1.e4 Quintiliano,R **1...e5 2.Nf3 Nc6 3.Bc4 Bc5** Jobava keeps avoiding the main theoretical lines, and this time he chooses the Philidor, which he has been playing with interesting regularity in the last 3−4 years. I never was a fan of this line, but I must admit that it's a solid opening, athough Black can stay passive and a bit cramped for some time **4.d3 Nf6 5.c3 d6 6.0−0 h6 7.Re1 0−0 8.h3** Some strong players like this setup with ♕e2 and ♖d1. **8...a5 9.a4 Be6 10.Bxe6 fxe6** Jobava faced this position against Najer in the Aeroflot and tried to hold the centre for some time. Now, he changes his strategy to give some more space to his pieces. **11.Be3 Bxe3 12.Rxe3 Qe8** White has a slight advantage, but this is normal in such positions, and compared to that game against Najer, Black is developing his pieces more easily. **13.Nbd2 g5**

[13...b6? 14.d4 exd4 15.cxd4−+ Nb4!? seems a good practical choice, although not so easy to calculate 16.Rc1 Rc8! 17.Qb3! Kh8! White needs this move to keep the attack 18.Rce1 Qf7 19.Nc4 Nd7]

14.Qb3 b6 This move seemed strange to me when watching the game, because Black is putting his own queen in the pin, but actually it is not bad, as is shown in the subsequent play. **15.Rc1** Natural, gaining the space. **15...Kh8 16.Nh2 Ne7 17.Qxe6 Rf7** Black has to find another way to develop the c8−bishop. **18.Ng4 Neg8 19.Qxe8 Rxe8!?** A brave decision, creating new weaknesses in Black's camp, but otherwise his position would be eternally cramped and passive, so this seems like an interesting practical attempt. **20.Rf3 Rff8 21.Nc4!** From here, the queen attacks b6 and helps to exert pressure in the f−file. **21...Kh7 22.Rf5 Kg6 23.f3 Ne7 24.Rxf6+?!** Demchenko prefers to finish his mobilisation instead of picking up material. **24...Rxf6** Black is trying to organise his defences and to keep material even, but his position is still difficult. **25.Nxf6! Kxf6 26.Ne3 Ke6**

27.d4 Black cannot avoid material losses now. **27...Rb8 28.dxe5!?** The position becomes very sharp, as White must sacrifice an exchange to keep the initiative. **28...dxe5!** The best practical chance, White keeps the advantage, but the position becomes very unbalanced. **29.Rd1! b5 30.axb5 Rxb5 31.Rd2 h5!** Jobava is fighting hard and finds the best moves to make his opponent's task difficult, which is not at all easy in such positions. **32.Kf2?** After this move Black starts to have real chances. White had two promising attacking choices. **32...h4!** Eliminating the dangerous knight which could go to e4 joining in the attack in many lines. **33.Ke2 Ng6 34.Kd3 Nf4+ 35.Kc2 Rb8!!** This sort of move becomes very clear when you see it played at the board, but it's also very difficult during a game! Black's pieces are away from his king but protecting all important squares around him at the same time! With this move Black supports b5 to disturb the b3−bishop, and frees the c5−rook which can be transferred to the kingside now without leaving the b6−pawn hanging. **36.Rd1 a4 37.Rd2?** For the first time in this game White makes a mistake, but Jobava is ready to seize this opportunity without giving any chances to his opponent. **37...Ra8 38.Kb1 Rb8** Now Black can mobilise his forces very rapidly, and it's practically all over. **39.Ka2 Rb3 40.Ng4 Rb8 41.Ka3? Ra8 42.Ne3 Ra5** This ends a very tense battle, but Jobava's fighting spirit and practical decisions were very impressive. [GM Grigor Grigorov]

(Diagram)

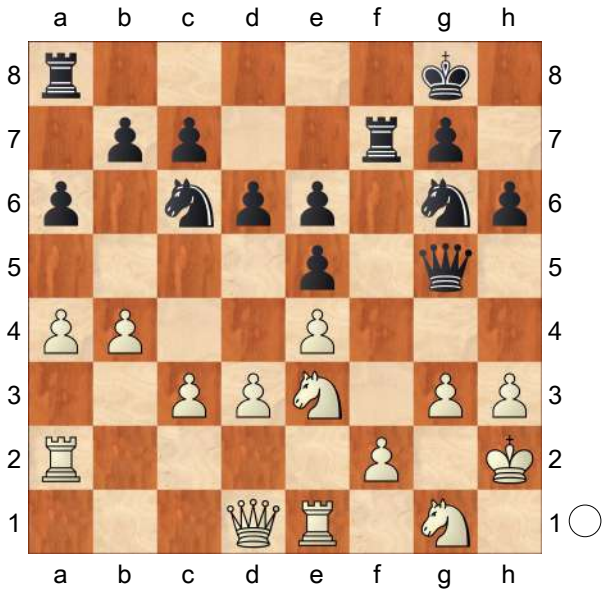
Now, we shall see a typical way of conducting the queenside play. In this position, Kobalia played **20.Qg4!**
As we know, in this structure, White always tries to exchange the queens.
20...Qxg4 It seems that Black has



nothing better than accepting the exchange.

[The attempt to keep the queens by playing 20...Qf6 is well met by 21.Rf1 preparing Ne2 followed by f2−f4.]

21.hxg4! Once again, we see this typical recapture which improves White's pawn structure. Now, the game becomes rather one−sided since Black is doomed to passivity. **21...Raf8 22.Kg2 Nce7 23.b5** Of course, White could have wasted more time on the preparation of this advance. In this position, however, starting out the queenside play is pretty logical since all black pieces are on the kingside. White has two ideas at his disposal − bxa6 followed by an invasion via the b−file or b5−b6 with the idea to ruin Black's pawn structure. **23...Ra8** Black is preventing bxa6 and threatens ... axb5 himself. **24.b6!** A very strong thematic idea by Kobalia. Now, every modification of the queenside structure is in White's favour. **24...c6** Now, the d6−pawn becomes vulnerable. Additionally, b6−pawn is a very important asset in the endgame. Pawns on the 6th rank blocked by opponent's pawn are called reserve passed pawns. Always try to have such pawns in the endgame.

[The alternative 24...cxb6 does not solve the problems either. For instance, White can follow with 25.Rb1 Nc8 26.Nc4 Nf8 27.Nxb6 Nxb6 28.Rxb6± when Black will have a hard time defending his weaknesses.]

25.Nc4 Rd8 26.d4! Provoking ...exd4 which would secure White's domination in the centre. **26...Nc8 27.a5** White has gained so much space on the queenside that every endgame will be winning for him. **27...exd4 28.cxd4 d5** Black is desperately looking for some counterplay. Having more space and superior piece activity, however, White is happy to open the position. **29.exd5 exd5 30.Ne5 Nxe5 31.dxe5!** The most precise recapture. Now, the central pawns would start rolling. **31...g5?** Makes White's task easier. White will carry out f2−f4 in any case. With a pawn on g5, however, White will be able to create two connected passed pawns. **32.Ne2** Besides preparing the advance f2−f4, the knight is also heading to the f5−square. **32...d4 33.Rc1?** A typical mistake for a blitz game which reduces the advantage. Later on, Kobalia managed to win anyway.

[White should have played 33.Nc1+− planning Nd3 followed by f2−f4. Probaby Kobalia was afraid of c5 34.Rc2 d3 Nevertheless, after 35.Rd1 Rfd7 36.Rxc5+− White is winning.]

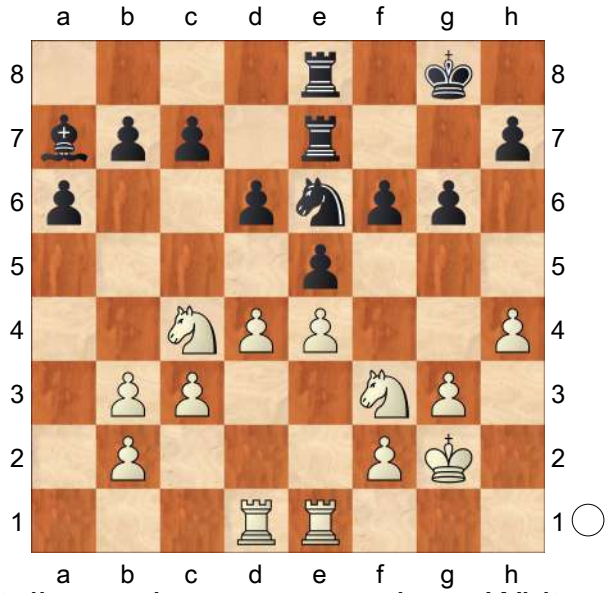
■ **Zajogin,Alexander** **2392**
Bundesliga 1314 (14.5) 05.04.2014
[GM Grigor Grigorov]



In Italian endgames, sometimes White releases the central tension by means of d4−d5. Such a decision is far from being one−sided. Black can already start thinking of creating his own play on the kingside. He can try to prepare the adavnce ...f5. In general, I recommend this approach only when you can follow with a quick expansion on the queenisde. The following short fragment taken from the game Saric − Zajogin is a good illustration of this idea. Saric went for **25.d5! Nc5 26.b4** We already know that having doubled pawns on the b−file is good for White only when the move b3−b4 can be played. In this particular case, the doubled pawns on the b−file are in White's favour. We are going to witness how Saric makes use of the semi−open a−file. **26...Nd7 27.Ra1** White starts immediately preparing the break b4−b5.

[On the other hand, before going for b4−b5, he could have dealt with Black's ideas on the kingside. A typical way to discourage the advance ...f6−f5 would be 27.h5!? when after f5 28.hxg6 hxg6 White has 29.Ng5 The knight is planning to occupy the weak e6−square. Now, we can see the point behind h4−h5 followed by hxg6. Black cannot challenge the stability of the white knight with the move .. .h7−h6. After Nf6 30.f3± White is clearly better. He can already proceed with his queenside play.]

27...f5 28.Nfd2

[Now, 28.Ng5? does not work in view of h6 29.Ne6 fxe4 when White's position is falling apart.]

28...Nf6 29.b5! This typical break marks the beginning of an interesting sequence in result of which White emerges with a slight advantage. **29...axb5 30.Nxd6 cxd6 31.Rxa7 fxe4 32.Nxe4 Nxe4 33.Rxe4 Rc8** In this slightly better rook endgame, Saric played **34.Re2?** which is too passive.

[Better would have been 34.Rb4 Rc5 35.Ra5 Rxd5 36.Raxb5 Rxb5 37.Rxb5 Kf7 38.Kf3 Ke6 39.c4± when White retains a slight edge.]

34...Kf7 35.Rd2 e4?! This is an inaccuracy. Black allows Rd4.

[After 35...b4! 36.cxb4 Rc4= Black does not have any problems.]

36.Ra5? Once again, White allows ...b5−b4 which was not played in the game. After mutual inaccuracies, Saric finally

managed to win the game. **36...Rc5**

[Bartel,M]

1.e4 Bartel,Mateusz Bartel,Mateusz Bartel,Mateusz: 'Bartel,M' **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5** This move, which was popular years ago, mainly due to Robert Fischer, is maybe not the best for White, but it certainly leads to very complex and interesting positions. That's why many players prefer 3...♗c5 − a calm Italian Game. **4...d5 5.exd5 Na5 6.Bb5+ Bd7**

[Of course, the most popular − and probably best − choice is 6...c6 , but the text has also been tried many times in the past. Still, I think it's a bit suspicious for Black.]

7.Qe2 Be7

[Another option is 7...Bd6 , but the bishop on e7 also makes sense − the queen will be in touch with the d5− square sometimes and from e7 the bishop can attack the knight on g5 more seriously.]

8.Nc3 0−0 9.0−0 Bg4 My preparation wasn't very deep in that line − I wasn't sure if my opponent would play 1...e5 and I also didn't expect that he would choose the ...♗d7 line. So, that's why during the game I forgot what I had checked earlier that day! **10.Qxe5!?**

[A very suspicious move − White's king is still in the centre, so it's probably not the safest idea to open the e−file for the black rook. However, during the game I couldn't find anything which would kill me immediately, so I decided to accept the gift. During the preparation my choice was 10.f3 which had been played in B. Socko−Naiditsch, Novi Sad 2009. At the board I remembered that idea, but I thought that bishop must be on d6 ...]

10...a6

[10...Bd6 is just mixing the move order after 11.Qe3 a6 12.Be2]

[It was interesting to play 10...c6!?

11.dxc6 Bd6 12.Qe3 bxc6
and now White should play the not very obvious *(12...Re8? 13.cxb7!)* 13.Ba4!? (which both players missed) with the idea: Re8 14.Nge4! Nxe4 15.Nxe4 f5? 16.Bb3+ and White is winning.]

11.Be2

[11.Bd3? would be a serious mistake, because the d3−square is a place for the queen. After Bd6 12.Qe3 *(12.Qd4* doesn't work because of *c5!)* 12...Re8 and White must put some piece or other on e4, what is certainly not a dream position.]

11...Bd6 12.Qe3 Re8 13.Qd3 Bxe2 14.Nxe2 After several more or less forced moves we got the crucial position of the game. My opponent blundered, which left his game almost lost.

14...Re5?

[Black should have played 14...Bxh2+! 15.Kxh2 Ng4+ 16.Kg1 Qxg5 17.Nc3 , but both players thought that this position is much better for White, since he is a pawn up and the mating threats aren't especially dangerous. The truth is a bit different, because with Qf4! Black makes 18.Qg3 necessary and the endgame after Qxg3 19.fxg3 Nc4 20.b3 Nb6 is very close to a draw and it has actually been played in 1985 in the game C. Herbrechtsmeier − J. Nunn.]

15.f4 Rxd5 16.Qf3 Now White is much better. He still has periodical problems with development, but it looks like the pawn is much more important. It is also interesting to notice that the so−called active pieces, the rook on d5 and the knight on a5, are slightly misplaced rather than dangerous. **16...Bc5+**

[At this moment, or one move later, Black probably should have tried 16...h6 , although after 17.Ne4 Nxe4 18.Qxe4 Bc5+ 19.Kh1 Qd7 20.d3 Re8 21.Qf3 Nc6 22.Bd2 White is simply pawn up, though there are still some technical problems.]

17.Kh1 Nc6 18.d3 Qd7 This position is probably very bad, but this move, after which the black rook will be in serious troubles, is surely hurrying the process. **19.Nc3 Nd4 20.Qd1 Rf5 21.Nce4 Bb6 22.c3** Finally, White has made progress and now things are getting much quicker. **22...Ne6 23.Nxf6+ Rxf6 24.Ne4 Rf5 25.Ng3!** The white position is much better and there were also other good moves, but I like the way I played the last part of the game − surprisingly White managed to create a dangerous attack! It is also funny to notice that the white bishop on c1 is better developed than the bishop on b6, which has already made 4 moves! **25...Rd5 26.f5 Nf8**

[Of course, you can't play 26...Rxd3 27.fxe6 Rxd1 28.exd7 , because the rook on f1 is protected.]

27.d4 c5 28.Qg4 Kh8 29.Bh6! Quite a simple move, but also quite pretty and what is the most important − simply the best. It was also possible to begin with 29.♘h5. **29...f6**

[29...gxh6 30.Nh5 f6 would lead to the same position.]

30.Nh5 gxh6 Bartel,Mateusz: 'Bartel,M: 'would lead to the same position.''

31.Nxf6 Qf7 32.Nxd5 Qxd5 33.Rae1 The black king is very weak, White has active pieces and strong pawns − so the rest must be simple. **33...Qf7**

[During the game I was a bit upset

that my opponent didn't play 33...Nd7 , because the game would finish brilliantly after 34.f6! Rg8 35.f7! Rxg4 36.Re8+ Nf8 37.Rxf8+ Kg7 38.Rg8# with a very elagant mate!]

34.f6 cxd4

[After 34...Bd8 White had another nice trick: 35.Re8!]

35.Re7 Qg6 36.Qf3 Bd8 37.Qxb7 dxc3 38.Qxa8 and Black resigned.

Maastricht Complete Chess m (4) 6.3.08
[L'Ami,Erwin]

From 3 till 6 March Daniel Stellwagen and yours truly played an advanced (computer assisted) chess match in Maastricht. In games 3 and 4 the moves 1.e4 e5 2.♘f3 ♘c6 3.♗c4 ♘f6 4.♘g5 were obligatory. This is the fourth game which was most exciting of all. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3!?**

[The third game, in which I had White, continued with the classical 8.Be2 h6 9.Nf3 e4 10.Ne5 Bc5 11.c3 Bd6 12.d4 exd3 13.Nxd3 0−0! 14.0−0 Re8 and it was suprisingly difficult for White to move;

A) 15.Nd2 Bf5 (threatening ♖xe2!) 16.Ne1 Qc7 17.Nef3 Rad8 looks really bad.;

B) 15.Bf4 Bxf4 *(15...Rxe2!? 16.Qxe2 Ba6 17.Qd1 Bxd3 18.Qxd3 Bxf4 19.Qxd8+ Rxd8 20.Na3* is another option. *)* 16.Nxf4 Qxd1 17.Rxd1 *(17.Bxd1 Ba6∓)* 17...g5 18.Nh5 Rxe2 19.Nxf6+ Kg7 20.b4 Kxf6 21.bxa5 Rb8 with a clear advantage in the endgame.;

C) 15.Be3 Qc7 16.h3 *(*forced, because *16.g3* runs into *Bh3 Δ17.Re1 Rxe3! 18.fxe3 Bxg3* winning. *)* 16...Bf5 17.Bd4 *(*or *17.Na3 Bxa3 18.bxa3 Rad8 19.Bd4 Nd5* and White is on the verge of complete collapse. *)* 17...Ne4 18.Nd2?! D) 15.b4 Nc4 16.Nc5 Ne5 17.Nd2 Nd5 18.Nce4 Bc7 19.Re1 Bf5 after which I was lucky to escape with a draw, l'Ami−Stellwagen, Maastricht Advanced Two Knights 2008. It seems that 13...O−O followed by ♖e8 is a much stronger concept then trying to prevent White from castling with 13...♕c7 which was previously played.]

8...Ng4!?

[After 8...Nd5 White´s idea was to continue 9.Nf3 Nf4 10.0−0 with advantage. Instead Black should continue 9...♗d6 with reasonable compensation. I was, however, in a more aggressive mood.]

[Golod,Vitali]

This is my second encounter with Evgeny over the chess board (before this round, we each had 3/3). It's interesting to know, that our first game was on the same day (July 21st) 4 years ago, and then the youth won. **1.e4** Golod,V **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.0−0 a6 7.Bb3 Ba7 8.Be3 Bxe3 9.fxe3 0−0** Amazing, that I made this move practically without thought :) **10.Nbd2 d5** It was more logical to prevent "a5" with: **11.exd5 Nxd5 12.Qe2 h6 13.Rae1**

[13.d4 exd4 14.Bxd5 Qxd5 15.exd4 ΔBd7 16.Qe4 Qxe4 17.Nxe4 Rae8 18.Nc5= =Bc8 19.Rae1]

13...Be6 14.d4 exd4 15.exd4 Re8 16.Qf2!? Golod,V: 'Golod,Vitali: '*'' White manages without the traditional "♔h1" and immediately starts an active movement on the kings side. But on the "g1" square, when possible, the king falls under ⇗a7−g1 threats. **16...Nf4!N 17.Bc2** The knight left the "d4" square weak, and White will have difficulties adding him in the attack on the king side. **17...b5** Now it's time to put the bishop on that diagonal. **18.b3 Rb8!?** The hardest move in the game. I was also thinking about: **19.Ne4 Bd5** I needed this rook

on the ⇔c file. **20.Nh4 Ng6!?** Now the white rook left for the king side, this move wins actually. However, after the exchange of the knights, White has less pieces for attack. **21.Nxg6 fxg6 22.Nc5 Qg5?! 23.h4± Qg4** Golod,V: 'Golod,Vitali: '!?'' 1.e4 Macieja **1...e5 2.Nf3 Nc6 3.Bb5 Nf6 4.d3 Bc5 5.c3 d6** Too solid or ... too passive. The only correct answer is
[5...0−0 with the possible pawn sacrifice 6.Bxc6 bxc6 7.Nxe5 d5 with compensation.]
6.d4! It seems like White has lost a tempo, but in fact Black is already in serious troubles. **6...exd4**

8...Bxd2+ 9.Nbxd2 Bd7
[During the game I considered 9...0−0 to be more challenging, but probably my opponent was not pleased with my possibility of 10.Bxc6 *(10.0−0 Ne7* gaining a tempo *)* 10...bxc6 11.Qc2 , although after 11...♗a6 things are not so simple.]
10.0−0 0−0
[Perhaps 10...Ne7 was more precise.]
11.Re1 The main battle in such structures is for the e4−square. If Black manages to play ...d5, e5 ♘e4, his position significantly improves. If he fails, the whole position becomes much worse. **11...Ne7 12.Bf1!** It is well known that this is a great place for the white bishop. The bishop is not disturbing other pieces, is not coming under attack (♘f4), it defends its king and may enter the battle, whenever it is needed. **12...c6**
[I expected 12...Ng6 13.h3 Re8 with clear advantage for White.]
13.b4! That's the right plan. White

controls the centre and has already gained some space advantage. The minority attack will create more problems for Black. **13...Bg4?!** It is difficult to recommend something concrete instead, but still I don't like this move. It is true that Black is suffering from a lack of space, and thus exchanges are helpful, but without the bishop the white squares will become very weak. **14.h3 Bxf3 15.Qxf3 a5** Forcing action. Otherwise White continues his plan, slowly leaving Black less and less air to breathe. **16.b5!**

[Tempting 16.bxa5 Qxa5 17.Nc4 Qc7 18.Nxd6 Qxd6 19.e5 doesn't work due to Qd5]

16...cxb5 17.Bxb5 Qb6?!

[18...dxe5 19.dxe5 Nfd5 20.a4±]

19.a4! The simplest. **19...dxe5 20.dxe5** Macieja: '±' White has a clear advantage due to his better pawn structure and the strong bishop. **20...Nc7 21.Bc4**

[Probably 21.Bd3!? with multiple threats was more precise. I wanted my bishop to put pressure along the important a2−g8 diagonal.]

21...Nc6 22.Qe4 As the black knight has been moved far from his king, White starts regrouping his pieces, aiming for an attack. **22...Nb4?!** This is an important tempo. Black was afraid of ♗d3 fatally weakening the position around Black's king. However I believe ...♖ad8 was correct. **23.Nf3 Ne6**

[23...Qc6 was possible, but every ending is very tough for Black due to the bad pawn structure and the dominating white bishop.]

24.Rad1 Rad8 25.Bxe6 fxe6

[Probably the last chance was to search for a draw after 25...Qxe6 White can simply win a pawn or continue 26.Ng5 Qg6 *(26...Qh6 27.Nxf7! Kxf7 28.e6++−)* 27.Qxg6 with a clear advantage.]

26.Rd6! A typical pawn sac, but always pleasant.

[White could have played 26.Rxd8 Rxd8 27.Ng5 g6 28.Qh4 Rd7 with a clear advantage, but 26.♖d6 is even stronger.]

Already a novelty according to ChessBase, but this feels like a critical

test of White's fairly slow last. **11.Bc2 Re8 12.Nf1** This was presumably the rising Spanish star's idea. It looks like Black may come under pressure down the d−file, while finding himself with a dead point on e4, but the experienced Kotsur reacts well. **12...d5!? 13.exd5 Bxd5!** Reminding White that he'll need to keep an eye on e5. **14.Ng3 Qd6**

[14...Bc5!]
15.Qe2 Rad8 16.b4 I haven't been able to find a better plan for White, but Black is able to hold his own on the d−file.
[but 16.Ne4 remains the critical move. We've covered this on plenty of occasions, but the trap]

[19.Ra3 , as Be6?! 20.Qf3 Bd5?! 21.Ne4 Nxe4 22.dxe4! is not what White wants to be doing. A new move for us and quite a rare one in practice. White has to avoid Bc4?! 23.Nf5 ,]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 0−0 This is main position for the 5 d3 variation. Here Black cannot really refrain from castling.

[The old idea of 6...a6 7.Bb3 Ba7 8.Nbd2 h6?! intending ...g7−g5 has one major defect: Black will not manage to create an attack, but instead will just weaken his own position, e.g. 9.Re1 g5 10.Nf1 g4 11.N3d2 Nh5 12.Nc4 Nf4 13.Be3 b5 14.Na3 Qf6 15.Bd5 Bd7 16.Nc2 Bxe3 17.Ncxe3 h5 18.a4 and White had the advantage in D.King−V.Hort, Dortmund 1988.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.a4 We are giving the old Italian a new lease on life. White should not worry about ♘a5 possibility no more and later will intend to grab some space on the queenside. **5...a6** The most natural reply. It frees up the a7 square for the bishop and avoids the weakening of b5, which could have happened in the alternative 5...a5. **6.0−0 h6** Keeping it simple, just closing all kinds of ♗g5 lines this way. Now all the battles will be going on the center and queenside. **7.c3 d6 8.Nbd2 Ba7 9.Re1 0−0 10.h3** Obvious standard moves by both sides finished. Now Black has to settle the future of his c8 bishop. **10...Re8!?** This position can be reached from many move orders, like usually in the Italians. I suggest this line because handling this position is pretty easy; the moves are relatively straightforward. Both players made the most natural moves. Black wants to trade White's light−squared bishop with Be6 but does not wish to have the structure with fxe6. Blacks' main idea after Be6 to prepare well for the d6−d5 push. After Bxe6 Rxe6, the rook on e6 is pretty good. He can transfer to g6 at some point after d6−d5 dxe4. He can play ♖d6 as well. The 10... ♖e8 variation is one of the most reliable ways for black to go.

[10...Be6 11.Bxe6 fxe6 12.b4! which would lead to strategicaly more complecated position where probably white has more chances to take advantage.]

11.Qb3!? Intriguing attempt as White is trying to provoke some miscoordination of blacks pieces and stop the ♗e6 move for the moment. Chigaev is the specialist in this variation.

[11.b4 The main line which we will cover in the forthcoming games.]

11...Qe7 The most natural move. It overprotects the f7 pawn and threatens ♘a5.

[11...Qd7?! is just an artificial move. 12.a5 b5?! 13.axb6 cxb6 (Chigaev−Nakamura, Chess.com 2022) 14.Bxa6! White can simply take the pawn. Na5 15.Bxc8! And this is an important tempo. The queen is misplaced on d7, thus 11...♕e7 is

12.a5!? The point of White's strategy is that the a5 pawn ensures some space advantage which could be unpleasant in some endgames. **12...Rb8** Simple and instinctive move. The engine's best suggestion is active breaking with 12... b5, willing to sacrifice a full pawn.
[12...Nd8?! A bit passive. 13.Nf1 Be6 14.Be3 Bxc4 15.Qxc4 Bxe3 16.Nxe3 Ne6 17.d4± Chigaev−Esipenko, Wijk aan Zee 2019]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 The Evans Gambit is a very interesting weapon against Black's opening setup. It was used by most of the best players of the 19th century, and also some World Champions, including Steinitz, Lasker, Alekhine and even Fischer and Kasparov. Nevertheless, it's a rare guest in modern tournament practice. **4...Bxb4 5.c3 Bd6** This idea was introduced by one of the best players of his time, McDonnell, in 1834. Black supports the centre and aims to save time for fast development of the kingside. However, the move has an obvious drawback− normal development of the queenside is prevented, in particular Black can't play ...d6 to develop his light−squared bishop. If we consider modern top players we see that only Grischuk was ready to make this "anti−positional" move. It's curious that Petrosian, who plays the Evans Gambit quite often, used this system when he faced it with the black pieces.

9.Nbd2 Re8 10.Qb3

[10.Bd3 , which used to be the main line, occurred in Sermek, D− Mikhalchishin, A/Bled SLO 2002/ [Paul Motwani]. In that game Black solved his opening problems easily

and so White started to look for improvements.]

[White also tested 10.Bb3 , which was met by Rybka's b5!? with the idea of challenging White's centre by means of ...b4, though after 11.a4 b4 12.Nc4 bxc3 13.dxe5 Bxe5 14.Nfxe5 Nxe5 15.Nxe5 Rxe5 16.Bf4! White develops a serious initiative.

B) 16...Re7 17.e5 Ne8 18.Qd3 with a strong initiative for a pawn in Short, N (2712)−Sokolov, I (2690)/ Sarajevo 2004.]

10...Re7!? Only this move is a novelty.

[In the only preceding game Black played 10...Qe7 11.Bd3 Na5 *(11...Rb8!?* with the idea of ...b5−b4 was interesting. *)* 12.Qa4 *(12.Qc2!?)* 12...b6 13.Nf1 Bb7 14.Ng3 Felgaer, R (2593) −Harikrishna, P (2646)/Dos Hermanas 2005 and here Black missed a chance to challenge White's strategy with exd4! 15.e5 *(15.Nf5 Qf8 16.Nxd6 Qxd6 17.e5 Qc5 18.cxd4 Qc3 19.Qa3 Qxa3 20.Bxa3 Bxf3 21.gxf3 Nd5∓; 15.cxd4?! 11.Nh4? This aggressive approach is wrong. Probably White underestimated Black's reply.

[11.Bd3 is safer, hoping to get long−term compensation for a pawn.]

11...exd4! 12.Nf5 dxc3! The point of the previous move. Black sacrifices an exchange for three pawns and obtains the better chances. **13.Nxe7+?!** This natural move is dubious. White should have kept the option of Nxd6.

[13.Nf3 was better. b5 *(13...Ne5 14.Qxc3!* with compensation. *)* 14.Nxe7+ Qxe7 15.Bd5 *(15.Bxb5? Rb8−+)* 15...Ng4 16.h3 Nge5 17.Nxe5 Bxe5 18.Be3 with a complicated position.]

15.Nd4

[15.Qxc3 Nxf3+ 16.Qxf3 Qe5 17.Rb1 Qxh2+ 18.Kf1 Be5∓ is also better for Black.]

15...Bc5 Volokitin wants to keep the dark−squared bishop.

[Another way to do so was 15...Bb4!? This time Black also protects the c3−pawn.]

16.Nf5 Qf8 17.Be3 d5 An interesting, but probably not the best continuation.

[17...Nfg4!∓ would be more unpleasant.]

18.exd5? After this mistake White is in trouble.

[I see no reason to avoid 18.Bxd5

For example, Bxf5 19.exf5 Nd3 *(19...c6 20.Qxc3 Bb4 21.Qxe5 Bxe1 22.Bf3* with compensation for a pawn. *)* 20.Re2 Nxd5 21.Qxd5 Rd8 22.Qc4 Qe7 23.f6 Qe5 24.Rd1 Bd6 25.Qh4 and White is still in the game.]

18...Bxf5 19.Bxc5 Qxc5 20.Rxe5 Be4! Now Black is threatening ... Ng4. **21.h3 c2∓** As a result of the tactical battle Black obtained two pawns for an exchange, while the d5−pawn is weak and the c2−pawn is very strong. So Black's advantage is already beyond question. **22.Rc1 Rd8 23.Bd3 Qd4! 24.Rxe4 Nxe4 25.Qxc2 Nxf2 26.Bh7+ Kh8 27.Qxf2 Qxf2+ 28.Kxf2 Kxh7 29.Rxc7 Rxd5 30.Rxb7** Another series of forced moves led us to a rook endgame with an extra pawn for Black, in which Black's chances to win are equal to White's chances to save the game. **30...Rf5+**

[If I remember well 30...Rd2+ 31.Kf3 Rxa2 32.Rxf7 leads to a drawish position.]

31.Ke3 a6! 32.Ra7 a5 Black kept an extra pawn, though his win is not yet guaranteed. **33.g4**

[33.a4!?]

33...Re5+ 34.Kf4 f6 35.a3? A serious mistake in mutual time trouble. White loses another pawn. **35...Rc5! 36.h4**

36...Rc4+ 37.Kf5 Ra4 38.h5 Rxa3 39.Ke6 Re3+ 40.Kf5 Ra3 41.Ra8 Ra1 Black's winning plan is to advance the a−pawn to a2 threatening a check. This will force White to bring the king to g2 and then Black brings the king to the kingside and wins. **42.Kf4**

[White's only practical chance is 42.Ke6 with the idea of Kf7 and Rg8 and thus trying to fight against Black's plan.]

42...a4 43.Kf3 a3 44.Kf2 a2 45.Kg2 g5! Freeing the king. [Postny,E]

This season of the Greek team championship went successfully for my team from Heraklion and for me personally. The current game was the only one where I was in real danger of losing. **1.e4** Postny,Evgeny Postny, Evgeny Postny,Evgeny: 'Postny,E' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** My opponent is in an aggressive mood! **4...Bxb4 5.c3 Be7** I've played even the weird 5...♗d6 before, but in the current game I chose the more healthy line. **6.d4 Na5**

[6...exd4 7.Qb3 Na5 8.Bxf7+ Kf8 9.Qa4 Kxf7 10.Qxa5 has appeared numerous times in practice with a murky position, but I didn't want to play with an unsecured king.]

7.Bd3

[Another theoretical line goes: 7.Nxe5 Nxc4 8.Nxc4 d5 9.exd5 Qxd5 10.Ne3 and here Black can choose between 10...♕a5 and 10...♕d8, both are fairly safe.]

[7.Be2 is a more common retreat. Here is the latest example: d6 8.Qa4+ c6 9.dxe5 dxe5 10.Nxe5 Nf6 11.0−0 Qc7 12.Nf3 0−0 13.Bg5 Re8 14.Nbd2 b5 15.Qc2 h6 16.Bh4 Nh5 17.Bxe7 Rxe7= ½−½ (19) Kurmann,O (2412)−Godena,M (2525) Switzerland 2014]

7...d6 Typically giving back the pawn and completing the development.

[After 7...exd4 8.cxd4 White has fine compensation.]

8.dxe5 dxe5 9.Nxe5 Nf6 10.0−0 0−0

11.Qc2 Black's structure is superior, but White is hoping to get some play on the kingside.

11...Qd6!?N The only thing I knew that this is the first choice of Houdini, so decided to give it a try. The queen is awkward in the centre, but the idea is concrete − to kick away White's active minor pieces.

[It is worth considerating the advance of the b−pawn: 14...b5 15.e5 Nd5 16.Ne4 b4 but that's an option for the next game.]

15.e5 Nd5 16.Ne4 Defending ♙c3, now the threat 17.♘d4 is annoying.

16...Nb4?!

[16...Bf5 was critical and seems satisfactory for Black. However, it was practically impossible to calculate the spectacular variations that could follow.

The variation could be continued, but to sum it up: Black holds, but is under pressure and has to find a bunch of strong defensive moves over the board.]

17.Qb1 Bxa2? I realised that it's a very risky business, nevertheless decided to be consistent. Objectively, it was necessary to go back with knight, admitting the mistake.

[17...Nd5 18.Nd4 Qb6 and still nothing disastrous has happened to Black's position.]
[17...Nxa2? 18.Neg5 Bxg5 19.Nxg5+−]

18.Rxa2 Nxa2 My knights are horribly far away from the kingside. **19.Bg5?!** I was concerned about this move and was quite pessimistic at this moment about the outcome of the game.

[19.Neg5! was natural and, actually, strong, but deep calculation was required. Bxg5 20.Nxg5 Nxc1 21.Qxh7+ Kf8

A) 22.Rxc1? Qh6 23.Qf5 Qg6 24.Qxg6 *(*White should avoid the exchange of queens and play for the initiative by *24.Qf4!* However, in this case the matter is far from clear, the rook on c1 is misplaced and can fall prey the knight move ♘a5−b3 at some point. *)* 24...fxg6 25.Ne6+ Ke7 26.Nxd8 Rxd8=;

B) 22.Bh5! Both players underestimated this resource.

20.Nxc3 Bxg5 21.Nxg5 Qg6

From the material point of view Black is doing fine, but White's initiative is still the main factor in the position.

22.Nce4?! From a human point of view it's logical for White to keep queens on the board, at least for a while. However, actually now it was the most appropriate moment to swap queens.

[22.Qxg6! hxg6 23.f4 The march of the f−pawn yields White an overwhelming initiative, his pieces are ideally placed. For instance: Rd2 *(23...f6 24.Ne6 Rd2 25.Bf3* is also bad for Black. *)* 24.f5 Rf8 *(24...gxf5 25.Rxf5 Rf8 26.e6+−)* 25.fxg6 fxg6 26.Bf3 c6 27.e6+−]

22...h6 23.Nf3

[23.Bh5?? If your engine is switched on, you will laugh at this, but during the game I wasn't 100% sure that I don't get mated here. My opponent also spent a lot of time, calculating the following variation: Qxh5 24.Nf6+ gxf6 25.Qh7+ Kf8 26.exf6 *(26.Qh8+ Ke7 27.Qxf6+ Ke8 28.e6 hxg5 29.Re1 Nc6 30.exf7+ Kf8−+)* 26...Qxg5 27.Qh8+ Qg8 28.Qxh6+ Ke8 29.Re1+ Kd7 30.Qh3+ Kc6 31.Qc3+ Kb6 32.Rb1+ Ka6−+ The king escapes!]

23...Nc6 I was sure that it's necessary to bring the knight into play as soon as possible. The engine's preference 23... ♖d5!? is something which I didn't even consider. **24.Bc4**

FIDE World Cup (2.3) 04.08.2023
[Ponomariov,Ruslan]

I don´t really believe in luck in chess. But the World Chess Cup is a tricky event when you need to focus during long period and one mistake can bring you back home. I was among top−50 and didn´t need to play the first round. On the paper due higher rating and more experience I should be a favorite in the 2nd round. However match was very difficult for me. My opponent was much better prepared at the opening stage and I was spending much more time to solve problems. Finishing both this game with a draw actually was not so bad result for me in such circumstances. Now everything should be decided on tie−break. I was a bit nervous if I would be able to solve problems with shorter time control and create some chances with white... Ich glaube nicht wirklich an Glück im Schach. Aber der World Chess Cup ist eine schwierige Veranstaltung, bei der man sich über einen langen Zeitraum konzentrieren muss und ein einziger Fehler einen zurückwerfen kann. Ich war unter den Top−50 und brauchte die erste Runde nicht zu spielen. Auf dem Papier sollte ich aufgrund meiner höheren Wertungszahl und mehr Erfahrung als Favorit in die zweite Runde gehen. Das Match war jedoch sehr schwierig für mich. Mein Gegner war in der Eröffnungsphase viel besser vorbereitet und ich verbrauchte viel mehr Zeit, um Probleme zu lösen. Dass ich beide Partien mit einem Remis beendete, war für mich unter diesen Umständen gar nicht so schlecht. Nun sollte alles im Tie−Break entschieden werden. Ich war ein wenig nervös, ob ich in der Lage sein würde, Probleme mit kürzerer Zeitkontrolle zu lösen und mit Weiß einige Chancen zu schaffen... **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 a5 7.Re1**

[Wei Ming]

To discover more about the chess truths of the Colman Variation, the author of "Surviving Changi: E.E Colman − A Chess Biography" Olimpiu G Urcan has sponsored a thematic correspondence chess tournament. With his kind agreement, I have included some of

these games in the sub−notes, with some analysis from his article in NIC Yearbook 86. **1.e4 e5 2.Nf3 Nc6 3.Bc4** It seems to me that many GMs have chosen 3.Bc4 as an alternative to the stoic Ruy Lopez. After 3..Bc5, they employ the Evans Gambit which no less then Nigel Short has successfully promoted in recent months. Flipping through the recent publication "Dangerous Weapons 1.e4 e5", I can foresee that the Max Lange Gambit/ Attack will feature more often in the future! **3...Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3** Just a small anecdote to share, when I was 12, I played in the World Disney's U−12 Rapid Chess Tournament which was eventually won by an imposing French IM by the name of Etienne Bacrot. I vaguely remembered a young Indian boy sitting next to me bashing out the opening moves in this variation. On that occasion, White played

[8.Be2 and he continued blitzing the following moves with impressive speed and poise: h6 9.Nf3 e4 10.Ne5 Bd6 11.d4 exd3 12.Nxd3 Qc7 13.h3 0−0 and won the game with a barrage of tactics. Since then, 13 years have passed and Ganguly has remained loyal to the 2 knights' defence which has undoubtedly served him well over the years.]

8...Rb8! There are many alternatives at this juncture but I firmly believe this move, signifying the Colman Variation guarantees ample counter chances for those looking for a good old fashioned hack! **9.Bd3**

[9.Bxc6+ as explained by Tony Kosten in Vallejo−Inarkiev Khanty Manyisk 2007 (See Archives) is "dodgy" and the Colman Cup certainly seems to reveal so. Please see Demian−Oprisor & Mathe−Demian, E. E Colman Cup 2007 in this update.]

9...h6 Both Urcan and A.C Van Der Tak regarded this move as inferior to it's alternatives due to an old game by Van Der Wiel. However, Ganguly came prepared with a new idea in mind.

[9...Bd6 as indicated by Urcan can be a real hassle for White to meet. Just watch how a 2305 rated player went down without any resistance:

A) 10.Bf5?! h6

A2) 11.Ne4 Nxe4 12.Bxe4

12.Bb2 Bg7 13.Qg3 0−0!?N Sacrificing a second pawn for some open lines for his rooks and active squares for his pieces.

[13...Nf4 was played in the afore mentioned game which effectively reduced the entire variation to the theoretical bin...at least for 3 years. 14.Qxf4!! 14.Bxe5 There seems to be nothing better. Any other moves would not be able to deter Black from launching an attack anyway so White might as well grab a pawn for what it's worth.

[14.Nbc3 f5 15.Nc5 Qe7 16.N3a4 g5!]

[14.Ba3 allows an intriguing exchange sacrifice that seems to promise excellent counter play. f5!? *(* In view of the outcome of the variation below, Urcan suggested *14...Nb4!?* again making use of the b8 rook. *15.0−0 f5 16.Nc5 Kh7 17.Nc3 Qd6* with definite compensation. *)* 15.Bxf8 Qxf8 16.Nec3 Nf4 *(16...Kh7!?)*

This line really demonstrates the spirit of the Colman Variation which was why I included it in the first place despite it ending in White's favour. Even though 18.Qxd3!! is objectively a far superior move, I've presented this as a sideline as it's really hard to believe anyone would have dared to enter it without any computer assistance.;

B2) 18.cxd3?! Qd6 19.Nbc3 Ba6 20.Nc1 c5⩲ with compensation and certainly, Black is having all the fun.]

14...Bxe5 15.Qxe5 f5!? In view of White's alternative on the next move, I am tempted to give this move a question mark but it worked perfectly well in the game.

16.Qxb8 White again takes up the gauntlet and plays the most critical move in the position. However, the move

[16.Nd6! comes into serious consideration not least because it avoids all the harrowing lines after the text and also maintains a certain degree of control in the center. 16...fxe4 17.Bxe4 Qe7?

B) 18.Qxa7 Qxa1 19.0−0 Qe5 20.Bxg6 Nb7 with the assessment "unclear" just about right. Rybka

prefers White's pawns to Black's extra piece but anything can happen in such a wild position.]

18.0−0? I'm not sure what deterred Zhang from playing the natural

[18.f3! cementing the bishop on the e4 square and clogging up the e−file. Here are some sample variations: Nf4

A) 19.0−0?? which loses to Qg5 20.g4 *(20.g3 Qc5+ 21.Kh1 Bh3!)* 20...Qc5+ 21.Kh1 Ba6!−+;

B) 19.d4!! certainly not the most obvious of solutions. White must definitely avoid the move 19...Nxg2+ 20.Kd2 *(20.Kd1* can be met with the simple tactic *Qxe4!* with the idea *21.fxe4 Bg4+* winning the queen back. *)* 20...Qg5+ 21.Kc3 Qe3+ 22.Bd3 and White should definitely be winning here.]

18...Nf4? Quite an inexplicable move to explain when there is an alternative as tempting as

[18...Qxe4 simply snatching a piece. 19.Qxa7 Nf4 *(19...Qg4!?)* 20.f3 Nb7! wishing for 21.fe4 Ne2+ is too much to hope for but this is still a nice move, nonchalantly leaving Black's queen en prise. 21.Nc3 Qxc2 22.Qe3 leaves White with 3 pawns and a rook for Black's 2 minor pieces but there is still a game to be played after g5]

19.Nc3? White's queen is surprisingly trapped after this move.

[19.Re1! would have presented Black with fresh problems to think about. Bg4 20.Qxf4! *(20.Bd5+ cxd5 21.Rxe7 Rxb8 22.Rxa7 Nc6 23.Ra4!±)* 20...Rxf4 21.Bd5+ Be6 22.Bxe6+ Kg7 23.Nc3± and White has 3 pawns, a bishop and a rook for Black's queen and more importantly, White has finally gotten all his pieces to reasonable looking squares!]

19...Bg4 Queen trapped! **20.Qxf8+ Kxf8 21.Rfe1 Qd6** Black has a slight material advantage but Zhang manages to hold the position with admirable accuracy. **22.Re3 Qxd2 23.h3 Ne2+ 24.Nxe2 Bxe2 25.Bxg6 Nb7 26.Be4 Nd6 27.Bd3 Qc3 28.Rc1 Qd2 29.Ra1 Qc3 30.Rc1 Qd2 31.Ra1** Summary: I really don't think Ganguly's idea stands up to the test of the engines and White should ultimately stand better. However, no one can deny the line with 9..h6 and 13..0−0 is a lot of fun for the second player and is perfectly viable at club level. For a more solid and yet equally aggressive option, I highly recommend 9..Bd6 where there still remains much scope for creativity.

Jensen, Borup 2010 − an example of someone slowly outplaying a lower−rated opponent from a pretty level position.]

11...dxe4 12.dxe4 Nh5 13.g3 Qd7?! By attacking the h3−pawn, Black is trying to induce a weakness on the kingside, either by g3−g4 (which will obviously be answered by ...Nf4), or h3−h4 leaving the g4−square weak. But White's reply is both obvious and good.

[13...h6 (Tiviakov−Buhmann)]

[and 13...Nf6 (Howell−Mchedlishvili) are covered in the book.]

14.Ng5! White avoids weakening his position and, even better, forces the exchange of Black's light−squared bishop. I'm pretty sure Bindrich was aware of this possibility, but he probably believed that the opening of the f−file would provide sufficient compensation. Often it does, but I feel that in this case it doesn't. **14...g6 15.Ne3 Rad8 16.Ng4!** Excellent play from Howell.

There's no rush to exchange on e6, as the bishop isn't going anywhere. White just slowly improves his position first.
[Even so, I feel White is a bit better even after 16.Nxe6 fxe6 *(*or *16...Qxe6 17.Bb3 Qd6 18.0−0)* 17.0−0]
16...Qe7
[Clearly Black has to avoid 16...f5? 17.Nxe6 when recapturing on e6 loses the queen.]
17.Nxe6 Only now does White exchange, with Black threatening to retreat the bishop. **17...fxe6**
[After 17...Qxe6 18.Bh6 Ng7 19.Bg5 Black has weakness on both his light squares and dark squares.]
18.Bh6 Rf7 Positionally White is doing very well (two bishops, well placed pieces, better structure, weak black kingside, etc). Black's counterplay lies in the fact that White can't castle at the moment and Black's rooks both have decent open files. There are also tactics on f2. However, with careful play White can neutralize Black's apparent activity, after which his positional trumps should be overwhelming. **19.Rd1!?**
[19.0−0?? is impossible because of Nxg3]
[but 19.Rf1! covering f2 looks good. White's plan is Bd2 (threatening Nh6+) followed by 0−0−0 with a clear edge, and it's difficult to see where Black's counterplay lies. Rd6 20.Bd2 Rf8 21.0−0−0 b5 22.Bh6 Rfd8 23.h4 etc.]
19...Rd6
[Good or bad, I feel Black should have gone for the complications of 19...Bxf2+ 20.Nxf2 Nxg3 21.Qg4 Nxh1 22.Nxh1 White is still better here, and maybe much better, but at least Black has managed to unbalance the position to some extent.]
20.Rd3! Protecting g3 and thus enabling castling. Now White is positionally winning and Howell makes no mistakes converting his advantage. **20...Rxd3 21.Qxd3 Kh8 22.0−0 Ng7 23.b4 Qd6 24.Rd1!** There's no need to be afraid of a queen exchange. **24...Ne8**
[After 24...Qxd3 25.Rxd3 Kg8 26.Bb3 and Black is running out of moves.]
25.Bb3 Qe7 26.Qc4 Rf3 27.Qxe6! Qxe6 28.Bxe6 Nd6
[Or 28...Rxg3+ 29.Kh2 Rxc3 30.Rd7! (threatening Nf6 or Rf7) Rf3 31.Kg2 winning.]
29.Ne3 Nxe4 30.Rd7! A nice win by David Howell. 13...Qd7 allowing 14 Ng5 doesn't look like a good idea for Black here.

[I think White has very good chances just to play on: 17.Qh6!? Nc2 18.Bxd8 Qxd8! *(18...Nxa1?? 19.Bf6+−* White has ♕h8 as a big threat but also then just let the h−pawn run....! *)* 19.Nbd2 The thing is that Black actually just loses when he takes back the exchange on a1. After ♖xa1 White is really about to play ♘e4−♘f6, while also the h−pawn is extremely dangerous for Black. Ba5! Black's only move to keep the balance! *(19...Nxa1? 20.Rxa1 Ba5 21.Rc1!+−)* 20.Ne4 Nxa1 21.Rxa1 Now White's ♘e4 is bound to his c3−pawn Bd5 22.Qh7 Bxe4 23.Qxe4 Now Black again has just one move!!

Qf6!! not easy to see! This move should bring equal play for Black. *(23...Bxc3??* is simply lost for Black after *24.Rd1!* Now c4 and d3 are just falling. *Bxg7 25.Qxc4*+− d3 will fall and White has also this extra pawn and his majority on the kingside. *)* 24.Qxc4 Qxg7 25.g3 Qxc3 26.Qxc3 Bxc3 27.Rc1 Ba5 28.Rd1 Rd8 29.h4 with a very complicated position. White can maybe try to push the h−pawn and to bring his king to Black's d3−pawn. Let's take a closer look: c5! 30.bxc6 bxc6 31.Ne5 Bc3! *(31...d2 32.Nc4±)* 32.Nxf7 Rd5 33.Nh6! c5 34.Ng4 c4 35.Ne3 Rc5 36.Nxc4 Rxc4 37.Rxd3 The engine would give a draw here but to be honest White's practical chances with those three passed pawns are better than Black's chances to play for a win!]

17...Bf5 18.Qh5 Be6 19.Qh7 and the game ended in a draw by repetition.

The Italian Variation with 5.d4 was already known about in the 17th century, basically as long ago as chess in its current form exists. The gambit 7.Nc3 is not particularly strong and the main line 7.Bd2 gives White a tiny endgame edge at most. The amazing thing is that 7. Nbd2!? has been largely ignored for centuries, with no mention of it in the Megabase before the 1990s. This week in the game between two young American 2600 grandmasters, Robson−Hess, White gave the move a try and had a winning position after only twenty moves! In the diagram position White is completely dominant and went on to play with maximum energy. The point is that White gets a favourable isolated d−pawn position with all the minor pieces still on the board. Black seems to equalize with 7... Nxe4 8.d5 Nxd2 9. Asian Continental op 18th (6) 12.06.19
[Sethuraman,SP]

After making draws in the fourth and fifth round, it was nice to score a victory in this game against my good friend Rinat. **1.e4 e5 2.Nf3 Nc6 3.Bc4** The popularity that Italian has gained over a short span of time is immense . So many move orders ,so many subtle nuances makes this opening quite interesting from both sides **3...Nf6 4.d3 Be7** From time to time 4...Be7 is seen on top level, but 4...Bc5 remains the main alternative. **5.0−0 0−0 6.Re1 d6 7.a4 Kh8** I didn't check this system before the game as it was hard to predict what Rinat would play. But I had one recent game in mind, the win of my compatriot Ganguly against Kazhgalaeyev from the World Team Cup, since I was just playing the next board to them in the match India−Kazak.. **8.h3**
I was hesitating whether to expand here with a5 immediately like in the below mentioned game or to wait for some time, having options like b4−b5.

[8.a5 a6 9.Nc3 Ng8 10.Nd5 f5 11.h3 fxe4 12.dxe4 Nf6 13.c3 Nxd5 14.exd5 Nb8 15.Nd2 Nd7 16.Ne4 Nf6 17.Nxf6 Bxf6 18.Bd3⩲ 1−0 (38) Ganguly,S (2633)−Kazhgaleyev,M (2587) Astana 2019]

[9.a5]

9...f5 10.Nd5 fxe4 11.dxe4 Qd7!?
My opponent played this quite fast and later after that game he said that he knew this idea of regrouping in such positions. But I still believe that White has a good advantage thanks to his space and the computers approve as well. **12.a5** Perhaps it was once again better to wait without playing a5 keeping the choices flexible.

[⩲12.b4 Bd8 13.Ra3±]

12...a6 13.b4 Bd8 14.Ra3! Quite an important manoeuvre, keeping the

position intact and safe of any threats on the kingside if at all :) **14...Qe8 15.Nh2?!** My idea was to change the rook on f8 with Rf3 or plan something with Ng4 but it was not necessary to disturb the knight as it was nicely placed on f3

[15.Bf1 was quite natural and important to carry out c4 −Bd2−b5. Qg6 *(15...Nce7 16.c4)* 16.c4± as Bxh3 is not at all a threat, thanks to the rook on a3 it is indirectly protected.]

1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.0−0 0−0 7.Re1 a5
Huebner,Robert: 'Previously 7...a6 was more usual, but after it recently White has been trying action on the queenside: 8.a4 ♗a7 9.b4 (for example M. Carlsen − S. Karjakin, 5th WCh match game 2016). How effective that is may be undecided; in any case with the text move Black turns against this plan with the assumption that the weakening of the b5−square will be unimportant. ' Huebner,Robert: 'Üblicher war bisher 7... a6, doch hat Weiß in letzter Zeit danach das Vorgehen auf dem Damenflügel versucht: 8.a4 La7 9.b4 (zum Beispiel M. Carlsen − S. Karjakin, 5. Partie der Weltmeisterschaft 2016). Wie wirksam dies ist, sei dahingestellt; Schwarz wendet sich mit dem Textzug auf jeden Fall gegen dieses Vorgehen in der Annahme, daß die Schwächung des Feldes b5 unwesentlich sein wird. '
8.Bg5 Huebner,Robert: 'This is a sharp plan and so far little experience has been gathered with it. White allows his queen's bishop to be driven to g3. There it is at first out of the play and may be exposed to further attacks (by h6−h5 after appropriate preparation). But White

is counting on getting in d3−d4 and that the pressure against the e5−point will then be important; in addition he wll perhaps be able to get some advantage out of the weakening of the black kingside whenever the positioon opens up. There is no way to decide whether the move is better, worse or just as good as the continuations 8.♘bd2 and 8.h3, which strive towards more modest goals. ' Huebner,Robert: 'Dies ist eine scharfe Idee, mit der bisher wenig Erfahrung gesammelt wurde. Weiß läßt es zu, daß sein Damenläufer nach g3 getrieben wird. Dort steht er zunächst außer Spiel und mag weiteren Angriffen ausgesetzt sein (durch h6−h5 nach geeigneter Vorbereitung). Weiß rechnet aber damit, daß er zu d3−d4 kommt und daß dann der Druck gegen den Punkt e5 wichtig sein wird; außerdem wird er vielleicht aus der Schwächung des schwarzen Königsflügels Nutzen ziehen können, wenn die Stellung sich öffnet. Es ist nicht zu entscheiden, ob der Zug besser, schlechter oder ebenso gut ist wie die Fortsetzungen 8. Sbd2 und 8.h3, die bescheideneren Zielen dienen.' **8...h6 9.Bh4 g5 10.Bg3** Diagram

[To the best of my knowledge nobody has yet tried the sacrifice on g5. It is speculative in nature because White has no pieces attacking and his pawn on f2 is pinned, so that the dangerous advance f2−f4 is at first prevented. Nevertheless things are not quite so clear. Let me give some sample continuations: Das Opfer auf g5 hat meines Wissens noch niemand probiert. Es ist spekulativer Natur, weil Weiß keine Figuren im Angriff hat und der Bauer auf f2 gefesselt ist, so daß der gefährliche Vorstoß f2−f4 zunächst unterbunden ist. Russian Championship Superfinal (1.1)
[GM Dejan Bojkov]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Bg5 A relatively rare continuation. White usually waits for his opponent to either castle first, or block his dark−squared bishop with d7−d6. **5...Be7** Karjakin kills the pin at once.

[But Black often ignores it, as the following examples show: 5...d6 6.Nc3 h6 7.Bxf6 Qxf6 8.Nd5 Qd8 9.c3 a6 10.Qe2 Ba7 11.0−0−0 Ne7 12.d4 Nxd5 13.exd5 0−0 14.dxe5 dxe5 15.Nxe5 Qd6 16.f4 Bf5 Fedoseev,V (2678)−Le,Q (2709) chess.com INT 2020]

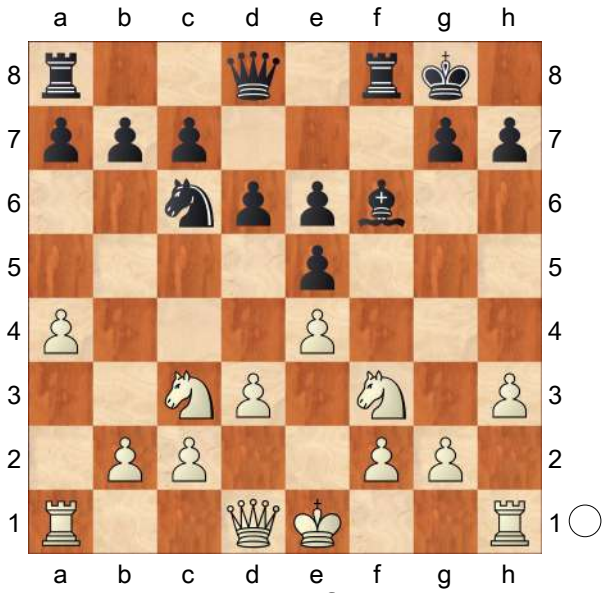
[And: 5...h6 asking the bishop to choose a diagonal, when: 6.Bh4 d6 7.c3 a6 8.Nbd2 Ba7 9.a4 Qe7 10.Qe2 Be6 11.b4 Bxc4 12.Nxc4 Qe6 was about equal in Yu,Y (2736)−Aronian,L (2756) Riga 2019]

6.Nc3 d6 7.a4 Saving the bishop from the positional threat Nc6−a5 with a swap of the minor pieces. **7...0−0 8.h3 Be6** Black is obviously not afraid to double his e−pawns. They cover all the important central squares. On the top of that the f−file would be opened for the black rooks. **9.Bxf6** Finally the bishop was traded as it was not quite useful on g5. **9...Bxf6 10.Bxe6 fxe6**

(Diagram)

11.Ne2N Antipov prepared an interesting regrouping of his pieces.

[The predecessor saw Black doing



fine in the opening after: 11.0−0 d5 12.Qe2 Qd7 13.Nb1 a5 14.Nbd2 Rad8 15.Nb1 Ra8 16.Nbd2 Rad8 17.g3 Be7 18.Kg2 Bd6 Yu,Y (2738) −Vidit, S (2707) Danzhou 2019]

11...Qd7 12.c3 Rf7 13.h4 For the time being White doe not want to castle on the kingside. Instead, he intends to bring his rook out via the h3 square.

[He could have expanded further on the queenside with: 13.a5 Raf8 14.Qa4 When Black is doing OK after both: a6 *(* Or: *14...Bd8)*]

13...Raf8 Karjakin's play is obvious and easy to understand. He is consistently improving his pieces and would not mind seeing the white king castling into his attack. **14.b4 Kh8** Black is not impressed by the enemy queenside expansion.

[It also makes sense to block the opponent's pawns with: 14...a5 15.b5 Nb8 with the idea to counter−attack them later with c7−c6.]

15.Ra2 Overprotecting the f2 pawn.

[15.h5!?]

15...Bd8! A nice regrouping by Black. He is getting ready to exploit the fact that most of the white pieces shifted away from the centre and the queenside.

[After: 15...Ne7 16.d4 the white rook may find work to do along the d−file.]

16.Neg1 A weird set up.

[However, in the line: 16.Ng3 h6 17.h5 Rf4 the black rooks enjoy greatly the f−file.]

16...Ne7 17.Ng5

[Instead: 17.h5 is met with: Ng8]

[Whereas: 17.d4 works into Black's hands as he wants to open the game: exd4 18.cxd4 Qc6 19.Qc2 Qb6 20.b5 c6]

17...Rf6 18.Kf1 Intending to castle by hand with g2−g3 and Kf1−g2 but Karjakin is prepared for the opposite−flank play.

[White achieves nothing after: 18.Qh5 h6 19.N1f3 Qc6 20.Ra3 a5]

18...c5! 19.bxc5

[Black's play cannot be stopped: 19.b5 d5]

19...dxc5 20.N5f3 Nc6 The white pawns became weak and will be soon targeted. **21.Rd2 Ba5 22.Qb3** Solidifying the flank.

[In case of: 22.Ne2 Antipov has to worry about both the positional exchange sacrifice: Rxf3!? *(* And the positional pawn sacrifice: *22...c4!? 23.dxc4 Qe7)* 23.gxf3 Rxf3 24.Kg2 In both cases the white king is exposed.]

22...a6 23.Rd1 The rook moves out of the pin.

[Which can indeed be very unpleasant, as in the line: 23.Rh3 Nd4 24.cxd4 Bxd2 25.Nxd2 Rxf2+ 26.Ke1 Rxg2]

23...h6

[Also good was the instant preparation of b7−b5 plan with: 23...Bd8!?]

[Or with: 23...Rb8!?]
24.h5 There is not much that White can do on the kingside.
[Therefore, it was time to bring the rook out with: 24.Rh3!? Bd8 25.Ne2 Na5 26.Qc2 Bc7 although Black is still better here.]
24...Kh7 25.Qc4 Qd6 Now Karjakin prepares the decisive queenside breakthrough. **26.Ne2 Rb8! 27.Rb1 Bc7 28.Rh3** It is all ready for the b−pawn advance. **28...Na5 29.Qa2 b5 30.axb5 axb5 31.Rd1**
[Or: 31.Nc1 Nc6 followed by b5−b4 anyway.]
31...b4! The queenside majority transformed into a powerful passer. The d3 pawn was further weakened, as well as the d4 square. Karjakin is strategically winning. **32.cxb4**
[Nothing changes: 32.c4 Ra8 33.Rb1 Rff8 and the b4−pawn will soon move.]
32...cxb4 33.d4
[Or: 33.Rb1 b3 34.Qd2 Nc6 *(34...Qc5)*]
33...b3 34.Qb1 Qb6 35.dxe5 Rf7 36.g4 A desperate counter−attacking chance, but the white pieces never get coordinated.
[Otherwise the b−pawn would cost White dearly too: 36.Kg1 b2]
36...b2 37.g5 Kh8 A cool defense.
38.gxh6 gxh6 39.Ned4 Nc6 40.Nxc6
[If: 40.Nxe6 Nxe5 41.Nfd4 Ng4 with decisive attack.]
40...Qxc6 41.Nh4 Qc4+ 42.Rhd3
[Black's attack decides in case of: 42.Kg1 Qe2 43.f3 Kh7]
42...Rb3 43.Ng6+ Kg7 44.Kg1 Rxd3 45.Rxd3 Qc1+
[The white knight is trapped after: 45...Qc1+ 46.Rd1 Qg5+ 47.Kf1 Qxh5]
0−1

12.Qb3! The most energetic continuation. White efficiently uses the g8−a2 and f8−a3 diagonals. **12...Re7 13.Ba3 h6?!** A natural reaction, prevening 14.♘g5. Yet, this move allows White to increase the pressure in the center. Instead, 13... ♗c5 deserved serious attention. **14.d4** Threatening d4xe5. **14...Qe8 15.h3** White is clearly better. His pieces are very active, he controls the most important diagonals, whereas the black pieces are placed clumsy and deprived of active possibilities. The next stage of White's plan is the preparement of c−pawn march. **15...Bd7 16.Qc2 Qb8** An original queen maneuver, which, however, does not change the character of the play. **17.Bd3 Qa7 18.Nc4** Resuming the threat d4xe5. **18...Ree8 19.Nxb6 Qxb6 20.c4 Nh5**

[The only meaningful way to meet the threat c4−c5. After 20...exd4 21.c5 Black is helpless.]

21.c5 dxc5 22.Bxc5

[It is much stronger than 22.dxc5?! Qf6 White needs to open the centre, obtaining the excellent perspectives due to the bishop pair and the pawn majority on the kingside.]

22...Qf6 23.dxe5 Nxe5 24.Nxe5 Qxe5 25.Bf1! A good move. White is planning to move his kingside pawns and needs to protect the h3 pawn by his light−squared bishop. **25...Be6 26.Rac1 Red8 27.g3 Rd7**

8.0−0 Obviously very logical, simply continuing development and tucking the king away. Although this is not the most popular move overall, it has been preferred by very strong players recently, in particular Zhigalko.

[8.dxe5 is the most common, Bb6 Nakamura,H−Anand,V.]

[8.Nbd2 Bb6 9.a4 Short,N−Sargissian,G, both games are in the Archive.]

I think this game shows very well the dynamic possibilities for Black in this variation. Although the analysies are by no means forced, they suggest that in practice it is not easy to find all the correct moves for White, and Black has always some hidden resources, besides the bishop pair which is always putting pressure on White's camp.

This game and the following one focus on an early ...d7−d5 line for Black. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0!?** Castling here is becoming quite popular. Against quiet, non−developing responses (e.g. 6 h3, 6 Bb3) Black's idea is to play 6...d5. However, more recently Black has also been trying the ambitious 6...d5 even when White castles and is ready to attack the centre.

6.0−0

[6.b4 Be7 7.0−0 d5 8.exd5 Nxd5 is another way of reaching the same position. On the evidence of new games, White should prefer one of 6 Nbd2, 6 Bg5, or 6 0−0 with 8 Re1 (see the notes to Nun−Spesny in the book for details).]

6...d5!? 7.exd5 Nxd5 8.b4

[8.Re1 might well be stronger. A recent game: Bg4 9.h3 Bh5 10.Nbd2 Nb6!

Fressinet, Belfort 2010. The computers slightly prefer White's more solid structure over Black's space edge, but it's difficult for either side to make any real progress at the moment.]

8...Be7

[Black must avoid 8...Bb6? 9.Bxd5! Qxd5 10.c4 and c5 trapping the bishop.]

9.b5 The consistent follow−up.

[If 9.Re1 Bf6 10.Ba3 Re8 11.Nbd2 then b5! is a good response, P. Ponkratov−I.Khairullin, Zvenigorod

9...Na5 10.Bxd5 Qxd5 11.c4 Qd7

Previously 11...Qd8 has been Black's most common choice, but both 11...Qd7 and 11...Qe6 look more promising and seem to offer Black a full share of the chances (and more in certain cases).

[7...h6? This move avoids the pin, but it can be dangerous when Black is already castled and White is not, due to the option of a brutal attack with g4−g5. 8.g4! The attack is scary.]

9...Ne7 Anticipating White's manoeuvre Nf1−g3, Black intends to maintain the symmetry. However, since ...a7−a6 does not help in the fight for the centre, Black risks having another tempo less to add to the initial one. **10.Re1 Ng6 11.Nf1 h6 12.Ng3 Re8 13.d4 c6?!**

This passive move finally turns the aforementioned risk into reality.

[After removing the knight from c6, the most active plan is 13...b5 14.a4 Bb7 Due to the pressure on e4, White faces problems setting up the battery with Be3 and Qd2. 15.Bc2 Bb6!? with chances for both sides.]

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.Nc3
The move order of this game makes one understand why Pinski calls this whole variation 'the Spanish Four Knights'. **4...Nd4 5.Bc4 d6!?**
Here is the state of play with the principle alternatives:
[5...Bc5 6.Nxe5 Qe7 7.Nf3 d5 8.Bxd5 Bg4 9.d3 and now there are three important moves for Black: Nd7 *(9...c6 10.Bb3 Nd7 11.Be3 Ne5 12.Nxd4* an interesting queen sacrifice that seems promising: *Bxd1 13.Nf5 Qf8 14.Bxc5 Qxc5 15.d4 Qb4 16.Rxd1* Motylev−Shirov, A Bastia 2004 and now Motylev considers *g6 17.a3 Qf8 18.Ne3* as correct 'with compensation'. Two pieces and two central pawns for the queen is not quite enough material but White has good positional control.*; 9...0−0−0 10.Be3 Nxd5 11.Nxd5 Rxd5 12.exd5 Re8 13.c3 Nxf3+ 14.gxf3 Qh4 15.Kd2 Rxe3!* with sufficient play for the sacrificed material, Vallejo Pons, F−Dominguez, L Cuernavaca 2006 *)* 10.Be3? *(10.Bg5 Qd6* is critical with unclear play according to Dominguez and Ibarra *)* 10...Ne5 11.Nxd4 Bxd1 12.Rxd1 *(*Now if *12.Nf5* Black has *Qf6 13.Bxc5 Bxc2* with advantage as pointed out by Dominguez and Ibarra. The difference between this and Motylev−Shirov is that here c2 is undefended. *)* 12...Qf6 13.Nf5 Bxe3 14.Nxe3 0−0−0 and Black was better in Najer, E−Shirov, A Poikovsky 2006]
[5...Nxf3+ 6.Qxf3 gives White a slight lead in development but is very solid.]
[5...c6 6.Nxe5 d5 7.exd5 Bd6 8.Nf3 Nxf3+ 9.Qxf3 0−0 10.h3 b5 11.Be2 b4 12.Ne4 Nxe4 13.Qxe4 Re8 14.Qf3 cxd5 15.d4 Ba6 16.Be3 Bxe2 17.Kxe2 Qc7 and Black had enough compensation in Keitlinghaus, L−Van den Doel, E Bundesliga 2004]
6.Ng5
[Instead 6.Nxd4 exd4 7.Nd5 Nd7 8.0−0 c6 9.Nf4 b5 10.Be2 g6 11.c3 offered dynamic equality in Sutovsky, E−Bacrot, E Khanty Mansisk 2005]
6...d5 This is not only reminiscent of a line in the Two Knights Defence where Ng5 is met by ...d5 it has actually transposed (1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6 4 Ng5 d5 5 exd5 Nd4 6 Nc3, note that both sides have played one less move).
[A solid alternative is 6...Ne6]
7.exd5 h6 8.Nf3 Bg4 9.Be2 Nxe2!?
An attempt at being dynamic that fails in the face of vigorous play by White. Perhaps in future the second player will settle for
[9...Bxf3 10.Bxf3 Bb4 11.0−0 0−0 12.d3 Bxc3 13.bxc3 Nxf3+ 14.Qxf3 Qxd5 and Black was close to equality as in Vallejo Pons, F−Kramnik, V Monte Carlo 2005]
10.Qxe2 Bd6 11.h3 Bh5
[Black might get more play with 11...Bxf3 12.Qxf3 Qe7 13.0−0 0−0−0!?]
12.d3 0−0 13.g4! Bg6 14.g5!
Despite his lack of development Najer seizes the initiative on the kingside.
14...Nh5 15.Ne4

[I presume that 15.gxh6 would be met by Nf4 16.Bxf4 exf4 17.0−0−0 Re8]
15...f5 16.gxf6?! Trying to keep things simple.
[White may still be better following 16.Nxd6! Qxd6 17.gxh6 e4 but he could easily lose control.]
16...Bxe4 17.Qxe4 Qxf6 18.Ke2 Bc5?!
[18...Rae8!? intending .. .Nf4+ looks tempting.]
19.Rg1 Rae8 now it's not the same...
20.Rg6! Qf5 21.Be3 Bxe3 22.fxe3 Qxh3 23.Rag1 With all White's pieces in play and his king more or less safe he has little to worry him. Black may have regained his pawn but it's now White who has the attacking chances. **23...Re7 24.Rxh6?!** A surprising exchange sacrifice.
[Less risky is 24.Nd4! eyeing the e−− square with a good game.]
24...Ng3+ 25.Rxg3 Qxg3
[After 25...Qxh6 White may have nothing better than 26.Kd2 walking his king to safety. Then he has compensation for the exchange (one pawn, good pieces, attacking chances) but perhaps no more.]
26.Qh7+ Kf7 27.e4!? Time trouble perhaps, ambition certainly! Najer wants more than a draw.
[Instead 27.Qf5+ Ke8 28.Qc8+ Kf7 29.Qf5+ is drawn.]
27...Qg4
[I don't think that White is worse after 27...Ke8 28.Qg6+ Qxg6 29.Rxg6 but Black might not be either.]
28.Rh2 Qg6?? Falling for a sucker punch.
[Instead 28...Ke8 29.Qh5+ Qxh5 30.Rxh5 Ref7 would have yielded a double−edged ending.]
29.Nxe5+! Rxe5 30.Rf2+ Qf6 31.Rxf6+ Kxf6 32.Qh2 The queen plus pawn mass dominate. **32...Rfe8 33.c4 g6 34.c5 b6 35.b4 bxc5** Black may have lost on time or the final moves are perhaps illegible. in any case White should win easily enough.

[Postny,Evgeny]

This is the game from penultimate round, with both of us having 5.5 out of 7 and fighting for top places. The time control was 60 minutes plus 5 seconds per move. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5** When playing Baadur, you can always count on an interesting game. **4...d5 5.exd5 Na5 6.Bb5+ Bd7** I've played this line a few times already and I think, it is a decent alternative to the main move 7...c6. **7.Be2?!** Not a principled move. The main challenge is 7.Qe2.

[7.Qe2 Be7 *(7...Bd6 8.Nc3 0−0 9.Bxd7 Qxd7 10.a3 Be7 11.0−0 Nxd5 12.Qxe5 Nxc3 13.dxc3±* 1−0 (47) Nogal,J (2380)−Mehlhorn,W (2469) ICCF email 2012 *)* 8.Nc3 Bxb5 9.Qxb5+ c6 10.dxc6 Nxc6 Normally Black gets decent compensation for the pawn thanks to advantage in development. 11.Qxb7 *(11.Nf3 0−0 12.d3 Nd4 13.Nxd4 exd4 14.Ne2 Rc8⩱ ½−½* (24) Short, N (2683)−Postny,E (2606) Kishinev 2017 *)* 11...Nd4 12.0−0 0−0 13.Nge4 Nxc2 14.Rb1 Qd3 15.Nxf6+ Bxf6 16.Qe4 Qxe4 17.Nxe4 Be7 18.b3 f5 19.Ng3 Nb4= 1−0 (43) Vovk,A (2617)−Postny,E (2670) Fagernes 2016]

10...Qxd7 Black is currently better developed, but the knight on a5 is misplaced and White is counting on his pair of bishops in the long term.

11.Bg4?! I didn't expect that. Now 11... f5 is met by check on h5, so I have to choose a square for my queen.

[11.Nc3 was more natural. Nxc3 *(11...Nf4 12.0−0 0−0−0 13.Nxe4 Nxe2+ 14.Qxe2±)* 12.dxc3 Qe6 *(12...Qxd1+ 13.Bxd1* is the kind of endgame, that I wanted to avoid, as I think that in the endgame pair of bishops might cause me troubles. *)* 13.Qd4 Nc6 14.Qc4 Qg6 15.Be3 0−0−0=]

11...Qb5?! I wanted to keep the c6 square for the knight, but 11...Qc6 was actually more precise.

[13...Rd8 14.Qe2 Qxe2+ 15.Bxe2±]

14.Qe2 Now we see the drawback of 11...Qb5. **14...Qe5** I wanted to keep the queens on the board, as in the endgame the pair of bishops has good potential.

[14...Qxe2+ 15.Bxe2 Nc6 16.Be3 0−0−0 17.0−0−0 f5 is objectively playable for Black.]

15.Be3

[15.f4 exf3 16.Qxe5+ Bxe5 17.Bxf3 0−0−0=]

15...Nc6?! I wanted to keep an option of castling to both sides, therefore at first I bring the knight back into play.

19.Qxf3 g6 20.Rhe1 Now I have a choice between two castlings, in both cases I might lose an exchange, but the matters are far from clear. **20...0−0!** Difficult choice, but surprisingly, this is the safest side available for my king.

21.Bh6 This move is too tempting.

[From a practical point of view it would be better to play 21.g3! Rae8 22.Bg2 and the bishops power yields White a serious advantage.]

21...Qxh2 This is an important pawn, because now White can't play g2−g3 without giving the pawn, which means that the bishop on h3 can be stuck forever. **22.Re6** Double threat on the ♙g6 and Rexd6, followed by Bh6−f4, trapping the queen.

This move is very simplistic, probably too much so. White immediately regains the ♙ and counts on his central majority, but Black's position is very comfortable and he does have good long–term chances thanks to his pair of ♗s.

[≤7.Bxf7+? This sacrifice is incorrect. Black can defend with ease against White's immediate threats. Kxf7 8.Nxe5+ Now both retreats of the black ♔ are possible.

B2) 9...Bf6 10.Nd3 White again threatens to regain the piece, but thanks to a forcing sequence Black succeeds in retaining his advantage: b6! 11.e5 Bb7 12.Qf4 Qe8 13.0–0 Qg6 14.Ne1 Ba6∓]

[7.Bd3 This move is very rare, but logical. White accepts to play a ♙ down but with a strong centre (should Black exchange on d4); in this case the light–squared ♗ is much better placed on d3 than on e2. In fact, it seems to me that White retains very reasonable compensation and enjoys decent attacking chances on the kingside. I believe Black should not go down this scenario. Instead, he can benefit from the fact that the ♕s cannot be exchanged now, to give up the central ♙ in a different way. d6! The best way of defusing White's idea. *(≤7...exd4 8.cxd4⩱* It is not clear how Black will proceed from here. The move ...♘f6 is not really enticing, ...d5 is met by e4–e5, the ♘a5 remains offside and ...0–0 just looks risky... *)* 8.dxe5 dxe5 9.Nxe5 Nf6 10.0–0 0–0 Black has a sound position and will attack the ♘e5 with either ...♗d6 or ...♘g4. On the other hand, White's position is fully playable. Overall, I'd say it's about equal, with Black counting on his better structure and White on his kingside play.

A) 11.Nd2 Ng4! The most direct. 12.Ndf3 Nxe5 13.Nxe5 Qd6 I think this is most accurate. The ♘ must be dislodged from e5 as soon

7...Nxc4 8.Nxc4 d5! This break, ensuring the break−up of White's centre, is the only consistent move.

[≤8...d6 Allowing White to retain his central edge does not equalise; one reason is that in this case the black ♗s do not have much scope. 9.0−0 Nf6 10.Nbd2 White's general plan now is to expand further with f4, perhaps after playing ♘e3 to contain Black's possible central play. Still, I don't think Black really needs to play like this.]

10.Ne3 Qa5! All logical retreats of the ♕ have been tried here, but this one is in my opinion clearly best. The ♕ remains active, puts pressure on White's position and can switch to the kingside if appropriate. In addition, it leaves more space in Black's camp for the other pieces to be deployed.

[10...Qd7 blocks the ♗c8, while]

[10...Qd8 takes away a useful square from the ♖a8. Moreover, both these moves allow White greater freedom.]

11.0−0 Nf6 The basic position of this line. Having taken a good look at possible developments, I feel Black

stands very well and is by no means worse; in fact, I'd even say that he has slightly better chances in the future. He has a sound position with no structural weaknesses, easy development and no real space constraints. Perhaps only the development of the ♗c8 may prove a little problematic. White's task is more difficult. Logic suggests that he should try to expand in the centre with c3−c4 and d4−d5, or try to build up some kingside attack. As we will see, neither of these plans is really threatening against reasonably careful play. Should Black succeed in restraining White's ambitions, he will be able to focus on White's weak structure. **12.a4**
An interesting idea, gaining queenside space and trying to restrict the black ♕. White wants to play ♘b1−a3−c4, but this idea just doesn't have any impact.

[12.c4 Logical. White wants to develop the ♘b1 to c3, but will need to spend a further tempo preparing this move. 0−0

13...Re8 14.d5 This central advance is logical, as it gains space and puts the white ♙s on the same square colour as that of the missing ♗, but it does weaken the dark squares. Given White's lack of development and coordination, Black is often able to exploit this factor. The only problem he might face is the restricted placement of his ♕, but this is usually resolved without much hassle.

14...Bc5

[For example, here 14...Ne4!↻ would have been strong: both ...♗f6 and ...♗c5 are annoying, depending on how White reacts, while the ♘b1 still has no good way to develop.]

This move was probably meant to anticipate an exchange on f5, when White could consider continuing with f5−f6. While playing it at this stage cannot be considered an inaccuracy, Black could also deal without this weakening of the light squares. Dieser Zug sollte wahrscheinlich einen Tausch auf f5 antizipieren, wonach Weiß überlegen könnte, mit f5−f6 fortzusetzen. In dieser Phase gespielt, kann man dies nicht als Ungenauigkeit werten, doch Schwarz konnte auch ohne diese Schwächung auf den hellen Feldern auskommen.

After the exchange of one rook and the bishop's return into play, White faces the danger of seeing his advantage vanishing. This was one of the last moments when he could still have stayed on the top. How?

In this game, too, White will leave his bishop on c1. The evaluation of this plan remains the same. **12.N3h2 Bxb3 13.axb3 Qd7 14.b4 Qe6 15.Qf3 Ne7 16.Ng3 c6 17.Ng4 Nxg4 18.hxg4 f6** Slightly mysterious, but not necessarily bad. **19.Nf5 d5 20.g3 Rad8 21.Kg2 dxe4 22.Rxe4!?**

Chicago Open (4) 26.05.2012
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 Here I surprised myself by playing this move instead of 3...Bc5, which is my usual choice against 3.Bc4. **4.d3 Be7 5.Nbd2** A relatively rare line if we compare it with 5.0−0, 5.c3 and 5.Nc3.
[One of the options to obtain the position in the game after 8.0−0 is 5.0−0 0−0 6.Bb3 d6 7.c3 h6 8.Nbd2]
5...0−0 6.Bb3
[Recently I analysed Socko, B (2636)−Bartel, M (2658)/Warsaw POL 2012/ [Mikhalevski, V], for you, which featured 6.0−0]
6...d6 7.c3 White has transposed to the more popular line with 5.c3, which I mentioned above. **7...h6**
[The following line is more popular. After 7...Na5 8.Bc2 c5 9.Nf1 Nc6 Black is fighting for the centre.]
8.0−0 Another transposition, this position may ensue from both 5.c3 and 5.0−0. **8...Nh7** A typical idea in this line. Black transfers the knight to g5 in order to exchange a few pieces and hopefully prepare ...f5. Though after playing it in the current game I wasn't too happy about what I saw at the board. **9.Nc4** White opens the diagonal of his dark−squared bishop in order to meet 9...Ng5 with the exchange of knights followed by f4. **9...Ng5 10.Nxg5 Bxg5**
[10...hxg5 is the only way to stop f4 and it was played just once. 11.Qh5 Be6 12.Ne3 Bxb3 13.axb3± and White was better in Radjabov, T (2761)−Aronian, L (2750) /Nice 2009 thanks to the light square control.]
11.f4 exf4 12.Bxf4 This position is well known and Gelashvili played like this before at least twice. So he didn't spend any time on making these moves, while I was on my own and each move took some of my time. **12...Be6** Probably the best. Black has to deal with the pressure along the a2−g8 diagonal and also with White's strong centre after
[The position after 12...Bxf4 13.Rxf4 Qg5 14.Qf3 Be6 15.d4 will be considered after 12...Be6.]
13.d4 b5!? Finally I managed to surprise my opponent. The move looks weakening, but Black gets rid of the active pieces on c4 and b3.
[Earlier Black played 13...Bxf4 14.Rxf4 Qg5 15.Qf3 Ne7 16.h4 Qb5 17.d5 Bd7 18.Rf1 f6 19.h5↑ and White was better thanks to the spatial advantage and misplaced queen on b5, though it's not easy to break through as Black's position remains rather solid. Gelashvili, T (2325) −Kobalia, M (2430)/ Guarapuava 1995.]
14.Ne3 Na5 Black is fighting for the light squares. This move is a logical follow−up

to 13...b5 as well as a defence against 15.d5. **15.Bc2** White is hoping that the strong centre will secure the better chances. **15...Nc4!** In a search of counterplay. **16.Nxc4 bxc4!** Black opens the b−file for his pieces.

[After 16...Bxc4 17.Bxg5 Qxg5 18.Rf3 Be6 19.Rg3± White is better thanks to the strong centre and chances for attack.]

17.d5 Bd7 18.Qd4 This looks strong, but White missed my idea.

[18.Bxg5 is a logical alternative. Qxg5 *(18...hxg5 19.b3! cxb3 20.axb3 Qe7 21.b4±* is in White's favour due to the weakness of the a7−pawn. *)* 19.Qd4 Rfb8 20.b3 cxb3 21.axb3 a5 22.Rf3 f6 and despite the weak pawn on a5 it's very difficult for White to break through Black's defence.]

18...Qb8

[Probably it would be more accurate to start with 18...Bxf4!? and only after 19.Rxf4 Qb8 For example, 20.Rf2 Qxb2 21.Rb1 Qxa2 22.e5! dxe5 23.Qxe5 Qa5 obtaining the game position with the h−pawn on h6 instead of g5, which seems to be in Black's favour.]

19.Bxg5! hxg5 20.Rf2! After a long thought White found a very strong idea.

20...Qxb2! Otherwise Black is just worse as the c4−pawn is hanging and the king may become vulnerable. **21.Rb1 Qxa2** The most principled.

[21...Qa3 22.Qxc4 Rac8 23.e5 dxe5 24.Qe4 f5 25.Qxe5 is slightly better for White.]

22.e5! White is breaking through in the centre. **22...dxe5 23.Qxe5 Qa5**

[After 23...Qa3!? 24.Qxc7 Rad8 25.Qxc4 Rc8 26.Qe4 g6 27.c4 Qc5= Black seems to almost fully equalize.]

24.Qe7! A very strong idea, which White had to see when he played 20.Rf2. Suddenly Black doesn't have a good square for the light−squared bishop.

24...Ba4? A blunder. For some reason I'd completely missed that the bishop can be pinned by the queen.

[The best defence is 24...Bc8! 25.Qe4! *(* If White wins an exchange by means of *25.Bh7+ Kxh7 26.Qxf8* Black obtains good counterplay. *Bf5 27.Qxa8 Bxb1 28.Rxf7 Qxc3⇄; 25.Rbf1 f5!=* with the idea to meet *26.Bxf5??* with *Bxf5 27.Rxf5 Qb6+!* and White loses due to the back rank problems. For example, *28.R5f2 Rae8! 29.Qxg5 Rxf2 30.Rxf2 Re1#)* 25...g6 26.Qd4! and despite being two pawns down the initiative is on White's side.]

[24...Rad8? doesn't work in view of 25.Rxf7 Qxc3 26.Bg6!± and Black can hardly move.]

25.Qa3!+− A nasty surprise. Black is lost.

[Somehow I was only counting on 25.Ra1 , which I prepared to meet with Qxc3 26.Rxa4 Rae8! and White has to save himself by means of 27.Ra3! Qd4! 28.Rh3! Rxe7 29.Bh7+ Kh8 30.Be4+! with a perpetual.]

25...Bxc2 The only practical chance.

[25...Rab8 26.Ra1!+− doesn't leave many chances to escape.]

26.Qxa5 Bxb1 27.Qxc7+− The strong passed pawn promises White a decisive advantage. **27...Bd3 28.d6**

[After the game Gelashvili offered 28.h3 in order to avoid any back rank

problems.]

28...Rac8!? An attempt to make White's task difficult. **29.Qd7**

[29.Qa5!? was a good alternative.]

[29.Qxa7?? is impossible in view of Ra8!]

29...Rcd8! 30.Qc6

[White could have returned to 29.Qa5 30.Qc7!? Rc8 31.Qa5]

30...f5 Trying to build a fortress. My idea is to bring the rook to the sixth rank.

31.Ra2

[After the accurate 31.Qc7!+− I would be prevented from gaining counterplay. Rc8 32.Qd7 Rcd8 33.Qe6+ and so on.]

31...Rf6 I'm starting to obtain practical chances. **32.Qd5+**

[32.Qc7 Rdxd6 33.Rxa7 Rg6 34.Ra8+ Kh7 35.Qf7 Rge6 36.h3± is still better for White, but at least Black eliminated the dangerous passed pawn.]

32...Kh7 33.Ra6 f4 It's not easy to defend this position, especially when you have 30 seconds per move.

[Probably 33...g4!? is a tougher defence.]

34.h3! Rd7 35.Kf2 Kg6 36.Qe5 Bf5 37.Qe8+ Kh6 38.Qb8 Bh7 39.Kf3 Bg6

[39...Re6!?]

40.h4?!

[40.Qh8+! Bh7 41.Kg4! was strong with the idea

A) 41...f3 42.gxf3

A1) 42...Rfxd6 43.f4! gxf4 44.Qf8! Rg6+ *(44...Rxa6 45.Qxf4+ Kg6 46.Qf5+ Kh6 47.Qh5#)* 45.Rxg6+ Bxg6 46.Qh8+! Bh7 47.Qe8+− An elegant win.;

A2) 42...Rdxd6 43.Rxa7! Rg6 *(43...Rf4+ 44.Kg3 Rg6 45.Rc7±)* 44.Rc7± and Black shouldn't survive.;

B) 41...Rfxd6 42.h4!! Suddenly Black comes under a very strong attack. gxh4 43.Qf8!! Rg6+ 44.Rxg6+ Bxg6 45.Qh8+! Bh7 46.Qe8!+− Black loses the rook or gets mated.]

40...gxh4 41.Kg4

[41.Qb4!?]

41...h3?!

[After the correct 41...Kh7! 42.Kxh4 Bd3± Black is back in the game as it's difficult for White to make progress.]

42.Kxh3 Bf5+

[42...Kh7!]

43.g4! fxg3+ 44.Kxg3 Once again Black starts to experience problems with his king. **44...Kg5**

[44...Rdf7!?]

45.Qb4 Kg6! 46.Qc5 Re6

[46...Kh7!?]

47.Qd5 Rf6! 48.Qc5 Re6 49.Kf4 Re4+ 50.Kf3 Re6 White still has to find a winning plan. **51.Qg1+?!**

[51.Kg3!±]

51...Kf6?!

[After 51...Kh7! White would find his own king in danger.]

52.Qh2

[52.Qd4+! Kg6 53.Rc6]

52...Be4+ 53.Kf2

[53.Kg3 Rdxd6 54.Rxd6 Rxd6 55.Qh4+ Ke5 56.Qf4+ Kd5 57.Qf7+ Re6 58.Qd7+ Ke5 59.Qxg7+ Kd6 60.Qxa7 Bd3= and I doubt White can break through.]

53...Kf7! 54.Qh5+

[54.Kg3 Rdxd6=]

54...Kg8! Finally I found a way to create

threats. 55...Rf7 is threatened. **55.Kg3 Bb7?** A mistake, which could have cost me the game after a tough defence.
[55...Rg6+! 56.Kf4 Re6= with the idea of 57... Rf7 was the correct defence. White has nothing to do but to repeat moves.]
56.Rxa7?
[After making my 55th move I realised that White can play 56.Qb5!
Now my best chance seems to be Rf7 57.d7 Re3+ 58.Kg4 Rxd7 59.Qxd7 Bxa6 60.Qc6! Rxc3 61.Qxa6 Rc1 with chances for a draw, which Black achieves if he gets the rook to either h6 or f6.]
56...Rdxd6! This was my idea behind 55. ..Bb7. Black sacrifices the bishop and checks the king. **57.Rxb7 Rg6+ 58.Kf4 Rgf6+ 59.Ke4**
[Of course not 59.Kg5? Rd5+∓]
59...Rfe6+ A tough game, but 13...b5 makes sense.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.h3 The move is meant to avoid the line with 6...d5. However, it is still possible for Black to play d5 which leads to complicated positions.

6...d6

[6...d5 7.exd5 Nxd5 8.Re1 Be6 *(8...Nb6 9.Bb3±)* 9.c3 *(9.Nxe5? Nxe5 10.Rxe5 Bxf2+! 11.Kxf2 Qf6+−+; 9.Nbd2!?)* 9...Bb6 and Black is doing more or less fine.]

7.c3 a6 Many games have been played in this line. The theory, however, is still not thoroghly analyzed or, maybe, just not well imprinted on players' memory due to a broad variety of choices for both sides. **8.a4!?** White intends to make some space on the queen side by playing a5 when given the chance. But more importantly, this move avoids Na5 and in some cases allows White to play Qb3 putting pressure on the b7 pawn. **8...h6 9.Re1** Emptying the f1 square for the knight. **9...Ba7** Black is preparing to go with the c6 knight to g6. **10.Nbd2 Ne7 11.Nf1 Ng6 12.Ng3 c6**

Black had several ideas in this position apart of the move in the game:

[12...Be6 White has no time for Bb3−c2. 13.Bxe6 fxe6 14.Qb3 Qd7 15.d4 exd4 16.cxd4±]

[12...a5 13.Bb3 Re8!?]

13.Bb3 Re8

[During the game, I wasn't sure what to do against 13...d5!? 14.exd5 Nxd5 Now, White can't take on e5 for obvious reasons and, thus, it was not clear to me whay my next would be. 15.d4!? *(15.Nxe5? Nxe5 16.Rxe5 Bxf2+!)* 15...exd4 16.Nxd4 With a slightly better position for White.]

14.d4 It is high−time to make this move. Had not White done that, Black would have played d5 on the next move. **14...Be6 15.Bc2** An important and somewhat typical move for the Italian structure. White has more space for his pieces, so any trades in this position would come in−handy for the black side. On top of that, the bishop on c2 solidifies White's position and will eventually support the jump Nf5. In comparison, the bishop on e6 gets in the way of the rook on e8 and puts no pressure on White's position. **15...Qc7**

[For a moment I was concerned about 15...Qd7 with a bold idea to capture on h3 on the next move. However, this does not work. 16.a5 Bxh3 *(* If *16...Rad8* then *17.Be3±* and it is not clear what the perks are of having the queen on d7. *)* 17.gxh3 Qxh3 18.Qd3 exd4 19.Qf1 Qg4 20.cxd4!± Qxf3? 21.Bd1!+−]

In this position, it doesn't take a lot of thought from the white side to develop his pieces. Pretty much all the moves that are to follow seemed to me quite logical during the game. All I had to do is make sure that I was not blundering anything in my calculations. **16.Be3 Rad8 17.Qc1!** Aiming at the pawn h6 as well as getting away from the "d" file where the queen could potentially get under attack if Black were to play d5. **17...a5** Too slow.

[Black should have anticipated an attack in face of the perilous positioning of White's pieces. 17...Bb8 Looks odd but perplexes White's most dangerous idea. 18.Nf5 Bxf5 *(18...d5!? 19.Nxg7 Kxg7 20.Bxh6+ Kg8 21.Nxe5∞)* 19.exf5 exd4 *(19...e4!? 20.fxg6 exf3 21.g3 d5 22.Qd1 Ne4 23.Bf4 Qd7 24.Bxb8 Rxb8 25.Qxf3 fxg6 26.Bxe4 dxe4 27.Rxe4±)* 20.Bxh6 Rxe1+ 21.Nxe1 d5! That's why the bishop on b8 was

so important. 22.fxg6 Qh2+ 23.Kf1 Qh1+ 24.Ke2 gxh6± White still has better chances, but the position looks very complicated.]

18.Nf5 With an idea to capture on h6 with the bishop. Black has little to offer to oppose this idea. **18...Bxf5**

There doesn't seem to be any defense against Bh6. All Black can do is to find some counterplay in the center.

1.e4 Lukacs **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** "This brilliant attacking opening was invented to make men understand that chess is a gift from God, " wrote Saviely Tartakower. The inventor of the gambit, William Davies Evans, was born on the 27th January 1790 in Pembrokeshire, South Wales. From 1804 he served in the navy, and in 1819 reached the rank of captain. In 1824 Evans took command of the steamer 'Oakland', which carried letters and passengers between England and Ireland. Evans was introduced to chess in 1818, and very quickly became a strong player. In the 1820s he was one of best in London. He beat Alexander McDonnell, John Cochrane and several others among the strongest players of the day. Evans 'invented' his gambit on a long haul on the sea in 1824, though he did not have a chance to play it in an actual game before 1827 against McDonnell. The first mention of the 'Evans Gambit' in print is found in Levison's 'Lessons on the Game of Chess' from 1832. It is not unfair to say that the Evans Gambit was the Ruy Lopez of the 19th century. It was simply one of the most popular openings, if not the most popular. At the turn of the century, however, the Evans Gambit disappeared from top chess for almost 100 years. First of all, because people became tired of it and wanted to explore new paths. Secondly, because strong defensive players, such as World Champions Wilhelm Steinitz and Emanuel Lasker, found ways for Black to get a good game against 4 b4!?. Nevertheless, in the 21st century the Evans has proven to be quite resilient to the threats presented to different romantic gambits by the silicon monsters. **4...Bb6** This cautious move is also playable in the Evans Gambit. Black refuses the challenge and keeps his bishop well placed. Though to some extent a strategy for wimps, it cannot be automatically ignored. As far as I can see White can achieve an opening advantage by transposing to the notes to Nevednichy−Gyimesi from Chapter 4 (see the notes to move 6 below).
[There is nothing wrong with the main line 4...Bxb4 as well, but here one has to remember to the sharp theoretical lines.]
[After the more passive 4...Be7 5.b5 Na5 6.Be2 Nf6 7.Nc3 , N.Minev−Atanasov, Bulgaria 1950, White is at least slightly better because of the weak position of the knight on a5.]
5.a4 this is the standard move in this position. White expands on the queenside, relying on the fact that **5...a6** This is the main move.
[In Kasparov−Piket we will look at 5...a5 , which also seems to give a

slight advantage for White. The safest way to gain an edge now is 6 a5, but it is hard to continue like this when playing a gambit.]
[5...Nxb4 does not work, since after 6.a5 Bc5 7.c3 Nc6 8.0−0 White is much better; Black has great problems developing and −− 9.d4 will come with great force.]

6.Bb2 '!?'
[The usual move here, 6.Nc3!? , can be seen in the next two games. Besides these White has also tried: Nf6]
[6.0−0 d6 7.a5 Ba7 8.b5 axb5 9.Bxb5 Nge7 10.d4 exd4 11.Nxd4 0−0 12.Nxc6 bxc6 13.Bd3 Ng6 , F.Marshall−R.Teichmann, Hamburg 1910, and now 14.Kh1 followed by f2−f4 is equal according to Matsukevich. However, 6 0−0 can transpose to the lines below, so it is not at all stupid.]
[6.a5 Ba7 , when we have two options:
A) 7.b5 does not inspire awe. After axb5 8.Bxb5 Black has a wide range of good moves. For instance
A1) However, I have looked a little bit on sharper lines such as 8...Nf6 9.Ba3?! A2) 8...Nge7 followed by ...d6 looks sound.;
B) 7.c3! Nf6 8.d3 is the correct strategy. In this kind of position White has a good chance for achieving a slight edge if he develops normally and keeps the queen away from b3 (see Nevednichy−Gyimesi in the previous chapter for details). Then d6 9.Qb3 (Hey, what did I just say?!) 0−0 10.Bg5 h6 11.Bh4 Qe7 12.0−0 Be6 13.Nbd2 g5 14.Bg3 Nh5 15.b5 axb5 16.Qxb5 was played in E.Sveshnikov−Z. C) 7.−−]

6...d6 7.b5 axb5 8.axb5 Rxa1 9.Bxa1 Na5 is meant to be the worst possibility, but surprisingly enough the game shows that even here Black has rich resources for a successful defence. Black also has some alternatives here:

11.cxd4 Ba7 12.h3 0−0 13.0−0 b5?! A very rare and aggressive continuation. Black doesn't want to equalize slowly, but wants to fight for the initiative. However Black's plan has a drawback: the weakening of the queenside, so I don't like it. As you will see Black comes under a dangerous attack.

[The most popular is 13...Ne7 14.Rc1 Nxd5!? *(* I played *14...Ng6* , but after *15.Qd2 c6 16.Nf4* Black still has some problems to solve. Bosch, J (2433)−Mikhalevski, V (2516)/Dieren 1999. *)* 15.Bxd5 c6 16.Bb3 Be6 17.d5 and a draw was agreed in Bauer, C (2576) −Dorfman, J (2602)/Marseille 2001.]

12...Be6

[This is much stronger than 12...h6? . Black's bishop move already brings about a key moment, with White facing a question which arises time and time again in the Italian Game. Should he allow the exchange of the light−squared bishops or avoid it? In general this question is very difficult to answer, and in many situations the correct choice may ultimately depend on a player's style. Let's see what Tiviakov does:]

13.Bc2 John Emms: '!?' John Emms: 'Tiviakov chooses to keep the bishops on the board. This Bb3−c2 retreat can be difficult to comprehend at first. I admit it's certainly not the sort of move I would have considered playing when I was younger. On the surface White seems to be spending a tempo moving his bishop to a more passive position, and leaving Black's e6−bishop in possession of the a2−g8 diagonal. If all of this is true (and it is!), why are grandmasters and Italian Game experts like Tiviakov happy to play this way? Why do they view Bc2 as White's most ambitious option? −−− Well, maybe this retreat could be compared to some extent with White's automatic Bb3−c2 when faced with ...Na5 in the Ruy Lopez. The bishop becomes temporarily passive, but White is counting on its long−term potential. Furthermore, despite the symmetrical pawn structure it does seem as though Black enjoys slightly less manoeuvring space for his pieces, and so in general he would welcome an exchange of minor pieces. Of course, in the Lopez scenario there's an extra incentive − to leave Black with a less than ideal knight on a5. This is why there Bc2 is an 'automatic' choice, whereas here the decision requires some agonizing. Let's return to the position after 13 Bc2. White's immediate plan is Nh4 followed by Nf5 and possibly Qf3. How should Black react?'

[13.Bg5 h6=]

[Let's see how Black should defend if White allows the exchange and continues action on the kingside: 13.Nh4 (planning Nf5) Bxb3 14.axb3 Qe6! (with the bishops off the board, the queen sits very comfortably on this square − it's now her job to patrol the light squares) 15.b4 Ne8 (this knight will go to d6 to battle for control of f5) 16.0−0 Nd6 17.Nhf5 . In this position Black should avoid *(*or *17.Kh2 Ne7 18.f4 exf4 19.Bxf4 Ng6* with a roughly equal position, G. Ardelean−I.Chirila, Eforie Nord 2009 *)* 17...Nxf5?! *(17...Ne7* is a wiser choice, and here *18.Nxd6 Qxd6 19.Rd1 Qc6* leaves Black close to equality *)* 18.exf5! which gives White a great square on e4 for his knight and the possibility to break up Black's kingside with f6.]

13...Rfe8

[John Emms: 'If Black wants to activate a rook, isn't' 13...Rad8 John Emms: 'more desirable?' 14.Nh4 **Δ** ♘hf5 which is one of the main threats in this structure. *(14.−−;* . White might be better off playing *14.0−0* instead. *)*

A) 14...Nb4! . This seems to solve Black's problems. For example, 15.Bb1 *(*White should avoid *15.cxb4 Qxb4+ 16.Bd2 Rxd2! 17.Qxd2 Bxf2+ 18.Kd1 Qxd2+ 19.Kxd2 Bxg3 ,;* while *15.Nhf5 Nxc2+ 16.Qxc2 Bxf5 17.Nxf5 Qe6 18.0−0* reaches an equal position *)* 15...Qd6! 16.Nhf5 Nd3+ 17.Bxd3 Qxd3 18.Bg5 Nxe4!? 19.Qxe4 Qxe4+ 20.Nxe4 f6! etc.;

B) 14...Qc5 15.Nhf5 Bc4 16.Qf3↑]

[13...b5 14.Nh4 Bc4 15.Qf3**±** and White has achieved what he wanted.]

[Another idea for Black is to prevent Nh4 with 13...Ne8 , when again the knight is ready to hop into d6:

A) 14.0−0 Nd6 15.Re1 f6 16.Nh2 Rad8 17.Ng4 Qf7 18.Bb1 Kh8 19.Ne3 Rd7 20.b3 Rfd8 , as played in V.Nevednichy−L. Fressinet, Khanty Mansiysk 2007, provides a good demonstration of a successful Black strategy − White's kingside play has come to nothing and Black is slowly improving his position.;

B) . White needs more dynamism here, and his play in D.Howell−P. Svidler, Dresden Olympiad 2008, provides more of a challenge: 14.Ng5 Bd7 15.Nf5 Qf6 *(15...Bxf5 16.exf5* reveals the point behind moving the knight to g5, as the e4−square is now beckoning *)* 16.h4 *(16.Nf3* intending Bg5 followed by 0−0−0 is also possible *)* 16...Nd6 . [Huschenbeth,Niclas]

In the third round of the European Championship, I played against the Italian No. 1, Daniele Vocaturo. We had

once crossed paths before and before the game I remembered painfully how back then I had let him escape from a won position to a draw. **1.e4** Huschenbeth, Niclas **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4** The new popular variation is to play with 6.e5, but I had something different in mind. **6.b4!?** This is quite an aggressive continuation which can lead to unusual and highly complicated positions, which are difficult to navigate. Naturally, this makes it a great surprise weapon and perfect for preparation. The line became famous when Dubov beat Karjakin at the end of 2020 in a game that was for many the best of that year. My attention was drawn to it right before the tournament, when Christian Braun analyzed it in−depth in a CBM article and showed many pitfalls for Black. **6...Be7** A safe and practical choice which I was quite disappointed to see.

[6...Bb6 is the main move. After 7.e5 d5 *(7...Ne4* was Karjakin's choice in the aforementioned game against Dubov. After *8.Bd5 Nxc3 9.Nxc3 dxc3 10.Bg5 Ne7 11.0−0* White has a clear lead in development and Black has to fence off the white initiative. *)* 8.exf6 dxc4 9.Qe2+ Be6 10.b5 Black has different choices. After all of them, highly unusual and concrete positions arise which are difficult to play for both sides.]

7.e5 Ng4 This is a rare, but plausible move.

[7...Ne4 This is the main move, which leads once again to unclear play after 8.b5 Na5 9.Bd3 Nxc3 10.Nxc3 dxc3 11.Qa4 b6 12.0−0 As after 6...Bb6, White is two pawns down, but has excellent compensation in terms of better development and active piece play.]

8.cxd4 d5?!

[8...Bxb4+ "See check, give check" was the right strategy here. 9.Kf1 *(9.Bd2 Bxd2+ 10.Qxd2 d6* and Black has equalized effortlessly. *)* 9...d5 10.Bb5 0−0 11.h3 Nh6 12.Qb3 is Braun's recommendation in the aforementioned CBM article and would have been my choice. White has enough compensation for the sacrificed pawn, but not more.]

9.exd6

[9.Bb5 In my mind, this was just going to transpose to 8...Bxb4+ above. However, this time White can play Bxb4+ 10.Bd2! Bxd2+ 11.Qxd2 And Black cannot challenge the white centre with ...d7−d6 anymore. Bd7 12.Nc3 White has nice compensation for the sacrificed pawn and I would have preferred this over the game continuation.]

9...cxd6 Honestly, this came as a surprise to me. Black weakens his pawn structure, but on the other hand obtains a better grip on the centre.

[9...Bxd6 10.0−0 0−0 11.b5 Na5 *(11...Nxd4* was a line I calculated and does not quite work for Black: *12.Qxd4 Bxh2+ 13.Kh1 Qxd4 14.Nxd4 Be5 15.Be3 Rd8 16.Rd1+−* and somehow the white construction holds. *)* 12.Bd3 and with the awkwardly placed black knights, I was hoping for an advantage.]

10.a3!

[10.b5 Na5 11.Bd3 Be6 gives Black access to too many light squares.]

10...0−0 11.0−0 Bf5 12.Bb2

It was a big question, how I would develop my queenside minor pieces. I decided to put the bishop on b2, to protect the pawn on d4 as well as support a knight on e5 (after Black plays ...d6−d5). The bishop may seem passive, but could become a powerful piece later if the d4−pawn ever happens to move. **12...d5 13.Ba2 Nf6** The knight is not doing anything useful on g4, so Black brings it back towards the centre. **14.Nc3** Developing the knight to c3 rather than d2 is a much more active choice as the knight targets the d5−pawn as well as can turn into a possible nuisance for Black via a4−c5 later on. **14...Bd6**

[14...Bg4 can be answered by 15.h3! Bxf3 16.Qxf3 Nxd4 17.Qd1 White wins back the pawn on d5 and enjoys a nice advantage with the bishop pair in the open position. By the way, this line is the reason why I placed my bishop on a2 instead of b3. On b3 it could be exchanged now by the black knight.]

15.Re1 I was feeling quite optimistic at this point. I am controlling the e−file which Black cannot oppose at the moment due to the weak d5−pawn. Also, the option Nf3−e5 is looming. However, the computer is simply giving the position as equal as the black pieces are decently placed and besides the d5−pawn, there are no weaknesses. **15...a5 16.b5 Ne7 17.Ne5 Rc8 18.Rc1 Be6 19.Na4** During the game, I was not happy with this move. However, White does not have an advantage anyway.

[19.g3 is a sensible alternative.]

19...Rxc1 20.Qxc1 Qe8! I had missed this move, which forces my knight back to c3 and prevents it from continuing its path to c5. **21.Nc3 Qd8 22.Na4 Qe8 23.Nc3 Qd8** As we were getting lower on time, I repeated the moves once. Under the impression that I am better in the current position, I continued. Well, let's be honest: I would have also continued if I had thought the position is equal. **24.Qd1 Qb6 25.Qe2** The queen is protecting the pawn on b5 and thus, preparing Nc3−a4. **25...Rc8**

[25...Qxd4 is not advisable. 26.Nxd5+−]

26.Na4 Qc7 27.Bb3?! This is quite a slow move, preventing the invasion Qc7−c2 which had not to be feared anyway.

[27.Nc5 I would have liked to play this way, opening up the dark−squared bishop. However, the compensation seems to be not sufficient. Bxc5 28.dxc5 Qxc5 29.Nxf7 does not work due to *(29.h3!?)* 29...Bxf7 30.Qxe7 Qxe7 31.Rxe7 Rc2−+]

[27.g3 Ne4 28.f3 Nf6 29.Rc1 Qd8 30.Nc5 is one possible continuation. White's position looks attractive, but after Qb6 Black is very solid and White has a good amount of square weaknesses − the position is balanced.]

27...Ng6 At this point I started to feel uncomfortable. Suddenly Black has ideas like ...Ng6−f4 and ...Qe7, pressuring the vulnerable pawn on a3.

[27...Nf5!? was another option to eye the pawn on d4.]

28.g3! Giving the king some space and restricting the knight on g6. **28...Qe7 29.Nb6?** This is just not a good move. It would have been definitely the best practical choice to give up a pawn with 29.Nc5. Huschenbeth, Niclas: 'is a cute repetition.'

[29.Nc5! Bxc5 30.dxc5 Nxe5 31.Qxe5 Qxc5 32.Qf4
White threatens to take on f6 and open up the black king position. The strong dark−squared bishop compensates for the sacrificed pawn.]

29...Re8 For some reason, I did not even consider this move. I was expecting him to stay on the c−file when I could at least repeat the moves.

[29...Rc7 30.Na8 Rc8 31.Nb6 is a cute repetition.]

30.Qf3! Bg4? This does not work out for Black due to one specific detail.

[30...Bxa3 was the move I expected and feared. I had missed before playing 30.Qf3 that Black always has the intermediate move ...Qa3−b4, hitting my rook on e1.

A) 31.Nxg6 hxg6 32.Nxd5 Nxd5 33.Bxa3 Qxa3 34.Bxd5 Qb4! Black wins a pawn, but White still has enough play to equalize. 35.Rc1! Qxb5 36.Bxe6 fxe6 *(36...Rxe6 37.Rc8+ Re8 38.Rxe8+ Qxe8 39.Qxb7=)* 37.Rc7= White is active enough and the position is even.;

B) 31.Nxf7!! This is the computer's solution, but it definitely was not going to be mine. 31...Kxf7 *(31...Bxb2 32.Ng5 Qb4 33.Rxe6 Rxe6 34.Nxd5 Qe1+ 35.Kg2 Kh8 36.Qf5)* 32.Nxd5]

[30...Qd8! was best, but counter−intuitive as Black lets go of the pressure on a3. 31.Na4 Ne4∓ Black enjoys better piece placement and is more comfortable.]

31.Nxd5!

[Of course not 31.Nxg4?? Qxe1+−+]

31...Nxe5! This was my opponent's idea. Black temporarily gives up the queen and it becomes a tactical mess.

[31...Nxd5 32.Qxg4 is completely winning for White.]

[31...Bxf3 32.Nxe7+ Rxe7 33.Nxf3+− The knight protects the rook and White is a healthy pawn uo.]

32.Nxe7+ Rxe7 33.dxe5

[33.Qc3 White cannot keep the queen due to Nf3+ and Black wins.]

33...Bxf3 34.Re3! This is the move my opponent had missed in his calculations. Suddenly all three black minor pieces are hanging and Black has to give back the material. **34...Bxe5 35.Rxe5**
I was happy to offer the rook trade as it simplifies the position (important with little time on the clock!) and still gives me good chances in the resulting endgame. **35...Rxe5**

[35...Rd7 can be answered nicely by 36.b6! and the pawn on b6 becomes a target. Black cannot exploit the weak white back rank in the meantime.]

36.Bxe5 Now we have reached this minor piece endgame where I felt quite optimistic. In this open position the two bishops are certainly better than knight and bishop. Black has to act fast to create play and/or exchange one of the bishops. **36...Bd5?!** The bishop was well placed on f3, so there was no need to move it.

[36...Ne4! 37.Bc2 f6 38.Bc7 Nc3 39.Bxa5 Nxb5 Exchanging the weakness is beneficial for Black. White is a still bit better, but Black should be able to draw without major difficulties.]

37.Bd1? This move gives away the advantage for White.

[37.Bc2! Be4 and only now *(37...Ne4 38.Bc7* In comparison to the position with the bishop on d1, Black does not have the fork Nc3. *a4 39.Ba5±)* 38.Bd1 Nd5 39.Bd4 and White has good practical chances to win this endgame with the two bishops.]

37...Ne4 38.a4 Nd2 39.Bc3 Nc4? After this move, the black position is lost. The white bishops reign over the board and can easily attack weaknesses on both sides.

[39...Nf3+ does not amount to anything. 40.Kf1 Nxh2+ 41.Ke1 Black will lose the pawn on a5 and has a difficult defence ahead.]

[39...Bb3! We both missed this move. Black has a unique chance to split the white bishop pair and reach a drawn endgame. 40.Bxb3 *(40.Be2 Nc4* is a great setup for Black. *)* 40...Nxb3 41.Kf1 Kf8 42.Ke2 Nc5 43.Bxa5 Nxa4 44.Kd3 Ke7 45.Kd4 Kd6 White can keep trying for a bit longer, but a draw is the logical outcome.]

40.Kf1 f6 41.Ke2 Kf7 42.g4? The wrong pawn move. Advancing the kingside pawns is the right idea, but first f2−f4 was much better.

[42.f4 In hindsight, it is difficult for me to say what I disliked. Ke6 43.Kd3 g6 44.g4 f5 and we actually reach the game position.]

42...Ke6?

[42...g5! was strictly necessary to stop the white pawn expansion. After 43.Kd3 b6 44.Kd4 Be6 It's not immediately obvious how White can make progress. Yet, in a practical game I would rank the white winning chances still high.]

43.f4 g6?!

[43...Be4 44.Bb3 Kd5 45.Bxa5 White wins a pawn and should win sooner or later.]

[43...Kd6! 44.Kd3 Kc5 must be the best try to achieve some activity with the king. Still, I find it hard to believe that Black can survive after 45.g5+− The bishops should find a way into the black position sooner or later.]

44.Kd3 f5 Huschenbeth, Niclas: 'and we actually reach the game position.' **45.h3 Kd6 46.Kd4 b6**

[46...Be6 does not help either: 47.gxf5 gxf5 48.Be2 Nb6 49.Bxa5 Nxa4 50.Bb4+ Kd7 51.Ke5+−]

47.gxf5 gxf5 48.Bc2 For one, attacking the pawn on f5, but also threatening Bd3 and trapping the black knight which is surprisingly out of squares.

[48.Be2 Na3 49.Bd3 Bb3 is not convincing yet.]

48...Na3

[48...Be6 49.Bd3 Na3 50.Bb2+− White wins the knight and the game.]

49.Bxf5 Bb3 50.Bb2! A last precise move to not allow any counter chances.

[50.Bxh7 Bxa4 might also be winning for White, but the game continuation is much smoother.]

50...Nc2+

[50...Nc4 51.Bc1 and Black cannot move his minor pieces anymore.]

51.Kc3 Ne3 52.Kxb3 This is the easiest. The extra pawn combined with the weaknesses b6 and a5 on the dark squares guarantee White a simple win.

[For a moment I thought 52.Ba3+ was quite smart, with the idea Kd5 53.Bxh7 Bxa4 54.Kd3 and White threatens to take the knight on e3 and also a beautiful checkmate with Bf7−

g8. Fortunately I was not blinded by the beauty and realized in time that Black has Bc2+ 55.Kxe3 Bxh7 and it's a draw!]

52...Nxf5 53.Kc4 Ne3+ 54.Kd3 Nd5 55.Ke4 Kc5 56.f5 Nc7 57.Bd4+ Black is going to lose the b6−pawn as well and will not be able to cope with two white passers. Ultimately, this game was decided in two moments. First, my opponent miscalculating 30...Bg4 which led to a favourable endgame for me. Then, in the 39th move the missed the opportunity to split the bishop pair. The perfect start with 3/3 was a great start into the tournament and made up a solid foundation for my later qualification for the World Cup.

White reached the ideal pawns arrangement on both sides! Obviously, to this end, they sought from the very beginning of the game. Recently this is Nakamura's favorite setup against the Italian. **11.Bb3** A rare line. The point can be that after ♗e6, White can play ♗c2 to avoid the trades, but it's a pretty harmless line. **11...Be6 12.a5**

[12.Bc2 a5! Stopping white from the b2−b4 is a natural idea. 13.Nc4 (Svidler−Vidit, chess24.com 2020) Nxe4! An excellent temporary sacrifice that simplifies the game well. Black will have a fork. 14.Rxe4 d5! 15.Rxe5 dxc4 16.Re1 cxd3 17.Qxd3 Qxd3 18.Bxd3=]

[12.Nf1 d5! Once black can play well the d6−d5 move he solves the problem in the center.

12...d5 Allowing White to save the bishop, which would complicate the game.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5! 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3!? Rb8! 9.Bd3! This seems the best retreat for the bishop, as White can try to exchange pieces on either f5 or e4 later. The development of the c1−bishop might be a practical problem in some cases, but much will depend on whether Black is able to take the initiative or White to solve this issue.
9...Be7 Not the only move, but one of the most played.
[9...h6 has been seen in more games, but Black can wait a bit with this move.]
[and 9...Bd6!? looks an interesting option as well, as the bishop is generally better placed on d6, especially if Black achieves the f5− advance.]
10.Nc3 0−0 11.0−0

11...Rb4!! An important move! The rook is transferred to the kingside, where it will create some annoying threats. This is a nice way to arrange Black's forces, since c5−♗b7 is always possible as well, when the pressure on g2 becomes really unpleasant. **12.Qe2?!** As we will see, the queen is badly placed on e2.
[12.Re1 is another option: Rg4 13.Nge4 ½−½ Kurnosov,I (2579)−Kiselev,G (2434) RUS−ch Higher League 60th 2007 (1) *(13.Rxe5?*

Black would often like to open up the centre quickly (with the ...d5 break) against the uncastled king. With a knight on c3, White makes sure the centre remains closed and increases the chances of succeeding with a delayed−castling strategy.'
[First, let's see some alternative lines: 5.Nbd2 0−0 Martin Lokander: 'White can try to play a waiting game with' White can try to play a waiting game with
A) 6.Nf1?! is a common theme in this structure, but here it's simply a mistake since Black can play d5! 7.exd5 Nxd5 and have complete control of the centre. After Martin Lokander: 'and have complete control of the centre. −−− After' 8.Ng3 Black has many different options, but my favourite is the untried Na5!? . Obviously Black wants to take the bishop−pair and Martin Lokander: '. Obviously Black wants to take the bishop pair and' 9.Nxe5 is very risky because of Bb4+ when White has to lose his castling rights (although I'm not sure he wanted them in the first place). Black has more than enough compensation for a single pawn. 8...Bg4, as in A.Bayrak−E. Horn, Dresden 2004, is good as well. *(9...−−)*;
B) 6.c3 , but the move c2−c3 doesn't work very well in an open centre. Black doesn't have to shy away from 6...d5! , when he has absolutely no problems at all. Black has many different ways to play this type of position and I'd just like to show you an extract from K. Szczepkowska−J.Krecji, Pobedsky 2009, where Black managed to obtain a very nice initiative on the queenside with some creative play: 7.Bb3 a5 8.0−0 Bg4 9.Re1 b5!? 10.a3 d4 11.c4 b4 12.Ba4 Nb8! 13.h3 Bxf3 14.Nxf3 Nfd7 15.Bb5?! c6 16.Ba4 Qc7 17.Bc2 Na6 18.a4 Nac5 19.b3
and by this point it was clear that Black's creative strategy had succeeded very well. The game later ended in a draw, but his positional advantage here is beyond doubt.]
[5.h3 is a pet variation of GM Oratovsky. After 0−0 he plays 6.a3 which actually isn't bad. I like the continuation d5 7.exd5 Nxd5 8.0−0

Nb6 9.Ba2 Qd6!? . This will be followed by ...Be6 when Black has equalized, but the best player will usually win this type of position which might explain Oratovsky's success in this variation.]

5...d6 6.h3 0−0

[I would rather play 6...Na5 to gain the precious c4−bishop, but there's nothing wrong with the text move either.]

7.g4?!N Martin Lokander: '?!' '?!' Martin Lokander: 'It would be interesting to know what van der Wiel had in mind when he went for this caveman attack. [Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Be2
More consistent than allowing an exchange of his bishop.
[Earlier I annotated for you 7.Nxe5 , which doesn't promise any opening advantage. Fressinet, L (2707) − Efimenko, Z (2701)/Wijk aan Zee NED 2011/[Mikhalevski, V].]
7...d6 A solid move, which scores pretty well. Black is trying to return his extra pawn and simplify the position.
[7...exd4 is more popular and was tested at the top level. Here is an example, 8.Qxd4 Nf6 9.e5 Nc6 10.Qh4 Nd5 11.Qg3 g6 12.0−0 with compensation for the sacrificed material in Kasparov, G (2805) − Anand, V (2715)/Riga 1995.]
8.Qa4+
[8.dxe5 dxe5 9.Qa4+ c6 transposes to 8.Qa4.]
8...c6 9.dxe5 dxe5 10.Nxe5
White has won a pawn back, but the queen is misplaced on a4 and Black has easy development. The only drawback of Black's position is his knight on a5, but he can solve it by playing ...b5.
10...Nf6 11.0−0 b5 The most popular.
[11...Qc7 looks like a good alternative. It was tested in a recent game: 12.f4 0−0 13.Be3 b5 14.Qc2 Nabaty, T (2553) −Melkumyan, H (2642)/Golden Sands BUL 2012. Now I would like to offer Bd6! with the idea 15.a4 Bxe5! 16.fxe5 Ng4! with better chances for Black.]
12.Qc2 Qc7
[12...0−0 13.a4 Qc7 14.Nf3 a6 transposes to the text.]
13.Nf3 0−0 14.a4 a6 15.Nbd2
A novelty. White delays developing his dark−squared bishop.
[Earlier White played 15.Bg5 The best way to meet this move is h6 16.Bh4 Nh5 17.Bxe7 Qxe7 with roughly equal chances in Kurnosov, I (2550) −Kobalia, M (2644)/ Warsaw 2005.]
15...Bg4!= A logical developing move. The position is equal. **16.Ba3 Bxa3 17.Rxa3 Rae8** Black moves the rook away from the a−file and puts pressure on the e−pawn.
[It would have been better to play 17...Bxf3 18.Nxf3 *(* or *18.Bxf3 Rad8! 19.axb5 Rxd2 20.Qxd2 Nc4 21.Qc1 Nxa3 22.Qxa3 axb5=)* 18...Qe7! 19.Rfa1 Nc4! 20.R3a2 Qxe4 21.Bd3 Qd5 22.axb5 cxb5 23.Rxa6 Rxa6 24.Rxa6 Re8= with equality.]
18.Re1?! White misses his chance to seize the initiative.
[18.axb5! was strong.
A) After 18...axb5 19.e5! Black can't play Nd5 *(19...Nb7* is better, but after *20.exf6 Rxe2 21.Nd4 Re5 22.h3±* with the subsequent fxg7 White's chances are higher. *)* in view of 20.Ng5!+−

with a double attack on h7 and g4.; **B)** 18...cxb5! 19.e5! Bxf3! *(19...b4* The point of the previous move. *20.Ra4! b3! 21.Qd3! Rd8 22.Qxa6±* with a superior position for White. *)* 20.Nxf3 Nd5 21.Rc1 with just a slight edge for White thanks to his pressure on the a−file.]

18...Bh5

[After the correct 18...Bxf3! 19.Bxf3 Re5= Black is by no means worse.]

19.Bf1

[19.axb5!? is again answered by cxb5 *(19...axb5 20.Bd3 Nd7 21.Rea1 Nb7* is also playable. *)* 20.Bd3 Nd7 21.Rea1 Nc6 22.Rxa6 Nc5 23.R6a3 Bxf3 24.Nxf3 b4 25.cxb4 Nxb4 26.Qc4 Nbxd3 27.Rxd3 Rxe4=]

19...Nb7! Finally Black improves the position of the misplaced knight and equalizes. **20.axb5 axb5 21.Nd4 Nc5 22.f3 Nfd7 23.Raa1**

[23.Rea1! taking the a−file is a better try for the advantage.]

23...Ra8!= 24.N2b3 f6 Black vacates the f7−square for his bishop. **25.Nxc5 Nxc5 26.Nb3?!** After this inaccurate move Black could have started to fight for an advantage.

[The clever 26.Qf2!? was better.]

26...Qe7

[26...Nxb3!? 27.Qxb3+ Bf7 28.Qb4 Qe5 and Black is starting to take over.]

27.Nd4 Qc7 28.Nb3?!

[28.Qf2!? would transpose to 26. Qf2.]

28...Na4!? 29.c4?! White seems to lose the thread. Now Black obtains a passed pawn. **29...b4!∓ 30.Qd2 c5?!**

[30...Bf7! was strong, with the idea to meet 31.Qxb4? with Rfb8 32.Qa3? *(32.Rxa4* is better, but *Rxb4 33.Rxa8+ Rb8∓* and White has to fight to escape. *)* 32...Qb6+−+]

31.Qe3 Bf7

[31...Ra6!?]

32.Ra2 Nc3 33.Rxa8 Rxa8 34.Qxc5 Qxc5+ 35.Nxc5 Rc8?! This natural move is inaccurate.

[35...Kf8! was better. 36.e5 fxe5 37.Rxe5 g6 and Black is fine.]

36.Nb3?! White returns the favour.

[Both players seems to miss 36.Ra1! and Black still has to be accurate. Kf8 37.Ra5 Rc7 38.Kf2±]

36...Bxc4 37.Bxc4+ Rxc4=

Now the position is equal. **38.Kf2 Kf7 39.Ra1 Rc7 40.Ra6 Nd1+ 41.Ke2 Nb2 42.Nd4 Rd7 43.Ra2 Nc4! 44.Nb3 Ne5! 45.Ra4 Nd3 46.g3 g5! 47.Ra5 Ne5 48.f4 gxf4 49.gxf4 Nd3 50.Ke3 Nb2 51.Rd5 Nd1+ 52.Kd4 Re7 53.e5 Nc3 54.Rd8 fxe5+** The novelty 15. 8...a5!? This interesting move can be called, in fact, the main line, which came as a big surprise for me. [9...Bd6 was tested in the following game: 10.a3 a6 11.Ba2 Bf5 12.b4 Re8 13.Bb2 and Black came under pressure in Radjabov, T (2744)−Bacrot, E (2710)/ Khanty−Mansiysk 2011.]

10.Nxe5 The most principled move, but hardly dangerous for Black, and it should have been analysed by Bacrot.

[In the only preceding game White played 10.a3 but after b5 11.Ba2 Bb7 12.Nf1 *(12.b4* is better. *)* 12...e4 13.dxe4 Qxd1 14.Rxd1 Nxe4 15.Be3 Bd6! Black equalized in Movsesian, S (2715)−Bacrot, E (2705)/ Rogaska Slatina 2011.]

10...Bxf2+? A dubious idea, which led Black to a quick defeat.

[For a reason unknown to me Black rejected the obvious 10...Qd4! 11.Qe2 Nxe5 12.Nb3 Qxf2+ 13.Qxf2 Bxf2+ 14.Kxf2 Nxc4 15.dxc4 Bf5= and Black isn't worse. I can only guess that Black wanted to avoid simplifications which were likely to lead to a draw.]

11.Kxf2 Qd4+ 12.Kg3! Nxe5 13.Nb3 Qd6 14.Bf4 Nfd7 15.Qh5± White might still be in his preparation, and the position is already clearly better for him. **15...b5!** The only way to avoid big material losses. **16.Bxe5 Nxe5 17.Qxe5 Qg6+**

[17...bxc4 18.Qxd6 cxd6 19.dxc4± leads to an unpleasant endgame with an extra pawn for White.]

18.Kh2 bxc4 19.dxc4 Qxc2 20.Rac1 Qf2 Black has to stay on the second rank in order to avoid the loss of the c7−pawn. **21.Nc5!±** Black is under serious pressure, while the c−pawn is in trouble. **21...Qd2?!** This only worsens an already dangerous position, though Black's task isn't easy even with the best defence.

[After 21...c6 22.Re2 Qh4 23.b3± Black has serious problems with the development of the queenside.]

22.Rcd1! Qb4? The decisive mistake.

[22...Qf2 would have prolonged the fight, though I doubt Black could have escaped here either.]

23.Rd8! A simple but nice tactical blow, which finishes the game. **23...Bb7 24.Rd7!+−** The point of White's combination, he threatens 25.Ne6! Now Black can't stop White's attack without losing material. **24...Qxc4**

[24...Qb6 , which prevents 25. Ne6, loses to 25.Re3! Bc8 26.Rg3 Qh6 27.Ne6! g6 28.Nxf8 Qxf8 29.Rxc7+− with a decisive material advantage.]

25.Nxb7 White is a piece up and the rest is easy. **25...Qxa2 26.Rxc7 h6 27.Nd6 Rab8 28.Nf5 Qxb2 29.Rc3 f6 30.Qg3** The obvious reason for Black's loss in the game was his unjustified attempt to complicate matters by any means with 10...Bxf2? He would have been fine after 10...Qd4. So despite disastrous statistics in this line I expect more attempts to prove that Black's position is playable.

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 d5 An extremely rare continuation.

[4...Nf6 5.e5 d5 6.Bb5 is a much more common move order to reach the same position as after White's 6th move.]

[4...Bc5 Cobb, J (2318)−Adams, M (2745) / West Bromwich ENG 2002/ [Nigel Davies].]

[4...Be7 Wagner, R−Meier, D/US Amateur West Ch. 1999/[Paul Motwani].]

5.Bb5

[The more principled continuation would be 5.exd5! Na5 6.Bb5+ c6

7.dxc6 bxc6 8.Be2±]

5...Nf6

[5...dxe4! 6.Nxd4 Nf6! is better for Black as 7.Nxc6 can be met by Qxd1+ 8.Kxd1 a6! 9.Ba4 Bd7∓]

6.e5 I wonder whether this was the real move order in the game. **6...Nd7!?** Once again a rare choice from Sokolov.

[6...Ne4 is the main line. Zelcic, R (2531)−Ivic, M (2186)/Omis CRO 2004/ [Nigel Davies].]

7.0−0 Be7 8.Re1

[The main alternative is 8.Bxc6 bxc6 9.Nxd4 Nb8 10.Nc3 though the position which arose in the game is similar.]

8...0−0 9.Bxc6 bxc6 10.Nxd4 Nb8! Black protects the c6−pawn and prepares ...c5 followed by ...Nc6.

11.Nc3?! A wrong move as the knight comes under attack from the d−pawn.

[11.Qf3 is the main line. c5 12.Nf5 Bxf5 13.Qxf5 Qd7 *(13...Nc6!?)* 14.Qxd7 Nxd7 and Black experienced no problems in Rogers, I (2565)−Short, N (2680)/Tilburg 1992.]

11...c5 12.Nde2?! d4∓ After a few inaccurate moves from White Black has seized the initiative. So the opening choice turned out to be very successful.

13.Ne4 Nc6 14.Bf4 Bf5 15.N2g3 Bg6 16.Qf3 Qd7 17.h4! h6 18.h5 Bh7 19.c3!?

[19.Nf6+!? was interesting, but Black seems to consolidate after gxf6 20.exf6 Bxf6 21.Bxh6

19...Rad8

[I like 19...Rab8!? 20.b3 Qe6 preventing ideas with Nf6, while 21.Nd6 is not dangerous in view of Rb6 22.Nc4 Ra6∓]

20.Rac1 White is preparing 21.cxd4.

[20.Nf6+ still seems to be in Black's favor. gxf6 21.exf6 Bxf6 22.Bxh6 Qd6! 23.Bxf8 Kxf8!? 24.Ne4 Bxe4 25.Rxe4 Ne5∓]

20...d3! 21.Nd2

[or 21.Rcd1 c4∓]

21...Rfe8

[21...Qe6!?∓]

22.Ngf1 It's important for White to block both the d and c−pawns and keep his e5−pawn protected. **22...Qe6**

[22...a5!?∓ with the idea of ...a4 deserved attention.]

23.Qg3 Protecting the e5−pawn White prepares 24.Ne3. **23...Bf8** Black's advantage is beyond question, and his only problem is to break through White's defense. **24.b3 Kh8**

[The immediate 24...Ne7 with the idea of ... Nf5 deserved serious attention. 25.Ne3 Nf5 26.Nxf5 Bxf5 27.Ne4 Kh8∓]

25.Nc4 Ne7! 26.Bd2 Qf5 I think it wasn't necessary to unblock the e−pawn.

[26...Nf5!?∓]

27.Qh2

[White could have taken advantage of Black's last move by means of 27.e6! fxe6 28.Qxc7 Nd5 29.Qh2 obtaining some counterplay.]

27...Nd5 28.Nfe3 Nxe3 29.Rxe3 Be7

[29...Qe6!? would be more flexible.]

30.Rce1

[Once again 30.e6! fxe6 31.Rce1 allowed White to create counterplay.]

30...Bg5?! The trade of the dark−squared bishops is in White's favor.

31.Rf3 Qe6 32.Qg3

[32.Bxg5! hxg5 33.Rd1= would be better.]

32...Bxd2 33.Nxd2 Rd5 34.Rfe3

[34.c4!? Rd4 35.Rf4 was a reasonable alternative.]

34...Red8 35.Qh4 Bf5 36.f3 Qa6 37.a4 Qa5 38.Rc1 Be6 39.Qf2 R5d7

[39...Qb6!?∓]

40.Qh4 Bf5 I'm pretty sure the last moves were made in mutual time trouble, so it's not necessary to focus on them. Anyway, not much happened since the exchange of the dark−squared bishops.

41.Qf2

[White could have thought of counterplay on the kingside. 41.g4!? Bh7 42.f4=]

41...Be6?! Underestimating White's counterplay.

[41...Rb8 with the idea to meet 42.g4 *(42.e6!?)* with 42...Be6∓ was better.]

42.f4! Bg4?!

[42...Bf5 43.Qf3 c4! 44.Nxc4 Qc5 45.Rd1 Rb8= allowed Black to create counterplay on the queenside.]

43.f5! Now White seizes the advantage.

43...c4! 44.b4

[After 44.Qf4! Black has to play

A) 44...Be2 is bad in view of 45.f6± with a strong attack.;

B) 44...Bxh5 is also dangerous in view of 45.Rh3! *(45.b4 Qxa4 46.g4 Qc2!! 47.Ree1 Bxg4!* looks ok for Black. *)* 45...Be2 46.f6± with an attack.;

EU−ch 15th Yerevan (10) 13.03.2014
[Bartel,Mateusz]

This game was played in the 10th round of the EU championship in a so−called must−win situation. Both players were at

+3 at that moment and even 1.5/2 could be isufficient to qualify for the World Cup. **1.e4** Bartel,M **1...e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 a6 6.Bb3 Ba7 7.Nbd2** White is trying to delay short castling, to see what Black would do. In such positions early castling can be met with quick counter−action like h6−g5. **7...h6 8.h3 d6 9.Nf1 Be6** This set up − ♗a7, d6, ♗e6 − isn't the most common for Black. At the same time it's absolutely ok and has some pluses − Black still keeps an option to castle long, which sometimes can be really useful. **10.Ng3**

[10.Bxe6 fxe6 11.Qb3 Qc8 seems to be ok for Black.]

10...Qd7 Up to now both sides were playing more or less normal moves. Starting from now my opponent became a bit over optimistic and his position quickly became much worse. **11.Ba4?!**

[A more natural move was 11.Qe2 0−0 12.0−0 Rfe8 13.Be3=]

11...b5 12.Bb3 Well, White's plan, to force Black to play ...b5, was just a waste of time. **12...d5 13.exd5?!**

[Another option was 13.0−0 0−0 14.Qe2 Rad8 with a more or less equal position, however I prefer Black.]

13...Nxd5 14.0−0 0−0 15.Re1 Rae8!∓ I was very proud of this move, as it protects the e5−square, not weakening the position.

[15...Rfe8 was much worse, as White can take the pawn: 16.Nxe5 Nxe5 17.Rxe5 Nxc3? 18.bxc3 Bxb3 19.Rxe8+ with check!]

16.a4

[16.Qe2? Nf4]

[Playing 16.Bd2 would mean he needed to calculate lines like this: Nf4!? 17.Bxf4 exf4 18.Ne2?! *(18.Ne4 Bf5)* 18...Bxh3!→]

16...b4! 17.a5? This is a positional mistake. At the first sight it seems that White has good prospects on the a4−e8 diagonal, but in fact, it is Black who gains a pawn for almost nothing.

[17.Qc2! was better: Nf6 (to protect the e5−pawn) *(17...a5 18.Bc4 f6 19.Bb5±; 17...Rb8 18.Bc4 Rfe8* what would lead to an extremely complex position: *19.Nxe5 Nxe5 20.Rxe5 bxc3 21.bxc3 Nxc3 22.Rxe6 Rxe6 23.Bxe6 fxe6)* 18.Bxe6 Rxe6∓]

17...bxc3 18.Ba4 f6?

[Too safe. Much better was 18...Rb8! , but it requires serious calculations: 19.Nxe5 Qd6 20.Nxc6 cxb2 21.Rb1 bxc1Q 22.Rxc1 Qxg3 23.Nxa7 Qg5 and pressure on the kingside provides Black an advantage − it seems that White will lose at least his h3−pawn.]

[There was also the interesting option to play 18...Bxh3!? , but I didn't take it too seriously during the game. However, it was worth checking, e.g. : 19.Bxc6 *(19.gxh3? Qxh3 20.Bxc6 cxb2! 21.Bxb2 Nf4 22.Nh2 e4! 23.Bxe4 Qxg3+ 24.Kh1 Bxf2−+)* 19...Qxc6 20.gxh3

A) 20...Qg6!? 21.Kf1 Qe6 22.Ng1 *(22.Kg2? cxb2 23.Bxb2 Nf4+−+)* 22...Bd4 23.bxc3 Bxc3 24.Ba3 Ne7 and Black is better;

B) 20...cxb2?! 21.Bxb2 Nf4 22.Bxe5 Nxh3+ 23.Kg2 Bxf2∞;

C) 20...Nf4 21.Bxf4 exf4 22.Ne4 c2 23.Qc1 f5 24.Ned2 Re3!→]

19.Ne4! This strong move keeps the tension on. **19...c2!?** It was my idea

when I played 18...f6. **20.Qxc2 Ncb4 21.Qd1?** This is too passive and Black keeps an advantage.

[He had to play 21.Qc4! c6 and now after 22.d4 White would be absolutely ok.]

21...c6∓ Now Black is better again, mainly because of d3−pawn, which should be weak forever (or until it dissapear). To make any progress Black needs to re−group his forces and for the next few moves this is what I was trying to do. **22.Bb3 Rd8 23.Ra3 Rfe8 24.Bc4 Nc7**

[24...Nf4 was also an option.]

25.Qb3 Nbd5 26.Ra1?!

[There was no reason to withdraw the rook without it being attacked, so something like 26.Bd2 was slightly more logical.]

26...Rb8 27.Qd1 Red8!∓ Now all the black pieces are well posted, so we are about to see some action. **28.b3 Nb4 29.Be3 Bxe3 30.Rxe3 Bxc4 31.bxc4 Nxd3** So, after some logical moves Black has got a pawn up. The position is close to winning, but because of the weakened structure on the kingside, there can potentially appear some difficulties. **32.Nh4 Nf4 33.Qc2 Nce6** Here I was sure, that the game must be over soon. **34.Rg3** Creating some threats. **34...Ng5?** Too slow. It was the moment to strike.

[34...Qd4! was very attractice, but it's always difficult to give up a pawn in front of your own king. After 35.Nxf6+ *(35.Re1? Rb2; 35.Rf1 Ng5−+)* 35...Kf7 36.Rf1 *(36.Qf5 Qxa1+ 37.Kh2 Rd1−+)* 36...Kxf6 37.Rg6+ Kf7 38.Qf5+ Kg8 39.Rxe6 Ne2+ 40.Kh2 Qxh4 Black would be winning.]

35.Re1 Nfe6?

[For the second time in a row, I chose not the most concrete move. It was better to play 35...Qd4 with the obvious idea ...♖b2. However, I missed that after 36.Nf5 Qb2 37.Nxh6+ Black has the simple Kf8! 38.Qxb2 Rxb2 with a winning position as the white position is too "hanging".]

36.Nf5 Nxe4 37.Qxe4 Ng5 38.Qc2

[Being short on time my opponent didn't play 38.Nxh6+ which represented a good chance. After gxh6 39.h4 I'd be forced to play f5□ 40.Qe2 f4 41.Rg4 Qf5 and Black would still be better.]

38...Qd2! After a few blunders, I have finally chosen the right way to cash in on my advantage. **39.Nxh6+ Kf8 40.Qxd2 Rxd2∓ 41.Nf5** Now Black is much better, because the doubled rooks on the second rank are seriously powerful. Unfortunately, it's not that easy to win it and I even didn't manage to pose real problems to my opponent.

41...Rbb2?

[41...Ne6 was much better.]

42.h4?

[White had a great chance to play the simple 42.Nxg7! . Now Black must play Rxf2 and after 43.Nh5 *(43.Rd1!?)* 43...Rxg2+ does not work because of 44.Rxg2 Nf3+ 45.Kf1 Rxg2 46.Re3 Rg5 47.Rxf3 Rxh5 48.Rxf6+=]

42...Ne6∓ Now, again, Black is much better, if not winning. **43.Rf3 Kf7?!**

[43...c5!? was better, slowly preparing progress. Having the pawn on c5 Black has a very simple plan −

to play ♖dc2. The pawn on c5 would allow him to meet any counterplay on the d−file with ...♘d4!]

44.c5 Nxc5?

[Not for the first time I played very carelessly. The most tempting 44...Nd4 45.Nxd4 exd4 46.Rf4 gave White some chances to save the endgame.]

[But the paradoxical 44...Kf8! would keep the advantage. Why should Black put his king back to f8? The explanation is simple − to prepare ...♖b5. The funny thing here is that White has nothing he can do, so Black can do what he wants.]

45.Rc1 Rdc2?

[The final mistake. I should have played 45...Rb5! and after 46.Rfc3 Nb3 47.R1c2 Rxc2 48.Rxc2 Rc5 49.Rb2 Rc3 Black would have every chance to win the endgame.]

46.Rxc2 Rxc2 47.h5! Now Black is a pawn up, but White has serious counterplay against the g7−pawn.

47...e4

[47...Ne6 48.Rb3]

[47...Rb2 48.Rc3]

48.Rg3 Ne6 49.Nd6+ Ke7 50.Nf5+ Kf7 51.Nd6+

[At first sight 51.Nxg7? could be very strong, but this time it' does not work: Nxg7 52.h6 Nf5 53.h7? *(53.Rg7+!* would give some chances to hold the rook endgame after *Kf8 54.Rg6 Nxh6 55.Rxh6 Kg7)* 53...Nxg3 54.h8Q Rc1+ 55.Kh2 Rh1+−+]

51...Kf8 52.Nxe4 Rc1+ 53.Kh2 Rc4 54.Re3 Now the material is equal, so in a few moves we agreed to a draw.

Niteroi op 2nd (5) 04.09.2022

[Di Berardino,Diego]

This game, against a strong GM and a friend whom I have a poor score, was played on table 1 of Niterói Chess Open, an important event in the Brazilian chess calendar. **1.e4 e5 2.Nf3 Nc6 3.Bc4** The Italian Game was no surprise... **3...Bc5 4.d3 Nf6 5.0−0** But I was expecting some line with the pin Bg5, which Fier had already used many times.

[5.c3 d6 6.Bg5 has been played by my opponent.]

5...d6 6.c3 a6 7.a4 Ba7 8.Re1 Therefore, we have a more traditional Italian, where both sides have many plans, the game has an unforced character and there are many hidden subtleties. **8...0−0 9.h3 Ne7** This is a common maneuver in these positions: the knight goes to g6 where it defends on e5, clears the way for the c−pawn and one day it may jump to f4.

[9...h6 is played most often.]

10.d4 White immediately creates tension in the center. **10...Ng6 11.Nbd2 exd4** I suspected this trade was a little premature, but my opponent was playing fast and wanted to get out of the beaten path.

[11...c6 preparing d5 has been played several times.]

[11...h6 or]

[11...Re8 are possible too, leading to positions that can come from several move orders, something typical of this opening]

12.cxd4 Re8?! But this seems to be dubious novelty.

[12...d5 13.exd5 Nxd5 14.Ne4 c6 15.Bg5± and white has some initiative, for example: Ding,L (2791)−Leko,P (2663) chess24.com INT 2020, 1−0 (65).]

[12...c6 13.Bd3 Nh5 seems more logical. In many positions, black can play d5 and answer e5 with f6, so the

rook looks best placed on f8.]

13.Bd3 Prophylactic against d5.

[13.e5 dxe5 14.dxe5 Nd5 15.Ne4 Be6 16.Neg5 c6 17.Nxe6 Rxe6± and white has slight pressure, but black is very solid.]

13...Nh5 14.Bf1 A bishop on f1 is usually good against a knight on f4, but another good possibility would be the knight maneuver for g3.

[14.Nf1 Nhf4 15.Ng3! Nxd3 16.Qxd3± and white has good possibilities in all sectors of the board, despite black's pair of bishops.]

14...Nhf4 15.b4± White has a space advantage on the queenside and in the center and black's initiative on the kingside is well controlled. **15...d5**

[15...Bd7 16.Nb3 h6 17.Qc2± it was possible, but white has the advantage and good plans at his disposal, for example: playing for b5 or Be3 with the idea of pressure on the c−file.]

16.e5 f6?! This reaction would be more effective with the rook on f8, now white can have a big advantage.

[16...Qe7 would be better, but after 17.Qb3 Bf5 18.Bb2± followed by Re3 and Rae1. White is better, although black remains solid.]

17.Nb3! Making way for the bishop, for the queen and looking at the c5 square.

17...Bf5

[17...fxe5 18.dxe5 Rf8 19.Be3± with domination of the d4−c5 complex of squares and paralysis of the black pawn majority on the queenside.]

18.Bxf4

[The simple 18.Nc5! was better: Bxc5 19.bxc5 Ne6 *(19...fxe5 20.Nxe5!+−)* 20.Ra3! c6 21.Rae3± with total domination.]

18...Nxf4 19.Qd2 Ng6

[Of course not 19...fxe5?? 20.Rxe5! Rxe5 21.Qxf4+−]

20.Bd3? This is a serious mistake that will lead, after a sequence of forced exchanges, to a dangerous position for white, where the bishop on a7 could become a monster...

[20.Nc5! Bxc5 21.bxc5 c6 22.exf6 Qxf6 23.Ra3± with a very good position: this rook can go to b3 or e3. Black's queenside is frozen and dark squares are weakened.]

20...Bxd3 21.Qxd3 fxe5 22.Nxe5

[22.dxe5 Nf4 23.Qd2 Rf8↑ with a dangerous initiative.]

22...Nxe5 23.Rxe5 Rxe5 24.dxe5 c6 Stabilizing the structure and releasing the queen. Black now has strong pressure on the dark squares and and white has to play very precisely and carefully to keep the balance. **25.g3?** White avoids Qh4 and gives the king an extra square, but this puts white on the brink of defeat.

[25.Qd2! was necessary, defending the critical points b4 and f2. Qh4 26.a5! To ensure the stability of the knight on c5. Qc4 *(26...Rf8 27.Nc5!=)* 27.Nc5! Bxc5 28.bxc5 Qxc5 29.Rb1 Rb8=]

[25.a5! Qh4 26.Qd2!= leads to the same position.]

25...Qb6?

[The super accurate 25...Qf8! would lead to an irresistible attack: 26.Qd2 Qf5! 27.Re1 Rf8! *(27...Qxh3?! 28.Nc5∓)* 28.Nc5 *(28.Re2 Qf3 29.Nc5 a5!−+)* 28...a5!−+]

26.Qd2 Rf8 27.Rf1?!

[27.Ra2! Qc7 28.Qe1! with the idea of Re2 and white can defend.]

27...Qc7! 28.Qg5? The decisive mistake.

[28.Nc5! a5! 29.Kg2! *(29.Ne6? 28...h6 29.Qh5 Qb6! 30.Qg4!? Putting one last trap. **30...a5!** A nice move to destabilize the knight, as we've seen in many variations.

[30...Rxf2? would throw away the victory: 31.Nc5! Rxf1+ 32.Kxf1 a5 33.Qc8+ Kh7 34.Qf5+=]

31.Nc5 Qxb4 32.Qe6+ Kh7 33.Nd3 Qb3 34.Qe7

The first and most important problem is how to play against the World Champion with Black? It is an important part of chess psychology as in womens chess it is more important than knowledge of long lines. The preparation was to play with Black very aggressively, not taking a step back! The motto was RUSSIANS AND TURKS NEVER RETREAT! Geoffrey Borg, chief of FIDE Grand Prix gave good advice, explaining, that Hou Yifan plays technical positions like a computer! So, there is no other way of playing her, than to try be better prepared in the opening and to conduct a very active strategy at every moment. Betul, you have nothing to lose, every result is good; it's a great honour to play the World Champion and every positive result will be a huge boost for you. **1.e4 e5 2.Nf3 Nc6 3.Bc4** Hou Yifan is by far the best female specialist in the Spanish, but as she is was preparing for the the match for the World Championship against Humpy Koneru, I recommended her to change it immediately! and to be very careful not to show her preparation. So, she has chosen the so called GIUOCO PIANO in recent competitions, where opening knowledge is not that important. Events are slowly developing and there is no danger of meeting any surprise opening preparation. **3...Nf6 4.d3 Be7 5.Bb3 0−0 6.0−0 d6 7.c3 Na5 8.Bc2 c5 9.Nbd2 Nc6 10.Re1**

[Somebody offered a change of direction here: 10.a3!? preparing b2−b4, which in my opinion is worth trying.]

10...Re8 Aleksander Beliavsky's favourite plan.

[It is more common to protect the e5−pawn differently, preparing for a central break. Betul has great practice in similar structures, which she defended well including some moments against such top players as

Aleksandra Kosteniuk and Tatiana Kosintseva. 10...Qc7]

11.Nf1 h6 12.h3 Bf8 Now after the pre−prepared setup is completed, Black is ready to counter in the centre with ... d6−d5. **13.N3h2?!** To be honest − this is a strange way to handle the classical Spanish position, but this move has been used by such experts of these lines as GMs Yudasin and Nevednichy! To move the knight from the centre is wrong, up to the moment, when the centre is closed or defined, like in classic games of Fischer, who introduced this knight manoeuvre to modern practice.

[There were two options which still

kept Black's advantage: 27...Nf4]
[27...Qa5]

[Srinath,Tanmay]

In my first All in One for Chessbase, I wanted to take the bull by the horns and try to refute the Berlin Defence. I had already tried something with a survey article in CBM 193 with the 5.Re1 variation. Back then, I wrote that 4. d3 is

not best, but almost two years later, changes in theory and the advent of newer and stronger engines has made me change my stance a little bit. For this, I have chosen what I feel is one of the most brilliant games in correspondence in recent times. White not only got something against the Berlin Wall, he tore it down to score what might be a championship defining win. As I write this, GM Christian Muck had scored another very important win in the main line of the 9.d4 Closed Ruy Lopez (The topic of my next All in One :)). A +2 score is almost impossible in any decent correspondence event, let alone a World Championship, so it seems that this might be the game that decides a new World Champion in correspondence chess! **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6** This Kramnik discovery has stood the test of time like no other opening in chess history. We have always had trends in chess. There was a time when the Zaitsev variation was incredibly popular thanks to Karpov. Or the Archangel thanks to Shirov and Anand. The Marshall Gambit has perennially stayed at the very top of the game. However, none of them can possibly come close to matching the sustained popularity of the Berlin. This is so sound that already on move 4 modern engines feel that the best way for White to play is 5.Re1 and the the rest are just dead equal :). Well, let's try and change that! **4.d3** My coach Shivananda always told me that 4.d3 was the best way to get a complex game as White. I always disagreed because I didn't really see the point of playing this with the bishop on b5. One of the many reasons why the Quiet Italian has become popular again is because of the insane number of unexplored lines and possible move orders. Also because with pawn d3, the bishop on c4 makes a lot more sense. However, after numerous correspondence games, I now feel that 4. d3 does have its place in respectable tries at the very least. **4...Bc5**
By and far the main line. There are other options as well.

[4...d6 was popularised by Magnus recently when he crushed Alireza Firouzja in Wijk Ann Zee. It is also recommended by Priyadarshan Kannappan in his book about the Berlin for Thinkers Publishing.

A) 5.0−0 Here we have a further split −

A1) 5...Be7

A1a) 6.h3 Seems a bit too slow to me. Black didn't try to punish it with a kingside attack, though I would be tempted to go all Kramnik here with some g5 ideas. Instead after a6 *(6...Rg8?* is what I wanted to do, but the machine points out that after *7.d4±* White crashes straight through in the centre. Moral of the story − wait for more commitment! *)* 7.Bxc6+ bxc6 8.Nbd2 0−0
We see that White's setup makes some sense, but Black also stays really solid. 9.Nc4 h6 10.Ne3 Be6 ½−½ (25) Szafraniec,T (2443)−Colin,S (2429) ICCF 2019, with a very comfortable position for Black.;

A1b) 6.Re1 0−0 7.c3 a6

8.Ba4 b5 White has tried both retreats here, but I quite like 9.Bc2!? with the idea of preventing Black's main plan of ♘a5 and c5. Play may now go *(9.Bb3 Na5 10.Bc2 c5* Black adopts the Chigorin Defence formation. Here it makes much more sense because White has lost some tempi compared to the original version. *11.Nbd2 Re8 12.Nf1 Nc6 13.h3 h6 14.Ng3 Be6* ½−½ (33) Hacker,C (2505) − Kevicky,M (2408) corr ICCF 2018: we get a Chigorin Ruy Lopez where White hasn't committed to d4 just yet, but he has to on the next move and that will allow simplifications. *)* 9...d5 10.Nbd2! This is better than taking on d5 immediately because it forces Black into a non−optimal arrangement of pieces. dxe4 The downside is that Black gets a pawn split, which in correspondence chess means White can't win so easily, but in OTB it really doesn't matter. For example − 11.dxe4 Be6 12.a4 Qb8 13.Qe2 Qb7 14.b4± Hall,R (2620)−Iotov,V (2572) ICCF 2015, with a small advantage.;

A2) 5...Bd7 6.c3 g6 Black generally does this. The point is that White is no real position to contest the ideal piece placement that Black has to go for. 7.Re1 Bg7 8.Ba4 0−0 9.Nbd2 Nh5 10.Nf1 Kh8 11.Ng3 Nxg3 and here I want to suggest an improvement over Oreopoulos−Percze ICCF 2018 12.hxg3!N Bg4 13.Qc2±;

B) 5.c3 Statistically this move scores the best. 5...g6 6.d4 Perhaps the best move here. Despite the tempo loss White has to try and punish Black for his lag in development. Bg7 *(6...Bd7!?* Seems like Black's best move, though after *7.Bd3! Bg7 8.0−0 0−0 9.h3!±* White will have some pressure. *)* 7.d5! This move gets a favourable King's Indian style position. a6 Creating a hook on the queenside. 8.Bd3 Ne7 9.c4 Here Black has to improve over previous correspondence games with Nh5 *(9...b5!?* is my attempt to play dynamically for equality. But it doesn't quite work − *10.Nc3! 0−0 11.0−0 Rb8 12.h3!?±)* 10.Nc3 Nf4 ½−½ (52) Winter,L−Jung,R (2262) ICCF email 2017; here I propose that we keep the double bishops with 11.Bf1!?N and Black is under some pressure here. Maybe he is fine after 0−0 12.g3 Nh5 *(12...Nh3* Allows White to play for an advantage − *13.Ng5! Nxg5 14.Bxg5 h6 15.Be3 f5 16.f3±* We have a KID style setup, but White hasn't castled yet and that gives me great confidence for the game ahead. *)* 13.Bg2 But I would definitely take White here because my king is so much safer compared to regular KID lines. For example b5! is basically Black's only move to play for equality, and if nothing else

after 14.0−0! bxc4 15.Nd2±
White will have annoying pressure on the queenside, while I don't see anything crushing on the kingside.]
[4...Ne7!? I didn't even know such a move existed, but generally this is desirable in the Italian/Ruy Lopez complex. Many times Black's knight on c6 is not so well placed. You know the best part? This move is also almost fine for Black! #ChessisaDraw! 5.Nc3 Possibly the best move. White just develops. c6 6.Bc4 d6
Black tries to play it like a Philidor, but the Philidor is bad! *(6...d5?!* is consistent but too ambitious − *7.exd5 Nexd5 8.0−0!±* and White has a massive lead in development. *)* 7.d4! I think this is the best way to put pressure on Black. exd4 8.Qxd4 Ng6 Boccia−Genga ICCF 2020. Here I propose the aggressive 9.Ng5!?N as an improvement. For example − Ne5 10.Bb3 h6 11.Nf3 Black is behind in development and has to watch out. Nfd7! The only move, but really consistent with Black's "You can't hurt me" strategy. 12.Be3 Delaying castling. We can go long if we want, and then it will be a real fist−fight! Be7 13.0−0−0∞
with a massively unclear position. The computer at low depths thinks Black is fine, but I have seen such positions before and it's really not so easy to assess. It will come down to a battle of skill.]
[4...Bd6 is another ridiculous move that actually seems to not lose on the spot. This is one of the potential problems of 4.d3 − since it's so slow many moves are possible. 5.c3 0−0 6.0−0 a6 7.Ba4 Re8 Dunlop−Dutra ICCF 2020. Black will regroup with ♗f8 and have a very harmonious build−up if left undisturbed. Here I want to propose the following move − 8.Bg5!? h6 9.Bh4 This pin is going to be really annoying for Black. For example − Be7 is probably best. White's bishop wants to go to c2 anyway, so forcing it there and allowing White to gain queenside space with a4 is probably too cooperative. *(9...b5 10.Bc2 Be7* seems like the natural way to proceed, but White has *11.a4! b4 12.a5!±* with a vastly improved version of the a4 Anti Marshall. *)* 10.Bg3!
A neat regrouping. d6 11.h3 Nh5 12.Nbd2! I like this move, which creates attacking chances for White. Nxg3 13.fxg3 Be6 14.Kh2!?↑
White has some clear targets to play for, while how Black gets his counterplay is unclear to me.]

5.c3 Considering Muck won with this move, I am going to call this the best try for White.

[5.Bxc6 Was the main line for quite a long time. Even now it is very popular in games between humans, but in correspondence a lot of things have been worked out. I understood only when preparing this survey how deeply the Berlin has been explored in correspondence chess − so many games! dxc6 6.Nbd2 This is what I feel White should try if he goes for this variation.

A) 6...0−0 7.Qe2 Re8 *(7...Nd7* transposes to the main line after *8.Nc4)* 8.Nc4 Nd7 9.Bd2
I would call this the critical position

if Black castles. There have been numerous tries here. OTB and correspondence games paint contrasting pictures. While White is winning many games here in human encounters, Black has a plus score in correspondence. All in all this tells me that this this position is still not understood by either humans or engines, and it is a realm of rich possibility. b5 10.Ne3 Bf8! This is one of the best ways Black can regroup. The knight will come to e6 and Black's king looks totally safe to me. 11.h4!?
A correspondence game between two strong players in 2019 went like this. I see no reason to deviate. Nc5 12.h5!? White goes for it, which is what he should be doing. a5! Black's play is not to be underestimated. 13.g4 a4 14.Nf5 Ne6 15.Be3 a3! just in time! 16.b3 Bb4+ 17.Kf1 c5∞ Schilcher,A (2567)−Neß,H (2540) ICCF 2019: with a 3 result game that later ended in a draw.;
B) 6...Be6! This is the problem with this line. I had seen one of Caruana's beautiful wins vs Nakamura in 2016 and picked this line up, but a Kramnik game here showed me that things are not as one sided as they appear to be. 7.Nb3 Probably White's best try.I don't want to go short as Black has the option to go long castling and start throwing pawns. Bb6!
What Black did in this game looks very convincing to me. *(7...Bd6!? 8.Na5 Rb8∞* feels too artifical. The knight can't be kicked back so easily and Black doesn't have the option to go long castling. *)* 8.Nxe5 Bxb3 9.axb3 Qd4! Black equalises by force − 10.Ng4 Nxg4 11.Qxg4 Qxf2+ 12.Kd1 0−0 13.Ra4 f5!
If Black knows this he is fine − 14.exf5 Qxf5 15.Re1 Qxg4+ 16.Rxg4 Bc5 White gets some temporary initiative but it soon subsides − 17.Bh6 Rf7 18.h4 a5 19.h5 Bd6 20.Ree4 Raf8=
and a draw was agreed in Komaromi−Hengl ICCF 2020. White can't make any progress and only now does my computer understand that there is no advantage here.]
[5.Nbd2 seems like a clever way to get the ♗xc6 line without allowing ♗e6, but after d6 6.c3 0−0 7.0−0 a6 White is forced into making one of the following two concessions − get a version of the Italian that is totally fine for Black after retreating the bishop, or go for dynamic but double edged play after ♗xc6.
A) 8.Bxc6 bxc6 9.d4 exd4 10.cxd4 Bb6 This seems like a brilliant Archangel to me. Black has two reasonably active bishops and the pawn weaknesses are irrelevant. For example − 11.Qc2 Re8 12.Re1 c5! Already threatens to take over. 13.d5 Was my first instinct, and indeed it's best.
(13.Nc4 Now we enter a forcing sequence − *d5!* Black makes the centre explode. This will result in mass simplifications. *14.Nxb6 cxb6 15.Bg5 dxe4 16.Rxe4 Rxe4 17.Qxe4 Nxe4 18.Bxd8 c4=*
Black was totally fine and held an easy draw in Jose,A −Avchinikov,V

B) 8.Ba4 Ba7 This seems like a very good Italian game to me. Black has absolutely no issues here. Some sample lines − 9.h3 Ne7 10.Re1 *(10.d4* Now we can regroup in typical Italian fashion. *Ng6 11.Bc2 b5 12.Re1 c5!* Black doesn't stay still. *13.Nf1 cxd4 14.cxd4 Bb7!* A very neat move to provoke d5 and then go back! *15.d5 h6 16.Be3 Bc8 17.a4 Bxe3 18.Nxe3 Bd7 19.Kh2 Nf4⇄* Black has fully equalised. [5.0−0 Is too co−operative. Here I quite like this option for Black − Nd4! Removing the bad piece from the board. 6.Nxd4 Bxd4 7.Nd2 *(7.Ba4 c6* Transposes after *8.Nd2)* 7...c6 8.Ba4 d6 9.c3 Bb6 Black should delay castling as long as he can. 10.Bb3 h6 11.Nc4 Bc7 12.Qe2 a5 Again delaying commiting the king. Black is in no hurry because White can't conjure up an attack so easily. 13.f4 Bg4 14.Qf2 a4⇄ Mulligan,B−Cvak,R corr ICCF 2018 Black will castle next with a fine position.]
5...d5!? I think this is Black's most direct attempt to equalise, but he doesn't quite get there.

As of this moment, I feel that White can still try for a bit, but maybe future engines can brute−force it here. a5!? Black's most enterprising attempt, preventing b4. 10.Qe2 Bd6 11.a4 h6 12.h3 Re8 13.Ne4 Be6 Martín Clemente,J−Neto,H ICCF 2020. Here I would suggest 14.Bb5!?N Nd5 15.Nxd6 cxd6 16.d4∞ with very interesting play.]
6.d4! Of course this move! White otherwise has no chance of playing for a win. What I suspect, after looking at the databases, is that Muck specifically

prepared this line for his opponent, because he knew he won't go for d5 with 0−0 included. Quite some judgement!

[6.exd5 Qxd5 7.Bc4 Qd6 8.b4 Bb6 9.a4 0−0 is the other hotly debated line, but here White's score is barely above 50 percent. For example − 10.Qe2 a6 11.Nbd2 Be6 12.Ba3 e4! 13.dxe4 Ne5 14.Bxe6 Nxf3+ 15.Nxf3 Qxe6⩲ Gleichmann,M−Korze,D corr ICCF 2018, was totally fine for Black despite the pawn minus.]

6...exd4 7.e5 Ne4 8.cxd4 Black has an important choice to make here. We have now transposed to a very topical Italian line. **8...Bb6!** Black makes the right choice.

[8...Bb4+!? Has been the best scoring move, but it hasn't been seen since 2019 so I suspect something is wrong with it. Indeed, after 9.Bd2! Nxd2 *(9...0−0 10.0−0 Be7* is suggested by my slow computer, but after *11.Nc3!⩱* I just don't see how Black can compensate for the space minus. *)* 10.Nbxd2 0−0 11.0−0 Black is facing some serious problems. For example − Bd7 12.a3 Bxd2 13.Bxc6! Bxc6 14.Qxd2± is really bad according to modern engines, and indeed White managed to win in Krammer,W −Milde,L GER email 2009]

9.Nc3 If there is anything against the Berlin, it has to be this line, which oddly enough can also come via Italian move orders :) **9...Bg4** Black has to strive for counterplay against d4. **10.Be3 0−0 11.h3** I really like how patiently White is handling this position. **11...Bh5 12.Qc2!** By and far the best scoring move in correspondence (56% compared to 40s for the remaining moves). Engines don't like it at first, but it is clearly the best try for White.

[12.Qb3 Had been tried before, but after Bxf3 13.gxf3 Nxf2!! Black equalised by force − 14.Bxf2 Nxd4 15.Bxd4 Qh4+! The point. 16.Kd2 Bxd4 17.Kc2 c6⇄ the game Epure,C−Szczepanski,Z corr ICCF 2018 was quickly agreed drawn, but I would rather take Black here as White's king is forever unsafe.]

[12.0−0 Also allows easy equality − Nxd4! 13.Bxd4 Bxf3 This way Black forces too many simplifications for White to play for a win. 14.Qxf3 Bxd4 15.Nxe4 dxe4 16.Qxe4 Bxb2 17.Rab1 Qd4= if anyone should be careful in a practical game, it is White, though the players agreed to a draw after just two more moves − Limanskis,N−Mielczarek,D ICCF 2019]

12...Bg6 My computer likes this move at low depths, but this is only the 2nd most popular move according to my database.

OTB chess I am not sure how he will manage to do so.]

13.Qb3! Ne7 14.0−0 The war of attrition continues. The engine keeps spouting some nonsense, so it really comes down to one factor − can White conjure up something on the kingside before Black consolidates and fights against the centre? **14...c6!**

So far neither player has given an inch.

[14...c5? would be thematic but horrible − 15.dxc5 Nxc5 16.Bxc5! Precisely this moment White can give up the bishop pair because after Bxc5 17.Rad1± He is hitting d5 really hard.]

15.Bd3! Nd2?! You might find it hard to believe, but I consider this move to be a small concession already. The bishop pair is really irrelevant here because of the closed centre. In hindsight 2020 games have shown us the way to equalise, but we have to understand that in 2019 when the game began both players didn't have an idea of what was the best way to play here. Still, White needed to display Carlsenesque technique to milk this, so let's follow along!

[15...Nxc3!? doesn't quite cut it 16.Qxc3 Bxd3 17.Qxd3 Ng6 18.Bg5± Nekhaev,A−Sperhake,K corr ICCF 2018, is some sort of suffering for Black.]

16.Nxd2! Bxd3 17.Rfe1 Bf5 18.Na4 Black's main problem here is that by removing that powerful knight from the board he has lost a very important resource to irritate White. Again, I want to reiterate that here it's all about the colour complexes − Black has the bishop pair but White will play exclusively on the dark squares. **18...Ng6 19.f4!** Very good understanding by Muck. The knight is needed to prevent c5. In the meantime Black has to start responding to threats on the kingside. One way that White usually wins in correspondence is by creating slow burning kingside attacks. We will see one here as well. **19...Ba5 20.Rf1!** Fantastic patience. Normal players would look at the engine and grab the pawn, but Muck fries bigger fish!

[20.Qxb7 Nh4! immediately equalises. For example − 21.Qa6 Bxh3!! Is quite pretty − 22.gxh3 Bxd2 23.Bxd2 Nf3+ 24.Kg2 Nxd2 25.Re2 Ne4= With such a knight on e4 Black can never lose. White's king is also quite unsafe.]

20...f6 21.Nf3! None of my engines show me this. So it's not about the silicon, but about the flesh and blood that drives the machine to do its bidding. Already here Stockfish is showing a small advantage for White, which is alarming because the Berlin is just dead equal! **21...Qe7**

[21...b6?! is suggested by the engine, but no sane human will play this. For example − 22.a3!? fxe5 23.fxe5 h6 24.Rac1± and I can easily imagine the bishop getting trapped one day.]
[21...fxe5! is what I would have checked first to see if there is a forced draw. But was Black playing for a win? 22.dxe5!? Very combative! I suspect this is what Muck had planned. Bc8! Black's only move. Getting out of g4 tempo gainers and protecting b7. 23.Nd4 Qh4!⇄ with good counterplay.]

22.Rf2 Rae8 23.Raf1 White has retained the tension as long as he can without making any concessions. Step Number 1 has thus been accomplished.

23...Qb4 Somehow this feels like the wrong direction to me.

[I would be very tempted to go 23...Bc8!? safeguarding the bishop. After 24.Nc3 Be6! Black can reposition his pieces and wait for a chance to strike. 25.Ne2 fxe5 26.fxe5 Rf7∞ How does White make progress here?]

24.Qd1! White's only chance to win lies in a kingside attack. **24...Bd8 25.Kh2** Kasparov style, strengthening the position to the maximum. **25...Qb5**

[I suspect Black's best chance to make a draw was 25...fxe5! 26.a3!? Qc4 27.Nxe5 Qb5!⇄]

26.Re1 Qa5 27.Nc3 Now both sides maneuver. **27...Qa6 28.a3 b6**

[28...Bc7!? was perhaps better, keeping an eye on e5 and potentially the king on h2. White can't get away with exf6 so easily now.]

29.Qd2 Be7 This is the critical moment of the game. White decides to change the pawn structure, and his decision is justified because there was nothing better. **30.exf6!** Black's hesitation in playing fxe5 is now being punished. Why play the Berlin if you don't want to make a draw? **30...Bxf6 31.Ne5** White still has a clear target on the kingside. He will slowly but surely advance his pawns. **31...Bh4?!** I just don't like this move. White wants to advance anyway − why let him do it with tempo?

[It was imperative to bring the queen back 31...Qb7! and now after 32.Rf3!? c5! 33.dxc5 Nxe5 34.fxe5 Bxe5+ 35.Kh1 d4!⇄ Black has very good play.]

32.g3! Now Muck can't be stopped!

32...Nxe5 33.dxe5 Be7

[33...Bd8!? was perhaps a touch more tenacious, not letting off the pressure on e5. Still, after 34.Rc1!± White has the better chances.]

34.g4!± The engine doesn't get it yet, but as human players we now understand what kind of trouble Black is in! **34...Bc8 35.Rg2!** Patience!

35...Bb7? This and only this was the losing blunder. It is hard to believe that there are trends in correspondence, but this one was clear the moment Black eschewed chances to equalise with fxe5.

[35...d4! Perhaps Black can throw this in as a last resort, though after 36.Qxd4 Rd8 37.Qe4 Bb7 38.Qc2!± White has a clear extra pawn.]

36.f5 c5

[36...Qc4!? was perhaps better, though 37.f6!! Seems really devastating. I suspect Muck's computer had seen the win by now. Mine does after being shown gxf6 38.Bh6+− Black is in serious trouble.]

37.Nxd5! The rest is pure engine calculations. **37...Bd8 38.e6 Qc4 39.Rd1 Qe4 40.Bf2 Bg5 41.Qxg5!** Muck transitions into a completely winning ending. **41...Bxd5 42.Rdg1 Qd3 43.Qe3 Qxe3 44.Bxe3 Bxg2 45.Rxg2** This might seem tricky according to GreedyVD fans, but rest assured White is totally winning here − **45...Rc8 46.Kg3 Rfd8 47.h4 c4 48.Bd2 Rd3+ 49.Kf4 Rd4+ 50.Ke3 Rd3+ 51.Ke4 Rcd8 52.Bc3 a5 53.h5 Rh3 54.Re2 h6 55.Ke5 Rc8 56.f6** An absolutely fantastic performance from Muck, who as I write has almost guaranteed himself the world crown. The key takeaway from this game is not the brilliant middlegame and the machine precision endgame, but how we can bust even Berlin players − constantly pose problems, however small or big. Eventually, the Wall can be breached. **1−0**

This was one of the best performances of my career so far, making my first 2800+ performance with 8.5 of 9! During the tournament I was able to play some interesting games in my style, with some chaos and attack. This one was one of the decisive games, since Jianu was doing quite well too and winning this game was an important step to the title, which even with 8.5 wasn't easy because Heberla had 7 points before the last round and got some good chances with black against Cheparinov **1.e4 e5 2.Nf3 Nc6** a big surprise, since Jianu plays a lot of Dragons and has some interesting ideas in the variation **3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5** my turn to surprise, since I usually play with Be2 or Bd3 these kind of positions. 1.e4 Berg,Emanuel Berg,Emanuel Berg, Emanuel: 'Berg,E' **1...e5 2.Nf3 Nc6 3.Bc4** Having played the Spanish in almost all my games of late, it was time for a change not the least to surprise my opponent. **3...Bc5 4.c3 Nf6 5.b4!?** The Italian Wing Attack. Not really something particulary dangerous for Black but leading to interesting play and hopefully something my opponent hadn't checked. **5...Bb6 6.d3 d6 7.a4** White hopes to get a space advantage on the queenside with some long term pressure. **7...a5!**

[7...a6 is the main alternative and the most popular move over the years. However I find it rather comfortable for White following 8.Nbd2 intending ideas like ♗b3 and ♘c4.]

8.b5 Ne7 9.Bb3 The bishop gives space for the knight on b1. It's better to wait with castling for White to avoid

9...Ng6 10.Na3 c6 Black opens a route for his bishop to c7. **11.Nc4 Bc7** Now Black's plan is to proceed with ...d5. **12.0−0 0−0 13.Re1 Re8** White can no longer stop Black from ...d5 so it's time to retreat with the knight from c4. **14.Ne3** A good square for the knight preventing ...♗g4. **14...d5** Black has achieved his main aim and has a nice pawn centre. However this is where the real battle starts. **15.exd5 cxd5 16.g3!** A good move restricting Black's knight on g6 while also securing White's king against attacks along the b8−h2 diagonal. True it also has a drawback of weakening the light squares but that's nothing Black can take advantage of at first sight. I had been analysing this exact position at my hotel room before the game and come to the conclusion that White had interesting chances to fight for an edge although theoreticaly Black should be just fine. **16...b6** A logical move preparing the a8−h1 diagonal for the light squared bishop. **17.d4** White's main idea in the position. Now after ...e4 he can play his knight back to d2 preparing the c4−break. **17...Bb7** Black keeps the centre dynamic hoping for an opening of the long diagonal. **18.Bb2** So far I had evrything under control having played my moves quickly while my opponent

had used a considerable amount of time.
18...Qd7 A human move which I had not investigated during my preparation.
[Instead the computer gave 18...e4 19.Nd2 which I was quite satisfied with. Having the pawn on e4 it's hard for Black to create anything really dangerous on the kingside. But White for his part can always open up with c4 at some point.]
19.Re2 Played after a long period of thought. The fact that Black's pawns were not static on d5 and e4 troubled me and I was slightly concerned about ... ♕h3 ideas.
[My first thought was to play 19.Rc1 which is also the computer's top suggestion. However I was not quite comfortable and thought that perhaps Black could get a quick attack on the kingside following Qh3!? Even with the computer by my side I'm far from convinced that the fearless 20.c4! would lead to something good for White. To open the long diagonal towards White's king looks like a nightmare. When going down the lines a bit we end up in a critical position after *(20.Ng5 Qh6 21.dxe5)* The main continuation follows 20...exd4 21.Bxd4 *(21.Ng5!?* also deserves serious attention intending *Qh6 22.Nxf7* with great complications. *)* 21...Ng4 22.cxd5 Nh4! 23.Rc2!∞ An important defensive resource which is the only way of surviving for White. Although the computer engine keeps rather calm all the way down these lines even the smallest error could end up in disaster for White.]
19...e4 This plays into White's hands, especially as now I knew exactly which plan to follow.
[Instead 19...Qh3 was what I expected when White has to be careful. I had planned to continue 20.dxe5 Nxe5 21.Nxe5 Rxe5 22.Qf1 Qh5 23.Rae1 when White has driven away Black's queen and has things pretty much under control.]
20.Nd2 h5?! This plan might look logical but in fact it only wastes time and in the end even helps White.
[20...Rad8 looks better to keep control in the centre and be ready for the c4−break.]
21.Qf1 A practical move but there might well have been better options.
[The immediate 21.c4!? is one interesting alternative.]
21...h4 22.c4 dxc4 This exchange gives White a very harmonious position. Perhaps Black should rather have allowed the advance c5 although that's not an easy decision to make. **23.Ndxc4 Nd5**
[During the game I started to think about 23...Nh7 intending ...♘g5−f3. This would at least be slightly annoying for White but the central counterplay should prove stronger after 24.d5 Ng5 25.Rd1 Nf3+ 26.Kh1± since Black lacks the power to continue his attack.]
24.Rd1! Nicely preparing for ♘e5 which is now a major concern for Black.
24...Qe7 25.Ne5 Rad8?! Black was in a difficult situation but this does not solve the issue.
[The straightforward 25...Nxe3 looks best when after 26.fxe3 Bxe5 27.dxe5 Bc8 followed by ...♗e6 Black is at least able to limit White's

attacking chances. Still White has a solid plus following 28.Rd6 Be6 29.Bxe6 fxe6 30.Qg2±]

26.Nxd5?! Not at all bad but there was better to be found.

[26.Nxg6! fxg6 would simply leave Black in very bad shape having a king without a real shelter, e.g. 27.Rc1 Kh7 28.Qh3+−]

[26.Nc6!? was another good way to a clear advantage following Bxc6 27.bxc6± with two potentially strong concted passed pawns as well as the pir of bishops.]

26...Bxd5 27.Bxd5 Rxd5 28.Rxe4 hxg3 29.hxg3 Bxe5 30.dxe5 Nxe5

A tricky move in time trouble. Black bravely enters the complications with the risk of losing a piece. **31.Kg2?!**

[31.Re3! would have forced Black into giving up his knight after the forced line Red8 32.Rde1 f6 33.f4 Qb4 34.Ba3 Qxa4 35.fxe5 Rxe5 36.Rxe5 fxe5 37.Bb2± with excellent winning chances for White.]

31...Qb7?!

[31...Qd8! was more precise when White keeps only a symbolic advantage.]

32.f3 f6 33.Bxe5! Liquidating into a very comfortable endgame for White.

33...Rdxe5 34.Rxe5 fxe5

[34...Rxe5?? cannot be played due to 35.Rd8+ when White's attack will become decisive.]

35.Qc4+ Qf7 36.Rd5 Qe6 37.Qe4 White has a nice grip holding Black passive defending his e5−pawn. **37...Kf8 38.g4!** Launching the g−pawn is a good way to play for White. It gives more space and at some point the g−pawn might continue to g5 or even g6. **38...Kf7 39.Kg3 Kf8 40.Kg2** A safety move to complete the time control. **40...Kg8 41.Kg3 Qe7 42.Rd1!** It's time to regroup the pieces. Now ♖h1 and ♕c4+ can cause Black serious trouble.

42...Qf6 43.Rc1 Rf8 44.Rc4 Importantly defending against the exchange of queens on f4. **44...Qf7?**

[44...Rd8 would have been better.]

45.g5! Allowing this move should normally mean the end for Black. Now g6 is a crucial threat. **45...Qf5 46.Qxf5??** I saw that this would give Black good drawing chances but

[in the eternal time trouble I did not realise that 46.g6! was just winning. There might follow Qxe4 *(46...Qe6 47.Rc6+−)* 47.fxe4 Rf6 48.Rc8+ Rf8 49.Rc6 *(49.Rxf8+ Kxf8 50.Kg4 Ke7=* is just a draw. *)* 49...Rf6 50.Kg4! Kf8 51.Rc8+ Ke7 52.Rc7+ Kf8 53.Kg5 Rf4 54.Rc6 Rxe4 *(54...Ke7* is the most stubborn but after *55.Rxb6 Rxe4 56.Rb7+ Ke6 57.Rxg7+−* White's two passed pawns will decide. *)* 55.Kf5 Rf4+ 56.Ke6 Rf6+ 57.Kd7+−]

46...Rxf5 47.Kg4 g6 48.Rc6 Rf4+ 49.Kg3 Kf7 50.Rxb6 Rxa4 51.Rf6+ Kg7 52.Ra6

[White could win a pawn by playing 52.Re6 but after Kf7 53.Rxe5 Rb4 Black will soon be able to force an exchange of his a−pawn against White's b−pawn which leads to a completely drawn endgame.]

52...Kf7 53.Rf6+ Kg7 54.Ra6 Kf7 55.b6 Rb4 56.Rxa5 Ke6 57.Ra8 Rxb6 58.Rf8

1.e4 e5 This came as a surprise to me and it was also the first time my opponent had played this move. I spontanously decided to go for a counter surprise, avoiding both the Spanish and the Scotch. **2.Nf3 Nc6 3.Bc4 Bc5 4.b4** Although I barely knew any theory at all on this move I thought it would be a good chance to get my opponent out into unknown waters at an early stage. Then Evans is a dangerous surprise weapon, but to my knowledge Black should equalise with correct defence. **4...Bxb4 5.c3 Ba5 6.d4 exd4** Somewhere around here my theoretical knowledge came to an end. Having a look at the database, 7.♕b3 seems to be the most fashionable move nowadays. Instead I went for the old mainline. **7.0−0** I can't find any recent top level games with this move.
[After 7.Qb3 Black must defend by either 7...♕e7 or 7...♕f6, but both of them seems to do theoretically fine.]
7...Nge7 This is the move that has been played by everyone in recent years. Black simply prepares to play ...d5 to get counterplay in the centre.
[7...d6 was played a few years back, but White seems to get a good game after 8.Qb3 Qe7 *(8...Qf6 9.cxd4±)* 9.e5! with a strong initiative. After

dxe5 the only move played so far is 10.♗a3. However one of the novelties 10.cxd4 or *(10.Re1* might be even stronger as suggested by my computer. *)*]

8.cxd4 Not knowing the theory I decided to go for the most simple solution, grabbing the centre.

[Instead 8.Ng5 forces the game into wild complications.

A) 8...Ne5?

A1) 9.Bb3!? is also interesting, but after correct defence Black is doing fine.

A1a) 9...0−0? 10.cxd4 N5g6?? *(*After *10...h6 11.dxe5 hxg5 12.Bxg5 d6* Black could still fight on, although White's advantage is obvious. *)* 11.Qh5 h6 12.Nxf7 Rxf7 13.Bxf7+ Kxf7 14.Qxa5+− Verkasalo−Tahvanainen, FIN−chJ 1998;

A1b) 9...f6? 10.cxd4 fxg5 11.dxe5± left Black in a difficult position in 1−0 (37) Jaros,M−Hubner,P Svetla nad Sazavou 1999;

A1c) 9...d5! 10.cxd4 *(10.exd5* − 8. ..d5 *)* 10...N5g6 *(10...Nc4?!* gives White the common tactical possibility *11.Bxc4 dxc4 12.Nxf7 Kxf7 13.Qh5+* when White has the better chances in view of Black's vulnerable king combined with the appearance of opposite coloured bishops.*; 10...Ng4!? 11.h3 Nh6 12.Qd3!* preparing ♘c3 gives White a nice initiative and full compensation for the sacrificed pawn. Black is struggling both with the safety of his own king and the missplaced knight on h6. *)* 11.Qh5 c6 12.f4 Now after f5N Black remains solid, but White has got compensation for the sacificed material. *(*Instead the game 1−0 (23) Della Morte,G (2341)−Ricciardi,G Villa Ballester 2010 continued *12...Ng8?* when after *13.f5 Nf6 14.Qe2 Ne7 15.e5* White had a crushing initiative and went on to win the game rather quickly. *)*;

A2) 9.Qh5? fails to g6∓;

A3) 9.Nxf7 Nxf7 10.Bxf7+± Kxf7 11.Qh5+ Ng6 *(11...g6 12.Qxa5* 1−0 (41) Sax,G (2400)−Honfi,K (2435) Budapest 1971; is better for White in view of Blacks vulnerable king. *)* 12.Qd5+ forcing the ♔ to retreat to a worse square. Kf8 13.Qxa5

A3a) 13...d5?! is a light−hearted attempt to finish development quickly. 14.exd5 Kf7 15.cxd4 Re8

A3a1) 16.Nd2?! allows Black to get back the d5−pawn without a fight. b6 *(16...Nf4 17.Nf3 Nxd5* Now the ♘ has an excellent blockading square on d5. *18.Bg5 Qd6 19.Ne5+ Kg8 20.Rae1 b6 21.Qb5 Bb7∞* Sertic−Stepic, CRO−chT U20 Medulin 1997 *)* 17.Qc3 Bb7∓ and White's pawn structure remains worse.;

A3a2) 16.Nc3± defending ♙d5.;

A3b) 13...d3 14.Rd1 d6 15.Rxd3 Qe7=;

B) 8...0−0?? loses to 9.Qh5 h6 10.Nxf7;

C) 8...d5 9.exd5 *(9.Nxf7 Kxf7 10.exd5 Ne5 11.Bb3* 1−0 (31) Hughey,M−South,F Alberta 2000; is an interesting piece sacrifice that is worth investigating further. *)* 9...Ne5 *(9...Nxd5?? 10.Nxf7 Kxf7 11.Qf3+!N Qf6 12.Bxd5++−* is simply winning for White. *)* 10.Bb3 Here White has also tried a few other moves, but keeping the bishop is the clearly favoured move in top level games.

C1) 10...dxc3 looks rather risky and gives White an initiative after 11.Qe2 f6 and here 12.Rd1 is an improvement for White as suggested by Lukacs. *(12.Ba3?!* 0−1 (42) Ovetchkin,R (2519)−Lastin,A (2634) Krasnoyarsk 2003 CBM 098 [Lukacs] *)*;

C2) 10...0−0 This is the critical starting position of the 8.♘g5 variation. So far White has failed to provide anything convincing. One possible line is 11.Nxh7 Kxh7 12.Qh5+ Kg8 13.Qxe5 Nf5 when Black is at least equal.]

8...d5 9.exd5 Nxd5 Black is ready to castle. This has to be avoided if White wants to hope for an advantage. **10.Ba3**

[The main continuation is 10.Qb3 Be6 11.Ba3 when Black is under some pressure. Now *(11.Qxb7?! Ndb4* runs into trouble for White who is about to get his queen trapped after ... ♖b8 in the next move. *)* 11...Qd7 looks like the best way forward for Black making long castling possible. It's not easy for White to find a way to put further pressure on Black and he therfore risks remaining a solid pawn down. The database statistics show a very good score for Black, but objectively speaking I believe the position is rather balanced. The most straightforward try for White is 12.Ne5 Nxe5 13.Qxb7N This spectacular move brings a pretty equal position. My computer gives the line *(13.dxe5* was seen in 1−0 (44) Mitlasovszki,I (2051)−Jamalieh,F Budapest 1999 but here Black is doing more than fine objectively. After the game continuation *0−0−0* Black was just a solid pawn up. *)* 13...Qc8 *(* Also possible is *13...Rd8 14.dxe5 c6 15.Qb3* but I suppose Black is more comfortable without queens, at least in a practical battle over the board. *)* 14.Bxd5 Qxb7 15.Bxb7 Rb8 16.Be4 with equal chances.]

10...Be6 11.Nbd2

[11.Bb5 looks tempting for White, but after Bb4! Black is very solid.

A) 12.Ne5 Bxa3 *(12...0−0)* 13.Nxc6 bxc6 14.Bxc6+ Ke7 15.Nxa3 Rb8 16.Nc4 Nc3 17.Qh5 Qxd4 18.Rad1 Nxd1 19.Rxd1 g6 20.Qg5+ f6 21.Qc1 Qxc4 0−1 (21) Yeo,M (2110)−Ledger,D (2260) Liverpool 2008;

[11.Qb3 transposes to 10.♕b3.]

11...Bb4! An important resource that limits White's counterplay to a minimum. **12.Bxb4 Ncxb4 13.Ne4N** At this stage I had already given up the idea of keeping Black's king in the centre. Instead White hopes that his active piece play should bring counterplay.

[The game 1/2−1/2 (97) Muzychuk,A (2469)−Kosteniuk,A (2515) Heraklio 2007 saw 13.Qa4+ Nc6 *(* Black could also equalise by tactical means after *13...c6 14.a3 0−0! 15.axb4 b5 16.Bxb5 cxb5 17.Qxb5 Qb6=* with a balanced game. *)* 14.Bb5 *(14.Ba6!? 13...0−0 14.Nc5 Bg4! A good decision, playing for counterplay rather than defending b7. **15.a3**

[A better try was 15.h3 Bxf3 16.Qxf3 Nb6 17.Bb3 Qxd4 18.Rac1 when White has full compensation for the sacrificed material. The strong bishop on b3 could bring long term pressure to bear on Black's position.]

[20...Qxf3=]

21.b5 Qa4?! A slight inaccuracy that give White some initiative.

22.Qf5 Black decides to give back his extra pawn and play for a draw.

[22.Rxc7 Qxb5 23.Nd6 Qd5 24.Qf4 would have been an interesting possibility to put further pressure on Black, but after Qe6 25.Nf5 Nd5 26.Qg4 Qf6 27.Rc6 h5□ 28.Rxf6 hxg4 29.Rd6= the position is liquidated into a drawn endgame.]

22...a6 23.bxa6 Qxa6 24.Rxc7 Ra7? This move gives the advantage over to Black. **25.Nc5?** This move gives the advantage over to Black.

[25.Qf3 would have maintained some practical chances to play for a win.]

25...Qa5 In timetrouble Bengt missed the opportunity

[25...Qxf1+! 26.Kxf1 Rxc7 with a small plus for Black. However after 27.g4 White should still be able to hold the draw.]

The first decisive game of the match continued the discussion both players were having in the Italian Opening. This game had its share of creative ideas.

6.Bg5!? This is the line Fier prepared for the match. These days the Bg5 pin is tried in different positions of the Italian. It feels like a provocation: White invites Black to play with h6, g5, hoping for a counter−attack. **6...h6 7.Bh4** Black can play it safe and come back with the bishop to e7, but Pechac accepts the challenge. **7...Ba7 8.Nbd2 d6 9.a4 g5**

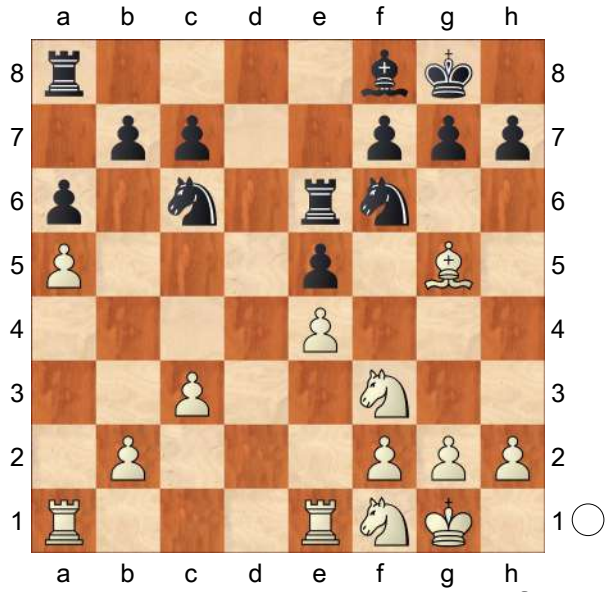
[GM Grigor Grigorov]



Now, we shall take a look at one of the most typical Italian endgames − symmetrical pawn structure arising after ...dxe4. Even though such positions look simple, playing them might be quite tricky. First of all, I would like to present the perfect scenario from White's point of view. For example, let's take a look at the diagram position. Black's main problem in such positions is the c6−knight. This knight is dominated by White's c3−pawn. Additionally, since the c7−pawn cannot fight for the centre, White often manages to occupy the d5−square. Since this is a symmetrical structure, both sides have the same plan − take the d−file under control and gain space on the queenside. Obviously, in this concrete position, White is the one who has chances to execute this plan. He has already gained space on the queenside by means of a2−a4−a5. At this point, Kulaots played **17.Bxf6!** This move indicates White's idea to apply a light−square strategy which is so typical for such kind of positions. After this exchange, White is the one who has the upper hand in the fight for the light squares. While both his minor pieces (the knights) can control the light−squares, only one black minor piece (the knight) can do so. In order to establish undisputed control over the light squares, White should also exchange the Black's remaining knight. Ideally, in order to further reduce Black's counterplay, White shall exchange a pair of rooks as well. Therefore, the ideal position would be rook and a knight against rook and a bishop. **17...Rxf6 18.Ne3** The knight is heading to c4 which is its ideal square. From this position, besides protecting the a5−pawn, the knight puts pressure on e5, thus forcing Black's pieces into passive squares. **18...Rd6 19.Nc4 Re6 20.Red1** As mentioned earlier, taking control of the d−file is an important part of the strategy in such positions. **20...f6 21.g3 Kf7 22.Nh4** Occupying the f5−

square is a typical idea in such structures. White tries to provoke the weakening ...g7−g6. Additionally, from f5, the knight can be rerouted to the d5−square via e3. **22...Ree8 23.Rd7+ Re7 24.Rad1 Ke8 25.Rxe7+** As pointed out in the comment to 17. Bxf6, White has nothing against exchanging one pair of rooks. **25...Nxe7 26.Kf1 Rd8 27.Rb1!** Of course, in order to keep winning chances, Kulaots should keep at least one pair of rooks on the board. Otherwise, it will be very difficult to attack the weaknesses of the opponent. **27...Nc8 28.Nf5 g6 29.Nfe3 Nd6?!** Black plays into White's hands. After exchanging a pair of rooks, White's plan was to exchange the remaining knight of the opponent.

[I think that Black should have adopted a waiting strategy by playing 29...Kf7 30.Ke2 h5 when it is not so easy for White to make progress. For example 31.b4?! is well met by Na7 when the knight would occupy the b5−square. This line illustrates the point behind keeping the knight.]

30.Nxd6+ Rxd6 31.Ke2 Bh6 32.Ng4! An important move.

[The straightforward 32.Nc4?! runs into Rc6 33.Kd3 b5! when Black solves his problems. For example, after 34.axb6 cxb6 35.Ra1 b5 36.Ne3 Bxe3 37.Kxe3 h5= the draw is obvious.]

32...Bg7 33.Ra1 Besides overprotecting the a5−pawn, in some position, White might try to put pressure on b7 by means of the manoeuvre Ra3−b3. There is also another point which will become clear in a few moves. **33...h5 34.Ne3 Bh6 35.Nc4 Rd7**

[With a rook on a1, the move 35...Rc6 is well met by 36.Kd3 It turns out that Black cannot free himself with the move ... b7−b5.]

36.Ra3 White's main idea is to execute the advance b2−b4−b5. Before going for this idea, however, he starts shuffling around with the pieces. There are three reasons behind such a strategy: 1) Black has no counterplay 2) Trying to confuse the opponent by hiding his ideas 3) Waiting to reach move 40 in order to get additional time on the clock. **36...Kd8 37.Ra1 Ke8 38.Rf1 Re7 39.Na3 Rd7 40.Nc4 Re7 41.b4!** Finally, on move 41, White goes for his real plan. Now is planning to prepare b4−b5 with Rb1 on the next move. **41...Rd7 42.Rb1 c6** Provoking the move ...c7−c6 is already a big achievement for White. With this move, Black's queenside structure loses its flexibility. The b7−pawn will always need protection.

[Allowing b4−b5 is not an easy decision. After 42...Ke7 Black was probably afraid of 43.b5 Rd8 44.bxa6 bxa6 45.Rb7 when it seems that the a6−pawn will be lost. Nevertheless, Black has the tricky Kd7 46.Ra7 Kc6! when it transpires that the pawn cannot be taken in view of ... Kb5. White can, however, play the simple 47.Ne3 Bxe3 48.Kxe3± with a huge advantage.]

43.Rb2! After provoking .. .c7−c6, White would like to install a knight on c5. With his last move, he takes the second rank under control. Later on, he will proceed with Rc2 followed by Nb2−d3−c5. At the same time, after putting the knight on d3, White will have the opportunity to execute the advance f2−f4, thus creating

a second weakness. **43...Bc1 44.Rc2 Bh6 45.Nb2**

[Another interesting possibility would have been 45.Nb6 Rd8 46.Na4 Kf7 47.Nc5 Bf8 48.Nd3]

45...c5?! Even though this is a typical idea in such structures, in the concrete position, it does not solve Black's problems.

[A better idea would have been 45...Bf8 46.Nd3 g5! gaining space on the kingside and playing against f2−f4. Later, Black can execute the advance ...c6−c5 anyway.]

46.bxc5 This move marks the beginning of a forced sequence which leads to a rook endgame which is better for White.

46...Rc7 47.Nd3 Bf8 48.Rb2 Bxc5 49.Nxc5 Rxc5 50.Rb6! Black has probaby missed this strong move which gives White an obvious advantage.

[Instead, he was relying on 50.Rxb7 Rxa5= with a draw.]

50...Rxc3

[50...Rxa5 51.Rxf6 Rb5 52.Rxg6±]

51.Rxf6? This careless move spoils the advantage.

[Better would have been 51.Rxb7 with the idea to meet Rc5?! with 52.Rb6+−]

51...Kd7 52.Rxg6 Ra3 53.f4 exf4?? Allowing White to create two connected passed pawns.

[Correct was 53...Rxa5= with a draw.]

54.gxf4 Rxa5 55.Rg7+ Ke6 56.Rxb7+− White is completely winning.

[Mikhalevski,Victor]

1.e4 e5 2.Nf3 Nc6 3.Nc3 Nf6 4.Bb5 Bd6 5.d3 h6 6.0−0 0−0 7.a3

The Chinese player wants to beat his opponent with the weapon the latter played against the world champion in 2017 − see below. In fact the move is the most popular in the position these days, although the entire setup is quite rare. **7...a6** Black also creates an escape square for his dark−squared bishop.

[Previously we considered 7...Re8 Harikrishna,P (2766)−Carlsen,M (2840) Wijk aan Zee NED 2017 [Mikhalevski,V]]

8.Bc4 After playing 7.a3 this retreat makes sense, as the bishop has an escape square on a2, while it's pretty good on the a2−g8 diagonal.

[8.Ba4 is the main alternative.]

8...Bc5 The players transposed into a rare line of the Italian Four Knights. There were very few GM games here, although you can find over a hundred games at lower levels.

[In some games Black preferred 8...Re8 with the idea of retreating the dark−squared bishop to f8.]

9.Be3 This move can be considered to be the main line. White exchanges the active dark−squared bishop, which is a typical idea for the Italian. **9...d6!**

The most popular and strongest reaction. Black doesn't want to open the f−file for the f1−rook, while he is not afraid of 10. Bxc5, which would provide him good control over the d4−square. Curiously, this leads us to another transposition.
10.Nd5 A novelty. White is trying to simplify the position.
[Earlier White was choosing between 10.b4 trying to provoke

[10.Bxc5 dxc5 11.h3 in Galego,L (2465)−Sandipan,C (2609) Caleta 2014 can be best answered by Re8 preparing ...Be6 at the appropriate moment.]
[10.h3 transposes to a more popular position, which Harikrishna has already defended. Bxe3 11.fxe3 Be6 12.Bxe6 fxe6 13.d4 exd4 14.exd4 e5 15.dxe5 Nxe5 with equal chances in Motylev,A (2680)−Harikrishna,P (2646) Minneapolis 2005]
10...Nxd5 11.Bxd5 Ne7 The knight has been transferred to g6. **12.Bb3 Ng6** Black delays Bxe3 in order to occupy the f4−square with his knight. **13.d4** This natural−looking move yields Black some initiative in the centre and on the kingside.
[White had an interesting tactical idea at his disposal. 13.Nxe5! Nxe5 14.d4 Nd7 15.dxc5 Nxc5 16.Bxc5 dxc5 17.Qxd8 Rxd8 18.Rad1 with a tiny superiority for White thanks to his better pawn structure.]
13...exd4 14.Nxd4 Re8
[The developing 14...Bd7!? was also good.]
15.f3
[15.c3!? deserved attention since the e4−pawn is untouchable. Rxe4? *(15...Qh4!? 16.f3 Bd7* is roughly equal. *)* 16.Bxf7+! Kxf7 17.Qf3+**±**]
15...Be6 16.Bxe6 Rxe6
[16...fxe6! looks stronger, with the idea of 17...d5! and Black equalises without any problems.]
17.Qd2
[Of course not 17.Nxe6? Bxe3+ 18.Kh1 fxe6−+]
17...Bxd4 18.Bxd4?! A weird decision, when it was possible to prevent 18...d5.
[After 18.Qxd4 White has a more pleasant position thanks to his pawn centre.]
18...d5 Now Black is fine. **19.exd5 Qxd5 20.Rad1**
[It would be better to look for simplifications. 20.Bc3=]
20...Rae8!?
[20...Qf5!? deserved attention. 21.Rde1 *(*Now *21.Bc3?!* is strongly met by *Nf4!∓)* 21...Rae8 and now White has to play the precise 22.Bf2! Nf4 23.Be3 and White is about to equalise.]

22.Bxd2

[22.Rxd2!? Nf4 23.Bb4 Re2 24.Rf2 is equal.]

22...Rc6! A clever attempt to set problems. Black provokes 23.Bc3 in order to play 23...Nf4. **23.Rc1!**

[23.Bc3 is inaccurate. Nf4 24.Bd2 Ne2+ 25.Kf2 Nd4 26.c3 Re2+ 27.Kg1 Rg6! 28.g3 Nb3 with slightly the better chances for Black.]

23...f6 24.Kf2 Ne5 25.b3!? White is covering the c4−square.

[25.Rfe1! is more natural, and after Kf7 26.a4 Nc4 27.Rxe8 Kxe8 28.Bc3= White equalises.]

25...Rd8! 26.Bf4

[26.Be3! was more accurate. b5 27.Ke2 Kf7 28.Rfd1 Rxd1 29.Kxd1 and White equalises.]

26...Ng6 27.Be3 Ne7

[27...f5! was strong, since the bishop on e3 is in some trouble. 28.f4 The best way to stop 28...f4, but it puts the pawn on a dark square and weakens the e4−square. *(*In case of *28.g3 f4!* is still possible. *29.gxf4 Nh4∓)* 28...Ne7 29.Rfe1 Kf7∓ and Black is better.]

28.Rfe1 Nf5 29.g4?!

[29.Re2 covering the second rank was called for.]

29...Nxe3 30.Rxe3 Rd2+ 31.Re2 Rxe2+ 32.Kxe2 Rc3∓ Now White experiences serious problems, as his rook on c1 is very passive. **33.h4 g5!?** Fixing a weakness on f3.

41...Kg6 42.a4 a5 43.Ke4 b6−+ Black wins at least one more pawn.

44.Kd5 c6+ 45.Kd6 Rxb3

[45...Rxb3 Now, after the obvious 46.Kxc6 Rb4−+ White is helpless and so he resigned. 13.Nxe5 seems to be the only try to create some problems.]

[As pointed out in Bromberger − Schmidt, in this move order, 9.Qxd4 Ne5! is known to be fine for Black since 10.Nxe5 dxe5 11.Qxe5 Ng4 12.Qf4 Bd6! gives White problems. Note that after 13.e5 Nxe5 14.Rxe5 fails to Qc7]

9...Ne5 10.Bf1 Black plays in a similar way after 10. Ba2. His plan involves ... Re8, ...Bf8, ...Ng6 and ...Bd7 in some order or another, when he will have decent pressure on the e4−pawn and can consider increasing it with ...c5 and ...Bc6. This relatively dynamic and easy−

to−play plan is one of the reasons for the Hanham's popularity. **10...Re8 11.h3 Bd7 12.Bf4** White has many options here. Luther logically brings his bishop to g3, where it defends the kingside and puts pressure on the d6−pawn. **12...Bf8 13.Bg3 c5** Playing ambitiously, but I think this is too loose.

[13...Ng6 14.Nb3 Be6 15.f4 was tested in the GM clash S.Azarov − V.Babula, Czechia 2012 (1−0 in 33). I think this was a good moment for Black to transform the position with Bxb3! 16.cxb3 d5 17.e5 Nd7= White has no favourable breaks (f5 is tough to achieve), while Black will bring his bishop into the game with ... Bb4 or ... Be7−h4.]

[13...Qb6? was tried by a GM in B. Takacs − Z.Varga, Hungary 2015 (1/2−1/2 in 42), but this lost a whole tempo when the queen dropped back to c7 after 14.a5! since Qxb2? 15.Qd2+− would cost Black decisive material to extract the queen, for example after Qb4 16.Ra4 Qc5 17.Nb3]

[13...Qc7 14.a5 Rad8 15.f4 Ng6 16.Kh1 b5 17.axb6 axb6 18.Qf3 b5 19.b4 and logical play by both players had resulted in a typical white edge in F. Wendling − G.Braun, Germany 2011 (1−0 in 73).]

14.Ndb5 Bc6 15.f4! Starting a thematic pawn roller in the centre, unleashing the potential of the actively placed white pieces.

[15.Nd5 is a more solid way to play for an edge. However, after Bxd5! 16.exd5 a6 17.Nc3 g6 Black has a good version of a Symmetrical Benoni, where he has managed to exchange his traditional problem piece, the light−squared bishop. White's space advantage isn't felt and the bishop pair struggles to find a role in quite a closed position.]

15...Ng6

[15...Ned7 isn't much better. 16.Nxd6 Bxd6 17.Qxd6 Bxe4 18.Qd2 a6 19.Rad1⩲ and Black faces unpleasant pressure down the open central files.]

16.e5! dxe5 17.fxe5 Nd7 18.e6! Luther is playing powerfully. **18...Rxe6 19.Rxe6 fxe6 20.Nc7 Rc8 21.Nxe6 Qf6 22.Nxf8?** Even though White retains some advantage after this move, I find it tough to explain. How could White give up his monster knight on e6 for the passive bishop on f8, simultaneously bringing Black's rook into the game?

[22.Bc4⩲ is much more incisive. After Nb6 23.Qg4 Nxc4 24.Qxc4 Kh8 25.Rf1 Qe7 26.Nb5 Black is in a bad way, for instance Bd7 27.Nbc7 is highly unpleasant.]

22...Rxf8 23.Qd6 Qg5 24.Re1 h5 25.Qe6+ Kh8 26.Qe3 Nf4 27.Bxf4 Rxf4 28.g3 Rxf1+ 29.Kxf1 Qf5+ 30.Qf2 Qxh3+ 31.Ke2 Ne5

A model game for how to play actively with White against a popular setup. Luther was on top until his mistake at move 22 spoiled his position.

12.Ng3 Black's further plan consists of a half−waiting strategy, in order to spot the best moment for launching the counterplay. His next moves are generally ...♕d8 (removing the queen from the e−file, once rooks have been connected), ...♔h8 (in order to be ready to advance the f−pawn when ready for it) and ...a6 (or eventually ...b6), with the aim of keeping the queen side out of danger, now that it has remained almost desert of pieces. Golden Sands Europe op 2nd (8)
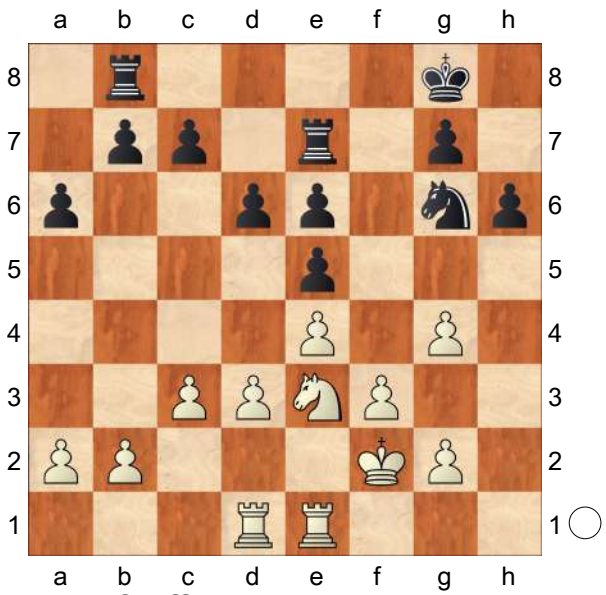
[GM Grigor Grigorov]

(Diagram)

Let's start with the most favourable type of endgames for White − Black has doubled pawns on the squares e5 and e6. In the middlegame, such a pawn structure provides Black with a good centre control and attacking chances on the f−file. In the endgame, however, Black is deprived of any counterplay. He has no favourable pawn breaks and targets. On the other hand, White enjoys



a variety of different possibilities. White's main strategy consists of gaining space on the queenside. For example, a typical idea would be a2−a4 followed by b2−b4 and a4−a5. Later on, White can execute the advance b4−b5 under favourable circumstances. Another typical idea is d3−d4. In this way, White keeps the opponent's pieces tied to the defence of the e5−pawn. Whenever Black plays ...exd4 White recaptures with the c−pawn and starts putting pressure on the c7−pawn. In this particular position, there is another important detail. White has doubled pawns on the g−file. In Italian structures, usually the recapture hxg4 should be considered as an improvement of the pawn structure. In the concrete position, White can put pressure on the h−file. Additionally, the break g4−g5 is always in the air. In the game, Spasov correctly started gaining space on the queenside with **22.a4! b6?!** This is already a dubious decision. In the future, the b6−pawn can be used as a hook for the a4−a5 break.

[Black should have tried to seize queenside space by means of 22...b5! A possible continuation would be 23.b4 *(*The natural *23.a5?!* is well met by *b4!* when Black gets enough counterplay on the queenside. The a5−pawn is already an issue for White. *)* 23...bxa4 24.Ra1 c5! Black is forced to go for this energetic continuation. From a static point of view, his position is lost. 25.bxc5 dxc5 26.Nc4 Rb3⇄ Despite his terrible structure, Black has enough counterplay to maintain the balance.]

23.b4 Rf7 24.Ke2 Kf8 25.Kd2

Since Black has no longer counterplay, White is not in a hurry to come up with something concrete. He has enough time to shuffle around with his pieces, gradually improving the position.

25...Ke7 26.Kc2 Rff8 27.Rh1

With this move, Spasov already indicates his intention of playing g4−g5 under favourable circumstances.

27...Rh8 28.Rdf1 Rbf8 29.Kd2

Since White is planning to restrict the black knight with g2−g3, the king is needed on the kingside in order to protect the f3−pawn. **29...Rf7 30.Ra1**

Being a good technician, Spasov is trying to confuse his opponent as much as possible. One one of his main ideas is to play g2−g3 followed by Rh5 and g4−g5. With the move 30.Ra1, however, White forces Black to reckon with the advance a4−a5. **30...Rff8 31.Rac1 Rb8 32.g3 Rbf8 33.Ke2 Rf7 34.Rh5**

White already starts playing more concretely. Now, g4−g5 will be always in the air. **34...Rhf8 35.Rf1 Rh8 36.d4!**

As pointed out in the introduction, this move is an important part of White's plan. Now, the black knight is tied to the

defence of the e5−pawn. **36...b5**
[Releasing the tension with 36...exd4 does not help Black since after 37.cxd4 the c7−pawn becomes a perfect target.]
37.a5 c6 38.dxe5 dxe5? This is a big positional mistake after Which Black cannot cover all his weaknesses.
[Lilov should have played 38...Nxe5 I think that after 39.g5 Rg8 40.f4 Nd7 41.Ng4 hxg5 42.Rxg5± White retains his edge.]
39.g5 hxg5 40.Rxh8 Nxh8 41.Ng4 The g4−square is a perfect spot for the knight. **41...Ng6 42.Rh1 Rf8 43.Rh5 Kf7 44.Rxg5+−** Black's position is already hopeless. The remaining part of the game does not need comments.
44...Rh8 45.Nxe5+ Nxe5 46.Rxe5 Ke7 47.Ke3 Kf6 48.Rc5 Rc8 49.f4 g6 50.g4 Rc7 51.Kf3 Rc8 52.g5+ Ke7 53.f5 gxf5 54.exf5 exf5 55.Kf4 Ke6 56.Rxf5 Rh8 57.Rf6+ Kd5 58.g6 Rh4+ 59.Kg5 Rh2 60.g7

This game was played before Giri−Harikrishna, but Shirov already seemed aware of Black's best move.
[12...Qg3? seems also strong, but it is a serious mistake. 13.Qxh5 Qxf2+ 14.Kh2 Qxe1 15.Ndf3+− 1−0 Vaibhav,S (2865)−Steindl,J (2477) Titled Tuesday intern op 14th April blitz 2020 (2) and Black's position is hopeless.]
13.Nef3 Rad8! Although this move looks simple and obvious, it is important to remember the right move order to develop Black's pieces.
[13...Rfe8?! also seems fine, but now 14.g4! comes in an improved version for White. Bxg4 15.hxg4 Qxg4+ 16.Kh1 Qh3+ *(16...Bxf2?* ½−½ Low,Z (2413)−Stany,G (2525) Biel MTO op 52nd 2019 (9) *17.Rf1* Black has some problems with the f7−pawn now, for example: *Qh3+ 18.Nh2 Bg3 19.Bxf7+ Kh8 20.Qh5+−)* 17.Nh2 Ne5 *(17...Bxf2? 18.Rf1* transposes to 16...Bxf2. *)* White has a strong continuation to get rid of Black's attack now: 18.Ne4! Nd3 19.Re3! Bxe3 20.Qxd3 Qh4 21.Bxe3 Qxe4+ 22.Qxe4 Rxe4± and Black still had a difficult ending ahead. These lines clearly show the drawbacks of 13...Rfe8: the f7−pawn

is unprotected in some lines, and White can mobilise his forces easily to defend the king without the pin on the d−file.]

14.g4 I don't think this move brings advantage to White objectively speaking, but especially from a practical point of view I would never play such a move against an attacking genius like Shirov!

[14.Qe2 is where the main discussion is right now.]

14...Bxg4 15.hxg4 Qxg4+ 16.Kh1 Qh3+! The most precise.

[16...Bxf2? can be met by 17.Nh2! Qxd1 *(17...Qh3 18.Re2 Bg3 19.Qf1+−)* 18.Rxd1± when this endgame offers better chances for White, as it seems easier to make use of the extra piece than advancing the kingside pawns.]

17.Nh2

[Of course not 17.Kg1?? Qg3+ 18.Kh1 Bxf2 19.Rf1 Rd6−+]

17...Bd6!

[17...Bxf2? 18.Re2+− only helps White.]

18.f4 Bxf4 Compared to the previous analysis, Black has more chances of increasing the pressure now. **19.Re2 Ne5 20.Qf1□** White is forced to look for safety by exchanging queens here.

[20.Qg1? Nd3−+ and Black wins material.]

20...Qxf1+ True, Black has nothing better than to enter in this ending.

[After something like 20...Qh6? 21.Ndf3! Nd3 22.Bxf4 Nxf4 23.Re4± it's White who is bringing all his pieces to the kingside.]

21.Ndxf1 Nd3

[21...Bxc1 22.Rxc1 Nd3 23.Rd1 Nc5 24.Bc2 Rxd1 25.Bxd1 Rd8 26.Bc2 g6∞ also seems balanced.]

22.Bxf4 Nxf4 23.Re7

[23.Re3!?]

23...Nbd5 24.Re5 Rfe8 25.Rxe8+

[25.Rae1 Rxe5 26.Rxe5 Kf8 doesn't change much.]

25...Rxe8 26.Rd1 c6⩱ The exchanges resulted in an interesting endgame which seems balanced. Black's three passed pawns on the kingside have some potential and offer enough compensation for the piece, but hardly more than that, as if Black advances them too fast they can be easily blocked by White's pieces. On the other hand, the reduced number of pawns ensures that Black is not risking anything here.

Let's wait until Aronian shows us how to play with the black pieces. I hope this event becomes a tradition. The organizers already have plans for a "revenge" match. Next time maybe the score will be tighter. But for now we all need to celebrate this

inaugural event even though it cost me dearly. I made a draw in all my 6 games and now I have to survive the jokes that will only cease when I win a game again.

As we have seen in the previous games, White should not rush to castle, so this seems the best continuation. **11...Nh6!** Still, this move forces the white queen to an awkward position. **12.Nf1□ f5!** Now this check forces more concessions from White. **13.Bxh6□** Although it seems tempting for White to cover the check with a piece, this is probably the safest option. **13...gxh6!** Compared to

the 10.0−0? line, White is unlikely to be going to castle to the kingside here, as for now the queen is stuck on f1 and after h3−g4 this option seems even less attractive. Therefore, the bishop has no great utility on d6, but keeping the d−file opened can be useful as Black has plans to undermine the centre with moves like ...b7−b5 or ...c7−c6. **14.exf5 Bxf5 15.Bd5 Qf6!** A very nice manoeuvre, taking advantage of White's weak d3−square but also threatening to advance the f−pawn, which would give a big advantage to Black.

9...Bf6
[9...Ne5 is another good line for Black.]
10.Re1 This is the main continuation. In the future, White will be trying to create some pressure along the e−file.
[Clearly worse is 10.dxc6 bxc6 11.Re1 d5 12.Bd3 0−0∓]
10...Ne7 11.Rxe4 d6 12.Bg5
By far White's first choice in this position. White is trying not only to eliminate the defender of the e7−knight but also to activate his own knight.
[It's important to mention that the super−aggressive 12.g4 doesn't yield White an initiative. For example, after h6 13.h4 c6 14.g5 hxg5 15.hxg5 Be5! 16.Nxe5 dxe5 17.Bf4 cxd5 18.Bb5+ Bd7 19.Bxd7+ Qxd7 20.Rxe5 0−0∓ Black is much better Rubio Doblas,R (2141)−Brandhorst,W (2477) ICCF email 2007]

14...hxg5 15.Re1 Be6!

Another important and very precise move that we must know. After closing the e−file, Black has no problems at all.

16.dxe6 f6 It might look scary at first glance, especially with White's powerful pawn on e6. However it transpires that Black is clearly better due to a clear plan of queenside castle , where Black king would be safe and his material advantage should tell. **17.Re3**

This is considered to be White's best try. However, it's hardly dangerous and Black can maintain much better game with accurate defense.

[The Chinese grandmaster had played this line earlier in the same tournament, and that game went 11...Bb4+? 12.Bd2 Again White gets an improved version with an easier development. Bg4 13.Qe3 Bxd2+ 1−0 Zeng,C (2561)−Kojima,S (2400) Asian Continental op 18th 2019 (2) 14.N3xd2! The typical idea. b5?! is ineffective now: 15.Nc3 bxc4 16.Qc5±]

12.Qf1□

[12.Qd2? e3!−+]

12...Bb4+! Now this check forces more concessions from White. **13.c3□** Although it seems tempting for White to cover the check with a piece, this is probably the safest option.

[The problem with 13.Bd2 is Bxd2+ 14.N1xd2 Re8 and White is unable to avoid e4−e3, when Black develops a strong attack against the king: 15.h3 e3! 16.fxe3 *(⌓16.hxg4 exd2+ 17.Kxd2 Ne4+! 18.Kc1 Qf6⟶)* 16...Rxe3+ 17.Kf2 0−1 Steiger,W−Loeffler,S Baden−ch MA Lauda 1986 (7) Be2! 18.Qc1 Qe7 Black's plan is simply to concentrate all his forces in the centre, then regroup them in a favourable way to launch the decisive attack; meanwhile, White is basically defenceless as his pieces are uncoordinated and mainly the ♖a1 and the ♘b3 are unable to participate in the game. A possible line is 19.Re1 Nh5! 20.Kg1 Re8−+]

[13.Nc3 was played once, but this old game by the brilliant Paul Keres shows how easily Black can seize the initiative: c6! 14.h3 Bh5 15.g4 *(15.dxc6?? Qd1#)* 15...Bg6 16.dxc6 bxc6 17.Bd2 White is one move away from completing his development with a nice position... but chess is the tragedy of one tempo! e3! 18.fxe3 *(18.Bxe3 Ne4⟶)* 18...Bxc3! 19.bxc3 *(19.Bxc3 Ne4)* 19...Bxc2 20.Nd4 Ne4! 21.h4 c5! 22.Nf3 Ng3−+ 0−1 Luckis,M−Keres,P Circulo de Ajedrez International 1939 (4)]

13...Be7! Compared to the 10.0−0? line, White is unlikely to be going to castle to the kingside here, as for now the queen is stuck on f1 and after h3−g4 this option seems even less attractive. Therefore, the bishop has no great utility on d6, but keeping the d−file opened can be useful as Black has plans to undermine the centre with moves like ... b7−b5 or ...c7−c6. **14.h3 Bh5 15.Be3**

[Another move order is 15.g4 Bg6 16.Be3 , but Black has an extra option now: b5!? *(16...Nd7* would transpose to the game. *)* 17.cxb5? 15...Nd7! A very nice manoeuvre, taking advantage of White's weak d3−square but also threatening to advance the f−pawn, which would give a big advantage to Black. **16.g4□ Bg6 17.N1d2 Ne5 18.0−0−0** White managed to castle just in time, but Black is able to pose new problems now. **18...Nd3+** Always a pleasant square to put the knight on. **19.Kb1 b5!** A typical idea to shake White's centre. **20.Nd4!** White also finds the best reaction.

[20.cxb5? on the other hand was bad: Qxd5 21.Nd4 Bf6 Black's initiative on the queenside develops undisturbed now. 22.N2b3 a6! 23.b6!? *(23.bxa6 Rxa6−+* looks winning for Black. *)* 23...c5! 22...Bf6 23.f4!?N Believe it or not, all these moves had been played before! I don't know when White's (and Black's) preparation finished, but this is the first new move, trying to solve the problems by force with the clear threat of f4−f5.

[23.Nb4? is bad: Rfb8! the right rook, keeping the threat of a7−a5. 24.f4 1−0 Fahnenschmidt,G−Hittinger,A GER−ch47 Kandidatenturnier08 1963 (11) , and now Black can play exf3! 25.Nxd3 *(25.Rxd3 Rxb4! 26.cxb4 Qxd5−+)* 25...Qxd5−+]

[23.Rxd3? was also a bad solution: exd3 24.Qg2 Rfe8 25.Nd2 Bg5! 26.Qf3 ½−½ Zeller,F (2419)−Linster,P (2244) Vienna op 18th 2013 (4) f5 27.Rd1 fxg4 28.hxg4 Black has an active idea now. Rxe3! 29.fxe3 Rf8 It is impossible to defend all the points under pressure in White's camp. 30.Qg3 Qxd5−+]

23...exf3?! Vidit didn't react well to White's idea, I'm not sure if he may have missed something in the variations,

[because 23...Qxd5 seems natural, and indeed this was the best option: 24.N4e5 *(24.N6e5?* seems inferior: *Rab8* I don't think we need many concrete variations, as having the rook on b8 already seems a significant improvement for Black. *)* 24...Rfe8 I like Black's position here, as the knights are stuck defending each other, Black keeps his nice ♘d3 there and the queenside always offers attacking chances in view of the open b−file; here are some illustrative lines: 25.Rh2!? *(25.Ka1 Bh7! 26.Qg2 Bxe5 27.Nxe5 Qe6 28.Qg3 Rab8 29.Rh2 f6∓)* 25...Bh7! and attack the knight with ...f7−f6 at some point. 26.Rhd2 a5! Preventing ♘b4. 27.Qg2 Qb5 28.Ka1 a4↑]

24.Rxd3 Qxd5 25.N4e5 White's pieces were hanging but this move keeps everything defended. **25...Be4!** Vidit finds the best way to keep the tension.

[25...Bxd3+? would make White's life easier. 26.Qxd3 Qe6 27.Bd4 *(27.Qf5!?)*]

26.Ka1 Qe6 White still has to deal with many pieces under attack. **27.Bf4 Bxd3** It is hard to blame Black for playing the most natural continuation.

[27...f2! 28.Rd2 Bh4!∓ is indicated by the computer as the best continuation, but I think it is a very non−human way to play.]

28.Qxd3 Bxe5 29.Nxe5 f5

[But here 29...f2!? was better: 30.Qf3 Rae8 31.Qxf2 f5 Black is better organised than in the game.]

14...f5 15.Ng3 Qd6 16.Qe2

According to Guillermo, he had to force matters here. If Black gets a tempo for Rae8 or Kh8 I might be worse as the e5+f5 pawns are very strong and e5−e4 is always something to check for. Unfortunately, he missed an idea that Black has in the 18th move.

[16.Qc2 Rad8 17.Rad1= leads to similar play as in 13... Bb6 14 Bd2 mentioned earlier.]

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.Re1 d6 7.c3 Bb6
A relatively rare move in a well−known position. Black's idea is to play ... Ne7 and then ...c6 in order to have an escape square on c7 for the dark−squared bishop.
[Earlier we considered four other options: 7...a6 So,W (2812)−Carlsen,M (2832) Paris FRA 2017 [Mikhalevski,V]]
[7...a5 So,W (2754)−Duda,J (2728) Moscow RUS 2019 [Mikhalevski,V]]
[7...h6 Vachier Lagrave,M (2779)−Navara,D (2741) Biel SUI 2018 [Mikhalevski,Victor]]
[7...Ne7 Vachier Lagrave,M (2789)−Carlsen,M (2837) London ENG 2017 [Mikhalevski,Victor]]
8.a4 A popular move in all Giuoco Piano positions. This time White prevents 8...Ne7. **8...a5** I had to stop the advance of the a−pawn in order to play 9...Ne7.
9.Nbd2
[A different setup was tested by MVL. 9.h3!? Ne7 10.d4 Ng6 11.Bd3 *(11.Bb3 c6* 1/2−1/2 (77) Landa,K (2626)−Nyback,T (2608) Germany 2016 *)* 11...c6 12.Be3 h6 *(12...d5!?* deserved serious attention. *)* 13.Nbd2 Be6 14.Qc2 with a slight edge for White in Vachier Lagrave,M (2789) − Alekseev,E (2616) Riadh 2017]
9...Ne7 10.Bb3N This retreat is already new. White's idea is obvious − he wants to play 11.Nc4, which explains Black's reaction.
[In all preceding games White played 10.Nf1 Ng6 11.Ng3 c6 12.Bb3 d5 13.d4 dxe4 14.Nxe4 Nxe4 15.Rxe4 exd4 16.Nxd4 Qf6 and Black was fine in Lu,S (2627)−Dai,C (2436) Danzhou 2016]
10...c6 Securing the b6−bishop. **11.h3**
[The immediate 11.d4!? makes sense, with the idea to answer Ng6 with 12.Nc4 Bc7 13.dxe5 dxe5 14.Qxd8 Rxd8 15.Be3 taking advantage of the weakened b6−square. Be6 16.Ng5 Bxc4 17.Bxc4 Nh8 18.f3 h6 19.Nh3 Nd7 20.Nf2 Bb6 21.Bxb6 Nxb6 22.Bf1⩲ with some edge for White.]
11...Ng6 We have just transposed to two games, in which the h3 move was played earlier. **12.d4** This move leads to another transposition.
[In one of them White played 12.Nf1!? h6 *(12...d5!?* looks more accurate. *13.Ng3 dxe4 14.dxe4 Qxd1 15.Rxd1 h6*= with equal chances. *)* 13.Ng3 Re8 14.d4 leads to a favourable tension in the centre for White. Praneeth,S (2347) −Karthikeyan,P (2426) Nagpur 2015]
12...exd4! A strong over−the−board novelty.
[The Iranian superstar Firouzja

preferred 12...Qe7?! , but was under pressure after 13.Nf1 h6 14.Ng3± Martinez Alcantara,J (2583) −Firouzja, A (2682) chess.com INT 2019]
[Another game saw 12...Bc7!? 13.Bc2 Re8 transposing to the game Topalov−Kramnik. 14.Nf1 d5 15.Ng3 *(15.exd5?! e4 16.d6 Qxd6∓* Topalov,V (2761)−Kramnik,V (2812) Paris 2016*; 15.Bg5!* is necessary. *)* 15...exd4 16.Qxd4 Bxg3 17.fxg3 Nxe4 18.Bxe4 dxe4 with equal chances in Landa,K (2626)−Nyback,T (2608) Germany 2016]

13.cxd4 d5 14.e5 Nh5 Black's idea is to undermine the centre by means of ... f6, while the h5−knight can be brought to e6. While considering 12...exd4 I had to make sure that the knight on h5 doesn't get trapped or that I get enough compensation for it. **15.Nf1!?**

[15.g3? This attempt to trap the knight on h5 doesn't work. Bxh3!
A) 16.Nf1 f6! 17.e6 Ne7!∓;
B) 16.Nh4 Nxg3!−+ *(16...Nhf4!−+)*;
C) 16.Nh2 The knight on h5 is trapped, but the price is too high. 16...Nxg3! 17.Qf3 *(* After *17.fxg3 Bxd4+ 18.Kh1 Bxe5−+* Black would obtain four pawns for the sacrificed piece. *)* 17...Ne2+! 18.Rxe2 Qg5+ 19.Qg3 *(19.Kh1? Nf4!−+* wins on the spot. *)* 19...Qxg3+ 20.fxg3 Bxd4+ 21.Kh1 Bxe5−+ with a decisive advantage for Black.]

15...Nhf4!? This way I prepare...f6, by taking control of the e6−square.

[I also considered the immediate 15...f6!? 16.Bc2!? *(16.e6 Qd6 17.g3 f5!* is fine for Black. *)* 16...Nhf4! 17.Ra3 fxe5 18.Nxe5 Nxe5 19.Rxe5 g6 20.Nh2 Bc7 21.Bxf4 Rxf4 22.Re2= with roughly equal chances.]

16.Bxf4

[It would be more accurate to play 16.Bc2! , which after f6 transposes to 15...f6.]

16...Nxf4 17.Qd2 Ne6! 18.Bc2 f6!∓ Now White has to fight for equality. The pressure on the a7−f2 diagonal gives Black the slightly better chances.

19.Bf5?!

[19.N1h2∓ was better.]

19...fxe5

[I saw 19...Ng5! , but rejected it because of 20.e6 Nxf3+ 21.gxf3 Re8!? *(* However, I missed *21...Qe7! 22.Ng3 Bc7! 23.Kh1 Bxg3! 24.fxg3 g6 25.Bd3 Bxe6∓* with a healthy extra pawn for Black. *)* 22.Qd3!=]

20.Bxe6+?! A dubious move.

[20.Rxe5! was better.
A) 20...Nxd4 21.Nxd4 Qf6! *(21...Bxd4? 22.Bxh7+!* I missed this move in my calculations. *Kxh7 23.Qxd4±)* 22.Rae1 Bxd4 23.Bxh7+ Kxh7 24.Qxd4 Bf5=;

20...Bxe6 21.Nxe5 Qh4!?

[21...Qd6!? 22.Ra3 Rae8∓ was a reasonable alternative.]

22.Nxc6? After this mistake White is in trouble.

[22.Nh2!? was necessary. Qf4! *(22...Qxd4?* is impossible in view of *23.Qxd4 Bxd4 24.Nef3!+−* The other knight is needed on h2 in order to avoid 24...Rxf3.*; 22...Bxd4?* runs into *23.Nhf3+−)* 23.Qxf4 Rxf4 24.Nhf3 *(24.Nxc6? bxc6 25.Rxe6*

22...bxc6!

[22...Rae8 23.Ne5 Qxd4 24.Qxd4 Bxd4 25.Nd3 Bd7∓ is also better for Black.]

23.Rxe6 Qxd4!

[23...Bxd4 24.Re2 Rab8 25.Rb1 Rf6∓]

24.Qxd4 Bxd4 25.Ne3 Rab8?

A blackout. I missed 29.Rc8.

[The simple 25...Bxb2! 26.Rb1 Rf6 27.Rxf6 Bxf6∓ led to a healthy extra pawn and a better position.]

[25...Rf6!? 26.Rxf6 Bxf6 27.Rc1 Ra6∓ was my initial idea. It would also be better than what I played.]

26.Rxc6 Rxb2 27.Rd1! Bxe3 28.fxe3 Rff2 I thought I would have good winning chances here, but... **29.Rc8+! Kf7 30.Rf1** One of the rooks gets exchanged and the rook endgame turns out to be equal. **30...Rxf1+ 31.Kxf1 Ra2 32.Rc5 Rxa4 33.Rxd5 Ra2 34.Rd7+ Kg6**

[or 34...Kf6 35.e4 a4 36.e5+ Kxe5 37.Rxg7 a3 38.Ra7=]

35.Ra7 h5 36.e4

[36.h4!?]

36...h4 37.e5 Kf5

[I saw that after 37...a4 38.e6 *(38.Ke1 a3 39.Kd1=)* 38...a3 39.e7 Kf7 40.Kg1 Ra1+ 41.Kh2 a2 I win the e7−pawn, but Black won't be able to make progress. 42.Ra8 Kxe7 43.Ra7+= and Black can't make progress.]

38.Rxg7 a4 39.Rg4 a3 40.Ra4 Kxe5 41.Kg1! Ra1+

[41...Kd5 a risky attempt to play for a win. 42.Rxh4 Kc5 *(42...Rc2 43.Ra4 a2 44.Kh2 Kc5 45.h4 Kb5 46.Ra8 Kb4 47.h5 Kb3 48.Kh3 Rc1 49.Rxa2 Kxa2 50.Kg4 Kb3 51.Kg5 Kc4 52.h6 Kd5 53.h7 Rh1 54.Kg6 Ke5 55.Kg7 Kf4=)* 43.Ra4 Kb5 44.Ra8 Kb4 45.Rb8+ Kc3 46.Rc8+= *(46.h4=)*]

[41...Ra1+ Now after 42.Kh2 a2= the position is a dead draw. 7...Bb6 is a reasonable alternative to 7... a6 and 7...a5 and requires more practical tests.]

But I also played one game with 3...♘f6 recently. **4.Ng5** Actually I had prepared this for Nadezhda Kosintseva in round two at the same tournament. Though they (sisters) had never played this, I guessed she could be playing this sharp line to divert me. But I didn't understand if she was prepared or if she was playing it over the board as she took some time before playing this move. **4...d5** Both of us made the next few moves very quickly: **5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Bc5** So, from here my opponent started spending time. Even I did't have much knowledge of this line, as I had never played it before. But on a few occasions I had checked my friend Eesha Karavade's analysis and just remembered the main lines and ideas. Dennis was leading the tournament with 4/4 and four players (including me) were trailing by half point. So, it was a crucial game especially for me **1.e4 e5 2.Nf3 Nc6 3.Bc4** This clearly came as a surprise to my opponent as I had last played this move back in 2010. My opening strategy was simply to get the typical Guico Piano type positions and be ready for a long fight! **3...Bc5 4.0−0 Nf6 5.d3 d6 6.c3 a6 7.a4 h6 8.Nbd2 0−0 9.h3 Ne7** This was a relatively new idea in this position. John Burke had a very good tournament and he proved that sometimes rating is just a number. His minus 1 score still sufficed for a 2658 performance, a TPR 100 points above his rating. This was a very nice attacking game, worthy of sharing. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 h6 7.Re1 0−0 8.h3 a5** Xiong chooses the most aggressive line. [Berg,Emanuel]

1.e4 Berg,E **1...e5** This came as quite a surprise although my opponent has tried quite a few different openings. **2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.b4 Bb6 6.d3!?** A very rare move which I have played twice before and got comfortable play with. However Illescas was not very impressed by the move pointing out that the pawn was nicely placed on d4. I agree in one sense but still think this move can pose Black some problems.

The main idea is to restrict the movement of both the knight on b6 and the bishop on c8. In return Black gets some counterplay on the dark squares.
6...d6 7.a4 a5 Not a novelty but a new move for me. Compared to ...♘8d7 Black now keeps the diagonal open for his bishop and has the extra opportunity of playing ...♘b4 in some lines. On the other hand the option of ...♘e5 no longer exists.
[7...a6 8.Nbd2]
8.b5N This is to prevent ...♗g4 before developing the king's knight. Now the bishop on c8 lacks a good square.
8...Ne7 9.Bb3
[9.0−0 Ng6 10.Ba2 0−0 11.Nbd2 Bg4 12.h3 Bh5]
9...Ng6 Here I started to use quite some time as the idea of ...♗g5 started to worry me a bit. **10.Na3 c6 11.Nc4 Bc7 12.0−0 0−0** A tricky move which opens the diagonal for Black's queen to h4. Now White really has to watch out as there are some dangeruous attacking ideas including ...♗xh3. **13.Re1?!** Here I started to lose confidence in my position and did not find the best way forward. **13...Re8 14.Ne3 d5 15.exd5!?** A radical solution. White basically gives away his best minor piece for Black's worst one. However the reason for this is that it restricts Black's counterplay and White gets some activity with the knights in the centre. **15...cxd5 16.g3 b6?!** Solid, but unnecessarily passive. Now White gets time to reorganise as Black will remain rather passive for the next few moves. **17.d4 Bb7 18.Bb2 Qd7**
[18...e4 19.Nd2]
19.Re2 Here I was pretty confident. Although Black objectively is a bit better White has an easy plan and not any concrete worries at the moment.
[19.Rc1 Qh3 20.c4 when Black has some initiative. Taking a closer look though it appears that White is doing well after *(* In the event of *20.Ng5* 11.0−0 would lead back to the game but now White can first play *Qh6* waiting with the king in the centre for the time being. After *21.dxe5)* 20...exd4 21.Bxd4 *(21.Ng5 Qh6 22.Nxf7±* and White stands slightly better as Black's attack doesn't hold up. *)* 21...Ng4 22.cxd5 Nh4 23.Rc2]
19...e4
[19...Qh3 20.dxe5 Nxe5 21.Nxe5 Rxe5± when White is pressing. The alternative was 22.Qf1 which was the move I wanted to play. However I was slightly concered about Qh5 23.Rae1]
20.Nd2 h5
[20...Rad8]
21.Qf1
[A better move was 21.c4! when White keeps things under control. There might follow]
21...h4!? An interesting move to complicate matters before White gets time to completely close the queenside with a4 and b3. **22.c4 dxc4 23.Ndxc4 Nd5**
[23...Nh7∓ 24.d5! With this almost forced move White keeps things under control. After Ng5 25.Rd1= the position is in balance. An important point is that Nf3+ can be met by 26.Kh1!∓]
24.Rd1 Qe7 25.Ne5 Rad8 The most solid move which leads the game into a rather drawish position.

[25...Nxe3 26.fxe3∓ Black has a very nice initiative. Bxe5!? was an interesting alternative when Black threatens both ...♘xc4 and ...♗xh3. 27.dxe5? is bad in view of Bc8! 28.Rd6 Be6! 29.Bxe6 fxe6∓ 30.Qg2]

26.Nxd5

[26.Nxg6 fxg6= 27.Rc1 Kh7 closes the queenside and White remains very solid. 28.Qh3 was a solid alternative mentioned by Illesscas. Now White will get access to the open e−file.]

[26.Nc6!∓ was stronger, keeping the queen at its active post on h4. Instead Bxc6 as mentioned by Illescas looks rather natural but following 27.bxc6!]

[31...Qd8]

32.f3 f6 33.Bxe5 Rdxe5 34.Rxe5 forcing through further exchanges on the e−file which give White a pretty safe position. **34...fxe5**

35.Qc4+ Qf7 36.Rd5! A clever in−between move. **36...Qe6 37.Qe4 Kf8 38.g4 Kf7 39.Kg3 Kf8 40.Kg2?!** On the last move before the time control I ended up taking a bad decision. I saw that I would lose the f4−pawn but assessed the resulting position wrongly. **40...Kg8!** I thought that I eventually would have chances to benefit fom Black's slightly weakened pawn struture by manouevring my knights and picking up the f4−pawn. However this assessment appeared to be wrong. **41.Kg3 Qe7** An important move which I had overlooked when playing 40.♕c3. White is now under some slight pressure but still remains very solid. **42.Rd1?! Qf6 43.Rc1 Rf8 44.Rc4 Qf7**

[44...Rd8 is fine for White, e.g.]

45.g5 Qf5 46.Qxf5!

[46.g6 Qxe4! *(46...Qe6 47.Rc6)* 47.fxe4 Rf6↑ is unpleasant for White. I was worried about 48.Rc8+! during the game and for good reasons it seems. Following Rf8 49.Rc6 *(*Now White should probably contnue *49.Rxf8+* to grab some space on the kingside and prevent ...♗f5. *Kxf8!? 50.Kg4 Ke7)* 49...Rf6 50.Kg4 Kf8 as mentioned by Illescas Black can continue 51.Rc8+∓ when Black's initiative appears to be very dangerous. One sample line is Ke7 52.Rc7+ Kf8 53.Kg5 Rf4 54.Rc6! Rxe4 *(54...Ke7*= would simply lead to an equal position where the draw is very close as neither side can make progress. *55.Rxb6!?* was more interesting when perhaps Black can exert some pressure. The pawn sacrifice *Rxe4!? 56.Rb7+ Ke6⩲* was worth considering. Now White's pawn structure is a bit shaky while the exxtra pawn is hard to put to any good use because of Black's strong bishop pair. Another worthy alternative was *57.Rxg7!?* preventing a4 for the moment. *)* 55.Kf5−+ Rf4+ 56.Ke6 Rf6+ might hold things together. 57.Kd7 intending ♘f3 would be better.]

46...Rxf5 47.Kg4 g6 48.Rc6 Rf4+ 49.Kg3 Kf7 50.Rxb6 Rxa4 51.Rf6+

This makes sense, as the ♗c4 was a problem in many lines. **10...Qxd5 11.c4 Qd7!** It is important for Black players remember that this is the correct square for the queen. There is not really a wide choice, as on some squares the queen would be exposed to attacks by White's pieces (c5,e6,d6), but there is a big difference between d7 and d8.

[The following game is a nice example: 11...Qd8?! 12.Bd2 e4 13.Bxa5 exf3 14.Qxf3 a6 15.a4 axb5 16.axb5 and Black had no better option than Qd7 but this gave White a very important tempo to organise the pieces 17.Bc3 Rxa1 18.Bxa1 Rd8 19.Qg3 f6 20.d4± 1−0 Jobava,B (2713)−Almasi,Z (2693) Bergamo ACP Golden Classic 2014 (5.1)]

13.Kh2 This variation was tested in an encounter Karpov,A−Yusupov,A/Bugojno 1986, in which White could get a small edge. The text looks even more flexible, and yet Black succeeds in obtaining an excellent counterplay.
[Wells: 'Atlas mentions here the game Karpov−Yusupov, Bugojno 1986, in which White successfully consolidated his king−side and slowly pushed the Black forces back after the sequence' 13.Bxa7 Rxa7 14.Kh2 Ne7 15.Ne3 Ra8 16.a4! Its significance lies in the importance of being able to push Black's f4 knight back to the relatively passive g6 square rather than the active and tactically fruitful h5 square. It also speaks to the tight margins at work here. To condemn the coming exchange on e6 as bad would surely be to read history backwards.' d5 21.Qe2 Nc6 22.Ng2 Rf7 23.h4 Rdf8 24.Rad1 Nge7 25.h5 g6 26.Nh3 *(26.hxg6* Karpov,An *Nxg6 27.Qh5 Qg5!∓)* 26...Qf3 27.Qxf3 Rxf3 28.hxg6 Nxg6 29.Ne3 d4 30.Nc2

This is clearly a merginal case and all the more interesting for that. Still, if there is something concrete to be learnt from a comparison with the Karpov game it is that the f4 knight needs to be able to retreat to a square from where it can support Black's tactical threats. h5 qualifies, g6 does not, hence the text−move looks like a very sensible idea. Thereafter, my feeling is that White never fully neutralises Black's f−file pressure.' **18.g3 Nh5** In contrast with Karpov,A−Yusupov,A, Black retreats his knight on the safe square h5 from where it threatens a pawn at g3. Creating a pressure along f−file, Black overtakes an initiative. **19.Qe2 Rf7 20.Rf1 Raf8 21.Ng4 Nb8!** Intending to knock over one of the defender of the crucial square f2. Wells: 'A secure knight on g4 is often a valuable trump for White. All the more so when Black has felt that the need to play 'dynamically' requires a rushed ... d5 break in the centre− which it generally does not.Here too, though, it can play a valuable role defending f2 and shielding g3. Hence the text − with e5 solidly defended, nothing speaks against this manoeuvre to challenge g4.' **22.b4 Nd7 23.Rae1 Ndf6 24.Nxf6+ Rxf6 25.Qe3 d5** Wells: '!' Wells: 'The '!' is for the timing of this break and for the triumph of the 'conrete' (e5 is difficult to attack) over the 'apparent' (e5 looks very weak). Almasi avoided ...d5 when it could have been genuinely vulnerable to a White knight at g4 and now is justified in the decision to bring in some attacking reserves.' **26.Kg2 Qf7**

Gligoric wants to fight for the initiative but again this move is dubious *(9...Nxd4* This continuation is solid and White stays slightly better thanks to the freer game. *10.Rxd4 d6 11.Nc3 Be6 12.Be3±)* 10.Nb5 Be6 11.Bxd5 Bxd5 12.N1c3 a6 13.Rxd5 Qc8 14.Nd6 Qe6 15.Rxc5 cxd6 16.exd6 Qxe2 17.Nxe2 Bxd6⩲ White is now a clear pawn up. Sax didn't discover the best way to dampen Black's counterplay and the game was eventually a draw, Sax, G (2565) −Gligoric,S (2565)/ Ljubljana 1977 (38)]

9.exd6 Qxd6 10.b4! This pawn sack is the only good way for White for a rapid attack in the center. Black hasn't castled yet! This is of course the critical position of the opening. **10...d3** This move looks very logical, but let's see if Black can do something else.

[10...Nxb4? 11.Rxd4 Qb6 12.Nc3 Ne6 13.Re4

A) 13...0−0 14.Rb1± This position is very difficult for Black because the queen is harassed and the white pieces take control of the whole board. Qc6 I decided to use this move as an example to show what can happen. 15.Ne5 Qc5 16.Ba3 a5 17.Nd5 Nimzowitch

The strategic plot is clear already. White has to prepare the kingside pawn advancing while Black has to react in the centre. Which is the most flexible way to prepare the pawn storm?

12.Rg1!! This is the correct answer to my question. Objectively, it may not be better than others, mainly in view of the next question, but it surely is the most flexible. The rook belongs to the g−file while the other pieces' plans may change. Dies ist die korrekte Antwort auf meine Frage. Objektiv mag es nicht besser sein als andere, vor allem in Hinblick auf die nächste Frage, aber es ist sicher am flexibelsten. Der Turm gehört in die g−Linie, während sich die

Pläne der anderen Figuren ändern könnten.

[12.Nf5 This exposes the knight too early, causing White problems with carrying out g4−g5. Dies exponiert den Springer zu früh, was Weiß Probleme verursacht bei der Durchführung von g4−g5. d5 13.Qe2 Qd7 14.Rg1 Rad8 15.Bd2 *(15.g5 h5)* 15...dxe4 16.dxe4 Bxb3 17.axb3 Qd3 and Black is safe enough without queens. und ohne Damen steht Schwarz sicher genug.]

12...d5?! This standard move has the drawback of interrupting the bishops' communication without reaching anything positive in time. Dieser Standardzug hat den Nachteil, die Kommunikation der Läufer zu stören, ohne rechtzeitig irgendetwas Positives zu erreichen.

[12...a5! This strong move prepares ... a5−a4, neutralizing WHite's potential pressure along the light diagonal and keeping the possibility of ...♗xb3 should White commit himself at once. Dieser starke Zug bereitet ...a5−a4 vor, was den potentiellen Druck auf der hellen Diagonalen neutralisiert und die Möglichkeit zu ...♗xb3 wahrt, falls Weiß sich sofort festlegen sollte.

[12...Bxb3 is premature as White has not committed himself yet. ist verfrüht, da Weiß sich noch nicht festgelegt hat. 13.Qxb3 This is the point. 13.Qe2 Re8 This is basically a waste of time but there is little Black can do anyway. Dies ist im Grunde ein Zeitverlust, aber es gibt sowieso nicht viel, was Schwarz tun kann.

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 d6 8.Nf1 I faced this move order about two weeks before this game. Then I played 8... Ne7 and faced some opening problems. This time I decided to deviate with the natural **8...Be6 9.Ng3 h6** This way Black transposes to 8...h6. The idea behind the move is to cover the g5−square, which can be used by White's knight. **10.0−0 0−0 11.Re1** A useful move. White supports the centre and prepares 12. d4.

[Last year I analysed for you 11.h3 Carlsen, M (2826)−Nakamura, H (2758) / London ENG 2011/ [Mikhalevski, V].]

[11.Bxe6 fxe6 12.Qb3 doesn't present a problem in view of the simple Qd7 and the b7−pawn is poisoned.]

11...Re8 There is nothing wrong with this move, but the fact that after 12.Bxe6 fxe6 the rook on e8 will be misplaced.

[Below are two playable alternatives. 11...Bxb3 12.Qxb3 Qd7 13.h3 Rfe8 14.Be3 Bxe3 15.fxe3 d5 16.exd5 Qxd5 with a roughly equal position in Anand, V (2725)−Kamsky, G (2735)/ Monte Carlo 1996.]

[11...Qd7!? 12.h3 Rfe8

A) 13.Bxe6!? deserved attention.

A1) After 13...Qxe6 14.Nf5 d5 White has an interesting piece sacrifice at his disposal. 15.Bxh6!? gxh6 16.Nxh6+ Kg7 17.Ng5 *(17.Nf5+ Kg8 18.Nh6+* leads to a repetition. *)* 17...Qd7 18.Qf3 *(18.Nf5+ Kg8 19.Nh6+* is equal again. *)* 18...Ne7 19.d4 with an initiative.;

A2) 13...fxe6;

B) 13.a4?! Rad8 14.a5 d5 15.exd5 Bxd5 16.Ba4? Bxf3 17.Qxf3 Qxd3 18.Bxc6 bxc6 Black won a pawn and converted his advantage into a win in Bologan, V (2732)−Mamedyarov, S (2726)/ Astana KAZ 2012.]

12.Bxe6 Rxe6 I considered this move to be the most logical follow−up to 11...Re8 as it's not easy for White to exploit the weakness of the f5−square.

[Nevertheless 12...fxe6 is still possible.]

13.d4 d5!

[13...exd4!? is a reasonable alternative and promises equal chances as well. For example, 14.cxd4 d5 15.e5 Ne4! 16.Nxe4 dxe4 17.d5! *(*In case of *17.Rxe4?! Qd5!* Black wins back a pawn and obtains a better position. *18.Rg4 h5 19.Rh4 Nxe5)* 17...Re7

A) 18.Rxe4 Rd7 19.e6 *(*or *19.d6 cxd6 20.e6 d5!)* 19...fxe6 20.Rxe6 Rxd5 21.Qb3 Kh8=;

B) 18.dxc6 Qxd1 19.Rxd1 exf3 20.Bf4 bxc6= with a roughly equal endgame.]

14.Nxe5 Nxe5 15.dxe5 Rxe5?! The first inaccuracy.

[I should have played 15...Nxe4! 16.Nxe4 dxe4 17.Bf4 Qxd1 *(17...Qd3!?* is also interesting. *18.Qe2 Qxe2 19.Rxe2 g5 20.Bg3 Rd8* and the e4−pawn is untouchable in view of 21...f5 with the subsequent

22...f4 and the g3−bishop is trapped. *)* 18.Raxd1 g5 19.Be3 *(19.Bg3 Rae8*= is equal. *)* 19...Bxe3 20.Rxe3 Rxe5 21.Rd7 b5 and soon a draw was agreed in Kudrin, S (2543)−Vescovi, G (2609)/Cali 2007. Unfortunately, I couldn't prepare for the game as we had to play two games a day and so I was on my own for a few moves already.]

16.Bf4 Re6 17.e5 Nh7 18.Nf5

During the game I was surprised that he played this move without thinking, but later it turned out that he was just following one of his own games.

[In case of 18.Qd3 Black should have played Nf8! with good chances to equalize *(*instead of *18...Qh4 19.Be3 Bxe3 20.Rxe3 Rd8 21.Nf5±* with White's advantage in Tischbierek, R (2395)−Lukacs, P (2460)/Leipzig 1983. *)*]

[18.Qf3!?]

18...Ng5!N A good novelty. The knight is not only aiming for e6, but also to e4 from where it puts pressure on f2.

[In the only preceding game, which I wasn't aware of, Black played 18...Nf8 Probably here Kudrin waited for me with 19.Qf3!± , which is an obvious improvement upon *(19.h4 Ng6 20.Qg4 h5*= with roughly equal chances in Kudrin, S (2547)−Gustafsson, J (2634)/New York 2011. *)*]

19.Qg4

[19.Qd3!? Ne4 20.Re2 c6 21.Rd1 was a reasonable alternative to the text.]

19...Rg6! 20.Be3!± White is still slightly better thanks to this precise move as his knight on f5 is rather annoying and can't be chased away.

[Certainly not 20.Nh4? Bxf2+!]

20...Ne4 21.Qf4 Bxe3

[21...Ng5 doesn't make much sense due to 22.Kh1±]

22.Rxe3 Now White is threatening 23, Rd1 and so my next move is forced.

22...c6! 23.c4!

[After 23.Rd1 Black can choose between Qg5 *(*and *23...Qc7)*]

23...Qc7?!

[23...Qg5!? would allow me to retain good drawing chances. 24.Qxg5 Rxg5 25.Ne7+ Kf8 26.f4 Rg4 27.cxd5 Kxe7 28.Rxe4 cxd5 29.Rb4 b5 30.Rc1 g5 with counterplay.]

24.Rc1! With an obvious threat of 25. cxd5. **24...Nf6** I connected my hopes to this move.

[24...Re8!? leads to an unpleasant rook endgame after 25.cxd5 Qxe5 26.Qxe5 Rxe5 27.Ng3 cxd5 28.f3 f5 29.Rc8+ Kh7 30.Rf8! Rf6 31.Rxf6 gxf6 32.Nh5! *(32.fxe4? f4=)* 32...d4 33.Re1 d3 34.fxe4 fxe4 35.Nxf6+ Kg7 36.Nxe4 d2 37.Rd1 Rxe4 38.Rxd2± and White is a pawn up in a rook endgame.]

25.Qh4

[25.Rf3! seems to be more precise. Nh5 26.Qd4 dxc4 27.Rd1!± and White is better thanks to his control of the d−file and a misplaced knight on h5.]

25...Ng4 26.Rg3?! White returns the favour.

[After the correct 26.Ne7+ Kh7 27.Re2 White wins an exchange for a pawn and obtains good winning chances. Nxe5 28.Nxg6 Nxg6 29.Qg4±]

26...Rg5! An important intermediate

move. **27.f4**
[In case of 27.Nxh6+ gxh6 28.Rxg4 Qxe5 Black restores material balance, but his position remains slightly inferior. 29.g3 Rd8 30.Rd4 with a minimal edge for White due to the vulnerability of the black king.]
27...Qb6+! The only move.

31.Kh1 Rxf5 32.Qxh6 Qf8 33.Rf3+− Now it's over. White's attack is decisive.
33...g5

Until now this has just been normal Italian, and I thought the next change of structure was favorable for me. **11.d4!?** This is an invitation to enter an IQP position, and I thought my pieces were fairly active for it. **11...exd4 12.cxd4 d5**
[The other version, trying to trade more pieces, was 12...Nxe4 13.Nxe4 d5 but after 14.Bd3 dxe4 15.Bxe4 c6 16.d5 *(16.Bg5!?)* 16...cxd5 17.Qxd5 Qxd5 18.Bxd5 White still has some initiative.]
13.exd5 Nxd5 14.Ne4 c6 15.Bg5
I saw this position when I played 11 d4 and it looked promising, Black has some problems finding a square for the queen. **15...Qb6?!** Black tries to provoke a4−a5 so the pawn is hanging there in some lines.
[15...Qc7 16.Rc1 Be6 17.h4↑]

16.a5
[16.Qc1! is a nice, waiting move that I failed to consider. It stops any Nf4 jumps and has the idea of meeting Be6 with Nc5. It is not easy to find a move for Black. f6 *(16...h6? 17.Bxh6; 16...Be6?! 17.Nc5)* 17.Bd2 Kh8 18.Nc5±]
16...Qc7 17.Qd2?!
[17.Rc1? Qxa5 was Black's idea with Qb6]
[17.Qc2! is a subtle improvement over the game, the immediate threat is Bxd5 Be6 18.Bd2!± clearing g5 for the knight, with the point h6? 19.Bxh6! gxh6 20.Bxd5 Bxd5 21.Nf6+ Kg7 22.Nxd5+−]

[19...Nge7! might be the easiest way for Black to play. 20.Ng4 *(20.Bh4?! Nf5)* 20...Bxg4 21.hxg4 Qd7=]
[19...Bb8? 20.Nc5±]
20.Nxg6 hxg6 21.Bxd5! This counter−intuitive exchange allows White to take control of the dark squares,
[21.Nc5 Bf7 is not much for White, there will be a lot of simplifications soon.]
21...Bxd5 22.Bf4 The point behind the exchange, the knight makes it to g5.
22...Qd8 23.Ng5 Black has to be careful to not get mated by Be5−Qf4−Qh4.
23...Rxe1+ 24.Rxe1 Re8?!
[24...Bf7! was a must, Black needs the counterplay against the d4−pawn 25.Be5 *(25.Nf3 Bd5 26.Ne5 Kh7=)* 25...Bc5! is a clever defense, the bishop goes to e7 to eliminate the knight, to keep some pressure White needs to find 26.Re3! Qxg5 *(26...Be7 27.Rg3±)* 27.dxc5 f4 28.Re4±]
25.Rxe8+
[25.Be5? Bxd4! is a clever trick I almost failed for, the queen on d2 is overloaded.]

[26.Bd6!? Qd8 27.Be5]

[26...Qe7 27.b4 and only then Be5. *(27.Be5?! c5⇄)*]
27.Kg3 Qd8 Threatening Qxg5+ so White has to take a decision. **28.Be5** This puts some extra tricks for Black to sidestep.
[28.Bxb8 will transpose to the game.]
[28.h4?! Ba7 with the pawn on h4, White no longer has the idea of transfering the queen to the h−file]
28...Bd6

29.Bxd6 Qxd6+ 30.Qf4 Qd8!
[30...Qxf4+? 31.Kxf4 Bxg2 Black is up a pawn but the endgame is lost by the king activity and weakness of the dark squares. 32.Ke5 Kf8 33.Kd6+− White will just improve with h4, f4, b4 and eventually take b7.]
31.h4 Without the bishops, there are no direct mating ideas with Qh4, but there are dark squares to take advantage of, and a hook on g6.
[31.Qh4 Qf6 Black is not mated.]
31...Kf8!? I thought this was clever defense, otherwise it is also hard for Black to make moves.
[31...Qf8 32.Qc7+−]
32.h5?!
[Waiting with a move like 32.f3 does not allow the king to run to the queenside. Kg8 33.h5 gxh5 34.Qxf5]
32...gxh5 33.Qxf5+ Ke7 34.Qe5+ Kd7 35.Qxg7+ Kc8 now the black king is safe and the a5−pawn is hanging.
36.Qe5! I was somewhat lucky to have this move, as otherwise it is not too clear.
[36.b4? Qd6+ 32 I failed to foresee this check when playing h5]
36...Qxa5 37.Ne6! 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.Qe2?! A pretty rare move, which hasn't been seen on our pages yet. I think that it is premature and can't be recommended.

5...0−0 It doesn't make sense to play 5...

d6, as the pawn can go to d5 in one move, instead. **6.Bb3?!** This retreat also looks inaccurate, as it allows Black to obtain a comfortable position.

[6.d3 d5 7.exd5 Nxd5 8.0−0 is more accurate, although after Bg4 Black is doing fine.]

6...d5! 7.d3 We've just transposed to a Radjabov game against Shirov. See below. **7...h6!?** My idea was to stop 8. Bg5, which puts pressure on the centre.

[However, Black had a more aggressive continuation at his disposal. 7...a5! 8.a4 *(8.Ba4 Rb8! 9.Bxc6 bxc6 10.Nxe5 Qd6! 11.d4 Ba7 12.0−0 c5!−+* ruining White's pawn centre and preparing 13...Ba6.*; 8.Bg5 dxe4 9.dxe4 h6 10.Bh4 a4 11.Bc2 g5 12.Bg3 Nh5!∓* also leads to Black's advantage. *)* 8...h6 with a slightly better version of the game thanks to the unprotected bishop on b3. 8.Nbd2 Re8!? The text isn't new either. Black brings the rook into play and protects the e5−pawn.

[Black has tested a few alternatives. 8...dxe4 9.dxe4 Nh5 10.g3 Bh3 11.Nh4 Nf6 12.f3 and White equalised in Giri,A (2642)−Bacrot,E (2710) Guingamp 2010.]

9.h3 White's idea is to play 10.g4, preparing to transfer the d2−knight to g3 and create an attack on the kingside. It also explains my reaction. **9...Nh5** This move is already new. It might not be the best, but it sets some concrete problems, which White was unable to solve in the current game.

[Objectively, 9...a5! 10.a4 Be6∓ was better.]

10.g3 White has to cover the f4−square. I wanted to provoke this move, as it will be difficult to castle short now, since the h3−pawn is under attack.

[10.Nf1 is another way to do so.

11...f5?! This aggressive move is inaccurate.

[11...a5! preparing 12...a4 was strong again. 12.Ne3 *(12.Ba4 Nf6!)* 12...Nf6∓]

15...exd4 After this White must play accurately to keep the game on an even keel.

16.Nce4! A theoretical novelty which makes this line OK for White.

European Rapid 2014 (9.8) 21.12.2014
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Nxe4 8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ d5

[10...Kf8 is also playable in my opinion. See 11.Qxb4+ Axelrod, A (2338)−Mikhalevski, V (2595)/Herzliya 2014/ [Mikhalevski, V].]

11.Ne5+ Ke6 12.Qxb4 Qf8 13.Qxf8 Rxf8 14.f3 The main alternative to 14. Nc3. First, White pushes the knight back and only then develops his queen's knight to c3.

[Last January 14.Nc3 was played in Harikrishna, P (2706)−Aronian, L (2812)/Wijk aan Zee NED 2014/ [Mikhalevski, V].]

14...Nf6 An extremely rare retreat, which in fact was tested just once, in a game between two little−known players. Usually the knight retreats to d6 in order to go to f5. I'm not so happy about the position of the knight on f6 as it's restricted by the f3−pawn. On the other hand, if the knight goes to f5 via d6 it might be later pushed by means of g4. So only a deep analysis may show which of the retreats is better.

[14...Nd6 is the main line. I've looked at it while analysing the game Harikrishna−Aronian, to be found in our PGN Archive. The most recent game here saw 15.Nc3 c6 16.Kf2 Nf5 17.Rhe1 Kd6 18.Rad1 g6 The players followed the aforementioned game of Aronian's before White introduced a novelty. 19.g4!? *(*Harikrishna played *19.b4)* 19...Ng7 20.h4 Ne6 21.Kg3 Bd7 22.Ne2 Rae8= and Black seems to have solved his opening problems, although he eventually lost the game. Ma Qun (2606)−Wen Yang (2591)/ Xinghua CHN 2014.]

[14...c5!? was played in two recent games. This idea is interesting and needs more practical tests.

A) 15.fxe4 dxe4! 16.dxc5?! *(16.Nc4 cxd4* is critical, when Black obtains two pawns and good compensation for a sacrificed piece. *)* 16...Kxe5∓ with a slight advantage for Black. Gikas, A (2189)−Ben Artzi, I (2344)/Caleta ENG 2014.;

B) 15.Nd3 cxd4 16.Na3 Nd6 17.Nc2 Nf5 18.g4 Nh4 19.Nxd4+ Kd6 20.Rf1 Bd7 with roughly equal chances in Zeng Chongsheng (2520)−Xiu Deshun (2571)/Xinghua CHN 2014.]

15.Kd2

[The preceding game, which I mentioned above, featured 15.0−0

Kd6 16.Re1 Bf5 17.Nc3 c6 18.Ne2 This move looks awkward. Rae8 19.Ng3 Bc8 and Black was fine in Fedyuk, I−Khademalsharieh, S/Kemer 2007.]

15...Kd6 16.Nc3 c6 The b5−square has to be covered. **17.Rhe1 Bf5** Black is provoking 18. g4 in order to exploit the weakness of the f3−square later−on.

[The bishop can be developed to e6 as well. 17...Be6!? 18.Re3 Rae8 19.Rae1 Nd7 and Black should be able to equalise.]

18.Re3 Nd7 A correct idea. Black is taking care of White's strongest piece.

19.Rae1 Nxe5 20.Rxe5

A safe recapture.

[20.dxe5+ is double−edged as both sides obtain a pair of connected passed pawns. Nevertheless, after Ke7 21.Ne2 c5 22.Rc1 d4 23.Ra3 Rfc8 24.Ng3 Ke6 25.f4= the chances are roughly equal.]

20...Rf7 It's understandable that Black doesn't want to allow 21.Re7.

[However, 20...Bd7 21.Re7 Rg8 with the idea of 22...Rae8 looks equal.]

21.R1e3 Raf8 22.Ne2 b6 Black has been preparing ...c5, which explains White's next move. **23.b4**

[23.Nf4 is interesting, although Black shouldn't have big problems after g5 24.Ne6 Rg8 25.g4 Bxe6 26.Rxe6+ Kd7=]

23...Bd7= No more Nf4 ideas. The advance of White's kingside pawns is also stopped and so the position is equal. **24.Ra3 Re8** This move wasn't necessary.

[There was nothing wrong with the simple 24...Bf5 , but Vallejo is trying to complicate matters in order to obtain winning chances.]

25.Rxa7

[25.Rxe8!? Bxe8 26.Nc1 transferring the knight to d3 and potentially to e5 would yield White some hopes of fighting for an advantage.]

25...Rxe5 26.dxe5+ Kxe5 27.Rb7 White is provoking an advance of the b−pawn.

[It was worth trying 27.a4 with the idea of 28.Rb7 or 28.Ra6. Be6 28.Ra6 Rb7 29.Kc3 preparing to meet c5 with 30.f4+ Kd6 *(30...Kf6?* is strongly met by *31.a5! cxb4+ 32.Kb2! Ke7 33.Nd4! Bd7 34.Rxb6! Ra7 35.a6±)* 31.bxc5+ Kxc5 32.Nd4± with a slight edge for White, although it's not easy to win due to the limited material on the board.]

27...b5 Now although Black's pawns are blocked the position is roughly equal as White always has to protect his a−pawn.

28.Ke3 Kd6 Freeing the rook from the defence of the bishop. **29.Nd4 Rf8**

[29...g5!= seems to be more precise.]

30.Ra7

[White could have considered 30.Nb3 g5 31.Nc5 , but Black seems to hold after Rf7 as the pawn endgame is equal thanks to the protected passed pawn on d5. 32.g3 *(32.Rxd7+ Rxd7 33.Nxd7 Kxd7=)* 32...Be8 33.Rxf7 Bxf7 and although the knight is superior to the bishop I don't see how White can break through.]

30...g5!? Black is preventing 31.f4.

31.g3 Re8+ 32.Kd3

[I would have rather retreated to d2. 32.Kd2 to keep the e1−square under control.]

32...Re1 Black activates his rook and forces White to repeat moves. **33.Ra6!** Threatening 34.Nxb5. **33...Kc7 34.Ra7+ Kd6 35.Ra6 Kc7 36.Ra7+ Kd6 37.Ra6** A rather logical draw. This game proved that Black doesn't experience problems in this line.

[Sagar,Shah]

The final rapid game of the four−game match between Wesley So and Praggnanandhaa. The score was tied at 1.5−1.5. A draw would mean that the match would be taken to the blitz format.

But Wesley was determined to end the match in this game itself. **1.e4 e5** Much more solid than the Sicilian tried in game two! **2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.a4 h6 7.h3 d6 8.c3 a5 9.Re1 Be6 10.Bxe6 fxe6** I somehow like this structure for Black. He has a very natural plan with ♘h5−f4. The rook has a half open file and there are more chances to launch an attack. However, it doesn't mean that White is worse, he should be completely fine. **11.Be3**

[11.d4 Bb6 12.dxe5 *(12.Na3±)* 12...Nxe5 13.Nxe5 dxe5= Black is completely fine here.]

11...Bxe3 12.Rxe3 Qe8 13.Nbd2 Nh5 14.g3 This does look weakening, but Black has no real way to exploit it. **14...Qf7 15.Qe2 Rad8** This move really puzzled me. Why did Wesley place his rook on d8. If he was looking to play the move d5, wouldn't the rook be better placed on e8? I am not so sure, but I think Wesley just wanted to confuse Pragg. **16.Nh4 d5 17.Rf1**

27...Nf3+ 28.Kf1 Rdf7 29.Rc2 Kg7 From an equal unclear position, Wesley has been able to turn it around in just five moves and has a clearly better position. **30.Ne1 Nfe5 31.Nxe5 Nxe5 32.Rdc1 c5! 33.Ra1 b6** This is the ideal setup for Black. His pawns cannot be attacked on the queenside and now he goes quietly about attacking White's kingside pawns. **34.Kg1 h5 35.Kg2 Kf6 36.Ra3 Ke7 37.Rb3 Nd7 38.Re2 Kd6 39.Nc2 Kc6** The king defends the b6 pawn and the knight can return back to e5. **40.Na3 Ne5 41.Nc4** White is a tempo too slow for getting his knight on c4. Now it can be taken and the d4 pawn becomes a protected passed pawn. **41...Nxc4 42.dxc4 g4 43.hxg4 hxg4 44.Rd3 Rh8 45.Rd1 Rfh7 46.Rg1 Rh2+ 47.Kf1 Rf8 48.e5**

[48.f4! was the final chance for Pragg. Rh5 Black remains better, but at least White has done away with one of his weaknesses on f2.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3?! This move has been briefly mentioned in

the archive as being good for Black, but not much analysis to back it up. In this game I will attempt to illustrate why White should stay away from it. Don't be fooled by the result of this game or the strength of the player conducting the white pieces. This move allows Black instant equality and hopes for more **4...Nf6 5.d3 h6 6.b4 Bb6 7.b5 Ne7 8.Nxe5 0−0 9.0−0 d6** This move is absolutely fine for Black, but Leinier Dominguez has demonstrated in a couple of his games that Black has an even better way of creating problems for White **10.Nf3 Bg4 11.Nbd2 Qd7**

An interesting attempt to hamper the actualization of White's plan.
[Usually Black met 9.♘f1 with the move 9...Ne7 after which White has a few possibilities to fight for the opening edge:

TCh−RUS Premier 2018 (8.1) 09.05.2018

[Mikhalevski,Victor]

1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 0−0 6.a4 We have already considered this idea in many different move orders, but never in the current position. So, the game is a good opportunity to fill the gap.

[Five other options include 6.Nbd2 Radjabov,T (2713)−Karjakin,S (2772) Shamkir AZE 2014 [Mikhalevski,V]]

[6.Bg5 Kramnik,V (2787)−Matlakov,M (2718) Wijk aan Zee NED 2018 The [Mikhalevski,Victor]]

[6.0−0 Bacrot,E (2718)−Ding Liren (2778) Liaocheng CHN 2018 [Mikhalevski,Victor]]

[6.b4 Macieja,B (2651)−Fressinet,L (2718) Wattenscheid GER 2011 [Mikhalevski,V]]

[6.Bb3 Radjabov,T (2756) −Shirov,A (2745) Baku AZE 2009 [Mikhalevski, V]]

6...a5 As usual, this move is aimed against White's b4.

[6...a6!? is a natural alternative, which after 7.0−0 transposes to 4.0−0. See in our archive.]

[6...d5 is also a reasonable option, which was tested by Kramnik, amongst others. 7.exd5 Nxd5 8.a5 a6 9.0−0 transposing to 6.0−0, which has also been seen on our pages.]

7.Bg5 Karjakin scored two wins with this move in 2017. White wants to prove that the pin might be unpleasant for Black.

7...h6 8.Bh4 Be7 Black decides to unpin the knight. That's also what

Karjakin's opponents did.
[8...d6 9.Nbd2 Kh7 preparing ...g5 is worth consideration.]
9.Nbd2
[9.Bg3 d6 10.Nbd2 leads to a transposition.]
9...d6 10.Nf1 White deviates from the preceding games with this novelty.
[10.Bg3 is the main line, which was tested almost exclusively in 2017. Black has been answering it with three different moves:
A) 10...Nh7 11.0−0 Kh8 12.Qb3 Qe8 13.Rfe1 Bf6 14.Nf1 *(14.d4!±)* 14...Ng5 15.Nxg5 Bxg5 16.Ne3± with the better chances for White in Karjakin,S (2773)−Anand, V (2783) Saint Louis USA 2017;
B) 10...g6!? This way Black prepares 11...Nh5, as the immediate 10...Nh5 may run into 11. Nxe5. 11.Nf1 Nh5 12.Ne3 Kg7 13.Nd5 Bg5 14.h3 Ne7 and Black equalised in Demchenko, A (2660)−Leko,P (2691) Riyadh KSA 2017;
C) Nevertheless, 10...Nh5 isn't bad either and leads to compensation for the sacrificed pawn. 11.Nxe5 Nxg3 12.Nxc6 bxc6 13.hxg3 d5 with some initiative.;
D) 10...Nd7 11.0−0 Bf6 *(11...Nb6!? 12.Bb3 Kh8 13.Re1 f5 14.exf5 Bxf5* Ragger,M (2659)−Dragnev,V (2466) Solingen GER 2017 and now *15.d4* promises White slightly better chances. *)* 12.Re1 *(12.h3!?)* 12...Nc5 13.Nb3 Nxb3 14.Qxb3 h5 15.h3 g5 16.Nd2 g4 17.hxg4 hxg4 18.Nf1 Anand,V (2783)−Levin,F (2474) Schwegenheim GER 2018, and if Black had continued Kg7 19.Ne3 Bg5= he would equalise.]
10...Nh5! 11.Bxe7
[Now 11.Nxe5?? is a blunder, as after Nxe5 12.Bxe7 Qxe7 13.Qxh5 Bg4 the queen on h5 is trapped.]
11...Qxe7 12.Ne3 Be6 13.Qb3
A slight inaccuracy.
[13.Nd5 is strongly met by Bxd5 14.Bxd5 *(* or *14.exd5 Nb8=)* 14...Nf4 15.0−0 Nxd5 16.exd5 Nb8 and Black is at least not worse.]
[13.Nd2! was the best practical chance to fight for an opening advantage.]
13...Nf4 Black is starting to take over.
14.Qxb7? White overestimates his chances. Probably he thought that he could sacrifice the queen, but in fact he doesn't obtain sufficient compensation.
[White should have preferred 14.0−0 Nxd3 15.Bxe6 fxe6 16.Qxb7 Qe8! 17.Qb5 Nc5 18.Qc4 Rxf3! 19.gxf3 Qh5 That's why 16...Qe8. 20.Rfe1 Rf8 21.Ng2 Qxf3 22.Qe2 Qh3 23.Qb5 Qf3 with a likely repetition.]
[14.Qc2!?= admitting that the previous move wasn't necessary also deserved attention.]
14...Rab8 15.Qxc6 Rb6∓
Now the queen is trapped. **16.Qb5?** This is already a losing move.
[16.Qxb6 was necessary, although Black is already clearly better. cxb6 17.0−0 Qf6! threatening 18..Nxg2! 18.Nd2! Rd8! 19.g3 d5! 20.exd5 Nxd5∓]
16...Rxb5 17.axb5 f5! Only this move proves that White's sacrifice was wrong.
18.exf5
[18.Nxf5 Nxg2+ 19.Kf1 Rxf5!

20.Bxe6+ *(*or *20.exf5 Bxc4 21.dxc4 Nf4*−+ and the bad position of the white king is crucial. *)* 20...Qxe6 21.exf5 Qxf5 22.Kxg2 Qg4+ 23.Kf1 Qxf3−+ with a decisive advantage.]

18...d5! The main point of the previous move. Now Black gets to d3. **19.Ba2**

[19.fxe6 is a possible alternative, but White's position is already bad anyway. dxc4 20.Nxe5 *(20.dxc4 e4 21.Ne5 Qc5 22.e7 Nxg2+! 23.Nxg2 Qxf2+ 24.Kd1 Re8*−+ and White is lost. *)* 20...cxd3 21.0−0−0 Qxe6 22.Nxd3 Nxd3+ 23.Rxd3 Rxf2−+]

19...Nxd3+

[19...Bxf5!? was also strong. 20.Nxd5 *(20.0−0−0 Nxd3+ 21.Kb1 Qd7! 22.Nxf5 Qxf5*−+ *)* 20...Nxd3+ 21.Ke2 Qd6−+]

20.Kd2 Bf7 21.Kxd3

[21.Nxd5 is also hopeless. Qc5 22.Kxd3 Bxd5 23.Bxd5+ Qxd5+ 24.Kc2 Qe4+ 25.Kb3 Qxf5−+]

21...e4+ 22.Kc2 exf3 23.gxf3 Qh4!−+ White's position falls apart. **24.Rhf1 Qa4+**

[or 24...Rb8!?−+]

25.Bb3 Qxb5 26.Ba4 Qe2+ 27.Kc1 Rb8 28.Bc2 Qb5 29.Kd2 d4! Opening up White's king. **30.cxd4 Qxb2 31.Ra4 Rb4** A well−played game by the Russian GM. 10.Nf1 doesn't seem to promise much, and anyway White had to try 13.Nd2.
