Weiß beabsichtigt, ein Tempo zu sparen (♖e1), während er seinen Springer zum Königsflügel überführt. Allerdings gibt es bei diesem Zug zwei kleine Nachteile. Erstens wird der Springer nur Zugang zu e3 haben; manchmal ist g3 ein besseres Feld, was ♖e1 Δ♘f1 Bedeutung verleiht. Es stimmt, dass in vielen Fällen dies von geringer Relevanz sein könnte, da das finale Ziel sowieso das Feld f5 it. Der zweite Aspekt ist etwas wichtiger. Bevor er mit seinem Springer nach e3 geht, würde Weiß gerne mit ♗e3 die schwarzfeldrigen Läufer tauschen, aber mit dem Springer auf c4 könnte dies nach ...b5 gewisse Probleme verursachen.

Another important achievement is that the f5−knight cannot be exchanged too easily. Weiß hat es geschafft, seine Entwicklung zu vollenden, ohne die schwarzfeldrigen Läufer zu tauschen, was seine Angriffsmöglichkeiten erhöht. Angesicht der aktiveren weißen Stellung ist das Feld h6 anfälliger als das Feld f2, was den a7−Läufer zu einem Zuschauer macht. (Diagram)

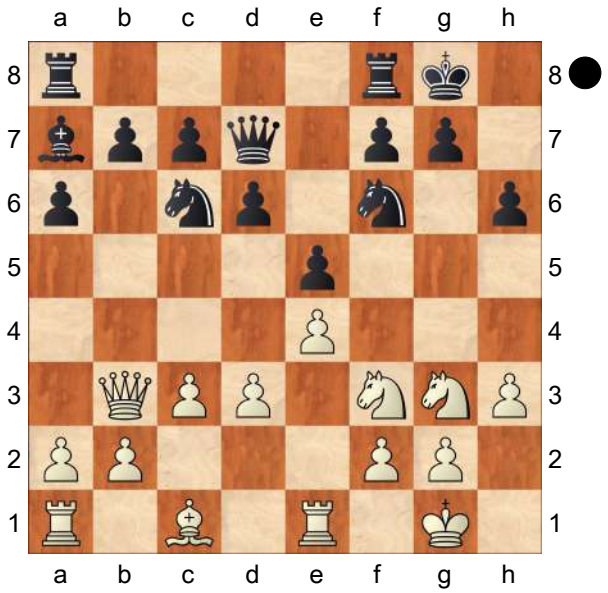
The position can be regarded as fairly equal, even though it is easrier to find moves for White (plan d3−d4). Grandelius played 13...Tfe8 against Hillarp 2009. But now he deviates.

13...Kh7 It is certainly not clear that this move is an improvement. Jonny has a keen eye for tactics and spots the oppurtunity to seize a small initiative.

14.d4! Rfe8



[14...exd4 15.cxd4 Nxd4 16.Nxd4 Bxd4 17.Qd3 Threatening e4−e5+. Be5 18.f4 and White is very much better.]

16.Rad1 exd4

[16...b5 finally threating the pawn was the alternative.]

17.cxd4 Nxe4

[The waiting strategy by 17...Ne7 did not appeal to Grandelius.]

18.Nxe4 Rxe4 19.Qxb7 Rb8

A human move which gives White a clear edge.

[19...Ree8 20.Rc1 Bc5! was a tricky way to keep White's advantage to a minimum. 21.Qb3 *(21.dxc5? Reb8)* 21...Bb6 22.d5 Ne5 23.Nxe5 Rxe5 24.Bxb6 Rxe1+ 25.Rxe1 Rb8]

[22...Rb7 23.d5 Nb8 24.Bxa7 Ra4 25.Qd3 Raxa7 26.Nd4 is depressing.]

23.Qa4! Rb6 24.Nd2! Rh4 25.Rc3 Rh5 So far Hector has played a perfect game and I can imagine that in his mind there was a sence of harmony. **26.d5**

[Perhaps White could improve te position even a little bit further before playing d5. 26.Nb3 it is not easy to see how black can prevent d4−d5 as d5 27.Rec1 is winning the piece.]

26...Rxd5 27.Bxb6 Bxb6 28.Nb3 Rf5 29.Re2 Ne5 30.Qa8+?!

[Hector is clearly very good at endgames, and many topplayers would probably not give many seconds of thought to 30.Qxd7 simply exhanging the Queen and then slowly grind Black down. Nxd7 31.a4! heading for a ending with an clear exchange up due to the weak c7−d6− pawns. g6 32.a5 Bxa5 33.Nxa5 Rxa5 34.Rxc7 Ne5 35.Rd2 d5 36.Rc8+ Kg7 37.Rd8 wrapping up the pawn.]

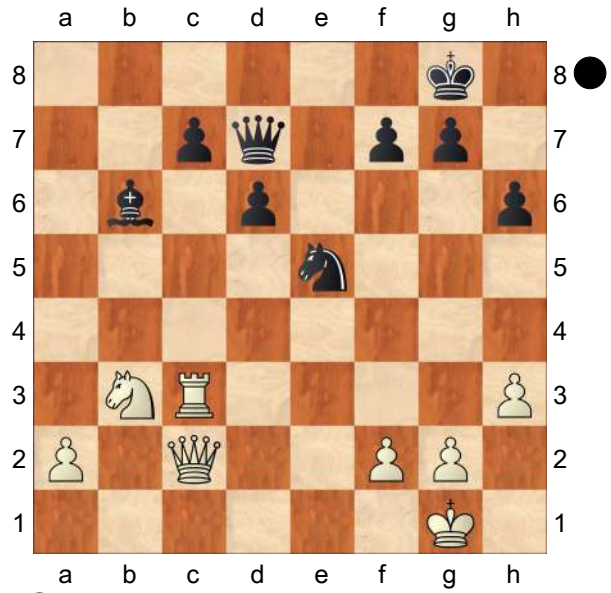
30...Kh7 31.Qe4 Now, on the other hand the picture is not so clear. **31...Ng6**

[Putting up resistance with a advanced frontier by playing 31...d5 32.Qc2 g6 was better. Black has interesting possibilities as Q−d6−g3 (when circumstances allow it), and d4−d3 which gives White some problems.]

32.Rf3 Re5 33.Qc2 Kg8 34.Rxe5 Nxe5 35.Rc3

(Diagram)

If we compare this position to the one



with Queens exhanged one can see that this one demands an exceptional level of technique for White. **35...d5 36.Qe2 Qf5 37.Nd2!**

[I still like the idea of playing 37.a4 taking away the safe haven of the Bishop. Perhaps Jonny was preoccupied with d4 38.Rc1 d3 39.Qd2]

37...d4 Jonny finds a clever way to activate the rook. **38.Ra3 d3 39.Qe1?!**

[Again Jonny disregards the exchange of Queens. This time it was not as obvious as last time: 39.Ra8+ Kh7 40.Qe4 Bxf2+ 41.Kf1 Black is temporarely winning a pawn. Qxe4 42.Nxe4 Bb6 43.Nd2 But now he can't prevent the a−pawn without giving something back: Nc6 44.Nc4 Bd4 45.a4 Nb4 46.Rd8 Bc3 47.Rd7 c6 48.Rxf7 and White is winning.]

39...g6 40.Ra4 Kg7 41.Re4 f6 42.Kf1 h5 The psychological momentum is now on Black's side. **43.Ra4 Qd7 44.Qd1 Qc6 45.Rf4 g5 46.Re4 Qc5 47.Qe1 Qd5** Centralization. **48.Ra4 Qc6 49.Qd1 Qc5 50.Qe1 Qc2**

[50...Ba5!]

51.Re4?

[51.Nb3 The sad news for White is that he now has to find "only moves".]

51...Ba5 curtains. **52.Rxe5 Bxd2 53.Re7+ Kh6 54.Rh7+ Kxh7 55.Qe7+ Kg6 56.Qe8+ Kf5 57.Qd7+ Ke5 58.Qe7+ Kd5 59.Qd7+ Kc5 60.Qxc7+ Kb4 61.Qe7+ Ka4 62.Qa7+ Ba5 63.Qd4+ Ka3 64.Qd6+ Bb4**

This game might indicate that Grandelius will win this year. Despite weak play in the initial phase of the middlegame and inadequate creativity in the defence he ended up winning by oppotunistic play in a losing position. And Nils will probably not end up in many more losing positions in the tournament. Jonny on the other hand might consider to forget about the audience once and a while. His preformance up to move 29 was absolutely world class. It is allowed to finnishing of games boringly...

Ever since I acquired a taste for such odd, invisible moves as 2.Ng6!!. To avoid detection by the opponent they are often carried out near or on the edge of the board. After all, all of us have been taught how significant is to control the center of the chessboard! Therefore the moves on the edge may easily escape your opponent's vigilance. I'm happy to prove with the following example from my own game that the topic of odd moves is not entirely my fancies with no relevance to OTB games. In fact, my entire article is designed to prove the opposite. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.0−0 0−0 6.c3 d5 7.exd5 Nxd5 8.b4 Be7 9.Re1 Bf6 10.Ng5 Bxg5 11.Bxg5 Qxg5 12.Bxd5 Ne7 13.Bf3 Ng6 14.Nd2 c6 15.g3 Bh3 16.Ne4 Qe7 17.Bh5 Rae8 18.Qd2 Bc8 19.a4 Nh8?! 20.d4 Qc7 21.a5 Ng6 22.d5 cxd5 23.Qxd5 Rd8 24.Qc5± Qb8 25.Bxg6 hxg6** Diagram

[20.Ba3 is most often seen, Rf8+ *(20...Qxd1 21.Bxd1 Rf8+)* 21.Ke1 Qxd1+ 22.Bxd1 This unbalanced endgame should be objectively equal, as White has two pawns for the exchange and hopes to keep some pressure on c6 and improve his position with d3−Bc1 etc. I suggest now a natural but still untested plan: Nb7!?N bringing this knight back to the game. [12...Nxc3!? is a reasonable alternative.]

13.Qe2N A novelty in a well−known position. One of the ideas behind this move is the fact that after White plays Bd3 his bishop isn't hanging, compared to the 13.Qb3 line.

[Earlier everyone played 13.Qb3 Krzyzanowski,M (2509)−Mikhalevski, V (2580) Budapest 2019 [Mikhalevski, V]]

13...Nxc3?! My first independent move turns out to be dubious. The main drawback of taking on c3 is strengthening White's centre, in particular the d4−pawn. I understood this, but thought that the idea of 14...f6 may justify it.

[I had at least a few better options: 13...Ne7!? Black may play the same way he does in the line with 13.Qb3. 14.0−0 *(14.Bd3 f5!* is fine for Black. *)* 14...c6 15.Bd3 f5!=]

[13...Ba5!? Since the knight on c3 is unprotected compared to the 13.Qb3 line, Black may try to attack it.

A) 14.Rc1 Nb4 15.0−0 c6

A1) 16.Ba4? runs into Nd3! 17.Rc2 *(17.Qxd3 Nxc3 18.Qd2 Nxa4−+)* 17...Nxb2 18.Nxe4 Nxa4−+;

[13...Nb4!? [16.0−0!? Bh5! *(16...Be4 17.Nd2 Bg6 18.a4 a5 19.f4±)* 17.g4 Bg6 18.exf6 Qxf6 19.Ne5±]

16...Qxf6 17.Ne5 c5! An important resource. Black isn't afraid of 18.Nd7.

18.0−0!

[18.Nd7?! doesn't promise any advantage in view of Qc6! 19.Nxf8? *(19.Ne5* is necessary. *)* 19...cxd4! and despite the extra rook White is in trouble. 20.0−0 *(20.Nxg6?* loses to *Qxc3+−+)* 20...dxe3 21.Nxg6 exf2+ 22.Kh1 hxg6∓]

19.Nxg6 hxg6 20.dxc5 Bxc5 21.Bxc5 Qxc5 Now, despite the slightly damaged pawn structure, Black should be able to hold. **22.Qe6+ Kh7 23.Rad1 Rf5!** I prepare to double rooks. **24.Rd4 Raf8 25.Rh4+**

25...Rh5 26.Rxh5+

[26.Qg4 Rff5 27.Qb4 Qb6!= is also equal.]

26...gxh5 27.Qe5 h4! It's good to fix White's kingside, as I don't mind trading the h4 and c3−pawns. **28.Qg5 Kg8!=** Black has fully equalised. **29.Qd2 Re8! 30.Rb1** Both sides take control of open files.

11.d3!? A practical decision, since White needs to hurry up with the development.

[Some extensive and complicated analysis proves that 11.c3 was objectively best, but both sides would have to find difficult moves in that case: Ng4+ Where to put the king? It is not an easy task. *(11...Bg4?* is worse, as after *12.Qf1 Nc2* White is able to finish the development with a couple of precise moves: *13.Bb5+! 11...dxc4? Black doesn't seize his chance.

[11...Ng4+! would be the best attempt, again asking White where he wants to place the king. 12.Kg1! Now this is the best choice, but also difficult to find. *(12.Ke1* seems safer, but after *dxc4 13.c3 Qf6!* Black has enough activity to keep a dynamic balance, for example *14.Qd2 Qh4+!* 15.g3 is not possible now in view of the check on f3. *15.Kf1 Nf5! 16.Kg1 cxd3 17.h3 Ng3! 18.Qxd3 Nxh1 19.hxg4 Bxg4∞)* 12...Qc5 13.Be3!! 8.Nxd4 exd4 9.c3 In my opinion, very logical reaction on black's idea. White is going to get into the game his queenside knight, and, at the same time, white is ready to activate his queen, transfering it to b3. White has the following alternatives:

12.dxc4 White opens the "d" file for the rooks, that they'll be able to press black's pawn "d".

[Worse is 12.Qxc4 c6 with acceptable position for black.]

12...Qd7 13.Bf4 White knows, that sooner or later black will play c7−c6 in order to cover the d5 square. So, last white's move is going to put pressure on black's d6 pawn.

[Probably, after 13.Qxb7 Rfb8 14.Qa6 Rb6 15.Qa5 c5 16.Nd5 Nxd5 17.cxd5 Rb4⩲ black has sufficient compensation for equalizing the game.]

13...Nh5 driving away white's bishop.

28.Nc3 Rf8 29.Nd5± White absolutely dominates the board. He has at least two good plans to improve the position. One of them is to carry out a4−a5, thus, attacking black's weaknesses on the queenside. Another one, is to centralize his heavy pieces, threatening with invasion through the centre. **29...Qe6**

30.exf5 Rxf5 31.Re1 White rooks have nothing to do on "c" and "d" files,

therefore, he occupies the "e" file.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 The old−fashioned variation, which leads to very positional

play. **6...d6** There is almost no difference if Black would play first 5...d6 and then 6...a6 **7.0−0 0−0 8.h3** White takes control over g4−square in order to avoid Black's knight jump. We have reached the main position of the so−called classical Giuoco Piano. White has two possibile plans in this position: 1) prepare the d3−d4 advance by playing Re1, Nbd2−f1−g3 2) develop a kingside attack by playing Re1, Nbd2−f1−g3 followed by Nh2 and Qf3. On the other hand, Black should try to challenge the strong b3−bishop and execture the d6−d5 break in the most suitable moment. **8...h6** This is prophylaxis against a possible Bg5. **9.Re1 Re8** This move helps to preapare Be6 and in general determines Black's strategy to keep dark−squared bishop as much as possible on c5 (not playing Ba7), trying to get it to f8 after the thematic advance in the center d6−d5. **10.Nbd2 Be6!** Getting rid of White's pressure along a2−g8 diagonal is one of Black essential ideas in this variation. **11.Nf1**

[An obvious alternative here would be 11.Bc2 when Black is ready to carry out d5 12.exd5 *(*Another popular direction here is *12.Qe2 Bf8!* the best square for Black dark−squared bishop. Now, a possible knight−transfer to f5 is not an issue anymore. *13.exd5 Qxd5 14.Ne4 Nxe4 15.dxe4 Qb5! 16.Bd3 Qa4* Black queen is quite annoying and White decided to force draw by repeation. *17.Bc2 Qb5 18.Bd3 Qa4 19.Bc2 Qb5* 1/2−1/2 (19) Gelfand,B (2758)−Aronian,L (2786) Moscow 2009 *)* 12...Bxd5 13.b4 This line has been quite fashionable recently. Ba7 This is one of the rare cases where I prefer to put the bishop on a7. This could be explained by the fact that Black has a clear plan to put pressure against the f2−pawn. 14.a4 b5! Sooner or later Black has to stop b4−b5 idea. 15.Bb2 Qb8!? Trying to activate the queen via b6−square. *(*Very reasonable for Black looks *15...Bb6 16.Rc1 Rb8* with normal game for Black Kadric,D (2546)−Sevian,S (2580) Dallas 2016 *)* 16.Nf1 Qb6 17.Ne3 Rad8 18.a5 Qb7 19.Nxd5 Nxd5∞ with very unclear play Hou,Y (2673)−Eljanov,P (2760) Wijk aan Zee 2016]

11...Bxb3

[There is nothing wrong with immediate 11...d5 here is one illustrative line 12.exd5 Bxd5 13.Be3 Bf8 14.Ng3 Bxb3! This looks like the most simple solution. *(14...Na5 15.Bc2 c5 16.a3 Nc6 17.Nd2 b5 18.a4 Qc7=* not bad either as in Adhiban,B (2671)−Ponomariov,R (2709) Baku 2016 *)* 15.axb3 a5 Very ambitious move. Black believes White b3−pawn might be weak in long−term 16.Qc2 too passive. Better would have been *(16.d4 exd4 17.Nxd4* with equality. *)* 16...Qd7 17.Rad1 Rad8∓ and Black was slightly better thanks to his space advantage in Vovk, A (2599)−Durarbayli,V (2559) Al Ain 2013]

12.axb3

[In case of 12.Qxb3 Black shouldn't waste time for defending the b7−pawn, since it's not really hanging! d5 b7−pawn is untouchable 13.Ng3 *(13.Qxb7?? Na5* White queen is trapped. *)* 13...Qd7 14.Bd2 Bb6

15.Rad1 Rad8 16.Bc1 Qe6=
Black has equalized comfortably in Paehtz,E (2472)−Mkrtchian,L (2434) Huaian 2016]

12...d5 13.Qe2 Bf8! My favourite square for Black dark−squared bishop! The major advantage of Black's last move is the security of the kingisde. Now, Black can prevent White's knight from heading to f5 by playing g6.

[Black was doing fine also i the following game 13...Qd7 14.b4 Bf8 15.Ng3 Rad8 16.Nh2 Andriasian,Z (2598)−Pashikian,A (2607) Yerevan 2013 Now very strong would have been d4! 17.Rd1 Re6 with nice game.]

14.Ng3 g6! 15.b4 Qd7 Now Black comfortably completes his development. **16.Bd2 Rad8 17.Rad1 Re6 18.Bc1 Rd6∓** Black position is better thanks to his space superiority. **19.Nd2 Bg7 20.exd5 Rxd5 21.Nde4 Nxe4 22.Nxe4 f5 23.Nc5 Qc8 24.f4 b6 25.Nb3 Qd7 26.fxe5 Rxe5 27.Qf1 Rxe1 28.Qxe1 Qd5 29.Nd2 a5 30.bxa5 Nxa5 31.d4 c5 32.Nf3 Nb3 33.Be3 g5 34.Bf2 b5 35.Nd2 cxd4 36.Nxb3 Qxb3 37.Bxd4 f4 38.Rd2 Bxd4+ 39.Rxd4 Rxd4 40.Qe8+ Kh7 41.cxd4 Qd5 42.Qe7+ Kg6 43.Qc5 Qe4 44.Qxb5 ½−½**

13...Nc5 Black's counterplay is connected with the pressure on the white's central "e" pawn.
[Comes to consideration: 13...Ne5 14.Ba2 Be6∞]
14.f3 strengthening the center.
[Of course not 14.b4?! Nxe4]
[14.e5 doesn't promise anything special: dxe5 15.Qxd8 Rxd8 16.Bxe5 Bxe5 17.Rxe5 Ne6 and black is close to an equality.]
14...Be6 15.Bf1 Certainly, white doesn't want to trade bishops, as he has a space advantage. **15...a5** preventing b2−b4, thus, improving the "status" of the knight on c5. **16.b3** defending the a4 pawn, in order to play ♖ad1.
[16.Rad1 Bxc3 17.Qxc3 Nxa4∞]
16...Qd7?! Strange move without any idea. Sometimes the black queen can be attacked by ♗b5.
[The most logical was to continue 16...Be5 17.Rad1 Qf6 18.Ne2!±]
[After 16...Bxb3 17.cxb3 Nxb3 18.Qd3 Nxa1 19.Rxa1 white has ♗+♘ for a rook and two pawns. I would evaluate this position as preferable for white, as he has very active light pieces− pair of bishops and knight, which is going to occupy the central d5 square.]
17.Rad1 Nxb3? Quite difficult to explain this move. Maybe, black felt, that white has got an advantage, and gradually will realize it. So, she decided to change the character of the struggle. But after this sacrifise white gets a decisive advantage. **18.cxb3 Bxb3 19.Rb1 Bxa4 20.Nxa4 Qxa4 21.Rxb7+−** White is a piece up without any counterchances from the black side. [15.Bd3 is the main line. See Naiditsch,A (2702)−Kramnik,V (2794) Antalya TUR 2017 [Mikhalevski, Victor]]
15...Nf5 Now this move is much stronger than with the white bishop on d3. **16.Na4** White has to protect the bishop on e3.
16...Nxe3! First of all, Black eliminates the dark−squared bishop.
[After 16...Bh5!? 17.g4 Nxe3 18.Nxb6 Nxf1 19.Nxa8 Nfd2

20.Nxd2 Nxd2 21.Qe3 Ne4 22.gxh5 f5!= the position is equal.]

18.Nc3 f6 After exchanging White's dark−squared bishop and keeping my own one I felt it would make sense to open up the position.

[18...Qe7!? also makes sense with the idea to meet 19.Bd3?! with f5!]

19.Nxe4? The first serious mistake.

[19.Bd3! was necessary. fxe5 *(19...f5!?=)* 20.Nxe5 Ng5!? *(20...Bxe5 21.dxe5 d4 22.Qe2 Nxf2 23.Bc4+ Kh8 24.Rxf2 dxc3 25.bxc3 b5 26.Bb3 Qb6 27.e6)*

20.Nd2 fxe5

[20...Bf5!? I didn't seriously consider this move, but it deserved attention. 21.f4 *(21.Nf3 Re8∓* is clearly better for Black since the e5−pawn is weak. *)* 21...g5! A strong idea, which secures an advantage. 22.Nf3 gxf4 23.Qxf4 Be4∓ Once again there is a problem with the e5−pawn.]

[22.Rad1!? was worth a try, although Black retains the better chances. For example, Qd5 23.Qg3 Qxa2 24.Qc3 exd4 25.Rxd4 Qa5 26.Qxa5 Bxa5 27.Rxe4 Rfe8∓]

22...Kh8 23.dxe5 b5! I took a long time before playing this move, as I had a feeling that 23...Bxe5 is better, but couldn't make it work. However, the text is much simpler, the idea is to save the b−pawn, which could be lost in the line with 23...Bxe5.

[23...Bxe5!? 24.Qxe4 Qf6 *(*The line *24...Bxb2 25.Rab1 Qf6 26.Bd3 g6 27.Qe2 Bd4 28.Rxb7* demonstrates why I started with 23... b5. *)* 25.Rab1 *(25.Qc2 b5 26.Bd3 Bxb2 27.Rab1 Bd4 28.Rbc1 g6 29.Qxc6 Bxf2+ 30.Kh1 a6∓)* 25...Rae8 26.Qc2 b5 27.Bd3 Bc7 28.Rbc1 Re6∓ and Black is still better.]

24.Bb3 Bxe5 25.Qxe4 Bxb2 26.Rad1 Qf6∓ Black is up a pawn plus two connected passers on the queenside.

27.Bc2 g6 28.Qe3?

[28.Rd3 c5 29.Rf3 Qe5∓ would be a better practical chance.]

28...c5!−+ The most accurate, as the pawn is untouchable. This way I secure the d4−square for my bishop.

[28...Rad8 29.Rxd8 Rxd8 30.Qxa7 Rd2 31.Qb8+ Kg7 32.Qa7+ Kh6 33.Qe3+ Qg5 34.Be4∓ is better for Black, but again the text is simpler

30.Qg3

[30.Qh6 Rf7−+ is also hopeless.]

30...Rae8! 31.Rxa7 Re1! Avoiding the last trick.

[31...Bxf2+?? runs into 32.Rxf2 Re1+ 33.Kh2 Qxf2 34.Rxh7+! Kxh7 35.Qxg6+ Kh8 36.Qh7# This is what my opponent was hoping for.]

32.Qf3 Bxf2+! The most precise.

[32...Bxf2+! 33.Kxf2 Qh4+ explains White's resignation. I was happy with my play in this game. White's 15.Be2 doesn't promise any opening advantage and so one should prefer the main line, 15.Bd3.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3! The modern main line, which has scored well for White in recent years. **8...Nd5!** The most appropriate response, attacking the knight and clearing the path to advance the f−pawn.

[The following line is an example of how useful the bishop can be on d3: 8...h6 9.Ne4 Nd5 *(* If *9...Nxe4 10.Bxe4* the f5−advance is not so dangerous now. *Bd6 11.d3 0−0 12.Nc3 f5 13.Bf3±* White keeps the pawn and has everything under control. *)* 10.0−0 Be7 11.Ng3! 0−0 12.Bf5 ;1−0 Wang,H (2690)−Fang,Y (2498) CHN−chT China 2017 (18.2) Again, White solves the problem of the bishop and remains the pawn up, with a better position.]

9.h4!? A less played but ambitious option. Instead of retreating the knight, White keeps it on g5, looking for aggressive play on the kingside with ♕f3/♕h5. **9...h6** This has been played in only 6 games, although it seems the most logical continuation for me.

[Black has tried other moves more often, like 9...Nf4 ,]

[9...Be7]

[and 9...Qc7]

10.Qh5!

[After both 10.Ne4? Be7]

[and 10.Nf3?! Bd6 11.Nc3 0−0 there is no point behind h2−h4.]

10...Qf6!

[10...g6? is bad in view of the obvious 11.Bxg6 hxg5 *(11...fxg6 12.Qxg6+ Kd7 13.Nf7+−)* 12.Bxf7+ Ke7 13.Qxh8 Kxf7 14.Qh5+ Ke6 15.hxg5+− when two piece are not enough against rook and 4(!) pawns.]

[10...Qe7? also loses material: 11.Nxf7 Nf4 12.Nd6+ Kd8 13.Nxc8±]

11.Nh7?! I think Gunina probably had prepared this idea, as the engine approves of it. Still, it seems a dubious practical decision, as White has to find (or remember) some precise moves, while Black's moves look more natural.

[11.Ne4 is a better attempt, see next game.]

[11.Nxf7? is bad now due to Nf4! 12.Qxe5+ Kxf7 13.Qxa5 Bd6! White is the side facing a strong attack now, for example: 14.Be4 Re8 15.d3 Rxe4+! 16.dxe4 Nxg2+ 17.Kf1 Qf3!−+]

11...Rxh7! 12.Bxh7 g6 13.Qf3? Gunina probably messed up something on her preparation, or simply it was not her tournament. It is clear that White has to pose as many practical problems as possible for Black, otherwise the bishop is lost and Black is simply better.

[Therefore, White should have kept queens on the board: 13.Qe2 Nf4 *(13...Qg7* is also playable, but Black will have to defend e5 before taking the bishop *14.Nc3 Be6 15.Nxd5 Bxd5 16.b3!∞)* 14.Qf3 This position is really complicated. The bishop is lost on h7, but White has some resources available. Bb7!? *(14...Be6* is also possible *15.Nc3 Qg7 16.d4! Nd5 17.0−0! Qxh7 18.dxe5∞)* 15.Nc3 c5 16.Ne4 Qg7 17.d4! f5! The position is a mess now, with both sides exchanging blows *(* In case of *17...0−0−0 18.Bxf4 exf4 19.0−0−0!* I think White has no problems to get equal chances, and in the event of something careless like *f5?* the evaluation can even be changed: *20.dxc5! Rxd1+ 21.Rxd1 Bxe4 22.Qa3! Nb7 23.Qa6±)* 18.dxe5 fxe4 19.Qxf4 Qxh7 20.e6!? 0−0−0 21.Be3 Nc6 Of course the analysis can be improved and deepened as both sides have many possibilities. I think the position is just unclear, since one imprecise move by either side may give the advantage to the opponent. Maybe more tournament games in future will answer the question.]

13...Qxf3 14.gxf3 Nf6 Now White simply loses the bishop without enough compensation. **15.d3?** Maybe frustrated by the tragedy in the opening, Gunina practically resigns herself to a lost endgame.

[15.h5 Nxh7 16.hxg6 fxg6 17.d3 h5−+]

[15.Bxg6 at least gives the bishop for one more pawn. fxg6 16.d3∓]

15...Nxh7 16.Bd2 Nb7∓ Gunina tried to fight until the end, but Black's advantage was never in question: after Muzychuk manages to coordinate her pieces and arrange the structure, his position is easily improved move by move. On top of that, White has no open files for the rooks, which means no counterplay as well. **17.Bc3 Bd6 18.Nd2 Be6 19.Ne4 Bc7 20.0−0−0 0−0−0 21.Rde1 Bd5 22.Nd2 f6 23.Rhg1 Bf7 24.a4 Nc5! 25.f4?!**

Eugenio is a chess legend, and was one of World top players in 70s−80s, playing in many tournaments with Karpov, Spassky, Korchnoi and others. Torre played good on this Olympiad scoring positive score on a 1st board against 2570 opposition. **1.e4** Tyomkin,D Lukacs **1...e5 2.Nf3 Nc6 3.Bc4 Nf6** Torre shows respect to his opponent and chooses a solid opening. **4.d3 Be7 5.0−0 0−0 6.Re1** Good alternative to the main 6.c3. hite can use c3 square for the knight b1, and then ♘ to d5. **6...d6 7.a4** First of all it saves ♗c4 from trade (♘a5), also it captures sapce on a queenside. **7...Be6 8.h3** Novelty. ♘c3 is coming and white prevents ♗g4 for that case. Dieser Zug wird in einem sehr aktellen beitrag zum Evans−Gambit von Yelena Dembo in ChessBase Magazin 142 (vor einer Woche erschienen) empfohlen. Niclas Huschenbeth ist übrigens ein eifriger Leser des ChessBase Magazins und es würde nicht wundern, wenn er diesen Beitrag schon kannte.

Nun geriet Gustafsson, der soweiso schon mehr Zeit als Huschenbeth verbraucht hatte, ins Grübeln. Die schwarze Position ist alles andere als einfach. **15...Qd6** Nach diesem Zug hatte Schwarz weniger als 15 Minuten Restbedenkzeit.

[Dembo schließt ihre Analyse mit 15...c6 ab und bewertet die Position als unklar. Rybka ist da für Weiß deutlich optimistischer.]

1.e4 Marin **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6 5.0−0 d6 6.c3 g6 7.d4 Qe7 8.Re1 Bg7 9.Nbd2 0−0 10.h3 Qd8!?** I have mixed feeling about this move. Basically, Black has lost two tempi with his queen, which is generally to be avoided at such an early stage of the game. Taking into account that d4 has been carried out in two moves, this reduces the loss to just one tempo compared to a normal Pirc. However, White's position has some minor drawbacks, too. The insertion of the moves h3 and ...h6 tends to favour Black, because the former is more of a weakness, while the latter does not affect the overall compactness of Black's king side, enabling additional plans such as ...♘h7−g5. At the same time, the bishop is slightly exposesd on c4 (in the Pirc it is usually developed on d3). In fact the main idea of the voluntary queen retreat (to threaten ... exd4 and ...d5) is based on this important detail. **11.Bb3** White has to lose a tempo with his bishop, too, which levels the rhytm of development already.
[11.Nf1?! exd4 **Δ**d5]
[11.Bb5 is the main alternative. Nd7!? *(11...Bd7* would lead to a reasonable form of the Steinitz system of the Ruy Lopez. The fact that the moves ...a6 and ♗a4 are missing slightly favours Black, because after *12.Nf1 Qe8* the threat ...♘xd4 forces White to either clarify the postion in the centre or lose just another tempo with his bishop. *)* 12.Bxc6 bxc6 13.dxe5 Nxe5 14.Nxe5 Bxe5 15.Nf3 Bg7 16.Bf4 Rb8= ½−½ Gomez Baillo,J (2295)−Fernandez Garcia,J (2400)/ Thessaloniki 1984/EXT 97−B (45)]
[Quite amusingly, 11.Bd3 leads to a position that could arise from a genuine Modern Defence, with the difference that Black has been given the tempo ...h6 for free. Understandably, this retreat is not really popular.]
11...Re8 12.a3 This slightly mysterious move is the most frequently seen in practice. Just as in certain lines of the Ruy Lopez, White needs to overdefend his e4−pawn by means of ♗c2 before transferring his knight to the king side.
[However, the immediate 12.Bc2 allows Black obtain counterplay in the centre with exd4 13.cxd4 Nb4 14.Bb1 c5 15.dxc5 dxc5 16.e5 Nh7 17.Ne4 Qxd1 18.Rxd1 Nc6 19.Nxc5 Nxe5 20.Nxe5 Rxe5 21.Ne4 Be6 22.Nc3 Rc8 23.Bf4 Ra5 24.Be4 b6 ½−½ Nunn,J (2590)−Fernandez Garcia,J (2405)/Marbella 1982/MCD]

the slight weakening of the enemy queen side, induced by the previous move.

13.Bc2

[13.a4 would weaken the b4−square, enabling the typical operation ...exd4, cxd4 ♘b4 whenever Black considers it oportune.]

13...Bd7 14.Nf1 a4 15.N3h2

[15.d5 Ne7 16.c4 Nh7 17.Ng3 b5 The queen side counterplay initiated by this move is entirely sound, but gives White some tactical chances. *(*The mainalternative consisted of *17...Rf8* followed by ...f5. *)* 18.cxb5 Bxb5 19.Bd2 c6 20.dxc6 Bxc6 21.Bc3 Qc7 22.Rc1 d5 23.exd5 Nxd5 24.Be4 Qb7? *(24...Rad8∞)* 25.Bxe5 Bxe5 26.Rxc6 Qxc6 27.Bxd5+− 1−0 Kudrin,S (2480)−Thorsteins,K (2310)/Gausdal 1982/MCD (33)]

15...b5 16.d5 Na5 To a certain extent, the structure is typical for the King's Indian, but we can easily notice that the queen side, traditionally White's attacking area, finds itself under complete Black control. Such can be the consequences of a move like a3...

Antes de que existieran los amigos inhumanos (programas informáticos que calculan millones de jugadas por segundo), era frecuente que alguien jugase una novedad teórica a sabiendas de que no era técnicamente correcta. Ahora, el riesgo de hacerlo es mayor, pero la estratagema puede funcionar, como en esta bella partida, gracias al arrojo de un aficionado argentino, que tumbó así al favorito del torneo.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.e5 Ng4!? I'd been tempted to try this move ever since seeing Renet's excellent November 2005 update, where he showed that both this and

[5...Ne4 were both much under rated, and probably at least as good, as the 'standard' 5...d5.]

6.0−0 Critical.

[6.Qe2 defends the pawn, but allows Black a very comfortable endgame after Qe7 7.Bf4 d6 for instance: *(7...f6* has also scored well for Black recently *)* 8.exd6 Qxe2+ 9.Kxe2?! *(9.Bxe2* is better, see Fernandez Garcia, J−Ivkov, B, in the PGN Archive. *)* 9...Bxd6 10.Bxd6 cxd6 11.Na3?! new and not very good, *(11.Rd1* is the best bet, *Nge5 12.Bb5 Bg4 13.Rxd4 Bxf3+ 14.gxf3 0−0−0 15.Bxc6 Nxc6* with a structural plus, Slovineanu, V (2423)−Inkiov, V (2538)/Predeal 2006 *)* 11...Nge5 12.h3 Be6 13.Bb3 0−0−0 14.Rhd1 d3+ *(* during the game I felt that *14...Rhe8!* was probably even stronger, with threats against the exposed white king, but I was too lazy to analyse it! *)* 15.cxd3 Bxb3 16.axb3 Nxf3 17.Kxf3 Nd4+ 18.Kg3 Nxb3 with a solid extra pawn for Black, Naudion, G−Kosten, A/Chamalières 2008.]

6...d6 7.exd6 Bxd6

[7...Qxd6 8.Re1+ Be7 is possible, although 9.b3! looks a bit annoying.]

8.Re1+ Kf8 9.Bb5!? A surprise, although Eric informed me afterwards that Pap had already played this new move a few days before at Nimes, and Rybka seems to quite like it, too. Others:

[A few days later he preferred 9.c3 Nge5!? *(9...Qf6!* was analysed by Olivier in Alsbirk, J−Sahl, B (2445). *)* 10.Nxe5 Nxe5 11.Qxd4 Nxc4 12.Qxc4 Be6 13.Qe4 Bd5! White has regained his pawn, but Black has two strong bishops to compensate his awkward king. 14.Qf5 *(14.Qe2 Qh4 15.h3* was unclear in Muzychuk, A (2452)−Ursic, M (2059)/ Otocec 2006 *)* 14...h6 15.c4!? Bxc4 16.Nc3 Qf6 17.Qc2 Qg6 18.Qa4 b5!? 19.Nxb5 Bxh2+ 20.Kxh2 Qh5+ 21.Kg1 Qxb5 with opposite−coloured bishops, but a small plus for White if he keeps queens on the board, Pap, M (2495)−Drenchev, P (2450)/ Creon FRA 2008.]

[9.Na3 Qf6 10.Bg5 Bxh2+ 11.Nxh2 Qxg5 12.Nf3 Qf4 13.Nb5 Bd7! Olivier's suggestion. *(13...Nce5?* Plachetka, J (2435)−Smejkal, J (2520)/Ostrava 1994 *)* 14.Nbxd4 Nxd4 15.Qxd4 Qxd4 16.Nxd4 h5!? *(16...Re8* Renet *)* 17.Rad1 Nf6 18.Nf3 Bg4 White has insufficient compensation for the pawn, Arnaudov, G (2345)−Radulski, J (2511)/Plovdiv BUL 2008.]

[I had actually been expecting 9.Nbd2!? Nge5 10.Bb3 *(10.Nxe5 Nxe5 11.Re4 Bf5 12.Rxd4 Nc6 13.Rd5 Be6 14.Ne4? Bxh2+ 15.Kh1?! Bxd5 16.Bg5?! Bxc4! 17.Bxd8 Rxd8* was a catastrophe for White in Hadzimanolis, A (2303)−Mastrovasilis, A (2491)/Athens 2005 *)* 10...Bg4 11.h3 h5!? *(*here I had planned to play *11...Bh5* instead, e.g. *12.g4 Bg6 13.Nxe5 Nxe5 14.f4 Qh4! 15.Kg2 Nxg4 16.hxg4 Bxf4* with 3 pawns and a strong attack for the bit *)* 12.Qe2 Qe7 13.hxg4 hxg4 14.Nxe5 Nxe5 15.g3 Qf6 16.Bd5 Re8 which is completely unclear, if rather unpleasant for Black who duly came a cropper! Pap, M (2387)−Leventic, I (2502)/ Bosnjaci 2005.]

9...Bd7 Simple development.

[9...Nce5 is a reasonable alternative.]

10.h3 Nge5 11.Bxc6 Nxc6 12.c3!?

[I had been expecting 12.Nxd4 instead, as then after Nxd4 *(12...Qf6!? 13.Nb5 Qg6 14.Nxd6 Bxh3* was a tempting alternative *)* 13.Qxd4 Bxh3! 14.Bf4 White keeps the c3−square for his queen's knight. For example, Be6 15.Nc3 Bxf4 16.Qxf4 Qd6 17.Qh4 with some compensation for the pawn.]

12...d3

[12...dxc3 13.Nxc3 is undoubtedly possible, but not to my taste.]

13.Qxd3 Bxh3 14.Qb5

[14.gxh3?? Bh2+ wins the white queen.]

14...Bg4! So Black remains a pawn up and has also obtained the bishop pair.

15.Nbd2

[15.Ng5!? menaces Nxf7, Qd7!? 16.Qxb7 Rb8 17.Qa6 Re8! 18.Rxe8+ Qxe8 19.Be3 f6 and the knight has no safe retreat squares.]

[15.Qxb7?! Bxf3 16.gxf3 Ne5 is obviously very satisfactory for Black, whose own king looks rather the safer of the two.]

15...Rb8! The best way to defend b7, as it also stops Ng5. **16.Nh2**
[At first I thought he was going to play the blunder 16.Ng5?? a6 and the knight is lost. But before moving he realised in time and took his hand off the piece!]
16...a6 17.Qa4 Bf5 18.Nhf1 Qd7 19.Qh4 Ne5 White's d3−square, and light squares in general, are looking a bit weak. **20.Ne3**
[20.Nc4! is the best chance, Nxc4 21.Qxc4 but then h5!? menaces ...h4−h3, to bring the h8−rook into the game.]
20...Re8! Returning the bishop pair for development. If Black has time to play ... h6 followed by ...Kg8−h7 he will be close to winning. **21.Rd1** Trying to keep more pieces on the board.
[21.Nxf5 Qxf5 22.Ne4 is met by Ng6 23.Qg5 Qxg5 24.Bxg5 f6 25.Nxd6 Rxe1+ 26.Rxe1 cxd6 with a extra pawn in the ending.]
21...h6 I felt it was time to bring my king to h7 and bring my king's rook into the game, and ...g5 might also be a threat.
[Rybka seems to like 21...Ng6 22.Qg5 Bd3 when the white queen is getting very short of squares.]
22.Nxf5 Qxf5 23.Ne4?! Obvious, but losing. Still, other moves would be a clear admission of defeat, e.g.
[23.Nf1 Qg4 24.Qxg4 Nxg4]
23...Qg6!? The safest.
[Actually, my first thought was 23...Nf3+! 24.gxf3 Qxf3 hitting d1 and e4, and while this should certainly win, I wasn't completely sure of 25.Rxd6 *(25.Re1 f5 26.Re3 Qd1+ 27.Kg2 fxe4 28.Rxe4 Qd5* wins *)* 25...cxd6 26.Nd2 Re1+ 27.Nf1 but with the a1−rook locked out of the game Black must win this.]
24.Ng3
[24.Nxd6?? Nf3+ wins the queen and then forces mate.]
[24.Kf1? Be7 25.Qf4 Bg5 26.Nxg5 hxg5 opens the h−file for the h8−rook, which makes it's first decisive entry into the game without actually having moved!!]
24...Ng4! The point. **25.Nh5?!**
[25.Bd2 (and most other moves) loses to the neat Nxf2! 26.Kxf2 Bxg3+ 27.Qxg3 Re2+ winning the queen, as 28.Kf3 Qe4# is mate.]
[25.Nf1 is the only way to prolong resistance: Kg8 26.Ne3 h5 and the end can only be a matter of time.]
25...Bh2+ 26.Kf1

[48.Be2 Na3 49.Bd3 Bb3]

48...Na3 Matej resigned, although in my opinion it is somewhat premature. To be sure he is in time trouble and frustration about the earlier course of the game played a large part. Matej gab auf, obwohl es sogar hier aus meiner Sicht etwas verfrüht ist. Sicherlich hat die Zeitnot und Frustration über früheren Partieverlauf eine große Rolle gespielt.

[48...Be6 49.Bd3 Na3 A very interesting position. At the cost of his remaining pawns White has so much improved his pieces that even with three extra pawns it is not easy for Black to win. Eine sehr interessante Stellung. Auf Kosten seiner restlichen Bauern, hat Weiß

seine Figuren so verbessert, dass es sogar mit drei Mehrbauern für Schwarz nicht einfach zu gewinnen ist. 50.Bb2]

B1a2) 37.Ne5 Bxe5 38.Rxe5 Qxe5 seems OK for Black, as analysed by John Emms in his notes to Golubev−Nisipeanu, Predeal 2006, as does 39.h4 Re3 40.Kg2 Re2 41.Rf7+ Kh6! , Dembo−Peptan, Eforie Nord *(41...Kg8 42.Rf8+ Kh7 43.Rf7+)* Despite my previous comment, Black can play ambitiously at this point with 42.Kh3 , as he did in Starostits−Bauer, Geneva 2007, (see the Archive), although I have my doubts about this after Re3+! . Quite a sensible and solid choice, especially when compared to the variation 43.Rf3 *(43.Kg2 Qe4+ 44.Kh2 Re2 45.Kh3)* 43...Re2! . 44.Rf7;

B1b) 31.Qe4 (the position resembles a Morra Gambit to an extent White isn't a pawn down, but neither is it easy for him to dent Black's solid set−up) 31...e2+ 32.Kg2 Be3 33.Rf6 Qxf6 34.Qxe3 Rd5 35.Qe8 Rd8 36.Qb5 and Black was completely OK in Vorobiov−Markus, Aghios Kirykos 2009. *(36.Rxe2 Qxg5)* At this point we will discuss the important alternative 36...Rd2 in Tiviakov−Balogh, and 37.Qc5 also has its supporters:

B1b1) 37...Qc6+ 38.Qxc6 bxc6 39.Kf2 Rxb2 40.Rxe2 Rb5 in Ponomariov−Vallejo Pons, Linares 2002. *(40...Rxe2+!?* (a creative way of solving some of the dark−square problems on the kingside) *41.Kxe2 Kg7 42.Ne6+ Kxf7 43.Nxf8 Kxf8 44.h4)* Thus Black tends to prefer 41.Re8!? nowadays: for example, Kg7!? 42.Ne6+ Kxf7 43.Rxf8+ Kxe6;

B1b2) 37...Kg7 38.Ne6+ Qxe6! 39.Qc3+ Kxf7 40.Qxd2 Re8 gave White a pleasant edge in Tal−Ljubojevic, Montreal 1979. So did 41.Kf2 Qb6+ *(41...Qxa2 42.Rxe2)*

42.Kf3 Qc6+! 43.Kf2;

B2) 28...Qc2 29.Rxe3 *(* A novelty, although unusually for Vachier Lagrave, I doubt that it was the product of home preparation. In Zelcic−Sulava, Cannes 2007, Black preferred *29.exf7+ Rxf7 30.Qxc2* , but after *Nxc2! 31.Nxf7 Nxe1 32.Nxd8 Bxd8 33.Kf1 Nc2* found himself overextended with weaknesses right across the board. The bishop can be hit here, and I believe that Black does better with *34.Ke2!)* 29...Qc1+! 30.Kh2 *(30.Kg2 dxe3 31.exf7+ Kh8 32.Qxg6 Qc6+* would still leave White with a pretty pleasant edge. *)*

B2a) 30...dxe3 31.exf7+ Rxf7! would have left White with a strong initiative. The only real defence appears to be *(31...Kh8 32.Qxg6; 31...Kg7* . White battles to gain control of the d4−square and to further weaken Black. I quite like this approach, although *32.Ne6+!? Kh7* first and only then *33.g5* must also have been tempting. Black doesn't then have to play as per the game, but *)* 32.Qxg6+ , but after Rg7 33.Qe6+ Kh8 Black's kingside pieces are blocked in and White will open the queenside with some effect. Black responds well, avoiding the extremely bad French position which would have arisen after 34.Qxb6?;

B2b) 30...Bc7 when there's no defence against mate. actually here 31.exf7+! Kh8 32.Ne6 dxe3 33.Qxg6 Bxf4+ 34.Nxf4! is a rather handy resource This does protect e5, but is rather inflexible and allows Black to blockade. Somewhat more dangerous would have been Qc6 35.Ne6 Qd6+ , retaining a fair degree of pressure: for example, 36.Kg2 and now White might attack with Qd5+ 37.Kg3 Rxf7 . or play on the queenside after 38.Qxf7!? Qe5+ 39.Kh4 It was also possible to rely on the old adage that opposite−coloured bishops favour the attacker to retain a clear plus with e2!? 40.Qg6 e1Q . Now White has a comfortable advantage with the two bishops and pressure on both flanks, but why did Black avoid 41.Qh6+ ? His problem is that]

After **28.Qg3 Kg7**

[28...f6 29.exf6 *(* Black is able to get away with this dark−square weakening, and he most certainly had to avoid *29.Rxf6!?)* 29...Nd5 30.Qh4 Qc7 31.Re7 and the defence remains tight.]

29.Qh4 there's no real way through for White. White might also have tried to probe after **29...Rh8 30.Rxf7+** , but Black should be able to hold: for example, **30...Kg8 31.Rh7**

A very smart idea.
[The classical approach was 10...Bd6 11.d4 exd3 12.Nxd3 Qc7
but White has a way to solve the problems in development here: 13.b3 0−0 14.Bb2 Ne4 15.Nc3 Bf5 16.h3 Rad8 17.0−0 1−0 Radjabov,T (2673)−Naiditsch,A (2626) EU−ch 6th Warsaw 2005 (8) although Black still has some compensation for the pawn, White managed to put all his pieces into play −]
11.c3□ White has to prepare d2−d4.
[11.0−0? puts White in trouble: Qd6 12.Ng4 Bxg4 13.Bxg4 h5! 14.Bh3 Ng4! Black has a strong attack now. 15.Bxg4 *(15.g3? Nxf2! 16.Rxf2 h4!* is already winning for Black. *17.d4 hxg3 18.Rd2 Rxh3 19.dxc5 Qxc5+ 20.Kh1 e3 21.Re2 Nc4−+)* 15...hxg4 16.g3 f5 *(16...Qg6* is equally good. *)* 17.d3 0−0−0∓ Black can always regain the sacrificed pawn, but a mating attack looks more likely.]
11...Qc7 12.d4 White has other options, but they are not really better.
[12.f4 weakens the diagonal, Black is not forced to take the pawn now: Nb7 13.b4 Bd6 14.Na3?! Nd5! 15.0−0 Nxf4 16.Rxf4 Bxe5 17.Rxe4 0−0 18.Nc4? *(18.Rh4* defends h2, but White's position looks a bit weird, for example: *Re8 19.Nc4 Bf6 20.Rh5 g6! 21.Rxh6 Qe7 22.Bf1 Bg5)* 18...Bxh2+ 19.Kh1 Nd6! 20.Nxd6 Bxd6−+ ;0−1 Alekseev,E (2475)−Yemelin,V (2540) St Petersburg−ch 73rd 2000 (5) Black regained the pawn with a nearly winning advantage, due to the exposed situation of White's king.]
[Also bad is 12.b4?! Qxe5 13.bxc5 0−0 14.0−0 Re8 15.Kh1 ½−½ Timoshenko,G (2563)−Sepp,O (2458) Keres Memorial−A 2007 (6) *(15.Ba3? Qg5→)* 15...Qxc5∓ Black regains the pawn again with an easier development.]
12...exd3 13.Nxd3 Bd6 Let's compare this position to the one analysed on Black's 10th move. At first sight, it seems that Black just wasted one move with ♗c5−d6. But a closer look reveals that that was actually good for the second player: White has placed the pawn on a square which could be useful for the development of the knight, and the ♘d3 is more unstable now. Also, the plan seen in Radjabov−Naiditsch mentioned in the notes is not possible anymore. The conclusion is that White will have more practical problems to develop her pieces in a good way now.

The ♘d3 is always the biggest obstacle for White, and there's not a ideal solution for this task. **14.h3 0−0 15.Be3?** Kosteniuk tries to organise the pieces before castling, but this is a mistake.

[But I think White's position is simply difficult to play in practice, since the most played 15.0−0 also doesn't seems enough to solve the problems, as the following games show: Bf5 16.Nb4 *(16.b4? Nc4 17.Nd2 Nxd2 18.Bxd2 Ne4 19.Be1 Rad8 20.Qc2 Rfe8 21.Rd1 c5−+* 0−1 Sarenac,I (2308)−Todorovic,G (2479) SRB−chT Cup Zlatibor 2008 (1.9) Black's centralisation was just too strong in*;* The most played is *16.Nd2 Rad8 17.Nf3* but White is still in trouble after *c5 18.Qa4? Rfe8−+)* 16...Rad8 17.Qa4 0−1 Teerapabpaisit,W (2306)−Abdulla,A (2522) Olympiad−38 Dresden 2008 (11) Rfe8 Black achieves a clear advantage by simple moves of centralisation. White has barely developed the pieces and already faces unpleasant pressure, for example: 18.Bf3 Bd7 19.Qc2 Nc4 20.Nd2 Nxd2 21.Bxd2 a5! 22.Nd3 Bf5−+ and the troublemaker ♘d3 is the cause of White's defeat.]

15...Nd5! 16.0−0

[16.Bd2 White can't waste more tempi: Nc4 17.0−0 Bf5 with huge pressure on White's camp.]

16...Nxe3 17.fxe3 Nc4 White's opening strategy went completely wrong, as Black is regaining the pawn with the bishop pair and a better position. **18.Rf3**

[18.Qc1 Re8 19.Rf3 Nxe3! 20.Rxe3 Qb6 is similar to the next note.]

18...Re8

[18...Nxe3! was already winning, although not by forced play: 19.Rxe3 Qb6 20.Qd2 Re8 21.Kf2 Ba6 The pinned rook is the cause of White's loss in this position. 22.Kf3 Bxd3 23.Rxd3 *(23.Bxd3 Rxe3+ 24.Qxe3 Qxb2−+)* 23...Bh2! 24.Na3 Re6−+ The piece up cannot prevent White from falling into a mating attack.]

19.e4 Rxe4∓ 20.Nf2 Bc5 21.b4 A desperate attempt, as White's position is simply very bad.

[21.Nd2? Nxb2∓ and]

[21.Bxc4 Rxc4 22.Kh1 Ba6∓ are also much better for Black.]

21...Qe7! Keeping the pressure. **22.Kf1 Bxf2 23.Kxf2 Ba6−+** Black finishes the development, which basically decides the game. **24.Bf1 Rd8 25.Qb3 Ne5 26.Bxa6 Nxf3 27.Kxf3 Re1** Mate is unavoidable in a few moves. A nice example of how dangerous this line can be for White in the event of careless play.

with the idea to play c3−c4 in order to activate the bishop. However, this strategy turns out to be not too successful. White's central pawns become significantly weaker and Black gets rid of his bad bishop.

Black's prospects to save this endgame are well substantiated. **29.Ra5**
This move allows Black to eliminate all but one White's pawns at the Q−side. Since White's pawn structure at the K−side is compromised, usual plans of converting an advantage in such type of endgames (cf. Spassky−Torre, Hamburg 1982) will not work here.

This is also logical, as the ♘ does not have any better options at the moment, but it can be argued that preparing castling on the queenside is more expedient. Still, this move is solid and sound. **11.Bg5** The main move, posing Black some concrete problems.

[11.Qf4 White tries to disturb Black's coordination and invade the kingside, but frankly I see no point in this move now that e4 is not attacked. [≤11...Nec6 In general I think this move is not optimal, as the ♘a5 may be missed from the action. 12.Qf4⩲]

12.h4?! White plays forcefully, but I think such activity is not justified. After Black's accurate response, the h♙ only represents a target.

[White should focus on quick development and piece activity, for which the obvious and best move is 12.0−0! and now:

A) 12...Bxg5 13.Nxg5

A1) 13...Qf6 14.f4 Bd7 seems OK for Black, though White may be able to drum up play on the kingside *(14...h6? 15.Nxf7! Kxf7 16.Bh5 Kg7 17.f5±* 1−0 Rajlich,V (2209)−Lukacs,P (2488)/Budapest 2000/CBM 077 ext (40) *)*;

1.e4 e5!? This is the first time I moved my king's pawn to the 5th rank on the first move. I sensed that even my opponent was a little surprised I moved it one square farther because I've always played the French! **2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6!?** I chose this sideline as I saw my opponent doesn't have experience against it and I like somewhat liked the arising King's Indian middlegame structures.
[The more popular and principled moves are bishop moves: 4...Bc5]
[And 4...Be7]
5.0−0 d6 6.c3 g6 7.d4 Qe7 8.dxe5 Nxe5! This is a typical idea which gets rid of the restricted knight on c6 and allows Black to cover d5 later with c7−c6. **9.Nxe5 dxe5 10.Qe2 Bg7 11.b3!?** Creating problems before I can castle.
11...Nh5 A logical response as it attacks a square that his dark−square bishop will leave when it goes to a3.
[After the normal 11...0−0 12.Ba3 c5 13.Nd2 Nh5 14.g3 I thought I may be able to achieve equality, but I didn't like that I have a long−term weakness on d5.]
12.g3 Bd7 Introducing the possibility to castle queenside.
[The first move I considered of course was 12...Bh3 but after 13.Rd1 I couldn't find a good way to get my king safe apart from sac−ing the exchange: 0−0 14.Ba3 Qg5 *(14...Qf6; 14...c5 15.Nd2±)* 15.Bxf8 Nf4 16.Qe3 Bxf8± but I didn't think I have enough compensation as I have no real threats and there isn't any clear way to break through his kingside.]
13.Qe3?!
[13.Ba3 Qg5 *(13...Qf6 14.Qe3)* 14.Bc1 Qf6 when I will have solved the king safety problem.]
13...Bh3 14.Rd1? Missing a tactical detail.
[14.Re1 was better, avoiding any tactics and keeping the game tense.]
14...0−0 15.Ba3 Rfd8! Underlining the drawback of rook to d1−−backrank weakness. **16.Rd5**
[16.Rxd8+ Rxd8! 17.Qe2 *(17.Nd2 Qxa3−+)* 17...Qg5 Black has a decisive attack due to White's inability to develop.]
16...Rxd5
[16...Qf6 17.Nd2]
17.exd5?! This simply gives me a clear target.
[More stubborn was 17.Bxd5 Qd7 18.Nd2 which will require accuracy for Black to keep the pressure.

17...Qd7 18.Nd2 Nf6 19.Ne4 Nxd5 20.Qe2 Rd8 I won a pawn for nothing.

21.Rd1 Nf4 Here, I honestly thought White missed my move (which could very well be true as he spent a long while for his next move) and that I was winning but turns out that I had a blindspot!

[Looking back, I think it was better to play 21...c6! to keep pieces and prepare f7−f5! 22.f3 *(22.Nc5? Qe7; 22.Qc2 Bg4; 22.Qd2 Qf5)* 22...Qc7!∓ *(22...Kh7?! 23.Bxd5 cxd5 24.g4)* 23.Qf2 *(23.g4 Nf4)* 23...b5 24.Be2 f5−+ with a winning game.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 a6 7.a4 Ba7 8.Re1 0−0 9.h3 Ne7 10.Bg5?!
I was not familiar with this move order and it seemed strange to me that Black was playing Ne7 before h6 and I wanted to punish, but this move is not any good.
[10.Nbd2 is the most played move]
10...Ng6 11.Nh4?! Consistent with the previous move, otherwise I just lose a tempo reatreating the bishop after h6.
11...Nxh4?! Missing the chance. Now the pin is annoying and Black will eventually have to play h6 and g5.
[11...Kh8! The idea is to recapture on g6 with the f−pawn and open the file. 12.Nd2 h6 13.Nxg6+ fxg6 14.Be3 I got until here during the game and assumed it would not be bad since I

can push d4 soon, but Black gets a very strong knight on f4 or chances to play for g5−g4. Bxe3 15.Rxe3 *(15.fxe3 g5↑)* 15...Nh5 16.d4 Nf4 17.Bf1 g5↑]

12.Bxh4 h6 13.Nd2 I wanted to keep all options open.

[13.d4 was also possible, but I did not like that I could not play Nd2 next since d4 would hand.]

[13.Na3 I also considered, but I do not know why I would prefer the knight here over d2.]

13...g5

[I was expecting 13...Be6 with the possible idea of breaking the pin by exchanging bishops and taking the queen to e6. I was going to play 14.a5 gaining some space and introducing some Qb3 or Ra3−b3 ideas.]

14.Bg3 This was the kind of position I was aiming for when I played Bg5. I was thinking that with one pair of knights exchanged and Black not having the usual Nh5 resource here, I should be better. If I push d4 and the center opens, Black's king might get more exposed. While if the center stays closed, my bishop on g3 would be a 'bad good bishop' aiming at that pawn chain c7−d6−e5 **14...c6?!** I thought this was too commital. Now the bishop on g3 get some more perspectives.

[Again, I expected 14...Be6 15.a5]

[Against 14...h5 I was planning 15.d4 *(15.Nf3!? h4 16.Nxh4 gxh4 17.Bxh4↑ Kg7 18.Qd2)* 15...exd4?! 16.e5 dxe5 17.Bxe5 dxc3 18.bxc3 with Qc2 coming and all pieces joining the attack on the kingside. *(18.Qc2!+−)*]

15.Bb3 I wanted to be flexible and maybe try for Nc4 (f1) and then d4 or Ne3. Also, the bishop retreats so that a move like b5 does not come with tempo.

[I considered giving up a pawn with 15.d4 exd4 16.e5 dxe5 17.Bxe5 but I did not know what to do after dxc3 18.Bxc3 *(18.bxc3 Bb8 19.Bd4 Ba7)* 18...Bd4]

[15.a5 was also possible, to stop b5.]

15...Re8

[15...Be6 16.Nf1 *(16.Nc4 Qe7 17.d4 Rad8* and my queenside pieces seem a bit tied up *)* 16...Qe7 17.Bc2 with d4 and Ne3 next. I still have some pressure.]

16.Nc4?! The knight does not seem to be well placed here.

[16.Nf1 Be6 17.Bc2 seems to be a better option, to push d4 before Ne3 and not allow Bxe3. *(17.a5)*]

16...Be6 Now I cannot push d4 and I could not see many useful ideas.

17.Ne3?!

[17.a5 Qe7 and I still need a plan.]

[17.Qe2 b5 and the knight has to retreat to d2. but it is better than allowing simplifications. 18.Nd2±]

17...Bxe3 18.Rxe3

[18.fxe3 c5 and I did not think I could be better, since the bishop on g3 does not have much future.]

18...Bxb3

[18...c5 19.Bxe6 *(19.Bc2!?)* 19...Rxe6 *(19...fxe6 20.d4±)* 20.a5 still with some hopes of opening the game with d4 or b4]

[If Black played some waiting move like 18...Kg7 I can keep my bishop with 19.Bc2]

19.Qxb3 b5?! I did not like this move. It seems the tension on a4−b5 favors me. I expected a queen move.

[19...Qd7 20.Qd1 anyway I have to stop Nh5−f4. I thought this line would continue in a similar way than what happened in the game, but Black having an extra tempo and not have played b5.]

[19...Qe7]

20.Qd1 Stopping Nh5 and preparing d4 (exd4 Qxd4 would defend e4). I have to do something, if the position stays closed I can easily be worse when the black knight gets a good square.

20...Qe7

[20...Qd7 21.d4 does not look like much improvement, Qf3 would come with a tempo.]

[20...Kg7 seemed to me like a flexible move, and I expected this. 21.d4 Qe7 22.Re1±]

21.d4 Black's position is hard to play now. During the game I still assumed there was some way for Black to equalize but I could not find it. Black has to take into account moves like axb5, dxe5 and h4. With White, it is easy: my next moves are probably Re1 and Qf3, against pretty much anything Black does, or even include Kh2 to slightly improve the king.

[21.b4!? was another different way of handling the position, with the idea of putting pressure on the a−file.]

21...c5 I was not sure whether creating more tension was good for Black.

[The engine seems to think 21...Qe6 22.Re1 Kg7 equalizes, but after 23.b3 White is still pushing.]

[21...Rad8

A) 22.h4 Kg7 opening the h−file would favor Black for the moment. *(22...g4 23.h5!)*;

B) 22.Re1 Kg7 23.Kh2±]

[21...exd4 22.Qxd4±]

22.Re1 The rook is doing nothing on e3, so I connect the rooks to prepare and fight for some files when they open.

[22.dxc5 dxc5 23.Rd3? Nxe4 24.Rd7 Qe6 gives White nothing.]

[22.h4 Kg7 I thought Black was still not afraid of opening the h−file or getting a weak g−pawn.]

[22.Kh2!?]

22...cxd4 It makes sense to open some files to get counterplay or exchange some rooks.

[22...Kg7 23.Kh2!? and Black still has to find moves.]

[22...b4 23.Qd3 looked good for me, keeping an eye on a6 a5 24.dxe5 dxe5 25.Qc4±]

[22...Rad8 23.axb5 axb5 24.dxe5 dxe5 25.Qf3 Ra8 26.Rxa8 Rxa8 27.h4 g4 28.Qf5± is a line that shows what could happen if Black just waits.]

24...Rc4 This forced me to trade all the pawns.

[24...Nh5!? 25.Bh2 *(25.axb5 axb5 26.Qxb5 Nxg3 27.fxg3 Rb8* White cannot be better here. *)* 25...Rc4 seems like an improved version of the game for Black. *(25...Qb7!?)* 26.axb5 axb5 27.dxe5 dxe5 28.b3 Rc5]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5! 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3!? Rb8 9.Bd3! Be7 10.b3!? An interesting plan, as in many positions seen in previous games White had problems with the development of this bishop, so he tries to solve it in the first place. **10...0−0 11.Bb2 h6** After this move White's idea works out very well, and this is the reason why 10. b3 has a high score in the database.

[So I tried to work out 11...Rb4!N − a thematic idea seen in the last games, but not tried yet in this position. I think as this is a sideline in a sideline, Black players didn't spot the differences immediately and played normally, realising that "something is wrong" only when it was too late. But this idea changes the evaluation completely, as the analysis proves:

A) 12.Bxe5!? this is playable, but White has to find an amazing idea to save the game: Bg4 13.Qg3 *(13.Qe3?* is worse after *Nd5 14.Bxh7+ Kh8−+)* 13...Nh5! 14.Bxh7+ Kh8 Now White has the resource 15.c4!! Nxg3 16.hxg3 and the open h−file guarantees the draw: Bxg5 17.Be4+! *(*but not *17.Bc2+? Bh4 18.Rxh4+ Qxh4 19.gxh4 Re8 20.d4 f6−+)* 17...Kg8 18.Bh7+ Kh8 19.Be4+ Kg8=;

B) 12.c4?! This obstructs the ♖b4, but the ♗d3 is also hanging in some positions. h6

B1) 13.h4? This idea doesn't work here: Bg4! 14.Qg3 *(14.Qe3? hxg5 15.hxg5 Nh5 16.Qe4 g6−+* White is lost due the bishop hanging on d3. *)* 14...Qd7! Black is ready to take on g5 15.Ne4 *(15.Bc3 hxg5 16.hxg5 Nh5 17.Qe3 Rd8−+)* 15...Nh5 16.Qe3 White's plan has completely backfired, and the tactics work in Black's favour now. Nf4 17.Bf1 Nxc4! 18.bxc4 Rxb2−+;

B2) 13.Ne4 Nxe4 14.Qxe4 *(14.Bxe4?! f5 15.Bc2 e4 16.Qg3 Rf7 17.Bc3 c5!* Accepting the sacrifice looks bad for White in view of simple but annoying threats like Bf6, but on the other hand after *18.Na3 Rb7!* Black achieves a nice position anyway. *)* 14...f5 15.Qe2 e4 16.Bc2 c5! Another nice and typical idea, improving the knight to a strong central outpost. 17.Nc3 *(17.Bc3?* doesn't change Black's plans: *Nc6!* and if *18.Bxb4 cxb4−+* with a winning position for Black. *)* 17...Nxc4! Another nice trick that works with the pawn on c4. 18.a3□ Nxb2 19.axb4 cxb4 20.Na4 Nd3+! Black achieves a strong attack now. 21.Bxd3 exd3 22.Qf3 Bf6 23.Rc1 Re8+ 24.Kf1 Re2−+;

C) 12.Nc3 should be the best continuation, but now 12...h6 is good *(12...c5!?* is also an option *)* 13.Nge4? *(13.h4!?* leads to an interesting position now,

White is better developed and the bishop is not hanging like in the 12. c4 line. *Bg4 14.Qe3 Nd5! 15.Nxd5 cxd5 16.f3 Bc8 17.0−0−0 Nc6∞* when the position remains complicated. *)* 13...Nxe4 The problem (which shows the importance of placing the rook on b4) is that White is not able to recapture with the queen on e4, so he can't achieve an ideal setup like in the game. 14.Bxe4 f5! 15.Bxc6 Nxc6! *(*again not *15...e4? 16.Bd5+!)* 16.Qxc6 Bb7 17.Qe6+ *(17.Qg6 Qd7!∓)* 17...Kh7 18.0−0−0 *(18.Qxe5? 12.Ne4 Nxe4 13.Qxe4! f5 14.Qe2 White has achieved a good setup and has solved the main problem of developing the dark−squared bishop. It is likely that Black's compensation has been already neutralised. **14...Bf6**

It's hard to search for the exact same endgame in the database, but I found this structure in the following endgame (White had h4−g3 already, and somehow was able to bring his king closer to the c−pawn) *(26...c5 27.Rb5* wouldn't change anything *)* 27.Rxc7 Rc2 28.g3 Kg7 From what I learned so far, in these endgames the defending side tries to push his pawns, to create counter−chances (because White will try to support his own passed pawn with his king, leaving the kingside abandoned), or approaches the passed pawn with his king. In this case, since the c−pawn is close to the centre, I believe Black also has that option. And eventually if the h−pawn is lost for the c−pawn, we go into a drawn endgame, 3 pawns against 2, on the same flank. 29.Kg2 Kg6 30.Kf3 h5 31.c4 and now both h4 or g4, bothering White's kingside structure should be decent for Black

I didn't want to allow the complications after 13.Nd5 f5! but this is simply very good for Black, my attack is too fast.]

8...Bxe3 9.fxe3 0−0

[9...Ne7 was Aronian's choice, and probably the simplest for Black. 10.Nbd2 *(10.Nh4* doesn't look as critical before Black has castled. 10.Nbd2 Here I had quite a long think. It's not so easy to come up with a plan.

10...h6

[10...Ne7 would be the most logical

but I was concerned by 11.Nh4
A) 11...Ng6 12.Nxg6!? *(12.Nf5 c6 13.Qf3 d5 14.Ba2 Be6=* 1−0 (59) Nozdrachev,V (2485)−Fakhrutdinov,T (2429) Serpukhov 2018 *)* 12...hxg6 13.Nf3±;

11.d4 I underestimated this idea. Now I think White has some definite pressure.

11...Bg4 An unusual move in Italian structures but my idea was to reroute the bishop to the b1−h7 diagonal to put pressure on the e4−pawn. **12.Qc2** Not the best square.

[A couple of Correspondence games have reached this position. They both went 12.Qe1! and the White players were successful in both cases.

12...Bh5 13.Rae1 Nd7

[It was probably better to start with 13...Bg6 I didn't want to allow 14.Nh4 but Bh7 isn't the end of the world, although it does look a little passive. Here Black is very solid.]
[13...a5 would stop White taking space on the queenside but gives up the b5−square and allows White's plan of 14.Nh4± when my bishop looks very odd on h5.]

14.b4 I still couldn't really assess this position. White's grabbing a lot of space but I hoped that would create weaknesses in his position. **14...Qe7**

[14...Ne7 would again allow White's plan with 15.Nh4 although here I can start generating counterplay with a5 16.b5 c6]

15.g3 White's continuing to play for the maximum. The knight is now coming round to f5 but generating another weakness on the light squares in front of his king. **15...a5!?** Fighting for counterplay on the queenside but leaving my bishop hanging in mid−air on h5.

[15...Bg6 16.Nh4 Bh7 17.Nf5 is pleasant for White.]

16.b5 Nd8 17.Nh4 Ne6

[I should have started with 17...Nb6! My knight is offside here but it would have prevented White's next. However White would still have been for preference after something like 18.Nf5 Qd7 19.h3 Ne6 20.g4 Bg6 21.Bd5 Rab8 22.Nc4 Nxc4 23.Bxc4 c6 24.h4±]

18.Bd5! I'd overlooked this idea.

18...Ra7 My rook looks very artificial here but I hoped to coordinate within the next few moves.

[18...Rab8 19.Nc4 and there's no good way to defend the a5−pawn. b6 giving away the c6−square looked so ugly to me.]

19.Nf5 It appears it was more accurate to delay this natural knight jump as I now get to use my bishop again.

[19.Nc4± Here it's very hard to find counterplay.]

19...Qd8 20.h3

[20.Nc4 can now be met with Bg4=]

20...Nf6?! 21.Bc4

[21.b6! I noticed this strong pawn sacrifice next move but it was already very powerful. cxb6 22.Qb3±]

21...c6 Starting my fight back. **22.Bd3 Bg6 23.Nc4 Bxf5!** Now White's pieces get pushed backwards and I get to take over the initiative. **24.Rxf5**

[After 24.exf5 Ng5 25.h4 I can choose either a murky position with e4 *(* or more likely the retreat *25...Ngh7* when White can't grab the e5−pawn as g3 is too weak. *)* 26.hxg5 exd3 27.Qxd3 hxg5∞]

24...g6 It makes sense to push the rook back so that I keep e5 securely defended but now my king has been weakened. It'll be harder to keep my knight on f6 and consequently f7 is more vulnerable.

[The engine offers an approach I hadn't considered: 24...cxb5! 25.axb5 b6 Now Black will have a wonderful outpost on c5 if White moves the d4−pawn and otherwise I can try to put pressure on the e4−pawn with ...♘g5 and doubling on the e−file.]

25.Rff1 Qe7 26.Kg2 Nd7 27.Qa2 Raa8 Finally I have coordination again.

28.Qa3 c5 29.d5 Ng7 30.b6!? This move really surprised me but maybe it's a good move. I thought the b6−pawn was now very exposed but he's getting counterplay against a5. Otherwise I'd take control of the b6−square and then try breaking on the kingside. **30...f5** Suddenly the position resembles a King's Indian. **31.Qc1 Nf6?** The wrong plan. **32.Qc2?!** Short on time he believes me.

[32.exf5! was actually very strong. My intention was e4 followed by recapturing on f5 with the knight with a good position but White has the strong piece sacrifice 33.fxg6! exd3 *(33...Nfh5* is the better practical try but there shouldn't be anything like sufficient compensation after *34.Be2 Qg5 35.Bg4±)* 34.e4! Nd7 35.Qxh6 Ne8± Material is rougly level but White has a very powerful initiative. The d3−pawn is probably also dropping when White will have four pawns for the piece.]

32...Rad8!? Provoking him to open the a−file and potentially freeing my queen from guarding the f6−pawn. **33.Kh2 h5** In mutual time trouble I ask White some more questions about his king's safety. **34.Nxa5** Trying to distract from what's going on over on the kingside but now I get a second front. **34...Ra8 35.Nb3?**

[During the game I wondered if 35.Nc6! were legal, and in fact it was a much better option Qe8 *(35...bxc6 36.dxc6* looks extremely dangerous. White has three advanced connected passed pawns. *)* 36.Na7 The a−file is blocked and c4 37.Bxc4 Nxe4 38.a5 is a much better version of the game

for White. However, it being a King's Indian style position, things are still very unclear.]

35...h4! I thought it useful to jettison another pawn to open up the lines on the kingside while I can. **36.gxh4 c4! 37.Bxc4 Nxe4** White is temporarily two pawns up but the h4−pawn is definitely dropping and I'll get counterplay down the a or c−files. White's king has been opened up and his structure is terrible. **38.Rg1?!** From his body language it's clear Kostenko missed that my next indirectly defends the g6−pawn.

[However matters are now very difficult for White. 38.a5 Rac8 and I crash through on the c−file.]

[My engine initially offers 38.Bd3 as White's best but Rxa4 39.Bxe4 Rxe4 doesn't seem to hold much hope for White.]

[Perhaps the most tenacious was 38.Bb5 but it's clear Black's now doing very well. One hypothetical line runs: Qxh4 39.Qg2 Nxc3 40.Qxg6 Nxb5 41.Rg1 This has some similarities to the game. Rf7 42.Rc1! *(42.axb5 Ra2+ 43.Rg2 Rxg2+ 44.Qxg2 Qxe1−+)* 42...f4!∓]

38...Qxh4 39.Ref1 Ng5? Short on time I decided to cash in and win the piece but this actually throws away the win.

[39...g5−+ was the most straightforward. White simply cannot deal with all the weaknesses in his position.]

40.Qg2 Qxc4 41.Qxg5 Qxb3 42.Qxg6 Rf7 I thought converting the extra piece should just be a matter of technique here as the White pawns should drop one by one but in fact White should have enoguh activity. **43.Qxd6**

[43.Qe6! should have been played immediately. Compared to the game I can't force his king back to h1: Qc2+ 44.Kh1 Qe4+ 45.Kh2 Qxe3 46.Rxg7+! Kxg7 47.Rg1+= and White is active enough to hold the balance.]

43...Qxc3 44.Qe6? The final mistake

[44.Rg2! And it's surprisingly difficult for Black. e4 *(44...Qxe3 45.Qe6!* can now be played. *)* 45.a5! Qf6 *(45...Qxa5? 46.Qe6+−; 45...Rxa5 46.Rfg1=)* 46.Qxf6 Rxf6 47.Rc1! It seems White is active enough to hold the draw without too many problems.]

44...Qd2+! An important check.

[44...Qxe3? would again allow 45.Rxg7+ Kxg7 46.Rg1+]

45.Kh1

[45.Rg2 Qxg2+ 46.Kxg2 Nxe6 is the important point.]

45...Qxe3 46.Rg6

[Now 46.Rxg7+ Kxg7 47.Rg1+ fails to Kh8 48.Qxf7 Qxh3# An extremely important difference.]

46...Qxh3+ Now I'm a full piece up. Black still needs to be on his guard but I decided pushing my passed pawns was the easiest conversion. **47.Kg1 Qe3+ 48.Kh2 Qe2+ 49.Kg1 f4 50.Rf2 Qe1+ 51.Rf1 Qe3+ 52.Kh2 Qe2+ 53.Kg1 f3 54.a5 f2+ 55.Kg2 Qf3+ 56.Kh2 Qf4+ 57.Kg2 Raf8 58.d6 Qf3+ 59.Kh2 Qh5+ 60.Kg2 Kh7 61.Qg4!?** An enterprising last try **61...Qxg6 62.Rh1+ Nh5! 63.Rxh5+ Kg7** Not a perfect game by any means but some interesting positions and a true battle. B) Playing 16.Bd2 would mean he needed to calculate lines like this: Nf4!? 17.Bxf4 exf4 18.Ne2?! *(18.Ne4 Bf5)* 18...Bxh3!→;

C) 16.a4 b4!

C1) 17.Qc2! was better: Nf6 (to protect the e5−pawn) *(17...a5 18.Bc4 f6 19.Bb5±; 17...Rb8 18.Bc4 Rfe8* what would lead to an extremely complex position: *19.Nxe5 Nxe5 20.Rxe5 bxc3 21.bxc3 Nxc3 22.Rxe6 Rxe6 23.Bxe6 fxe6)* 18.Bxe6 Rxe6∓;

C2) 17.a5? This is a positional mistake. At the first sight it seems that White has good prospects on the a4−e8 diagonal, but in fact, it is Black who gains a pawn for almost nothing.

17...bxc3 18.Ba4

C2a) Too safe. Much better was 18...Rb8! , but it requires serious calculations: 19.Nxe5 Qd6 20.Nxc6 cxb2 21.Rb1 bxc1Q 22.Rxc1 Qxg3

23.Nxa7 Qg5 and pressure on the kingside provides Black an advantage − it seems that White will lose at least his h3−pawn.;

C2b) There was also the interesting option to play 18...Bxh3!? , but I didn't take it too seriously during the game. However, it was worth checking, e.g. : 19.Bxc6 *(19.gxh3? Qxh3 20.Bxc6 cxb2! 21.Bxb2 Nf4 22.Nh2 e4! 23.Bxe4 Qxg3+ 24.Kh1 Bxf2−+)* 19...Qxc6 20.gxh3

C2b1) 20...Qg6!? 21.Kf1 Qe6 22.Ng1 *(22.Kg2? cxb2 23.Bxb2 Nf4+−+)* 22...Bd4 23.bxc3 Bxc3 24.Ba3 Ne7 and Black is better;

C2b2) 20...cxb2?! 21.Bxb2 Nf4 22.Bxe5 Nxh3+ 23.Kg2 Bxf2∞;

C2b3) 20...Nf4 21.Bxf4 exf4 22.Ne4 c2 23.Qc1 f5 24.Ned2 Re3!→;

C2c) 18...f6? 19.Ne4! This strong move keeps the tension on. c2!? It was my idea when I played 18...f6. 20.Qxc2 Ncb4 21.Qd1? This is too passive and Black keeps an advantage. *(*He had to play *21.Qc4! c6* and now after *22.d4* White would be absolutely ok. *)* 21...c6∓ Now Black is better again, mainly because of d3−pawn, which should be weak forever (or until it dissapear). To make any progress Black needs to re−group his forces and for the next few moves this is what I was trying to do. 22.Bb3 Rd8 23.Ra3 Rfe8 24.Bc4 Nc7 *(24...Nf4* was also an option. *)* 25.Qb3 Nbd5 26.Ra1?! *(*There was no reason to withdraw the rook without it being attacked, so something like *26.Bd2* was slightly more logical. *)* 26...Rb8 27.Qd1 Red8!∓ Now all the black pieces are well posted, so we are about to see some action. 28.b3 Nb4 29.Be3 Bxe3 30.Rxe3 Bxc4 31.bxc4 Nxd3 So, after some logical moves Black has got a pawn up. The position is close to winning, but because of the weakened structure on the kingside, there can potentially appear some difficulties. 32.Nh4 Nf4 33.Qc2 Nce6 Here I was sure, that the game must be over soon. 34.Rg3 Creating some threats.

C2c1) 34...Qd4! was very attractice, but it's always difficult to give up a pawn in front of your own king. After 35.Nxf6+ *(35.Re1? Rb2; 35.Rf1 Ng5−+)* 35...Kf7 36.Rf1 *(36.Qf5 Qxa1+ 37.Kh2 Rd1−+)* 36...Kxf6 37.Rg6+ Kf7 38.Qf5+ Kg8 39.Rxe6 Ne2+ 40.Kh2 Qxh4 Black would be winning.;

C2c2) 34...Ng5? Too slow. It was the

moment to strike. 35.Re1 Nfe6? *(*For the second time in a row, I chose not the most concrete move. It was better to play *35...Qd4* with the obvious idea ...♖b2. However, I missed that after *36.Nf5 Qb2 37.Nxh6+* Black has the simple *Kf8! 38.Qxb2 Rxb2* with a winning position as the white position is too "hanging". *)* 36.Nf5 Nxe4 37.Qxe4 Ng5 38.Qc2 *(*Being short on time my opponent didn't play *38.Nxh6+* which represented a good chance. After *gxh6 39.h4* I'd be forced to play *f5□ 40.Qe2 f4 41.Rg4 Qf5* and Black would still be better. *)* 38...Qd2! After a few blunders, I have finally chosen the right way to cash in on my advantage. 39.Nxh6+ Kf8 40.Qxd2 Rxd2∓ 41.Nf5 Now Black is much better, because the doubled rooks on the second rank are seriously powerful. Unfortunately, it's not that easy to win it and I even didn't manage to pose real problems to my opponent. Rbb2? *(41...Ne6* was much better. *)*

C2c21) White had a great chance to play the simple 42.Nxg7! . Now Black must play Rxf2 and after 43.Nh5 *(43.Rd1!?)* 43...Rxg2+ does not work because of 44.Rxg2 Nf3+ 45.Kf1 Rxg2 46.Re3 Rg5 47.Rxf3 Rxh5 48.Rxf6+=;

C2c22) 42.h4? Ne6∓ Now, again, Black is much better, if not winning. 43.Rf3 Kf7?! *(43...c5!?* was better, slowly preparing progress. Having the pawn on c5 Black has a very simple plan − to play ♖dc2. The pawn on c5 would allow him to meet any counterplay on the d−file with ...♘d4! *)* 44.c5 Nxc5? *(*Not for the first time I played very carelessly. The most tempting *44...Nd4 45.Nxd4 exd4 46.Rf4* gave White some chances to save the endgame.*;* But the paradoxical *44...Kf8!* would keep the advantage. Why should Black put his king back to f8? The explanation is simple − to prepare ... ♖b5. The funny thing here is that White has nothing he can do, so Black can do what he wants. *)* 45.Rc1 Rdc2? *(*The final mistake. I should have played *45...Rb5!* and after *46.Rfc3 Nb3 47.R1c2*

Rxc2 48.Rxc2 Rc5 49.Rb2 Rc3 Black would have every chance to win the endgame. *)* 46.Rxc2 Rxc2 47.h5! Now Black is a pawn up, but White has serious counterplay against the g7−pawn. e4 *(47...Ne6 48.Rb3; 47...Rb2 48.Rc3)* 48.Rg3 Ne6 49.Nd6+ Ke7 50.Nf5+ Kf7

C2c221) At first sight 51.Nxg7? could be very strong, but this time it' does not work: Nxg7 52.h6 Nf5 53.h7? *(53.Rg7+!* would give some chances to hold the rook endgame after *Kf8 54.Rg6 Nxh6 55.Rxh6 Kg7)* 53...Nxg3 54.h8Q Rc1+ 55.Kh2 Rh1+−+;

C2c222) 51.Nd6+ Kf8 52.Nxe4 Rc1+ 53.Kh2 Rc4 54.Re3 Now the material is equal, so in a few moves we agreed to a draw. Nc7 55.g3 Ra4 56.h6 Rxa5 57.hxg7+ Kxg7 58.Rc3 Re5 ½−½ (58) Iordachescu, V (2583)−Bartel,M (2662) Yerevan 2014]

42nd Olympiad 2016 (6.1) 08.09.2016
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6 5.0−0 d6 6.a4 A pretty rare move in this position, although it's popular in the Italian.

[Last year I faced the main line 6.c3 in Bologan,V (2607)−Mikhalevski,V (2536)/Berlin 2015/ [Mikhalevski,V].]

6...g5 I could find only two games with this move in my database. As usual, the Hungarian GM plays very ambitiously and fearlessly. One of the ideas behind this move might be a transfer of the queenside knight to g6. However, the text also has an obvious drawback − the f5−square is weakened.

[In most of the preceding games Black proceeded with 6...g6]

7.Nc3! An improvement over two preceding games.

[Earlier White took space on the queenside by means of a5, either right away or on the next move. 7.a5 a6 8.c3 Rg8?! 9.Ne1?! *(9.Be3!?* was better. *)* 9...Rg7?! Vratonjic,S (2401)−Nestorovic,N (2449)/ Kragujevac 2015. Now 10.Nd2± promised the upper hand for White.]

[7.c3 Bg7 8.a5 a6 9.Re1 Mohota,N (2245)−Csonka,B (2415)/ Caleta ENG 2016. Here Black missed a good chance to create play on the kingside by means of g4! 10.Nfd2 h5 *(* or *10...Be6* with roughly equal chances. *)*]

7...Bg7 8.Re1

[8.Be3!? makes sense, as after g4 9.Nd2 the dark−squared bishop isn't blocked.]

8...Bg4 A provocative move. Black wants to use the h−pawn as a hook for a possible attack on the kingside.

[After 8...g4 White can sacrifice a pawn by means of 9.Nh4 Nxe4 10.dxe4 Qxh4 11.Nd5 Qd8 12.a5 with long−term compensation for a pawn.]

9.h3 Bd7 Now Black is ready to play 10...g4, which explains White's reply.

10.Nh2! Ne7 The knight is going to g6.

11.Be3 Since Black removes his knight from c6 White goes for the central break d3−d4. **11...Ng6 12.d4 0−0 13.f3?!** This move looks wrong as it allows Black to bring his knight from f6 to f4.

[13.Bb3! would be better. Re8 14.dxe5 Nxe5 *(* or *14...dxe5 15.Re2!±)* 15.Nf3±]

13...Nh5!= Now the knight obtains a nice square on f4, and White can't force it back due to the hanging pawn on h3.

14.Ng4 Nhf4 15.dxe5 Nxe5! A precise recapture.

[15...dxe5 16.a5! h5 17.Nf2 promises White slightly better chances.]

16.Bf1 Rodriguez is planning to play Nf2 with a subsequent g3.

[In case of 16.Nxe5 Black recaptures with the bishop. Bxe5 with good pay on the dark squares.]

[16.Bb3 Keeping the bishop on the a2−g8 diagonal deserved attention, though after Be6 *(* or *16...Neg6* the chances remain roughly equal. *)*]

16...h5

[16...Be6!? looks more accurate, when Black takes the a2−g8 diagonal under his control.]

17.Nf2 White is ready to play 18.Qd2 and so Black's reply makes a lot of sense. **17...f5! 18.exf5**

[In case of 18.a5 White has to deal with the surprising Nxh3+!

A) 19.Nxh3 f4 20.Bf2 *(20.Bc1 g4! 21.fxg4 f3!* is dangerous for White. *)* 20...g4! 21.Nxf4 Qg5 and Black is developing a strong initiative.;

B) 19.gxh3 fxe4 20.Nfxe4 Nxf3+ 21.Kh1 Bc6! and White faces unpleasant problems.]

18...Rxf5 Now Black is fine thanks to his strong knights. **19.Nce4 Kh8**
A slight inaccuracy as Black wastes a tempo.
[19...Bc6! was stronger. 20.c3 *(*Now *20.Ng3?! Rf7 21.Bxf4 gxf4 22.Nxh5* doesn't work because of *Qg5! 23.Nxg7 Nxf3+* that's where the bishop on c6 is instrumental. *)* 20...Qe7 21.Bd4 *(21.Qb3+ Bd5 22.c4 Bxe4 23.Nxe4 Nxh3+!* favours Black. *)* 21...Raf8 leads to a promising position for Black.]
20.Ng3!? The most critical.
[20.a5!? Bc6 21.b4 Qe8 22.Bd4 deserved attention.]
20...Rf7 21.Bxf4 gxf4 22.Nxh5 Bf8 This was Black's idea behind the pawn sacrifice. The knight on h5 is in danger of being trapped. **23.Qd4?** White fails to find a defence and loses on the spot.
[23.Ng4! was necessary with the idea Qg5 24.Nhf6! Rxf6 25.Rxe5! dxe5 26.Qxd7 Rc6 27.Bd3! Bg7 28.Qd5!± and White is better despite being an exchange down thanks to his full control over the light squares.]
23...Qg5−+ Now White loses a piece.
24.Nd3
[or 24.Ng4 Re8 25.Bc4 *(25.Nhf6 Rxf6 26.Nxf6* runs into *Nxf3+−+)* 25...Rfe7 26.Qxf4 Qxf4 27.Nxf4 Nxf3+! and Black wins an exchange.]
24...Bg7! Probably White missed this strong reply. Now the bishop can't be captured due to the check on f3.
25.Nxe5 Bxe5 26.Qd5 Qxh5 27.Qxb7 Rg8 The rest is easy. **28.Kh1 Bxh3 29.gxh3 Qg5** Mate on g1 can't be prevented and so White resigned. The idea of 6...g5 is interesting, although it seems that White should be able to obtain an edge with some precise play.

We should not get the impression that only White can use the kingside attacking ideas. The position is almost symmetrical and Black can have his ambitions, too. However, being a tempo down, he should choose the moment for a counterattack with care. In this game, he did not. **8...h6 9.Re1 g5?! 10.Nf1 g4 11.N3d2 h5 12.Nc4 h4 13.Be3 h3 14.g3 d5** As Irina Bulmaga told me after the game quoted below, this whole variation was some sort of bluff, but she relied on the fact that the refutation is not easy to find for White. [Busemann]

The present attacking game is theoretically interesting. In an unclear position with lots of potential for Black, White acts too slow and is ran over in an elegant way. **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.e5 Ng4** 5...d5 is common here, but 5...♘e4 can also be played.. **6.Qe2 Qe7 7.Bf4 d6** The older move 7...f6 may not promise very much to Black. **8.exd6 cxd6 9.Nbd2 Bf5 10.Nb3 Qxe2+ 11.Kxe2**
[Based on the present game, I like 11.Bxe2 better than the text move, which is generally thought to be ok. Black receives an equal game after d3! 12.cxd3 Nge5 13.Kd2 Be7 14.Nbd4 Nxf3+ 15.Nxf3 0−0 16.Rhc1 d5 17.Be3 Rfc8 , see Informant 71/329]
11...Nge5 12.Bb5 Nxf3 13.Kxf3 0−0−0 14.Bxc6 bxc6 15.Nxd4 Bd7
This position is thought to be unclear. In my preparation for this game, I developed the idea c5, followed by ♖g8 and g5, in order to provide space to the ♗ pair. In spite of the ♕ swap, the white ♔ finds itself in trouble in many variations. **16.Rhe1**
[16.c4 c5 17.Nb3 Bc6+ 18.Kg3 g5!?→]
16...c5 17.Nb3
[17.Ne2 Δ c4, ♘c3 was to be considered. Black can continue with ♖g8 or ♗e7.]
17...Rg8! 18.h4? Since White cannot avoid the push g5 anyway, he should

have kept the h−file closed. In the sequel it is Black who profits from it being opened.

[18.Bd2! g5 19.Bc3 f5 20.Bf6 Re8 21.Rxe8+ Bxe8 22.Re1 Bc6+∓]

18...h6 19.Na5?! Otherwise, the thread Bc6 gains more and more strength. Moreover ♘b3 was placed badly. To avoid being this still more the case on a5, the ♘−move will have to be justified by an attack on the ♕ side. However, it seems that this already takes too long to be effective..

[19.g4 in order to have a safe ♔g3 after ♗c6+ is met with g5 20.hxg5 hxg5 21.Be3 Rg6 22.Rad1 Bg7 23.c3 Rh8∓]

19...g5 20.hxg5 hxg5 21.Bd2 d5 22.Ke2 Bd6 Development. The threat ♗b5+ is stronger here than its immediate execution.

[22...Bb5+ 23.Kd1 Bd6 24.a4 Ba6 *(24...Bd7)* 25.Nc6 *(25.Ra3)* 25...Rd7 26.b4 cxb4 27.Bxb4 and White has made sufficient progress on the ♕ side to balance the game.]

23.c4

[23.Kf1 f6 24.Rad1 Rh8∓]

23...d4 24.a3? Consistent, but too slow. White is confronted with the dilemma to become active quickly, thus opening lines and diagonals, but not creating opportunities for the ♗ pair. He could try b4 or ♔f1 followed by b4:

[24.Kf1 f6 25.b4 cxb4 26.c5 Bb5+ 27.Kg1 Be5 28.Bxb4 Rh8 29.g3 Bd7 30.Rad1 Bg4∓]

[24.b4 cxb4 25.c5 d3+ 26.Kxd3 Bb5+ 27.Kc2 Bxc5∓]

24...Rh8! This renders the ♔ retreat to f1 impossible and, at the same time, threatens ♖h2, announcing play against the pawns on g2 and h2. **25.Kd1**

[25.Rh1? Rde8+ 26.Kf3 g4#]

[25.b4 Rde8+ 26.Kd1 Ba4+ 27.Kc1 Rxe1+ 28.Bxe1 Bf4+ 29.Kb2 Re8−+]

[25.Bxg5 Rdg8 26.f4 *(26.Bf6 Rh6* wins a piece. *)* 26...Rh2 followed by ... f6 with a decisive attack.]

25...Rh2 26.Rg1 His improving pressure now yields Black the e−file as well.

26...Re8 27.Bxg5

[It was more difficult to demonstrate a win after 27.Kc2 , for instance: Bf5+

A) 28.Kd1 Be4 29.b4 *(29.f3 Rxg2)* 29...Bxg2 **Δ** ♗f3+;

B) 28.Kb3 Re2 29.Bxg5 f6! Preparing a surprising ♖ swing, which leads into a short mating attack. 30.Bxf6 Rh6 31.Bg5 Rg6 32.f4 *(32.Bh4 Bc7* looses the ♘. *)* 32...Bxf4! 33.Bxf4 Rb6+−+]

27...Rg8! 28.Bd2 Rgxg2 29.Rxg2 Rxg2 30.Be1

[30.Ke2 Bg4+ 31.Kf1 Bf3 with desaster after ♖h2.]

[30.f3 d3−+]

30...Bg4+ 31.Kc2 Now follows a quite prosaic final, in which Black wins ♙f2 and mobilises his free pawns. **31...Bg3! 32.Kb3 Bxf2 33.Bxf2 Rxf2 34.Nc6 Kb7 35.Rg1 Bf5 36.Ne5 Bc2+ 37.Ka2 d3**

Los Angeles Metropolitan 11th (9)
[Bojkov,Dejan]

Before the final round of the Metropolitan Invitational GM tournament T. Gareev was leading with 6/8, followed by me and Z. Amanov on 5.5/8. There were only two prizes which meant that I needed to play for a win as Black. **1.e4** Bojkov **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2** Surprise! In our previous encounter in January, Mackenzie chose:
[8.Bd3]
8...h6 9.Nf3 e4 10.Ne5 Bc5
A tricky move order. Black provokes his opponent to "win" a tempo. **11.c3 Qc7 12.d4 exd3 13.Nxd3 Bd6** However, it now becomes obvious that the pawn on c3 hinders White's normal development. It deprives White of the c3−square, and also makes the fianchettoeing of the black−squared bishop less effective.
14.Nd2 0−0!? I played this too quickly, simply forgetting the theory. The other natural move is:
[14...Bf5 intending to bring the rook as fast as possible to d8 to torture her Majesty on the open file. One famous example is: 15.b4 Nb7 16.Nc4 Rd8 17.Be3 0−0 18.Bxa7 Nd5 19.Bd4 Rfe8 20.Nxd6 Nxd6 21.0−0 Nb5 and Black had dangerous threats. 22.Qd2 Ndxc3 23.Bxc3 Rxe2 24.Qxe2 Nxc3 25.Qc2 Rxd3 as in Sutovsky−Postny, Tel Aviv 2001.]
15.b4 Nb7 16.Nc4 Nd5 I was also considering the "all in play":
[16...Bxh2 but was not yet in the mood for it 17.g3 *(* There is also the idea *17.Bxh6!? Re8 18.Be3 Be6 19.Nd2 Nd5 20.Bd4 Bg4 21.Nf3 Bxf3 22.gxf3⩱* Ninov,N (2518)−Burguete Archel,E (2187)/ Pamplona 2007/CBM 121 Extra (39) *)* 17...Bxg3 18.fxg3 Qxg3+ 19.Kd2 Nd6!?⩲]
17.Nxd6N
[17.Bd2 is an alternative when Black can still sacrifice the piece: or play it safe:
A) 17...Bxh2 18.g3 Bxg3 19.fxg3 Qxg3+ 20.Nf2 *(20.Kf1 Bh3+)* 20...Re8⩱;
B) 17...Re8]
[17.Bb2 Bf5 18.Nxd6 Nxd6 19.0−0 Nc4↑]
[17.Qc2 Bf5]
[The only other game that I found in Megabase saw 17.Qb3?! Re8 18.Ne3 a5 instead *(18...Be6∓)* 19.Nxd5 cxd5 20.Be3 Bf5 with good compensation for Black in Markgraf,A (2345)−Walter,S (2194)/

Germany 2004/EXT 2006 (31)]

17...Nxc3 Now forced play starts:

[17...Nxd6 18.0−0 Nxc3 19.Qc2 Nxe2+ 20.Qxe2±]

18.Qc2

[18.Nb5?! cxb5 19.Qc2 Re8∓]

[19.Nxc8 Nxc1 20.Rxc1 Re8+∓]

[19.Nxb7 Nxc1 20.Rxc1 Re8+ 21.Kf1 Bxb7∓]

19...Qxd6! Playing for the full point. I am trying to decoy white pieces on to vulnerable positions.

[19...Nxd6 was the move, which I had been intending to play from far back, with the possible line 20.Bf4 Ba6 21.0−0 Rad8 22.Rfd1 Qc8 23.Qc2 Qf5 Δ24.Qxc6 *(24.Qc5 Bxd3 25.Bxd6 Rfe8=)* 24...Bxd3 25.Bxd6 However, Black wins more easily in this line:

A) and here I intended 25...Be4 26.Qc5 *(*but missed *26.Qc3!)* 26...Qg4 27.f3 Bxf3→;

B) 25...Qg6!]

20.Bf4□

21...Qc4 22.Rc1

[22.0−0 Bf5 23.Nf4 Qxe2 24.Nxe2 Rfe8−+]

22...Qb5 23.Bc3? After solving many problems, White fails in the final exam. The last only move was:

[23.a4! Qxa4 24.0−0⩲ when the awkward position of the knight on b7, and the weak a− and c−pawns give full compensation for the sacrificed pawn.]

23...Bf5 It is my turn now to create threats, and the opposite coloured bishops will only help. **24.Ne5 f6 25.Qc4+**

[≤25.Qxb5 cxb5 26.Nc6 Rfe8+ 27.Kd1 Be4∓ *(27...Nd6)*]

26.Nxc4 Rfe8+ 27.Ne3 Bd3

White does not have the chance to castle, and to connect the rooks, and his defence is very, very difficult. **28.Rd1 Rad8 29.Kd2 c5!**

[Bringing the last piece into the attack. Of course not: 29...Bc4+ 30.Kc2 Bxa2 31.Rxd8 Rxd8 32.Ra1 Bf7 33.Rxa7 Nd6=]

30.Kc1 cxb4 31.Bxb4 Re4 32.Bc3

[32.a3 a5 33.Bc3 Nc5∓]

[32.Ba3 Ra4 33.Kb2 Na5∓]

32...Nc5 33.Rd2 Rb8! Gains an important tempo. White's threat is seen in the line:

[33...Rc8? 34.Rhd1 Ba6 35.Rd8+=]

34.Rb2 Please, allow me one small demonstration of the attack with bishops of opposite colours:

[34.Bb2 Ra4 35.Rhd1 Rxa2 36.h3 Ra1+ *(36...Nb3#)* 37.Bxa1 Rb1#]

34...Rc8 35.Rd1 Kh7!? I was very proud of this prophylactic move, which prevents White from trading pieces.

[However, 35...Ree8! 36.Rb4 Bg6 would be much more effective...]

36.Kd2

[36.Rbd2 Na4 37.Rxd3 Nxc3 38.R1d2 Nxa2+ *(38...Rb4)* 39.Kb2 Nb4∓]

36...Ba6 37.Rb4 Rxb4 38.Bxb4 Nd3 39.Rb1 Nxf2 40.Rb3 Ne4+ 41.Kd1

Bb5 Time trouble is over, White is a pawn down, and has no move at all. I was wondering why he was not resigning. perhaps, as has happened many times before he was hoping to "manage to make it to the draw". **42.Rb2 a6**
[42...h5!?]
43.g4 g6 44.h4 Rd8+ 45.Ke1 Rd3
Missing the simple: **46.Rb3**

46...Rd7 47.Rb1 Rd4 48.Rb3 Kg7 49.h5 Kf7 50.hxg6+ Kxg6 51.Ba3
Stops ♔g6−g5. Now after a prolonged period of thought I went for the "winning" continuation: **51...Nd2?!**
[51...Kg5 52.Bc1]
[51...Ra4! is winning.]
52.Rb4 Rd3 53.Bc1 Rxe3+??
[It was not too late to switch to 53...Nf3+ 54.Kf2 Ne5∓]
54.Kxd2 Re2+ 55.Kd1

55...Rxa2 56.Bb2 Ra4 57.Rxa4 Bxa4+ 58.Ke2 a5
[and only here I realised with horror, that the intended gain of the third pawn: 58...Kg5 is most easily refuted by 59.Bc1+ Kxg4 60.Bxh6=]
59.Kf3 Now it is a draw. I cannot easily trade any of the pawns on the king's flank, as Molner will have enough time to switch the defenders − bring the king to fight with the a−pawn, and sacrifice the bishop for the remaining h− or f− pawn. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Be2 exd4 8.Qxd4 d5! '!?' This aggressive counter−blow in the centre is very typical of the young Indian's style. '!?' Perhaps it is a matter of style, but I believe this to be the most appropriate response to White's opening. It promises Black easy play and good prospects, without any need for detailed theoretical knowledge, and is virtually risk−free. Black's idea is very simple: since ...♘f6 can be met by the annoying e4−e5, he wishes to eliminate this possibility before playing ...♘f6. Should White push e4−e5 now, it doesn't come with tempo and the ♘g8 can later be developed otherwise.

9.exd5 The only move that can aspire to anything.

[9.Qxg7 A critical move, but the ensuing transformation does more for Black than for White. Still, this move leads to certain complications and is not bad at all. Bf6 10.Qg3 dxe4 Now White has a choice:

A) 11.Ng5 Bf5 12.0−0 h6

A1) 13.Nxf7? This sacrifice is just bad: Kxf7 14.Bh5+ Kf8 15.Ba3+ Ne7 16.Rd1 Qc8∓;

A2) 13.Nh3 (Vasquez,R (2521)−Sundararajan,K (2446)/Dos Hermanas 2004) Qd6∓ *(13...Qe7∓* Intending ...0−0−0 (or ...♖d8 if ♖d1 comes). *)*;

A3) 13.Rd1 Qe7 14.Rd5 hxg5 15.Rxf5 Nc6 16.Bxg5 Bxg5 17.Rxg5 0−0−0∞ Black is not worse in this position. His pieces are better coordinated and more active.;

B) 11.Nd4!? This seems more dangerous; White intends ♘b5.

B1) 11...Bxd4?! is just bad: 12.cxd4 Qxd4 13.Nc3 Ne7 14.0−0↑ with a powerful initiative.;

B2) 11...Nc6 This also doesn't quite work: 12.Nxc6 *(≤12.Nb5 Nge7! 13.Nxc7+ Qxc7 14.Qxc7 Be5* is a nice idea, which we will see later as well! *15.Qxe5 Nxe5=)* 12...bxc6 13.Ba3↑ Black faces some problems.;

B3) 11...Ne7 I think this is best.

B3a) 12.0−0 Reasonable but rather tame. Rg8 13.Qe3 Now Black has more than one route to a good position:

B3a1) 13...Bg4 14.Nd2 *(14.Qxe4 Bxe2 15.Nxe2 Qd5 16.Nd2 0−0−0∓)* 14...Bxd4 15.cxd4 f5 16.Bxg4 Rxg4∓;

B3a2) 13...Qd5 14.Nd2 Bxd4 15.cxd4 Nf5 16.Qxe4+ Be6 17.Bb2 0−0−0∓;

B3b) 12.Nb5 The most consistent. 12...Nd5 Critical. *(12...Nac6!?* could be a simple way out; White has

nothing better than *13.Nxc7+ Qxc7 14.Qxc7 Be5 15.Qxe5 Nxe5*= with approximate equality, Black's space in the centre compensating for White's pair of ♗s. *)* 13.c4 *(13.Bg5 a6! 14.Bxf6 Qxf6 15.Nxc7+ Nxc7 16.Qxc7 Nc6 17.0−0 0−0∞* is complex but I feel Black is not worse. *)* 13...a6 14.cxd5 axb5 15.Nc3 c6∞ With a complicated position. White's ♔ will be more safe than Black's, but Black has good counterplay. This position could do with further analysis.]

[9.Qxd5 Exchanging the ♕s just leaves Black better; White does not have the piece activity necessary to compensate for his inferior structure. Qxd5 10.exd5 Nf6 11.c4 Ne4 12.Bf4 c6↑ *(12...Bf6 13.Be5 Bxe5 14.Nxe5 0−0↑)*]

[9.e5?! This closes the position and allows Black to develop play in comfort. Nc6∓ intending ...♗c5 and ...♘ge7, or simply ...f6. *(9...c5* is also fine, for example *10.Qa4+ Nc6 11.0−0 Qa5∓)*]

9...Nf6 10.Qa4+?! This only helps Black. White chooses a sub−optimal move; there was no need for this check.

[White should go for natural development with The main move is 10.c4 , when Black has two options: 0−0 Black has good prospects in this position, as White's central ♙s are securely blockaded. He will play ...b6 and ...♗a6 to put pressure on the ♙c4, while also developing the rest of his pieces in comfortable places. *(10...−−; 10...c6 11.Nc3)*

B4) 11...b6 12.0−0 The basic position. The structure resembles the main lines of the Petroff, but in a version not so promising for White. Black has several options regarding his future play. The most obvious plan is to put pressure on the white central ♙s with ...♗a6, while he can gain time on the white pieces in the centre, with ...♗c5 and ...♖e8. Another option is to develop with ...♗f5, while ...c6, to break up White's centre, is also possible. Even the somewhat offside ♘a5 is useful, putting pressure on the ♙c4. Overall Black has a very sound position, with good play for his pieces, and stands at least equal. [In view of the improvement suggested for Black on the 6th move, it makes some sense to prepare an escape square for the bishop with 6.a3 before developing the knight to c3. g6 Compared with the main line, Black can safely develop his bishop in fianchetto, because White has spent a whole tempo on a move that does not serve the purpose of the fight for the centre in any way, which makes d4 ess dangerous now. 7.Nc3 Bg7 8.h3 0–0 9.Be3 My opponent played all these moves almost instantly, which makes me believe that he had analyzed it at home. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 From a historical perspective, this is one of the oldest continuations in the position. White is trying to occupy the centre as soon as possible. The modern practice, however, managed to prove that Black has enough resources to challenge White's central strategy.
5...exd4 6.cxd4 Bb4+ Without this check, Black's position would be simply bad. The reader probably knows that when playing a rook down (a1−rook), old masters like Greco started their games with a pawn on a3! The reason was obvious − in this position, the move 6...Bb4 wouldn't be possible. **7.Bd2 Bxd2+ 8.Nbxd2 d5!** An important move, which allows Black to have a comfortable game, otheriwse Black would be in trouble. Now, we are going to enter an IQP position. **9.exd5 Nxd5 10.Qb3** White tries to put some pressure on d5, before Black completes the development. We know that in positions with an isolated queen's pawn, the control over the d5−square is of a crucial importance.
[Another direction is 10.0−0 0−0
A) White main alternative here is 11.Re1 Nb6 12.Bb3 Bg4 This leads to more complex game to compare with *(12...Nxd4 13.Nxd4 Qxd4 14.Qc2* here White compensation is enough to maintain balance *c6 15.Ne4 Bf5 16.Qc5! Qxc5 17.Nxc5≅* 1/2−1/2 (22) Khorunzhy,M (2221)−Petukhov,V (2232) ICCF email 2012 *)* 13.h3 Bh5 14.g4 Bg6 15.Rc1 Qd6 16.Ne4 Bxe4 17.Rxe4 Rad8 with double−edged play Andrade,J−Delgado,L (1896) ICCF email 2010;
B) 11.Rc1 This move is directed against the line 11...Nb6 12.Bb3 Nxd4 which could be now answered by 13.Nxd4 Qxd4 14.Rxc7.
11...Nb6 12.Bb3 a5! This is a thematic idea for the variation. Black intends to gain space on the queenside by means of a7−a5−a4 advance. Later on, he could even consider activating his queen's rook

by playing Ra5.

B1) In case of 13.a4 White is weakening the important b4−square. Here I like the following game Bg4 14.h3 Bh5 15.Rc5 Bg6 16.Qc1 Aitbayev,A (2420)−Jumabayev,R (2561) Astana 2014 Here Black missed an elegant solution Nb4 17.Ne5 *(17.Rxc7* is too risky in view of *Nd3 18.Qc3 Nf4!* with double threat 19...Ne2 and 19...Nbd5 *19.Qc5 Nxa4* and Black is clearly better. *)* 17...c6 and Black has very comfortable game.;

B2) 13.Nc4 Nxc4 14.Bxc4 Bg4! Black easily obtained a comfortable game in recent game 15.d5 Ne5 16.Be2 Bxf3 17.Bxf3 Qd6 0−1 (54) Harikrishna,P (2753)−Tomashevsky,E (2728) Huaian 2016]

10...Nce7 Maybe a bit passive move, but Black is trying to complicate matters.

[His problem is that after 10...Na5 11.Qa4+ Nc6 12.Qb3 *(* After *12.0−0 0−0* It's probably White's worst version of isolated pawn in this line due to the misplaced position of his queen *13.Qc2 Nb6 14.Qc3 Nxc4 15.Nxc4 Ne7∓* Black is already better Khorunzhy,M (2331)−Szabo,V (2386) LSS email 2010 *)* 12...Na5 we have a draw by repetition.]

11.0−0 0−0 12.Rfe1 c6 Many games have been played in this position, but the following line looks as a critical one

13.Ne4 Qb6

[Deserves attention 13...Nb6 14.Bd3 Ned5 a good example here 15.Nc5 Rb8 16.Rac1 Nf4 17.Bb1 this happened in Van den Doel,E (2599)−Sokolov, I (2690) Leeuwarden 2004 and now Black should have played Bg4! 18.Ne5 Qg5⇄ with interesting play.]

14.Qa3 Here my choice would be

14...a5!? 15.Nc5 Qc7

[15...Qb4! looks more convincing 16.Qd3 Bf5 17.Qe2 Rad8= with easy equality.]

21.Nb5 Qg5! Black begins to develop serious initiative. **22.g3?** A serious positional blunder.Mark unnecessary weakens his king and gets punished immediately.

22...h5!⟶ Advance of the h−pawns turns out to be very unpleasant. Now a good advice would be highly appreciated.

[The very last chance was 23.Rae1 although after h4 24.Re3 hxg3 25.Rxg3 Qh4 26.Qg2 Rxg3 27.Qxg3 Qc4 White's position is hardly defensible.]

23...h4 24.gxh4

[Daniel Fernandez]

1.e4 e5 2.Nf3!? Not a common move in practice, but philosophically somewhat difficult for the Modern player: the 'ideal' ...h5 could be exploited if White then plays as in some other anti−Modern line.

2...Nc6 A reasonable reaction. **3.Bc4?!** I don't like this by White: playing as he did in the game, Black obtains a

Gurgenidze setup with the f8−bishop still at home. This then has the advantage of being able to go to h6 or (eventually) to e7, if Black plays for instance ...Bg4, ... e6, ...Ne7−f5 and ...h5−h4 and wishes to support that pawn. **3...Bc5!?** Showing good understanding, but Black had a better reply. So much drama, and only three moves have been played! **4.c3 Nf6 5.d3 d6 6.0−0** This is a 'compliant' move which balances out Black's inaccuracy ...Bh6. **6...0−0 7.Re1 h6 8.h3?!∓** Now White is decidedly worse. **8...a5** Maybe Black could have tried to trade this bishop for White's developed knight rather than the undeveloped one, but he keeps an edge in any case. **9.Nbd2 Be6 10.Bb5** Trying to get some tricks for the pawn. **10...Qb8! 11.Bxc6 bxc6 12.d4 exd4 13.cxd4 Bb4 14.Re3 a4 15.Nf1**

[15.a3 Ba5 16.Nf1 Bb3!? 17.Qe2↑ The position remains very unclear, but White's d5−pawn exerts a strong cramping influence on Black's centre. Qb5 18.Ng3 Qxe2 19.Rxe2?! is apparently possible, but a bit too scary to believe after Bd1 20.Re3 Bxf3 21.Rxf3 Rfe8]

15...d5∓ Black has consolidated everything perfectly. This must be one of the best opening positions I've seen Black get recently after 15 moves between master−level players of equal strength. I'll leave the rest uncommented. **16.Ne5 Qb5 17.exd5 Qxd5 18.Rg3 Ne4 19.Rd3 Bd6 20.Bf4 Qb5 21.Ng3 f5 22.Re3 Qxb2 23.Nxe4 fxe4 24.Rxe4 Bxe5 25.dxe5 a3 26.Be3 Rfd8 27.Rd4 Rd5 28.Rxd5 Bxd5 29.Bd4 Qb4 30.Rb1 Qc4 31.Rb3 Be6 32.Ba1 c5 33.Qb1 Rd8 34.Kh2 Rf8 35.Rg3 Rxf2** Following **36.Qg6** Black can win a pawn in various ways. **36...Rf7! 37.Rxa3 Qf4+ 38.Rg3 Re7 39.a4 Qxa4 40.Qf6** Black has time for a consolidating move like **40...Qd7!∓** and is pretty much a clean pawn up. **41.Qxh6 Rf7 42.Bc3 c4 43.Qg6 Rf1 44.Qg5 Rf5 45.Qh4 Rf1∓ 46.Qh6 Rf7 47.Bd2 Bf5 48.Qg5 Be6!** mysteriously holds together for White. **49.Bb4!? Rf5 50.Qh4** wins a pawn and is more in keeping with the 'Good French' ethos. **50...Rf7 51.Rg5 Rf5= 52.Rg4?!** makes far less sense when it isn't a last−ditch measure to save an otherwise hanging e5−pawn: **52...Rxe5 53.Rg3 Rf5 54.Bc3 Rf7 55.Rg5 Qd6+=** and only Black is trying to be better. **56.Be5** is always the critical test in these positions, especially now that Black is unable to arrange ...Bxc5. **56...Qe7 57.Qg3!** Now the engine thinks Black should play the slightly wasteful 7. ..Bg7 (+0.21.) **57...Bf5** is a reasonable waiting move, but White is under no obligation to play Nf3, and can continue waiting himself. **58.Rh5!** is Black's best way to equalise now, because the f8−bishop uses its other options in some lines, e.g. **58...Bd3 59.Qg4 c3 60.Qg3 Be2 61.Rg5= c2!** Now it is Black trying to be better. The most likely outcome is that Black will manage to exchange a not−very important pawn for the enemy e−pawn and retain slightly more aesthetic development at the end, e.g. **62.Bb2?! Bd3 63.Re5 Qd7 64.Qe3 Bf5 65.Rc5 Qd6+ 66.Be5 Qe6 67.Qc3 Be4∓** If you give a 'dubious' mark on move three you better have a good reason for it. Frankly, I think the text move leaves White worse. Let's

investigate the obvious alternative in some detail. **68.Bxc7** I once played **68...Qg6!** which tries to claim that White will not manage h5 and hence this is just a good Scandinavian. **69.Qg3!** This is the way White can play this line for an advantage. **69...Rf1 70.Bf4 Rxf4 71.Rg5** Now Black has to choose one of several routes through the mess to an eventual unclear salvation. **71...Qxg5! 72.Qxg5 c1Q**

[John Emms]

This is a good example of how NOT to play the classical main line as White.
1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 Ba7 7.Re1 d6 8.Bb3 0−0 9.h3 Ne7 10.Nh4?!
This aggressive move is seldom seen, and David Howell's play in this game gives us a good indication why that is the case.
[In the book I focussed on the much more typical 10.Nbd2 Ng6 11.Nf1 − (see, for example, Felgaer−Hector).]
10...Ng6 11.Bg5 This is the point to White's previous move. The bishop cannot be pushed away by 11...h6? as this loses the exchange. However, it's all a bit crude and Black's reply is more than good enough.
[If 11.Nxg6 hxg6 12.Bg5 Black can break the pin without fear of weakening his kingside: Qe8!? 13.Nd2 Be6 14.Nc4 Nh7 15.Be3 with an equal position, P.Jaracz−A. Delchev, Arnhem 1990. Still, given the game continuation, that might be White's best line.]
11...Kh8! An excellent reply. The key point is that Black will be happy to recapture on g6 with the f−pawn, with the activity he gains on the open f−file at the very least compensating for the weakening of his pawn structure. With this in mind there is now nothing White can reasonably do to prevent ...h6 coming.
[11...Nxh4 12.Bxh4 justifies White's play, as now Black has the typical problem of not being able to break the pin unless he accepts a structural concession on the kingside. h6 13.Nd2 Qe7 14.Nf1 Be6 15.Ne3 Rab8 was N.Bojkovic−J.Belic, Cetinje 1990, and here 16.Nf5 Bxf5 17.exf5 intending d4 looks favourable for White.]
[11...h6? 12.Nxg6 wins material.]
12.Nf5 Continuing ambitiously.
[12.Nxg6+ is met by fxg6!]
[12.Nd2 h6! 13.Nxg6+ fxg6 14.Bh4? *(14.Be3* must be played, and it's equal *)* 14...g5! 15.Bg3 g4! is a frightening example of how Black's attack can gain momentum if the f−file opens. If 16.h4? then Nh5! is murderous.]
12...h6 13.Be3 c5!? This paradoxical self−blocking of the a7−bishop is actually a really clever idea. The block is only temporary, and Howell's move highlights the superficial nature of White's play. The bishop on e3 only gets in the way of White's central plans, while the seemingly active knight on f5 is in fact insecure, especially since ...d5 is coming. Even so, it actually takes a very neat tactical point to fully justify Black's decision.
[There was nothing wrong with 13...Bxf5 14.exf5 Nh4]
14.Qf3
[14.Ng3 d5 15.exd5 Nxd5 16.Bxd5 Qxd5 17.c4 Qc6 is better for Black, with ...Rd8 and ...f5 two possibilities.]
[Perhaps White should try 14.c4!? to prevent ...d5 − a nice echo of Black's 13th move!]
14...d5! 15.exd5?? Clearly missing

Black's intended 17th move, and Erdogdu can be forgiven for doing so as it's not the sort of move which is immediately obvious at this point. See if you can find Howell's idea:

[If 15.g4 then c4! and White's centre crumbles after 16.Bxa7 Rxa7 17.dxc4 dxe4]

[White has to go backwards with 15.Ng3]

[or try 15.Bxd5!? although the complications here after Bxf5!? 16.Bxb7 *(16.Qxf5?? Nh4* is similar to the game *)* 16...Nh4 17.Qg3 Nh5 18.Qxe5 Rb8 19.exf5 Rxb7 20.Qe4 Rxb2 look to be in Black's favour.]

15...Bxf5 16.Qxf5 Obviously White was expecting 16...Nxd5, but... **16...Nh4!** ...and White resigned!

[After 16...Nh4! 17.Qxe5 Bb8! the bishop comes back into play with a vengeance, trapping the queen in mid−board. A nice miniature from Howell, an a good reason to avoid 10 Nh4 for White.]

38th Zurich Christmas (4.1) 28.12.2014

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3 Nd5 9.Nf3 Bd6 10.0−0 0−0 Nowadays this line is less popular than 10... Nf4. It's amazing that the line first appeared in 1890, but there were no games at all in the twentieth century! The interest in this line returned only in the 21st century!

[Earlier we considered only 10...Nf4 in Popov, I (2644)−Ragger, M (2680)/Tromso NOR 2013/[Mikhalevski, V].]

11.Re1 White has never tried anything else! **11...Bg4!?** This line is starting to gain popularity. Black's idea is very concrete: he is planning to meet 12.h3 with 12...Bxf3 to be followed by 13...f5.

[The original game saw 11...Qc7 12.Bf1! f5 13.d3 Bd7 14.c4 Nf6 15.c5 *(15.Nc3!?* was better. *)* 15...Bxc5 16.Rxe5? *(16.Nxe5!?)* 16...Bxf2+ 17.Kh1 Ng4 18.Re2 Rae8∓ and so on. Bird, H−Schallopp, E/Manchester 1890.]

[11...Re8 used to be the most popular continuation. Here is a recent example: 12.Nc3 Nb4 13.Bf1 Bg4 14.d3 Bxf3 15.gxf3 f5

A) 16.a3! Na6 *(*or *16...Nd5 17.Nxd5 cxd5 18.f4!)* 17.f4! yields White a clear edge.;

B) 16.f4?! exf4 *(16...Qh4!?)* 17.Rxe8+ Qxe8 18.a3 *(18.Bg2!±)* 18...f3! 19.Qxf3? Nxc2 20.Rb1 Nd4 21.Qg2 Nab3∓ Sivuk, V (2501)−Inarkiev, E (2680)/Wroclaw POL 2014.]

12.h3 The critical continuation.

12...Bxf3! This capture was played only once before.

[In most of the previous games Back retreated to h5, as in the following game: 12...Bh5?! 13.Bf5! Qf6 14.Bg4 Bxg4 15.hxg4± and Black didn't have any compensation for a pawn. Navara, D (2692)−Beliavsky, A (2656)/Novi Sad 2009.]

13.Qxf3 f5! 14.Bxf5!? White accepts the challenge.

[14.Bf1 looks promising for Black after e4 15.Qd1 *(15.Qe2 Bc7!)* 15...Bc7 16.Nc3 Qf6 , but in fact the position remains very unclear.]

14...Qe7! Black prevents a check from e6 and creates a threat of 15...g6.

[In the only preceding game Black played 14...Bc5? , but lost quickly. 15.Rf1! Qe7 16.Nc3 *(16.Qe4!?±* is also better for White. *)* 16...Nb4? *(16...Nxc3* is a better chance, but after *17.dxc3 g6 18.b4 Rxf5 19.Qe4 Rd8 20.bxc5 Qxc5 21.Bh6 Qxc3 22.Rad1±* White retains a clear edge. *)* 17.Qg4**±** and White is two healthy pawns up. Negi, P (2615)−Cori Tello, J (2486)/Chotowa 2010.]

15.Qe4 This natural move is slightly inaccurate.

[15.c4! was strong, with the idea to win time for development. However, it should be admitted that this is a very hard move to find over the board.

A) 15...Nf4 16.Bc2 Bc5 looks promising for Black, but 17.d4!

A1) 17...Bxd4 is strongly met by 18.Bxf4 Qd8 *(18...Qb4 19.Qe4! Rxf4 20.Qxh7+ Kf7 21.Nc3!+−; 18...Rxf4 19.Qxf4 exf4 20.Rxe7 Bxb2 21.Nd2 Bxa1 22.c5±* is better for White thanks to his better pieces. *)* 19.Qh5 Rxf4 20.Qxh7+ Kf8 21.Qh8+ Kf7 22.Qh5+ Kg8 *(22...Kf8 23.Nc3+−)* 23.Nc3 Bxf2+ 24.Kh2 Bxe1 25.Rxe1**±** Black's king is vulnerable, and all of his pawns are weak.;

A2) 17...Ng6 18.Qg3! Bxd4 19.Re2**±** and White seems to be better.;

B) 15...g6?! 16.cxd5 Rxf5 17.Qe4 Qf7 18.dxc6 Bc5 19.d4! Bxd4 20.Kh2! Rxf2 21.Nc3**±** and White's extra pawn promises him the upper hand.;

C) 15...Nxc4 16.d3 The game could have continued Ncb6 17.Qe4 Bc5! 18.Rf1 g6 19.Bg4 Nf6 20.Qe2 e4 21.Bh6 Rf7 22.Nc3 Nxg4 23.Qxg4 exd3 24.Ne4**±** with a slight edge for White.]

15...g6 16.Bg4

[16.Bxg6 is safer. hxg6 17.Qxg6+ Qg7 18.Qxg7+ Kxg7 and leads to a complex position. Despite White having four pawns for a piece I can't give him any edge as he is behind in development.]

16...Rf4 Black is trying to exploit his development advantage. The main object of attack is the f2−pawn. **17.Qe2 Raf8**

[But not 17...Bc5? 18.d4!**±**]

18.Bf3?? This move is just losing.

[White had to play 18.Rf1! e4! 19.Nc3 *(19.d4* is strongly met by *h5!)* 19...h5 20.g3 hxg4!? 21.gxf4 Nxf4 22.Qxg4 Rf5 23.h4= and White seems to survive, although his position looks scary.]

18...Rxf3!−+ Now Black's attack has been developing all by itself. **19.gxf3 Nf4 20.Qf1 Qg5+ 21.Kh1**

[or 21.Kh2 e4!−+]

21...Qh5! White is helpless. **22.Re3 Nxh3 23.Nc3 e4! 24.f4 Nxf4+ 25.Kg1 Ne2+ 26.Qxe2 Qh2+ 27.Kf1 Qh1#** The sequence 11...Bg4, 12...Bxf3, 13...f5, 14...Qe7 is very interesting and leads to big complications. It definitely requires more practical tests.

White has already made the first steps to a massive kingside attack. Which is the most consistent continuation?

13.Ng3 This is one of the cases when putting all the pieces into the right places is not the most effective idea, as it offers Black a tempo to take defensive measures. Dies ist einer der Fälle, bei dem das Stellen aller Figuren auf die richtigen Plätze nicht die wirksamste Idee ist, da es Schwarz ein Tempo bietet, um Verteidigungsmaßnahmen zu treffen.

[13.g5! The immediate pawn break is the strongest continuation, as it forces Black to waste time for eliminating the pin. The f1−knight will step into the attack slightly later. Der sofortige Bauernhebel ist die stärkste Fortsetzung, da er Schwarz zwingt, Zeit für das Abschütteln der Fesselung aufzuwenden. Der f1−Springer wird etwas später in den Angriff eingreifen. hxg5 14.Bxg5 Bxb3 15.axb3 Qd6 16.Ng3 Ne7 17.Rg1 Kh8 18.Nh4+− It is obvious that White's massive attack should soon break through. 13...Re8? This move does not add anything positive to Black's position. In fact, the rook is useful on f8, for the case White exchanges on e6. Dieser Zug fügt der schwarzen Stellung nichts Positives hinzu. Tatsächlich ist der Turm nützlich auf f8, für den Fall, dass Weiß auf e6 tauscht.

[13...Nh7! The strongest move, taking measures against g4−g5. [Luc Winants]

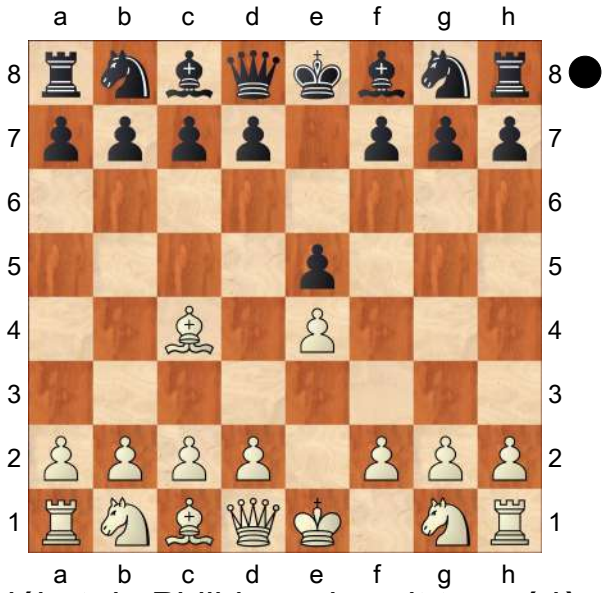
1.e4 Winants,Luc Winants,Luc Winants, Luc: 'Luc Winants' **1...e5 2.Bc4**



Le début de Philidor qui avait trouvé là une passerelle entre les manuscrits du dix−septième siècle et les théories avancées dans son "analyse du jeu des échecs" publiée en 1749. Nous y retrouvons la diagonale italienne des Greco, Polerio et Salvio, mais aussi le concept qui consistait à laisser le champ libre aux pions des ailes, pour assiéger ensuite celui du centre, à e5, par les coups de béliers sur f4 ou d4 appuyé de c3. **2...Nf6** La défense berlinoise, ainsi nommée en hommage à Paul Rudolph von Bilguer, dont le célèbre "handbuch" faisait alors autorité. **3.d3 Nc6 4.Nf3** Voici enfin le "giuoco Piano" ; il figure au répertoire de nombreux champions, dont Karpov, Kasparov et Kramnik.

[Les Blancs pourraient également opter pour 4.Nc3 − la partie viennoise − dans le but et de contrôler d5 et d'avancer ensuite vers f4. Une stratégie notamment adoptée par Bent Larsen depuis le début des années soixante.]

4...h6

[4...Bc5 reviendrait à la partie italienne]

[et 4...Be7 à celle des deux Cavaliers. Le coup joué empêche ♘g5 et projette le développement du Fou en fianchetto : g6 puis ♗g7.]

5.c3 d6 6.Bb3 g6 7.Nbd2 Bg7 8.Nf1 Un regroupement thématique d'abord imaginé par l'Américain Stanley, puis repris par William Steinitz : ce Cavalier se dirige vers e3 ou g3. Le dispositif n'a pas l'air très menaçant au premier abord, mais en y regardant de plus près, on s'aperçoit que le centre ne peut être bousculé. Les Noirs pourraient certainement pousser d5 et provoquer le pion de e4 en duel, mais les Blancs y répliqueraient toujours par ♕e2, conservant le statu quo, pour initier ensuite les hostilités à l'aile Roi. Il faut tenir compte d'un assaut à la baïonnette, h3−g4 ou ♘g3 suivi de h4−h5. Les Noirs doivent éviter de roquer trop rapidement, pour ne pas jeter leur Roi dans la gueule du loup. **8...Nh5!?** Une nouveauté conçue devant l'échiquier, justement dans le but de contrecarrer les projets adverses.

[Faute de connaissances théoriques, je n'avais pas songé à 8...d5 9.Qe2 Be6 10.Ng3 Qe7 (Gislplis−Eingorn, championnat d'URSS 1980) et les Noirs se préparent à roquer du côté Dame...]

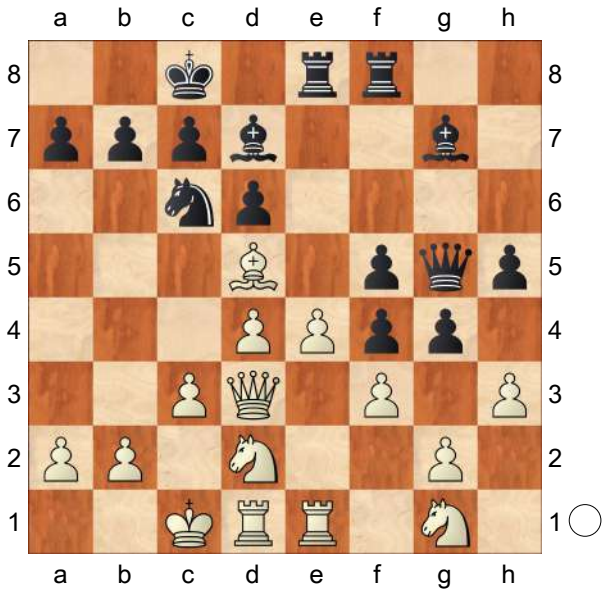
9.Ng3 Une faute de jugement me semble−t−il.

[Il valait mieux conduire ce Cavalier vers d5, via 9.Ne3]

9...Nf4 10.Bxf4 exf4 11.Ne2 g5 Les Blancs ont obtenu une majorité centrale, mais abandonné les deux Fous à l'adversaire. De plus, le ♘e2 ne dispose d'aucune case intéressante. **12.d4 Qe7** L'idée du grand roque m'était enfin venue à l'esprit. **13.Qd3 Bd7** Le plan coule de source : Il faut assiéger e4 et tâcher de se débarrasser des pions doublés (f7−f5). **14.0−0−0**

[Avancer le pion de b2 vers b5 ne donnait pas un meilleur résultat. Supposons 14.Bd5 0−0−0 15.b4 f5 16.b5 fxe4 17.Bxe4 Na5 et les Blancs éprouvent de grosses difficultés, suite au retard en développement.]

14...0−0−0 15.Nd2 Rhf8 16.Rhe1 f5 Les Noirs se sont emparés de l'initiative, mais il reste à trouver un emploi au ♗g7, qui butte devant la forteresse d4, soutenue de c3 et b2. **17.Bd5 Rde8 18.Ng1** En route pour f3. **18...g4** Maintient le Cavalier hors du jeu et dégage une nouvelle diagonale, h6−c1. **19.h3 h5 20.f3 Qg5**



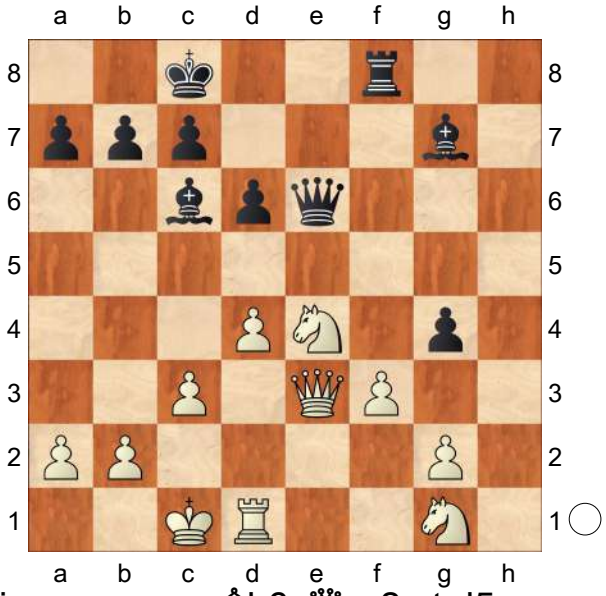
Vers e3, mais aussi d5 : les Noirs menacent de prendre e4, puis d'avancer d6−d5 pour poster enfin la Tour sur e3. **21.exf5** La pression était trop forte. **21...Re3 22.Rxe3** Cette prise ouvre les lignes au bénéfice des deux Fous.

[Mais si 22.Qc4 alors Rxf5 23.Ne4 *(23.Be4 d5)* 23...Qh6 avec la menace ♘a5]

22...fxe3 23.Ne4 Qxf5 24.Bxc6 Bxc6 25.hxg4 hxg4 26.Qxe3? Une faute et pourtant

[26.d5 se heurtait à Bh6!]

26...Qe6



Trois menaces : ♗h6, ♕xa2 et d5. **27.Kb1 d5**

[Mais pas 27...gxf3 28.gxf3 Rxf3 à cause de 29.Nxd6+! et les rôles seraient inversés.]

28.Qg5 Forcé. **28...dxe4**

[Non pas 28...Bh6 29.Nc5]

29.Qxg7 Toujours pas d'alternative :

[sur 29.d5 Bh6 garde la pièce.]

29...Rg8 30.Qe5 Qxe5 31.dxe5 exf3 32.gxf3 gxf3 Le complément des coups précédents : le pion passé, ajouté à la maladresse du Cavalier, donne un avantage décisif. **33.e6** Une dernière

ressource.

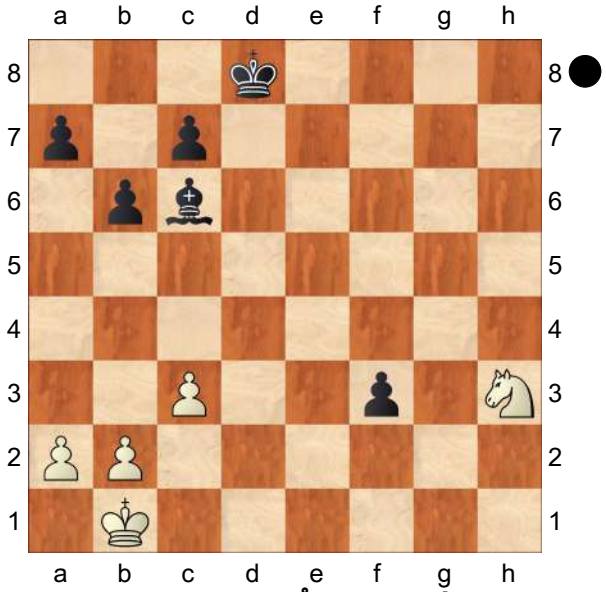
[33.Nh3 ne sauvait pas les Blancs. Une variante : Re8 34.Re1 Rh8 35.Nf2 Rh2 36.Nd1 Re2 37.Rf1 Be4+ 38.Ka1 f2! 39.Rxf2 Re1 40.Rd2 Bf3 Les Noirs gagnent.]

33...Rh8? Une faute qui permet aux Blancs de démontrer les inconvénients du Fou.

[Il fallait aussi éviter le mirage de 33...Bb5? 34.Nxf3 Be2 35.Rg1!=]

[Cependant le gain s'obtenait aisément via 33...f2! 34.Nh3 Bf3! (je n'y avais pas pensé) 35.Rc1 *(35.Rf1 Bg2)* 35...Be4+ 36.Ka1 Rf8 37.Rf1 *(*sur *37.e7 f1Q 38.e8Q+ Rxe8 39.Rxf1 Bg2* gagne encore du matériel. *)* 37...Bg2 38.Rxf2 Rd8! avec la menace du mat du couloir.]

34.e7 b6 35.Rd8+! Forcé, mais suffisant. **35...Rxd8 36.exd8Q+ Kxd8 37.Nh3**



Tout simplement : le ♗c6 ne réussira jamais à lever le blocus des cases noires, dont f2, d2 et e1. Il suffit désormais de maintenir l'opposition en diagonale : Si le Roi noir se dirige vers e3, via f4, les Blancs réagissent par ♔d2, quand le nombre de cases disponibles pour le Cavalier empêche tout zugzwang. Il y en a six : h1, d1, h3, d3, g4 et e4. De même, si le Roi décide faire le tour par g3 en direction de c1, les Blancs ripostent par ♔e1, pour empêcher l'invasion de la première traverse. **37...Bd5 38.a3 Kd7 39.Kc2 Ke6**

[Durant la partie je jouais sous l'impression que le gain pouvait encore être démontré par la mise en place d'un contre−pied en partant de l'aile Dame : ♔c6−b5−a4−b3 suivi de la poussée b5−b4. Vérification faite, il n'en est rien. Supposons : 39...Kc6 40.Kd3 Kb5 41.Nf2 Bc4+ 42.Ke3 Ka4 43.Kd2 *(43.Kxf3 Kb3 44.Nd1 Bf7)* 43...Kb3 44.Kc1 Be6 45.Ne4 Ka2 46.Nf2 Bf5 47.Nd1 Kb3 48.Nf2 a5 49.Nd1

24th Chicago Open 2015 (7) 24.05.2015
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 The Evans gambit was rather popular in 2014, but this year we don't see many top level games featuring it. **4...Bxb4 5.c3 Be7 6.d4 Na5 7.Bd3** White is following last year's game from Kryvoruchko, which is referred to below. **7...d6 8.dxe5 dxe5 9.Nxe5 Nf6 10.0−0 0−0 11.Qc2 Nd7!?** The only preceding game played with this move was Kramnik's. Black's idea is to exchange White's active knight.

[11...c5 can be considered to be the main line. See Kryvoruchko, Y (2707)−Karjakin, S (2771)/Dubai UAE 2014/ [Mikhalevski, V].]

12.Nxd7 Qxd7 13.Bf4

[In the aforementioned game White played 13.e5 g6 14.Nd2 b6 15.Nf3 Bb7 16.Be4 Bxe4 17.Qxe4 Qc6 and Black obtained a promising position in Halkias, S (2519)−Kramnik, V (2760)/Doha QAT 2014.]

13...Rd8

[Black can also start with 13...b6 with the idea 14.e5 g6 15.Nd2 Bb7 16.Rfe1 Rad8 17.Bf1 Bd5= with equal chances.]

14.Be2 b6 15.Rd1 Qc6

[I prefer 15...Qe6 as the queen is better placed there.]

16.Rxd8+ Bxd8 17.Bf3 Creating a threat of 18.e5

[17.Nd2 is more natural and better.]

17...Be6 18.Nd2

[Now 18.e5?! is answered by Bd5 and leads to a weakening of the light squares.]

18...Be7 19.e5?! As I mentioned above the move leads to a weakening of the light squares.

[White had to admit that 17.Bf3 was inaccurate and retreat to e2. 19.Be2 although Black is already the one playing for a win.]

19...Bd5 20.Rd1 Rd8!∓ 21.Ne4 White has been preparing 22.Rd4! with the idea to double on the d−file.

[21.h3 deserved attention.]

21...h6

[Black should have started with 21...Qc4! , which was the only way to set problems. For example, 22.Ng5 *(* or *22.Rd2 h6!)* 22...g6 23.Bxd5 Rxd5 24.Rxd5 Qxd5∓ with a better endgame.]

22.Rxd5?!

[After 22.Rd4! Black has to think of retaining the balance. Nc4 23.Qd3 Qe6! *(* or *23...Nb2!? 24.Qe2 Nc4 25.Nf6+ Bxf6 26.Rxd5 Rxd5 27.exf6 gxf6 28.Bxh6 Ne5 29.Bxd5 Qxd5)* 24.Nf6+ *(24.Ng3 Nb2 25.Qd2 Nc4=)* 24...Bxf6 25.exf6 c6 26.Bxd5 Rxd5 27.Rxd5 cxd5 28.fxg7 Kxg7= is roughly equal.]

22...Rxd5 23.Ng3 Qe6 24.Bxd5 Qxd5∓ As the result of the exchanges White has a few weaknesses on the queenside and in the centre. **25.h3 Nc6**

[25...Qc4!? 26.Be3 Nc6∓ deserved attention as it allowed Black to avoid an exchange of queens.]

26.Nf5 White doesn't take his chance to simplify the position.

[26.Qe4! was better, as Black's queen is more active than White's.]

26...Bf8 27.Qe2 a5! Black has an extra pawn on the queenside and that's where he has to play. **28.c4** This leads to a further weakening of the position, although it's not easy to offer a good alternative. **28...Qe6 29.Qe4 a4 30.g4?**

[30.Ne3 was necessary, in order to meet a3 with *(30...Nb4!* is better. *31.Qa8! Nd3 32.Bg3 Nc1 33.Kh2 Ne2 34.Nd5 Nxg3 35.fxg3 Qxe5 36.Qb8∓* with chances to survive. *)* 31.Nd5]

30...a3!∓ Black fixes the a−pawn on a2 and it will be difficult for White to protect it. **31.Ne3 Nb4 32.Nd5**

[32.Nc2 was the very last practical chance. Nxa2 33.Nxa3 Bxa3 34.Qa8+ Bf8 35.Qxa2 b5∓]

32...Nxa2−+ Now the passed a−pawn promises Black a win. **33.Qb1 Nb4! 34.Nxb4 Qxc4 35.Bd2 b5!** Advancing the queenside pawns decide the game.

36.Qd3

[36.Qd3 I don't know if White lost on time or resigned, but his position after Qxd3 37.Nxd3 c5 38.Nc1 b4 39.Kf1 *(* or *39.Kg2 c4 40.Bxb4 Bxb4 41.Na2 Bd2 42.Kf3 Kf8 43.Ke4 c3 44.Kd3 Ke7−+)* 39...c4 40.Ke2 b3 41.Kd1 Bc5 42.Ne2 Bxf2 43.Kc1

Bc5 is hopeless, although he could continue playing. The line which occurred in the game leads to roughly equal chances, so 11...Nd7 is a good alternative to 11... c5.]

Hier versucht weiß eine Neuerung zu spielen,wahrscheinlich kannte er die Fernschachpartie nach ♗f4 die relativ schnell Remis endete. Die Idee ist den ♗c1 über b2 oder a3 zu entwickeln, schlußendlich auch ohne Erfolg.

[35.Qe3 Qb2 36.Qd2 would have resulted in an immediate draw; of course the text move draws as well but now Black can try a little

something.]
35...Rxc3 36.Qxc3 Qxf2+ 37.Kh1 Qf1+
[37...Nh5 looks strong but doesn't work in view of 38.f6+ g6 39.Bxg6+! Kxg6 *(39...fxg6 40.Qc7+=)* 40.Qd3+ and White makes a draw.]
38.Ng1 Qxb1 39.Qf3 Qc2 40.Ne2 Ne4 The 40th move has been reached and what remains is a slightly uncomfortable ending for White. Of course he should be able to hold on but it is of course not easy to defend such an ending after having had such a fantastic position. **41.Kg2 Ng5 42.Qg4 Qc6+** The white king is provoked out into the open. **43.Kf2 Ne4+ 44.Ke3 Nf6 45.Qf3 Qc5+ 46.Kd2 Qe5 47.Nc3**
[White would like to play 47.g4 but Ne4+ 48.Kd3 Ng5 is annoying, when the h−pawn is likely to fall.]
47...Qd4+ 48.Kc2?
[A serious error, the king belongs on the kingside: 48.Ke2 h5 49.Kf1]
48...h5! Preventing g3−g4 which would considerably improve White's position. The next task is to provoke h3−h4, creating further weaknesses in White's camp. **49.Kb3 Qg1 50.Kc4 Qh2 51.h4 Qd2 52.Kb3 Qd4** The second step has been completed and now Black can combine the attack on the weakness on f5 with an attack on the king with the joint forces of queen and knight (via g4−e3). **53.Kc2 Ng4 54.Ne2?!**
[Tougher is 54.Kb3 now Black is winning by force.]

Quarantäne−Bundesliga 2 Team Battle
[Braun, Christian]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 The classical idea of the Italian is to build a strong centre by playing d2−d4. **4...Nf6 5.d4** Now Black has to take on d4. **5...exd4 6.cxd4 Bb4+** The only way for Black because otherwise White can push his strong centre by playing e4−e5. **7.Nc3 Nxe4 8.0−0** White castles to use his development advantage − idea Re1. **8...Bxc3!** the only move for Black! **9.d5!** Leading to the Moeller−Attack. In the last years this attack was applied to be refuted by Black, but now White is 'back in business!' It is very important to let Black not play the important move 'd7−d5'! **9...Bf6!** The main move. **10.Re1 Ne7 11.Rxe4 d6** Now we are following the main line which was more or less considered lost for White! **12.Bg5** Black is now forced to take on g5. **12...Bxg5 13.Nxg5 h6!** An important move for Blackm because White is threatening to tripple his major pieces on the e−file.

[Very dangerous for Black is 13...0−0?! because of 14.Nxh7!]

14.Qe2 Trippling on the e−file. **14...hxg5 15.Re1 Be6**

[15...0−0? 16.Rxe7±]

16.h3!? This is the new idea in this position: White does not take on e6 directly! In this variation White is willing to keep both rooks for a possible attack on the queenside (if Black castles long) with b4−a4 and so on. Now Black has two options: a) to castle queenside and b) to play Kf8.

[Before, White used to play 16.dxe6 f6! to keep the e−file closed. 17.Re3 with the idea to change rooks on h3 and go Qh5+ c6! White wants to free his king to castle long. 18.Rh3 Rxh3 19.gxh3 g6! not allowing Qh5+ with a mating attack. 20.Qf3 Qa5!−+ This is the refutation of the old variation! Now 16.h3!? keeps White alive again!]

16...c6 17.dxe6 f6 Black has to close the e−file, while his Ne7 has to stay and block White's e6−pawn.

[if 17...f5!? 18.Rd4 d5! 19.Qd2 g4 20.hxg4 fxg4 21.Qf4!⩲]

18.Bd3!? Black has problems to bring his king into a safety area. Playing ... 0−0 is really dangerous because of Bd3 and later h4! oder Qh5. If Black castles queenside, White can start an attack with a4−b4. For an engine this type of position is really hard to calculate. Important to mention is that the Re4 always goes to g4 if Black plays ...d5. **18...Qa5?!** This was played in my game against GM Andrew Tang. I guess this move is not so good because White wins time by playing b4 a tempo. In the "old variation" (without h3) this is an important move. For most Black players Qa5 could make sense, whereas we know that this gives us a very good oppportunity to attack Black's king with b4−a4.

[if 18...Qc7 looking very logical to castle queenside. 19.Qe3!? always an unpleasant situation for Black not beeing able to castle. Qb6! to prepare 0−0−0. *(19...d5 20.Rg4∞)* 20.Qd2! of course the queens should

stay on the board! Now White follows his plan and goes b4−a4. 0−0−0 21.b4 d5 22.Rg4 the rook has kind of a double−function here. He is able to swing to the queenside but also after f4 he makes pressure on g7. Kb8 23.a4 Qc7 24.Qc3 White wants to centralize his queen and then go forward with the a− and b−pawn. Qd6 *(*if *24...Rh4 25.Rxh4 gxh4 26.Qd4 Rh8* only move. *27.a5!∞* White gains more space and Black cannot play active. White could go Qg4 forcing Black to play g5. Then the queen turns back to d4 (maybe also with the idea to invade Black's position with Qh7 somewhen). The evaluation of the engine is that Black has a small advantage. But I can tell you that Black cannot win this game with such a passive position. It is really unclear how Black can make further progress. *)* 25.Qd4∞ With the idea to go f4!? White could also improve his position by playing a5 with Rc1−b5.]

[falls 18...d5 if 19.Rg4 Qd6 *(19...Qc7* transposition to 18...Qc7. *)* 20.Qe3∞ not allowing Black to castle! The plan is to go on with a4−b4. This position is really dangerous for Black because the king will not be save very soon. White should try to open the position on the queenside.]

[if 18...Qb6 19.b4 0−0−0 20.a4 d5 21.Rg4! This is the usual move here... the rook is also able to swing to the queenside after a5−b5. for example: Kb8 22.a5!? Qc7 23.a6!? to weaken Black's king. b6 24.Rf1!∞ with the idea to go f4 somewhen! (then White can make pressure on g7). Another idea is to centralize the queen on d4.]

[if 18...Kf8 19.Rg4!± having the idea to go on with f4! (maybe Qe3 is interesting − looking on g5 and a7). Black's Ne7 cannot move. g6 20.f4 Qb6+ *(20...f5 21.Rxg5 Qb6+* transposition. *)* 21.Kh2 f5! only move! *(21...gxf4? 22.Bxg6+−)*

B) 22.Rxg5!? Qd4 23.g3 The Rg5 is locked. White now can play the setup h4−Bb1−Rd1−Rd2 (and on the long term h5). Kg7 24.h4±]

19.b4 falls **19...Qb6?** inviting White to play a4−a5 (also a tempo).

[19...Qc7 20.Qe3! Now Black cannot castle queenside! White wants to go on with a4. For example: Qb6 21.Qd2 0−0−0 22.a4∞ White is going to create a dangerous play against Black's king.]

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.0−0 d6 6.a4 This move starts to gain in popularity here, as well as in some other lines of the Italian. **6...a5** The idea behind this move is not to let White take space on the queenside and also obtain an escape square on a7 for the dark−squared bishop.

[6...Bg4 Morrison,C−Horner,J/British Championship 1985/[Paul Motwani].]

[6...a6 is the most common reaction. It transposes into Nepomniachtchi,I (2767) −Fressinet,L (2672)/Doha QAT 2016/[Mikhalevski,V]]

[6...h6 7.c3 a5 This position has been seen in a few recent games, including Van Foreest,J (2612) − Jones,G (2665)/Wijk aan Zee NED 2017. I could also have reached it by playing 7...d6 in the current game.]

7.c3 Bb6 Moving the bishop away from a possible attack from the d−pawn. At the same time I have been preparing 8... Ne7 followed by 9...c6 and the bishop can escape to c7. This move has never been seen in this specific position, but some games reached it by transposition.

[As I mentioned above 7...h6 transposes to 6...h6.]

8.Bb3 A new move, although a similar position exists in theory without the moves a4 and ...a5 included.

[A relatively recent game saw 8.Na3 Ne7 9.Ba2 c6 10.Nc4 Bc7 11.Bg5 Ng6 12.Nh4 Nf4 13.Bxf4 exf4 14.Nf3 0−0 15.e5 dxe5 16.Ncxe5 Nd5 and Black was close to equalising in Areshchenko,A (2675)−Granda Zuniga,J (2648)/Aachen GER 2016.]

[White also tested 8.h3]

[8.Re1]

[and 8.Bg5]

8...Ne7 Following my plan. **9.Be3?!** Probably Odeev decided to stop me from saving the dark−squared bishop from exchange by means of 9...c6 and 10... Bc7, but this move doesn't seem to set problems.

[White could have tried 9.Na3!? c6 10.Bg5 Ng6 11.Nh4!⩲ A typical idea for this type of position. The point is to keep the dark−squared bishop on the d8−h4 diagonal.]

9...Bxe3 10.fxe3 Ng6 This way Black stops the Nh4 idea. The position is already roughly equal, but Black has the

potential to seize the initiative if he manages to play ...c6 and ...d5 quickly.
11.Nbd2 0−0 12.Qe1 White has been preparing 13.Nh4. I saw that this idea may run into some tactics with 13... Nxe4, but couldn't find a more useful move than 12...c6. **12...c6**
Black's natural idea is to play 13...d5, but the move also has a drawback as it weakens the d6−square for one moment and allows White to go on with his idea of **13.Nh4**
[In case of the preparatory 13.Rd1 moving the rook away from an attack of the black knight. See 14.Nxg6? Rb8! A clever move, which prepares the opening of the b−file. 14.Nh4 Nxh4 15.Qxh4 b5 16.axb5 cxb5∓]
13...Nxe4! This exchange operation leads to a roughly equal position. To my big surprise Odeev told me in the post−mortem that he simply missed this move.
[13...Nxh4 14.Qxh4 Re8 15.Rf2 *(*or *15.d4 Be6=)* 15...Be6 16.Bxe6 Rxe6 17.Raf1= is also equal.]
14.Nxe4! Fortunately for White he isn't worse yet.
[The critical line is 14.Nxg6? Nxd2 15.Nxf8 Nxb3 16.Ra3 Nc5! White's knight on f8 is trapped and so before playing 13...Nxe4 I had to calculate 17.d4 *(17.Nxh7* can be answered by *Be6!*−+ and the knight is still trapped. *)* 17...Nd3 *(*Probably *17...Ne4!?*−+ is even simpler. *)* 18.Qe2 e4 19.Nxh7 Qh4!−+ trapping the knight again and obtaining a winning position. I calculated up to here when I played 13...Nxe4! *(*It's important that *19...Kxh7* is strongly met by *20.Qh5*+ *Kg8 21.Qxf7*+ and White can force a draw by perpetual. *)*]
14...Nxh4 15.Nxd6
[15.Nf6+ is slightly inaccurate. gxf6 16.Qxh4 f5! 17.Qxd8 Rxd8 18.g4! White wins a pawn back, but it doesn't equalise because of Ra6! 19.Ba2 Rb6 20.Rab1 Bd7! 21.gxf5 c5∓ with some edge for Black.]
15...Qxd6 16.Qxh4 Qxd3? A blunder, as it turns out. We both missed a simple tactical idea.
[Instead, I should have played 16...Be6! , which was my first intention. 17.Bc2 White's idea is a discovered attack by means of 18.d4. *(17.Bxe6 Qxe6 18.Rad1* is also close to equality. *)* 17...f5 18.d4 g6 19.Qg3 f4! I saw this idea during the game, but for some mysterious reason preferred the risky 16... Qxd3. 20.Qg5 *(20.dxe5 Qd2! 21.Qf2 fxe3 22.Qxd2 exd2* is what I calculated. It also leads to roughly equal chances. *)* 20...Bc4 21.dxe5 Qd2 22.Rf2 Qxe3 23.Bxg6 hxg6 24.Qxg6+= with a draw by perpetual.]
17.Qg5? White returns the favour.
[17.Rxf7! Rxf7 18.Qe7! was the move we both missed. Now the best Black can do is to reach a position where he is a pawn down. Be6 19.Bxe6 Qxe3+ 20.Kh1 Qf2 21.Qxb7! Re8 22.Qxc6 Rxe6 23.Qxe6 e4! and now White has to find 24.h3! e3 25.Rd1! g6 26.Rd4!! attacking the e−pawn from behind, as in rook endgames. e2 *(26...Qxb2?* is bad because of *27.Rd8*+ *Kg7 28.Qe5*+ *Kh6 29.Qxe3*++− *)* 27.Re4 e1Q+ 28.Rxe1 Qxb2±]
[17.Rf2? with the idea of 18.Bc2, which I considered during the game, is

met by means of Qxe3!∓]

17...Be6! Now it's equal.

[17...h6 18.Qxe5 Be6!= is also equal, but unnecessary. *(*while *18...Bg4?!* is wrong in view of *19.h3 Be2? 20.Rf2±* and the light−squared bishop is in trouble. *)*]

18.Bxe6 fxe6 19.Qxe5 Qd5 20.Qd4 After 20 moves we reached a completely symmetric position. Black's extra tempo doesn't promise any advantage here. **20...h6 21.Rxf8+** White simplifies the position into a queen endgame.

[or 21.h3 Qb3 22.Rxf8+ Rxf8 23.Rf1=]

21...Rxf8 22.Rf1 Rxf1+ 23.Kxf1 Qf5+ 24.Ke2 Qc2+ 25.Kf3 Qxb2 Black has won a pawn, but has left his king alone. **26.Qd8+ Kf7 27.Qd7+ Kf6 28.Qd8+ Kg6 29.Qd3+** The king can't escape the checks, and so after **29...Kf7 30.Qd7+** a draw was agreed. A rather clean game, notwithstanding the mutual blackout on the 17th move. It seems that White can set some problems with 9.Na3. Black can also avoid the discussed position with 6...a6 or 6...h6.

6...g6 7.0−0 Bg7 8.Bb3 0−0 9.Re1 White prepares a transfer of the knight to g3 via f1. **9...Na5** The most popular. Black is looking for better control of the centre. **10.Bc2 c5 11.d4**

[11.Nf1 is a logical alternative.]

11...exd4!?N A novelty, which was found over the board. My idea is very simple− I'm opening the diagonal for the dark−squared bishop.

[11...cxd4 12.cxd4 exd4 13.Nxd4 Bg4 14.N2f3 Rc8 15.h3 Bxf3 16.Nxf3 Re8 Fontaine, R (2449) − Onischuk, A (2627)/Bastia 2000]

12.cxd4 Re8!? Black puts pressure on the centre.

[I could have started with 12...cxd4 and only after 13.Nb3 Re8

The purpose of the early exchange is to prevent the option of d5.]

13.h3 The purpose of this move is to control the g4−square and thus prepare 14.e5.

[The immediate 13.e5?! is dubious. dxe5 14.dxe5 Ng4 and White can't protect the e5−pawn.]

[However 13.d5 deserved attention, trying to exploit the bad position of the knight on a5.]

13...cxd4! No more e5 and d5 ideas. **14.Nxd4 Bd7** Time to finish development. **15.N4b3?!** Surprisingly, after this inaccurate move Black's chances are higher.

[15.b4!? deserved attention in order to develop the dark−squared bishop. Nc6 16.Nxc6 Bxc6 17.Rb1 a6 18.Bb2 Rc8 with roughly equal chances.]

15...Rc8!∓ Suddenly White has problems

completing development. **16.Nxa5**
[or 16.Nf3 Nc4 putting pressure on b2.]
16...Qxa5 17.Bd3 White wants to put his knight on c4.
[17.Nb3 would be better, although after Qc7 18.Bd3 d5∓ Black is better. *(18...Bc6!?∓)*]

20.Qxe5 Re8 21.Qxe8+ Bxe8 Despite an approximate material balance Black is on top as White experiences problems with his development. **22.Nf3 Ne4!∓** Sacrificing a pawn Black obtains the advantage of the bishop pair and keeps White's queenside undeveloped. **23.Bxe4 dxe4 24.Rxe4 Bc6 25.Re3 Qa4**

26.Rd3
[26.Rb3 would be a better try, although after Bd5 27.Rd3 Qe4 28.Re3 Qc2∓ Black retains a clear edge.]

27...Qc2
[27...Bxb2!? 28.Re1 Qxa2−+ is equally strong.]
28.Rd6 Qxb2 29.Re1 Qxa2−+ with queen and two pawns and a pair of bishops Black is winning. **30.Bf4** White prepares 31.Ne5.

48...Kxg5 49.Rxb1 Kf4 White loses the f3−pawn and the game, and so he resigned. The line with 4...h6 is gaining popularity and deservedly so. The current game is an additional confirmation.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.0−0 0−0 6.Nc3 A reasonable move, although it's out of fashion. White's idea is to play 7.Bg5, which

explains Black's reply.

[6.Nbd2 Karjakin,S (2769) −Tomashevsky,E (2728) Wijk aan Zee NED 2016 [Mikhalevski,V]]

6...h6 7.Be3 Since the g5−square is unavailable it makes sense to place the bishop on e3. It also allows White to neutralise the strong bishop on c5. **7...d6** Black allows White to double his pawns, which will be compensated by his good control of the d4−square.

[Another way of playing would be 7...Bxe3 8.fxe3 d6]

8.Nd5 White is trying to simplify matters.

[8.Bxc5 dxc5 9.h3 Re8 is roughly equal.]

8...Be6 I tried to retain some tension in the position.

[Probably the most accurate is 8...Nxd5! 9.Bxd5 *(*In case of *9.exd5?! Bxe3 10.fxe3 Ne7* the c4−bishop is misplaced. *)* 9...Bxe3 10.fxe3 Nb8!= A nice manoeuvre, transferring the knight to f6 and equalising.]

9.Bxc5 dxc5 10.Ne3! White brings the knight to a better position. **10...Bxc4!**

11.Nxc4 Re8

[11...Qe7!? with the idea of...Qe6 deserved attention.]

12.Nfd2 White has been preparing f4.

[In the only preceding game White played 12.Ne3 Nd7 *(12...Qd7!?* with the idea of 13...Rad8 is more natural. *)* 13.Nf5 Nf8 14.Qd2 Ne6 15.Qc3?! White has chosen the wrong plan in Triapkin,P (2278) −Predke,A (2468) Uljanovsk 2013 and Black could have obtained a comfortable position by means of Ncd4]

12...Qd7 13.Ne3 The knight is heading for f5.

[Now 13.f4? runs into Ng4! *(13...exf4!?* is also good for Black. *14.Rxf4 b5 15.Ne3 Qd4∓)* 14.Kh1 b5 15.f5 bxc4 16.Qxg4 cxd3∓]

13...Rad8 Meanwhile Black brings all of his pieces into play. **14.Re1** It turns out that White isn't interested in playing f4. Instead he vacates the f1 square for the d2−knight. **14...b6** It makes sense to protect the c5−pawn. **15.Ndf1 Qe6** e6 looked like a good square for the queen. This way Black also creates a threat of 16...Nxe4.

[I could also start with 15...g6 , but I wasn't afraid of the Nf5 move, as Black can easily prepare ...g6 and force the knight back.]

16.Qc1!? White removes the queen from the d−file and prepares 17.Nf5. **16...Kh7** One way to prepare for 17.Nf5. **17.Nf5** This move is slightly premature.

[17.a4= deserved attention.]

[If White wanted to prepare Nf5 he could have started with 17.b3 , which prevents the ...c5−c4 break.]

17...Ng8!? Preparing 18...g6. That was one of the reasons I played 16...Kh7.

[Since White creates no real threats on the kingside I could have tried to

counterattack in the centre and on the queenside. 17...c4!? 18.dxc4 Nxe4 *(18...Qxc4!? 19.N1g3 Ne7 20.Ne3 Qc5* is also marginally better for Black. *)* 19.Nxg7 Kxg7 20.Rxe4 f5 21.Re1 Qxc4 22.c3 Qd3 with a slight preference for Black.]

18.N1e3 g6 19.Ng3 Nf6 I wanted to cover the d5−square, but there were more accurate ways to do this.

[Both 19...Nd4!?]

[and 19...Nge7!? look more accurate.]

20.a3 Haimovich prepares b4.

[20.Rf1!? coming back to the plan of f4 was better. Nd4! 21.c3 *(* Now *21.f4* is premature in view of *exf4 22.Rxf4 Nh5! 23.Rf2 Nxg3 24.hxg3 f5! 25.c3 Nc6∓* and the weakness of White's centre makes Black's position better. *)* 21...Nb5 with roughly equal chances.]

20...a5!?

[20...Nd4!?= was also possible, planning to meet 21.b4 with Qe7!=]

21.a4 White fixes the queenside.

21...h5!? Black is preparing to take some space on the kingside.

[There was also nothing wrong with the immediate 21...Nd4!?=]

22.Ngf1 Avoiding h4−h3, which would weaken the kingside.

[I would prefer 22.Ne2 , as this way White prepares f4 and takes control of the d4−square. Nd4! 23.Nxd4 cxd4 24.Nc4=]

22...Nd4 Now the knight is well−placed on d4, as c3 would run into ...Nb3.

23.Qd1 Rd7 My idea was to protect the c7−pawn before trying something like ... h4 and ...Nh5 on the kingside, as in that case the c7−pawn is protected and so Nd5 doesn't gain a tempo.

[23...Kg7 also makes sense.]

24.Nc4

[24.Nd2!? preparing Rf1 and c3 looks natural.]

24...h4 Black is ready to advance his h−pawn to h3 and so White plays **25.h3** himself. **25...Nh5** Since White can't play g3 any more it makes sense to transfer the knight to f4. **26.Nh2 Nf4 27.Nf3**

[27.Ng4 f6 28.Kh2 Kg7 29.b3 looks roughly equal, as it's difficult to make any progress.]

27...Qf6! Protecting both e5 and h4.

[The text is more accurate than 27...Nxf3+ 28.Qxf3]

28.Nxd4 Qg5! I had in mind this intermediate move when playing 27... Qf6. **29.Qg4** White hopes to equalise in the endgame.

[The cold−blooded 29.g3!? cxd4 30.Kh2 Ne6 is a little more pleasant for Black, who has more space.]

29...Qxg4 30.hxg4 cxd4 31.Kh2?! This move might be inaccurate.

31...f6! Stopping g5. **32.Nd2 Kg7 33.Nf3 Rh8!?∓** Black stabilises his position and obtains the better chances.

[33...g5!?∓ was also good.]

34.g5 Re7!?

[I could also force gxf6 by means of 34...Ne6!?]

35.Rab1

[It makes more sense to come to b1 with the other rook, as after b4 the a−rook can support the advance of the a−pawn to a5. 35.Reb1]

35...fxg5 36.Nxg5 Kf6 37.Nh3

[37.Nf3? is worse. g5! Now White has to allow 38...g4 since 38.g3 leads to a mating attack. hxg3+ 39.Kxg3 g4! 40.Ng1 Rg7! 41.Rf1 Nh5+ 42.Kg2 Rgh7 43.b4 Nf4+ 44.Kg3 Kg5 and White gets checkmated.]

37...Ne6! Black should keep knights on, as his knight is more active. **38.Rf1?!** White is preparing 39.f4, so Black's reply is obvious.

[White should have tried to create some counterplay on the queenside by means of 38.b4! axb4 39.Rxb4 Ree8 40.f3 Ra8∓ although Black retains the better chances.]

38...g5!∓ Black is better as he has more space on both the kingside and in the centre. **39.f3 Nc5 40.b3**

[40.b4! was still a better practical chance, as in the game his position is passive and lacking counterplay. axb4 41.Rxb4 Ra8 42.Ra1 Ra5∓]

40...Na6! The knight is heading to b4 from where it will be attacking the c2−pawn, while preventing counterplay with b4. **41.Nf2 Nb4 42.Ng4+ Ke6 43.Rf2 Rd7!?** My idea was to transfer the rook to c6 in order to put even more pressure on the c2−pawn. **44.Rd2 Rd6**

[44...Na2!?∓ also deserved attention with the idea of placing the knight on c3 and then preparing ...b5.]

45.Nf2 Rc6 46.Rc1 Rc5 Black can't win without playing ...c6 and ...b5.

47.Kh3 c6 48.Nd1 Kf6! A good waiting move.

[The immediate 48...b5? would run into 49.c4!=]

49.Nb2 b5 50.Nc4? A clever idea, which doesn't seem to work. White is trapping my rook on c5, but Black has enough resources to free it and retain some extra material.

[50.Kg4!? was worth a try.]

50...bxc4−+ 51.dxc4 Na2! The first part of Black's plan is to prepare a sacrifice on a4 by means of ...Nc3.

52.Ra1 The rook has to be on a1.

52...Nc3 53.g3 hxg3+ 54.Kxg3 Rh4 Black has just created a threat of 55... Rxe4. **55.Rh2**

[55.Rf2 Rf4 56.Kg2 Kg6−+ with the idea of 57...g4 is hopeless for White.]

55...Rxh2 56.Kxh2 g4! Black weakens the e4−pawn. **57.Kg3** The f3−pawn has to be supported in order to save the e4−pawn. **57...gxf3**

[57...Kg5−+ also wins easily.]

58.Kxf3 Ke6−+ Now White is in zugzwang and has to move his rook away from the a−file. **59.Rh1 Nxa4!** The coming rook endgame will be easily won for Black. **60.Rh6+ Kd7 61.Rh7+ Kd6 62.Rh6+ Kc7 63.bxa4 Rxc4 64.Re6 Rc3+!** An important intermediate check. **65.Kg4 Rxc2 66.Rxe5 d3** The d−pawn decides the game. **67.Kf3 Re2!** Preparing 68...Re1 with 69...d2 to follow. **68.Rxa5**

68...Re1! Now the d−pawn can't be stopped and so after **69.Ra7+ Kc8 70.Ra8+ Kd7** White resigned. The line

with 6.Nc3 leads to quiet positional play with roughly equal chances.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.Bxf7+! From a practical point of view, I think this is the best option for White.
[For 5.Nxf7 see next games.]
5...Ke7 6.Bb3 Rf8 As mentioned in the previous games, Black aims to get the

initiative for the pawn, in view of the open f−file and better development.
7.d3! I also think this is the most precise move order for White.
[7.0−0 is the most played, but the king on g1 gives at least practical chances for Black, as some analysis suggests: d6 8.Nc3 *(8.d3 Bg4 9.Nf3 Qe8 10.Nbd2 Qh5 11.h3 Nd4!* The ♗g4 can't be taken due to mating ideas on h2, but White forces mass exchanges after *12.c3 Nxf3+ 13.Nxf3 Bxf3 14.Qxf3 Qxf3 15.gxf3 Nh5±)* 8...Nd4! 9.Nd5+ Nxd5 10.Bxd5 Rf4!? ;½−½ Escalante Ramirez,B (2331)−Requejo,O (2240) PER−ch Grand Prix final 2016 (5) Suddenly, it is not so obvious how White should continue, and Black got chances in 11.d3 White would be better after a difficult line: *(* but not *11.Qh5? 7...d6
[7...Qe8 wouldn't improve things for Black: 8.Be3 Bxe3 9.fxe3 Qg6 10.Nf3 and since the g2−pawn is taboo, White finishes his development without problems. d6 11.Nc3±]
8.Be3! This exchange easily neutralises Black's attempts at an initiative on the kingside. **8...Bxe3**
[8...Bg4 9.Qd2 Nd4 would be an attempt to pose more problems for White, but it doesn't work: 10.Nc3 Qe8 *(10...h6* fails due to the intermediate moves *11.Bxd4! exd4 12.Nd5+ Nxd5 13.exd5±)* 11.h3 Bd7 The easier path to consolidate White's advantage seems to be going for exchanges. 12.Bxd4 Bxd4 13.Nf3 a5 14.Nxd4 exd4 15.Nd5+ Nxd5 16.Bxd5 keeping the pawn up and a good position, for example Qg6 17.e5! dxe5 18.Bxb7 Rab8 19.Be4±]
9.fxe3 Ng4 10.Nf3!?
[Objectively stronger was 10.Nc3! Nxe3 11.Qd2 Ng4 12.Nxh7+−]
10...Qe8 Accepting the pawn would be very risky.
[10...Nxe3 11.Qd2 Ng4 12.Nc3 *(12.Qg5+* − winning the pawn back looks good enough as well. *)* 12...Nf6 13.Qg5! g6 14.0−0 Black's king is in a difficult situation, stuck in the centre, for example Be6 15.Bxe6 Kxe6 16.Nd5! Nxd5 17.Qg4+! Ke7 18.exd5+−]
11.Nc3 Qh5
[11...Nxe3? 12.Qd2 Ng4 13.Qg5+ is also very bad for Black.]
12.Qe2 Qh6 13.Nd5+ Kd8

[23.h3 would fail now due g3 24.Qg2 Rg7−+]

23...Rg7 Now f4−f3 threatens to win on the spot. **24.Kf1 Bb7 25.c5 Rc8?** This is really strange. I mean, Black's position is so much better that even after this move he keeps a clear advantage, but what's the logic of this move?

[25...Re8−+ is so natural and clearly winning that makes me wonder if the text is not a case of wrongly recorded moves... maybe.]

26.Nc3

[Black is so winning here that even in the event of 26.h3 the only thing he has to do is go back to the winning path: Re8! 27.hxg4 Qe7 28.f3 Ba6−+]

26...Ba6−+ We have total domination over the board, Black has so many threats that it is just a matter of time until something terrible happens for White, so he tried to make things a bit more complicated, but that only made things shorter. **27.Nf3 gxf3 28.Qxf3 Nb3 29.Rb1 Bxc5 30.Bxf4 Nd4 31.Qxh5 Qxh5 32.Bxh5 Bxd3+ 0−1**

[A very interesting alternative to avoid a draw is 12.Bg5!? a very interesting move going for the attack.
A) 12...Ng6 13.Bxf6 Qxf6 14.Qd4! with the idea to exchange queens and bring the Nf3 to b5. Qxd4 *(14...d6 15.Qxf6 gxf6 16.Nd4 Ne5 17.Bf1⩲* White has a very good compensation for the pawn because c7 is very weak. B) 12...Bxg5 13.Nxg5 d6! is the only move for Black because Qh5 has to be answered by Bf5! 14.Nxh7 with a transposition to the game B. Dauth − J. C. Schroeder 1−0.]
[another very interesting variation (also played by myself) is: 12.g4!? d6 13.g5 Be5 *(13...Bf5 14.gxf6 Bxe4 15.Nd2±)* 14.Nxe5 dxe5 15.Rxe5 Ng6 Now White's king is a bit 'open', but with the pair of bishops it is not

really a problem. White has a clear plan using the a1−h8 diagonal to create a battery against Black's king. 16.Re1

A) maybe the best Black can play is 16...Re8 17.Rxe8+ Qxe8 18.Qe2 with the idea to exchange queens and play on with the pair of bishops Qxe2 *(18...Qf8 19.Bd2 Bd7 20.Re1 Re8 21.Qd1 Rxe1+ 22.Qxe1 Qd6 23.Qe4±)* 19.Bxe2± c7 is very weak.;

12...cxd6 13.Qxd6 Nf5 14.Qd5 d6

[Now Black can draw the game by repeating moves: 14...Ne7 15.Qd6 Nf5=]

Now better would have been **15.Bg5!** for example **15...Bd7**

[15...Bxg5? 16.Nxg5+− White often threatens to play Qxf7+! followed by Re8 mate. Ne7 *(16...Qxg5 17.Qxf7+ Rxf7 18.Re8#; 16...Be6 17.Nxe6 fxe6 18.Rxe6 Kh8 19.Bd3+−)* 17.Nxf7 Nxd5 18.Nxd8 Rxd8 19.Bxd5+ Kh8 20.Re7+−]

16.Bxf6 Qxf6 17.Qxb7± and White has the better pawn structure. Of course there were also other moves for Black, but he is badly developed and under pressure, so it is not easy to defend against White's active play.

11...Nd4 12.Kd1?! This is not a very good square for the king!
[12.0−0! 0−0 again transposes to the Naiditsch game. *(12...Nxc2 13.Nxf7!)*]
12...Rb8 13.Qa6 0−0 Black threatens ... [16...h5!? is possible, menacing ... Ng4, but simply]
[16...Bd6 keeps all the advantages of the position.]
17.Rxe5 Bxc3 18.bxc3? White has a difficult choice, and it was far from evident that this loses.
[18.dxc3! opens the d−file against the king, still, following Nb3 19.axb3 Qd6+ regains some material, although after 20.Ke2 Qxe5+ 21.Be3 White is doing quite well.]
[18.Qxc3? is worse: Qxg2! 19.Qxd4 Ng4 with strong threats.]
18...Nxc2!! Luring the white king to the wrong side of the pawns! **19.Kxc2 Qa4+** A king hunt! **20.Kd3 h6 21.Ne4**
[21.Nf3 Ng4 attacks f2 and e5, 22.Qg3 Nxe5+ 23.Nxe5 Rfe8 24.Ke3 f6 25.f4 Qc4! and Black should win.]
[21.Ke2 is met by Rfe8! *(21...hxg5 22.d4)* 22.Nxf7!? Kxf7 23.Re3 Qc4+ and Black's attack more than compensates the 3 pawns.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Nbd2 a6 7.Bb3 Ba7 8.h3 For some reason I thought that this moves order is inaccurate. So during the game I decided to exploit it by playing
[8.Nf1 is the main alternative.]
8...Nh5!?N [Δ ♘f4] The idea behind the move is very simple. Black wants either to bring his knight to f4 or to force weakening of the kingside g3, which would make castling more difficult.
[Usually Black chooses between 8... Ne7 and 8...0−0. Here are two recent examples: 8...Ne7 9.Nf1 Ng6 10.Ng3 0−0 11.0−0 Be6 12.d4 Re8 13.dxe5 Nxe5 14.Nxe5 Bxb3 15.Qxb3 Rxe5 16.Qxb7 Bb6 17.Qc6 Qe8 18.Qxe8+ Raxe8∓ ½−½ Rodriguez,A−Sasikiran,K/Calvia ESP 2004/The Week in Chess 519 (23). (23)]
[8...0−0 Ü 90/284 9.Nf1 d5 10.Qe2 dxe4 11.dxe4 Qe7 12.Ng3 Be6 13.Bc2 Rfe8 14.Nh4 Qf8 15.Nhf5 Ne7 16.Bg5 Bxf5? 17.exf5 Ned5 18.0−0−0± 1−0 Tiviakov,S−Sargissian, G/Tripoli LBA 2004/CBM102[Lukacs]]
9.Nf1 Nf4 10.Bxf4 exf4 [⩱f1] Black gives up the centre, but obtains an advantage of a bishop pair. Moreover the white knight on f1 is misplaced and has to return to d2. I though that this would be a sufficient ground to consider my idea playable. **11.N1d2 Qf6 12.d4 0−0 13.0−0 Bd7** I wanted ny queen rook on e8 as the other rook may be useful on f8, for example preparing f5. **14.Ne1** Preparing regrouping of pieces. The knight goes to d3 and the queen to either f3 or h5. **14...Rae8 15.Nd3?!** This allows Black to equalize, if he wants.
[15.Qh5!? was interesting preventing Qh6.]
[Another idea which I was considering during the game is 15.Qf3 Qh4!? Preparing a double sacrifice. 16.Nd3 Bxd4! 17.cxd4 *(17.Qxf4 Bf6!)* 17...Nxd4 18.Qd1 Bxh3! 19.gxh3 Qxh3 20.Nxf4 Qh6∞ with a complicated endgame.]
15...Qh6 Preparing an offensive on the kingside.
[I thought that it's too difficult to win a position which would arise after 15...f3!? 16.Qxf3 Qxf3 17.Nxf3 Rxe4= and so played differently.]
16.Re1

[16.Qf3 g5]
16...Kh8 17.Qf3 g5
[17...f5? is wrong in view of 18.Qxf4 Qxf4 19.Nxf4 fxe4 20.Nd5 and Black loses a pawn.]
18.e5 dxe5 19.d5? White has completely missed my idea.
[19.Nxe5 was necessary and after Nxe5 20.dxe5 Bc6 21.Qg4 *(21.Bd5 Bxd5 22.Qxd5 Rd8 23.Qxb7 Bxf2+!→* is dangerous for White. *)* 21...Qg6 22.Nf3= and White doesn't run risks.]
19...f5! A very strong move, which puts White on the edge. There are too many black pawns on the kingside! **20.dxc6 Bxc6 21.Qd1 e4 22.Nc4**
[22.Nb4 e3! 23.Re2 f3!−+ is also hopeless for White.]
22...Qh4! The pawns are stronger than pieces!
[22...exd3!?−+ was also enough for a decisive advantage, but I want more!]
23.Nce5 f3!? With a very unpleasant threat of Qg3, which White suddenly misses.
[Probably now 23...exd3! was objectively better. Δ24.Nxd3 Qg3−+]
24.Nxc6? loses at once.
[However even after the best 24.Kh2 Bxf2! 25.Nxf2 Qxf2 26.Nxf3 exf3−+ White is completely lost.]
24...Qg3! Now White can't avoid mate in a few moves and so he resigned. Philidor would be happy to see the march of the black pawns!

[10...d5 is a more popular alternative.]
11.Qxb4+ Qe7 12.Qxe7+ Kxe7 13.0−0 Nf6!? Black's idea here is to protect the c7−pawn by means of Kd8.
[Usually Black plays 13...Re8 Play may continue 14.Re1 Kf8 15.Na3 Nf6 16.Nb5 Rxe1+ 17.Rxe1 Nd5 18.Rc1 c6 19.Nd6 Ke7 20.Nf5+ Kf6 with equal chances. Smerdon, D (2519)−Smith, A (2481)/ Vaxjo 2014.]
14.Nc3 d6 15.Rfe1+ Kd8
[15...Kd7!? deserves attention with the idea to develop the light−squared bishop along the a6−c8 diagonal.]
16.h3
[Once I faced 16.d5 See Axelrod, A (2338)−Mikhalevski, V (2595)/Herzliya 2014/ [Mikhalevski, V].]
16...a5 Preparing to take some space on the queenside, while the a−rook may enter the game from the a−file.
[16...b6!? makes sense, with the idea to meet 17.Ng5 with Kd7 18.Nge4 Nxe4 19.Rxe4 Bb7 with roughly equal chances. However, then it would be more accurate to start with 15...Kd7.]
[In the only preceding game Black played 16...Bf5 17.d5 Bg6 18.Ng5 Kd7 19.Ne6 Rhg8 20.Rad1 Now Black's play in Colin, V (2382) − Maiorov, N (2573)/Avoine FRA 2015 can be improved by means of Rae8 preparing 21...Bf7. 21.Nb5 Nxd5 22.Rxd5 Rxe6 23.Rxe6 Kxe6 24.Nxc7+ Kd7 25.Nb5 Kc6 26.Nc3 Re8= with equal chances.]
17.Ng5 Rf8 18.Rad1 h6 19.Ne6+ This move only helps Black, who had to solve the problem of his light−squared bishop.
[19.Nf3 Bd7 20.d5 Re8= would be equal.]
19...Bxe6 20.Rxe6 Kd7 21.Rde1 Rf7 I wanted to refrain from exchanges to retain some winning chances.
[21...Rae8!? 22.Rxe8 Nxe8 is also fine for Black.]
22.f4
[22.g3!? deserved attention.]
22...h5 23.g3 a4 This way Black is obtaining the a5−square for his rook and takes more space on the queenside.
24.R6e2 Ra5 25.h4 I don't like this move as it weakens the g4−square and takes away the option of g4, even though computer considers it to be reasonable. **25...Ra6!?** A waiting move. I hoped my opponent would make additional concessions. **26.a3** This move wasn't necessary either, as it weakens the b3−square. **26...Ra5 27.Kf2 Nd5!** The only chance to try and make some progress. **28.Ne4?!**
[White should have activated his rook in order to create counterplay. 28.Re8! Nxc3 29.bxc3 Rb5 30.Ra8 Rb3 31.Rxa4 Rxc3 32.Ra5=]
28...Rb5!?
[After 28...Re7! White also starts running into problems, as Black wants to improve his position by means of ...

Rb5−b3 without allowing any counterplay along the e−file.]

29.Ng5 Rf6 It's useful to repeat the position, especially if you're short on time.

[In case of 29...Re7 White can play 30.Ne6= That's why 28...Re7 was stronger and allowed Black to trade a pair of rooks before playing ...Rb5.]

30.Ne4 Rf7 31.Ng5 Rf5!∓ It's clear that Black should play on. White's weaknesses on b2, g3 and g4 yield Black the upper hand. **32.Ne4 Rb3! 33.Rc1 g6**

[I could have also started with 33...Rd3 34.Ng5 g6 *(34...Rxd4?* is wrong due to *35.Ne6 Rd3 36.Nxg7 Rf7 37.Nxh5)* 35.Ne6 b5∓]

34.Rcc2 b6 With the last two moves Black underlines White's helplessness.

35.Rc1 Rd3! 36.Rd2 Rxd2+ 37.Nxd2 Nf6 Taking away the e4−square from White's knight.

[37...Ne7!? 38.Ne4 Rb5 39.Rc2 Nf5 might have been even stronger.]

38.Ke3 Rb5 39.Rc2 c5!? This way Black is creating passed pawns in the centre.

[39...Ng4+!? transferring the knight to f5 was also strong. 40.Kd3 Nh6∓]

40.dxc5 bxc5 41.Kd3 d5 Black has made considerable progress in the last twenty moves and White is virtually doomed. **42.Kc3 Kd6**

[The immediate 42...Ng4!? 43.Rc1 Ne3 44.Kd3 d4 45.Rb1 Ke6−+ is also winning for Black.]

43.Rc1 Ng4!?

[or 43...d4+ 44.Kc2 Ng4−+]

44.Re1 Ne3! 45.Kd3 d4−+ White's position collapses and so he resigned.

[45...d4−+ The rook endgame after 46.Nc4+ Nxc4 47.Kxc4 Rxb2 48.Re8 Rc2+ 49.Kb5 Rc3 is hopeless for White as Black can easily advance his central pawns. This game once again proved that 10...Kf8 is a reasonable alternative to 10...d5.]

[7.Bb5 Now this move is not as strong as before because Black is in time to play 7... Bg4 with a good game. Bg4! 8.h3 This is not White's only move. I gave this game as a historical example. 7...Nxd6 8.Bd5 Nf5 This a critical move of course. Black wants to provoke White into playing g4. For players who want to play less complicated middlegames, I advise them to play 8...Be7, accepting a

bad structure compensated by the pair of bishops. The theory of this move is not very developed as yet and 8...Be7 might be as good as 8...Nf5. I will just give one game as an example:

[8...Be7 9.Bxc6+ bxc6 10.Nxd4 Bb7! 11.Nb3 0−0 12.Nc5 *(12.Nc3 Re8 13.Qg4 Bf6∞)* 12...Bc8 13.Qf3 White's success will be short and Black will soon have excellent compensation for the pawn. 9.Re1+ Be7 10.Bxc6+ bxc6 11.g4 Nh6!? This is a very interesting move. It has the advantage of attacking g4 twice. Black is not afraid of Bxh6 because in principle Black can easily exploit the open g−file when the white pawn is on g4.

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.0−0 Nxe4 6.Re1 d5 7.Bxd5 Qxd5 This line doesn't give Black any theoretical problems. Nevertheless, it is a very solid line and if White wants to make a draw it isn't so easy for Black to create complications. **8.Nc3 Qh5** This line is recommended by Nigel Davies and it is no worse than 8..Qa5 **9.Nxe4 Be6 10.Bg5 Bd6!?** This move is safe and it sets a positional trap if White is tempted to play 11 Bf6 as we shall see later.

[10...Bb4!?

A) 11.c3 dxc3 12.bxc3 Ba5 Is a risky line because the black queen is in danger. Black has to analyse this position deeply. 13.Qd2 *(13.Rb1 Rb8)*;

Romantic chess ! Still with the new technologies, some players cannot forget the emotions provided by piece sacrifices, aimed to attack the rival. In the game we are going to see, which we could name "Inmortal game of the pawns" (of course, I am being a bit exagerated), White sacrifices first a piece by three pawns, and then a bishop by two soldiers. The game is complex, and the first player emerged victorious, a deserved win thanks to their originality.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5! 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3!? This is an interesting sideline, as White develops the queen winning a tempo by both pinning and attacking c6. **8...Rb8!** A nice and active answer. Black should not hesitate in such positions, but instead go for active play. **9.Bxc6+?!** White will soon realise that being materialistic here is not a good choice .
[9.Bd3! is the right move.]
9...Nxc6 10.Qxc6+ Nd7!
My suggestion is that Black should think not about one or two pawns in such positions, but in terms of development and (mainly) piece mobility (like AlphaZero!). White has won a second pawn, but in doing so he gave up the bishop pair and helped Black to solve a potential problem (the ♘a5). On the other hand, by covering the check with the knight Black hits the ♘g5, and the queen can be harassed with moves like ,, ,♖b6 and ...♗b7. Black is two moves away from completing development, when he will be ready to look for active ideas like advancing the f−pawn. Although White is two pawns up, it looks like he acquired too many practical problems in return, and surviving the middlegame already seems a very difficult task. **11.d3**
[Both retreats of the knight still give Black a pleasant initiative: 11.Nf3 Rb6 12.Qe4 Bb7 13.Qe2 Rg6! 14.d4!? *(14.0−0?* falls for the nice tactical idea *Rxg2+! 15.Kxg2 Qg5+ 16.Kh1 Qg4−+)* 14...Bd6 15.dxe5 Nxe5 16.Bf4 Qa5+! 17.Nbd2 Re6→]
[11.Ne4 Rb6 12.Qc3 Bb4 13.Qg3 0−0→]
11...Be7 12.Nf3
[12.Ne4 was played in some games, but I still prefer Black's position. Rb6 13.Qa4 0−0 14.Nbc3 f5 15.Nd2 Bb7 16.Nc4 Re6! *(16...Rg6 17.Nxe5! Nxe5? 18.Qb3+±)* 17.Rg1?! Nc5 18.Qa5 Qd7−+]

12...Rb6 A natural move and also one that you always want to play in such positions.

[But 12...0−0 was possibly more precise, as if 13.Qe4 Black can immediately launch a strong initiative in the centre: f5 14.Qe2 e4! 15.dxe4 fxe4 16.Nfd2 *(16.Qxe4? Bb4+ 17.Kf1 Ne5!−+)* 16...e3!! 17.Qxe3 *(17.fxe3 Ne5→)* 17...Bc5 18.Qe6+ Kh8 19.0−0 Rb6↑ Although White is 3(!) pawns up, he has almost no pieces developed and faces big problems already; this line is a good example of how active play is far more important than material in such positions.]

13.Qe4 Bb7 14.Qe2 Rg6! This rook is very annoying. **15.Rg1?** The problem is that after this move White can hardly find a good place for his king.

[15.0−0 looks risky: 0−0 16.Nbd2 f5! 17.Re1 Qc7 18.c3 Bf6 Black has no reason to hurry, he can simply improve his position and wait for the right moment. 19.Nf1 Ba6! 20.Qd1 f4! This advance restricts White's pieces very well, and if White loses patience, for example 21.d4?! Bb7!→ just increases the pressure on White's camp]

[The engine indicates 15.Be3! trying to solve the problem of the king as soon as possible. f5!? Avoiding ♘bd2. *(15...Rxg2 16.Nbd2∞)* 16.Nc3 Qa8! 17.0−0−0! Rxg2
White's position seems very unpleasant, but he can complicate matters by playing actively: 18.Nxe5! Nxe5 19.Bc5! Ng6□ 20.Bxe7 Nxe7 21.Rhe1 Qd8 22.d4 Be4!
The position remains complicated, and the computer ends with the typical computer draw :) 23.Nxe4 fxe4 24.Qxe4 Rxf2 25.Qc6+ Qd7 26.Qa8+ Qd8 27.Qc6+=]

15...Qa8! The pressure on White's camp is very unpleasant now. **16.Nbd2 0−0 17.c3?!** It is not easy to suggest how White should play, but this move normally creates new targets for Black.

[17.h4!? looks like a desperate attempt already: f5 18.h5 Rc6 19.Nc4 Bf6∓]

17...Nc5! Howell immediately spots the new weakness.

[Mikhalevski,Victor]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0–0 Nf6 5.d3 0–0 6.a4 a5 7.Bg5
[Earlier we only considered 7.c3 Nepomniachtchi,I (2767)–Aronian,L (2785) Doha QAT 2016 [Mikhalevski, V]]
7...d6 This move is new for this exact position, but it will soon lead to a transposition.
[Aronian prefers 7...h6 8.Bh4 Be7 Caruana,F (2808)–Aronian,L (2793) Stavanger 2017]
8.c3 This position has been seen many times with c2–c3 played at an earlier stage of the game.
[In case of 8.Nc3 Black can choose between h6 *(*and *8...Nb4!?)* 9.Bh4 Nd4=]
8...Be6 A very rare continuation, which has the purpose of eliminating the strong like–squared bishop.
[8...h6 is the main line with the idea to answer 9.Bh4 with g5 10.Bg3 Kg7 11.Re1 g4! 12.Bh4! Ne7! 13.Bxf6+ Kxf6 14.d4 Bb6 15.Nh4?! *(15.Nfd2* was necessary. *)* 15...Kg7 and Black was better in Hou,Y (2652)–Ding,L (2773) Moscow 2017]
9.Nbd2 White finishes his development and supports the bishop on c4.
[9.Bb5 is another typical reaction.]
9...Ba7 The second new move in this game. My idea was to remove the bishop from c5 in order to avoid d3–d4 with tempo, especially after my c6–knight will be on his way to g6.
[In the only GM game which reached this position Black played 9...Kh8 10.Qb3 Qd7 11.Rfe1 Poetsch,H (2408)–Graf,A (2621) Leinzell 2011 and now Black should have played Nh5]
[9...h6!? 10.Bh4 g5 11.Bg3 Ba7! deserved attention.]
10.Re1
[After 10.Bxe6 fxe6 11.Qb3 Black protects both e6 and b7 by means of Qe8 *(11...Qd7!?)* when the b7–pawn is untouchable. 12.Qxb7?? runs into Bb6!–+]
10...Re8 My idea was to wait with 10...h6, as I had in mind the idea of ...Nc6–e7–g6. It would be less appropriate with the h–pawn on h6 due to Bxf6.
[Nevertheless, the idea of 10...h6 11.Bh4 Qe7 makes sense.]
11.Bh4!± White provokes 11... h6.
11...Ne7?! I knew this idea from the Four Knights Opening and decided to test it here. **12.Bxf6**
[12.Bxe6! fxe6 13.d4! was the way to set problems. For example, Ng6 14.Bg3 exd4 15.cxd4 d5± with better chances for White thanks to his better pawn structure.]
12...gxf6 13.d4 Ng6 Here I was more or less happy with my position, but in

fact, White is still better. **14.Qb3!?** An annoying attack on b7. **14...Qc8** The reasoning behind placing my queen on c8 was to avoid an x−ray on the d−file, but the position of the queen on c8 was too ugly.

[14...Qd7!? 15.Rad1 Rab8 was more to the point and allowed Black to fight for equality.]

15.Nf1 A standard transfer of the knight.

[15.Rad1!? is a logical alternative.]

15...Kh8!? A useful move, which removes the king from the a2−g8 diagonal and vacates the g8−square for the e8−rook. **16.Ne3** The best square for the knight as it controls both the d5 and f5 squares. **16...Rg8** It looked logical to me to use the g−file.

17.Bxe6?! This exchange was unnecessary, as it allows Black to cover both f5 and d5.

[Both prophylactic moves 17.g3!?]

[and 17.Kh1!? deserved attention.]

17...fxe6 18.Rad1 Here I spent a lot of time and came with an original, but objectively dubious idea. **18...Bb8?!** The exclamation mark is mostly for the idea. I decided to bring the rook from a8 via a6. Curiously, this rook will soon decide the game in Black's favour.

[Nevertheless, 18...Qd7! 19.g3 c6= with the idea of 20...d5 was better.]

19.g3 Ra6 A continuation of the same plan.

[19...Ba7! trying to come back to the correct plan was better, although inconsistent.]

20.Kh1± Objectively, White is already clearly better. **20...Ba7** The point of this regrouping was to improve the position of my a8−rook. **21.Qb5! Rb6!** A clever idea, which has worked out, surprisingly. **22.Qxa5?** The first real mistake from my opponent in this game.

[22.Qe2 Qe8⩲]

22...Ne7! The point of the previous move. Now the bishop on a7 turns out to be invulnerable, while White's queen is misplaced and is in some danger. **23.c4** This way White opens his queen's cage.

[After 23.d5 Ra6! 24.Qb5 Bxe3 25.fxe3 exd5 26.exd5 Qh3 Black develops a serious initiative.]

[Obviously, 23.Qxa7?? would run into Ra6!∓ (but not *23...Nc6? 24.Qxb6 cxb6 25.d5±* with a slight edge for White.)]

23...Rxb2! The rook has already made a good career, but look where it will be in a few moves. **24.dxe5?** The decisive mistake in time trouble, probably connected to a miscalculation.

[24.Rf1! was necessary, when after Ra2!? 25.Qb5 Qe8= the chances are roughly equal.]

[This time 24.Qxa7?? fails to Nc6!−+ and the queen is trapped.]

24...Nc6!

[White was counting on 24...fxe5? 25.Nxe5! Rxf2 *(25...dxe5?? 26.Qxe5+* wins the rook on b2.) 26.Qxa7 b6!! This way Black prevents the escape of the queen by the a7−g1 diagonal. *(26...dxe5? 27.Qc5±* is bad for Black.) 27.Rxd6! The only way to stay in the game. cxd6 28.Qxe7 dxe5 29.Nf5!! Qd8! (It turns out that the knight is untouchable. *29...exf5? 30.Qf6+ Rg7 31.Rd1!+−*) 30.Qxe6 Rg6 31.Qd5!?= with a roughly equal endgame. *(31.Qxe5+!? Qf6 32.Qxf6+ Rxf6 33.g4=)*]

25.Qc3 Rxf2∓ 26.exd6?

[After 26.Rf1 Rxf1+ 27.Nxf1 fxe5∓ White is a pawn down in a worse position, but the text loses instantly.]
[It's important that after 26.exf6 Rxf3 27.f7+ Rg7 28.Rf1 Rxf1+ 29.Rxf1 Qf8 the f7−pawn doesn't present a big danger.]

26...Rxf3 27.d7 Qf8!

[27...Qd8!? is good enough, even though it allows 28.c5 , but then Rg7−+ and Black wins. 7.Bg5 is an interesting line, which has to be treated with care. I think Black should prefer 7...h6 or 8... h6.]

White's only success with this special move order would be that he will have avoided the continuation from the game über Zugumstellung zur Variante 15.♕c1 führen würde. Reflecting on Carlsen's win against Harikrishna (given below), one can quickly see the positional similarities between the type of position White got in that game and the one which we are about to play through. **1.e4 e5 2.d4**

2...exd4 3.Nf3 Nc6 4.Bc4 Nf6 5.e5!
I give this an exclamation mark for practical reasons; it is a good over the board bet. Sveshnikov has been the main proponent at GM level in recent years, but various masters use 5.e5 to good effect and Black's doesn't find it that easy to equalize; at least not as easy as the books suggest. **5...d5**
[Both 5...Ng4]
[and 5...Ne4 must be given careful consideration if White wishes to use this line on a regular basis. 5...♘g4 is particularly stubborn.]
6.Bb5 Ne4 7.Nxd4 Bc5
[7...Bd7 is a less aggressive choice, but can lead to a very similar position after 8.Bxc6 bxc6 9.0−0 when Black chooses between 9...♗c5, 9...♗e7 or 9...c5]
8.Be3 Taking on c6 has been found to be far too risky and so you could say the main point of 7...Bc5 has been to force White to put his Bishop on e3. White doesn't mind though, he welcomes the exchange of dark−squared Bishops if it can be arranged. **8...Bd7 9.Bxc6 bxc6 10.0−0 0−0 11.f3** White has two key advantages which help him (her) to choose the right continuation. a) The kingside and central pawn majority is very useful. The f−pawn can be advanced as a battering ram against Black's king and endgames are favourable, as long as White's e pawn does not become isolated and weak. Black can attack the f−pawn with a well−timed ...f7−f6. b) White has the easy plan of trying to dominate the squares d4 and c5. Black must contest this idea and he does not really want the dark−squared bishops exchanged for this reason. Black meanwhile has two bishops and must try to get rid of the pawn on e5 at the earliest opportuntiy.

11...Ng5 12.f4 Ne4 13.Nd2 Exchanges favour White, thanks to his better pawn structure. **13...Nxd2**

[13...f5 definitely comes into consideration, but then 14.c4! seems a bit better for White: Nxd2 *(14...Qe7 15.Nxe4 fxe4 16.Rc1±; 14...Bb6 15.Nxe4 fxe4 16.b4! dxc4 17.Qc1!±)* 15.Qxd2 dxc4 16.Qc2! Bxd4 17.Qxc4+ Kh8 18.Qxd4+−]

14.Qxd2 f6 15.Nb3 Nice timing and another typical move in this type of position. Rather meekly, Black now exchanges, playing right into White's hands. **15...Bxe3+?**

[15...Bb6 was surely better, but Black is uncomfortable after 16.Bc5! fxe5 *(16...Qe7!? 17.Qe3)* 17.fxe5 Qe7 18.Qe3 Rae8 19.Rxf8+ Rxf8 20.Re1±]

16.Qxe3 Qe7 17.Rae1 fxe5 18.fxe5 Rxf1+ 19.Rxf1± This is what I meant in my opening remarks by a 'good practical bet'. White has managed to combine the two main plans of the variation and now not only has absolute control of d4 and c5, but also a strong well−protected e5− pawn, which Black does not have the remaining resources to destroy. It is all downhill for Black from here. **19...Re8**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 A good old classical line that So analyzed extensively for an online course. **5...exd4 6.e5 d5 7.Bb5 Ne4 8.cxd4 Bb6 9.Nc3 0−0 10.Be3 Bg4** The pawn structure now is very much alike the one in the Yates line of the Ruy Lopez. White has a strong center but Black's free piece play allows him a chance to eventually attack and destroy the center. **11.h3 Bh5 12.Qc2 Bg6**
[Last year Carlsen had another discussion with a top player: 12...Nxc3 13.bxc3 f6 14.Bxc6 bxc6 15.exf6 Bxf3 16.fxg7 Rf7 17.gxf3 Qd6 18.Rg1 c5 19.Rg5 cxd4 20.cxd4 Rxg7 21.Rxg7+ Kxg7 22.Ke2 Qg6 White is up a pawn, but has too many weaknesses which makes the position balanced, Giri,A (2764)−Carlsen,M (2862) Online 2020]
13.Qb3 The attack against the d5 point

helps So relieve the pressure against his d4 pawn. **13...Ne7 14.0−0 c6 15.Bd3!** The bishop belongs to this diagonal. **15...Nf5 16.Qc2** There it is, the pressure along the b1−h7 diagonal. It forces Carlsen to swap a few pieces. An earlier game saw White doing well after **16...Nxe3**

[16...Nxc3N 17.bxc3 Nxe3 18.fxe3 Bxd3 19.Qxd3 The center survived, and is ready to get into motion. Therefore: f6 is forced, but then 20.c4 Bc7 And Black errs! *(*The correct way to play it was connected with *20...fxe5 21.Nxe5 Qd6* when White still has some pressure, but since the pawns are not moving that easily Black should be able equalizing little by little. *)* 21.cxd5 Qxd5 *(21...cxd5 22.Qb3* is awful for Black. *)* 22.exf6

A) After 22...Rxf6 23.e4! Qd7 24.e5 Re6 25.Qb3 White is in control as long as he does not rush: Rae8 26.Rad1! Overprotecting the center. *(*Definitely not *26.Ng5?? Qxd4+ 27.Kh1 Qxe5)* 26...Qd5 27.Qxd5 cxd5 28.Rb1;

B) 22...gxf6 As ugly as this move is, it was played. Carlsen admitted in the after−match interview that he had miscalculated earlier and thought that this was the only way he may get some play. 23.e4 Qd7 24.Rad1! Believe it or not, but So had this position in his online course! Apparently Carlsen had not checked it, as he probably believed that the course was designed only for a lower−rated audience. A wonderful example of a scrupulous, earnest work done for the people that can be used by yourself, as an example! Rad8 25.Nh4

With the knight coming to f5 White is strategically winning. Kh8 26.Nf5 c5 The only chance to get some counterplay, but White keeps everything stable. 27.d5 Be5 28.Rb1 b6 29.Qc4 Rfe8 30.Kh1 Sheer beauty! Every single white unit has been placed on a light square! Which does not prevent him to attack on the dark squares, it just makes his pieces invincible. Bd4 Carlsen tries his last chance. Had he had stayed, then So would have most likely created another weakness on b6 by advancing the a−pawn. With the kingside in ruins Black would not be able to stop the combined attack on both wings. 31.Rf4 Rxe4 32.Rxe4 Qxf5 33.Rbe1

B1) 33...Qxd5? was also losing immediately after 34.Re8+ Kg7 35.R1e7+ Kg6 36.Qd3+ f5 37.Qg3+;

B2) 33...Be5! was the only way to play it. Of course, Black should not survive here either, say: 34.Rf1 *(*Or even easier as in the general plan: *34.a4!?)* 34...Qg6 35.Rg4 Qf7 36.Rd1 Bd4 37.Re4! followed by Re4−e6 as: Qxd5 loses once more due to *(*Whereas *37...Be5 38.a4* does not change anything. *)* 38.Re8+ Kg7 39.Re7+ Kf8 40.Qxd5 Rxd5 41.Rxa7;

B3) 33...Rxd5 A blunder that finishes the game at once. 34.Rg4! Now it is a forced mate. *(*Perhaps the world champion only saw: *34.Re8+ Kg7*

35.R1e7+ Kh6 36.Qc1+ Qg5 when the game continues in full speed. *)* 34...h5 35.Re8+ Kh7 36.Re7+ Kh8 37.Qc1!

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.h3 Here I decided to surprise my young opponent and experimented with **6...a5** An extremely rare move, which has only been tested twice. The idea behind it is to create an escape square for the dark−squared bishop and fight for space on the queenside.

8.d4
[White could continue with 8.Re1 , which would transpose to well−known positions after d6 See the aforementioned game of Ding Liren.]

8...Bb6!
[In one game between unrated players Black played 8...exd4? , which is a mistake, as Black gives up the centre. 9.cxd4 Bb6 Vujic, A−Kovacevic,D Vukovar 2013 and now 10.d5± promised White a clear edge.]

9.dxe5
[9.Nxe5 Nxe5 10.dxe5 Nxe4 is fine for Black.]

9...Nxe4 10.Bf4?! A dubious move, which allows Black to solve his opening problems.
[10.Bd5! was critical. Then the game could continue Nc5 11.Bf4 Ne7 12.Bc4 Ne4! Preparing ...d5. 13.Bd3 d5 14.exd6 Nxd6 15.Qc2± with some pressure.]

10...d6= 11.Qe2? This is already a mistake.
[It was necessary to play 11.exd6 Qf6 12.Bh2 Nxd6 13.Bd3 a4 with equal chances.]

11...dxe5 A slight inaccuracy.
[I could set even more problems had I played 11...Bf5! For example, 12.exd6 Qf6! A difficult move.

13.Nbd2 *(13.dxc7 Rae8!∓* and suddenly White experiences problems with his queen. *)* 13...Nxd6∓ and next Black can exploit the unfortunate position of the white queen on the e−file by means of ... Rfe8.]

12.Qxe4 exf4 13.Qxf4 g5! A strong move, which underlines the unfortunate position of the white queen. **14.Qe4?** A bad square for the queen. The one−move threat of 15.Qg6 can easily be met.

[14.Qh2 would be better, although Black retains the better chances with the help of Bc5!∓ and the bishop will be transferred to d6.]

14...Kg7! Hard to believe, but White already experiences serious problems.

15.Bd5? Another unfortunate move.

[15.Nbd2 loses a pawn after f5 16.Qc2 g4 17.Nd4 Nxd4 18.cxd4 Qxd4 , but it was the best practical chance.]

15...Ne7∓ This inaccuracy leaves some hopes for White.

17.Qe5+ f6 18.Qg3 Ng6! The knight is coming to f4, which is a really nice square for the knight and it also keeps the queen on g3 completely out of play.

13...Nxe2+ 14.Qxe2 Bg5! 15.c3 Bxc1 16.Raxc1 Qh4 The queen isn't doing much on h4 and so the text wasn't necessary.

[I had to choose between the modest 16...Re8!?=]

[or 16...Nf6!?=]

17.a5! I like this move. White takes space on the queenside and stops Black from playing ...a5. **17...Ng5** Since the d3−d4 advance can't be stopped from e6 the knight belongs on f6.

[That's why it would be better to play 17...Qe7!?= Admitting the inaccuracy of the last move and preparing 18... Nf6 was better.]

18.Qg4 White hopes to press in the endgame thanks to the d4 break, which can't be stopped.

20.f3 Nh7 I realised that the knight will be better placed on f6, where it covers an important invasion square on d7 after the likely d3−d4 with a possible dxe5 trade. **21.b4 Nf6 22.d4 Kf8** Despite White's spatial advantage it's difficult for him to make progress.

23.Red1 Rac8!? This way I'm preparing the ...d6−d5 advance, when after an exchange on d5, the rooks will be well−placed on the semi−open file.

42.Kh2

[42.Bc4!?= was also possible.]

42...Nh7!? I saw that my only hope to win this game was by activating my knight, which can potentially be stronger than the bishop. **43.Rd5!**

White provokes 43...f6. So, I won't be able to retreat my knight to that square.

43...f6 44.Rc6! Finally the rook can leave the a6−square without losing the a5−pawn. **44...Rxc6 45.Bxc6 Nf8**

Une confrontation un peu spéciale pour les blancs. En effet, face à eux, un de ces demi−dieux, un SIM ! Si les blancs ont pour le moment un score raisonnable face à ces titrés, ils n'ont jamais pu marquer le point entier... L'objectif de cette partie est donc parfaitement clair : le gain ! La seule question qui se pose est : comment ? **1.e4** Les blancs restent fidèles à ce coup de pion central. **1...e5** Réponse classique. Pas de Sicilienne, ni autre complexe Moderne/Pirc. **2.Nf3** Toujours classique, on s'oriente vers une Petrov ou bien, plus couramment, une Espagnole. **2...Nc6** Les noirs semblent proposer le deuxième choix. **3.Bc4!?** Chose que les blancs refusent immédiatement ! En effet, pourquoi donc jouer dans les variantes adverses ? Il est de la plus haute importance de jouer « à domicile », c'est−à−dire de sortir l'adversaire de sa préparation tout en restant soi−même dans ses analyses. Ceci, agrémenté d'un zeste de provocation et d'un soupçon d'agressivité, doit nous permettre de maintenir l'adversaire dans un état de déséquilibre permanent... là où la faute est possible. **3...Nf6** La redoutable Défense des Deux Cavaliers, complexe et extrêmement vivante. **4.Ng5!?** Une contination « musclée », provocatrice à souhait, mais excellente ! Par de purs moyens tactiques, les blancs font voler en éclats l'équilibre initial de la partie. Nous entrons dans une phase où la théorie des compensations sera reine. La rupture d'équilibre va être immédiate, les noirs vont devoir « lâcher » un pion... **4...d5** Il faut bien couper cette belle diagonale blanche.
[4...Bc5 introduit l'extraordinaire Attaque Traxler.]
5.exd5 Na5 La suite principale. À chaque coup, les noirs ont un choix difficile à effectuer. Si leur travail à la maison à été mal fait, ils vont devoir avaler pas mal de théorie en très peu de temps !
[5...b5 (Olav Ulvestad)]
[5...Nd4 (Aleksander Fritz)]
[5...Nxd5?! La suite la plus ancienne et sans doute la moins forte.]
6.Bb5+ L'échec perturbateur. **6...c6** La réponse conseillée par la théorie : un gambit ! Mais on peut se demander si c'était bien l'intention des noirs de jouer un gambit, quand ils ont entamé la partie. **7.dxc6 bxc6** Ce gambit est un

peu spécial, pas facile à négocier. Les compensations sont purement positionnelles. **8.Be2** Après l'opération commando commencée avec ♘g5, nous assistons à la phase de repli, elle sera suivie d'une phase de consolidation de la position, elle−même suivie de la phase ultime de la partie: la valorisation des avantages.

[8.Bf1? h6 9.Nh3 Bc5 10.d3 Qb6 11.Qe2 Bg4 12.f3 Bxh3 13.gxh3 0−0−0∓ , Steinitz − Chigorin, La Havane 1892.]

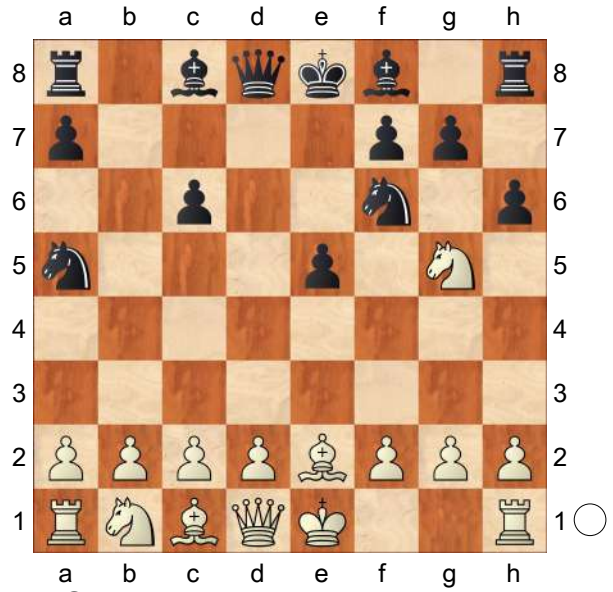
8...h6 Sinon le cavalier g5 disposera de la case e4.



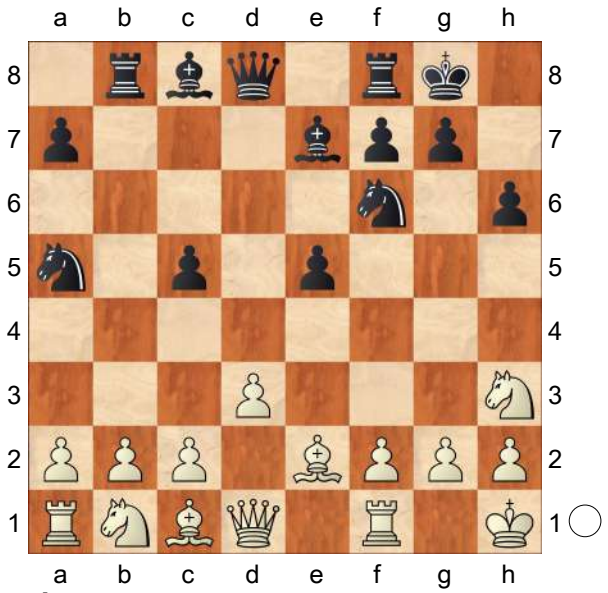
9.Nh3!? Toujours jouer dans ses variantes, et poser des problèmes aux noirs ! Commence maintenant un micro−conflit entre le fou c8 et le cavalier h3... Prendra ? Immédiatement ou plus tard ? Prendra pas ? **9...Be7!?** Ce coup mérite respect et explications. Le naturel ♗c5 gênerait le cavalier a5 qui ne pourrait plus bouger, sauf reculer en b7. Le rusé ♗d6, lui libèrerait le pion c, donc la case c6 pour le cheval, mais bloquerait la colonne d et affaiblirait le contrôle de d4. Reste ♗e7, bon, mais cependant quelque peu passif! Bref, un bel effort des noirs pour briser le leadership des blancs dans cette partie. Remarquez également comment les blancs et les noirs incluent la totalité de l'échiquier dans leurs raisonnements. **10.d3** Important, avant le futur roque, ce coup met pas mal de cases sous contrôle. **10...0−0** Les noirs n'osent pas prendre en h3.

[10...Qc7 11.0−0 Bxh3 12.gxh3 Rb8 13.Nc3 Nd7 14.Bf3± , Ribeiro − Lopez, Candas 1992.]

11.0−0 La poussée f2−f4 avant le roque n'est pas du goût des blancs qui respectent l'avance de développement des noirs. Ils choisissent une suite moins violente, beaucoup plus lent ... mais au contenu stratégique et positionnel extraordinairement complexe. **11...Rb8** Simple et bon, pression sur b2, mais le cavalier h3 est toujours vivant ! **12.Kh1!?** Toujours provocant... les blancs se hâtent avec lenteur. **12...c5** C'était la dernière chance de prendre en h3 ! Les noirs veulent recycler leur cavalier isolé à l'aile dame. Il va bientôt leur falloir établir un plan concret : où faire porter le poids de la bataille ?

(Diagram)

13.Ng1! Une superbe position !! Les blancs sont toujours dans leurs variantes ! J'y ai passé pas mal de temps... à la maison. La capacité de resistance de la position blanche ne doit pas être sous−



estimée.

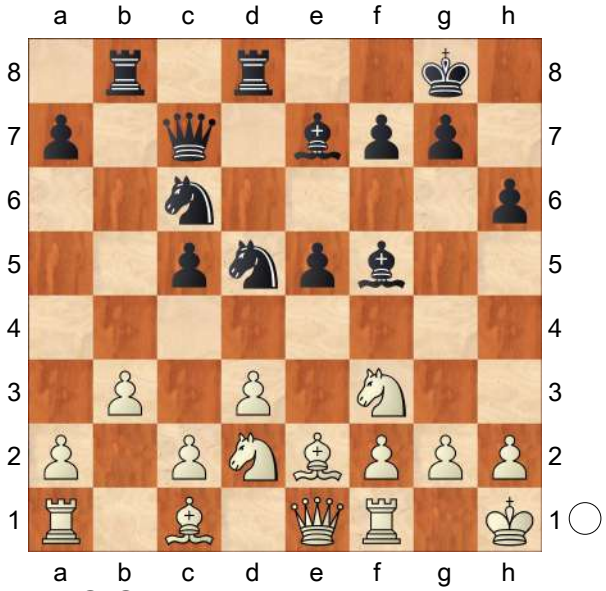
[13...Nc6 , Klaman − Faibisovich, Leningrad 1979, 14.f4!± (selon Joseph Palkövi).]

14.Nf3 Alors que les blancs, eux, en sont au commencement... **14...Rd8** Ouverture terminée pour les noirs ! **15.Qe1** Sort du clouage. Les blancs doivent s'attendre à une longue et lente partie. **15...Nc6** Enfin ce cheval retrouve une case active. Pour le pion de moins, les noirs ont une pression durable sur la position blanche, mais pour le moment peu de points d'attaque. **16.Nbd2** Un développement « rampant » visant c4 et e4. **16...Bf5** Les noirs semblent viser e4. Un autre plan consistait en l'avance des pions de l'aile roi. **17.b3** Nécessaire mais relâche un peu les cases noires.

17...Nd5 Centralisation...

[17...e4 18.dxe4 Nxe4 19.Bd3 Nxd2 20.Bxd2 Bxd3 21.cxd3 Rxd3 22.Qe2=]

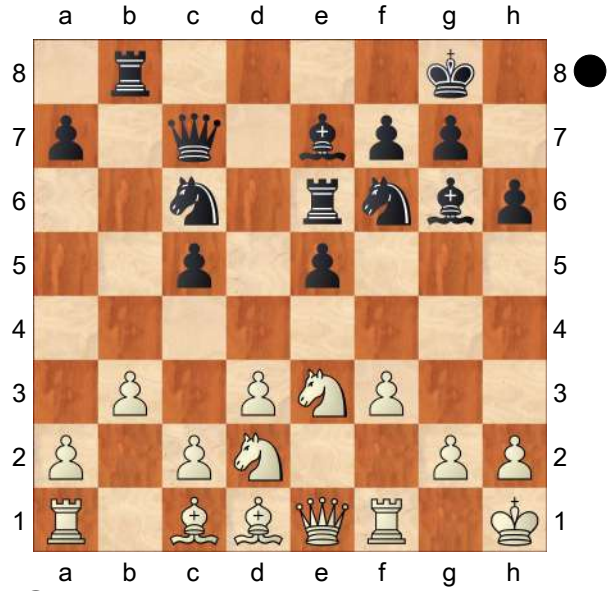


18.Bd1!? Cette position n'est pour le moment pas faite pour les fous. **18...Rd6** Attention... cela pourrait être le prélude à une avance côté roi! **19.Nc4** Force les événements, avec gain de temps. **19...Re6** Deuxième face−à−face tour/dame. **20.Nfd2** Encore et toujours le contrôle de e4. Le pion f est maintenant libre de ses mouvements. **20...Bg6** Une prévention contre ♘e3. Seule l'avance f5 est maintenant disponible pour les noirs.

[20...Bh7!?]

21.Ne3 Propose des échanges tout en fermant la colonne d. **21...Nf6** Que les noirs refusent. Mais maintenant plus d'avance de pions... et la tour e6 semble bien mal placée. **22.f3** Prend le contrôle de e4 et libère f2. Malgré leur faible espace disponible, les blancs essayent de tirer le maximum de la position. Nous sommes de plain−pied dans la phase de consolidation. Phase

délicate, car la pression adverse est terrible.



22...Qd7 Retour sur la colonne d et la case d4. Les noirs ont un peu de mal à définir une stratégie concrète. Où porter leurs efforts ? À l'aile dame ? Au centre ? À l'aile roi ? Et comment ?

[22...Nb4 23.Ndc4 Nfd5 24.a3 Nxe3 25.Nxe3 Nc6 26.Nd5 Qd6∓]

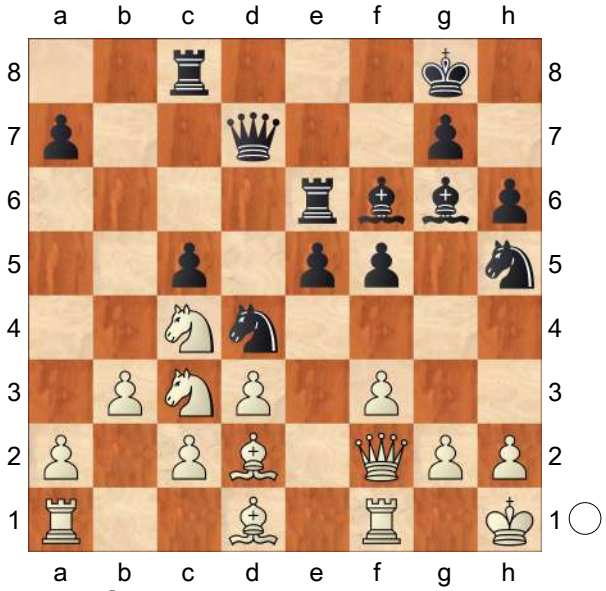
23.Ne4 Ces chevaux fournissent un travail remarquable. **23...Rc8** Un coup obscur... mettant c2 sous pression après un éventuel ♘d4. **24.Qf2** Les blancs reprennent leur développement, sortent du face−à−face tour/dame et défendent c2. **24...Nd4** Franchit le Rubicon. Les noirs ont choisi la voie centrale.

[24...Nd5 25.Nc4 Nd4 26.c3 Nc6 27.Bb2 f5 28.Nxc5±]

25.Bd2 Ce fou ne peut quitter la diagonale c1−h6 à cause de la faiblesse de f4. **25...Nh5** Direction f4 ou avance f7−f5 ? **26.Nc4** Superbe la cavalerie ! **26...f5** Enfin une avance côté roi.La position blanche semble critique. **27.Nc3 Bf6** Attention, regardez bien comment ce fou va se transformer en gros pion. Autre concéquence de ce coup, le cavalier h5 devra aller en f4.



28.Rc1 Il faut bien sortir du regard percant du fou f6. Les blancs ont presque terminé leur développement. **28...Nf4** C'était facile à deviner, non ? **29.g3** Repousse l'intrus. **29...Nd5** **30.Nxd5** Enfin un échange, mais la position reste immensément complexe. **30...Qxd5 31.c3!** Repousse définitivement l'ennemi. La faiblesse de d3 n'a aucune importance. La phase de consolidation est maintenant terminée. Les blancs veulent valoriser les avantages (majorité de pions à l'aile dame, paire de fous)... même en lâchant le pion d3 si c'est nécessaire. Ils ajouteront alors la colonne d à la liste des acquis ! **31...Nb5**

(Diagram)

32.b4! Enfin un plan actif ! La position s'ouvre enfin pour la paire de fous. Les noirs vont regretter de ne pas avoir

avancé à l'aile roi. **32...cxb4 33.cxb4±** Les blancs sortent la tête haute des complications et de cette interminable phase de consolidation. La paire de fous va se déchaîner. **33...Qd8** Hé, hé... la faiblesse de la huitième rangée va se payer cash. Nouveau coup d'œil sur le Gambit Evans **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** Diese romantische Attacke wurde oft im neunzehnten Jahrhundert als Evans Gambit gespielt. Kasparov Erfahrungen mit diesem Schachzug in den späten zwanzigern brachte ihm einen zweiten Wind. **4...Bxb4 5.c3 Ba5**

6.d4 Schwarz muß sich jetzt mit einer "schrecklichen" Entscheidung konfrontieren! Die Variante 6. ♕b3 wurde in CDE/592 entwickelt. **6...exd4**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Schon seit einigen Jahren wende ich diesen guten alten Zug an. Sehr häufig stellt er eine echte Überraschung für Schwarz dar, der zu sehr auf 3.Lb5 eingestellt ist.
3...Bc5 4.b4 Das Evans−Gambit − alter Wein in neuen Schläuchen. Die Grundidee ist typisch für alle Gambits: Material wird gegen Entwicklungsvorsprung eingetauscht.
4...Bxb4 Warum den angebotenen Bauern nicht nehmen? Eine andere Fortsetzung ist die Ablehnung des Gambits − solider, aber auch passiver.
5.c3 Ein Zug, der mehrere Zwecke verfolgt. Mithilfe dieses Tempogewinns wird Weiß d2−d4 durchdrücken können.
5...Ba5
[5...Be7 ist in Mode gekommen − man fragt sich warum!? MS: Weil es sich um einen soliden und sinnvollen

Zug handelt. Einer der Vorteile ist, dass das Feld a5 für den Springer frei bleibt.]

6.d4 Definitiv genauer und besser als die kurze Rochade, die dem Weißen wenig einbringt.

6...exd4 Die Aufgabe des Zentrums ist immer ein kritischer Moment in diesem Gambit, aber in diesem konkreten Fall könnte dies durchaus die für Schwarz beste Fortsetzung sein. Schwarz erhält so ein offeneres Spiel als nach 6...d6 und Harding meint: "This is the best."

7.Qb3!? Eine viel seltenere Fortsetzung als 7.0−0, die aber den Vorteil hat, alle Diskussionen um die Panov−Variante (Sge7) zu umgehen, falls Schwarz diese im Sinne hatte.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 This leads to the "real" Classical Italian. When I started playing chess I learned the Classical and played it more or less until I became FIDE Master. Then I started to play the Guioco Pianissimo (also known as the Modern Italian) with 5.d3. **5...exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0** Now Black has to make a decision. He can take on c3 with the bishop or the knight. Bxc3 is usually played, while Nxc3 in most cases leads to a huge advantage for White except in one (very rarely played) variation. **8...Nxc3+− 9.bxc3 d5!** Actually a very interesting try for Black. To be honest I did not know this variation until I became International Master. In my career playing the Italian, I never got this variation on the board in a real chess game. Nonetheless, this move has to be considered seriously! This is actually the only move for Black to stay in the game with equal chances.
[The game was played in the wrong move order... 9...Be7? Here 9.d5! is already more or less winning for White. 10.Re1? *(*as we can see in another game *10.d5!*+− leads to a very good position for White. *)*]
10.Re1+

[Another interesting try for White is 10.Bb5!? Be7 11.Ne5 Bd7 12.Nxd7 Qxd7 0−1 (33) Gandolfi,G (1780) − Stern,R (2501) Rijeka 2010 CBM 136. now more promising is 13.h4!? at the first look it does not look very logical, but the idea is to push the h−pawn to h6 and weaken Black's king if he castles short.

A) 13...Bxh4? running into an attack! 14.Re1+ Kf8 *(14...Be7?? 15.Ba3+−)* 15.Rb1± Black cannot castle anymore and bring his king into a safety zone. White now wants to activate his pieces to exploit that Black's pieces are very uncoordinated.;

B) another try would be 13...0−0−0 14.Rb1 Bxh4? *(14...a6! 15.Bd3±)* Black can maybe equalize if he plays very precisely, but White has a very easy position. *)* 15.Bf4!±;

C) 13...0−0 14.h5! White's plan is to play Qf3−Bd3 and Black always has to be careful of a battery. h6?! looks like a normal reaction to stop White from playing h6 somewhen, but this move weakens the diagonale b1−h7 so White is maybe able to build a battery. 15.Qf3↑ The Engine evaluates this position as equal and I guess it is equal, but Black has to solve some problems to equalize fully. White has the easier game.]

[10.cxb4!? regarding White's pawn structure it does not look very great, but White wants to create dynamic play against Black's king. dxc4 11.Re1+ Ne7 1−0 (19) Ambrogi,A (2159)−Rossi,L (2019) Buenos Aires 2007 CBM 116 Extra. now better was 12.Qa4+!? Bd7 *(12...c6?! 13.b5±)* 13.b5 with the idea to play Ba3 to win the Ne7. Black has to castle! 0−0 14.Qxc4 threatening Ba3 and then Ng5. Bg4 15.Ba3 Re8 16.Rxe7 Rxe7 17.Bxe7 Qxe7 18.Ne5 Be6 19.d5 Bf5 20.Re1= looks like White has a bit pressure on the c7−pawn, but in general this position is equal after perfect play by Black.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Bb3 Bb6 A rather rare alternative to the main line, 6...a6. The main reason is that it allows White to exchange the dark−squared bishop by means of Nd2−c4. Quite surprisingly it has never been seen on our pages.
7.Nbd2 Ne7 8.Nc4 The bishop on b6 is trapped, but Black doesn't care. **8...Ng6 9.h3** This useful move is the main line, though I can't say it's necessary. **9...0−0**
[The very first game in this line, which took place 120(!) years ago saw 9...c6 10.0−0 *(10.Nxb6!?)* 10...Bc7 11.a4 and now the simple 0−0 promised Black comfortable play in Nemeth, F (2452)−Glodeanu, I (2157)/Mamaia 2015 . *(* Steinitz played *11...Qe7* and eventually won in Hanham, J−Steinitz, W/New York 1894, but White's play in that game can be improved. *)*]
10.0−0 Be6!? My idea was to reduce the pressure on the a2−g8 diagonal. I also don't mind trading light−squared bishops as White is going to obtain the advantage of the bishop pair.
[10...h6 is a more popular alternative. 11.a4 c6 12.Nxb6 Qxb6 *(12...axb6!? 13.Be3 Re8 14.Re1 d5 15.exd5 Nxd5* is also enough for equalising. Ponkratov, P (2593) − Khismatullin, D (2657)/Dagomys 2010. *)* 13.Be3 Qc7 14.a5 d5 15.exd5 Nxd5 16.Bc5 Re8∓ and Black obtained the upper hand in Antipov, M (2569) −Alekseev, E (2642)/Berlin 2015.]
11.Re1 White protects the e4−pawn. Now he will be able to play d4 at the appropriate moment, possibly after an exchange on b6.
[In case of 11.Ng5 I would play Bxc4 12.Bxc4 c6 preparing ...d5.]
11...c6 Black prepares 12...Bc7 with the subsequent 13...d5.
[11...h6 I wasn't sure that this move is necessary. Even though it stops Ng5

it wasn't a worry as I can meet it with 12...Bxc4 13.Bxc4 d5. 12.a4 c6 13.Nxb6 Bxb3 14.Qxb3 axb6 15.Be3 Ra6 *(15...c5!?)* 16.Nd2 d5 and Black equalised in Ponomariov, R (2717)−Krasenkow, M (2661)/Lugo 2007.]

12.Nxb6 It's time to capture the bishop before it escapes to c7. **12...axb6** This recapture is new.

[Earlier Black tested two alternatives. 12...Bxb3 13.axb3 axb6 14.Rxa8 Qxa8 15.d4 *(15.Bg5!* is better. *Qd8 16.h4 h6 17.h5 hxg5 18.hxg6 Ng4 19.gxf7+ Rxf7 20.Qd2 Qf6 21.Rf1 Qf4 22.Qxf4 gxf4 23.Ra1 Rd7* and Black's position is slightly worse, but holdable. *)* 15...h6 16.dxe5 dxe5 17.Qd6 Re8= with an equal position in Wei, Y (2530)−Zhou, W (2590)/ Xinghua 2013.]

[12...Qxb6 13.Bc2 h6 14.d4 Rad8 15.a4 a5 16.b4 axb4 17.cxb4 Rfe8 18.Be3 Qxb4 19.Rb1 Qa5 20.Rxb7± was better for White in Kramnik, V (2490) −Krasenkow, M (2550)/ Moscow 1991.]

13.Bxe6 fxe6 14.Qb3 White connected her hopes with this attack as Black seems to have problems protecting the pawn. However, I saw that I can sacrifice the b6−pawn and obtain a strong initiative. **14...Qe7! 15.Qxb6 Nd7?!** A dubious move. I decided to go for a forced line, but miscalculated.

[Initially I was planning the correct. 15...Nh5! with the annoying idea of an exchange sacrifice on f3. 16.Bg5 Qd7 17.Qb3!? Rxf3! 18.Qd1 Raf8 19.gxf3 h6! 20.f4! hxg5 21.Qxh5 Nxf4 with good compensation for the sacrificed material.]

16.Qxb7 White accepts the second pawn.

[16.Qe3! was more precise. Rf7! *(16...Nf4?* can be answered by *17.g3!* and the h3−pawn is untouchable.*; 16...Nc5?* is met by *17.Qe2!* with the idea to answer *Nb3?* with *18.Bg5!+−)* 17.Qe2 Raf8 18.Bg5 Qe8 19.Kh1 Nf4 *(19...h6 20.Be3 Rxf3 21.gxf3 Qe7 22.Rg1 Kh7 23.Rg3±* is insufficient. *)* 20.Bxf4 Rxf4 21.b4± and I'm not sure Black's initiative fully compensates a pawn.]

16...Rfb8!

[16...Rab8? is wrong because of

A) 17.Qxc6 Rxf3 18.gxf3 Nc5 19.Kf1! Qf8 20.Ke2 Nh4 *(* The immediate *20...Qd8?* is dubious. *21.b4 Rb6 22.Qxb6 Qxb6 23.bxc5 Qxc5 24.Bd2+−)* 21.f4 Qd8 Black is going to trap the queen on c6 by means of 22...Rb6. 22.b4 Rb6 23.Qxb6 Qxb6 24.bxc5 Qxc5 an inclusion of the moves 20...Nh4 21.f4 favours Black who can meet 25.Bd2?! with exf4;

[It wasn't too late to deviate from a repetition with 19.Qxc6!±]
19...Rc8 20.Qb7 Rcb8 and a draw was agreed. A short, but interesting game. The line with 6...Bb6 is not as bad as it may appear, and is a serious alternative to the more popular lines.

10.Qb3+ Kf8 I decided to test this interesting, but relatively rare continuation. Black's idea is to keep the d−pawn on d6 in order to control the e5−square, which is usually weak after the main line 10... d5.

[10...d5!? occurred in the recent top level game Harikrishna, P (2706) − Aronian, L (2812)/Wijk aan Zee NED 2014/[Mikhalevski, V], which can be found in our PGN Archive.]

11.Qxb4+ Qe7 12.Qxe7+ Kxe7 13.0−0

[You can find an old game which featured 13.Na3 in our archives. 13.Na3 Coleman, D−Parker, J/ Isle of Man 1999/[Paul Motwani.]

[13.Nc3 is dubious. Nxc3 14.bxc3 d6 *(14...b6!?* developing the light−squared bishop to the a8−h1 diagonal looks even stronger. *)* 15.Kd2?! Be6! 16.Ng5 Bd5 17.Rhe1+ Kd7∓ and Black was better in Pilgaard, K (2438)−Jones, G (2548)/Kallithea 2008.]

13...Nf6! This move is the most accurate, in my opinion.

[Earlier Black preferred 13...Re8 14.Re1 Kf8 15.Na3 Nf6 16.Nb5 Rxe1+ 17.Rxe1 Nd5 and Black holds

the position. 18.Rc1 c6 19.Nd6 Ke7 20.Nf5+ Kf6 21.Nd6 Ke7 22.Nf5+ Kf6 23.Nd6 Ke7 draw. Netzer, J (2396)−Gozzoli, Y (2551)/Belfort 2012.]

14.Re1+ Kd8 15.Nc3 d6! The point of Black's setup. Now the e5−square is covered. **16.d5!?** White takes some space and fixes the weak e6−square.

[It's important that 16.Ng5 is met by Rf8 with equal chances.]

16...Rf8

[16...Re8!? deserved attention. For example, 17.Rxe8+ Kxe8 18.Re1+ Kf8 19.Nd4 Bd7=]

17.Nd4 a5 I was trying to create counterplay on the queenside by means of either ...a4 followed by ...Ra5 or ... Ra6−b6.

[The simple 17...Bd7!? with the idea of ...c6 deserved attention and was close to equalising.]

18.a4 This move is also slightly inaccurate and allows Black to equalise.

[White could have ignored my idea as after 18.f3 a4 19.Kf2 Ra5 he has the strong *(19...Ng4+!?)* 20.b4 idea at his disposal. Now after axb3 21.axb3 Rxa1 22.Rxa1 White is slightly better.]

18...Ra6!? Black brings the rook to b6 in order to deflect the d4−knight from the e6−square. **19.f3 Rb6 20.Ndb5 Bd7 21.Re2 Re8! 22.Rae1**

[22.Rd2= would be safer.]

22...Rxe2 23.Rxe2 Be8 I didn't take my chance to seize the advantage. I was attracted by the idea of bringing the bishop to f7 in order to put pressure on d5.

[23...Ne8! was strong, with the idea 24.Rd2 c6! 25.dxc6 bxc6 26.Nxd6 Nxd6 27.Rxd6 Rxb2∓ with slightly better chances for Black.]

24.Kf2 Bf7?! An inaccuracy.

[24...Bg6! left chances for a win.]

25.Rd2?! Axelrod returns the favour.

[25.Nxc7! was correct. Kxc7 26.Re7+ Kd8 27.Rxf7 Rxb2+ 28.Kg1 Ne8 with roughly equal chances.]

25...Kd7

[25...Nd7!∓ transferring the knight to c5 was strong.]

26.g4 Ra6! The rook has nothing to do on b6 any more. **27.g5** This optimistic move weakens the f5−square.

[It would have been better to play 27.h4!? with equal chances.]

27...Ng8 The knight is heading to e7 from where it will have access to f5, while attacking the d5−pawn. **28.Rd4**

[28.Nd1! Ne7 29.Ne3 Ra8 is more pleasant for Black.]

28...Ne7 29.Rf4?! Another pseudo−active idea. **29...Bg6 30.Rf8?** White has made a number of active moves, but his position has got worse.

30...c6∓ After exchanging the d5−pawn and driving the knight out of b5 Black gains access to the weak b2−pawn.

31.Na3?

[31.Nd4! was necessary, though after Rb6 32.b3 Rb4 33.Nce2 Nxd5 34.Rg8 Ne7 35.Rxg7 Ke8∓ Black is better.]

31...Rb6∓ Now Black's advantage is close to decisive. **32.Nc4 Rb4 33.Nxa5 Rxb2+ 34.Kg3 cxd5 35.Nb5 b6 36.Nb7 Nf5+ 37.Kh3 d4!−+**

A precise calculation. Black either wins a piece or promotes the d−pawn.

38.Rd8+ Ke7 39.N5xd6 Nxd6 40.Rxd6 Bf5+ 41.Kg3 Bc8 42.Rc6

[42.Rxd4 Bxb7−+ is hopeless too.]

42...Bxb7! 43.Rc7+ Kd6 44.Rxb7 d3 The d−pawn is unstoppable and so White resigned. Sometimes "active" moves only weaken your position, and that's exactly what happened in this game. The opening line with 10...Kf8 looks playable, though some tests at a high level would be useful.

Nxe4 8.0−0 reaching again the main position in this Classical Italian where Black now takes with the bishop (what is usually played here). **8...Bxc3! 9.d5!** Reaching the Moeller Attack! White has to play d5 himself otherwise, Black plays ...d5 and is simply better.

[9.bxc3? d5!∓]

9...Bf6 The main move here. **10.Re1** Now White gets a piece back **10...Ne7 11.Rxe4 d6** Not allowing White to play d6. **12.Bg5!** Black has to take on g5. **12...Bxg5 13.Nxg5 0−0** I would not say this is a dubious move, but now Black has to face a huge attack and to play very very precisely (of course White also has more or less "only moves").

17.Qh7+ Kf7 18.Rh6! Now Black has to play Rg8! Suprisingly in this game, the specialist in openings, GM Jan Christian Schroeder, did not know this line and was punished for it very quickly.

18...Re8?? Loses immediately.

[18...Rg8! The only move here is 19.Re1

If the knight retreats, Black has clearly an inferior position. **17.Be3!?**

An ambitious reply; White counts on the attacking propensity of opposite coloured bishops in the middle−game. He will sacrifice the queenside and build up against the black king with pieces and pawns.

[17.Qf3 is simpler and preserves an edge, but in correspondence play,

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3 Nf6 6.b4!? Reaching the starting position of our gambit! **6...Be7** The second move here. 7...♗b6 is the main move.

[Very bad for Black is 6...Bd6? 7.0−0 White wants to go e5 to use the pin after ♖e1.

A) 7...dxc3? is just followed by the powerful 8.e5! with a pawn chain followed by ♖e1 with a pin − winning material or getting a huge attack. Nxe5 9.Re1 Qe7 10.Nxc3 now Black is in a dangerous pin. He cannot take with ♘xf3+ because then after gxf3! Black loses material due to the pin! 0−0 *(10...Nxf3+ 11.gxf3 Be5 12.f4* now Black can give up his queen or lose his bishop. *Bxc3 13.Rxe7+ Kxe7 14.Rb1+−* although the advantage of material is not that big for White, Black has really big problems to get his pieces into the game. White can simply activate his pieces and attack Black's 'weak' king. *)* 11.Bg5+− threatens ♘d5! (or ♘e4). Two pins are sometimes just too much to handle! Nxf3+ 12.Qxf3 Be5 13.Nd5 Qd6 14.Rad1+− and White's play is full of dynamism! Black has collected some pawns but neglected his development! Nxd5 *(14...Bxh2+ 15.Kh1 Nxd5 16.Rxd5 Qxb4 17.Re4! Bd6 18.Bb3 Qa3 19.Rf5* with a completely winning position for White! *)* 15.Rxd5 Qxb4 16.Rdxe5 Qxc4 17.Be7 Re8 18.Qg3+− winning by the threat ♗f6.;

B) 7...0−0 8.b5! Na5 9.Bd3 again with the threat of playing e5 with a pawn fork. Re8 10.Re1 Be7 11.e5 Nd5 12.cxd4 White has a very strong centre − Black has to fight against it. d6 13.Bd2! b6 14.Qc2 h6 *(14...g6 15.e6!* a very unpleasant guest in Black's camp! *Bxe6 16.Rxe6! fxe6 17.Bxg6 hxg6 18.Qxg6+ Kh8 19.Qh6+ Kg8 20.Qxe6+ Kg7 21.Qxd5+−)* 15.Bh7+ Kh8 16.Be4 Be6 17.Nc3 increases the pressure on the pin on the ♘d5. Nxc3 *(17...dxe5 18.Nxe5+−* White is not a pawn down and has very dynamic and dangerous play here! *)* 18.Bxa8 Qxa8 19.Bxc3+− and White is the exchange up.]

7.e5 Ne4 With the idea to play ...d5!

[never been played: 7...d5N sacrificing a piece for some pawns. 8.exf6 Bxf6 9.b5! this is a very important move to evict Black's knight (not allowing ♘b4 later on)! Ne7 *(9...Na5? 10.Bd3±* just a worse version because the knight is badly placed on a5. *)* 10.Bd3 dxc3 threatening c2. 11.Qc2! now Black has to play d4 because this c3−pawn is a very important compensation for

Black. d4 12.0−0 Bg4 13.Ng5↑ and White has the initiative. A further plan could be to play ♘e4−♗a3−h3.]

8.b5! This is one of the advantages of this line: White is able to dislodge Black's knight. In this case White aims to go Qxd4. **8...Na5!** Attacking White's Bc4 'a tempo'.

[8...Nb8? 9.Qxd4! Black's knight is not well−placed. Nc5 10.Qg4! provoking Black to weaken his kingside. g6 11.Qf4!± the queen gets out of d5−threats. Also the h6−square is a real hole. Black cannot castle easily due to the weak dark squares.]

9.Bd3 Nxc3

[9...Nc5 10.cxd4 Nxd3+ 11.Qxd3∞ reaching a unclear position. White has a very strong centre and wants to push it. Black's ♘a5 is also not well−placed so Black has to break up White's centre. White should castle and later go on playing h4!? followed by ♘g5 or ♗g5.]

10.Nxc3 dxc3 11.Qa4!? Attacking the knight and trying to swing over to the kingside to create a weakness in Black's camp. **11...b6**

[11...c5N defends the knight but does not improve Black's position at all. It is still very hard to castle for Black. 12.0−0 0−0 *(*the engine suggests a very unhuman solution: *12...a6! 13.bxa6 c4! 14.Bxc4 Nxc4 15.Qxc4 Rxa6 16.Qxc3 0−0 17.Bf4∞* first of all to see this variation Black really has to take a look at this position with the engine before. Otherwise you will not find those moves. The resulting position seems to be easy for White because Black has some problems with his isolated d7−pawn and also with his passive ♗c8. *)* 13.Qe4!? Black's pieces are not well−coordinated and also the king does not have many pieces to feel secure so White can start an attack here. *(*a more solid way would be *13.Re1 c4! 14.Be4 a6! 15.b6! Qxb6 16.Be3±* Now White wants to go ♖ab1 and ♕c2 − Black's problem is that he does not have many soldiers defending his king! *)* 13...g6 14.Bh6 Re8 *(*Black could think about giving the exchange. *14...d5!? 15.exd6 Bxd6 16.Bxf8 Bxf8 17.Rad1⩲* with the pair of bishops Black has actually some compensation but White can improve his position by h4−h5 (attacking Black's king) or ♖fe1. Another point for White is that the f7−pawn could become weak and of course Black's ♘a5 is awkwardly placed and out of play. *)* 15.Qf4 White wants to play ♘g5−h4−h5 attacking Black's king. d5! this is actually Black's only move! 16.Ng5∞ leading to a very complicated position for Black! White aims to let the h−pawn run − weakening Black*s king!]

12.Qg4!?

[I guess even better is 12.Qe4!? provoking Bb7 Now White can go ♕g4 and Black does no longer has an attack (with ♗c8) on White's queen by playing d5. 13.Qg4! Now Black will have really big problems to castle. g6 *(13...0−0 14.Bh6 g6 15.0−0!±* not accepting the exchange yet. Black has to be afraid of ♘g5! and h4−h5.*; 13...Kf8 14.0−0 c5 15.Ng5! h5 16.Qg3* for example (to show White's idea) *Rb8?? 17.Nh7+! Kg8 18.Bh6!*

g6 19.Bxg6!+− and Black's king is totally lost. *)* 14.0−0 a6! trying to free the ♘a5. *(14...c5 15.Ng5!* with the idea to go ♖e1 and bring the knight to f6 or d6. *h5 16.Qg3±* White can maybe later try some interesting break with e6!? sacrificing on e6 a piece if Black takes back!*; 14...0−0? 15.Bh6 Re8 16.Ng5!* f7 is a weakness but Black also does not have many pieces covering Black's king. White simply plays f4−f5 or h4−h5 and has many pieces starting an attack. *Bd5 17.f4*+− White has really a huge attack here. *)* 15.Bh6 axb5 16.Bxb5∞ a very unclear position. Black's king cannot really castle and White will make pressure on the d−file.]

12...Kf8 Now Black cannot castle anymore. White will play 0−0 and tries to win back the c3−pawn or start an attack!

[I guess Black's only try here is 12...g6 13.0−0 c5! 14.Qg3 d6 15.exd6 Qxd6 16.Ne5 0−0 *(16...Be6! 17.Bf4 0−0−0! 18.Rfe1*∞ reaching an extremly complicated position. To be honest Black's 16...♗e6! and 17... 0−0−0! look very unnatural and have to be found by analysis with the engine. Still the position is full of tactics and Black has to be very precise. *)* 17.Bh6 Re8 18.Rfe1±]

13.0−0 c5

[13...d5 14.Qf4↑ White could go for ♖e1 (threatening e6) and h4−h5−h6. Also ♘d4−♘f5 is a good idea.]

14.Qh5 Bb7 15.Ng5! Bxg5

[15...Qe8 16.Ne4! Bxe4 17.Bxe4 Rd8 18.Bd5± Black is very stuck and White can improve his position by playing ♖e1 and maybe even e6 later on]

16.Bxg5 Qe8 17.Bf6! typical move in those positions not allowing Black's king to castle anymore and to get into safety.

17...h6

[17...gxf6?? 18.Qh6+ Ke7 *(18...Kg8 19.exf6*+− *)* 19.Qxf6+ Kf8 20.Qxh8++−]

18.Rfe1! Qe6 Now better than the game would have been **19.Rad1!+−** White threatens to play ♗f5.

[The game saw 19.Bf5 Qc4? *(19...Qd5!* would have led to a draw after *20.Be4 Qe6 21.Bf5 Qd5 22.Be4=)* 20.Rad1! g6 21.e6!! What a beautiful mating attack for White!

A) 21...gxh5?? 22.e7+ Kg8 *(22...Ke8 23.Bxd7#)* 23.e8Q+ Rxe8 24.Rxe8#;

B) 21...dxe6 22.Bxg6 fxg6 23.Qxg6 Rg8 24.Qxh6+ Ke8 25.Bg5 Be4 26.Rd6 Rg6 27.Qh8++− 1−0 (27) Aleskerov,F (2325)−Prosviriakov,V (2346) Moscow 2006]

19...gxf6?? 20.Bf5!+− Now White gets his d−rook on the 7th rank!

1.e4 e5 2.Nf3 Nc6 3.Bc4 Italian is a frequent guest in practice of both my opponent and myself. **3...Bc5 4.0−0 Nf6 5.d3 0−0 6.c3** Both sides have a lot of different move orders in the Italian. This particular one allows the d5 Italian, which is a fascinating sub−topic within the Italian itself. **6...d5 7.exd5 Nxd5** There are tons of games and analysis revolving around this tabia. Andrey decides to follow one of the main paths, the trend that was started by Van Foreest few years ago and the one that brought me some points on the white side as well. **8.Re1 Bg4 9.h3 Bh5 10.Nbd2 Nb6 11.Bb3** '!' ist inzwischen erfolgreicher als 11.Bb5. This was the twist back then. White offers a trade of e5 and d3 pawns. **11...Qxd3 12.Nxe5 Qf5** The endgame after 12...Bxd1?! is no fun, as I managed to prove in my game against Harikrishna, from the very memorable Shenzhen 2019. **13.Nef3** Now the pawn structure is rather symmetrical, but the main question is− does White threaten g4 here? **13...Rfe8!?** A rare move, but an option that has been around for a while. Most top games go 13...Rad8, after which grabbing the bishop with 14.g4 is even less attractive, but it does allow 14.Qe2! "grabbing" the e−file. **14.g4** Here this is pretty much forced. White has no other way to untangle his pieces. **14...Bxg4 15.hxg4 Qxg4+ 16.Kh1 Ne5** A fancy looking move, but not the one I

can take creative credit for. It is suggested by the computers, but also has been played before in a correspondence game. When Andrey was thinking a little bit here, I started to wonder whether he contemplates allowing a forced draw with 17.Nxe5 Qh3+ 18.Kg1 Qg3+ 19.Kh1. On the one hand, a bailout against a well prepared opponent is natural, but on the other hand I suspected he was somewhat familiar with the position as well, not to mention the fact that playing a double edged position is in a way an opportunity. **17.Nh2** This is the winning attempt. **17...Qg6 18.Bc2 Nd3 19.Bxd3 Qxd3** Curiously, so far this has all been included in my Chessable course for White. I had no intentions to hide this important subvariation, not to mention we are still following the correspondence game. I believe I recommend here to not deviate from that one and follow with 20.Nb3. **20.Nb3** Led to a fascinating battle as well, that was eventually drawn.

[20.Ndf3 One of the three ways to aim for an endgame (20.Nb3 and 20. Ndf1 are alternatives). Qxd1 21.Rxd1 Bxf2 This endgame with 3 pawns in one version or the other was something I had expected to get after 13...Rfe8!?. Now it is on White to mobilize his pieces and pose some problems, because if he allows Black to consolidate and trade some stuff, then the three pawns will eventually get moving. 22.Bf4 I had expected White to activate his h2 knight with Ng4 here or on the next move. c6 23.Rd2?! Not seeing anything clear cut, White chooses the wrong path of allowing trades. Instead, he should try to mobilize his light pieces, starting probably with 23.Ng4 and then try and create some threats on the kingside, which is easier said than done. Be3! Trading stuff kind of helps me. 24.Bxe3 Rxe3 25.Nd4 Intending to activate the h2 knight. But now I can kick the rook away from the d−file. Nc4! I was very happy with this move, kicking the rook away and bringing my knight closer to action. 26.Rf2 Rae8 I was getting more and more optimistic. The fact that I can choose to trade a rook at any point in time with Re1 was warming my heart. 27.Raf1?! A natural move, but somewhat inaccurate apparently. *(27.Nf5* Would have led to a better version for White of the same kind of thing as in the game. *Re1+ 28.Rxe1 Rxe1+ 29.Kg2* Likely we will get a similar material balance of rook+knight vs rook, but White mobilizes his pieces for counterplay somewhat faster here. *)* 27...Nd6 I was wondering at this point, whether the more ambitious looking 27...f6 was stronger, but finally I decided to go with my instincts and just focus on reducing my opponent's counterchances. 28.Nf5 At first I felt this makes my life easier, but then later I was still unsure what the knight trade does to my winning chances. Nxf5 29.Rxf5 f6 There was also some merit in R8e7!? intending g6−h5 instead, but f6 Kf7 felt more natural and frankly I didn't doubt too much here. 30.Kg2 Kf7 Both sides are bringing the kings closer to action. It's not easy for White to come up with a

good idea here. Black intends to trade a rook and slowly push the kingside pawns down the board, while for White it is a lot harder to come up with a clear plan. 31.Rd1 h5!? Around here I realized that it is important in what version I push my pawns, as my winning chances depend a lot on whether White gets to coordinate his rook and knight to create some counterplay. *(31...Re2+ 32.Rf2 h5* was my initial idea, but then I didn't like that after *33.Nf3* I now have to trade the rook before pushing g5, in a somewhat unfavorable version. *Rxf2+ 34.Kxf2 g5 35.a4* This is smart, creating some potential counterplay on the queenside, though even the direct 35. Rd7+ Re7 36.Rd8 followed by Nd4 was something where I thought my winning chances were somehow disappearing. With White knight being well centralized and the rook always ready to give checks from behind, I didn't see a realistic way to push my three pawns forward without weakening them too much. *)* 32.Rf2 Anticipating Re2, but now I reverse the move order. *(32.Rxh5!?* Would change the position drastically, but the general outlook would remain the same. White would have to face a long struggle for a draw. *Re2+ 33.Kg3 Rxb2 34.Rd7+ Re7 35.Rxe7+ Kxe7* I would enjoy this a lot, with two connected passers on the left and a majority on the right as well. Of course, draw would still be a huge favorite here, especially if White defends well. *)* 32...g5! This is good, now I can meet 33.Nf3 with 33...Kg6!. I thought I can play Re2 later, but now that I look at the position again, I am wondering why I was planning Re2 at all, in fact. 33.Rd7+ R3e7 34.Rd6 Re6 35.Rd7+ R8e7! I can't say I was close to accepting the move repetition, but still, given my low confidence at that point, the fact that I played the game with the Black pieces and that I am not something like a full rook up at this point, it was not a given that I wouldn't. 36.Rd8 g4!? It wasn't entirely clear to me, whether this was a better attempt at pushing for a win than 36...Kg6, but I thought with the psychological situation in mind and the potential time trouble, with move 40 close, but not quite there yet, this would be a much harder question to answer. *(36...Kg6 37.Rg8+ Rg7 38.Rh8* White is hanging on, as it is not easy to push the pawns too far up the board, with the rook disturbing from behind. *)* 37.Rh8? A big mistake, practically speaking one of the main ones that determined the outcome of this game. *(37.Nf1!* This leads to a forcing sequence that works out just fine for White, despite it getting dangerously close. *h4* There may be some other attempts, but I felt this was the most critical. *38.Rh8 g3 39.Rf4 Re2+ 40.Kg1* Here I was hoping something else would appear, but the back up variation that I saw was pretty much the best try anyway. *g2 41.Nh2 Rxb2 42.Rh7+ Ke8 43.Rxe7+ Kxe7 44.Rxh4 Rxa2 45.Rh7+ Kd6 46.Rxb7 a5* I had a suspicion that this was going to be holding for White and that is

also what the computers confirm. Too comfortable it is not, but given that what happened in the game was looking much more depressing, White clearly had to go for this. *)* 37...Kg6 38.Rg8+ Rg7? It was a very difficult choice at this point, as frankly both options, this and 38...Kh7 seemed practically winning to me. Whether White had some hidden defense in either of the two was difficult to see at that point, so I went with the one where my king is more active. Objectively, this was a wrong call. *(38...Kh7!* It seems that the role my king should be playing is not supporting the pawn mass from up close, on g5, but to guard the rear, covering the h8−g8−f8 squares, neutralizing the rook on the 8th rank. *39.Ra8* Likewise 39.Rb8 is met with Re2, while Rf8 is always met with Kg7!. *Re2* Neutralizing the f2 rook as well, now the f−pawn is ready to march (after Kg7 if need be). Nf1 is always met with h4!. *)* 39.Rf8 Kg5 I was very enthusiastic about this, but was soon to realise that it's not that easy to actually make progress. 40.Nf1 h4 Preventing the knight from entering the game. Nd2 is met by g3! as well, but as the time control passed, and I started thinking about the position more deeply, I realized that it is actually very hard to make progress and if White just waits and slowly pushes pawns on the queenside, there may be no way to win this game. 41.a4! Andrey too, came to the same conclusion and realized he can just start making useful moves on the other side of the board, as my pawns aren't quite rolling. a5! The exclaim is for not pushing g3, which would allow White to liquidate into a drawn rook endgame. *(41...Rg6* Intending Re5 and f5 was my first instinct, but the problem is that even after that, it's still hard to get the pawns rolling. *42.Rf7 Re5 43.Rxb7 f5 44.Rf7* and it's not clear what's next, as the pawns seem stuck.*; 41...g3 42.Nxg3! hxg3 43.Kxg3* This rook endgame is just very drawish, with one extra pawn not being enough to win, as so often in those. *)* 42.b4 At some point I had a thought to now go for the rook endgame with g3 Nxg3 hxg3, as the c3 pawn is softer thanks to the a5−b4 inclusion, but the position still appeared drawn. Instead I decided to maintain the tension once again and hope for the best, even though I was not at all sure there will be a win in the end. b6 43.bxa5 I felt this wasn't a good inclusion for White, but it doesn't change too much. bxa5 44.Ra8 Re5 White has achieved nothing here and I am ready to push f5−f4. It is very tempting to go for Nd2−Nc4 here, but that turns out the be the losing mistake. 45.Nd2? Instead, White had to just keep waiting. Surprisingly, even despite getting the pawn to f5, it is still hard to make progress for Black. *(45.Rc8 f5 46.Rf8!* White actually still holds here, objectively, as there is just no way to push the f−pawn forward. *)* 45...g3! Luckily I was hoping for this as soon as I went for 41...a5, so it wasn't too hard to clinch the game at this point. 46.Nf3+ Kf4 Beautiful idea, stepping into a discovered check, but after 47.

Nxe5 gxf2+! it's a countercheck. 47.Rf1 h3+! The final sequence. 48.Kxh3 g2 49.Rf2 Ke3 0−1 (49) Esipenko,A (2714)−Giri,A (2772) Wijk aan Zee 2022 Setting up a cute finale. White resigned. *(49...Ke3 50.Rxg2 Kxf3 51.Rxg7 Rh5#* Is a pretty mate. *)*]

1.e4 Roiz,Michael Roiz,Michael Roiz, Michael: 'Roiz,M' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.a4** The setup with White's pawn on a4 is becoming extremely popular. **6...d6 7.0−0 0−0** The latest fashion.

[Both 7...h6]

[and 7...Ba7 have been tested many times on the highest level.]

8.Bg5 The most aggressive choice − now, when Black's king is on the k−side this pin is more dangerous.

[8.b4 Ba7 9.Re1 Ne7 10.Nbd2 Ng6 11.d4 c6 12.h3 Carlsen,M (2853)−Karjakin,S (2772) New York USA 2016. This led to a complex position, where Black's chances are not worse.]

8...h6 9.Bh4 g5

[In the following recent game Black didn't manage to solve the problems after 9...Qe7 10.Nbd2 Ba7 11.Kh1 Be6 12.Bd5 Nd8 13.d4↑ Bacrot,E (2692)−Karpov,A (2628) Cap d'Agde

FRA 2016]

10.Bg3

[The typical piece sac doesn't work in this situation: 10.Nxg5?! hxg5 11.Bxg5 Kg7 12.Qf3 Rh8 13.Nd2 Kg6 14.h4 *(⌓14.Be3 Qd7! 15.h3 Kg7∓)* 14...Bg4 15.Bxf6 Qd7 16.Qg3 Kxf6−+ Caruana,F (2804)−Nakamura,H (2787) Paris FRA 2016]

10...Ba7 It's vital to prevent White from pushing d3−d4.

[10...g4 is too risky: 11.Bh4! gxf3 12.Qxf3 Kg7 13.Nd2 Rg8 14.Rfe1→ Schroeder,J (2507)−Fressinet,L (2677) Helsingor DEN 2016]

11.Nbd2

[Another standard knight's route − 11.Na3!? has been checked out only once so far: Ne7 12.Nc2 Kg7 *(* Perhaps, *12...Ng6!? 13.Ne3 c6* was safer. *)* 13.Kh1 Nh5 14.d4± So,W (2770)−Anand,V (2770) Leuven BEL 2016]

11...Kg7 Following the recent game Van Foreest − Leko, where the higher−rated player was nicely outplayed.

[During the game, I also considered 11...Nh7!? 12.h3 h5⇄ , trying to save a tempo. Possibly, this is more precise.]

12.Re1 Nh7 13.Nf1N A natural innovation. The knight is heading to e3, unlocking the d−file, so the d3−d4 advance is again on the cards.

[The above−mentioned high−level encounter saw 13.d4 g4 *(13...h5!? 14.h3 g4 15.Nh4 exd4 16.cxd4 Bxd4 17.hxg4 hxg4⇄)* 14.Nh4 exd4 15.cxd4 Bxd4 16.Nf1⩲ Van Foreest,J (2615)−Leko,P (2709) Douglas ENG 2016, White had a full compensation for a pawn.]

13...f5?! For some reasons, this move was played without any thought...I was convinced, that opening up the f−file should favour Black.

[However, a better way of handling the position was: 13...h5! 14.h4 *(14.h3 h4 15.Bh2 g4 16.hxg4 Bxg4 17.Ne3 Bxe3 18.Rxe3 Ng5∓)* 14...g4 15.N3d2 Ne7 16.Ne3 Ng6⇄ The hanging h4−pawn is putting White under definite psychological pressure.]

14.exf5 Bxf5 15.d4! exd4

[Now it was too late for playing 15...h5 , though refuting it is not a trivial task: 16.h3 *(16.h4* is weaker: *Bg4! 17.N1h2 gxh4 18.Bxh4 Qxh4 19.Nxh4 Bxd1 20.Raxd1 exd4 21.Rd3 Ng5 22.Rg3 Kh6 23.Rxg5 Kxg5 24.N2f3+ Kh6 25.Re6+ Kg7 26.Rg6+ Kh8 27.Rh6+ Kg7 28.Rg6+=)* 16...h4 17.Bh2 g4 18.hxg4 Bxg4 19.Ne3! Bxf3 20.gxf3 exd4 21.Nd5! dxc3 22.bxc3 Kh8 23.Re4↑ with a powerful initiative.]

16.Nxd4 Nxd4 17.cxd4 Obviously, Black's rook does not have much of a job along the −file, whereas the ♔g7 is in big dangerf **17...Qd7** One more inaccuracy, that makes my position difficult.

[17...Bg6 was safer: 18.Bd3 Bxd3 19.Qxd3 Qd7 20.Ne3 Rae8±]

18.Rc1?! This move is not bad, but it gives Black an important tempo for consolidating.

[Instead, Saar had 2 promising continuations: 18.Ne3!? Be4 19.f3 Bg6 20.Bd3 Bxd3 21.Qxd3 Rae8 22.Rac1↑]

[and 18.Qb3 Bxd4 19.Ne3↑]

18...Rae8?! Returning the favour.

[Black should have improved the placement of his knight: 18...Nf6! 19.Ne3 Rae8 20.Qb3 Be4 21.f3 Bc6⇄]

19.Ne3

[A more energetic try would be: 19.Qb3! Bb6 *(19...Bxd4 20.Qxb7 Rxe1 21.Rxe1 Kh8 22.Ne3±)* 20.Ne3 Be4 21.f3 Bc6 22.Qc3 Bxa4 23.Nd5 Ba7 24.Kh1↑ and Black suffers from a lack of harmony in his camp.]

19...Be4 20.Bb3 Frankly speaking, I completely missed the main idea behind this move.

[Possibly, the more consistent 20.f3!? Bg6 21.Bf2 would be stronger.]

20...Nf6 21.a5! Re7 At this moment I wasn't intending to touch my c7−pawn.

[However, 21...c6! 22.Nc4 d5 23.Ne5 *(23.Nb6 Qd8 24.Be5 Bb8⇄)* 23...Qf5 24.h3 Nd7 25.Nxd7 Qxd7 26.Rc3 Qf7 27.f3 Bg6 28.Rce3 Rxe3 29.Rxe3 Re8= would enable Black to simplify matters and solve the problems.]

22.Ba4 c6

[Of course, making a move like 22...Qd8 isn't much fun. Indeed, the position after 23.Bc2 c6 24.f3 Bxc2 25.Rxc2± the knight is heading to f5.]

23.Nc4 Bb8? An awful decision − after this move Black is doomed to a passive defence.

[It was necessary to leave the h2−b8 diagonal unlocked: 23...d5 24.Nb6 Bxb6 25.axb6 g4 26.Rc3 Ref7 27.Be5 Kh7 28.Rg3 Rg8 29.f3 gxf3 30.gxf3 Bf5 31.Bc2± White is better, but the play is quite complex.]

24.Nb6! Qd8 25.f3 Bg6

[25...Bf5 wasn't better either: 26.d5 c5 27.Bf2 Rff7 28.b4! cxb4 29.Bd4+−]

26.d5! Of course, White is happy to seize more space and squeeze Black's pieces. **26...c5**

[26...Nxd5 27.Nxd5 cxd5 28.Rxe7+ Qxe7 29.Bf2! Kh7 30.Qxd5 also would yield White a decisive positional advantage.]

27.Rxe7+

[An even stronger move was 27.b4! Nh5 28.Qd2 Nxg3 29.hxg3 cxb4 30.Re6+−]

27...Qxe7 28.Qd2 Bc7 White's position is winning, but Saar was under strong time pressure, so I was still optimistic.

29.Qc3 The first step in the wrong direction.

[29.b4! cxb4 30.Bf2 Kg8 31.Bd4+− would offer White full domination.]

29...Kh7 30.Re1 Qf7 31.Bb3?! Spoiling the significant part of his advantage.

[After 31.Re6! g4 32.fxg4 Nxg4 33.Qf3 Qxf3 34.gxf3 Ne5 35.Bxe5 dxe5 36.d6 the d−pawn should secure a win.]

31...Bf5 32.Bc4?

[⌓32.Bc2! Bxc2 33.Qxc2+ Kg7 34.Nc4±]

32...Re8 Only now is my position becoming playable − though the strategic problems (poor ♗c7) are not fully solved yet. **33.Rxe8 Nxe8 34.Qe3**

[34.b4 cxb4 35.Qxb4 Qg7 36.h3±]

34...Nf6 35.h4 g4 Black is aiming to complicate matters.

[Objectively, a better move was 35...Qe8 36.Qxe8 Nxe8 37.hxg5 hxg5 38.Bh2 Nf6 39.g4 Bg6 , though after 40.Kf2 White's position is absolutely safe.]

36.fxg4

[36.Be2! was stronger: gxf3 37.Bxf3 Qg7 38.Kh2 Ng4+ 39.Bxg4 Qxg4 40.Qe8±]

36...Nxg4 37.Qf3 Qg6 38.Na8?? A nervous decision − Saar was hoping to repeat moves and cross the time control.

38...Bd8?!

[Somewhow, I completely missed 38...Bxa5 39.Bxd6 Ne3! , exchanging the powerful ♗d6 and leaving White with a poor knight: 40.Qxe3 Qxd6 41.Bd3 Bxd3 42.Qxd3+ Kg7 43.Qe4 b5−+]

39.Bxd6 Bf6? Spoiling the lion's share of the advantage!

[I can hardly explain why I rejected the obvious 39...Bxh4 40.Bxc5 Be4! *(* Compared to the game, now *40...Ne5 41.Qe2 Nxc4 42.Qxc4 Be4* also would offer Black a stable advantage, but it's still weaker *)* 41.Qh3 Qg5! , developing a decisive attack: 42.b4 h5 43.Bf1 Kg6 No hurry! 44.g3 Ne5−+ and White is helpless.]

40.Bxc5 Ne5 41.Qf4 Nxc4 42.Qxc4 Be4 This was my idea − the d5−pawn falls. However, White still manages to keep another extra pawn! **43.Qe2 Bxd5** Even though White is a pawn up, Black's position is completely safe now.

44.Nb6

[A simpler way was 44.Nc7 Bc6 45.Ne6 Qb1+ 46.Kh2 Qf5 47.Bd6 Bxh4 48.Nf4 Bf6 49.b4= , and Black cannot make any progress.]

44...Bc6 45.h5! Not only avoiding the loss of a pawn, but also putting Black's king under some pressure. **45...Qb1+ 46.Kh2 Qf5**

[46...Qxb2 47.Qxb2 Bxb2 48.Bb4 is just a dead draw.]

47.Bd6!? White is ready to give up the a5−pawn in order to consolidate.

[I was expecting 47.b4 Be5+ 48.Kg1 Qb1+ 49.Kf2 Bf6 50.Nc4 , and it looks like White should be OK.]

47...Qxa5 48.Nc4 Finally the knight is back in the game. **48...Qf5 49.Bg3?!** Inviting new troubles.

[More to the point was 49.Be5 Bxe5+ 50.Qxe5 Qxe5+ 51.Nxe5 Bd5 52.g4 Kg7 53.Kg3 Kf6 54.Kf4=]

49...Bg7?! Returning the favour.

[49...Bb5 was much stronger: 50.b3 Bg7∓]

50.Nd6

[Missing another opportunity of exchanging the bishops: 50.Be5!=]

50...Qd5 51.Ne8? A blunder.

[After 51.Bf4! Ba4 52.Qg4 Bc2 53.b4= White would have enough counter−play.]

51...Bd4? Alas, this was played rapidly...

[Instead, 51...Bb5! 52.Qc2+ Bd3 would allow Black to grab the ♙h5 and win the game: 53.Qc8 Qxh5+ 54.Kg1 Bd4+ 55.Bf2 Bxf2+ 56.Kxf2 Qf7+ 57.Ke3 Bg6−+]

52.Nd6 a5
[52...Bf6!? was the best practical chance, but had Saar played 53.Bf4 Bg5 54.Qc2+ it would still end in a draw.]
53.Qd3+ Kh8
[A draw was agreed in view of 53...Kh8 54.Nf7+! Qxf7 55.Qxd4+ Kh7=]

Unive Open Hoogeveen (3) 13.10.2014
[Mikhalevski, V]

1.e4 This first move came as some surprise from my young opponent, who recently started to mostly play 1.d4.
1...e5 2.Nf3 Nc6 3.Bc4
Another surprise. I expected him to continue with 3.Bb5. **3...Nf6 4.d3 h6**
I decided to go for a side line and thus to avoid any home preparation.
[Both 4...Be7]
[and 4...Bc5 are more popular.]
5.c3 d6 6.Bb3 A useful move, which secures the position of the light−squared bishop.
[Earlier I annotated for you 6.Nbd2 Ostrovskiy, A (2403)−Mikhalevski, V

(2552)/Washington D.C. 2013/ [Mikhalevski, V].]

6...g6 One of the points of Black's 4th move. 4...d6 or 4...g6 would run into 5. Ng5. **7.Nbd2 Bg7 8.Nf1** This way White is trying to save a tempo, and brings his knight to either g3 or e3. When short castles is played White needs to move the rook to e1 first and only then to transfer his knight via f1. **8...a6!?** An extremely rare continuation, which has the purpose of meeting Ba4 with ...b5 after Black plays ...Na5.

[8...d5 9.Qe2 0−0 10.Ng3 a5 leads to a comfortable position for Black as well. Mamedov, R (2626) − Ernst, S (2589)/Novi Sad 2009.]

[In case of the immediate 8...Na5 I didn't like 9.Ba4+]

[The most popular is 8...0−0 9.h3?! *(9.Ne3!?)* 9...d5 10.Qe2 a5! and Black seized the initiative in Both, E (2195)−Ernst, S (2583)/Dieren 2010.]

9.Ne3!?N White is fighting for the d5−square.

[9.Ng3!? is a natural alternative.]

9...Na5 10.Bc2 c5 While Black is getting some control over the d4−square. **11.h3** White keeps the option of Ng4 at the appropriate moment in mind, and that's why he's delaying short castles. **11...b5** I also decided to delay castling, while making some useful moves on the other side of the board. **12.Bd2** This move looked a little awkward as White blocks the d−file, but it serves the goal of finishing development.

[12.a3!? preparing b4 deserved attention.]

12...Bb7 My idea was to put pressure on the e4−pawn. In some cases Black can even play ...c4 and it's not easy for White to protect the centre.

[12...Be6 also looks reasonable.]

13.Qe2

[White could try to block my light−squared bishop with my own knight and resume his fight for the d5−square with 13.b4!? cxb4 14.cxb4 Nc6 15.Bb3! 0−0! *(* But not *15...a5 16.bxa5 Nxa5 17.a4!⩲)* 16.0−0 *(16.Ng4* can be met by *Nxg4 17.hxg4 g5* and Black seems to be fine. *)* 16...a5 17.bxa5 Nxa5 with equal chances.]

13...Rc8 My idea with this move was to prepare an advance of the c−pawn and get ready for any opening of the c−file, which may occur after White plays b4.

[I had a number of good alternatives at my disposal such as 13...Qc7 preparing 14...c4]

[The immediate 13...c4!? 14.dxc4 Nxc4 15.Nxc4 bxc4 16.Qxc4 Qc8! 17.Qe2 Qc6 and White can't protect the e4−pawn.]

[or 13...Qd7 getting ready for 14.b4 cxb4 15.cxb4 Nc6 16.Bb3 0−0= Now the bishop on b7 and rooks are connected.]

14.Ng4 White is preventing short castles and protects the e4−pawn, which allows him to meet 14...c4 with 15.d4.

[After 14.b4 cxb4 15.cxb4 Nc6 16.Bb3 0−0 White can't play 17.Nd5? in view of Nxd5 18.Bxd5 Nxb4!!∓ and Black wins some material.]

14...Nh5 I wanted to keep my knight in order to have options of ...f5 and ...Nf4 available.

[14...Ng8 intending to transfer the knight to e7 looks slow in view of

15.a4!±]

[14...c4?! doesn't make much sense because of 15.d4!±]

15.0−0?! Finally White castles, but this natural move turns out to be inaccurate as it allows 15...Nf4.

[15.g3!? was better, though after Nf6 *(*but not *15...f5? 16.Nh4!)* 16.a4 Nxg4 17.hxg4 Nc6 Black should be able to equalise.]

15...Nf4! 16.Bxf4 It's difficult to suffer Black's knight on f4. **16...exf4** Now the knight on g4 turns out to be misplaced as it can't get back to e3 and will have to retreat to h2. **17.Qd2 g5** The idea of ...h5 is kept in reserve.

18.Rfe1 White is preparing 19.e5.

18...Kf8 I decided to keep my rook on the h−file and anticipate its opening after ...h5 and ...g4.

[The natural 18...0−0!? was possible and could have been better than the text.]

19.Rad1 After this move I spent around 20 minutes. **19...Nc6!?** I thought White's idea was to play 20.d4 and so after I capture it with my pawn White can recapture with the knight, which looks annoying since the knight is heading to f5. Therefore by bringing my knight to c6 I'm ready to trade knights and prevent Nf5.

[I also considered 19...h5!? 20.Ngh2 Rh6 with good play for Black.]

[19...d5 20.e5 d4 21.Ngh2 *(21.e6 fxe6 22.Rxe6)*]

20.Bb3 This is exactly what I expected. White is taking control over the d5−square, which is possible after a retreat of my knight, but...

[20.d4!? cxd4 21.cxd4 *(*Now *21.Nxd4?!* is answered by *Nxd4 22.cxd4* and Black starts an offensive on the kingside. *h5 23.Nh2 g4!* with an initiative. *)* 21...Qa5 22.Qe2= with roughly equal chances.]

20...h5 21.Ngh2 Ne5 This was my idea behind 19...Nc6. **22.d4?!** This dubious move leads to an inferior position as it allows a dangerous attack on the kingside.

[White should have played 22.Nxe5 dxe5 23.d4! c4 24.Bc2 Rc7! 25.dxe5 Qxd2 26.Rxd2 Ke7= with equal chances.]

[22.h4 which looked promising, as it seemed to destroy my pawn structure on the kingside, runs into g4 23.Ng5 c4 24.Qxf4 Qe7! 25.dxc4 bxc4 26.Bc2 f6∓ and White starts experiencing problems with his knight on g5.]

22...Nxf3+ 23.gxf3 Now the king becomes vulnerable while the minor pieces are passive.

[23.Nxf3 c4 24.Bc2 g4 25.Nh2 Bh6∓ is not much fun either.]

23...c4 It looked logical to me to shut the light−squared bishop out. **24.Bc2 Bh6** I decided to protect the f4−pawn in order to prevent the h4 idea. The only drawback to my move is an option of 25. e5 and that's what White should have done.

[24...Rc7!? deserved attention, with the idea of 25...Bc8.]

25.Kg2?! Here the king is coming under attack.

[25.e5!? g4 26.Qe2∓ was a better chance, though Black's advantage is out of the question.]

25...Rg8∓ Black is creating a threat of 26...g4, when after all the exchanges on g4 ... f3+ is coming, winning the queen.

That's where the bad position of the king on g2 can be exploited. **26.d5?**
A mistake in a difficult position.
[26.Rh1! is a clever defensive move.
A) Now Black shouldn't rush with 26...g4 as after 27.hxg4 hxg4? *(27...f5!* is still good for Black. *)* 28.Nxg4 Rxg4+? 29.fxg4 f3+ , which seems to win, in fact is refuted by 30.Kg3 *(*but not *30.Kxf3?? Qf6+−+)* 30...Bxd2 31.Rh8+± and White is clearly better.;
B) 26...Qd7! 27.Rdg1 Re8∓ and Black retains a clearly better position.]
26...g4!−+ Now Black's attack is decisive. **27.Kh1 Qh4! 28.fxg4**
This move only helps Black as now the bishop on h6 will be protected and Black can play ...f3. **28...hxg4 29.e5 Qxh3**
[or 29...f3!? 30.Qd4 Qxh3 31.Rg1 Be3!! 32.Qxe3 g3! 33.fxg3 Qxh2+! 34.Kxh2 Rh8+]
30.Bf5 f3 This game showed that 4...h6 is a reasonable alternative to the main lines.

Black has destroyed his pawn structure in return for the material advantage of the two bishops. But this is NOT a Benoni as in the famous 3rd game of the Spassky−Fischer World championship in Reykjavik 1972! White has kept his 'good bishop' which means Black's dark−squared bishop is blocked by a solid d4 pawn. The latter also has a more irreparably weakened king position and few chances to create any serious attack on the kingside by making use of the semi−open g−file. So... Black naturally wants to increase the scope of his remaining bishop. Yet the main point of his last move (instead of the more thematic **11.Ba4** as the less promising white option to contain the g7−bishop in this position. Carlsen − S. Karjakin, 5. Partie der Weltmeisterschaft 2016). Wie wirksam dies ist, sei dahingestellt; Schwarz wendet sich mit dem Textzug auf jeden Fall gegen dieses Vorgehen in der Annahme, daß die Schwächung des Feldes b5 unwesentlich sein wird. **8.Bg5** Dies ist eine scharfe Idee, mit der bisher wenig Erfahrung gesammelt wurde. Weiß läßt es zu, daß sein Damenläufer nach g3 getrieben wird. Dort steht er zunächst außer Spiel und mag weiteren Angriffen ausgesetzt sein (durch h6−h5 nach geeigneter Vorbereitung). Weiß rechnet aber damit, daß er zu d3−d4 kommt und daß dann der Druck gegen den Punkt e5 wichtig sein wird; außerdem wird er vielleicht aus der Schwächung des schwarzen Königsflügels Nutzen ziehen können, wenn die Stellung sich öffnet. Es ist nicht zu entscheiden, ob der Zug besser, schlechter oder ebenso gut ist wie die Fortsetzungen 8. Sbd2 und 8.h3, die bescheideneren Zielen dienen.

11.d4 Die Folgen des Partiezuges sind schwer zu beurteilen. Bb6 12.dxe5 h5 Dies ist der Plan des Schwarzen: Er möchte den Königsflügel des Weißen sofort aufbrechen. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.Nxf7 Bxf2+! 6.Kxf2 Nxe4+ 7.Ke3!? The bravest! **7...Qh4 8.g3□** This is still forced.

[8.Qf3? Ng5! 9.Nxg5 Qxg5+

The king can't retreat, so White is in danger, for example 10.Kd3 Rf8 11.Qg3 e4+! 12.Ke2 Nd4+ 13.Ke1 Qxg3+ 14.hxg3 Nxc2+−+]
[8.Rf1? seems more solid, but is also risky for White. Rf8 9.Qe1 Qxh2! This position is very dangerous for White, as his king is very exposed and he can't accept the second gift, for example 10.Kxe4? Qxg2+ 11.Kd3 Qh3+ 12.Ke2 Qg4+ 13.Ke3 Qd4+ 14.Ke2 Qxc4+−+]

8...Nxg3! Like in the previous game, Black should strike while the iron is still hot. **9.hxg3 Qd4+ 10.Kf3 d5! 11.Rh4!** White prevents the check from g4 with tempo. **11...e4+ 12.Kg2 0−0! 13.Qh5** White chooses the safest option, which is a draw.

[He could try to play for an advantage with 13.Rf4!? although the evaluation is not so conclusive: dxc4 14.Qh5 Bd7! 15.Nc3 *(* Bringing the knight back would be a mistake: *15.Ng5? h6 16.Nh3 Rxf4 17.Nxf4 Ne5→* with a powerful attack coming in the next moves. *)* 15...Be8 16.Rh4! h6 17.Nxh6+ gxh6 18.Qg4+! Qg7 19.Qxg7+ Kxg7 20.d3! h5 21.dxe4 but even after everything, Black should have adequate counterplay with Nd4! 22.Bf4 Nxc2 23.Rf1 Bg6 and the position tends to be balanced.]

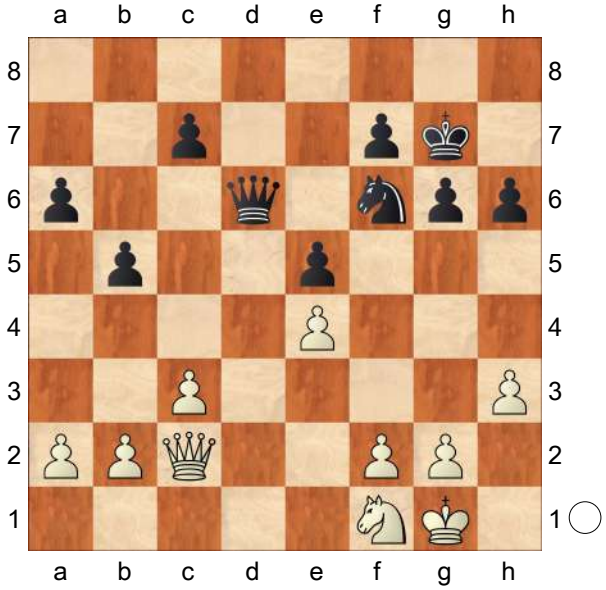
Olympiad−42 Baku (2.3) 03.09.2016

[GM Grigor Grigorov]



In the next example, we will see how White was overplayed due to the fact that he underestimated the fight for space on the queenside. The position is about equal but it's already White who should be careful. Besides his slightly more active pieces, Black started seizing space on the queenside by means of .. .b7−b5. Black's plan is simple: 1) Bring the knight to c5 2) Gain even more space by playing a6−a5−a4 3) Provoke the move a2−a3 by attacking the a2−pawn with ...Qe6 4) After turning the b2−pawn into a weakness, create another weakness on the kingside 5) Winning the game by applying the principle of two weaknesses. In the

game, not without the help of his opponent, Black managed to execute the plan. White played **26.Nd2?!** which is already an inaccuracy.

[White should have immediately started fighting for space on the queenside with the move 26.a4! After h5 27.axb5 axb5 28.h4 Qc5 29.Ne3= , the position would be completely equal.]

26...Nd7! The knight is heading for the c5−square. From this spot, besides stopping a2−a4, the knight will also put pressure on e4 and d3. **27.Kf1 Nc5 28.Ke2 Qc6!** Black tries to tie White's pieces to the defence of the e4−pawn. Provoking the move f2−f3 would be a huge achievement for Black since he can make use of the weakened dark squares. **29.Kf1** This move indicates that White has run out of useful ideas. He is just waiting. **29...a5!** Black already starts gaining space on the queenside. **30.Qb1 a4 31.a3** Now, the weakness of the b2−pawn will be a concern until the end of the game. Nevertheless, it's already difficult to come up with a better suggestion.

[I have also examined 31.b4 but after Ne6 32.Qc2 Nf4∓ Black's advantage is indisputable.]

31...Qe6 32.Ke2 Qa6 33.Ke3 Qf6! Black swings the queen to the kingside, showing his intentions to play on both wings. **34.Ke2 Qg5 35.Qh1** A sad necessity.

[After 35.g3? Qh5+ 36.Ke3 Qxh3 Black enjoys a healthy extra pawn.]

35...h5! A good technical decision. The idea of his move is to fix the g2−pawn by means of ...h5−h4. **36.g3 Qd8?** This move gives White the chance to consolidate the position by transferring the queen to e3. Even though Brunello finally won, the remaining part of the game is not instructive.

[Black should have played 36...h4 37.Qf3 Ne6∓ planning to proceed with ...Qh6 followed by Ng5. The h3−pawn would be a constant source of worries.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.b4!? Here White goes into the gambit via another move order.

[The better (and usual) move order is 5.d4 exd4 6.b4!? Be7 7.e5 transposing to the game.]

5...Be7 6.d4 Of course Black now has also other moves like d6 or ♘xe4. That is why the better move order is 5.d4 and 6.b4!? **6...exd4 7.e5 Ng4 8.cxd4 Bxb4+**

[Another reply (just once played by Black!) is 8...d5!?

A) actually White has an aditional option here with 9.exd6!? Qxd6?! Now White gets an edge! *(9...Bxd6 10.b5 Na5 11.Bd3 0−0 12.0−0* I guess with equal chances. Black has his bad knight on a5 and White the isolated d4−pawn. I think White should go on with ♘c3−♖e1 and later maybe h3−♘e5 with some dynamic play.*; 9...cxd6 10.a3* followed by ♘c3 and 0−0. I guess the position is also equal. Maybe White can develop a bit more harmonously than Black. *)* Now in Hvenekilde,J (2290)−Danielsen,H Allerod 1984, 0−1 (81), White should have played 10.0−0!? Nxb4 11.Re1 0−0 12.a3 Nc6 13.Nc3 Bf5 14.Nd5!?↑ White creates problems for Black!;

B) 9.Bb5! Bxb4+ 10.Kf1 transposing to the game.]

9.Kf1!? Actually the most challenging try for Black − White is going to create active play! 6.Bd2, for example, is just to harmless for Black and leads to an equal position, but we want to keep the attack rollin'! **9...d5!** Maybe the only good move Black can make here... and of course a well−known move for Black (not difficult to find). **10.Bb5 0−0 11.h3 Nh6 12.Qb3!?** Now the idea of 10.♗b5 is clear. White wants to take on c6 winning Black's ♗b4. Also, d5 is attacked and above all White's queen is able to get fast to e3 (after ♗xh6) joining the attack. **12...Rb8** A clever move − protecting b7 and also the ♗b4 (because after 13.♗xc6 bxc6 the rook covers the bishop).

[12...Ba5 13.Bg5!? Qe8 14.g4!?∞ not letting the ♘h6 come to f5 and threatening ♕e3! I would say the position is unclear but Black is under some pressure to find good moves. White has easy moves like ♕e3 or ♘c3−♘e2−♘g3 improving his position.]

13.Bxh6!? Af course! White wants to weaken Black's king and get active play for the sacrificed pawn. Though White played ♔f1, he king seems to be safter than Black's. White wants to play on with ♕e3−♘c3−♘e2−♘g3 − to throw all his pieces into the attack! **13...gxh6 14.Nc3** White's knight wants to go to e2 and g3, followed by ♕e3! **14...Be6** Now White can improve his idea from the game with the immediate **15.Ne2N**

[15.a3 Be7 16.Ne2 Bf5 17.Qe3 f6 18.e6 Qd6 19.Nf4 Be4 20.h4 Ne5 21.Rh3 Ng4 22.Qd2 Kh8 23.Ng1 c6 24.Be2 f5 25.Bd1 c5 26.dxc5 Qxc5 27.Rc1 Qd6 28.Nge2 Rbd8 29.Nd4 Ne5 30.Be2 Rg8 31.Nb5 Qb6 32.Qb2 Bf6 33.Qd4 Qxd4 34.Nxd4 Ng6 35.Nxg6+ Rxg6 36.Nf3 d4 37.Bb5 Be7 38.Bd7 Bxa3 39.Rd1 Bc5 40.h5 Rg7 41.Rg3 Rdxd7 42.exd7 Rxd7 43.Rc1 b6 44.Ne5 Rc7 45.f4 Bd5 46.Ke2 a5 47.Nd3 Bd6 48.Rb1 Rb7 49.Rc1 Rb8 50.Ne5 Re8 51.Kf2 Rd8 52.Rd3 Bc5 53.g3 a4 54.Ra1 b5 55.Rc1 Ba7 0−1 (55) Miettinen,K (2294)−Haraldsson,H (2390) ICCF email 2007]

For example **15...f6!** I guess Black has to play this move somewhen anyway (this is of course just possible because White does not have a black−squared bishop anymore!) **16.Nf4!? Qe8!**

It is necessary for Black to cover the ♗e6!
[16...Bf7?? 17.e6!±]
17.Qe3 fxe5 18.Nxe5∞ reaching a very complicated position. White's pieces are very active and Black has to play very precisely just to hold the position! White can improve his position with ♖e1 and later (maybe) ♘h5!?

This is absolutely a model game from the black point of view. Though the favoured grandmaster gave away the advantage he had first achieved (around move 30) and at the end even lost (probably by overstepping the time control in an approximately level position). Dies ist durchaus eine Modellpartie aus schwarzer Sicht. Wenngleich der favorisierte Großmeister seinen zunächst erspielten Vorteil wieder hergab (um den 30. 10.d5! There is an easy rule for White: If Black does not play ...d5, I will do so! White sacrified a pawn, but now he takes the initiative and pushes Black back!

10...Na5

[This move is lost by force: 10...Nb8? 11.d6!

A) if 11...cxd6 12.Qd5 just threatens to mate. If Black goes Rf8 the king will stay until his mate in the middle. 0−0 13.Ng5!

A1) 13...Bxg5 14.Bxg5 Qb6 15.Be7+− with a winning position for White. *(* even stronger is *15.Rfe1* with the idea of Re8! and then Qxf7. *)*;

A2) 13...Qe8 14.Re1 Nc6 15.Nxh7! Kxh7 16.Qh5+ Kg8 17.Re3+− with a mating attack!;

B) 11...Bxd6 12.Re1+ Be7 now you can see why this move d6! was a very strong one. White sacrificed a pawn and could a) bring his rook to e1 (with a pin on the Be7) and b) White's Bc4 has won back his diagonale to f7! *(*White wins easily after *12...Kf8 13.Bg5 f6 14.Qd5+−)* 13.Bg5! this is maybe the easiest win for White. Nc6 14.Ne5+− a clever move exchanging the Nc6 so the Be7 is hanging. Nxe5 15.Rxe5 Kf8 16.Qd5 Qe8 17.Rxe7 Qxe7 18.Bxe7+ Kxe7 19.Qxf7+ Kd8 20.Qxg7 Re8 21.Qf6+ 1−0 (21) Ardiansyah,H (2380)−Mohamed,B Singapore 1979 EXT 2020 [chris]]

11.d6!! Winning again by force!

[White also gains an advantage after 11.Bd3!?

A) 11...0−0 12.Qa4! b6? *(12...c6 13.Re1+−* threatens either to take on e7 (and then e5) or just simply Qe4 with a double attack! *)* 13.d6! a sacrifice opening also the diagonale to a8! Bxd6 14.Qe4+−;

B) 11...d6 12.Re1 0−0 13.Qa4 b6 14.Qe4+− g6 15.Qxe7 Bg4 16.Qxd8 Raxd8 17.Nd4 Bd7 18.Bg5 Rde8 19.Be7 1−0 (19) Cortiella Valles,R (2079)−Subarroca Blanch,F (1951) Tornabous 2014]

11...cxd6 12.Bxf7+ Kxf7 13.Qd5+ Kf8 and now stronger would have been **14.Bg5!** with the idea to make pressure on the Be7 and Na5!

[The game went on like this 14.Ng5!? Qe8 15.Qxa5 Qg6 16.Re1 h6 17.Nh3±]

14...Nc6 15.Rae1+− This is just winning for White. Re4−Rf4 is a very big threat! Conclusion: It is clear that Black can play 8...Nxc3, but after 9.bxc3 9...d5! has to be played. Otherwise White is more or less already winning by playing 10.d5! himself.

14.d4 Ne6 This looks a bit provocative, but in fact White cannot get any advantage by blocking the centre with d5. This would just enable the start of active operations based on ...f5. Esta jugada parece un poco provocativa, pero en realidad las blancas no sacarian ningun provecho del bloqueo del centro con d5. En tal caso, serian las negras quienes podrian empezar operaciones activas basadas en f5. **15.Nf1** Since his initial

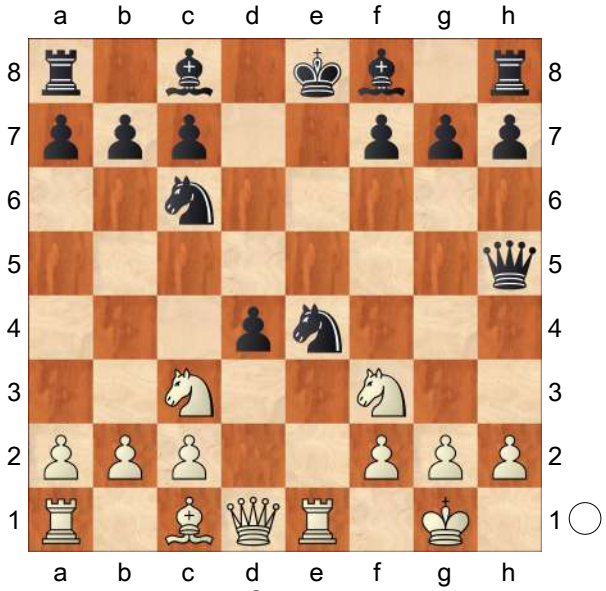
Las blancas deciden dirigir este caballo hacia d5, aunque este plan supone considerable perdida de tiempo. **15...Rd8!** Thisslightly mysterious move anticipates White's plan. One of the permanent threats consists of the exchange on e5, especially after the knight reaches the d5−square. In such a case, the usefulness of the rook on d8 becomes obvious. Esta misteriosa jugada anticipa el plan de las blancas. Una de las amenazas permanente es el cambio en e5, especialmente si el caballo logra instalarse en d5. 33.Kd2 Qe7! It might seem that this is the preparation to the advance of the g−pawn. In fact, it is better to maintain this threat in reserve, in order to avoid weakening the position of the own king. The queen's retreat is the signal to an attack on the opposite wing, where the enemy king tries to find a reliable shelter. Aparentemente este es el inicio del plan basado en el avance del peon g para molestar al alfil enemigo. En realidad, es mejor dejar esta amenaza en estado latente, para no debilitar sin necesidad la posición del enroque. La vuelta atras de la dama constituye el comienzo de un ataque contra la futura residencia del rey enemigo. **34.Kc1 Qc7 35.Qb3 b5 36.Kb1 a5** White cannot defend against threats on both sides. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0 Sicherlich eine kleine Überraschung für meinen wie immer gut vorbereiteten Gegner, meistens spiele ich 5. e5. **5...Nxe4 6.Re1 d5 7.Bxd5 Qxd5 8.Nc3 Qh5!?**

[Sicherer ist auf jeden Fall 8...Qa5 9.Nxe4 Be6 10.Bd2]



Das ist eine Kampfansage, derZug gilt als etwas zweischneidig. **9.Nxe4 Be6 10.Bg5 h6!?** Das ist schon "Provokation", da auch der nächste Zug bekannt ist. Mir war klar, daß ich in einer "Vorbereitung" steckte. **11.Bf6** Damit bleibt Schwarz "blockiert", denn dieser Läufer ist über mehrere Züge nicht zu nehmen. Offensichtlich wollte Oliver Kniest die sich nun ergebende verpflichtende "Hängestellung" der weißen Leichtfiguren ausnutzen. **11...Qg6 12.Nh4 Qg4N** Eine Neuerung, die sich aber wenig bewährt. Gespielt wurde schon 12.−♕h7, worauf mir 13. ♕h5 ♔d7! nicht für Weiß gefällt, ich hätte 13.f4 versucht. **13.Qd3!** Eigentlich logisch, schien aber die schwarze Vorbereitung zu durchkreuzen, mein Gegner "bebrütete" diese Stellung nun fast 30 Minuten. **13...Qh5?!** Für diesen erneuten Damenzug hat Schwarz keine Zeit, es mußte unbedingt

13.−♗e7 gespielt werden.

9.Bb3 Ng4 10.Re2 Kh8 11.h3 Not the right direction but we have already examined a couple of games in this section with this theme of an early exchange of White's queen's bishop against Black's king's knight: In the Tromp 2...e6 3.e4 h6 4.Bxf6 Qxf6 5. It is hard for White to find anything to get his teeth into, no strong outposts for his knights, while the opponent gradually catches up with development before taking advantage of his two bishops.

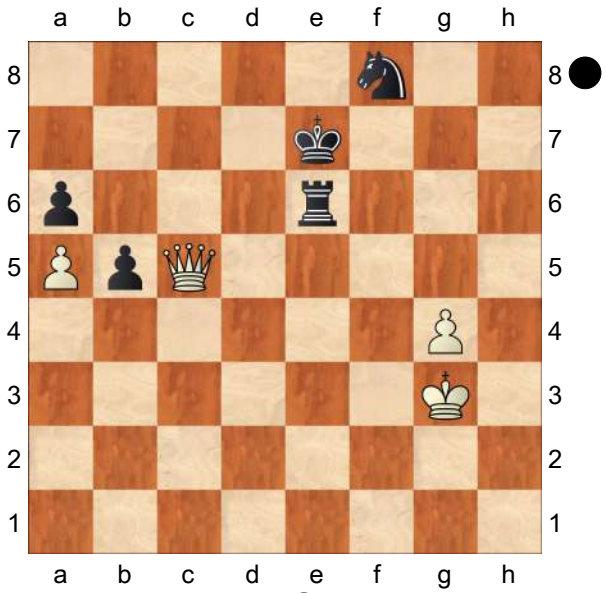
Trotz des beträchtlichen Materialvorteils ist Weiß nicht in der Lage, den Gewinn zu erzwingen. Der schwarze Turm besetzt weiterhin die sechste Reihe,



geschützt durch den Springer, der wiederum durch den König geschützt wird. Wenn Weiß seinen König von g3 nach f5 vorzieht und dann auf e6 die Dame für Turm und Springer opfert (DxTe6 SxDe6, Kxe6), würde Schwarz seinen König auf g7 oder g8 stellen, um den weißen g−Bauern aufzuhalten, während der schwarze b−Bauer nicht mehr aufgehalten werden kann. Ein sehr seltenes Beispiel, bei dem die Dame den Sieg gegen Turm und Springer nicht erzwingen kann. Malgré le considérable avantage matériel les Blancs sont incapables de forcer le gain. La Tour noire continue à occuper la sixième traverse, protégée par le Cavalier, lui−même protégé par le Roi. Si les Blancs avancent leur Roi de g3 en f5, sacrifient ensuite en e6 la Dame pour Tour et Cavalier (DxTe6 SxDe6, Kxe6), les Noirs placeraient leur Roi sur g7 ou g8 pour arrêter le pion g blanc, tandis que le pion b noir ne pourrait plus être arrêté. Un très rare exemple où la Dame ne peut forcer la victoire contre Tour et Cavalier.

Turnovo−open (5) 2005
[FM Nikolay Yordanov]

In that game, you will see how to attack the opponent's king in h−file when both sides have castled on the short side. Also, I played one of the oldest openings in chess − the Italian game. That opening is good for beginners, because White follows the basic opening principles of fighting for the center and taking care of the king's safety. From there, the game can turn into either tactical or positional struggles. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3!? a6 6.Bb3 d6 7.h3** The idea of that move is to prevent Bg4. **7...Ba7 8.0−0 0−0 9.Re1** with idea Nbd2, Nf1, Ng3 **9...Qe7 10.Nbd2±** A typical moves in Italian game for both sides. **10...Nh5 11.Nf1 Qf6** White has to think about how to develop their non−active pieces. **12.Be3** It's good to exchange the black−squared bishops because the bishop on a7 can be very dangerous. **12...Bxe3**

[12...Nf4 13.d4 Ne7 14.Ng3± White has e pretty nice position because they control the center, the knights are very strong, ready for an attack or defense.]

B) 12...Nd5 hier kann Weiß einfach 13.f3 spielen, mit einem besseren Endspiel. 13.Nf3 Nf4 14.Qxd8 Raxd8 15.Bxf4 Rxf4 16.0−0±;

C) 12...Bxf2+!? Objektiv ein sehr gutes Opfer, aber vielleicht nicht praktisch! Schwarz erreicht Remis, aber das Problem ist, dass er sehr präzise und genau sein muss! Es ist also ein Zug mit hohem Risiko. 13.Kxf2 Die nächsten Züge sind erzwungen. Ng4+ 14.Kg1 Ne3 Schwarz gewinnt die Figur zurück, aber sein ♘pringer ist auf c2 gefangen. 15.Qe2 Nxc2 16.Rb1 N6d4! Sehr präzise. Schwarz kann es sich nicht leisten, Weiß Zeit zu lasse,seine Position zu festigen. 17.cxd4 Qxd4+ *(*Nicht *17...Nxd4 18.Qe1 Qg5 19.Kh2* und die weiße ♕ame kommt bald nach g3 ,und Weiß kann sich gegen alle Bedrohungen wehren. *)* 18.Kh2 Rf2

19.Qg4□ Der einzige Zug Ne3 20.Qxe6+ Abgesehen davon, dass Schwarz gezwungen wird, ein Tempo zur Verteidigung zu spielen, gelingt es Weiß, ein oder zwei Bauern zu einzusammeln. Kh8 21.Rg1 Defending the crucial g2 spot. Now White wants to get rid of the knight on e3. He can do this by playing ♘f3 or ♘b3 next, attacking the Black Queen and allowing his bishop to capture the annoying knight next. Qd3! This immobilizes White's forces right now. Black is also threatening ♕e2. 22.Qxe5 Nicht nur ein Bauer, sondern auch die ♕ame ist auf dem Weg nach g3, wo sie wichtige Felder verteidigen wird. Hier hat Weiß bisher perfekt gespielt, und er hat eine Möglichkeit, ein Remis zu erreichen. Die Engine findet alles in Sekundenschnelle .Das Problem ist, dass Schwarz nicht einmal einen Bauern für die Figur hat, und ein Fehler führt zum sofortigen Verlust der Partie.

C1) Schwarz kann ein Remis erzwingen durch 22...Nxg2! Die Varianta ist allerdings nicht so einfach; Schwarz muss noch sehr präzise spielen.

C1a) 23.Rxg2 Rxg2+ 24.Kxg2 Qe2+ führt sofort zum Dauerschach. 25.Kg1 *(25.Kg3 Qe1+)* 25...Qe3+=;

C1b) 23.Kh1 Raf8! *(23...Qxh3+ 24.Qh2 Qg4 25.b4* gefolgt von ♖b3 im nächsten Zug. Weiß steht besser. *)* 24.Qc3 Qe2 25.Qg3 Und nun muss Schwarz den einzigen Zug finden R8f7! den lebenswichtigen ♙g7 zu schützen. Schwarz zieht alle Register ,die sind aber auch nötig wie die Engine aufzeigt. 26.Rxg2 *(26.Qg4 Ne3)* 26...Rxg2 27.Qxg2 Rf2=;

C2) 22...Raf8? Der Fehler der zum Partieverlust führt. Das sieht sehr natürlich aus, aber danach gelingt es Weiß, seinen ♔önig zu konsolidieren und zu verteidigen. 23.Qg3 Die ♕ame ist die beste Verteidigerin des ♔önigs. Sie kontrolliert von g3 aus so viele Felder. Das Spiel ist für Schwarz verloren, nur mit einem Fehler. 1−0 (26) So,W (2765)−Anand,V (2758) Wijk aan Zee 2020]
