8.g3 Nxg3 9.hxg3 Qd4+
[9...Qxg3+ 10.Qf3 Black must exchange queens and is virtually lost]

10.Kf3□ d5 11.Rh4
[11.Be2!? 0−0 12.Kg2 Rxf7 13.Rf1 Rxf1 14.Qxf1± This is perhaps a much safer way to keep a small advantage. However Martin Bennedik gives Be6 and judges that Black has enough compensation.]

11...e4+ 12.Kg2!
[12.Ke2?!
A) 12...Qxc4+?! 13.d3 exd3+ 14.cxd3 Bg4+ 15.Kd2 Qb4+ *(15...Bxd1 16.dxc4±)* 16.Nc3 Bxd1 17.Rxb4 Nxb4±;
B) 12...g5! 13.Nxh8 gxh4 14.Qf1 Qxc4+ 15.Ke1∓]

12...0−0
[12...Rf8 It's difficult to determine if this is better. 13.Nc3!? *(13.Rf4!?; 13.Rf4!?* de Jongh, H. *)* 13...Rxf7 *(13...Qxc4 14.Ng5)* 14.Bxd5 Qf2+ 15.Kh1]

13.Qh5
[13.Nh6+ gxh6 14.Bb3 Qf2+ 15.Kh1 Qf1+ 16.Qxf1 Rxf1+=]
[13.Rf4!? Qxc4
A) 14.Na3 Qc5
A1) 15.Qh5!? Qe7 16.Ng5 h6 17.Nh3 *(17.Rxf8+ Qxf8 18.Nh3 Qf3+)* 17...Bxh3+ 18.Qxh3± Rxf4 19.gxf4;
A2) 15.Ng5 Rxf4 16.gxf4 h6 17.Nh3 Bxh3+ 18.Kxh3 Qf2 19.d3 e3;
B) 14.Ng5 Rxf4 15.gxf4 h6 *(15...Bf5 16.Na3 Qc5 17.d3 exd3 18.cxd3 Re8⩱* Martin Bennedik *)* 16.Nh3 Nd4 17.Nc3⩲]
[13.Bb3 Be6!? This interesting move is a discovery by Martin Bennedik. He claims it's winning for black and he is definitely right after Ng5. However a good try might be Qh5
A) 14.Qh5!? Rxf7 *(14...Bxf7 15.Qxh7#)* 15.Qxh7+ Kf8 16.Rf4 Rxf4 17.gxf4 Bg4!? 18.Qh8+? *(18.d3! Re8±* i see no clear way to keep black's initiative going *)* 18...Kf7 19.Qxa8 Bf3+ 20.Kf1 e3 21.Nc3 exd2 22.Bxd2 Qxd2 23.Rd1 *(23.Bxd5+ Bxd5 24.Nxd5 Qxd5 25.Kf2 Qd2+⩱)* 23...Qg2+ 24.Ke1 Qg3+=;
B) 14.Ng5 Rf2+ 15.Kh1 Qf6 16.Rf4 *(16.Kg1 Rf8 17.Rf4 Rxf4 18.gxf4 Qxf4∓)* 16...Qh6+∓]

13...Rxf7
[13...Qxc4? 14.Qxh7+ Kxf7 15.Rf4++−]

14.Bxd5 And here white offered a draw, which i accepted. Indeed black can draw by Qf2+. White might have tried Rf4 instead which offers him a chance to play for a win.
[14.Qxh7+ Kf8 15.Rf4 Rxf4 16.gxf4 Qxc4∓]
[14.Rf4!? And now the position is very unclear. The best chance seems not to allow the exchange of rooks and play Bf5. Also possible is Be6, but i feel that white may claim som advantage with Bb3.
A) 14...Bf5!? 15.Be2 *(15.Bf1 Raf8 16.Nc3 Qe5 17.Ne2 e3−+; 15.Bb5 Raf8 16.Bxc6 bxc6 17.Nc3 Rf6 18.Ne2 Qc5⩱)* 15...Raf8 16.c3 Qb6⩲;

B) 14...Be6
B1) 15.Be2 Rxf4 16.gxf4 Qf6 17.d3? *(17.Nc3 Nb4 18.Bd1 Qxf4 19.a3 Rf8)* 17...e3 18.Nc3 Qxf4;

corr WS/M/682 20.02.2018
[Mulde]

Dieses Turnier wird auf dem Server gespielt. Das Turnier wird am 20.02. 2018 gestartet. Für dieses Turnier ist kein fester Endtermin festgelegt. Es wird ICCF Standard−Zeitkontrolle 10 Züge in 50 Tagen mit Verdopplung nach 20 Tagen verwendet. Wenn die Bedenkzeit abgelaufen ist, oder bei Verstoss gegen Regel 3b, wird das Ergebnis der Partie automatisch eingetragen. Eine mögliche Ausnahme sind genehmigte Rücktritte vom Turnier. Jeder Spieler hat 45 Urlaubstage im Jahr. In diesem Turnier gibt es keinen Sonderurlaub. Es können Eventualzüge eingegeben werden. Dieses Turnier gestattet Reklamationen auf der Grundlage von Endspieldatenbanken mit sechs Steinen (Tablebases). Die 50−Züge−Regel wird in Stellungen mit sieben oder weniger Figuren nicht angewendet. Remisangebote sind auf eines pro Spieler alle zehn Züge beschränkt. Bei gleicher Punktzahl entscheidet die Baumbach−Regel über die Platzierung. Falls erforderlich werden Abschätzer vom Server ausgewählt. Andere Turnierteilnehmer können die Partien anzeigen nachdem sie beendet wurden, und mindestens 10 Partien im Turnier beendet sind. Die Partien können öffentlich angezeigt werden nachdem sie beendet wurden, und mindestens 10 Partien im Turnier beendet sind. Dieses Turnier wird von Kracht, Jörg organisiert. + + + C50: Evans−Gambit + + + Stockfish 210218 64 POPCNT (5m): 'C50: Evans−Gambit C50: Evans−Gambit ' Ernst Falkbeer in der Wiener Schachzeitung 1855, S.55: "Die weissen Steine wurden von dem Grafen Vitzthum, dem Praesidenten der Leipziger Gesellschaft 'Augusta' gefuehrt, einem ausgezeichnetem Schachspieler, dessen geistreiches und originelles Spiel zu bewundern uns mehrfach die Gelegenheit geboten wurde." Dear Renzo, nice to get you know! I'm Ralf Mulde, born in 1962 in Bremen where I still use to live. It's in the very north of Germany with a long ship−trading tradition (Bremerhaven). Have a nice tnmt! All the best, Ralf/ **1.e4 e5** Hi, chessfriend! Good games from Pesaro, Italy! Renzo **2.Nf3** Ah, Pésaro in Marche! A place with a deep history with names like della Rovere and Sforza, and this means as well: Borgia. Well,

nowadays, we haven't any chance to have a cup of coffee with them on Piazza del Popolo. − All the best from Bremen, Ralf/ **2...Nc6** ....but we can imagine of! Greetings from Piazza del Popolo, Renzo **3.Bc4** Dear Renzo, after talking about Borgia & friends, an Italian game is clearly premature. All the best, Ralf/ **3...Bc5** Ah! Ah! Ah! Really nice! You're just the most pleasant player of ICCF, I suppose you will play Evans gambit, now! − Regards, Renzo

[3...Nf6 4.d4 exd4 5.e5 bringt ebenfalls neuen Schwung ins Leben. Ng4

4.b4 Dear Renzo, I love to do what you seem to like. Starting the game, I was prepared to continue with 4.c3 or 4.d4,

but you want me to celebrate Cpt Evans' dinner, and so I do. "Don't put a blame on me" (Rita Hayworth) if I'll going to lose now! Have a nice weekend. Ralf/ + + + Den tollen 40er Jahre Song der roten Rita kannte er wohl nicht. − Eig. hatte ich für die Partie das Italienische Gambit mit 4.d4 geplant gehabt, aber nach gar nicht allzu langer Beschäftigung damit nahm ich von dieser − für mich − Uraufführung Abstand. Also Linda Evans ... "Dlese interessante ldee geht auf den englischen Schachmeister und Schiffskapitän William Davis Evans (1790−1872) zurück. Weiß ist zu einem Bauernopfer bereit, um unter Tempogewinn das Zentrum mit d2−d4 zu besetzen. Das Evans−Gambit, wie die mit 4. b4 eingeleitete Zugfolge nach seinem Erfinder benannt worden ist, ist eine selbstständige Eröffnung ..." ["Italienische Partie ... richtig gespielt, Konikowski / Bekemann, Joachirn Beyer Verlag => Schachverlag Ullrich, Eltmann 2013, S.12"] Das warf mich vorläufig zurück auf "Italian Game and Evans Gambit", Jan Pinski, Everyman Chess Ltd., London 2005, in das EG die Seiten 57−139 beansprucht, eine nützliche, aber nicht gerade enzyklopädische Darlegung. + + +

[Ich hatte die kleine Aufwands−Entschädigung des Deutschen Schachbundes für meine Dienste als Texter der Deutschen Schach−Amateurmeisterschaft DSAM dazu genutzt, mir ein zum Thema gehöriges Buch zuzulegen: "The Italian Gambit System. Including the New Miami Variation. A Guiding Repertoire for White −1.e4. A Chess Masters Guide to the 1.e4 Player's Repertoire.", Jude Acers, George S. Laven, Trafford Publ. , Victoria, Canada 2003. Schon der lange Titel nimmt die Tradition der Renaissance auf. Das dicke Papier verdeckt, dass es sich nur um real 104 Seiten handelt. Dann ist da aber zumindest noch das Buch, das ich ungerechterweise, aber kurz mit "Bekemann" zitiere. Dessen Name ist mir einfach schon länger als der von Konikowski geläufig. "Italienisch ... richtig gespielt", Jerzy Konikowski, Uwe Bekemann, Eltmann 2013, genauer: ISBN 97 8−3−940417−16−9, 1. Auflage 2013, © 2013 by Joachirn Beyer Verlag. Ein Imprint des Schachverlag Ullrich, Zur Wallfahrtskirche 5, 97483 Eltman. "Mamma Mia! So wie man in Italien mit diesem Ausruf auch auf Überraschungen reagiert, kann sich Schwarz hier in der Italienischen Partie über dieses fragwürdige gegnerische Bauernopfer freuen. ... Pronto, Schwarz greift zu, das Schlagen mit dem Läufer ist seine stärkste Antwort. 4...exd4 lässt eine Stellung aus dem Schottischen Gambit entstehen, nach 5.0−0 NNf6 6. e5 geht das Spiel in das Zweispringerspiel im Nachzuge über (Max−Lange−Angriff). ... Der Versuch des Anziehenden, Schwarz mit einem Bauernopfer einen Eröffnungsvorteil abzuringen, ist für diesen nicht gefährlich. Allerdings muss Schwarz genau spielen." [Bekemann] 4.d4 Sehr nett. Aber neben dem Herrn Evans hatte ich ja auch schon eine Romanze mit dem "Italian Gambit" 4. d4 begonnen.

2013]
Dear Renzo, I remember a few Russians "playing" like this. After I managed to get a won position against one of them with approx. one move per year, I resigned the (won) game. Chess is made to have fun − and I just played another game. − Johnny Owens is one of these "Russians", and Tessone as well. I really wonder why they do so. − All the best from Bremen, Ralf/ **9.e5 Nc6** Dear Ralf, why "russians"? − Happy Sunday, Renzo **10.Qh4** Dear Renzo, why not Russians? More seriously: I got the experience now with half a dozen "not moving players" from there. When we played by post, half of the suffering players guessed the post latestly behind Moscow would be delivered (if ever) by reindeer sleds, or they would conference with some grandmasters in some clubs. Now I fear some of them are simply no gentlemen. − All the best, Ralf/

D) 12...h5 Das sieht sehr aktiv aus. Allerdings loggert es auch − man sehe die schwarzen Felder am K−Flügel; nicht umsonst spricht man bei Metall beim Abdunkeln ja auch vim "Mattieren" ... − und zudem ist Schwarz, wie ein Geschenk unterm Lametta, am D−Flügel noch überhaupt nicht ausgewickelt. Wohin wird sich der schwarze König denn bald wenden wollen? Insgesamt glaube ich, dass Renzos Neuerung keine gute Innovation sein kann. 15...Bg4 Hi, Ralf; I admire your decisions! Me, i prefer to anchor "russians" at board and wait −−if possible−− their resign! Good sweet week! Renzo **16.Bf4** Dear Renzo, your method may be a bit boring but will bring more plus in the tables and ratings than mine. It remembers me to the very successful Italian style to play football since Giuseppe Meazza over and over again. You can't be wrong due to the fact Meazza (and his team, of course) was the first football−champion of the world in 1934 (when Alekhine was champion in chess). All the best from Bremen in summer Ralf/

17.Nb5 Dear Renzo, yes, when I was a little school−boy, Beckenbauer and Netzer played football in an unknown elegant style around 1972. But when GER became World−Champ, Netzer's best days where already in the past. But around 2015 Netzer himself as a TV−commentator pointed out, the TV−records from these days (compared with today) seem to run in slow−motion. With his style to play today he would never have a possibility to succeed just in 3rd league. Well, it's the same in tennis or in any other sports: Things develop over and over. And it's a mess, both − Beckenbauer and Netzer − are entangled in some financial FIDE−corruptions. More the stupid Beckenbauer than the smart Netzer. They all can't get enough. Beckenbauer's arm was in Mexico 1970, right? Football in really a different century ... All the best, Ralf/ **17...Bxh4** Hi, Ralf, from many years I find true football seeing play Zdenek Zeman's teams.No drugs to players, max respect to audience and...it's better to win 6−−5 than loose 0−−1!!!! All the best, Renzo **18.Nxh4** Dear Renzo, indeed it's always better to win than to lose! Well, these days we see every sports on top−level commercialized. It's just an industry with its focus on benefits and provision. There is no place for fun & beauty. Only results are important. And this is one reason why the fans will prefer to stay at home in future when the referee opens the game. And that's another reason why I like girl's football and dancing more than this sport−industry (including olympis). All the best frome Bremen, Ralf/ P.S.: Unfortunately, I don't know anything about Zeman. − − Vielleicht geht das ja doch gerade noch mal gut mit dem Linda−Evans−Gambit, dachte ich mir ... **18...Bxe2** Hello Ralf, congratulations for your win on Mr Perry! Beauty and fun from Pesaro, Italy! Renzo **19.c4** Dear Renzo, thank you so much for your congratulations on my win against "Fred" Perry! He was quite passive, my pieces became better and better, he was forced to drop a piece, and I was able to win. The old simple story. All the best from Bremen, Ralf/

21.Nf5 Dear Renzo, your question about spiritualism reminds to a classic scene with a very young girl and a pour assessor in 19th century. I changed some words in his answer: ""How do you feel about religion? Tell me, pray." ... "Well, I have studied philosophy, / economy as well as history,/ not to my sorrow, theology; / studied them well with ardent zeal, / yet here I am, a wretched fool, / no wiser than I was before." − − My all.time hero is this guy with his really impressing beard: https:// it.wikipedia.org/wiki/ Ludwig_Feuerbach There is no God. Everything is just an idea and impression.

Dear Renzo, sounds a bit like a jokey Gershwin− or Irvin−Berlin−song. You are only around 70 years too late with it. − Trees ... bees ... may be a link to Divina Comedia? Did you come in touch with a guy called Dante Aleghieri? Or are you Dante himself at the end? − All the best from Bremen, Ralf/ **25.Bh6!!** Dear Renzo, sounds a bit like a jokey Gershwin− or Irvin−Berlin−song. You are only around 70 years too late with it. Trees ... bees ... may be a link to Divina Comedia? Did you come in touch with a guy called Dante Aleghieri? Or are you Dante himself at the end? All the best from Bremen . Ralf/ + + Dieser Zug ist doch einer Göttlichen Komödie würdig! Ärgerlich ist, dass jeder weiß, dass ich ihn niemals selbst entdeckt hätte − und Bh6 also ein reines Computer−Produkt ist. Das Fernschach nimmt und unsere Träume, besser gesagt: die Romantik des Spiels. Insofern kann man auch darüber nachdenken, ob heute überhaupt zwei Ausrufezeichen angebracht sein können, die ja doch immer zum Teil für einen überragenden Einfall standen − und der kann der Natur der Sache her nur menschlichen Ursprungs sein. Ein Computer hat keine Einfälle, keine Ideen, überragende schon gar nicht. Ein Computer hat nur Einsen und Nullen. Jedenfalls ist die Partie umgeschlagen − dieses obskure und vermutlich sogar fehlerhafte Linda EVANS−Gambit ließ mich erst klar schlechter stehen und jetzt ... nicht mehr. Schon seltsam, dass so etwas trotz all der Maschinen heute noch möglich ist. **25...gxh6** Dear Ralf, each one of us is Dante Alighieri after the Comedia contact! It is inside our souls. And chess is the same.....Divina Chess Game? Too sun on my head! Best days, Renzo **26.Qg6** Well, "The Sun Is Gonna Shine Anymore ..." **26...Qc7** ....and Moon carry happyness in my soul... Good Fifa cup, if you will! Renzo **27.a5**

Dear Renzo, a lot of people in GER stirred at the screen in order to see a 10−0 in minimum in GER−MEX, but the Americans played − as I was told − much more quickly, had the much better tactic, and won as the clearly better team. The streets were so comfortable silent after this ... Go on, Mexico! (How can they do a header with their sombrero ahead ...?) Have a very nice week, Renzo! All the best, Ralf/ **27...Ne5** Ah! Ah! Ah! In Italy we hav'nt Fifa−cup problem....my football simpathy to Costarica! − Best days, Renzo

[Die Alternative ist nicht besser: 27...Nc8 28.Ra3 Nd6 *(28...h4 29.Qxf6+ Kg8 30.Qg6+ Qg7+− 31.Nxg7 N8e7 32.Qf7+ Kh8 33.Qh5+−)* 29.Qxf6+ Nf7 30.Rg3± Re8± 31.exf7 Qxf7 32.Qd6+ Re7 33.Rf3 Ne5 34.Rf4 Kg8 35.Nxe7+ Qxe7 36.Qb8+ Kg7 37.Re1 Nf3+ 38.Rxf3 Qxe1+ 39.Kh2 Qe7 40.Rg3+ Kf6 41.Qf4+ Ke6 42.Re3+ Kd7 43.Rxe7++−]

28.Qxf6+ Dear Renzo, yes indeed, in ITA you don't have problems at all ... only one or two exploding vulcanos have been missed to complete the situation. Seriously, the situation all over the world is very complicated. The most reason is the "march of poverty" from Africa to Europe. And there is no human solution to handle this global problem which will last for years and years. All the best, Ralf/ **28...Kg8** Good morning Ralf, i'm agree with your opinion. I hav'nt a solution; my few money contains a part for a family with two children and a almost insane mother. Together we'll cry, together we'll smile. long live our hearts, Renzo **29.axb6** I don't know what to say. We agree with another, and we can't change anything. However, have a nice weekend, Renzo! Ralf/ **29...Ng4** .... I'm not agree .... anything each one do make a change inside, outside and all over universe ... I suppose it's true!

[29...Qb8 30.e7 Ng4 31.Qe6+ Kh8 32.Nd6 Bb5 *(32...Qg8+− 33.e8Q Rxe8 34.Qxg8+ Rxg8 35.Nxc4 dxc4 36.Rd5 h4 37.Rh5 c3 38.Rc5 Rhg7−+)* 33.Rxd5 Qg8 34.Re1 Bc6 35.Rc5 Qxe6 36.Rxe6 Bd7 37.Nc8 Rg7 38.Rc7 Rg8+−]

30.Qg6+ Rg7 Wenn's gerade so nett nach vorne geht, tauscht man eher ungern die Damen, aber hier ... "Good morning, Ralf, I can't answer about 'bf effect'; I tell you I'm follower of ancient Hawaian spiritualism called 'ho'oponopono'. I found peace and interior evolution. It's sweet only to pronunce! Lucky week−end, Renzo" **31.bxc7** Dear Renzo, first I thought you liked to kidding me, an I was going to answer: <The only Hawaiians you really use to follow are like Tia Carrere (Relic Hunter), and Nicole Scherzinger ...! And, may be, Queen Lili‘uokalani (*1838 +1917), last Queen of Hawaii. − I am pretty sure James A. Michener had put her into his great work dealing with the island. Aloa! Ralf/ > But then I fall in doubts, and searched for this strange word "ho'oponopono". Now it is clear: No joke. It seems to be an old, deep, mighty kind of tradition or religion. It gives you peace, and so you do right with it. [You will need it in this position :−)] Yours wishing all the best, Ralf/

[Nicht ganz so gut wäre 31.Nxg7?? Qh2#]

31...Rxg6 Hi, Ralf, thank you for trust in

my words! Today I will have a meditation to vanish your pawns...Fine sunday, Renzo **32.Re1!** Dear Renzo, maybe, the Hawaiian Goddess Pélé could support to make my pawns vanish? All the best, Ralf/

[32.Ne7+? Kg7 33.Re1 *(33.Nxg6 Kxg6∓* und Schwarz hat einfach zwei Figuren für einen (schwarzen) Kohle−Klotz − mit den verstreuten, wenn auch weit voran geschrittenen (weißen) Sahne−Freibauern wird er leicht fertig, während ihm die a+b−Freibauern verfügbar sein werden. *)* 33...Nf6 34.c8R Rxc8 35.Nxc8 Ne8 36.Ne7 Rf6 37.Re5 Nc7 38.Nf5+ Kg6 39.Nh4+ Kg7 40.e7 Ne8**±**]

[Mulde]

Winner of an ICCF Master Class Tournament will qualify to one entry in the Preliminaries of the ICCF World Correspondence Chess Championship. Finishing in second place twice will count as a full qualification as well. − − − Dieses Turnier wird auf dem Server gespielt. Das Turnier wird am 20.02. 2018 gestartet. Für dieses Turnier ist kein fester Endtermin festgelegt. Es wird ICCF Standard−Zeitkontrolle 10 Züge in

50 Tagen mit Verdopplung nach 20 Tagen verwendet. Wenn die Bedenkzeit abgelaufen ist, oder bei Verstoss gegen Regel 3b, wird das Ergebnis der Partie automatisch eingetragen. Eine mögliche Ausnahme sind genehmigte Rücktritte vom Turnier. Jeder Spieler hat 45 Urlaubstage im Jahr. In diesem Turnier gibt es keinen Sonderurlaub. Es können Eventualzüge eingegeben werden. Dieses Turnier gestattet Reklamationen auf der Grundlage von Endspieldatenbanken mit sechs Steinen (Tablebases). Die 50−Züge−Regel wird in Stellungen mit sieben oder weniger Figuren nicht angewendet. Remisangebote sind auf eines pro Spieler alle zehn Züge beschränkt. Bei gleicher Punktzahl entscheidet die Baumbach−Regel über die Platzierung. Falls erforderlich werden Abschätzer vom Server ausgewählt. Andere Turnierteilnehmer können die Partien anzeigen nachdem sie beendet wurden, und mindestens 10 Partien im Turnier beendet sind. Die Partien können öffentlich angezeigt werden nachdem sie beendet wurden, und mindestens 10 Partien im Turnier beendet sind. Dieses Turnier wird von Kracht, Jörg organisiert.

6.d4 d6

[6...exd4 7.0−0± This leads to exciting positions where White is ready to sacrifice as many as three pawns. Robert Fischer− Rueben Fine is one of the classics in this line. [Sagar Shah] − Stimmt, von diesem Fischer habe ich auch schon gehört. Hat der nicht die Dübel erfunden? Das 1943 geborene Bobbele Fischer jedenfalls war in der Partie mit dem feinen Reuben genau 20 Jahre jung, was damals noch fast als Kind galt, man vergleiche, wie die "Erwachsenen" ggüb. Jimmie Dean in seinen 3 Filmen agierten. Er starb mit 24. Fine hingegen hatte mit seiner Entscheidung, zugunsten des Psychologie−Studiums (das später zu einer Reihe Bücher führen sollte, mit der er als Kapazität diese "Wissenschaft" voran brachte) und gegen die Teilnahme an der Schach−WM 1948 mit dem Wettkampf−Sport aufgehört. Es handelte sich hier also nur um eine eher unbedeutende Partie eines alten Meisters, der nichts mehr beweisen musste, mit einem immer weiter in den Irrsinn treibenden Jugendlichen. Man könnte Fine allenfalls vorwerfen, dass er Fischers behandlungsbedürftigen Zustand zwar früh erkannte, aber nicht energisch

genug Maßnahmen einforderte − aber wie soll man das auch tun ...? dxc3 8.Qb3 Qe7 9.Nxc3 Nf6 10.Nd5 Nxd5 11.exd5 Ne5 12.Nxe5 Qxe5 13.Bb2 Qg5 14.h4 Qxh4 15.Bxg7 Rg8 16.Rfe1+ Kd8 17.Qg3 1−0 (17) Fischer,R − Fine,R New York 1963.]

26.Nc4 b6 Aus irgendeinem Grunde weigerte sich mein Apparatschik, die Zugfolge korrekt und wie gewohnt von der ICCF−Seite in meine "laufende" Partie zu kopieren, damit ich sicher sein konnte, die aktuelle Stellung zu bearbeiten. Dann eben die "einmal neu macht der Mai" Methode ... + + + "Lieber Ralf, ich danke für Deine Unterstützung! Ich gratuliere zu Resultat mit Perry! Ich habe keine Pozition für Gewinn... Mit Fernschachgruss, Karel" + + + Zeit für eine Zwischenbilanz: Die weiße Eröffnung ist total gescheitert. Mit Glück wird noch ein Remis zu erreichen sein. Zwar ist das Spiel materiell ganz ausgeglichen, beide Seiten dirigieren je sechs Bauern, zwei Türme und eine Leichtfigur, aber der schwarze Turm d3 ist sehr aktiv und die weiße Bauernformation ist völlig zerklüftet und läss damit große Löcher für die schwarzen Figuren.

[26...Rxc3 27.Nd6 Rf8 28.Nxc8 Rxc8 29.Rxb7 a5 30.Ra7 c5 31.Rb1 Rc4 32.f3 Rxa4 33.Rbb7 Rf8 34.e5 h5 35.e6=]

27.Re3 Ohne nähere Beweise antreten zu können − oder zu wollen −, nahm ich nach einigem Bedenken an, dass die beste Verteidigung darin liegen müsse, die zunächst aktivste Figur des Gegners von der Weltbühne zu verweisen, was allerdings einen Bauern kostet.

[Passive Verteidigung ist häufig schlecht. Hier auch. 27.Rbc1 Ba6

□ **Akylbekov,Nasyr 2218**
■ **Mikhalevski,Victor 2581**
11th New York International (6) 16.06.18
[Mikhalevski,Victor]

1.e4 e5 2.Nf3 Nc6 3.Nc3 Nf6 4.Bc4 Bc5 5.d3 d6 6.Be3 The third most popular move in this position. White starts asking questions immediately, Black has to decide what to do with the dark−squared bishop.

[Earlier we considered 6.Bg5 , the most popular move in the position. Lupulescu,C (2594) − Georgiev, K (2645) Dresden GER 2008 [Mikhalevski,V]]

[and the current choice of top players 6.Na4 Karjakin,S (2778)−Topalov,V (2749) Shamkir AZE 2018 [Mikhalevski,Victor]]

6...Bb4 A pretty rare choice. My idea was to avoid a symmetric position and create doubled pawns, which may become a positional asset in the long−term. As you're going to see this was the case in the current game.

[Usually Black prefers 6...Bb6 , which retains the tension.]

7.a3?! I find this move weird as Black wants to take on c3 even without being forced to do so.

[Both 7.0−0]

[7.h3 make more sense.]

7...Bxc3+ 8.bxc3 Ne7 A typical transfer of the knight to g6, where it's better placed compared to c6, being restricted by the c3−pawn.

[Both 8...Be6!?]

[and 8...0−0!? are good alternatives.]

9.Nh4 This looks inaccurate, as it can be met by a counter attack in the centre.

[The only way to fight for an opening advantage is 9.Bg5! Ng6 *(* or *9...c6 10.0−0 Ng6 11.Nh4!)* 10.Nh4! An important move, which stops 10... h6. Nf4! 11.0−0 0−0= with a complex position, but still the chances are roughly equal.]

9...d5! 10.exd5 Nexd5 Now the knight on h4 is misplaced. **11.Bd2 0−0 12.0−0 Bg4!** An important move, which provokes a weakening of the kingside.

13.f3?!

[13.Qc1! was necessary, when White is still ok.]

13...Be6!?

[13...Bd7!? also deserved attention, keeping the e−file open for the rook. For example, after 14.Re1 the e5−pawn can be protected by means of Re8∓ and the bad position of the knight on h4 yields Black a slight edge.]

14.Qe1 White attacks the e5−pawn and plans to transfer the queen to f2.

[After 14.Re1 c6 looks interesting with the idea to meet 15.Rxe5?! *(15.Qe2* is preferable. *)* with 15...Nd7 16.Rh5 *(*In case of *16.Re4 g5!* the knight on h4 is finally trapped. *)* 16...N5f6 17.Rg5 h6 18.Rg3 Qb6+ 19.Kh1 Nh5∓ trapping the rook on g3.]

14...Qd6! Meanwhile Black protects the e5−pawn and connects rooks.

[Now 14...Nd7?! 15.Bxd5 Bxd5 16.c4 Bc6 17.f4 is already slightly better for White, who solved the problem of his misplaced knight.]

15.Bxd5?! It wasn't necessary to exchange the bishop.

[Instead, 15.Qf2 looks more appropriate.]

15...Nxd5∓ Now Black is better thanks to his better pawn structure and the misplaced knight on h4. **16.g3**

An attempt to bring the knight back into play via g2. **16...Rfe8**

[Starting with 16...b5∓ was also strong.]

17.Qf2

[After 17.c4 Ne7∓ the knight gets access to d4.]

17...b5! Black fixes the weak pawn on c3. **18.Rfb1**

[It was better to start with 18.a4 a6∓ as in the game I managed to prevent a4 and the a3−pawn remained weak as well.]

18...Bd7!∓

[18...Qc6 19.a4 a6 20.Qe1 Bd7∓ is also clearly better for Black, but I didn't see the point in placing my queen on c6, in front of the c−pawn.]

19.Ng2 c5! Obtaining a better control of the centre. **20.Ne3 Nb6!** It makes sense to keep more pieces on the board, as White has very limited space for his pieces. **21.Nd1?!** A dubious transfer of the knight to b2, where the knight will be misplaced. **21...c4!** With unpleasant pressure on d3. **22.Nb2 Bf5!?**

[Both 22...Qc6]

[and 22...Rac8 were equally strong.]

23.Rd1

[23.Be3 had to be tried, although White's position is already difficult.]

23...Qc6! 24.Qe2 Rac8 Black has been increasing pressure on the weak pawns.

[24...Rad8!?]

25.Be1 f6 This move underlines the helplessness of White's position, as he is lacking constructive ideas. **26.h4 Bg6−+ 27.dxc4** This exchange only helps Black, but good advice for White was already costly. **27...bxc4 28.Bf2 e4!** The decisive break in the centre.

29.Bxb6?? A blunder in a lost position.

[The following line illustrates White's problems. 29.fxe4 Rxe4 30.Qf1 Nd7 31.Qg2 Ne5 32.Rd4 Re8 33.Rf1 Bh5−+]

29...Qxb6+ An instructive game! 6. Be3 is a playable line, but 6...Bb4 shouldn't be met by 7.a3.

0−1

C53

□ **Alboredo,Julia** **2216**

■ **Pereira,Silvio Cunha** **2217**

Osasco 60 Ann (8) 26.02.2022

[Alboredo,Julia]

This game was played in a closed tournament and, as is often the case in these eventos, we had plenty of time to prepare. My opponent was an experienced player, but he rarely

changed his openings, playing the same repertoire for years. So, I prepared an interesting idea for this game. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Bb6 5.d4 Qe7** this is his pet line, with many games played! **6.Bg5!?** an interesting move that I prepared based on a positional idea. **6...Nf6 7.d5 Nd8**

[If 7...Bxf2+? 8.Ke2!

A) 8...Na5 9.Bd3 Bb6 10.b4+− and the knight is trapped. Nc6 11.dxc6 dxc6 12.Nbd2 Bg4 13.Nc4 0−0−0 14.a4 a6 *(14...Be6? 15.Qc2 Rxd3 16.Nxb6+ cxb6 17.Qxd3+−)* 15.Nxb6+ cxb6 16.Qc2 Rd6 17.Rhd1+− with no compensation for black.;

B) 8...Bb6 9.dxc6 bxc6 10.Qa4! Avoiding d5. Black doesn't get enough compensation for the piece. 0−0 11.Nbd2 d5 12.Qxc6 Rb8 13.Qxd5 Nxd5 14.Bxe7 Nxe7 15.Nxe5 Ng6 16.Nxg6 hxg6 17.Rhf1+−]

[Doesn't change the scene too much 7...Nb8 8.d6! Qxd6 9.Qxd6 cxd6 10.Bxf6 gxf6 11.Nh4+−]

8.d6! white sacrifices a pawn in order to kill the c8−bishop's actions. **8...cxd6**

[8...Qxd6? would be worse because of 9.Qxd6 cxd6 10.Bxf6 gxf6 11.Nh4+− with a strategically winning position, due to Black's numerous weaknesses, in addition to the lack of development. Ne6 *(11...d5* trying to open lines for the c8 bishop, but after *12.exd5!* now the knight is dominated. *d6 13.Bd3+−)* 12.Na3+− with a strategically winning position.]

9.Na3!? Provoking Bxf2, which at first sight looks good for Black. **9...a6**

[9...Bxf2+? 10.Kf1! *(* of course not *10.Kxf2? Nxe4+ 11.Ke1 Nxg5∓)*

A) 10...Bb6 11.Nh4+− h6 *(11...Ne6 12.Nf5 Qf8 13.Bxf6 gxf6 14.Nb5+−)* 12.Nf5 hxg5 13.Nxe7 Kxe7 14.Nb5 d5 *(14...Nxe4?! 15.Qd3 f5 16.Bd5+−* with strong pressure *)* 15.Bxd5 and with a little of technique, White should be able to convert this position.;

B) 10...Bc5 a little more accurate than Bb6, going to insane variations! 11.b4 Bb6 *(11...d5 12.exd5 Bd6 13.Nh4+−)* 12.Nh4 Nd5!? 13.Qd2! Be3 *(13...f6 14.Nf5 Qf8 15.Qxd5 fxg5 16.Ke1 Nf7 17.Nb5+−)* 14.Bxe7 Bxd2 15.Bxd8 Nxc3 *(15...Bxc3 16.Bxd5 Bxa1 17.Bc7+−)* 16.Bc7 Nxe4 17.Bd3+−]

[9...0−0 lately it has been the best answer for black. 10.Bxf6 Qxf6 11.Nb5 Ne6! 12.Nxd6

A) 12...Ng5?! 13.Qd3! avoiding Bxf2 followed by Qxd6. Bc5 *(13...Nxf3+ 14.gxf3±; 13...Bxf2+? 14.Kxf2 Qxd6 15.Nxg5+−)* 14.Nxg5 Qxf2+? *(14...Qxg5 15.Nxf7+−; 14...Qxd6 15.Qxd6 Bxd6 16.Nf3±; 14...Bxd6 15.Nf3±)* 15.Kd1+−;

B) 12...Nd4! 13.Nxc8 Raxc8 *(13...Nxf3+? 14.Qxf3 Rfxc8 15.Qxf6 gxf6 16.Bd5+−)* 14.Nd2

B1) 14...Nc2+? 15.Qxc2 Qxf2+ 16.Kd1 Qxg2 17.Re1 Bf2 *(17...Qxh2? 18.Qd3+−)* 18.Bf1 Qxh2 19.Re2 Qg3 20.Nb3 Be3 21.Qd3 Bf4 22.Qxg3 Bxg3 23.Kc2+−;

B2) 14...Nb3? 15.Qxb3 Qxf2+

16.Kd1 Be3 17.Be2 Qxg2 18.Rf1+−;
B3) 14...Ne6 15.0−0⩲]

10.0−0
[10.Bd5 A little more precise, further limiting the mobility of black pieces.
A) 10...Ne6 11.Nc4 Bc7 12.Ne3
A1) 12...g6? 13.Bxe6 Qxe6 *(13...fxe6 14.Ng4 0−0 15.Nxf6+ Rxf6 16.h4 Qf7 17.Bxf6 Qxf6 18.h5+−)* 14.Bxf6 Qxf6 15.Nd5 Qd8 16.Qd2;
A2) 12...Nxg5? 13.Nxg5 0−0 14.Nf5 Qd8 15.h4 h6 16.Rh3;
A3) 12...h6 13.Bh4 g6 14.Nd2+− Rb8 15.Bb3 g5 16.Bg3 Nf4 17.Nf5 Qf8+− 18.Bxf4 gxf4 19.Qf3;
B) 10...h6 11.Bxf6 Qxf6 12.Nc4 Bc7 13.a4
B1) 13...Ne6 14.a5 0−0 15.0−0 Rb8 16.Nb6 Bxb6 17.axb6 Qd8 *(17...Nf4 18.Nd2+−)* 18.Qb3;
B2) 13...0−0
B2a) 14.a5 Rb8 *(14...Ne6 15.g3)* 15.g4;
B2b) 14.g4! Ne6 15.g5 hxg5 *(15...Nxg5 16.Nxg5 Qxg5 17.Ne3+−)* 16.h4 g4 17.Nh2 Qxh4 18.Qxg4 Qxg4 19.Nxg4+−]

10...Ne6 11.Bxf6 Qxf6 12.g3?! a natural move from a practical point of view, but not so necessary.
[12.Nc2⩲ starting the journey to d5 was a better option for white.]

12...h5?! a very optimistic move by my opponent, trying to create an attack on the kingside, but it seems a bit desperate, since Black doesn't have a good part of his pieces developed.
[better was 12...Ba7∓ with the idea of b5 in some cases, and incredibly the computer likes black a little bit, although in my opinion it is difficult to play with black pieces here.]

13.Nh4 stopping h4. **13...Ng5?** very optimistic.
[again it was better to retreat the bishop to prepare b5. 13...Bc7 14.Bd5 Rb8 15.Nc4 b5 16.Ne3⩲]

14.Bd5 Nh3+ 15.Kg2?!
[more accurate was 15.Kh1! Nxf2+? 16.Rxf2! Qxf2 *(* doesn't work either *16...Bxf2? 17.Qd3+−* preparing Rf1. *)* 17.Nc4+− with the unstoppable idea of Qd3 and Rf1.]

15...Nf4+ 16.Kh1 another natural move from a human point of view, but not so accurate.
[better was 16.gxf4 Qxh4 17.Nc4 Bc7 18.f5± and white is positionally crushing.]

16...Bd8 17.Nc4
[again it was possible 17.gxf4 Qxh4 18.Nc4+−]

17...Nxd5 18.Qxd5 Qe6 the decisive mistake.
[18...0−0 still gave Black some hopes from a practical point of view. 19.Rad1+−]

19.Nxd6+ Kf8 20.Rad1 Rh6 21.Nhf5 Rf6 22.Qc5 and White is crushing.

22...b6 23.Qe3 Rg6 24.f4 Kg8 25.Rd5 exf4 26.gxf4 Bc7 27.Rfd1 f6 28.Rg1 Rxg1+ 29.Qxg1 This game was very interesting from a theoretical point of view.

1−0

□ **Vianin,Pascal** **2215**
■ **Lurje,Pawel** **2145**
Geneve op (7) 1995
[Olivier Renet]

1.e4 e5 2.Bc4 Nf6 3.d4 exd4 4.Nf3 Nc6 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bc5 8.0−0 0−0 9.Bxc6

[9.Nxc6 bxc6 10.Bxc6 Taking the pawn on c6 this way is not good. Ba6! 11.Qxd5 Bxf1 12.Qxe4 Bb5!∓ Thanks to this move Black stays the exchange up and gets rid of the active bishop on c6. 13.Nc3 Bxc6 14.Qxc6 Bd4]

9...bxc6 10.Nxc6 Qd7

[10...Qh4?! 11.Be3 Bxe3 *(11...Ba6* Unfortunately this move doesn't work. *12.g3□ Qh3 13.Bxc5! Bxf1 14.Qxf1 Qxf1+ 15.Kxf1 Nxc5 16.Nc3!±)* 12.fxe3 Qg5!? 13.Rf4 Bb7 *(13...Be6 14.c4!±)* 14.Qxd5+− Rad8 15.Qxe4 Rd1+ 16.Kf2 Bxc6 17.Qxc6 Qxe5 18.Qc3 Qb5 19.Na3! 1−0 Rogers,I−Wahls,M/Groningen 1990 *(19.Na3 Qf1+ 20.Kg3+−)*]

[10...Nxf2!? This move is also playable, but it leads to an equal ending. but I am surprised that it has never been tested. 11.Rxf2 *(11.Nxd8 Nxd1+)* 11...Qh4 12.Qf3 *(12.Qf1 Qa4)* 12...Bd7 *(12...Qa4 13.Qc3! Qxc6 14.Be3)*

A) 13.Na5 Bg4 *(13...Qb4 14.Bd2 Qxb2 15.Nb3 Bxf2+ 16.Qxf2 Qxe5∞)* 14.Qg3 Qxg3 15.hxg3 f6 16.e6 Rae8 17.Nb3 Bb6 18.Kf1 Rxe6∓;

B) 13.Be3 Bxe3 14.Qxe3 Bxc6 15.Qc5 Qc4 I could not find anything better than this ending. *(15...Qh6 16.Nc3 Rad8 17.Rd1±)* 16.Qxc4 dxc4 17.Nc3 *(17.Rf4 Rad8 18.Rxc4 Rd1+ 19.Kf2 Bd7 20.Rxc7 f6⩱* Black gets excellent compensation thanks to the lack of development. *)* 17...Rae8! 18.Re1 Re6! And Black has no problems and the weakness of c4 is compensated by a weak pawn on e5.]

11.Nd4 Ba6

[11...Qe7 This move, played By Timmerman, is also good but 11... Ba6, which was condemned By Rogers, is in fact very strong. 12.Bf4 f6 13.Be3 fxe5? *(13...Bb7!∞)* 14.Nc6 Qd6 15.Bxc5 Qxc5 16.Qxd5+ Qxd5 17.Ne7+ Kh8 18.Nxd5± 1−0 Rogers,I−Wong Chee Chung/Singapore 1998]

12.Re1 Rae8! 13.c3

[13.f3 Nd6∓]

13...f6

[13...Rxe5!? Now I think that Black should sacrifice a piece with very good compensation. 14.f3 Nxc3 15.bxc3 Rxe1+ 16.Qxe1 Re8 17.Qd1□ Qe7 Now it is not easy for White to find an adequate defense against this slow but strong attack! 18.Bd2 *(18.Bf4* White can give the piece back but will have to face a similar ending to the main line. *Qe1+ 19.Qxe1 Rxe1+ 20.Kf2 Rf1+ 21.Kg3 Bd3 22.Bxc7 Bxb1)* 18...Qh4 19.Kh1□ Bd3! White is completely paralysed. 20.Qg1 *(20.a4 Qf2* Threatening Bf1. *21.Qg1□ Qxg1+ 22.Kxg1 Re2 23.Bf4 Re1+ 24.Kf2 Rf1+ 25.Kg3 Bxb1∓)* 20...Re2 21.a4 *(21.Nxe2 Bxg1 22.Nxg1 Qf2−+)* 21...Bxb1 *(21...h6)* 22.Rxb1 Rxd2∓]

14.e6
[14.exf6 Nxf6 15.Rxe8 Rxe8 gives Black adequate compensation with is mobile central pawns and his pair of bishops.]
14...Rxe6 15.Nd2
[15.Nxe6 Bxf2+ 16.Kh1 Qxe6−+]
15...Re7
[15...Rfe8 16.Nxe4 Rxe4 17.Rxe4 Rxe4 18.b4 Bd6 19.Be3 Bc4∓ Black has a comfortable position.]
16.Nxe4 dxe4 17.b4 Bd6 18.b5 Bb7 19.Qa4 f5 Black's pawn majority on the kingside is still very dangerous and White experiences difficulties in finding a way to control it. **20.Nc6 Ref7 21.f3?**
[21.Qc4 was essential to be able to play a4 on .. .a6.]
21...a6! 22.c4 exf3 23.gxf3∓ Now White's kingside is broken and Black infiltrates with his major pieces easily. **23...Rf6**
[23...Re8! Now White's bishop on c1 has nowhere to go. 24.Bg5 *(24.Bb2 Bxh2+)* 24...f4 is very strong.]
24.Kh1 f4?!
[24...Re8!]
25.c5?
[25.Bb2! Qh3 26.Qb3 Rh6 27.Re2 and White can hold.]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3 Nf6 6.b4!? Eine sehr interessante Idee.Plötzlich muß über den b−Bauer nachgedacht werden. A very interesting idea, in accordance with Oleg's style. Suddenly the b−pawn must be reckoned with. **6...Be7**

[6...Bb6 7.e5 d5 8.exf6 dxc4 9.Qe2+ Be6 10.b5 Eine zusätzliche Option.Schwarz muß nun in unterschiedlichen Varianten rechnen. Nb4 Manchmal ist es besser, aggressiv zu sein als genau. Nun sind die schwarzen Bauern(c4 und d4) und die beiden ♗er ziemlich gefährlich. Sometimes, it is better to be aggressive than accurate. Now the connected passed pawns and the two bishops are quite dangerous in practical play. *(10...Na5* is spielbar, die ♘a5 ist aber unwahrscheinlich eine wichtige Rolle zu spielen ... is playable, the ♘a5 is unlikely to play an important role... *)* 11.fxg7 Rg8 12.cxb4 Qf6 13.0−0 Qxg7 14.g3 0−0−0 15.a4 *(15.Qe5 Qxe5 16.Nxe5 f6 17.Nf3 a5* Schwarz kann diesen Zug nicht für immer vermeiden Black can't avoid this move forever *18.bxa6 bxa6* Genug Kompensation für die Figur. enough compensation for the piece. *)* 15...d3 Mit der Idee... ♕xg3,es ist für Schwarz wohl schwer von dieser Idee zu lassen,denn Once I steeled myself to play ...♕xg3, it was hard to resist the thought of executing the move. *(15...Qf6!* war wohl objektiv besser was probably objectively better. *)* 16.Qb2 Qxg3+ 17.hxg3 Rxg3+ 18.Kh2 Rxf3! Diese einfache Zug hält die Stellung I am not sure I would have appreciated this simple move, but it is equal.

A) 19.Kg2 Bd5 *(19...Rf5* Kann Schwarz auch spielen. I would probably have gone for this *20.Rg1 c3 21.Nxc3 d2 22.Qxd2 Rxd2 23.Bxd2 Rxf2+ 24.Kg3 Rxd2 25.Rgd1* und ausgeglichener Stellung. is about equal*; 19...Bd4? 20.Kxf3)* 20.Kh2 Be6! Dieser einfache ♗zug gleicht aus. I am not sure I would have appreciated this simple move, but it is equal.;

B) 19.Qg7 Was Schwarz erwartete what I was expecting Rh3+ 20.Kg2 Bd4 21.Qg5 h6! Die weiße ♕ame muß aus der g−linie verschwinden(♖g8) The queen runs out of squares on the g−file. 22.Qxd8+ Kxd8 23.Ra3 Schwarz hat genug Kompensation. I was sure that Black has enough here.;

C) 19.Bg5? erlaubt jetzt Based on an oversight. 19...Bd4! 20.Qd2 Rg8! Und überraschend ist Weiß verloren. And surprisingly, White is lost. 21.Ra3 *(21.Rg1 Rh3+ 22.Kg2 h6 23.Kf1 Rxg5!* wins. *)* 21...h6 22.Rg1 Rh3+ 23.Kg2 Rxg5+ 24.Kf1 Rxg1+ 25.Kxg1 Bd5 Ein sehr schöne Partie 0−1 (25) Skvortsov,O−Anand,V (2786) Zuerich 2017 A very enjoyable game]

ISR−ch op Ramat Aviv (1) 28.03.1999
[Mikhalevski,Victor]

1.e4 Mikhalevski,V Mikhalevski,V Mikhalevski,V Mikhalevski,V: 'Mikhalevski,Victor Mikhalevski,Victor:

'Mikhalevski,V'' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Nc3** Old−fashioned continuation and a rare guest in the modern tournament practice.

[5.c3 is more popular.]

5...d6 6.h3 Side branch of 5.♘c3 line.

[6.Bg5 usually leads to approximately equal play.Here are two examples: h6 7.Bxf6 Qxf6 8.Nd5 Qd8 9.c3 a6 10.d4 Ba7 11.dxe5 Nxe5 12.Nxe5 dxe5 13.Qh5 0−0 14.Qxe5 Re8 15.Qf4 Qd6 If black plays 9...a6 then all the games reach this position where White chooses between endgame after 16.♕:d6 and 16.♕f3.

A) 16.Qxd6 Rxe4+ 17.Kd2 cxd6 18.Bb3 Bd7 19.f3 Re5 20.f4 Re4 21.Rhe1 Rae8 22.Rxe4 Rxe4 23.Re1 Rxe1 24.Kxe1 Kf8 25.Kd2 Bg1 26.h3 h5 27.Bc2 Bc6 28.Be4 f5 29.Bf3 h4 30.Nc7 a5 31.Bxc6 bxc6 32.Ne6+ Ke7! 33.Nxg7 Kf6 34.Ne8+ Ke7 35.Ng7 *(35.Nc7? Kd7 36.Na6 Kc8)* 35...Kf6 36.Ne8+ *(*After *36.Nh5+ Kg6 37.g4* White has no chances to win in view of an unfortunate position of his knight. *)* 36...Ke7 ½−½ Ivanovic,B−Spassky,B/Bugojno 1984/MCD (36);

B) 16.Qf3 Be6 17.0−0−0 Qe5 18.Be2 Rad8 19.Nb4 Rxd1+ 20.Bxd1 *(20.Rxd1 Qxh2)* 20...Bc4 21.Bc2 Re6 22.Qf5 a5 23.Bd3 Bxd3 24.Nxd3 Qxe4 25.Qxe4 Rxe4 26.Kd2 c6 27.f3 ½−½ Morozevich,A−Korneev,O/Elista 1997/CBM 59 (27)]

6...a6 A rare move and an attempt to escape from simmetry.

[In the 19−th century Black tried 6...Ne7 One of the first games in this line continued as following: 7.d4 exd4 8.Nxd4 c6 9.Nf3 Ng6 10.0−0 0−0 11.Qd3 Nh5 12.Ne2 Kh8 13.g4 Nf6 14.Ng3 Nd7 15.Bb3 Nge5 16.Nxe5 Nxe5 17.Qc3?? *(17.Qe2)* 17...Bd4! Suddenly White loses a queen. 18.Qb4 a5 0−1 Williams,E−Harrwitz,D/London 1852/HCL (18) **Δ**19.Qa4 *(*or *19.Qa3 Bc5 20.Qa4 b5)* 19...b5 20.Qa3 Bc5]

[More popular 6...h6]

[6...Be6]

[and 6...Na5]

7.a3 b5 before playing ♗e6 I decided to take some space on the queenside.

[7...h6 8.Be3 0−0 9.Qd2 Qe7 10.0−0 Nd4 11.Nh4? Nxe4∓ 0−1 Ludwig,I−Fanouraki,N/Tallinn 1997/EXT 98 (42)]

[7...Ne7 8.Bg5 Be6 9.Bxf6 gxf6 10.Bxe6 fxe6 11.Nh4 Kd7 12.g4 Ng6 13.Nxg6 hxg6= 0−1 Mudongo,B−Lang,H/Elista 1998/CBM 66 ext (56)]

8.Ba2

[8.Bb3 h6 9.0−0 0−0 ½−½ Ilincic,Z−Conquest,S/Alma Ata 1989/EXT 97 (9)]

8...Be6= 9.Bxe6 fxe6 10.Bg5?! Not the best place to develop the bishop. After capture on e6 the pin is not dangerous any more and the bishop on g5 is going to feel uncomfortable in few moves. **10...0−0 11.0−0 Qe8!∓** moving the queen to the king side.

12.Ne2?! After this careless move initiative is moving srongly to the White's hands.

[12.Be3!?]

12...Qg6! 13.Kh2? allows Black to produce a nice tactical operation which brings a big positional advantage.

[13.Ng3? is refuted by Nd4!

winning at least a pawn. *(13...Nd7 14.h4! Δh6 15.h5)*
A) 14.Nxd4 Bxd4 15.Bxf6 *(⌓15.Bh4 Bxb2∓)* 15...Qxg3!−+;
B) 14.Bd2 Nxe4!
B1) 15.Nxe4 Nxf3+∓;
B2) 15.dxe4 Nxf3+ 16.gxf3 *(⌓16.Kh1)* 16...Qxg3+−+;
B3) 15.Nxd4 Nxg3−+;
C) 14.Bxf6 Rxf6 15.Nxd4 *(15.Nh2? Qxg3! 16.fxg3 Ne2+ 17.Kh1 Nxg3#; 15.Nh4?! Qg5 16.Qg4 Qxg4 17.hxg4 Nxc2∓)* 15...Bxd4 16.c3 Bxf2+!?∓]
[⌓13.Qd2]
[13.Nc3!?
A) 13...Nd4
A1) 14.Nxd4 Bxd4∓ *(14...exd4 15.Bxf6 Rxf6 16.Ne2)*;
A2) 14.Be3!? Nxf3+ *(14...Nxe4? 15.Bxd4!+−)* 15.Qxf3 Nd5 16.Nxd5! exd5 17.Qe2 dxe4 18.Bxc5 exd3 19.cxd3 dxc5 20.Qxe5=;
B) 13...Nh5!∓]

13...Nxe4! 14.dxe4 Rxf3 15.gxf3 Qxg5∓ The results of this sacrifice have been seen with the naked eye.The shelter of the White's king is destoyed; all the pawns on the king side are weak and part of them situated on the open file;posts f4 and h4 are waiting for the Black's knight.What else Black needs to win the game? **16.c3** covering the d4 square and preparing ♕b3. **16...Rf8 17.Ng3 Ne7!−+** Transfering the knight to the king side Black decides the game in his favour. **18.b4 Bb6 19.Ra2** White is helpless against unnumerous threats. **19...Ng6 20.Rg1?! Nh4 21.Rf1**
[21.Nf5 Qf4+]
21...Rxf3 22.Qb3 Kf7 23.a4 Bxf2 This game can be a good example of the positional sacrifice of exchange.
[23...Bxf2 24.Raxf2 Qxg3+ 25.Kh1 Rxf2]

[Hungerkamp,Hans]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nach vielen Jahren des Dornröschenschlafs, zumindest in der Weltspitze, erlebt die Italienische Partie eine Renaissance auf höchster Ebene. Sowohl Kramnik als auch Anand sammelten 2016 auf beiden Seiten des Brettes einige Erfahrungen.
3...Bc5 4.c3 Nf6 5.d3 d6 6.0−0 0−0 7.h3 a6 8.Bb3 Ba7 9.Re1 h6 10.Nbd2 Be6 11.Nf1 Re8 12.Bc2 d5 13.exd5 Bxd5 14.Ng3 Bc5
Schwarz weicht von einer Blitzpartie ab, in der er gegen Anish Giri böse Schiffbruch erlitt.
[14...Qd7 15.Nh4 Rad8 16.Nhf5 Kh8 17.d4 exd4 18.Nxg7 Rxe1+ 19.Qxe1 Kxg7 20.Bxh6+ Kh8 21.Qd2 Rg8 22.Qf4 Qd6 23.Qh4 Qxg3 24.fxg3 1−0 Giri,A (2773) − Anand,V (2804) Stavanger (blitz) 2015]
15.b4 Bf8 16.a4 b5 , z.B.

[16...g6N Der erste neue Zug, der aber ein wenig nach einem Tempoverlust aussieht, da ein Springerausfall nach f5 noch gar nicht drohte. Eine Umgruppierung des Läufers nach g7 findet außerdem in der Partie nicht statt. In einigen Vorgängerpartien geschah ausnahmslos 17.Bb2 b5 Spätestens jetzt musste Schwarz zu diesem Zug greifen, um weißes b5 zu unterbinden. 18.Ne4 Rb8 19.Bc1 Es sieht seltsam aus, den Läufer zwei Züge später wieder nach c1 zu ziehen, doch er hatte auf b2 seine Schuldigkeit getan und soll wieder auf eine bessere Diagonale beordert werden. Nd7 20.Bb3! Ein typisches Manöver, um den starken Läufer auf d5 abzutauschen. Die weiße Schwäche auf d3 fällt kaum ins Gewicht. Bxb3 21.Qxb3 Re6 22.axb5 axb5 23.Be3 Hier steht der Läufer prächtig, da er in beide Richtungen agiert und das schwache Feld c5 anvisiert. Nf6 24.Rad1 Nxe4 25.dxe4 Qe8 26.Rd5 Nd8 27.Ra1 Nb7 28.Ra7 Weiß entfaltet dank seiner aktiveren Figuren eine typische "Italienisch−Initiative". Solche Stellungen sind für Schwarz überhaupt nicht einfach zu verteidigen. c6 29.Rd1 Nd6 30.Nd2 Ra8 31.Rda1 Rxa7 32.Rxa7 Re7 33.Ra6! Das ist wichtig. Nach einem weiteren Turmtausch würde die Partie stark verflachen. Rc7 34.Qa2 Kg7 35.Bb6 Rb7 36.Bc5 Be7 37.Ra8 Rb8 *(37...Qd7!* war wahrscheinlich besser, da Weiß auf der 8. Reihe nicht so viel Unheil anrichten kann verglichen mit dem, was später noch auf der 7. Reihe passieren wird. *)* 38.Ra7 Rd8 *(38...Rb7? 39.Bxd6 Rxa7 40.Bxe5++−)* 39.Bb6 Rc8 40.Bc7 Qd7 41.Bb6 Qe8 42.g3! Ein schöner Abwartezug. Bg5 Diesen aktiven Zug verkraftet die schwarze Stellung erstaunlicherweise nicht. *(* Stattdessen hätte Schwarz mit *42...Rb8* den weißen Läufer befragen und schauen können, wie Weiß eigentlich seine Stellung verstärken möchte. *)* 43.Bc7! *(43.Nf3 Nc4=)* 43...Bxd2 44.Bxd6 Bxc3 45.Re7 Plötzlich hat Schwarz große Probleme. Qg8? *(45...Qf8* war besser, doch wer stellt die Dame in die Fesselung rein? Ein Unterschied ist, dass Schwarz das Feld g8 für den König braucht, um den Bauern f7 zu entfesseln. *46.Qe6 Kg8 47.Qd7±)* 46.Qe6 Qf8 47.Kg2 *(47.Rc7 Rxc7 48.Bxf8+ Kxf8 49.Qd6+ Re7 50.Kg2+−* möchten die materialgeilen Engines spielen, doch Kramniks Lösung scheint technisch sauber genug zu sein. *)* 47...Rd8 48.Bc5 Bd4 49.Qxc6 Kg8?! *(49...Bxc5 50.Qxc5 h5 51.Qxe5+±* lässt aber auch kaum Raum für schwarze Hoffnung. *)* 50.Qxb5 Rb8 51.Rxf7 Weiß gewinnt weiteres Material. Eine positionell sehr feine Leistung von Kramnik. 1−0 (51) Kramnik,V (2808)−Anand,V (2776) Moscow RUS 2016]

Untergrombach op 32nd (4) 05.01.2015
[Quintiliano, Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.d4!? White aims to get an improved version of the main lines with this move. **5...Bxd4?** And this just plays into his hands.

[5...d5! is the best chance, see next game.]

6.Nxf7 Qe7

[Now 6...Bxf2+? is simply bad: 7.Kxf2 Qe7 *(7...Nxe4+ 8.Kg1 Qh4 9.g3! Nxg3 10.Nxh8 Nxh1 11.Qd5!+−)* 8.Nxh8 Qc5+ and the absence of the d−pawn helps White's development. 9.Be3 Qxc4 10.Nc3 d6 11.Rf1! Ng4+? 12.Kg1 Nxe3 13.Qh5+ g6 14.Qxh7+− with a winning attack.]

7.Nxh8+− Bxf2+ 8.Kf1!?

[8.Kxf2 Qc5+ 9.Be3 would transpose to the previous line]

8...Bb6 Black intends to create some threats, but he has neither enough time nor pieces to accomplish his goal.

9.Bf7+! A good way to make Black's development harder. **9...Kd8 10.c3?!** But this looks a bit slow and careless.

[10.Nc3 was a better choice, looking for development. Qf8 *(10...Qc5 11.Qf3 Nd4* White was probably afraid of this move, but it is actually harmless: *12.Qg3 Nxc2 13.Bg5!+−)* 11.Bg5 Qxh8 12.g3 d6 13.Kg2+− and White has no problems consolidating his advantage.]

[10.Bb3 also seems good, bringing the knight back. Qc5 11.Qf3 Nd4 12.Be3!+−]

10...Nxe4?

[10...d6 would be a better try. 11.Bg5 Bg4 White's play is not so simple here, although he still keeps an advantage. 12.Qe1! *(* for example *12.Qxg4? Nxg4 13.Bxe7+ Kxe7 14.Ke2 Rxh8 15.Bb3 Rf8 16.Rf1 Rxf1 17.Kxf1 Ne3+ 18.Ke2 Nxg2⩱* and Black achieves material compensation for the exchange. *)* 12...Kd7 13.Qh4 Rxh8 14.Bxf6 Qxf6+ 15.Qxf6 gxf6 16.Nd2±]

11.Qf3 Qc5

[11...Nf2? 12.Bd5 e4 *(12...Nxh1 13.Bg5!+−)* 13.Qxf2! Bxf2 14.Bg5 Qxg5 15.Nf7+ Ke7 16.Nxg5+−]

12.Bh5 White has everything under control and has kept the material advantage, which should be enough for an easy win. **12...Nf6**

[⌓12...d5 would offer better chances 13.Nf7+ Ke7 White should be careful now and play 14.Ke1! *(14.Ng5 Qf2+! 15.Qxf2 Nxf2 16.Rg1* Suddenly, the position seems unclear after *Bg4! 17.Bxg4 Nxg4 18.Rh1* when Black can go for a repetition, or continue the adventure with *Rf8+ 19.Ke2 Rf2+ 20.Kd1 Rxg2 21.Nh3 Nxh2∞* Black has four pawns for the rook and all his pieces are cooperating well, while White has problems in development; the whole line looks like fantasy, but it is a good example of the bizarre material constellations that may arise in this variation. *)* 14...Qf2+ 15.Qxf2 Bxf2+ 16.Ke2 White is able to preserve an advantage here Bh4 *(16...Bb6? 17.Rf1+−)* 17.Nd2 Nf6 18.Nf3! Nxh5 19.N7xe5 Nxe5 20.Nxe5±]

13.Bg5 Ke7 14.Nd2 d5 15.Re1?

Once more, White plays naturally and carelessly.

[15.b4! would lead to a quick end: Qb5+ *(15...Qd6 16.Nf7 Qe6 17.b5! e4 18.Qf4 Na5 19.Ne5+−)* 16.Ke1 Be6 17.Rf1+−]

15...e4?? The last error.

[Surprisingly, 15...Be6! would make things far from clear again; Black is going to win the knight, when his development and space in centre seems worthy compensation for the exchange. 16.b4?! Qb5+ 17.Qe2 even after exchange the queens, White doesn't solves his problems Qxe2+ 18.Rxe2 *(18.Kxe2 Rxh8 19.Rhf1 h6 20.Bxf6+ gxf6 21.Kd1 Rg8 22.g3 d4!↑)* 18...a6! 19.a4 Rxh8 20.b5 axb5 21.axb5 Na7 22.Rxe5 Kd6! 23.Bf4□ Nxh5 24.Rxh5+ Kd7 25.Nf3 Nxb5 Black still has some resources in this position, for example 26.c4 *(26.Be5 Ra8! 27.Bxg7 Ra1+ 28.Ne1 c6 29.Rxh7? Bf5−+)* 26...Rf8! 27.cxb5 *(27.Bd2 Nd4 28.cxd5 Bg4∓)* 27...Rxf4 28.Rxh7 Rf7∓ Despite being an exchange down, Black has a strong centre of pawns that can be supported by the bishops.]

16.Nxe4!?

[16.b4 Qb5+ 17.c4+−]

16...Qc4+ 17.Re2

[17.Re2 dxe4 18.Bxf6+ gxf6 19.Qg3+−]

1−0

corr 21.PZ/V2 Post 2020

[Hungerkamp,Hans]

Hier eine Hochexplosive Post−Partie. Ich habe mir viel Zeit gelassen für die Kommentierung,aber alle taktischen und strategischen Fakten zu verstehen sind schon sehr schwer einzuschätzen heutzutage.Trotzden die entscheidenen Situationen so denke ich sind auf den Punkt gebracht.Viel Spaß! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.h3 h6 7.Nbd2 a6 8.a4!?** ist inzwischen eine erfolgreiche Alternative zur Hauptvariante mit

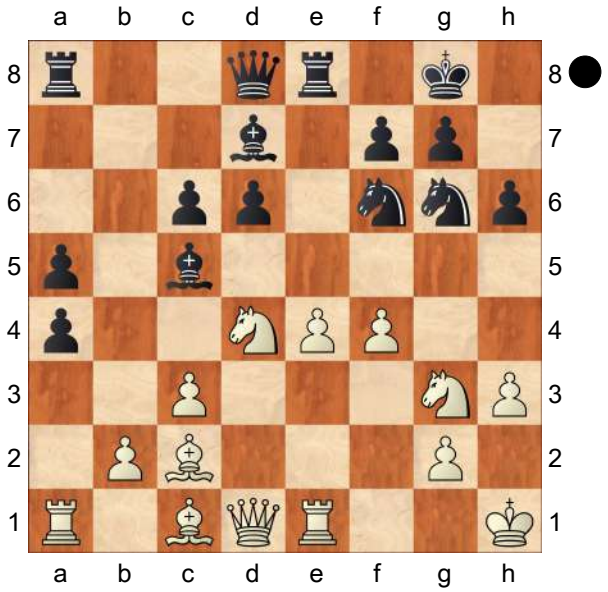
[8.Bb3]

8...a5!? Neben den u.s. Varianten ein Favorit der Engine.

[8...Ba7 9.b4 *(9.0−0 0−0 10.Re1 Re8 11.b4 Be6 12.Bxe6 Rxe6 13.Qc2 Qd7 14.Nf1 d5 15.Be3 Bxe3 16.Nxe3 Ne7 17.Rad1 c6 18.Nd2 Rc8 19.Nb3 b6 20.Rc1 Ng6 21.Kh2 c5 22.bxc5 bxc5 23.Nd2 c4 24.dxc4 dxe4 25.Rcd1 Qc6 26.Nf5 Ne7 27.Nxe7+ Rxe7 28.Nxe4 Nxe4 29.Rxe4 f5 30.Re3 e4 31.Rd4 Rce8 32.Qd1 Kh7* ½−½ (32) Ruppelt,K (1873)−Schueler,L (2047) BDF 2020 *)* 9...0−0 10.0−0 Ne7 11.Re1 Ng6 12.d4 exd4 13.cxd4 d5 14.exd5 Nxd5 15.Ne4 Bf5 16.Qb3 Nb6 17.Bf1 Qd5 18.Nc5 Qxb3 19.Nxb3 Nd5 20.Bd2 Rfd8 21.Na5 Rab8 22.b5 axb5 23.axb5 Bb6 24.Nc4 Ra8 25.Rac1 Ba7 26.Ra1 Bb6 ½−½ (26) Gulbis,H (2228)−Mamonovas,V (2204) ICCF 2019]

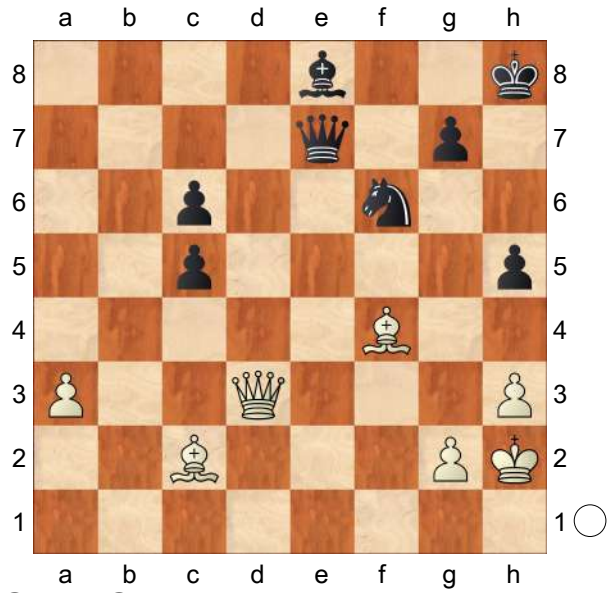
9.0−0 0−0 10.Re1 Be6 11.Bb5 Ne7

12.d4 exd4 13.Nxd4 Bd7 14.Nf1!?
Ein schöne Umgruppierung,der ♘er soll über g3 nach h5.Außerdem erblickt der ♗c1 das Licht der Welt! **14...Ng6?!**
Diesen Zug sollte Schwarz besser vorbereiten mit ...−♗xb5 oder ...−♖e8
15.Bd3!N Eine starke Verbesserung, gegenüber der Partie siehe Variante. Beide ♗er schielen Richtung schwarzem ♔önig!
[Vorgänger: 15.Ng3 Re8 16.Bc4 c6 17.Be3 Qc7 18.Ba2 Re5 *(18...d5!=)* 19.Qc2!?± Rae8 20.Nf3 R5e7 21.Bxc5 *(21.Bd4 Bxd4 22.cxd4 Nf4 23.Bb1 c5 24.Ra3±* Laut Stockfish 12 leichter Vorteil Weiß *)* 21...dxc5 1−0 (44) Vachier Lagrave,M (2804)−Grischuk,A (2783) Tbilisi 2017]
15...c6 16.Bc2 Re8 17.f4!
Ein deutlicher Fingerzeig von Weiß ,wo die Reise hingehen soll. **17...b5 18.Kh1 bxa4 19.Ng3**



a3! Ein trickreicher Zug **20.bxa3!**
[Nach 20.b3= Qb6⇄ hat Schwarz Gegenspiel auf der langen Diagonalen a7−g1]
[20.Rxa3? Bxa3 21.bxa3 und Weiß hat für die Qualität nicht viel. Schwarz steht bereits besser.]
20...Rb8 21.Rf1 Qc7
[21...a4 22.Bxa4 Bxd4 23.cxd4 Nxe4 24.Nxe4 Rxe4 und Weiß hat das ♗paar 25.Bc2±]
22.Kh2 Freiwillig von der Fesselung des ♗ers in die Diagonale der ♕.Ich persönlich bevorzuge
[22.a4 und Schwarz ist gefragt.]
22...a4
[22...Qd8!? Ein Eingeständnis aber vieleicht ein Hauch besser]
23.Bxa4 h5!? Sieht auf den ersten menschlichen Blick etwas gekünzelt aus aber überraschenderweise gut spielbar.
[23...Nxe4!? 24.Nxe4 Rxe4 25.Bc2 Re7 26.f5 d5+!± Weiß hat sicherlich die bessere Stellung ,aber Schwarz hat viel Potential sich zu behaupten.]
24.Nxh5 Nxe4 25.f5 Weiß hat erstaunlicherweise kaum Vorteil, der Textzug erlaubt Schwarz ...−d5 zu spielen (Warum Schwarz ihn nicht spielt ist mir unklar),d5 kann in vielen Varianten die entscheiden Rolle für aktives Gegenspiel auf der Diagonalen b8−h2 sein,außerdem wird das Feld e4 gestützt! **25...Nxc3?+−**
Dieser Bauernschmaus kostet schlußendlich die Partie für Schwarz.Ja Fernschach ist heutzutage Brutal!
[Stark war wiederum(s.Variante oben) der Zentrumsvorstoß 25...d5+ 26.Kh1 Rb7 27.Bc2 Nh4 und laut Engines fast ausgeglichen.]
26.Qd3 Ne4 27.fxg6!
Dieses Bauernopfer ist der einzige Zug um den weißen Vorteil zu konsolidieren
27...fxg6 28.Bf4!
[28.Bb3+ d5+!=]
[28.Ng3 Nxg3 29.Kxg3 d5+!=]

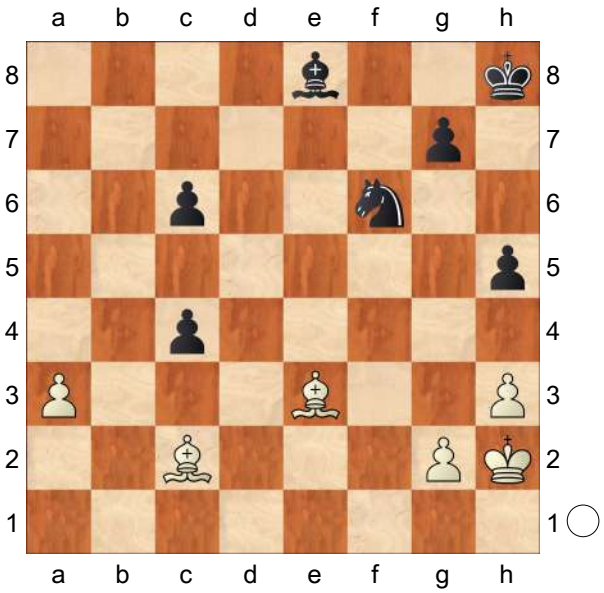
28...gxh5 29.Rae1↑ Weiß hat Initiative!
29...Nf6
[29...Bxd4 30.Qxd4 Bf5 31.Rc1+−]
30.Bb3+! Kh8 31.Bc2! In solchen Stellungstypen kann man schnell fehlgreifen z.B.:
[31.Nf3?! Rxe1!! 32.Rxe1 Qa5!=]
31...Rxe1 32.Rxe1 Re8
[Zäher war vielleicht 32...Rf8 33.a4 h4 34.Nf3 Re8 35.Qd2 aber auch hier wird es Schwarz schwer haben.]
33.Rxe8+ Beide Spieler tauschen nun in Serie,was letzlich in ein günstiges Endspiel für Weiß mündet **33...Bxe8 34.Ne6 Qe7 35.Nxc5 dxc5**



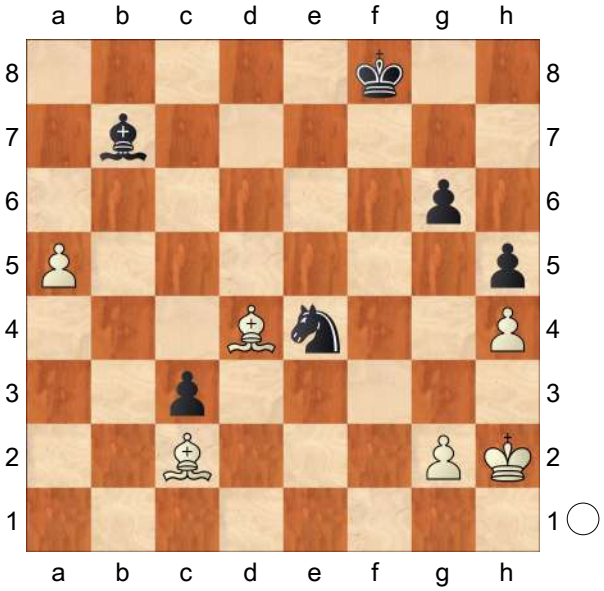
36.Qe3! Qxe3 37.Bxe3+− Die Engine zeigt hier mittlerweile deutlich Vorteil für Weiß an(+2.00).Aus menschlicher Sicht würde ich die weiße Stellung bevorzugen ,aber klarer Gewinn?!
37...c4

(Diagram)

38.a4! Dieser weiße Bauer droht einfach durchzustarten.Schwarz muß reagieren. Das ♗paar allerdings zeigt sich überlegen.Es ist wunderbar



zuzusehen wie präzise(Engineunterstützung) die Partie zu Ende gespielt wird!Wahnsinn!
38...Nd5 39.Bd4 c3 40.Be4 c5?!
[40...Bd7 ist auch nicht viel besser.]
41.Bxc5 Nf6 42.Bc2 Bc6 43.h4 Ne4 44.Bd4 Kg8 45.Bb3+ Kf8 46.a5 Man achte auf die Harmonie des ♗paares!!! **46...Bb7** Ich denke Schwarz spielt gut,aber laut Engines reicht es einfach nicht....irre **47.Bc2** Mittlerweile zaubert die Engine eine Bewertung von + 3 an! **47...g6**



48.a6! Ablenkung!! **48...Ba8**

[48...Bxa6 49.Bxe4]
49.Be3 Welcher Freibauer macht das Rennen?Für die Engine erübrigt sich die Frage: **49...Ke7**
[⌓49...Bc6]
50.Kh3 Kf6 51.g4 Ke5
[51...hxg4+ 52.Kxg4 Ke5 53.a7 Bd5 54.Bb6 Bc6 55.Ba5 Ba8 56.Bd8 Bc6 57.Bc7+ Ke6 58.Bb8 Kf6 59.Kf4! g5+ 60.Ke3! Nd2 *(60...gxh4?? 61.Bxe4)* 61.h5!+− der zweite Sprinter]
52.a7 Nf6 Schwarz gibt alles aber er kann das unvermeindliche nicht verhindern. **53.Bxg6 Nxg4 54.Bc5**
[54.Bxh5?? Nxe3−+]
54...Kd5 55.Bb4 Kc4 56.Ba3
Eine spannende Partie!
[Hier eine Variante wie es hätte weiter gehen könnte! 56.Ba3 Nf6 57.Be7 Ne4 58.Bf7+ Kb5 59.Bxh5 c2 60.Ba3 Ka4 61.Bc1 Kb3 62.Bg6! Nf6 63.h5 und jetzt sieht auch ein durchschnittlicher Spieler wie ich(DWZ 2034), wie Weiß gewinnt!]
1−0

Creon op 8th (2) 29.07.2003
[Renet]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.e5 Ne4 6.Bd5 Bb4+ 7.c3
[7.Kf1 This move doesn't set Black any problems. f5
A) 8.Nbd2 Bxd2 9.Nxd2 *(9.Bxd2 d6∓)* 9...Qe7!∓;
B) 8.Nxd4 Nxd4 *(8...Nxe5? 9.Nxf5+−)* 9.Bxe4 *(9.Qxd4? Bc5−+)* 9...Qe7! A very instructive move from the tactical point of view, with it Black will be slightly better. 10.Qxd4 *(10.f4 d6! 11.Qxd4 dxe5∓; 10.Bd3 Nc6∓)* 10...Bc5 11.Qc4 fxe4 12.Nc3 Qxe5∓]
[7.Nbd2 Against this move Black has probably more than one way to equalize, I will only indicate my way. Nc5 8.a3 *(8.0−0 Ne7 9.Bb3 d6 10.exd6 Qxd6 11.Nc4 Qd8 12.a3 Nxb3 13.cxb3 Bc5 14.b4 Bb6=)* 8...Bxd2+
A) 9.Qxd2 Ne6 10.0−0 f6! If White takes with the queen on his ninth move this is the best reply. *(10...0−0 11.Re1 d6 12.Bxc6 bxc6 13.Nxd4±)* 11.Re1 fxe5! 12.Nxe5 0−0=;
B) 9.Bxd2 0−0 10.0−0 Ne6 11.Qe2 d6= Again Black's position is completely sound.]
7...dxc3 8.0−0 cxb2 9.Bxb2 Ng5!
This is the critical position of the line. The fact that Black can castle quickly makes me think that he should be O.K!
10.a3
[10.Nxg5 Qxg5 11.Qb3 *(11.f4 Qh6* This is worse for White because the black queen is a good guard of the kingside. *)* 11...Qe7 12.Qg3 0−0 13.Kh1 This is the best arrangement of his pieces that Black can find to activate his pawn majority on the kingside. Re8 14.f4 Qf8 15.f5 Ne7 Now Black has regrouped well and there is a chance to break the attack. *(15...d6 16.e6 fxe6 17.Bc4 d5 18.fxe6 dxc4 19.Rf7!±)* 16.Bb3 d5 17.f6 Nf5 18.Qf4 gxf6∞]
[10.Qb3 Nxf3+ 11.Qxf3 0−0 12.Qg3 Ne7 13.Be4 Ng6∓ 14.Nc3 d6∓

Now Black is ready to attack the e5 point with ...d6 and he takes the initiative.]
[10.Nd4 Black has to be precise now, he should not allow the white knight to f5. 0−0 *(10...Ne6 11.Nf5!* and it is not so easy for Black to free his game. *)* 11.f4 Nxd4 *(11...Ne6 12.Nf5⩱)* 12.Qxd4 Qe7! 13.Qd3 c6 14.Bc4 *(14.Bb3 Ne6 15.Bc2 f5 16.exf6 gxf6∓)* 14...Ne4! 15.Qxe4 d5 16.Bxd5 cxd5 17.Qxd5 Rd8∓ Black gave all his pawns back but has completely repulsed the attack and is now much better positionally.]
[10.Nc3 0−0 And it isn't clear at all whether White's attack is dangerous or not. 11.Ne4 I give this line as an example. Nxe4 12.Bxe4 d5! 13.Bxd5 Be6 Black is at least equal.]

10...Be7?!
[10...Ba5! I don't see any compensation after this move. 11.Nd4 Nxd4 *(11...0−0 12.f4)* 12.Bxd4 c6 13.Ba2 d5∓]

11.Nxg5 Bxg5 12.f4 Be7 13.Nd2
This is too slow, here White should have played 13 f5! and the phalanx (e5−f5) helped by the two bishops is difficult to break. **13...d6** After ... d6 Black is out of danger. **14.Qh5** From this point the game is played weakly by both sides and loses its interest. **14...g6?**
[14...0−0! 15.Nf3 dxe5! 16.Rad1 Nd4 is more complex perhaps, but certainly much better. In the game Black gives himself a hole on f6. 17.Ba2 c5 18.Nxe5 Be6∓]

15.Qf3 0−0 16.exd6?
[16.Ne4 dxe5 17.fxe5⩱]

16...Qxd6 17.Kh1?

corr Spain − Germany 15.09.2008
[Methling,Ludger]

Wie so viele der romantischen Eröffnungen gilt das Evans Gambit heutzutage wieder als spielbar!Schwarz hat eine Reihe von Möglichkeiten,das Material zurückzugeben und dabei vollen Ausgleich zu erreichen. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4!?**
Die Idee ist ziemlich geradlinig,weil die Zeit eine so wichtige Rolle bei der Umsetzung des weißen Zentrumsvorstoßes spielt,wird der schwarze ♗ auf ein Feld gelockt,von wo er nach dem Zug c3 wieder fliehen muß. Ein subtilerer Grund ist,dass nach dem Verschwinden des b−Bauern in einigen Variantem ♗a3 ins Spiel kommen kann.
4...Bxb4! Es ist oft gesagt worden ,dass der Weg,ein Gambit zu widerlegen,darin besteht,es anzunehmen.Schwarz nimmt den Bauern ,was ihm die Option gibt, selbst ein bißchen Material aufzugeben, um die weiße Initiative zu neutralisieren.
[4...Bb6 ist ebenfalls spielbar,aber gibt dem weißen nach 5.a4! etwas Druck. a6 6.Nc3 Nf6 7.Nd5!? und Schwarz hat einige Probleme zu lösen.]
5.c3 Ba5 Als Bestes empfohlen der ♗ muß irgendwo hin gehen,also vermeidet er,in d4 hineinzulaufen,und behält die Kontrollebüber einige wichtige Felder. Schwarz hat folgende Alternativen.
[5...Be7 6.d4 Na5 ist eine solide, wenn auch anspruchslose Antwort auf das Gambit.Schwarz gibt den Bauern zurück,um sich zu befreien.Weiß kann die Spannung aufrechterhalten: 7.Be2!? *(*Ruhiger ist *7.Nxe5 Nxc4 8.Nxc4 d5! 9.exd5 Qxd5 10.Ne3 Qd7* mit Ausgleich. *)* 7...exd4 8.Qxd4! führt zu einer komplexen Stellung, wonach Nc6!? *(8...Nf6 9.e5 Nc6 10.Qh4 Nd5 11.Qg3 g6 12.0−0 Nb6 13.c4 d6 14.Rd1 Nd7 15.Bh6!* Gibt Weiß einen viel versprechenden Angriff. *)* 9.Qxg7 Bf6 10.Qg3 d6∞ Mit unklarer Stellung.]
[5...Bc5?! Läuft in den von Weiß geplanten Vorstoß d4 hinein. 6.d4! exd4 7.0−0! d6 8.cxd4 Bb6 9.Nc3 Na5 *(9...Nf6? 10.e5 dxe5 11.Ba3* Ist vernichtend für Schwarz. *)* 10.Bg5 Zwingt Schwarz ,vorsichtig zu sein. Ne7!
A) 11.Bd3∞;
B) 11.Bxf7+!? Kxf7 12.Nd5 Re8 13.Bxe7! Rxe7 14.Ng5+ Kf8 15.Qf3+ Kg8 16.e5 g6 *(16...h6? 17.exd6 cxd6 18.Rae1±)* 17.Rae1±;
C) 11.Nd5 f6 12.Bxf6 *(12.Bf4* Ist möglich. *)* 12...gxf6 13.Nxf6+ Kf8 14.Ng5=]
[5...Bd6 Neuerdings von GM Alexander Grischuk ausprobiert,wobei er zeigte ,das Schwarz auch hier keine Probleme hat.Die Idee ist einfach,den ♗ aus der Schußlinie zu

bringen und dem Vortstoß d4 zuvorzukommen,so dass Schwarz Zeit gewinnt,um seine Entwicklung zu beenden.Nach 6.d4 Nf6 7.0−0 0−0 8.Re1 h6! mit der Idee ...−♖e8 und ...−♗f8,hat Schwarz mindestens Ausgleich.]

6.d4 exd4

[6...d6?! 7.0−0 *(7.Qb3↑* ist stärker. *)* 7...Bb6 Weiß kann den Bauern zurückgewinnen,indem er auf e5 und d8 schlägt,aber damit würde er die Initiative verlieren.]

7.0−0 Nge7! Dieser ♘zug ist der Grund , warum das Evans Gambit heutzutage nicht mehr so oft zu sehen ist,erst recht in "Fernschachduellen".Statt blindlings alles in Sichtweite zu schlagen,bereitet Schwarz einen schnellen Gegenangriff im Zentrum vor.

[7...Bb6?! 8.cxd4 d6 führt zur Variante nach 5...−♗c5.]

[7...dxc3 ist sehr riskant. 8.Qb3 Qf6 9.e5 Qg6 10.Nxc3 Nge7 11.Ba3 und Weiß hat für die zwei Bauern starke Initiative.]

8.cxd4 d5 9.exd5 Nxd5 10.Ba3 Be6 Weiß hat nun einige Kompensation,aber ich würde hier die schwarze Stellung bevorzugen.In der Partie folgte nun **11.Bb5 Bb4 12.Bxc6+ bxc6 13.Bxb4 Nxb4 14.Qa4 Rb8 15.a3 Nd5 16.Qxc6+** Weiß hat den Bauern zurück, aber die Stellung ist völlig ausgeglichen. **16...Qd7 17.Qc5 f6 18.Nbd2 Nf4 19.Rfe1 Rb5 20.Qc4 Rb6 21.d5 Nxd5 22.Qc5 Ne7 23.a4 0−0 24.a5 Ra6 25.Nd4 Rd8 26.N2f3 Nc8 27.Rxe6 Rxe6 28.Qc4 Rde8 29.Nxe6 Qxe6 30.Qxc7 Qe7 31.Qc3 Rd8 32.g3 Qd7 33.Re1 Kf7**

□ **Lastra,Ricardo** **2176**

■ **Mikhalevski,Victor** **2536**

Foxwoods Open (3) 23.01.2014

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5! In my opinion this is the best way to meet the Scotch Gambit. **5.c3 Nf6** We've just transposed into the old line of the Italian Game with 5.d4. **6.e5**

[The main alternatives are 6.cxd4 Harikrishna, P (2706)−Aronian, L (2812)/Wijk aan Zee NED 2014/ [Mikhalevski, V] from the January 2014 update.]

[and 6.0−0 in Ruiz Alcaide, J−Rizouk, A/ Dos Hermanas ESP 2002/[Paul Motwani], which is also part of our PGN Archive.]

6...d5 A typical counterattack in the centre. **7.Bb5** The main line. White pins the c6−knight and regains the d4−pawn.

[Recently 7.Be2 started to gain popularity, mainly thanks to Jobava's efforts.]

[The line 7.exf6?! dxc4 8.fxg7 Rg8∓ favours Black.]

7...Ne4 8.Nxd4?! White seems to attack the knight on c6, but it turns out to be a blank shot.

[8.cxd4 is more popular and better. See Bologan, V (2672)−Hracek, Z (2635)/Tromso NOR 2013/ [Mikhalevski, V].]

8...0−0!∓ The "threat" of Nxc6 can be ignored due to the hanging pawn on f2. Black is already better. **9.Bxc6** This capture is virtually forced as the e5−pawn was hanging. **9...bxc6 10.0−0 f6!** Once again Black ignores the attack on c6. **11.exf6?** White swims with the

tide.

[In my opinion White should have tried 11.Be3! Qe8 *(* but not *11...fxe5? 12.Nxc6 Qd6 13.Bxc5 Qxc5 14.Qxd5+! Qxd5 15.Ne7+±* with better chances to White. *)* 12.exf6 Nxf6∓ with slightly the better chances for Black.]

[11.b4? Hautot, S−Motwani, P/ Anderlecht rapid−play 1999/[Paul Motwani] can be strongly answered by fxe5 12.bxc5 exd4 13.Qxd4 Ba6−+ Black wins the f2−pawn and obtains a decisive advantage.]

[11.Nxc6? can be met by either **A)** or 11...Nxf2! 12.Qe2 *(12.Rxf2 Bxf2+ 13.Kxf2 fxe5+ 14.Kg1 Qf6 15.Qxd5+ Kh8−+* with the decisive threats on the back rank and against the c6−knight. *)* 12...Qd7! 13.Nd4 *(*or *13.Be3 Ba6! 14.Qxa6 Bxe3−+)* 13...fxe5−+; **B)** 11...Qd7 with the subsequent 12...fxe5.]

11...Qxf6∓ Black is already clearly better thanks to his overwhelming development advantage. **12.Be3?!** White is protecting the f2−pawn, but it doesn't help.

[12.f3? fails to Ba6! 13.Re1 Qh4! with a deadly threat of 14...Bd6, while 14.fxe4 leads to a forced mate after Qf2+ 15.Kh1 Bf1!−+]

[12.Nd2!? Ba6 13.Nxe4 dxe4 14.Be3 Bxf1 15.Qxf1∓ would be the best chance to stay in the game, though Black is an exchange up.]

12...Ba6 13.Ne2? Now everything wins.

[13.Re1 Nxf2−+ is hopeless too.]

[13.Nd2 was relatively better, but this time after Nxd2 14.Qxd2 Bxf1 15.Rxf1 Bb6−+ White's position is lost anyway. It would have just allowed him to prolong the fight.]

13...Bxe3 I decided to simplify the position.

[I saw that 13...Nxf2 is winning too. 14.Bxf2 *(*or *14.Bxc5 Nxd1 15.Rxf6 Rxf6−+)* 14...Bxf2+ 15.Kh1 Rae8 16.c4 Bxc4 17.Nbc3 d4−+]

14.fxe3 Qxf1+ 15.Qxf1 Rxf1+ 16.Kxf1 Rf8+

[16...Rf8+ White resigned, not waiting for 17.Ke1 Rf2 *(17...Bxe2 18.Kxe2 Rf2+ 19.Kd3 Rxb2* is completely winning too. *)* 18.c4 Bxc4 19.Nbc3 Rxg2−+ 8.Nxd4 is a dubious move, while 8.cxd4 is necessary and leads to a roughly equal position.]

[Dembo,Yelena]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.Qb3 This rare sideline fails to pose Black real problems. While it does force Black to defend the ♙f7, the ♕ walks right into the intended ...♘a5. This in turn obliges White to initiate forcing play, the outcome of which is rather in Black's favor. **6...Nh6 7.d4 Na5 8.Qb5 Nxc4**
So far practically forced, and now White must make a choice: **9.Qxc4**
[9.Bxh6 This seems like it ruins Black's kingside structure, providing compensation, but in fact Black has a nice intermediate move that gives him good chances for advantage. Still, 9. ♗xh6 is White's best move, as the text allows Black some extra options, one of which is very simple and quite good.
A) 9...gxh6 This may be OK, but the alternative is much cleaner and effective. 10.Qxc4 exd4 11.cxd4 c6! 12.d5! *(12.0−0 d5! 13.exd5 Qxd5∓* Zelcic−Sermek, Pula 2001*; 12.Qc3* (Nyman,S−Ekenloev,L/ ICCF corr 1990) *d5∓; 12.Nc3 b5 13.Qd3 b4 14.Ne2 a5∓* 0−1 Freire,D−Gallottim,M/ICCF corr 1980/Corr 2000 (23) *)*
A1) 12...Bf6 13.e5 Bg7 14.Nc3 *(14.0−0 d6 15.dxc6 dxe5 16.c7 Qd6 17.Nc3⩱; 14.d6 b5* (Pirrot−Jenni, Cappelle la Grande 2002) *15.Qb3 0−0 16.0−0⩱)*;
A2) 12...Qa5+ 13.Nbd2 Qc5∓;
B) 9...Nd6! Best! 10.Qxe5
B1) 10...Nxe4 Continuing on the same theme. This move is pretty good, though White may be able to claim some compensation.
B1a) 11.Bxg7 Rg8 Intending ...d5. 12.Qxe4 *(12.0−0 d5 13.Nfd2 Be6 14.Nxe4 dxe4∓* 1−0 Bericat,A (2507)−Geider,F (2365)/ Argentina 1997/Corr 2002 (28) *)* 12...Rxg7 13.d5 Preventing ...d5 seems to me like the best option. *(13.0−0 d5 14.Qe5 Kf8 15.Re1 Qd6 16.Qe2 Bh3 17.g3 f6 18.Nbd2 Kg8 19.c4 c6∞* Morozevich−Bacrot, Sarajevo 2000. In general I feel that Black's prospects should be superior here, though it's not so easy to organise his position. *)* 13...Rxg2 *(* safer is *13...d6 14.Nd4∞)* 14.Nbd2⩱ It won't be so easy for Black to untangle.;
B1b) 11.Qxe4 gxh6 12.d5 0−0 *(12...d6 13.0−0 Kf8 14.Nd4⩱* 0−1 Meera,S (2227)−Adhiban,B (2421)/Mumbai 2008/CBM 124 Extra (24) *)* 13.0−0 d6 14.Nbd2 Bf6 15.Qd3 Re8 16.Rfe1 Bg4

(16...Bg7 17.Nd4 Bd7∓ is another way to play. *)* 17.h3 Rxe1+ 18.Rxe1 Bh5∓;

B2) 10...f6 This alternative is, I think, quite good for Black. 11.Qh5+ Kf8 *(11...g6 12.Qd5 c6↑* 1−0 Sklavounos,P (2150)−Tsitouras,D/Ikaria 1997/EXT 2003 (49) *)* 12.e5 Nf7 13.Bf4 d6∓]

9...Ng4!? A pretty good move, not allowing White to break up the kingside ♙s. Black's idea is to allow dxe5 and meet it with ...d6. There are other good options though:

[9...d5 is one possibility; after 10.exd5 e4 11.Ne5 (Aronson−Umansky, corr. 1978) Nf5∞ we have a complex position with mutual chances.]

[Black has a good option here in 9...exd4 , when White has nothing better than 10.Bxh6 *(10.Qxd4 0−0 11.Bxh6 gxh6∓* is at least fine for Black *)* 10...gxh6 transposes to 9. ♗xh6 gxh6 10.♕xc4 exd4.]

10.h3 Seemingly very strong, but...

[10.Nxe5 Nxe5 11.dxe5 d6! 12.Bf4 0−0 13.0−0 dxe5 14.Bxe5 c6∓ 0−1 Skotorenko,V−Trapl,J/ Czechoslovakia 1987/Corr Nr. 1 (37)]

[10.dxe5 d6! 11.exd6 Qxd6∓ 0−1 Bolhari,O (2104)−Garrido Dominguez,J (2309)/Evora 2007/CBM 119 ext (72)]

10...Nf6 11.dxe5 d5! This is Black's idea, and it seems pretty effective to me. One of White's e ♙s is removed, securing for Black good central control.

12.exd6

[12.exd5 Nxd5 13.0−0 c6 14.Rd1 Be6 15.Qe2 Qa5∓ 0−1 Meisinger,P−Hole,T/GER email 2001/Corr 2004 (48)]

12...cxd6∓ Both sides have some weaknesses, but Black has the two ♗s and faster development, which means he is better. **13.0−0 0−0**

[Tony Kosten]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.0−0 Nxe4 6.Nc3?!

This surprising move surely can't be correct, but it would be tricky to face in a quick game.

[6.Re1 is the mainline.]

6...Nxc3! The best practical choice.

[6...d5

A) 7.Bxd5 may not have satisfied the World Champion, dxc3 8.Bxe4 Qxd1 9.Rxd1 Bd7 Patt Rubinstein,J−Steinberg,J Rosario 1952, 0−1 (30), although 10.Bxc6!? Bxc6 11.Re1+ Kd8 12.Ng5 Be8 13.b3 is a bit messy.;

B) 7.Re1 will likely transpose to 6 Re1, e.g. dxc3 *(7...dxc4 8.Rxe4+ Be6 9.Nxd4 Nxd4 10.Rxd4 Qf6 11.Nd5!)* 8.Bxd5 Be6 9.Bxe4 Qxd1 10.Rxd1 cxb2 11.Bxb2 f6;

C) 7.Nxd5? Be6! winning! 8.Ng5 Bxd5 9.Bxd5 Nxg5 10.Re1+ Ne6 11.Qh5 g6 12.Rxe6+ fxe6 13.Bxc6+ bxc6 14.Qe5 Carlsen,M (2862) −Tang,A (2538) Lichess.org INT 2021, when Rg8 15.Qxe6+ Qe7 16.Qxc6+ Kf7 is convincing, a back rank mate is threatened and so Black will remain a rook ahead.]

[6...dxc3 may be best, objectively, but I wouldn't want to play like this!

7.Bxf7+ Kxf7 8.Qd5+

A) 8...Ke8 9.Re1 is worse, Qf6 10.Bg5 Qd6? 11.Qxe4+ Kf7 12.Qc4+ Kg6 13.Rad1 Qc5 14.Qe4+ Kf7 15.Rd5 Qb4 16.Rf5+ Kg6 17.Nh4+ Kh5 18.Be3+ 1−0 Pranesh,M (2437)−Sychev,K (2572) Chess.com INT 2020. *(18.g4#* is also good! *)*;

B) 8...Kf6! 9.Re1 Ne7 10.Qxe4 Solar,P (1826) −Metzger,S (1716) play.chessbase.com 2020, and now Black has to find the only move: Kf7! 11.Bg5 d5 12.Qf4+ Kg8 and should win.]

[6...Nd6

A) 7.Nxd4?! Nxc4 8.Qe2+ De Silva,L (2085)−Recuero Guerra, J (2226) chess.com INT 2020, 1−0 (36), N6e5! 9.Nf3 *(9.f4 Bc5 10.Be3 0−0 11.fxe5 Nxe5* with two extra pawns. *)* 9...d6 10.Nxe5 Nxe5 11.f4 Be7 12.fxe5 0−0 with a solid pawn more.;

B) 7.Nd5!? Nxc4 8.Re1+ *(8.Qe2+ Ne7 9.Qxc4 Nxd5 10.Qxd5 Be7)* 8...Be7 9.Nxe7 Nxe7 10.Qxd4

and Black should return the piece: 0−0! 11.Qxc4 Re8 and ...d7−d5.; **C)** 7.Qe2+ Be7 8.Nd5 Nxc4 9.Qxc4 0−0 10.Nxd4 *(10.Re1 Bf6* White doesn't have enough for the material, Enjuto Velasco,R (2145) − Olivera Gutierrez,A (2072) Logrono 2002. *)* 10...Nxd4 11.Qxd4 White will capture on e7 when the opposite−coloured bishops will help minimise his pawn less, Pranesh,M (2437)−Yilmaz,M (2630) Chess.com INT 2020, 0−1 (81).]

7.bxc3

[7.Re1+ Be7 8.bxc3 0−0 9.cxd4 d5 10.Bb5 when Na5 *(10...Bb4!?)* 11.Qe2 Be6 followed by ...Nc4, is good for Black.]

7...d5

[7...Be7! might be slightly more accurate: 8.cxd4 d5 9.Bb5 0−0 10.Bxc6 bxc6 11.Ne5 Bd6! 12.Nxc6 Qh4 *(12...Qe8!? 13.Ne5 Bf5* is also promising. *)* 13.f4?! Re8 14.Ne5 Estrada Degrandi,W−Diano,D Uruguay 1974, 1−0 (30), f6 15.Nd3 Bg4 16.Qd2 Qh5 with a big advantage.]

8.Bb5 Be7 9.Ne5

[9.Bxc6+! bxc6 10.Ne5 is more precise, Bd7 11.cxd4 0−0 12.Bf4 Bd6 13.Qf3 De Silva,L (2085)−Balaji,A (2206) Chess.com INT 2020, 1/2−1/2 (56), f6]

9...Bd7 10.Re1? A new move that should lose, but actually causes a major upset!

[10.Nxd7 Qxd7 11.cxd4 a6 12.Be2 *(12.Bxc6!? bxc6)* 12...0−0 13.Rb1 b5 with a good extra pawn, Tochtrop, L−Dannenberg,L Krefeld 1986, although 1−0 (26)!]

[10.Bxc6 Bxc6! *(10...bxc6* transposes above. *)*]

10...Nxe5 11.Rxe5 Bxb5?

[11...c6 12.Bd3 *(12.Ba3 Be6 13.Bxe7 Qxe7* is winning. *)* 12...dxc3 13.Qh5 g6 14.Qh6 Be6 leaves Black 3 pawns ahead, 15.Bxg6 hxg6! 16.Qxh8+ Kd7 is good for Black, 17.Qh6 Qh8 18.Qe3 Bd6]

12.Ba3 0−0??

[12...c5 is the only chance, 13.Bxc5 0−0 14.Bxe7 Qc7 hitting the rook and saving the exchange. 15.Qxd4 Rfe8 equal.]

13.Bxe7 Qd7 14.Bxf8 Rxf8 15.cxd4 Black has one pawn for the exchange, but no activity. White can simply double rooks and infiltrate the 7th or 8th ranks.

15...Qd6 16.Qf3 Bc4 17.a3 Qg6 18.Rae1! h6

[18...Qxc2 19.Re8 Qd3 20.Rxf8+ Kxf8 21.Qf4 h6 22.Qxc7 g6 23.Qd6+ Kg7 24.Qe5+ Kg8 25.Qf6]

19.Re8 Rxe8 20.Rxe8+ Kh7 21.h3 b5 22.Re7 f6 23.Rxc7 a5 24.Qg3 h5 25.Qxg6+ Kxg6 This ending is obviously hopeless for Black, who would resign if this were not a blitz game. **26.f3 h4 27.Kf2 a4 28.Ke3 Kh6 29.Rd7 g5 30.f4 Kg6 31.Kf3 Kf5 32.fxg5 fxg5 33.Rd6 Ba2 34.Rb6 Bc4 35.Rd6 Ba2 36.Rd8 Bc4 37.Re8 Ba2 38.Re5+ Kf6 39.Kg4 Bc4 40.Rxg5 b4 41.Rf5+ Ke6 42.axb4 a3 43.Rf8 a2 44.Ra8 Kd6 45.Kxh4 Kc6 46.Kg5 Kb5 47.h4 Kxb4 48.h5 Kb5 49.h6 Kb6 50.Rxa2**

[50.h7 Ba6 51.h8Q a1Q 52.Qd8+ would force mate anyway, but White's choice is definitely simpler.]

50...Bxa2 51.h7

[Fischer,Stefan]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5
[3...Nf6 ist eine gute Alternative. 4.d3 *(4.Ng5* verlor einiges an Popularität in der letzten Zeit. *d5 5.exd5* Schwarz hat mehrere Möglichkeiten,

eine gute Kompensation für den geopferten Bauer zu erzielen, eine davon ist *Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Qd4 11.f4 Bc5⩱)* 4...Be7 5.0−0 0−0 6.Re1 d6 7.a4 Be6 8.a5 a6= Weiß hat keinen echten Vorteil.]

4.c3 Nf6 5.d4 Diese Variante ist schon seit Jahrzehnten als schädlich bekannt. Weiß erreicht eigentlich nicht viel.

[5.d3 a6 6.Bb3

A) 6...Ba7!? 7.Nbd2 0−0 8.h3 *(8.Nf1 Ng4 9.d4 exd4 10.cxd4 d5! 11.Bxd5 Nxd4!! 12.Nxd4 c6⩱)* 8...d6 9.Nf1 *(9.0−0* führt zur Partiestellung. *)* 9...d5!! Mit Tempoverlust, aber trotzdem sehr stark. 10.Qe2 *(10.Ng3 dxe4 11.dxe4 Qxd1+ 12.Bxd1 Be6=)* 10...Be6 11.Ng3 *(11.Ng5 dxe4! 12.Nxe6 exd3 13.Nxd8 dxe2 14.Nxc6 exf1Q+ 15.Rxf1 bxc6 16.Ba4 Rfd8 17.Bxc6 Rab8↑)* 11...dxe4 12.dxe4 Bxb3 13.axb3 Ne8 14.Nf5 Nd6 15.g4 Qf6= Bologan − Malakhov (Kemer, 2007);

B) 6...0−0 Schwarz hat eine Menge an Möglichkeiten, das ist mehr oder weniger Geschmackssache. Mir gefällt der Zug 6....♗a7 besser. 7.0−0

B1) 7...d5?! Diesen Vorstoß muss man sehr gut vorbereiten, ansonsten bekommt man Schwierigkeiten mit dem e5−Bauern. 8.exd5 Nxd5 9.Nbd2 *(9.h3?! Nb6 10.Re1 h6 11.Nbd2 Qxd3 12.Nxe5 Qg3 13.Qf3 Qxf3 14.Ndxf3=* Kramnik − Krasenkow (Wijk aan Zee, 2003) *)* 9...Bg4 10.h3 Bh5 11.Ne4 Ba7 12.Ng3 Bg6 13.Bg5 Qd7 14.Nh4 Na5 15.Nxg6 hxg6 16.Bc2± Sanduleac − Daurelle (Creon, 2007);

B2) 7...d6 8.h3 h6 9.Re1 Ba7 10.Nbd2 Es gibt viele Zugfolgen, die zu dieser Stellung führen. Jetzt ist der entscheidende Moment, in dem Schwarz einen Plan auswählen muss.

B2a) 10...Re8 11.Nf1 Be6 ist genau so gut, weil es nur eine Zugumstellung ist.;

B2b) 10...Ne7 11.Nf1 Ng6 12.Ng3 Re8 13.d4± Hat Weiß es geschafft, das Zentrum d4−e4 aufzubauen, so hat er sich schon mal einen kleinen Vorteil gesichert. Natürlich ist die Stellung von Schwarz immer noch in Ordnung, aber es geht hier darum, ob Schwarz einen absoluten Ausgleich erreicht, oder nicht.;

B2c) 10...Nh5 11.Nf1 *(11.Nxe5? Nxe5 12.Qxh5 Nxd3∓)* 11...Qf6 12.Be3 Nf4 13.Ng3 g6 14.d4± Wieder hat Weiß das Zentrum unter Kontrolle genommen.;

B2d) 10...Be6! Ich denke, das ist der beste Weg zum Ausgleich.

B2d1) 11.Nf1 Re8 12.Ng3 Zieht Weiß den Läufer nicht zurück, so wird zu viel abgetauscht und die Stellung sehr vereinfacht. d5 *(12...Bxb3 13.Qxb3 Rb8 14.Nf5 d5 15.Qc2*

Qd7 16.N3h4 Re6 17.Qe2 dxe4 18.dxe4 Rd8 19.Qf3 Qd3= Hamdouchi − Tkachiev (Cap d'Agde, 2002) *)* 13.Bd2 dxe4 14.dxe4 Bxb3 15.Qxb3 Qd7 16.Rad1 Qe6 17.Qxe6 *(17.Qxb7?? Bb6−+)* 17...Rxe6 18.Be3 Bxe3 19.Rxe3 g6= Petrosian − Kobalia (Kallithea, 2008);

B2d2) 11.Bc2 Re8 12.Nh2 *(12.Nf1 d5 13.exd5 Qxd5 14.Qe2 Rad8 15.Ng3 Bc5! 16.Nh4 Bf8⇄* Radjabov − Aronian (Dresden, 2008). Mit der Überführung des Läufers nach f8 hat Schwarz die Lage seines Königs verbessert und hat die Möglichkeit, mittels g6 das Feld f5 unter Kontrolle zu nehmen. *)* 12...d5 13.Qf3 dxe4N Eine ruhigere Fortsetzung. Es ist nicht auszuschließen, dass Schwarz auch schon auf Konter spielen kann. *(13...d4!? 14.Ndf1 Qe7 15.Ng3 Rad8 16.c4 b5 17.cxb5 Nb4 18.Bb1 axb5 19.a3 Na6 20.Nf5 Bxf5 21.Qxf5 Nc5 22.Bc2 Nb7 23.Qf3 c5 24.a4 b4 25.Nf1 c4! 26.dxc4 Nc5⩱* Areshchenko − Azarov (Plovdiv, 2008) *)* 14.dxe4 *(14.Nxe4* Je mehr Figuren getauscht sind, desto einfacher ist die Verteidigung für Schwarz. *Nxe4 15.dxe4 Ne7 16.Rd1 Qc8 17.Ng4 Ng6=)*

14...Ne7 15.Ndf1 Ng6

B2d21) 16.Ng3?! Dieser Zug ist sinnlos, denn der Springer kann demnächst nicht nach f5 gehen. c6

B2d211) 17.Nf5?? Bxf5 18.exf5 *(18.Qxf5 Nh4−+)* 18...e4 19.Qe2 Nh4∓;

B2d212) 17.Rd1 Qa5 18.Bd2 *(18.Bxh6?? Nh4−+; 18.b4 Qc7 19.Ng4 Nxg4 20.hxg4 c5∓)* 18...Rad8∓;

B2d22) 16.Be3 Bxe3 17.Nxe3 c6= Schwarz hat überhaupt kein Problem. 18.Nf5 Bxf5 19.exf5 *(19.Qxf5?? Nh4−+)* 19...Nf4 20.Rad1 Qc7 21.Ng4

B2d221) 21...Nxg4 ist ebenfalls möglich, Weiß kann keinen Nutzen aus seiner augenblicklichen Initiative ziehen. Aber die Partiefortsetzung ist trotzdem besser. 22.Qxg4 *(22.hxg4 Nd5=)* 22...Nd5 23.Bb3 Rad8 24.Bxd5 cxd5 25.f6 g6 26.Qh4 Qb6⇄;

B2d222) 21...N4h5 22.Re3 Nxg4 23.hxg4 Nf6 Der Springer auf f6 verhindert das gesamte weiße Spiel

am Königsflügel. 24.Qg3 Rad8 25.Rde1 Rd2 26.Bb3

B2d2221)

26...Rxb2?

Habgier wird bestraft. 27.g5! hxg5 28.Qxg5 Der weiße Angriff ist sehr gefährlich. Nh7 29.Qh4 Qe7 30.Qh5 Nf6 31.Rxe5 Qxe5 *(31...Nxh5 32.Rxe7 Rxe7 33.Rxe7±)* 32.Rxe5 Rxe5 33.Qxf7+**±**;

B2d2222) 26...Qd8

B2d22221)

27.Rxe5!?

kam ebenfalls ins Betracht. Rxe5 28.Qxe5 Rxb2 *(28...Nxg4 29.Qe8+ Qxe8 30.Rxe8+ Kh7 31.f3 Nf6 32.Rf8 Nd5 33.Rxf7 b5 34.Bxd5 cxd5 35.Ra7 Rxb2 36.Rxa6±)* 29.Rd1 Rd2 30.Rxd2 Qxd2 31.Qb8+ Kh7 32.Bxf7 Qe1+ 33.Kh2 Qe5+ 34.Qxe5 Nxg4+ 35.Kg3 Nxe5 36.Be6 Nd3=;

B2d22222) 27.g5 hxg5 28.Qxg5 Nd5 29.Qh5 Qf6 30.Rh3 Weiß kann nur eine Mattdrohung aufstellen, Matt selbst kann er jedoch nicht geben. Kf8 31.Qg4 *(31.Qh8+ Ke7 32.Qh7 Kd6!∓* Der schwarze König wird sich auf c7 in Sicherheit fühlen, und die weißen Figuren haben alle nichts mehr zu tun. *)*

B2d222221)

31...Ke7?

Das wäre zu frech... 32.c4 *(32.Rxe5+ Qxe5 33.Qg5+ Kd6 34.Qxd2 Qe1+ 35.Qxe1 Rxe1+ 36.Kh2 Re2 37.Rh7 Rxf2 38.Rxg7 Rxf5=)* 32...Nb6 33.Rxe5+ Qxe5 34.Qg5+ f6 35.Qxd2**±**;

B2d222222)

31...Kg8 32.Qh5 Kf8 33.Qg4 Kg8 34.Qh5 ½−½ (34) Radjabov,T (2761)−Carlsen,M (2776) Linares 2009]

5...exd4 6.cxd4 Bb4+ All dies ist für Schwarz bekannt. Das letzte Schach ist wichtig, um zu verhindern, dass Weiß sein massives Zentrum behält. **7.Bd2** Ist die Hauptvariante

[7.Nbd2 Ein seltener Zug, der in den

alten Partien überhaupt nicht versucht wurde.

A) Ein weiterer Versuch ist 7...d5 8.exd5 Qe7+ *(8...Nxd5 9.0−0 0−0 10.a3* Kann Schwarze Probleme verursachen. Er muss entweder die ♗er tauschen oder sich nach dem Rückzug des ♗ers mit einigen Problemen seiner Leichtfiguren befassen. *)* 9.Be2 Nxd5 10.0−0 Der Tempogewinn mit ... ♕e7 + wird bald nach ♖e1 gefolgt von ♗c4 keinen nutzen für Schwarz haben. Schwarz findet immer noch keinen optimalen Weg, um seine Leichtfiguren über das Feld d5 zu konsolidieren.;

B) 7...Nxe4 Schwarz nimmt den Federhandschuh auf. 8.d5! Das ist die Idee der Variante! Weiß kämpft um Raum und Fortschritt in der Entwicklung. Aber Schwarz hat genug Ressourcen, um seine Stellung zu halten. Nxd2 9.Bxd2 Bxd2+ 10.Qxd2 Ne7 11.d6 Ein weiterer typischer Zug, der die Entwicklung der schwarzen ♕ame verlangsamt. cxd6 12.0−0 Die weiße überlegene Entwicklung kompensiert sicherlich die fehlenden Bauern, aber Schwarz muss nicht an seinem materiellen Vorteil festhalten. d5! Die Entwicklung des ♗c8 Priorität 13.Bxd5 0−0 14.Rad1 Nxd5 15.Qxd5 d6 16.Qxd6 Es scheint nichts besseres als das zu geben, aber jetzt vereinfacht sich das Spiel zu einem Ende, in dem nur Weiß kleine Probleme haben könnte. Qxd6 17.Rxd6 Be6 18.a3 Rfd8 19.Rd4! Das genaueste *(*Falls *19.Rfd1 Rxd6 20.Rxd6 Rc8 21.h4 Kf8* Kann Schwarz hoffen, die Überlegenheit seines ♗ers über den ♘er auf beiden Flügeln zu agieren. *)* 19...Rxd4 20.Nxd4 Rd8 21.Rd1 f6 22.f3 Kf7 23.Kf2 Rd5 24.Ke3 Weiß hat eine perfekte Zentralisierung erreicht und Schwarz findet nichts Besseres als ein Unentschieden durch Zugwiederholung. Re5+ 25.Kd3 Rc5 26.Re1 Bd7 27.Kd2 Rd5 28.Kc3 Rc5+ 29.Kd2 Rd5 30.Kc3 Rc5+ 31.Kd2 ½−½ (31) Nakamura, H (2799)−Giri,A (2776) Khanty−Mansiysk 2015]

[Greco's Favorit war 7.Nc3 (siehe unten) Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 h6 14.Qe2 hxg5 15.Re1 Be6 16.dxe6 f6∓ Schwarz steht einfach viel besser − seinem Plan c6−d5−♕d6 hat Weiß nichts entgegenzusetzen.]

7...0−0

[Die einfachste Fortsetzung ist 7...Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 Mit bequemem Ausgleich für Schwarz. Der weiße letzter Zug opfert einen Bauern und könnte zu Recht als "Original" bezeichnet werden. Für einen Spieler wie Nakamura, der erst vor zehn Jahren mit 2.♕5 in den offenen Spielen experimentierte, kann die ganze Variante sicher als "klassisch" angesehen werden! 10.Qb3 Na5 *(10...Nce7?!* Schwarz seinerseits sollte dem Remis auch nicht ausweichen, denn Weiß kann in dem Fall eine gefährliche Initiative entwickeln. *11.0−0 0−0 12.Rfe1 c6 13.Ne4 Nb6 14.Bd3*

Ned5 15.Nc5↑ Van den Doel − Sokolov (Leeuwarden, 2004) *)* 11.Qa4+ Nc6 12.Qb3=]
[7...Nxe4 8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ d5 11.Ne5+ Ke6 Dieser extravagante ♔zug ist das beste 12.Qxb4 Qf8 Geht den sicheren Weg. 13.Qxf8 Rxf8 14.Nc3 c6 15.f3 Nd6 16.Kf2 Nf5 17.Rhe1 Kd6 18.Rad1 g6 19.b4 Bd7 20.Na4 b6 21.Rd2 Rae8 22.Nc3 Re7 23.Rc1 Be8 24.Ne2 Ng7 25.Re1 Ne6 26.Nc1 Rf4 27.Ne2 Rf5 28.Nc3 Rf4 29.Ne2 Rf5 30.Nc3 Rf4 ½−½ (30) Harikrishna,P (2706)−Aronian,L (2812) Wijk aan Zee 2014]

8.d5
[Interessant ist hier auch wenn Weiß selber den ♗er nimmt 8.Bxb4 Nxb4 9.e5 d5 10.Be2!N *(10.exf6? dxc4 11.0−0 Qxf6∓)* 10...Ne4 11.a3 und Weiß hat etwa Initiatve!]

8...Bxd2+
[8...Nxe4? 9.dxc6 Nxd2 10.Nbxd2 Qe7+ 11.Kf1 bxc6 12.a3 Bxd2 13.Qxd2 d5 14.Bd3± Schwarz hat nicht genug Kompensatin für sein Opfer.]

9.Nbxd2 Na5?! Eine Ungenauigkeit
[Die Verteidigung mittels 9...Ne7! ist für Schwarz deutlich besser. 10.0−0 d6 11.Rc1 Bd7 12.Re1 Ng6 13.Nf1 Re8 14.Ng3 h5 15.h4 Ng4 16.Qd2 *(16.Nxh5=)* 16...Nxh4 17.Qf4?∓ *(17.Ng5!=)* 17...Ng6 *(17...Nxf3+ 18.gxf3 Ne5 19.Nxh5 Ng6 20.Qh2 Qg5+→)* 18.Qd2 h4 19.Nf5 Qf6 20.N3d4 Bxf5 21.exf5 Rxe1+ 22.Rxe1 Ne7 23.Qf4 Ne5 24.b3 Nxd5 25.Bxd5 Nd3 26.Qe3 Nxe1 27.Kf1 c6 28.Be4 Re8 29.Kxe1 d5 30.f3 dxe4 31.fxe4 h3 32.gxh3 Qh4+ 33.Qf2 Rxe4+ 0−1 (33) Tschoepe,F (1420)−Bartsch,R (2159) freechess.de 2013]

10.Bd3± d6?? Verliert schlicht eine Figur und somit auch die Partie.
[Schwarz muß 10...c5 spielen und nach 11.d6± muß er sich mit einer sehr passiven Stellung herumplagen.]

Sitges Sunway op 6th (1) 13.12.2019

[Quintiliano, Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3! Nd5 9.Nf3 Bd6 10.0−0 0−0 11.Re1 f5!? An interesting and less played line, sacrificing a second pawn to get a quick attack.

[Black has three options more often seen: 11...Re8 ,]

[11...Qc7]

[and 11...Bg4 , both leading to interesting play.]

12.Nxe5 Qf6 White has already a critical choice ahead. **13.Nc4?** This is the most played, and probably a mistake.

[13.Nf3 is the best retreat, see the next game.]

[13.Qe2? is also bad Bb7 White does not have a good way to deal with the threat of ♖ae8 *(13...Re8?* is hasty: *14.Ng4!)* 14.Nc4 *(14.Nd7* is also insufficient in view of *Qh6! 15.Qe6+□ Qxe6 16.Rxe6 Rfe8! 17.Bxf5 Kf7!* and White has big problems, for example: *18.Rxe8 Rxe8 19.Kf1 g6 20.Bh3 Nb4 21.Na3 Ba6+ 22.d3 Nxd3!∓)* 14...Nf4 15.Qf1 c5 White is already facing a serious attack 16.f3 Nxd3 17.cxd3 *(17.Qxd3 Bxh2+!)* 17...Nxc4 18.dxc4 Qd4+ 19.Kh1 *(19.Qf2 Bxh2+! 20.Kf1 Qxc4+−+)* 19...Qh4 20.g3

Bxg3−+ 0−1 Low,Z (2413)−Tabatabaei,M (2601) Biel MTO op 52nd 2019 (4)]

13...Nxc4 14.Bxc4 Qh6!N

[14...Qh4 was seen in other games, and is also good 15.Bxd5+ cxd5 16.g3 Qh3⟶ with nice attacking chances.]

15.g3

[After 15.h3 Qf4! 16.Bxd5+ cxd5 we have transposed to 14...♕h4 15.♗xd5+ cxd5 16.h3 ♕f4. 17.g3 Qg5 18.h4 Qg6 White is simply helpless against the imminent attack on the kingside. He tried a counter−attack with 19.Qf3 but Black can simply ignore it: f4! 20.Qxd5+ Kh8 21.Qxa8 fxg3−+ 0−1 Chekhov,S (2486)−Triapishko,A (2393) RUS−chT2 Sochi 2015 (4.2) and Black is winning.]

15...f4⟶ Black's attack comes fast & furious on the kingside. **16.d4 Qg6**

17.Bxf4!? A practical decision, getting three pawns for the piece and avoiding the collapse of the kingside's defences.

[Another defensive measures wouldn't prevent Black from increasing the pressure on the kingside, for example: 17.Bd3 Bf5 18.Bxf5 Rxf5 19.Qd3 fxg3 20.fxg3 Nb4! 21.Qb3+ Kh8 22.Na3 *(22.a3? Nxc2!)* 22...Raf8 23.Bd2 and Black wins by force now with Rf3 24.Re3□ Rf2! 25.Bxb4 Qf5!−+]

17...Rxf4 18.Nc3 Bb7?! This is logical, but not the best continuation for Black.

[It was still necessary to sacrifice one more pawn: 18...Rb8! 19.Nxd5 cxd5 20.Bxd5+ Kh8 White has four (!) pawns for the piece, but her position is still bad as Black is quickly activating his forces. 21.Bg2 Rf8 22.b3 Bg4 23.Qd2 Bf4! 24.Qa5 *(24.gxf4?? Bf3−+)* 24...Bh6! Black wins more material now, for example: 25.c4 Qf6 26.f4 Qxd4+ 27.Kh1 g5! 28.fxg5 Bg7−+]

19.Bd3! Black is forced to offer the rook on f4 now. **19...Qh6**

[19...Nxc3 20.bxc3 Qg5 keeps the pin, but leaves Black with other problems 21.Qe2 Rf6 22.Rab1 Bc8 23.Qe4±]

20.Ne4? White should had accepted the risks.

[It may look scary, but White had to go 20.gxf4! and try to hold the attack. Bxf4 *(20...Nxf4 21.Qg4! Rf8 22.Bf5!* keeps the kingside defended *g6 23.Be6+ Kh8 24.h3+−)* 21.Qg4! again, White is able to defend against all the threats Qxh2+ 22.Kf1 Qh1+ 23.Qg1 Qh4 24.Re4+−]

20...Rf7 21.c4!?

[The passive approach would be 21.Qd2 Qxd2 22.Nxd2 but although White has three pawns for the piece, Black's position is easier as he is able to coordinate the pieces: Rd8 23.c3 Bc8! 24.Ne4 Be7∓]

21...Nf4!? Black is still fighting for the initiative.

[21...Raf8!? was also possible 22.cxd5 cxd5 23.Nxd6 Rxf2! 24.h4 Qxd6 25.Re3 Qb6↑]

22.gxf4 Bxf4 23.Ng3 Raf8 A critical moment. **24.Re4?!**

[24.c5! was the best move, creating the dangerous threat ♗c4 Bxg3 *(24...Kh8!?)* 25.fxg3 Rf2 26.h4 and White is doing well to prevent the attack, for example: Rxb2 27.Bc4+ Kh8 28.Re6!+−]

24...Bb8

[Even stronger would be 24...Bd6! 25.Re2 c5! 26.d5 Bc8→]

25.Qc1

[25.Re2 directly was a better try.]

25...g5! 26.Re2 Bc8?!

[26...Rxf2! would be already winning. 27.Rxf2 Rxf2 28.Kxf2 Qxh2+ 29.Ke1 Qxg3+ 30.Ke2 Qg4+−+ and White simply has not a good square to the king, losing even more material.]

27.Be4? Trying to manoeuvre the bishop to g2 protecting the kingside, but there is not enough time for that.

[Instead, 27.Qe1! was the correct defence Bg4 28.Re8 Rxf2! 29.Qxf2 Rxe8 30.Re1 Rf8 31.Qe3∞]

27...Bg4 28.Rc2 Rxf2! Black finally manages to break into White's defences, with a winning attack. **29.Rxf2 Rxf2 30.Kxf2 Qxh2+ 31.Bg2 Qxg3+ 32.Kf1**

[32.Kg1 Bh3 33.Qf1 Qh2+ 34.Kf2 Bg3+ 35.Kf3 Bxg2+ 36.Qxg2 g4+−+]

32...Qd3+ 33.Kg1 Qxd4+ 34.Kf1 Bh2! 35.Bd5+

[35.Qxg5+ is an useless check. Kh8−+]

35...Kf8! 36.Kg2 Bf4 37.Qc3 Qxc3 38.bxc3 cxd5 39.cxd5 Bf5 40.Rd1 Ke7

0−1

18th European Teams (2.13) 04.11.2011
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3 I've recently written an article on this line in New in Chess, but Black's following move had skipped my attention. In fact, it was tested only once before in the Spanish Championships ... under 10! **8...g6** Black's idea is to complete development of the kingside by means of ...Bg7 and ...0−0, which will be followed by ...Nd5 and an advance of the f and e−pawns. In the game Black managed to realize this idea without any

resistance from his opponent.

[In my opinion the most reliable line for Black is 8...Nd5 , which has featured in a recent blitz match Kasparov, G−Short, N Leuven 2011. In that game Kasparov achieved a good position after 9.Nf3 Bd6! 10.0−0 Nf4! 11.Re1 Nxd3 12.cxd3 0−0 13.Nc3 Re8 14.h3 c5 15.b3 Ba6 16.Ba3 Bxd3 17.Ne4 Bxe4 18.Rxe4 f5 19.Ra4 e4 20.Nh2 Nc6 21.Rc1 Ne5∓ Short, N (2698) − Kasparov, G (2812)/Leuven BEL 2011.]

9.0−0

[9.Ne4 Bg7 *(9...Nd5!?* with the idea to attack the knight by means of ...f5 makes more sense. *)* 10.Nxf6+ Qxf6 11.0−0 0−0 12.Nc3 Bf5?! 13.Bxf5 Qxf5 14.d3± and White was better in Gonzalez Lopez, J−Leon Fernandez, M/Oropesa del Mar 1999.]

9...Bg7 10.Re1 0−0 11.Nc3

[The e5−pawn is poisoned. 11.Rxe5? Ng4−+]

11...Nd5!

[11...Ng4 looks like an interesting alternative, though White seems to have the better chances after 12.Nge4 f5 13.Be2! h5! 14.h3! fxe4 *(14...Nh6 15.Nc5!±)* 15.hxg4 Qd4 16.Rf1 hxg4 17.Bxg4! *(17.g3 Bf5!)* 17...e3! 18.Bf3! exf2+ 19.Rxf2 g5 *(19...Bf5!?)* 20.Qe1! g4 21.Ne2! Qb6 22.Be4±]

12.Nge4 Here the knight is exposed to attack.

[Probably White should have preferred 12.Nf3 Re8 13.Bf1± with 14.d3 to follow.]

12...f5 13.Nc5 e4 14.Be2!

[14.Bf1?! Bd4 15.Nb3 Nxb3 16.axb3 Qb6 17.Re2 Ba6 is fine for Black.]

14...Bd4! 15.Nxd5? A bad positional move, which improves Black's pawn structure in the centre.

[After the correct 15.Nb3 Nxb3 16.axb3 Be6 Black obtains an initiative for the sacrificed pawn.]

15...cxd5∓ Now the position is already unpleasant for White. **16.Nb3 Nxb3 17.axb3 f4**

[17...Qh4!? was also strong. 18.g3 *(18.Rf1 f4−+* leads to a decisive attack. *)* 18...Bxf2+! 19.Kg2! The only move. *(19.Kxf2?* loses to *Qxh2+ 20.Ke3 Qxg3+ 21.Kd4 Qd6!−+* with a decisive threat of 22... Qb6. *)* 19...Qh6! 20.Rf1 Bb6 with a big advantage.]

18.c3

[18.Ra4 Bb6∓ doesn't change much.]

18...Bb6 Iordachescu doesn't want to force matters.

[However 18...Bxf2+! virtually wins by force. 19.Kxf2 Qb6+ 20.d4! The only defense. *(20.Kf1 f3!* is disastrous for White. *)* 20...exd3+ 21.Kf1 dxe2+ 22.Qxe2 f3! 23.Qe3 d4! 24.Qxd4 fxg2+ 25.Kxg2 Qb7+ 26.Kg1 Bh3 27.Qc4+ Rf7 28.Re2 *(28.Qe2 Re7! 29.Qc4+ Re6!−+)* 28...Rc8! 29.Bh6 g5!! With a threat of 30...Qb6. 30.Qc5! Rf6!−+ and Black wins.]

19.d4

[19.Bf1! was a lesser of evils, though after Qh4 20.d4 Bc7∓ White is under strong pressure.]

19...f3!∓ 20.Bf1

[20.gxf3 is strongly met by Bc7! and Black's threats are decisive. For

example, 21.f4 *(21.fxe4 Bxh2+!−+)* 21...Qh4 22.Bf1 Rxf4−+]

20...fxg2 21.Bxg2 Qh4 22.Be3?

Loses on the spot.

[22.Re3 was the very last chance to prolong the fight. Qxf2+ 23.Kh1 Bc7∓]

22...Bc7!−+ 23.Qd2 Qxh2+ 24.Kf1 Bg4 and White resigned, not waiting for 25...Bf3. The 8...g6 line looks like an interesting alternative to other lines and requires more practical tests.

0−1

[Quintiliano,Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5! 5.exd5 Na5 6.d3?! h6 7.Nf3 e4 8.Qe2 Nxc4 9.dxc4 Bc5! 10.Nfd2 0−0 11.0−0?

[⌓11.Nb3]

11...Bg4! 12.Qe1 Qd7! This position has occurred a few times in tournament practice, but surprisingly the queen move was seen only in the present game. The point is to prevent h2−h3,

increasing the degree of White's development problems. **13.Nb3?** And after this White is losing by force.

[if 13.Nxe4 Nxe4 14.Qxe4 Rae8 15.Qf4 Be2 Black's activity will be enough to regain both pawns and keep an advantage: 16.Re1 Bxc4 17.Be3 Bxd5 18.Nc3 Bd6 19.Qh4 Bc6 20.Rad1 Qf5 21.Rd2 Re6→ and White's position is very unpleasant.]

[13.Nc3 is relatively better, but White's problems still look very difficult after Rfe8 14.Nb3 *(14.h3? Bxh3−+)* 14...Bd6 15.Be3 *(15.c5 Be5∓)* 15...Qf5! The threats of both ♕e5 and ♕h5 are very annoying now. 16.Nb5!? Bf3!−+ with the same ideas as in the game.]

13...Bf3!! A winning shot. Even the engine takes a few seconds to realise that White has no defence in this position.

[13...Bd6!? was good, but the text is winning by force.]

14.Bf4

[In case of 14.h3 Black has another route for the queen: Qf5 15.Nxc5 Qg6 16.g3 Qh5 17.h4 Qf5 White has a hard time having to prevent the invasion of the queen 18.Kh2 Ng4+ 19.Kg1 Ne5 20.Kh2 All the moves until here seemed natural, and the winning idea now is g5! opening new lines towards the king. 21.Nd2 *(21.Nxe4 Bxe4 22.Nd2 Bf3−+)* 21...gxh4 22.Ncxe4 Ng4+ 23.Kg1 h3!−+]

14...Qg4 15.Bg3 White apparently has repelled the immediate threats, but...

15...Nh5! The knight adds more pressure on the kingside. **16.Nxc5**

[16.gxf3 wouldn't offer better chances: exf3 17.Kh1□ The only way to prevent both ♕h3 and ♘xg3. Nxg3+ 18.fxg3 f2! 19.Rxf2 Rfe8 20.Qf1 Bxf2 21.Qxf2 Qd1+ 22.Kg2 Re2−+]

16...Nf4 17.Nd2

[17.Nxe4 Qh3!]

17...Qh3! And mate is unavoidable. A beautiful finish.

0−1

Barcelona Sants op 19th (1) 18.08.2017

[Quintiliano,R]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0 6.0−0 d5!? 7.exd5 Nxd5 8.Re1 The main line: instead of going for sharp lines, White just looks for quick development while keeping an eye on e5. **8...Bg4 9.h3**

[9.b4? is bad now due to tactical reasons Ndxb4! 10.Ba3 *(10.cxb4 Bxf3 11.Qxf3 Bd4∓)* 10...Bxf3 11.Qxf3 Nc2! 12.Bxc5 Nxe1 13.Qe2 b5!! an important detail 14.Bb3 *(14.Bxb5 Qd5! 15.Bxc6 Qxc6−+)* 14...Nxd3 15.Bxf8 Nc1! 16.Qxb5 Nxb3 17.axb3 a6! 18.Qe2 Kxf8∓]

9...Bh5 10.g4?! White just went for the e5−pawn in a different way.

[for 10.b4!? and]

[10.Nbd2 see the next games]

10...Bg6 11.Nxe5 Nxe5 12.Rxe5 c6⩱ This position resembles a Marshall Gambit, but the fact that White's kingside has been weakened by h3−g4 makes Black's compensation even more valuable. The many weak points in White's camp (f4,h4,h3) and ideas like ♕h4, h5 or f5 always on the air make his game harder in practice. **13.Qf3**

[13.Bxd5 Bd6! 14.Re1 *(14.Rg5* g5 is a poor place for the rook, as it will become evident *cxd5 15.Qf3 f5! 16.gxf5 Be7!* Even after *17.f6 Bxf6 18.Qxd5+ Rf7* White's problems remained difficult *19.Qxd8+ Rxd8−+* ;0−1 Souleidis,G (2421)−Ragger,M (2529) Bundesliga 0708 2007 (1.7) *)* 14...cxd5 15.Qf3 Bc7 This is simple

and very annoying for White 16.Na3 *(16.Nd2 f5! 17.Nf1 fxg4 18.Qxg4 Bf5 19.Qg5 Rf6 20.Ng3* 0−1 Stjazhkina,O (2280)−Arnaudov,P (2416) Varna op 4th 2010 (9) *Bxh3−+)* 16...Qd6 17.Nb5 *(17.Kf1 Qh2* is still unpleasant for White *)* 17...Qh2+ 18.Kf1 Rae8! White has serious threats hanging over his head now 19.Rd1 *(19.Bd2 Bxd3+!)* 19...f5! 20.Qxd5+ *(20.g5 Bh5−+)* 20...Kh8 21.Qg2 Qe5 22.Nd4 fxg4−+ 0−1 Istratescu,A (2573)−Anand,N (2377) Abu Dhabi op 25th 2018 (3)]

[13.d4 does not help either Bd6 14.Re1 Qh4 15.Qf3 Rae8−+ Black is too far ahead in development; there is no way White is going to survive in this position]

13...Bd6

[13...Qc7N has never been played, but it seems an interesting option 14.Re1 *(14.d4 Rae8! 15.Rxe8 Rxe8 16.Bd2 Bd6↑)* 14...Rae8 15.Bd2 Rxe1+ 16.Bxe1 Re8 17.Na3 *(17.Nd2 Ne3!)* 17...Re6 Black keeps interesting compensation]

14.Re1 Kh8!? The most natural continuation, preparing f7−f5, which will give a lot of problems for White.

[14...Bc7 is another way to prepare the same idea, with the additional threat ♕d6]

15.Kh1 This is slow, but I must say that White's position is unpleasant anyway.

[15.Bxd5 might offer better chances cxd5 16.Na3 *(16.Bf4??* 1−0 McShane,L (2640)−Sethuraman,S (2646) Wch Rapid Riadh 2017 (15) *Qf6−+* For some reason, Black missed this simple winning move *)* 16...f5 17.g5 f4! this keeps both White's queen and bishop restricted 18.h4 Qd7 19.Bd2 Bxd3! 20.Qxd3 Qg4+ 21.Kf1 f3−+]

15...Qh4 16.Nd2

[16.Bxd5 cxd5 17.Be3 this was the best chance, trying to continue the development as soon as possible Bxd3 18.Nd2 f5 Even then White's position is very unpleasant, for example 19.Qg2 Rae8 20.Bd4 fxg4 21.Qxg4 Qxg4 22.hxg4 Be2 23.Bxa7 Bxg4∓]

16...f5−+ White is defenceless now against the attack. **17.g5 Rae8 18.Rf1 Bh5 19.Qg2 Be2**

[19...Be2 20.Rg1 *(20.Re1 Nf4 21.Qg3 Qh5−+)* 20...Bg4−+]

17...fxe5 18.fxe5 Qf4 19.Qc5

[19.Qxf4? Rxf4 Weiß verliert nach dem ♕tausch einen weiteren Bauern.]

19...Bg4 Vertreibt den weißen ♖urm auf ein passives Feld ,bis zum Ende der Partie bleibt dieser hier auch stehen.

20.Rc1

[Nach 20.Rd3]

[oder 20.Rd4 folgt Qf2 21.Rc1 Bf3! der Bauer d5 darf nicht verloren gehen. 22.Nd1 Qe2 23.Qxc6 Qxe5 24.Qc5 c6 Schwarz steht besser,aber Weiß hat Verteidigungspotential.]

20...Qc4 21.Qxc4 dxc4 22.e6∓ Weiß setzt auf seinen Freibauern,er ist aber keine Gefahr für Schwarz.Objektiv besser für Weiß war

[22.b3∓ Schafft ein Luftloch für seinen ♔ und die ♖ürme können sich besser am Spiel beteiligen. Der ♖c1 kann jetzt offenen Linien besetzen.]

22...Rae8 23.Re5?!−+

[Etwas besser 23.e7∓]

23...Rxe6 24.Ra5

[Auch hier hätte Weiß etwas besser forsetzen können 24.Rc5 Rf4−+]

24...Rh6 25.Rxa7 Rxh4 26.a4 h5 27.a5 Bf3 28.a6 Hat Weiß noch einen Chance evtl. mit seinem Bauern durchzukommen? **28...Rhf4!** Nein dieser ♖ wird rechtzeitig auf a5 auftauchen und den Freibauer entschärfen. **29.Na4 R4f5 30.Rxc7 h4 31.a7 h3 32.Nb6 h2 33.Nc8 Ra5 0−1**

Reviakino (2) 23.12.2017
[Quintiliano, Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.Nxf7 Bxf2+! 6.Kf1! As we have seen, the king would be very exposed on f2, so White should decline this sacrifice. **6...Qe7 7.Nxh8 d5!** As usual, Black bets on his quick development and the exposed white king to compensate for the big material difference. **8.exd5**

[8.Bxd5?? Bg4−+]

[8.Be2?! This seems a solid option, but Black has nice chances after Bb6!

9.Bh5+ Kf8 10.exd5 Qc5! 11.d4□ Nxd4 12.Nc3 Bf5 and White still faces some problems here 13.Be3 Bxc2! 14.Bxd4 exd4 15.Qxc2 dxc3 16.Bf3 Kg8↑ the knight is lost on h8, which makes the material difference not so serious, especially in view of the situation of White's king.]

[8.Qf3? aims to save a tempo, but the queen can also be attacked in the next moves: Bc5 9.Bxd5 Nd4 10.Qc3 Nxd5 11.exd5 Qf6+ 12.Ke1 Qh4+! 13.Kf1 Qf4+ 14.Ke1 Qe4+−+ with a winning attack for Black.]

[8.Kxf2?! looks playable, but Black achieves enough compensation again: dxc4 9.Nc3 Bg4 10.Qf1 0−0−0 11.h3 *(11.Qxc4? Rf8! 12.Kg1 Be6 13.Qd3 Ng4−+)* 11...Rf8! 12.Kg1 Be6∞]

8...Nd4 9.c3? Although this is the most played, it is just a mistake.

[9.h3? doesn't solve White's position either: Bh4 10.c3 Nf5∓]

[9.d6! 9 is the right move to play for an advantage, see games 8 and]

[9.Kxf2? is also bad here: Bg4 10.Qe1 Nxc2−+]

9...Bg4! 10.Qa4+ Nd7 White has many reasons to be scared in this position, as his king is stuck in the centre, his pieces are not developed and Black is one or two moves away from launching a winning attack. **11.Kxf2** Accepting the risks.

[11.cxd4 is also losing after Qf6 12.dxe5 Qf4−+]

11...Qh4+! The most precise, as Black will need the f3−square, so he forces White to weaken that point first.

[White could survive after 11...Qf6+? 12.Ke1 Qf5 13.d3! Nf3+ 14.Kd1! Nd4+ 15.Ke1= and Black has only a draw.]

12.g3

[12.Kf1 0−0−0−+ is just hopeless]

12...Qf6+ 13.Ke1 Nf3+ 14.Kd1 Nd4+ 15.Ke1 Nf3+ 16.Kd1 Nd4+ 17.Ke1 Qf3!

[17...Qf5! was also winning: 18.cxd4 Qe4+ 19.Kf2 Qf3+ *(19...Qxh1−+)* 20.Ke1 Qxh1+ 21.Bf1 0−0−0−+]

18.Rf1

[18.cxd4 Qe4+! 19.Kf2 Qxh1 20.dxe5 Qxh2+ 21.Kf1 0−0−0−+]

18...Qe4+ 19.Kf2 0−0−0−+

Black brings the rook into the attack, with decisive effect. **20.cxd4** White has no better options.

[20.Nf7 Rf8 21.d6 Rxf7+! 22.Kg1 *(22.Bxf7 Qf3+ 23.Kg1 Ne2#)* 22...Nf3+ 23.Rxf3 Qxf3 24.Bxf7 Bh3−+]

[20.Kg1 Bh3 21.Rf2 Qe1+ 22.Bf1 *(22.Rf1 Nf3+ 23.Kh1 Bxf1−+)* 22...Ne2+ 23.Rxe2 Qxf1#]

20...Rf8+ 21.Kg1 Qxd4+ 22.Kg2 Qe4+ 23.Kg1 Rxf1+ 24.Kxf1 Qh1+ 25.Kf2 Qxh2+ 26.Kf1 Bh3+ 27.Ke1 Qg1+ 28.Ke2 Bf1+ 29.Kf3 Qg2+ 30.Kg4 Qe4+ 31.Kh5 Nf6+

0−1

[Karben,Michael]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Zweispringer spiel **3...Nf6** Im Grunde genommen ist das Zwei♘spiel ein Bauernopfer,und die Kompensation von Schwarz scheint ausreichend zu sein.
[Während das sichere 3...Bc5 nie an Beliebtheit verlor,begannen ehrgeizigere Spieler ,etwas Aggressiveres als die ruhigen Gewässer des Giuoco Pianissimo zu suchen.Das Zweispringerspiel im Nachzug ist dafür genau das Richtige −indem er sofort den Bauern e5 unter Beschuss nimmt,möchte Schwarz die Initiative ergreifen.Das ist der erste echte Gegenangriff von schwarzer Seite. Weiß kann drei Wege in Betracht ziehen: 1)Die Hauptvariante 4.Ng5 die das Hauptproblem der ♘entwicklung deutlich macht.Schwarz kann den Bauern f7 nicht bequem verteidigen,weshalb er sofortvzum Angriff übergehen muss. 2)Die Verteidigung des Bauern e4−hier sollte Schwarz keine haben,egal ob er sich entscheidet ,in die Gefilde des Giuoco Pianissimo überzuleiten oder die Partie im Zweispringerspiel zu

halten. 3)Der Max−Lange Angriff mit *(4.d4* noch eine Variante ,die ihren guten Teil an glorreichen Siegen gesehen hat ,aber in der aktuellen Theorie tot und begraben scheint. *)*]

4.Ng5 Unterstreicht den Defekt der schwarzen Entwicklung−es gibt keine einfache Lösung, um f7 zu decken.

[4.d3 ist harmlos mit Bc5 kann Schwarz zu den Varianten des Giuoco Pianissimo überleiten,während er mit *(4...Be7 5.0−0 0−0* doe Option behält,entweder ...−d6 oder ...−d5 zu spielen. *)*]

[Näher bringen möchte ich natürlich 4.d4 mit dem Max Lange Angriff,der Bauernzug stiftet sofort Unruhe. exd4 5.0−0 *(5.e5 d5! 6.Bb5 Ne4 7.Nxd4* ist der Beginn einer ruhigeren ,eher positionellen Variante.Weiß strebt eine bessere Bauernstruktur und freie Entwicklung an,wofür er das ♗paar aufgibt.Nach *Bd7 8.Bxc6 bxc6 9.0−0 Bc5 10.f3 Ng5 11.Be3 Ne6* hat Schwarz vollen Ausgleich. *)* 5...Bc5 *(*Eine verlockende Alternative für Schwarz ist *5...Nxe4 6.Re1 d5 7.Bxd5 Qxd5 8.Nc3 Qa5 9.Nxe4 Be6 10.Bd2 Qh5 11.Bg5 Bd6!* mit keinerlei Problemen. *)* 6.e5 Das ist die Grundstellung des Max−Lange Angriffs.Wie so so viele Varianten der Italienischen Partie ist er sehr gefährlich ,aber ein gut vorbereiteter Spieler sollte mit Schwarz keine Probleme haben. d5! Wieder ist der Zug lebenswichtig. 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5! Schwarz deckt den ♗e6 und bereitet gleichzeitig die lange Rochade vor(die kurze Rochade ist mit dem Bauern f6,der wie ein Keil in der Festung steckt,nicht allzu verlockend).Es stimmt,dass die ♕ ein Angriffsobjekt für die weiße Entwicklung darstellt,aber die Analysen haben gezeigt ,dass sich das Risiko lohnt. 10.Nc3 Qf5 11.Nce4 0−0−0! Fazit:Weiß hat Mühe, seine Stellung zusammenzuhalten − Schwarz besitzt hervorragende Kontrolle im Zentrum,und die bevorstehende Linienöffnungen am ♔flügel versprechen nichts gutes für den weißen Monarchen.]

4...d5! Ein Gegenschlag im Zentrum ist oft eine gute Spielweise in der Eröffnung ,und hier stellt er die bei weitem stärkste Möglichkeit für Schwarz dar.

[4...Bc5 ist eine verrückte Nebenvariante ,die am besten durch 5.Bxf7+ Ke7 6.Bd5! entschärft wird.]

5.exd5 Nxd5?! Dieser ♘zug ist an sich schon sehr fragwürdig. Außerdem ist es natürlich sehr riskant gegen einen Spieler der auch noch in der Elo Liste gut 200 Punkte höher steht diese minderwertige Variante zu spielen?

[Richtig ist der ♘zug 5...Na5!? Deshalb möchte diesen einzigen richtigen Zug ausführlich Kommentieren. 6.Bb5+ c6 7.dxc6 bxc6 Der Tempogewinn auf den ♗er ist wichtiger ,als den ♘ a5 ins Spiel zu zurückzubringen. 8.Be2 *(*Eine Alternative ist *8.Qf3* Schwarz hat mehrere gute Antworten , darunter *Rb8! 9.Bxc6+ Nxc6 10.Qxc6+ Nd7⩲* mit genug Kompensation für den Bauern *)* 8...h6 Der ♘ steht auf g5 nicht großartig, aber indem er ihn vertreibt,plant Schwarz,mit ...−e4 weitere Zeit zu gewinnen oder den ♘ an den

Brettrand zu drängen.
A) 9.Nh3 Eine alte Idee von Steinitz Bc5 10.0−0 0−0 11.d3 Bxh3 12.gxh3 Qd7 13.Bf3 *(13.Bg4 Nxg4* nbst ...−f5 mit schönem schwarzen Angriff *)* 13...Qxh3 wonach der geschwächte weiße Königsflügel durch das ♗paar auf offenem Brett kompensiert wird.;
B) 9.Nf3 e4 10.Ne5 Bd6 Gewinnt mehr Zeit .Nun hat Weiß die wahl,wie er den ♘ verteidigt. 11.d4 *(11.f4 exf3 12.Nxf3* ist ebenfalls Okay für schwarz ,da seine Entwicklung,gekoppelt mit der etwas wackeligen weißen ♔stellung ,ausreichende Kompensation darstellt. *)* 11...exd3 12.Nxd3 Qc7 13.b3 0−0 Fazit: Schwarz hat genug Kompensation −gute Entwicklung und aktive Felder für seine Figuren .Er sollte mit ...−c5 und ..−♗b7 fortsetzen,während Weiß versucht,seinen Mehrbauern zu konsolidieren.Ein weiterer bedeutsamer Faktor ist der ♘ auf a5 −sehr oft hängen Erfolg oder Misserfolg des Nachziehenden davon ab ,ob dieser ♘ ins Spiel gebracht werden kann.]
[Schwarz hat zwei Gambitalternativen die Dubios sind,zum einen der Textzug und 5...Nd4?! in beiden Fällen bleibt der b−Bauer nach dem Rückzug des ♗ers sehr schwach 6.c3 b5 7.Bf1!]

6.d4!
[6.0−0? Verliert unnötig Zeit und Schwarz hat keine Probleme.]
[6.Nxf7 Kxf7 7.Qf3+ Ke6 8.Nc3 Ncb4 9.0−0 c6 10.d4 Qf6 11.Qe2 Kd7 12.Ne4 Qf5 13.a3 Na6 14.Rd1 Kc7 15.b4 Be6 16.b5 Nb8 17.Bd3 Nf4 18.Bxf4 Qxf4 19.g3 Qg4 20.Qe3 Bd5 21.c4 Bxe4 22.Bxe4 exd4 23.Qxd4 Qd7 24.Qe3 Qe6 25.c5 Bxc5 26.Qxc5 Qxe4 27.Rab1 Kc8 28.Qd6 Qe8 29.bxc6 Nxc6 30.Rxb7 Kxb7 31.Rb1+ Kc8 32.Rc1 Qd7 33.Rxc6+ Kd8 34.Qc5 Rc8 ½−½ (34) Schroeder,M (2440)−Denisov,T (2078) ICCF 2014]

6...Be7?! Wieder nicht das beste.
[Aber auch nach dem etwas besseren 6...Nxd4± steht Weiß deutlich besser. 7.c3 f6 8.cxd4 Bb4+ 9.Bd2 Bxd2+ 10.Nxd2 fxg5 Weiß ist besser entwickelt und Schwarz hat struktuelle Probleme (Bauern)]

7.Nxf7! Fernschach 2014 nach 7 Zügen steht Weiß schon sehr Vorteilhaft...ein seltener Umstand aber wohl doch noch möglich! **7...Kxf7 8.Qf3+ Ke6?!±**
[8...Ke8 Den ♔ auf die Grundreihe zu bringen ist die sicherer Alternative. 9.Bxd5! Nxd4 10.Qf7+ Kd7 11.Be4 Qf8 12.Qh5 c6 13.Qxe5± Schwarz hat einen sehr wackeligen ♔ und hat einen Bauern weniger....]

9.Nc3 Ncb4?
[Warum Schwarz hier nicht das offensichtliche 9...Nxd4± spielt bleibt sein Geheimnis!]

10.Qe4 c6 11.a3! So merkwürdig es auch ausschauen mag,dieser scheinbar aussehende Bauernzug ist der einzige gewinnbringende Zug!!Es ist wichtig den schwarzen ♘ zu vertreiben bevor die weiße ♕ auf e5 zuschlägt..man sehe folgende mögliche Zugfolge.
[11.0−0 Jetzt hat Schwarz Zeit seinen ♔ aus der Schußlinie zu bringen. Kd7 12.Qxe5 Ohne Schach! Bf6! 13.Qg3

Nxc2=]
11...Na6 12.Qxe5+± Kf7
[12...Kd7 verliert sofort 13.Nxd5 Qf8 *(13...cxd5?? 14.Bb5#)* 14.Nxe7 Qxe7 15.Bf4 Qxe5+ 16.Bxe5+−]
13.Nxd5 cxd5 14.Bxd5+! Besser als
[14.Qh5+ g6 15.Bxd5+ Ke8 16.Qe5 Rf8 und Schwarz hat sich etwas konsolidiert.]
14...Kf8 15.Qh5 Qe8 16.Qf3+ Bf6+ 17.Be3 Rein Materialistisch gedacht hat Schwarz Ausgleich und kann versuchen die Partie in schlechter Position fortzusetzen.In der Hoffnung das Weiß ungenau fortsetzt. **17...Qb5?**
Das setzt aber voraus das Schwarz auch die besten Züge findet.
[17...Nc7!? 18.Bb3± aber der Gewinn verlangt noch viel Arbeit für Weiß.]
18.c4 Gewinnt deutlich an Raum!
18...Qa5+?
[⌓18...Qd7]
19.Bd2 Qb6 20.0−0 Nc7??+−
Jetzt geht Schwarz im weißen Angriffstrubel unter!
[Unbedingt Notwendig war 20...Be6 21.Bxb7 Rb8 22.Be4 Qd8 23.d5+−]
21.Bb4+ Ke8 22.Bc5 Qa6 23.Rfe1+ Schwarz steht verloren. **23...Kd8 24.b4 Qa4 25.b5 Bd7 26.Bxb7 Rb8 27.b6!** Eine herrliche Schachpartie,sie ist nicht frei von Fehlern aber schön zum Nachspielen. Fernschach 2014 alles ist noch möglich!

Hastings Challengers (3) 2003
[Huber,G]

1.e4 e5 2.Bc4 f5 The "Calabrese Counter Gambit", which is not nearly as bad as it looks. Black benefits from having his bishop still on f8 where it helps defend the kingside from quick ♗xg8 and ♕h5+ attacks. Das "Kalabresische Gegengambit", das bei weitem nicht so schlecht ist, wie es aussieht. Schwarz profitiert davon, dass sein Läufer noch auf f8 steht, wo er hilft, den Königsflügel gegen schnelle Angriffe mit ♗xg8 und ♕h5+ zu schützen. **3.d3**

White is content to head towards a reversed King's Gambit Declined setup with an extra tempo. Both sides have various development move−orders to achieve this, but they normally result in the same end position Weiß ist damit zufrieden, einen Aufbau des Abgelehnten Königsgambits mit vertauschten Farben und einem Mehrtempo zu bekommen. Beide Seiten verfügen über eine Reihe von Zugfolgen, um dies herbeizuführen, aber normalerweise führen sie alle zur selben Stellung.

[3.Bxg8?! Prepares an appealing ♕h5+, but it isn't very good Bereitet das verlockende ♕h5+ vor, ist aber nicht sehr gut. Rxg8 4.exf5 *(4.Qh5+?!* wastes too much time pawn−grabbing verschwendet zu viel Zeit, um auf Bauernraub zu gehen. *g6 5.Qxh7 Rg7∓* gives black excellent play for the pawn, and demonstrates the importance of having the black bishop still on f8. gibt Schwarz ausgezeichnetes Spiel für den Bauern und zeigt, wie wichtig es ist, den Läufer noch auf f8 zu haben. *)* 4...d5 5.Qh5+ otherwise black simply regains the f5−pawn with advantage sonst gewinnt Schwarz den Bauern f5 einfach mit Vorteil zurück. g6 6.fxg6 Rxg6!⩱ guaranteeing black good play for the pawn, and even offering the h7 pawn as well if white is so greedy garantiert Schwarz gutes Spiel für den Bauern und bietet auch noch den Bauern h7 an, wenn Weiß so gierig ist. 7.Qxh7?! Qf6 and black's development lead will be very dangerous und der schwarze Entwicklungsvorsprung ist sehr gefährlich.]

3...Nc6

[3...Nf6 4.Nf3 *(4.f4?!* White's king is a bit too exposed to gain any advantage from this. Der weiße König steht ein wenig zu exponiert, um auf diese Weise Vorteil zu erzielen. *Nc6! 5.Nf3 fxe4 6.dxe4 Nxe4 7.fxe5* 7.♕d5 and 7.♗d5 have also been tried without success. 7.♕d5 und 7.♗d5 wurden ebenfalls ohne Erfolg probiert. *Nxe5!* and the black knight is immune due to ...♕h4+ und wegen ...♕h4+ ist der schwarze Springer immun. *)* 4...Nc6 5.0−0 Bc5 6.Nc3 d6 is one example of many possible transpositions to the game. ist eines von vielen Beispielen, wie die Partiestellung mit Zugumstellung erreicht werden kann.]

4.Nf3 Bc5 5.0−0 d6 6.Nc3 Nf6 7.Bg5

Certainly a sensible way for white to use his extra tempo here, as black often plays the same idea in the reversed version of this position. Sicherlich ein kluger Weg, wie Weiß hier das Extratempo nutzen kann, da Schwarz in der Stellung mit vertauschten Farben diese Idee oft anwendet.

[7.Ng5?! overly direct, as white doesn't gain much from infiltrating on f7. Zu direkt − Weiß gewinnt nicht viel, wenn er auf f7 eindringt. Qe7 8.Bf7+ Kf8 9.Nd5 Nxd5 10.Bxd5 f4 11.Qh5 g6 12.Qh6+ Qg7 13.Qxg7+ Kxg7= left white with nothing in Yeo−Lyell, 1999. und Weiß hatte nichts, Yeo−Lyell, 1999.]

7...Na5 8.Bxf6 Qxf6 9.Nd5

[9.b4?! trying to create tricky forks with ♘d5, but they don't quite work. versucht, trickreiche Gabeln mit ♘d5,

aber die funktionieren nicht wirklich. Nxc4 *(9...Bxb4? 10.Nd5±)* 10.bxc5 *(10.dxc4 Bb6=)* 10...Na5 11.cxd6 cxd6 12.Nd5 Qd8= is nothing special for white. ist nichts Besonderes für Weiß.]

9...Qd8 10.b4 Entering a series of exchanges which leaves white better developed. Der Auftakt zu einer Reihe von Abtäuschen, nach denen Weiß besser entwickelt bleibt. **10...Nxc4 11.bxc5 fxe4 12.dxc4 exf3 13.Qxf3±** and black will have a hard time coordinating and getting his king out of the center. und Schwarz wird Probleme haben, sich zu koordinieren und seinen König aus dem Zentrum zu bekommen. **13...c6 14.Nc3 Qf6 15.Ne4!?**

[15.Qxf6 gxf6 16.cxd6±]

15...Qxf3 16.Nxd6+ Ke7 17.gxf3± and white's strong knight and active rooks are worth more than the wrecked pawn structure. und der starke weiße Springer und die aktiven Türme wiegen die ruinierte Bauernstellung mehr als auf. **17...h5 18.Rfe1 Kf6 19.Rad1 Be6 20.h4 b6 21.Ne4+ Ke7 22.Ng5 Bxc4 23.Rxe5+ Kf6 24.Re4?**

□ **Nareznoy,David 2069**
■ **Mikhalevski,Victor 2559**
16th ch−EUR Indiv 2015 (2) 25.02.2015
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 It's quite surprising, but I have never met this line before. However, I had an idea what to do here as I recently looked at L'Ami's win over Jones. This game is also an opportunity to revisit a line which hasn't been seen on our pages for about ten years. **4...exd4 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bd7**
[7...Bc5!? is an interesting alternative, when the main point is that White can't win material by means of 8.Nxc6 Bxf2+ 9.Kf1 bxc6 10.Bxc6+ Kf8 11.Bxa8?? because of Ba6+]
8.Bxc6 The main line. **8...bxc6 9.0−0 Bc5 10.f3** This move, with the subsequent 11.f4 wins a tempo for White, although Black gets a nice square on e4 in exchange. **10...Ng5 11.f4**
[Sometimes White starts with 11.Be3 , which may transpose into the text after Bb6 12.f4 Ne4 like for instance in Jones, G (2661)−L'Ami, E (2618)/ Wolvega 2014.]
11...Ne4 12.Be3 Before exchanging Black's strong knight White needs to support his own knight. **12...Bb6** Freeing the c−pawn. **13.Nd2 c5** I decided to give White a wider choice of recapturing on d2 as I believed that it's best to recapture with the queen.
[13...Nxd2 is much more popular. 14.Qxd2 c5 15.Nf3 d4 16.Bf2 Bc6 is the main line and transposes to the game of L'Ami. Enjoy the the Dutch GM's game! 17.a4 a5 18.f5 Qd5 19.Qg5 h6 20.Qxg7 0−0−0 21.Qf6 Rhg8 22.Bg3 c4 23.Kh1 h5 24.b3 cxb3 25.cxb3 d3 26.Qh6 Kb7 27.Qd2 Rg4 28.b4 Rxb4 29.Qg5 Rh8 30.Qg7 Qd8 31.e6 h4 32.Be5 Rg8 33.Qxf7 h3 34.Bg3 Rb2 35.gxh3 Qd5 36.Qh5 Rg5 37.Qxg5 Qxf3+ 38.Rxf3 Bxf3# 0−1 Jones, G (2661)−L'Ami, E (2618)/Wolvega 20145]
14.N4b3 By attacking the c5−pawn White provokes a recapture on d2, although Black wouldn't have avoided it even after the more natural 14.Nf3.
[I expected mostly 14.N4f3 Nxd2 15.Qxd2 , which transposes to 13... Nxd2.]
[14.Ne2 occurred in Zelcic, R (2531)−Ivic, M (2186)/Omis CRO 2004/[Nigel Davies]. This was our last reference to the entire line with 4.d4!]
14...Nxd2 15.Nxd2
[Now 15.Qxd2 would allow Black to build a strong battery along the a8−h1 diagonal. d4 16.Bf2 Bb5 17.Rfe1 Qd5∓]
15...0−0 16.c4
[In the only preceding game White played 16.Qf3 Bf5 17.g4 Bxc2 *(17...Bc8* with the idea to exploit the weakening of the kingside later was

also possible. *)* 18.f5? *(18.Rfc1* was necessary, although Black retain an upper hand after *Bd3 19.Bxc5 Ba6)* 18...Re8 19.Qg3 d4−+ Demoulin, J−Hernandez, A/Szeged 1994.]

16...Bf5 Probably not the most accurate. My idea was to exploit the weakness of the d3−square.

[16...d4! is more to the point, although during the game I wasn't sure I want the position to be blocked as my bishop pair might be rather useless. 17.Bf2 Bf5 *(17...f6* is strongly met by *18.Bh4* pinning the f−pawn.*; 17...Qe8!?* with the idea of 18...f6 is interesting. *)* 18.g4 Bc8 19.Ne4 Bb7 20.Qf3 Re8∓]

17.Qh5!? This move came as a surprise. White takes advantage of the fact that the bishop can't be protected by the black queen due to over loading of the latter and so I'll have to either weaken my position with 17... g6 or allow an advance of the f−pawn to f5.

[17.cxd5 Qxd5 *(17...Bd3?! 18.Qf3!±)* 18.Qf3 Rad8= leads to a roughly equal endgame, where the double pawns on the open c−file are compensated by the activity of the black pieces and weak light squares.]

17...Bg6

[17...Bd3 18.f5 looked scary. Even though Houdini gives Black a slight edge my task would be difficult.]

18.Qh3! d4 My idea is to stop f5 at all costs. **19.Bf2?!**

[White should have played the immediate 19.f5! , when after dxe3 20.fxg6 hxg6 21.Qxe3 Qd4 22.Qxd4 cxd4 23.Nb3 c5 24.Nc1= the knight is regrouped nicely to d3 and the chances are roughly equal.]

19...Qc8! Finally I managed to prevent an advance of the f−pawn. **20.Qf3!** White avoids an exchange of queens and prepares g4 with the subsequent f5.

20...Qf5! A very concrete approach, which has the point of attacking the d2−knight from either d3 or c2.

[After 20...Bf5 I didn't like 21.h3 as I couldn't find how to stop the advance of the white pawns.]

21.Rac1?! This looks a little slow.

[In case of 21.g4 Qd3 22.Qd1! I would probably play h5! trying to build a blockade on the light squares. Nevertheless, White should have looked for counter chances in this direction.]

21...f6 Might be slightly inaccurate again.

[It seems that Black should have preferred 21...Bh5!? 22.Qe4 Qxe4 23.Nxe4 Bg6 24.Ng3 h6∓ retaining the upper hand thanks to the protected passed pawn in the centre, while after 25.f5 Bh7 White will have to worry about his advanced pawns.]

22.Bh4? White goes astray.

[22.g4! was necessary. Qd3 23.exf6 *(* During the game I was seriously considering *23.f5 Qxd2 24.e6* when White manages to keep the position closed and Black's light−squared bishop can't retreat due to the hanging position of the rook on a8. However, Black seems to be on top after *Rae8∓* with the idea of 25... Re7. *)*

A) 23...Qxd2 24.Qd5+ Kh8 *(*or *24...Bf7 25.Qg5 Bg6 26.Qd5+)* 25.fxg7+ Kxg7 26.Qe5+ leads to a perpetual.;

B) 23...Qxf3 24.Nxf3 gxf6 25.f5 Be8! transferring the bishop to the a8−c6 diagonal. 26.b4 Rd8 is a little better for Black.]

22...fxe5 23.Qd5+ Bf7 24.Qxe5 Qd3!?
[24...Qxe5 is simpler. 25.fxe5 Rae8 26.Bg3 h6∓]

25.Rf2 Rae8 A risky decision in time trouble.
[It would be safer to come to e8 with the other rook. 25...Rfe8!?
A) or 26.Be7? c6! preparing 27...Bd8. 27.Qg5? *(27.Re1* is relatively better, but Black retains the upper hand after *Ba5∓)* 27...h6 28.Qh4 Qe3! This move wouldn't be possible with the a8−rook on f8. 29.Bd6 Ba5−+;
B) 26.Qg5 Re2∓]

26.Be7 Ba5?⊕ An awful move. I missed that after 27.Nb3 the material at the end will be in White's favour.
[After the correct 26...Bg6! 27.Qd5+ Rf7 28.f5 Kh8!∓ Black is better.]

27.Qxc5? Fortunately White returns the favour.
[He would obtains the better chances after 27.Nb3 Qe3 *(27...Bb6!?* is relatively better. *28.Rf3 Qg6 29.Rg3 Rxe7 30.Qxe7 Qd6 31.Qg5 Bg6±)* 28.Qxe3 dxe3 29.Bxf8 exf2+ 30.Kxf2± Somehow I failed to calculate the material on the board. It turns out that Black is a pawn down.]

27...Bxd2 28.Rd1 Qe3! White has clearly missed this idea, but in fact this is not the only way to win. **29.Bxf8**
[The bishop on d2 is untouchable. 29.Rdxd2 Qe1+−+]

29...Be1! Another important idea behind 28...Qe3. **30.Rxe1 Qxe1+ 31.Rf1 Qe3+ 32.Kh1 Rxf8** Black is a healthy piece up. So it's time to resign.
[32...Qf2!−+ leads to mate.]

33.Qxc7 d3 This game confirmed the evaluation of the line as good for Black.
0−1

□ **Mahoney,Michael 2055**
■ **Mikhalevski,Victor 2533**
World Open Philadelphia (3) 01.07.2016
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 Anish Giri's likes this move order. However, it allowed me to play **6...Bb6!?** with the idea to play ... Ne7, ...c6 and ...Bc7 escaping an exchange of the dark−squared bishop.
[You can find two recent examples in our archive. 6...a6 Giri,A (2798)−Anand, V (2784)/Zurich SUI 2016/ [Mikhalevski,V].]
[6...0−0 Giri,A (2790)−Eljanov,P (2765)/Stavanger NOR 2016/ [Mikhalevski,V].]
7.a4 Lines with a4 are gaining popularity.
[7.Bb3 is a natural move here.]
[earlier we looked at 7.Nbd2 Jobava,B (2730)−Sasikiran,K (2707)/ Amsterdam NED 2012/[Mikhalevski,V]. In that game the position after 6...Bb6 was achieved after a transposition.]
7...a5 I need this move in order to proceed with 8...Ne7.
[Obviously, the immediate 7...Ne7?? allows White to trap the dark−squared bishop by means of 8.a5+−]
8.Na3 The knight is heading to c2 in order to eliminate Black's pressure along the a7−g1 diagonal by means of Be3. White also has alternatives. **8...Ne7**
9.Nc2 A new move in a rare position.
[Here is one of the examples of GM play. 9.Bb3 White prepares 10.Nc4. c6 10.Nc4 Bc7 11.Re1 0−0 *(* I would suggest the immediate *11...Ng6* in order to meet *12.Bg5* with *h6* and White gets no time for 13.Nh4, as in the game. *)* 12.Bg5 Ng6 13.Nh4 Nxh4 *(13...Nf4* also promised good play for Black. *)* 14.Bxh4 h6 15.d4± with some pressure for White in Neiksans,A (2607)−Romanov,E (2635)/ Fagernes NOR 2016.]
9...c6 10.Be3 Bc7! After keeping the dark−squared bishop it turns out that White's knight on c2 is out of play, since the e3−square is occupied by the bishop. **11.Ba2**
[11.Bg5!? was worth a try freeing the aforementioned square.]
11...Ng6 12.h3
[Now 12.Bg5 would be answered by h6∓]
12...0−0∓ 13.Re1 h6! The idea of Bg5 has been fully prevented and White starts to feel that his pieces are in each other's way. **14.Qd2 Kh7** A safe move.
[After losing the first game I didn't want to allow Bxh6, though it was strong to play 14...d5! with the idea 15.Bxh6? gxh6 16.Qxh6 Nh7−+]
15.Rad1 Nh5 Black is increasing the

pressure. My idea was to bring the knight to f4, while the queen will go to f6 to create tactical threats on h3.
[15...d5!?∓ was possible, but I didn't want him to play Bc5 as the bishop is a problem.]
16.d4 Qf6! Black should avoid any exchanges as it facilitates White's defence. **17.Ng5+?** White was attracted by this tactical idea, based on the position of my queen. However, it turns out that the knight will be stuck there and has to retreat to f3, wasting important time.
[17.Rf1 Nhf4∓ 18.Nce1∓ looks awkward, but allows White to hold on.]
17...Kg8 Now White faces an extremely annoying threat of 18...Nhf4 **18.g3** This attempt to cover the f4−square doesn't help White.
[While 18.Nf3 is met by Bxh3!−+]
18...Nhf4!−+
[18...Ngf4!−+ is also strong.]
19.Nxf7
[19.Nf3 Bxh3 20.Nh2 Nh4!−+ is also bad for White.]
[19.gxf4 exf4 20.Nf3 Bxh3−+ also leads to a disaster.]
19...Rxf7
[I could have started with 19...Nxh3+!? and only after 20.Kg2 Rxf7−+]
20.Bxf7+ Qxf7 21.Bxf4 exf4 22.Kg2
[22.Kh2 Bd7−+ isn't much better.]
22...Bd7! One shouldn't forget about development. The e6−square is kept for the queen. **23.h4 f3+** I saw that this move wins easily.
[23...Nxh4+! wins on the spot. 24.gxh4 f3+ 25.Kg3 *(25.Kh2 Qf6−+)* 25...d5+ 26.e5 Qg6+ *(* or *26...Qf5)* 27.Kxf3 Qg4+ 28.Ke3 Qe4#]
24.Kh1 Qe6 The queen is coming to h3.
25.Ne3 Qh3+ 26.Kg1 Nxh4!?
[or 26...d5 27.e5 Bxe5 28.dxe5 Nxe5 29.Qd4 Ng4 30.Qxg4 Bxg4−+]
27.gxh4
[27.Qd3 Ng2 28.Qf1 Nxe1−+]
27...Rf8! A slow death. White can hardly move, while Black brings his rook into the fray with decisive effect. **28.Qd3 Rf4 29.Qf1 Qxh4** 30...Qg5 is coming.
30.Qc4+ d5 and White resigned as he gets mated. This game showed a drawback of the plan with Na3−c2: the bad position of the knight on c2 when the dark−squared bishop is on e3.
0−1

corr VWC8 /pr 1 01.09.2015
[Bellmann,Herbert]

Seit dem Weltmeisterschaftskampf zw. Magnus Carlsen und Sergey Karjakin ist die Italienische Partie wieder ein wenig aus dem Dornröschenschlaf erwacht. Warum Italienisch wieder Modern ist, möchte ich gern etwas näher beleuchten . **1.e4 e5 2.Nf3 Nc6 3.Bc4** Dieser Entwicklungszug ist sehr alt und praktisch seit den Kindheitstagen des Schachspiels bekannt.Seine Beliebtheit unter den Spielern ist ungebrochen, auch wenn ihm 3.♗b5 den Rang abgelaufen hat.Die Argumente für den ♗zug nach c4 liegen deutlich auf der Hand : Weiß postiert seine Figur auf einem zentralen Feld,von dem aus sie

auf der Diagonalen a2−g8 sehr wirksam am Spiel teilnehmen kann.Der ♗er nimmt den empfindlichen Punkt f7 im Lager des Gegners aufs Korn und steht bereit,jederzeit an einem Angriff auf den schwarzen ♔ teilzunehmen. **3...Bc5** Populär und gleichermaßen historische Antwort des Nachziehenden.Er verhindert d2−d4 und greift seinerseits den gegnersichen emmpfindlichen Punkt in ♔nähe an,also f2. **4.c3** Der meistgespielte Zug sowohl im Nahschach als auch im Fernschach. Auch ist er der Favorit der Theorie . Weiß will d2−d4 durchsetzten ,um sich damit eine Überlegenheit im Zentrum zu verschaffen.

[Andere weiße Möglichkeiten sind 4.0−0]

[4.d3]

[4.Nc3]

[oder sofort 4.d4]

4...Nf6 Das ist die natürlichste und auch beste Antwort.Schwarz entwickelt seinen ♘er und nimmt sofort den Bauern auf e4 unter Beschuss.Seine Strategie ist auf ein schnelles Gegenspiel ausgerichtet. **5.d4** Der Anziehende besetzt konsequent das Zentrum.Diese Fortsetzung gilt als die beste Wahl.Es geht hier auch

[5.d3 Ein bescheidener Zug mit Weiß zu erkennen gibt ,das er seine Bestrebungen ,in Vorteil zu kommen, eher auf das Mittelspiel verlegen will.]

[5.0−0]

[5.b4 Allgemein sucht Weiß in diesem Abspiel seinen Erfolg vor allem am ♕flügel.]

5...exd4 6.cxd4 Die am häufigsten gewählte und auch beste Fortsetzung . Zu beachten sind aber auch mehrere Alternativen:

[6.0−0 Nicht immer ist eine frühe Rochade gut.Nach ihrer Wahl kann Weiß kaum auf Vorteil hoffen.]

[6.e5 Eine problematische Variante , der Bauer startet durch wie ein Ferrari, auf den zweiten Blick aber entpuppt sich der Versuch doch nur als Fiat Panda.Bei genauem Spiel bereitet er Schwarz keine Probleme. d5 Resolut und richtig!Ohne diesen typischen Gegenstoß im Zentrum stünde es schlecht um die schwarzen Chancen 7.Bb5 Andere Züge sind schwächer. Ne4 8.cxd4 *(8.Nxd4 0−0 9.Bxc6 bxc6 10.0−0 Bd7 11.Nd2 Nxd2 12.Bxd2 Re8 13.Be3 Rb8 14.Nxc6 Bxc6 15.Bxc5 Rxb2 16.Bxa7 Rxe5 17.Bd4 Ree2 18.Re1 Qe8 19.Rxe2 Rxe2 20.Be3 Rb2 21.a4 Bxa4 22.Qxd5 Bc6 23.Qd3 Be4 24.Qc4 Bc6 25.h3 Qd7 26.Bf4 h6 27.Be5 Qf5 28.Qf4 Qxf4 29.Bxf4 Rb3 30.Rc1 Rb7 31.c4 f6 32.c5 g5 33.Be3 Kf7 34.h4 Ke6 35.h5 Rb2 36.Re1 Ke5 37.Rd1 Ke4 38.Bd4 Rc2 39.Bxf6 Kf5 40.Bg7 Kg4 41.Bxh6 Kxh5 42.Bf8 Kg6 43.Re1 Kf6 44.Re7 Rc1+ 45.Kh2 Rxc5 46.Rxc7 Rc2 47.Bg7+ Kf5 48.Kg3 Kg6 49.Bh8 Rc4 50.f3 Kf5 51.Rf7+ Kg6 52.Rg7+ Kf6 53.Rc7+ Kf5 54.Rf7+ Kg6 55.Rc7 Kf5* ½−½ (55) Cunningham,P (1712)−Lawrence,S (1876) ICCF 2015 *)* 8...Bb6 Schwarz erhält den Druck auf das weiße Zentrum. *(8...Bb4+* Nicht ganz klar aber vermutlich spielbar *9.Bd2 Nxd2 10.Nbxd2 0−0 11.0−0 Bd7 12.a3 Bxd2 13.Qxd2 Nxe5 14.dxe5 Bxb5 15.Rfd1 Ba4 16.Rdc1 Be8 17.Nd4 Bd7 18.Rc3*

c6 19.f4 Qe7 20.Rac1 Rae8 21.Qe2 a5 22.Re1 Rc8 23.Rg3 c5 24.Nb5 b6 25.Qd3 Bxb5 26.Qxb5 Qe6 27.Qd3 f5 28.a4 Rc7 29.Rd1 d4 30.b3 Re7 31.Rf1 Kh8 ½−½ (31) Danzanvilliers,P (2201)−Steinke,R (2232) Lechenicher SchachServer 2015 *)* 9.Be3 Verteidigt den zentralen Punkt d4 0−0 10.Nc3 Bg4
Ein logischer Zug im Kampf um den Punkt d4.Spielbar ist auch *(10...f6!?∞)* 11.h3 Der ♗er wird zur sofortigen Entscheidung gezwungen Bh5 12.Be2 Ne7 *(12...f6!?*
Eine recht interessante Alternative, die genauer untersucht werden sollte.Stockfish8 bewertet den Zug mit einem ganz leichten Vorteil für Schwarz. *)* 13.g4 Bg6 14.h4 f6
Die natürliche Reaktion.Das Bauernzentrum von Weiß wird angegriffen.Es geht auch wohl *(14...Nxc3 15.bxc3 Be4* usw.Diese Idee ist ein gutes Thema für intensive Analysen und eine Überprüfung in der Turnierpraxis. *)* 15.h5 Nxc3 16.bxc3 Be4 17.exf6 Rxf6 18.h6 Ng6 19.Rh5 *(19.hxg7 Nf4!?)* 19...Qd6 20.Ng5 *(20.Ne5 Re8!∓)* 20...Re8 mit einer sehr dynamischen Stellungund guten Aussichten für Schwarz.Der Vorstoß c7−c5 mit einer Öffnung der Stellung im Zentrum liegt ständig in der Luft.]
[6.b4 Bb6 7.b5 Na5 8.e5 Nxc4 9.exf6 *(9.Qe2 d3 10.Qxd3 Nxe5 11.Nxe5 0−0−+)* 9...Qxf6 10.0−0 0−0 11.cxd4 d5−+]

6...Bb4+ So ist es richtig .Nur mit dieser Entwicklung a´ tempo kommt Schwarz rechtzeitig zum Angriff auf das gegnerische Zentrum. **7.Nc3** Das ist die populärste Fortsetzung.Sie führt zu einem sehr scharfen Spiel,in dem weiß im Kampf um Initiative einen Bauern opfert.Eine starke Alternative ist
[7.Bd2 die in relativ ruhiges Spiel führt. Alvarez,Roberto Gabriel: 'is safer.']

7...Nxe4 Die beste Erwiderung für den Nachziehenden.Weil andere Züge nicht wirklich in Frage kommen,lasse ich sie außer Acht. **8.0−0** Es gibt keinen Ausweg: Weiß muß konsequent weiter opfern,deen ihm stehen sonst nur schwache Alternativen zur Verfügung. Hier ein Beispiel.
[8.Bd2 Nxd2 9.Qxd2 0−0 10.0−0 d5 11.Be2 Ne7 12.a3 Bd6 13.Rac1 c6 14.Rfe1 Ng6 15.Bd3 Bf4 16.Qc2 Bxc1 17.Qxc1 Nh4 18.Qf4 Nxf3+ 19.Qxf3 Qb6 20.b4 Qxd4 21.h3 f5 22.Bb1 a5 23.Ba2 axb4 24.axb4 Ra3 0−1 (24) Goehring,D (1383)−Wittig,D (2067) freechess.de 2013]

8...Bxc3 Das schlagen mit dem ♗er gilt als die beste Lösung für Schwarz.Die Idee mit
[8...Nxc3 führt zu interessanten Verwicklungen,was auch die Fernschach CD 2017 bestätigt,ich finde insgesamt 29 Partien,keine endete Remis!! 1−0 17xWeiß,0−1 10x Schwarz.]

9.d5 Nur mit diesem Zug kann Weiß auf Vorteil hoffen.Er stammt vom dänischen Spieler J.Möller.Deshalb "Möller Angriff". Andere weiße Züge sind schwach
[u.a. 9.bxc3∓ d5 10.Ba3 dxc4 11.Re1 f5 12.Nd2 Be6 13.Nxe4 fxe4 14.Rxe4 Qd7 15.Qh5+ g6 16.Qh4 Kf7 17.Qh6 Bf5 18.Rf4 Nd8 19.g4 Ne6 20.Rf3 Ng7 21.Re1 Rhe8 22.Rxe8 Rxe8 23.gxf5 gxf5

24.Rg3 Re1+ 25.Kg2 Qc6+ 26.Qxc6 bxc6 27.Re3 Rxe3 28.fxe3 Nh5 29.Bb4 Nf6 30.Kf3 Ke6 31.Ba5 Nd5 32.e4 fxe4+ 33.Kxe4 Kd6 34.Kf5 c5 35.dxc5+ Kxc5 36.Ke4 Kb5 37.Kxd5 Kxa5 38.Kxc4 Ka4 39.Kc5 Ka3 0−1 (39) Sicker,R (2340)−Wegelin,R (2510) www.remoteschach.de 2014]

9...Bf6 Ist am bekanntesten und am häufigsten gespielt.Zu beachten ist auch

[9...Ne5 Ein frecher Zug. 10.bxc3 Nxc4 11.Qd4 0−0 Vielleicht die sicherste Methode für Schwarz und auch am meisten gespielt *(11...f5!?)* 12.Qxe4 Nd6 Einfach und gut! *(*Problematisch ist *12...b5* wegen *13.a4* mit weißer Initiative. *)*

A) 13.Qd3 b6!?∓ Meine Empfehlung statt 13...−♕f6 14.Re1 *(14.Ba3 Qf6∓; 14.Bg5 f6 15.Bf4 Bb7 16.Bxd6 cxd6 17.Rfe1 Re8 18.c4 Ba6 19.Nd4 Qc7 20.Nf5⩲* 0−1 Maas,T−Yin Hao (2380)/Rotterdam 1998/EXT 1999 (42) *)* 14...Bb7 15.Bg5 f6 16.Bf4 Nf7 17.d6?! *(17.c4!?* Schränkt den ♗b7 ein *)* 17...cxd6 18.Bxd6 Nxd6 19.Qxd6 Bxf3 20.gxf3 Rf7∓ 0−1 Pugachov,A (2445)−Shinkevich, V (2518)/Moscow 2009/CBM 131 Extra (40);

[Evans,Craig]

"No no... That's not how chess works." CRAIG EVANS SUNDAY, DECEMBER 24, 2017 The near−immortal words of GM Peter Svidler (now 8−time Russian Champion, and one of my favourite players, nay, people of all time), in a streamed online Banter Blitz game

against IM Lawrence Trent. Peter went on to get utterly smashed in that game as Lawrence hacked and sacked his way to a very fun and impressive win. Since I'm a bit short on offers from others to rip their games apart, I've offered this one instead as a Christmas treat, fresh from the WCCF 4th Invitational where I've secured the CCE Title and a CCM norm. So, in typical Welsh/me tradition, I've ripped into the victor as much as I can, whilst also providing a (hopefully) fun and interesting game against fellow Welshie, Danny den Drijver. I'd like to think I played in the spirit of Lawrence, and that Peter would here, too, give his famous (but, fortunately, not last) **1.e4** Following in the footsteps of the greats, such as Bobby Fischer, Robert J. Fischer and R. J. Fischer. Some others have probably played it too **1...e5 2.Nf3** Attack. **2...Nc6** Defend. **3.Bc4** Almost certainly a novelty. Nf6 I have no idea if this is theory or not, but black defends with two knights. What could we call this thing? **3...Nf6** I have no idea if this is theory or not, but black defends with two knights. What could we call this thing? **4.Ng5??** A terrible move, moving the same piece twice in the opening before development is complete. Any reputable opening book (i.e. anything not written by Benjamin and Schiller) will tell you this is naughty. **4...d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3!?** A good illustration of the differences between CC and OTB chess. OTB, this move has never really caught on, has been mainly frowned upon by authors, and would entail a great deal of risk. In CC, however, things are more concrete − white is up a pawn, and wishes to win more material. Black doesn't have a lead in development, has a knight placed rather daftly on a5 − surely there is no justification for the sacrifice? The statistics are misleading − after 8...Be7, 8...Rb8 and 8...h6 black is meant to be doing well. However, a look at the 'new generation' of up−and−coming CC players, e.g. Cvak and Panitevsky, will see white scoring rather well in these lines. I fancied trying something different. **8...cxb5?!** As Svidler once famously said in a Chess24 Banter Blitz session, "This is not how chess works." Black chucks more wood on the fire − he will now be an exchange and a pawn down. But that knight on a5 is beautiful, no?

[8...Be7 9.Bd3 0−0 10.Nc3 h6 11.Nge4 Nd5 12.Ng3 Nb4 13.Nf5 Bg5 14.h4 Nxd3+ 15.cxd3 Be7 16.b3 Bxf5 17.Qxf5 c5 18.Bb2 Nc6 19.Kf1 is a line I have played both sides of, and gives nothing to white... but equally, gives nothing to black.]

9.Qxa8! Yum, free rooks. It is safe to say that neither humans nor engines fully understand the mess that is now created. **9...Be7 10.0−0!?** Let chaos commence.

[10.Ne4!? is a novelty that I've been looking at to play myself, but I thought instead I would share it with you (since it is no use). Merry Christmas! The position is an absolute mess after Qd7 11.Nxf6+ gxf6 *(11...Bxf6 12.Qf3 Bb7 13.Qg3±)*

A) 12.Qf3 Nc6 13.c3 Rg8 14.Na3 *(14.Qh3 Qb7 15.Qxh7 Rxg2 16.d3 Rg6∓)* 14...b4 15.Nc4 Bb7 16.Qe2 Rxg2=;

10...0−0 Calmly castling. Is black drunk? Probably... **11.d3?** Until this move we have been following two games by the aforementioned Panitevsky (on the black side!), but this is new and, on first glance, logical (simply preparing the bishop's development whilst controlling c4).

[11.Qf3 Bg4 12.Qe3 Nd5 13.Qg3 h5 14.h4 Nc6 15.Nc3 Nd4 16.Kh1 Nb4 17.Rb1 f6 18.Nh3 Nbxc2 19.f3 Nf5 20.Qh2 Qd3 21.Rd1 Bxh3 22.Qxh3 b4 23.Ne4 Nfd4 24.Qd7 f5 25.Ng3 Bxh4 26.Nxh5 Bf6 27.b3 Qe2 28.Bb2 Qf2 29.Rdc1 Qh4+ 30.Kg1 Qxh5 31.Rxc2 Nxc2 32.Qd5+ Qf7 33.Qc5 Nd4 34.Bxd4 exd4 35.Qxf5 Re8 0−1 (35) Salati,P (2296)−Panitevsky,I (2489) ICCF 2016]

[11.d4! Still looks best; black had to work after exd4 12.Qf3 h6 13.Ne4 Bb7 14.Nxf6+ Bxf6 15.Qg3 Re8 16.Nd2 Re6 17.Kh1 Be5 18.Qh3 Bc7 19.Nf3 Rg6 20.Re1 Nc4 21.a4 b4 22.b3 Nd6 23.Bd2 Ne4 24.Re2 d3 25.cxd3 Qxd3 26.Rae1 Bb6 27.Be3 Re6 28.Ng1 Qd6 29.f3 Nc3 30.Rd2 Bd5 31.Bxb6 Rxe1 32.Bf2 Re8 33.a5 Qe7 34.Qf5 Be6 35.Qe5 Bxb3 36.Qxe7 Rxe7 37.Bc5 Rb7 38.a6 Rc7 39.Rd8+ Kh7 40.Bxb4 Nb5 41.h4 Rc4 42.Be7 Rc6 43.Kh2 Rxa6 44.Ne2 Ra4 45.h5 a5 46.Rc8 Be6 47.Rc5 Bc4 48.Nf4 Bf1 49.Kg3 Ra2 50.Rc1 Be2 51.Bc5 a4 52.Nxe2 Rxe2 53.Rb1 Nc3 54.Rb7 Re5 55.Ba3 Rg5+ 56.Kf2 Rd5 57.Kg3 Ne2+ 58.Kf2 Nd4 59.Kg3 f6 60.Ra7 Rxh5 61.Rxa4 Rd5 62.Kf4 Ne6+ 63.Ke3 h5 64.Re4 Ng5 65.Rh4 Ne6 66.g4 Nf4 67.Rh2 g5 68.Bb2 f5 69.gxh5 Rd3+ 70.Kf2 Rd2+ 71.Kg1 Ne2+ 72.Kf1 Rxb2 73.Rxe2 Rxe2 74.Kxe2 f4 ½−½ (74) Kitaev,S−Panitevsky,I (2489) ICCF 2016]

11...Nd5!? attempts to muddy the waters as much as possible. Queen retreats worry me when I've given up so much material in the opening for no reason other than to put the queen on a silly square... but again, as Svidler says, "This is not how chess works.".

[11...h6 is also ridiculously complex − you can figure it out for yourselves. I think it's probably levellish with best play − good luck finding that!]

12.Nf3 Nb4

[12...e4 13.Nd4 Qd7 14.Qb8 exd3 15.Qg3 Nb4 16.c3 Nc2 17.Nxc2 dxc2 18.Na3 Bxa3 19.bxa3 Nc4 20.Re1 Qg4 21.Be3 a6 22.Bc5 Qxg3 23.hxg3 Rd8 leads to an insanely complex endgame where, despite the extra material, white has as many losing chances as winning ones.]

13.Na3

[13.Bd2 Nxc2 14.Nc3 *(14.Na3 Nxa1 15.Rxa1 a6 16.Rc1 b4 17.Nc2 b3 18.Na1 bxa2 19.Bxa5 Qxa5 20.Rxc8 Qb5 21.Rxf8+ Bxf8 22.Qe4 Qxb2 23.Qxe5 Qxe5 24.Nxe5 Bb4 25.Nc4 Bc3 26.Nc2 a1R+ 27.Nxa1 Bxa1 28.Kf1 f5*

29.Ke2 Bd4 and black has the better side of a certain draw. *)* 14...Nxa1 15.Rxa1 Bb7 16.Qxd8 Rxd8 17.Nxb5 Nc6 18.Ne1 *(18.Be3 a6 19.Na7 Nxa7 20.Bxa7 Bxf3 21.gxf3 Rxd3 22.Rc1 f5 23.Bb8 Rd5 24.b3 Bc5 25.f4 e4* and black has some chances in this endgame but it probably holds for white with best play. *)* 18...a6 19.Na3 e4 20.Nc4 exd3 21.Rd1 Bc8 22.Ne3 a5 23.Rc1 Bb7 24.Nf3 Bb4 25.Kf1 Nd4 26.Bxb4 Nxf3 27.Rc7 Ba6 28.Ra7 Nxh2+ 29.Kg1 axb4 30.Rxa6 Ng4 31.Nxg4 d2 32.Ne3 d1R+ 33.Nxd1 Rxd1+ 34.Kh2= Yawn. The game deserves a better finish.]

[13.Nc3 Nbc6−+]

13...Nac6 What on earth is going on here? White's queen suddenly feels a little lonely. Still, black's position feels very loose, everything could end up hanging. **14.c3 Qd6!?** Utter chaos. Black ignores the attack on c3, and moves his queen to a square where it can be hit with tempo. **15.Nxb5?!**

[15.cxb4!? May be an improvement. But perhaps not. Neither me nor the silicon dynamo can fully fathom things out, though I suspect black is fine if not better. Ba6 16.Qxf8+ Bxf8 17.Rd1 Nxb4 18.Be3 Bb7 19.Ne1 a6 20.Nac2 Nd5 21.a3 Qe6 22.Rac1 Bd6 23.Bd2 Qf6 24.Nb4 Ne7 25.Nbc2 Bc7 26.Ne3 Bb6 And, despite black optically doing very well, there is no mate and the position is a mess − the two rooks may well give chances against the queen if white doesn't get mated.]

15...Qxd3! 16.cxb4 Ba6!! Just bonkers. Black blunders a knight on b4, and then blunders the other one on c6. **17.Qxc6**

[17.Qxf8+ Bxf8 18.a4 e4−+ May be a better holding try, though I think black will be able to crash through with a kingside pawn rush.]

17...Bxb5! The point − the mate threat on f1 forces white to give up the queen after all. On a point−counting basis, white gets a rook, piece and pawn for it − in reality, black is left with queen, two other bits, and some pawns to tenderise the white kingside... this should be enough. **18.Qxb5 Qxb5 19.a3 e4**

[19...Rd8 as also tempting, after 20.Re1 f5 21.Bd2 e4 22.Bc3 Rd3 23.Nd2 Qd5 24.Re2 Kf7 25.Nf1 h5 26.Rae1 Bg5 with threats of splat on the kingside.]

20.Nd4 Qh5 Subtle as a not−so−subtly−shaped brick. **21.Bf4 f5** Here comes Freddie and the gang. **22.Rac1 Bf6 23.Rc4**

[23.Nc6 Might be one last possible improvement, though it is hard to believe it can hold. Qg4 24.Be5 f4 25.h3 Qg5 26.Rc5 f3 And the mayor of hacksville is at the door.]

23...Rd8 24.Nc6 Rd1 25.Rc1 Rxc1 26.Bxc1

[26.Rxc1 Bxb2−+]

26...g5 Gary joins the party. **27.Nxa7 Be5 28.h3 g4** Gary is full of energy today. Where is he going? **29.Nc6 gxh3!!** What is Gary doing? Hasn't he seen the bishop is en prise? 30. Nxe5 h2+! Gary has turned into Harry, and is causing all sorts of mayhem. **30.Nxe5 h2+!** Gary has turned into Harry, and is causing all sorts of mayhem. **31.Kh1 Qe2!** The point − the rook on f1 is, rather surprisingly, trapped on the back rank. My opponent gamely struggled on

for another 20 moves or so, but in the end Edward had the last laugh, becoming a new queen. One of the wildest games I've played at any time control, and some excellent play in the opening from my opponent also. We are a long way from the last word on 8.Qf3 and 8...cxb5 − Happy Hunting folks! Oh, and Merry Boxing Eve.
0−1

□ **Cordovez,Javier** **2050**
■ **Mikhalevski,Victor** **2579**
2019 US Open (2) 04.08.2019
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Nc3 Nxe4
[Last year I analysed a game for you with 4...Bc5 Akylbekov,N (2218)−Mikhalevski,V (2581) New York 2018 [Mikhalevski,Victor]]
5.Bxf7+? A bad move, which leads to Black's advantage, as he obtains a strong pawn centre and the bishop pair.
[5.Nxe4 d5 6.Bd3 dxe4 7.Bxe4 Bd6 8.0−0 0−0 is the mainline, with roughly equal chances.]
5...Kxf7 6.Nxe4 d5 7.Neg5+ Kg8! The best square for the king as it doesn't come under attack there. **8.d3 h6** Forcing the knight to a bad position. **9.Nh3 Qf6!?−+** Black consolidates his position in the centre and prepares both ...Bg4 and the development of his kingside.
[9...Bg4 is the main line and also good for Black.]
[9...Bd6 10.c3 0−1 (33) Santos, P (1761) −Richter,W (2359) Remote email 2012]
10.c3 Bd6! Black has been developing the kingside. **11.Nhg1** The knight has nothing to do on h3 and so White is trying to bring it back into play. **11...Kh7 12.h3 Rf8!?**
[12...e4! 13.dxe4 *(13.Nh2 Rf8 14.Be3 Ne5 15.dxe4 dxe4−+* was winning for Black in the game Santos,P (1761)−Richter,W (2359) Remote email 2012 *)* 13...dxe4 14.Nd2 Qg6−+ would be even stronger.]
13.Qe2 b6!? My idea is to develop the light−squared bishop to a6 followed by ... e4.
[13...Kg8!?]
14.Be3 Ba6 15.0−0−0 The best practical chance is to give up an exchange.
[15.Qc2 d4 16.Bd2 Qg6−+ is completely winning.]
15...e4
[15...Rae8 16.Qc2 d4 17.Qa4 Bb7 18.Bd2 Qg6 is also hopeless for White.]
16.Ne1 Ne5
[16...Rae8!?]
17.Qc2 Nxd3+ This simple move is sufficient for a win, but it would be even better if I'd prepared it with 17...Qxg6.
[17...Qg6!−+]
18.Nxd3 Bxd3 19.Rxd3 exd3 20.Qxd3+ Qg6 I wanted to bring my king closer to the centre.
[20...Qf5!?]
21.Qxg6+ Kxg6 22.Ne2 Rae8
[Another possible way of playing was a trade of bishops by means of 22...Bc5!? 23.Nd4 Bxd4 24.Bxd4 *(24.cxd4)* 24...c5 25.Be3 Rac8 26.Kd2 Rcd8−+ and White can't stop

the advance of the d−pawn.]
23.Kd2 Re4
[23...c5!?]
24.Rd1 Bc5 The exchange of bishops favours Black.
[or 24...Kf6 25.Kc2 Ke6 26.Nd4+ Kd7 27.Nb5 Be5 28.Nxa7 c6 29.Bxb6 Re2+−+]
25.Nd4 Rfe8 26.Kd3 a6 Covering the b5−square. **27.Rd2 Bd6!** With the pawn still on a7 White would have the Nb5 move. **28.Ne2 Kf6 29.Kc2 c6!?**
[29...g5!? was possible, with the idea of ...Bf4. 30.Rxd5 Bf4 31.Nxf4 gxf4 32.Bd2 Ke6 33.Rd3 Re2−+]
30.Kd3 b5!?
[or 30...c5!? 31.Kc2 Ke6−+]
31.b4 Rc4 Preparing 32...c5. **32.a3 c5 33.bxc5 Bxc5 34.Bxc5 Rxc5 35.Rb2 Rc4 36.Rb3 h5!** Now Black takes space on the kingside. **37.g3 g5 38.Kd2 h4 39.g4 Ke5 40.Kd3?** A blunder in a lost position.
[40.f3 was necessary. Then play could continue as follows: Rf8 41.Ke3 Ra4 42.Nd4 Re8 43.Ne2 Kd6+ 44.Kd2 Kc5 45.Kd3 Re6 46.Kd2 *(46.Nd4 Re1−+)* 46...Kc4−+]
40...Rf8 41.Ke3 Re4+ 5.Bxf7+ is a mistake and shouldn't be played. Instead 5.Bd3 is necessary. However, already 4. Nc3 doesn't promise any advantage.
0−1

C58
□ **Sarvadh,Sathiaram 2046**
■ **Banik,Siddharth G 2276**
Bay Area op Burlingame (2) 02.01.2019
[Quintiliano,Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5! Finally we go to the main answer for Black. **5.exd5 Na5!**
[Of course Black should avoid the classic Fegatello Attack: 5...Nxd5? 6.Nxf7 Kxf7 7.Qf3+ Ke6 8.Nc3→ with a powerful (probably winning) attack for White.]
6.d3?! An old line, but since I've found a couple of recent GM games with it, it is better to check it. **6...h6 7.Nf3 e4 8.Qe2□**
[8.Nd4? Bc5 9.Nb3 Nxc4 10.dxc4 Bg4! 11.f3 exf3 12.gxf3 Ne4!! Black's attack is already winning. 13.Qe2 0−0!−+]
[I remember an old game of Bronstein in which he simply sacrificed the piece: 8.dxe4 Nxc4 9.Qd4 Indeed, White has two pawns and a nice centre for the piece, but this compensation can't survive concrete analysis: Nd6! *(* That game went *9...Nb6 10.c4* 1−0 Bronstein,D−Rojahn,E Olympiad−12 Preliminaries A 1956 (5) Even here Black is better and objectively White's compensation is not enough; but those were other times, and Bronstein did prove his point, as his pawns rolled over the board − *)* 10.Nc3 *(10.e5? Nf5 11.Qa4+ Qd7!* After the exchange of queens White's centre become very exposed. *12.Qxd7+ Nxd7 13.Nc3 Bc5 14.0−0 Nd4−+)* 10...Nfxe4! This simple tactic wins more material

for Black, with a winning position. 11.Nxe4 Qe7 12.0−0 *(12.Ne5 Nxe4 13.Qxe4 f6 14.f4 fxe5 15.fxe5 Qb4+−+)* 12...Nxe4 13.Re1 f5 14.Nd2 Kd8! Keeping the king in the centre is a cheap price to pay for being a piece up in this position. 15.Nxe4 *(15.f3 Qf6!)* 15...fxe4 16.Rxe4 Qf6 17.Qc4 Bd6−+]

8...Nxc4 9.dxc4 Bc5! The right square for the bishop.

[9...Bd6?! was played in some games, but White faces less problems to arrange the pieces now. 10.Nc3 0−0 11.Nd4 etc]

10.0−0? Probably a mistake already.

[10.Nfd2 0−0 11.Nb3! is the best way to try to solve White's problems, see Zeng−Vidit]

10...0−0 11.Nfd2 Bg4! Now we see why the bishop should be developed to c5, as White has no choice but to retreat the queen to a worse square.

12.Qe1 Re8 A natural developing move, also creating the threat of e4−e3.

[It turns out that 12...Qd7! is even stronger, see the next game.]

13.Nb3□ Bd6 14.h3

[White can try to bring the pieces quickly into play, but this hardly solves the development problem as Black is able to create dangerous threats. 14.Be3 Qe7 15.Bd4 *(15.c5 Be5∓)* 15...Nh5! White has no way to stop the incoming attack on the kingside. 16.N1d2 *(16.f3 Bxf3! 17.gxf3 Qg5+ 18.Kh1 exf3 19.Qd2 Qg4−+)* Now the most direct continuation is 16...Bxh2+! *(* but not *16...Qh4? 17.f4!)* 17.Kxh2 Qh4+ 18.Kg1 Bf3! The unfortunate position of the queen's is the reason for White's defeat. 19.Qe3 Nf4! 20.Nxf3 exf3 21.Qxf3 Ne2+ 22.Qxe2 Rxe2−+]

14...Bf5

[14...Bh5!? is indicated by the engine, but the game shows that f5 is a more logical square for the bishop.]

15.Be3? This seems natural, but actually it is likely the decisive mistake by White.

[A better try would be 15.Nc3 when Black should find Nh5! looking for ♘f4 ideas and clearing the path for the queen. *(15...Qd7 16.Qe3!* An important point, White has to keep this square available to the queen in order to defend against the sacrifices on h3*; 15...Qe7!?* still comes into consideration. *)* 16.Ne2! A good defensive idea, trying to cover the kingside. *(16.g4??* is obviously bad: *Bxg4 17.hxg4 Qh4−+)* 16...Qf6 17.Ng3! Bg6! Although White is trying hard, he still has some problems to finish the development. 18.Rb1!? *(18.c3 Nf4 19.Bxf4 Qxf4↑* keeps some pressure for Black. *)* 18...Qe5! 19.c5?! *(* If *19.Be3 b6* followed by f5−f4 looks promising for Black. *)* 19...Nxg3 20.fxg3 Be7 and White's position remains harder to play, for example 21.c4? e3 22.Ra1 e2 23.Rf3 Bxc5+! 24.Nxc5 Qd4+−+]

15...Qd7 Simple and strong, as White does not have a good way to deal with the sacrifice ...♗xh3. **16.Bc5 Bf4!**

17.Qc3 White found another square to defend h3 with the queen, but now follows a surprise.

[Black wouldn't repeat after 17.Be3 Be5! (winning an important tempo) 18.Bd4 Bxh3! and now comes a

winning attack: 19.Bxe5 Bxg2! 20.Kxg2 Rxe5 21.Rh1 Qg4+ 22.Kf1 e3−+]

17...e3!! A nice move, cutting the queen off from helping on the kingside.

[Also strong was 17...c6!? 18.dxc6 Qxc6⟶]

18.Bxe3

[18.fxe3 isn't better: Ne4 19.Qe1 Bg3! 20.Qe2 Be5! and Black wins material.]

18...Ne4 19.Qe1□ Nxf2!? Sufficient, but not the most direct continuation.

[19...Bxh3! would lead to a quick finish: 20.Bxf4 *(20.gxh3 Qxh3 21.Bxf4 Qg4+ 22.Kh1 Qxf4 23.Qe3 Qh4+ 24.Kg2 Qg4+ 25.Kh2 Re5−+)* 20...Qg4 21.Bg3 Nxg3−+]

20.Nc5 Qc8

[Again Black had a direct win with 20...Nxh3+! 21.gxh3 Bxe3+ 22.Qxe3 Qd6 White should defend both g3 and c5−squares now 23.Qf2□ Bxh3 24.Nd2 Qg6+ 25.Kh1 Re5−+]

21.Ne6!? The only way to put up some resistance. **21...Bxe6?** And Black goes wrong.

[The sequence 21...Nxh3+ 22.gxh3 Bxe3+ 23.Qxe3 fxe6∓ is simple and wins − although the material is even, it is clear that White won't survive with such an exposed king.]

22.Bxf4? And White misses his chance of keeping up the fight.

[⌓22.Qxf2 Bxe3 23.Qxe3 Bxd5 24.Qf4 Be6 25.Nc3= The white king is not so exposed now and White can bring his remaining pieces into play.]

22...Nxh3+! Finally! **23.gxh3 Bxh3 24.Qg3 Bxf1 25.Kxf1 Qf5−+**

White can't avoid further material losses.

26.Qf2

[26.Nc3 g5]

26...Qh3+ 27.Kg1 Qg4+ 28.Bg3 h5 29.Qg2 Qd1+ 30.Qf1 Qg4 31.Qg2 Qd4+ 32.Bf2 Qxb2

0−1

6.Bb5+ c6 7.dxc6 bxc6 8.Qf3

[Eine ander Möglichkeit ist 8.Be2 h6 9.Nf3 e4 10.Ne5 Bd6 11.d4 exd3 12.Nxd3 Qc7 Schwarz hat ein gutes Figurenspiel und eine bessere Entwicklung für das Opfer.]

8...Be7 Schwarz ist bereit den zweiten Bauern zu opfern, um in einer offenen Position einen großen Entwicklungsvorsprung zu erlangen.

C58: Zweispringerspiel (Klassisches System)

[8...Rb8 9.Bd3 h6 10.Ne4 Nd5 11.b3 Nf4 12.Bb2 f6 13.0−0 Be7 14.Re1 0−0 15.Bf1 c5 16.Ng3 Qd7 17.Nh5 Bb7 ½−½ (62) Ganguly,S (2614)−Amin,B (2627) Abu Dhabi 2014]

9.Bd3

[9.Bxc6+ Nxc6 10.Qxc6+ Bd7 11.Qf3 Weiß hat bereits große Probleme mit seiner Entwicklung.]

9...0−0

[9...h6?! 10.Ne4

A) 10...Nxe4?! 11.Qxe4→;

B) 10...Nd5 11.Ng3 0−0 *(11...g6 12.0−0 h5 13.Nc3* Weiß ist gut aufgestellt. *)* 12.Bf5 Bxf5 13.Nxf5±;

C) 10...Nh7 11.0−0 0−0 12.Ng3 Ng5 13.Qh5 Nb7 mit der idee ...−♘d6 und Kompensation für den Bauern:]

10.Nc3 h6 11.Nge4 Nd5 12.Ng3 g6 0.61/25 Hat den Vorteil seinen ♗e7 auf die Diagonale h8−a1 zu ziehen,ist aber Zeitaufwendig und schwächt den ♔önigsflügel.

[In einer ander Fernschachpartie wurde 12...Nb4!? gespielt. 13.Nf5 *(13.Be4* Weiß kann seinen ♗er nicht vor den Angriff des ♘ers ziehen. Entweder folgt ...−♘xc2 oder nach ♗e4 −stark f5! *f5−+; 13.Bf5 Bxf5 14.Nxf5 Nxc2+−+)* 13...Bg5 14.h4 Nxd3+ 15.cxd3 Be7 16.b3 Bxf5 17.Qxf5 c5 18.Bb2 Nc6 19.Kf1 Nd4 20.Qxe5 Bf6 21.Qd5 Nc2 22.Rb1 Nb4 23.Qc4 Nxd3 24.Rh3 Nxb2 25.Rxb2 Bd4 26.Rc2 Qf6 27.d3 Rae8 28.Ne4 Qe5 29.Kg1 a5 30.Re2 Qh5 31.Kf1 Re6 32.Ng3 Rxe2 33.Nxe2 Re8 34.Rf3 ½−½ (34) Lebedev,V (2474)−Martin Sanchez,C (2471) ICCF 2018]

[Schachengines schlagen u.a. auch 12...Nb4= 0.00/30 vor.Zum Beispiel: 13.Nf5 Bg5 14.h4 Nxd3+ 15.cxd3 Be7 16.b3!? Mit der Idee den ♗er über b2 zu entwickeln Bxf5 Den weißen ♘er kann man nicht auf das starke Feld stehen lassen.Früher oder später muß Schwarz ihn entfernen,aslo warum nicht sofort. 17.Qxf5 c5 18.Bb2 und die Stellung scheint in der Balance zu sein]

13.0−0 f5 Schwarz droht nun e5−e4

14.Re1 Bf6 15.Bf1 0.31/27 Weiß zieht sich in den nächsten Zügen merklich zurück,es sieht schon etwas merkwürdig aus ,erfüllt aber seinen Zweck.

15...h5?!± 0.85/26 Schwarz hat zwar eine gute Entwicklung,aber auch viele Felderschwächen produziert

[15...Kh7± 0.31/27]

[15...e4 16.Qd1 ½−½ (25) Meissner,R (2238)−Lanin,B (2150) ICCF email 2013 Bd4 17.Nxd5 cxd5 18.c3 Bxf2+ 19.Kxf2 f4 20.Nxe4 Qh4+

21.Kg1 Bg4 22.g3 Qh5 23.Qc2 dxe4 24.d4 e3 25.Bxe3 ½−½ (25) Meissner,R (2238)−Lanin,B (2150) ICCF 2013]

[Am besten ist 15...Bg7 wie die Partie zeigt 16.Na4 Nb7 17.c3 Re8 18.d4 e4 19.Qe2 Be6 20.Qa6 Qc7 21.Bc4 Kh7 22.Bb3 Bf7 23.Nf1 Rad8 24.Bd2 g5 25.f3 exf3 26.Rxe8 Bxe8 27.gxf3 c5 28.Qe6 Bf7 29.Qxf5+ Bg6 30.Qh3 cxd4 31.Bxg5 Nf4 32.Bxf4 Qxf4 33.Qg4 Qf6 34.Ng3 dxc3 35.bxc3 Nc5 36.Nxc5 Qxc3 37.Rf1 Qxc5+ 38.Kh1 h5 39.Qf4 Qe5 40.Qxe5 ½−½ (40) Morales,O (2267)−Mamonovas,V (2125) ICCF 2017]

16.Qd1 0.33/27 Rückzug **16...Be6** 0.91/26 **17.Nge2±** Rückzug aber Weiß bekommt langsam die Stellung im Griff und erhält Vorteil **17...Bf7** 0.92/25 **18.Rb1 c5** 1.28/24

[18...Re8± 0.57/30]

19.Nxd5 0.62/30

[Auch 19.b3± 1.28/24 war spielbar]

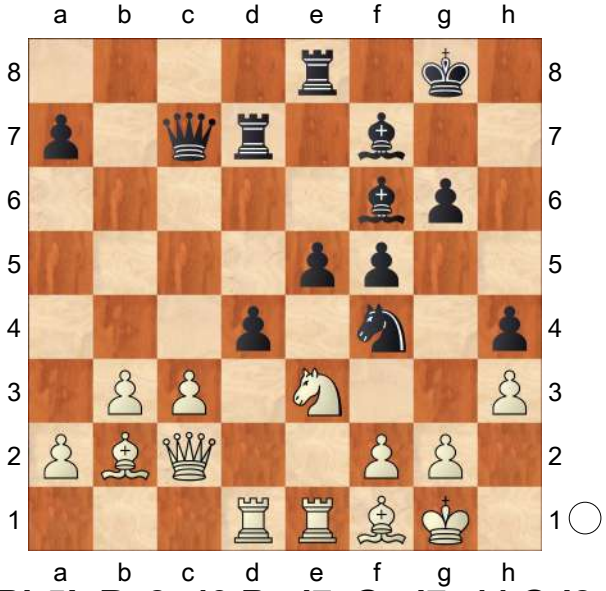
19...Qxd5 20.Nc3 Qd6 21.d3 0.39/30 **Rfd8** 0.95/27

[21...Nc6± 0.39/30]

22.b3! Weiß möchte mittels ♗b2 Druck auf den Bauern e5 ausüben. **22...Nc6 23.Nb5** 0.55/27 **Qe7** 1.02/25 **24.Bb2 Rd7 25.Na3 Rb8** 1.06/24 **26.c3 Qd8** 1.16/23 **27.Qf3** 0.69/29 Weiß hat sich wieder gut entwickelt und hat die bessere Bauernstruktur.Schwarz hingegen konnte seine Figuren nicht optimal aufbauen.....Weiß kontert wie im Fußball.... **27...Bd5** 1.17/24 **28.Qe2** 0.62/30 **Kh7 29.Rbd1 Qa5 30.Qd2** 0.63/30 **Rbd8** 1.08/27 **31.h3** 0.57/32 **Qc7** 1.15/26 **32.Qc1** 0.43/30 Weiß möchte die Stellung gern öffnen, muß sich aber die schwarze Stellung erst mit Geduld zurechtlegen. **32...Bf7 33.Nc4** 0.38/29 **Bg7?** 1.11/28

[Eine bessere Aussicht auf Verteidigung bot 33...Ne7 0.38/29]

34.Qc2 0.64/29 **Ne7 35.Bc1 Bf6 36.Qd2** 0.55/32 **Kg8** 1.01/26 **37.Qc2 Re8** 1.40/25 **38.Ba3** 0.64/29 **Nd5± 39.Ne3 Nf4 40.Bb2** 0.55/30 **h4 41.d4 cxd4**



42.Bb5! Rc8 43.Bxd7 Qxd7 44.Qd2 d3! 45.c4 Qc7 46.f3 0.59/29 **Be6 47.Kh1 Kg7** 2.19/26

[47...Re8± 0.79/28 ist eine bessere Verteidigung.]

48.Ra1 g5? 3.11/25 Den Bauern nach g4 vorzuziehen ist taktisch falsch , besser war

[48...Rd8]

49.Nd1+− g4 50.hxg4 fxg4 51.Nf2 gxf3 4.62/27

[51...Kg8 3.22/29 war nötig.]

52.Ne4 Weiß steht klar auf Gewinn.

52...fxg2+ 53.Kh2 Ne2

[Viel schlechter ist 53...Rf8 54.Nxf6 Qc6 55.Bxe5]

54.Qxd3 Nd4 55.Kxg2 Bf5 56.Rf1 Qc6 57.Rae1 Rd8 58.Kh2 Bh7 59.Rf2

[Nicht 59.Rxf6 Qxf6 60.Rg1+ Kh8±]
59...Kh8 60.Qe3 Bg7 61.Qg5 Rd7 62.Qg4 Bxe4 63.Rxe4 Kg8 64.c5 1−0

Endgame Seattle (1) 30.08.2019

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 It's curious that even though I've played 3...Nf6 on quite a few occasions I have never once faced 4.Ng5, formerly the main theoretical move. **4...d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3** The most popular retreat these days. **8...Nd5 9.Nf3 Nf4** A slightly inaccurate move order, which gives White the additional option of 10.Bf1.

[It's more precise to start with 9...Bd6 and only after 10.0−0 Nf4]

10.0−0 This way White transposes into

9...Bd6.

[10.Bf1!? was interesting. For example, e4 11.d3! exf3 12.Bxf4 Qf6 13.Qxf3 *(13.Qc1!* sets more problems. *)* 13...Qxb2 14.Qe2+ Be6 and after 15.Be5 *(15.Qe5!* promises the better chances for White. *Bb4+ 16.Kd1 Qxe5 17.Bxe5 0−0 18.Be2±)* 15...Qc1+ 16.Qd1 Black could equalise by means of Bb4+! *(* In the game Black played *16...Qg5* , but still achieved a draw after a long fight. Socko, B (2627)−Bartel,M (2598) Warsaw 2019 *17.Bg3±)* 17.c3 Qb2 18.Bxg7 Rg8 19.cxb4 Rxg7 20.Nd2 Qxb4=]

10...Bd6 11.Re1

[In a recent top level game the players discussed the main alternative 11.Nc3 Nxd3 12.cxd3 0−0 13.b3 An interesting idea of Aronian's, which has the point of saving a tempo on the Re1 move. *(13.Ne4!?* was played in most of the preceding games.*; 13.Re1* transposes to the text. *)* 13...c5 *(13...Re8!?* may still transpose to the main line if White answers with the logical *14.Re1)* 14.Ba3 Nc6 15.Ne4 Another transposition, this time into 13. Ne4. Nb4 *(15...Bf5!?)* 16.Bxb4 cxb4 17.Re1 Bb8 *(*Earlier Black preferred *17...Bb7)* 18.Ng3 *(18.Nc5!?)* 18...Qxd3 19.Nxe5 Bxe5 20.Rxe5 Be6 with certain compensation for a pawn in Aronian,L (2765)−Ding,L (2805) Saint Louis 2019]

11...Nxd3 12.cxd3 0−0 13.Nc3

As I have a already mentioned above the same position can be reached after 11. Nc3.

[13.Nxe5 isn't dangerous for Black in view of c5!]

13...c5!? Black is intending to bring the knight from a5 into play on c6.

[Earlier we considered 13...Re8!? in Popov,I (2644)−Ragger,M (2680) Tromso NOR 2013 [Mikhalevski,V]]

14.b3

[14.Ne4 Re8 transposes to 13... Re8. *(*However, *14...Nc6* might be even better. *)*]

14...Nc6

[Once again 14...Re8!? 15.Ne4 transposes to 13... Re8.]

15.Ne4 Ba6 I thought this move would make sense since the d3−pawn is weak, but it leads to a slight edge for White.

[It seems that Black should prefer 15...Bg4!? 16.h3

A) The only game, which reached the discussed position saw 16...Bh5 17.Bb2 *(17.Nxd6 Qxd6 18.Ba3 Rfe8 19.Rc1 Nb4* yields Black sufficient compensation as well. *)* 17...Re8 18.Re3 and now f6! was correct, when Black would be fine. *(18...f5 19.Nxd6 Qxd6* Yap,K (2363)−Burke,J (2518) New York 2018 and now *20.Qe2!?* was worth a try. *)*;

B) 16...Bxf3 17.Qxf3 Nb4 18.Bb2 *(18.Rb1?! Be7* is already in Black's favour. *)* 18...Nc2 19.Nxd6 Qxd6 20.Re4 Nxa1 21.Bxe5 Qd7 22.Bxa1 f6 with roughly equal chances.]

16.Ba3! Bxd3 17.Nxd6!?

[17.Rc1 Bxe4 18.Rxe4 Qe7 19.Qf1 Rac8 is roughly equal.]

[17.Nxc5!? Bxc5 18.Bxc5 Re8 19.Re3 doesn't seem to change much compared to the game.]

17...Qxd6 18.Rc1 In a similar position with the light−squared bishop on g4

Black would play 18.. .Nb4. That's why 15... Bg4 has to be preferred. **18...Rfe8 19.Bxc5** White regains an extra pawn, but Black retains counter chances thanks to the weak pawn on d2 and a nice blockade on d3. **19...Qf6?!N** Only this move is a novelty and a dubious one. I liked the queen on f6 as she seemed to control a lot of squares, but in fact after 20.Re3 I started to realise that she would be better placed on d7.

[The only predecessor saw 19...Qd7!? 20.h3?! Zhigalko,S (2671) −Tari,A (2584) Doha 2016, and now Black had to continue with *(20.Re3!? Rad8 21.b4±)* 20...e4 21.Nh2 f5]

20.Re3!± Daniel creates an escape square for the knight on e1, which also helps to unblock the d−pawn. **20...Rad8 21.Ne1**

[21.h3!?]

21...Bg6

[I didn't like 21...Ba6 because of 22.b4± and the bishop may be attacked by the queen.]

22.Qe2!?

[22.b4!± was more precise and flexible.]

22...h6! Black may need a luft for the king. **23.d3**

[The immediate 23.b4!? e4! 24.d3 Nd4! 25.Bxd4 Rxd4 26.a3 Kh7 gives Black certain counterplay for the pawn since his bishop is better than White's knight in an open position.]

23...Rd5! 24.b4 a6!? Preventing an advance of the b−pawn to d5.

[24...Rc8!= looks even stronger, with the idea to exploit the x−ray on the c−file.]

25.a4

[25.h3 Rb8 26.Nf3 Rbd8=]

25...Rb8! 26.Qa2 Qd8 27.Qc4 Up to this point both sides played pretty well. **27...Rc8??** A blunder.

[I had to play 27...Bf5! 28.Rb1 Qd7! 29.h3 *(* or *29.Re2 Nd4 30.Bxd4 Rxd4 31.Qxa6 e4 32.dxe4 Bxe4 33.Rc1 Rdxb4=)* 29...Nd4 30.Bxd4 Rxd4 31.Qxa6 Qc7! Setting a serious threat of 32...Bc8. 32.Rb2! Rbxb4 *(* Now *32...Bc8?* is strongly met by *33.Rc2! Qxc2?! 34.Qa7!+−)* 33.Qa8+ Kh7 34.Rc2 Qd6=]

28.Bb6!+− I spotted this move right after playing 27...Rc8. White wins another pawn. **28...Qd7 29.Qxa6 Bf5** I protected the rook on c8, which is important in some concrete lines, and hoped that I could exploit the unfortunate position of the white pieces on the queenside. **30.Rc5?** Unnecessary, giving up the b4−pawn.

[I would have had a hard life after both 30.b5! Ne7 31.Rxc8+ Nxc8 32.Qa8!+−]

[and 30.Rc4! Kh7 31.b5 Ne7 32.Rxc8 Nxc8 33.Ba5+−]

30...Nxb4! 31.Qxc8+ Qxc8 32.Rxc8+ Bxc8 Black has regained one of the pawns, but the other one still gives White the upper hand. **33.d4**

[After 33.f4!? Bd7! 34.Rxe5 Bxa4 35.Ba5 f6! It would be difficult for White to demonstrate a winning plan.]

33...f6?!

[33...Bd7! was more precise. 34.Rb3 *(34.Rxe5 Bxa4* and Black should hold. *)* 34...Na6 35.a5 exd4±]

34.f4?!

[Shubin could try to create an isolated pawn by means of 34.dxe5! Bd7!? *(* Both *34...fxe5 35.h3 Rd1 36.Ba5*

Nc6 37.Bc3±; and *34...Rd1 35.Ba5 Nc6 36.Bc3 fxe5 37.h3±* would lead to a position with a healthy extra pawn. *)* 35.exf6 gxf6 36.g4! *(36.a5 Rd1! 37.a6 Nc2 38.a7 Bc6 39.Kf1 Nxe3+ 40.fxe3=)* 36...Rd1! 37.Ba5! Nd5 *(37...Nc2* is met by *38.Rd3!±)* 38.Re4 Ra1 39.Rd4 Bc6 40.Bd2 Rxa4 Black wins back one of the missing pawns and obtains good drawing chances since all the remaining pawns are on one side. 41.Rxa4 Bxa4 42.Bxh6 f5 43.gxf5 Bd7**±**]

34...Bd7!

[My first intention was to play 34...Nc6? but soon I realised that in this case, after 35.Nf3! he unpins the d−pawn and wins the e5−pawn.]

35.dxe5

[35.fxe5!? deserved attention. fxe5 36.Rb3! exd4! 37.Rxb4 d3 Black wins back a piece. 38.Nxd3 Rxd3 39.a5 Rd1+ 40.Kf2 Rd2+ 41.Kf3 Bc6+ 42.Ke3 Rxg2 43.Bc7**±** and Black should be able to hold.]

35...fxe5 36.Rxe5 After the exchange of rooks White's chances to win are minimal and so White offered a draw.

[Other options: 36.Re4 Rd1! 37.Rxb4 Rxe1+ 38.Kf2 Ra1 39.a5 Ra2+ 40.Ke3 exf4+ 41.Rxf4 Rxg2 with a holdable position.]

[36.fxe5 Rd1 37.Ba5 *(37.Kf2 Rxe1!=)* 37...Nd5 38.Rd3 Rxd3 39.Nxd3 Bxa4 should be holdable for Black.]

[Now 36.Rb3 is not as strong in view of Nc6 In the line which occurred in the game Black has to play 9...Bd6 instead of 9...Nf4 and then 15...Bg4 was critical.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+

All dies ist für Schwarz als harmlos bekannt. Der letzte Zug ist als Kontrolle unerlässlich, um zu verhindern, dass Weiß sein massives Zentrum behält.

7.Nc3

[7.Nbd2!? Ein seltener Zug, der in den alten Spielen überhaupt nicht versucht wurde.

A) 7...Bxd2+ 8.Bxd2 d5 9.exd5 Nxd5 10.Qb3 Nce7 11.0−0± bietet Weiß etwas Druck durch sein ♗paar.;

B) Ein weiterer Versuch ist 7...d5 8.exd5 Qe7+ *(8...Nxd5 9.0−0 0−0 10.a3* Kann Schwarz einige Probleme bereiten. Er muss sich entweder von seinem ♗er trennen oder sich nach dem Rückzug des ♗ers mit einigen Problemen bei der Koordination seiner Leichtfiguren konfrontiert sehen. *Be7 11.Re1 Be6 12.Ba2 Qd7 13.Ne4 Rad8 14.b4 a6 15.Nc5 Bxc5 16.dxc5 Rfe8 17.Bc4 h6 18.Ra2 Qc8 19.Rd2 Nc3 20.Bxe6 Rxe6 21.Rxd8+ Qxd8 22.Qxd8+ Nxd8 23.Kf1 b6 24.Rxe6* ½−½ (24) Andersen,J (2303)−Caruso,A (2338) ICCF 2016 *)* 9.Be2 Nxd5 10.0−0 Das mit ...−♕e7+ gewonnene Tempo wird bald nach ♖e1 und ♗c4 verloren gehen und Schwarz hat noch immer keinen optimalen Weg gefunden, die Kontrolle über das d5 Feld zu festigen.;

C) 7...Nxe4 8.d5! Das ist der Geist dieser Variante! Weiß kämpft um Raum und Fortschritt in der Entwicklung. Aber Schwarz hat genug Ressourcen, um sich zu behaupten. Nxd2 9.Bxd2 Bxd2+ 10.Qxd2 Ne7 11.d6 Ein weiterer typischer Zug, der die Entwicklung der schwarzen ♕ame verlangsamt. cxd6 12.0−0 Die weiße überlegene Entwicklung kompensiert sicherlich den fehlenden Bauern, aber Schwarz muss sich nicht an seinen materiellen Vorteil festhalten. d5! Den d7−Bauern befreien und die Entwicklung des ♗c8 möglich machen. 13.Bxd5 0−0 *(* In einer Fernschachpartie wurde sofort *13...Nxd5* gespielt. *14.Rfe1+ Ne7 15.Rxe7+ Qxe7 16.Re1 h6 17.Qd6 Qxe1+ 18.Nxe1 a5 19.Nd3 f6 20.Nf4 Ra6 21.Qd5 Rf8 22.h4 g5 23.Qe4+ Kd8 24.Nd5 Re8 25.Qg6 Rd6 26.Qf7 gxh4 27.Kh2 f5 28.Qxf5 b6 29.Qf7 Bb7 30.Nc7 Kxc7 31.Qxe8 Rd5 32.Qe4 h5 33.Qf4+ d6 34.Qf7+ Kc6 35.Qe8+ Kc7 36.Qe7+ Kc6 37.Qxh4 Kd7 38.Qh3+ Kc7 39.Qe6 Rd2 40.Qe1 Rd5 41.Qe7+ Kc6 42.Qf7 Rc5 43.Qe8+ Kc7 44.Qe7+ Kc6 45.Qd8 Rc2 46.Qe8+ Kc7 47.Qe7+ Kb8 48.Qxd6+ Ka7 49.Qd4 Rc5 50.f4 Bc8 51.a3 Kb7 52.b4 Rf5 53.Qd6 axb4 54.axb4 Rb5 55.Qd8 Rf5 56.Kg3 Rb5 57.Kf2 Bg4 58.Qd4 Bf5 59.Qg7+ Kb8 60.Qh8+ Bc8 61.Qd8* 1−0 (61) Schmid,P (2361)−Larwinski,P (2289) FICGS 2016 *)* 14.Rad1 Nxd5 15.Qxd5 d6 16.Qxd6 Es scheint nichts Besseres zu geben, aber jetzt vereinfacht sich die partie zu einem Ende, in dem nur Weiß leichte Probleme haben könnte. Qxd6 17.Rxd6 Be6 18.a3 Rfd8 19.Rd4! Das genaueste. *(*Falls *19.Rfd1 Rxd6 20.Rxd6 Rc8 21.h4 Kf8* und Schwarz kann hoffen, die Überlegenheit seines ♗ers über den ♘ in einem Endspiel mit offenenem Zentrum und Bauern auf beiden Flügeln zu beweisen. *)* 19...Rxd4 20.Nxd4 Rd8 21.Rd1 f6 22.f3 Kf7 23.Kf2 Rd5 24.Ke3 Weiß hat eine perfekte Zentralisierung erreicht und Schwarz findet nichts Besseres als

ein Remis durch Zugwiederholung. Re5+ 25.Kd3 Rc5 26.Re1 Bd7 27.Kd2 Rd5 28.Kc3 Rc5+ 29.Kd2 Rd5 30.Kc3 Rc5+ 31.Kd2 ½−½ (31) Nakamura,H (2799)−Giri,A (2776) Khanty−Mansiysk 2015]

[Die Hauptvariante ist 7.Bd2 Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 Mit einer komfortablen Stellung für Schwarz. 10.Qb3 Nce7 11.0−0 0−0 12.Rfe1 c6 13.Ne4 Nb6 14.Bd3 Bf5 15.Nc5 Bxd3 16.Qxd3 Rb8 17.Qa3 Nec8 18.Ne4 Nd5 19.Rac1 Re8 20.g3 a6 21.Ne5 Re7 22.Rcd1 Ncb6 23.Nc5 Qc7 24.Qb3 h6 25.Ned3 Rxe1+ 26.Rxe1 Nd7 27.Kg2 Kf8 28.h3 Kg8 ½−½ (28) Van Leeuwen,E (2493)−Percze,J (2533) ICCF 2016]

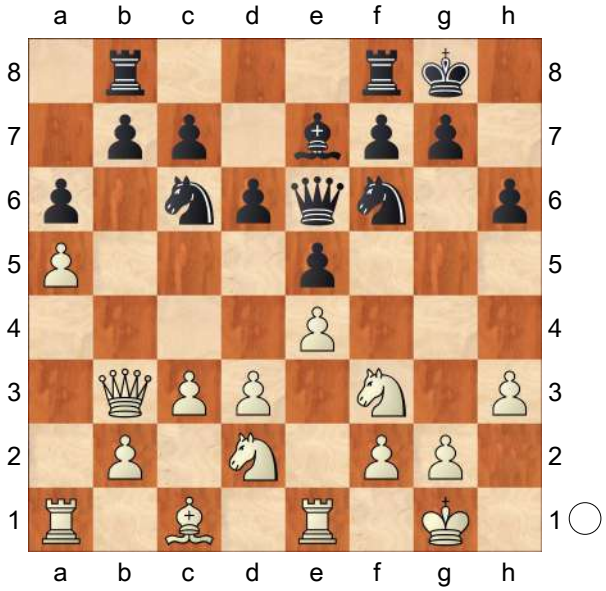
□ **Jacon,Marcel** **1929**
■ **Ducolombier,Bertrand** **2035**
corr AJEC/5446 01.03.2010
[Dauthuis,Fernand]

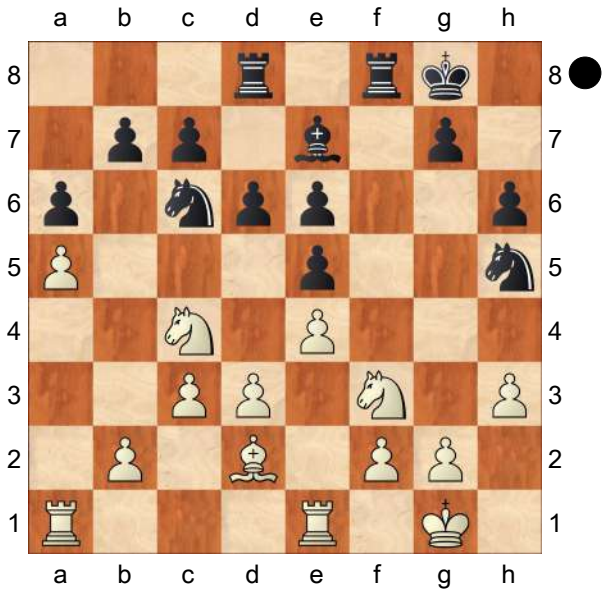
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1 d6 7.a4 Be6 8.Nbd2 Qd7 9.c3 h6 10.a5 a6 11.Bb3 Bxb3 12.Qxb3 Rab8N
Le pion b7 n'étant pas véritablement en prise, l'intérêt de cette nouveauté apparaît plus clairement au coup suivant. 12...♖fe8 et 12...♘h5 ont été joués dans cette position. **13.h3 Qe6**



Maintenant les blancs ne peuvent plus prendre en b7, attaquant le cavalier c6, et sont pratiquement forcés d'échanger les dames pour ne pas perdre un tempo. Il en découle un certain renforcement du centre noir et l'ouverture de la colonne f pour l'attaque. **14.Qxe6 fxe6 15.Nc4 Nh5 16.Be3 Rbd8**
[16...Nf4!? et si 17.Bxf4 Rxf4 suivi de ♖bf8.]
[16...Rf6 tout de suite ne semble rien donner de particulier et permettrait aux blancs de faire tomber la pression après 17.d4 exd4 18.Nxd4 Nxd4 19.cxd4]
17.Bd2?!

(Diagram)

Une perte de temps. 17.b4 tout de suite semble plus logique. **17...Rf6!**



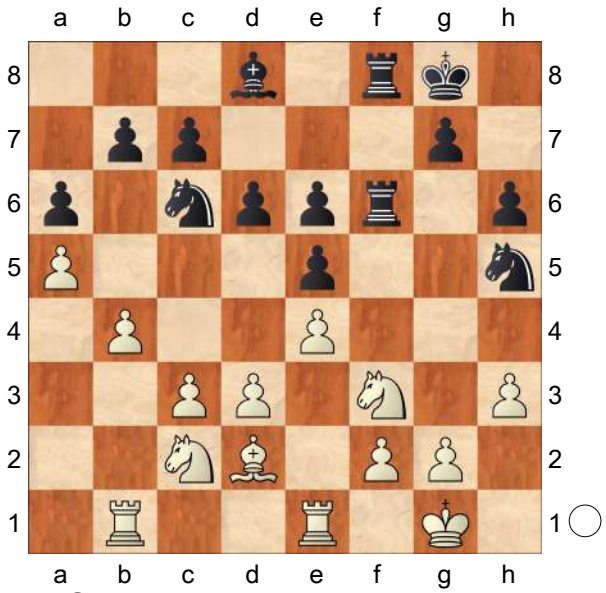
Évidemment, 18.d4 serait maintenant beaucoup moins fort. **18.b4 Rdf8 19.Rab1 Na7!** Possible... grâce au 17e coup des blancs. **20.Na3 Nc6?!**

[20...c6 pour verrouiller l'aile dame avant de se consacrer à l'attaque sur l'autre aile semble plus cohérent avec les coups qui précèdent.]

21.Nc2?!

[21.Nc4!=]

21...Bd8



22.Rb2?! Le plan des blancs est peu apparent... **22...Nf4 23.Bxf4 Rxf4**

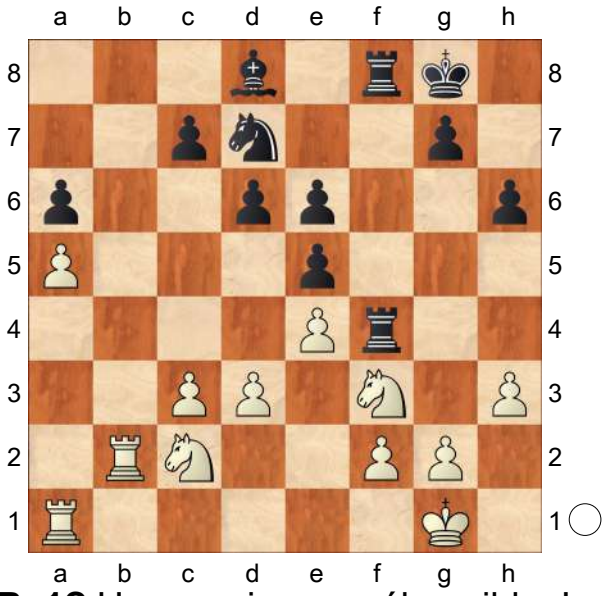
[Bien entendu, 23...exf4 pour dédoubler les pions e n'aurait aucun sens et libérerait le jeu blanc.]

24.Ra1 Prépare la poussée b4−b5. Ah si le cavalier noir était resté en a7 !...

24...Nb8?

[Vu les pertes de temps des blancs, 24...Na7 n'était pas ridicule. Petit à petit les noirs se laissent distraire de leur plan initial qui consistait à développer leur attaque à l'aile roi.]

25.b5! Nd7 26.bxa6 bxa6



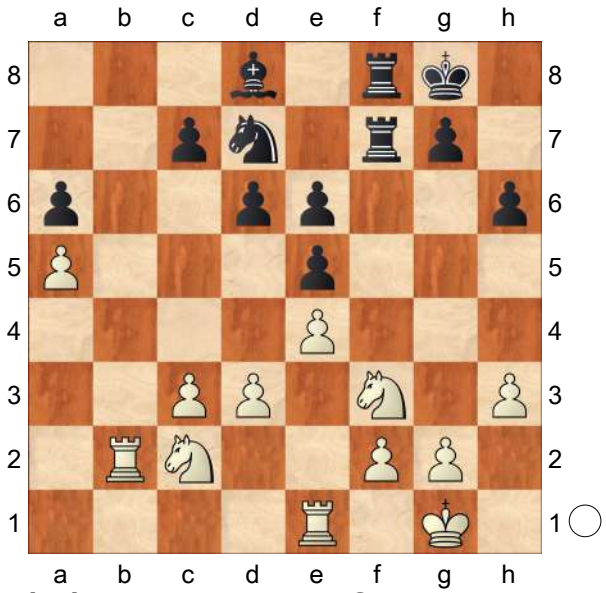
27.Re1? Un coup incompréhensible. Les blancs avaient pourtant réussi à trouver du contre−jeu à l'aile dame. Il fallait renforcer le centre, notamment d3, au moyen de ♔f1−e2 et se concentrer sur la faiblesse des cases blanches de l'aile dame noire. **27...R4f7?!**

[Encore une manœuvre mystérieuse... L'actif 27...c5!?∞ attaquant a5 et menaçant surtout c5−c4 pour faire sauter le centre blanc, semble digne d'intérêt.]

28.Rc1 Rf4 29.Re1 R4f7

(Diagram)

30.Nb4?! Les blancs refusent la nullité



par répétition de coups. C'est toujours un choix délicat. Il est vrai que les noirs n'ont pas l'air d'humeur très combattive, alors... **30...c5 31.Nc6**

[Forcé pour ne pas perdre un pion : 31.Nxa6? Bxa5 32.Rb7 *(32.Rc1? Ra8)* 32...Bxc3]

31...Bf6 32.d4 Joué avec une volonté évidente de « casser la baraque ».

32...exd4 33.cxd4 Rc8

[Mieux valait prendre une fois en d4 d'abord : 33...cxd4 34.Ncxd4 Rc8 . L'immédiat 33...♖c8 abonde dans le plan des blancs qui est de semer la pagaille.]

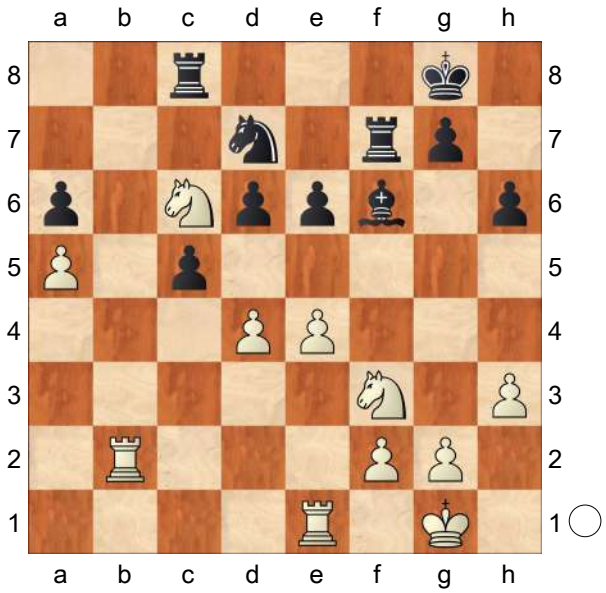
(Diagram)

34.e5! dxe5 35.Ncxe5 Nxe5 36.dxe5 Bd8

[Contre−attaque juste à temps le pion a5, tout en empêchant ♖b6 : 36...Be7? 37.Rb6±]

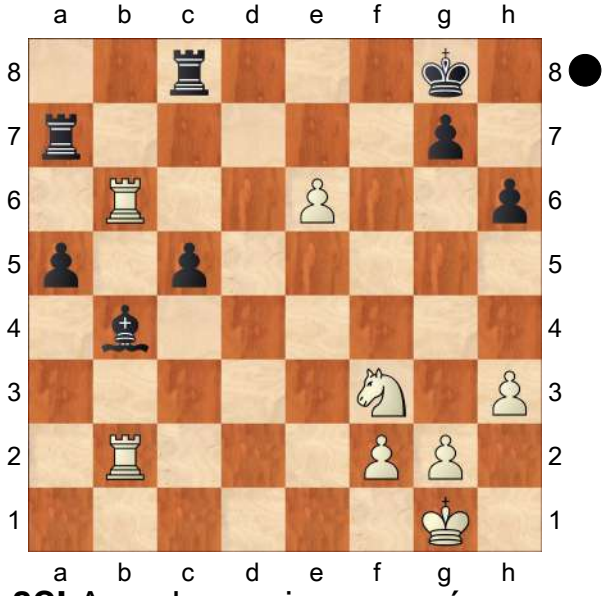
37.Rd1 Ra7 38.Rd6 Bxa5 39.Rxe6

[Tapis ! Les blancs misent tout sur le pion passé e. Possible mais peu séduisante était la suite « raisonnable



» : 39.Ra2 Bb4 40.Raxa6 Rxa6 41.Rxa6 c4 42.Ra2 avec un jeu approximativement équilibré, mais probablement peu de chances de gain.]

39...Bb4 40.Rb6 a5 41.e6



Rca8?! Avec leurs pions passés éloignés de l'aile dame, les noirs sont mieux. On ne voit pas comment les blancs pourront tirer avantage de leur pion passé e6 qui est faible car difficile à étayer; par exemple les cases d4, g5 et aussi f4 (à cause de g7−g5) sont inaccessibles au cavalier blanc et le roi

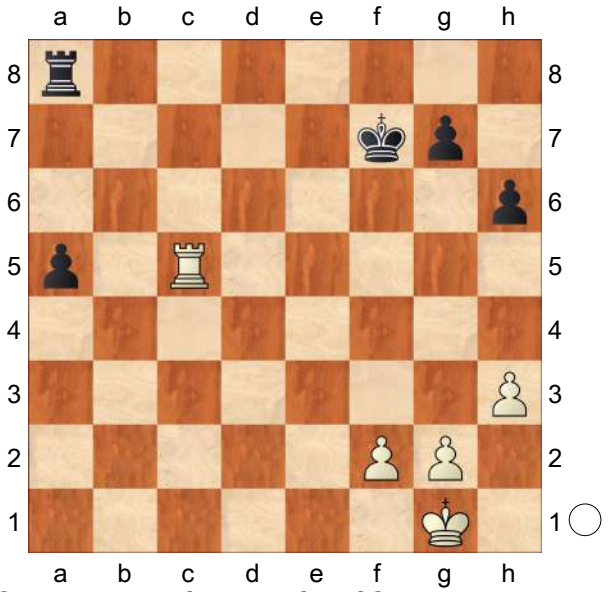
est bien loin. Alors que le roi noir peut facilement soutenir ses deux tours pour venir l'attaquer. Le coup des noirs montre qu'ils veulent pousser leur pion a, mais en découvrant leur roi ils offrent l'occasion à leur adversaire d'obtenir du contre−jeu... Pourquoi dans ce cas ne pas pousser le pion a tout de suite ? Ou alors, les deux pions a et c fermement défendus par le fou b4, peut−être fallait−il d'abord privilégier l'élimination du pion e6, avant de pousser le pion passé...

[Par conséquent, j'aurais préféré ⌓41...Re8! et si les blancs viennent défendre leur pion e, alors a5−a4!]

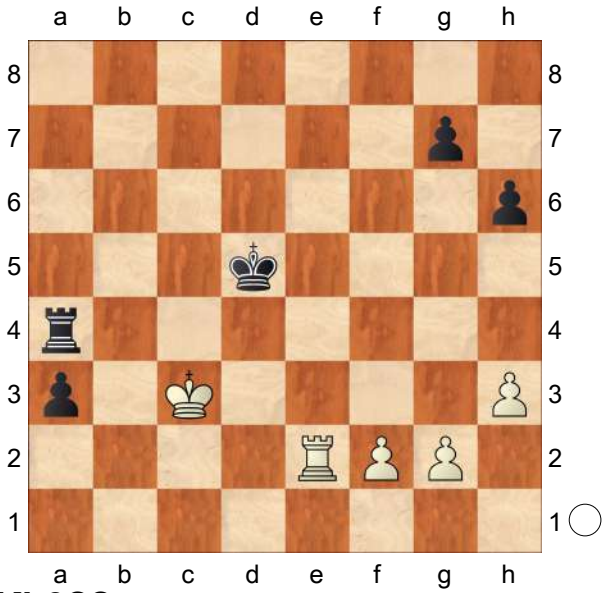
42.Ne5 Bc3?!

[42...a4!]

43.Rb8+! Kh7 44.Rxa8 Rxa8 45.Re2□ Bxe5 46.Rxe5 Kg6 47.e7 Kf7 48.e8Q+ Rxe8 49.Rxc5 Ra8



La finale est délicate à défendre pour les blancs. Le pion passé éloigné à l'aile dame pèse lourd dans la balance, d'autant que la tour noire est idéalement placée, derrière le pion, prête à le soutenir pour atteindre la promotion. Pire même, le roi blanc est loin du champ de bataille et la majorité de pions à l'aile roi est encore au point de départ... Et pourtant, en jouant précisément, il est encore possible de maintenir l'équilibre et d'obtenir la nullité. Les finales de tours... **50.Kf1 a4 51.Rc2 Ke6 52.Ke2 Rb8 53.Ra2 Rb4 54.Kd3 Kd5 55.Re2 a3 56.Kc3 Ra4**



57.Kb3??

[Une énorme faute. Il fallait absolument empêcher le pion d'avancer, donc 57.Ra2=]

[ou même 57.Rd2+ Ke5 58.Re2+ Kf5 59.Ra2 et on ne voit pas comment les noirs gagnent...]

57...a2−+ 58.Rxa2□ Rxa2 59.Kxa2 Kd4! Le roi noir va cueillir tous les pions blancs, la partie est finie. **60.Kb2 Kd3 61.Kc1 Ke2 62.f4 Kf2 63.g4 Kg3 64.g5 hxg5 65.fxg5 Kxh3 66.g6 Kg4 67.Kd2 Kg5 68.Ke3 Kxg6 69.Kf4 Kh5!** Le seul coup gagnant, mais il suffit. **70.Kg3 Kg5 71.Kf3 Kh4 72.Kf4 g5+ 73.Kf3 Kh3 74.Kf2 g4 75.Kg1 Kg3−+ 76.Kh1 Kf2 77.Kh2 g3+**

18...f5 19.Bh5 Re7 20.c4 a6 21.Nc2 Be6!? Black has now a nice centralization, with only one piece to be improved (the knight on a5, which at the moment is attacking c4, thus impeding White from pushing b3−b4 and opening lines against the black king. Also, the white king is lacking from good defenders. White needs to be careful since he has a pawn on h3 (possible break on square g4), and both black bishops are pointing to the kingside. Other tactical issues in Black´s favour are, for example, ♗h2+ freeing the −d file, where the black rook is aiming at the white queen. **22.Ne3**

[22.Bg6 Kb8 23.Nce1 Bc8 24.Qc2 Qb6 25.Rd1 Bc7 26.Bh5 Nc6⩲]

22...Red7

23.Be2 Nc6 Hamarat is wisely keeping in hand the threat of ...♘h2+ **24.Nd5 Bxd5 25.cxd5 Bh2+ 26.Kh1 Rxd5 27.Qc2 Rxd3 28.Bxd3 Nb4 29.Bxa6+ Nxa6 30.Rad1** Alvarez,Roberto: 'transposes to the game.''Alvarez, Roberto Gabriel: 'Alvarez,Roberto: 'transposes to the game.'" **30...Rxd1 31.Qxd1 g6 32.Qd5 Qd6 33.Qa8+?!**

[Since Black has an extra piece (2 knights against a rook), is better for the defender to exchange queens. The side with the "extra" piece usually takes advantage of this by attacking (he can attack twice a point, and the opponent lacks enough pieces for defense). 33.Qxd6 Bxd6 34.Kg1 Nb4 35.Rd1 Kc7 36.a4 Kc6= with a leveled position, but I would prefer to play it with the black side :−)]

33...Nb8 34.Qa5 Bf4 35.a3?? Missing Black´s threat. Now White´s first rank is weak, since the rook is overloaded defending f2.

[35.Qb5 Nc6∓]

[35.Kg1 Nc6 36.Qa8+ Kc7 37.Qa6 h5∓]

35...Nxf2+!−+ 36.Kg1

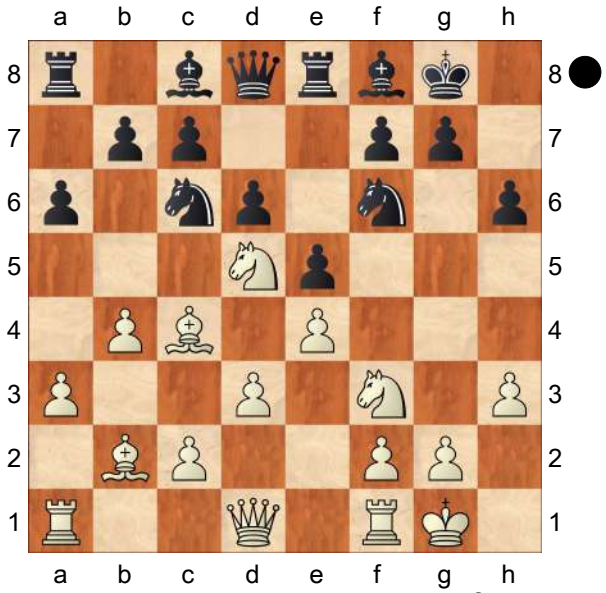
Vitrolles−ch 13th (3) 10.11.2012
[Gozzoli,Yannick]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.Nc3 La variante Canal.
[5.c3 mène au Giucco Piano.]
5...h6 Un réfléxe contre la combinaison

♗g5−♘d5 mais pas nécéssaire !
[5...d6 6.Bg5 h6 7.Bxf6 Qxf6 8.Nd5 Qd8 9.c3 a6 10.d4 exd4 11.cxd4 Ba7=]
6.a3 0−0 7.0−0 Re8 pas nécéssaire dans la position.
[7...a6 Pour pouvoir jouer d6 sans craindre ♘a4 est plus précis.]
8.h3
[8.b4 Bf8 9.Nd5 pour jouer c3−d4 est plus fort.]
8...a6 9.b4 Bf8?! illogique !
[9...Ba7 garde le ♗ sur belle diagonale est la véritable idée de ...a6 !]
10.Bb2 d6 11.Nd5± Diagramme



L'ouverture des Blancs est un véritable succès, leur position est saine et donne beaucoup de perspectives. **11...g5?!** beaucoup trop affaiblissant !
[11...Nxd5 12.Bxd5 Qf6 13.Nh2± /=]
12.Nh2 Les Blancs vont maintenant pouvoir utiliser l'affaiblissement des cases blanches à l'aile−♔ **12...Bg7 13.Qf3?!**
[13.Nxf6+ Qxf6 14.Ng4 Qg6 15.Ne3± était la bonne séquence de coups pour souligner les cases faibles !]
13...Nd4! Bonne réaction ! Les Noirs libèrent donc le pion c6 pour chasser le ♘d5 et l'empêcher de venir en e3 pour cibler f5. **14.Bxd4 exd4 15.Nxf6+ Qxf6 16.Qh5 Re7?!**
[16...Be6= éliminant le dangereux ♗ de cases blanches égalisait.]
17.Rae1
[17.Ng4! gagnant le ♗ de cases blanches adverse sécurisait un gros avantage aux Blancs.]
17...Be6! Mieux vaut tard que jamais !
18.Bxe6 Qxe6?!
[18...Rxe6⇄ gardant f4 sous contrôle laissait les Blancs avec des problèmes pour monter leur attaque et de nombreuses faiblesses à l'aile−♕]
19.f4!→ Les Blancs ne ratent pas leur chance et se lancent à l'attaque du roque adverse ! **19...Qg6 20.Qf3** pas le meilleur !
[20.Qxg6! fxg6 21.fxg5 hxg5 22.Ng4±]
20...gxf4 21.Qxf4 Be5 22.Qf5? pourquoi vouloir échanger les ♕ maintenant ?
[22.Qh4↑]
22...Qxf5! bien sûr ! **23.Rxf5 Bxh2+?**
[23...c6! avec l'idée a6−a5 sans craindre b4−b5 était fort ! 24.Ng4 Kg7 25.Rh5 Re6 26.Rf1 a5!⇄ 27.Rhf5 Re7 28.Rh5 Re6 29.Rhf5 Re7=]
24.Kxh2± La finale de pièces lourdes est très difficile pour les Noirs. La ♖f5 est très forte et le pion d4 est difficile à soutenir. **24...Kh7?** La faute décisive.
[24...Re5 Pour contester l'activité horizontale de la ♖f5 s'imposait.]
25.Ref1 Rf8 26.h4
[26.Rd5 gagnait le pion d4.]

26...c6 27.h5?! pourquoi perdre la case h5 qui aurait pu être parfaite pour une ♖ ou le ♔ ! **27...b6?!**
[27...Kg7 les Noirs doivent se contenter d'une défense passive et ne doivent surtout pas toucher aux pions pour le pas créer de nouvelles faiblesses !]
28.Rf6 Rd7 29.R1f5
[29.e5! soulignait parfaitement l'inconvénient de 27...b6 dxe5 30.Rxc6 gagne tout.]
29...c5?

GER−chT U20 Osnabrueck (7.6)
[Quintiliano, Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.Nxf7 Bxf2+! 6.Kf1! Qe7 7.Nxh8 d5! 8.exd5 Nd4 9.d6! Qxd6!

The right move, as the queen might help Black's minor pieces in the attack in many lines, as we'll see. **10.c3**

One of the safe options.

[10.Kxf2? is simply bad now: Bg4 11.Qe1 *(11.Qf1 Ne4+ 12.Kg1 Ne2+!−+)* 11...Nxc2−+ and Black wins the queen thanks to the winning threats of checks on c5 and b6.]

[10.d3 is playable, and the result is probably a balanced position, with correct play by both sides. Bg4 11.Nf7! An important intermediate move. *(11.Qd2 Be2+! 12.Kxf2 Ng4+ 13.Ke1 Qf6!* White should part with the queen now in order to prevent being mated. *14.Qxe2 Nxe2 15.Kxe2 Qf2+ 16.Kd1 Qxg2 17.Re1* This position is an instructive example of how well queen and knight might coordinate against an exposed king. *Nf2+ 18.Kd2 Ne4+ 19.Kd1 Qg4+! 20.Re2 Nf2+ 21.Kd2 Qf4+!* and Black wins material: *22.Ke1 Qxc1+ 23.Kxf2 Qxb2∓)* 11...Qb6 12.Qd2 Be2+! 13.Kxf2 Ng4+ 14.Ke1 Qf6! *(14...Nf3+?* is the wrong way to win the queen: *15.Kxe2 Qf2+ 16.Kd1 Nxd2 17.Bxd2 Qxg2 18.Re1+−)* 15.Qxe2 Nxe2 16.Rf1!? Fighting for an advantage. *(16.Kxe2* leads to a draw now: *Qf2+ 17.Kd1 Qxg2 18.Re1 Nf2+ 19.Kd2 Ne4+ 20.Kd1*

Black probably should go for repetition here, as the knight on f7 represents a better version of the previous variation for White, for example *Qg4+ 21.Re2 Nf2+? 22.Kd2 Qf4+ 23.Kc3! Nd1+ 24.Kb3 Qxc1 25.c3 Ne3 26.Na3! Qxa1 27.Rxe3 Qd1+ 28.Nc2 a5 29.a4±* White's better coordination gives him better chances as well. *)* 16...Nf4 17.Bxf4 *(17.g3* leads to a repetition by *Nxh2 18.Rf2 Ng4 19.Rf1 Nh2=)* 17...exf4 18.Nc3 Ne3 19.Bb3! Kd7! The position remains difficult to evaluate: White's pieces are well coordinated, but I think Black should be fine with correct play; I offer the following illustrative lines, although they are by no means forced: 20.Kd2! *(20.Rf2 Re8 21.Kd2 Qh4 22.Re2 f3! 23.gxf3 Qf4∞; 20.Nd5?* An unfortunate moment to force exchanges. *Nxd5 21.Bxd5 Qxb2 22.Kd2 Qb4+ 23.Ke2 Re8+ 24.Kf3 Qd4 25.Be4 Qf6−+)* 20...Nxf1+ 21.Rxf1 Re8 22.Ne4!? Qxb2 23.Rxf4 h6∞]

[10.Nf7!? seems the most ambitious try for White: Qe7 11.h3! *(11.c3 Bg4! 12.Qa4+ Nd7 13.Kxf2* Compared to the game, White is one tempo ahead with the knight already on f7, thus avoiding ...0−0−0, but Black can still make a draw with *Qh4+ 14.Ke3 Bf5!! 15.cxd4 Qxd4+ 16.Ke2 Bg4+ 17.Kf1 Qf4+ 18.Kg1 Qd4+ 19.Kf1 Qf4+=)* 11...Bh4! 12.c3 Nf5 Black looks for new threats, but White should answer with quick development. 13.d4! b5!! A nice move, the bishop will find a lot of work on the a8−h1 diagonal. 14.Nxe5! *(14.Bb3?* This leaves the play in Black's hands. *exd4 15.Ng5 Ng3+ 16.Kg1 Ne2+ 17.Kf1 d3!→)* 14...bxc4 15.Qf3 White is apparently doing well here, but Black's resources are not exhausted yet. Ne4! 16.Nd2 Bb7! 17.Nxe4 Bxe4 18.Qg4 Ng3+ 19.Kg1 h5! 20.Qd1 Qf6 21.Be3 Rb8! We may breathe a bit now and evaluate the position again: Black is an exchange down, but all his pieces are active, while White has not coordinated his forces yet; also, the rook on h1 can be taken at any moment, and the only reason why Black has not done it yet is because the annoying knight on g3 keeps the White pieces tied down on the kingside. 22.Qd2 Bd3!? 23.Nxd3 cxd3 24.Qxd3 Rxb2 25.Re1 Kd7 26.Rh2!? *(26.Kh2? Nxh1 27.Rxh1 Qd6+ 28.Kg1 Rxg2+! 29.Kxg2 Qg3+ 30.Kf1 Qf3+ 31.Kg1 Bf2+−+)* 26...Qf5! 27.Qxf5+ *(27.Qd1 Rxa2−+)* 27...Nxf5 28.g4! Rxh2 29.Kxh2 Bxe1 30.gxf5 Bxc3= − just another piece of amusing analysis in the Traxler!]

10...Bg4 11.Qa4+ Nd7 12.Kxf2

The position resembles Game 7.

12...Qf6+ 13.Ke1 0−0−0 14.Nf7

[14.Rf1? would leave White in trouble: Qh4+ 15.g3 *(15.Rf2? Qxh2 16.cxd4 exd4)* 15...Qxh2 16.Nf7 *(16.cxd4 exd4)* 16...Qxg3+ 17.Rf2 Nf3+ and Black wins: 18.Ke2 Nxd2+! 19.Ke1 Nf3+ 20.Ke2 Nh2+ 21.Ke1 Nc5−+]

14...Nc5!

[14...Nb6 would be the same: 15.Nxd8 Nxa4 16.cxd4]

15.cxd4 Nxa4 16.Nxd8 Qxd8

White has got two rooks and one piece

for the queen. That should be more than sufficient material, but he is still underdeveloped, so accurate play is required. **17.Be2?** And he went wrong now.

[17.Rf1! was the right move. Qxd4 *(17...exd4 18.h3 Qh4+ 19.Rf2 Nc5! 20.d3 Bf5 21.Kf1! Bxd3+ 22.Bxd3 Nxd3 23.Rf8+ Kd7 24.Bd2±* seems good for White. *)* 18.Bb5 c6 19.Bxa4 Qe4+! Black is able to reach an equal endgame now. 20.Kf2 Qd4+ 21.Kg3 Qd3+! 22.Rf3 *(22.Kxg4 Qxf1 23.Nc3 Qf4+ 24.Kh3 Qh6+ 25.Kg3 Qf4+=)* 22...Bxf3 23.gxf3 e4 24.Bd1 e3! 25.Nc3 exd2 26.Bxd2 Qxd2 27.Rb1 Qg5+ 28.Kf2 Qh4+ 29.Kg2 Qg5+=]

17...Qxd4? Black also doesn't see the correct continuation.

[It was 17...Bxe2 18.Kxe2 Qg5! after which White has no time to develop his pieces, while Black coordinates queen + knight with time: 19.Kf2 Qf4+ 20.Ke2 Qe4+! 21.Kf2 *(21.Kf1 exd4!* keeping White's pieces tied down. *)* 21...Qxd4+ 22.Ke2 Qg4+ 23.Kf2 Nc5! The knight comes back now, forcing material gains. 24.Nc3 Nd3+ 25.Ke3 Qxg2 26.Kxd3 Qxh1−+]

18.h3?! Risky.

[⩲18.Nc3 Bxe2 *(18...Nxc3 19.Bxg4+! Qxg4 20.dxc3 Qxg2 21.Rf1 Qe4+ 22.Kf2 Qf5+ 23.Kg2 Qg4+=)* 19.Nxe2 Qh4+ 20.g3 Qe4 21.Rf1 Nc5 22.Kd1 Qg2 23.Rg1 Qxh2 24.b4 Nd3 25.Rb1∞]

18...Bxe2 19.Kxe2 Qe4+ 20.Kf2?? The decisive mistake.

[20.Kd1 would keep White in the game: Qxg2 21.Re1 Nc5 White has the difficult task of finding the best defensive play now: 22.Re3! Qf1+ 23.Kc2 Ne6! 24.b3 Qf5+ 25.Kb2 Nf4! The perfect coordination between queen and knight keeps Black's initiative alive. 26.Nc3 Nd3+ 27.Kb1 *(27.Ka3?? Qf8+−+)* 27...Nb4+ 28.Ne4 *(28.Kb2 Qc2+ 29.Ka3 Nd3 30.Rxd3 Qxd3∓)* 28...Nd5 29.Re1 Qxh3 30.Ba3∓]

20...Nc5−+ White has no way to defend against the queen + knight assault now.

21.Nc3 Nd3+ 22.Kg1 Qd4+ 23.Kh2 Qf4+ 24.Kg1 Qg3 25.Ne2

[25.Nd1 Ne1 26.Kf1 Nc2!−+]

25...Qf2+ 26.Kh2 Qxe2 27.b3 Ne1 28.Rxe1

[28.Rg1 Nf3+]

28...Qxe1 29.Bb2 Qe2 30.Kg3 Kd7 31.Bc3 Ke6 32.Kh2 Qf2 33.h4 c5 34.Kh3 g6 35.Rb1 Qf5+

8...0−0

[8...h6 3:34 9.Bh4 21 g5 6:26 10.Bg3 19 Ne7N 1:34 *(10...Bg4 11.Nbd2 Nh5 12.Kh1∞ Nf4 13.b4 0−0 14.b5 axb5 15.axb5 Ne7 16.Qc2 Neg6 17.Bxf4 Nxf4 18.g3 Nh3 19.Kg2 Bb6 20.Rxa8 Qxa8 21.d4 Qe8 22.Qd3 Kg7 23.Bd5 c6 24.bxc6 bxc6 25.Bb3 f5 26.dxe5 dxe5 27.exf5 Bxf5 28.Qd6 e4 29.Nd4 Bg4 30.Nxe4 Qxe4+ 31.f3 Rxf3 32.Rxf3 Bxf3+ 33.Nxf3 h5 34.Qd7+ Kh6 35.Qd2 Bc5 36.Bd1 Qd5 37.Kxh3* 1−0 (37) Andreikin,D (2636)−Nyback,T (2628) Khanty−Mansiysk 2009 *)* 11.d4!? 2:55 konsequent gespielt − Weiß kommt Schwarz in Ruhe zu Sg6 hat er Angriffschancen am Königsflügel *(11.Na3 Ng6 12.Nc2 Qe7∞)* 11...Nxe4! 12:18 Weiß nimmt den Fehdehandschuh auf − nur so ist das vorherige Spiel zu rechtfertigen 12.Nxe5 26 Schwarz ist noch im Buch und spielt ein interessantes Opfer

A) 12...dxe5 13.Bxe5 und hier hätte Schwarz viele Möglichkeiten, die jedoch allesamt riskant sind Nd6 *(13...Rf8* der materialistischste Ansatz *14.Re1 Bf5 15.g4!?⩱; 13...0−0 14.Re1⩱; 13...f6 14.Re1 Bf5 15.Nd2⩱)* 14.Bxh8 Nxc4 15.Re1∞;

B) 12...0−0! 16:06 eine aus praktischer Sicht gute Lösung − das Opfer zu akzeptieren, wo Schwarz sich offensichtlich noch in der Vorbereitung befand, wäre zu riskant gewesen. Zudem ist 12... 0−0 kein Eingestädnis, sondern ein auch objektiv kein schlechterer Zug als 12...dxe5 13.Nxf7? 15:52 *(13.Nf3 d5 14.Ba2 f5* und Schwarz steht aktiver *15.Re1 Kh7 16.Nbd2 Ng6∓)* 13...Rxf7 23 14.Bxf7+ 3 Kxf7 5 15.f4 5 g4! 16:50 hält die Stellung geschlossen, was konkret den eigenen König schützt und zudem bei gegebener Materialverteilung auch prinzipiell wünschenswert ist *(15...Nf5 16.fxg5 Kg6 17.Nd2 Nexg3 18.hxg3 Qxg5 19.Qb3 Bd7 20.Rf2∞)* 16.f5 1:22 Nxg3 3:03 17.hxg3 20

B1) 17...Qg8!? gefällt zuerst der Engine, ist aus menschlicher Perspektive aber unmöglich spielbar 18.f6 Nf5 *(18...Nd5* ist noch eher verständlich *)* 19.Qd3 Kxf6 *(19...c5!? Δ20.Rxf5 Qg6 21.Qe4 Qxf5 22.Qe7+ Kg6 23.Qg7+ Kh5 24.Nd2∞)* 20.Rf4 c5 21.Nd2∞;

B2) 17...Ng8! 1:50 Das schwarze Spiel in dieser Partiephase gefällt mir sehr gut − er geht den Komplikationen aus dem Weg und strebt einen geschlossenen Stellungstypen an, in dem sich seine Leichtfiguren langfristig

durchsetzen sollten. 18.Qxg4 8:32 Qg5 14

B2a) 19.Qe2 c5! *(19...Nf6? 20.Nd2 Bd7 21.Ne4 Nxe4 22.Qxe4 Bc6 23.Qd3 Re8 24.Rae1±)* 20.Nd2 cxd4 21.cxd4 Bxd4+ 22.Kh2 Be5 23.Ne4∞;

B2b) 19.Qxg5? 2:05
Ein nur schwer erklärbarer Fehler − Schwarz muss unbedingt Komplikationen erzwingen und die Initiative aufrecht erhalten. Erhält die Partie einen statischen Charakter, wird sich Schwarz langfristig durchsetzen.
19...hxg5 6 20.Nd2 16 Nf6 6:18 21.Nf3 2:32 Nh7! 8
stellt den Springer kurzzeitig passiv um den geschlossenen Charakter aufrecht zu erhalten. In dieser Partiephase versteht es Weiß nun ausgezeichnet, alles weißes Spiel zu verhindern und dabei langsam seine Figurenstellung zu verbessern.Schwarz findet keinen durchschlagenden Plan, Weiß auch nur ansatzweise zu stören − vermutlich gibt es auch keinen.
Interessanterweise zeigt hier Houdini auch bei Tiefe 25 noch 0.00 an. *(21...Bxf5 22.Nxg5+ Kg6 23.Nf3 Be4* wäre auch möglich gewesen, doch hat Weiß hier mehr Gegenchancen *)* 22.g4 17:12 Bd7 31 23.Rfe1 1:27 Rg8! 17:21 24.Kf2 6:58 Nf6 9:30 25.Kg3 24 c5 30
der La7 erwacht wieder zum Leben 26.Re2 9:12 cxd4 1:17 27.cxd4 36 *(27.Nxd4 Bxd4! 28.cxd4 Rc8∓)* 27...Bb6 1:38 28.b3 7:08 Bc6 2:40
der schwarze Plan ist von Erfolg gekrönt, die drei Leichtfiguren sind den weißen Türmen deutlich überlegen.
29.Rae1 1:02 *(29.Rc1 Bd8∓)* 29...Ba5 44 30.Re7+ 12:53
gibt bereits Material Kf8 4 31.R1e2 2 Bd8 46 32.R7e6 2:45 Bd7 26 die weiße Turmverdoppelung auf der e−Linie hat nicht eingebracht, ja ganz im Gegenteil, Schwarz gewinnt hier bereits entscheidend Material.
33.R6e3 4 Nd5 34 34.Re4 2:16 Nc3 9 35.d5 15 Bf6 1:01 36.Nd2 18 Rg7 5:15 37.Re1 57 Nxe4+ 6 38.Nxe4 2 Re7 59 der Rest ist saubere Technik und bedarf keines Kommentars 39.Kf3 32 Kg7 1:18 40.Rh1 0 Be8 0 41.Nxd6 4:55 Bf7 3:30 42.Nxf7 2:09 Kxf7 1:21 43.Rc1 6:32 Bd4 1:55 44.Rc4 5 Bb6 1:22 45.Re4 1:18 Rxe4 2:09 46.Kxe4 4 Ke7 25 47.b4 1:48 Bd8 2:46 48.a5 4:47 Kd6 28 49.Kd4 6 Bf6+ 13 50.Kc4 3 Bg7 7 51.b5 5 Bf6 9 0−1 (51) Mamedov,R (2655)−Caruana,F (2804) Shamkir 2016]

Queens−ch Jamaica (6) 10.11.2006
[ChessBase II]

1.e4 e5 2.Bc4 Nc6 3.Nf3 Bc5 4.Bxf7+? Loses − most developing moves toward the center are better.

4...Kxf7 5.Nxe5+ Nxe5 6.d4
[6.Qh5+ Ke6 7.Qf5+ Kd6 8.f4 Qf6 Would leave white with no adequate compensation.]

6...Bd6? A bad mistake,
[⌓6...Qh4! 7.0−0 *(7.dxc5 Qxe4+)* 7...d6 and black wins.]

7.dxe5 Be7 8.0−0±
[8.Qf3+ Ke8 9.Nc3± is even better.]

8...d6 9.f4 Another silly move. Better would be,
[9.Qf3+ Kg6 10.Qg3+ Kf7 11.Rd1 with a slight advantage.]

9...g6 10.e6+?! Another silly move better is, **10...Kg7?**
[⌓10...Bxe6 and after, 11.f5 Bd7 12.Qd5+ *(12.fxg6+ Kg7 13.Qd5 Qe8!* is also good for black. *)* 12...Kg7 13.fxg6 Qe8! is also good for black. 14.Rf7+ Kxg6 Black is winning.]

11.f5 Nf6 12.Nc3 c6 13.Bg5 Qb6+ 14.Kh1 Qc7
[14...gxf5 15.exf5 d5 16.Bxf6+ Bxf6 17.Qg4+ Kf8 18.Qh5 Qc7 19.Rae1! should win, though black can still put up resistance.]
15.fxg6?!
[⩲15.Qd2 h6 16.Bxf6+ Bxf6 17.Rf3 g5!= and black has succeeded in closing the position to any white entry.]
15...hxg6?
[strong was, 15...Bxe6! 16.Ne2 hxg6 17.Bxf6+ Bxf6 and black is winning!]
16.Bxf6+! Bxf6 17.Rxf6! Kxf6 18.Qd4+ Kxe6 19.Qxh8 Rb8 20.Rf1 Qe7 This game was very hard to annotate − Both players need to work hard on their tactics.

□ **Robers,Frank** **1564**
■ **Flaccus,Daniel** **1480**
corr freechess 18.07.2015
[Komodo 11.01+Bauer,Elmar]

Einer der fleißigsten Spieler auf dem Schachserver freechess ist Frank Robers. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 h6 6.0−0 0−0 7.Re1 d6 8.Nbd2 a6 9.Nf1!?**
Weiß hat keine Angst, dass ...−♘a5 den ♗c4 gewinnen wird. Normalerweise würde Weiß in solchen Positionen ♗b3 spielen um den ♗er zu bewahren. Aber das ist ein Tempoverlust und Schwarz antwortet normalerweise mit ... ♗e6
[9.Bb3 Ng4 10.Re2 Nf6 11.Nf1 Nh5 12.h3 Ba7 13.Re1 Be6 14.Bc2 f5 15.d4 fxe4 16.Bxe4 Bf7 17.dxe5 Nxe5 18.Nxe5 Bxf2+ 19.Kxf2 Bb3+ 20.Qf3 dxe5 21.axb3 Qh4+ 22.g3 Rxf3+ 23.Bxf3 Qxh3 24.Bg2 Rf8+ 25.Kg1 Qg4 26.Ra4 Qg6 27.Bd5+ Kh8 28.Be4 Qg4 29.Bg2 Qg6 30.Rxe5 Nxg3 31.Nxg3 Qxg3 32.Re2 Qd3 33.Rae4 Qd1+ 34.Re1 Qxb3 35.Be3 b6 36.Bf2 Qxb2 37.Bd4 Qd2 38.R4e2 Qg5 39.Re7 c5 40.Bxg7+ Qxg7 41.Rxg7 Kxg7 42.Kh2 ½−½ (42) Voll,A (2571)−Korze, D (2544) ICCF 2016]
9...Be6
[9...Na5 10.b4!? Das war die Idee von Weiß Nxc4 11.bxc5 Na5 12.a4 *(12.cxd6 cxd6 13.a4 b5 14.axb5 axb5 15.Rb1 Qc7 16.Bd2 Re8 17.h3 Nb7 18.Nh4 d5 19.exd5 Nxd5 20.Rxb5 Nxc3 21.Bxc3 Qxc3 22.Nf3 Ra5 23.Rxa5 Qxa5 24.Qd2 Qb5 25.Qc3 f6 26.d4 exd4 27.Nxd4 Qd7 28.Rxe8+ Qxe8 29.Ne3 Nd6 30.Qc5*

Qe5 31.Qxe5 fxe5 32.Nc6 e4 33.Kh2 Kf7 34.Kg3 g5 35.h4 Nf5+ 36.Nxf5 Bxf5 37.hxg5 hxg5 38.Ne5+ Kf6 39.Nc4 Be6 40.Ne3 1/2−1/2 (40) Giri,A (2755)−Mamedyarov,S (2761) Moscow 2016 *)* 12...Re8 13.cxd6 Qxd6 14.Ba3 Qd8 15.Ng3 b6 Der ♗er wird gut auf b7 platziert, aber das scheint ein bisschen langsam. 16.d4! Weiß erkennt schnell , dass dies seine Chance ist. Nc4

A) 17.Qb3 Nxa3 *(17...Na5 18.Qc2±)* 18.Nxe5**±**;

B) 17.Nxe5 Nxe5 18.dxe5 Qxd1 19.Raxd1 Rxe5 20.f4 Re8 21.e5 Weiß drückt weiter. Und optisch scheint es, dass er besser steht. Aber Schwarz hat keine Schwächen und es ist nicht so leicht für Weiß welchen Punkt er in der schwarzen Position angreifen sollte. Nd7 22.a5 Ein bisschen zu ehrgeizig. *(22.Nf5* War interessant, droht ...−♘e7 und weiter mit ♘xc8. *Nc5 23.Ne3 Nxa4 24.Nd5 Ra7 25.Ne7+ Kh7 26.Nxc8 Rxc8 27.Rd7* Mit gutem Spiel für den Bauern *)* 22...Kh7 23.axb6 Nxb6 24.Rd4 f6! Die schwarzePosition sieht nicht attraktiv aus. Die ♖ürme sind getrennt, die Bauern sind isoliert, aber es gibt keinen Weg für Weiß davon zu profitieren und damit ist die Position als gleich zu bewerten. 25.f5? Das verliert lediglich einen Bauern. *(25.h4!? fxe5 26.fxe5=)* 25...Rxe5 26.Rxe5 fxe5 27.Rg4 Bd7 Es wäre interessant zu wissen, was Weiß sich gedacht hat bei 25.f5?. Weil er gerade einen Bauern verloren hat! 28.c4 a5 29.Kf2 a4 30.Ke1

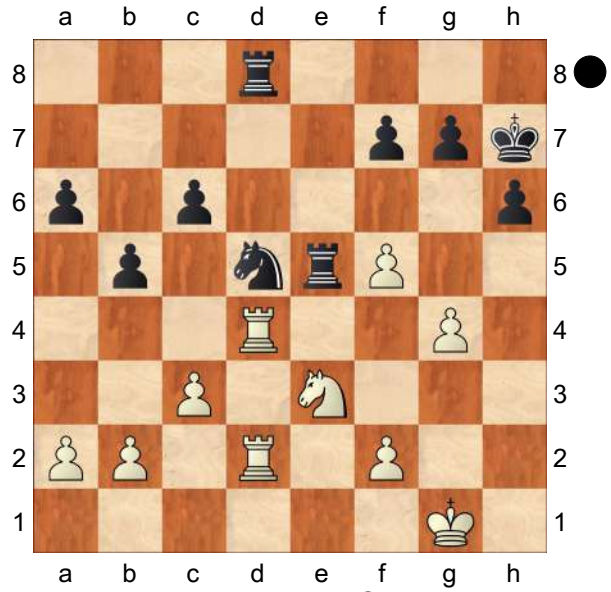
B1) 30...Be8! Die Idee ist ...−♗f7 zu spielen mit der Drohung ...−♘xc4 und vertreibt den ♗a3. 31.Ne4 Rd8 *(31...Bf7 32.Nd2)* 32.f6 g5−+;

B2) 30...Rg8 31.Bb2 g6 Schwarz spielt sehr pragmatisch. Er gibt den Bauern zurück, damit er seine Position befreien kann 32.c5 Nd5 33.fxg6+ Rxg6 34.Rxg6 Kxg6 35.Bxe5 Das Material ist ausgeglichen, aber der a4−Bauer ist ein echter Trumpf. a3 36.Kd2 a2 37.Ne2 Nb4 38.Nc1 Kf5 39.Bb2 Be6 40.Nd3 Na6 41.Ke3 Bc4 42.Ne5 *(42.Kd4 Bxd3 43.Kxd3 Nxc5+ 44.Kc4 Ne4 45.Kb3* Das sollte in einem Unentschieden enden. *)* 42...Bd5 43.g4+ Kg5 44.c6 Nb4 45.Kd4 Be6 46.Kc3 Nd5+ 47.Kd4 Kh4 48.Ke4 Nb4 49.Nd3 Nxc6 Durch geschicktes Manövrieren hat Schwarz einen Bauern gewonnen! 50.Bf6+ Kxg4 51.Ne5+ Nxe5 52.Bxe5 Kh3 53.Kf3 c5 Dieses ungleichfarbige ♗erendspiel ist völlig gewonnen für Schwarz, weil er seinen a Bauern aufgeben wird, um den Bauern h2 zu gewinnen, und die daraus resultierenden zwei Bauern sind einfach zu weit entfernt um für Weiß kontrolliebar zu sein . 54.Kf2 a1Q 55.Bxa1 Kxh2 56.Bg7 h5 57.Bf8 c4 58.Bb4 Bd5 59.Bc3 Kh3 60.Be5 Kg4 61.Ke3 h4 62.Kd4 h3 63.Ke3 Bf7 64.Bd6 Be8 0−1 (64) Xiong,J (2658)−

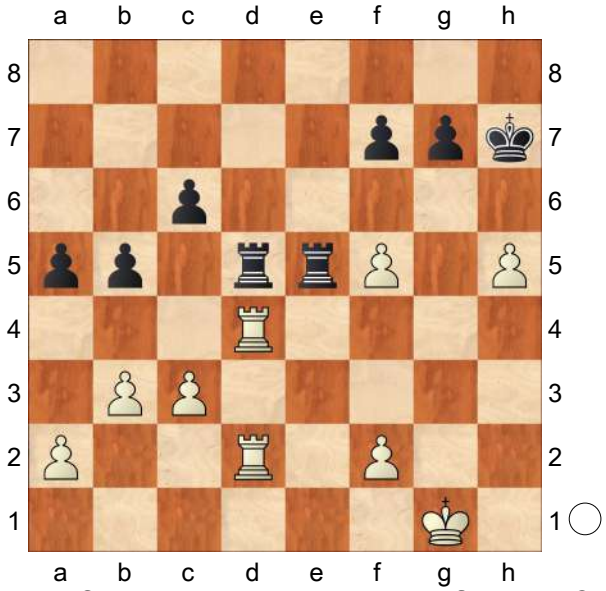
Negi,P (2670) Khanty−Mansiysk 2017 *(64...Be8 65.Be5 Bb5 66.Bd6 c3 67.Be5 Ba4 68.Kd3 c2 69.Kd2 Kf3−+)*]

10.Bb3 Nh7N Ein unverständlicher Zug, weder ...−f7−f5 noch ...−♘g5 sind spielbar.Doch seltsamerweise steht Schwarz nicht wirklich schlechter..ein Indiz für die gute schwarze Position wenn ein solcher antipositioneller Zug nicht bestraft werden kann.

[10...Bxb3= Hier eine Partie aus der GM Szene wie Schwarz ausgeglichenes Spiel erhält. 11.Qxb3 Re8 12.Be3 Bxe3 13.Nxe3 Qd7 14.h3 Ne7 15.Nh2 c6 16.Rad1 d5 17.Nhg4 Nxg4 18.hxg4 Rad8 19.d4 exd4 20.Rxd4 Qc8 21.Red1 b5 22.Qc2 dxe4 23.Qxe4 Nd5 24.Qd3 Qe6 25.Qf5 Qxf5 26.gxf5 Re5 27.g4 Kh7 28.R1d2



h5! Zersplittert die weißen Bauern am Königsflügel, was sich für das kommende Turmendspiel als vorteilhaft erweist 29.gxh5 Rd6 30.b3 a5 31.Nxd5?! *(*Nach *31.c4 bxc4 32.bxc4* scheitert *Nxe3 33.Rxd6* an *Nxc4* mit Bauerngewinn.*;* Die Maschinen empfehlen *31.a4!?)* 31...Rdxd5



32.c4? Danach entsteht ein für Weiß ungünstiges Turmendspiel. *(32.Rxd5!? cxd5 33.f6)* 32...bxc4 33.bxc4 Rxd4 34.Rxd4 Rxf5 35.Rd7 f6 36.Ra7 Rxh5 37.Kg2 Kg6

■ **Haldane,Robin W** **189**
Ashtead I (home) − Streatham I 07.12.10
[P.L.]

Time control: (1 hour / 30 moves) + (20 minutes for completion). **1.e4 e5 2.d4 exd4 3.Bc4!? Nc6 4.Nf3 Nf6 5.0−0 Nxe4 6.Nc3!?** A rare and old move which I found to be interesting but objectively dubious. **6...Nxc3**
An excellent practical decision; Black contents himself with a small advantage. Robin told me afterward that he had previously chosen 6...dxc3 and lost to Graham Keene.
[6...dxc3?! In a practical situation I would not try this greedy approach, which calls for careful, computer−precise defense. 7.Bxf7+ Kxf7 8.Qd5+→ Ke8 9.Re1 d6 10.Rxe4+↑ Be7 11.Bg5 Kf8 12.Rae1↻

White's game is superbly developed and aggressive; for the price of one sacrificed piece, he renders Black unable to castle, to co−ordinate his pieces, and to dream of any future. Of course a chess engine like Rybka 4 could survive (−+ 0.66 is the evaluation), but a human is being strangled here. Bf6 13.bxc3⩲]

7.bxc3 Be7 8.cxd4 d5 9.Bb5 Bd7 10.Rb1 (39 minutes remaining) **10...0−0** (48) **11.Bxc6 bxc6 12.Ne5 Bd6∓ 13.Rb3!? f6 14.Nxd7 Qxd7 15.Rh3 Rfe8 16.c4! dxc4! 17.Qc2 g6 18.Qxc4+ Qe6 19.Rc3 Qxc4 20.Rxc4** (9.45) **20...Re2!** (19.28) **⩽21.a4?!**

I was surprised by Black's excellent winning plan: to invade with the heavy pieces and target the a−♙.

[⩲21.a3 Only immediately after my mistake did I realize that this was more logical. I would like Black's bishop off the board; so long as it solidly controls so many squares, my rooks' counterplay is reduced to nothing sufficiently compensating for the pawn. Therefore, if he wants my a−pawn, Black will have to exchange my passive bishop for the miracle−worker on d6. With my rooks hitting c6, c7 and then the 7th rank, the drawing margin is greatly increased. Re4 22.f3 Re2 23.Rxc6 Kf7∓ Consequently Black must settle for material equality, and superior forces.]

21...Ra2 22.Be3 Rb8 23.Rfc1 Rb3 24.g3 Rba3 25.Rxc6 Rxa4∓ ⩽26.Rxc7!? I was becoming desperate, and seeked counterplay at whatever cost. In principle a good endgame technique, but a more concrete move could have followed that same philosophy...♗f4!

[⩲26.Bf4!

B) 26...Bxf4 27.gxf4 Ra1 28.Rxa1 Rxa1+ 29.Kg2 Ra4 30.Rxc7 Rxd4 31.Rxa7 Rxf4 32.Kg3∓]

26...Bxc7 27.Rxc7 g5 28.d5 Ra1+ 29.Kg2 Rd1 30.Rxa7 (0.15)

[⩽30.Bxa7?? I considered this, and understood that it is obviously better to keep my active rook, but I instinctively ignored this good principle! My tactical intuition served me well; this blunder would be crushed by an annoying checkmating net... g4! General endgame tip: When fighting with pieces against a rook (♗+♘ v ♖, or ♗ v ♖), keeping a pair of rooks complements the piece and makes the rook duo fulfill the same duties. g4! 31.h3 h5 32.Be3 Raa1 33.Rc8+ Kf7 34.Rc7+ Kg6 35.hxg4 hxg4 36.f3 Ra2+ 37.Bf2 Rdd2 38.fxg4 Rxf2+−+]

30...Rxa7 (8.50) **31.Bxa7 Rxd5−+ 32.g4 Kf7 33.Kg3 Ke6 34.h4 Rd3+ 35.Be3 h6 36.hxg5 hxg5 37.Kf3 Ke5 38.Ke2 Ra3 39.Kf3 Kd5 40.Ke2** (4.25) I stopped recording. **40...Ra2+−+** (11.17) Later I had (1.04) against Black's (2.20): the position was [W to play] ♔e2, Pf2, Pg4; [B] ♔e4, Pf4, Pf6. Black offered a draw in the drawn pawn endgame. Between the end−of−notation position (you see here) and the final game position, Black had used up much

of his time thinking up an attacking method of making progress. This kind of winning endgame is very subtle; the nuance of zugzwang requires precise technique, for which the quickplay finish would not allow. Robin was kindly going to offer a draw because not much progress was being made, and simplified by playing ♖f4+ ♗xf4 gxf4 ♔e2 ♔e4 to reach the final position I described.

□ **Tiviakov,S.**
■ **De Vreugt,D.**
51045 Dieren 2003
[John Emms]

It seems only right to include a Tiviakov game with Be3, since he was the one player who really put this move on the map. **1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3 Nc6 5.c3 d6**
[It's also worth mentioning the move order 5...a6 6.0−0 Ba7 7.Bb3 0−0 where Black holds back with his d−pawn and can consider meeting 8.Be3 with *(* if White wishes to avoid this possibility, he can play *8.h3* intending 9 Be3 only after *d6)* 8...d5!? . For example, 9.exd5 Nxd5 10.Bxa7 Rxa7 11.Re1 Nf4 12.d4 exd4 13.cxd4 Bg4 , as played in S. Zagrebelny−A.Aleksandrov, Moscow 2004.]
6.Bb3 a6 7.0−0 Ba7 8.Be3
With this move order, if White wants to play Be3 there's no reason to hesitate. As we see in this game and in some sub−variations, White might not have to play h3 at all. **8...0−0 9.Nbd2 Ne7**
This typical knight move has been Black's most popular choice, but it does allow White to carry out his intended plan. In particular, White can now play Nh4 without worrying about ...Nxe4 tactics. Let's look at some alternatives in this position:
[9...Bxe3 10.fxe3 reaches a structure similar to the previous game, with White having an open−file for his rook. As I mentioned there, these positions are usually easier for White to play, because his plans − usually involving action on the kingside − are more obvious. An example: Na5 11.Bc2 c5 12.Qe1 Nh5 13.a3!? g6 14.b4 Nc6 15.Bb3 Ng7 16.Bd5 *(16.d4!?)* 16...cxb4 17.axb4 Be6 18.Nc4 with a bit of pressure, F.Vallejo Pons−A.Shirov, Dos Hermanas 2008.]
[9...Be6 is solid, but 10.Bxe6 fxe6 11.Bxa7 Rxa7 12.Qb3 Qe7 13.d4 still offers White chances of an advantage. The structure is reversed from the previous note; this time Black possesses the open f−file. However, White has been able to advance in the centre and activate his queen, and furthermore Black's rook on a7 is misplaced − all of this makes a difference. S.Tiviakov−H.Jonkman, Santo Domingo 2002,continued Nd7 14.a4 a5 15.Qb5 Qf6 16.d5 with an edge for White.]
[Black's best move might well be 9...h6! . This prepares ...Re8 and, if White does nothing, ...d5.

A) . The problem for White is that 10.Nh4? is met simply by Nxe4! .;
B) . Typical play from here is 10.h3 Re8 and now:
B1) 11.Nh4!? can be met by Na5! *(*if *11...Nxe4?* White has *12.Qh5!)* 12.Bc2? *(12.Qf3!* is best *)* 12...Nxe4! .;
B2) . Tiviakov has played 11.Re1 Bxe3! 12.fxe3!? , but of course the rook is not ideally placed on e1 here.;
B3) 11.Bxa7 Rxa7 12.Re1 Ne7 13.d4 Ng6 14.Nc4 Be6 15.dxe5 Bxc4 16.Bxc4 Nxe5 17.Nxe5 dxe5 18.Qb3 Qe7 19.a4 c6 20.a5 Raa8 with an equal position, R. Felgaer−A.Onischuk, Buenos Aires 2005. −−− In summary, 9...h6! is a very solid option which seems to promise Black a position with level chances.;
B4) 11.−−;
C) 10.−−]

10.Nh4! So simple! White plans Bxa7 followed by f2−f4, after which the position will resemble a King's Gambit Declined − and a good version for White − rather than an Italian Game.
[Tiviakov has noted that the move order 10.Bxa7 Rxa7 11.Nh4 allows Black the possibility of g5 preventing f4. Still, even this position looks quite promising for White after 12.Qf3! Nd7 *(*Black must avoid *12...gxh4 13.Qxf6 Ng6?! 14.Bxf7+!)* 13.Nf5 *(*and White should probably avoid *13.Qe3 gxh4! 14.Qxa7 Nb6!)* 13...Nxf5 14.exf5 .]

10...c6?! This looks a bit slow and it does nothing to challenge White's basic plan. Let's consider alternatives:
[10...Ng6 11.Nxg6 hxg6 12.Bxa7 Rxa7 13.f4 c6 transposes to the main game, and this was actually the move order adopted in both games in the note to White's 14th move.]
[With f4 coming, 10...Be6 in order to relieve some of the pressure against f7 looks sensible. Even so, White still keeps an edge with 11.Bxa7 Rxa7 12.f4 , and he gradually built up some pressure on the kingside after exf4 13.Rxf4 d5 14.d4 c5 15.e5 Nd7 16.Bc2 in Z.Efimenko−B.Avrukh, Saint Vincent 2005.]
[10...Bg4!? 11.Qe1! is not even a minor inconvenience, unless Black continues with Nh5! to prevent f4. B. Michiels−P.Vandevoort, Pays de Charleroi 2003, continued 12.h3 Be6 13.Qd1 *(*perhaps *13.Bxe6 fxe6 14.Bxa7 Rxa7 15.g3 Ra8 16.Qe2 Nf6 17.Kh2* and slowly building for f4, à la Karpov−Yusupov *)* 13...Nf4 *(*Black is close to equality after *13...Ng6! 14.Nxg6 Bxb3 15.Qxb3 hxg6 16.d4 Rb8)* 14.Bxf4! exf4 15.Qf3 Bxb3 16.axb3 Ng6 17.Nxg6 fxg6 18.Qg4 Qf6 19.Nf3 Rae8 20.Rfe1 c6 21.b4 Re7 22.Re2 Rfe8 23.Rae1 with an edge − d4 and e5 will eventually arrive.]
[There's still time to play 10...Bxe3 here: 11.fxe3 Kh8 *(*or *11...Ng6 12.Nf5 c6 13.d4 d5 14.Qf3 Be6 15.Rae1* with a small advantage for White, D.Barua−K.Sasikiran, Nagpur 2002 *)* 12.h3 Neg8 13.Qe1 g6 14.g4!? Qe7 15.Qg3 Ne8 16.Rf2 Ng7 17.Raf1 Be6 18.d4 Rae8 19.Nhf3 f6 , as played in I. Khamrakulov−A.Rizouk, Lorca 2005,

demonstrates good defence by Black. White enjoys more freedom, but Black's position is difficult to break down.]

11.Bxa7! Rxa7 12.f4! Of course! I definitely prefer White's chances here.

12...Ng6 13.Nxg6 hxg6 14.fxe5

[It's possible that 14.Qf3 might be even stronger. What is certainly true is that it has led to three easy wins for White. Strangely (and promisingly from our perspective!), in all three games Black fell for the same trap: Qb6+ *(* this plan is flawed; Simon Williams' suggestion of *14...b5* offering protection to f7 would have been wiser *)* 15.Kh1 Bg4 16.Qg3! Be2? (intending ...Nh5 after rook moves, but...) 17.fxe5! Bxf1 *(* or *17...dxe5 18.Rxf6! gxf6 19.Qxg6+ Kh8 20.Qxf6+ Kg8 21.Re1 Qe3 22.Nc4 Qxd3 23.Nxe5* and 1−0, V. Sikula−M.Hrenic, Latschach 2006 *)* 18.exf6 Bxg2+ *(* Black chose to suffer less in W.Hendriks−D.Ledger, Hastings 2008/09, with *18...Be2 19.Qxg6 Qxb3 20.Qxg7#)* 19.Kxg2 d5 20.fxg7 Re8 21.Rf1 and White soon won in D.Sadvakasov−H. Melkumyan, Dubai 2007.]

14...dxe5 15.Nf3 Bg4!

[If 15...Qe7 , 16.Ng5 planning Qe1−h4 looks promising for White.]

16.Qe1 Nd7? This is a blunder.

[Black would still be fighting after 16...Bxf3 17.Rxf3 a5! intending 18.Qg3?! a4! .]

17.Qg3! Bxf3 18.Rxf3 The pressure against f7, g6 and e5 is too much to handle, and Black loses a pawn by force.

18...Nc5 19.Bxf7+! Rxf7 20.Rxf7 Kxf7 21.Qf2+

[Resignation is a bit premature, but perhaps De Vreugt didn't wish to experience Tiviakov's renowned technique. After 21.Qf2+ Kg8 22.Qxc5 Ra8 23.d4 White should win in the long run.]

□ **Degraeve,J.**
■ **Dorfman,J.**
French League 2007
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6
[The move order 5...d6 6.Bb3 a6 is just as likely.]
6.Bb3 d6 Black forgoes the possibility of ...d5 in one move, but commits neither his king nor his dark−squared bishop. There are many possibilities for transpositions into lines we've already covered, since Black often plays ...Ba7 at some point. Here I'll focus mainly on lines where Black delays or avoids this move. **7.Nbd2**
[Naturally White can play 7.h3 (or 7 0−0 of course), with a likely transposition to main lines, but here he decides to play the Nd2−f1−g3 manoeuvre as quickly as possible.]
7...0−0
[7...Ba7 transposes to the note to Black's 7th move in Emms−Flear.]
8.Nf1!? A bold move, inviting Black to play ...Ng4. If he doesn't, White will just carry on with Ng3 and there may be some advantages to delaying h2−h3.
8...d5 As we've seen before on more than one occasion, this is the natural response to Nf1. Alternatively:
[The critical continuation is 8...Ng4!? 9.d4!? *(9.Ne3 Nxe3 10.Bxe3* is just equal *)* 9...exd4 10.cxd4 and now:
A) 10...Nxd4!? is dangerous and unclear, but White has good chances to emerge unscathed and with some advantage: 11.Nxd4

Qh4 *(*or *11...Re8 12.Ne3 Rxe4 13.Nf3 Bxe3 14.fxe3 Nxe3 15.Bxe3 Rxe3+ 16.Kf2)* 12.Ng3 Qf6 13.Be3 Nxe3 14.fxe3 Bb4+ 15.Ke2 Bg4+ 16.Nf3 Qxb2+ 17.Qc2 etc;

B) 10...Bb4+ 11.Bd2 Re8 *(*or *11...Qe7 12.Ng3 Nf6 13.Bxb4 Nxb4 14.0−0 Bg4 15.h3 Bxf3 16.Qxf3* with a clear plus for White, G.Sax−F.Berkes, Hungarian League 2003 *)* 12.Ng3 Bxd2+ 13.Qxd2 Nf6 *(*or *13...d5 14.e5 f6 15.h3 Nh6 16.0−0−0!?)* 14.0−0! (9 d4 would be totally unplayable without this resource) Nxe4 (otherwise White's centre gives him an edge) 15.Nxe4 Rxe4 16.Bxf7+! Kh8 17.Rfe1 *(17.d5!* intending *Ne5 18.Ng5 Rg4 19.f4* looks even more promising *)* 17...Rxe1+ 18.Rxe1 Bd7 19.d5 with an obvious advantage for White, G.Zentai−K.Valko, Hungarian League 2003. −−− 8... Ng4 9 d4 has had little practical testing so far, so it's difficult to make a definitive assessment. The signs are looking quite promising for White, though. And as a back up, there's always 7 h3!;

C) 10...−−]

[8...Be6 9.Ng3 *(9.Bg5!?)* 9...h6 and now:

A) 10.h3 d5 11.Qe2 Re8 12.Nh2!? Qd7 13.Qf3 is similar to positions we've seen before, but here Black can utilize the fact that his dark−squared bishop isn't committed to a7 − it might instead drop back to defend on the kingside. For example, Rad8 *(13...a5!?)* 14.Bc2 b5 15.0−0 Be7!? 16.Re1 Nh7 and Black was solidly placed in M.Kobalija−E.Inarkiev, Ramenskoe 2006.;

B) 10.0−0 Ba7 11.h3 *(11.Bc2!?)* 11...d5 12.Qe2 dxe4 *(12...Re8* transposes to the note on 10...Re8 in Tiviakov−Buhmann *)* 13.dxe4 Bxb3 14.axb3 Qd6 *(14...Qd7 15.Nf5 Kh7* , as in I. Nepomniachtchi−Z.Almasi, Dresden 2007, looks safer, and Black was just about holding his own after *16.Rd1 Qe6 17.Bg5! Rad8 18.b4 Bb6!)* 15.Nf5 Qe6 , and here 16.Bxh6!? is interesting: gxh6 17.Nxh6+ Kh8 18.Ng5 Qe8 19.Qf3 Nh7 20.Qh5 f6 21.Nhf7+ Rxf7 22.Nxf7+ Kg7 23.Qh6+ Kxf7 24.Qxh7+ Ke6 25.Qxc7 and White was on top in L.Ruan−Y. Shen, Beijing 2009. Black might have better ways to defend here, but it seems wise not to allow this sacrifice.;

C) 10.−−]

9.exd5!? Chess is no t an easy game! I freely admit that previously I've questioned the strategy of combining the Nd2−f1−g3 manoeuvre with exd5. Maybe I'll try to justify this as the exception which proves the rule. Or maybe White's case is helped by the fact that, with the omission of h2−h3, his development is a bit quicker than usual.

[9.Qe2 Be6 is similar to 8...Be6 above.]

9...Nxd5 10.Ng3 Nf6 There are some decent alternatives for Black here:

[10...f6 followed by ... Be6 and ...Kh8 is what I've suggested for Black in similar positions. In this particular

situation, though, White has just enough time after 11.0−0 Be6 to get in the desirable *(*if *11...Kh8* , White should play *12.Re1* discouraging ...Be6 in view of d3−d4 *)* 12.Be3! . This makes at least some difference: Be7!? *(12...Ba7?! 13.Bxa7! Rxa7 14.d4 exd4 15.Nxd4* is the kind of position that Black must avoid*;* or *12...Bxe3 13.fxe3 Kh8 14.Qd2* and White will push with d4 *)* 13.d4! Kh8 14.dxe5 Nxe3 15.fxe3 Qxd1 16.Raxd1 Bxb3 17.axb3 Bc5 18.Kf2 Rae8 *(18...Nxe5 19.Nxe5 fxe5+ 20.Ke2* is better for White; his king is well placed and the knight will come to e4 *)* 19.b4 Bb6 20.Rd5 Ne7 *(*or *20...Nxe5 21.Nxe5 Rxe5 22.Rxe5 fxe5+ 23.Ke2 Rxf1 24.Nxf1* followed by Kd3−e4 *)* 21.Rd7 Ng6 22.c4 fxe5 (V.Malakhov−V.Georgiev, Solin 2006) and now 23.Ke2 e4 24.Ng5 Rxf1 25.Nxf1 would have kept an advantage.]

[10...h6 11.0−0 Re8 *(11...Nf6* transposes to the main game *)* 12.Ne4!? Be7! *(*if *12...Bf8;* or *12...Ba7* you have to remember the standard trick *13.Bxh6!)* 13.Re1 Be6 14.Ng3 *(*White could consider *14.h3!?* and if *Qd7* then *15.Ng3 Bd6 16.Nh5!?* and possibly d3−d4 *)* 14...Bc5 was equal in S.Kudrin−M. Khachiyan, Las Vegas 2006.]

[10...Nf4 11.Bxf4 exf4 12.Ne4 Be7 *(*after *12...Bb6 13.0−0* the bishop is once again in danger of being blocked out by d4 *)* 13.0−0 Bg4 14.d4 planning Qd3. White's strong centre promises him an edge here.]

11.0−0 h6

[Preparing ...Re8, which at the moment, 11...Re8 , would be strongly met by 12.Ng5! .]

12.Be3! Again we see this move, and it's the only one here which allows White to fight for an advantage. Black must make some kind of concession. Either he must spend time safeguarding his bishop or, as chosen in the game, exchange on e3 thereby strengthening White's pawn structure and opening the f−file.

12...Bxe3

[If 12...Bd6 , 13.Nh4!? aims for f2−f4 − White doesn't always have to play Re1! This plan worked to perfection in T.Gharamian−D.Marholev, La Fere 2008: Bg4 *(13...Re8!?)* 14.Qd2! (lining up Bxh6 possibilities) Ne4?! *(14...Na5 15.Bc2 Re8 16.Nhf5 Bf8 17.b4* , with an edge for White *)* 15.Nxe4 Qxh4 16.f4! Ne7? 17.Nxd6 cxd6 18.fxe5 dxe5 19.Bc5 Rae8 20.Rae1 Qh5 21.d4 , when Black was tied up in knots and saw no reason to continue the struggle. Admittedly this was poor defence by Black, but even so White's plan looks promising.]

13.fxe3 Re8 14.Nh4! I prefer White here. At the very least his position is the easier to play. **14...Be6 15.Nhf5 Bxb3 16.Qxb3 Re6!**

[16...Qxd3 17.Nxh6+ is good for White.]

[There's not enough time for 16...Rb8? , which is met by 17.Nxg7! Kxg7 18.Rxf6! Kxf6 *(*or *18...Qxf6 19.Nh5+)* 19.Rf1+ Kg7 20.Qxf7+ Kh8 21.Rf6 , winning.]

17.Qxb7!? Bold play by Degraeve, and he is instantly rewarded. **17...Ra7?** This looks like a critical mistake. True, Black regains his pawn, but only at a

cost of losing coordination.
[If 17...Rb8 18.Qxa6 and Black doesn't have an effective discovered attack against the queen.]
[Or 17...g6 18.Nxh6+ Kg7 19.Nxf7! Kxf7 20.Ne4 , and White threatens Ng5+.]
[However, after 17...Kh7! preparing ... g6 the position is still very unclear.]
18.Qb3 Qxd3 19.Rad1 Qb5 20.Qc2! White certainly isn't about to ease Black's position by exchanging queens.
20...Rb7?
[Black had to play 20...Qc4 preventing White's next move.]
21.Ne4! Threatening 22 Nxh6+. **21...Ne8**
[If 21...Nxe4 22.Qxe4 and Rd7 is coming. Black's can't play Qxb2 because of 23.Rb1 .]
22.Qf2! Again the threat is 23 Nxh6+. Black tries to prevent it with... **22...Kh7**
23.Nxh6! ...but it happens anyway!
[Dorfman resigned in view of the following lines: 23.Nxh6 Kxh6 *(* or *23...gxh6 24.Qxf7+ Ng7 25.Rd7 Rg6 26.Nf6+;* or, finally, *23...Rxh6 24.Ng5+ Kh8 25.Qxf7* with mate to follow *)* 24.Qh4+ Kg6 25.g4 (threatening mate on h5) Nf6 26.Rf5 Nxe4 27.Qh5# .]

4 Escaldes 2017

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5 7.Bb5 Ne4

8.cxd4 Bb6 9.Nc3
[As mentioned earlier, if you want to prevent ...Bg4 you can play 9.h3 .]
9...0−0 10.Be3 Bg4! As we've already seen on numerous occasions, this pin can be a powerful weapon. **11.h3! Bh5**
[White's idea is to meet 11...Bxf3 with 12.gxf3! (so that the queen remains defending the d4−pawn) Nxc3 13.bxc3 with a very interesting position. White's kingside pawns would be broken and the g−file half−open. This is why White delayed castling kingside and played other developing moves first, such as 9 Nc3 and 10 Be3. White's king would be fairly safe behind the wall of centre pawns, and White could try to use the open g−file himself to attack the black king.]
12.Qc2 Bg6 Black threatens a discovered attack, so the queen moves again. **13.Qb3 Ne7 14.0−0 c6 15.Bd3 Nf5** The tension is building. **16.Rfe1**
[White could grab a pawn here with 16.Nxe4 dxe4 17.Bxe4 , but Black would win it back straightaway with Nxd4 18.Bxd4 Bxe4! . Instead White brings a rook into action, and then finally we have a sequence of captures.]
16...Nxe3 17.Rxe3 Nxc3 18.Bxg6 hxg6
[18...Nb5 is perhaps wiser, when the chances are equal. 19.Bc2! then sets a trap. Black shouldn't take the d−pawn because he gets forked at the end. For example, Nxd4 20.Nxd4 Bxd4 21.Qd3! , when the queen threatens both the bishop and the pawn on h7 with checkmate!]
19.bxc3! A good move - now the pawn on d4 is far more secure. **19...Qe7 20.Rae1 Rfe8** At some moment White will want to advance the e5−pawn, to try to open the e−file for his rooks. In the game White prepares the advance so that it comes with maximum effect. Meanwhile, Black prepares the pawn move ...c5, to open lines for his bishop. **21.h4 Rad8 22.g3 c5 23.Kg2 Qd7 24.Qb1!** The queen goes to an effective square, where she points towards Black's kingside. **24...Qg4**
[24...Qf5 , offering the exchange of queens, was wiser.]
25.e6! White has manoeuvred his pieces skilfully, and now this pawn advance comes with some force. **25...Rxe6 26.Rxe6 fxe6 27.Re5!!** . After this brilliant move, the game came to a sudden end, with Black deciding to resign! He did so because the black queen has no safe squares to go to, and White is going to trap it next move with Nh2!.
[The only possible way to avoid the queen being trapped is by playing 27.Re5 g5 , so that the queen could escape to h5, but then White can win in a number of ways. The most decisive is 28.Qg6! ; for example, Rf8 29.Nxg5 (threatening Qh7 mate) Rf6 30.Qh7+ Kf8 31.Qh8+ Ke7 32.Qxg7+ Kd6 33.Qxf6 and Black, a rook down, will soon be checkmated. POINTS TO REMEMBER: 1) The pawn push 6 e5 is a recommended alternative to 6 cxd4, and a tricky move for Black to meet. 2) White should answer 6...Ne4?! with 7 Bd5!, which traps the knight in the middle of the board. Black can defend the knight with 7...f5, but only at the cost

of exposing the king. 3) Black's best response to 6 e5 is the counterattack 6...d5!, which leads to a position with equal chances.]

□ **Gazikova,V.**
■ **Wu Min**
2: World Girls' U−18 2016
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5
10.Qb3 Castling kingside is obviously a good move too, but 10 Qb3 keeps up the pressure by creating new threats. White threatens the knight on d5, and the knight cannot move because that would allow Bxf7+. Again we see ideas involving Black's weak point on f7. NOTE: Another benefit of playing 4 c3 is that it allows the queen to move to b3, where it teams up with the bishop on c4.
10...Na5 Black meets the threat with a counterattack on White's queen.
[10...Be6 defends the knight but now the b7−pawn is unprotected and White could grab it with 11.Qxb7 . Black could react with Ndb4! , which threatens to trap White's queen with ...Rb8 and also a fork with ...Nc2+. White responds with 12.Bb5! reaching a very complicated position where both sides are making threats.]
[10...Nce7 , supporting one knight with the other, is another good choice for Black. Both sides will castle and the chances are equal.]
11.Qa4+! White's queen forks the king and the knight, but Black can escape the threats. **11...Nc6! 12.Bb5**
The bishop attacks the knight on c6 for a second time and creates another threat.
[NOTE: 12.Qb3 would reach the same position as we had after 10 Qb3. If the game continued Na5 13.Qa4+ Nc6 14.Qb3 , the same position would arise for the third time and it could result in the game being drawn by the threefold repetition rule. When playing with the black pieces, you can avoid the repetition of moves by choosing to protect the knight with 10...Nce7 or 10...Be6.]
12...Bd7! Black calmly defends and unpins the knight. In the next few moves both sides continue to activate their pieces while creating some threats.
13.0−0 0−0 14.Qb3 Nb6 15.Ne4 Ne7 16.Bd3 Be6 17.Qc2 Once again, White lines up the queen and the bishop on the same diagonal. When the knight moves from e4, the bishop will be threatening to take the pawn on h7. Black defends against this idea by moving the pawn forward. NOTE: When two or more pieces combine to attack along the same file or diagonal, it's sometimes called a battery. This is an example of a queen and bishop battery.
17...h6 18.Nc5! The knight is well placed on this square. It's situated on an advanced central position, is protected by one of its own pawns and threatens to take the pawn on b7. **18...Bd5!** Black's bishop is also strongly placed. It defends the b7−pawn and attacks White's knight on f3. **19.Be4** Getting rid

of your opponent's most active pieces is usually a good idea, and here White decides to offer an exchange of bishops. Nxb7 is again threatened, so Black defends the pawn. **19...Rb8 20.Rfe1! Nd7 21.Rac1!** White's last two moves were both smart choices. Rooks love open files, so putting the rooks on e1 and c1 is a very natural thing to do. All of White's pieces are active and working well as a team. **21...c6 22.Bxd5 Nxd5?** EXERCISE: Here Gazikova played a small combination which won a pawn. Can you work out what she did?

[22...cxd5! would have prevented White's next move.]

ANSWER: **23.Nxb7! Nb4**

[After 23...Rxb7 24.Qxc6! the queen threatens the rook on b7 and the knight on d5. Following Rxb2 25.Qxd5 , White regains the piece and is a pawn ahead. In the game Black chooses not to take the knight but still ends up a pawn down. NOTE: A combination is a sequence of moves which involves at least one tactical idea. A combination may lead to a gain of material or even checkmate.]

24.Nxd8 Nxc2 25.Rxc2 Rfxd8 26.Rxc6 Rxb2 27.Rd6! The tactical themes continue. This pin on the knight is awkward for Black. **27...Rbb8 28.g3!** This pawn move gives the king an escape square on g2 and so prevents any future back−rank mate problems. **28...Kf8 29.Rc1 Ke7 30.Rd5 Ke6 31.Ra5 Rb7 32.Re1+ Kf6 33.Rd5! Rbb8?** Black fails to spot White's idea.

[The best option was 33...g6 , to give the king a safe escape square on g7.]

34.Rd6+! Black's king is forced up the board, where it will be exposed to all sorts of checks and has little chance of surviving. **34...Kf5 35.Nh4+! Kg4**

[One possible finish is 35...Kg5 36.Rd5+ Kf6 37.Rf5# mate!]

36.Kg2 Rb5 37.Re7! Excellent play to the end. White continues to combine threats against Black's pieces with threats to surround and checkmate the black king. **37...g5 38.h3+ Kh5 39.g4+!** Black resigned.

[The only move is 39.g4+! Kxh4 , but then 40.Rxh6# is checkmate. Gazikova played skilfully in this game. She activated and coordinated her pieces, put her opponent under pressure by creating many threats and took her chances when they arose. POINTS TO REMEMBER: 1) 4 c3! followed by d2−d4 is a more exciting way for White to play the Italian Game. 2) As Black, you should play 4...Nf6! to attack the e4−pawn, exchange on d4, and then check with the bishop on b4. By doing this, you don't lose time and can strike in the centre with 8... d5!. 3) The positions after 8...d5 are quite open, with both sides able to move their pieces freely.]

□ **Emms,J.**

■ **Ledger,D.**

British League (4NCL) 2006

[John Emms]

This game highlights a problem that Black often encounters in this line: how does he create meaningful counterplay? My opponent plays quite imaginatively on the queenside, but he still finds it very difficult to do anything constructive. In contrast, White's moves on the kingside didn't seem to require too much thought. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.Nbd2 0−0 8.h3 Ba7 9.Nf1 d5 10.Qe2 Qd6** Black adds support to e5 in preparation for his next move. **11.Ng3 Na5**

[11...Be6 is certainly possible, but perhaps it makes more sense to play it a move earlier without the queen committed to d6 (see the next game). Now:

A) 12.Nh4 dxe4 13.dxe4 Bxb3 14.axb3 Qe6 transposes to the note to White's 13th move in Tiviakov−Sargissian.;

B) 12.Ng5!? Ne7 13.0−0 Ng6 *(13...Bd7!?)* 14.Nh5 Nd7 15.Nxe6 fxe6 16.Be3 Nf6 17.Nxf6+ Rxf6 18.Bxa7 Rxa7 19.g3 c6 20.d4 looked a touch better for White in B. Macieja−P.Acs, Budapest 1996.;

C) 12.0−0 h6 13.Nh4 dxe4 14.dxe4 Ne7! *(14...Bxb3 15.Ngf5!?* is interesting, planning to answer *Qe6 16.axb3 Qxb3?* with *17.Qf3* with threats on h6 *)* 15.Qf3 Kh7 16.Nhf5 Nxf5 17.Nxf5 Bxf5 18.Qxf5+ g6 19.Qf3 Kg7

and Black has equalized, I.Brandis−S.Vajda, Sovata 1998.;

D) 12.−−]

[11...d4 is another reasonable idea for Black, although not many players have been willing to alter the tension in this way. One of Black's ideas is to play ...dxc3 in combination with ...b5−b4 to gain control of d4, but this plan is not easy to carry out if White plays with purpose: 12.0−0 Be6 13.Nh4 (again this idea suggests itself as the most dangerous) Ne7 14.Bg5 Ne8 15.cxd4!? Bxd4 16.Bxe7! Qxe7 17.Nhf5 Qd7 18.Bxe6 fxe6 *(*or *18...Qxe6 19.Nxd4 exd4 20.Nf5)* 19.Nxd4 Qxd4 20.Qc2 and White enjoyed a slight edge in B.Macieja−I. Sokolov, Elista Olympiad 1998 − Black's pawn weaknesses are more serious than White's.]

12.Bc2 dxe4

[Golubev suggests 12...d4!? here, and this is certainly a worthwhile idea. After 13.0−0 White's plan is similar to the one employed after 11...d4.]

13.dxe4 Bd7! This is the point of Black's previous play. With the knight vacating c6, Black gains the possibility of doing some damage with ...Bb5. Should White play b3, to meet ...Bb5 with c4? This is what Rybka wants to do... **14.Nh4!** No! **14...Bb5 15.Qf3** Computers, at least initially, assess that Black is well placed here. Perhaps they are taking into consideration the fact that White is unable to castle either side at this moment. My feeling, though, is that White's king stuck in the centre may well be safer than Black's king tucked behind those three kingside pawns, at least in human vs. human battles!

15...Rfe8? Perhaps the main problem for Black is not the assessment of the position, but rather the fact that it's more difficult for him to handle. After just one seemingly natural move by Black, the computers begin to acknowledge White's attacking potential.

[15...Qe6! pre−empts Nf5 ideas and, although I prefer White, there's everything still to play for.]

16.Nhf5 Qf8

[The problem with 16...Qe6 here is that 17.Bg5! threatens 18 Nxg7 Kxg7 19 Bxf6+ Qxf6 20 Nh5+, and also exploits a downside to 15... Rfe8 − the f6−knight no longer has e8 available. Against Nd7? I had planned 18.Nh5! , which exploits another drawback to Black's rook move!]

17.h4! This move creates a major threat, and it also introduces h5−h6 ideas.

[I had analysed the immediate 17.Nxg7 Qxg7 18.Nf5 , but couldn't find a follow up after Qg6 . With a pawn on h4 instead of h3, though, White could win here by playing h5.]

17...Re6? Initially this move seems to discourage Nxg7 because it appears to give Black a second option of capturing on g7, with the king. However, this proves to be worse than capturing with the queen!

[17...Kh8! was the only decent way to meet White's threat. The point behind the king move is that 18.Nxg7 *(*instead I had planned to keep up the pressure with *18.h5)* 18...Qxg7 19.Nf5 Qg6 20.h5 Qg4 no longer works for White because it's not check on h6.]

18.Nxg7! Kxg7
[18...Qxg7 is more resilient but still winning for White: 19.Nf5 Qg6 *(19...Qf8* is met by *20.Bh6;* or *19...Qh8 20.Bh6* with the point that *Ne8 21.Qg3+ Rg6* allows *22.Ne7#)* 20.h5 . Here Nxh5 *(20...Qg4 21.Nh6+* wins the queen *)* 21.Rxh5 is hopeless for Black in the long run.]
19.Bh6+!
[David Ledger looked a bit shocked when I played this move, which either wins the queen or forces mate. Perhaps he had been expecting 19.Nf5+? Kh8 . Sportingly, he allowed me to execute the mate.]
19...Kxh6 20.Nf5+ Kg6 21.Qg3+ Kh5 22.Qg5#
1−0

GER Cup−20 1968/69 Daehne Pokal (3)
[Oechslein,Rainer]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Der mit diesem Zug angestrebte Aufbau hat sich als die wirkungsvollste Waffe gegen die Drachenvariante erwiesen. **6...Bb4+ 7.Nbd2**

[7.Bd2]

[7.Nc3]

7...Nxe4

[7...d5!? gibt dem Nachziehenden bessere Chancen. 8.exd5 Nxd5! 9.0−0 *(9.Qe2+ Be7 10.0−0 0−0 11.Bb5 Ndb4 12.a3 Nc2 13.Bxc6 bxc6 14.Ra2 Be6 15.b3 Nxd4 16.Nxd4 Qxd4 17.Rc2 Bd6 18.Nc4 Bd5 19.Bb2 Qe4)* 9...0−0

A) 10.h3 Bf5 *(10...Be6; 10...Nb6 11.Bd3 Nxd4 12.Nxd4 Qxd4 13.Nf3)* 11.a3 Be7 12.Re1 Bg6 13.Ne4 Nf6 14.Nc3 Bh5 15.g4 Bg6 16.Bf4 a6 17.b4 a5 18.b5 Na7 19.Ne5;

B) 10.a3

B1) 10...Bxd2 11.Bxd2 Nb6 *(11...Bg4 12.h3 Bxf3 13.Qxf3 Nb6 14.Bd3 Qxd4 15.Bc3 Qh4 16.Rfe1)* 12.Bg5 Qd6 13.Ba2 Be6 14.Bxe6 Qxe6 15.Bf4 Qd7 16.Rc1 Rfe8 17.Bg3 Rad8 18.Rc5 Re7;

B2) 10...Be7 mit gleichem Spiel. 11.Re1 Be6 12.Ba2 Nf4 13.Nc4! Ng6 14.Be3 Bf6 15.Qd3 Bd5! ebenfalls mit ungefähr gleichen Chancen. 16.Ncd2 Bxa2 17.Rxa2 Qd5 18.Raa1 Rad8 mit Vorteil für Weiß. 19.Ne4 Bxd4 20.Rad1 Nge5 21.Nxe5 Qxe5 22.Ng5 g6 23.Nf3 Qh5 24.Bxd4 Nxd4 25.Nxd4 c5 26.Qe4 Rxd4 27.Rxd4 cxd4 28.Qxd4 Qa5]

8.d5 Ne7 9.0−0 Nxd2

Diesen Damenausfall hält man für die präziseste Fortsetzung.

[Jetzt ergibt 9...Bxd2 ein verlorenes Endspiel: 10.Nxd2 Nxd2 11.Bxd2 d6

12.Re1 0−0 13.Qh5 Ng6 14.Bd3 Bd7? 15.Re4 *(15.Rac1; 15.Bc3)* 15...Re8 16.Bg5 Qc8 17.Rh4! In der erwähnten Partie Dueball − Mistra geschah schwächer: h6 18.Bxh6! Re5 19.Bg5 und Weiß gewann schließlich den Bd6 und damit auch die Partie. Rxg5? 20.Qxg5 Nxh4 21.Qxh4 Bf5 22.Qc4 Bxd3 23.Qxd3 Qd7 24.h3 Re8? 25.Rc1 c5]

10.Bxd2 Bxd2 Mit diesem von Parma eingeführten Verteidigungssystem leitet Schwarz gegen den weißen Königsangriff (mit h2−h4−h5 und Le3−h6) einen Gegenangriff auf der c−Linie ein. Diese Aufstellung ist im Augenblick Gegenstand zahlreicher (friedlicher) Auseinandersetzungen. **11.d6**

[11.Qxd2 d6 12.Rfe1 0−0]

11...cxd6

[11...Bb4? 12.Ng5 cxd6 13.Bxf7+ Kf8 14.Bb3]

12.Qxd2 d5

[12...0−0! 13.Qxd6 *(13.Rfd1 d5 14.Bxd5 d6 15.Rac1 Qb6 16.b3 Bf5 17.Bc4 Rad8 18.Qg5 Rfe8 19.Nd4 h6 20.Qg3 d5 21.Bb5 Bd7!)* 13...Nf5 nebst Dg7. Dieses Damenrückzugsmanöver wird mit dem "Bauernopfer" verhindert. Warum nicht 14.Qd3 Die folgende Variante veranschaulicht dies: d6]

13.Bxd5 Weiß verliert keine Zeit mit Kc1−b1. **13...0−0** Die Annahme des Bauernopfers hat sich als aussichtsreicher erwiesen. **14.Bb3**

[14.Rad1 Nxd5 15.Qxd5 d6 Um überhaupt noch etwas ziehen zu können, muß Schwarz seinen e−Bauern opfern: 16.b3 h6 L bel Kxe3 und die Königswanderung nach f8 ist nicht mehr zu verhindern. Damit stünde gleichzeitig fest, daß 15. Kb1! doch gut ist. *(16...Rb8 17.Qxd6* fehlt Schwarz das rettende Schachgebot. Das verlockende *Qxd6 18.Rxd6 Bg4* scheitert an *)* 17.Rfe1? Re8 Auf 18.Rxe8+ gewinnt Weiß auf schöne Weise: Qxe8 19.Re1 Qd8 *(19...Qc6)* 20.h3 *(20.Qb5)* 20...Rb8 sonst Txc2+ mit ewigem Schach 21.Nd4 Bd7 22.Rd1 Qc7 23.Nf3 Be6! nebst 28. Sg5. Vielleicht hat 24.Qxd6 Qxd6 nebst Txe7 bessere Chancen. Nach 25.Rxd6? Kf8]

14...d5!? Wegen dieses überraschendes Zwischenschach galt 14. Lh6 einige Zeit für schwach − bis Dueball bei der 15. Studenten−Mannschaftsweltmeisterschaft 1968 in Ybbs seinen tschechischen Gegner Mistra mit der folgenden Erwiderung überraschte. **15.Rfe1! a5!** Sollte mein Gegner mit diesem Zug seine eigene Erfindung widerlegen wollen?!

[15...Bg4 16.Qb4! *(16.Nd4)*

A) 16...Bxf3! Natürlich nicht 17.Rxe7? wegen *(17.Qxe7 Be4 18.Qxd8 Rfxd8 19.Rad1 Rac8)* 17...a5 nebst Matt 18.Qxb7! beendet die Auseinandersetzung ziemlich schnell: a4 19.Bxa4!! Bxg2 20.Kxg2 Rxa4;

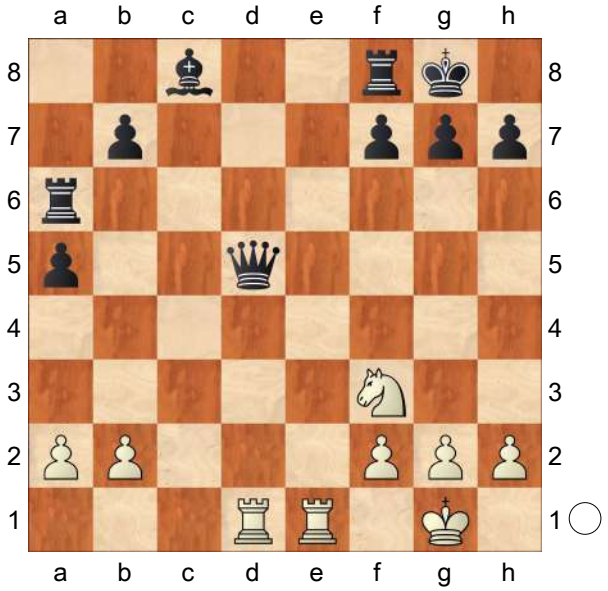
B) 16...Be6 17.Qxb7 Qd6 Es gibt keine Rettung mehr gegen das drohende Te7. *(17...a5?)* 18.Rac1 a5 19.Qb5 Dueballs Neuerung 15. Kb1! wurde doch noch "gerettet". Aber nicht g6? 20.Qe2 a4?? wegen 21.Bc2 Rfb8 22.Bd3 nebst Dxf4+ Qf4? 23.Ne5 Beide Spieler hatten hier die "einfache" Fortsetzung Rb7 24.Rc2

Rab8 25.Rd1 Qf6! übersehen.]

16.Rad1 Ra6

[16...Be6 17.Ng5 Ra6 ein letzter Versuch 18.Qd3 Ng6 19.h4]

17.Bxd5 Nxd5 18.Qxd5 Qxd5



19.Rxd5!! Be6! Wegen der Drohung 20. g5 Sh5 21. Txh5 gxh5 22. Lxf7 Kxf7 23. Dxh7+ Kf8 34. g6 erzwungen. **20.Rb5 Bxa2 21.b3**

[21.Rxb7 Bd5!]

21...a4 22.bxa4 Rxa4 23.Rxb7 Bd5 24.Rbe7 Bxf3 25.gxf3 g6 26.Re8 Rxe8 27.Rxe8+? Damit bringt sich der Anziehende um die Früchte seines mutigen Spiels. In seiner Vorausberechnung kam das Zugpaar e4/ f4 nicht vor; daher erschien es gleichgültig, ob erst Th1 oder Sf6 folgen würde. **27...Kg7! 28.Re3 Ra5 29.Re2 Ra4?** Danach ist wieder alles im Lot.

30.Re3 Ra5 31.Re2 Ra4 32.Re3

Correspondence 1976

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 d6 7.d4 Bb6!? This was Emanuel Lasker's idea and is therefore known as the Lasker Defence. Although in that case we should be able to label all kinds of minor lines, which do not deserve names of their own. **8.dxe5**

[8.a4 is an alternative, though not one that I can recommend. I am not superstitious, but Black has won all the games I have seen from here. For example:

A) 8...Nf6 9.Bb5 a6 10.Bxc6+ bxc6 11.a5 Ba7 12.Qa4 exd4 13.cxd4 Bd7 14.e5 Nd5 15.Ba3 0−0 16.Qc4 Nf4 17.Kh1 *(17.exd6* , retaining the pressure, is preferable according to Matsukevich *)* 17...Be6 18.Qc1 Nxg2 19.Kxg2 Bd5 20.Kg3 f5 21.Nbd2 f4+ 22.Kg2 Qg5+ 23.Kh1 Qh5 24.Qc3 Bxd4 and Black won in St. Petersburg−Vienna, telegraph match 1898.;

B) 8...exd4 9.cxd4 Bg4 10.Bb5 a6 11.Bxc6+ bxc6 12.a5 Ba7 13.Be3 Ne7 14.Nc3 0−0 15.Qc2 Bxf3 16.gxf3 f5 and Black was better, M.Chigorin−Em.Lasker, St. Petersburg 1897.;

C) 8...−−]

8...dxe5 9.Qb3 Others:

[9.Bxf7+? would only work in a blitz−game with three minutes or less. It certainly does not work in correspondence chess: Kxf7 10.Nxe5+ Ke8! 11.Qh5+ g6 12.Nxg6 Nf6 13.Qh6 Rg8 14.Nh4 Ne5 15.g3 Neg4 16.Qf4 Nh5 17.Qf3 Qxh4 0−1 Kopel−Grocescu, correspondence 1989.]

[9.Qxd8+ leads to an interesting endgame after Nxd8 10.Nxe5 Be6 11.Nd2 Ne7 and now we have:

A) 12.Ba3?! f6 13.Nd3 Ng6 14.Rab1 Kf7 15.Bd5 Re8 16.c4 c6 17.Bxe6+ Nxe6 and Black is at least slightly better, M.Chigorin−H. Pillsbury, London 1899.;

B) 12.a4! (best) Ng6 *(*not *12...c6?! 13.Ba3 f6 14.Nef3 Kf7 15.Nd4 Bxc4 16.Nxc4 Bc7 17.Rfd1 g6 18.Nf5!* anyway, and White was better in S.Holzner−K. Elison, correspondence 1997 *)* 13.Nxg6 hxg6 14.Ba3 Bd7 15.Bb3 Ne6 16.Rfe1 Rh5 17.Bd1 Rh4 18.Nc4 Bc5 19.Ne5 Bxa3 20.Rxa3 Nc5 21.Bc2 Be6 22.g3 Rh5 23.Nf3 0−0−0 with equality, J. Bohak−S.Holzner, correspondence 1998.;

C) 12.−−]

9...Qf6 The normal move, though not the only one. Alternatively:

[9...Qd7!? is an unusual transposition to Hansen−Stefansson in the next chapter.]

[9...Qe7 is also possible, e.g. 10.Ba3 Qf6 11.Nbd2 *(*after *11.Ng5?! Nh6 12.h4 Na5 13.Qa4+ Bd7 14.Bb5 0−0−0* and Black was more−or−less winning in D. Kilgour−S.Mannion, Scottish Championship 1985*;* , or if *11.Bd5 Na5 12.Qb4 Nh6 13.Nbd2 c6* and White's initiative is gone *)* 11...Nge7 12.Bd5 Bg4 *(*or *12...Na5* immediately *)* 13.c4 Na5 14.Qc3 Bxf3 15.Nxf3 c6 16.c5 Bc7 17.Bb3

0−0 and Black was just a pawn up, J. Galiana Salom−R.Calvo Minguez, Palma de Mallorca 1991.]

10.Bg5 Qg6 11.Bd5 This indirect pressure on e5 is often a very important tool for White in the Evans Gambit.

[After the slower 11.Nbd2?! Nf6 12.Qa3 Nd7 13.Be3 Qd6 14.Qxd6 cxd6 15.Bxb6 Nxb6 16.Bb3 Na5 Black just kept the pawn in V. Ciocaltea−G.Alexandrescu, Bucharest 1954.]

11...Nge7 12.Bxe7 Kxe7 13.Bxc6 Qxc6 14.Nxe5 Qe6 15.Nc4

[If 15.Qa3+ Qd6 and Black will keep his position together.]

15...Bc5

[15...Rd8 16.Nbd2 *(* while after *16.Qa3+ Ke8 17.Nxb6 cxb6* the position is equal according to Yakov Estrin *)* 16...Kf8 17.Kh1 Bc5 transposes to the game]

16.Nbd2 Rd8 17.Kh1 Kf8 18.f4 Qe8 19.Nf3 b6

[Or 19...a6 20.Rae1 b5 21.Nce5 Be6 22.Qc2 Bd6 with an unclear position.]

20.f5 h6 21.Rfe1 a5 22.Qc2 Ba6 23.Nce5 Kg8? The most important thing in this position is to keep control of the sixth rank.

[Therefore 23...Rd6! 24.Rad1 Rad8 was correct, with an unclear game.]

24.Ng4 Bf8 25.Qf2 Qd7?!

[25...h5? would be even worse after 26.Qh4! hxg4 27.Ng5 Bc5 28.e5 Bb7 29.f6 and White wins]

[but with 25...c5 26.Qg3 Kh8 27.e5 Rd3 Black still has chances of creating counterplay.]

26.Qg3 Kh7

[If 26...Kh8 27.f6 c5 28.Qh4 and White is much better.]

27.f6 Bc8 28.h3! c5 29.Qh4 Qc7 30.Ng5+

[White is also on top after 30.e5 Bxg4 31.Qxg4 .]

30...Kg6 31.Nxf7? A real 'showing off' move, which is quite empty too. In our age the use of computers excludes this kind of mistake from correspondence games.

[Instead simply 31.Nf3 Kh7 32.e5 gives White everything.]

31...Kxf7

[The point was 31...Bxg4 32.Nxd8 Bd7 33.e5 Rxd8 34.e6 and White wins.]

32.fxg7 Bxg4?? This is very questionable.

[Here 32...Bxg7 33.Nxh6+ Bxh6 34.Qxh6 may look dangerous, but what about the main game?! In fact, after Kg8 35.Qg5+ *(* if *35.Re3? Qg7 36.Qxb6 Rd2* and Black is better *)* 35...Kh7 36.Qh5+ White only has a draw. Whereas now White just wins.]

33.gxf8Q+ Rxf8 34.Qxg4 Qe5 35.Rab1 Rab8 36.Rf1+ Ke7 37.Rfd1 Qe6 38.Qg3

1−0

□ **Ding Liren**
■ **Li Shilong**
22: Chinese Team Championship 2010
[David Vigorito]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 a6 7.Re1 h6 8.a4 0−0 9.Nbd2 Re8 This direct approach has made a comeback in recent years.
10.h3 Be6!? KEY DEVELOPMENT: While this move is hardly new, more strong players have noticed it recently. It looks totally viable to me, and it could actually be the most straightforward answer to 8 Rb1. However, Black's king will come under direct attack, so it is not so surprising that this method of play does not suit everyone. **11.Bxe6 Rxe6 12.b4 Ba7 13.Bb2**
[13.Qc2]
13...Ne7 This is the critical position. White has two approaches.
[13...b5 14.d4 Re8 *(14...exd4!* but perhaps *15.cxd4!?* is a better try *Nxb4* has been White's main try. After *16.Qb3 c5 17.axb5 axb5* Black has: *18.d5 Re8!?* (with the idea of ...Qg4) *19.Ra3?)* 15.axb5 and ½−½ in Y. Shulman−G.Kamsky, Saint Louis 2010, which looked very easy for Black. Flear suggests axb5 with the idea of 16.Qe2 exd4 17.Qxb5 dxc3 18.Bxc3]
[13...Qd7 14.d4 Ree8 and Black was just up a piece in Sa.Williams−S. Knott, British League 2007. *(14...exd4 15.cxd4 d5* with some compensation for the pawn *16.e5 Ne4 17.Nxe4* and here: *dxe4 18.d5?* has had universal success in practice, but it is a mistake. After *)* White should probably try 15.Qb3!? b5]
14.c4
[14.Nf1
A) 14...Nh5 15.Bc1 *(15.Ng5 Rf6 16.d4 Nf4 17.Nf3)*;
B) 14...Ng6 15.c4]
[14.d4 Ng6]
14...a5
[14...Nh5 15.Nf1 Nf4 16.Bc1 Neg6]
[14...Ng6 15.Nf1]

15.bxa5 Black must be careful.
[15.b5 Ng6 16.g3]
15...Nc6! This is the most reliable.
[15...Nh5! , as played in C.Gibson−S. Knott, Hastings 2007/08 The main alternative is 16.Nb3 Nf4 and now 17.Bc1 would repeat, but White can also try: Neg6]
16.Bc3 White takes the most violent approach.
[16.Nb3 Bc5 17.Bc3 Bb4 ½−½, A.Greet−S.Knott, Douglas 2005. worse is 18.Bxb4 Nxb4 19.Nh4]
16...Nd7
[16...Nh5 17.Nb3 *(17.Nxe5 Qf6)* 17...Nf4 18.Kh2 *(18.Bd2 Nxd3)* 18...Bxf2 19.Rf1 Ba7]
17.Rb1 Nc5? This loses. It is surprising that such a strong player would go into this line with Black without being properly prepared. WARNING: In sharp lines where one's king is under attack, any mistake is fatal, and both good preparation and concentration over the board must be maintained. There are two alternatives and they both look completely satisfactory for Black... if he has done his homework.
[17...Kh7 18.Nf1 is pretty level as shown by a couple of 10...Bxc3+ specialist Simon Knott's games: Bd4 19.Bxd4 Nxd4 20.Nxd4 exd4 21.Nd2]
18.Nf1! This wins; **18...Rg6?**
This loses in a relatively straightforward manner, but Black could not save the game anyway. **19.Ne3! Ne6** There is nothing to be done. **20.Nd5!** By now a familiar theme.
[20.Rxb7 Nf4]
20...Rb8 21.Rb2
[21.h4]
21...Ng5
[21...Ncd4 22.Nxd4 gives Black a pleasant choice between Bxd4 23.Bxd4 Nxd4 24.Ne3 Kh7 25.Kh2 c6 , which leads to a perpetual check. and 26.Nf5!? Nxf5 27.exf5 with counterplay Rf6]
22.Nxg5 White threatens Qe6+.
22...Qxg5 23.Qf3
[23.Ne3]
23...Bd4 24.Reb1
[or 24.Bd2 Qh4 25.Rbb1 and now: Rg3]
24...Bxc3 The white queen will soon be replaced with another attacker. **25.Nxc3 Nxa5 26.Nd5 Nc6**
[26...Qd8]
[but not 26...Rc8? 27.Rxb7 when White wins after either Nxb7 28.Rxb7]
27.Ne3!
[27.g3 Nd4 28.Qe3 Qd8 29.Rxb7 Rxb7! 30.Rxb7 Qa8 31.Rb1 Kh7 32.Nxc7 Qxa4 with a repetition. Black wards off the attack after 33.Nb5?]
Instead **27...b6 28.Nf5** changes little
[28.Nd5 Ra8 *(28...Nd4 29.Qg3)* 29.g3]
while **28...Ra8 29.h4 Qf4**
[29...Qd8]
30.Qxf4 also leads to mate.
[as does the imaginative 30.Qd1! which threatens both 19 Rh8+ and 19 Kf1 with the idea of Qh5. After Qg4 31.Qxg4 Rxg4 32.Ra2 Kh7 33.f3! Rg6 34.Ne3 White wins. Ra7 35.Kf2 Re6 White also wins after 36.Nd5]
At least **30...exf4** would have tested White, but there is still a win with **31.d4!** which protects the g6−pawn and threatens Rh8+ : **31...Rxa4**
[31...f3 32.g3 Rxa4 there is no

mate]
32.d5! Ne5 33.Ne7+ Kh7 34.Nxg6 Kxg6 . The only way to win (and in fact, the only way to not lose) is to find
35.c5!!
[or 35.Rc2 Kh5! or 36.Rcc1 Ra5! after the immediate 37.Rb5 Ra8 38.Rbb1 Kxh4 39.Ra1 Rc8 40.Ra7]
35...bxc5 36.Rb8! .

□ **Howell,D.**
■ **Ashton,A.**
British Rapidplay Championship, Halifax
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d6
[The main advantage of the 7 h3 move order is that, in contrast to 7 Nbd2, White maintains the option of meeting 7...0−0 with 8.Bg5! (see Tiviakov−El Taher, Game 10).]
[7...d5 is covered in Roy Chowdhury−Skjoldborg.]
8.Nbd2 White begins the knight manoeuvre round to g3. Castling would transpose to lines considered in Chapter Three. **8...0−0**
[8...Ne7 is covered in Korneev−Campora and Bauer−Nyback.]
9.Nf1 d5 This has been the popular choice in practice and it is certainly Black's most challenging response to White's Nd2−f1 plan. It can't be denied that Black has lost a tempo by playing ...d6 and then ...d5 in quick succession, but there's a cast−iron logic for doing so. Once White's knight moves from d2 to f1, White is in a much less favourable position to answer ...d5 with exd5, 0−0, Re1, Nc4 etc, to attack the centre and the e5−pawn in particular. Black often follows the rule of thumb to play ...d5 only after White's knight is committed to f1.
[9...Be6 is covered in Yemelin−Klimov.]
10.Qe2! In response, White usually meets this advance by protecting the strongpoint on e4 rather than exchanging on d5. That is, he chooses Plan A instead of Plan B. Returning to 10 Qe2, Black must decide whether to clarify the situation in the centre immediately or keep the tension for at least one more move.
[10.exd5 Nxd5 11.Ng3 is too slow and gives Black enough time to get organized. For example, Be6 12.0−0 f6! 13.Re1 *(*maybe White should play *13.Be3!?* , an approach considered in Emms−Greet *)* 13...Qd7 14.d4 exd4 15.cxd4 Bf7 16.Bc2 Rae8 and White had less than nothing in S.Movsesian−V.Akopian, Carlsbad 2007.]
10...dxe4
[The option of keeping the tension with moves such as 10...Be6]
[or 10...Re8 is discussed in Emms−Ledger and Tiviakov−Buhmann.]
11.dxe4 Qe7
[11...Nh5 is covered in Gonzalez Vidal−Gomez.]
12.Ng3 h6?
[The natural follow−up to 11...Qe7 must be 12...Be6 (see Tiviakov−Sargissian) , and I can see no reason to delay this move. −−− Is Black's choice of 12... h6 the first sign that he is unaware of the danger in this position? True, it's desirable to eliminate the possibility of Bg5 or Ng5, but the drawback is that Black's kingside has been weakened. Is this weakness significant?]
13.Nh4! Yes it is! And it's immediately apparent why. Not only does White threaten 14 Ng6, but when a knight reaches the juicy f5 outpost it's going to be mightily difficult for Black to dislodge it, even more so now that ...g6 would leave the h6−pawn hanging. −−−

Black's defence from this position could probably be improved upon, but it's already clear that he is experiencing much discomfort. **13...Kh7**

[If 13...Be6 both knight moves to f5 look enticing, but 14.Ngf5 has the advantage of vacating g3 for the queen. For example, Qd7 15.Qf3 and the threats of 16 Bxh6 and 16 Nxh6+ are not easy to meet.]

14.Nhf5 Qe8?

[It's not good, but Black has to play 14...Qd8 .]

15.Qf3 Ng8 This defends against the Nxh6 threat, but... **16.Nxg7!** ...Howell had another idea up his sleeve!

16...Kxg7 17.Nh5+

[White forces mate after 17.Nh5+ Kg6 *(* or *17...Kh8 18.Qg3* followed by Qg7 *)* 18.Qg3+! Kxh5 19.Bd1+! . A crushing win for White. Perhaps the quiet Italian is not so quiet after all!]

12.Ng3 h6?
[The natural follow−up to 11...Qe7 must be 12...Be6 (see Tiviakov−Sargissian), and I can see no reason to delay this move. Is Black's choice of 12...h6 the first sign that he is unaware of the danger in this position? True, it's desirable to eliminate the possibility of Bg5 or Ng5, but the drawback is that Black's kingside has been weakened. Is this weakness significant?]

13.Nh4! Yes it is! And it's immediately apparent why. Not only does White threaten 14 Ng6, but when a knight reaches the juicy f5 outpost it's going to be mightily difficult for Black to dislodge it, even more so now that ...g6 would leave the h6−pawn hanging. Black's defence from this position could probably be improved upon, but it's already clear that he is experiencing much discomfort.

13...Kh7
[If 13...Be6 both knight moves to f5 look enticing, but 14.Ngf5 has the advantage of vacating g3 for the queen. For example, Qd7 15.Qf3 and the threats of 16 Bxh6 and 16 Nxh6+ are not easy to meet.]

14.Nhf5 Qe8?
[It's not good, but Black has to play 14...Qd8 .]

15.Qf3 Ng8 This defends against the Nxh6 threat, but... **16.Nxg7!** ...Howell had another idea up his sleeve!

16...Kxg7 17.Nh5+
[White forces mate after 17.Nh5+ Kg6 *(* or *17...Kh8 18.Qg3* followed by Qg7 *)* 18.Qg3+! Kxh5 19.Bd1+! . A crushing win for White. Perhaps the quiet Italian is not so quiet after all!]

1−0

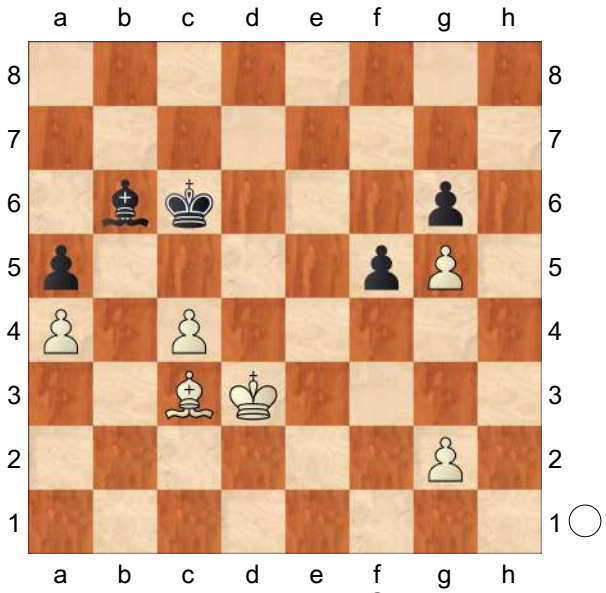
□ **Paoli,Enrico**
■ **Liebert,Heinz**
Debrecen 2nd (8) 12.08.1968
[Rittner,Horst Robert]

SCHACH 10/1968 Seite 296
Sonderpreis für Dr. Paoli Der italienische Meister Dr. Paoli, sonst kaum in der Preisliste internationaler Turniere zu finden, bekam in Debrecen einen Sonderpreis für die einheitlichste Partie. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Nd4 6.c3 b5** Beide haben eine ganz moderne Variante gewählt. **7.Bf1 Nxd5 8.cxd4 Qxg5 9.Bxb5+ Kd8 10.0−0 Bb7 11.Qf3** Das sieht nicht unbedenklich aus, weil nach Tb8 der Lb7 drohend steht. Aber Weiß hat witzige taktische Pointen in petto. **11...Rb8 12.Nc3! exd4**
[Wenn 12...Nxc3 so natürlich nicht 13.Qxc3?? *(* sondern *13.dxc3!* und auch die Dg5 steht ein. *)* 13...Qxg2#]

13.d3 Qf6 14.Qg4! Droht Lg5 und auch Dd7 matt. Die schwarze Antwort ist erzwungen. **14...Bc8 15.Qh5** Zwingt den Springer ebenfalls zurück. **15...Ne7 16.Ne4 Qf5 17.Qxf5 Nxf5** Also haben die weißen Geistesblitze nicht mehr eingebracht als das bessere Endspiel. **18.Bc4 f6 19.b3 Rb6**

20.Bb2 h5 21.Ng3 Bc5
[Falls hier 21...c5 geschieht, so wird der Bc5 schnell zum Sorgenkind.]
22.Rac1 Nxg3 23.fxg3! Rd6 24.Bf7 Bb4 Er möchte nach e3. **25.Rf2 Ba6 26.Bg6 Rh6 27.Be4 g6** Die Drohung f5 nebst Lxd3 ist leicht zu parieren. Der Textzug schafft nur zusätzliche Sorgen. **28.a3 Ba5 29.b4 Bb6 30.Rd2 Bb5 31.Bf3 Rh7 32.Bd1 a5 33.a4 Ba6 34.b5 Bc8 35.Bb3 Be6 36.Bc4 Bf5 37.Re2 Bc5 38.h3 Bb4 39.Rf1 Re7 40.Rxe7 Kxe7 41.Rf2 Kd7 42.Kf1 Bc5 43.Bc1** Ein etwas langwieriger Partieabschnitt. Weiß verlagert jetzt seine OPerationen auf den Königsflügel. **43...Kd8 44.Bf4 Rd7 45.Bd2 Bb6 46.Rf4 Rd6 47.g4 hxg4 48.hxg4 Bd7 49.g5! f5** Notwendig.
[Wenn 49...fxg5 so 50.Rf8+ Ke7 51.Rf7+ Ke8 52.Bxg5 und Schwarz ist in Nöten.]
50.Rh4 Be6 51.Rh8+ Kd7 52.Rh7+ Kc8 53.Bf4! Sehr geschickt führt Paoli ein Endspiel mit gleichen Läufern herbei, in dem der Bd4 verlorengeht. **53...Bxc4 54.dxc4**
[Nicht 54.Bxd6?? Bxd3+]
54...Rd7 Auch erzwungen.
[Falls 54...Re6? so gewinnt 55.c5!]
55.Rxd7 Kxd7 56.Ke2 c6 57.bxc6+ Kxc6 58.Kd3 Kc5 59.Be5 Kc6 60.Bxd4 Bc7 61.Bc3 Bb6

(Diagram)



Wie kommt Weiß nun weiter? **62.c5!!** Ein feines Manöver! **62...Bc7**
[Nach 62...Kxc5 63.Bd4+ nebst Lxb6 gewinnt Weiß das Bauernendspiel,]
[und bei 62...Bxc5 63.Bxa5 muss Schwarz sich um den a−Bauern kümmern, so dass Weiß den Bauern g6/f5 zu Leibe rücken kann]
63.Kc4 Bd8 64.Bf6 Bc7 65.Bc3 Bd8 66.Bd2 Bc7 67.Kd4 Bd8 68.Bf4 Be7 69.Ke5! "Finis coronat opus..." **69...Kxc5**
[69...Bxc5 70.Kf6 usw.]
70.Ke6 Bd8
[70...Bf8 71.Kf7 Bd6 72.Bxd6+ usw. ist natürlich ebenfalls zwecklos.]
71.Kd7! An dieser Gefangennahme des Läufers hätte selbst Altmeister Rinck seine Freude gehabt − weniger allerdings Jungmeister Liebert, der das Pech hatte, auf einen Paoli in Form zu treffen. **71...Bxg5**
[71...Bb6 72.Be3+]
72.Bxg5 Kb4 73.Ke6 Schwarz gab auf. In der Tat eine einheitliche Leistung des italienischen Maestros, die ihn mit manchem Mißgeschick versöhnt haben mag.

□ **Kindermann,S.**
■ **Dietmayer Kraeutler,M.**
Austrian League 2007
[John Emms]

We've seen that pinning with Bg5 is sometimes good, sometimes bad and occasionally somewhere in−between − it all depends on the specifics of the position. The same cannot be said about ...Bg4. Although it might be stretching things to call this outwardly enticing move an outright mistake, White is usually more than happy to see it arrive on the board. In the notes to Erenburg−Kreizberg we saw how White can deal effectively with an early ... Bg4 if he hasn't castled. In the following game White has committed his king, but a similar plan should still promise him some advantage. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 d6 7.Bb3 Bg4 8.Nbd2!**

[Black has yet to commit his king, and he shouldn't be encouraged to attack on the kingside. So White should avoid giving Black a 'hook' with 8.h3 Bh5 9.Nbd2 , when h6 followed by ... g5 would be a tempting plan.]

8...0−0

[If Black insists on castling long, White leaves the kingside alone and just organizes action on the other wing. For example, 8...Qd7 9.Re1 0−0−0 10.Bc2! d5 11.b4 Ba7 12.a4! etc.]

9.h3 Now it's okay to put the question to the bishop,

[although there's also nothing wrong with playing 9.Re1 first.]

9...Bh5 It might be better just to accept the loss of time and retreat to e6. **10.Re1** There's no point delaying the strong Nf1−g3 plan. **10...Re8**

[10...d5 can be met by 11.exd5! Nxd5 12.Ne4 . This can be compared to similar positions arising in Chapter Two, but here White's tempo gain, caused by ...d7−d6−d5, leaves him in control: Ba7 13.Ng3 Bg6 *(* giving up the bishop pair with *13...Bxf3 14.Qxf3* is hardly fun for Black either *)* 14.Nxe5 Nxe5 15.Rxe5 left White a pawn up for nothing in P. Lyrberg−J.Barkhagen, Budapest 1993.]

11.Nf1 h6

[11...d5 is again premature: 12.exd5 Nxd5 13.Ng3 Bg6 14.d4! wins a pawn with a tactic we've seen before.]

[11...Qd7 12.Bg5! is also awkward for Black: Bg6 13.Bxf6 gxf6 14.Ng3 f5 15.exf5 Bxf5 16.Ng5 Bg6 17.Qf3 Qe7 18.N5e4 Kh8 19.Nf5 Qf8 20.Nf6 Red8 21.h4 Bb6 22.Bd5 Rab8 23.h5 with a dominating position, V.Spasov−M.Mitkov, Istanbul 2001.]

12.Ng3 This is good enough,

[but White can play with even more ambition with 12.g4! Bg6 *(* White is well enough protected after *12...Nxg4 13.hxg4 Bxg4 14.Kg2 Qf6 15.Be3)* 13.Ng3 . The h3/g4 set−up is particularly effective when reinforced by a knight on g3, which is useful both in defence and attack. White has a firm grip on the kingside and if he isn't careful Black can easily get squashed, as in the following example: Qd7 14.Nh4 Kh8 15.Kg2 Ne7 *(15...Nd8* planning ...Ne6 looks wiser *)* 16.g5!? *(16.Qf3 Nh7 17.Nhf5* is solid and

good *)* 16...Nfg8 17.Qg4! Qxg4 18.hxg4 a5 *(*or *18...hxg5 19.Nxg6+ Nxg6 20.Bxg5* and Rh1+ is coming *)* 19.Rh1 a4 20.Bc2 Kh7 21.gxh6 gxh6 22.g5 and White soon won, T. Halmeenmaeki−G.Buchhauser, correspondence 2000.]

12...Bg6

[12...Bxf3 13.Qxf3 would just be an admission that the whole plan with ... Bg4 was misguided. Nf5 is coming and White has a ready−made attack.]

13.Nh4!?

[If White doesn't want to sacrifice the exchange and enter the following complications, 13.Nh2 intending Qf3 is reasonable]

[or just 13.Qe2 . One nice line, certainly not forced, is Bh7 *(13...Qd7* is met by *14.Nh4!)* 14.Nh2 d5 15.Ng4 Nxg4 16.Qxg4 Qf6 17.Nh5! Qxf2+ 18.Kh2 Bg6 19.Bxh6! (over−protecting g1!) gxh6 20.Re2 and White wins!]

13...Nxe4! Definitely the best.

[After 13...Bh7 14.Qf3 Black is already under considerable pressure on the kingside and he has absolutely no counterplay.]

14.Rxe4! Bxe4 15.Qg4 Bxd3 16.Nh5 g5 17.Qf3 Kh8

[17...d5 18.Qxd3 gxh4 19.Qf3 is good for White.]

18.Qxd3 gxh4 19.Qf5 Rg8 20.Bxh6

[20.Bxf7 might be stronger. Rybka's main line is Qe7 21.Bxg8 Rxg8 22.Bxh6 Nd8 23.Nf6 Qf7 24.Bg5 Ne6 25.Bxh4 and White is better, although the position remains complicated.]

20...Qe7?

[After 20...Rg6! White might well be advised to accept the perpetual line 21.Bg7+ Rxg7 22.Nxg7 Kxg7 23.Qxf7+ Kh8 24.Qh5+ Kg7 25.Qf7+ etc.]

21.Nf6! Now White is firmly back in control. **21...Rg6 22.Qh5 Qxf6**

[22...Bxf2+! 23.Kh1 Qxf6 24.Bg5+ Kg7 25.Bxf6+ Rxf6 would have been a tougher nut to crack.]

23.Bg5+ Kg7 24.Bxf6+ Rxf6 25.Qg5+ Rg6 26.Qxh4 Rh8

[And here Black should have tried 26...f5 .]

27.Qe4 Rxh3 28.Qf5! Now it really is over as a contest. **28...Rh7 29.Qxf7+ Kh6 30.Qf8+ Rhg7 31.Qh8+ Rh7 32.Qf8+ Rhg7 33.Bd5 Rg4 34.Qf6+ R7g6 35.Qh8+ Kg5 36.Rd1 Rf4 37.Rd2 Bb6 38.g3 Rg4 39.Kg2 e4 40.Re2 Kf5 41.Bxe4+ Rxe4 42.Qh5+ 1−0**

□ **Gonzalez Vidal,Y.**

■ **Gomez,F.**

Cuban Championship, Holguin City

[John Emms]

This game demonstrates just how much flexibility White's position contains. Early on it looks like White is aiming for a typical pawn storm on the kingside, but somewhat surprisingly he ends up castling that side. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.Nbd2 d6 8.h3 0−0 9.Nf1 d5 10.Qe2 dxe4 11.dxe4 Nh5!?**

This knight move is an important idea − both here and in similar positions − because it more or less prevents 12 Ng3, which has become undesirable in view of 12...Nf4 or 12...Nxg3. So White has to amend his original plan. **12.g3!** Preventing any ...Nf4 ideas. While it's certainly true that White's kingside structure has become compromised to some extent, White can usually get away with accepting this because kingside castling only rarely features in his plans.

[Whenever Black plays ...Nh5, both sides need to be wary of tactics involving Nxe5 uncovering an attack on the knight by the white queen. On this occasion 12.Nxe5?? is a blunder. White wins a pawn after Nxe5 13.Qxh5 , but then Black wins the game with Nd3+! .]

[White can allow ....Nf4 in some positions, but he doesn't want to force the knight there: 12.g4?! Nf4 13.Bxf4 exf4 and White has weakened his position for no compensating factors. What's more, that knight on f1 is no longer such a happy piece!]

[If White wants to allow ...Nf4, a better way to do so would be 12.Bg5 Qd6 13.Ne3 , as played in K.Landa−V. Akopian, Sochi 2006.

A) . I'm sure that White plans to meet 13...Nf4 with 14.Bxf4 exf4 15.Nd5;

B) , or 13...h6 with 14.g4 Nf4 *(14...hxg5!?)* 15.Bxf4 exf4 16.Nd5 , when in comparison to 12 g4?! White has found an excellent square for the knight.;

C) . In the game, Akopian chose 13...Bxe3 and Landa managed to gain a small advantage after 14.Bxe3 Nf4 15.Bxf4 exf4 16.e5 Qh6 17.Qe4 Be6 18.Bxe6 Qxe6 19.0−0 Rae8 20.Rfe1 f6 21.Qxf4 fxe5 22.Qe3 in view of the isolated e−pawn, although Black's play was perhaps a bit too simplistic.;

D) 13...−−]

12...Nf6! The knight has done its job − Ng3 is no longer possible. Now it returns to hit the e4−pawn so that White cannot plan Ne3 either. **13.g4!?** White has other options but clearly this is the most ambitious. The good thing about delaying castling is that White can consider aggressive ideas such as lunging forward with pawns on the kingside.

[13.Bg5 h6 14.Rd1 Qe7 reveals a problem with having a pawn on g3. White would like to play 15.Bh4 , but then he would always have to worry about ...g5 trapping the bishop. Even if an immediate g5 is considerably risky in view of 16.Nxg5 hxg5 17.Bxg5 , the fact that Black has this possibility in reserve, say after 15...Be6, is somewhat annoying for White (although not annoying enough to prevent some bold players choosing to play like this − see the Howell−Mchedlishvili reference in Tiviakov−El Taher). −−− After 13 g4 Black needs to come up with an effective plan, which is easier said than done...]

13...Nd7 Sensibly moving the knight out of the firing line of White's kingside advance, and eyeing the possibility of exploiting the hole on f4 via ...Nc5−e6.

[13...Qe7 intending ...Be6 is, as always, a key defensive idea. Against this, White could play 14.Ng3

and meet Be6 with 15.Nf5 .]
[The immediate 13...Be6!? is also interesting, and White faces one of those typical dilemmas regarding the light−squared bishops. 14.Bxe6 *(*I would be much more tempted to continue with *14.Ng3)* 14...fxe6 leaves the e−pawns doubled and isolated, but it could be argued with some justification that Black's gain in control of d5 and f5, plus the use of the open f−file, more than compensates him for this.]

14.Ne3 Nc5 15.Bc2 Preventing the exchange and also ...Nd3+. **15...a5** Black's idea is ...b6 followed by ...Ba6, but White can easily negate this threat after which Black is left awkwardly placed.
[Motwani suggests 15...Ne6 , planning to meet 16.Nd5 with *(*another enticing option is *16.Nf5* , intending to answer *g6* with *17.Nh6+* followed by h4, again with some initiative *)* 16...f6!? "followed by ...Ne7 to challenge White's d5−knight, which is a key guardian of the f4−square". This does look like a wise defence to me, although I still prefer White's position after 17.Be3 Bxe3 18.Qxe3 Ne7 19.0−0−0 .]

16.0−0! It's sometimes easy to forget that White can still castle this side! Black is hardly in a position to exploit any weaknesses, especially as most of his pieces are labouring on the queenside. **16...b6 17.Rd1 Ba6 18.Qe1 Qf6 19.Kg2** It has become abundantly clear that Black's plan involving ...a5, ...b6 and ...Ba6 was a misguided one. He should have at least consulted his poor bishop on a7!

19...Ne7 Black had to do something about the obvious idea of Nd5 or Nf5.
20.g5!? This advance is quite committal, but White's initiative becomes very strong. **20...Qe6 21.b4 axb4 22.cxb4 Nb7?**
[Black misses his chance. After 22...Ng6! 23.Ng4 *(23.bxc5 Nf4+ 24.Kh1 Qxh3+ 25.Nh2* is very unclear*;* , as is *23.Nd5 Bc8! 24.Ng1 Na6)* 23...Nd7 24.Bb3 Qe7 25.h4 , White is better but Black is still alive.]

23.Nd5! Rac8 24.Bb3 Nxd5 25.b5!
[White wins a piece after 25.b5 Bxb5 26.Bxd5 and 27 Bxb7.]

1−0

□ **Tiviakov,S.**
■ **El Taher,R.**
39804 Amman 2006
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6
[Note that the actual move order of the game was 5...d6 6.Bb3 a6 7.h3 0−0 8.Bg5 h6 9.Bh4 Be6 10.Nbd2 Ba7 11.Nh2 .]
6.Bb3 Ba7 7.h3 0−0 Black commits himself to neither ...d6 nor ...d5. On the other hand, as we already know, castling itself is committal!
[As well as 7...d6 or 7...d5, there's also the flexible 7...h6!? , preventing the pin and hoping to find out White's intentions before committing to a plan of action. After 8.Nbd2 0−0 ,
A) , if 9.Nf1 then d5! 10.Qe2 gives Black an extra ...h6 move in the main lines (the first five games of this chapter). This should be at least partially useful to him, although I'm not 100% sure − we've seen previously how this pawn advance can give White a hook to attack.;
B) . Looking at alternatives, 9.0−0 d6 10.Re1 would transpose to the 0−0 lines of Chapter Three.;
C) . More aggressive players might prefer 9.g4!? . Again White is looking to exploit Black's early ...h6. The positions are double−edged, but this certainly worked well for White in the game T.Stepovaia Dianchenko−I.Turova, Kazan 2004: d5 10.Rg1 *(* even *10.g5 hxg5 11.Nxg5* is interesting; the open g−file is always going to promise White some action *)* 10...dxe4 11.dxe4 Be6 12.Qe2 b5 13.Nf1 Nd7 14.Be3 Na5?! *(14...Nc5!?* looks better *)* 15.Bxe6 fxe6 16.0−0−0 Qe7 17.g5 Bxe3+ 18.Nxe3 hxg5 19.Nxg5 Nf6 20.Rg3 and White's attack looked much more dangerous than Black's.;
D) 9.−−]
8.Bg5! One of the main points behind White's move order with 7 h3 is that 7... 0−0 can be met by this move. This typical pin is more annoying than usual for Black for the following reasons: 1. Black has already castled kingside. Therefore, breaking the pin with ...h6 and ...g5 will compromise his king's safety. −− 2. White has yet to commit to kingside castling. This might make it easier for him to start an attack on the kingside (for example, meeting ...g5 with h4) without having to worry about his own king's safety. −− 3. With Black's bishop back on a7, there is no possibility in the foreseeable future to break the pin with ...Be7. −− In isolation, I don't think any of these factors carry such great significance. When combined, though, they certainly seem to give Black a few headaches. **8...d6 9.Nbd2 Be6**
[The alternative is to break the pin immediately. I.Kulish−O.Stjazhkina, Elista 2000, continued 9...h6 10.Bh4 g5 11.Bg3 *(11.Nxg5!? hxg5*

12.Bxg5 is a tempting piece sacrifice; compare Emms−Flear *)*

A) or 11...Nh5 − planning ....Qf6 and ...Nf4 − 12.Nh2!? and now Nf4 *(*or *12...Nxg3 13.fxg3* and White gains a useful open f−file *)* 13.Qf3 followed by 0−0−0 and h4;

B) 11...Re8 12.Nf1 Ne7 13.Qd2 Kg7 14.0−0−0 Ng6 (in view of what happens, Black should probably hold back with this move) 15.h4! g4 16.h5! Nf8 *(*or *16...Nf4 17.Ng1 N6xh5 18.Bh4 f6 19.Ng3)* 17.Nh4 and White is ready to make significant progress on the kingside with f4, Ne3 etc. Black's defences are beginning to creak.]

10.Nh2! Threatening Ng4 and thus encouraging Black to advance on the kingside.

[Garry Kasparov played Bg5 more than once against an early ...0−0, but in G. Kasparov−J.Timman, Rotterdam 1999, he failed to find the right plan: 10.Bh4?! Kh8 11.g4 Ne7! 12.Bxf6 gxf6 13.Nh4 Ng6 14.Ng2 c6 15.Qf3 d5 16.Nf1 a5 17.Ng3 Bc5 18.a4 Be7 19.Ba2 Ra6 20.Nh5 Rb6 21.Qe2 Qd6 with reasonable counterplay for Black. Timman suggested 10 Nh2 as an improvement for White.]

[10.Nf1 would transpose to the note to White's 10th move in Yemelin−Klimov.]

10...h6

[10...d5 is too slow here: 11.Qf3! d4 12.Ng4 Bxg4 13.hxg4 dxc3 14.bxc3 Qd6 15.Nc4 Qe7 16.Qh3 and Black's position was already critical in G.Hassell−S.Smith, correspondence 2000, since h6 17.Bxh6 gxh6 18.Qxh6 forces mate.]

11.Bh4 g5 12.Bg3 Timman assessed this position as 'unclear', but I would prefer to be White and evidently so would Tiviakov! **12...Kg7**

[Ideally Black would really like to shift the queen's knight over to g6 in order to bolster defences on the kingside, but there's not enough time to do so: 12...Ne7?! is met by 13.Bxe6 fxe6 14.Ng4! Nxg4 *(*if *14...Kg7* , White plays *15.Nxf6 Rxf6 16.h4 Ng6 17.hxg5 hxg5 18.Rh5)* 15.Qxg4 , hitting e6 and answering Qd7 with 16.h4 .]

13.Bxe6 fxe6 14.h4! Direct play by Tiviakov − the idea of h4 is obvious and good. The g5−pawn becomes increasingly vulnerable and the h1−rook becomes active on its home square. **14...Rh8 15.Ndf3!** Enticing the pawn forward. **15...Kg6** Probably best, although the fact that Black is having to make moves like this is not a good sign for him!

[The 'easy' option would have been 15...g4 16.Nd2 h5 , but then White would simply break with f2−f3 and Black's king would never be completely safe.]

16.Qe2 Nh5 17.hxg5 hxg5 18.0−0−0 Qe7 19.Ng4 Raf8

[Or 19...Nf4 20.Bxf4 and now either exf4 *(*or *20...gxf4 21.g3!* probably killing the king! *)* 21.d4! killing the a7−bishop.]

20.Qd2 Nd8 21.d4! The time is right for this advance. White hopes that once the centre is opened, Black's king will become even more exposed. **21...exd4 22.cxd4 Nf7 23.e5 Kg7 24.Bh2**

[Perhaps 24.Kb1 is stronger. I don't think White should mind if Black trades on g3.]

24...d5! Black's best chance is to keep the position as blocked as possible.

25.Kb1 c5 26.dxc5 Bxc5 27.Rc1 Rc8 28.Nd4 Bb6

[28...Bxd4! 29.Qxd4 Rxc1+ 30.Rxc1 Nd8 intending ...Nc6 would have kept Black in the game.]

29.Ne3 Qd7? 30.Nef5+!

Now the bishop on h2 comes right back to life. **30...exf5 31.e6 Qa4 32.Be5+!** Perhaps El Taher overlooked this move.

32...Kg6

[Now 32...Nxe5 33.Qxg5+ mates quickly, so Black is lost.]

33.exf7 Bxd4 34.Bxh8! Rxh8 35.b3 Qd7 36.Qxd4 Rf8 37.Qb6+

San Juan 1967 1967
[Paul Motwani]

Mr Mo's game G12.36: "C.J.S.Purdy's Chess Jewels Selected Perfectly". Australia's late great IM Cecil John Seddon Purdy (1906−1979) was not only the first−ever World Correspondence Chess Champion and a four−times winner of his country's national championship, but also an extremely gifted writer who communicated his thoughts on the Royal Game with almost unsurpassed lucidity. Now, thanks to Thinkers' Press, their newly published 256−page Volume 2 of "C. J. S.Purdy's Fine Art of Chess Annotation and Other Thoughts" treats the reader to a magnificent collection of 120 instructive games and 13 further articles where Purdy poured out his pearls of wisdom, thereby allowing players of all standards to derive enormous benefit and enjoyment too. Another superstar from the same era was GM Nicolas Rossolimo (1910−1975), and his following stunning 24−move victory at San Juan in 1967 impressed me as much as it delighted Purdy. French League 2009
[John Emms]

1.e4 e5 2.Bc4 Nc6 3.Nf3 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.h3 d6 9.Nf1 Ne7 10.Ng3 Ng6 11.0−0 b5 Black's light−squared bishop will go to b7, where it can influence events in the centre. This is a very reasonable alternative to the plan of ...h6, ...Be6 and ...Re8 seen in the previous game. Black's light−squared bishop will go to b7, where it can influence events in the centre. This is a very reasonable alternative to the plan of ...h6, ...Be6 and ...Re8 seen in the previous game.

12.a4

[White certainly has chances of keeping a slight edge in the tension−filled positions after White certainly has chances of keeping a slight edge in the tension−filled positions after 12.d4 Bb7 *(* or *12...c5 13.Bc2 cxd4 14.cxd4 Bb7 15.Be3 Re8 16.Re1* , V.Bologan−R.Kasimdzhanov, French League 2007 *)* 13.Bc2 *(* if *13.d5* , Black will break with ...c6 *)* 13...Re8 14.Re1 h6 15.a4 , and indeed this has been played in quite a few games.

However, it's clear that after White plays d4 Black's light−squared bishop is more actively placed on b7 than, say, e6 or d7. So if the d3−d4 advance isn't quite so attractive against ...Bb7, what else can White consider doing? −−− Well, if ...Bb7 does have a weakness, it's the fact that on this square the bishop no longer controls some key light squares on the kingside. This encourages White to just hold back in the centre, restricting the bishop's influence there, and to begin action on the kingside, where its lack of presence might be exploited. −−− Let's see how Christian Bauer tries to do this: , and indeed this has been played in quite a few games. However, it's clear that after White plays d4 Black's light−squared bishop is more actively placed on b7 than, say, e6 or d7. So if the d3−d4 advance isn't quite so attractive against ...Bb7, what else can White consider doing? Well, if ...Bb7 does have a weakness, it's the fact that on this square the bishop no longer controls some key light squares on the kingside. This encourages White to just hold back in the centre, restricting the bishop's influence there, and to begin action on the kingside, where its lack of presence might be exploited. Let's see how Christian Bauer tries to do this: , and indeed this has been played in quite a few games. However, it's clear that after White plays d4 Black's light−squared bishop is more actively placed on b7 than, say, e6 or d7. So if the d3−d4 advance isn't quite so attractive against ...Bb7, what else can White consider doing? Well, if ...Bb7 does have a weakness, it's the fact that on this square the bishop no longer controls some key light squares on the kingside. This encourages White to just hold back in the centre, restricting the bishop's influence there, and to begin action on the kingside, where its lack of presence might be exploited. Let's see how Christian Bauer tries to do this:]

12...Bb7 13.Re1 Re8 14.Nh2!?

White keeps the d−pawn firmly on d3, blunting the b7−bishop, and begins typical action on the kingside. He can now think about moves such as Qf3, Ng4 and Nf5. I'm not sure whether objectively this is a better way to play than 12 d4, but it does at least give Black something different to think about.

[14.Nf5?! would be premature here, and after would be premature here, and after d5! it's not easy for White to hold his centre. Don't rush with this move!]

14...d5

[With the pressure off his e−pawn, Black strikes in the centre with ...d5. This advance is such a natural reaction to a move like Nh2, although that doesn't mean alternatives don't exist. For example, With the pressure off his e−pawn, Black strikes in the centre with ...d5. This advance is such a natural reaction to a move like Nh2, although that doesn't mean alternatives don't exist. For example, 14...Nd7 planning ...Nc5 to hit the bishop and the a4−pawn. Let's follow another game involving Bauer here, C. Bauer−M.Godena, Swiss League 2004: 15.Qf3 (normally White would

be reluctant to give up his light−squared bishop, but after normally White would be reluctant to give up his light−squared bishop, but after *15.Nf5!? Nc5 16.axb5 axb5 17.Ng4 Nxb3 18.Qxb3* White's knights on the kingside pose a threat, and White's knights on the kingside pose a threat, and *Bxf2+?? 19.Kxf2 Rxa1* loses to *20.Nfh6+ gxh6 21.Nxh6+ Kg7 22.Qxf7+ Kh8 23.Bg5* etc *)* 15...Rf8 16.a5!? *(*White wants to answer ... Nc5 with Ba2, so he releases the tension; *16.Nf5 Nc5 17.Bc2* is also possible *)* 16...Nc5 17.Ba2 Ne6 18.Nf5 Ngf4 19.Bxf4 *(19.d4!?)* 19...Nxf4 20.d4 Qf6 21.Rad1 with a tense position offering equal chances.]

15.Qf3 Nh4 This looks enticing, but in fact the knight is going back to g6 next move.

[The game O.Eismont−S.Hirsch, Duisburg 2000, demonstrates a typical battle between White's kingside play and Black's advancing pawns in the centre: The game O.Eismont−S. Hirsch, Duisburg 2000, demonstrates a typical battle between White's kingside play and Black's advancing pawns in the centre: 15...h6 (to prevent Bg5) 16.Nf5 c5

A) 17.Bxh6!? gxh6 18.Bxd5 Bxd5 *(18...Nxd5??* loses to loses to *19.Nxh6+)* 19.exd5 is an interesting piece sacrifice;

B) 17.exd5

B1) this thematic pawn sacrifice is forced, since this thematic pawn sacrifice is forced, since 17...Bxd5 fails to tactics on h6: 18.Bxd5 Qxd5 *(*or *18...Nxd5 19.axb5 axb5 20.Bxh6!)* 19.Nxh6+!;

B2) 17...c4! 18.dxc4 e4 19.Qe2 Qd7 20.Nd4 *(20.Nxh6+!?)* 20...Bxd4 21.cxd4 bxc4 22.Bxc4 Nxd5 and Black has some compensation but I still prefer White's position after and Black has some compensation but I still prefer White's position after 23.b3 .]

16.Qe2 Ng6

[White was threatening Bg5, and after White was threatening Bg5, and after 16...h6 17.Ng4 Nxg4 18.Qxg4 *(*or *18.hxg4* , the knight is not especially well placed on h4 after all. *)*]

[After 16...Ng6 Black's argument is that White's 'free' Qd1−e2 is not particularly useful, given that ...Nf4 will attack the queen again.]

After 16...Ng6 Black's argument is that White's 'free' Qd1−e2 is not particularly useful, given that ...Nf4 will attack the queen again. **17.Ng4 Nf4 18.Qf3 Nxg4 19.hxg4 dxe4 20.dxe4 Qf6**

After some to−ing and fro−ing with the queen and knight, Black still has problems to solve here. Firstly, White is just threatening to win a pawn by taking on f4.

[Secondly, After some to−ing and fro−ing with the queen and knight, Black still has problems to solve here. Firstly, White is just threatening to win a pawn by taking on f4. Secondly, 20...Qd3 is the move Black would like to play, but this is very well met by is the move Black would like to play, but this is very well met by 21.Be3! . If Bxe3 22.fxe3! White threatens both the knight on f4 and to trap the queen with

Rad1.]

21.Nf5 g6! Nyback chooses to sacrifice his f−pawn, preferring complications over a passive position.

[21...Ng6?? loses to loses to 22.g5! . For example, Qb6 leads to a king hunt and a nice mate in the middle of the board: 23.Bxf7+! Kxf7 24.Nh6+ Ke7 25.Qf7+ Kd6 26.Nf5+ Kc5 27.Be3+ Kc6 28.Qd5#! . This is worth a diagram!]

[21...Ne6 , blocking the diagonal, is a wiser choice, but White keeps an advantage here after , blocking the diagonal, is a wiser choice, but White keeps an advantage here after 22.g5! Nxg5 *(*or *22...Qd8 23.Qg3)* 23.Bxg5 Qxg5 24.axb5 . The point is that Black cannot recapture on b5, since . The point is that Black cannot recapture on b5, since axb5?? loses to 25.Rxa7! (deflecting the rook from back rank duties) Rxa7 26.Nh6+! gxh6 27.Qxf7+ Kh8 28.Qxe8+ Kg7 29.Qg8+ Kf6 30.Qf7# .]

22.Nh6+ Kg7 23.Nxf7 Rf8 24.Bxf4

[Possibly 24.axb5 is more accurate: axb5 *(*while after *24...Rxf7 25.Bxf7 Qxf7 26.bxa6 Bc6 27.Be3* it's still complicated but White must be better *)* 25.Bxf4 exf4 26.e5! would transpose to the note to Black's 25th move, below.]

24...exf4 25.axb5 a5?

[The point behind 25...a5 is that The point behind 25...a5 is that 25...axb5 26.e5! is very good for White: is very good for White: Qxf7 27.Qxb7 Qxb3 28.Rxa7 Rxa7 29.Qxa7 Qxb2 30.Qd4! and it will be very difficult for Black to cope with the passed e−pawn.]

[However, Black should play However, Black should play 25...Rxf7! 26.bxa6 Bc6 27.Bxf7 Qxf7 . White has a material advantage and should be better, but it won't be easy to overcome those two powerful bishops.]

26.g5 Qe7 27.Nh6?

[Here 27.Qh3! , intending Rxf7 28.Bxf7 Qxf7 29.Rad1! , would have been very strong: Re8 30.Rd7 Re7 31.Red1! Bc5 32.b6! cxb6 33.Qh6+ Kg8 34.Rd8+ Re8 35.R1d7! Rxd8 36.Rxf7 Kxf7 37.Qxh7+ is winning. After 27 Nh6 Black is allowed right back into it. The rest of the game isn't really important for our purposes. Here are the remaining moves: is winning. After 27 Nh6 Black is allowed right back into it. The rest of the game isn't really important for our purposes. Here are the remaining moves: is winning. After 27 Nh6 Black is allowed right back into it. The rest of the game isn't really important for our purposes. Here are the remaining moves:]

□ **S.Tiviakov**
■ **D.De Vreugt**
Dieren 2003
[John Emms]

It seems only right to include a Tiviakov game with Be3, since he was the one player who really put this move on the map. **1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3 Nc6 5.c3 d6**
[It's also worth mentioning the move order 5...a6 6.0−0 Ba7 7.Bb3 0−0

where Black holds back with his d−pawn and can consider meeting 8.Be3 *(*if White wishes to avoid this possibility, he can play *8.h3* intending 9 Be3 only after *d6)* with 8...d5!? . For example, 9.exd5 Nxd5 10.Bxa7 Rxa7 11.Re1 Nf4 12.d4 exd4 13.cxd4 Bg4 , as played in S. Zagrebelny−A.Aleksandrov, Moscow 2004.]

6.Bb3 a6 7.0−0 Ba7 8.Be3

With this move order, if White wants to play Be3 there's no reason to hesitate. As we see in this game and in some sub−variations, White might not have to play h3 at all. **8...0−0 9.Nbd2 Ne7**

This typical knight move has been Black's most popular choice, but it does allow White to carry out his intended plan. In particular, White can now play Nh4 without worrying about ...Nxe4 tactics. Let's look at some alternatives in this position:

[a) 9...Bxe3 10.fxe3 reaches a structure similar to the previous game, with White having an open−file for his rook. As I mentioned there, these positions are usually easier for White to play, because his plans - usually involving action on the kingside - are more obvious. An example: Na5 11.Bc2 c5 12.Qe1 Nh5 13.a3!? g6 14.b4 Nc6 15.Bb3 Ng7 16.Bd5 *(16.d4!?)* 16...cxb4 17.axb4 Be6 18.Nc4 with a bit of pressure, F. Vallejo Pons−A.Shirov, Dos Hermanas 2008.]

[b) 9...Be6 is solid, but 10.Bxe6 fxe6 11.Bxa7 Rxa7 12.Qb3 Qe7 13.d4 still offers White chances of an advantage. The structure is reversed from the previous note; this time Black possesses the open f−file. However, White has been able to advance in the centre and activate his queen, and furthermore Black's rook on a7 is misplaced - all of this makes a difference. S.Tiviakov−H.Jonkman, Santo Domingo 2002, continued Nd7 14.a4 a5 15.Qb5 Qf6 16.d5 with an edge for White.]

[c) Black's best move might well be 9...h6! . This prepares ...Re8 and, if White does nothing, ...d5.

A) The problem for White is that 10.Nh4? is met simply by Nxe4! .;

B) Typical play from here is 10.h3 Re8 and now:

B1) If 11.Nh4!?

B1a) however, Black can play 11...Na5! intending 12.Bc2? *(12.Qf3!* is best *)* 12...Nxe4!;

B1b) 11...Nxe4? White has 12.Qh5! .;

B2) Tiviakov has played 11.Re1 Bxe3! 12.fxe3!? , but of course the rook is not ideally placed on e1 here.;

B3) 11.Bxa7 Rxa7 12.Re1 Ne7 13.d4 Ng6 14.Nc4 Be6 15.dxe5 Bxc4 16.Bxc4 Nxe5 17.Nxe5 dxe5 18.Qb3 Qe7 19.a4 c6 20.a5 Raa8 with an equal position, R.Felgaer−A.Onischuk, Buenos Aires 2005. In summary, 9...h6! is a very solid option which seems to promise Black a position with level chances.;

B4) 11.−−;

C) 10.−−]

10.Nh4! So simple! White plans Bxa7 followed by f2−f4, after which the position will resemble a King's Gambit Declined - and a good version for White

- rather than an Italian Game.

[Tiviakov has noted that the move order 10.Bxa7 Rxa7 11.Nh4 allows Black the possibility of g5 preventing f4. Still, even this position looks quite promising for White after 12.Qf3! Nd7 *(*Black must avoid *12...gxh4 13.Qxf6 Ng6?! 14.Bxf7+!)* 13.Nf5 *(*and White should probably avoid *13.Qe3 gxh4! 14.Qxa7 Nb6!)* 13...Nxf5 14.exf5 .]

10...c6?! This looks a bit slow and it does nothing to challenge White's basic plan. Let's consider alternatives:

[a) 10...Ng6 11.Nxg6 hxg6 12.Bxa7 Rxa7 13.f4 c6 transposes to the main game, and this was actually the move order adopted in both games in the note to White's 14th move.]

[b) With f4 coming, 10...Be6 in order to relieve some of the pressure against f7 looks sensible. Even so, White still keeps an edge with 11.Bxa7 Rxa7 12.f4 , and he gradually built up some pressure on the kingside after exf4 13.Rxf4 d5 14.d4 c5 15.e5 Nd7 16.Bc2 in Z.Efimenko−B.Avrukh, Saint Vincent 2005.]

[c) 10...Bg4!? 11.Qe1! is not even a minor inconvenience, unless Black continues with Nh5! to prevent f4. B. Michiels−P.Vandevoort, Pays de Charleroi 2003, continued 12.h3 Be6 13.Qd1 *(*perhaps *13.Bxe6 fxe6 14.Bxa7 Rxa7 15.g3 Ra8 16.Qe2 Nf6 17.Kh2* and slowly building for f4, à la Karpov−Yusupov *)* 13...Nf4 *(*Black is close to equality after *13...Ng6! 14.Nxg6 Bxb3 15.Qxb3 hxg6 16.d4 Rb8)* 14.Bxf4! exf4 15.Qf3 Bxb3 16.axb3 Ng6 17.Nxg6 fxg6 18.Qg4 Qf6 19.Nf3 Rae8 20.Rfe1 c6 21.b4 Re7 22.Re2 Rfe8 23.Rae1 with an edge - d4 and e5 will eventually arrive.]

[d) There's still time to play 10...Bxe3 here: 11.fxe3 Kh8 *(*or *11...Ng6 12.Nf5 c6 13.d4 d5 14.Qf3 Be6 15.Rae1* with a small advantage for White, D.Barua−K.Sasikiran, Nagpur 2002 *)* 12.h3 Neg8 13.Qe1 g6 14.g4!? Qe7 15.Qg3 Ne8 16.Rf2 Ng7 17.Raf1 Be6 18.d4 Rae8 19.Nhf3 f6 , as played in I. Khamrakulov−A.Rizouk, Lorca 2005, demonstrates good defence by Black. White enjoys more freedom, but Black's position is difficult to break down.]

11.Bxa7! Rxa7 12.f4! Of course! I definitely prefer White's chances here.

12...Ng6 13.Nxg6 hxg6 14.fxe5

[It's possible that 14.Qf3 might be even stronger. What is certainly true is that it has led to three easy wins for White. Strangely (and promisingly from our perspective!), in all three games Black fell for the same trap: Qb6+ *(*this plan is flawed; Simon Williams' suggestion of *14...b5* offering protection to f7 would have been wiser *)* 15.Kh1 Bg4 16.Qg3! Be2? (intending ...Nh5 after rook moves, but...) 17.fxe5! Bxf1 *(*or *17...dxe5 18.Rxf6! gxf6 19.Qxg6+ Kh8 20.Qxf6+ Kg8 21.Re1 Qe3 22.Nc4 Qxd3 23.Nxe5* and 1−0, V. Sikula−M.Hrenic, Latschach 2006 *)* 18.exf6 Bxg2+ *(*Black chose to suffer less in W.Hendriks−D.Ledger, Hastings 2008/09, with *18...Be2 19.Qxg6 Qxb3 20.Qxg7#)* 19.Kxg2 d5 20.fxg7 Re8 21.Rf1 and White

soon won in D.Sadvakasov−H. Melkumyan, Dubai 2007.]

14...dxe5 15.Nf3 Bg4!

[If 15...Qe7 , 16.Ng5 planning Qe1−h4 looks promising for White.]

16.Qe1 Nd7?

[This is a blunder. Black would still be fighting after 16...Bxf3 17.Rxf3 a5! intending 18.Qg3?! a4! .]

17.Qg3! Bxf3 18.Rxf3 The pressure against f7, g6 and e5 is too much to handle, and Black loses a pawn by force.

18...Nc5 19.Bxf7+! Rxf7 20.Rxf7 Kxf7 21.Qf2+

[Resignation is a bit premature, but perhaps De Vreugt didn't wish to experience Tiviakov's renowned technique. After 21.Qf2+ Kg8 22.Qxc5 Ra8 23.d4 White should win in the long run.]

1−0

C54

□ **Emms,J.**

■ **Greet,A.**

British Championship 2005

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.Nc4 d5 Black makes the thematic ... d5 break, ignoring the double attack on the e5−pawn. To me this looks like the best way of meeting 8 Nc4. **9.exd5**

[I don't think Black has much to worry about after 9.Ncxe5 Nxe5 10.Nxe5 dxe4 . For example, 11.d4 (the only chance for an edge is to try to block out the a7−bishop, but Black immediately seeks to activate it) c5! 12.Be3 (M.Klinova−Qin Kanying, New Delhi 2000) and now Qe7 intending ... Be6 is Black's simplest route to a decent position.]

9...Nxd5 10.0−0 With White's king finally tucked away, the threat to e5 becomes real. How should Black deal with it? **10...f6!** This is a key move, which demonstrates that Black is not afraid of the temporary weakness on the a2−g8 diagonal. For example, 11 Ne3 can be met by 11...Be6 followed by ... Kh8.

[10...Re8 looks seemingly more attractive and is certainly playable, but I feel White can cause Black more problems after this move: 11.Re1 Bg4 *(* Black must avoid *11...Qf6 12.d4! e4 13.Ncd2!* , attacking d5 and e4, P. Svidler−H.Steingrimsson, Gausdal 1991 *)* 12.h3 Bxf3 *(* if *12...Bh5* White can safely grab the pawn with *13.g4 Bg6 14.Ncxe5* and follow up with d3−d4 to shut out the a7−bishop *)* 13.Qxf3 Qf6 14.Nd2 Qxf3 15.Nxf3 Nf6 16.Bg5 Rad8 17.Rad1 h6 18.Bh4 with a nagging edge for White, P.Van der Houwen−J.Masek, correspondence 2003. The pawns on d3 and e5 are both weaknesses, but White's two bishops might become a handful if the position opens up.]

11.Re1

[Given how effectively Black deals with this obvious move, there's an argument here for trying something else. If I were to reach this position again, I would be tempted to play 11.Be3!? . It might seem strange to offer Black the chance to grab the two bishops, but actually I think White should be happy to get rid of his dark−squared bishop. It's not easy to find a

useful role for it; indeed, it's in danger of becoming White's worst minor piece. I won't go as far as to claim that this gives White an advantage, but it can lead to some interesting positions. If Nxe3 (this is certainly not the only move) 12.fxe3! Kh8 13.d4 , the position looks genuinely unclear. White's aim − not for the first time − is to keep the a7−bishop firmly out of play. The game Z.Hajnal−L.Vajda, Eger 2002, continued e4 (this looks too committal) 14.Nh4 Ne7 15.g3 g5 *(15...Bh3!?)* 16.Ng2 b5 17.Nd2 f5 18.Qh5! Ng6 and I prefer White's position here. As well as the game's 19.Bc2 , *(*White could consider the pawn break g4 (now or later), or even *19.h4* , intending to meet *gxh4* with *20.Nxe4! fxe4? 21.Nxh4!* with a winning attack: *Nxh4 22.Rxf8+ Qxf8 23.Qe5+ Qg7 24.Qe8+* and it's mate next move. *)*]

11...Kh8! Other moves are possible, but vacating the a2−g8 diagonal is the simplest solution. I think Black is fully equal here. **12.h3**

[White needs to prevent ...Bg4. I wanted to play 12.Nh4 intending Qh5, but I couldn't find a reason why Black should avoid the straightforward g5! 13.Nf3 b5 14.Ne3 Nf4 when White is in serious danger of being worse.]

12...Re8

[12...b5 13.Ne3 Nf4 14.d4 exd4 15.cxd4 Ne7 was equal in A. Tzermiadianos−H.Gretarsson, Rethymnon 2003, *(*and even *15...Nxd4!?* is possible: *16.Nxd4 Qxd4 17.Qf3 Be6 18.Nc2 Qxf2+ 19.Qxf2 Bxf2+ 20.Kxf2 Nd3+ 21.Kf3 Nxe1+ 22.Nxe1* is again equal. *)*]

13.Be3! Better lat e than never (see the note to White's 11th move), even if the circumstances here are less favourable for White.

[13.d4 looks like the only other logical continuation, but after exd4 14.Rxe8+ Qxe8 15.cxd4 *(*or *15.Nxd4 Nxd4 16.cxd4 Be6)* 15...Be6 Black is well coordinated and probably has an edge.]

13...Nxe3 14.Nxe3

[14.fxe3?! makes much less sense with the rook on e1. Besides, after b5! White's knight would have to retreat to the ugly a3−square to avoid dropping the d3−pawn.]

14...Na5?! It is desirable to kick the bishop off the a2−g8 diagonal, but now Black's knight is misplaced, he loses his grip on the centre and White can get in d3−d4.

[14...Be6 15.Bxe6 Rxe6 16.Qb3 looks a bit awkward for Black, but Qc8 should be okay for him.]

[Alternatively, there's 14...Qd6 to prepare ...Be6. White can try 15.Nh4 here, and Be6 *(*unfortunately, Black can spoil the fun with something like *15...Bxe3* first, and only then ... Be6 *)* 16.Nef5 Qd7 17.Qh5 Bxb3 18.axb3 Kg8 19.Ra4! is the kind of thing White should be aiming for.]

15.Bc2 Be6 16.d4! exd4 17.Nxd4 Bg8 18.Qg4 Bxd4 19.cxd4 Nc6 20.d5 Now White enjoys a small advantage. His pieces are the more active, and the isolated d−pawn, although requiring protection, does have a slight cramping effect on Black's position. **20...Ne5**

[20...Ne7 21.Red1 Qd6 is equally playable, *(*but not *21...Nxd5?? 22.Nxd5 Bxd5 23.Qh5 .)*]

21.Qh4 Qd6 22.Red1 Qf8 23.Rac1 Rad8 24.Bb1 Re7 25.Qb4 c6 26.dxc6 Nxc6 27.Qb6 The c− and d−pawns have been exchanged, leaving a symmetrical structure. White's more active pieces still promise an edge, something which is maintained through to the endgame. **27...Red7 28.Rxd7 Rxd7 29.Be4 Qd8 30.Qxd8 Nxd8 31.a3 g6 32.Rc8 Kg7 33.Kf1 Be6 34.Ke1 Kf7 35.Bf3 Ke7 36.Nc4 Rd1+ 37.Kxd1 Bxc8 38.Kd2 Be6 39.Kc3 Kd7 40.Kd4 Bf7 41.Kc5 Kc7**

[During the game I was concerned about the defence 41...Ne6+ 42.Kb6 Nd4 43.Na5? *(* but in fact *43.Bg4+! f5 44.Ne5+ Ke7 45.Nxf7 fxg4 46.Ng5* is still very good for White *)* 43...Nxf3 44.gxf3 Be6! 45.h4 Bd5 .]

42.Bd5 Ne6+

[Now White is probably winning. Passive defence with 42...Be8! offers Black better chances of survival.]

43.Bxe6! Bxe6 44.Nb6! Intending Nd5+. The pawn endings are winning for White because his king is so far advanced and Black runs out of waiting moves. **44...g5 45.Nd5+ Bxd5 46.Kxd5 Kd7 47.g4! Ke7**

[Or, for example, 47...a5 48.b3 b6 49.b4 axb4 50.axb4 h6 51.b5 etc.]

48.Kc5 Kd7 49.Kb6 Kc8 50.a4 Kb8 51.b4! Kc8

[If 51...Ka8 , White wins by 52.Kc7 Ka7 53.b5

A) or 53...a5 54.f3 h6 55.Kc8 *(* but not *55.b6+?? Ka6!)* 55...Kb6 56.Kb8 , winning as in the game;

B) 53...axb5 54.axb5 Ka8 55.b6 h6 56.f3 and it's mate in four.]

52.Ka7 a5! The last try. **53.b5!**

[53.bxa5? Kc7! 54.a6 b6! 55.Ka8 Kc8! is only a draw, but...]

53...Kc7 54.Ka8

[After 54.Ka8 h6 55.f3 Kb6 56.Kb8 White wins the crucial b−pawn and with it the game.]

1−0

C54

□ **S.Tiviakov**

■ **R.El Taher**

Amman 2006

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6

[Note that the actual move order of the game was 5...d6 6.Bb3 a6 7.h3 0−0 8.Bg5 h6 9.Bh4 Be6 10.Nbd2 Ba7 11.Nh2 .]

6.Bb3 Ba7 7.h3 0−0 Black commits himself to neither ...d6 nor ...d5. On the other hand, as we already know, castling itself is committal!

[As well as 7...d6 or 7...d5, there's also the flexible 7...h6!? , preventing the pin and hoping to find out White's intentions before committing to a plan of action. After 8.Nbd2 0−0 ,

A) if 9.Nf1 then d5! 10.Qe2 gives Black an extra ...h6 move in the main lines (the first five games of this chapter). This should be at least partially useful to him, although I'm not 100% sure - we've seen previously how this pawn advance can give White a hook to attack.;

B) Looking at alternatives to 9 Nf1, 9.0−0 d6 10.Re1 would transpose to the 0−0 lines of Chapter Three.;

C) More aggressive players might prefer 9.g4!? . Again White is looking to exploit Black's early ...h6. The positions are double−edged, but this certainly worked well for White in the game T.Stepovaia Dianchenko−I.Turova, Kazan 2004: d5 10.Rg1 *(* even *10.g5 hxg5 11.Nxg5* is interesting; the open g−file is always going to promise White some action *)* 10...dxe4 11.dxe4 Be6 12.Qe2 b5 13.Nf1 Nd7 14.Be3 Na5?! *(14...Nc5!?* looks better *)* 15.Bxe6 fxe6 16.0−0−0 Qe7 17.g5 Bxe3+ 18.Nxe3 hxg5 19.Nxg5 Nf6 20.Rg3 and White's attack looked much more dangerous than Black's.;

D) 9.−−]

8.Bg5! One of the main points behind White's move order with 7 h3 is that 7... 0−0 can be met by this move. This typical pin is more annoying than usual for Black for the following reasons: 1. Black has already castled kingside. Therefore, breaking the pin with ...h6 and ...g5 will compromise his king's safety. 2. White has yet to commit to kingside castling. This might make it easier for him to start an attack on the kingside (for example, meeting ...g5 with h4) without having to worry about his own king's safety. 3. With Black's bishop back on a7, there is no possibility in the foreseeable future to break the pin with ...Be7. In isolation, I don't think any of these factors carry such great significance. When combined, though, they certainly seem to give Black a few headaches. **8...d6 9.Nbd2 Be6**

[The alternative is to break the pin immediately. I.Kulish−O.Stjazhkina, Elista 2000, continued 9...h6 10.Bh4 g5 11.Bg3 *(11.Nxg5!? hxg5 12.Bxg5* is a tempting piece sacrifice; compare Emms−Flear *)*

A) or 11...Nh5 - planning ....Qf6 and ...Nf4 - 12.Nh2!? and now Nf4 *(* or *12...Nxg3 13.fxg3* and White gains a useful open f−file *)* 13.Qf3 followed by 0−0−0 and h4;

B) 11...Re8 12.Nf1 Ne7 13.Qd2 Kg7 14.0−0−0 Ng6 (in view of what happens, Black should probably hold back with this move) 15.h4! g4 16.h5! Nf8 *(* or *16...Nf4 17.Ng1 N6xh5 18.Bh4 f6 19.Ng3)* 17.Nh4 and White is ready to make significant progress on the kingside with f4, Ne3 etc. Black's defences are beginning to creak.]

10.Nh2! Threatening Ng4 and thus encouraging Black to advance on the kingside.

[Garry Kasparov played Bg5 more than once against an early ...0−0, but in G.Kasparov−J.Timman, Rotterdam 1999, he failed to find the right plan: 10.Bh4?! Kh8 11.g4 Ne7! 12.Bxf6 gxf6 13.Nh4 Ng6 14.Ng2 c6 15.Qf3 d5 16.Nf1 a5 17.Ng3 Bc5 18.a4 Be7 19.Ba2 Ra6 20.Nh5 Rb6 21.Qe2 Qd6 with reasonable counterplay for Black. Timman suggested 10 Nh2 as an improvement for White.]

[10.Nf1 would transpose to the note to White's 10th move in Yemelin−Klimov.]

10...h6

[10...d5 is too slow here: 11.Qf3! d4 12.Ng4 Bxg4 13.hxg4 dxc3 14.bxc3 Qd6 15.Nc4 Qe7 16.Qh3

and Black's position was already critical in G.Hassell−S.Smith, correspondence 2000, since h6 17.Bxh6 gxh6 18.Qxh6 forces mate.]

11.Bh4 g5 12.Bg3 Timman assessed this position as 'unclear', but I would prefer to be White and evidently so would Tiviakov! **12...Kg7**

[Ideally Black would really like to shift the queen's knight over to g6 in order to bolster defences on the kingside, but there's not enough time to do so: 12...Ne7?! is met by 13.Bxe6 fxe6 14.Ng4! Nxg4 *(* if *14...Kg7* , White plays *15.Nxf6 Rxf6 16.h4 Ng6 17.hxg5 hxg5 18.Rh5)* 15.Qxg4 , hitting e6 and answering Qd7 with 16.h4 .]

13.Bxe6 fxe6 14.h4! Direct play by Tiviakov - the idea of h4 is obvious and good. The g5−pawn becomes increasingly vulnerable and the h1−rook becomes active on its home square.

14...Rh8 15.Ndf3! Enticing the pawn forward. **15...Kg6** Probably best, although the fact that Black is having to make moves like this is not a good sign for him!

[The 'easy' option would have been 15...g4 16.Nd2 h5 , but then White would simply break with f2−f3 and Black's king would never be completely safe.]

16.Qe2 Nh5 17.hxg5 hxg5 18.0−0−0 Qe7 19.Ng4 Raf8

[Or 19...Nf4 20.Bxf4 and now either exf4 *(* or *20...gxf4 21.g3!* probably killing the king! *)* 21.d4! killing the a7−bishop.]

20.Qd2 Nd8 21.d4! The time is right for this advance. White hopes that once the centre is opened, Black's king will become even more exposed. **21...exd4 22.cxd4 Nf7 23.e5 Kg7 24.Bh2**

[Perhaps 24.Kb1 is stronger. I don't think White should mind if Black trades on g3.]

24...d5! Black's best chance is to keep the position as blocked as possible.

25.Kb1 c5 26.dxc5 Bxc5 27.Rc1 Rc8 28.Nd4 Bb6

[28...Bxd4! 29.Qxd4 Rxc1+ 30.Rxc1 Nd8 intending ...Nc6 would have kept Black in the game.]

29.Ne3 Qd7? 30.Nef5+! Now the bishop on h2 comes right back to life. **30...exf5 31.e6 Qa4 32.Be5+!** Perhaps El Taher overlooked this move.

32...Kg6

[Now 32...Nxe5 33.Qxg5+ mates quickly, so Black is lost.]

33.exf7 Bxd4 34.Bxh8! Rxh8 35.b3 Qd7 36.Qxd4 Rf8 37.Qb6+ 1−0

□ **Ker,A..**
■ **Croad,N..**
109th New Zealand Championship (4)
[Paul Motwani]

Mr Mo's game G12.38: "Ker crunches Croad!" **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4** The Scotch Gambit, but there are many transpositional possibilities that can quickly take us into other openings.
4...Nf6 5.0−0
[5.e5 may be answered by d5 *(*or *5...Ng4; 5...Ne4* for example*.)*]
5...Bc5
[The principal alternative is 5...Nxe4 6.Re1 d5 7.Bxd5 Qxd5 8.Nc3 Qa5 *(*or *8...Qh5)*]
6.e5 d5 7.exf6 dxc4 The opening has now become the Max Lange Attack. Some sources assign an ECO code of C55 while others give C56. I have used the latter. **8.fxg7**
[The "main line" is 8.Re1+ Be6 and then:
A) 9.Ng5 Qd5 *(*after *9...Qxf6? 10.Nxe6 fxe6 11.Qh5+* , the loose c5−bishop goes *)* 10.Nc3 Qf5 11.Nce4 with highly tactical play;
B) 9.fxg7 Rg8 10.Bg5 Be7 transposes to the actual game *(*whereas *10...Qd5 11.Nc3 Qf5 12.Ne4 Rxg7? 13.Nh4!* is a neat trap that has actually happened before *)*]
8...Rg8 9.Re1+
[9.Bg5 Be7 10.Bxe7 Kxe7 is not only very similar to the game itself, but is also mentioned in "Nunn's Chess Openings", and the line stops there with the assessment of "unclear". Clearly, anyone planning to go down such a tricky path should ideally first check it further at home.]
9...Be7 10.Bg5 Be6 11.Bxe7 Kxe7
[11...Qxe7 allows 12.Nxd4 , and after Rd8 *(12...0−0−0 13.Nxc6!)* 13.c3 White will soon play Qa4 or Qh5.]
12.Re4 It was this particular move that really caught my attention when I first spotted this game. **12...d3?!**
[12...Qd5 walks into 13.Nc3!]
[and 12...f5 13.Rh4 is murky, but may in fact represent the 'best' line.]
13.Nc3! White seizes his chance for fast effective piece−development. **13...Rxg7 14.cxd3 Qxd3 15.Nd5+! Kd6 16.Nf4 Qxd1+ 17.Rxd1+ Kc5??** Missing a crucial tactic.
[However, 17...Ke7 18.Nd5+ Kf8 19.Nxc7 is also no fun for Black.]
18.Rxe6! Black resigned, seeing now that 18... fxe6 crashes to 19 Nxe6+: a fatal fork and check.
1−0

C54

□ **Evrard,Paul**
■ **Clerckx,W.**
CCOL1 prel4−03 1946
[Harding]

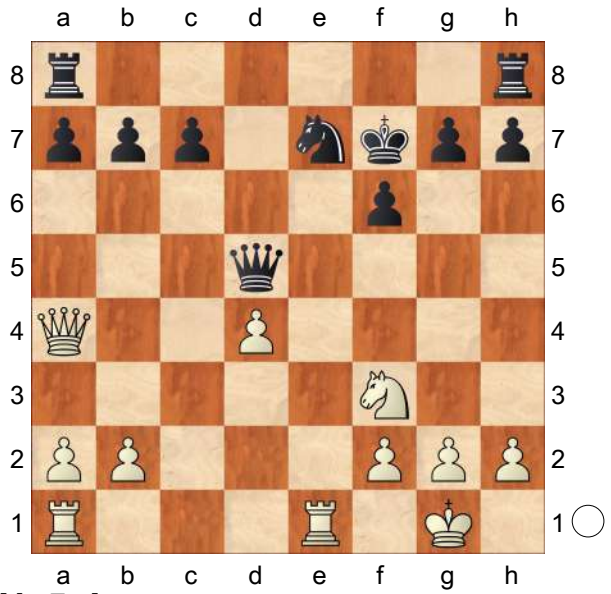
This game is of some theoretical importance for a sideline in the Greco−Möller Attack. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 d5** The only alternative to the customary
[7...Nxe4]
8.exd5 Nxd5 9.0−0 Be6?! You won't get any useful guidance from ECO, MCO or NCO on this sub−variation, once

thought playable for Black. **10.Bg5 Be7 11.Bxd5 Bxd5 12.Nxd5 Qxd5 13.Bxe7 Nxe7 14.Re1 f6 15.Qa4+!** This line was examined in detail by Igor Zaitsev in "64" (1973/48 pp4−7). With the improvements found later, the check is now considered stronger than

[15.Qe2 Qd7 16.Rac1 Steinitz−von Bardeleben, Hastings 1895 Kf7∞]

15...Kf7

[15...Qd7 16.Qb4]



16.Ne5+!

[Zaitsev's analysis focused on 16.Rac1

A) 16...c6 17.Rxe7+! Kxe7 18.Qb4+ Kf7 19.Qxb7+ Kg6 20.Ne5+! *(20.Rxc6* (Zaitsev) *Rhc8* leads to a draw (Wade) *)* 20...fxe5 21.Rxc6++− Wade;

B) 16...Qd6! 17.Qb3+ *(17.Qc2 Nd5 18.Qf5 g6)* 17...Nd5 18.Nd2±]

16...fxe5 Black is forced to accept the knight as 16...♔f8 is answered by 17 ♘d3 followed by ♘f4. **17.Rxe5 Qd6 18.Qb3+**

[Zaitsev only gave 18.Rae1 Ng8!]

[According to Estrin, in his posthumously published book Die Italienische Partie (Franck, 1985), the winning line is 18.Qc4+! Kf8 19.Rae1 Ng8 *(19...Re8 20.R1e3 g6 21.Re6!)* 20.Rd5 Qc6 21.Qb4+! *(21.Rc5 Re8! 22.Rxe8+ Qxe8)* 21...Kf7 22.Rc5 Qd6 23.Qc4+ Kf8 24.Rxc7+− ΔNh6 25.Rc8+ Estrin attributes the idea of the ♘ sacrifice to GM Geller but here we see that the French amateur Evrard found essentially the same idea two or three decades earlier.]

18...Kf8 19.Rae1 Re8

[19...Ng8 20.Rd5 Qb6 is the reason why the check on c4 is more accurate, but even here White may be winning. 21.Qa3+]

20.Re6 Qd7 21.R1e3 g6 22.Rf6+ 1−0

□ **Smith,Robin**
■ **Gach,Andrew**
USCCC−13 final 1999
[Smith]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ Bd7?!
The Informants give this whole line, starting with 6....Bd7 as "with compensation", so it is no wonder that Black picked it. But I think there is good reason Bd7 is almost never played by GM's. Black actually ends up without much compensation.
[Black also may have been intimidated by an "if move" that I sent .... If 6...c6 then 7.dxc6 then if bxc6 8.Qf3]
7.Qe2 Bd6
[RR7...Be7 is probably better; see Kibitzer 59.]
8.Nc3 0−0 9.Bxd7 Qxd7 10.a3
This move has not been played a lot, but it creates an issue Black has to deal with .... White threatens to win the a5 knight with b4, while at the same time keeping Black's Bishop forever out of b4.
10...Be7N Indirectly g the Knight, due to the threat of Nxd5. Previously Black has played b6, to give the Knight an escape square. #
[10...b6 11.0−0± *(11.d3±)*]
11.0−0 White still must be careful
[11.b4? Nxd5 12.Nxh7⩲]
[11.Nxh7!?±]
[11.Qxe5? Bd6 12.Qd4 Rfe8+⩲]
[11.d3?! Nxd5⩲]
[11.Nf3!?±]
11...Nxd5
[11...Rfe8 12.d3 *(12.Nxf7 Kxf7 13.b4±)* 12...Nxd5 13.Qxe5± is similar to the game]
12.Qxe5 c6
[12...Nxc3 13.Qxc3 Bxg5 14.Qxa5±]
13.d3 Rfe8
[13...Nxc3 14.Qxc3±]
[13...f6 14.Qe6+ Qxe6 15.Nxe6 Nxc3 16.Nxf8 Ne2+ 17.Kh1+− since Black cannot take the f8 Knight without losing one of his Knights too.]
[13...Bf6 14.Qe4 Bxg5□ Qxh7 was threatened 15.Bxg5 Nxc3 16.bxc3±]
14.Bd2 Again developing while threatening the Knight on a5. It looks risky for White to keep the Queen on the e−file, but one of the advantages of postal chess is that risks can be thoroughly evaluated. Actually the Queen and Knights are all quite safe. #
14...b6
[14...Bf6 15.Qg3 Nxc3 16.Bxc3 Bxc3 17.bxc3±]
[14...Bxa3 and Black's pieces hang on the a−file, e.g. 15.Qd4 Bxb2 16.Rxa5 Qd8 17.Qh4 Qxa5 *(17...h6 18.Nxd5 hxg5 19.Qb4+−)* 18.Qxh7+ Kf8 19.Qh5+−]
15.Qg3 Nb7 White has avoided all the pitfalls and emerged a clear pawn up. Now White sets out to trade down into a won ending. **16.Rfe1 Bd6 17.Qh4 h6 18.Nf3 Nc5 19.Nxd5 cxd5 20.Bc3 Rac8 21.Rxe8+ Rxe8 22.Qd4 Ne6 23.Qg4 Qc7 24.Re1 Re7 25.g3 a5 26.Nd4 Nxd4 27.Rxe7 Bxe7 28.Qxd4**
[also possible is 28.Bxd4 Bf8±]
28...Bf6 29.Qxd5
[29.Qf4? Qxf4 30.gxf4 d4!⩱ *(30...Bxc3? 31.bxc3 Kf8 32.Kg2 Ke7 33.Kf3±)*]
29...Bxc3 30.bxc3 Qxc3 31.Qb3
[The pawn race starting with 31.d4?

Qxa3= is good for Black.]
31...Qd4 The trading down strategy has been a success; but Queen endings can be very tricky. Back on move 28 I had examined the position now on the board long enough to convince me it is won. At first it looks like Black's excellent Queen position gives him good drawing chances and I considered avoiding this position by playing 28.Bxd4, but in the present position White's Queen can manoeuvre to b5, c6 and if need be finally e4, driving Black's Queen away. **32.a4** First I need to imobilize Black's b−pawn. **32...Kf8**
[after 32...h5 33.Qb5 and White can follow a plan similar to the one in the game.]
[or 32...g5 33.h3 h5 34.Kf1 and again White can follow a plan similar to what is played in the game.]
33.Qb5 Ke7 34.Qc6 In Queen endings it is important to have her Majesty actively placed. The Queen is much more active on c6 than it was on b3. **34...Qd6?** This leads to a simple and clearly lost K+P's ending. The game is probably lost anyway, but leaving the Queens on retains Black's only chance to hold a draw. Much better for Black is to sit tight with f6, or f5 or even h5, and see what White does. (See also Smith book p145) **35.Qxd6+ Kxd6 36.Kf1** White's King will make it to the a file just in time. **36...b5**
[36...Kc5 37.c3 b5 38.Ke2 bxa4 39.Kd2+−]
37.Ke2 bxa4 38.Kd2 a3 39.Kc1 Kc5 40.Kb1 Kb4 41.Ka2 f5 42.d4 Kc4 43.c3 Black's problem in this ending. The c3 pawn cannot be taken or the d−pawn takes off and queens. **43...g5 44.Kxa3**
1−0

□ **Steinitz,William**
■ **Von Bardeleben,Curt**
Hastings (10) 17.08.1895
[Knaak]

Steinitz was definitely past his best in 1895, but as he himself said, "I may be an old lion, but I can still bite someone's

hand off if he puts it in my mouth." The choleric von Bardeleben left the room after move 25 and permitted his time to expire, whereupon Steinitz demonstrated to the onlookers a brilliant 10−move mating combination Tartakower/du Mont/ Reti: 'C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3 ' Vladimir Vukovic: 'The following brilliancy by Steinitz is an example of a game in which White plays consistently to build up pressure on the e−file and finally makes his decisive breakthrough there.' Vladimir Vukovic: 'The following brilliancy by Steinitz is an example of a game in which White plays consistently to build up pressure on the e−file and finally makes his decisive breakthrough there. ' Hastings 1895 ging als eines der großartigsten Turniere aller Zeiten in die Geschichte ein. Pillsbury siegte vor Chigorin, erst dann kamen die eigentlichen Favoriten Lasker, Tarrasch und Steinitz. Letzterer, erst ein Jahr zuvor von Lasker auf dem Weltmeisterschaftsthron abgelöst, spielte dabei gegen den Deutschen Curt von Bardeleben eine Glanzpartie, die ihm zu Recht den 1. Schönheitspreis des Turniers eintrug. Ein ähnliches Glanzstück gelang Steinitz schon zu Beginn seiner Karriere (gegen Mongredien, London 1862), aber aus seiner erfolgreichen Zeit sind solche Kabinettstückchen nicht bekannt. Hastings 1895 ging als eines der großartigsten Turniere aller Zeiten in die Geschichte ein. Pillsbury siegte vor Chigorin, erst dann kamen die eigentlichen Favoriten Lasker, Tarrasch und Steinitz. Letzterer, erst ein Jahr zuvor von Lasker auf dem Weltmeisterschaftsthron abgelöst, spielte dabei gegen den Deutschen Curt von Bardeleben eine Glanzpartie, die ihm zu Recht den 1. Schönheitspreis des Turniers eintrug. Ein ähnliches Glanzstück gelang Steinitz schon zu Beginn seiner Karriere (gegen Mongredien, London 1862), aber aus seiner erfolgreichen Zeit sind solche Kabinettstückchen nicht bekannt. " Tartakower/du Mont/Reti: 'Sources: Sources: Tartakower & du Mont, 500 Master Games of Chess, pp.9−10; The Hastings Tournament, 1895, pp. 157−158; Reti, Masters of the Chessboard, pp. 52−55. All comments are Tartakower's unless otherwise noted. The feature of the following game is how White fastened on a small weakness in the enemy's camp and how, by skilful manoeuvring, he prevented him from castling. Never relaxing his grip, he wound up the game with one of the most beautiful and esthetically satisfying

combinations ever devised on the chessboard. ' **1.e4** ChessBase ChessBase Tartakower/du Mont/Reti ChessBase **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3** ChessBase: '!?' Fischer sim Davis 1964

[ChessBase]

Bobby Fischer: 'GAME N. 50 Tour de force. As one of ten simultaneous clock games played on tour. at Davis College, this is a perfect example of the precept

that if White makes a slip in the opening he is punished by loss of the initiative, while if Black makes a slip (since he is skating on thin ice from the very start) it is likely to be fatal. 6 ... d6 is the offender. With 9 Qh5 Fischer assumes a commanding control of space, but faces a strong defense which compels him to offer a piece in order to maintain pressure. Continuing with restraint and circumspection, he builds up the attack with a series of quiet developing moves − reminiscent of Morphy 's famous victory over the Duke of Brunswick at the Paris opera. When the time is ripe, Fischer throws everything at Black's King, including the proverbial kitchen sink. His show of brute force is handsomely rewarded. ' **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4!?** Evans,W Bobby Fischer: 'The Evans was already analyzed to death by the 'nineties. But it still makes for enterprising chess. Evans,W'

□ **S.Tiviakov**

■ **G.Sargissian**

FIDE World Championship, Tripoli 2004

[John Emms]

One question you might ask is, does White's attack offer chances for success against a 2600+ grandmaster? Let's see... **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Bb3 a6 7.h3 Ba7 8.Nbd2 0−0 9.Nf1 d5 10.Qe2 dxe4 11.dxe4 Qe7 12.Ng3 Be6**

[This is much stronger than 12...h6? . Black's bishop move already brings about a key moment, with White facing a question which arises time and time again in the Italian Game. Should he allow the exchange of the light−squared bishops or avoid it? In general this question is very difficult to answer, and in many situations the correct choice may ultimately depend on a player's style. Let's see what Tiviakov does:]

13.Bc2!? Tiviakov chooses to keep the bishops on the board. This Bb3−c2 retreat can be difficult to comprehend at first. I admit it's certainly not the sort of move I would have considered playing when I was younger. On the surface White seems to be spending a tempo moving his bishop to a more passive position, and leaving Black's e6−bishop in possession of the a2−g8 diagonal. If all of this is true (and it is!), why are grandmasters and Italian Game experts like Tiviakov happy to play this way? Why do they view Bc2 as White's most ambitious option? Well, maybe this retreat could be compared to some extent with White's automatic Bb3−c2 when faced with ...Na5 in the Ruy Lopez. The bishop becomes temporarily passive, but White is counting on its long−term potential. Furthermore, despite the symmetrical pawn structure it does seem as though Black enjoys slightly less manoeuvring space for his pieces, and so in general he would welcome an exchange of minor pieces. Of course, in the Lopez scenario there's an extra incentive - to leave Black with a less than ideal knight on a5. This is why there Bc2 is an 'automatic' choice, whereas here the decision requires some agonizing.

[Let's see how Black should defend if White allows the exchange and continues action on the kingside: 13.Nh4 (planning Nf5) Bxb3 14.axb3 Qe6! (with the bishops off the board, the queen sits very comfortably on this square - it's now her job to patrol the light squares) 15.b4 Ne8 (this knight will go to d6 to battle for control of f5) 16.0−0 Nd6 17.Nhf5 *(*or *17.Kh2 Ne7 18.f4 exf4 19.Bxf4 Ng6* with a roughly equal position, G. Ardelean−I.Chirila, Eforie Nord 2009 *)* . In this position Black should avoid 17...Nxf5?! *(17...Ne7* is a wiser choice, and here *18.Nxd6 Qxd6 19.Rd1 Qc6* leaves Black close to equality *)* 18.exf5! which gives White a great square on e4 for his knight and the possibility to break up Black's kingside with f6.]

Let's return to the position after 13 Bc2.

White's immediate plan is Nh4 followed by Nf5 and possibly Qf3. How should Black react? **13...Rfe8**

[If Black wants to activate a rook, isn't 13...Rad8 more desirable?

A) Yes it is, especially since after 14.Nh4 the rook on d8 helps with the tactical shot Nb4! . This seems to solve Black's problems. For example, 15.Bb1 *(* White should avoid *15.cxb4 Qxb4+ 16.Bd2 Rxd2! 17.Qxd2 Bxf2+ 18.Kd1 Qxd2+ 19.Kxd2 Bxg3 ,;* while *15.Nhf5 Nxc2+ 16.Qxc2 Bxf5 17.Nxf5 Qe6 18.0−0* reaches an equal position *)* 15...Qd6! 16.Nhf5 Nd3+ 17.Bxd3 Qxd3 18.Bg5 Nxe4!? 19.Qxe4 Qxe4+ 20.Nxe4 f6! etc.;

B) White might be better off playing 14.0−0 instead.;

C) 14.−−]

[Another idea for Black is to prevent Nh4 with 13...Ne8 , when again the knight is ready to hop into d6:

A) 14.0−0 Nd6 15.Re1 f6 16.Nh2 Rad8 17.Ng4 Qf7 18.Bb1 Kh8 19.Ne3 Rd7 20.b3 Rfd8 , as played in V.Nevednichy−L. Fressinet, Khanty Mansiysk 2007, provides a good demonstration of a successful Black strategy - White's kingside play has come to nothing and Black is slowly improving his position.;

B) White needs more dynamism here, and his play in D.Howell−P. Svidler, Dresden Olympiad 2008, provides more of a challenge: 14.Ng5 Bd7 15.Nf5 Qf6 *(15...Bxf5 16.exf5* reveals the point behind moving the knight to g5, as the e4−square is now beckoning *)* 16.h4 *(16.Nf3* intending Bg5 followed by 0−0−0 is also possible *)* 16...Nd6 *(* if Black plays *16...h6* White could ignore the attack on the knight, since *17.Bd2 hxg5? 18.hxg5 Qg6 19.0−0−0* looks to me like a very strong attack down the h−file *)* . In this position my feeling is that 17.g4!? , as suggested in 'Chess Today', *(* looks more ambitious than Howell's *17.Ne3 .)*;

C) 14.−−]

14.Nh4! Now there is absolutely nothing to dissuade White from carrying out this desirable idea. It's surprising just how quickly Black's position worsens from here on. **14...Qf8**

[14...g6 prevents an entry into f5 for the moment, but the pin with 15.Bg5 is obviously going to hurt Black.]

[14...Qc5 offers Black more possibilities, such as ...Qc4, ...Qb5 or ...Bc4. Here Lukacs feels that 15.Bg5! , intending Bc4 16.Qf3 Re6 17.Nhf5 , is White's best option and I agree with him. White is threatening −− 18.Nxg7! Kxg7 19.Bxf6+ Rxf6 20.Nh5+ .]

15.Nhf5 Ne7! Black has to challenge this powerfully placed knight as quickly as possible. **16.Bg5 Bxf5?**

[Black really needed to keep this bishop in order to oppose its counterpart, whose scope is about to be increased with the change of pawn structure. Having said that, 16...Nxf5 isn't a bed of roses for Black either: 17.exf5! *(17.Nxf5 Nd7!* followed by ... f6 minimizes Black's disadvantage *)* 17...Bd5 18.0−0−0!? intending to

meet Bxa2 with 19.Bxf6 gxf6 20.Ne4 .]

17.exf5 Ned5 18.0−0−0! Excellent play! Tiviakov exploits to the full his earlier decision to delay castling. Indeed, 0−0−0 is now the natural choice, with White's active pieces, powerful bishops and pawn spearhead on f5 providing ample ammunition for a kingside attack. White enjoys a significant advantage in this position. **18...h6 19.Bh4 Qc5 20.Ne4 Qc6 21.Bb3 Nf4!? 22.Nxf6+ Qxf6 23.Qg4 Qc6 24.f6! Qxg2?**

[24...g6 is more resilient, even though White is in complete control after 25.Rd7 Ne6 26.Rhd1 .]

25.Bg3! g5 26.Qd7?

[26.Bxf4! was much stronger. White wins after Qxg4 27.hxg4 exf4 28.Rxh6 Bxf2 29.Rg6+! Kf8 30.Rg7 , as indicated by Lukacs.]

26...Rf8?

[Missing a big chance to get back into the game with 26...Ne6! .]

27.Bxf4! Tiviakov rarely wastes a second opportunity! **27...exf4 28.Qf5! Rfd8 29.Qg6+**

□ **Fischer,Robert James**

■ **Bisguier,Arthur Bernard**

New York State op (6) 02.09.1963

[ChessBase]

Bobby Fischer: 'GAME N. 45 Ghosts. Steinitz, nicknamed "the Austrian Morphy" (although two styles could hardly be more dissimilar), apparently exercises a great influence on Fischer, who has restored several of his pet lines to prominence. One of these is the bizarre 9.Nh3!?, found wanting at the turn of the century, and perhaps best left there. Bisguier appears unimpressed, regaining his gambit Pawn with a strong initiative. But he misses several opportunities to gain an advantage and is gradually outplayed. Just at the critical moment, when the chances are roughly equal, he commits the same kind of gross oversight that had doomed Fischer against Spassky (game 18). He suffers the same fate. ' **1.e4** Bobby Fischer Bobby Fischer: ', Best by test. ' **1...e5 2.Nf3 Nc6 3.Bc4** Bobby Fischer: ', The last time I played this move in a tournament was when I was 12, at the 1955 US Junior Championship. ' **3...Nf6!?** Bobby Fischer: '; Steinitz considered this to be an unsound sacrificial continuation! ' **4.Ng5** Bobby Fischer: ', Tarrasch branded this a "duffer's move" and Panov called it "primitive." But there is no other way for White to try for an advantage.'

□ **S.Roy Chowdhury**
■ **J.Skjoldborg**
Prague 2008
[John Emms]

In the final two games of this chapter we consider Black's main alternatives to 7... d6. These are 7...d5, 7...0−0 and 7...h6. Let's begin with 7....d5: **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d5** Black's d−pawn advances straightaway to d5. The advantage of this approach is that Black doesn't spend a tempo on ...d6 before playing ...d5. The disadvantage is that White hasn't committed himself to the Nd2−f1 plan, and he has other possibilities. **8.exd5** This is an important moment, with White choosing a completely different strategy - Plan B. Instead of holding the centre, as we've seen in previous games, White chooses to open it. He will castle quickly and

then try to combine pressure on the centre (in particular the e5−pawn) with dynamic piece play.

[If White wants to stick to Plan A, there's an argument here for 8.Qe2 , and if 0−0 9.Bg5! utilizing the fact that White hasn't had to play Nd2−f1 before developing this bishop. S. Conquest−J.Parker, British League 2009, continued typically with dxe4 10.dxe4 Be6 11.Nbd2 Bxb3 12.axb3 Qd6 13.Nh4 Qe6 14.Nf5 Ne8 15.b4 f6 16.Be3 Bxe3 17.Nxe3 Nd6 18.0−0 when you could only describe the chances as level. Even so, there is still plenty of scope for either side to outplay his opponent here, and it's worth giving the rest of this grandmaster battle to show how Conquest slowly gained an advantage: Rad8 19.Rfd1 Ne7 20.Qg4 Qf7 21.Ra5!? Ng6 22.g3 Rfe8 23.Rd5 c6? *(* this seemingly imperceptible weakening of d6 is eventually fatal; there's nothing wrong with Black's position after *23...Ne7)* 24.Rd3 Qc7 25.Ndc4 Nxc4 26.Rxd8 Rxd8 27.Qe6+! Kh8 28.Rxd8+ Qxd8 29.Nxc4 Qd1+ 30.Kg2 h5 31.h4 Qd3 32.Nd6 Kh7 33.Qf5! Qxd6 34.Qxh5+ Kg8 35.Qxg6 Qd2 36.h5 Kf8 37.Qf5 Qd8 38.Qe6 1−0.]

8...Nxd5 9.0−0 0−0 10.Re1

Quickly attacking the e5−pawn. White must continue with purpose, otherwise Black would soon reach a comfortable position. **10...f6** This move looks like a surprising way to defend the e5−pawn, but it's not that easy for White to fully exploit the pin on the d5−knight and the temporary weakness of the a2−g8 diagonal. What's more, defending the e5−pawn with pieces presents more problems for Black than you might think. Here are some alternatives:

[a) 10...Re8?! is met strongly by 11.d4! . This is a key tactical theme to remember - Black loses a piece if he captures on d4. e4 is the obvious choice, but 12.Ng5 leaves Black in difficulties. For example, Bf5 *(* or *12...e3 13.Bxe3 Rxe3 14.Rxe3 Nxe3 15.Qh5* , winning *)* 13.Nxf7! Kxf7 *(13...Qd7* is met by *14.Qh5* - Lukacs *)* 14.Qh5+ g6 *(14...Ke6 15.c4* regains the piece *)* 15.Qxh7+ Ke6 *(* or *15...Kf6 16.Qh4+ Ke6 17.Bg5 Qd6 18.Nd2)* 16.g4 with a big advantage for White, M. Kobalija−V.Petkov, European Ch., Plovdiv 2008.]

[b) 10...Qd6 rather invites 11.Nbd2 intending Nc4 or Ne4. In this position Nf4 looks critical: 12.Ne4 *(12.Nc4 Qxd3 13.Bxf4 Qxd1 14.Raxd1 exf4 15.Nce5* - Lukacs - also looks promising *)* 12...Qxd3 *(* or *12...Qg6 13.Bxf4 exf4 14.Kf1 Kh8 15.Qd2* with an edge for White, V.Nevednichy−R.Dabo Peranic, Bizovac 2006 - after the exchange on f4, Black's a7−bishop is in constant danger of being shut out by d3−d4 *)* 13.Bxf4 Qxd1 14.Raxd1 exf4 15.Neg5 . I think that White's activity is worth more than a pawn here. For example, Na5 16.Bxf7+! Rxf7 17.Nxf7 Kxf7 18.Ne5+ Kf6 19.Rd8 threatening Ng4+ followed by Ree8.]

[c) 10...Be6 is a decent option for Black:

A) The tactical justification is 11.Nxe5? Nxe5 12.Rxe5 Bxf2+! intending 13.Kxf2? Qf6+

. This theme is well worth remembering because it crops up in many similar positions.;
B) 11.Na3 b5! 12.Nc2 Qf6 13.Qe2 h6 14.Be3 Bxe3 15.fxe3 Rad8 was equal in F.Vallejo Pons−V.Topalov, Dos Hermanas (rapid) 2008, but I'm not totally convinced by 11 Na3.;
C) Lukacs's suggestion of 11.Qe2!? looks more interesting. He gives Re8 *(*if *11...Qf6 12.Qe4* and ...Rd8 runs into Bg5,*;* or *11...f6 12.d4 Re8 13.dxe5 Bf7 14.Qd1 Nxe5 15.Nxe5 Rxe5 16.Rxe5 fxe5 17.Nd2 Qh4 18.Qe2 c6 19.Nf3)* 12.Ng5 and assesses the position as "±". It's worth playing a few more moves after Nf4 , which looks critical to me: 13.Bxf4 Bxb3 14.axb3 exf4 15.Qxe8+ Qxe8 16.Rxe8+ Rxe8 17.Kf1 Ne5 (otherwise White plays d4 to kill the a7−bishop) 18.d4 h6! *(18...Nd3? 19.Na3!* leaves Black's knight embarrassed, and it becomes trapped after *Nxb2 20.Rb1 Nd3 21.Rd1 Nb2 22.Rd2)* 19.Nf3 Nxf3 20.gxf3 c6 21.Nd2 Bb6 22.b4 with a level endgame position.;
D) 11.−−]

11.d4
[11.Nbd2 is possible but I feel that White's best chance of an edge might well be to clarify things in the centre, accept an isolated queen's pawn (IQP) and then try to exploit the light−squared weaknesses in Black's camp. If this is the case, the knight most certainly belongs on c3 rather than d2.]

11...exd4 There was little choice, as White was threatening 12 dxe5 uncovering an attack on d5. **12.Nxd4!?**
[12.cxd4 would be very promising for White after 12...Kh8 13 Nc3!, but Na5! , as played in F.De la Paz−N.Short, Ottawa 2007, is a stronger move. Black doesn't mind investing a tempo or more if it means he can swap off White's powerful light−squared bishop. That game continued 13.Nc3 *(13.Bc2!? Nb4 14.Be4 f5* forces the exchange, but this is worthy of consideration because ...f6−f5 is quite a concession from Black *)* 13...Nxb3 14.Qxb3 c6 15.Bf4 Rf7 16.Bg3 Bf5 and here White should have played 17.Nh4 .]

12...Nxd4 13.cxd4 The exchange of knights means that it's easier for Black to support his remaining knight on d5 with ...c6. On the other hand, it also means that White gets to keep his powerful light−squared bishop! **13...Kh8 14.Nc3 Nxc3?!** I don't like this move, and neither does Black's bishop on a7!
[The solid 14...c6 is the most obvious choice, although it's entirely possible that White keeps a small edge in the symmetrical structure arising after 15.Nxd5 cxd5 16.Qf3 Bxd4 17.Bxd5 , because of his slight lead in development and Black's weaker king. At the very least Black will have to display some accuracy to equalize.]
[14...Ne7 is another try, and here White could consider building up the pressure with 15.d5 intending Qf3, Bf4 (or Be3), Rad1 etc.]

15.bxc3 Re8 16.Rxe8+ Qxe8 17.Bf4 c6 18.Qd3 Bb8 Understandably Black was keen to swap off or improve the position of his problem bishop, but this

'undevelopment' leaves him lacking coordination and with back rank issues.
19.Bxb8?! White begins to drift and lets Black off the hook.
[19.Bd2! prepares Re1 and keeps up the pressure. For example, Bd7 20.Re1 Qf8 21.Bc2 g6 22.Qf3 intending to meet Bc7 with 23.Bh6! Qxh6 24.Qxf6+ Qg7 25.Qxg7+ Kxg7 26.Re7+ .]
19...Rxb8 20.Kf1
[20.Bc2 g6 21.Qg3 is stronger.]
20...Qf8 21.Re1 Bd7 22.Qe3 Re8 23.Qf4 Rxe1+ 24.Kxe1 Qe7+ 25.Kd2 Bc8 26.g4 g6 27.h4 Kg7 28.g5 Be6?
[White has no real advantage after 28...Bf5! .]
29.Bxe6 Qxe6 30.Qc7+ Qf7 31.gxf6+
[I wonder whether Black lost on time here. His problem is that 31.gxf6+ Kxf6 *(* so *31...Kg8* is forced, and then White has excellent chances to convert his extra pawn after *32.Qc8+ Qf8 33.f7+ Kxf7 34.Qxb7+)* allows 32.Qe5# .]

□ **S.Kindermann**
■ **M.Dietmayer Kraeutler**
Austrian League 2007
[John Emms]

We've seen that pinning with Bg5 is sometimes good, sometimes bad and occasionally somewhere in−between - it all depends on the specifics of the position. The same cannot be said about ...Bg4. Although it might be stretching things to call this outwardly enticing move an outright mistake, White is usually more than happy to see it arrive on the board. In the notes to Erenburg−Kreizberg we saw how White can deal

effectively with an early ...Bg4 if he hasn't castled. In the following game White has committed his king, but a similar plan should still promise him some advantage. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 d6 7.Bb3 Bg4 8.Nbd2!**

[Black has yet to commit his king, and he shouldn't be encouraged to attack on the kingside. So White should avoid giving Black a 'hook' with 8.h3 Bh5 9.Nbd2 , when h6 followed by ... g5 would be a tempting plan.]

8...0−0

[If Black insists on castling long, White leaves the kingside alone and just organizes action on the other wing. For example, 8...Qd7 9.Re1 0−0−0 10.Bc2! d5 11.b4 Ba7 12.a4! etc.]

9.h3

[Now it's okay to put the question to the bishop, although there's also nothing wrong with playing 9.Re1 first.]

9...Bh5 It might be better just to accept the loss of time and retreat to e6. **10.Re1** There's no point delaying the strong Nf1−g3 plan. **10...Re8**

[10...d5 can be met by 11.exd5! Nxd5 12.Ne4 . This can be compared to similar positions arising in Chapter Two, but here White's tempo gain, caused by ...d7−d6−d5, leaves him in control: Ba7 13.Ng3 Bg6 *(* giving up the bishop pair with *13...Bxf3 14.Qxf3* is hardly fun for Black either *)* 14.Nxe5 Nxe5 15.Rxe5 left White a pawn up for nothing in P. Lyrberg−J.Barkhagen, Budapest 1993.]

11.Nf1 h6

[11...d5 is again premature: 12.exd5 Nxd5 13.Ng3 Bg6 14.d4! wins a pawn with a tactic we've seen before.]

[11...Qd7 12.Bg5! is also awkward for Black: Bg6 13.Bxf6 gxf6 14.Ng3 f5 15.exf5 Bxf5 16.Ng5 Bg6 17.Qf3 Qe7 18.N5e4 Kh8 19.Nf5 Qf8 20.Nf6 Red8 21.h4 Bb6 22.Bd5 Rab8 23.h5 with a dominating position, V.Spasov−M.Mitkov, Istanbul 2001.]

12.Ng3

[This is good enough, but White can play with even more ambition with 12.g4! Bg6 *(* White is well enough protected after *12...Nxg4 13.hxg4 Bxg4 14.Kg2 Qf6 15.Be3)* 13.Ng3 . The h3/g4 set−up is particularly effective when reinforced by a knight on g3, which is useful both in defence and attack. White has a firm grip on the kingside and if he isn't careful Black can easily get squashed, as in the following example: Qd7 14.Nh4 Kh8 15.Kg2 Ne7 *(15...Nd8* planning ...Ne6 looks wiser *)* 16.g5!? *(16.Qf3 Nh7 17.Nhf5* is solid and good *)* 16...Nfg8 17.Qg4! Qxg4 18.hxg4 a5 *(* or *18...hxg5 19.Nxg6+ Nxg6 20.Bxg5* and Rh1+ is coming *)* 19.Rh1 a4 20.Bc2 Kh7 21.gxh6 gxh6 22.g5 and White soon won, T. Halmeenmaeki−G.Buchhauser, correspondence 2000.]

12...Bg6

[12...Bxf3 13.Qxf3 would just be an admission that the whole plan with ... Bg4 was misguided. Nf5 is coming and White has a ready−made attack.]

13.Nh4!?

[If White doesn't want to sacrifice the exchange and enter the following

complications, 13.Nh2 intending Qf3 is reasonable,]
[or just 13.Qe2 . One nice line, certainly not forced, is Bh7 *(13...Qd7* is met by *14.Nh4!)* 14.Nh2 d5 15.Ng4 Nxg4 16.Qxg4 Qf6 17.Nh5! Qxf2+ 18.Kh2 Bg6 19.Bxh6! (over−protecting g1!) gxh6 20.Re2 and White wins!]

13...Nxe4!
[Definitely the best. After 13...Bh7 14.Qf3 Black is already under considerable pressure on the kingside and he has absolutely no counterplay.]

14.Rxe4! Bxe4 15.Qg4 Bxd3 16.Nh5 g5 17.Qf3 Kh8
[17...d5 18.Qxd3 gxh4 19.Qf3 is good for White.]

18.Qxd3 gxh4 19.Qf5 Rg8 20.Bxh6
[20.Bxf7 might be stronger. Rybka's main line is Qe7 21.Bxg8 Rxg8 22.Bxh6 Nd8 23.Nf6 Qf7 24.Bg5 Ne6 25.Bxh4 and White is better, although the position remains complicated.]

20...Qe7?
[After 20...Rg6! White might well be advised to accept the perpetual line 21.Bg7+ Rxg7 22.Nxg7 Kxg7 23.Qxf7+ Kh8 24.Qh5+ Kg7 25.Qf7+ etc.]

21.Nf6! Now White is firmly back in control. **21...Rg6 22.Qh5 Qxf6**
[22...Bxf2+! 23.Kh1 Qxf6 24.Bg5+ Kg7 25.Bxf6+ Rxf6 would have been a tougher nut to crack.]

23.Bg5+ Kg7 24.Bxf6+ Rxf6 25.Qg5+ Rg6 26.Qxh4 Rh8
[And here Black should have tried 26...f5 .]

27.Qe4 Rxh3 28.Qf5! Now it really is over as a contest. **28...Rh7 29.Qxf7+ Kh6 30.Qf8+ Rhg7 31.Qh8+ Rh7 32.Qf8+ Rhg7 33.Bd5 Rg4 34.Qf6+ R7g6 35.Qh8+ Kg5 36.Rd1 Rf4 37.Rd2 Bb6 38.g3 Rg4 39.Kg2 e4 40.Re2 Kf5 41.Bxe4+ Rxe4 42.Qh5+ 1−0**

□ **S.Erenburg**
■ **M.Kreizberg**
Tel Aviv 2002
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 This is still a very popular move order for Black, especially at club level. Again transpositions are frequent, since Black typically plays ...a6 at some point. In this game I'll focus on lines where he doesn't. **6.Bb3 h6** Black has quite a few alternatives:

[a) What should White play against 6...0−0 ? Hopefully 7.Bg5! should be an automatic reaction by now! Play is similar to Tiviakov−El Taher and in fact a transposition is possible after Be6 8.Nbd2 a6 9.h3 Ba7 10.Nh2 h6 11.Bh4 .]

[b) 6...Be6 can be met by 7 0−0, 7 Nbd2, 7 Bc2 or even 7 Ba4!?, exploiting the fact that there is no ... b5 available for Black. There's also the possibility of 7.Ng5!? which works because Bxb3 *(*Black can avoid the pawn loss with *7...d5 8.Nxe6 fxe6 9.Nd2 0−0 10.0−0* , as indicated by Lukacs, when we reach a position of dynamic imbalance, where Black's light−squared control and pawn structure has been compromised, and White has the bishop pair, but Black enjoys some central control and can seek action down the open f−file; if pushed, I think I prefer White because there's more scope for improvement in his position, and if Black releases the tension in the centre it is likely to expose his structural weaknesses − one possible continuation from here would be *Qe7 11.Qe2 Kh8 12.Nf3 Rad8 13.Ba4 Bd6 14.Re1)* 8.Qxb3 wins a pawn. True, Black gets some compensation, but it's not totally convincing: after 0−0 9.Qxb7 Qd7 10.0−0 Bb6 11.Qa6 Ne7 12.Nd2 h6 13.Ngf3 Ng6 14.Nc4 Qe6 15.Qa4 Nh5 16.Qd1 , as played in S.Tiviakov−S.Sulskis, Istanbul 2003, White must be a bit better.]

[c) 6...Bg4?! , either here or in many other similar positions, is a move you are likely to meet quite often when facing less experienced players. One of the key advantages for White is that while Bg5 is nearly always a concern for Black, ...Bg4 generally causes White no problems at all; in fact he positively welcomes the move! Why is this so? 1. With the c3−pawn covering d4, Black is never in a position to increase the pressure on the pin with ...Nd4. 2. Nbd2 reinforces the defence of the f3−knight, but more importantly White has the basic plan (after h2−h3 and ...Bh5) of Nf1−g3. This forces Black to either spend time safeguarding his light−squared bishop or agree to an

undesirable exchange. In effect, White can use Black's bishop as a hook to gain momentum on the kingside. I noticed a number of Kasparov games from simultaneous displays with his opponents choosing 6...Bg4. They were all wins, with the longest game lasting just 34 moves! Let's see how White should proceed: 7.h3 Bh5 8.Nbd2 0−0! 9.Qe2 d5 *(*passive play is likely to get crushed: *9...Qd7 10.g4! Bg6 11.Nf1 Rfe8 12.Ng3 Ne7 13.Bg5 h6 14.Bxf6 gxf6 15.0−0−0 Red8 16.Nh4 Bh7 17.Nh5 Qc6 18.Nxf6+ Kf8 19.Nxh7+ Kg7 20.g5 Kxh7 21.Qh5 Ng8 22.Qxf7+ Kh8 23.Ng6#* , G.Kasparov−B.Guillot, Besancon 1999 *)* 10.Nf1 dxe4 11.dxe4 Bg6 *(*if *11...h6* , *12.Ng3 Bg6 13.Nh4* gains more time *)* 12.Ng3 Nh5 13.Nxh5 Bxh5 14.g4 Bg6 15.h4! h5 *(*or *15...h6 16.h5 Bh7 17.g5!)* 16.Ng5! Qe7 *(16...hxg4 17.h5 Bh7 18.h6* is very strong *)* 17.gxh5 Bh7 18.Rg1 Kh8 19.Nxh7 Kxh7 20.Qg4 Qf6 21.Rg2 g6 22.Bxf7! and 1−0, A. Kofidis−S.Beshukov, Greece 1995. It's not easy defending against this type of attack, whether you are an amateur facing the mighty Kasparov, or a grandmaster with a rating of 2500!]

[d) Finally, there's the solid option of 6...Bb6 . This is typical prophylaxis against d3−d4 and is usually combined with the manoeuvre ...Ne7−g6. Compared to the ...a6 and ...Ba7 plan, Black is saving a tempo. What's more, if White castles, plays Be3 and exchanges bishops, Black is happier to recapture with the a−pawn rather than having to play ...Rxa7. The 'only' problem for Black is that on b6, the bishop cannot escape capture if White plays Nd2−c4. It therefore makes sense for White to choose this plan, and this gives him good chances of gaining an edge. For example, 7.Nbd2! Ne7 *(7...0−0* is also met by *8.Nc4)* 8.Nc4 Ng6 9.0−0 0−0 10.h3 h6 11.Re1 Be6 12.d4 Bxc4 *(12...Re8* then *13.d5!? Bd7 14.a4* - Kramnik - is a line which demonstrates why White isn't always in a rush to trade on b6 *)* 13.Bxc4 exd4 14.cxd4 Nxe4 *(*or *14...d5 15.exd5 Nxd5 16.Bd2 c6 17.Qb3 Qd7 18.a4* with an edge - Kramnik *)* 15.Bd5 Nf6 16.Bxb7 Rb8 17.Bc6 and again White is slightly better, D. Bojkov−K.Haznedaroglu, Istanbul 2001.]

7.Nbd2 Now that Black has played ...h6 to rule out Bg5, there's no real need to hold back with this any longer, especially if White is planning on delaying castling in favour of Nf1−g3 etc.

[On the other hand, it's worth remembering that in nearly all cases White can revert back to the old main lines by castling at any stage. If, for example, White plays 7.0−0 here or on the next move, Black might be 'tricked' into a line where he is committed to ...h6; a perfectly respectable line, but not necessarily one he would have chosen had White castled earlier. For example, here 0−0 8.Nbd2 a6 9.Re1 Ba7 10.h3 would transpose to Frois−Korneev and Areshchenko−Aleksandrov. *(*Moreover, the move order chosen here means that White even has the option of playing *10.Nf1* and delaying

h3 - *Ng4* achieves nothing after *11.d4!* . See also Bronstein−Ivkov, where Black delays ...Ba7. *)*]

7...0−0 8.h3 Nh5!? Aiming for ...Nf4 and ...Qf6, which is one of Black's main plans in the Classical Main Line (see Frois−Korneev).

[8...Be6 is, as usual, a solid option for Black. If White wants to avoid castling, transposing to the Classical Main Line, he can try one of the following:

A) If 9.Nf1 d5 10.Qe2 Black can try to utilize the tempi gained avoiding ...a6 and ...Ba7: Na5!? *(*or *10...a5!?)* 11.Bxd5! *(*White has to improvise, since the autopilot response *11.Bc2?* allows *dxe4 12.dxe4 Bc4!* which is embarrassing *)* 11...Bxd5 12.exd5 Nxd5 13.Ng3 Nf4!? 14.Bxf4 exf4 15.Ne4 Re8 16.b4 Bb6 17.bxa5 Bxa5 18.0−0 f5 19.Qc2 fxe4 20.dxe4 Bb6 21.Rad1 Qe7 22.e5 Rad8 23.Qe4 Rxd1 24.Rxd1 Qc5 25.Qg6 Qxf2+?? 26.Kh1 and Black resigned in I. Nepomniachtchi−E.Sutovsky, Netanya (rapid) 2009, in view of Rf8 27.Rd7 Qf1+ 28.Kh2 with mate on g7. A win for White, but overall this line looks quite unclear.;

B) 9.Bc2 d5 10.Qe2 and now:

B1) 10...d4 11.Nf1 a5 12.g4 a4 13.Ng3 with complex play.;

B2) 10...Re8 11.Nf1 Qd7 12.Ng3 b5!? and White should play 13.0−0 *(*the typical *13.Nh4?!* allows a tactical trick with *dxe4 14.dxe4 Bc4 15.Qf3 Nb4!)* 13...dxe4 14.Nxe4 Nxe4 15.Qxe4 with a roughly equal position.;

B3) 10...−−;

C) 9.−−]

9.d4!?

[White exploits tactics involving the unprotected knight on h5, but this advance in the centre is quite committal. Another option worth considering was 9.Nf1 Qf6 10.g3!? , preventing ...Nf4 and leaving the knight poorly placed, albeit at a cost of weakening the kingside. White can play Be3, swap off bishops and then aim for Ne3−d5/g4 or Nh4.]

9...Bb6

[If 9...exd4 , 10.cxd4 Nxd4 11.Nxd4 Bxd4 12.Qxh5 reveals Erenburg's idea.]

10.Nc4

[Erenburg suggests 10.0−0 here. If Black plays Qf6 *(*I think *10...Nf6!* is stronger, and the position looks equal to me *)* , 11.Nc4! would transpose to the game.]

10...Qf6

[Black can, and probably should, play 10...exd4 11.Nxb6 axb6 12.Nxd4 *(12.cxd4 Nf6* leaves White struggling to defend e4 properly *)* 12...Nf6 13.f3 , as indicated by Erenburg. Here d5 should equalize.]

11.Nxb6 axb6 12.0−0 Nf4 13.Kh2 Superficially it looks like Black is doing pretty well. It seems that with the knight on f4 and the queen on f6 he enjoys some pressure on the kingside. Black's position certainly isn't bad, but perhaps a key point is that there are more opportunities for improvement in White's (for example, Be3, Ng1, g2−g3 and eventually f2−f4) and there's the long−term advantage of the bishop pair. Perhaps realizing this, Kreizberg

chooses to go for an adventurous attack on White's king, but it proves to be over−ambitious. Erenburg's precise play demonstrates both the resilience and potential in White's position. **13...Ra5!? 14.Be3 exd4** Committal, but consistent with Black's previous move. **15.cxd4 Rh5**

[There was still time to change tack with 15...Re8 (Erenburg), but Black wasn't going to back down.]

16.Ng1! Black was threatening the deadly 16...Bxh3. Now Qf3 becomes an important resource for White in some lines. **16...Ne7?** This meets with a rather simple refutation.

[Rybka wants to play 16...Rh4 intending to answer

A) however, Black's attack has a desperate look to it after 17 f3: for example 17.f3 , e.g. Nxg2 *(* or *17...Rh5 18.Qd2)* 18.Kxg2 Qg6+ 19.Kf2 Bxh3 20.Nxh3 Rxh3 21.Ke2 etc;

B) 17.g3 with 17...Bg4 .]

17.Bxf4! I can only think that Black forgot this move was possible because White had avoided it for so long.

17...Qxf4+ 18.g3 Qg4

[The only other move to protect the rook was 18...Qg5 , but 19.f4 Qg6 20.f5 Qg5 21.Qf3 intending Bd1 is crushing.]

19.Qxg4 Bxg4 20.f4! Bc8 21.f5! I bet by now the rook was wishing it was back on the sleepy a8−square! **21...d5 22.Bd1**

[If 22.Bd1 Rg5 , 23.h4 puts the rook out of its misery.]

□ **S.Tiviakov**

■ **J.Werle**

Dutch Championship, Leeuwarden 2005

[John Emms]

Many of the notes in this game are based on Tiviakov's own excellent notes for ChessBase. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Be7 5.0−0 0−0 6.Bb3**

[7...Na5 is a popular move, and one that is likely to be played by anyone who uses the Chigorin Defence (9... Na5) in the mainline Ruy Lopez; or the ...Na5 plan against a variety of d3 Lopez lines, for example 1 e4 e5 2 Nf3 Nc6 3 Bb5 a6 4 Ba4 Nf6 5 0−0 Be7 6 Re1 b5 7 Bb3 d6 8 c3 0−0 9 d3 Na5 10 Bc2 c5. Note that this position can also be reached from the main game, if White chooses 6.Re1 (instead of our 6 Bb3) and then d6 7.c3 Na5 8.Bb5! (White saves the bishop in a roundabout route) a6 9.Ba4 b5 10.Bc2 c5 .]

6...d6 7.c3 Na5 In our line, the positions reached are similar to those in the d3 Lopez, with just a couple of slight differences. A positive for White is that his bishop has reached c2 in less time (c4−b3−c2 instead of b5−a4−b3−c2). On the other hand, Black isn't committed to ...a6 and ...b5 and might be able to use these two tempi more effectively elsewhere. **8.Bc2 c5 9.a3!?** The plan of a3 and b4 to gain space is not exactly new, but it's noticeable that many of the leading Italian Game experts are favouring this approach. It's certainly a way of trying to exploit Black's lack of ...a6 and ...b5 - White's plan would be less effective in the analogous d3 Lopez positions.

[One advantage of this plan is that it can be implemented at quite a few different moments. For example, White can play 9.Re1 Nc6 10.Nbd2 Re8 and now, instead of the traditional

A) White can switch with 11.a3 Bf8 12.b4 when a6 reaches the note to move 12 in the main game.

(In S.Tiviakov−L.Bruzon Bautista, Calvia Olympiad 2004, Black instead chose *12...g6* , but then *13.Ba4! cxb4 14.axb4 Bd7 15.Nc4 h6* would have been favourable for White had he

continued with *16.b5! Na5 17.Ne3* , as indicated by Bruzon. *)*;
B) 11.Nf1 intending Ng3, h3 and d4 (or Ne3, h3, Nh2−g4 etc),]

9...Nc6 10.b4 a6

[Black normally prevents the pawn advancing to b5. If, for example, 10...Re8 White could consider 11.b5!? Na5 12.c4! (Lukacs) when suddenly the b1−knight changes course and will be very effectively developed on c3, whereas Black's knight on a5 will take a while to rejoin the action.]
[Black is usually reluctant to swap pawns on b4 unless he really has to: 10...cxb4 11.axb4! increases White's central control and activates the rook on a1.]

11.Re1 Re8

[At first sight the apparently loose 11...d5 looks like it shouldn't work at all, but it's actually playable because Black can use tactics to avoid losing his e−pawn:
A) 12.exd5 Nxd5 *(*if *12...Qxd5 13.Nbd2* and Nc4−b6 becomes an idea *)* 13.h3!? *(*preventing ...Bg4; *13.Nxe5? Nxe5 14.Rxe5 Bf6* is Black's idea*,;* while *13.Bb2 Bg4! 14.Nbd2 cxb4 15.axb4 Nf4* left Black quite active in Zhang Zhong−L.Bruzon Bautista, Calvia Olympiad 2004 *)* 13...Bf6!? 14.bxc5 *(*Dolmatov suggests *14.Nfd2!?* planning Ne4 *)* 14...Bf5 was V.Belikov−S.Smagin, Kazan 1995, and now White should consider 15.Ra2 preparing d4 to hold on to the extra pawn.;
B) There's something to be said for 12.Nbd2 , intending d4 13.cxd4 cxd4 and now 14.Bb3 reactivating the bishop: Bd6 15.Nh4 Ne7 16.Qf3 Bg4 17.Qg3 etc, R.Picard−T.Calistri, Guingamp 2006.;
C) 12.−−]

12.h3 White often chooses the plan of Nbd2 and Bb2, aiming for d3−d4, but Tiviakov tries something a bit different.

[The position after 12.Nbd2 Bf8 13.Bb2 has been seen in a few games. Some examples:
A) 13...b5 14.d4! c4 *(14...exd4 15.cxd4 cxb4* is met by *16.d5!* and here *bxa3?* loses material to *17.Bxf6 Qxf6 18.dxc6;* or *14...cxd4 15.cxd4 exd4 16.Nxd4 Nxd4 17.Bxd4 Bb7 18.Qf3* with an edge for White, R.Schmaltz−R.Berzinsh, German League 2002 *)* 15.a4 Bb7 16.d5 Ne7 17.Nf1 g6 18.Bc1 Bg7 19.Ng3 Qd7 20.Bd2 Rec8 21.Qe2 Ne8 22.Ra3 Nc7 23.Rea1 was a typically complex Lopez−style battle in Z.Efimenko−I.Saric, Kemer 2007. With White beginning to press on the a−file, Black hit back with f5!? and the unclear complications continued after 24.exf5 Ncxd5 25.Nh4 Nf4 26.Qg4 .;
B) 13...Nh5 14.Nf1 *(*this time *14.d4!?* offers a gambit, and *exd4 15.cxd4 cxb4 16.d5 bxa3 17.Bxa3* promises decent compensation *)* 14...g6 15.Ne3 Nf4?! *(*this wastes time; Hebden prefers *15...Bg7* aiming for an eventual ...f5 *)* 16.g3 Nh5 17.Kg2 Bg7 18.Bb3! (d5 is firmly under White's control) Bd7 19.h3 Rf8 20.Nd5 Rc8 21.d4 with some advantage for White, C. Bauer−M.Hebden, Escaldes 1998.;
C) 13...Be6 14.h3 d5 *(*otherwise

it's White who advances in the centre: *14...Nd7 15.d4 cxd4 16.cxd4 exd4 17.Nxd4 Nxd4 18.Bxd4* with a small advantage, A. Areshchenko−A.Abdulla, Moscow 2008 *)* 15.Ng5! d4 *(*Black must avoid *15...Bc8? 16.exd5 Nxd5 17.Qh5)* 16.Rb1! cxb4 *(16...b5!?)* 17.cxb4 a5 18.b5 Na7 19.Nxe6 fxe6 (S.Jessel−M.Hebden, Dublin 2008) and here 20.Nc4 Nd7 21.b6!? Nc6 22.Ba4! Rc8 23.Bc1 looks better for White. He can meet Nc5 with 24.Bxc6 Rxc6 25.a4 and Ba3.;

D) 13...−−]

12...Bf8

[If Black chooses to prevent Bg5 by playing 12...h6 , White can revert back to the Bb2/Nbd2/d4 plan: 13.Bb2 Bf8 14.Nbd2 b5 15.d4 exd4 16.cxd4 cxd4 17.Nxd4 Bb7 18.Nxc6 Bxc6 19.Qf3 with a comfortable position for White, A.Sitnikov−D.Antic, Kavala 2005.]

13.Be3!? Now we see why Tiviakov delayed Nbd2 for so long - he wanted to put his bishop on e3! Actually, e3 is normally a slightly unusual square for the bishop in this line, but here the pressure against c5 provides at least some justification for it, and it certainly works well in the game.

[Tiviakov also mentions the more natural−looking 13.Bg5!? : "After the exchange on f6 the d5−square will become weak and White can hope for the advantage because of the bad bishop on f8." This move is always a serious consideration if Black plays ... Bf8 without first playing ...h6.]

13...cxb4 If Black is forced to release the tension so quickly, maybe 12 Be3 really is an effective move.

[Tiviakov believes that Black should prefer 13...b5 . After 14.Nbd2 White has the possibility of increasing the pressure on c5 with Nb3.]

14.axb4 b5 15.Nbd2 Now White is ready to take the initiative in the centre by playing d4, so Black takes steps to discourage him from doing so. **15...Bb7 16.Bg5**

[If 16.d4 , exd4 17.Nxd4 d5 equalizes.]

16...h6 17.Bh4 Rc8

[17...Be7 is an idea we've seen previously, with Black intending to relieve some pressure with ...Nh5 or ... Nd7. I think White keeps a small plus after 18.Nf1 Nh5 *(*or *18...Nd7 19.Bg3)* 19.Bxe7 Qxe7 *(19...Nxe7? 20.Nxe5!)* 20.Ne3 , intending Nf4 21.Nd5! .]

18.Nf1

[It's quite instructive witnessing how Tiviakov eventually uses all of his minor pieces to take control of the d5−square. He also considered 18.Nb3!? , which has the advantage of preventing ...a5 for the foreseeable future.]

18...Nb8 Rerouting the knight to d7. The battle for the d5−square is in full swing.

19.Ra3 Nbd7 20.Ne3 Qc7 21.Bb3 g6

[Black misses a chance to eliminate a weakness and free his position with 21...a5! . White can only expect a very slight advantage after 22.Rxa5 *(22.bxa5 d5!)* 22...Qxc3 23.Bxf6 Nxf6 24.Rxb5 Bc6 25.Rb6 Nd7 26.Ra6 Qxb4 27.Bd5 .]

22.Nh2 Bg7

[And here the pawn sacrifice 22...d5!?

23.Nxd5 Nxd5 24.Bxd5 Bxd5 25.exd5 a5! 26.Rxa5 Qxc3 27.Rxb5 Bxb4 28.Nf3 keeps White's advantage under control.]

23.Qf3 If Black does nothing special White will increase the pressure with Nhg4, after which all his minor pieces are either directly or indirectly controlling the key d5−square! This is brilliant strategy from Tiviakov - he has basically won the key battle to control d5. However, winning a game of chess against a strong grandmaster is rarely easy. Werle refuses to let his position slide into passivity. Instead he wisely chooses to gain some activity and practical chances by sacrificing a pawn, ironically on the very same square White was aiming to dominate. **23...d5! 24.Nxd5 Nxd5 25.Bxd5 Bxd5 26.exd5 Qd6 27.Rea1 Nb8 28.g4**

[Tiviakov discarded 28.Nf1 in view of f5 29.Nd2 f4 trapping the bishop, but later he realized that 30.Ne4 Qf8 31.Qg4 g5 32.Bxg5 hxg5 33.Nxg5 gives White a strong attack.]

28...g5 29.Bg3 Red8 Now Black wins back the d5−pawn, but his position remains compromised. If White brings his knight to f5 it will be very difficult for Black to save the position. **30.Qe2 Qxd5 31.Rd1** At first sight it looks like there has been a shift in momentum: Black has regained his pawn and White has retreated. But in fact Black still has major issues to solve here. His position is full of weaknesses, especially the light squares on the kingside, and White has a very straightforward plan of manoeuvring the knight to the very juicy outpost on f5. To make matters worse, Werle was experiencing time trouble problems. **31...Rc6**

[Tiviakov believes that staying active was Black's best chance: 31...e4 32.d4 f5 33.gxf5 Qxf5 34.Bxb8 Rxb8 35.Rxa6 Rbc8 36.Qe3 and "White has an extra pawn with advantage". With passive defence, Black is probably losing.]

32.Nf1! Here it comes! **32...Nd7 33.Ne3 Qe6 34.Nf5 Bf8?! 35.d4!** Now Black is unable to avoid losing material.

35...exd4 36.Qxe6 fxe6

[After 36...Rxe6 37.Rxd4 Rc6 38.Rd3 , the pin on the d−file is fatal and White follows up with R(a3)−a1−d1.]

37.Nxd4 Nf6 38.Rda1! The first pawn drops, and for the rest of the game Tiviakov never loses his grip. **38...Rcc8 39.Nxe6 Rd3 40.Rxa6 Rdxc3 41.Nxg5 R3c6 42.Ne6 Bxb4 43.Rxc6 Rxc6 44.Ra8+ Kh7 45.Ra7+ Kg8 46.Nd4 Rc5 47.Nf5 h5? 48.Nh6+ Kh8 49.g5** A great performance from Tiviakov and a hugely instructive game. It's reassuring to be reminded that even strong grandmasters can be outplayed in these 'quiet' positions.

34219 Prague 2008
[John Emms]

In the final two games of this chapter we consider Black's main alternatives to 7...d6. These are 7...d5, 7...0−0 and 7...h6. −−− Let's begin with 7....d5: **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d5** Black's d−pawn advances straightaway to d5. The advantage of this approach is that Black doesn't spend a tempo on ...d6 before playing ...d5. The disadvantage is that White hasn't committed himself to the Nd2−f1 plan, and he has other possibilities. **8.exd5** This is an important moment, with White choosing a completely different strategy − Plan B. Instead of holding the centre, as we've seen in previous games, White chooses to open it. He will castle quickly and then try to combine pressure on the centre (in particular the e5−pawn) with dynamic piece play.

[If White wants to stick to Plan A, there's an argument here for 8.Qe2 , and if 0−0 9.Bg5! utilizing the fact that White hasn't had to play Nd2−f1 before developing this bishop. S. Conquest−J.Parker, British League 2009, continued typically with dxe4 10.dxe4 Be6 11.Nbd2 Bxb3 12.axb3 Qd6 13.Nh4 Qe6 14.Nf5 Ne8 15.b4 f6 16.Be3 Bxe3 17.Nxe3 Nd6 18.0−0 when you could only describe the chances as level. Even so, there is still plenty of scope for either side to outplay his opponent here, and it's worth giving the rest of this grandmaster battle to show how Conquest slowly gained an advantage: Rad8 19.Rfd1 Ne7 20.Qg4 Qf7 21.Ra5!? Ng6 22.g3 Rfe8 23.Rd5 c6? *(* this seemingly imperceptible weakening of d6 is eventually fatal; there's nothing wrong with Black's position after *23...Ne7)* 24.Rd3 Qc7 25.Ndc4 Nxc4 26.Rxd8 Rxd8 27.Qe6+! Kh8 28.Rxd8+ Qxd8 29.Nxc4 Qd1+ 30.Kg2 h5 31.h4 Qd3 32.Nd6 Kh7 33.Qf5! Qxd6 34.Qxh5+ Kg8 35.Qxg6 Qd2 36.h5 Kf8 37.Qf5 Qd8 38.Qe6 1−0.]

8...Nxd5 9.0−0 0−0 10.Re1 Quickly attacking the e5−pawn. White must continue with purpose, otherwise Black would soon reach a comfortable position. **10...f6** This move looks like a surprising way to defend the e5−pawn, but it's not that easy for White to fully exploit the pin on the d5−knight and the temporary weakness of the a2−g8 diagonal. What's more, defending the e5−pawn with pieces presents more problems for Black than you might think. Here are some alternatives:

[10...Re8?! is met strongly by 11.d4! . This is a key tactical theme to remember − Black loses a piece if he captures on d4. e4 is the obvious choice, but 12.Ng5 leaves Black in difficulties. For example, Bf5 *(* or *12...e3 13.Bxe3 Rxe3 14.Rxe3 Nxe3 15.Qh5* , winning *)* 13.Nxf7! Kxf7 *(13...Qd7* is met by *14.Qh5* − Lukacs *)* 14.Qh5+ g6 *(14...Ke6 15.c4* regains the piece *)* 15.Qxh7+ Ke6 *(* or *15...Kf6 16.Qh4+ Ke6 17.Bg5 Qd6 18.Nd2)* 16.g4 with a big age for White, M.Kobalija−V.Petkov, European Ch., Plovdiv

2008.]
[10...Qd6 rather invites 11.Nbd2 intending Nc4 or Ne4. In this position Nf4 looks critical: 12.Ne4 *(12.Nc4 Qxd3 13.Bxf4 Qxd1 14.Raxd1 exf4 15.Nce5* − Lukacs − also looks promising *)* 12...Qxd3 *(*or *12...Qg6 13.Bxf4 exf4 14.Kf1 Kh8 15.Qd2* with an edge for White, V.Nevednichy−R.Dabo Peranic, Bizovac 2006 − after the exchange on f4, Black's a7−bishop is in constant danger of being shut out by d3−d4 *)* 13.Bxf4 Qxd1 14.Raxd1 exf4 15.Neg5 . I think that White's activity is worth more than a pawn here. For example, Na5 16.Bxf7+! Rxf7 17.Nxf7 Kxf7 18.Ne5+ Kf6 19.Rd8 threatening Ng4+ followed by Ree8.]
[10...Be6 is a decent option for Black:
A) The tactical justification is 11.Nxe5? Nxe5 12.Rxe5 Bxf2+! intending 13.Kxf2? Qf6+ . This theme is well worth remembering because it crops up in many similar positions.;
B) 11.Na3 b5! 12.Nc2 Qf6 13.Qe2 h6 14.Be3 Bxe3 15.fxe3 Rad8 was equal in F.Vallejo Pons−V.Topalov, Dos Hermanas (rapid) 2008, but I'm not totally convinced by 11 Na3.;
C) . Lukacs's suggestion of 11.Qe2!? looks more interesting. He gives Re8 *(*if *11...Qf6 12.Qe4* and ...Rd8 runs into Bg5*;* , or *11...f6 12.d4 Re8 13.dxe5 Bf7 14.Qd1 Nxe5 15.Nxe5 Rxe5 16.Rxe5 fxe5 17.Nd2 Qh4 18.Qe2 c6 19.Nf3)* 12.Ng5 and assesses the position as "±". It's worth playing a few more moves after Nf4 , which looks critical to me: 13.Bxf4 Bxb3 14.axb3 exf4 15.Qxe8+ Qxe8 16.Rxe8+ Rxe8 17.Kf1 Ne5 (otherwise White plays d4 to kill the a7−bishop) 18.d4 h6! *(18...Nd3? 19.Na3!* leaves Black's knight embarrassed, and it becomes trapped after *Nxb2 20.Rb1 Nd3 21.Rd1 Nb2 22.Rd2)* 19.Nf3 Nxf3 20.gxf3 c6 21.Nd2 Bb6 22.b4 with a level endgame position.;
D) 11.−−]

11.d4
[11.Nbd2 is possible but I feel that White's best chance of an edge might well be to clarify things in the centre, accept an isolated queen's pawn (IQP) and then try to exploit the light−squared weaknesses in Black's camp. If this is the case, the knight most certainly belongs on c3 rather than d2.]

11...exd4 There was little choice, as White was threatening 12 dxe5 uncovering an attack on d5. **12.Nxd4!?**
[12.cxd4 would be very promising for White after 12...Kh8 13 Nc3!, but Na5! , as played in F.De la Paz−N.Short, Ottawa 2007, is a stronger move. Black doesn't mind investing a tempo or more if it means he can swap off White's powerful light−squared bishop. That game continued *(12...Kh8 13.Nc3)* 13.Nc3 *(13.Bc2!? Nb4 14.Be4 f5* forces the exchange, but this is worthy of consideration because ... f6−f5 is quite a concession from Black *)* 13...Nxb3 14.Qxb3 c6 15.Bf4 Rf7 16.Bg3 Bf5 and here White should have played 17.Nh4 .]

12...Nxd4 13.cxd4 The exchange of knights means that it's easier for Black

to support his remaining knight on d5 with ...c6. On the other hand, it also means that White gets to keep his powerful light−squared bishop! **13...Kh8 14.Nc3 Nxc3?!** I don't like this move, and neither does Black's bishop on a7!

[The solid 14...c6 is the most obvious choice, although it's entirely possible that White keeps a small edge in the symmetrical structure arising after 15.Nxd5 cxd5 16.Qf3 Bxd4 17.Bxd5 , because of his slight lead in development and Black's weaker king. At the very least Black will have to display some accuracy to equalize.]

[14...Ne7 is another try, and here White could consider building up the pressure with 15.d5 intending Qf3, Bf4 (or Be3), Rad1 etc.]

15.bxc3 Re8 16.Rxe8+ Qxe8 17.Bf4 c6 18.Qd3 Bb8 Understandably Black was keen to swap off or improve the position of his problem bishop, but this 'undevelopment' leaves him lacking coordination and with back rank issues. **19.Bxb8?!** White begins to drift and lets Black off the hook.

[19.Bd2! prepares Re1 and keeps up the pressure. For example, Bd7 20.Re1 Qf8 21.Bc2 g6 22.Qf3 intending to meet Bc7 with 23.Bh6! Qxh6 24.Qxf6+ Qg7 25.Qxg7+ Kxg7 26.Re7+ .]

19...Rxb8 20.Kf1

[20.Bc2 g6 21.Qg3 is stronger.]

20...Qf8 21.Re1 Bd7 22.Qe3 Re8 23.Qf4 Rxe1+ 24.Kxe1 Qe7+ 25.Kd2 Bc8 26.g4 g6 27.h4 Kg7 28.g5 Be6?

[White has no real advantage after 28...Bf5! .]

29.Bxe6 Qxe6 30.Qc7+ Qf7 31.gxf6+ I wonder whether Black lost on time here.

[His problem is that 31.gxf6+ Kxf6 allows *(* so *31...Kg8* is forced, and then White has excellent chances to convert his extra pawn after *32.Qc8+ Qf8 33.f7+ Kxf7 34.Qxb7+)* 32.Qe5# .]

1−0

□ **Salygo,A.**
■ **Boshoer**
Correspondence 1971

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.0−0 d6 8.cxd4 Bb6 9.d5 Na5 As promised in the previous game, we will give a large number of alternatives here, though none of them seems especially appealing for Black:

[9...Nb8 10.Bb2 Nf6 11.e5 dxe5 12.Nxe5 0−0 13.Nc3 Nbd7 14.Nf3! Re8 15.Ne2 Nc5 16.Ng3 with good attacking chances, A.Anderssen−C. Mayet, Berlin match 1865.]

[9...Ne5? 10.Nxe5 dxe5 11.Ba3 Bd4 12.Nd2 Bxa1 13.Qxa1 f6 14.f4 gave White a strong attack in Goncharenko−Osipjenko, Kiev 1956, e.g. exf4 15.e5 f5 16.e6 Nf6 17.Rxf4 a6 18.Rxf5 b5 19.e7 Qd7 20.Rxf6 and wins.]

[9...Nce7 10.e5 and here again Black has a long list of unpleasant alternatives, probably making him wish he had played 9...Na5 instead:

A) 10...dxe5 11.Nxe5 Qd6 12.Qe2 Bd4 13.Bf4 Bf5 14.Bb5+ c6 15.dxc6 0−0−0 16.cxb7+ Kxb7 17.Nd2 with a decisive attack for

White, A.Anderssen−J.Kipping, Manchester match 1857.;
B) 10...Ng6 11.e6 fxe6 12.dxe6 N8e7 13.Ng5 0−0 14.Nc3 and White has a strong attack according to Matsukevich.;
C) 10...Bg4 11.Qa4+ Qd7 12.Bb5 c6 13.e6! Bxe6 *(*or *13...fxe6 14.Qxg4 cxb5 15.Qxg7 Ng6 16.Bb2)* 14.dxe6 fxe6 15.Bd3 and White is much better.;
D) 10...Nh6 is an old Steinitz idea. In my opinion this gives White excellent chances after 11.Nc3 0−0 12.Bxh6 gxh6 13.Ne4 dxe5 14.Nxe5 Nf5 15.Ng4 Kh8 16.Rb1 Qh4 17.Rxb6 axb6 18.Qa1+ f6 19.Ngxf6 Ng7 , and now White should play 20.Re1! *(*the white rook wants to enter the game as soon as possible! − rather than *20.g3?! Qh3 21.Re1 Qf5 22.Be2 h5 23.Nxh5 Qg6 24.Rc1 Rf7 25.Nhf6 Re7 26.f3 Bf5* , when Black kept the balance in G. Neumann−W.Steinitz, Paris 1867 *)* 20...Qf4 21.Re3 with a strong attack.;
E) 10...−−]

10.Bb2 Ne7 11.Bd3 0−0 12.Nc3 Ng6 13.Ne2 c5 14.Rc1
[Instead of 14.Qd2 as in Gielge−Poscher.]

14...Rb8 15.e5 White always can comeback to old plan.
[White can always return to the plan seen in the previous game, i.e. 15.Qd2 f6 16.Kh1 Bc7 17.Ng3 b5 18.Nf5 b4 19.Rg1 Bb6 20.g4 with an attack in A.Anderssen−J. Zukertort, Barmen 1869.]

15...Bc7
[Black has options all over the place, but they will hardly change the general (and possibly slightly vague) evaluation; e.g. 15...dxe5 16.Bxg6 hxg6 17.Bxe5 Ra8 18.h3 and White has compensation.]

16.Nc3 a6 17.Ne4
[White can also try 17.Bxg6!? (at some levels seemingly anti−positional, but at others quite attractive) which forces Black into fxg6 *(*if *17...hxg6?! 18.exd6 Bxd6 19.Ne4* and White regains the material while retaining a better position *)* 18.e6 b5 19.Re1 Qe7 20.Rc2 Nc4 21.Bc1 with an unclear game. Nevertheless, the text move seems to set Black sufficient problems.]

17...b6 18.Nfg5 h6??
[18...dxe5 was necessary, when White can try to develop an initiative in various ways:
A) 19.Nxh7?! is probably questionable after Re8
A1) if 20.Bb1 Kxh7 21.d6 Kg8 22.dxc7 Qxc7 23.Re1 and two pawns could be too big a price for the attack, *(*e.g. *23.Nd6? Rd8 24.Bxg6 Rxd6* Black even wins *)*;
A2) 20.Nhg5 Nf4 21.g3 Nxd3 22.Qxd3 Bf5 23.Rfd1 c4 24.Qf3 Qd7 25.h3 and White has some practical compensation, though Black is for preference.;
B) 19.Qh5 h6 20.d6 Bxd6 21.Nxf7 Nf4! 22.Nxh6+! *(*not *22.Nxd8? Nxh5 23.Nxd6 Nf4 24.Nxc8 Nxd3 25.Ne7+ Kh7 26.Ndc6 Nxc6 27.Nxc6 Rbc8 28.Nxe5 Nxb2* and Black wins *)* 22...gxh6 23.Qxh6 Rf5 24.Rfd1

Be6 25.Nxd6 Qg5 26.Qxg5+ Rxg5 27.g3 Nxd3 28.Rxd3 Bxa2 29.Ne4 Rf5 30.g4 and White remains better, keeping some initiative.;

C) 19.−−]

19.Nf6+! gxf6 20.exf6!

[Stronger than 20.Qh5 fxg5 *(* or *20...dxe5 21.Qxh6 fxg5 22.Bxg6 fxg6 23.Qxg6+)* 21.Bxg6 dxe5 22.Qxh6 fxg6 23.Qxg6+ with equality.]

20...Ne5

[20...Nf4! was a stronger defence, though White can still go for it with 21.Ne6!! fxe6 *(* if *21...Bxe6 22.Qd2!* wins *)* 22.Qg4+ Kf7 23.Qxf4! *(23.Qg7+ Ke8 24.Bg6+ Nxg6 25.Qxg6+ Rf7 26.Qg8+* goes nowhere *)* 23...e5 24.Qe4 Qxf6 25.f4 with a close to winning attack.]

21.Bxe5 dxe5 22.Qf3 Re8 23.Ne6?

[Here 23.Bh7+! Kf8 24.Ne4 Qd7 25.h3! wins comfortably. Black is unable to bring any of his extra pieces to the defence of the king.]

[23.Qg3 also wins, though it requires a little technique.]

23...Rxe6 24.Qg4+ Kf8 25.Qg7+ Ke8 26.dxe6 Bxe6 27.Rfd1 White is still better here, but Black retains some chances. **27...Bd6 28.Bxa6 Nc6 29.Bb5 Kd7 30.Rd2 Kc7 31.Bxc6 Kxc6 32.Rcd1 c4?**

[Black had drawing chances after 32...Ra8 33.f4 exf4 34.Qxh6 Rxa2 35.Rxd6+ Qxd6 36.Rxd6+ Kxd6 37.Qxf4+ Kc6 .]

33.Qxh6 c3 34.Rd3 b5 35.Rxc3+ Now the smoke has cleared. **35...Kd7 36.Qe3 b4 37.Rxd6+**

■ **Brandhorst,Wesley Ted**

USCCC−13 final 1999

[Smith]

The following prologue was written by my chess buddy, Tim Duesing, who is also the person who convinced me to try the Evans (and who loaned me all of his Evans Gambit books). The "Open" Game: "When you think of a win with the Evans Gambit, you usually picture vicious King hunts, piece sacrifices, and wild tactics with the game hanging by a thread (for both sides!) right out of the opening. Death by slow suffocation is not normally an Evans modus operandi. And yet, that's exactly what happens in this game. Black succeeds in winning a modest material advantage and even manages to construct a fortress of sorts which seems immune to any Evans−style pyrotechnics. But soon it's clear that any hope of weathering the storm to reach a materially won endgame will be snuffed out by White's systematic restraint of any attempt to leave the fortress alive. Eventually, in the ever tightening grip of zugzwang, Black has little choice but to slowly suffocate while he waits for an endgame that he will never see." **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6** Black's comment on his postcard: "Something tells me not to get into an Evans accepted with a player who wins as many games as you do." **5.a4 a6 6.Nc3 Nf6 7.Nd5 Nxd5 8.exd5 Nd4**

[8...Nxb4!? is usually given a ?, because 9 c3 "wins the knight" but 9.... e4 upsets Black's plan.

A) 9.Nxe5? Bd4 *(9...Bxf2+!? 10.Kxf2 Qh4+∞)* 10.c3 Bxe5 11.d4∓;
B) 9.c3? e4! 10.0−0 *(10.cxb4 exf3 11.Qxf3 0−0∓)* 10...exf3 11.Qxf3 0−0 12.cxb4 Bd4∓;
C) 9.0−0! e4 *(9...c6 10.d6±)* 10.Re1 0−0 11.Rxe4±]

9.d6 An idea I got from Michael Rohde's book "The Great Evans Gambit Debate".

9...Qf6

[9...cxd6 10.Nxd4? I think this move, recommended in Rohde's book, is a mistake. *(⌓10.Bb2∞)* 10...Bxd4 11.c3? *(11.Qf3□∓)* 11...Bxf2+! Rohde must have missed this deadly move. *(11...Ba7? 12.Qf3⩱* Rohde *)* 12.Kxf2 Qh4+ 13.g3 Qxc4∓]

10.0−0 # **10...Nxf3+?N** This looks onable, since it leaves White with "weak" double isolated f−pawns, but it is actually the start of Black's troubles.

[10...Ne6 11.Bb2 cxd6 12.d4 e4 13.Nd2 Qg6 14.Bd5 *(14.Bxe6 dxe6 15.Nc4 Bc7 16.d5 0−0 17.Re1 Rd8 18.Re3 e5 19.Rg3 Qf6 20.Bc1 Qe7 21.Bh6 g6 22.Qe2 Bf5 23.Qh5 Bd7 24.Qe2 b5 25.Nd2 Bf5 26.Nxe4 Qh4 27.Bg5 Qxe4 28.Qxe4 Bxe4 29.Bxd8 Rxd8 30.axb5 axb5 31.Rc3 Bb6 32.Ra6 Bd4 33.Rc7 Bb2 34.Rb6 Ra8 35.h3 Ra1+ 36.Kh2 Bc1 37.Kg3 Bf4+ 38.Kg4 h5+ 39.Kh4 Bf3* 0−1 Casella,M−Almasi,Z/ New York 1993 *)* 14...f5 15.Nc4 Nf4 16.Ne3⩲ Rohde]

[10...cxd6 11.Nxd4 *(* or *11.Bb2 Nxf3+ 12.Qxf3 Qxf3 13.gxf3⩲* which is similar to the game. *)*]

[10...Qxd6!?∞]

11.Qxf3 Qxf3 12.gxf3 a5? This allows White to lock up the queenside pawns, resulting in a stranglehold on the position. Black should leave the option of playing a b5 pawn break open.

[⌓12...cxd6 13.Bb2! would follow lines similar to the game continuation, but the fluid q−side pawns would be more advantageous for Black than what occured in the game.]

13.b5 cxd6 14.Bb2 White's double isolated f−pawns and pawn deficit make his position "look" bad, but looks can be deceiving. In fact White is already better. Black will have to give back the pawn by playing ...d5 at some point, or face slow suffocation.

[14.f4]

[or 14.Bd5 are also a reasonable moves, but I had in mind a plan involving d4 and if permitted, d5, shutting in the c8 Bishop.]

14...g5 preventing an f4 break, but if White had wanted to play f4 it would have been played last move.

[⌓14...0−0 15.f4 *(15.d4!?)* 15...exf4 16.d4 d5 Black must prevent a White d5. 17.Bxd5±]

[14...d5 15.Bxd5 d6 16.f4±]

15.d4 The whole point behind White's 14th move. **15...f6** Black's comment: "Looks like I'm going to pay for my 'pawn ahead'." Black seems hell bent on keeping the position closed. This is understandable, given White's lead in development, but he will be forced into an open game at some point, so the sooner he gets it over with the better off he would be. **16.Rfe1** This move wa s made already anticipating the possibility of the game continuation, or some variation thereof, though I did not expect it to actually occur.

[I could already have played 16.d5±

shutting in the Bc8, but I was worried that Black can then set up a fortress position with his King on e7, and Bishops on c5 and b7. In my analysis I could not find a forced way to victory after 16.d5, even though Black is effectively down a Bishop, so I decided to keep my options open.]

16...h5 Now Black seems to be dealing with a possible white h4 pawn break, but again, he is trying to delay the inevitable. He needed to be working on a plan to give back the pawn with d5. **17.Rad1 h4** Still trying to keep things closed. **18.Ba3** This move wins rather quickly, yet when I review this game with chess programs, they seem to think Black is doing OK! **18...Bc7**
Black's comment: "I think I need to consult with Houdini on this one." **19.b6 Bb8** Black's comment: "How the devil did I get into this 'mummified' position? Never saw it coming. Unique in my experience."

[19...Bxb6 is also doomed to fail, since 20.Bxd6+− tears open the position and leaves Black's exposed King and undeveloped pieces helpless.]

20.d5 The door is slammed shut, leaving 3 Black pieces buried alive. **20...Kd8**
Black's comment: "I am embarrassed by this game. I don't want anyone to see it. Never had that feeling before." **21.f4**
A most peculiar game. Some of Black's last postcard read, in response to a question I asked "<My play> was more an overzealous attempt to preserve a pawn plus, that spiralled out of control .... .. This is my shortest CC game ever (in 20 years)."

□ **Sporrer,B..**
■ **Kiefersbeck,A..**
Bezirksliga 2000 2000
[Paul Motwani]

G12.10: "Bernhard Sporrer: disappointed to 'only' win Black's queen at move 12!!" In the following game, B.S. indicates notes by Bernhard Sporrer, while M. M. stands for Mr Mo! B.Sporrer−A. Kiefersbeck, Bezirksliga 2000. Italian Game with 4 c3 & 5 d4. **1.e4 e5 2.Nf3 Nc6**
[B.S. Regarding 2...f5 I really like your recommendation 3.Nc3 against the Latvian Gambit (M.M.: See game G5.2). But after fxe4 4.Nxe5 Qf6 I do not want to return to the main lines with 5.Nc4 as there is too much theory. Does White have better alternatives? M.M.: I fully understand the desire to seek good strong paths which at the same time do not get oneself too bogged down in masses of theory. However, in this particular instance I really do feel that 5 Nc4 is a natural, uncomplicated, and powerful move which already puts Black in serious trouble. Therefore, my honest recommendation is this: if you get the chance, play it!]
3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4
[M.M.: 6.e5 d5 happened in game G9. 7.]
6...Bb4+ 7.Nc3
[M.M.: Although this gambit probably does not stand up against the best continuations for Black, White can at least try to have a little fun along the way−−−which is scarcely possible after 7.Bd2 Nxe4! 8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ because of IM Jonathan Parker's important novelty Kf8! in game G12.5.]
7...0−0?
[B.S.: GM Dr John Nunn claims in "Schachgeheimnise" (the German version of "Secrets of Practical Chess") that Black is already better after 7...Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 h6 Hence I conclude that there must be improvements for White. After 13.. .h6, what is your recommendation for White? In my opinion, the most critical variation is *(*but if this is true, I do not understand the game Fritz−Anand, Frankfurt 1999. Fritz, which was prepared by GM Thomas Luther, was willing to play this "bad" variation, and Anand deviated with the (in my eyes) obviously inferior *13...0−0* and was lucky to draw the game. *)* 14.Qe2 hxg5 15.Re1 Be6 16.dxe6 *(*(Informator gives a game with *16.Re3* but after *c6* I see nothing better for White than to return to the main line with *17.dxe6)* 16...f6 17.Re3 c6! 18.Rh3 Rxh3 19.gxh3 g6 I have three books about the Italian

Opening, and each author recommends different lines: Palkovi 20.Qf3 *(*Soltis *20.Qd2;* Heyken/Fette *20.Rd1* , but none of them is entirely convincing .M.M.: As you have indicated, there is lots of theory after 13... h6, and so Anand may have chosen 13...0−0 simply to avoid a really deep contest with Fritz's opening "book". As for Fritz's choice of opening, it is interesting that it selected a gambit line with a slightly dubious reputation. I cannot speak for GM Thomas Luther (or Fritz!), but I can tell you that I myself tried the same gambit line as White just once (at Edinburgh in 1988 against IM Stephen Mannion), partly for surprise value. G12. 10.1: However, it turned out that Steve was actually quite familiar with the tricks of this opening, and after 13...h6 14 Qe2 hxg5 15 Re1 Be6 16 dxe6 f6 17 Re3 d5!? 18 Rh3 Rxh3 19 gxh3 g6 20 Qf3, he surprised me with 20...Qd6!. I was relieved to get a draw via 21 Qxf6 Qf4 22 Qh8+ Qf8 23 Qd4 Qf4 24 Qh8+, repeating the position. It's possible that the Informator reference to 16 Re3 has some independent significance for White, because at least after 16...c6 17 dxe6 f6, Black has not yet attacked the c4−bishop with Steve Mannion's ... d5. Nevertheless, I must be honest that I no longer really trust this whole gambit approach for White. One could analyse almost endlessly in a Fritz−like manner and perhaps come up with some clever new moves, but I still have faith in Black's position and its resources when required. *)*]

8.e5 Ne4 9.0−0! Nxc3 10.bxc3 Bxc3?

[B.S.: After the more tenacious 10...Be7 I wanted to continue with 11.d5 Na5 12.Bd3 d6 13.Qc2 g6 14.c4 but I am no t sure if this is best. What is your recommendation? M.M.: After 10...Be7, White possesses so much extra space that even just very simple developing moves such as 11 Re1 look good. Your line is also tempting, and at the end of it I think you might like *(14.Bh6* (more directly aggressive than 14 c4) *Re8 15.e6* intending *fxe6? 16.Bxg6!)*]

11.Ng5! M.M.: White's multiple threats include 12 Qh5 or 12 Qd3 or 12 Nxf7 Rxf7 13 Bxf7+ Kxf7 14 Qb3+. **11...Bxa1 12.Qh5 Qxg5**

[B.S.: Although I am winning Black's queen, 12...Qxg5 disappointed me because I hoped to repeat an ancient game (played by Max Lange) which went 12...h6 13.Nxf7 Rxf7 14.Qxf7+ Kh8 15.Bg5! hxg5 *(15...Qxg5 16.Qg8#)* 16.Qh5#]

13.Bxg5 Bxd4 14.Bf6! gxf6

[M.M.: White threatened 15 Qg5 g6 16 Qh6, and 14...h6 lost instantly to 15.Qg6!]

15.Bd3 Re8

[Reader's Challenge P12.10.1 If 15...f5 then can you find a way for White to force checkmate not later than move 19? An answer appears after the game G12.10.]

16.Qh6! M.M.: Threatening 17 Bxh7+ Kh8 18 Bg6+ Kg8 19 Qh7+ Kf8 20 Qxf7.

16...Nxe5 17.Bxh7+ Kh8 18.Bf5+!

[B.S.: Here, I had the chance to blunder the game away with 18.Re1?? Bxf2+ 19.Kxf2?? Ng4+ . Usually I don't miss such chances!!]

18...Kg8 19.Re1! d6

[M.M.: White was simply planning to eliminate Black's knight which gave him vital protection at f7. If 19...Nf3+ 20.gxf3 Rxe1+ 21.Kg2 then Black ld have been defenceless against the same basic mating sequence that was given in the earlier notes at move 16.]

20.Bh7+!

[M.M. 20.Rxe5?? loses to Bxf5 because of 21.Rxf5 *(*or *21.Rxe8+ Rxe8* with a decisive material advantage for Black. *)* 21...Re1#]

20...Kh8 21.Rxe5! Rxe5 22.Bg6+

It's mate in two more moves. Solution to P12.10.1 16 Qg5+! Kh8 17 Qxf5 Bxf2+ 18 Rxf2 forces mate with 19 Qxh7.

1−0

□ **Nunn,J..**

■ **Parker,J..**

4NCL, 2000 England 2000

[Paul Motwani]

G12.19: "This game's fun for Nunn darker for Parker!" J.Nunn−J.Parker, Four Nations Chess League, England 2000. Transposition to Italian Game with 4 d3, Code C54. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5** The same position was reached via a different move−order in game G12.18. **5.c3**

[5.Bb3 featured in game G12.2.]

5...d6

[In game G12.18, Black gave his c5−bishop a cosy retreat at a7 by playing 5...a6]

6.0−0

[6.d4? exd4 7.cxd4 Bb4+ gives Black a favourable version of a well−known line (namely 1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 c3 Nf6 5 d4 exd4 6 cxd4 Bb4+) since he has the extra move ...d7−d6 for "free".]

6...0−0 7.Nbd2 a6 This not only makes possible ...Ba7 if required, but also the idea of ...Na5 must be considered a threat to White because in that case he can no longer preserve his light−squared bishop with the previously−available manoeuvre Bb5−a4−c2. **8.Bb3 Ba7 9.Nc4 Be6 10.Bg5 h6 11.Bh4 g5 12.Bg3**

[The sacrifice 12.Nxg5? is easily refuted by hxg5 13.Bxg5 Kg7 14.Qf3 Kg6 intending 15.Qg3 *(*or *15.h4 Bg4!? 16.Bxf6 Qd7!)* 15...Nh5!]

12...Ne7 13.Re1 Nh5?

[13...Ng6 is better]

14.Nxg5! Nxg3 15.Nxe6 fxe6 Has White overlooked the fact that he's still a piece down and 16...Bxf2+ is threatened? **16.Ne3!** There's the answer: Nunn has missed none of those details! He's seen further and realised that Black's g3−knight cannot escape. **16...Nxe4 17.Bxe6+ Kh8 18.dxe4** After the flurry of tactics, White has now emerged with a sound extra pawn. He gives one back soon at move 21, but calculates correctly that three moves on from there he'll go one ahead once again. **18...Rf6 19.Bh3 Qf8 20.Qd2 Rf4 21.g3! Rxe4 22.Bg2 Bxe3 23.fxe3 Rg4 24.Bxb7 Ra7** Not a happy place for the rook, but Black has no choice since he cannot allow 25 Bxa6. **25.Rf1 Qg8 26.Bg2 Rg6 27.Rf2 c6 28.Raf1** Simple yet devastating chess. **28...Ra8**

[If 28...Qxa2 then 29.Rf8+ wins because of: a) Ng8 *(*b) *29...Rg8 30.Qxd6;* c) *29...Kh7 30.Be4*

(one of numerous easy paths to victory); d) *29...Kg7 30.Qf2* threatening 31 Qf7+ Qxf7 32 R1xf7. *)* 30.Bxc6]

29.Rf7 Nd5 30.c4 Nunn again chooses a very simple but crushing option.

30...Nf4 31.Bxc6 Rb8 32.Bd5 Rxg3+ In a hopeless position, Black just tries for a final trick before resigning. **33.hxg3 Qxg3+ 34.Bg2**

[Of course not 34.Kh1?? Qh3+ intending 35.Qh2 *(*or *35.Kg1 Rg8+ 36.Kf2 Qg3#)* 35...Qxf1+]

34...Nh3+ 35.Kh1 That's the end of Black's tricks, and he's still a whole rook down. So...

1−0

□ **Emms,J.**
■ **Flear,F.**
Speigel Memorial, Southend 2009
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 [So far we've only considered 7.h3 . This knight move offers White some new possibilities.] **7...0−0** The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump. [If 7...d6 , White can of course transpose to the main lines with 8 h3, but there's also 8.Nf1!? inviting Black to play Ng4 . Now:

A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S. Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;

B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 − White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5 Nxd5 14.h3 Be6* is equal *)* 13...Ne4 14.Bc2 *(* this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3 17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−] **8.Nc4!?** This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked. [White normally chooses either 8.h3 (see Oratovsky−Gozzoli)] [or 8.0−0 , reaching the Classical Main Line.] **8...d6** Can this natural move really be

classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz 2000), after which 10.0−0?! let Black off the hook following *(* later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5

A) , I would have been very tempted to play just like in the game, with 11.Nxg5!? hxg5 12.Bxg5 .;

B) . However, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V. Zhelnin−A. Kolev, Odessa 1989: Bg4 *(* perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a significant advantage without having to do anything spectacular.;

C) 11.−−]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(* I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(* White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(* the problem for Black is that *21...exd4* allows mate with *22.Re7+ Kh8 23.Ng6#)* 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(* or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G. Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve

some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+) Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(or 18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .]

16.Qxf5 Nbd7 17.h4! With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**

[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]

28.Rh3 Bb6 29.Rg3 Bd8 Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**

[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]

32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

C54

□ **W.Hendriks**
■ **D.Ledger**
Hastings 2008

We'll begin with a game which involved a nice little idea that Black must have missed. Even in quiet positions you need to keep your wits about you and it seems that here Black wasn't on the ball at a critical moment towards the end of the opening stage. **1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3**

[White can also try 4.f4!? as Aronian did in a rapid game against Anand in 2006. Black should counter aggressively as quiet play would allow White to generate unpleasant pressure. Indeed, the game saw d5!

5.exd5 Ng4!? (striving for complications) 6.d4 Bxd4 7.Nf3 Bf2+ 8.Kf1 Bb6 9.fxe5!? with an extremely messy and unclear position.]

4...Nc6

[Many top players prefer 4...d6 , which is more flexible as the black knight on b8 may wish to develop to d7 in order to support its comrade on f6. That way Black can also play ... c6 followed by either ...d5 or ...b5 later on.]

5.c3 White prepares to play either b2−b4 or d3−d4. **5...a6** Black gives his dark−squared bishop an escape square on a7. **6.0−0 d6 7.Bb3** Now that Black has played ...d6, which gives extra protection to his pawn on e5, White has to prepare himself for ...Na5. He does not really want to allow the exchange of his light−squared bishop for Black's knight, as that bishop is his best minor piece. **7...Ba7** The bishop moves here to get out of the way of d3−d4. Now if White plays d3−d4 anytime soon, Black will be able to meet it with ...Bg4, placing White's centre under unpleasant pressure. **8.Be3** White has played a number of moves here, but the text is very sensible, exchanging off Black's raking bishop. **8...0−0**

[Again this move cannot be faulted. Instead 8...Bxe3 9.fxe3 strengthens White's centre and gives him chances to attack along the f−file.]

9.Nbd2 White brings his last minor piece into play. This system has been a favourite of Tiviakov's, but it shouldn't threaten Black too much. **9...Ne7**

[We are still in theory, as Black brings his knight around to the kingside while freeing his c−pawn. Perhaps Black's other common approach is better, though, namely 9...h6 , taking control of the g5−square.]

10.Nh4!

[A standard reply, preparing to meet ... Ng6 while freeing the f−pawn. Note that 10.Bxa7 Rxa7 11.Nh4 is not as strong as the game continuation, because Black can exploit his control of the g5−square to go g5! .]

10...Ng6? Black's main mistake in this game. The text loses too much time and allows White to launch a nasty attack. Better options included:

[a) With 10...Be6 Black tries to take the sting out of White's attack by exchanging the light−squared bishops. The game Z.Efimenko−B.Avrukh, European Club Cup, Saint Vincent 2005, continued 11.Bxa7 Rxa7 12.f4 , retaining some pressure.]

[b) 10...Bxe3 aims to stop White from playing f2−f4, but again White probably has a small advantage after 11.fxe3 Ng6 12.Nf5 .]

11.Nxg6 After a number of exchanges White starts a dangerous attack along the f−file. **11...hxg6 12.Bxa7!** This is an important part of White's plan, misplacing the black rook and making it possible for him to play f2−f4. **12...Rxa7 13.f4** The standard follow−up. White's bishop on b3 and rook on f1 X−ray Black's pawn on f7, which can often become a weakness in this opening. **13...c6?!**

[It's hard to suggest a good plan for Black here, but I am not a great fan of this move as it seems rather irrelevant and loses more time. Better may have been 13...exf4 , which concedes the

centre and so guarantees that White will have an edge, but at least this way Black can dig in with 14.Rxf4 Qe7 15.Qe2 Be6 , unpleasant though this is.]

14.Qf3 Lining up another piece against f7. **14...Qb6+?!**

[Another time−consuming move. Black is basing his whole play on a tactic that does not work. A better idea would have been 14...b5 when the rook on a7 provides some extra protection to Black's weak pawn on f7. Perhaps White should then aim to create a weakness on the queenside that he can attack with 15.Qe3 Re7 16.a4! .]

15.Kh1 Bg4 16.Qg3 Be2 The move that Black was relying on, but it has a serious drawback. **17.fxe5!**

[White is winning after this. However, 17.Rfe1? would have allowed Black to play Nh5 18.Qh4 Nxf4 which should be fine for him.]

17...Bxf1 18.exf6 The combination of White's light−squared bishop, pawn on f6 and queen on g3 leaves Black in a hopeless state. **18...Be2**

[Unbelievably this position had been reached before, in D.Sadvakasov−H. Melkumyan, Dubai 2007, which continued 18...Bxg2+ 19.Kxg2 d5 20.fxg7 Re8 21.Rf1 and Black lost very quickly.]

19.Qxg6 Qxb3 20.Qxg7# Black's plan of moving his knight around to g6 was quite risky, losing a fair bit of time. Hendriks reacted well with 10 Nh4!, at which stage Ledger should have given serious thought of how to continue, rather than making the mistake of continuing on autopilot which landed up costing him the game. When faced with an idea which is new, try to crawl inside your opponent's mind, work out what his plan is and, if necessary, the best way to stop it.

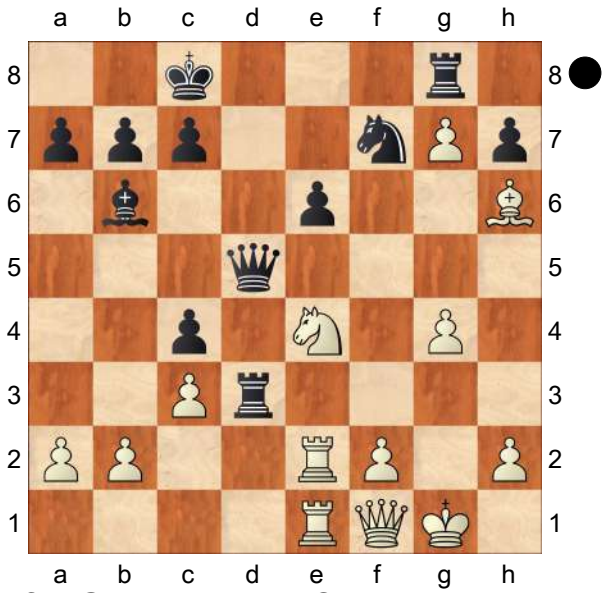
■ **Brooke,WM.**
Four−Leaved Shamrock v BCCA (4)
[BCCA Magazine 16; WIT4/4/14; Harding]

First in BCCA Magazine 16 (Dec. 1913) p. 174 Weekly Irish Times 4 April 1914. Mrs Rowland calls this 'a fine game' but in the complications after move 22 numerous mistakes are made and Black throws away an easy win at move 28 − TH. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0 Bc5 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5 10.Nc3 Qf5 11.Nce4 0−0−0** The BCCA magazine says this was first played in a match in Vienna in 1913 (see BCM Aug 1913) but a much earlier BCCA magazine had already condemned the older ...Bb6 and recommended castling. **12.Nxe6 fxe6 13.g4 Qe5 14.fxg7 Rhg8 15.Bh6 d3 16.c3 d2 17.Re2 Bb6 18.Qf1 Rd3 19.Rd1 Nd8 20.Nxd2 Qd5 21.Rde1 Nf7 22.Ne4** Diagram

(Diagram)

22...Nxh6
[RR22...Qd8!?]



23.Nf6 Qg5 24.Rxe6?
[24.Nxg8□ Nxg8 25.Rxe6]
24...Nxg4?! ! from Mrs Rowland but better is
[RR24...Rgd8]
25.Re8+ Now Black is winning.
[RR25.Nxg8! is equal after Nxh2+ 26.Qg2 *(26.Kxh2 Qh4+ 27.Kg1 Rg3+ 28.Qg2 Rxg2+ 29.Kxg2 Qxf2+* also leads to perpetual check *)* 26...Nf3+ 27.Kf1 Nd2+ 28.Kg1 Nf3+ etc.]
25...Rd8 26.Rxd8+ As White eventually wins, and the alternative is only slightly better, maybe Jones did the right thing here!
[26.Nxg8 Ne3+ 27.Kh1 Rxe8∓]
26...Kxd8?
[26...Rxd8 is much better.]
27.Rd1+?
[⌓27.Nxg8 Qxg7∓]
27...Kc8 28.Nxg8 Bxf2+??
[⌓28...Nxf2+ 29.Qg2 Nxd1+]
29.Kh1 Qxg7 30.Qxc4 c6 31.Ne7+ Kc7 32.Qf4+
1−0

[Rogers,Ian]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 d5!?
[Most players prefer to try their luck in the line 7...Nxe4 8.0−0 Bxc3 9.d5! but the text is quite reasonable if followed up correctly.]
8.exd5 Nxd5 9.0−0 Nxc3 10.bxc3 Be7! 11.d5 Nb8 12.Qb3 0−0 13.Bf4 c6?! 14.d6! Bf6 15.Rad1 Nd7 16.Rfe1 Nb6 17.Be5?! Bg4 18.Rd3 Bxf3? By first exchanging on c4 Black could avoid all the ensuing problems.
[18...Nxc4]
19.Bxf6 Qxf6 20.Rxf3 Qxd6 21.Bxf7+ Kh8 22.Qc2! Qd7?! An unlucky choice. Black has seen the threat of 23.♕xh7+ ♔xh7 24.♖h3+ which he plans to meet with 24...♕xh3 but has missed that White need not simply retreat his bishop from f7. **23.Re7!! Qxe7**
[Unfortunately 23...Qd6 24.Re6! leads to a similar finale.]
24.Qxh7+! Kxh7 25.Rh3+
It's checkmate next move. The winner of this game could only manage a 50% score and 24th place in the Under 10 Championship!
1−0

C52

□ **Evans,W..**
■ **McDonnell,A..**
London 1827
[Christoph Scheerer]

Stockfish 6 64 POPCNT (10s): 'C52: Evans Gambit Accepted: 5 c3 Ba5 ' **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0**
There has been quite some debate on the particular move order of this game, as some sources suggest that it already featured the gambit in its true form. However, I believe that the text move was played. It should be noted that White's move order is a somewhat inaccurate way to reach the Evans Gambit, as after 4...Nf6 White has to take care of his e−pawn. **4...d6 5.b4!? Bxb4 6.c3 Ba5**
[It is not entirely clear if 6...Bc5 is as inaccurate as it has been considered. It seemingly deprives Black of a few options, but it also has its merits. On the one hand, it allows White to gain a tempo on the bishop with d2−d4, but on the other, the bishop does not block a5−square, which offers an important defensive resource as after a possible Qb3, White has always to watch out for ... Na5.]
7.d4 Bg4
[7...Bb6! is the famous Lasker Defence, which will obviously be examined below.]
8.Qb3
[Alternatively: 8.Qa4 , despite netting Mikhail Chigorin two wins over Wilhelm Steinitz in their 1892 World Championship match, is rather harmless. After Bxf3 9.gxf3 exd4

10.cxd4 Qf6! White has nothing better than 11.Bb5 Qxf3 12.Bxc6+ bxc6 13.Qxc6+ Ke7 14.Qxa8 Qg4+ 15.Kh1 Qf3+ with a draw by repetition.]

[8.Bb5 forces Black to be a bit more accurate. After exd4 9.Qa4 *(*or *9.cxd4 Bd7 10.Bb2 Nf6* and Black has a slight advantage according to 'NCO' *)* 9...Bxf3 10.gxf3 *(*following *10.Bxc6+ bxc6 11.Qxc6+ Kf8 12.gxf3 dxc3 13.Nxc3 Bxc3 14.Qxc3 Qf6* it is White who has to struggle for a draw *)* 10...Bb6 11.cxd4 Nge7! 12.d5 a6 13.Bxc6+ *(*moving the bishop off the a4−e8 diagonal does not help: for example, *13.Bc4 Bd4 14.dxc6 Nxc6 15.Nc3 Bxc3 16.Bxf7+ Kxf7 17.Qc4+ Kg6! 18.Qxc3 Qf6* and Black should already have a winning advantage *)* 13...bxc6 14.dxc6 0−0 White has regained his pawn at too high a price.]

8...Qd7? After this move White gets a dangerous attack.

[It was necessary to remove the knight with 8...Bxf3 . The game A. Santasiere−F.Marshall, New York 1926, continued 9.gxf3 *(9.Bxf7+ Kf8 10.gxf3 Bb6 11.Bxg8 Rxg8* should be more than okay for Black *)* 9...exd4 10.Qxb7 *(10.Bxf7+?!* is dubious: *Kf8 11.Bxg8 Rxg8 12.Qxb7 Qe8!* and White's position is very awkward *)* 10...Ne5 11.Kh1 Rb8 12.Qa6 Nxc4 13.Qxc4 and now Qf6! 14.Qa4+ Kf8 15.Qxa5 Qxf3+ 16.Kg1 Qg4+ 17.Kh1 Qf3+ was the quickest route to a draw.]

9.Ng5

[Instead 9.Qxb7? is not possible as Rb8 10.Qa6 Rb6 traps the white queen]

[but 9.Bxf7+ looks promising at first. However, Black seems to have enough resources to defend this position: for example, Qxf7 *(9...Kf8?! 10.Ng5* is not recommended *)* 10.Qxb7 Nd8!? (otherwise White is simply a pawn up with a better position) 11.Qxa8 Bxf3 12.gxf3 *(12.Bg5?! Ne7 13.Bxe7 Qg6! 14.g3 Kxe7* is rather dangerous for White *)* 12...Qxf3 13.Nd2 Qg4+ 14.Kh1 Bxc3 15.f3 Qd7 16.Rb1 Bxd4 17.Nb3 Bb6 and Black's position is quite solid.]

9...Nd8 10.dxe5 dxe5 11.Ba3 Nh6

[11...h6? runs into 12.Nxf7! Nxf7 13.Bxf7+ Qxf7 14.Qb5+ when White will regain his invested material with interest.]

12.f3 Bb6+ 13.Kh1 Stockfish 6 64 POPCNT (10s): 'last book move'

13...Bh5 Stockfish 6 64 POPCNT (10s): '??' Stockfish 6 64 POPCNT (10s): 'shortens the misery for Black'

[⌓13...Be6 14.Rd1 Qc8±]

14.Rd1 We reach a position which every player who employs the Evans dreams of: White has put most of his pieces on active positions, whereas Black's pieces lack coordination. Stockfish 6 64 POPCNT (10s): '+−' **14...Qc8**

[14...Be3 doesn't do any good 15.Rxd7 Kxd7 16.Qb5+ Kc8 17.Nxh7 Rxh7 18.Qxe5 f5+−]

15.Rxd8+?! This turns out to be too ambitious.

[Instead 15.Qb5+! Stockfish 6 64 POPCNT (10s): '⌓' Stockfish 6 64 POPCNT (10s): 'and the result of the game is clear: White will win' Nc6

16.Bd5 would have been an elegant way to finish the game. Stockfish 6 64 POPCNT (10s): '+−']

15...Qxd8 Stockfish 6 64 POPCNT (10s): '±'

[Avoiding 15...Kxd8? which is curtains after 16.Ne6+! fxe6 *(* or *16...Ke8 17.Nxg7+ Kd8 18.Nxh5)* 17.Bxe6 Bf7 18.Qd1+ , as pointed out by Harding.]

16.Nxf7 Stockfish 6 64 POPCNT (10s): 'White has a mate threat' **16...Qh4??**

[Black also had to avoid both 16...Nxf7 17.Bb5+ c6 18.Qe6+]

[and 16...Bxf7 17.Bxf7+ Nxf7 18.Qe6+]

[but with 16...Qf6! he could have got back into the game to an extent. −−− According to Harding, probably best is Stockfish 6 64 POPCNT (10s): '⩲' Stockfish 6 64 POPCNT (10s): 'this is the best way to fight back' 17.Qa4+ *(17.Nxh8 0−0−0* picks up the knight on h8*; 17.Bb5+ c6 18.Nd6+ Kd7±)* 17...c6 18.Nd6+ with attacking chances: for example, Kd7 19.Nxb7 Bxf3 20.Nd2! Bxg2+ *(* or *20...Bg4 21.Rf1 Qg6 22.Nf3)* 21.Kxg2 Rhb8 22.Nf3 Rxb7 23.Rd1+ Kc7 24.Bd6+ Qxd6 25.Rxd6 Kxd6 26.Qb4+ c5 27.Qb3 and Black's position remains critical.]

17.Qb5+

[17.Bb5+ c6 18.Qe6+ Qe7 19.Qxe7#]

17...c6 18.Qxe5+ Kd7 19.Qe6+ Kc7 20.Bd6# . Given the course of this game, it is hardly surprising that McDonnell was impressed. He was not the only one. Soon after this game, Evans's analysis was published in various treatises: George Walker's A New Treatise on Chess, with Fifty Chess Problems (2nd Edition, 1833) and William Lewis's A Second Series of Lessons on the Game of Chess (1834) being two of the more popular ones. Unsurprisingly the debut of the Evans Gambit at the top level wasn't long in coming. Having suffered a horrendous defeat in his first match against de la Bourdonnais (+5 =4 −16), McDonnell decided to give Evans's idea a go in the first game of their second match. De la Bourdonnais, knowing no English and therefore not familiar with the previously−published analyses, intuitively chose the line nowadays known as the Lasker Defence, but failed to find the best possible moves and eventually lost (see the following game). **1−0**

C51

□ **Stevic,H.**
■ **Rogic,D.**
Vinkovci 1995

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.a4 a6 6.Nc3 The main move.

6...Nf6

[6...Nxb4 7.Nxe5 Qg5 looks tempting, but after 8.Qf3!? *(* not *8.Nxf7? Qxg2 9.Rf1 d5!* and Black is better *)* 8...Nxc2+ 9.Kd1 Qxe5 10.Qxf7+ Kd8 11.Qf8+ Qe8 12.Qxe8+ Kxe8 13.Kxc2 Bxf2 14.Nd5!? Bd4 15.Nxc7+ Kd8 16.Nxa8 Bxa1 17.d3 Bd4 18.Bf4 , White has a clear advantage.]

7.Nd5 Nxd5

[7...Nxe4 8.0−0 Nd6?! *(* but if *8...d6 9.d3 Nf6 10.Bg5* and White is slightly better, I.Kan−M.Botvinnik, Odessa

1929 *)* 9.Bb3 e4? (a standard mistake; Black starts to attack before completing his development and the punishment comes swiftly...) 10.d3!

A) 10...0−0? (lacking in consistency; this is characteristic of correspondence games, where you have time to realise when you are on a wrong track; but 10...0−0 only makes matters worse) 11.Bg5 Qe8 12.Nf6+! (simple, but still nice) gxf6 13.Bxf6 h6 14.Ng5 Bd4 15.Qh5 Nf5 16.Qg6+ 1−0 T.Harding−P. Feher Polgar, correspondence 1988.;

B) . Instead of 10...0−0? Black could have tried 10...exf3 11.Re1+ Kf8 12.Nxb6 cxb6 13.Qxf3 h6! *(*if *13...Qf6? 14.Qxf6 gxf6 15.Bh6+ Kg8 16.Re3 ,;* or *13...Nd4!? 14.Qd5 N4f5 15.Bf4 Qf6 16.g4 Qg6 17.Kh1* and White wins *)* 14.Ba3! b5 *(*on *14...Qf6 15.Qxf6 gxf6 16.b5* and wins *)* 15.Bb2 bxa4 16.Rxa4 and White has a terrific attack, e.g. b5 17.Qf4 bxa4 18.Qxd6+ Ne7 19.Bd5 Rb8 20.Qxb8 Nxd5 21.Qd6+ Ne7 22.Bd4 and White is close to winning.;

C) 10...−−]

8.exd5 Nd4

[Or 8...e4 9.dxc6 exf3 10.Qxf3 Qe7+ 11.Kd1!? *(11.Qe2 dxc6 12.Qxe7+ Kxe7 13.Bb2 Be6* was equal in Y.Estrin−G.Ravinsky, Moscow 1956 *)* 11...dxc6 12.Bb2 Be6 13.Bxg7 Rg8 14.Bf6 *(*if *14.Bxe6 fxe6 15.Bc3 Qd7* and Black has definite compensation *)* 14...Bg4 15.Bxe7 Bxf3+ 16.gxf3 Kxe7 and the position is more or less equal.]

9.0−0 Alternatively:

[9.Nxe5?! 0−0 10.0−0 d6 11.Nf3 Bg4 12.Be2 Nxe2+ 13.Qxe2 Re8 14.Qd3 Qf6 and Black has the initiative, J.Bednarski−N.Minev, Warsaw 1961.]

[9.a5 Ba7 10.d6!? *(*if *10.0−0 Nxf3+ 11.Qxf3 d6 12.d3 0−0 13.Be3 Bxe3 14.Qxe3 Re8* is equal *)* 10...Qf6 *(*or *10...cxd6 11.0−0 0−0 12.Nxd4 Bxd4 13.c3 Ba7 14.Qf3)* 11.c3 Nxf3+ 12.Qxf3 Qxf3 13.gxf3 cxd6 14.Bd5 and White has full compensation for the pawn.]

9...Nxf3+ 10.Qxf3 d6

[After 10...Qh4! Black gets equality by keeping control over d4; e.g. 11.d3 d6 12.h3 0−0 etc.]

11.a5 Ba7 12.Bb2 0−0?!

[It was last chance to stop d2−d4 with 12...Qh4! . Now White takes over.]

13.d4! Qh4 Too late.

[But if 13...Bxd4 14.Bxd4 exd4 15.Qf4 Re8 16.Rae1 Bd7 17.Qxd4 and White is slightly better.]

14.g3 Qf6?

[The last chance was 14...e4!? 15.Qe3 Qh3 16.Qxe4 Bf5 17.Qe2 Rae8 18.Qd2 Qh5 when Black has compensation.]

15.Qxf6 gxf6 Black must go through the rest of the game asking about a draw, which is humiliating, particularly when White does not hear the question.

16.Rfd1 Bg4 17.Rd2 Rfe8 18.Bf1 Re7 19.c4! Rae8 20.c5 Now Black has to play without the a7−bishop. When it returns to the game, pawn structure will decide. **20...exd4 21.Rxd4 Bf3**

[If 21...f5 22.Rc4 dxc5 23.bxc5 Bf3 24.d6 Rd7 25.Rc3 Be4 26.Rd1

and White is much better.]

22.Rf4?

[Better was 22.Ra3 dxc5 23.bxc5 Be4 24.Rc3 and White keeps the pressure.]

22...Bxd5 23.Bxf6 Re4 24.Rf5 Bc6 25.f3 R4e6?!

[Now Black could have made a draw with 25...Rxb4 26.Rg5+ Kf8 27.Bg7+ Ke7 28.Re1+ Kd7 29.Bh3+ Re6 30.Bxe6+ fxe6 31.Bc3 Bxc5+ 32.Kg2 Rb3 33.Rg7+ Kc8 34.Rg8+ Kd7 35.Rg7+ .]

26.Bc4 dxc5

[26...h6? is met strongly by 27.Rf4! dxc5 28.Rg4+ Kf8 29.Bg7+ Ke7 30.Bxe6 h5 31.Rf4 cxb4+ 32.Kg2 fxe6 33.Rd1 Bd5 34.Rxb4 and White is better.]

27.bxc5 Bxc5+ 28.Kf1! Rxf6! 29.Rxf6 Bd4 30.Bxf7+ Kg7 31.Rxc6 Bxa1??

[Black could still have held with 31...bxc6 32.Ra4 Kxf7 33.Rxd4 Re5 34.Rd7+ Kg8 35.Rxc7 Rxa5 36.Rxc6 Ra2 37.Kg1 Kg7 and game is drawn due to the poor position of the white king.]

32.Rxc7! Now White wins. **32...Re5 33.Bd5+ Kf6 34.Bxb7 h6 35.Rc6+ Kg7 36.Rxa6 Bc3 37.Be4 Rxa5 38.Rg6+ Kf7 39.Rxh6 Bf6 40.Kg2 Ra2+**

1−0

□ **Felgaer,R.**
■ **Hector,J.**
Copenhagen_3736 2002
[Jan Pinski]

1.e4 John Emms **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.0−0 Ba7 7.Bb3 d6 8.Nbd2**

[8.Re1 John Emms 0−0 9.h3

A) One other idea worth mentioning is 9...Kh8!? , breaking the pin on the f−pawn and planning ...Ng8 (or ...Nh5) and ...f5. White can certainly continue with

A1) but against such a non−developing move 10.d4!? seems justified. With action happening in the centre, Black is distracted from his plan, and a

bonus for White is that ...Re8 isn't possible with the f−pawn hanging. Qe7 11.Be3 h6 *(11...Nxe4? 12.d5!* wins material *)* 12.Nbd2 Bd7 13.Nf1 *(13.Bc2!?* pre−empting ... Na5 looks sensible *)* 13...Na5 14.Bc2 b5 15.Ng3 *(15.a4!?)* 15...c5 16.dxe5 dxe5 17.Nh4 Nc4 18.Bc1 Nd6 19.Qf3 c4 20.a4 was solid for Black in V. Nevednichy−V.Tkachiev, Manila 1992, but White may have stronger options and even here he might still have a slight edge.; **A2)** 10.Nbd2 ,;

B) 9...Ne7 Again we see the typical ...Ne7−g6 manoeuvre by Black. 1−0 (30) Felgaer,R−Hector,J Copenhagen 2002 [John Emms]]

8...0−0 9.h3

[After 9.Nc4 Black can play similarly to the current game with Ne7 10.Bg5 Ng6 11.Nh4 Kh8! 12.a4 h6 13.Nxg6+ fxg6! 14.Be3 Nh5 15.d4 with an unclear position in E.Torre−I. Rausis, Yerevan Olympiad 1996. Here I have analysed Nf4!? with the following idea: 16.Bxf4 Rxf4 17.dxe5 Qg5! 18.Qd3 Be6 19.exd6 Raf8! when Black has a strong attack because of 20.d7? Bxd7! .]

9...Ne7!? Black is aiming his knights towards f4, which is a perfectly acceptable plan.

[Also good here is 9...h6 10.Re1 Be6 11.Nf1 Re8 12.Be3 Bxb3 *(* or *12...d5 13.Bxa7 Rxa7 14.exd5 Bxd5 15.Bxd5 Qxd5 16.Ne3 Qc5 17.d4 exd4 18.cxd4* S.Fedorchuk−L.Vajda, Bar 2005, and now after *Qd6* Black keeps the balance *)* 13.axb3 Bxe3 14.Nxe3 Qd7 15.Nh4 d5 with equality in G.Kaidanov−V. Malaniuk, Lucerne 1997.]

10.Re1 Ng6 11.Nf1 Nh5 12.d4

[12.Bg5 (John Emms) more or less forces Qe8 . It looks tempting but in reality White doesn't gain a great deal from this insertion of moves, as the bishop is vulnerable to ...h6 possibilities. Also, 13.Nxe5 Nxe5 14.d4 Nf6 15.Bxf6 gxf6 16.dxe5 fxe5 17.Ng3 Kh8 is okay for Black, A. Grosar−S.Polgar, Bled 1994.]

12...Nhf4

[Of course Black has to avoid 12...Qf6?? John Emms 13.Bg5! .]

[12...Qe8 (John Emms) has been played a few times, and even by Shirov, but it does look a bit strange to move the queen here without being forced to by Bg5. True, White is discouraged from playing Ng3,but 13.Ne3! planning Nd5 or Nf5 does the job just as well. Nhf4 *(13...exd4 14.Nd5!)* 14.Nf5 exd4 15.N3xd4 *(15.cxd4* also looks promising *)* 15...Qd8 16.Qf3 Ne6 was Z.Efimenko−A.Shirov, German League 2006, and here White looks pretty active after 17.Be3 .]

13.Ng3 Qf6? This is actually quite a common mistake, but then White's idea is quite tricky...

[Black has naturally tried other moves here. One game went Black has naturally tried other moves here. One game went John Emms: 'Finally, one of the earliest games reaching this position featured a very young Vladimir Kramnik displaying his understanding of the intricacies in this line. V.Kramnik−D.Campora, Moscow

1989,went' 13...Qe7?! 14.Be3 Rd8 15.Bc2 John Emms: '!' h6 16.Nf5 Qf6 John Emms: 'with a clear plus for White − Black has basically wasted a tempo with his queen. Here' 17.g3! John Emms: 'forced the knight to retreat, since' Ne6 *(17...Nxh3+?* John Emms *18.Kg2 Ng5 19.Nxg5 hxg5 20.Qh5* would have been virtually winning for White. *)* 18.Nh2 Re8 19.Qh5 and White had an attack in V.Kramnik−D.Campora, Moscow 1989.]

[In my opinion the simplest option for Black is safe development with 13...Bd7

A) 14.Be3 John Emms

A1) , Black is no nearer to playing 14...Qf6 as it still runs into 15.Nh5! .;

A2) . In the game V. Ivannikov−E. Gafner, St Petersburg 2000, Black decided he couldn't do without 14...h6 anyway, but this admission really questions the value of 13...Bd7; after 15.Qd2 Black still has problems to solve: after the game's Qc8!? White could have even gained an advantage with the simple *(* note also that *15...Qf6? 16.dxe5!* highlights another problem with Black's 13th move *)* 16.Bxf4 exf4 17.Nh5 Bxh3 18.Nxf4 Nxf4 19.Qxf4 .;

A3) 14...−−;

B) 14.Nf5 Re8 , when I do not see how White can get an advantage. e. g. 15.dxe5 dxe5 16.Be3 with equality.]

[In view of the following trap, it's clear now that ...Qf6 requires some preparation. 13...h6! (John Emms) is a logical move, preventing the Bg5 idea.

A) . It's worth comparing this to the 12...Ne7 variation in Frois−Korneev, and indeed it leads to a direct transposition after 14.Be3! Qf6 15.Bc2 .;

B) . This might be White's best option, since 14.Bxf4 Nxf4! 15.dxe5 dxe5 16.Qxd8 *(16.Nxe5? Qg5!)* 16...Rxd8 17.Nxe5 Rd2 18.Bxf7+ Kf8 (Marin) is unclear;

C) , while the immediate 14.Nf5 can be met by exd4 intending 15.cxd4 d5 .;

D) 14.−−]

14.Nh5! Qe7

[Since 14...Nxh5 (John Emms) allows 15.Bg5! winning the queen, Black is forced to retreat and must allow a damaging exchange of pieces on f4. 13...Qf6 is simply a blunder, and evidently White's two−move trap is sophisticated enough to have snared a number of highly−rated victims!]

15.Bxf4 Nxf4

[Black even loses the f−pawn after 15...exf4 John Emms 16.Qd2 .]

16.Nxf4 exf4 It is easy to compare White's situation here with how a donkey might feel when it has in front of it a tray with oats and another with hay. The main problem is to decide which one will taste better. **17.Qd2**

[Also strong is 17.e5!? Be6 18.exd6 Qxd6 19.Bxe6 fxe6 20.Qb3 Qd5 21.Rxe6 Qxb3 22.axb3 and White h as a technically winning position, E. Alekseev−A.Mikhalevski, Tel Aviv 2001.]

17...Qf6

[Or 17...g5 John Emms 18.e5 h6 19.exd6 Qxd6 20.h4 Bg4 21.Qd3 Bxf3 22.Qxf3 , V.Belikov−M.Novik, Sochi 1990. In all of these lines White is enjoying a power play with one black piece 'sitting on the bench'.]

18.e5 dxe5 19.Rxe5

[19.Nxe5 (John Emms) is also pretty good, but this move looks even stronger.]

19...c6

[19...Bd7 John Emms 20.Rae1 c5 , as played in P.Tishin−J.Geller, Samara 2002, also tries to reawaken the dark−squared bishop before it's too late. But 21.R1e4! *(*instead of the game's *21.d5? Rad8 22.Bc2 Bb8)* 21...Bb8 22.Rxf4 , if not quite as destructive as the main game, should still give White a near decisive advantage.]

20.Rae1 h6 21.R1e4 Bb8

[If 21...g5 John Emms 22.h4 and Black's position collapses: for example, Bf5 23.hxg5 hxg5 24.Nxg5! .]

22.Rxf4 Qg6

[After 22...Bxe5 White will not undertake any adventures, but simply continue 23.Nxe5! Qg5 24.h4 Qd8 25.Nxf7 Qe7 26.Nxh6+ Kh7 27.Nf7 with a winning position.]

23.Rxf7 Rxf7 24.Re7 Qb1+ 25.Ne1 Bf4 26.Qe2

[Not falling for 26.Qxf4? (John Emms) , when the amazing defensive resource of Be6! , intending 27.Bxe6?? Qxe1+ 28.Kh2 Qxe6! , allows Black to fight on.]

26...Bf5 27.Rxf7 Kh8 28.g4 Bd3 29.Qxd3 Qxe1+ John Emms: 'If Black saves the bishop by playing' **30.Kg2 Bg5** (John Emms) , **31.Bc2** mates quickly. Don't be fooled by these apparently quiet lines. There are many traps lurking. 1−0 (31) Felgaer,R−Hector, J Copenhagen 2002 [Jan Pinski]

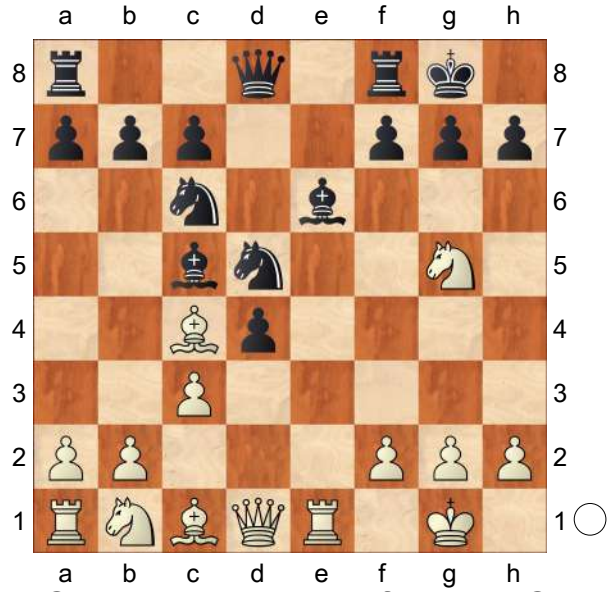
□ **Estrin,Yakov Borisovich**
■ **Sadomsky,AnatolyMikhailovich**
USSR ch−05 6063 1960
[Motwani, Paul]

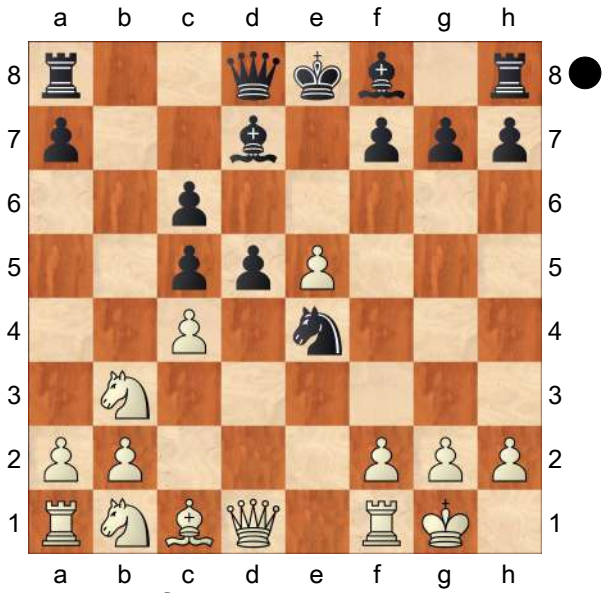
1.e4 e5 2.Nf3 Nc6 3.Bc4
[If 3.d4 exd4 4.Bc4 then 4...♘f6 would transpose to our main game, but instead Black chose Bc5 in the encounter Y.Estrin−S.Letic, Yugoslavia−USSR 1967, where the continuation was 5.c3 Nf6 6.0−0 d5?! *(*Best is *6...Nxe4 7.cxd4 d5!)* 7.exd5 Nxd5 8.Re1+ Be6 9.Ng5 0−0 *(9...Qd7 10.Nxf7!! Kxf7 11.Qf3+ Kg8 12.Rxe6!* is a tactical nightmare for Black. *)*



10.Qd3! g6 11.Rxe6! fxe6 12.Qh3! (Yet another power−packed move in a devastating sequence of 'punches' from Estrin.) Qe7 13.Qxe6+ Qxe6 14.Nxe6 Nb6 15.Bb3 with decisive threats against Black, and White duly went on to win (1−0, 37).]
3...Nf6 4.d4
[4.Ng5 is a whole different 'ballpark', but Estrin's chosen move will bring us more than enough excitement for one game.]
4...exd4 5.e5
[The variation 5.0−0 Nxe4 6.Re1 d5 7.Bxd5 *(7.Nc3 dxc3 8.Bxd5 Be6* cannot be recommended for White, and he must certainly avoid *9.Rxe4??* because of *Ne7! .)* 7...Qxd5 8.Nc3 Qa5 *(*or *8...Qh5)* 9.Nxe4 Be6 10.Neg5 0−0−0 is generally considered to be 'equal'.]
5...d5
[5...Ne4 is a wholly respectable alternative]
[as is 5...Ng4 .]
6.Bb5 Ne4 7.Nxd4 Bd7
[Nowadays, the major alternative is 7...Bc5! , after which White normally plays 8.Be3 *(*instead of getting into a mess with *8.Nxc6? Bxf2+ 9.Kf1 Qh4* , when one unpleasant line is *10.Nd4+ c6 11.Nf3 Ng3+! 12.Kxf2 Ne4+ 13.Ke2 Qf2+ 14.Kd3 Bf5 .)*]
8.Bxc6 bxc6 9.0−0 c5
[White's centralised ♘ remains unperturbed after 9...Bc5 .]
10.Nb3! c6
[10...c4 simply loses a pawn to 11.Qxd5! .]
11.c4! Diagram

(Diagram)

Effectively fixing Black's c−pawns where they stand, so that they can later be attacked and (very possibly) won.
11...dxc4
[11...d4 12.f3 Ng5 13.f4 Ne6 14.f5

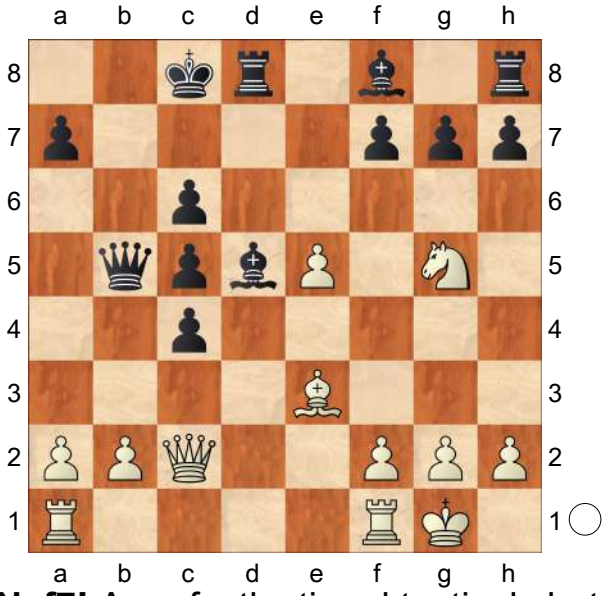


is horrible for Black.]

12.N3d2 Nxd2 13.Nxd2 Be6 14.Qa4 Qb6 15.Qc2!

[15.Nxc4? would throw away White's positional advantage, because Black then has Qb5 .]

15...Qa6 16.Ne4 0−0−0 17.Be3 Qb5 18.Ng5 Bd5 Diagram



19.Nxf7! A perfectly−timed tactical shot from Estrin. **19...Bxf7 20.Qf5+ Rd7 21.e6 Rd5 22.Qxf7 Qb7 23.Qe8+ Rd8 24.Qh5 Be7**

[If 24...Rd5 25.Qg4 then White simultaneously threatens 26 ♕xc4 or 26 e7+.]

25.Qg4 g6 26.Qxc4 The first of Black's three weaklings drops off on the c−file. **26...Qb5 27.Qc3** Maintaining the pressure, while preventing 27...♖d3 because of 28 ♕xh8+. **27...Rhg8 28.Rad1 Rd5 29.Rxd5 cxd5 30.Rc1** Simple, strong chess. **30...Kb7 31.Bxc5 Bxc5 32.Qxc5 Qxc5 33.Rxc5 Re8 34.Rxd5 Rxe6 35.g3 Kc6 36.Ra5** Black lost on time according to Shakmatny Byulleten 5/1962, but of course his two−pawn deficit would have been fatal in any case.

C54

□ **Y.Gonzalez Vidal**
■ **F.Gomez**
Cuban Championship, Holguin City
[John Emms]

This game demonstrates just how much flexibility White's position contains. Early on it looks like White is aiming for a typical pawn storm on the kingside, but somewhat surprisingly he ends up castling that side. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.Nbd2 d6 8.h3 0−0 9.Nf1 d5 10.Qe2 dxe4 11.dxe4 Nh5!?**
This knight move is an important idea - both here and in similar positions - because it more or less prevents 12 Ng3, which has become undesirable in view of 12...Nf4 or 12...Nxg3. So White has to amend his original plan. **12.g3!**
Preventing any ...Nf4 ideas. While it's certainly true that White's kingside structure has become compromised to some extent, White can usually get away with accepting this because kingside castling only rarely features in his plans.
[Whenever Black plays ...Nh5, both sides need to be wary of tactics involving Nxe5 uncovering an attack on the knight by the white queen. On this occasion 12.Nxe5?? is a blunder. White wins a pawn after Nxe5 13.Qxh5 , but then Black wins the game with Nd3+! .]
[White can allow ....Nf4 in some positions, but he doesn't want to force the knight there: 12.g4?! Nf4 13.Bxf4 exf4 and White has weakened his position for no compensating factors. What's more, that knight on f1 is no longer such a happy piece!]
[If White wants to allow ...Nf4, a better way to do so would be 12.Bg5 Qd6 13.Ne3 , as played in K.Landa−V. Akopian, Sochi 2006.
A) I'm sure that White plans to meet 13...Nf4 with 14.Bxf4 exf4 15.Nd5;
B) or 13...h6 with 14.g4 Nf4 *(14...hxg5!?)* 15.Bxf4 exf4 16.Nd5 , when in comparison to 12 g4?! White has found an excellent square for the knight.;
C) In the game, Akopian chose 13...Bxe3 and Landa managed to gain a small advantage after 14.Bxe3 Nf4 15.Bxf4 exf4 16.e5 Qh6 17.Qe4 Be6 18.Bxe6 Qxe6 19.0−0 Rae8 20.Rfe1 f6 21.Qxf4 fxe5 22.Qe3 in view of the isolated e−pawn, although Black's play was perhaps a bit too simplistic.;
D) 13...−−]
12...Nf6! The knight has done its job - Ng3 is no longer possible. Now it returns

to hit the e4−pawn so that White cannot plan Ne3 either. **13.g4!?** White has other options but clearly this is the most ambitious. The good thing about delaying castling is that White can consider aggressive ideas such as lunging forward with pawns on the kingside.

[13.Bg5 h6 14.Rd1 Qe7 reveals a problem with having a pawn on g3. White would like to play 15.Bh4 , but then he would always have to worry about ...g5 trapping the bishop. Even if an immediate g5 is considerably risky in view of 16.Nxg5 hxg5 17.Bxg5 , the fact that Black has this possibility in reserve, say after 15...Be6, is somewhat annoying for White (although not annoying enough to prevent some bold players choosing to play like this - see the Howell−Mchedlishvili reference in Tiviakov−El Taher).]

After 13 g4 Black needs to come up with an effective plan, which is easier said than done... **13...Nd7** Sensibly moving the knight out of the firing line of White's kingside advance, and eyeing the possibility of exploiting the hole on f4 via ...Nc5−e6.

[13...Qe7 intending ...Be6 is, as always, a key defensive idea. Against this, White could play 14.Ng3 and meet Be6 with 15.Nf5 .]

[The immediate 13...Be6!? is also interesting, and White faces one of those typical dilemmas regarding the light−squared bishops. 14.Bxe6 *(* I would be much more tempted to continue with *14.Ng3)* 14...fxe6 leaves the e−pawns doubled and isolated, but it could be argued with some justification that Black's gain in control of d5 and f5, plus the use of the open f−file, more than compensates him for this.]

14.Ne3 Nc5 15.Bc2 Preventing the exchange and also ...Nd3+. **15...a5** Black's idea is ...b6 followed by ...Ba6, but White can easily negate this threat after which Black is left awkwardly placed.

[Motwani suggests 15...Ne6 , planning to meet 16.Nd5 *(* another enticing option is *16.Nf5* , intending to answer *g6* with *17.Nh6+* followed by h4, again with some initiative *)* with 16...f6!? "followed by ... Ne7 to challenge White's d5−knight, which is a key guardian of the f4−square". This does look like a wise defence to me, although I still prefer White's position after 17.Be3 Bxe3 18.Qxe3 Ne7 19.0−0−0 .]

16.0−0! It's sometimes easy to forget that White can still castle this side! Black is hardly in a position to exploit any weaknesses, especially as most of his pieces are labouring on the queenside. **16...b6 17.Rd1 Ba6 18.Qe1 Qf6 19.Kg2** It has become abundantly clear that Black's plan involving ...a5, ...b6 and ...Ba6 was a misguided one. He should have at least consulted his poor bishop on a7! **19...Ne7** Black had to do something about the obvious idea of Nd5 or Nf5. **20.g5!?** This advance is quite committal, but White's initiative becomes very strong. **20...Qe6 21.b4 axb4 22.cxb4 Nb7?**

[Black misses his chance. After 22...Ng6! 23.Ng4 *(23.bxc5 Nf4+ 24.Kh1 Qxh3+ 25.Nh2*

is very unclear,*;* as is *23.Nd5 Bc8! 24.Ng1 Na6)* 23...Nd7 24.Bb3 Qe7 25.h4 , White is better but Black is still alive.]

23.Nd5! Rac8 24.Bb3 Nxd5 25.b5!

[White wins a piece after 25.b5 Bxb5 26.Bxd5 and 27 Bxb7.]

1−0

Borup 2009

[Cyrus Lakdawala]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 d5

[a) 6...Bb4+? 7.Nc3 *(7.Kf1 d5 8.exd5 Nxd5 9.a3* and Black is busted. For example, *Ba5? 10.Bg5* . or *Qd6 11.Nbd2 Be6 12.Ne4 Ne3+ 13.fxe3 Bxc4+ 14.Kf2 Qd5 15.Nc5* He has trouble castling if he tries to maintain the f5 point: *h6)* 7...Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 and now Ne7?? fails miserably to 11.Rxe4! d6 12.Bg5 . b) Bxg5?? 13.Nxg5 h6 14.Qe2 . Black cannot castle out of his problems: hxg5 15.Re1! Be6]

[6...Bb6 7.e5 Nh5 8.0−0 0−0 9.Nc3 d6 10.Bg5 Qe8 11.exd6 cxd6 12.d5 and Black is still in a terrible tangle. Also very tempting is the line Nd8 13.Nd2 g6 14.Bh6 Ng7 15.Qf3 Qe5 when the h6−pawn is doomed and Black still hasn't found shelter for his king.]

7.dxc5 dxc4?! Black has problems generating any counterplay after this move. He should trade on e4. **8.Qxd8+ Nxd8 9.Nc3 0−0 10.0−0 Re8?!** A poor decision. Black weakens to make room for the bishop. **11.Re1 Bg4** It was high time to make preparations to castle queenside. **12.Nd2 Ne6 13.f3 Nd4? 14.Rb1** The steamroller moves forward with Black's pieces in its path. **14...Be6 15.Ne2 Nxe2+ 16.Rxe2 Nd7 17.b3!** The steamroller continues forward. **17...cxb3** He can't accept the offer: **18.Nxb3 Bxb3** The f8−knight and the h7−bishop have been placed in custody and behind bars. **19.axb3** Threatening Nb5. **19...Nxc5 20.b4!** Offering the exchange to remove Black's only good piece. **20...Ne6** He must decline the gifts: **21.Kf2!** I insist! **21...Rad8 22.Be3 a6** Tricky. Black threatens 23...Be3+ winning the queen. **23.b5!** Black's game collapses after the removal of his only dangerous piece. **23...axb5 24.Rxb5 b6 25.Bxb6**

[25.g4! ends the game.]

25...cxb6 26.Rxb6 Nf4 27.Reb2 Summary: Allowing e5 without first exchanging on e4 gives White a large space advantage.

[27.Ra2 (threatening 22 Qh5+) Rd7 28.Rba6 Nd3+ 29.Kg3 f6 30.Ra7! finishes Black off. b) Red8??]

Or instead **27...Nd3+ 28.Ke2 Nxb2 29.Rxb2** and there is no good way to stop Rxh7. Acceptance is disastrous once again: **29...f5? 30.Ke3 fxe4 31.fxe4 Rb8 32.Rd2 Rb4 33.Rd4 Rxd4 34.Kxd4** . a) **34...Ra8??**

□ **Burnett,R..**

■ **Naylor,J..**

Coulsdon 1999

[Paul Motwani]

G12.2: "Cool play at Coulsdon" R. Burnett−J.Naylor, Coulsdon 1999. Bishop's Opening **1.e4 e5 2.Bc4** The opening soon transposes into the Italian Game, and so this particular encounter feels more "at home" placed in group 12 rather than group 2. **2...Nf6 3.d3**

[G12.2.1: 3.d4 exd4 4.Nf3 Nc6 in the game P.Evans−D.Howell, Monmouth 1999, transposed to the

Two Knights Defence because the same situation can arise via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6 4 d4 exd4. The continuation was *(*if *4...Nxe4 5.Qxd4* with a lead in development for White as compensation for one sacrificed pawn *)* 5.0−0 Nxe4 *(5...Bc5* transposes to game G12.1.2 *)* 6.Re1 d5 7.Bxd5 *(*Reader's Challenge P12. 2.1.1 If *7.Nc3 dxc3 8.Bxd5* then one safe, sound choice for Black is *Be6* In fact, how would he win if White plays *9.Rxe4?* An answer appears after the main game G12.2. *)* 7...Qxd5 8.Nc3 Qh5 *(8...Qa5* is also popular *)* 9.Nxe4 Be6 10.Nxd4 *(*If *10.Bg5 Bd6 11.Bf6* then *Bxh2+!* is a neat trick which appeared as a novelty in Informator a few years ago, and after *12.Nxh2 Qxd1 13.Raxd1 gxf6 14.Nxf6+ Kf8* Black has a sound extra pawn *)* 10...Qxd1 11.Rxd1 0−0−0 12.Be3 Nxd4 13.Bxd4 Bf5 , when Black's bishop−pair gave him some advantage, and indeed our young hero of the month, David Howell, went on to win in 40 moves.]

3...Nc6 4.Nf3 Bc5 5.Bb3

[G12.2.2: The more common 5.c3 was White's choice in the 1999 clash G.Kasparov−J.Timman at the Wereldhaven Festival in Rotterdam, where the continuation was d6 6.Bb3 0−0 7.Bg5 Be6 8.Nbd2 a6 9.h3 Ba7 10.Bh4 Kh8 11.g4!? Ne7 12.Bxf6 gxf6 13.Nh4 Ng6 14.Ng2 it is important for White to "cover" the obvious hole at f4 c6 15.Qf3 d5 16.Nf1 a5 17.Ng3 Bc5 18.a4 Be7 anticipating White playing Nh5 soon, and also Black really is now threatening ...dxe4 followed by ...Bxb3 *(*White had prevented 18...a4, and he did not fear *18...dxe4 19.Nxe4 Bxb3* because of *20.Nxc5)* 19.Ba2 Ra6!? 20.Nh5 Rb6 21.Qe2 with a highly interesting and double−edged game, which Black in fact won in 59 moves.]

5...a6 This little pawn−move is rather popular because Black's c5−bishop can drop back to a7 to avoid being "hit" if White plays c3 followed by d4. **6.c3 0−0 7.Nbd2**

[Black did not fear 7.d4 because after exd4 8.cxd4 he has the important check Bb4+ followed by 9...Nxe4]

7...d6 8.Nc4 h6

[8...b5 9.Ne3 would leave Black looking slightly loose on the queenside]

9.0−0 Ba7

[If 9...Be6?! then 10.d4 forces Black to part with his light−squared bishop for White's c4−knight, since Ba7?? loses immediately to the fatal fork 11.d5]

10.Re1 Be6 11.Ne3 Re8

[11...d5?! 12.exd5 Nxd5 13.Nxd5 *(*Better is *13.Nc4!* as it really does threaten to win the e5−pawn and forces the ugly move *f6* which not only creates a horrible hole at g6 but also leaves the e6−bishop unprotected, and so *14.d4* is very strong for White *)* 13...Bxd5 14.Nxe5 Nxe5 15.Rxe5 is fine for Black because of the resource Bxf2+! intending 16.Kxf2? Qf6+]

12.h3 Bxe3?!

[Black is certainly not forced here to part with a long−range bishop for a white knight, and instead 12...Qd7 looks perfectly playable]

13.Bxe3 d5 14.Bc2 d4
[The queenless middlegame resulting from 14...dxe4 15.dxe4 Qxd1 16.Rexd1 is still unpleasant for Black because of White having the bishop−pair and the possibility to easily expand on the queenside, for example, with b4 and a4−a5 followed perhaps by Ba4 or manoeuvring the knight from f3 to c5.]
15.cxd4 exd4 16.Bd2 It's worth noting that White now has a pawn majority on the right side of the board, and soon he will use it to storm Black's king. **16...Nd7 17.Rc1! Nb6**
[Of course 17...Bxa2?? loses to 18.b3 followed by Ra1]
18.a3 a5 19.Bb3 a4 20.Bxe6 Rxe6 21.Nh2! Making way to attack with the motto "f for forward"! **21...Na5 22.f4 Nb3 23.f5 Re8**
[23...Nxc1 24.fxe6 Nxd3 25.exf7+ is nightmarish for Black, especially after Kxf7 26.Qf3+]
24.Rc2 c5?
[Black's attempted counterplay on the queenside is simply too slow in the face of his opponent's fast kingside attack, but the relatively best chance for survival was 24...Nxd2 to reduce the number of White's attacking forces.]
25.Bf4 c4 Hoping for 26 dxc4 d3, but White does not co−operate **26.Ng4 cxd3 27.Qxd3 Rc8 28.f6** White's attack is now overwhelming. **28...Rxc2 29.Nxh6+!** A lovely finish by IM Ron Burnett, and Black resigned because of 29...gxh6 30 Qg3+ followed by 31 Qg7 or 29...Kh7 30 e5+ g6 31 Qxc2 d3 32 Qf2 d2 33 Rd1 when the d−pawn has been stopped "dead", whereas White's kingside attack is simply unstoppable. Solution to P12.2.1. 1 9...Ne7! caused White to resign immediately in several actual games, because the pinned d5−bishop cannot be saved.

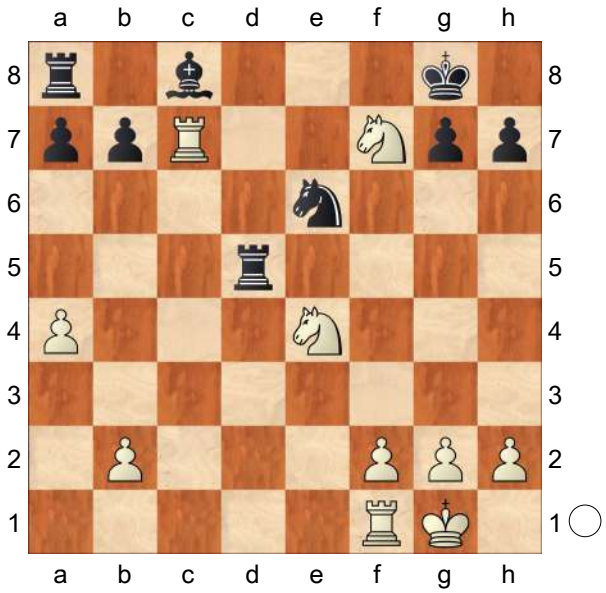
15.Bxd5 cxd5 16.Qxd5 Rd8 Sergey Kasparov, Mon Hokmome: '!' **17.Rac1** Sergey Kasparov, Mon Hokmome: '!' **17...Rxd5** 0.39/22 Garry put the queen here, while I would prefer a lesser piece as then the advance b3−b4 is obstructed because of ...Rxc4.

[17...Qe7= −0.01/25 Sergey Kasparov, Mon Hokmome 18.Qc5 Qxc5 19.dxc5 Re8]

18.Rxc7 Sergey Kasparov, Mon Hokmome: '±' **18...Nxd4 19.Nxf7** Sergey Kasparov, Mon Hokmome: ' Strongly threatening Nf7−h6+!' **19...Ne6** 1.18/23 Sergey Kasparov, Mon Hokmome: '±' Sergey Kasparov, Mon Hokmome: '

[19...Rd7 0.34/24 and Black's counter−pressure nearly balances the chances. A.Karpov−G.Kasparov, Moscow 1981. Sergey Kasparov, Mon Hokmome: '±' not 20.Rxd7?? *(20.Nh6+* Sergey Kasparov, Mon Hokmome *Kf8=)* 20...Bxd7 and the queen perishes]

(Diagram)



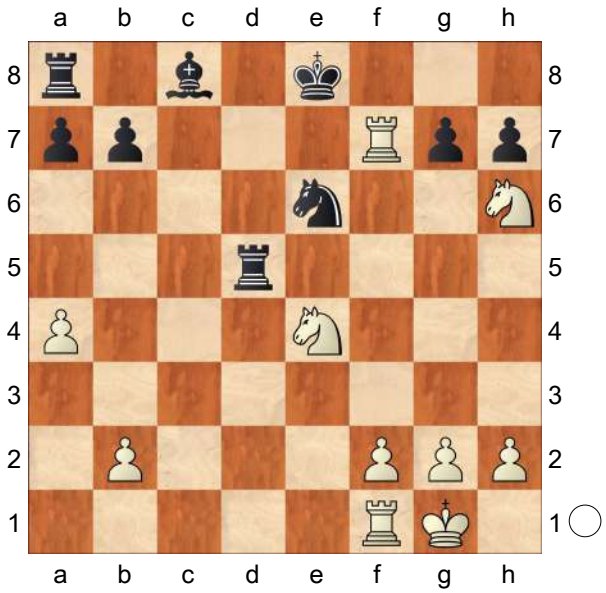
White leaves nothing to chance now.' **20.Nh6+** Sergey Kasparov, Mon Hokmome: '±!'

[Worse is 20.Re7 Sergey Kasparov, Mon Hokmome Kf8 21.Rxe6 Bxe6−+]

20...Kf8 1.99/21

[20...Kh8± 1.13/24 (Sergey Kasparov, Mon Hokmome) was called for. 21.Re7 *(21.Nf7+ Kg8±)* 21...Bd7]

21.Rf7+ Sergey Kasparov, Mon Hokmome: '+−' **21...Ke8** Sergey Kasparov, Mon Hokmome: '



' **22.Rxg7!** An exemplary manoeuvre in

the given structure. The queen defends the c4−pawn for the sake of an offensive with b3−b4−b5; a4−a5 might also follow. **22...Nxg7 23.Nf6+** Sergey Kasparov, Mon Hokmome: ' Pair of Knights!' **23...Kf8** Stopping the enemy approach on queenside in its tracks. Now the b5−square becomes weak, though, and the white knight will rush there with joy. However, it is far from fatal. **24.Nxd5 Bd7 25.Nc3 Rc8 26.Rd1 Ke7 27.Rd4 Bc6 28.f3 Ne6** The queen is activated and the d6−pawn is extremely well guarded, so White has to look for new weak spots in the enemy camp. **29.Rd2** Eyeing e6. **29...Nc5 30.Nf5+ Kf8 31.Rd4 Ne6?!** 2.37/22 Despite being Houdini's second line, this is still an unforced weakening.

[⌓31...Rc7 1.87/21 Sergey Kasparov, Mon Hokmome 32.h3 a6]

32.Rd6 Now I am faced with real problems. White threatens f2−f4 and Qxb6. **32...Kf7 33.Kf2 Nc5 34.Rd4** Sergey Kasparov, Mon Hokmome: ' Black must now prevent Nf5−d6+.' **34...Ke6?!** Time−trouble convulsions begin. When you can't find sound moves, you have to make do with bad ones. **35.g4 Rf8?!** I don't recommend to carry out such advances with opposite−coloured bishops and here the light squares are compromised, the e6−pawn in particular. **36.Ke3 Kf7 37.Rc4 Nb3 38.Ne4 Rd8 39.Rb4 Nc1**

[39...Bxe4 40.Rxe4 Rd7 Sergey Kasparov, Mon Hokmome: ' Prevents Re4−e7+.']

40.Nd4 Bd5 41.Nc3 a5

[41...b6 42.Nxd5 Rxd5 43.Rc4]

42.Rb5 Sergey Kasparov, Mon Hokmome: 'White is clearly winning.' **42...Bc6 43.Rxa5 Kg6 44.Nxc6 bxc6** Sergey Kasparov, Mon Hokmome: 'Endgame KRN−KRN' **45.Rc5 Rd3+ 46.Ke4 Rd6 47.h4** A more stubborn line was **47...h6 48.h5+ Kg7 49.a5 Nb3 50.Rf5 Nd4** 6.60/24

[50...c5 51.f4 Ra6 52.Re5]

[⌓50...Rd8 4.56/24 Sergey Kasparov, Mon Hokmome 51.Ke3 Ra8]

51.Re5 Nc2 , continuing furious resistance.

[51...Nb3 52.Re7+ Kf8 53.Ra7 Nd2+ , but, of course, this is a draw. In an encounter of the great 'Ks', events developed a bit differently: 54.Kf5 (consolidating the e6−pawn just in case and attacking along the c−file) Nxf3 55.Rb7 (the same line; overprotection of the key pawn on e6 against ideas of Bg2−h3 and Nd4xe6)]

Moreover, after **52.a6 Rd4+ 53.Kf5** Sergey Kasparov, Mon Hokmome: ' Hoping for a6−a7.' **53...Rd7 54.Ke6** there is nothing terrible for Black in sight. The thing is that breakthrough **54...Ra7?** doesn't work: **55.Ra5 Ne3**

[55...Nb4 56.Kd6 Nxa6]

56.b3 Nc2 57.Kd6 Nd4

[or even 57...Nb4! One could have trodden water with 58.Ra4 , waiting for the opponent's actions. Here is a blow left behind the scenes: Nxa6 59.Ne4]

58.b4 and it's time for White to resign. Sergey Kasparov, Mon Hokmome: 'and it's time for White to resign. Weighted Error Value: White=0.12 (very precise) / Black=0.30'

1−0

□ **Sveshnikov,E.**
■ **Dautov,R.**
Pinsk 1986
[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 As mentioned above, this is hardly dangerous for Black if he knows what he's doing. The important point here is that Black is forced to counter−strike in the centre without hesitation. **6...d5! 7.Bb5 Ne4 8.cxd4** Now Black has three possibilities. 8... Bb6 and 8..Be7 are considered here, while 8...Bb4+ is investigated in the next game. **8...Bb6**
[8...Be7 might look a little passive at first sight, but it is a completely viable possibility. Then 9.Nc3 0−0 10.Be3!? *(* this appears to be better than *10.Bd3 f5 11.exf6 Nxf6 12.Be3 Nb4 13.Bb1 Ng4* with counterplay, W.Steinitz−Em. Lasker, New York match 1894 *)* 10...f5 11.exf6 Nxf6 12.Ne5 was seen in the recent game B.Macieja−C.Garcia Moreno, Spanish League 2004. Now, instead of Nb8 as played,
(I would suggest *12...Qd6! 13.Bf4 Nd8 14.0−0 Ne6 15.Be3 a6 16.Be2 c5* with counterplay as an improvement. *)*]
9.Nc3
[9.a4?! a5 10.Be3 0−0 11.Bxc6 bxc6 12.0−0 was strategically dubious, and after f5 13.exf6 Qxf6 Black is at least equal, A.Biro−P. Lukacs, Budapest 1985.]
9...0−0 10.Bxc6 This exchange appears quite risky. It is easy to end in a position where White is under attack from the dynamic duo, aka Black's bishop pair.

[There is little need to exchange on c6 immediately. White would be better off playing 10.Be3!? , when play is likely to continue Bg4 11.Qc2 Bxf3 12.gxf3 Ng5 13.Bxc6 bxc6 14.0−0−0 Nxf3

A) , and now GM Sveshnikov continues his analysis with 15.Qf5 Nh4 16.Qg4 Ng6 17.h4 f5 18.exf6 Qxf6 19.h5 Nf4 20.Rh4 where he claims that White has full compensation for the pawn. Actually I fear that White is fighting for a draw, and is not guaranteed to succeed. A possible continuation is Ne6 21.h6 g6 22.Rh5 Rae8 23.Re5 Nd8 24.Rxe8 Rxe8 25.Qd7 Qf7 etc.;

B) . However, White's play can be greatly improved. After 15.Qe2! Nh4 16.Rhg1 White has real threats coming up on the kingside, and Black will not be able to free himself as easily as in the other line. It is hard to make a final conclusion, but 'with compensation' is not an unfair evaluation. *(16.−−)*;

C) 15.−−]

10...bxc6 11.Be3?!

[White is trying to play against the bishop on b6, but it was better simply to continue 11.0−0 Bg4 12.Re1 with equality.]

11...Bg4? This does not really achieve anything. Here Black had the chance to annoy the bishop on e3, or if White wants to avoid this, he will have to give up a lot of his presence in the centre.

[After 11...f5! 12.exf6 Qxf6 , Black is just better. Strong grandmasters have tried this out in two recent games:

A) 13.Qb3 Qg6 14.Ne5 Qxg2 15.0−0−0 Nxf2 16.Rhg1 Nxd1 17.Rxg2 Nxe3 18.Re2 Bxd4 19.Nxc6 Bb6 20.Nxd5 Rf1+ 21.Kd2 Rd1+ 22.Kc3 Rc1+ 23.Kd2 Rc2+ 24.Ke1 Rxe2+ 25.Kxe2 Ba6+ with a dangerous initiative, J.Rowson−I.Sokolov, Selfoss 2003.;

B) 13.Nxe4 dxe4 14.Nd2 Ba6! 15.Nxe4 Ba5+ 16.Nc3 Bxc3+ 17.bxc3 Qg6 and again Black had a deadly initiative in B.Macieja−G. Vescovi, Bermuda 2004. *(17...−−)*;

C) 13.−−]

12.Qa4 c5?! Black is entering a quagmire of bad tactics.

[12...Bxf3 was better, although after 13.gxf3 Nxc3 14.bxc3 Qe8 15.f4 Qe6 16.Rg1 Rae8 17.Qc2 Qh3 18.0−0−0! White has some initiative, because of the weak black bishop on b6.]

13.dxc5 Bxf3

[If 13...Bxc5?? 14.Bxc5 Nxc5 15.Qxg4 and White wins.]

14.gxf3 Nxc5 15.Bxc5 Bxc5

16.0−0−0! Now Black has some problems with the d−pawn and also, less obviously, with his king, as the open g−file can become an engine for a dangerous white attack. **16...Qe8** Black has an unpleasant choice here.

[Black can play the text move, or 16...d4 17.Ne4 Bb6 18.Rhg1 Qh4 19.Rg4 when White has an unpleasant attack]

[or 16...Qe7 17.Rxd5 Rad8 18.Rhd1 Bxf2 19.f4 where White is also better.]

17.Qa5 Bxf2 18.Qxd5 Qe6 19.Kb1 White would, of course, not mind

entering the endgame. The black pieces have difficulties working together; his bishop especially is lacking a useful diagonal. Maybe Black has more chances in the endgame, but it is understandable that he chooses to avoid it, even though this is probably mistaken.

19...Rac8 20.Rhf1 Bb6 21.f4 Qf5+
[After the better try 21...Qxd5 22.Nxd5 Rfe8 23.Rf3 c6 24.Nxb6! *(24.Nc3 Rcd8 25.Rfd3 Rxd3 26.Rxd3 f6* would allow Black to gain counterplay *)* 24...axb6 25.Rd6 White still has some winning chances. His advantage is not necessarily that great, but it is a firm and stable superiority, that in practice will cost Black a very tough defence in return for the draw.]

22.Ka1 h6 23.Ne4 White is just much better here. **23...Kh7 24.Ng3 Qg4 25.a3 Qh3 26.Qe4+ Kh8 27.f5 c6 28.f6 g6 29.Rf4 Rcd8 30.Rd6 Qxh2 31.Rh4 Qg1+ 32.Ka2 Qe3 33.Qh1**
[33.Rxc6!? is also possible, as after Rfe8 34.Qh1 Kh7 35.Rc2! White wins. The ideas are Rxe5 *(*or *35...Qg5 36.Rch2 Be3 37.Ne4)* 36.Re2 . In both cases White wins.]

33...Kh7 34.Ne4 Rh8 35.Rxc6?!
[Simpler was 35.Rxd8! Bxd8 36.e6 fxe6 37.Qd1 and White wins.]

35...h5 36.e6 Kh6 37.Rc3 Qe2 38.e7 Rd1 39.Qh2 Qxh2 40.Rxh2 Re1 41.Nd6 Rb8 42.Nxf7+ Kh7 43.Rc6 Bd4 44.Ng5+
1−0

□ **J.Emms**
■ **G.Flear**
Speigel Memorial, Southend 2009
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2
[So far we've only considered 7.h3 . This knight move offers White some new possibilities.]

7...0−0 The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump.
[If 7...d6 , White can of course transpose to the main lines with 8 h3, but there's also 8.Nf1!? inviting Black to play Ng4 . Now:
A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S.Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;
B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 - White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5 Nxd5 14.h3 Be6* is equal *)* 13...Ne4 14.Bc2 *(* this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3

17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−]

8.Nc4!? This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked.

[White normally chooses either 8.h3 (see Oratovsky−Gozzoli),]

[or 8.0−0 , reaching the Classical Main Line.]

8...d6 Can this natural move really be classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz, 2000), after which 10.0−0?! *(* later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* let Black off the hook following 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5 I would have been very tempted to play just like in the game, with

A) however, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V.Zhelnin−A. Kolev, Odessa 1989: Bg4 *(* perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a significant advantage without having to do anything spectacular.;

B) 11.Nxg5!? hxg5 12.Bxg5 .]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(* I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(* White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(* the problem for Black is that *21...exd4* allows mate with *22.Re7+ Kh8 23.Ng6#)* 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(* or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G.

Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+) Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(* or *18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .]

16.Qxf5 Nbd7 17.h4! With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**

[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]

28.Rh3 Bb6 29.Rg3 Bd8 Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**

[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]

32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

□ **Chigorin,M..**
■ **Steinitz,W..**
23: Match by telegraph (1) 1890
[Garry Kasparov]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 Qf6?!
[6...d6! .]
7.d4 Nh6
[In the 1889 match Steinitz tried to uphold 7...Nge7 (Game No.22)]
[and against Gunsberg - 7...h6 , but he did not repeat such experiments any more.]
8.Bg5 Qd6
[After 8...Qg6 9.d5 Nb8 10.Bxh6 Qxh6 11.Nxe5 0−0 12.d6 Nc6 Vasyukov and Nikitin recommend 13.Ng4! Qg6 14.Re1 with the initiative.]
9.d5 Nd8 10.Qa4 Bb6 11.Na3 c6
[11...0−0 12.Bd3! Qg6 13.Nc4 etc.]
12.Be2! A subtle manoeuvre: the bishop makes way for the knight. **12...Bc7**
[Or 12...Bc5 13.Nc4 Qf8 14.Bxd8 Kxd8 *(14...b5 15.Qa5 bxc4 16.dxc6)* 15.Nfxe5 f6 16.dxc6! etc.]
13.Nc4 Qf8 Typical Steinitz!
[However, also bad were both 13...Qc5 14.d6! Bb8 *(14...Bxd6 15.Be3)* 15.Be3 Qb5 16.Qc2 with the threat of Nb6]
[and 13...Qg6 14.Bxd8 Bxd8 15.Nfxe5 Qf6 16.Qa3 Be7 17.d6 .]
14.d6! (and this is typically Chigorin−like) **14...Bxd6**
[After 14...Bb8 15.Be7!]
[or 14...b5 15.dxc7 Nb7 16.Qb3 Black loses quickly (Nc5 17.Qb4 bxc4 18.Qb8!).]
15.Nb6 Rb8 16.Qxa7 Ne6 It is typical that the champion also dared to go in for this variation in his match for the chess crown with Gunsberg (New York 1890/91). When in the 12th game the latter employed the Evans Gambit for the first time, before playing 6...Qf6?! Steinitz unexpectedly asked: 'Do you think that I am morally bound to play exactly the same defence as I did against Chigorin?' Gunsberg replied: 'You are not exactly bound, but the public will expect you to defend your own theories!'
[Alas, after 16...Ng4 17.Nh4! Ne6 18.Bxg4 Nxg5 19.Nf5 Ne6 20.Rfd1! Bc7 21.Na8! Rxa8 22.Qxa8 Kd8 23.Rxd7+! Kxd7 24.Rd1+ Black lost ignominiously... 16...Ne6 looks rather more solid, but... not for a game with a time control of 'three days for a move'.]
17.Bc1! 'Astounding. This move, like White's 12th and 14th moves, bears the stamp of genius.' (Steinitz) **17...Ng8** **18.Ba3** (with the threat of Qxb8) **18...c5**

19.Rad1! Nf6
[If 19...Bc7 Chigorin had prepared 20.Bb5 Nf6 21.Nd5 Bd6 22.Nh4! Nxd5 23.Rxd5 Bc7 24.Nf5 g6 25.Rfd1 gxf5 26.Rxd7 Bxd7 27.Rxd7 Qh6 28.Bxc5! Nxc5 29.Qxc5 Qc1+ 30.Rd1# .]
20.Bc4 Bc7
[Black fails to save the game with 20...Nxe4 21.Nxc8 Rxc8 22.Qxb7 Rc6 23.Nxe5]
[or 20...Qe7 21.Bxe6 fxe6 22.Nc4 Bc7 23.Bxc5 and 24 Nd6+.]
21.Nd5! Bd6 22.Nh4! Nxd5 23.Nf5! g6 24.Nxd6+ Qxd6 25.Bxd5 Qc7 26.Bxe6 fxe6 27.Bxc5 Ra8 28.Qxa8 Qxc5 29.Qa4 Kd8 30.Rd2 Kc7
31.Rb1! White accurately converts his clear advantage of the exchange.
31...Rd8
[31...d6 32.Rb4! etc.]
32.Rb5! Qc6 33.Qb4 d6 34.a4! Qe8
[34...Bd7 35.Rxd6! .]
35.Rb6 Qf8 36.Qa5 d5

□ **Eliskases,E.**
■ **Grunfeld,E.**
Game 42 1933

Symphony of combinations What is it in a game that qualifies it to win a prize for brilliancy? Is it the unexpected sacrifice of material? If so, this game features an offer of a Knight, followed later by the sacrifice of two Pawns on the seventh rank, just a step away from the Queening square. Is it originality of ideas? Here, to give one instance, we see that a piece attacked only once may be in deadly danger, though protected by King, Queen and both Rooks. Is it a finely−played ending? This one, with a magic Morphy move in it, is elegance itself. Whatever it is that makes a game such as this worthy of the brilliancy prize, it holds us spellbound with its wealth of imaginative ideas. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Bb6** Black wants to maintain a strong point at e5
[4...d6 5.d4 in reply forces an exchange of Pawns Bb6 *(5...exd4* and the elimination of the strong point. *)* 6.dxe5 dxe5 7.Qxd8+]
5.d4 Qe7 Black supports the King Pawn with another piece, as he does not want to yield the center by 5 Δexd4 6 cxd4.
[5...exd4 6.cxd4]
6.0−0 Nf6 7.d5 Nb8
[7...Nd8 keeps the Knight out of play for a long time]
[7...Na5 8.Bd3 c5 9.b4 cxb4 10.cxb4 Qxb4 11.Ba3]
8.Bd3 d6 9.Nbd2 a6 Gives the Bishop a flight−square
[9...c6 serves the purpose better, as it strikes a blow at the center as well.]
10.Nc4 Ba7 11.a4 0−0
[Disputing the center at this point by 11...c6 would be doubtful strategy 12.dxc6 bxc6 13.Bc2]
12.b4 Ne8 Prepares for 13 Δ f5, striking at the base of the Pawn chain, strategy recommended by Nimzovitch.
[12...c6 13.dxc6 bxc6 14.b5 cxb5 15.axb5 axb5 16.Nb6]
13.Qc2 g6 A further attempt to get in the freeing move 14 Δ f5, as well as making a square available to the Knight.
14.Bh6 Ng7 15.Ne3 Both sides

concentrate their strength on the critical square f5 - White, to prevent the break by Δf5, Black, to enforce it. **15...f6 16.Rae1 Rf7 17.Kh1 Nd7 18.g4** White has three pieces and two Pawns bearing down on the key square f5. This would seem to put a definite stop to the threat of Δ f5, the vital move for the freeing of Black⇗s pieces. **18...Nf8 19.Rg1 Bxe3** Black decides to remove this Knight at once, in view of White⇗s evident intention to open a file against his King

[19...−− 20.Nf5 gxf5 21.gxf5 Kh8 22.Rg2 Ne8 23.Reg1 and the threat of 24 ♖g8 mate assures the return of the piece to White, and leaves him with a decisive advantage]

20.fxe3! The doubled Pawns are quite strong; they allow no point of entry to Black⇗s pieces. **20...Bd7 21.Rg3 c6 22.Bc4**

[22.c4 cxd5 23.cxd5 *(23.exd5* the pressure on f5 is lessened, and Black might get in the thrust Δ f5 *)* 23...Rc8 and Black controls an important open file.]

22...cxd5 23.Bxd5 Be6 24.Reg1 Rc8

[If Black becomes impatient and tries to break through by 24...Bxd5 25.exd5 f5 26.Bxg7 Kxg7 *(26...Rxg7 27.gxf5)* 27.gxf5]

25.Nh4 The Knight is bound for f5, there to give up its life. Its capture will open the g−file, uncovering attacks along the length of it. **25...Bxd5 26.exd5 Rc7** Black⇗s move strengthens the square g7, so that it is guarded four times - but it⇗s not enough!

[If the King moves out of the line of fire by 26...Kh8 27.Nf5 gxf5 28.gxf5]

27.Nf5! sacrifice which Black must accept, or lose the exchange (after the Queen moves away) **27...gxf5**

[27...Nxf5 28.gxf5 g5 29.h4 *(* or crash into the position immediately with *29.Bxg5 fxg5 30.Rxg5+)*]

28.gxf5 Qe8

[28...−− 29.Bxg7 Rxg7 30.Rxg7+ Qxg7 31.Rxg7+]

29.Qg2 Qd7 30.Rxg7+ Rxg7 31.Bxg7 Qxg7 32.Qc2 A pin which forces Black to return some of his ill−gotten gains. **32...Ng6 33.fxg6 h6** The consequence of White⇗s fine combination is that he has an extra Pawn and the better position. However, he must find a new way to break through, as the g−file is closed once more. **34.Qf5 Qf8**

[34...Rxc3 35.Qe6+ Kf8 *(35...Kh8 36.Qe8+ Qg8 37.g7+ Kh7 38.Qg6#)* 36.Rf1 Qe7 37.g7+! Qxg7 38.Rxf6+]

35.c4! Kg7

[35...Rxc4 36.Qe6+ Kg7 37.Qd7+ Kg8 38.Qh7#]

36.Rc1 b6

[36...−− 37.c5 dxc5 38.bxc5 Rxc5 39.Qd7+ Kxg6 40.Rg1+ Kh5 41.Qh3#]

37.e4 This is meant to prevent Black from freeing himself by Δ f5, in the event that White⇗s Queen moves away. **37...Qe7 38.Qf2 Rb7 39.h4 a5** Besides this move, Black must consider these alternatives

[39...h5 40.Qf5 Kh6 41.Rg1 Qg7 42.Rg5 fxg5 43.hxg5#]

[39...Kxg6 40.Rg1+ Kf7 41.Qf5

A) 41...Kf8 42.Qc8+ Kf7 *(42...Qe8 43.Rg8+)* 43.Qg8#;

B) 41...−− 42.Qh7+ Ke8 43.Rg8+

Kd7 44.Qxe7+ Kxe7 45.Rg7+]
40.h5! axb4
[Against a waiting move, say 40...Qf8 41.bxa5 bxa5 42.c5 dxc5 43.Qxc5 Qxc5 44.Rxc5 Ra7 45.d6+−]
41.Rb1 b3 42.Rxb3 Qd7 43.Qf5 Qe7
[43...Qxa4 44.Rf3+−]
44.Qe6 Qc7 White now forces the game by clever combination play. He begins with an exchange of Queens, throwing in his passed Pawn as largesse. **45.Qf7+! Qxf7**
[45...Kh8 46.Qf8#]
46.gxf7 Ra7
[46...Kxf7 47.a5+−]
47.Rxb6 This begins an amazing clearance of Pawns. Nearly all of them disappear in the next few moves!
47...Rxa4 48.Rxd6 Rxc4 49.Rxf6! A little endgame trick, originally perpetrated by Morphy on Harrwitz in the third game of their match in 1858
49...Kf8 50.d6 Rxe4
[50...Rd4 51.Kg2 Rd1 52.Kf2 Rd4 53.Kf3 Rd2 54.Kg4]
51.d7 Rd4 Now comes a beautiful conclusion! White gives up his splendid passed Pawns, for the sake of promoting an unlikely candidate - the innocent−looking h−Pawn. **52.Rxh6! Kxf7**
[52...Rxd7 53.Rh8+ Kxf7 54.Rh7+ Ke8 55.Rxd7 Kxd7 56.h6]
53.Rh8 A delightful ending to a game beautifully played by Eliskases.
1−0

□ **Bronstein,D.**
■ **Rojahn,E.**
Moscow Olympiad (Game 5) 1956
[Steve Giddins]

Martin Lokander: 'I must admit that I couldn't find a model game for Black against the following variation. Apparently 6 million games in the database isn't enough. Anyway, I've elected to go with the entertaining stem game in which White's gamble actually succeeds. For my suggested improvements, read the notes, especially to Black's 9th and 10th moves. ' **1.e4** Martin Lokander **1...e5 2.Nf3 Nc6 3.Bc4 Nf6**
[As this game shows, Bronstein was a fount of remarkable opening ideas, and this might be an appropriate time to mention another, which I came across some years ago in an old issue of the Russian magazine, 'Shakhmaty v SSSR'. In the main line of the Giuoco Piano, a well−known tabiya is reached after 3...Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 .
A) Now the best move is generally agreed to be 10...Na5 , but this has the significant drawback that White can force a draw after 11.Qa4+ Nc6 12.Qb3 , etc.;
B) Black players wishing to fight for a win here are therefore forced to resort to 10...Nce7 , which avoids the immediate draw, although White probably retains a pull, objectively.;
C) I for one certainly never seriously entertained the thought that Black might have any other playable move in this position, but I had failed to reckon on the tireless creativity of David Bronstein. In a clock simultaneous in the 1960s, against the well−known endgame study composer Ernest Pogosyants, Bronstein played the remarkable move 10...0−0!? . It looks like madness, but, on closer inspection, after 11.Bxd5 Na5 Black regains the piece. 12.Bxf7+ *(*in the game, Pogosyants refrained from taking the pawn, and was holding the balance until very near the end; the rest of the game is not of great importance in itself, but once again, I offer the complete score, for the benefit of collectors of Bronstein game scores: *12.Qc3 Qxd5 13.0−0 Nc6 14.Rfe1 Be6 15.Nb3 Qh5 16.Ne5 Bd5 17.Nxc6 bxc6 18.Qg3 a5 19.Nc5 Rfe8 20.Re5 Qg6 21.Qxg6 hxg6 22.Rae1 Rxe5 23.Rxe5 Rb8 24.h4 Rxb2 25.Re8+ Kh7 26.Nd7 g5 27.hxg5*

Kg6 28.Ne5+ Kxg5 29.f4+ Kf6 30.Ng4+ Kf5 31.Ne3+ Kxf4 32.Nxd5+ cxd5 33.Re7 f5 34.Rxg7 Rxa2 35.Re7 Ra4 36.Re2 Rxd4 37.Kf2 a4 38.Ra2 Ke4 39.Ke2 f4 0−1, E.Pogosyants−D.Bronstein *)* 12...Rxf7 is then critical, when Bronstein claims that Black has sufficient initiative to compensate for the pawn. That is perhaps objectively questionable, although Black's position does not looks so much worse than in the main line of the 4 Ng5 Two Knights.;

D) 10...−−]

4.Ng5 QUESTION: Is this good? Tarrasch dismissed it as bad, didn't he? ANSWER: Yes, Dr. Tarrasch famously derided it as "a duffer's move", whereas Steinitz stubbornly stuck to it, despite losing a number of bad games against Chigorin. The dispute rumbled on for decades, but the advent of computers has certainly swung grandmaster opinion towards the white side, and nowadays, one finds few GMs willing to play the black side of the Two Knights.

4...d5 5.exd5 Na5 And this is the main reason why. Not only does Black lose a pawn, but he is also forced to put his knight on the edge of the board. Although White is behind in development, his position contains no weaknesses at all, and nowadays, strong players tend not to trust such sacrifices.

[Unfortunately for Black, the two alternative continuations 5...b5] [and 5...Nd4 , which see the black knight occupy a central post, have both been analysed out to a white advantage.]

6.d3?! A very unusual choice for the 20th century.

[The line that has put people off the Two Knights is 6.Bb5+ c6 7.dxc6 bxc6 and now both 8.Qf3 *(* and Steinitz's old move *8.Bd3* have achieved excellent results for White in the computer era. *)*]

[QUESTION: But is there anything wrong with Bronstein's 6.d3 ? It looks quite logical to defend the bishop and open the other white bishop's line. ANSWER: It is, but the problem is the sequence which follows.]

6...h6 7.Nf3 e4 This is the rub.

[For many decades, it has been assumed that after 7...e4 White has nothing better than 8.Qe2 , but after Nxc4 9.dxc4 Bc5 Black has excellent play for the pawn. However, for this game, Bronstein had prepared a very special idea.]

8.dxe4!? Astounding. QUESTION: Err, doesn't this...? ANSWER: Yes, it does. White is giving up a whole piece, for which he will have only a couple of pawns, plus a central pawn duo. At first sight, it looks like madness, and indeed, the line has never been trusted and has not been repeated at GM level, but it works on this occasion. QUESTION: What was the reaction of Bronstein's teammates? ANSWER: Ah, well thereby hangs an interesting tale. This game was played in an Olympiad. The Soviets had a very good rule in operation within their team, to the effect that nobody was allowed to play in a manner that might cause their teammates to be alarmed about their position. This was for the very good pragmatic reason that, in a

four−board match, if the other players start to believe that teammate X is losing, they are liable to start taking liberties in their own games, to try to generate winning chances to make up for him. This very often makes the match situation worse, and so the Soviets always tried to avoid such dangers. In accordance with this 'rule', Bronstein records that he had shown his idea to his teammates the night before, and had received their blessing to his trying it out. QUESTION: But his opponent obviously did not know about this? ANSWER: No, According to Bronstein, after the game, his opponent complimented him on his coolness and cold−bloodedness, in calmly playing on and finding the best chance, after "blundering" away a piece! Martin Lokander: 'I'm not sure what assessment to give this move. I love the creative idea behind it, but in reality it doesn't work as well as I would like it to. The credit for this idea goes to the creative genius David Bronstein, who successfully applied the piece sacrifice in this very game. ' **8...Nxc4 9.Qd4** Martin Lokander: 'White has a huge pawn centre that can gain time by attacking Black's knights. It turns out that his compensation is real and Black should really know something about how to react.'

[A few players have tried 9.Qd3 (Martin Lokander) , perhaps because White's queen is slightly exposed on d4 or maybe just to get Black out of book. After Nb6 10.c4 I'd like to take advantage of White's queen placement with Bg4! . With the queen on d4, White would have e4−e5, hitting the bishop on g4. However, now Black can happily exchange off White's f3−knight and establish better control over the dark squares.]

9...Nb6?! This is already a critical moment.

[Rojahn's choice is the most obvious, but in actual fact, Martin Lokander: 'It wasn't my first intention, but Bologan's recommendation of ' 9...Nd6 was more critical. QUESTION: But that just sets the knights up to be forked, doesn't it? ANSWER: It looks that way, but tactical resources change the assessment, and after Martin Lokander: '!?' Martin Lokander: 'might actually be the strongest response, with the idea of' 10.Nc3 Black has the nasty trick *(*it is, of course, important that *10.e5* (Martin Lokander) can be met with *Nf5 11.Qa4+ Qd7; 10.0−0* (Martin Lokander) can be met in a similar way with *Nfxe4 11.Re1 f5* when Black can follow up with ...Qf6, after which his material advantage should prevail *)* 10...Nfxe4 Martin Lokander: '!' Martin Lokander: '. Your opponent is unlikely to be aware of this strong near−refutation. Following ' 11.Nxe4 Qe7 , when he regains the piece and eliminates one of White's central pawns. After the further moves

A) 12.Ne5 Nxe4 *(12...Bf5* (Martin Lokander) is also very good for Black *)* 13.Qxe4 f6 14.f4 fxe5 15.fxe5 Qb4+ is also better for Black;

B) 12.0−0 Nxe4 *(*and not *12...Qxe4?? 13.Re1)* 13.Re1 f5 it looks a bit shaky, but Black should emerge with most of his

booty intact: for example, 14.Nd2 Martin Lokander: 'Bologan's '

B1) 14...Kd8! (Martin Lokander) a nice, cool move as the king simply steps right out of the danger zone; 15.Nxe4 fxe4 16.Rxe4 *(*or *16.Bf4 Bf5!* when Black will unravel his extra piece with ...Qd7 and ...Bd6 *)* 16...Qf6 Black will follow up with ...Bd6 when his extra piece has been consolidated.;

B2) 14...Qc5 Martin Lokander: '!?' Martin Lokander: 'is fine as well' 15.Qe5+ Kf7 16.Nxe4 fxe4 17.Qxe4 Bd7 and, objectively, White does not have enough. QUESTION: So is 9...Nd6 just a refutation? What did Bronstein intend? ANSWER: I am not sure! It is curious that neither in '200 Open Games', nor 'The Sorcerer's Apprentice', does Bronstein mention the move 9... Nd6, or say what he had in mind.]

10.c4 Martin Lokander: '?!' Martin Lokander: 'The main continuation, but I dare say it's an error. '

[10.0−0! (Martin Lokander) is a much better move order, although it has only been tried twice. Black should still be better, of course, but White seems to have decent practical compensation and this is the reason I prefer 9... Nd6.]

10...c5? Black was clearly totally thrown by events on the board, and it is perhaps not surprising that he found it hard to orient himself. The mass of white pawns from c4 to e4 looks dangerous, and Rojahn hastens to blockade the c−pawn, but the result is that the white d−pawn is now passed, whilst Black's king's bishop has limited scope. Martin Lokander: '?!' Martin Lokander: 'A very natural move, but most likely a mistake as well. We will soon notice that it's harder to develop Black's pieces when White's central pawns are free to walk.'

[He would have done better to play 10...Nbd7 followed by 11...Bc5. QUESTION: Wasn't he frightened of

A) 11.0−0 Martin Lokander Bc5 12.Qc3 and then 0−0!? *(*or *12...Nxe4 13.Qxg7 Qf6* . Black's extra piece should be decisive. *)*;

B) 11.e5 ? I know I would be. ANSWER: It does look a bit scary, I agree, but the computer shows that 11...Bc5 12.Qh4 *(12.Qd3?! Ng4)* 12...Qe7 is better for Black, as the white centre is overextended. For example, 13.Bf4 Nxe5 14.Bxe5 g5 15.Qg3 Nh5 wins the queen. However, one should not be too critical of Rojahn, as it is all too easy to sit in the comfort of one's study, with Fritz whirring away on one's computer, and think how easily Black could have refuted the sacrifice. Over the board, with the clock ticking and the other players crowding round the board, looking at Bronstein's latest amazing idea, it is much, much harder to keep one's cool and analyse the tactics accurately. One must also bear in mind the God−like reputation that the leading Soviet players had in that era - I should imagine this was such that,

when Bronstein played 8 dxe4, his opponent will have 'believed' him, and already mentally accepted that he had run into a powerful new idea. In such a case, it is very hard to maintain one's objectivity and play normally.]

11.Qd3 Bg4 12.Nbd2 Be7 Martin Lokander: 'Now with Black's pawn on c5, White's big pawn centre provides good long−term compensation and Bronstein doesn't have to rush things.' **13.0−0** QUESTION: So now what is the assessment? White is still a piece down and he does not seem to have any threats. ANSWER: True, but Bronstein was ready for that. He is placing his faith in the long−term advantage of the mobile pawn centre. This is very much a case of what Rudolf Spielmann termed a 'real sacrifice', where there is no immediately calculable way to regain the material or give mate. Rather, it is a long−term sacrifice, where White hopes his two pawns and massive pawn centre will offer sufficient compensation for the piece. **13...0−0!?**

[Bronstein later criticized this, and said Black should have taken his final chance to exchange off this bishop for the knight with 13...Bxf3 . Now it becomes a target for the onrushing white pawns.]

14.Ne5 Bh5 15.b3 Martin Lokander: 'The bishop is placed on a dangerous diagonal and White can play a future f2−f4 which would increase his influence in the centre.' **15...Nbd7 16.Bb2 Nxe5 17.Bxe5 Nd7 18.Bc3 Bf6** QUESTION: Black's play looks very logical! ANSWER: It does and it is. He has exchanged off his badly−placed knight on b6 and now seeks the exchange of dark−squared bishops, whilst at the same time maintaining control of e5. The computer still assesses the position in Black's favour. **19.Rae1 Bxc3** Martin Lokander: '?!' Martin Lokander: 'So far Black has defended fairly well, but this is imprecise.'

[Instead, 19...Re8 Martin Lokander 20.f4 Bg6 applies pressure on the b1−h7 diagonal and if White's queen moves then ...Bd4 becomes possible, with reasonable counterplay. This would certainly have been a better chance.]

20.Qxc3 Qf6 Martin Lokander: '?' Martin Lokander: 'A move difficult to understand. Black provokes White's pawns to move forward even though doing so is clearly to White's advantage.'

[20...f6 is the computer's choice here, but after 21.f4 play continues along similar lines. Fritz still claims a small edge for Black, but its assessment is dropping with every move, which usually means that the players knew what they were doing.]

21.e5

[QUESTION: Wait a minute! Isn't 21.Qh3 attacking two pieces? ANSWER: Yes, but Rojahn had seen this and intended the reply Qb2 . If then 22.Nb1 Be2 23.Qxd7 Bxf1 24.Rxf1 Qxa2 and Black has returned the exchange, to neutralize the white initiative. QUESTION: So you mean Black was trying to equalize? ANSWER: So it would seem, and Bronstein's response shows that he was not interested in such a continuation. Although Fritz still thinks Black is better, it is clear that

both players were of a different opinion during the game.]

21...Qf5 22.f4 Now the pawn centre really starts to assume menacing proportions, and even the silicon beast agrees that White is now very much on top. Bronstein's faith in his position has been justified, and the remainder of the game is pure pleasure for White.

22...Bg6 23.Ne4 Martin Lokander: 'White's initiative is extremely strong and we can see that Black has difficulties making his extra piece felt. Moreover, he is quickly forced into something of a tangle. ' **23...Rab8** QUESTION: What is the point of that? ANSWER: Black just defends the b7−pawn against the threat of 24 Nd6. But such a passive move can hardly be good.

[23...b6 looks like a better way to do the same thing, although it does not change the course of the game.]

24.Qf3 Now g4 is also on the agenda.

24...Bh7

[24...Nxe5 was a try to disrupt the course of White's build−up. After 25.fxe5 Qxf3 *(*or *25...Qxe5 26.Nxc5* when "White has an extra passed pawn" - Vainstein *)* 26.Rxf3 Bxe4 27.Rxe4 "the double rook ending with an extra pawn is won for White" (Vainstein).]

[24...Bh5 is a better option, also mentioned by Vainstein, who then gives 25.Ng3 *(*Fritz's simple line *25.Qe3 Bg6 26.Nd6 Qd3 27.f5 Qxe3+ 28.Rxe3* looks even more crushing *)* 25...Bxf3 26.Nxf5 Bg4 27.Ne7+ Kh8 28.f5 and claims a winning advantage for White.]

[Finally, there is 24...Qh5 , which the computer suggests as the best chance. After 25.Qxh5 *(25.g4 Bxe4 26.Rxe4 Qg6 27.f5 Qg5* is less clear, according to the beast *)* 25...Bxh5 26.f5 White retains what should be a decisive advantage, although some work remains to be done.]

25.g4 Qg6 26.f5 Now it turns into a massacre, as the pawn armada sweeps away all resistance. **26...Qb6 27.Qg3 f6 28.e6** If anything justifies Bronstein's original idea of 8 dxe4, it is this position. Martin Lokander: 'A beautiful position to look at. I don't think any further annotations are necessary. After Black played 10...c5, the small mistakes just kept coming because the position wasn't any longer so easy to handle. ' **28...Ne5 29.h4!** It seems only fair to include White's eighth and final pawn in the fun. **29...Kh8 30.g5 Rbc8 31.Kh1** QUESTION: Huh? ANSWER: Yes, I know it looks a bit strange. But besides setting up gxf6 and then Rg1, there is probably also an element of sadism about it - Black is invited to consider that, if White has time for such moves, perhaps it is worth considering resignation. **31...Qd8** Not on your life!

32.g6 Bxg6

[Unable to face the horrors of 32...Bg8 33.d6 Black makes a desperate sacrifice, but it does not long delay the inevitable.]

33.fxg6 b5 34.d6 Qb6 35.d7 Nxd7

[After 35...Rb8 White has many ways to win, but I suspect Bronstein might have chosen 36.Qxe5 *(36.e7* is simplest of all *)* 36...fxe5 37.Rxf8+ Rxf8 38.e7 .]

36.exd7 Rcd8 37.Nxf6! A final sacrifice to finish off a masterpiece. **37...Qc6+**

38.Qg2 One of Bronstein's most famous games. The remarkably imaginative piece sacrifice 8 dxe4 does not appear to be really correct (especially after 9... Nd6!), but one must remember that Rojahn was no fool - he was good enough to get in the powerful Hungarian Olympiad team, for a start. The game illustrates how effective such long−term sacrifices can be in an over−the−board situation, with the defender taken by surprise and having limited time on the clock.
1−0

White can of course continue with , and the rook on a7 is covered. White can of course continue with , and the rook on a7 is covered. White can of course continue with 28.Qxe8+ Kg7 29.Qg8+ Kf6 , and readers can try to speculate whether, with the extra pawn, White is winning, or whether Black can hold, with all the pawns being on the same side of the board. White can try to do better with his pieces, though not White can try to do better with his pieces, though not White can try to do better with his pieces, though not 30.Qf7#?]

22.Nh6+ Kg7 23.Nxf7 Rf8 24.Bxf4

[The computer suggests that The computer suggests that The computer suggests that 24.axb5 axb5 *(24...Rxf7 25.Bxf7 Qxf7 26.bxa6 Bc6 27.Be3* , and then perhaps , and then perhaps , and then perhaps *)* 25.Bxf4 exf4 is a draw, but if we play on, White still has a clear edge after is a draw, but if we play on, White still has a clear edge after is a draw, but if we play on, White still has a clear edge after 26.e5]

24...exf4 25.axb5 a5

[25...axb5 26.e5 , and a safe victory. The straightforward capture, The straightforward capture, The straightforward capture, Qxf7! , is however safer and better. Black has no safe squares for his checks, apart from , is however safer and better. Black has no safe squares for his checks, apart from , is however safer and better. Black has no safe squares for his checks, apart from 27.Qxb7 . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a

move, with . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a move, with . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a move, with Qxb3! , and there are no further checks. Black could still try , and there are no further checks. Black could still try , and there are no further checks. Black could still try 28.Rxa7 , when there is a wide choice for White, the simplest being , when there is a wide choice for White, the simplest being , when there is a wide choice for White, the simplest being Rxa7 29.Qxa7 Qxb2 . White is covering the h1, g1 and f2 checking squares for the queen. This line is visually complicated, and quite probably most players would find it highly uncomfortable in trying to play through such a variation in their head, with White's king wide open against queen and rook. On reflection, I have no longer given my move, my pawn push, a question mark. It is a good practical move, and I considered at the time that the queen and pawn ending was winning for me. I could not see any successful perpetual check for Black, and I still do not. There are several stages in this game where I can be criticized over many of my moves, and certainly this game dragged out for a long time, even though I was a pawn up in the opening. This was bad, but at least I managed to keep an edge every move throughout the game, and indeed quite probably a decisive edge. At no stage did my opponent equalize. . Russian Ch., Krasnoyarsk 2003

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Nxe5!?

[This was the usual move before Kasparov played 8 Qxd4!, thereby elevating 7.Be2 to main line status.]

7...Nxc4 8.Nxc4 The outcome of the opening is already quite clear. The position is relatively balanced, with White having a strong centre and Black having the two bishops. Now Black

needs to strike in the centre before White takes complete control. **8...d5 9.exd5 Qxd5 10.Ne3 Qa5** Others:

[10...Qd8 11.0−0 Nf6 12.c4 0−0 13.Nc3 c6 14.Rb1 Re8 15.Bb2 Qc7 16.Qf3 Bd7 17.Ne2 Bd6 *(17...Rad8 18.Ng3 Bc8 19.d5!* and White has some plus here, G.Kasparov−N.Short, London (rapid) 1993 *)* 18.Ng3 Bxg3 19.fxg3 Re7 20.d5 Rae8 21.Bxf6 Rxe3 22.Be5 Rxf3 23.Bxc7 Rxf1+ 24.Kxf1 with equality.]

[10...Qd7 11.0−0 Nf6 12.c4 0−0 13.Nc3 *(*if *13.Bb2?! b5! 14.Nc3 bxc4 15.Nxc4 Rb8* and Black is at least slightly better *)* 13...c6 14.Qd3 Ng4 15.h3 Nxe3 16.fxe3 b6 17.Bb2 Ba6 18.Rac1 Rad8 19.Rf3 f5 20.Ne2 Rf7 21.Qb3 and game is unclear, S.Ganguly−K.Sundararajan, Indian Championship 2004.]

11.0−0 Nf6 12.c4 c6 13.d5 Qd8?! It is not really clear what the queen is supposed to do from d8. Some alternatives needed consideration:

[13...cxd5 is quite a risky move: 14.cxd5 0−0 15.d6 Bd8 16.Bb2 Re8 17.Nd2 Bd7 18.Ndc4 Qa6 19.Ne5 Be6 20.a4! Bb6 21.N3g4 and White has a strong attack.

A) . M.Rybak−Z.Necesany, correspondence 2000, continued 21...Nd5? 22.Ra3! Nf4 *(*if *22...f6 23.Nh6+ gxh6 24.Rg3+ Kf8 25.Qh5* wins*;* , or *22...Red8 23.Rg3 f6 24.Nh6+ Kf8 25.Ba3 g6 26.Nxg6+ hxg6 27.Rxg6 Rd7 28.Qg4!!* forces mate *)* 23.Rg3 Ng6 24.d7 Red8 25.Nh6+!! 1−0. If gxh6 26.Qh5 Qxa4 27.Nxg6 hxg6 28.Rxg6+ Kf8 29.Bf6 and White wins.;

B) . Instead 21...Nxg4 22.Nxg4 Qc4! gives Black chances for a defence, *(*but not *22...Bc5? 23.Qf3 Qxd6 24.Nf6+! gxf6 25.Qxf6 Kf8 26.Qg7+ Ke7 27.Qg5+ Kd7 28.Rfd1* and wins *)*;

C) 21...−−]

[13...Qc7! is the simplest. After 14.Bb2 0−0 15.Nc3 a6 16.Qd4 c5 17.Qd3 Bd6 18.h3 Re8 19.Nf5 Bxf5 20.Qxf5 Re5 21.Qd3 Rae8 Black is alright, O.Rajala−R.Pomell, correspondence 1977.]

14.Qf3 cxd5 15.cxd5 0−0 16.Na3 Ne8? Black is fighting for control of d6, but he has only two minor pieces that can help to cover, whereas White has three. The coming exchanges only aid White. Instead:

[16...Rb8?! 17.Rd1 b5 has the minus of weakening c6. After 18.Rb1 a6 19.Bb2 Qd6 20.Nac2 Re8 21.Nd4 White is much better.]

[16...Re8 17.Nac4 Bc5 18.Bb2 Ne4 is a better defence, and while the position might appear bad for Black after 19.Rad1 , he can use tactics to keep the balance: Qg5 20.d6 Bd7 21.Rd5 Qh6 22.Ne5 Ng5! 23.Qd1 Bxe3 24.Nxd7 Ne4 25.fxe3 Qxe3+ 26.Kh1 Nf2+ 27.Rxf2 Qxf2 28.Bc3 Re3 29.Rc5 Rd8 with counterplay.]

17.Nac4 Nd6 18.Bb2 Nxc4 19.Nxc4 Bf6 This move does not look good, but Black is getting quite desperate in his defensive efforts. **20.Bxf6 Qxf6 21.Qxf6 gxf6** This ending should be more or less lost for Black. **22.Rfd1 Rd8 23.Rd4 b5 24.Ne3 a5 25.Kf1 Ra6 26.Rc1 Bd7 27.Rc7 b4 28.Ke1 Kf8 29.Rdc4?** White fails to control his opponent's only possible counterplay,

the advance of the b−pawn.
[The precise move was 29.Kd2! when the king comes to the queenside, allowing the rooks to go to the seventh row; while after Rb6 30.Nc4 and White wins.]
29...Rb6 30.Ra7 a4 31.Rcc7
[Or 31.Kd2 b3 32.axb3 axb3 33.Kc1 b2+ 34.Kb1 f5 35.Rcc7 f4 36.Rxd7 Rxd7 37.Rxd7 fxe3 38.fxe3 Rb3 and Black has good drawing chances.]
31...b3 32.axb3 axb3 33.Nc4
[If 33.Rcb7 Rb8 34.Rxb6 Rxb6 35.Nc4 Bb5! and Black is defending without risks.]
33...Rb4? Now Black is starting to drift.
[Instead, the clever 33...Be8! would have solved most of his problems. After 34.Rcb7 Rxb7 35.Rxb7 Rxd5 36.Rxb3 White has only a spiritual advantage.]
34.Rab7 Rxb7 35.Rxb7 Ba4??
[35...Bf5 36.Ne3 Bc2 was necessary as it's the only way Black stays alive, though after 37.Kd2 White still has good winning chances.]
36.Rb4 Be8 37.Ne3 Ke7 38.Rxb3 Kd6 39.Ke2 Bd7 40.Rb6+ Ke5 41.g3 Rh8 42.Rb7 Rd8 43.Kf3 h5 44.Rb4 Bg4+ 45.Kg2

A) 15.Qe2? Bg4 16.f3 Qd4+ 17.Kh1 Bd7 18.Nbd2 0−0−0 19.Rad1 Qb6 20.Nc4 Nxc4 21.Bxc4 Rhe8 and Black was much better in B.Boschma−C.Van Wieringen, correspondence 1999.;

B) . White should have preferred 15.Bxb4 , when we could imagine play continuing Bxb4 16.Nbc3 Qd3 17.Qb2 c6 18.Rad1 Qa6 19.Rfe1 Bg4 and now 20.Nxf6+! gxf6 21.Ne4 Bxd1 22.Nxf6+ Kd8 *(*not *22...Kf8? 23.Nd7+! Ke8 24.Qxe5+* and White wins *)* 23.Rxd1+ Nd3 24.Qd4+ Kc7 25.Rxd3

B1) not 25...Rad8? 26.Qe5+ Bd6? *(*or *26...Kb6 27.Nd7+ Rxd7 28.Rxd7* with a deadly attack *)* 27.Rxd6 Rxd6 28.Qe7+ and White wins;

B2) 25...Qa3 26.Bg8! Qc1+ 27.Rd1 Qg5 28.h4 Qf5 29.Nd5+!? *(29.Bxh7* is also promising *)* 29...cxd5 30.Qxh8 Rf8 31.Qxh7+ Qxh7 32.Bxh7 and White has good winning chances despite the opposite−coloured bishops.;

C) 15.−−]

14.Nd6+?! I am ready to bet here that the knight is singing the pop hit 'No Limit' in a very dubious falsetto (just imagine a horse singing!).

[Better was 14.f4 Bg4 *(*if *14...Bb6+ 15.Kh1 Bg4 16.Qe1 c2 17.fxe5 cxb1Q 18.Rxb1* with a clear advantage *)* 15.Qe1 c2 16.Nbd2 Qb6+ 17.Kh1 Nd3 18.Nd6+ Kd7 19.Qg3 and White's attack is pretty strong.]

14...Kd7 15.f4 Ng6 16.Bxd5! Qb6+

[Not 16...cxd5? 17.Qb5+ and White wins.]

17.Kh1 cxd5 18.Nxc3!! White rightly puts time before material; there are limits to how much you can hesitate when it comes to sacrificing a inactive little pony. **18...Bxc3 19.Rab1 Qc6**

[After 19...Qa6 20.Nb5 Ba5 21.Rbd1 Qe6 22.Qf3 Ne7 23.Bxe7 Kxe7 24.Qa3+ Kf7 25.Nd6+ Kg8 26.f5 Qe5 27.Qxa5 White's superiority is overwhelming.]

20.Qd3 d4

[If 20...Ne7 21.Rfc1 d4 22.Nb5 Nd5 23.Nxd4 and White wins according to Bronstein.]

21.Nb5 Rd8 22.Nxc3 Qxc3 23.Qb5+ Qc6 24.Qb3 Rh8?? This is a typical mistake for the older generation of computers. Straight talk would be to say that their circuits melt down from calculating too many variations. The move itself has no real idea (a purely human concept of course) behind it (other than to vacate d8 for the king), and White wins without any problems. Some further comments on this position are, however, in order.

[24...Re8? loses fairly straightforwardly to 25.Rbc1 Qe6 26.Qa4+ Kd8 27.Qxd4+ Bd7 28.f5 Qe5 29.Qxd7+!! Kxd7 30.Rfd1+ and White wins.]

[24...Qe6! was the only move and should give Black a draw. Now White can continue:

A) 25.Qa4+ Kc7 26.f5 Qd7 27.Qc4+ Kb8! *(*stronger than *27...Qc6?! 28.Qf7+ Rd7 29.Qg8*

Ne7 30.Bxe7 Rxe7 31.Rbc1 h6 32.Qd5 a5 33.Rfd1 Rd7 34.Qe4 Ra6 35.Qf4+ Rd6 36.Qg3 Bxf5 37.Qxg7+ Bd7 38.Qxh6
with advantage to White, although Black still has good counterplay *)*
28.fxg6 hxg6 29.Rbc1 *(*or *29.Rfe1 Qc7 30.Qb3 b6 31.Re7 Rd7 32.Rxd7 Bxd7 33.Rc1 Qe5*
, when the white attack is over and Black is clearly better *)* 29...a5! 30.Rfe1 Ra6 31.Re7 Qc6 32.Qd3 Qd5 and Black has defended successfully. Now the hunter and the prey will change seats.;
B) 25.Qb4! is much stronger, e.g. a5 26.Qa4+ Qc6 27.Qb3 *(*not *27.Rb5? Ke8 28.Re1+ Be6 29.Rxb7 Rd6* and White's attack is gone *)* 27...Qe6 28.Qb5+ Qc6 with a draw by repetition.
*(*Black cannot sidestep with *28...Kc7?* as *29.Rfc1+ Kb8 30.Qc5* wins for White. *)*;
C) 25.−−]

25.Rbc1 Qe6 26.Qc2 Qb6 27.Bc5 Qc6 28.Qb3 Kd8 29.Bxd4 Qe4 30.Qc3 Be6 31.Rfe1 Qd5 32.Rcd1 Ke8 33.Bxf6 Qxd1 34.Rxd1 gxf6 35.Qxf6 And White is winning. **35...Bf7 36.f5 Rg8 37.Qd6 Bxa2 38.fxg6 Rxg6 39.Qd7+ Kf8 40.Qxh7 Rg7 41.Qh8+ Bg8 42.Rf1+ Rf7 43.Qh6+ Ke8 44.Re1+ Re7 45.Qh5+ Kf8 46.Qh6+ Ke8 47.Rf1 Rf7 48.Rd1 Rh7 49.Qd6 Re7 50.h4 Be6 51.Qe5 1−0**

□ **Caruana,F.**
■ **Iturrizaga,E.**
35: Aeroflot Open 2012
[Cyrus Lakdawala]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2
[7.Nc3]
7...Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 10.0−0
[10.Qb3 wins Black's queen. However, the know−it−all computer points out that after Nce7! Black is mated in seven moves. *(10...Na5!)* 11.0−0 0−0 12.Rfe1 c6! is a winning attack for White, since e6 falls.]
10...0−0 In this way, at the cost of the bishop pair, Black retains a good bishop and forces White to retreat a piece.
11.Ne4
[If 11.Rc1 Nb6 wins the b−pawn, with check. 12.Bb3??]
11...Bg4 Black goes after White's e5−pawn.
[11...h6 Winning the queen. 12.Ne5 Be6 13.a3 Nf4 QUESTION: Isn't this going to be hard for White to win, since Black's assets are rook, bishop and passed d−pawn? ANSWER: It's a clear win, mainly because Black is unable to hang on to his b−pawn. 14.Nxc6 bxc6 15.Bxe6 fxe6 16.g3 Qd5 17.f3 Nh3+ Caruana blockades Black's d−pawn. 18.Kg2 Intending ... e5−e4. Ng5 19.Qd3! This is a good try. Black wants to activate his bishop; the trouble is that Black's position can't be saved, no matter what he does. c5 20.Nxc5 e5 21.Qb3 Black doesn't have the time to push his d−pawn further. Qxb3 22.Nxb3

Rab8! This move forces Black's rook back. 23.Nd2 Rxb2 24.Rad1 e4 25.f4 Nf3! The push of the e−pawn disrupts Black's attempts to organize a defence. 26.Rf2 e3 27.Rxf3 Re8 28.Kh3 Rxd2 29.Rxe3 Rxe3 30.Rxd2 Rxa3 It was the English king Richard II who once said, ⊕Serfs you were and serfs you shall remain.⊞ It becomes clear that Black's passed d−pawn isn't going anywhere. 31.Rc2 Rd3 32.Rxc7 Rxd4 After 33.Rxa7 Rd2 34.f5 Rf2 35.g4 h5 36.Kg3 Rf1 37.h3 Black is unable to halt both the e− and b−pawns. Kh7? 38.Kh4 wins the bishop, as does Rf3? 39.Kxh5 . If Rxh3+ 40.Kg5 Rf3 41.Rf7 , Black's forces are stuck where they are and White centralizes his king.]

12.Nc5! Planning to blast the c−file open to enhance both bishop pair and development lead.

[12.Rc1 Unpinning his c4−pawn. Re8 Black logically closes the queenside. The question thus arises as to why he tried to open it with ...b7−b5 on his 27th move. 13.Nc3 Nf4 14.Qb3! Caru threatens his opponent on a second front. Bxf3 15.Bxf7+ Targeting the e6−pawn. Kh8 16.Nb5 Bxg2 17.Rc5 Bxf1 18.Kxf1 Securing c4. Now White's rook is free to roam. Rf8 19.Rf5 Nxd4 The text move is made with the philosophy: If you are going to commit suicide, don't jump from the ground floor window. Take the elevator to the 19th floor and do it right. EXERCISE (combination alert): What is White's most forceful continuation of his attack? 20.Nxd4! ANSWER: Line opening. Qxd4 21.Kg1 Qe4]

12...Rb8 Discouraging c2−c4. **13.Rc1!?** ...or maybe not! Caruana plays the central break anyway, a new move in this position. **13...Nb6** I have a feeling this move is the seed of Black's future difficulties. **14.Be2 Re8!?** The start of an ambitious idea.

[14...Qc8!?]

[14...Qf6]

15.Nxb7 Rxb7!? QUESTION: Isn't Black worried about loosening his king's cover? ANSWER: It's a trade−off. Black plans to round up White's e5−pawn with the idea ...Ng6 and ...Bg7, when one of his knights can chop e5. The problem with the line, as you mentioned, is that it loosens the pawn front around Black's king which will give White attacking chances.

[15...Qf6 16.Nc5! The rook blockades the d−pawn and is able to swing to either side of the board. Rxe2 17.Qxe2 Nxd4?! This looks like an overly aggressive winning try in a position where his goal should be to draw.]

16.Rxc6 Qd5

[16...Nd5]

17.Rc5 Qxa2 18.Qc2 Na8 It tugs at our heart when our callous opponent destroys that which we love in our position. The apex tends to be the most formidable part of a pawn chain, but not this time. The e5−pawn falls, albeit at a high cost for Black.

[18...Re7]

19.Bc4! This is White's sneaky hidden provision, written into the contract in tiny print. Now the e5−knight is truly pinned as Caruana's last move deprived Black

of the bailout ...Nxf3+. **19...Qxb2 20.Bxf7+ Kxf7!** Black needs to remove pieces from the board. **21.Ng5+ Kf8 22.Rf5+ Bxf5 23.Qxf5+ Ke7** QUESTION: What compensation does White get for the sacrificed pawn? ANSWER: The following: 1) Bishops of opposite colours, which naturally favour the attacker. 2) White's domination of the light squares is important. 3) Black is stuck with an ineffective bishop, trapped behind a dark square pawn chain. 4) Black's central majority is blockaded, while White's queenside majority remains fluid. 5) Black's king will be insecure for the rest of the game. **24.Qe6+** Intending to push his majority with c4−c5.
1−0

Buekfuerdo 1995

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 d6 7.Qb3 Qd7 8.dxe5 dxe5 9.Ba3!? An intrusive move. **9...Bb6 10.Nbd2 Na5**
[The alternative 10...Nh6?! would make Dr. Tarrasch turn in his grave... at least a little bit. Now White can consider:
A) 11.Rd1?! Na5 12.Qb4 c5 13.Qb1 0−0 14.Nxe5 Qe7 15.Ndf3 Nxc4 16.Nxc4 Bg4 and Black is better. H.Hoeksema−J.Brenninkmeijer, Groningen 1993.;
B) 11.0−0! Na5 12.Qb4 Nxc4 13.Nxc4 f6 14.Rad1 Qe6 *(*not *14...a5?! 15.Qb3 Qc6?! 16.Nfxe5! fxe5 17.Nxe5 Be6 18.c4* and White wins *)* 15.Rd5 c5 *(*if *15...Bd7 16.Ng5!;* or *15...Nf7 16.Rfd1* and Black's position looks awful *)* 16.Qa4+ Bd7 17.Rxd7 Qxd7 18.Nxb6 Qxa4 19.Nxa4 b6 20.Rd1 Rd8 21.Rxd8+ Kxd8 22.c4 Nf7 23.Nc3 and White was clearly better, P.Rodriguez−L. Valdes, Cuba 1990.;
C) 11.Bb5!? f6 12.0−0−0! , followed by −− 13.Nc4 , is also very dangerous for Black.;
D) 11.−−]
11.Qb4
[An interesting option is 11.Nxe5!? Nxb3 12.axb3! (the black queen is not a hare, she will not run away) Bxf2+ *(12...Nf6* is possibly better,*;* but not *12...Qd8?? 13.Bxf7#* again *)* 13.Ke2 Bh4 *(*or *13...Bb6 14.Nxd7 Bxd7 15.Nf3* with compensation *)* 14.Ndf3 Bf6 15.Nxd7 Bxd7 16.e5 Be7 17.Nd4 Bxa3 18.Rxa3 Ke7 19.b4 with excellent compensation for the pawn in Y.Estrin−M.Skrovina, correspondence 1960.]
11...c5!?
[Black can defend his colours more easily by 11...Qe7! 12.Qb5+ *(*if *12.Qb2 Qf6;* or *12.Nxe5 Nxc4 13.Ndxc4 Qxb4 14.cxb4* with equality. *)* 12...Bd7 13.Bxe7 Bxb5 14.Bxb5+ Kxe7 15.Nxe5 c6 with equality.]
12.Qb2 Nxc4 13.Nxc4 Qe6?
The beginning of a truly horrible game for Black.
[13...Qd3? would be even worse, due to 14.Nfxe5 Qxe4+ 15.Kf1 Qd5 16.Qb3 and Black is in big trouble.]

[But after simply 13...f6 14.Rd1 Qc6 15.Nd6+ Ke7 16.0−0 *(* or *16.c4 Be6)* 16...Nh6 17.c4 Nf7 18.Nxc8+ Raxc8 19.Rd5 Rhd8 White has nothing much to show for the pawn, L.Christiansen−H.Gretarsson, Yerevan Olympiad 1996.]

14.Nfxe5 Nf6 15.Qb5+ Bd7 16.Nxd7 Qxe4+ 17.Kd2 Qd5+

[17...Qf4+ 18.Kc2 Qf5+ *(* if *18...Qxf2+ 19.Kb3 Nxd7 20.Rhe1+* just wins *)* 19.Kb3 Qxd7 20.Rhe1+ Kf8 21.Bxc5+ Bxc5 22.Qxc5+ Kg8 23.Rad1 is similar to the game, and is much better for White, because of his superior mobilisation. After Qg4 he would just cash in with 24.Qxa7! .]

18.Kc2 Qxd7 19.Rhe1+ Kf8 20.Bxc5+ Bxc5 21.Qxc5+ Kg8 22.Rad1 Qa4+ Compared with the 17...Qf4+ line above, Black has this extra check available, but it does not really help at all. **23.Kb2 h6 24.Rd4 Qc6 25.Qxc6 bxc6 26.Re7** Material is equal, but the position is just lost for Black. **26...Nd5 27.Rd7 Kh7**

[Or 27...Nb6 28.Rc7 c5 29.Nxb6 axb6 30.Rdd7 and White wins - something for those who like to dominate.]

28.Rxf7 Rhf8 29.Rxf8 Rxf8 30.Rd2 Rf7 31.Ne5 Rb7+ 32.Kc2 Rb6?!

[32...Rc7 , followed by ...g7−g5 and moving the king to the centre, might have offered a faint prayer of a draw.]

33.Rd4 Ra6 34.a4 Nb6 35.Kb3 c5 36.Rd6 Black's pieces are tragicomical. It's almost as if White has played the moves for both sides. **36...Ra5 37.Rc6 h5 38.f4 Kg8 39.g3 Kh7 40.h3 Kg8 41.g4 h4 42.g5 Kf8 43.c4 Ke7 44.f5 1−0**

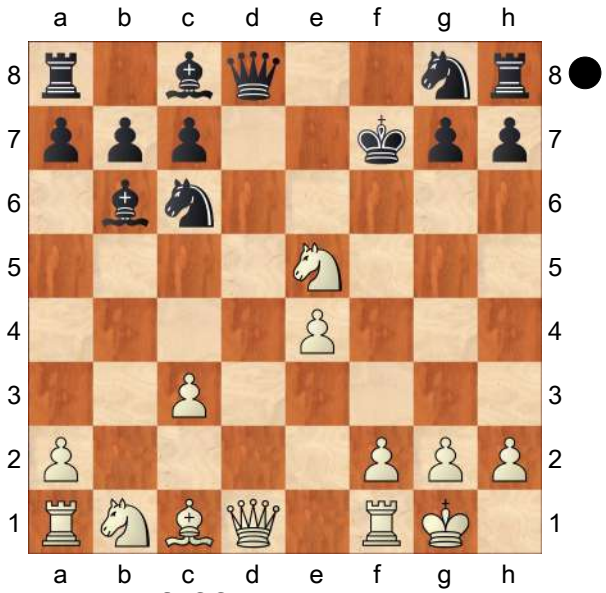
□ **Wilson (OR Wolfers?),P.**
■ **Wilson,J.**
BCCA Handicap 1921
[BCM Sept. 1921 pp. 343−4; Harding]

D.J. Rogers's history of the BCCA mentions that "P.Wilson" (who died in 1928) was a pseudonym for Rev. Philip Wolfers, so this game may have been won by Wolfers. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 Bb6 7.0−0 d6** TH: The standard position of Lasker's Defence has been reached by transposition. With the move order in this game, White could have played 7 dxe5 but it is not completely clear. **8.dxe5 dxe5 9.Bxf7+** "We would like to believe that the soundness of White's 9th move can be satisfactorily established". **9...Kxf7 10.Nxe5+** Diagram

(Diagram)

See comment p73 of 1st ed Harding & Cafferty "Play the Evans Gambit"; incorrect analysis of this line was still being published in the 1990s! **10...Ke6** One of two moves that may refute White's sacrifice; see details in PEG p73



[RR10...Kf8?? 11.Ba3+ Nge7 12.Qf3+ 1−0 Eckl−Schönewald, Germany corr 1967 (INF 5).]

[10...Ke8 possibly good. It had been analysed to Black's advantage by S. Mlotkowski in BCM, 1917: 11.Qh5+ *(≤11.Nd3* Moody − but his analysis is implausible; Black should probably aim for a rapid O−O−O by Qe7 followed by Bd7 or Be6 not his 11... Ne7? *)* 11...g6 12.Nxg6 *(RR12.Nxc6 gxh5 13.Nxd8 Kxd8−+)* 12...Nf6∓ 13.Qh6 Rg8 (Kopel−Grotescu, corr 1908) 14.Nh4 R. Gaudin in BCM 1921 pp. 442−3; later proposed in Chess Digest Magazine 4/1969 *(14.Nf4* The older move, which Rev Cunnington claimed to have analysed with a French player around 1900, and in his book (see BCM Nov 1921 p416). It was analysed to Black's advantage by S. Mlotkowski in BCM, 1917: *Ne5* Again suggested by Gaudin but BCM in 1921 seems to have forgotten what it had published (under a different editor) four years earlier: *15.Nd5 Rg6 16.Nxf6+ Qxf6 17.Qxh7 Ng4 18.Ba3 Nxf2* and Black soon won in a 1950 postal game Lane−Black which followed Mlotkowski's analysis? *)* 14...Ne5−+ BCO credits this move to Panov & Estrin but were they first? In 1st ed PEG p74 we cite analysis by D. Forthoffer in Chess Digest Magazine 2/1970 (details in book). 15.Nf5 *(15.Bg5 Neg4 16.Bxf6 Qxf6! Δ17.Qxh7 Bxf2+ 18.Kh1 Rh8 19.Qg6+ Qxg6 20.Nxg6 Rxh2#; 15.Qf4 Neg4 16.e5 Nxf2! 17.Be3 Nh3+)* 15...Neg4 16.Qf4 Nxf2! 17.Qe5+ Kf8! 18.Ba3+ *(18.Be3? 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.a4 a6 6.Nc3 Nf6 7.Nd5 Nxd5 8.exd5 e4 9.dxc6

[9.0−0 White could maybe consider this transpositional trick also? 0−0 *(9...exf3 10.dxc6* see note below, 10 0−0!? *)* 10.Ne1∞ see 7...0−0 8 0−0 Nxd5 9 ed e4 10 Ne1 suggestion on p169 of 1st ed PEG ΔNxb4? Problem is what to do with the white N after 10...Ne5 or 10...Ne7 11.Ba3 followed by c3, winning material]

9...exf3 supposedly the critical line as it avoids the 9...0−0 10 Bb2! possibility

10.Qxf3 Threat xb7. Previously thought good for White but now unclear says Chandler

[10.cxd7+!? "trying to win a pawn, is ignored by both Neistadt and ECO, though it is the only way to test Black's play" − Botterill. Open Gambits (still untested and unlikely to

give much in my opinion)]
[10.0−0!? is also critical (Harding move−order idea, approved by Chandler) Δ0−0 transposing to Sokolsky−Lilienthal *(10...fxg2?! 11.Re1+; 10...0−0 11.Qxf3* transposing to game *)*]

10...Qe7+ Ravinsky & Moiseyev analysed this line in Shakhmatny Biulleten 1/79 p6, extensively quoted by Zagorovsky in Romantic Chess Openings and cited in full below
[10...0−0 11.cxb7 Bxb7 12.Qxb7 Qf6 13.Ra3 Qxf2+ 14.Kd1+− safely a piece up (Estrin) Estrin]

11.Kd1 We gave this a ! in our 1st ed
[11.Qe2 Estrin−Ravinsky]

11...dxc6 Zagorovsky (Romantic Chess Openings) said this was equal, citing M&R's analysis in detail as below.

12.Re1
[12.Bb2!? Alexander's move, given a ! in 1st ed PEG, but again Black seems to have good resources:
A) 12...0−0? 13.Qg3 g6 14.Qc3 forces mate (Alexander);
B) 12...Be6 13.Bxg7 *(13.Re1* 12 see Re1 *)* 13...Rg8 14.Bxe6 *(14.Bf6 Bg4 15.Bxe7 Bxf3+ 16.gxf3 Kxe7* M&R *)*
B1) 14...fxe6 looks critical:
B1a) 15.Qh5+ Kd7 *(15...Qf7 16.Qxf7+ Kxf7 17.Be5 Rxg2 18.Bg3±)* 16.Be5 Raf8 gives Black an active game said M&R;
B1b) 15.Bc3 0−0−0! 16.Bf6 Qxb4 17.Bxd8 Rxd8∞ and Black has a serious initiative for the exchange (M&R) NOTE ALSO: White has trouble connecting his rooks and has no secure haven for his K so highly unclear position (Chandler, BCM 8/95);
B2) 14...Rxg7 15.Bc8! AS IN Haynes−Rodf ord, cor ca. 1973−4 WHICH I HAVE BEEN UNABLE TO FIND *** threat Re1 (NOT final of BCCA ch 1973−74 as all games were in Correspondence Chess but might have been a preliminary round, Rodford won final!) *(15.Bf5 Qxb4 16.Re1+ Kf8∓* M&R *)* 15...Qxb4 16.Qf6 LOOKS LIKE THE REFUTATION! Examine closer. Maybe this is what Haynes played? *(16.Bxb7 Rd8 17.Bxc6+ Kf8 18.Qe2 Rg6* and the hopeless position of the white K gives Black an excellent game (Moiseyev & Ravinsky) *)*;
C) 12...Rg8! 13.Re1 Be6 14.Bxe6 fxe6 15.Qg4 0−0−0! leaves White not a jot better e.g. 16.Qxe6+ *(16.Rxe6 Qd7* idea ...Rge8 *)* 16...Qxe6 17.Rxe6 Bxf2 Botterill, Open Gambits]
[12.a5 also comes into consideration as a preliminary (after ...Ba7) to one of the other ideas, probably Bb2]

12...Be6 Panov; sometimes given as edge to White, sometimes as equal. Leko in INF 63 says this favours White but Chandler implies the opposite. The present game is not particularly convincing as Black goes wrong early, at least once. **13.Bxe6**
[13.Bb2 0−0−0 with counterplay according to Leko, INF 63 *(13...Rg8?! 14.b5! axb5 15.axb5 Rxa1+ 16.Bxa1*

Black gets a difficult position − M&R, line not in Zag's book *)* 14.Bxg7 Qxb4 15.Bxe6+ fxe6 equals Δ16.Bc3 Qd6 threatening ...Rhf8 M&R]

13...fxe6 14.Qh5+ Not considered by previous analysts; it may slightly improve White's chances by inducing ... g6 weakening of long diagonal

[14.Qg4 0−0−0! *(14...0−0 15.f3±* Leko, INF 63, who appears ignorant of old analysis in this variation. *)* 15.Rxe6 Qd7 16.Qe2 Rhe8 and Black has the initiative according to Moisyeev & Ravinsky]

14...Kd7

[⌓14...g6]

15.Ra3!? Rae8

[15...Bxf2 16.Rf3 was presumably White's idea but may be good for Black]

16.b5 White at least equal now

16...cxb5

[16...axb5 may be better]

17.axb5 Black starts to get into difficulties from here. **17...a5 18.Rf3 g6 19.Qe5 Qc5?!**

□ **Yudasin,L.**

■ **Lenderman,A.**

Philadelphia 2004

[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.b4

[5.d3 d6 6.b4 Bb6 7.a4 a5 is the usual move order to reach this position. Yudasin chose a slightly different sequence to avoid the possibility of 5...a6, discouraging b2−b4, as the bishop can then retreat to a7 in one go.]

5...Bb6 6.d3 d6 7.a4 This assault should not be dangerous for Black. The attack on the a− and b−files is happening in too narrow an area to create serious problems for Black. And what is more important, White does not have full stability and control over his centre, which offers Black good chances for counterplay exactly there. **7...a5** is the usual move order to reach this position. Yudasin chose a slightly different sequence to avoid the possibility of 5...a6, discouraging b2−b4, as the bishop can then retreat to a7 in one go. **8.b5 Ne7**

[8...Nb8!? is less popular, though still good, e.g. 9.0−0 0−0 10.Bg5 h6 11.Bh4 g5 12.Bg3 Bg4 and the position is equal according to Unzicker.]

9.0−0

[Against 9.Nbd2 ,

A) 9...c6! achieves equality directly, based on 10.bxc6 bxc6 11.0−0 0−0 12.Ba3 Rb8 13.Bb3 Ng6 and Black is alright.;

B) . The solid 9...0−0 is also fine, e.

g. 10.Ba2 Ng6 11.Nc4 Bc5 12.0−0 Be6 13.d4 exd4 14.cxd4 Bb4 15.d5 Bd7! *(*inferior is *15...Bg4 16.h3 Bxf3 17.Qxf3* and White was slightly better in L. Psakhis−S.Skembris, Beersheba 1993 *)* 16.Qd4 Re8 17.Bg5 Bc5 18.Bxf6 Qxf6 19.Qxf6 gxf6 20.Rfe1 Ne5 with equality.;

C) 9...−−]

9...0−0 10.Nbd2

[10.Bg5?! Ng6 11.Nh4 Kh8 12.Nxg6+ fxg6! is a useful trick to remember. We learn that we should recapture towards the centre in the middlegame, but when you see an attacking chance, you should not hesitate to use it. After 13.Be3 c6 14.Qe2 d5 Black has an initiative.]

10...Ng6 11.Bb3

[11.Ba3?! would be a mistake, as Black can exploit the absence of the bishop from the kingside with Nh5 12.d4 Nhf4 13.dxe5 , and now the aggressive Bg4! is strongest. White has the following discouraging opportunities:

A) 14.Qc2 Qd7 15.Kh1 Bxf3 16.Nxf3 Qg4 17.Ne1 Nxe5 18.f3 Qh4 19.g3 Qh3 and Black had an attack in V.Cordeiro−J.Soberano, correspondence 1996.;

B) 14.g3 Nxe5 15.gxf4 Bxf3 16.Nxf3 Nxc4 17.Qd5 Nxa3 18.Rxa3 Qf6 19.f5 g6 20.Qxb7 gxf5 21.c4 Kh8 22.Kh1 Rae8 23.exf5 Rg8 and Black was much better in the top level game, C.Lutz−A.Khalifman, Wijk aan Zee 1995.;

C) 14.exd6 cxd6 15.Qb3 is probably White's best option, though after Qf6 Black has perfect compensation for the pawn. *(15...−−)*;

D) 14.−−]

11...Be6?! Seemingly a harmless developing move, but in reality the position is sharper than it appears at first sight. White is coming round with his knight, causing Black real concerns, and all Black can think of is this simple automatic move, with no plan or idea behind it. Or at least that's what it looks like. Maybe Black was surprised by the troubles he faced later on, in the middlegame with opposite−coloured bishops. Instead:

[11...d5!? directly could be an alternative. After something like 12.Ba3 Re8 13.exd5 Nxd5 14.Ne4 h6 Black is alright, e.g. 15.g3 Bg4 16.Nd6 cxd6 17.Bxd5 Qd7 etc.]

[11...c6 is also better, when the position after 12.bxc6 bxc6 13.d4 Bg4 14.Qc2 should be equal. Then Black can try Nf4!? 15.dxe5 dxe5 16.Nxe5 Be2 17.Ndf3 N6h5 18.Re1 Bxf3 19.Nxf3 Qd7 when he has compensation for the pawn according to Greenfeld. I am a little suspicious about this, but maybe it is worth a go?]

12.Nc4 d5 13.exd5 Nxd5 14.Qc2

[A simple alternative here was 14.Nxb6!? cxb6 15.Ng5 Ngf4 16.Nxe6 Nxe6 17.Ba3 and White is better. But Yudasin was no doubt looking forward to skating around on the light squares.]

14...Ndf4 15.Bxf4 Bxc4 16.Bxc4 Nxf4

17.g3?! This is slightly inaccurate.

[White is still better after the text move, but more energetic was 17.Rfe1! Re8 18.d4 exd4 19.Rxe8+ Qxe8 20.Re1

and Black is in trouble. After the only move Qf8 *(*if *20...Ne6 21.cxd4 Qd7 22.Qf5* and White is much better *)* 21.Qf5 Ne6 22.Bxe6 fxe6 23.Qxe6+ Qf7 24.Qe4 Rd8 *(*not *24...dxc3? 25.Ng5!! Qxf2+ 26.Kh1 g6 27.Qe7* and White wins *)* 25.cxd4 White has a clear advantage.]

17...Ng6 18.Qe2 Qd6 19.Qe4 c6 20.Rab1 Rab8 21.Qf5 Qf6?!

[21...Bd8! was necessary; after 22.bxc6 bxc6 23.Rxb8 Qxb8 24.d4 Bf6 White is better, but Black can hold the position.]

22.Qh5

[Or 22.Qxf6 gxf6 23.d4 and White is much better. But White wants to keep the queens and the pressure on.]

22...h6 23.Nd2 Kh7 24.Ne4 Qe7 25.Qf5 Qc7 26.Qh5 Qe7 27.h4 Nh8 28.Qf5+ g6?? A forgivable blunder;

[but also after 28...Kg8 29.Kg2 White has a clear advantage.]

29.Qd7! Bd8

[The point is 29...Qxd7 30.Nf6+ Kg7 31.Nxd7 and White wins.]

30.bxc6 Qxd7 31.cxd7 Kg7 32.Rb5 1−0

C54

□ **Carlsen,Ma**
■ **Adams,Mi**
66: Olympiad 2006
[Cyrus Lakdawala]

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.d3 Bc5 5.Ba4

[5.Bxc6 , followed by ...Kb3, when his king is far more active than in the game. In particular, Black has options of ...Nb1 to target the c3−pawn, should the white king wander off somewhere.]

[not 5.Nbd2?]

[5.c3!]

[5.0−0]

[5.Bg5]

5...0−0 6.0−0!? If the Catalan was a body of water, we would all be in danger of drowning. The theory is extensive, subtle, and therefore exceedingly difficult to master. This move leads to a slightly funky version with Black's bishop on b4 and White's knight committed to c3, which isn't the normal template of a pure Catalan. **6...d6!** Acceptance is Black's best option against an early Nc3.

[6...Re8

A) 7.c3 d5! is Step 2: Give check on the c−file, after which Rc5+ picks off Black's c−pawn, no matter which way his king goes. This in turn would give White a passed c−pawn. 8.Nbd2 dxe4 *(8...a6)* 9.Nxe4 Nxe4 wins the a−pawn. Passing with the bishop doesn't help: 10.dxe4 Qe7 11.h3 a5 12.Qe2 Bd7 *(12...Rd8)* 13.Bc2 f6 14.Bb3+ Be6 (zugzwang);

B) 7.Bg5 a6 forces mate. 8.c3 hangs the g6−pawn to b5 Black can put up more resistance with 9.Bb3!? again, which makes it more difficult for White to win the a−pawn. Still, he can make progress by forcing Black's king back. For instance: Be7 10.a4 Rb8 11.axb5 axb5 12.Re1 h6 13.Bh4 d6 14.Bg3 Bf8 15.Nbd2;

C) 7.Nbd2! Bf8 *(7...Rb8* and 62 Rc5+ wins the even more valuable c−pawn. *)* 8.h3 d6

*(*Adams lets his a−pawn go, since *8...a6)* 9.Re1 Bd7 10.c3 and draws, as confirmed by the tablebases]

[6...d5 7.exd5 Qxd5 8.Nc3 Qd6 9.Bxc6 bxc6 and White's king moves to d4, followed by Bxa3. 10.h3 Bb6 *(10...Re8)* 11.Re1 Re8 Adams elects to repeat, whereas he later realized he could have tried 12.Be3!? *(12.Nd2)* 12...Bxe3 13.Rxe3 Nd5 14.Re1 Nf4]

7.c3 Bb6 Pressuring d4, discouraging Ne5, and enabling ...Na5, if he chooses.

[7...Ne7 8.Nbd2 *(8.d4* then *Bb6 9.Bc2 Ng6* wins. not yet *10.h3? c6)* 8...Ng6! 9.d4 Bb6 and White wins. or 10.Bc2 Re8 11.Re1 c6 and the h−pawn promotes If 12.h3 h6 13.a4 Be6 *(13...a5 14.Nc4 Bc7* , threatening Rxg6, or if *)* 14.Nf1 Qd7 15.Ng3 , White's plan is to time an exchange sacrifice on g6, when Black's knight and king are muscled out of the future passed h−pawn's promotion square. For example:]

[7...h6 8.Nbd2]

8.Nbd2 Ne7

[8...a6]

9.Nc4 Ng6 Adams indicates that he plans to turn the status of his grabbed pawn to permanent, since he now has the option of backing it up with ...b7−b5.

10.h3 h6

[10...Be6]

11.Bc2 Be6 12.Nxb6! A purist views the world in Black and White and therefore is unlikely to compromise. Now the position becomes a bit more Alice−in−Wonderlandish. Threat: e4−e5. It isn't so easy to break the pin. **12...axb6** Adams returns the pawn to relieve the pressure. **13.d4**

[13.a3

A) 13...Qd7 14.Re1 *(14.d4 Bxh3)* 14...c5! (threatening Be5 and h6−h7) 15.d4;

B) 13...Re8 and wins. For example: 14.Re1 b5 15.d4 Bd7 16.Bd2]

13...b5

[13...Bxa2 14.b3! threat: Rf8 mate; c5

A) 15.dxe5 dxe5 loses to 16.Qxd8 , followed by Rf8+ and Rh8 mate If Rfxd8 17.c4 *(17.Be3!)* 17...b5 18.cxb5 c4 White is ready to give up the exchange with;

B) 15.Be3 c4 16.Nd2 and White wins. not b5??]

14.Be3

[14.a3]

14...c6

[14...Bxa2 15.b3 Qe7 16.Qc1 Ra6]

15.Re1

[15.a3! (threatening back rank mate)]

15...Qc7

[15...Bxa2 16.b3 and mate on h8 next move Or Ra6]

16.a3 1. Magnus had regained his sacrificed pawn. 2. He also picked up the bishop pair. 3. Both sides get super pawn majorities on their respective wings, which generally favours the bishop's side, but not here, due to number 4 on the list. 4. White's queenside is punctured with light square holes on a4, b3 and d3, all occupiable by Black's knight. 5. White's c3−pawn is a fixed target and slightly vulnerable. Conclusion: The engine calls it dead even. **16...Rad8** Now ...Nxe5 and ...g7−g5 are in the air. **17.Qd2! Rfe8?! 18.Rad1 Qe7?!** Principle: If you are

planning to pull off a felony, then don't be late. EXERCISE (planning): Taking the knight allows Black to regain the piece with ...g7−g5. Find a continuation which offers White an advantage. ANSWER: Zwischenzug. Moving the bishop to d8 wins the exchange. **19.Qc1! Nh5 20.dxe5** Black's rook is trapped.

[20.Kh2 threatens both back rank mate and Rxh4. or Nhf4 21.Ng1]

20...dxe5 21.Rxd8 Rxd8 Black still got a pawn for the exchange. It's not quite enough, despite his active knight and bishop and domination of the light squares. **22.Rd1!** Principle: The side up the exchange benefits from open lines to activate the rook or rooks. **22...Nhf4!** White's rook cannot be allowed to reach the seventh rank.

[22...Rxd1+ 23.Qxd1 Nf6]

23.Kh2! f6

[23...Rxd1 24.Qxd1 Nh4 25.Ne1! The weak back rank, together with the weakness of g6, is too much for Black to survive. For example: Nhg6!]

24.Rxd8+! Endgame principle: The exchange−up side benefits from a swap of the defender's remaining rook.

24...Qxd8 25.Qd2 Qc8

[25...Qc7]

26.Ng1 Bf7 27.g3 Ne6?! It seems wrong to let the rook into his position voluntarily. **28.h4 Qd8! 29.Qxd8+ Nxd8 30.Nf3 Nf8** Principle: The defending side benefits from a reduction in the pawn population. **31.Nd2 g5**

[31...Nd7]

32.f4 gxf4 33.gxf4 exf4 34.Bxf4 Negating the threat of ...Kb7. **34...Ng6! 35.Kg3**

[35.Bxh6 Nxh4! Heading for the long diagonal.]

35...Nxf4 36.Kxf4! This is the start of a deeply conceived plan to win either the a− or c−pawn by overloading Black's bishop. We see how Magnus accomplishes this around twenty moves later! **36...Kf8**

[36...Kg7 37.Nb3 Ne6+ 38.Ke3]

37.e5! Ke7 White's king is annoyingly fenced out, with f3, e3 and d3 all inaccessible. Magnus begins a plan to disrupt this blockade by constantly going after Black's weakest point, the g6−pawn.

[37...fxe5+ 38.Kxe5 Ke7 39.Kf5]

38.exf6+ Kxf6 39.Ne4+! Threat: Rf6. **39...Ke7!** Oh you sneaky guy. **40.Nf2** Let's try this again. Threat: Re6.

[40.Kf5]

40...Be6 Black cuts that off too.

[40...Bh5]

41.Bf5! The rook gains entry to the sixth rank, forcing Black to defend g6 with the bishop. **41...Nf7 42.Ng4 h5 43.Ne3! Kf6** At long last. Magnus' once imprisoned king is given access on the kingside. The bishop still covers both the g6− and c4− pawns, yet has had to relinquish control of the long light diagonal, allowing White's king to enter Black's position through the gap left on f3. **44.Bxe6 Kxe6 45.Nf5 Kf6!** Adams resists ferociously, tying the white king down to defence of g3.

46.Ng3 Kg6 47.b3 Nh6

[47...Nd6 48.Ke5 Nf7+ 49.Ke6! Removal of the guard, allowing White's king to enter via f4 again.]

[47...b6 48.Ke4]

48.Ke5 It's clear that Black's a−pawn isn't going anywhere. But where are the targets in his position? Black's light−squared bishop seems to be covering a4,

c4 and g6. Magnus keeps probing, until he overloads the bishop and picks one of them off. **48...Ng4+ 49.Kd6 Ne3 50.Kc7?!** Repeating moves to gain time on the clock is fine as long as the opponent is obliged to follow suit, which isn't the case here. **50...c5 51.Kxb7 c4 52.b4!** Magnus correctly breaks the deadlock, as otherwise there is no way to make progress. Nonetheless, it's a big concession since every pawn swap helps Black move closer to a draw. **52...Nd1 53.Ne2 Kf5 54.Kc6 Kg4 55.Kxb5 Kxh4** EXERCISE (planning): How did Magnus force the win of either Black's a− or c−pawn? ANSWER: Step 1: Cut and paste, by transferring the rook to the back rank and then to a8. Then if Black's knight moves, Ra5+ picks off his a−pawn. **56.a4! Kg4 57.a5! Ne3 58.a6! Nd5 59.a7 h4 60.Kc6 h3 61.a8Q** The end of an era. The cursed a−pawn finally falls, after which the life−expectancy of Adams' position continues to sink.
1−0

14: Cappelle la Grande 2013
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ Bd7
This variation was briefly popular and is generally considered a decent alternative to the more popular 6...c6. After analysing this variation heavily, I came to the conclusion that Black is fighting very hard for equality and that White has plenty of interesting options at his disposal. I won't give this variation my main seal of recommendation, but I have included some coverage of the critical variations in case you'd like to analyse it yourself or perhaps use it as a surprise weapon.
[My recommendation is 6...c6 which will be covered in our next games.]
7.Qe2 The queen protects b5 while attacking e5 simultaneously.
[Instead, 7.Bxd7+ Qxd7 is simply considered to be fine for Black.]
7...Be7 Recent trends suggests that this move is the critical continuation.
[7...Bd6 has historically been the most popular move. However, going to this square interferes with a future ...Qxd5 and now the g5−knight is harder to drive away. Here are some key lines:
A) 8.Nc3 0−0 *(8...c6!?* isn't very common, but it might be Black's best shot; White should go for *9.dxc6 Nxc6 10.Nge4* when Black is active, but White has no significant weaknesses, which is quite a typical scenario in this variation *)* 9.Bxd7 Qxd7 10.a3!? . This little pawn move scores almost 75 %! Now ...Bb4 is prevented and b2−b4 is threatened. After b6 *(*Black should perhaps prefer *10...Be7!?* , pointing at the unprotected knight on g5; after *11.0−0 Nxd5 12.Qxe5* White was still slightly better in I.Saric−M. Pavlovic, Biel 2012 *)* 11.d3 Black has nowhere near sufficient compensation, as in A.Morozevich−I.Sokolov, Sarajevo 1999.;
B) 8.Bxd7+ is a good alternative as well. After 8...Qxd7 9.Nc3 c6 10.dxc6 Nxc6 11.0−0 0−0 12.d3 Nd4 13.Qd1 Rac8 Black is very active in return for his missing pawn, but a pawn is a pawn and White

has no significant weaknesses.]

8.Bxd7+!? A very unusual move, but one I think deserves serious attention.

[However, Black's cause isn't easy in the alternative lines either: 8.Nc3 is the main move, when Black should opt for Bxb5! *(8...0−0* has suffered lately because of the *9.Bxd7 Qxd7 10.0−0* variation *)* 9.Qxb5+ c6 10.dxc6 Nxc6 . Compared to many similar positions where Black goes ... c6 and agrees to playing a pawn down, White has lost plenty of time with his queen, which should justify the pawn sacrifice, as we can see after 11.0−0 *(*note that with a bishop on d6, *11.Qxb7 Nd4??* would allow 12 Qxf7 mate *)* 11...0−0 12.Qe2!? Nd4 13.Qd1 . Now there is Rc8 14.d3 b5! when the c2−pawn is vulnerable..]

[8.Nf3!? is rather unusual, but also good. Black's best seems to be 0−0! *(*Black doesn't fully equalize after *8...Nxd5 9.Bxd7+ Qxd7 10.Nxe5 Qf5 11.d4)* 9.Nxe5 Bxb5 10.Qxb5 Bd6 11.d4 and now c5! with a complicated game.

*(*Instead, Yandemirov has twice tried *11...Bxe5 12.dxe5 Qxd5 13.Qxd5 Nxd5 14.Bd2 Nc4 15.Nc3 Nxc3 16.Bxc3 Nxe5! 17.0−0−0 Nc6 18.Rd7* . On both occasions he managed to draw, but it doesn't look like a lot of fun. *)*]

8...Qxd7 9.c4! Black has sacrificed a pawn, but he's about to break White's centre down. **9...c6** White, however, has a brilliant counter−strike. **10.d4! exd4 11.Bd2** Suddenly, the knight on a5 is loose. **11...b6** The only move that has been played so far.

[However, as Slavisa Brenjo notes, Black's best try to solve his problems is with the shocking 11...0−0!! 12.0−0! *(12.Bxa5?!* is met with the clever *Bd8!* when both ...Re8 and ... Bxa5+ are threatened, and *13.Qd2?!* can be met with *Re8+ 14.Kf1 cxd5* when White's pieces are just too loose and underdeveloped *)* 12...Rfe8 13.Bxa5! . Now 13...Bd8 is just met with 14 Qd2, so Black has to go Bb4! 14.Qxe8+ Rxe8 15.Bxb4 cxd5 . After trading brilliant punches, the two sides have reached a very interesting position. White has a material advantage, but Black's position is fully developed and he carries a decent initiative. Black's initiative might do well in practice, but from a theoretical point of view I think White might have a slight edge. He should go 16.c5! , trying to keep the position closed while developing his remaining pieces. We are deep in unexplored territory, so I'll leave the joy of analysing this position further to my readers.]

12.Bxa5 bxa5 13.dxc6 Qxc6 14.0−0 Black has a weak pawn structure and hasn't castled yet. Even though his pieces have active potential, it's clear that White is slightly better and he can start rounding up the d−pawn. **14...Qc5 15.Nf3 0−0 16.Nbd2** Black can engage in some counterplay down the b−file and with ...a4, but White has a good blockade on the light squares, and d4 is certainly a weakness and not a strength in this case. Overall, White is still slightly better. **16...a4 17.Ne5** Bringing the knight to d3 where it blockades the d4−pawn and protects b2.

[Another setup is 17.Rfe1 Rfe8

18.Qd3 followed by b2−b3. Black's doubled pawn is exchanged, but White gains pressure down the a−file. White can also follow up with Re5 or Ne4. In view of the game continuation, this might have been preferable.]
17...Rfe8 18.Nd3 Qa5 19.Nf3 a3! 20.b3 Bb4 21.Qc2 Bc3 22.Rad1 Black has played efficiently and it's difficult for White to make progress with the e−file now inaccessible. **22...Qc7?!**
[22...Rad8! keeps the bind because 23.Nc1?! Ne4 24.Ne2 Nd2! is bad for White.]
23.Nc1! An excellent manoeuvre. The bishop on c3 is kicked away and Black has serious difficulties defending his d4−pawn. **23...Rad8 24.Ne2 Bb2 25.Nexd4** White is now up a pawn and Black's queenside won't make much resistance. **25...Ne4 26.Nb5 Qe7 27.Rxd8 Qxd8**
[27...Rxd8 doesn't help because of 28.Nxa7! when White grabs a second pawn.]
28.Re1 f5 29.Nxa7 Nc3 30.Nb5 Rxe1+ 31.Nxe1 Nxa2 32.Nxa3 White is two pawns up on the queenside. The win is just a technicality. **32...Qe7 33.Nd3 Nb4 34.Qxb2 Nxd3 35.Qd2 Qe4 36.Nb5 f4 37.f3 Qg6 38.Kf1 h6 39.Nc3 Nc5 40.Qd5+ Ne6 41.Ne4** . Black is robbed of all counterplay. **1−0**

ordinary London 1861
[Bird, H.]

Franco Pezzi: 'Ebbene sì! Ogni tanto capitava anche al grande Anderssen di incontrare qualcuno che riusciva a dargli sadiche martellate da maniscalco. Uno di questi fu proprio l'ungherese Ignazio von Kolisch, noto fra gli scacchisti dell'epoca per essere un forte picchiatore e grosso fumatore. Fu proprio Anderssen che, riferendosi ad una vittoria del Kolisch contro il famoso giocatore tedesco Daniel Harrwitz, al Cafè del la Régence di Parigi, ironicamente, alludendo all'abitudine dell'ungherese di soffiare sulla scacchiera il fumo del suo mefitico sigaro, disse: 《 Kolisch è riuscito ad "affumicarlo"!》 Ma forse intendeva dire la parola "offuscarlo" riferendosi appunto all'offuscamento dell'aureola di gloria che circondava il formidabile Harrwitz.' **1.e4** Franco Pezzi: 'Bird, H.' **1...e5** Fritz 6 (5s): 'Opening = C52 − Evans Gambit−Hauptvariante /Evans Gambit−main line' **2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 dxc3** Franco Pezzi: "(Compromised Defence) Bei tempi quelli! □ **Sveshnikov,E..**

■ **Ivanov,I..**

Cheliabinsk 1976 1976

[Paul Motwani]

Mr Mo's game G9.25: "52 years this week!" (The following passage was first written by me on Saturday 9 February 2002.) The number 52 might make one think of the weeks in a year, but to GM Evgeny Sveshnikov it's also his years in the next week! Monday will be the 52nd birthday of the great Russian grandmaster who was born on 11 February 1950. Sveshnikov is certainly a lot older but no less interesting to me than many younger stars, such as the talented nine including Scotland's GM Jonathan Rowson featuring in "Interview with a Grandmaster", a fascinating new 144−page Everyman book written by England's GM Aaron Summerscale and his wife Claire. The result of their very well−conducted interviews and research is that all readers of their work will get treated to a most enjoyable and valuable insight into the thoughts, feelings, and favourite games of the nine selected celebrities. Today, however, let's switch back to Sveshnikov, and a double demolition job using the Scotch Gambit! The first half of the action occurred at Cheliabinsk back in 1976... when our hero was only half of his present age! **1.e4 e5 2.Nf3 Nc6 3.d4**

[The move−order 3.Bc4 Nf6 4.d4 exd4 would transpose to the game.]

3...exd4 4.Bc4 Some sources give this the ECO code C55, while others assign C56. I have used the latter.

[Sveshnikov also likes the Scotch Game, 4.Nxd4 , but in the current encounter he instead chooses the Scotch Gambit.]
[One problem with 4.c3 , the Goring Gambit, is that allows Black to play d5 and instantly obtain a very comfortable position.]

4...Nf6

[A major alternative is 4...Bc5 5.c3 , after which dxc3 *(*a safer line is *5...Nf6 6.cxd4 Bb4+)* 6.Bxf7+ Kxf7 7.Qd5+ is unpleasant for Black.]

5.0−0

[G9.25.1:16 years later, the 1992 game E. Sveshnikov−S.Johnsen at Gausdal in Norway deviated with 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bc5 8.0−0 *(*Modern "theory" favours *8.Be3;* but not *8.Nxc6* because *Bxf2+ 9.Kf1 Qh4* is extremely dangerous for White. *)* 8...0−0 *(*After *8...Bxd4 9.Qxd4* it's clearly important that the c6−knight is pinned! *)* 9.Bxc6 *(*If *9.Nxc6?! bxc6 10.Bxc6* , then *Ba6!* is a known strong response. *)* 9...bxc6 10.Be3 *(10.Nxc6 Qd7 11.Nd4* gives Black a choice of various attractive continuations including *Qe7 12.Bf4 f6)* 10...Qh4 *(*A noteworthy improvement is *10...Qe8!* , intending *11.f3 Nd6!)* 11.Nd2 f6? 12.N2f3 Qh5 13.Nxc6 Bxe3 14.Qxd5+ (After making inferior choices at moves 10−11, Black's position is now suddenly in ruins.) Kh8 15.fxe3 f5 16.Nfd4 a5? (Total collapse.) 17.Qxe4! Black resigned, in view of 17.. .fxe4 18 Rxf8.]

5...d5?

[Much better options are 5...Bc5 6.e5 d5]
[And 5...Nxe4 6.Re1 d5 , intending 7.Bxd5 *(*Or *7.Nc3 dxc3 8.Bxd5 Be6* , after which *9.Rxe4??* loses instantly to *Ne7!* : a neat trick that has caught out numerous players. *)* 7...Qxd5 8.Nc3 Qa5 *(*or *8...Qh5)*]

6.exd5 Nxd5 7.Ng5! The same position can also be reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6 4 Ng5 d5 5 exd5 Nxd5?! (Black should prefer the main path, 5...Na5, or the ultra−energetic 5...b5!? gambit, or the similar very dynamic counterattacking line 5... Nd4 6 c3 b5!) 6 d4! exd4 (6...Nxd4 7 c3 puts Black's knights in double trouble) 7 0−0. **7...Be6**

[7...Be7 8.Nxf7! Kxf7 9.Qh5+ is also terrible for Black.]

8.Re1 Be7?

[Black had to try 8...Qd7 , but White still smashes through with 9.Nxf7!! *(*more deadly than *9.Nxe6 fxe6 10.Qh5+ Kd8)* 9...Kxf7 *(*or *9...Qxf7 10.Bxd5)* 10.Qf3+ Kg8 11.Rxe6!]

9.Rxe6! Black could resign here, but by playing on we get treated to a pretty finish! **9...fxe6 10.Nxe6 Qd7 11.Bxd5 Nd8 12.Qh5+ g6 13.Qe5 Nf7 14.Nxc7+ Kf8 15.Qxh8+!! Nxh8 16.Bh6#**

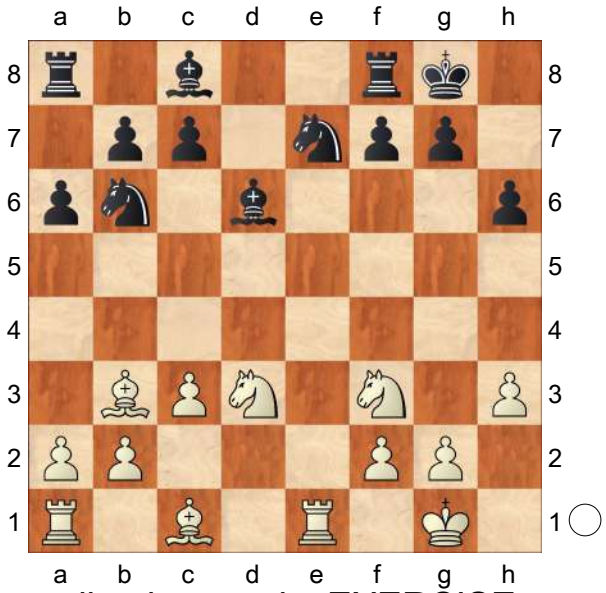
C53

□ **Kramnik,V.**
■ **Krasenkow,M.**
40: Wijk aan Zee 2003
[Cyrus Lakdawala]



This ending is an epic. EXERCISE (planning): Appearances deceive in what appears to be a drawish ending. In reality, White has a clear advantage if you find Kramnik's plan. ANSWER: Black's dark−squared bishop is the key defensive steward in his position. Once removed, Black must hand over concessions. So it should be challenged with 16 Bf4!. **16.Bf4! Ng6**
[It seems like a shocking decision to allow Black's structure to be damaged and take on a weakling isolani like this, yet it's worse for Black if he swaps. For example: 16...Bxf4? 17.Nxf4 Nc6 18.Ng6! Rd8 19.Ne7+ Kf8 (forced, otherwise White's rook reaches the seventh rank with devastation to follow) 20.Nxc6 bxc6 21.Ne5 (double attack) and Black loses a pawn with a wretched structure. Rd2 can be met by the

simple 22.Rad1 and Black must swap since Rxb2?? allows 23.Ng6+! Kg8 24.Rd8+ Kh7 25.Bxf7 Bf5 26.Rxa8 Nxa8 27.Nf8+ Kh8 28.Re8 and wins.]

17.Bxd6 cxd6 18.Re4! The rook shifts to d4 to hammer away at Black's now isolated d−pawn. **18...a5 19.Rd4 Rd8**

[19...a4 20.Bc2 doesn't bother White.]

20.Rd1 d5 21.Nc5 Seizing control over d7, while keeping an eye on b7 and e6.

21...Ne7 22.a4

[22.a3 is an option, leaving a4 open for a piece.]

22...Re8 23.R4d2 Kramnik clears d4 for his knight. **23...Nd7** White's knight was too troublesome on the c5−square.

24.Nxd7 Bxd7 White has achieved an ideal position where he controls d4 and hammers away at Black's isolated d−pawn. Even with all these strategic advantages, converting to an actual win is not so easy. **25.c4!**

[This is a better winning try over the rote 25.Bxd5 Nxd5! *(25...Bxa4?! 26.Bxb7 Rab8 27.Ra1* leaves White a clean pawn up *)* 26.Rxd5 Bxa4 27.Ra1 Bc6 28.Rdxa5 Rxa5 29.Rxa5 Re2 30.b3 Rc2 31.Rc5 Bxf3 32.gxf3 b6 , when Black has very good chances of holding a draw.]

25...dxc4 26.Rxd7 cxb3 27.Rxb7 Rab8 28.Rdd7 Nc6! Excellent defence.

[If 28...Rxb7? 29.Rxb7 Nc6 30.Rxb3 Re4 31.Rb6 Rc4 32.g3 , White is better off than in the game, since an extra set of pawns remains on the board.]

29.Rxf7 Rxb7 30.Rxb7 Re4 31.Rxb3 Rxa4 32.Rb6 Rc4 33.g3 a4 34.h4 Nd4 Kramnik's extra pawn is on the kingside. His only prayer to win is to generate some kind of endgame attack against Black's king, with rook, knight and kingside pawns. **35.Ne5 Rc5 36.Rb8+ Kh7 37.Nd7 Rb5 38.Ra8!** The best practical chance in an otherwise drawish position. Kramnik feels he can't win with rooks off the board, since this would take his kingside attack off the table.

[After 38.Rxb5 Nxb5 39.Nc5 a3 40.bxa3 Nxa3 , it would be a miracle if White actually finds a way to win.]

38...Ne2+?!

[Black should play 38...Nf3+ 39.Kf1 *(* or *39.Kg2 Ne1+ 40.Kf1 Nd3)* 39...Rxb2 40.Rxa4 Rb5! , preventing h4−h5 and intending ...Ne5, when it's hard to see how White will win.]

39.Kg2 Rxb2 EXERCISE (critical decision): Should White play it safe with 40 Rxa4, after which there are only two possible results of a win or a draw? Or risk a possible loss and play for mate with 40 h5, which allows Black to hang on to his a−pawn? ANSWER: White's only chance to win is the risky path of giving away his queenside pawn and playing for mate. **40.h5!!** It takes real courage to commit to such a risky course of action, yet the engine says it's White's only path to a possible win.

40...Nc3 41.Ne5 Threat: Ng6 and Rh8 mate. **41...Rb5** The only move. **42.f4 Ne4! 43.g4** White is ready for Ng6 and Rh8 mate.

[The immediate 43.Ng6? is met by Rxh5 44.g4 Kxg6 45.gxh5+ Kxh5 46.Rxa4 Nf6 and Black should draw.]

43...Nf6 44.Ng6 Ng8 45.Nf8+ White repeats here, and twice more later,

in order to gain time on the clock.

45...Kh8 46.Ng6+ Kh7 47.Kf3!

[Confession: I would very likely have settled for the more cowardly 47.Rxa4?! , removing a possible loss from the equation. The problem is it that allows Black to seize control over his back rank with Rb8! , when it's hard to see how White can make progress.]

47...Rb3+ 48.Ke4 a3

[After 48...Rb4+ 49.Kf5 Rb5+ 50.Ne5 , White pushes his g−pawn forward.]

49.Nf8+ Kh8 50.Ng6+ Kh7 51.g5! hxg5 52.fxg5 This is scary. There are only two white pawns remaining on the board and all Black needs to do is to sacrifice his knight for them. Black can even give his pawns away since White's rook and knight can't beat a lone rook.

52...Rb4+ 53.Kf5 Rb5+ 54.Kg4 Rb4+ 55.Kf5 Rb5+ 56.Kg4 Rb4+ 57.Nf4 a2!

[Black can't hang on to the pawn, since 57...Rb3?? loses to 58.g6+ Kh8 59.Ne6 , as there is no defence to the coming Ng5/Nd8 and Nf7+. On the plus side, with the a−pawn gone Black has some added prospects of stalemate.]

58.Rxa2 Ne7? Bringing the knight out at once is a mistake.

[Instead: a) 58...Rb8? 59.Ne6 wins for White. Threats include: Ra7 (targeting g7) and mating nets involving g5−g6+ and then transferring the knight to f7. For example: Rb4+ 60.Kf3 Rb6 61.Nf8+ Kh8 62.Ng6+ Kh7 63.Ra8 Rb3+ 64.Kg4 Rb1 65.Nf8+ Kh8 66.Ne6 Re1 67.Nd8! (threat: Nf7+ and g5−g6 mate) g6 (forced) 68.h6 Re4+ 69.Kf3 Re7 70.Kf4 Kh7 (threat: ...Nxh6, with a drawn ending) 71.Ra1! (intending to meet a capture on h6 with Rh1) Rd7 72.Ne6 (threat: Nf8+) Rf7+ 73.Ke5 Ne7 74.Ra8 and there is no remedy to a knight check on f8. Black can try for a stalemate cheapo with Nc8 which White should not accept: 75.Rb8! (zugzwang) *(*not *75.Rxc8?? Rf5+ 76.Kd6 Rd5+! 77.Ke7 Rd7+!* and Black draws with the Mad Rook theme *)* 75...Rf5+ 76.Ke4 Rf1 77.Rb7+! Kg8 78.Kd5 wins.]

[b) 58...Re4! , controlling the e6−square, may still hold a draw. After 59.Rd2 *(*or *59.Kf5 Re1)* 59...Ne7 60.Rd8 Ng8 , it's not easy to see how White makes progress. If 61.g6+ Kh8 White must release control over the eighth rank, in view of 62.Kf5? (a new paradox emerges) Rxf4+! 63.Kxf4 stalemate.]

59.Ra8! Threat: g5−g6+, followed by mate on h8. **59...Ng8** The knight has to go back.

[59...Nd5?? walks into 60.g6+ Kh6 61.Rh8# .]

60.Ra7?

[There was buried treasure in the position if White had unearthed 60.g6+! Kh8 61.h6!! (this eliminates Black's stalemate themes and creates a mating net) Re4! *(*or *61...gxh6 62.Ra7 Nf6+ 63.Kf5 Ne8 64.Ra8 Rb5+ 65.Ke4 Rb4+ 66.Kf3 Rb3+ 67.Ke2! Rb2+ 68.Kd3 Rb3+ 69.Kd2 Rb2+ 70.Kc3* and wins*;* note that *61...Rb7* is no good either because after *62.h7* Black has no checks *)* 62.Kf5! *(*not *62.h7??* due to *Rxf4+!* again, when Kramnik would suddenly be in dire need of an airsickness bag *)*

62...Re1 63.Nd5! Rf1+ 64.Ke6 Re1+ 65.Kd6 Rd1 66.Rf8! Rd2 67.Ke5 Rd1 68.Ke6 Rd2 69.Nf6!! Re2+ 70.Kd5 gxf6 71.h7 forces mate.]

60...Kh8?

[60...Re4! should still hold the draw, as in the notes above.]

61.Ra8! Kh7 62.Rf8?

[Both sides keep missing the idea 62.g6+! Kh8 63.h6!! .]

62...Kh8 63.Kf3 Rb3+ 64.Ke4 Rb4+ 65.Ke5 Rb5+ 66.Nd5 Ra5 67.Rd8 Kh7 68.g6+ This shouldn't work and Black is drawing with correct play.

68...Kh8 69.h6 EXERCISE (planning): Kramnik finds the idea which worked earlier, yet here it works at cross−purposes with his previous intent. How can Black hold the draw? ANSWER: Don't take the pawn. Go into a holding pattern playing on the familiar stalemate theme. **69...Ra7!** Kramnik's sword is being re−forged into a ploughshare and the game threatens to end in peace.

[69...gxh6?? 70.Rd7 wins on the spot.]

70.Ne3

[If 70.h7 Re7+! 71.Kd4 Re4+! , the Mad Rook saves the day and Black draws. This theme conjures the image of a guy slamming his fist in your face and then when you get up, enraged and ready for reprisal, he says: ⊕Hey, buddy, take it easy and don't take it so personally! Can't you take a joke?⊞]

70...gxh6! Now Black can take it. The thorn is finally plucked from tender flesh.

71.Nf5 Threat: Nxh6. **71...Ra5+?** Poland's then number one ranked player finally falters. Now Black can only watch helplessly at Opportunity's retreating form.

[Instead, 71...Ra1! holds the draw, keeping the option of checking from either the a−file or the first rank. White is unable to make progress since 72.Nxh6 Ra5+ 73.Kf4 Kg7! 74.Nxg8 Kxg6 removes his final pawn.]

72.Kf4 Ra4+ 73.Kf3 Ra3+ 74.Kg4 Ra4+ 75.Kh5! No more rook checks.

75...Ra7

[If 75...Ra1 76.Ne7 Rh1+ 77.Kg4 Rg1+ 78.Kh3 Kg7 then 79.Rxg8+ Kf6 80.Nd5+ Ke6 81.Nf4+ wins.]

EXERCISE (planning): How does White force the win? ANSWER: Transfer the rook to f7. Black is defenceless against this plan. **76.Rf8! Rb7 77.Kh4**

[The immediate 77.Rf7 wins on the spot.]

77...Rb4+ 78.Kg3 Rb6 79.Ne7! Kg7 80.Rf7+! Suddenly, Black's position looks like he bought it at a Salvation Army thrift shop.

[It's mate after 80.Rf7+ Kh8 81.Rh7# .]

1−0

□ **J.Emms**
■ **A.Greet**
British Championship, Douglas 2005
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.Nc4 d5 Black makes the thematic ... d5 break, ignoring the double attack on the e5−pawn. To me this looks like the best way of meeting 8 Nc4. **9.exd5**
[I don't think Black has much to worry

about after 9.Ncxe5 Nxe5 10.Nxe5 dxe4 . For example, 11.d4 (the only chance for an edge is to try to block out the a7−bishop, but Black immediately seeks to activate it) c5! 12.Be3 (M.Klinova−Qin Kanying, New Delhi 2000) and now Qe7 intending ... Be6 is Black's simplest route to a decent position.]

9...Nxd5 10.0−0 With White's king finally tucked away, the threat to e5 becomes real. How should Black deal with it? **10...f6!** This is a key move, which demonstrates that Black is not afraid of the temporary weakness on the a2−g8 diagonal. For example, 11 Ne3 can be met by 11...Be6 followed by ... Kh8.

[10...Re8 looks seemingly more attractive and is certainly playable, but I feel White can cause Black more problems after this move: 11.Re1 Bg4 *(*Black must avoid *11...Qf6 12.d4! e4 13.Ncd2!* , attacking d5 and e4, P. Svidler−H.Steingrimsson, Gausdal 1991 *)* 12.h3 Bxf3 *(*if *12...Bh5* White can safely grab the pawn with *13.g4 Bg6 14.Ncxe5* and follow up with d3−d4 to shut out the a7−bishop *)* 13.Qxf3 Qf6 14.Nd2 Qxf3 15.Nxf3 Nf6 16.Bg5 Rad8 17.Rad1 h6 18.Bh4 with a nagging edge for White, P.Van der Houwen−J.Masek, correspondence 2003. The pawns on d3 and e5 are both weaknesses, but White's two bishops might become a handful if the position opens up.]

11.Re1

[Given how effectively Black deals with this obvious move, there's an argument here for trying something else. If I were to reach this position again, I would be tempted to play 11.Be3!? . It might seem strange to offer Black the chance to grab the two bishops, but actually I think White should be happy to get rid of his dark−squared bishop. It's not easy to find a useful role for it; indeed, it's in danger of becoming White's worst minor piece. I won't go as far as to claim that this gives White an advantage, but it can lead to some interesting positions. If Nxe3 (this is certainly not the only move) 12.fxe3! Kh8 13.d4 , the position looks genuinely unclear. White's aim - not for the first time - is to keep the a7−bishop firmly out of play. The game Z.Hajnal−L.Vajda, Eger 2002, continued e4 (this looks too committal) 14.Nh4 Ne7 15.g3 g5 *(15...Bh3!?)* 16.Ng2 b5 17.Nd2 f5 18.Qh5! Ng6 and I prefer White's position here. As well as the game's 19.Bc2 , *(*White could consider the pawn break g4 (now or later), or even *19.h4* , intending to meet *gxh4* with *20.Nxe4! fxe4? 21.Nxh4!* with a winning attack: *Nxh4 22.Rxf8+ Qxf8 23.Qe5+ Qg7 24.Qe8+* and it's mate next move. *)*]

11...Kh8! Other moves are possible, but vacating the a2−g8 diagonal is the simplest solution. I think Black is fully equal here. **12.h3**

[White needs to prevent ...Bg4. I wanted to play 12.Nh4 intending Qh5, but I couldn't find a reason why Black should avoid the straightforward g5! 13.Nf3 b5 14.Ne3 Nf4 when White is in serious danger of being worse.]

12...Re8

[12...b5 13.Ne3 Nf4 14.d4 exd4 15.cxd4 Ne7 was equal in A.

Tzermiadianos−H.Gretarsson, Rethymnon 2003, *(*and even *15...Nxd4!?* is possible: *16.Nxd4 Qxd4 17.Qf3 Be6 18.Nc2 Qxf2+ 19.Qxf2 Bxf2+ 20.Kxf2 Nd3+ 21.Kf3 Nxe1+ 22.Nxe1* is again equal. *)*]

13.Be3! Better late than never (see the note to White's 11th move), even if the circumstances here are less favourable for White.

[13.d4 looks like the only other logical continuation, but after exd4 14.Rxe8+ Qxe8 15.cxd4 *(*or *15.Nxd4 Nxd4 16.cxd4 Be6)* 15...Be6 Black is well coordinated and probably has an edge.]

13...Nxe3 14.Nxe3

[14.fxe3?! makes much less sense with the rook on e1. Besides, after b5! White's knight would have to retreat to the ugly a3−square to avoid dropping the d3−pawn.]

14...Na5?! It is desirable to kick the bishop off the a2−g8 diagonal, but now Black's knight is misplaced, he loses his grip on the centre and White can get in d3−d4.

[14...Be6 15.Bxe6 Rxe6 16.Qb3 looks a bit awkward for Black, but Qc8 should be okay for him.]

[Alternatively, there's 14...Qd6 to prepare ...Be6. White can try 15.Nh4 here, and Be6 *(*unfortunately, Black can spoil the fun with something like *15...Bxe3* first, and only then ... Be6 *)* 16.Nef5 Qd7 17.Qh5 Bxb3 18.axb3 Kg8 19.Ra4! is the kind of thing White should be aiming for.]

15.Bc2 Be6 16.d4! exd4 17.Nxd4 Bg8 18.Qg4 Bxd4 19.cxd4 Nc6 20.d5 Now White enjoys a small advantage. His pieces are the more active, and the isolated d−pawn, although requiring protection, does have a slight cramping effect on Black's position. **20...Ne5**

[20...Ne7 21.Red1 Qd6 is equally playable, *(*but not *21...Nxd5?? 22.Nxd5 Bxd5 23.Qh5 .)*]

21.Qh4 Qd6 22.Red1 Qf8 23.Rac1 Rad8 24.Bb1 Re7 25.Qb4 c6 26.dxc6 Nxc6 27.Qb6 The c− and d−pawns have been exchanged, leaving a symmetrical structure. White's more active pieces still promise an edge, something which is maintained through to the endgame. **27...Red7 28.Rxd7 Rxd7 29.Be4 Qd8 30.Qxd8 Nxd8 31.a3 g6 32.Rc8 Kg7 33.Kf1 Be6 34.Ke1 Kf7 35.Bf3 Ke7 36.Nc4 Rd1+ 37.Kxd1 Bxc8 38.Kd2 Be6 39.Kc3 Kd7 40.Kd4 Bf7 41.Kc5 Kc7**

[During the game I was concerned about the defence 41...Ne6+ 42.Kb6 Nd4 43.Na5? *(*but in fact *43.Bg4+! f5 44.Ne5+ Ke7 45.Nxf7 fxg4 46.Ng5* is still very good for White *)* 43...Nxf3 44.gxf3 Be6! 45.h4 Bd5 .]

42.Bd5 Ne6+

[Now White is probably winning. Passive defence with 42...Be8! offers Black better chances of survival.]

43.Bxe6! Bxe6 44.Nb6! Intending Nd5+. The pawn endings are winning for White because his king is so far advanced and Black runs out of waiting moves. **44...g5 45.Nd5+ Bxd5 46.Kxd5 Kd7 47.g4! Ke7**

[Or, for example, 47...a5 48.b3 b6 49.b4 axb4 50.axb4 h6 51.b5 etc.]

48.Kc5 Kd7 49.Kb6 Kc8 50.a4 Kb8 51.b4! Kc8

[If 51...Ka8 , White wins by 52.Kc7 Ka7 53.b5

A) or 53...a5 54.f3 h6 55.Kc8 *(*but not *55.b6+?? Ka6!)* 55...Kb6 56.Kb8 , winning as in the game;
B) 53...axb5 54.axb5 Ka8 55.b6 h6 56.f3 and it's mate in four.]

52.Ka7 a5! The last try. **53.b5!**
[53.bxa5? Kc7! 54.a6 b6! 55.Ka8 Kc8! is only a draw, but...]

53...Kc7 54.Ka8
[After 54.Ka8 h6 55.f3 Kb6 56.Kb8 White wins the crucial b−pawn and with it the game.]

1−0

C54

□ **J.Degraeve**
■ **J.Dorfman**
French League 2007
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6
[The move order 5...d6 6.Bb3 a6 is just as likely.]

6.Bb3 d6 Black forgoes the possibility of ...d5 in one move, but commits neither his king nor his dark−squared bishop. There are many possibilities for transpositions into lines we've already covered, since Black often plays ...Ba7 at some point. Here I'll focus mainly on lines where Black delays or avoids this move. **7.Nbd2**
[Naturally White can play 7.h3 (or 7 0−0 of course), with a likely transposition to main lines, but here he decides to play the Nd2−f1−g3 manoeuvre as quickly as possible.]

7...0−0
[7...Ba7 transposes to the note to Black's 7th move in Emms−Flear.]

8.Nf1!? A bold move, inviting Black to play ...Ng4. If he doesn't, White will just carry on with Ng3 and there may be some advantages to delaying h2−h3.
8...d5 As we've seen before on more than one occasion, this is the natural response to Nf1. Alternatively:
[a) The critical continuation is 8...Ng4!? 9.d4!? *(9.Ne3 Nxe3 10.Bxe3* is just equal *)* 9...exd4 10.cxd4 and now:
A) 10...Nxd4!? is dangerous and unclear, but White has good chances to emerge unscathed and with some advantage: 11.Nxd4 Qh4 *(*or *11...Re8 12.Ne3 Rxe4 13.Nf3 Bxe3 14.fxe3 Nxe3 15.Bxe3 Rxe3+ 16.Kf2)* 12.Ng3 Qf6 13.Be3 Nxe3 14.fxe3 Bb4+ 15.Ke2 Bg4+ 16.Nf3 Qxb2+ 17.Qc2 etc;
B) 10...Bb4+ 11.Bd2 Re8 *(*or *11...Qe7 12.Ng3 Nf6 13.Bxb4 Nxb4 14.0−0 Bg4 15.h3 Bxf3 16.Qxf3* with a clear plus for White, G.Sax−F.Berkes, Hungarian League 2003 *)* 12.Ng3 Bxd2+ 13.Qxd2 Nf6 *(*or *13...d5 14.e5 f6 15.h3 Nh6 16.0−0−0!?)* 14.0−0! (9 d4 would be totally unplayable without this resource) Nxe4 (otherwise White's centre gives him an edge) 15.Nxe4 Rxe4 16.Bxf7+! Kh8 17.Rfe1 *(17.d5!* intending *Ne5 18.Ng5 Rg4 19.f4* looks even more promising *)* 17...Rxe1+ 18.Rxe1 Bd7 19.d5 with an obvious advantage for White, G.Zentai−K.Valko, Hungarian League 2003. 8...Ng4 9 d4 has had little practical testing so far, so it's difficult to make a

definitive assessment. The signs are looking quite promising for White, though. And as a back up, there's always 7 h3!;

C) 10...−−]

[b) 8...Be6 9.Ng3 *(9.Bg5!?)* 9...h6 and now:

A) 10.h3 d5 11.Qe2 Re8 12.Nh2!? Qd7 13.Qf3 is similar to positions we've seen before, but here Black can utilize the fact that his dark−squared bishop isn't committed to a7 - it might instead drop back to defend on the kingside. For example, Rad8 *(13...a5!?)* 14.Bc2 b5 15.0−0 Be7!? 16.Re1 Nh7 and Black was solidly placed in M.Kobalija−E.Inarkiev, Ramenskoe 2006.;

B) 10.0−0 Ba7 11.h3 *(11.Bc2!?)* 11...d5 12.Qe2 dxe4 *(12...Re8* transposes to the note on 10...Re8 in Tiviakov−Buhmann *)* 13.dxe4 Bxb3 14.axb3 Qd6 *(14...Qd7 15.Nf5 Kh7* , as in I. Nepomniachtchi−Z.Almasi, Dresden 2007, looks safer, and Black was just about holding his own after *16.Rd1 Qe6 17.Bg5! Rad8 18.b4 Bb6!)* 15.Nf5 Qe6 , and here 16.Bxh6!? is interesting: gxh6 17.Nxh6+ Kh8 18.Ng5 Qe8 19.Qf3 Nh7 20.Qh5 f6 21.Nhf7+ Rxf7 22.Nxf7+ Kg7 23.Qh6+ Kxf7 24.Qxh7+ Ke6 25.Qxc7 and White was on top in L.Ruan−Y. Shen, Beijing 2009. Black might have better ways to defend here, but it seems wise not to allow this sacrifice.;

C) 10.−−]

9.exd5!? Chess is not an easy game! I freely admit that previously I've questioned the strategy of combining the Nd2−f1−g3 manoeuvre with exd5. Maybe I'll try to justify this as the exception which proves the rule. Or maybe White's case is helped by the fact that, with the omission of h2−h3, his development is a bit quicker than usual.

[9.Qe2 Be6 is similar to note 'b' above.]

9...Nxd5 10.Ng3 Nf6 There are some decent alternatives for Black here:

[a) 10...f6 followed by ...Be6 and ... Kh8 is what I've suggested for Black in similar positions. In this particular situation, though, White has just enough time after 11.0−0 Be6 *(* if *11...Kh8* , White should play *12.Re1* discouraging ...Be6 in view of d3−d4 *)* to get in the desirable 12.Be3! . This makes at least some difference: Be7!? *(12...Ba7?! 13.Bxa7! Rxa7 14.d4 exd4 15.Nxd4* is the kind of position that Black must avoid*;* or *12...Bxe3 13.fxe3 Kh8 14.Qd2* and White will push with d4 *)* 13.d4! Kh8 14.dxe5 Nxe3 15.fxe3 Qxd1 16.Raxd1 Bxb3 17.axb3 Bc5 18.Kf2 Rae8 *(18...Nxe5 19.Nxe5 fxe5+ 20.Ke2* is better for White; his king is well placed and the knight will come to e4 *)* 19.b4 Bb6 20.Rd5 Ne7 *(* or *20...Nxe5 21.Nxe5 Rxe5 22.Rxe5 fxe5+ 23.Ke2 Rxf1 24.Nxf1* followed by Kd3−e4 *)* 21.Rd7 Ng6 22.c4 fxe5 (V.Malakhov−V.Georgiev, Solin 2006) and now 23.Ke2 e4 24.Ng5 Rxf1 25.Nxf1 would have kept an advantage.]

[b) 10...h6 11.0−0 Re8 *(11...Nf6* transposes to the main game *)* 12.Ne4!? Be7! *(* if *12...Bf8;* or

12...Ba7 you have to remember the standard trick *13.Bxh6!)* 13.Re1 Be6 14.Ng3 *(*White could consider *14.h3!?* and if *Qd7* then *15.Ng3 Bd6 16.Nh5!?* and possibly d3−d4 *)* 14...Bc5 was equal in S.Kudrin−M. Khachiyan, Las Vegas 2006.]

[c) 10...Nf4 11.Bxf4 exf4 12.Ne4 Be7 *(*after *12...Bb6 13.0−0* the bishop is once again in danger of being blocked out by d4 *)* 13.0−0 Bg4 14.d4 planning Qd3. White's strong centre promises him an edge here.]

11.0−0 h6

[Preparing ...Re8, which at the moment, 11...Re8 , would be strongly met by 12.Ng5! .]

12.Be3! Again we see this move, and it's the only one here which allows White to fight for an advantage. Black must make some kind of concession. Either he must spend time safeguarding his bishop or, as chosen in the game, exchange on e3 thereby strengthening White's pawn structure and opening the f−file.

12...Bxe3

[If 12...Bd6 , 13.Nh4!? aims for f2−f4 - White doesn't always have to play Re1! This plan worked to perfection in T.Gharamian−D.Marholev, La Fere 2008: Bg4 *(13...Re8!?)* 14.Qd2! (lining up Bxh6 possibilities) Ne4?! *(14...Na5 15.Bc2 Re8 16.Nhf5 Bf8 17.b4* , with an edge for White *)* 15.Nxe4 Qxh4 16.f4! Ne7? 17.Nxd6 cxd6 18.fxe5 dxe5 19.Bc5 Rae8 20.Rae1 Qh5 21.d4 , when Black was tied up in knots and saw no reason to continue the struggle. Admittedly this was poor defence by Black, but even so White's plan looks promising.]

13.fxe3 Re8 14.Nh4! I prefer White here. At the very least his position is the easier to play. **14...Be6 15.Nhf5 Bxb3 16.Qxb3 Re6!**

[16...Qxd3 17.Nxh6+ is good for White.]

[There's not enough time for 16...Rb8? , which is met by 17.Nxg7! Kxg7 18.Rxf6! Kxf6 *(*or *18...Qxf6 19.Nh5+)* 19.Rf1+ Kg7 20.Qxf7+ Kh8 21.Rf6 , winning.]

17.Qxb7!? Bold play by Degraeve, and he is instantly rewarded. **17...Ra7?** This looks like a critical mistake. True, Black regains his pawn, but only at a cost of losing coordination.

[If 17...Rb8 18.Qxa6 and Black doesn't have an effective discovered attack against the queen.]

[Or 17...g6 18.Nxh6+ Kg7 19.Nxf7! Kxf7 20.Ne4 , and White threatens Ng5+.]

[However, after 17...Kh7! preparing ... g6 the position is still very unclear.]

18.Qb3 Qxd3 19.Rad1 Qb5 20.Qc2! White certainly isn't about to ease Black's position by exchanging queens.

20...Rb7?

[Black had to play 20...Qc4 preventing White's next move.]

21.Ne4! Threatening 22 Nxh6+. **21...Ne8**

[If 21...Nxe4 22.Qxe4 and Rd7 is coming. Black's can't play Qxb2 because of 23.Rb1 .]

22.Qf2! Again the threat is 23 Nxh6+. Black tries to prevent it with... **22...Kh7**

23.Nxh6!

[...but it happens anyway! Dorfman resigned in view of the following lines: 23.Nxh6 Kxh6 *(*or *23...gxh6 24.Qxf7+ Ng7 25.Rd7 Rg6 26.Nf6+;* or, finally, *23...Rxh6 24.Ng5+ Kh8*

25.Qxf7 with mate to follow *)* 24.Qh4+ Kg6 25.g4 (threatening mate on h5) Nf6 26.Rf5 Nxe4 27.Qh5# .]

Jack Speigel Memorial, Southend 2009
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2
[So far we've only considered 7.h3 . This knight move offers White some new possibilities.]
7...0−0 The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump.
[If 7...d6 , White can of course transpose to the main lines with 8 h3,

but there's also 8.Nf1!? inviting Black to play Ng4 . Now:

A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S.Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;

B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 - White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5 Nxd5 14.h3 Be6* is equal *)* 13...Ne4 14.Bc2 *(*this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3 17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−]

8.Nc4!? This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked.

[White normally chooses either 8.h3 (see Oratovsky−Gozzoli),]

[or 8.0−0 , reaching the Classical Main Line.]

8...d6 Can this natural move really be classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz, 2000), after which 10.0−0?! *(*later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* let Black off the hook following 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5 I would have been very tempted to play just like in the game, with

A) however, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V.Zhelnin−A. Kolev, Odessa 1989: Bg4 *(*perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a significant advantage without

having to do anything spectacular.; **B)** 11.Nxg5!? hxg5 12.Bxg5 .]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(*I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(*White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(*the problem for Black is that *21...exd4* allows mate with *22.Re7+ Kh8 23.Ng6#)* 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(*or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G. Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+) Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(*or *18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .]

16.Qxf5 Nbd7 17.h4! With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can

Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**

[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]

28.Rh3 Bb6 29.Rg3 Bd8

Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**

[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]

32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

C55

□ **J.Bokar**
■ **V.Nasybullin**
Correspondence 2006
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7

This is the Hungarian Defence, and it's quite a rare choice for Black (I haven't yet faced it). Black wants to play ...Nf6 without fear of Ng5, and he is also ready to meet d4 with ...d6. Let's look at one or two other rare moves for Black. I don't plan to cover every option (e.g. 3... h6?!, 3...Qf6?!, 3...Qe7?! etc). I feel at some stage it must be best to just play some chess and use common sense at the board, rather than try to be booked up against every single possibility.

[a) 3...d6 looks similar to 3...Be7, but a key difference is that Black is planning to fianchetto his king's bishop. Black can also begin with 3... g6, which often transposes.

A) After 3...d6, Black can meet 4.d4 with exd4 5.Nxd4 g6 and the bishop will be much more active on g7 than it would be on e7. It's basically the Larsen Variation of the Philidor but with an early Bc4 and ...Nc6.;

B) But what about 4.c3 here, followed by d4? Let's see:

B1) 4...g6 is the most solid option for Black. 5.d4 Bg7 *(*or *5...Qe7 6.0−0 Bg7)* 6.0−0 Qe7 7.Re1 Nf6 8.Nbd2 0−0 9.h3 should be compared directly to 3...Nf6 4 d3 h6 (Bologan−Tomashevsky) and the typical ideas for White must be very similar. The only detail here is that Black is missing the move ... h6, but I don't think this should make much difference.;

B2) 4...Nf6?! looks risky in view of 5.Ng5! d5 6.exd5 , when surely the extra c2−c3 makes a difference. After Nxd5 *(6...Na5 7.Qa4+!)* 7.d4 Be7 we actually transpose to a line of the Two Knights (4 Ng5 d5 5 exd5 Nxd5 6 d4 Bb4+ 7 c3 Be7) and here 8.Nxf7! is known to be good for White. For example, Kxf7 9.Qf3+ Ke6 10.0−0 Na5 11.Bd3 Qf8 12.Qe4 Bd6 13.dxe5 Be7 14.b4 and White won, D.Langier−R.Acosta, Buenos Aires 1993. Black can probably defend better, but who

would want to play like this?;
B3) The innocent−looking 4...Be7 might also be a mistake: 5.Qb3!? Nh6 6.d4 Na5 7.Qa4+ c6 8.Bd3 , as played in A. Vitolinsh−A.Zakharov, Soviet Union 1963, looks good for White. In this case, knights on the rim does equal 'grim'!;
B4) 4...Bg4 must surely be the most sensible option if Black isn't planning a kingside fianchetto, and this is reflected by the fact that it's the most common choice after 4 c3. If Black follows up with ...Nf6, and I think this is his best option, something similar to lines seen in Chapter Four is more than likely and this of course suits our repertoire. For example, 5.h3 Bh5 6.d3 Nf6!
*(*the plausible *6...Qf6??* loses to *7.g4! Bg6 8.Bg5* trapping the queen - this is why we inserted 5 h3!*;* and after *6...Qd7 7.Nbd2* White need not be afraid of *Na5* , as the trick *8.Nxe5!*
wins a pawn - another good reason for 5 h3! *)* 7.Nbd2 Be7 8.Bb3 0−0 9.Nf1
*(*there's nothing wrong with *9.0−0* but with f1 still vacant, why not this more aggressive approach? *)* 9...d5 *(*if *9...Nd7* , *10.g4 Bg6 11.Ng3* is tempting *)* 10.Qe2 and then Ng3, or g4 followed by Ng3.;
B5) 4...−−;
C) 4.−−]
[b) 3...Nd4?! is known as the Blackburne−Shilling Gambit, because the English player Joseph Henry Blackburne reputedly used it to win shillings from amateurs. 4.−−
*(*It's also known in some circles, especially in junior chess, as the "Oh my god!" trick. For maximum effect, after playing the move you are meant to hold your head in your hands and exclaim those words, all to give the impression that you have just blundered a pawn. Then you hope for *4.Nxe5?! Qg5! 5.Nxf7?? Qxg2 6.Rf1 Qxe4+ 7.Be2 Nf3#* . It works with some frequency at junior tournaments!*;* The problem (for Black, not us!) is that after any half−decent reply, we can't escape the fact that Black has moved his only developed piece twice, and it gets exchanged. After something like *4.Nxd4 exd4 5.c3* White can already count on a significant advantage, especially since *Bc5?* loses to *6.Bxf7+!* . *)*]
[c) 3...f5 is the kind of move you probably shouldn't spend hours fretting over, simply because the chances of facing it are quite slim.
A) The sensible reply, especially if you are surprised over the board, is 4.d3 , which I would have thought compares quite favourably to 4 d3 against the Schliemann. Is the bishop better on c4 than on b5? Just ask Black's king! Nf6 5.0−0 Bc5 6.Nc3 d6 7.Bg5 is a King's Gambit Declined with reversed colours, and Na5 8.Bxf6! Qxf6 9.Nd5 Qd8 10.b4! Nxc4 11.bxc5 was somewhat better for White in D. Fryer−M.Lyell, Hastings 2003/04.;
B) Even so, when considering a move like 3...f5, it's always tempting to look for something approaching a

direct refutation. I suspect that 4.d4! is the most critical move. For example:

B1) 4...exd4 5.e5! d5 6.exd6 Bxd6 7.0−0 looks like a very promising gambit for White.;

B2) 4...Qe7 5.Nc3 Nf6 6.Nxe5! Nxe5 7.dxe5 Qxe5 8.0−0! fxe4 *(*or *8...Bd6 9.g3 fxe4 10.Re1)* 9.Nd5! Nxd5 10.Bxd5 c6 *(*if *10...Bd6 11.g3 c6* , *12.Bxe4 0−0 13.Qd3* looks good for White *)* 11.Bxe4 d5 12.Bd3 Kf7 13.Re1 Qf6 14.Re3! . White prevents Black from coordinating his pieces and thus keeps an advantage.;

B3) 4...fxe4 5.Nxe5 d5 6.Bb5 Qd6 7.0−0 Nf6 8.c4! a6 9.Bxc6+ bxc6 10.Nc3 Qe6 11.Qa4 Bd7 12.Bg5 Be7 13.Rae1 h6 14.Bxf6 Bxf6 15.f4 and Black is under pressure, F. Fritsche−B.Blankenberg, correspondence 2003. He can't castle because of tactics on d5 and d7, and he faces the threat of 16 f5. In summary, 4 d3 is a solid choice if you don't want to have to think too hard; 4 d4 is the move if you're aiming for a quick win.;

B4) 4...−−;

C) 4.−−]

4.d4

[For one game I'm going to break away from the book's central theme of c2−c3, to examine the main choice in this position, 4 d4. Of course there is nothing wrong with playing 4.0−0 Nf6 5.d3 , with a direct transposition to Chapter Four. *(*However, attempts to play a quick c2−c3 and d2−d4 don't seem to be justified. For example, if *5.Re1 0−0 6.c3?!* , the typical fork trick *Nxe4!* ensures Black of at least equality. *)*]

4...d6

[Black's other main option here is 4...exd4 , after which 5.Nxd4 Nf6 6.Nc3 0−0 7.0−0 d6 8.Re1 is a kind of Scotch Game, but one where Black has developed passively with his bishop on e7 instead of b4 or c5. This position can also be reached via the Philidor Defence. Although Black's set−up is solid, White's extra space and central superiority promise at least a small edge. For example, Ne5 9.Bf1! *(*if *9.Bb3* , *c5!* suddenly gives Black good counterplay *)* 9...Re8 10.Bg5 Nfg4 11.Bf4 Ng6 12.Bg3 Bh4 13.Qd2 Bxg3 14.hxg3 Bd7 15.a4 N6e5 16.a5 a6 17.Be2 Nf6 18.f4 Nc6 19.Bf3 , M.Stolz−G.Braun, German League 2009.]

5.dxe5! Even though ...Be7 ensures that Black's king isn't displaced after the exchange of queens on d8 (or indeed that Black doesn't lose either the f7− or the e5−pawn!), I still think that the resulting position is quite uncomfortable for Black and I'm not sure why anyone would be in a rush to accept it.

[Note that 5.c3 is not the most effective approach, as Black gains quick counterplay in the centre. For example, Nf6 6.Nbd2 0−0 7.0−0 exd4 8.cxd4 d5! 9.exd5 Nxd5 .]

[There's no reason not to, but if White really wants to avoid an exchange of queens, he should play a King's Indian structure with 5.d5 Nb8 6.Bd3

and c2−c4.]
[Alternatively, 5.h3 Nf6 6.Nc3 0−0 7.0−0 exd4 8.Nxd4 is similar to 4... exd4.]

5...dxe5

[Forced, since 5...Nxe5? 6.Nxe5 dxe5 7.Qh5! is disastrous for Black.]

6.Qxd8+ Bxd8 7.Nc3 This queenless middlegame has always been considered better for White, because of his active pieces and lead in development. I imagine that over the board it's quite difficult for Black to defend. As this game demonstrates, it's no easier in correspondence chess, where you have a lot more time to solve your problems (or, perhaps, to wallow in a miserable position). **7...Nf6**

[7...Bg4 8.Be3 Nf6 9.0−0−0 would transpose.]

8.Be3 Bg4

[If 8...0−0 White plays 9.Bc5! Re8 10.Ng5 Be6 11.Nxe6 fxe6 12.Bb5! Nd7 13.Bxc6 bxc6 and Black's pawns are not a pretty sight, E. Vasiukov−G.Gheorghiu, Manila 1974.]

9.0−0−0 0−0 10.h3 Bh5

[White is not worried about 10...Bxf3 11.gxf3 , since f3−f4 is always an option and meanwhile the bishop pair promises good long−term chances.]
[Bearing in mind what happens to Black's bishop in the game, there's an argument here for 10...Be6 . But even here White can either saddle Black with permanently weak doubled pawns with 11.Bxe6 *(*or choose the possibly even stronger *11.Bd5!? .)*]

11.g4 Bg6 12.Nd2 Be7 13.f3! Now Black's light−squared bishop will struggle to get back into the game.

13...Na5 14.Be2 Rfd8

[The first new move! The stem game, N.Rossolimo−S.Bernstein, US Ch., New York 1954, had continued 14...c6 15.Nb3? *(*however, there is no reason for White to relieve Black's position by exchanging knights, especially such a poor knight on the rim; *15.h4!* , as in the main game, would keep the pressure firmly on Black *)* 15...Nxb3+ 16.axb3 b5 and Black managed to equalize.]

15.h4! h5 16.g5 Ne8 17.a3 By pushing the knight back to e8, White opens up possibilities of Nd5. The problem for Black is that ...c6 can be met by b4 trapping the knight on a5 - a good reason for White to avoid its exchange.

17...Bf8 18.Bf2 a6

[18...Nd6 is strongly answered by 19.Nd5 intending c6? 20.Nc7 Rac8 21.Bxa7 Rxc7 22.Bb6 .]

19.Nd5 Bd6 20.Rhe1! b5 21.f4! White's position is so good that he can win with a direct assault in the centre, even if this bring the bishop on g6 back to life. **21...exf4**

[If 21...f6 , I like 22.f5 Bf7 23.g6 Bxd5 24.exd5 .]

22.e5! Bc5

[22...Bxe5 is met by 23.Ne7+ Kf8 24.Nxg6+ fxg6 25.b4 Nc6 26.Bf3 , winning material.]
[Or if 22...Bf8 23.Nxf4 and Black is getting squashed.]

23.Bxc5 Rxd5 24.Bb4! Winning an exchange. **24...Nc6 25.Bf3 Nxb4 26.axb4 c6 27.Bxd5 cxd5 28.e6! Rc8 29.exf7+ Kxf7 30.c3 Nc7**

[30...d4 fails to 31.Nf3 dxc3 32.Ne5+

.]
31.Re5 Re8
[Again 31...d4 is no good: 32.Nf3 dxc3 33.Rd7+ Kg8 34.Rc5! etc.]
32.Rxe8 Kxe8 33.Nb3 Ke7 34.Rf1 Kd6 35.Rxf4 Ne6 36.Rf2 Ke5 37.Kd2 Bf5 38.Ke3 g6 39.Nd4 Nxd4 40.cxd4+

□ **Hergott,D.**
■ **Garcia,G.**
Linares_107147 1994

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.0−0 This romantic gambit does not offer White any chances for an advantage. Actually at times he needs to be careful not to be worse.

6...Nxe4 Others:

[6...d5?! is very dangerous. After 7.exd5 Nxd5 8.Re1+ Be6 9.Ng5 White has the advantage, e.g. 0−0 10.Qd3 g6 11.Rxe6! fxe6 12.Qh3 Qe7 13.Qxe6+ Qxe6 14.Nxe6 and White was better in Y.Estrin−S. Letic, correspondence 1967.]

[6...d3 has been played in some recent games, though mainly by players wanting to avoid main lines they were unfamiliar with. White has a slight plus after almost any move. One line could be 7.e5 d5 8.Bxd3 Ng4 9.Qe2 Qe7 10.Bf4 and Black has no easy way of improving his position, as after the possibly best f6 11.exf6 Qxe2 12.Bxe2 Nxf6 White should secure a clear edge with 13.Bxc7! .]

[6...dxc3 looks risky, but after 7.e5!? d5! Black is doing all right. 8.Bb3 can be met strongly with c2! 9.Bxc2 Ne4 10.Nc3 Nxc3 11.bxc3 Bg4 when White's compensation is in doubt, J.Blauert−D.Belotelov, Budapest 1997.]

7.cxd4 d5! The only move.

[7...Be7?! 8.d5 Nb8 9.Re1 Nd6 *(*or *9...Nf6? 10.d6 cxd6 11.Bg5 0−0 12.Rxe7! Qxe7 13.Nc3* gives White a whirlwind initiative *)* 10.Bd3 0−0 11.Nc3 and White has very pleasant compensation for the pawn.]

8.dxc5 No choice. **8...dxc4** White has tried several moves in this position, but none that leads to anything better than a struggle (often successful) for equality.

9.Qxd8+

[9.Qe2 Qe7!? *(*more ambitious than the old move *9...Qd3* , e.g. *10.Re1 f5 11.Nc3 0−0 12.Nxe4 fxe4 13.Qxe4 Bf5* ½−½ T.L.Petrosian−A.Grischuk, Internet (blitz) 2004; White is certainly not better here, but probably not worse either *)* 10.Qxc4 *(*if *10.Re1 Nxc5 11.Qxc4 Be6!* and Black is better - Lukacs *)* 10...Nxc5 *(*or *10...f5!?* - Lukacs *)* and now 11.Be3!? was suggested by Golod, intending Ne6 12.Nc3 with compensation, but here Qb4! seems to give White problems proving this. Black is a little better.]

[9.Qe1 Qe7 10.Nc3 Nxc3 11.Qxc3 0−0 12.Qxc4 Be6 was pleasantly equal for Black in A.Pashikian−G. Sargissian, Armenian Championship 2003. And Black can probably create more problems for White with more ambitious play.]

9...Kxd8

[9...Nxd8? is just wrong. After 10.Re1 f5 11.Ng5 0−0 12.Nxe4 fxe4 13.Rxe4 Be6 14.Nc3 Bf7 15.Bf4 Ne6 16.Be3 White dominated in L. Barczay−L.Karsa, Hungarian Championship 1980.]

10.Rd1+

[White has also tried 10.Ng5 Nxg5 11.Bxg5+ f6 12.Rd1+ *(*after *12.Bf4 Nb4 13.Na3 Nd3 14.Rfd1 Bd7 15.Bg3 Nxb2 16.Rd4 Kc8 17.Nxc4 Nxc4 18.Rxc4 a5 19.Re1 Re8*

Black was a pawn up with opposite−coloured bishops in D.Dumitrache−Kr. Georgiev, Athens 1992; with accurate play and help from the opponent, Black managed to gain a full point *)* 12...Bd7 13.Bf4 Nb4! (the way to ensure an advantage) 14.Nc3 Nd3 15.Bg3 Nxc5 16.Rd4 Ne6 17.Rxc4 was J.Blauert−G.Von Bülow, German Bundesliga 1998, when Black has many ways to try to win with his extra pawn.]

10...Bd7

[10...Ke8 is met by 11.Re1 f5 12.Nc3 and White is OK.]

11.Be3

[After 11.Na3 Nxc5 Black is just a pawn up]

[while 11.Ng5 Nxg5 12.Bxg5+ Kc8 13.Na3 Be6 14.Nb5 a6 15.Nd4 Nxd4 16.Rxd4 a5 17.Rad1 f6 18.Bd2 Ra6 was J.Blauert−M.Hebden, London Lloyds Bank 1991. Again Black managed to convert his extra pawn to a full point despite the opposite−coloured bishops. As in the previous example, this can be attributed to the fact that Black was the stronger player, as well as to the position.]

11...Kc8

[Black can also play for an advantage with 11...Ke7!? and then after 12.Nbd2 *(* if *12.Na3 c3! 13.bxc3 Nxc3 14.Rd3 Ne4 15.Re1 Be6* and Black had a slight edge in K. Honfi−G.Sax, Hungary 1970 *)* 12...Nxd2 13.Nxd2 Be6 14.Rdc1 (as in F.Ramos Suria−A.Sorin, Seville 1989) Ne5 15.f4 Nd3 16.Rc3 b5 17.cxb6 axb6 18.Nxc4 Bxc4 19.Rxc4 c5 allows White to regain his pawn, but his pieces are very badly coordinated and his position full of weaknesses.]

12.Rc1

[12.Na3 is weaker, when c3 13.b3 Re8 14.Rdc1 Nb4 15.Ne1 Nd5 16.Bd4 Nf4 17.Rc2 Bf5 18.g3 Ne6 *(18...Rd8* was even stronger, when Black is just winning *)* 19.Bxc3 N4xc5 gave Black a very clear edge in P. Tishin−O.Karpeshov, Samara 2002.]

12...Be6 13.Na3 c3 14.bxc3 b6

Although natural, this seems a bit too early.

[Instead 14...Re8! was a useful waiting move, when White is desperately fighting for equality, and will probably be unsuccessful.]

15.Nd4 Bd7 16.Nb3

[16.f3 Nxc5 was a little better for Black in N.Kopylov−M.Govbinder, correspondence 1976.]

16...Re8 17.Rab1 Rb8 18.Nb5 bxc5

19.Na5?

[19.Nxc5! Nxc5 20.Bxc5 was necessary, when the game is level after Bf5 21.Rb3 Bc2 *(21...Re2!? 22.Nxa7+ Nxa7 23.Bxa7 Ra8 24.Bd4 Raxa2* gives a bit more play, but it is still a dead draw *)* 22.Nxa7+! Nxa7 23.Bxa7 Bxb3 24.Bxb8 Bxa2 25.Ba7 with a draw.]

19...a6

[19...Rxb5! was very strong. White has no choice but to enter a ridiculous endgame with 20.Rxb5 a6 21.Nxc6 axb5 22.Na5 when Black's extra pawn should tell.]

20.Nxc6 Bxc6 21.Na3?!

[White had to play 21.Na7+ Kd7 22.Rxb8 Rxb8 23.f3 Nd6 24.Bxc5 when Black is better, but not too

much.]
21...Rxb1 22.Nxb1 Nd6 23.c4 Nf5 24.Bxc5 Re5 25.Bf8 Nh4 26.Bxg7 Rg5 27.Bf6 Rxg2+ 28.Kf1 Rxh2 29.Ke2 Nf3 30.Nc3
[30.Bc3 was slightly better, but the position is very bad for White anyway.]
30...Rh6! 31.Bh8 Re6+ 32.Kd3 Kd7 33.Nd5 h5 34.Rh1 h4 35.Rh3 Bxd5 36.cxd5 Rh6 37.Bg7 Rh5!
[Black has a lot of nice options, e.g. 37...Ng5 38.Rh2 Rd6 with a clear extra pawn. After the text White has no choice but to enter a bad rook endgame.]
38.Rxf3 h3 39.Be5 Rxe5 40.Rxh3 Rxd5+ 41.Kc3 White has drawing chances, but in practical terms, it is hard to defend. **41...Rf5 42.Rd3+ Kc6 43.f3 Kb5 44.Kd2 c5 45.Rb3+ Ka4 46.Rc3 Rd5+ 47.Kc2 Rf5 48.Kd2 a5 49.Ke3 Kb4 50.Rb3+ Kc4 51.Ra3 Kb5 52.Rb3+ Kc6 53.a4 Re5+ 54.Kf4 Rd5 55.Rb8 Rd7**
[Stronger was 55...Rd4+ 56.Ke5 Rxa4 57.Rf8 Rd4 58.Rxf7 Rd7 59.Rf6+ Kb5 and Black should win.]
56.Ke3 c4 57.Rc8+ Kd5 Sacrificing the a−pawn seems a bit unnecessary.

□ **C.Bauer**
■ **T.Nyback**
French League 2009
[John Emms]

1.e4 e5 2.Bc4 Nc6 3.Nf3 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.h3 d6 9.Nf1 Ne7 10.Ng3 Ng6 11.0−0 b5 Black's light−squared bishop will go to b7, where it can influence events in the centre. This is a very reasonable alternative to the plan of ...h6, ...Be6 and ...Re8 seen in the previous game. **12.a4**
[White certainly has chances of keeping a slight edge in the tension−filled positions after 12.d4 Bb7 *(* or *12...c5 13.Bc2 cxd4 14.cxd4 Bb7 15.Be3 Re8 16.Re1* , V.Bologan−R. Kasimdzhanov, French League 2007 *)* 13.Bc2 *(* if *13.d5* , Black will break with ...c6 *)* 13...Re8 14.Re1 h6 15.a4 , and indeed this has been played in quite a few games. However, it's clear that after White plays d4 Black's light−squared bishop is more actively placed on b7 than, say, e6 or d7. So if the d3−d4 advance isn't quite so attractive against ...Bb7, what else can White consider doing? Well, if ... Bb7 does have a weakness, it's the fact that on this square the bishop no longer controls some key light squares on the kingside. This encourages White to just hold back in the centre, restricting the bishop's influence there, and to begin action on

the kingside, where its lack of presence might be exploited. Let's see how Christian Bauer tries to do this:]

12...Bb7 13.Re1 Re8 14.Nh2!?

White keeps the d−pawn firmly on d3, blunting the b7−bishop, and begins typical action on the kingside. He can now think about moves such as Qf3, Ng4 and Nf5. I'm not sure whether objectively this is a better way to play than 12 d4, but it does at least give Black something different to think about.

[14.Nf5?! would be premature here, and after d5! it's not easy for White to hold his centre. Don't rush with this move!]

14...d5

[With the pressure off his e−pawn, Black strikes in the centre with ...d5. This advance is such a natural reaction to a move like Nh2, although that doesn't mean alternatives don't exist. For example, 14...Nd7 planning ...Nc5 to hit the bishop and the a4−pawn. Let's follow another game involving Bauer here, C.Bauer−M.Godena, Swiss League 2004: 15.Qf3 *(*normally White would be reluctant to give up his light−squared bishop, but after *15.Nf5!? Nc5 16.axb5 axb5 17.Ng4 Nxb3 18.Qxb3* White's knights on the kingside pose a threat, and *Bxf2+?? 19.Kxf2 Rxa1* loses to *20.Nfh6+ gxh6 21.Nxh6+ Kg7 22.Qxf7+ Kh8 23.Bg5* etc *)* 15...Rf8 16.a5!? *(*White wants to answer ...Nc5 with Ba2, so he releases the tension; *16.Nf5 Nc5 17.Bc2* is also possible *)* 16...Nc5 17.Ba2 Ne6 18.Nf5 Ngf4 19.Bxf4 *(19.d4!?)* 19...Nxf4 20.d4 Qf6 21.Rad1 with a tense position offering equal chances.]

15.Qf3 Nh4 This looks enticing, but in fact the knight is going back to g6 next move.

[The game O.Eismont−S.Hirsch, Duisburg 2000, demonstrates a typical battle between White's kingside play and Black's advancing pawns in the centre: 15...h6 (to prevent Bg5) 16.Nf5 c5

A) 17.Bxh6!? gxh6 18.Bxd5 Bxd5 *(18...Nxd5??* loses to *19.Nxh6+)* 19.exd5 is an interesting piece sacrifice;

B) 17.exd5

B1) this thematic pawn sacrifice is forced, since 17...Bxd5 fails to tactics on h6: 18.Bxd5 Qxd5 *(*or *18...Nxd5 19.axb5 axb5 20.Bxh6!)* 19.Nxh6+!;

B2) 17...c4! 18.dxc4 e4 19.Qe2 Qd7 20.Nd4 *(20.Nxh6+!?)* 20...Bxd4 21.cxd4 bxc4 22.Bxc4 Nxd5 and Black has some compensation but I still prefer White's position after 23.b3 .]

16.Qe2 Ng6

[White was threatening Bg5, and after 16...h6 17.Ng4 Nxg4 18.Qxg4 *(*or *18.hxg4* , the knight is not especially well placed on h4 after all. *)*]

After 16...Ng6 Black's argument is that White's 'free' Qd1−e2 is not particularly useful, given that ...Nf4 will attack the queen again. **17.Ng4 Nf4 18.Qf3 Nxg4 19.hxg4 dxe4 20.dxe4 Qf6**

[After some to−ing and fro−ing with the queen and knight, Black still has problems to solve here. Firstly, White is just threatening to win a pawn by taking on f4. Secondly, 20...Qd3

is the move Black would like to play, but this is very well met by 21.Be3! . If Bxe3 22.fxe3! White threatens both the knight on f4 and to trap the queen with Rad1.]

21.Nf5 g6! Nyback chooses to sacrifice his f−pawn, preferring complications over a passive position.

[21...Ng6?? loses to 22.g5! . For example, Qb6 leads to a king hunt and a nice mate in the middle of the board: 23.Bxf7+! Kxf7 24.Nh6+ Ke7 25.Qf7+ Kd6 26.Nf5+ Kc5 27.Be3+ Kc6 28.Qd5#! . This is worth a diagram!]

[21...Ne6 , blocking the diagonal, is a wiser choice, but White keeps an advantage here after 22.g5! Nxg5 *(*or *22...Qd8 23.Qg3)* 23.Bxg5 Qxg5 24.axb5 . The point is that Black cannot recapture on b5, since axb5?? loses to 25.Rxa7! (deflecting the rook from back rank duties) Rxa7 26.Nh6+! gxh6 27.Qxf7+ Kh8 28.Qxe8+ Kg7 29.Qg8+ Kf6 30.Qf7# .]

22.Nh6+ Kg7 23.Nxf7 Rf8 24.Bxf4

[Possibly 24.axb5 is more accurate: axb5 *(*while after *24...Rxf7 25.Bxf7 Qxf7 26.bxa6 Bc6 27.Be3* it's still complicated but White must be better *)* 25.Bxf4 exf4 26.e5! would transpose to the note to Black's 25th move, below.]

24...exf4 25.axb5 a5?

[The point behind 25...a5 is that 25...axb5 26.e5! is very good for White: Qxf7 27.Qxb7 Qxb3 28.Rxa7 Rxa7 29.Qxa7 Qxb2 30.Qd4! and it will be very difficult for Black to cope with the passed e−pawn.]

[However, Black should play 25...Rxf7! 26.bxa6 Bc6 27.Bxf7 Qxf7 . White has a material advantage and should be better, but it won't be easy to overcome those two powerful bishops.]

26.g5 Qe7 27.Nh6?

[Here 27.Qh3! , intending Rxf7 28.Bxf7 Qxf7 29.Rad1! , would have been very strong: Re8 30.Rd7 Re7 31.Red1! Bc5 32.b6! cxb6 33.Qh6+ Kg8 34.Rd8+ Re8 35.R1d7! Rxd8 36.Rxf7 Kxf7 37.Qxh7+ is winning. After 27 Nh6 Black is allowed right back into it. The rest of the game isn't really important for our purposes. Here are the remaining moves:]

27...Qxg5 28.Ng4 h5 29.Nh2 Qxb5 30.Bd5 c6 31.Ba2 Rad8 32.Rad1 Qxb2 33.Rxd8 Rxd8 34.Rb1 Qxf2+ 35.Qxf2 Bxf2+ 36.Kxf2 Rd2+ 37.Ke1 Rxa2 38.Rxb7+ Kf6 39.Nf3 Rxg2 40.Rc7 g5 41.Rxc6+ Ke7 42.Kf1 Rg3 43.Nd4 Re3 44.Rc5 Kf6 45.Rxa5 Rxe4 46.Ra6+ Kf7 47.Nf3 Kg7 48.Nxg5 Rc4 49.Ra3 Kf6 50.Nf3 Rc8 51.Kf2 Kf5 52.Ra5+ Ke4 53.Ke2 1−0

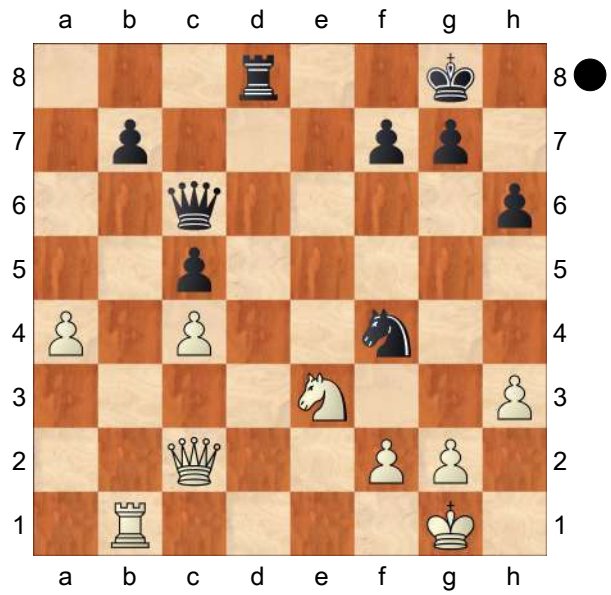
□ **Carlsen,Ma**
■ **Potkin,V.**
European Cup, Porto Carras 2018
[Neil McDonald]

(Diagram)

Keeping Control with Pragmatic Decisions −−− It is Black to play. It appears that Potkin is doing pretty well against the world champion. His queen



and rook are active and the knight is hanging ominously over the white kingside. **28...h5?** QUESTION: Can you find White's best reply and give some positional reasons for playing it? −−− The march of the black pawn to h4 is visually impressive as it cramps White's kingside and prevents him from driving back the knight with a well−timed g2−g3. However, Carlsen is able to show that it is an irrelevance. The action is going to take place in the centre and on the queenside. Besides, in a couple of moves the black knight is going to leave f4 voluntarily. −−− But the decision to play 28...h5 isn't just bad because it is pointless. When assessing the value of a move don't just take into account what it does or doesn't do. Ask yourself which move is it taking the place of.

[Here we could substitute the defensive 28...b6! , which stops White's next move. We can sympathize with Potkin not wanting to put the pawn in range of the white knight after a future Nd5. However, White can't establish his knight uncontested on the central square; for example, if 29.Kh2 (intending g2−g3 at some moment − though that itself would be double edged as it leaves a big hole on f3), then Nd3 30.Nd5 Qd6+ 31.Kg1 Nb4! neutralizes the danger. After 32.Nxb4 cxb4 33.Qb2 Qc5! 34.Qxb4?! Rd1+ 35.Kh2 , Black at the very least has Rxb1 36.Qxb1 Qxf2 with equality.]

ANSWER: **29.a5!** White creates an outpost for the rook on b6 and fixes the b7−pawn as a target. He will also drive the black queen from her "Goldilocks square" (see the notes to the Smirin game in Chapter Nine) on c6 where she puts pressure on g2. **29...h4?!** There is a proverb I've seen in Russian chess books that runs "when two men do the same thing, it's not the same thing." Notice that both players have pushed rook's pawns. White is using his a−pawn as part of a plan involving all his pieces. In contrast, Black has no follow−up to the advance of the h−pawn: it proves a waste of precious time that could have been used to shore up the queenside. **30.Rb6** A sensible and pragmatic move. The white rook takes up its desirable residence and evicts the black queen from her own pad on c6.

[A computer program will tell you that 30.Qf5 gives White a bigger advantage, but perhaps Carlsen was put off by Ne2+ 31.Kh1 Re8 , when Black has counterplay − notably there is the threat of 32...Rxe3 33 fxe3 Ng3+. The computer is unperturbed by all this and will continue 32.Nd5 , ready to answer Nd4 with 33.Qf4 followed 34 Qxh4, punishing the black pawn's impulsive march by capturing it. There are

other tricky lines after 30 Qf5 as well. Carlsen doesn't want anything to do with it. Why speculate when he has a clear plan to increase the pressure on the queenside? He keeps his queen back to defend the first and second ranks.]

30...Qd7 31.Qb2

[Once again the computer suggests 31.Qf5 . But besides Qc7 , *(* Black could try the line *31...Qxf5 32.Nxf5 Rd1+ 33.Kh2 Rd2 34.Rxb7 Rxf2* with counterplay. It might not work for Black but it is messy and unnecessarily forcing. The world champion prefers to probe to see whether his opponent makes a positional blunder. He has cunningly placed his queen on b2 as bait for the black horse. *)*]

31...Nd3 What could be more natural than transferring the knight with gain of time to b4 to plug the open file? But as we shall see, the knight is badly placed on b4 and the pressure on b7 continues.

[31...Qc7 was more resilient, so that if 32.Rxb7? then Qxa5 equalizes, though White could respond with the same plan as in the game.]

32.Qb1! Carlsen has studied chess history in depth. I'm sure he has observed Karpov's speciality of bossing the opponent by keeping the queen on the first rank. **32...Nb4?** Potkin is feeling the heat here and rushes to block the attack on b4.

[Instead, a computer will say that 32...Qa4 is equal. But then 33.Rb5 leaves the black queen shut in with only two squares available to it. Nor can the black knight move as 34 Rxc5 follows. "No problem," says the computer totally unperturbed: " g6 is okay!" Nonetheless, it's no surprise that a human player is unwilling to have his queen boxed in on the a−file.]

33.Qe4! The barrier on b4 is bypassed.

33...Qd4 Black's last hope is that the adage "all rook endgames are drawn" proves true. It doesn't inspire you with much confidence when facing Magnus Carlsen!

[Black has no good way to defend b7, as if 33...Nc6 then 34.a6 is decisive.]

[Nor can Black afford to immobilize his rook as 33...Rb8 34.Nf5 will give White a withering attack on his king; *(34.Qxh4* is also good enough. *)*]

34.Qxd4 cxd4 35.Rxb4 dxe3 36.fxe3 Rd1+ If Black defends passively by keeping his rook on d7, White can put his king on e2 and then play to swap his c−pawn for the b7−pawn to create a passed pawn on the a−file. His task would be helped by c4−c5, exposing an attack on the h4−pawn. If the black rook opposed this by going to the c−file, the white king could advance further to support the queenside pawns. **37.Kf2 Ra1 38.Rb5!** Keeping the dangerous a−pawn.

[After 38.Rxb7? Rxa5 Black would have more hope as his king isn't as far away from the c−pawn.]

38...Ra2+ 39.Kf3 g6 40.c5 Kg7

It looks as if Black has set up a stout defence with the white king tied to g2 and the white rook having to guard a5.

41.Ke4!! One exclamation mark for courage, the other for exact calculation. It is the final ignominy for Black's plan of 28...h5 and 29...h4 that, even in the

endgame, the h−pawn proves irrelevant.
41...Rxg2 The only way to obtain counterplay.
[Waiting is hopeless with the white king joining the show on the queenside; e.g. 41...g5 42.Rxb7 Rxa5 43.c6 Rc5 44.c7 Kf6 45.Kd4 Rc2 46.Kd5 etc.]
42.Rxb7 g5
[Or 42...Ra2 43.c6 Rxa5 44.c7 Rc5 45.Kd4 Rc1 46.Kd5 etc. The white king goes up the board to support the passed pawn. If he is checked to c8 then Kb8 will allow him to promote next move as the rook on b7 shields him from further checks.]
43.c6 g4 44.c7 Rc2 45.Kd3
[Here 45.a6 wins in the style of the game, but it's a sensible precaution to get the king away from a potential promotion on h1 with check.]
45...Rc1 46.Kd2! This move, however, is now vital.
[White has to force the black rook off the eighth rank, as after 46.a6? gxh3 it is White who has to think about how to draw! (It can be done with 47.Rb4! .)]
46...Rc6 47.a6 gxh3 48.a7 h2 49.Rb1! . Black has run out of counterplay. −−− A strategic masterpiece by Carlsen. He kept probing throughout the middlegame, setting his opponent problems on every move and never giving him any chance for lively counterplay. And in the endgame he was supreme. −−− Yet, playing through the game with a computer program, you get the impression that he let Black off the hook on several occasions. Computers don't understand the practicalities or the psychology of a struggle between two human minds. We build our strategy on positional considerations, not relentless and infallible calculation. If there is a bizarre−looking saving move for one of the players buried in a sea of otherwise losing variations, it doesn't mean that the position between humans is equal. Likewise, certain strategic ideas, such as burying our queen in enemy territory (see the comment to 32...Nb4 above) seem too risky or make a bad impression, even if a computer assures us they are fine. −−− Computers are great for finding the blunders and errors in calculation in your games, but they don't play like humans. Potkin was sliding downwards from move 28 in the game above, but the computer will insist "nah, it was equal if he had found 32. .. Qa4." If you use a computer program to analyse one of your games, be sceptical about its evaluation of the turning points − for example, when it indicates the position goes from a small advantage to a big advantage. The flow of a game for a human isn't always the same as that for a computer.

□ **Morphy,Paul**
■ **Morphy,Ernest**
Morphy casual 22.06.1849
[ChessBase]

1.e4 Sergeant, P. Ernest Morphy (1807−1874) was Paul Morphy's uncle. Ernest had been referred to as the "Chess King of New Orleans" [see J. Löwenthal's "Morphy's Games of Chess,

" p.3]. He was probably also young Paul's greatest admirer. Besides sending Paul's games to various publications, in Europe as well as in America, Ernest also tried to arrange matches with the best chess players in America, though to no avail (erfolglos). The game was played blindfold on Paul's 12th birthday. Which one played blindfold (or quite possible both), is not recorded Max Lange:Paul Morphy.3.Aull. 1894. Partie 2, S.2−3. Die anwesenden Zuschauer, meist Angehörige sowie einige Freunde der Familie Morphy, waren von der kraftvollen Spielweise und sicheren Siegesberechnung des zwölfjährigen Blindlingsspielers so überrascht, dass sie den Knaben auf ihren Armen in ein Nebenzimmer trugen, wo sie ihn mit einem bereits für seinen Geburtstag bereit gehaltenen feingeschnitzten Schachspiel aus Elfenbein unter wiederholten Beifallsäußerungen beschenkten (Bericht des Augenzeugen Dr.Ford).

52: European Rapid Ch, Wroclaw 2014

[Cyrus Lakdawala]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 If we live in a cage long enough, we become a zoo animal who thinks of it as home. As mentioned earlier, I gave up Alekhine's Defence as my main weapon against 1 e4 when I got sick of defending Black's side here. From a standpoint of soundness, the recapture with the e−pawn is both more

sound and more solid than the recapture with the c−pawn, which we looked at in the previous three games. The trouble is that it leads to a cramped, serf(ish) Petroff's Defence−like position, where Black must sweat under White's extra central space and mild "+=" for 40+ moves. If you defend perfectly, the big reward is a draw, since White's position is virtually bullet−proof. **6.Bb3 0−0**

[QUESTION: Can Black try for an imbalance by picking up the bishop pair with 6...a6 − ? −−− ANSWER: Unfortunately, that fails to achieve its end. White can just play]

[6...Bb6! and the c4−pawn is immune due to a queen check on a4.]

7.h3 a6

[7...Ne7! 8.0−0 Ng6 , when Black has no good defence to the threatened a2−a3. or 9.Nbd2 c6 10.d4 Bb6 with more than enough play for the pawns or 11.Re1 Re8 12.Bc2 h6]

8.Nbd2 White avoids development to f3, which would allow Black a pin with ... Bg4. **8...Be6** Black has to find a way to bring the bishop out somehow. **9.Bc2**

[9.Nf1 Bxb3 *(9...d5* , M.Schleich−R. Kotz, German League 2011, and now the comp suggests the cute back and forth *)* 10.axb3 d5]

9...d5

[9...Ba7]

[9...h6]

10.Qe2

[10.Nf1 dxe4! 11.dxe4 Qxd1+]

10...h6

[10...Re8! 11.0−0 *(11.Ng5)* 11...h6]

[10...Qe7]

11.g4 Stabilizing c4.

[11.Nf1 b5 , since Black lacks a constructive plan and can only await events. 12.Ng3 It makes more sense to me to play for a swap with dxe4 to free his cramped position somewhat. Still, 13.Nxe4 *(13.dxe4 Bc4 14.Qd1 Qxd1+ 15.Bxd1* is no fun for Black, who is unpleasantly cramped and can only fight for a draw, P.Leko−V.Ivanchuk, World Rapid Cup, Odessa 2007. The tricky *Bd3?!* is met by *)* 13...Nxe4 14.Qxe4 Bd5 15.Qe2 Re8]

11...Nh7

[Black had to bite his lip and bear the pain with 11...Be7! 12.Rg1 *(12.g5* , D.Tsoi−A.Cherepov, St Petersburg 2017, when White looks clearly better after *Nh5 13.gxh6 g6)* 12...dxe4 13.Nxe4 *(13.dxe4 Nh7)* 13...Nxe4 14.dxe4 b5 15.Bb3! *(15.g5 Bc4* (a good multipurpose move, increasing White's grip on d5 and worrying Black about Nxg6 possibilities) *)* 15...Qc8 16.Be3 , although White has all the chances in the ending a more strategically−minded player can opt for a stabilizing line like Bxb3 17.axb3 Qe6 with a steady plus for White]

12.Rg1

[12.exd5 Bxd5 13.Ne4

A) 13...Bb6 (so that his f4−knight is free to move again) 14.Rg1 (or maybe not!) Qe7 15.g5 *(15.h4* gave White a very dangerous passed pawn in J.L.Arizmendi Martinez−C.Philippe, Andorra 2010. *)* 15...h5 , when 16.h4? Rad8 17.Be3;

B) 13...Be7 14.h4 f5! 15.gxf5! (exploiting the pin on White's f4−knight) Rxf5 16.Be3]

12...d4 13.Nb3 Be7 14.Nxe5 Nxe5 Black's position's lungs strain to take in air. He hasn't equalized yet. **15.Nxd4 c5 16.Nf5** Why swap in a position of extra space when we don't have to? **16...Kh8**

[16...Bh4 17.Kf1 , as in the previous note, might be a slight improvement. *(* If Black goes for *17.Be3* here, then *Ng5* denies him the easy swap he had in mind, since capturing on e4 greatly enhances White's structure. Black has tried: *18.Nxh4 Nxh3 19.Nf3 Nxg1 20.Nxg1 Rc8!?* (this disruptive move leads to great complications) *)* M.Cornejo−J.Xiong, US Team Tournament 2014, saw 17...Ng6 18.f4 Qc7! 19.Qf3 , and now Rfe8 maintains White's advantage.]

17.f4! Depriving the black knights of f5, with the option of hassling the f6−bishop with g4−g5 as well.

[17.Be3 Ng6 18.f4 Bh4+ 19.Nxh4 Qxh4+ and Black looks okay, J.Lesot−J.M.Degraeve, Lille 2010. Instead, 20.Qf2! followed by]

17...Nc6 Black must chip away at White's queenside space. From the other side, note that an exchange of pawns on c5 justifies Duda's decision to put his rook on d1.

[17...Bh4+]

18.Be3 Rc8 19.Nxe7 Qxe7 The knight eyes the f4− and g5−squares (via e6) and allows Black to support his d−pawn with ...c7−c6. **20.Qf2 b6?!** The cold war suddenly turns hot. To observe is good; to perceive and accurately interpret your observation is better. This sacrifice looks like it's based on either a miscalculation or a misassessment.

21.h4 f6

[21...Rcd8 22.g5 *(22.f5 Ne5 23.fxe6* , already gave Black a good game. The same applies to *Nxd3+ 24.Bxd3 Rxd3)* 22...f5 23.e5 Rg8]

22.f5! Bg8?! There are worms living in this apple. Black regains his material, at the cost of opening the h−file. **23.0−0−0 Ne5**

[23...Bxa2 24.g5 Ne5 *(24...fxg5* . *25.hxg5* is too routine and transposes to M.Simons−A.Baburin, Isle of Man 2011, where *Nxg5!)* 25.g6 c4 26.dxc4 *(26.d4 Nd3+)* 26...Nxc4 (preventing ...Ng6) 27.gxh7 with a sharp game only slightly favourable to White. The comp prefers b5 28.Bd4 b4 , though I still like White after]

24.Rg3!? Presumably he didn't like Black's knight coming to e6.

[He should have played 24.Kb1]

24...Rfd8

[24...Bxa2 25.g5 *(25.b3 c4 26.bxc4 Qa3+* gives him good play for the exchange. I'm guessing he overlooked White's reply. *27.Kd2* is also met by *b5!* . *)* 25...fxg5 *(25...c4 26.d4* with a big advantage. or *Nd3+ 27.Bxd3* or *cxd3 28.gxh6* He should try *gxh6 29.Bxh6 Rg8 30.Rdg1 Qxe4 31.Bg7+ Rxg7* , when the blockade square on d5 provides some − if not enough − compensation for the missing pawn. Black has banked on this move, after which *32.Rxg7 d2+ 33.Kxd2 Bb3! 34.Kc1 Ba2)* 26.hxg5 Nxg5 is also very good for White 27.Bxg5 looks even more promising, and if hxg5 then 28.Qh2+! Kg8 29.Rh1 Rfd8 30.b3]

25.g5! White's simple plan is to double rooks on the h−file. **25...fxg5**

[or 25...Bxa2 was correct. The comp

shows that White should insert 26.gxh6!! first; for example, gxh6 27.Bxh6 Rg8 28.Rdg1 Rxg3 29.Rxg3 Rg8 30.b3 Qf7 31.Kb2 Ng4 32.Rxg4! Rxg4 33.Bd1 Qg8 *(33...Rg8 34.Kxa2)* 34.Bxg4! Qxb3+ 35.Kc1 Qxc3+ 36.Qc2! with a decisive bind. Qe1+? walks into 37.Bd1! Qxh4 38.Bd2 not Bg8?]

26.hxg5 hxg5 27.Rxg5? As planned, and threatening mate, but it's mistimed and allows Black more chances to defend. **27...Qf7** Making luft for his king.

[27...Nxg5 28.Qh4+ Bh7 29.Bxg5 Nf3 30.Bxe7 Nxh4 31.Bxh4 .]

[or 27...Rxd3 28.Bxd3 Nxd3+ 29.Rxd3 Qxe4 30.Rg3! The tempting shot Qxd3? , intending 31.Bh6 Qd7 32.Bxg7+ Qxg7! 33.Rxg7 (forced) Kxg7 fails to 34.Qg2+! Kh8 35.Qb7 Rf8 36.Qxb6 and White has to take the repetition draw or get mated after ... Rg2+ and ...Nf4. Rxf5? 37.Qxa6 and 39...Nf4 even wins for Black c4?]

[27...Nxd3+ with an easily won rook ending 28.Bxd3 or Rxd3? 29.Rxd3 Either Qxe4]

28.Qg3

[28.Rg2 . But who would even consider 36 Kf1 at the end of a rapid game? Black has better chances with Rd7!? 29.Qg3! Re8 30.Bf4 Rde7 , even if they come to nothing after 31.Rh1 b5 32.Rgh2]

28...Nc6

[After 28...Nxd3+! 29.Rxd3 *(29.Bxd3 Qxa2* and the comp actually claims equality! The only reason I've given his move a dubious mark is that engines show that White can save the piece with *30.Rxg7! Qa1+ 31.Kc2 Qa4+)* 29...Rxd3 30.Bxd3 Nxg5 , Black's king is too exposed to survive. whereas the text might be met by 31.Bxg5 Qh5!]

29.Bb3! White's 3:1 queenside majority should be more effective than Black's passed d−pawn. **29...Qe7!**

In such situations the defender must take action. Sitting on the picket fence risks getting impaled on it. **30.Rh5 c4 31.Bxc4**

[31.Rdh1 . SUMMARY: 5...exd6 is solid but about as much fun for Black as job on an assembly line. It leads to positions where White tends either to win or draw, and rarely lose. Or cxb3 32.Qg6 and Black has run out of checks.]

31...Ne5

[31...Bxc4 32.Rdh1 Bg8 33.Qg6]

32.Bg5 Qd6? Probably both players were running short of time by now. The rook was better where it was.

[32...Qe8 33.Rdh1 Nxc4?? The players swap blunders here. 34.Qh3?? When you are in danger, putting off the necessary until later comes with the mistaken assumption there will be a later. This was Black's final−straw moment. −−− EXERCISE (combination alert): White to play and win. −−− ANSWER: Rook sacrifice/ annihilation of defensive barrier. Qxh5! Now Black is mated by force. The defensive reinforcements are all injured, exhausted or ill. 35.Qxh5 Rxd3 36.f6]

33.Bf4 Rc5?! This bid to regain some authority on the kingside is an attempt to conceal a weakness and tout it as a strength.

[33...Re8?! Unlike a human body, a

threat to one part of the chessboard doesn't necessarily constitute a threat to the whole. White's king easily evades the black queen. 34.Be6]

34.Bd5 Removing the h4−obstruction.

[34.d4]

34...Bxd5 35.Bxe5

1−0

C55

□ **Nevednichy,V..**

■ **Negulescu,A..**

Romanian Ch., Lasi 1999 1999

[Paul Motwani]

G12.8: "Two Knights Battle in the East" V.Nevednichy−A.Negulescu, Romanian Championship, Lasi 1999. Two Knights Defence (by transposition). The last millennium certainly provided us with a plentiful supply of action−packed games...which is why we're now going to time−warp back there for more! Lock on to the co−ordinates 47N 27E and set the date for Wednesday 22 December 1999. On that day, in a town called Lasi on the East coast of Romania, two of the country's best chess knights had a terrific battle in round 10 of their national championship. Brace yourself for a breathtaking combination of really slick strategy and neat tactics in the following GM versus IM clash of the titans. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7**

[Perhaps IM Adrian Negulescu prefers this instead of the more common move−order 3...Nf6 of the Two Knights Defence because then White may play 4.Ng5 (although Black did well in game G12.6).]

4.0−0

[4.d4

A) 4...exd4 may seem simpler at first sight, but after 5.c3! there are perilous pitfalls for Black such as dxc3? *(*or *5...Nf6 6.e5 Ne4 7.Bd5 Ng5?? 8.Nxg5 Bxg5 9.Qh5!* giving White a deadly double attack against f7 and g5. *)* 6.Qd5!;

B) 4...d6 is the slightly passive but solid Hungarian Defence.]

4...Nf6 5.d3 In practice, the same position is very often reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6 4 d3 Be7 5 0−0. **5...0−0 6.Bb3** At least one idea behind this move is that White's light−squared bishop avoids being "hit" by ...d5. **6...d6 7.c3 Na5 8.Bc2** This further retreat was made possible by White's last move, designed to retain an important (long−range) bishop instead of letting it be captured at this early stage by a shorter−range enemy knight. **8...c5 9.Re1 Nc6** For Black, the position is probably a slightly inferior version of what he would get via the following move−order in the Ruy Lopez: 1 e4 e5 2 Nf3 Nc6 3 Bb5 a6 4 Ba4 Nf6 5 0−0 Be7 6 Re1 b5 7 Bb3 d6 8 c3 0−0 9 d3 Na5 10 Bc2 c5, because there Black has effectively gained space with two moves ...a6 and ...b5 in place of 9...Nc6 in the actual game. It is true that White can try to open up lines on the queenside with a2−a4 if the opponent has played ...b5, but personally I would still welcome the extra space as Black which comes from the aforementioned advances ...a6 and ...b5. **10.Nbd2 Bg4?!** The bishop quickly becomes a target for White to attack and simultaneously improve his own

position on the kingside. **11.h3 Bh5 12.Nf1** Loaded with ideas such as 13 Ng3 Bg6 and then the move Nh4 which Black actually stops now. However, White is plotting other dangerous plans too... **12...Ne8 13.g4!** This case of g for "go for it!" gains valuable time for White by attacking Black's harassed light−squared bishop. **13...Bg6 14.Ng3** The knight the famous manoeuvre Nb1−d2−f1−g3 which also occurs with great frequency in the Ruy Lopez. **14...d5** This event does not go unnoticed by White's light−squared bishop, which responds immediately by switching back onto the a2−g8 diagonal. **15.Bb3! d4**

[15...Nc7 loses a pawn to 16.exd5 Nxd5 17.Nxe5 and if]

[15...dxe4 16.dxe4 Qxd1 17.Rxd1 then White enjoys control of the open d−file, and in particular the juicy outpost at d5.]

16.Bd5 White couldn't wait to sample the succulent square! He also threatens simply Bxc6 followed by Nxe5. **16...Bd6** Now e5 is covered again, but what about that h4−square...? **17.h4!** White is again in pursuit of the enemy light−squared bishop, this time with a case of "h **17...h6 18.h5 Bh7 19.g5** 20 Grandmaster Nevednichy is playing with tremendous vigour, and he's now menacing 20 g6 or gxh6 **19...hxg5 20.Nxg5 Nf6 21.Nxh7 Kxh7 22.Bg5 Be7 23.Bxf6!** By eliminating the f6−knight, White ensures that his remaining bishop can enjoy a longer stay at d5, and Black now looks very vulnerable on the light−coloured squares without a suitable bishop of his own to "cover" them. **23...Bxf6 24.Qf3 Kh8**

[If 24...Qd7 then 25.h6! is horrible for Black since g6 *(*or *25...gxh6* would leave the f6−bishop "en prise", whereas*; 25...Kxh6* walks straight into *26.Qh5#)*]

25.Bxc6 White finally parts with his proud bishop because in the process he can inflict structural damage on Black's position. **25...bxc6 26.cxd4 cxd4**

[If 26...Qxd4 then 27.h6! echoes the earlier notes at move 24, and this time one plausible end is Qxb2 28.hxg7+ Bxg7 29.Qh5+ Kg8 30.Nf5 threatening 31 Ne7 or 31 Qg4/5.]

27.Rac1 White continues relentlessly with simple, strong, logical chess, now pinpointing the weakling at c6. **27...Rc8 28.Rc5 Qd6 29.Rec1 Bg5 30.R1c2 Bf4 31.Nf5 Qf6**

[31...Qe6 allows 32.Nxd4! intending exd4 33.Qxf4 Qxa2 34.h6]

32.Qg4

[This natural move threatens 33 Rxc6! Rxc6 34 Rxc6 because of 34...Qxc6 35 Qxg7. Still, 32.Nxd4! seems very powerful too, since exd4 is answered by 33.Rf5]

32...g6 33.hxg6 fxg6

[33...Qxg6 loses quickly and clearly to 34.Qxg6 fxg6 35.Ne7]

34.Rxc6!! Rxc6 35.Rxc6 gxf5

[If 35...Qxc6 36.Qh4+ Kg8 and then the sting in the tail: a deadly fork 37.Ne7+]

36.Rxf6

[Even simpler than 36.Qh3+ or]

[36.Qh5+]

36...Rxf6 37.exf5 Bh6 38.Qe4 Bg7 39.Qa8+

[Black was hoping for 39.Qxe5?? Rg6+ 40.fxg6 Bxe5 but White is too alert to fall for that, even if he was in time−trouble.]

39...Kh7 40.Qxa7 Rxf5 41.Qb7 Rf4 42.a4 The a−pawn starts accelerating towards eventual promotion at a8, but in this game Black will throw in the towel before that happens. **42...e4 43.dxe4 d3 44.Qd5**
1−0

Telegraph match 1890

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 Qf6?!
Please do no t show moves like this to innocent beginners or those under 16. Especially not when they have been played by our first World Champion. Actually this game is solid proof that the motion picture "You should not 'walk' the queen in the opening" is based on a true story...
[Instead 6...Nf6 is seen in the next game]
[and the main move 6...d6 in Karpatchev−Renner and the two subsequent games.]
[Also interesting is 6...Nge7

when play could develop 7.Ng5 d5 8.exd5 Nxd5 9.d4 *(*after *9.Qh5?! g6 10.Qf3 Qxg5 11.Bxd5 0−0 12.d4 Qf5* Black retains the material without repercussions *)* 9...h6 10.dxe5 *(*here *10.Nxf7! Kxf7 11.Qf3+ Ke6 12.Ba3* looks more dangerous *)* 10...hxg5 11.Bxd5 Be6 12.Bxe6 Qxd1 13.Rxd1 *(*risky is *13.Bxf7+?! Kxf7 14.Rxd1 Rad8 15.Re1 Rhe8 16.Bxg5 Rxe5* and Black retains pressure *)* 13...fxe6 14.Bxg5 Nxe5 and the position is more or less equal according to Unzicker.]

7.d4 Nh6

[7...h6 is met strongly with 8.dxe5! Nxe5 9.Nxe5 Qxe5 10.Qb3 Qh5 11.e5 Ne7 12.Re1 Nc6 13.Ba3 with the initiative.]

[7...Nge7 8.d5 Nd8 9.Qa4 *(*stronger than *9.Bg5 Qd6 10.Qa4 f6 11.Bc1 Bb6 12.Na3* , though here, too, White has more than enough compensation *)* 9...Bb6 10.Bg5 Qd6 11.Na3 c6 12.Rad1 Qb8 13.Bxe7 Kxe7 14.d6+ Kf8 15.Qb4 f6 16.Bb3 was M.Chigorin−W.Steinitz, Havana match (game 17) 1889. White is much better here and you sincerely wonder why Steinitz chose to repeat the queen move in our main game.]

8.Bg5

[This is the most natural, though 8.d5!? has also been tried: Ne7 9.Qa4 Bb6 10.Na3 Ng4 11.h3 h5 12.Rb1 a6 13.Rxb6 cxb6 14.Rd1 with full compensation for the exchange, J.Timman−B.Kurajica, Wijk aan Zee 1977.]

8...Qd6?! Things are only getting worse for Black. What is the queen supposed to do here?! Steinitz is playing as if he is inventing the basic principles of chess as he goes along. Well he is... was, I mean... well, never mind...

[8...Qg6 , however, also leads to trouble: 9.d5 Nb8 *(*or *9...Nd8?! 10.Bxd8 Kxd8 11.Nxe5 Qxe4 12.Re1 Qh4 13.d6 cxd6 14.Qxd6* and White is better, E.Schiffers−V. Yurevich, St. Petersburg 1892; e.g. *Bb6 15.Re2 Qf6 16.Qd5! Re8 17.Nd2 Bxf2+ 18.Kh1* with a strong attack *)* 10.Bxh6 Qxh6 11.Nxe5 0−0 12.d6! Nc6 13.Ng4 Qg6 14.Re1 and White has the advantage according to Matsukevich.]

9.d5 Nd8 10.Qa4 Bb6 11.Na3 c6?!

[11...Qg6 was better, though after 12.Bxd8 Kxd8 13.Nxe5 Qxe4 14.Rae1 Qf4 15.d6! White has a strong attack.]

12.Be2 Bc7 13.Nc4 Qf8 14.d6! Bxd6 15.Nb6 Rb8 16.Qxa7 Objectively speaking Black has already lost the game, but we can still enjoy how the first Russian grandmaster puts the first world champion away. **16...Ne6 17.Bc1! Ng8**

[17...f5 is met strongly by 18.Rd1 Bc7 19.Ba3! and Black is on a lot of pain. *(*Slightly weaker is *19.Nxc8 Rxc8 20.Bxh6 gxh6 21.Qxb7 Rb8 22.Qa7 Qg7 23.Bc4* where White has the advantage, but such stupid pieces as the c8−bishop have disappeared, giving Black some hope. *)*]

18.Ba3 c5

[If 18...Qe7 19.Rfd1! *(*not *19.Bxd6? Qxd6 20.Rfd1 Qc7 21.Na8 Rxa8 22.Qxa8 Nf6* and unexpectedly Black survives *)* 19...c5 20.Rxd6 Qxd6 21.Rd1 Qc7 22.Nd5 and White

wins.]
19.Rad1 Nf6 20.Bc4 Bc7 21.Nd5 Bd6 22.Nh4 In a position like this all road leads to Rome.
[Here 22.Nxf6+!? gxf6 23.Bxe6 fxe6 24.Bxc5 Bxc5 25.Qxb8 Kf7 26.Rd3 also wins.]
22...Nxd5 23.Nf5

□ **Chigorin,Mikhail Ivanovich**
■ **Charousek,Rudolf Rezso**
Budapest plof Chigorin−Charousek +3−1=0 (2)
[Tartakower/du Mont/Chigorin/Bogoljubow/Marocz]

C56: Two Knights: 4 d4 exd4 5 0−0 Nxe4 Sources: Tartakower & du Mont, 500 Master Games of Chess, pp. 58−59. Budapest 1896, International Chess Tournament (ed. John Adams), pp. 180−182. All comments are Tartakower's unless otherwise noted. In the following game the Black king, not having castled, is the object of many attacks. Black's unsuccessful but varied attempts to bring the king into safety form an interesting feature of the play.
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0
[The thrust 5.e5 would be premature by reason of the counter−stroke 5.... d5]
5...Bc5 Permitting the well−known Max Lange Attack. This position can also, by an inversion of moves, arise from various other openings such as the Giuoco Piano, the Scotch Gambit, the Centre Gambit, etc.
[Maroczy: An alternative to be considered was 5...Nxe4 6.Re1 d5 7.Bxd5 Qxd5 8.Nc3 Qd8 9.Rxe4+ Be7 10.Nxd4 f5! 11.Rf4 0−0 12.Nxc6 Qxd1+ 13.Nxd1 bxc6 and so forth with equal play. The textmove likewise equalizes the gane, but here very complicated and dangerous variations arise where one

can easily make mistakes; with this the danger also arises −− as here−− that one falls into a well−worked−out prepared variation.]

6.e5 d5

[Against 6...Ng4 the best reply is 7.c3]

7.exf6

[After 7.Bb5 Ne4 8.Nxd4 Bd7 , etc., the positions tend to equalisation. Now, however, it is war to the knife.]

7...dxc4 8.Re1+ Be6

[After 8...Kf8 White obtains an overwhelming position after 9.Bg5 gxf6 10.Bh6+ Kg8 11.Nc3 Bg4 12.Ne4 etc.]

9.Ng5 Qd5

[Plainly neither 9...Qxf6 10.Nxe6 fxe6 11.Qh5+ followed by ♕xc5;] [nor 9...0−0 10.Rxe6 fxe6 11.f7+ Kh8 12.Qh5 h6 13.Qg6 and wins.] [Against the peculiar defence 9...g6 White brings a fresh battery into the fray by 10.Qf3]

10.Nc3 Qf5 11.Nce4

[Too impetuous would be 11.g4 Qg6 12.Nce4 Bb6 etc.]

11...Bb6

[≤11...gxf6?! 12.g4! Qg6 13.Nxe6 fxe6 14.Nxc5±]

[Trying to hold on to the pawn, instead of returning it voluntarily by 11...0−0−0]

[Against 11...Bf8 White would try to disorganize the hostile defence by a temporary sacrifice 12.Nxf7 Kxf7 13.Ng5+]

12.Ng3

[White's attack would have more substance after 12.fxg7 Rg8 13.f4 etc.]

[Chigorin/Bogoljubow: 12.fxg7 is stronger, eg the games Chigorin−Teichmann, London 1899, which continued 12.... Rg8 13.g4 Qg6 14.Nxe6 fxe6 15.Bg5! Rxg7 16.Qf3! e5? *(* or *16...Rf7 17.Nf6+)* 17.Nf6+ Kf7 18.h4 h6 19.Ne4+ Ke6 *(* or *19...Kg8 20.h5 Qf7 21.Nf6+)* 20.h5 Qf7 21.Bf6! Rgg8 22.Qf5+ Kd5 23.b3! Rxg4+ 24.Qxg4 Rg8 25.bxc4+ Kxc4 26.Bg5 hxg5 27.Qg3! Na5 28.Qxe5 1−0 Chigorin, M−Teichmann,R London 1899 (3)]

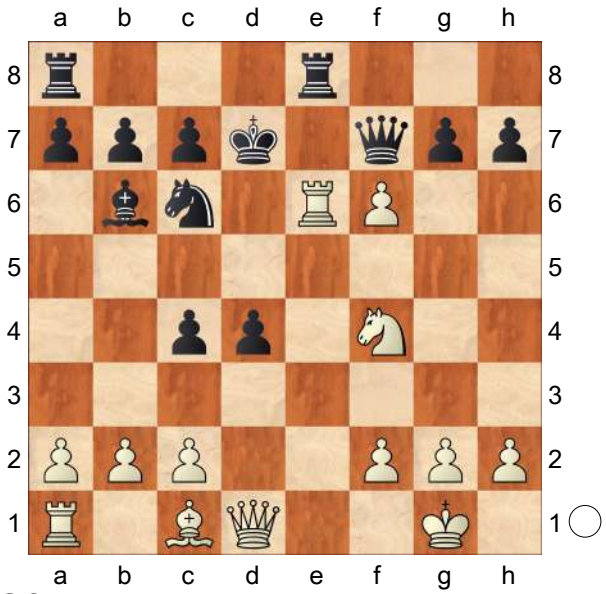
12...Qg6 13.Nxe6 fxe6 14.Rxe6+ Kd7 15.Nh5

[A clever defence of the Rook. If 15.Qe2 Rae8]

15...Rhe8

[Not 15...Rae8 otherwise he would lose a tempo after 16.Nf4 Qf7 17.fxg7]

16.Nf4 Qf7



17.Qf3 Very prettily White maintains the attack. 17.... **17...Rad8** But, by good play, Black works for the time when his king will be able to leave the danger zone.

[But the time is not yet for 17...Rxe6

in view of 18.Qd5+ Kc8 19.Nxe6 etc.]

18.Bd2 gxf6

[Here again 18...Rxe6 would be too uncomfortable after 19.Qd5+ Ke8 20.Qxe6+ Qxe6 21.Nxe6 Rd7 22.fxg7 Kf7 23.Re1 Re7 24.Re4 etc]

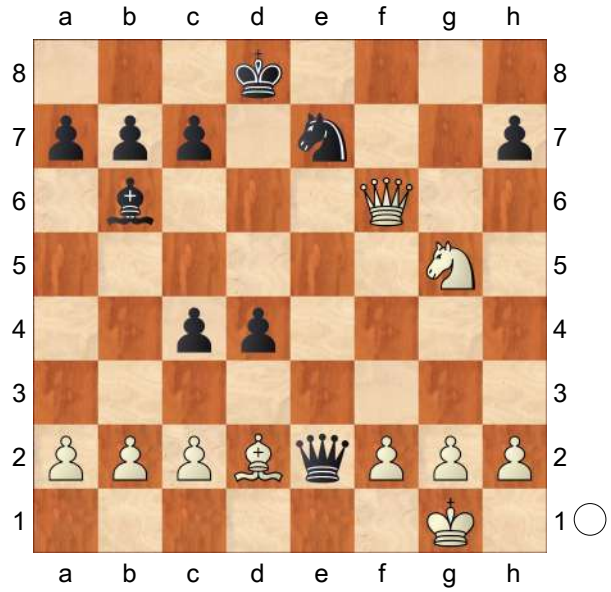
19.Rae1 Rxe6 Thinking—but erroneously—that the right moment for simplification has arrived.

[By interpolating the manoeuvre 19...Ne5 Black could, with advantage, have interrupted the co−ordination of the hostile forces, namely: 20.Qd5+ Kc8 21.Rxe8 Qxe8 22.Qe4 Qd7 etc., and he has consolidated his position.]

20.Nxe6 Re8 21.Ng5!

[Instead of 21.Qd5+ Kc8 etc., White finds ways and means of reviving the attack.]

21...Rxe1+ 22.Bxe1 Qe7 23.Qf5+ Kd8 24.Bd2 Attacking and defending at the same time. 24.... **24...Qe2 25.Qxf6+ Ne7**



26.h4 d3 Maroczy: Black may not take the bishop, for 27.♘f7+ ♔e8 28.♘e5 decides immediately. The text move also does not save the game.

[Chigorin/Bogoljubow: A decisive mistake. Now Black should force a draw: 26...Qxd2 27.Nf7+ Kc8 *(* if *27...Ke8?* then *28.Ne5! Qd1+ 29.Kh2 Qh5 30.g4!)* 28.Qxe7 Qc1+ and White best plays 29.Kh2 Qf4+ 30.Kg1 *(* since *30.Kh3 Qf5+ 31.Kg3 Qg6+ 32.Kf4 Qg8* and Black stands well. *)*]

27.Nf7+ Kc8

[Or 27...Ke8 28.Ne5 Bxf2+ 29.Kh2 and now the threat is 30.♕f7+ ♔d8 31. ♕f8#.]

28.Qh8+ Kd7 29.Qd8+ Ke6

[or 29...Kc6 30.Qe8+ Kd5 31.Qd7+]

30.Ng5+ Kf5 31.Qf8+ Black resigns.

1−0

C51

□ **19) All the Games: 7...h6**

■ **13) Rakesh Kulkarni vs. Frank,C**

Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.h4!?

[Did we mention that White 'always' castles 7.0−0 in this position?]

7...h5!?

[Interesting, though perhaps an overreaction. Instead 7...h6∓ is likely a better use of Black's free move. White has to castle somewhere, and then we'll see which of the h− pawns is weaker!]

[Also the usual 7...Nge7!? can be played, e.g. 8.Bg5 Qg6 9.Nbd2 There is a threat on the board. h6? Stopping one threat, but.... One step further 9...h5 stops the coming

chaos. Then 10.Bd3 b6= is roughly equal. After the half step there's a winning combination afoot: 10.h5! hxg5? Falling for it. Instead 10...Qh7!? may be survivable. If 11.Bh4 b6 12.O−O g5 13.hxg6 Qxg6 14.Re1 $14 White's +0.50 equity in the position is, perhaps, tolerable. The trap is sprung, and continues 11.hxg6 Rxh1+ 12.Nf1 f6 13.Nxg5! White can't allow peace to break out! fxg5 14.Qf3 Nd8 15.Bf7+ Kf8 16.Bc4+ Ke8 17.g3! Rh6 18.Bf7+ Kf8 19.Ne3 Black is hog tied.]

8.Ng5

[Castling 8.0−0∞ is okay, despite his dislocated h−pawn.]

[If instead 8.Na3 Black can resort to Bxa3 9.Bxa3 d6 with equal chances.]

[There is also 8.Bg5!? Qg6 9.Nbd2 and now both f6∞ and 9...Nf6 $13 are fine for Black, while the thematic 9... Nge7 $13 transposes to the note above.]

8...Nh6! 9.f4?

[White can accept the offering, and after 9.Qxh5 g6 10.Qf3 Qg7! play becomes randomized. If 11.d5 Black can consolidate. Instead 11.Ba3 may only help Black to clear his third rank by 11...Bxa3 12.Nxa3 f6 13.Nh3 d6 $13 with a good game. Consolidation begins with Na5 12.Be2 when both b6∞ and 12...f6 $13 are very acceptable.]

9...exd4∓ 10.e5!? Nxe5?

[We've seen this sacrifice in other settings, often correct, but here it's the beginning of a dreadful collapse. Rather 10...Qe7 , and if 11.cxd4 Bb4+ 12.Kf1 d5∓ Black keeps a healthy advantage.]

11.fxe5 Bxe5?

[Black cannot afford this pause in the action; he must keep the initiative at any cost. And so checking 11...Qxe5+! is best, when after 12.Kd2 dxc3+ 13.Kc2 Qf5+ the position is judged inscrutable following 14.Bd3 Qf2+ 15.Qe2+ Qxe2+ 16.Bxe2 Be5 17.Nxc3 d6∞ unclear. But White can hardly hope for more than a draw, as Black has a good number of potential Queens!]

12.Rf1± Suddenly White is worth 2/3 of a pawn! **12...Bg3+ 13.Kd2 dxc3+?**

[Better is the sharp 13...Qc6! , aiming for a poor endgame following 14.Nxf7 Qxg2+ 15.Qe2+ Qxe2+ 16.Kxe2 Rf8 17.Nxh6 Rxf1 18.Kxf1 gxh6 19.cxd4± and all the Kingside pawns will likely disappear, leaving Black with two pawns for a Knight. About +0.75 for White, but with everything on one side of the board might there be drawing chances?]

14.Kc2 Qg6+ 15.Bd3 Qd6? 16.Ba3

[16.Qf3 is winning.]

16...Qe5 17.Nf3?

[Again 17.Qf3 wins.]

17...Qe3?

[His best option is 17...Qe6! so that if 18.Nxc3 Ng4 makes a threat. White then has 19.Bc1± retaining a clear advantage, but after f6 20.Bg6+ Kd8 it won't be easy to dig Black out of his burrow, having only a piece for four pawns.]

18.Nxc3 c6? A serious misstep. **19.Ng5**

[Good enough, but 19.Ne4! threatens the enemy Bishop and also the deadly 20.Bc5+− with actual death shorty after.]

19...d6 20.Rf3 Ng4 21.Nxf7
[In spite of his opponent's clever defense White should continue 21.Nce4 as in the previous note, winning shortly.]
21...0−0 22.Nxd6 Rxf3 23.Qxf3 Be6 24.Nf5 Forcing trades at last − simplify and clarify! **24...Qxf3 25.Ne7+ Kf7 26.Bg6+ Kf6 27.gxf3** Two Black pieces are attacked, one directly and one indirectly. **27...Ne3+ 28.Kd3 1−0**

[7...Bb6! - Game No.43.]
8.cxd4 Bb6 9.Nc3 Na5 10.Bg5!
This, the 'Göring Attack' was a tabiya of Mikhail Chigorin, his favourite position.
10...f6 11.Bf4!?
[Less convincing is 11.Bh4 Nxc4 12.Qa4+ Qd7 13.Qxc4 Qf7 14.Nd5 Nh6 (Chigorin−Yakubovich, correspondence 1879).]
11...Nxc4 12.Qa4+ Kf7 13.Qxc4+ Be6 14.d5! Bd7
['After 14...Bg4 Black has to reckon with a piece sacrifice for the sake of an attack: 15.e5! (? - G.K.) fxe5 16.Nxe5+ dxe5 17.Bxe5 .' (Vasyukov, Nikitin) Excuse me: after the simple Nf6! and the approximate 18.Bxf6 Qxf6 19.Qxg4 Qxc3 White has got nowhere. Whereas the 'positional offensive' 15 Nd4! and a2−a4 gives him excellent compensation for the pawn.]
15.Ne2 Qe8?! A loss of time.
['It was better to develop the kingside by 15...Ne7 and ...Re8 or ...Rf8. The queen should have been reserved for a better post.' (Steinitz) After this there would evidently have followed 16.a4 with a complicated game.]
16.a4! Ne7 17.Be3! Ng6
[Steinitz suggested the tenacious but passive 17...Qd8 18.Bxb6 axb6]
[while to me 17...Rc8!? seems interesting.]
18.Bxb6 cxb6 19.Qb4 Qe7
[19...Bg4 20.Rac1 Bxf3 *(20...Qe7 21.Ng3)* , does not work on account of 21.Rc7+ Kg8 22.gxf3 Nh4 23.Ng3 Nxf3+ 24.Kg2 Nh4+ 25.Kh1 with an attack.]
20.Ng3 Rhc8 21.Nd4 Rc5 22.f4 Rac8 23.Qd2 Rc4
[After Steinitz's move 23...Nf8 , forestalling the invasion of the white knight at e6, 24.Rae1 is unpleasant with the dangerous threat of Ngf5 and possibly e4−e5 (Vasyukov, Nikitin).]
[My alternative is 23...Kg8!? 24.Ngf5 *(24.Ne6 Rc2)* 24...Bxf5 25.exf5 Nf8 .]
24.Ne6! Nh4 Clearly, Black cannot take twice on e6 on account of the fork f4−f5.
['But perhaps it was worth trying to

disrupt the attack by giving up the exchange: 24...Rc2 25.Qxc2! Rxc2 26.Nf5 Bxe6 27.Nxe7 Nxe7 28.dxe6+ Kxe6 .' (Vasyukov, Nikitin) And indeed, the position after 29.Rfc1 Rc5 does not look altogether clear.]

25.Qd1! Bxe6? In my opinion, a serious mistake, and one that was not mentioned by the commentators.

[25...Kg8! should have been played, and if 26.Qg4 - f5 27.exf5 *(27.Nxf5 Nxf5 28.exf5 Qf6)* 27...Rc2 .]

26.dxe6+ Kg8 27.Qg4! 'The king's side attack is congenial to Mr Chigorin's style and he pursues it here with consummate mastery.' (Steinitz)

[However, also good was 27.f5!? g5 28.Rf2 with the threat of 29 Rd2 followed by e4−e5 (Vasyukov, Nikitin). *(28.fxg6!? .)*]

27...Ng6 28.Nf5! Qc7

[Of course, not 28...Qxe6?? 29.Nh6+! .]

29.e7!? The culmination of the battle. 'Everything serves the purpose of the attack on the king. The knight at g6 is pinned and the terrible h2−h4−h5 is threatened. However, many masters of the later "cautious" times would have been unlikely to detach from its neighbours this far−advanced pawn, which guarantees victory.' (Spielmann)

['After the direct 29.h4?! Black has the defence Rxe4 30.h5 Ne5! 31.Qg3 Nc4 and ...Qc5+]

[but after 29.Rae1! followed by the march of the h−pawn Black would appear to have no defence.' (Vasyukov, Nikitin).]

29...Kf7? The decisive mistake.

[Far more tenacious was Steinitz's suggestion of 29...Re8! . In the variation of Vasyukov and Nikitin 30.h4 Rxe7 31.h5 Nf8 32.Nxe7+ *(* I suggest *32.h6! g6 33.Nxe7+ Qxe7 34.Rae1 Rxe4 35.Qd1* and White's position is better *)* 32...Qxe7 33.Rac1!? Qxe4 34.Rce1! Qd4+ 35.Kh1 the outcome remains unclear.]

[But not 29...Rxe4? 30.Nxd6 .]

30.Rad1 Qc5+ 31.Kh1 Rc6

This results in a fatal weakening of the eighth rank. **32.e5!!** A breakthrough at the most fortified point!

[True, in the opinion of the computer, White also wins by the cold 32.e8Q+!? Kxe8 33.Nxg7+ Kf7 34.Qd7+ Ne7 35.Ne6 Qh5 36.Nd8+ .]

32...fxe5

[Also pretty was 32...dxe5 33.Rd8 Re6 34.Rf8+!]

[or 32...Qxe5 33.Nxd6+! Rxd6 34.fxe5 .]

33.Nxd6+ The commentators attach an exclamation mark to this 'crushing blow'

[although 33.e8Q+!? Kxe8 34.Nxg7+ Kf7 35.Qd7+ would have concluded matters immediately.]

33...Rxd6 34.fxe5+ Rf6 35.e8Q+! Kxe8 36.Qd7+ Kf8 37.exf6

. 'The grandiosity of Chigorin's ideas is enchanting: his every move breathes with creative force and an irresistible will to win.' (Spielmann)

1−0

□ **Chigorin,M..**
■ **Steinitz,W..**
24: World Championship, Havana (1) 1892
[Garry Kasparov]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0
[6.d4! .]
6...d6
[Away with 6...Qf6?! .]
7.d4 Bg4
[Best of all is Lasker's 7...Bb6! (Game No.43)]
[but 7...Bd7 8.Qb3 Qf6 9.dxe5 dxe5 10.Rd1 h6 is also more or less sound (seventh and ninth games).]
[The two players also tried 7...exd4 8.cxd4 Bb6 *(*and *8...Nf6 9.e5 dxe5 10.Ba3 Be6 11.Bb5 Qd5 12.Qa4* with the initiative (Hastings 1895; St Petersburg 1895/96) *)* 9.Nc3 Na5 10.Bg5 f6 11.Bf4 Nxc4 12.Qa4+ Qd7 13.Qxc4 Qf7 14.Nd5! with a dangerous attack (London 1883).]
8.Bb5?!
[Later Chigorin was twice successful with 8.Qa4
A) , although after 8...exd4 9.cxd4 a6! (15th game);
B) , or 8...Bxf3 9.gxf3 exd4 10.cxd4 (17th game) Qf6! Black should not have any opening problems. *(10...−−)*;
C) 8...−−]
8...exd4 9.cxd4 Bd7 10.Bb2 Nce7?
At what a price does Steinitz arrive at the chess truth!
[Of course, correct was 10...Nf6! 11.Na3
A) , and here not 11...0−0 12.d5 Ne7 *(*or *12...Nb8* , which brought Black draws in the third and fifth games *)*;
B) , but 11...Nxe4! 12.d5 Ne7 13.Qa4 Bc3! 14.Rab1 Bxb2 15.Rxb2 Nc5 with a decisive material advantage (13th game).;
C) 11...−−]
11.Bxd7+ Qxd7 12.Na3! Nh6 13.Nc4 Bb6 14.a4! c6
[14...a6 15.Qb3!]
[14...a5 15.Nxb6 cxb6 16.Qb3 Nc8 17.d5 .]
15.e5! d5
[No better was 15...dxe5 16.dxe5! Qxd1 17.Raxd1 0−0 18.Rd7]
[or 15...Bc7 16.exd6 Bxd6 17.Nxd6+ Qxd6 18.Ba3 and 19 Re1.]
16.Nd6+ Kf8 17.Ba3 Kg8 18.Rb1! Nhf5?!
[If 18...Nc8 , 19.a5! Nxd6 20.exd6 Bxa5 21.Ne5 Qc8 22.d7 Qc7 23.Qh5 Bb6 24.Be7 wins]
[but 18...Rb8 was more tenacious.]
19.Nxf7!
[Much bolder than the obvious 19.a5 ; this knight sacrifice was published right round the world.]
19...Kxf7 20.e6+ Kxe6 21.Ne5 Qc8
[Or 21...Qe8 22.Re1 Kf6 23.Bxe7+! etc.]
22.Re1 Kf6 23.Qh5! g6
[23...Ng6 24.g4! .]
24.Bxe7+ Kxe7
[Of course, not 24...Nxe7? 25.Qh4+ g5 26.Ng4+ Kf7 27.Qxg5 .]
25.Nxg6+ Kf6 26.Nxh8 Bxd4
[Equally dismal was 26...Qxh8 27.Re5 Qc8 28.g4]
[or 26...Qd7 27.Rb3! Rxh8 28.Rf3 Rg8 29.Re5 Rg5 30.Qh6+ Rg6 31.Rexf5+ Qxf5 32.Qf8+ .]

27.Rb3 Qd7 28.Rf3 Rxh8 29.g4 Rg8 30.Qh6+ Rg6 31.Rxf5+
[In view of 31.Rxf5+ Qxf5 32.Qf8+ Black resigned.]

□ **Blass,Robert**
■ **Grob,Henry**
FSZ der NZZ corr Switzerland 1941
[Grob v2 p8 FSZ#280; Blass #8;]

Played 1941−42 according to the Blass book **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.d3 h6 7.Nf3 e4 8.Qe2 Nxc4 9.dxc4 Bd6**
Grob observes that previously 9...Bc5 or 9...Be7 was usually played. Blass said that Grob got the idea from Stoltz.
10.Nd4 0−0 11.h3 c6 12.dxc6
[12.Nc3 cxd5 13.cxd5 Bb4! and the d5−pawn falls (Grob)]
12...bxc6 13.Be3 Ba6 Grob remarks that although White cannot now play Nxc6 because of the reply ...Qc7, the text move is insufficient.
[13...Qc7 was good says Grob]
14.Nd2 Qd7 15.N4b3 Qe7 16.0−0−0 Nd5 17.Qh5 Nxe3 18.fxe3 Be5 19.Qf5 c5 Diagram # **20.c3**
[Not 20.Qxe4 because of Bb7 21.Qg4 a5 starting an attack (Grob)]
20...Bc8 21.Qxe4 Bb7 22.Qg4 f5 23.Qe2 a5 24.Nb1 a4 25.N3d2 a3 26.b3 Qf6 27.Kc2 Rad8 28.Rhg1
Grob: White has cold−bloodedly accepted the pawn sacrifice and for his part of the bargain has got a very tense defensive position. The acceptance of the third pawn offer by Nxa3 would hardly be survivable, which is why White seeks to switch the play to the kingside.
[28.Nxa3 Bxc3−+]
28...Rd6 29.g4 Rfd8
[29...f4 would be better according to Dr Blass, since thereby Black could soften the impact of the opening of the kingside.]
30.Rgf1 Rd3 31.Rxf5 Qd6 Diagram # N ow Black threatens 32...g6 33 R5f1 Bxc3 34 Nxc3 Rxc3+ 35 Kxc3 Qe5+ 36 Kc2 Qb2# **32.Rdf1!** This cuts across the opposing plan (32...Bxc3 line)
[32.−− g6 33.Rff1 Bxc3 34.Nxc3 Rxc3+ 35.Kxc3 Qe5+ 36.Kc2 Qb2#]
32...Kh7
[32...Bxc3? 33.Rf8+! Rxf8 34.Rxf8+ Kxf8 35.Qxd3]
33.e4 Rxh3
[33...Bxc3 now fails to 34.Rd5!]
34.R1f3 Rh2 35.Rf2 Rxf2 36.Rxf2 Bf4 37.Nxa3 Bxd2 38.Qxd2
Diagram # **38...Bxe4+** After the text move (says Grob) White frees himself and gets a dangerous position where the captured pawns start to make themselves count.
[Here Black should have contented himself with playing for a draw by 38...Qg3 (writes Grob). However, White does not have to take the R but could play Qf4 with winning chances. Also where is the draw if White takes the R? (TH)
A) 39.Qxd8!? "and Black has no more than a draw" wrote Blass Qxf2+ *(39...Bxe4+ 40.Kc1* see note to Black's 39th *)* 40.Qd2 Bxe4+ 41.Kc1+−;
B) RR39.Qf4! not considered by either]
39.Kc1 Qe7
[RR39...Qg3 40.Qxd8 *(40.Qf4??*

Qxc3+) 40...Qxf2 41.Qd2 Qg1+ 42.Qd1 Qe3+ 43.Kb2 Qf2+ 44.Nc2 maybe is a draw. The computer just cannot judge it. Black cannot exchange on c2 as White queens first, but otherwise White is tied up. Qg2 45.a4 Bf3]

40.Qe2! Qg5+ 41.Kb2 Bg6 42.Nb5 Re8 43.Qd1 Re4 44.Nc7!

Black's attempt to set up a perpetual attack on the first and second ranks is countered by this problem−like N move (says Grob) But computer analysis casts a different light on all this phase of the game **44...Qe5 45.Na6 Re3 46.Ka3!** Diagram # **46...Qxc3?** This bad move is passed over by both Grob and Blass without comment!

[RR46...Qe7! 47.Qd5 Re6 needs more analysis 48.Nc7! *(48.Nxc5 Re5* and the N is lost *)* 48...Rb6

A) 49.Qa8 Qxc7 50.Rf8 Bf7 51.Qe4+ g6 *(51...Rg6)*;

B) 49.g5 Qxc7 50.gxh6]

47.Qd2! Qe5 48.Qd5 Qxd5

The Q exchange is the best answer to the threat of Rf8 but thereby Black loses his strongest weapon. **49.cxd5 c4 50.Nc5 c3 51.Rf1** Threatening to win the B by N−e6−f8+ **51...Be8?**

[51...Re5 would put up more resistance]

52.d6 c2 53.Rc1 Rg3 54.d7 Bxd7 55.Nxd7 Rxg4 56.b4! Rd4 57.Nc5 g5 58.Rxc2 g4 59.b5 Rd6 60.Kb3 h5 61.a4 h4 62.Ne4 Rd4 63.Nf6+ Kh6 64.Nxg4+! White sees that in an eventual pawns v R ending, Black will be helpless. Grob complimented his opponent: "White has achieved the win with an admirably dauntless conduct of all phases of the struggle" **64...Rxg4 65.b6 h3 66.Rh2 Rg3+ 67.Kb4 1−0**

Correspondence 1992

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4

[This is more accurate than 6.0−0 d6 7.d4 , which gives Black the extra option of Bb6 , transposing to one of the lines after 5...Ba5 (see Skotorenko−Ahman).]

6...exd4

[6...Bb6?! is inferior, transposing to 5...Ba5 6 d4 Bb6?! (see the notes to Anderssen−Dufresne).]

7.0−0

[Instead, 7.Ng5?! is a violation of just about all existing attacking principles. The following variation is simply good for Black: Nh6 8.Nxf7 Nxf7 9.Bxf7+ Kxf7 10.Qh5+ g6 11.Qxc5 d5! with the initiative, e.g. 12.exd5 Re8+ 13.Kf1 Re5 14.c4 Qh4 15.Nd2 Qh5 and Black wins because of 16.f3 Bh3! .]

[However, 7.cxd4!? is possible, and then Bb4+ 8.Kf1 *(* better than *8.Bd2 Bxd2+ 9.Nbxd2* , since after 8 Kf1 Black must be careful about the b4− bishop *)*

A) 8...Nf6 9.d5 Na5 10.Qc2 Nxc4 *(* if *10...0−0 11.e5 Ne8 12.Bd3* and White is much better, due to the threat of Qa4 *)* 11.Qxc4 a5 12.e5 b6 13.Kg1 Ba6 14.Qb3 Ng8 15.Nc3 and White has compensation for the pawn.;

B) 8...Be7 9.d5 Bf6 10.dxc6 Bxa1 11.Qd5 Nh6 12.Bxh6 0−0 was played in N.Doghri−N. Stevanovic, Yerevan Olympiad 1996. Now White can keep the advantage with 13.cxd7 Bxd7 14.Bg5 Qe8 15.Nbd2 b5 16.Bd3 c6 17.Qc5 Qe6 18.Nb3 .;

C) , when we could imagine play continuing like this: 8...−−]

7...d6 This is the best. Other moves are simply weaker:

[7...Nge7?! 8.cxd4 Bb6 9.Ng5 d5 10.exd5 Na5 11.d6 Nxc4 12.Qa4+ c6 13.Qxc4 Qxd6 14.Qxf7+ Kd7 15.Nc3 and White stands much better.]

[7...d3?! 8.Ng5! is a completely different situation from on the previous move. Now Black has an unpleasant choice:

A) 8...Ne5 9.Nxf7! Nxf7 10.Bxf7+ Kxf7 11.Qh5+ Kf8 12.Qxc5+ d6 13.Qc4 Qe7 14.Ba3 Be6 15.Qxd3 c5 16.Nd2 Re8 17.Rfe1 Nh6 18.c4 b6 19.Bb2 and White was much better in E.Moser−P. Dumancic, Aschach 1999.;

B) 8...Nh6 9.Nxf7! Nxf7 10.Bxf7+ Kxf7 11.Qh5+ g6 *(* or *11...Kf8 12.Qxc5+ d6 13.Qd5 Qf6 14.Qxd3 Be6 15.f4* with a clear advantage *)* 12.Qxc5 d6 13.Qe3

(13.Qd5+ Be6 14.Qxd3 is also good *)* 13...Qe7 14.Nd2 Re8 15.f4 Kg8 16.Qxd3 Be6 17.Bb2 d5 18.c4! and White was better in V.Ragozin−A.Ilyin Zhenevsky, Moscow 1930.;

C) 8...−−]

8.cxd4 Bb6 This could be called the 'standard position' in the Evans Gambit. Standard, that is, for chess games played in the 19th century. In the 20th century it has been limited more to correspondence games, probably because these kind of romantic openings were especially popular in thematic tournaments before the introduction of strong chess−playing programs. Now White has two main options: 9 d5 and 9 Nc3. The first we shall look at now, while the second will be covered in Estrin−Angelov and the two subsequent games. **9.d5** Adolf Anderssen, one of the strongest players in the 19th century, has the copyright of this move. Unfortunately for his family, chess players do not like to pay for intellectual rights... **9...Na5** Other moves are weaker (see the annotations to move 9 in Salygo−Boshoer). **10.Bb2 Ne7** That we are dealing with really old stuff can be seen from the next note:

[10...f6 11.Bd3 Ne7 12.Nc3 c5 13.e5 dxe5 14.Nxe5 0−0 15.Qh5 f5 16.Rad1 and White is better according to Bilguer's 'Handbuch'.]

[More interesting is: 10...Nf6 11.Bd3 0−0 12.Nc3 c6 13.Ne2 Bg4 , when White can try:

A) 14.Qd2 cxd5 15.exd5 Bxf3 16.gxf3 Nxd5 17.Bxh7+ Kxh7 18.Qxd5 Rc8 19.Qh5+ Kg8 20.Qg4 and White has some compensation for the material.;

B) 14.Ng3! is probably stronger though, and after cxd5 15.exd5 h6! *(* if *15...Rc8 16.h3 Bd7 17.Ng5!* and White is better *)* 16.h3 Bd7 17.Re1 White has good compensation for the pawn. Basically it is hard to think up a situation where Black's extra b7−pawn will be a real asset before move 40.;

C) 14.−−]

11.Bd3

[Pawn grabbing can be bad for your health: 11.Bxg7? Rg8 12.Bf6 Nxc4 13.Qa4+ Qd7 14.Qxc4 Rxg2+!! 15.Kxg2 Qh3+ 16.Kh1 Qxf3+ 17.Kg1 Bh3 and Black wins, as given by Anderssen.]

11...0−0 12.Nc3 Ng6

[Another chess legend, Johannes Zukertort, gave the line 12...c5?! 13.e5! dxe5 14.Nxe5 Ng6 15.Qh5 Qd6 16.Rae1 Bc7 17.Ne4 with a deadly attack.]

13.Ne2 c5

[After 13...f6 14.Nfd4 c5 15.Nf5 Bxf5 16.exf5 Ne5 17.Nf4 White is better according to Matsukevich. The idea of the text move is simple: Black wants to keep control over the d4−square. Now White has two equally good possibilities: 14 Rc1 as in the next game, and 14 Qd2 as below.]

14.Qd2 f6 15.Kh1 Bc7 16.Rac1 Rb8 17.Ng3 b5 18.Nf5 Rb7 19.g4! Typical for this kind of position, White has good play for the pawn, if nothing more. **19...Bb8 20.Rg1 Ne5 21.Bxe5?!** In this structure the dark−squared bishop is very useful. It can attack the g7−pawn and the knight on a5 at the same time.

[Better therefore was 21.Nxe5 fxe5 22.f4 c4 23.Be2 and White would have had full compensation.]

21...fxe5 22.Ng5 Re8 23.Rg3 h6?! Violating the old rule of not advancing pawns where you are defending, which seems to give White a helping hand here. **24.Nf3 Rf8 25.Rh3** Black still has problems with his two passive pieces: Na5 and Bb8. **25...Nc4?**

[25...c4 26.Be2 a6! was much stronger, with the obvious plan of getting the bishop back into play after something like 27.Rg1 Ba7 28.Bd1 b4 etc. Generally after 25...c4, Black should be better.]

26.Bxc4 bxc4 27.Rg1?! Why not just take the pawn?

[After the simple 27.Rxc4 Rb1+ 28.Kg2 Rf7 29.Rg3 White has the advantage.]

27...Qe8 28.Nxh6+! White has to time to lose and need to act now.

[If 28.g5? h5 29.N3h4 g6 30.Nh6+ Kg7 31.Rf3 Rxf3 32.Nxf3 Qa4 and Black is close to winning.]

28...Kh7?? Black takes his opponent at his word and declines the sacrifice.

[Actually, acceptance by 28...gxh6 was forced, and then Black can put up an amazing defence to keep the position unclear: 29.Qxh6 *(*not *29.Rxh6? Rf4! 30.Nh4 Qa4 31.Nf5 c3* and Black wins *)* 29...Qe7 30.Qh8+ Kf7 31.Rh7+ Kg6 32.Nh4+!? *(32.Rh6+ Kf7* is a draw by repetition *)* 32...Qxh4 33.Rxh4 Rxh8 34.Rxh8 Bd7 35.h4 c3 36.Rc1 Kg7 37.Rh5 Rb4 38.Rxc3 Rxe4 39.Rb3 Rb4 40.Rg5+ and Black should probably allow the draw by Kh7 41.Rh5+ etc., rather than take a lot of chances by running with the king.]

29.Nf5+ Kg8 30.Qg5 Bxf5 31.gxf5

[After 31.gxf5 Qd8 White wins by 32.Qh5 etc.]

1−0

■ **D.Ledger**

British League (4NCL) 2006

[John Emms]

This game highlights a problem that Black often encounters in this line: how does he create meaningful counterplay? My opponent plays quite imaginatively on the queenside, but he still finds it very difficult to do anything constructive. In contrast, White's moves on the kingside didn't seem to require too much thought. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.Nbd2 0−0 8.h3 Ba7 9.Nf1 d5 10.Qe2 Qd6** Black adds support to e5 in preparation for his next move. **11.Ng3 Na5**

[11...Be6 is certainly possible, but perhaps it makes more sense to play it a move earlier without the queen committed to d6 (see the next game). Now:

A) 12.Nh4 dxe4 13.dxe4 Bxb3 14.axb3 Qe6 transposes to the note to White's 13th move in Tiviakov−Sargissian.;

B) 12.Ng5!? Ne7 13.0−0 Ng6 *(13...Bd7!?)* 14.Nh5 Nd7 15.Nxe6 fxe6 16.Be3 Nf6 17.Nxf6+ Rxf6 18.Bxa7 Rxa7 19.g3 c6 20.d4 looked a touch better for White in B. Macieja−P.Acs, Budapest 1996.;

C) 12.0−0 h6 13.Nh4 dxe4 14.dxe4 Ne7! *(14...Bxb3 15.Ngf5!?* is interesting, planning to answer *Qe6 16.axb3 Qxb3?* with *17.Qf3* with threats on h6 *)* 15.Qf3 Kh7 16.Nhf5 Nxf5 17.Nxf5 Bxf5 18.Qxf5+ g6 19.Qf3 Kg7 and Black has equalized, I.Brandis−S.Vajda, Sovata 1998.;

D) 12.−−]

[11...d4 is another reasonable idea for Black, although not many players have been willing to alter the tension in this way. One of Black's ideas is to play ...dxc3 in combination with ...b5−b4 to gain control of d4, but this plan is not easy to carry out if White plays with purpose: 12.0−0 Be6 13.Nh4 (again this idea suggests itself as the most dangerous) Ne7 14.Bg5 Ne8 15.cxd4!? Bxd4 16.Bxe7! Qxe7 17.Nhf5 Qd7 18.Bxe6 fxe6 *(*or *18...Qxe6 19.Nxd4 exd4 20.Nf5)* 19.Nxd4 Qxd4 20.Qc2 and White enjoyed a slight edge in B.Macieja−I. Sokolov, Elista Olympiad 1998 - Black's pawn weaknesses are more serious than White's.]

12.Bc2 dxe4

[Golubev suggests 12...d4!? here, and this is certainly a

worthwhile idea. After 13.0−0 White's plan is similar to the one employed after 11...d4.]

13.dxe4 Bd7! This is the point of Black's previous play. With the knight vacating c6, Black gains the possibility of doing some damage with ...Bb5. Should White play b3, to meet ...Bb5 with c4? This is what Rybka wants to do... **14.Nh4!** No! **14...Bb5 15.Qf3** Computers, at least initially, assess that Black is well placed here. Perhaps they are taking into consideration the fact that White is unable to castle either side at this moment. My feeling, though, is that White's king stuck in the centre may well be safer than Black's king tucked behind those three kingside pawns, at least in human vs. human battles!

15...Rfe8? Perhaps the main problem for Black is not the assessment of the position, but rather the fact that it's more difficult for him to handle. After just one seemingly natural move by Black, the computers begin to acknowledge White's attacking potential.

[15...Qe6! pre−empts Nf5 ideas and, although I prefer White, there's everything still to play for.]

16.Nhf5 Qf8

[The problem with 16...Qe6 here is that 17.Bg5! threatens 18 Nxg7 Kxg7 19 Bxf6+ Qxf6 20 Nh5+, and also exploits a downside to 15... Rfe8 - the f6−knight no longer has e8 available. Against Nd7? I had planned 18.Nh5! , which exploits another drawback to Black's rook move!]

17.h4! This move creates a major threat, and it also introduces h5−h6 ideas.

[I had analysed the immediate 17.Nxg7 Qxg7 18.Nf5 , but couldn't find a follow up after Qg6 . With a pawn on h4 instead of h3, though, White could win here by playing h5.]

17...Re6? Initially this move seems to discourage Nxg7 because it appears to give Black a second option of capturing on g7, with the king. However, this proves to be worse than capturing with the queen!

[17...Kh8! was the only decent way to meet White's threat. The point behind the king move is that 18.Nxg7 *(* instead I had planned to keep up the pressure with *18.h5)* 18...Qxg7 19.Nf5 Qg6 20.h5 Qg4 no longer works for White because it's not check on h6.]

18.Nxg7! Kxg7

[18...Qxg7 is more resilient but still winning for White: 19.Nf5 Qg6 *(19...Qf8* is met by *20.Bh6;* or *19...Qh8 20.Bh6* with the point that *Ne8 21.Qg3+ Rg6* allows *22.Ne7#)* 20.h5 . Here Nxh5 *(20...Qg4 21.Nh6+* wins the queen *)* 21.Rxh5 is hopeless for Black in the long run.]

19.Bh6+!

[David Ledger looked a bit shocked when I played this move, which either wins the queen or forces mate. Perhaps he had been expecting 19.Nf5+? Kh8 . Sportingly, he allowed me to execute the mate.]

19...Kxh6 20.Nf5+ Kg6 21.Qg3+ Kh5 22.Qg5#

This is an appealing option and it's no surprise that it has been Black's most popular choice over the years.

[9...h6 is a necessary precursor to the plan, because the immediate 9...h6 is a necessary precursor to the plan, because the immediate 9...h6 is a necessary precursor to the plan, because the immediate 9...h6 is a necessary precursor to the plan, because the immediate 9...Nh5 is met convincingly by is met convincingly by is met convincingly by is met convincingly by 10.Bg5! forcing an awkward queen move. After forcing an awkward queen move. After forcing an awkward queen move. After forcing an awkward queen move. After Qe8 , if nothing else there's , if nothing else there's , if nothing else there's , if nothing else there's 11.d4 *(11.Nh2!?)* 11...h6 12.Be3 and White could end up a tempo ahead of the main lines: and White could end up a tempo ahead of the main lines: and White could end up a tempo ahead of the main lines: and White could end up a tempo ahead of the main lines: Qe7 13.Nbd2 Qf6 14.Nf1 Nf4 15.Ng3 etc. −−− This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 − the immediate 9...Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3. etc. This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 - the immediate 9... Nh5 is a major possibility for Black

after 8 Nbd2 0−0 9 h3. etc. This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 - the immediate 9...Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3. etc. −−− This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 − the immediate 9... Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3. etc. −−− This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 − the immediate 9...Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3. etc. This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 - the immediate 9... Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3.]

10.Nbd2 Nh5 11.Nf1

[Note that Note that Note that Note that 11.Nxe5?? is a blunder because of is a blunder because of is a blunder because of is a blunder because of Nxe5 *(*or, even worse, or, even worse, or, even worse, or, even worse, *11...Qh4!)* 12.Qxh5 Nxd3 .]

11...Qf6 12.Be3!

[12.Ne3 is also possible, but the feeling is that White's best chance of finding an advantage lies with this offer to trade the dark−squared bishops. However, it should be pointed out that White's isn't always going to force the exchange of these bishops. Indeed, if Black avoids exchanging on e3, which he tends to do in practice, White will often play d3−d4. In this case, as we've seen before, a significant part of White's strategy is to block the a7−bishop out of the action. What's more, all the time White has the option to exchange bishops with dxe5 followed by Bxa7, whereas Black doesn't. This tension in the centre undoubtedly favours White.]

12...Nf4 Occupying f4 straight away looks attractive, and this is Black's most popular choice here. However, worthy alternatives do exist:

[a) 12...Bxe3 is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ... Nf4, any exchange on e3 only encourages fxe3 to force the knight to retreat. White can recapture in either way: is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ... Nf4, any exchange on e3 only encourages fxe3 to force the knight to retreat. White can recapture in either way: is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ... Nf4, any exchange on e3 only encourages fxe3 to force the knight to retreat. White can recapture in either way: is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ... Nf4, any exchange on e3 only encourages fxe3 to force the knight to retreat. White can recapture in either way: is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ... Nf4, any exchange on e3 only encourages fxe3 to force the knight to

retreat. White can recapture in either way:

A) 13.Nxe3 Nf4 14.Kh2 *(14.Nd5 Nxd5 15.exd5 Ne7 16.d4 Ng6* is equal *)* 14...Ne7 transposes to note 'a', above 15.a4 Be6 16.Bxe6 fxe6?! *(*after *16...Nxe6!* − Karpov − the position is equal - Karpov - the position is equal − Karpov − the position is equal − Karpov − the position is equal - Karpov - the position is equal *)* 17.Ng1! . This knight retreat is one point of 14 Kh2; indeed it's a typical plan for White. The idea is to kick the knight back with g3 and slowly make progress on the kingside: Rad8 18.g3 Nfg6 (now this knight is a poor piece, restricted by the pawn on g3) 19.Rf1 d5 20.Qe2 Nc6 21.Ng2 Rf7 22.h4 Rdf8 23.Rad1 Nge7 (A.Karpov−A. Yusupov, Bugojno 1986) and here (A.Karpov−A.Yusupov, Bugojno 1986) and here (A.Karpov−A. Yusupov, Bugojno 1986) and here (A.Karpov−A.Yusupov, Bugojno 1986) and here 24.f4! (Karpov) would have maintained an edge for White.;

B) 13.fxe3!? is perhaps challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: is perhaps more challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: is perhaps challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: is perhaps challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: is perhaps more challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: Qe7 (to give the knight a square) 14.g4 Nf6 15.Ng3 Be6 16.d4 *(*I'd be tempted to hold the centre and continue with *16.Rf1!?* , intending *d5 17.exd5 Nxd5 18.Qe2)* 16...Bd7! 17.Qe2 Nh7 18.Qg2 Kh8 19.Rf1 with an unclear position, D. Svetushkin−C.Marcelin, Yerevan 1999. White is the more active but Black's position is solid enough.;

C) 13.−−]

[b) 12...Ne7 (providing reinforcements for the kingside) (providing reinforcements for the kingside) (providing reinforcements for the kingside) (providing reinforcements for the kingside) 13.d4 *(13.Bxa7 Rxa7 14.Ne3 Nf4 15.Kh2 Ra8* transposes to note 'a', above *)* 13...Nf4 which transposes to 12...Ne7, above. which transposes to 12...Ne7, above. which transposes to 12...Ne7, above. −−− After 13 Ng3, initially there appears to be no danger at all for Black, but watch out for some hidden traps lurking in this position! *(13...Ng6?* fails to the tactic fails to the tactic fails to the tactic fails to the tactic *14.Nxe5! dxe5 15.Qxh5* , since *exd4 16.cxd4 Bxd4?* loses to *17.Bxd4 Qxd4 18.Qxg6)* 14.Ng3 Neg6 15.Bc2! . The decision to retreat the

bishop looks strange at first sight (how many times have I said that?), but it's actually a strong move. The key idea for White is to interfere with Black's kingside action by playing Nf5: . □ **Cafferty,Bernard**
■ **Clement,Paul**
CCOL5 prel2−04 1961
[Cafferty/Barden]

"The Evans Gambit" (Leonard Barden, Guardian, 18/10/1963). Robert Fischer, the young US champion, told me a few years ago that he regarded all the gambits resulting from 1 e4 e5 unsound, be they King's, Scotch, Danish, or Evans. Now it seems that Fischer has changed his mind to some extent. In the recent New York State championship, which he won with 7 out of 7, Fischer was twice prepared to play the Evans, but his opponents "declined" with the Two Knights' Defence. One of the new ideas in the Evans is illustrated in this week's game played in the semi−finals of the world postal team championship. The notes are based on the winner's." **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7**

[This is thought to be a solid defence. In practice, though, Black's best antidote to the gambit is 5...Ba5 6.d4 d6 7.Qb3 Qd7 8.dxe5 Bb6 and whether White plays 9 exd6, 9 0−0 or 9 Nbd2, Black replies 9...Na5 eliminating the powerful bishop (LWB)]

6.d4 Na5

[Not 6...exd4? 7.Qb3 (LWB)]

7.Bd3 exd4

[A recommendation of Euwe but sounder is 7...d6 8.dxe5 Bg4 (LWB)]

8.cxd4 d5 9.Qa4+!

[9.exd5 Qxd5 10.Nc3 Bb4!]

9...Nc6 Recommended by Konstantinopolsky in Shakhmatny Biulleten 9−01959.

[9...c6 10.exd5 *(* If 9...c6 *10.Bd2* favours White (LWB) *)* 10...Qxd5 11.Nc3± Sokolsky]

10.exd5

[10.e5!? Ostroverkhov−Flammiger]

10...Qxd5 11.Nc3

[11.0−0 was played in some unconvincing games, met by 11...Bd7 and 11...Nf6.]

11...Qa5?

[According to Keres, the equalising line is: 11...Bb4 12.Bd2 Bxc3 *(12...Qa5!?* Larry Evans *)* 13.Bxc3 Nge7 gave chances for K to escape centre (notes Cafferty, FSCH 8/63)]

12.Qxa5 Nxa5 13.Nb5± White has some advantage since, despite the pawn minus, he has active play with his minor pieces. The continuation was instructive:

13...Bd8

[13...Bd6 14.0−0 or Nxd6+ with good attacking chances]

14.Bf4 c6?? 15.Nd6+! Ke7?

[15...Kf8 was critical.]

16.0−0 Be6 17.Rfe1 Kf8 (White threatened 18 Ng5 followed by 19 Ndxf7 − LWB) **18.Bf5 Be7**

[Not 18...Bxf5? 19.Re8#]

19.Bxe6 fxe6 20.Rxe6 Nf6 21.Nf5 Nd5? (Missing White's strong reply but his position was already bad − LWB)

22.Rxe7!+− Nxe7

[Or 22...Nxf4 23.Rae1! with mating possibilities − LWB]

23.Bd6 Kf7 24.Bxe7 Ke6? 25.g4 g6 26.Re1+ Kd7 27.Ne5+ Kc7 28.Bd6+ Kb6□ 29.Nd7+ Kb5 30.Rb1+ Kc4

[King excursions of this type are normally, as here, forced marches rather than exercise sprees. If

30...Ka4 31.Nc5+ Ka3 32.Ne3 and mates by 33 Nc2 − LWB]

31.Ne3+! Kd3

[31...Kxd4 32.Rd1+ Ke4 33.Kg2]

32.Nc5+

[32.Nc5+ For if Ke2 33.Kg2! −− and to postpone the finish 34.Rb2+ Ke1 35.Nd3# Black must give up another piece by 33...Nc4. A lively and well−played game by Cafferty, illustrating how to carry through an attack after the queens are exchanged − LWB]

1−0

C52

□ **McDonnell,A..**

■ **De La Bourdonnais,L..**

London (match) (1) 1834

[Christoph Scheerer]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 d6 7.d4 Bb6

It is remarkable that de la Bourdonnais chose the move that would later strike a heavy blow against the variation. However, it was probably due to the fact that de la Bourdonnais lost this game rather unconvincingly that this defence went unnoticed until the end of the 19th Century.

[Besides 7...Bg4, which I examined in the previous game, the other major alternative is 7...Bd7 . Now Fine gives 8.Qb3 Qe7 9.dxe5 dxe5 10.Rd1 Rd8 11.Rd5 , as clearly better for White, but after *(* of course not *11.Qxb7? Rb8 12.Qa6 Rb6)* 11...Bb6 12.Ba3 Qf6 it is not clear how White should prevent Black from consolidating.]

[7...exd4 8.cxd4 Bb6 is the so−called 'Normal Position' and will be dealt with below.]

8.dxe5 Bg4?! Given the generally aggressive style of the period in which this match was played, this seems to be a natural move.

[However, offering the exchange of queens was the better option and the natural 8...dxe5! will be examined in our next game.]

9.Bb5 Bxf3 10.Qxf3 dxe5 Black is still a pawn up, but with two bishops in an open position White has serious compensation. **11.Qg3 Qf6 12.Bg5 Qe6 13.Na3**

[13.Bh4!? would have been a consistent follow−up to the idea of 11 Qg3, as now Black has to be very careful in order not to compromise his position: for example, Kf8 *(* dubious is *13...g6?! 14.Rd1 Nge7 15.Na3* and Black has problems *)* 14.Rd1 Nge7 15.Nd2 Ng6 16.Bc4 Qe8 17.Nf3 and Black has problems co−ordinating his pieces.]

13...Nf6 14.Bxf6 gxf6? After this move Black gets into serious difficulties. Maybe de la Bourdonnais was dreaming of castling queenside and attacking via the half−open g−file, but White's next move simply shows that the black pieces are too uncoordinated.

[14...Qxf6 would have been more logical when White can win his pawn back with 15.Bxc6+ bxc6 16.Nc4 , but after 0−0 17.Qxe5 Qxe5 18.Nxe5 Rfe8 19.Nxc6 Re6 20.Nd4 Rxe4 if anything, Black has the better chances.]

15.Rad1 Bc5

[Alternatively, 15...Rd8 runs into

16.Qg7! Ke7 17.Rxd8 Rxd8 18.Bc4] [while 15...Qxa2 16.Nc4! a6 17.Bxc6+ bxc6 18.Nxe5 Ke7 *(*or *18...Qe6 19.Qg7 Rf8 20.Nd7* and wins *)* 19.c4! Qe2 20.Rd7+ leaves the black king in a mating net: Ke6 *(*or *20...Kf8 21.Rxf7+ Ke8 22.Qg7 ,;*or *20...Ke8 21.Qg7 Rf8 22.Rxf7)* 21.Qh3+ Kxe5 22.Qf5# .]

16.Qg7 Ke7?

[16...Rf8 was the only try to get the king into safety, even though after 17.Nc2 Bd6 18.Bxc6+ bxc6 19.Qxh7 White has the far superior minor piece. Now White obtains and quite convincingly converts a winning material advantage.]

17.Bc4 Rag8 18.Qxg8 Rxg8 19.Bxe6 fxe6 20.Nc2 Rg4 21.Rfe1 f5 22.exf5 exf5 23.Ne3 Bxe3 24.Rxe3 Ke6 25.Rh3 Rg7 26.Rh6+ Ke7 27.Rb1 Nd8 28.f3 So far McDonnell has shown an excellent technique, attacking Black's weaknesses and hence driving back his opponent step by step,

[but here 28.Rb5 Nf7 29.Rh5 would have been a more effective way to force resignation.]

28...b6?!

[28...Nf7 29.Rh4 Nd6 would have been more resilient.]

29.Rd1 Nf7

[29...Ne6 is only marginally better, as White has 30.Re1 Kd6 31.f4! e4 32.Rf6 .]

30.Rc6 Rg8 31.Rxc7+ Kf6 32.Rxa7 Rc8 33.Rdd7 Ng5 34.Rdc7 . As a result of this game, de la Bourdonnais himself picked up the Evans Gambit. Indeed, in the remaining five matches between McDonnell and de la Bourdonnais, the Evans Gambit was played (and accepted) in 22 out of the 60 games!

1−0

Casuals Anderssen before Morphy Match *[ChessBase]*

1.e4 Von Gottschall: Adolf Anderssen. S. 151. Anderssen traf von Breslau (Abreise 11.XII) über Köln (Besuch bei seinem Freund Carstanjen) am 14. Dezember abends in Paris ein. Er fand Morphy krank im Bett an, so daß der Beginn des Wettkampfes sich bis zum 20.XII verzögerte. Anderssen nutze die Zeit zu freien Partie mit Harrwitz, den er mit +3−1=2 bezwang, und französischen Meistern des Café de la Régence, von denen Morphys Freund Arnous de Revière hervorzuheben ist. Nur die vorliegende Partie ist aus dieser Zeit (15−19. Dezember) erhalten. **1...e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.Ng5 Ne5 6.Bb3 h6 7.f4 hxg5 8.fxe5 Nxe4 9.0−0**

8: European Championship, Plovdiv
[Cyrus Lakdawala]

John Emms: 'In the next two games we consider lines where Black castles quickly, either on move five or six.' **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5** This time Black posts the bishop more aggressively on c5 in proper Italian style. **5.c3** Opening up possibilities of d3−d4, as well as b2−b4. **5...0−0**
[5...a6 6.Bb3 1−0 (28) Bologan,V−Heberla,B European Championship, Plovdiv 2008 [John Emms] d5 7.exd5 Nxd5 8.0−0]
6.Bb3 QUESTION: What is the point of this move? −−− ANSWER: White inoculates himself against any ...Na5 ideas, going after the light−squared bishop, and now has the option of responding to ...d7−d5 with Nbd2, instead of exchanging on d5.
[For instance, after 6.0−0 d5!? White is forced to play 7.exd5 , when Nxd5 8.Re1 Bg4 9.h3 Bh5 10.Nbd2 *(10.g4?!* looks a bit too risky, since *Bg6 11.Nxe5 Nxe5 12.Rxe5 c6* gives Black a kind of super Marshall Gambit position, and I don't recall too many of those where White tossed in g2−g4?! *)* 10...Bb6 11.Ne4 f6 , Black has a decent enough position,

V.Moiseenko−A.Shirov, Finnish Team Championship 2015.]

6...a6 Giving the c5−bishop a retreat square on a7. Often Black plays this on the previous move, that is as soon as White might consider hitting the c5−bishop with b2−b4. John Emms: 'Let's return to the position after' **7.h3!?** With this semi−useful move, preventing a later ...Bg4, Bologan asks whether his opponent wants to push the d−pawn two squares. With this semi−useful move, preventing a later ...Bg4, Bologan asks whether his opponent wants to push the d−pawn two squares. John Emms: ':'

[More usually White just castles with 7.0−0 , when d5 *(* while *7...d6 8.Nbd2 Ba7 9.h3 h6 10.Re1 Re8 11.Nf1* transposes to the next game *)* 8.exd5 Nxd5 9.h3!? transposes below.]

[Judging by what we've seen in previous games, there's a great temptation to play 7.Bg5!? h6 8.Bh4 here.

A) . Indeed, after 8...d6 9.Nbd2 Black suffers the usual pains from the pin. For example, Ne7 10.Bxf6 *(* or *10.d4!?)* 10...gxf6 11.Qe2 f5 12.0−0−0 Kh8 13.d4 exd4 14.cxd4 Ba7 15.e5 and Black's king remains a concern, M.Kobalija−A.Kharlov, Internet 2004.;

B) . Alternatively, 8...g5 9.Bg3 d6 10.Nbd2 Bg4 *(* I prefer *10...Nh5)* 11.h3 Bh5 12.Qe2 Bg6 13.h4 Nh5 14.hxg5 Nxg3 15.fxg3 hxg5 16.0−0−0 , again with some advantage to White, V.Ivanchuk−M.Marin, Canada de Calatrava (blitz) 2007.;

C) . However, Black has a strong defensive resource in 8...Be7! . Even though this move breaks the pin, it might not be easy at first to understand its real strength. After all, hasn't Black just given up a tempo with ...B(f8) −c5−e7 in an otherwise normal looking position? That's a fair question, but it's not quite as simple as that. It could be argued in Black's favour that White's bishop on the h4−d8 diagonal is now somewhat misplaced, since it offers Black opportunities to relieve some pressure via exchanges. S.Tiviakov−M.Marin, Reggio Emilia 2007, continued 9.Nbd2 d6 *(9...Nh5 10.Bg3 Nxg3 11.hxg3 d6* , as indicated by Marin, bypasses White's possibility on the next move *)* 10.Bg3!? *(10.0−0 Nh5! 11.Bxe7 Qxe7* sees Black's exchanging plan in action *)* 10...Re8 . *(* Tiviakov's idea was to meet *10...Nh5* with *11.Nxe5! Nxe5 12.Bxe5 dxe5 13.Qxh5 Qxd3 14.Qxe5* with some advantage, since *Bg4* can be answered safely by *15.Bc4)*

C1) . Here Tiviakov's 11.Nf1?! looked too slow and cumbersome with the bishop on g3 blocking its natural route, and d5! (Marin) Black's position already looks comfortable.;

C2) . I would prefer 11.0−0 , planning typical central action with h3, Re1, d4 etc. Black can grab the bishop pair with Na5 *(* but not *11...Nh5? 12.Nxe5!)* 12.Bc2 Nh5 , but as compensation White can gain

space on the queenside after 13.b4 Nxg3 14.hxg3 *(14.fxg3!?)* 14...Nc6 15.Bb3 .;

C3) 11.−−;

D) 8...−−]

[7.Nbd2!? intending d5 *(7...Ba7* transposes to the last three games *)* 8.exd5 Nxd5 John Emms: 'or' 9.0−0 is also possible. Now: John Emms: 'transposes to lines considered below.'

A) . We've seen previously that White must be wary of ...Nf4 ideas, but here 9...Nf4?! 10.Ne4! gains a key tempo attacking c5, and if Nxd3?! there follows 11.Nfg5! . Suddenly Black is facing a fierce attack: for example, h6? *(*Black has to play *11...Nxc1!* , although even here *12.Qh5! Bf5 13.Bxf7+ Kh8 14.Raxc1 h6 15.Nxc5 Qxg5 16.Qxg5 hxg5 17.Bd5* is very good for White *)* 12.Qh5! Qe7 13.Qg6! hxg5 14.Nxg5 and Black is forced to give up his queen.;

B) 9...Bg4 is logical and has been played a few times: 10.h3 Bh5 11.Ne4 Ba7 12.Re1 *(*or *12.Ng3!? Bg6 13.Re1)* 12...f6 13.Be3! Bxe3 *(*if *13...Kh8* , *14.Bxa7 Rxa7 15.Ng3 Bf7 16.d4!* opens up the centre to White's advantage *)* 14.fxe3 Bf7 15.Qd2 h6 16.d4 and White's centre pawns promise him a slight advantage, P.Svidler−T. Ernst, Gausdal 1991.;

C) 9...−−]

7...d5!? Heberla takes up the challenge, even though it leaves the e5−pawn a bit tender.

[John Emms: 'Likewise,' 7...d6 is obviously still possible. is obviously still possible. John Emms: 'can and probably should be met by' 8.Bg5! . In either case Black has lost the possibility to unpin with ...Be7.]

[If 7...Ba7 White shouldn't hesitate to reply with 8.Bg5! (see Tiviakov−El Taher).]

8.exd5 So White goes for the e4xd5 route after all.

[Instead, Instead, John Emms: 'If' 8.Qe2 h6 9.Nbd2 dxe4 *(9...Be6 10.Nf1* Black has gained a tempo by playing ...d5 in one go, and he might even find a better move than the usual ...Bc5−a7. *)* 10.dxe4 Qe7 11.Nf1 Be6 12.Ng3 is another Ruy−Lopez−like manoeuvring game, V.Kramnik−D. Howell, London (blitz) 2002.]

8...Nxd5 9.0−0!? transposes below.

[This time White must avoid 9.Nbd2? Nf4! .]

9...Nde7

[Another game continued 9...Bf5 10.Re1 Qd6 11.Nh4 Be6 12.Nd2 Ba7 13.Nc4 Qe7 14.Nf3 f6 15.d4 Rad8 16.dxe5 Nxc3 17.Qc2 Nd5 18.exf6! gxf6 (recapture with queen or rook loses the exchange to Bg5) 19.Bh6 Rfe8 20.Re4 and Black was in trouble due to his exposed king, J. Armengol Comas−Z.Ivanovic, correspondence 2011.]

[9...Ba7 transposes to Roy Chowdhury−Skjoldborg.]

[9...Nf6 10.Re1 Qd6 11.Nbd2! Qxd3 12.Nxe5 Nxe5 13.Rxe5 Ba7 *(*if *13...Bd6??* , *14.Bc2!* traps the queen in mid board! *)* 14.Qf3! Qxf3 15.Nxf3 with an edge for White, R.Mainka−R. Stern, Höckendorf 2004. The 'exchange' of pawns in the centre often benefits White, whose pieces

tend to be a bit more actively placed. There's pressure against f7, and possibilities of Ng5, Re7 and Bf4 or Bg5.]

[9...Nb6 10.Re1 h6 11.Nbd2! *(*not *11.Nxe5?! Bxf2+! 12.Kxf2 Nxe5 13.Rxe5? Qf6+)* 11...Qxd3 12.Nxe5 Qg3 13.Qf3! Qxf3 14.Ndxf3 , as played in V.Kramnik−M. Krasenkow, Wijk aan Zee 2003, is similar to the previous note. After Krasenkow's Ne7 , I think Kramnik could have won a pawn with *(*Black can improve with *14...Nxe5 15.Nxe5 Bd6* , but here *16.Ng6 Rd8 17.Ne7+ Kf8 18.Nxc8 Raxc8 19.Be3* , as indicated by Lukacs, gives White the advantage of the bishop pair in an open position *)* 15.Nxf7! Rxf7 16.Rxe7! Bxe7 17.Ne5 − I really can't see anything wrong with this.]

10.Nxe5!? A new move; White plays for a standard fork trick, hoping to gain an edge with a tiny lead in development.

[R.Mainka−H.Bastian, German Championship, Höckendorf 2004, saw 10.Re1 Ng6 11.Ng5 John Emms: '!?' John Emms: 'is another possibility. For example,' h6 12.Qh5 John Emms: '!' hxg5 *(*or *12...Nce7 13.Ne4 Bb6 14.Bxh6!)* 13.Qxg6 Na5!? *(13...Qf6* is more solid is more solid John Emms: '!' John Emms: 'keeps the material balance, and after' *14.Qxf6 gxf6 15.Nd2 Bb6 16.Ne4 Kg7 17.Be3 Rd8 18.Rad1* the position looks equal to me *)* 14.Qxg5 Nxb3 15.axb3 Qxd3 16.Qxe5 , when Black was unable to prove full compensation for the pawn. Bd6 17.Qe3 Qc2 18.Nd2 Bf5 19.b4 , R.Mainka−H.Bastian, Hoeckendorf 2004. White is threatening to unravel with Nc4 or Nf3−d4, and I don't think Black has got quite enough compensation for the pawn.]

10...Nxe5 11.d4 Bxd4 Black gives up the bishop pair in exchange for handing White an isolani.

[I prefer this decision to 11...Bd6 12.dxe5 Bxe5 13.Qxd8 Rxd8 14.Nd2 Bf5 15.Nc4 , which is somewhat uncomfortable for Black, since if he tries to hang on to bishops with Bf6 then 16.Bf4 Nd5 17.Bg3 gives White nagging pressure in the ending.]

12.cxd4 N5c6 13.Bg5

[White could return the bishop pair with White could return the bishop pair with John Emms: 'I wonder about' 13.d5! Na5 14.Nc3 John Emms: 'here. White wants to increase the pressure with Re1, Bg5 etc.' Nxb3 15.Qxb3 , which looks to be slightly in his favour.]

13...Be6

[I think Black can obtain a more favourable version of the game by flicking in 13...h6! here. If 14.Bh4 *(14.Bxe7 Qxe7 15.Nc3 Bf5 16.d5 Ne5* looks equal *)* 14...Be6 , the insertion of ...h6 and Bh4 seems to help Black. For example, 15.Nc3 Bxb3 16.Qxb3 Qxd4!? , and because the bishop is attacked on h4, White has to settle for the less threatening *(*or *16...Qd7)* 17.Bxe7 Nxe7 18.Rad1 *(*or *18.Qxb7 .)*]

14.Nc3 Bxb3

[It's a bit late for 14...h6 now, since 15.d5! hxg5 16.dxe6 f6 is something Black would rather avoid.]

15.Qxb3 Qxd4?! Don't count on your

raise until it is approved by the boss.
[This may be the wrong recapture, as Black falls too far behind in development. He should accept the minor structural pain of 15...Nxd4! 16.Qxb7 John Emms: 'is only a bit better for White,' h6 17.Bh4 Qd7 18.Bxe7 Qxe7 19.Rad1 Qd6! , when his well−posted knight (which can be backed up by ...c7−c5) and open b−file make up for White's slightly superior structure. There is a big difference between pain and injury.]
[and there's also nothing wrong with 15...Qd7 : 16.Bxe7 *(16.Qxb7?? Rfb8* traps the queen,*;* or *16.d5 Nd4 17.Qc4 Ndf5* and the knight heads for d6 *)* 16...Nxe7 17.Qxb7 Nc6 18.d5 Nd4 19.d6! Qxd6 20.Rad1 Rab8 21.Qe4 c5 and the position is equal.]
16.Rfe1! Na5 17.Qa3! Black's knights are now forced to contort. **17...Nec6 18.Rad1 Qa7?** The queen on a7 is like a Beluga whale in a coy pond. Black can't afford to place his queen so far away and his game now quickly unravels.
[He had to try 18...Nc4! 19.Qb3 Qc5 20.Nd5 Nd4 21.Qxb7 c6 , when 22.Nf6+! gxf6 23.Bxf6 Rad8! 24.Bxd8 Rxd8 25.Kh1 may leave White with the better chances, but not nearly as much as in the game.]
19.Nd5 Nc4 EXERCISE: Most of Black's pieces are on the queenside, which makes his king rather lonely. Find one powerful idea and White's pieces turn into an army of sentient self−replicating machines, whose only directive is to kill humanity without conscience. −−− ANSWER #1: Annihilation of the defensive barrier.
[Note that even 19...f6 would not have prevented this move: White still plays 20.Nxf6+! gxf6 21.Bh6 Rf7 22.Re6! (target: f6) Qb8 23.Qg3+ Kh8 24.Rxf6! Qe8 25.Qf4 Qe2 26.Rd7! and overwhelms Black's king to force mate.]
20.Nf6+! This is the punch line to the knight's joke.
[ANSWER #2: The simple path with 20.Qc3! is also crushing; for example, Nd6
A) 21.Nf6+! Kh8 *(21...gxf6 22.Bxf6* is even quicker *)* 22.Qd3 g6 23.Qc3 Nb5 and now the attack on the queen can be ignored with 24.Ng4+!! Nxc3 25.Bf6+ Kg8 26.Nh6# .;
B) 21.Bf6! g6 22.Qxc6! bxc6 23.Ne7# .]
20...gxf6 Forced,
[since 20...Kh8 loses instantly to 21.Qd3! with a deadly double attack on h7 and the loose c4−knight.]
21.Qg3! There is nothing to it. Bologan simply points at the target and pulls the trigger. **21...fxg5**
[Or 21...Kg7 22.Bh4+ Kh6 23.Qf4+ Kg6 24.Qxf6+ Kh5 25.Qg5# .]
22.Qxg5+ Kh8 23.Qf6+ Kg8 24.Rd5! Black is now two knights up but they are helpless to defend their king. **24...N4e5 25.Rdxe5 Nxe5 26.Rxe5 Rfe8** This allows White to force mate.
[The only way to prolong the game was with the grand gesture The only way to prolong the game was with the grand gesture John Emms: 'The only way to avoid mate is with' 26...h6 John Emms: ', but' 27.Qxh6 Qb6 28.Rg5+ Qg6 A grand gesture isn't of

much practical value. 29.Rxg6+ fxg6 30.Qxg6+ , which isn't of much practical value. Sure, Black evaded mate, but White has way too many pawns. Taking refuge in such a line is the same as the sinner who dies and is reborn in hell, asking the devil for an air−conditioned room. In hell there are only two settings: hot and hotter. , which isn't of much practical value. Sure, Black evaded mate, but White has way too many pawns. Taking refuge in such a line is the same as the sinner who dies and is reborn in hell, asking the devil for an air−conditioned room. In hell there are only two settings: hot and hotter. John Emms: 'is an easy win.']
[If 26...Rfd8 , White finishes Black off with 27.Rg5+ Kf8 28.Rf5 Rd7 29.Qh8+ Ke7 30.Re5+ Kd6 31.Qf6# .]

27.Rg5+ Kf8 28.Rf5!

[Since Since John Emms: 'White mates after' 28.Rf5! Kg8 *(* or *28...Re7 29.Qh8#; 28...Re1+ 29.Kh2 Ke8 30.Qxf7+ Kd8 31.Rd5+ Kc8 32.Qf8+* . −−− Plan B can be just as dangerous as Plan A! *)* 29.Qxf7+ Kh8 30.Qf6+ Kg8 31.Rg5# is mate. −−− SUMMARY: If Black goes for ...d7−d5, don't be afraid to give up the centre with e4xd5, since the e5−pawn is tender in many lines.]

□ **Nunn,J..**
■ **Parker,J..**
4NCL, England 2000 2000
[Paul Motwani]

G12.19: "This game's fun for Nunn darker for Parker!" J.Nunn−J.Parker, Four Nations Chess League, England 2000. Transposition to Italian Game with 4 d3, Code C54. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5** The same position was reached via a different move−order in game G12.18. **5.c3**
[5.Bb3 featured in game G12.2.]
5...d6
[In game G12.18, Black gave his c5−

bishop a cosy retreat at a7 by playing 5...a6]

6.0−0

[6.d4? exd4 7.cxd4 Bb4+ gives Black a favourable version of a well−known line (namely 1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 c3 Nf6 5 d4 exd4 6 cxd4 Bb4+) since he has the extra move ...d7−d6 for "free".]

6...0−0 7.Nbd2 a6 This not only makes possible ...Ba7 if required, but also the idea of ...Na5 must be considered a threat to White because in that case he can no longer preserve his light−squared bishop with the previously−available manoeuvre Bb5−a4−c2. **8.Bb3 Ba7 9.Nc4 Be6 10.Bg5 h6 11.Bh4 g5 12.Bg3**

[The sacrifice 12.Nxg5? is easily refuted by hxg5 13.Bxg5 Kg7 14.Qf3 Kg6 intending 15.Qg3 *(* or *15.h4 Bg4!? 16.Bxf6 Qd7!)* 15...Nh5!]

12...Ne7 13.Re1 Nh5?

[13...Ng6 is better]

14.Nxg5! Nxg3 15.Nxe6 fxe6 Has White overlooked the fact that he's still a piece down and 16...Bxf2+ is threatened? **16.Ne3!** There's the answer: Nunn has missed none of those details! He's seen further and realised that Black's g3−knight cannot escape. **16...Nxe4 17.Bxe6+ Kh8 18.dxe4** After the flurry of tactics, White has now emerged with a sound extra pawn. He gives one back soon at move 21, but calculates correctly that three moves on from there he'll go one ahead once again. **18...Rf6 19.Bh3 Qf8 20.Qd2 Rf4 21.g3! Rxe4 22.Bg2 Bxe3 23.fxe3 Rg4 24.Bxb7 Ra7** Not a happy place for the rook, but Black has no choice since he cannot allow 25 Bxa6. **25.Rf1 Qg8 26.Bg2 Rg6 27.Rf2 c6 28.Raf1** Simple yet devastating chess. **28...Ra8**

[If 28...Qxa2 then 29.Rf8+ wins because of: a) Ng8 *(* b) *29...Rg8 30.Qxd6;* c) *29...Kh7 30.Be4* (one of numerous easy paths to victory)*;* d) *29...Kg7 30.Qf2* threatening 31 Qf7+ Qxf7 32 R1xf7. *)* 30.Bxc6]

29.Rf7 Nd5 30.c4 Nunn again chooses a very simple but crushing option. **30...Nf4 31.Bxc6 Rb8 32.Bd5 Rxg3+** In a hopeless position, Black just tries for a final trick before resigning. **33.hxg3 Qxg3+ 34.Bg2**

[Of course not 34.Kh1?? Qh3+ intending 35.Qh2 *(* or *35.Kg1 Rg8+ 36.Kf2 Qg3#)* 35...Qxf1+]

34...Nh3+ 35.Kh1 That's the end of Black's tricks, and he's still a whole rook down. So...

1−0

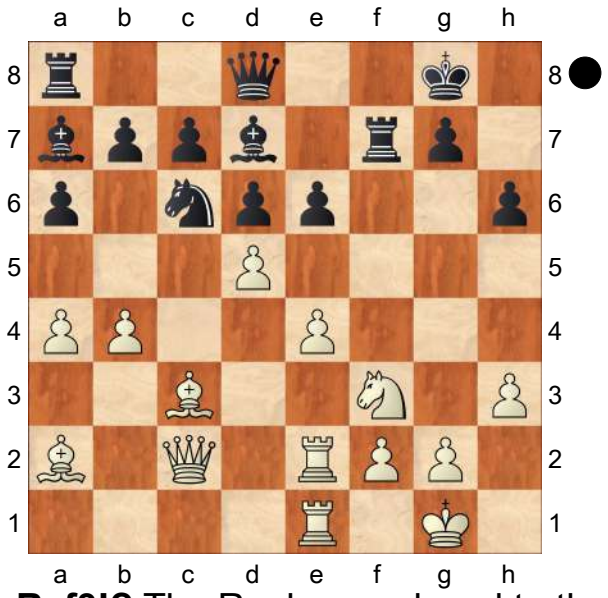
□ **Paris,Chess Club**
■ **London,Westminster CC**
Paris−Westminster match 1834−6 (2)
[Walker/ FS 92:84/ Harding]

See Pagni volume 1 page 27 and the pamphlet by Walker which I got scanned at the British Library. Actually, we have seen it said that Paris (nominally) played the black pieces but moved first and so we have converted this to the normal convention that the player who moves first is White. Walker just identifies the players as "Westminster" and "Paris" not mentioning colours. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 d6 5.d4 exd4 6.cxd4 Bb6 7.h3**
TH: Jaenisch discussed this in his book and Walker commented on it (pp 188−9) saying that the move was first viewed as weak, then praised when Paris won the game, but later the correct method for Black was found. **7...Nf6 8.Nc3 0−0 9.0−0 Re8?** No note in Walker's booklet here, but in his Jaenisch translation, he says the line Jaenisch recommended was well known in London long before the book appeared.
[9...Nxe4 10.Bxf7+ *(10.Nxe4 d5 11.Bxd5 Qxd5 12.Nc3 Qd8 13.Be3 Bf5* 'your isolated pawn gives him advantage of position' − Jaenisch *)* 10...Rxf7 11.Nxe4 Bf5 12.Re1 *(12.Neg5? Rf6)* 12...Qd7 13.Ng3 h6 14.Be3 *(14.d5 Ne5)* 14...Re8 'he comes off with the better disposed game' − Jaenisch]
10.a3 h6
[10...Nxe4? 11.Nxe4 Rxe4 12.Bxf7+]
11.Re1 a6 12.b4 Re7 13.Ra2 Walker first note here: 'The mode in which Paris manages to bring this Rook round to the centre is highly worthy of notice and imitation. Up to this point the game appears tolerably equal, though Westminster is already much crowded.' **13...Ba7 14.Rae2 Nh7 15.Nd5 Re8 16.Nf4 Nf8 17.Qb3 Ne6** The position for Westminster, during many of the moves, is one of intense difficulty, and it does appear that better play could have been substituted for the line of proceedings actually adopted. **18.Nxe6 fxe6 19.Bb2 Nb8** This moves cramps the game horribly, but is essential to prevent the ill consequences which would otherwise arise from the advance of QP. **20.a4 Bd7 21.Qc2 Re7 22.Ba2 Nc6 23.Bc3 Rf7?!**
[RR23...Qe8]
24.d5 Diagram



24...Rxf3!? The Rook was played to the Bishop's second, on purpose to take the Knt. at this move. Should France retake

Rook, Westminster would have a fair game by playing Queen to KR5, threatening at least a perpetual check. **25.dxe6!**
[RR25.gxf3 Qh4! good drawing chances]
25...Qh4 If they retreat QB, the Queen is lost by the advance of the Pawn discovering check. **26.exd7+ Kh8 27.Be6** If Paris capture Rook, the Queen would give a perpetual check, beginning at KKt sixth. **27...Qg3** It looks very pretty to have the Queen and Rook both "en prise," while they are both in perfect safety, and at the same time to threaten to take Bishop with Rook. When so many pieces, however, are committed, it is difficult to disengage them without loss, and it is a question whether doubling Rooks would not be sounder play than this move of Queen. **28.Ba1 Raf8** If Kt. take KtP, the Gallic Queen moves to Q. second, offering to take RP, and checkmate. **29.Bf5 Bb6**
[RR29...Nxb4 30.Qd2 Rxf2 31.Rxf2 Qxf2+ 32.Qxf2 Bxf2+ 33.Kxf2 Nc2 34.Rc1 Nxa1 35.Rxc7+− What was source of this note?]
30.Qd2 Rf4 31.Rc1 Qg5 32.Kh2 This is much better play than taking Rook. **32...Rxf2?**
[RR32...Bxf2±]
33.Qxg5+− hxg5 34.Rxf2 Bxf2 35.b5 axb5 36.axb5 Nd8 37.Rxc7 Kg8 38.Bg6 Bb6 39.Rc8 A few sources end here but more moves were played **39...Ne6 40.Be8 Nd8 41.Bb2** London resigned the match.
1−0

☐ **19) All the Games: 7...h6**

■ **12) Ernst Weinzettl vs. Andre,A**

Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 Nh6!? FM Andreas Druckenthaner is the highest rated player to adopt the 6...Qf6 Steinitz System, barring Hanham perhaps, and he chose to develop his King's Knight to the edge. We believe the move is based on a wrong premise − see below − and that this literally 'eccentric' Knight move can be reserved for future experiments. The normal (7... Nge7 $13 must be better. **8.Bd5**

[The usual objections apply to 8.d5?! in this position, and here Black can try the available Ne7 , although its usual spot on a5 seems like the better option. Now if 9.Bg5 Qg6 10.Bxe7 Kxe7∓ and Black is doing well enough.]

[In addition, after 8.Na3 the normal play 0−0 9.Nb5 b6 10.Re1 Bb7 11.Bd5± leaves Black missing his connected e7 Knight.]

8...0−0 9.Na3± Coincidence maybe, but somebody has been reading old chess books − compare the second [/variation/13760378/#/8/b] consultation game between Tschigorin and Steinitz, after the latter played his 8...Nh6 move. It's an echo of the present position, but with odd differences. According to notes by Steinitz, the 'improved' placement of the Knight to h6 means that if White pushes d4−d5, then the threatened c6 Knight can go to e7 instead of d8 as in the match, and presumably onward to g6 at some point. In the Stone−Ware Steinitz System, however, Black has better plans in case of the d4−d5 push. **9...exd4?!**

[The exchange 9...Bxa3 10.Bxa3 is less effective than in chapter 7 [/course/80564/7] analysis, e.g. Re8 11.Rb1 is a good play. Attempting to steal the e5 strong point by 11.Bxc6?! is wrong because 11...Qxc6 $15 hitting c3 is fine for Black. Now d6 12.Bc1 Nd8 An abject retreat, but the trick is to play it quickly and with great confidence! In any case, this line is probably Black's best hope. If 13.dxe5 dxe5 14.Bg5 Qd6 then 15.h3± is the top candidate, almost +0.40 for

White.]
10.cxd4 Bxa3 11.Bxa3 d6
By releasing the central tension ahead of this move Black has traded his strong point for nothing but trouble. **12.Rb1** White obviously has some advantage, but how to measure it? Is Black's position playable? **12...Qg6 13.Re1 Nd8?**
[The culprit. White intends to crash in by e4−e5 regardless, and 13...Re8 14.Qd2± for example is much in White's favor.]
[Black's only out seems to be 13...Bh3! and then 14.Nh4 Qf6 15.gxh3 Qxh4 16.Rxb7 follows, when we see the point of White playing Ra1−b1 so often in this opening. After Ne7 17.Bb3 Qxh3 18.Re3 Qc8± Black retains a pawn surplus but faces a game with two Knights vs. two Bishops. The White edge is right at +0.33, or one third of a pawn.]
14.e5 Be6 15.Be4 f5 16.Bxb7 Rb8?! He's making it worse. The game continues unevenly from here until the fine finish, but play is interesting throughout. The opening battle, however, is concluded. **17.d5?!**
[The second tier choice, when breaking in by 17.exd6 was available.]
17...Bf7 18.exd6
[Pushing 18.e6 is a matter of choice.]
18...cxd6 19.Ba6?!
[19.Bc6 is much better.]
19...Rxb1 20.Qxb1 Bxd5 21.Qd3± Be4?
[White has work to do after 21...Bxf3 22.Qxf3 Ndf7 23.Qb3 Kh8± , though he still claims a clear advantage − again, the two Bishops against two Knights.]
22.Qxd6 Qxd6 23.Bxd6 Rf6 24.Bc4+ Ndf7!? 25.Bb4?!
[White is winning again, but he should press harder with 25.Bf4 instead.]
25...Rb6 26.Rd1?!
[Threatening mate. The quiet 26.a3 however covers everything neatly.]
26...g5 27.Bc3 Kf8 28.Bb3!? Bxf3 29.gxf3 Rb7 Black has won a small but insufficient concession in pawn structure.
30.Rd5 Ke7 31.Bd4 Rd7?! 32.Bf6+! Winning the Exchange. The middlegame was more difficult than it needed to be, but now only mopping up remains.
32...Ke6 33.Rd4+ Kxf6 34.Rxd7 Ne5 35.Rxa7 White's a−pawn is the guarantor of victory. He can take damage on the Kingside if his eye is fixed on a new Queen! **35...Nxf3+ 36.Kg2 Nh4+ 37.Kf1 Ng4 38.h3 Nh2+ 39.Ke2** The King will find relief from checks on d1, while Black makes a desperate drive to Queen his own pawn.
39...h5 40.Ra6+ Ke5 41.Rh6 Ng2 42.a4 The end. **42...Nf4+ 43.Kd1 g4 44.hxg4 Nxg4 45.a5!** Nicely calculated. White's Bishop cuts off any route to the a−pawn **45...Nxh6 46.a6 h4 47.a7 h3 48.a8Q h2 49.Qh8+**
1−0

C51

□ **19) All the Games: 7...h6**
■ **4) Miguel Munoz vs. Ferran Ce,B**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 h6!? 8.Kh1!? Non−standard, if the term has meaning in this course. Often Black will

have an annoying check along the g1−a7 diagonal, but it might be too early to worry about that! For other tries see chapter 16 [/course/80564/16] and chapter 17 [/course/80564/17]. **8...Nge7 9.dxe5 Bxe5** Black recaptures this way to gain a tempo next move. **10.Nxe5 Nxe5 11.Bb3!?**

[Seeing no attack on the horizon 11.Be2 is the more favorable post.]

11...d6∞

[Reasonable, though we prefer 11...b6 12.Qe2 Bb7 and if 13.f4 N5g6∓ Black has a very likable position. After the move played the odds are equally divided.]

12.f4

[White could reserve f2−f4 and play 12.Na3 but then Be6 is good, and after 13.Nb5 0−0 we offer up the c−pawn. Otherwise: Going long is also interesting here. For example 13...O−O−O 14.Nxa7+ Kb8 $13 and Black begins to take the lead in development. Unclear. Now following 14.Nxc7 Bxb3 15.axb3 Rac8∞ we have a game full of unknown consequences.]

12...Ng4!? Adventurous, but carrying more risk than bringing it back to g6.

13.h3 Qh4 14.Kg1 h5?!

[Ah, that old trick. Black should have backed off 14...Nf6 and if 15.e5 then Ne4∞ with evenly divided prospects. We can add that White so far has made three King moves.]

15.Qf3!?

[Minding the center with 15.Qd3± is more profitable, and White gets a +0.60 reading from the chess chip. Clean and simple, but it's worth noting that]

[15.Nd2!?± is also viable. Black does best to invade Qg3 , sidestepping a little trap: The tempting 15...Ne3?! leads to 16.Qe1 when 16...Nxg2 is forced, but now 17.Kxg2 $16 is much better for White − his King is in no danger. After Black's mate threat there follows 16.Nf3 Nf6 17.Qe1 Qxe1 18.Rxe1± , giving White about 1/3 of a pawn, duly logged into Circuit Head's permanent ledger − a notion which sends X_Master to the neighborhood pub.]

15...Nh6?!

[No, the Knight should stay at its post, willing to make the ultimate sacrifice. Play instead 15...Bd7 16.Bd2 0−0−0 and finish development. Then 17.Be1 Qf6 is critical and uncertain − White can capture the brave steed or go 18.Nd2 d5∞ , not clear at all in either case.]

16.Na3± Bd7 17.Be3 Bg4?!

[This time the passive sacrifice will be accepted, but 17...Ng6 18.Nc4± is depressing as well.]

18.hxg4 hxg4 19.g3! Excellent − White is winning now. **19...Qf6?** Black is making it worse; he had to go through with the Queen trade. **20.Qf2 Qg6 21.Qg2 0−0−0 22.Rab1!? Rh7?!** There will be no Kingside attack. **23.Bc2 Rdh8 24.f5?**

[Weakening a central dark square, when instead 24.Rxb7! looks decisive.]

24...Qh5 25.Kf2 The King migrates to a safe square, and also threatens to win the opposing Queen. **25...Nhg8 26.Nc4?!**

[Still winning, perhaps, but the way of the warrior is 26.f6! Nxf6 27.e5!

clearing away the center pawns. After Qxe5 28.Bd4 Black will lose material.]

26...f6 27.Ke1 Qe8 28.Bg1 Nc6 29.Kd2 Safe in the middle of the board, White can turn his attention to the enemy King. **29...Ne5 30.Nxe5 Qxe5?!**

[30...fxe5 is better, but Black is in a tough spot.]

31.Qf2?! b6 32.Qf4 Qa5 33.a4 a6?! Seriously undermining his b−pawn.

34.Bb3 Ne7?! 35.Be6+

[35.Bxb6 feels crunchy. Some sort of sacrifice on b6 looms large.]

35...Kb7 36.Rb4?

[Again 36.Rxb6+ would wrap up matters quickly, but Black's game is beyond hope in any case.]

36...Rd8 37.Rfb1 d5 38.Bxb6 At last. The Black King will be dragged into the public square to watch his Queen taken away. **38...cxb6 39.Rxb6+ Qxb6 40.Rxb6+ Kxb6 41.exd5 Rh2+** Black gets a few spite checks, but that's all. **42.Kc1 Rh1+ 43.Kc2 Rh2+ 44.Kb3 a5** Now begins the mopping up operation. **45.Qd4+ Kb7 46.d6 Nc6 47.Qc5 Rb8 48.Ka3** White has prepared one last shelter for his King. **48...Rh1 49.Qb5+ Ka7 50.Qxc6 Ra1+** Forlorn. **51.Ba2 g5 52.fxg6 f5 53.g7 f4 54.Qc7+** Next White will take the Rook.

[Steinitz]

1.e4 Myers Euwe Steinitz **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3**

[4.b4 We should mention that the Evans Gambit was a very popular opening at this time.]

4...Nf6 5.d4

[5.d3 leads to the Italian Game.]

5...exd4 6.e5

[6.cxd4 Bb4+ 7.Bd2 Bxd2+ 8.Nbxd2 d5 ! 9.exd5 Nxd5 10.Qb3 Nce7 Black controls the d5 square. The position is equal.]

6...d5 7.Bb5 Ne4 8.cxd4 Be7 Steinitz: A good deal of surprise prevailed when I, as my debut in this game, selected a Giuoco Piano. Not only because I heretofore have never been known to adopt this opening, but moreover, because I chose a most universal form, which practically has been given up by the masters. The new idea which I had in view did not come to the surface, as Lasker was the first to make an alteration from the usual line of play by 8...♗e7.

[8...Bb6 That move is more popular probably because of the fact that the bishop on b6 is placed more actively.]

9.Nc3 0−0 10.Bd3 f5?!

[10...Bf5]

11.exf6 Steinitz: My eleventh move proved a surprise, as I exchanged an apparently strong passed pawn, and furthermore, deliberately isolated my d−pawn in order to keep up an attack against the Kingside.

[11.0−0!? Be6 12.Ne2 Nb4 13.Nf4 Qd7 *(13...Bd7? 14.Be2±)* 14.Be2 c5 15.Be3 c4 16.a3 Na6 17.Qc2± Myers]

☐ **19) All the Games: 7...h6**
■ **7) Wolfgang Thormann vs. Lasz,P**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 h6!? 8.Na3 a6?! This position is covered in lesson 13 [/variation/13988490] of chapter 17. We are reminded of a military enveloping maneuver, as if Black intends to enfold the enemy from the wings. On the other hand, X_Master thinks he's just wasting time. **9.Nc2 Nge7 10.Ne3** This move always bears watching. White has a threat, but not the Queen trap we've seen elsewhere.
10...Ng6!?
[Suppose Black does something normal, say 10...0−0 , White then has a little combination designed to steal Black's strong point, his e−pawn. White pushes 11.d5 with a forced sequence in mind. An entirely different scheme begins 11.Ng4 immediately. After 11...Qg6 12.Nh4 Qh7 13.Bxh6 We've seen this attack in different settings many times in the training lessons. Black's best is 13... Ba3 and then 14.Bg5 d6 15.Rb1 is a +0.30 credit for White. The strong point steal continues Na5 12.Ng4 Qg6 13.Nfxe5! Bxe5 14.Nxe5 Qf6 15.Ng4! Qxc3 16.Bd3 d6 That Rook in the corner is bait of course, but does the text move stabilize Black's position? 17.Nxh6+! gxh6 18.Bxh6 Qf6 19.Bxf8 Kxf8 20.Qd2 White has a Rook and pawn for two Knights, but Black has difficulty getting organized. Next b6 21.Rac1 c5 22.Rb1± again yields +0.30 for White.]
11.a4± A useful gain of space, constricting Black's Queenside. White's edge here comes to +0.50 in tech talk; fair enough considering his opponent's 'time out' on moves seven and eight.
11...Qd8?!
[Not forced. It's better to castle 11...0−0 and if 12.Nf5 then Nge7 13.Nxd6 Qxd6∞ offers equal scope for creative play. Oddly enough, if both a−pawns were unmoved we transpose to a position from lesson 5 [/variation/13988476/#/10/b] in chapter 17.]
12.Nf5± Bf8 13.h4 Better to push on the other wing pawn. **13...d6!? 14.Qb3** Now White has a firm grip on the position, likely winning. **14...Qd7 15.a5 f6?! 16.h5** Definitely winning. **16...Nge7 17.Bf7+ Kd8 18.N3h4?!**

[White should fade back to 18.Ng3 and wait, because Black cannot move without weakening himself.]

18...exd4!? 19.cxd4 Nxf5 20.Nxf5 Ne7 Black is remarkably cramped.

21.Ne3 Qb5 22.Qa2 Nc6 23.Rd1 Be7?! 24.f4?

[An easily won position follows 24.Rb1 Qxa5 25.Qc4]

24...Rf8 25.Bg6 Bd7 26.d5 Nxa5?

[Black's game isn't desperate enough for this measure, and 26...Na7 offers a stouter defense.]

27.Qxa5 Qxa5 28.Rxa5 Black's pair of connected passed pawns would, in many positions, be compensation enough for his missing piece. But not in this position − he can barely move at all.

28...Be8 29.Nf5 Rg8 This g−pawn is a terminal weakness. **30.Be3 b6 31.Ra2 Bxg6 32.hxg6 Kd7** Waiting to see how White will break through his lines. Alright then, he'll double Rooks on the c−file and get that monster Knight a bit closer to the action. All the while White's Bishop looks for his signal to join the rout. **33.Rc1 Bd8 34.Rc6 a5** Nothing better, but a fresh point of entry is opened. **35.Kf2 Ra7 36.Kf3 Be7 37.Nd4 Rc8 38.Rac2 Rg8**

[The pressure is too much; even if 38...Rb7 he faces 39.Ne6 losing his g−pawn in view of Bd8 40.Bxb6! and Black collapses.]

31431 St Petersburg 2009

[John Emms]

Now we consider three games in which Black chooses to delay, or completely dispense with, the ...d6−d5 advance. In this first game, White goes all out for an attack − and succeeds! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.h3 d6 8.Nbd2 0−0**

[If Black plays 8...Be6 (a move earlier than in our main game), White has the possibility of 9.Ng5!? . −− *(* If Black has already castled this move makes little sense. But here *9...Bxb3 10.Qxb3 0−0 11.Qxb7* wins a pawn, as indicated by Ivanchuk, even though Black is not completely devoid of compensation.*;* Instead, the imbalances caused by *9...Qd7 10.Nxe6 fxe6* are not easy to assess. I'm still not 100% certain which side has been favoured more by the exchange on e6. However, White's play in R.Slobodjan−Z.Gyimesi, German League 1997, is certainly worth noting, especially the way he slowly shuts the a7−bishop out of the game: *11.Nf3 0−0 12.0−0 Rae8 13.Kh2 Ne7 14.Nh4 h6 15.g3! g5 16.Ng2 Ng6 17.f4! gxf4 18.gxf4 exf4 19.Nxf4 Nxf4 20.Bxf4 Kh7 21.Qe2 Qf7 22.d4! Qh5 23.Qxh5 Nxh5 24.Be3 Rf6 25.Rxf6 Nxf6 26.Rf1 Rf8 27.Kg2 Rg8+ 28.Kf3 d5 29.exd5 exd5 30.Bc2+ Kg7 31.Bf5 b6 32.Bf4 c6 33.Re1 Re8 34.Rg1+* and Black resigned. *)*]

9.Nf1 Be6 The ...d6 and ...Be6 idea is seen in many lines of the Italian Game. It's a solid option for Black and is favoured by many strong players. In this particular position, for example, both Carlsen and Aronian have played 9... Be6.

[Black sometimes prefaces ...Be6 with 9...h6 , perhaps to avoid the possibility of 9...Be6 10 Bg5 (see below).

A) . Here 10.Ng3 Be6 would transpose to the main game;
B) , but White has another option in 10.g4!? . As we've already seen, this aggressive lunge is often a promising way to respond to ...h6. Here's a young Viktor Bologan demonstrating White's attacking potential and making it all look very easy: Nh7 *(10...d5 11.Qe2* transposes to the note on 10...h6 in Tiviakov−Buhmann *)* 11.Ng3 Be6 12.Rg1 d5 13.Qe2 Re8 *(13...dxe4 14.dxe4 Bxb3 15.axb3 Qd7* followed by ...Qe6 or ...Rad8 might be stronger *)* 14.exd5!? Bxd5 15.Ne4 Bxb3 16.axb3 (I prefer White here) f6 17.h4 Kh8 18.Be3 Bxe3 19.Qxe3 Qd5 20.0−0−0! Qxb3 21.g5 f5 22.Nc5 Qb6? *(22...Qd5* offers a better chance; now the queen is hopelessly out of play *)* 23.gxh6 Rad8 24.Rxg7 e4 25.Ng5 Nxg5 26.Qxg5 Ne5 27.Rh7+! and 1−0, V.Bologan−G. Prakash, Mamaia 1991.;
C) 10.−−]

10.Ng3

[10.Bxe6?! fxe6 needs to be avoided, here and in many similar positions after ...Be6, for obvious reasons. White shouldn't present Black with an open f−file and extra control of centre squares unless there is a good reason to do so. One good reason is if White can trade his f3−knight instead of his light−squared bishop. Black still gets an open file and some central control, but this time White gains the bishop pair and Black loses some influence over the light squares.]

[10.Bg5 is rare in this position, but part of me is tempted by it. This move is a standard way of trying to exploit Black's lack of ...h6. However, compared to the similar position reached in Emms−Flear, it might not be so effective, since h2−h3 isn't such a vital move here. Even so, I think it deserves attention. It certainly worked out well for White in A.Purtov−R. Farakhov, Alushta 2004:
A) 10...h6 11.Bh4 g5 12.Bg3 *(*I don't trust *12.Nxg5 hxg5 13.Bxg5* , if nothing else because of *Bxf2+!)* 12...Nh5 is unclear;
B) 10...Qe7 (preparing ...Bxb3 followed by Qe6) 11.Bc2 *(11.Ne3!?)* 11...h6 12.Bh4 d5 *(12...g5!?)* 13.Qe2 dxe4 14.dxe4 Qc5!? 15.Bxf6 gxf6 *(15...Bc4 16.Qd2 gxf6 17.Ne3 Rfd8 18.Qc1* is a critical line − I think I prefer White here *)* 16.Ne3 Rfd8 17.Bb3 Na5? (a blunder, although by now White's advantage cannot be disputed) 18.Bxe6 fxe6 19.Nh4! . This wins a vital pawn: Qe7 20.Qg4+ Qg7 21.Qxe6+ Qf7 22.Qg4+ Qg7? 23.Nhf5 and Black resigned.]
[Finally, 10.Bc2 is also possible. For example, if d5 11.Qe2 we have transposed to Tiviakov−Buhmann.]

10...h6 The most popular choice. Black decides to prevent the possibility of Bg5, and this makes it easier for him to play ...d5 if needed (see the note to Black's 11th move, below).

[The immediate 10...d5 is risky because it invites the pin with 11.Bg5!? . Here *(11.Qe2*

is, of course, also possible *)* 11...dxe4 12.Nxe4 Bxb3 13.axb3 appears to be precarious for Black, and it would be without the resource Nxe4! 14.Bxd8 Nxf2 , as played in F.Nemeth−I. Danilov, Eforie Nord 2008. Even so, White kept an edge in the game after 15.Qc2 Raxd8 16.0−0 Ng4+ 17.Kh1 Ne3 18.Qe2 Nxf1 19.Rxf1 .]

[There's a strong case for Black to exchange bishops immediately, and perhaps significantly 10...Bxb3 is what both Carlsen and Aronian have chosen to do when reaching this position:

A) . After 11.axb3 Ne7 12.Nh4 Kh8 13.0−0 d5 14.Qe2 Qd6 15.Bg5 Qe6 16.b4 h6 17.Be3 Bxe3 18.Qxe3 Rad8 19.Ngf5 Nxf5 20.Nxf5 Rd7 21.Rfe1 dxe4 22.dxe4 Kh7 *(22...Rfd8 23.Qg3 Ne8* also looks okay *)* 23.Ra5 b6!? 24.Rxa6 Rfd8 25.Qf3 g6 26.Ne3 Kg7 Black had sufficient play for the pawn to hold the balance in I. Nepomniachtchi−L.Aronian, Mainz (rapid) 2009.;

B) . However, 11.Qxb3 Qc8 *(11...Rb8!?)* 12.0−0 Ne7 13.d4 Ng6 14.Bg5 Nd7 15.Nf5 gave Black more problems to solve in K.Kulaots−M.Carlsen, Gausdal 2007.;

C) 11.−−]

11.Nh2! Operations on the kingside begin! This knight can hop into g4, offering a trade of minor pieces. Black has to be careful because an exchange on g4 gives White the opportunity to open the h−file for his rook. One significant advantage White enjoys is that, in contrast to several positions where the queen has to go to e2 and only later f3, here she can reach the more desirable attacking post in one jump.

[Note that this is one of those positions where 11.Nh4? is impossible − it simply loses a pawn to the typical tactic Nxe4! .]

11...Ne7 Black responds by moving another minor piece to the kingside, to help out in defence. Just like White's Nd2−f1−g3, Black's ...Nc6−e7−g6 is a typical manoeuvre in the Italian Game.

[Action in the centre with 11...d5 is still a serious option here. White replies with 12.Qf3 and now:

A) 12...Na5 13.Bc2 dxe4 14.dxe4 Nc4 15.Ng4 Nd7 16.0−0 *(16.Nf5!?)* 16...Qh4 17.Nf5 Bxf5 18.exf5 Nd6 19.f6! Nxf6 20.Nxf6+!? *(20.Nxe5)* 20...gxf6 21.Kh2 f5 22.g3 Qf6 23.Qh5 Kg7 24.g4 f4? *(* Black should play *24...e4 25.Bf4* , when White has promising compensation for the pawn *)* 25.g5! Qe6 *(25...hxg5 26.Qh7#)* 26.Bxf4! with a big advantage for White in view of exf4 27.Rae1 , A.Morozevich−M.Adams, Yerevan 2008.;

B) 12...dxe4 is more solid: 13.dxe4 Bxb3 14.axb3 Nh7 15.h4 *(* perhaps White can apply more pressure with *15.Ng4 Ng5 16.Qf5)* 15...Qd7! *(* Black loses quickly after *15...Qxh4? 16.Ng4 Qd8 17.Nf5* − a nasty accident is going to happen on h6 or g7, or both! *)* 16.Ng4 Rad8 17.0−0 Qd3! , V.Tkachiev−G.Flear, Clichy 1995. This defensive resource with ...Qd3, offering the exchange of queens, is

well worth remembering, and Black is very close to equality here. I think White's best chance is 18.Be3 Bxe3 19.Nxe3 when the possibilities of Nf5 and Nd5 still give Black something to think about.;

C) 12...−−]

12.Ng4 Ng6

[The Brazilian grandmaster Vescovi has played 12...Nh7 here, but in a later game he preferred the text move (see below). I wonder whether this is because of 13.Nh5!? . For example, *(13.Qf3 Qc8 14.Ne3 Bxe3! 15.Bxe3 Bxb3 16.axb3 f5* was okay for Black in V.Iordachescu−G.Vescovi, Bermuda 2004 *)*

A) or 13...Bxb3 14.Qxb3! with pressure, and if *(*White must avoid *14.axb3 f5!)* 14...Kh8 , White could consider 15.Nxg7!? Kxg7 16.Bxh6+ Kh8 and now 17.Bxf8 *(*or *17.0−0−0!?)*;

B) 13...Qd7? 14.Bxh6! Bxg4 *(*if *14...gxh6* , White plays *15.Ngf6+)* 15.hxg4 gxh6 16.Qd2 Qxg4 17.Qxh6 Qg6 18.Nf6+! .]

13.Nf5 Nh7

[The game J.Cubas−G.Vescovi, Sao Paulo 2006, provides another example illustrating the problems Black can face here: 13...Re8 14.Qf3 h5 15.Nxf6+ Qxf6 16.g4! *(16.Qxh5 Bxf5 17.Qxf5 Qxf5 18.exf5 Nf4* is okay for Black *)* 16...Bxb3 17.axb3 Nh4 18.Qg3 Nxf5 19.gxf5 d5 20.Rg1 Bc5? (this should lose, but with Bg5 on the cards Black was already under some pressure) 21.Bg5 Qb6 *(*or *21...Qc6 22.Be7!)* 22.Be3! (preventing ...Bf8!) g6 23.fxg6 f6 24.Bxc5 Qxc5 25.Qh4 dxe4 26.Qxh5 Re7 , and here White could have forced an immediate win with 27.Rg4 intending Rh4.]

[The risky attempt to win a pawn with 13...Bxf5 14.exf5 Nh4 backfires after 15.g3 Nxf5 16.Qf3 Nxg4 17.hxg4 Ne7 18.g5! etc.]

14.h4! White is slowly beginning to turn the screw.

[14.Bxe6 fxe6 15.Nxg7 is tempting, but Kxg7 16.Bxh6+ Kh8 17.Bxf8 Qxf8 looks unclear to me and lets Black off the hook to some extent.]

14...Qd7

[Against 14...h5 I prefer 15.Nh2 so that after *(*to *15.Nge3* , *)* 15...Nf6 White can set up an annoying pin by playing 16.Bg5 .]

15.h5 White's attack seems to be building up steam, but surely it's not yet hopeless for Black? **15...Ne7?** It is now!

[It looks like Black's only chance lies with 15...Bxf5 16.exf5 Nf4! . Perhaps Klimov was worried about the knight being trapped with *(16...Ne7* is strongly met by *17.f6!)* 17.g3 , but Black can save himself here with Qc6! , even though White must still be better after 18.Rf1 Nh3 19.Qe2 N3g5 20.Bxg5 Nxg5 21.0−0−0 . In any case, this is infinitely superior for Black compared to what happens in the game.]

16.Ngxh6+! Kh8

[Of course! Somehow Black had missed that 16...gxh6 is met by the crushing 17.Qg4+ . Unfortunately for Black, declining the knight is no help at all.]

17.Qg4 g6 18.Bxe6

[18.Nxf7+ Rxf7 19.hxg6

is even more decisive: Nxg6 20.Qxg6 Bxb3 21.axb3 Rg8 22.Rxh7+! Rxh7 23.Qf6+ Rgg7 24.Bh6 etc.]

18...Qxe6 19.Nxe7 Qxe7 20.hxg6 fxg6 21.f3 White is just going to play Bd2 and 0−0−0, with a good extra pawn and a decisive advantage. −−− Black seemed to put up very little resistance in this game, and you would be forgiven for thinking this was the work of an inexperienced player. Yet Sergey Klimov is a grandmaster, rated over 2500. It just goes to show that it's not that easy for players, even very strong ones, to deal with the pressure of having to defend against White's obvious attacking intentions on the kingside.

1−0

C54

□ **S.Tiviakov**
■ **R.Buhmann**
an der Weinstrasse 2009
[John Emms]

Sergei Tiviakov is one of the Italian Game's greatest advocates. He's always coming up with new and interesting ideas, and it's no coincidence that his games are featured more than anyone else's in this book.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d6 8.Nbd2 0−0 9.Nf1 d5 10.Qe2 Be6 This is a good move. Black increases the tension by introducing the possibility of a bishop exchange after a trade on e4. White can react either solidly or aggressively.

[If 10...h6 , White can continue with **A)** but 11.g4!? is an attractive alternative, especially now that Black has given White's attack a 'hook' with ...h6. The game V. Komliakov−I.Yagupov, Russia 1995, demonstrates some of White's attacking possibilities: dxe4 12.dxe4 Nd7 (the typical reaction to g2−g4 - Black's knight heads for e6) 13.Ng3 *(* I quite like *13.Ne3!? Nc5 14.Bc2* , when the knight can also go to d5 - compare Gonzalez−Gomez *)* 13...Nc5 14.Bc2 Ne6 15.Nf5 Re8 16.h4 Nf4 17.Bxf4 exf4 18.Rd1 Qf6 19.g5 hxg5 20.hxg5 Qg6 21.N5h4 Qh5 22.Qd2 Bc5 23.g6 Bd6 24.gxf7+!? *(* Rybka prefers the paradoxical *24.Qd5!* , because even after an exchange of queens White keeps an initiative: *Qxd5 25.Rxd5 Be6 26.Rh5* etc *)* 24...Kxf7 25.Rg1 Bg4 26.Bb3+ Kf6 27.Rxg4!? Qxg4 28.Qd5 Ne5 29.Nxe5 Rxe5?? *(* after *29...Bxe5* there's nothing obvious for White; now the attack is decisive *)* 30.Qf7+ Kg5 31.Kd2! Kh6 32.Rh1 Qh5 33.Nf5+ Rxf5 34.exf5 and Black resigned.;

B) 11.Ng3 ,]

[10...Re8 is more solid.

A) Black doesn't fear 11.Bg5 because he plans to meet it with dxe4 12.dxe4 Be6 , followed typically by an exchange of bishops on b3 and the queen working her way to e6. For example, 13.Rd1 *(* I haven't found any games with *13.Bc2!?* , but this looks like the sort of move Tiviakov might choose *)* 13...Qe7 14.Ne3 Bxe3 15.Qxe3 Bxb3 16.axb3 Qe6 17.Bxf6 Qxf6 18.0−0 Qe6 19.Rd5

f6 with a level position, V. Iordachescu−Z.Gyimesi, Romania 2004.;

B) If 10...Re8 is met by 11.Ng3 , Black can play h6 safe in the knowledge that White no longer has aggressive g2−g4 ideas at his disposal. Even so, there are some interesting possibilities here:

B1) 12.0−0 Be6 13.Rd1 (otherwise Black might play ... Na5, ...dxe4 and ...Bc4) Qe7 14.Nh4 dxe4 15.Nhf5 Qf8 16.dxe4 Bxb3 17.axb3 Ne7 18.Qf3 (threatening Nxh6+) Nxf5 19.Nxf5 Re6 (K.Landa−M. Adams, Enschede 2006) and here 20.b4 introduces the possibility of b5 at some point. White's position is the more comfortable, even if Black might be able to equalize with accurate play.;

B2) White can also begin kingside action with 12.Nh2!? . This move offers more chances for both sides to unbalance the position. For example, Be6 13.Ng4 dxe4 14.dxe4 Bxb3 15.axb3 Re6!? *(15...Nd7?* allows *16.Bxh6! gxh6 17.Nxh6+ Kf8 18.Qg4* - Kobalija - which is very good for White *)* 16.Bd2 Ne7 17.0−0−0!? Qe8 (M.Kobalija−M.Sorokin, Russian Championship 2005) and here Kobalija gives 18.Nf5!? Rd8 19.Be3 Bxe3+ 20.Qxe3 with an unclear and roughly level position.;

B3) After 12.Nh4 White has to watch out for ...Nxe4 tricks. For example, Na5 13.Bc2 Nxe4!? 14.dxe4 Qxh4 15.exd5 Nc4 .;

B4) 12.−−;

C) 11.−−]

Let's return to 10...Be6. What should White play? **11.Bc2!?** Here's that 'mysterious' bishop move again!

[11.Ng3 has been White's most popular choice in practice. With accurate play Black has very good chances of reaching a level position, but this move might still appeal to those who prefer more simplified positions. Play normally continues dxe4 *(*there's also *11...Na5!? 12.Bc2 dxe4 13.dxe4 Bc4! 14.Qd2 Qxd2+ 15.Nxd2 Be6 16.Nf3 Nd7* , as in E.Vorobiov−V.Diu, Krasnodar 2002; this looks fairly level and I'm surprised we haven't seen it more often *)* 12.dxe4 Bxb3 13.axb3 and now:

A) 13...Qd7 14.0−0 Qe6 15.b4 h6 and here the plan of 16.Nh4 intending Nf5 forces Black to defend with some accuracy: Kh7! 17.Nhf5 Ne7 18.Be3 *(*perhaps *18.Nxe7 Qxe7 19.Nf5 Qe6 20.Qf3)* 18...Nxe4!? *(18...Bxe3* looks wiser, and equal *)* 19.Qg4 g6 20.Qxe4 Nxf5?! *(*better is *20...gxf5! 21.Qxb7 Bxe3 22.fxe3 c6* with g−file counterplay *)* 21.Nxf5 Qxf5 22.Qxb7 Bxe3 23.fxe3 Qd3 24.Qxc7 Qxe3+ 25.Kh2 Kg8 26.Rf6 with some advantage for White, L.McShane−Z.Gyimesi, German League 2006.;

B) 13...Ne8! again reroutes the knight to d6, a more favourable square. This seems to be a reliable option for Black:

B1) 14.Nf5 Nd6 15.0−0 *(15.g4* is aggressive, but after *Qf6 16.h4 Qe6 17.b4 f6! 18.h5 Rad8 19.N3h4 Rd7* , V.Bologan−V.Malakhov, Kemer 2007, it's not clear what White does next *)* 15...Ne7 16.Nxd6 Qxd6 17.Rd1 Qe6 18.Qc4 Qxc4 19.bxc4 Rad8 with equality, V.Bologan−V. Georgiev, Wijk aan Zee 2007.;

B2) 14.Nd2!? Nd6 15.Nc4 Nxc4 16.bxc4 Ne7 17.0−0 Qd6 18.b3 Rfd8 19.Ba3 Qf6 , again with a level position, L. McShane−J.Werle, London 2009.;

B3) 14.−−;

C) 13...−−]

[Against 11.Bg5 Black can employ a similar plan to reach a level position: dxe4 12.dxe4 Bxb3 13.axb3 Qd6 14.Ng3 Qe6 15.b4 Ne8 16.0−0 f6 , S.Movsesian−V.Topalov, Tripoli (rapid) 2004.]

[Finally, although in some positions White can contemplate meeting ...Be6 with Ng5, I don't think this is one of them. There are various pros and cons to weigh up about an exchange of knight for bishop on e6, but here the debate might even be redundant, due to tactical reasons: 11.Ng5 dxe4!? *(11...Qe7 12.Nxe6 fxe6* is solid *)* 12.Bxe6 *(* or *12.Nxe6 exd3 13.Nxd8 dxe2)* 12...exd3 13.Nxf7 Rxf7 *(13...Qe7 14.Ng5+ Qxe6 15.Nxe6 dxe2 16.Kxe2 Rf7* is equal *)* 14.Bxf7+ Kxf7 with good compensation for the exchange.]

11...dxe4

[11...d4 must be a consideration here.]

[There's also 11...b5!? with the intention of playing ...Bc4 - after exchanging pawns - to force a queen exchange: 12.Ng3 *(* White could try *12.Ng5* , the idea being that after *Qe7 13.Ng3* the queen now has space on f3: *dxe4 14.dxe4 Bc4 15.Nf5 Qd7 16.Qf3* etc *)* 12...dxe4 13.dxe4 Bc4 14.Qd2 , as in A.Maier−A.Stoer, Augsburg 2003.]

12.dxe4 Nh5 We've already seen this idea in a similar position (Gonzalez Vidal−Gomez), and White's response is the same.

[12...Qe7 13.Ng3 would transpose to Tiviakov−Sargissian.]

13.g3 h6 This move certainly has its uses, but Black must always be a bit wary about playing it unprovoked.

[In D.Howell−M.Mchedlishvili, Dresden Olympiad 2008, Black instead chose 13...Nf6 . The young English grandmaster responded with the bold 14.Bg5!? h6 15.Bh4!? - bold, because it gives Black the opportunity to trap the bishop with ... g5. Having said that, it's possible that the execution is weaker than the threat, because g5 16.Nxg5 hxg5 17.Bxg5 Kg7 18.f4! left White with tremendous play for the piece. Indeed, after Qd6 19.f5! Bc8 20.Rd1 Qc5 21.Ne3 Rh8 22.Nd5 Nxd5 23.Rxd5 Qb6 24.Bb3 Kf8 25.h4 Rg8? , White could have reached a winning position with 26.Qh5! . Black doesn't have a decent defence to the threat against f7 after the d5−rook moves: for example, Ke8 27.Rd6!! Rf8 28.Bxf7+! Rxf7 29.Rf6 Qf2+ 30.Kd1 etc. It's very possible that Black

should avoid ...g5 at that moment and instead choose something like 15...Qe7 (or 14...Qe7 a move earlier) when the position remains doubled edged.]

14.Ne3

[White must avoid 14.Nxe5? Nxe5 15.Qxh5 Nd3+ 16.Bxd3 Qxd3 .]

14...b5 15.Nh4! Tiviakov carries on with the typical attacking plan on the kingside. **15...Nf6 16.Nhf5 Ne7**

[Black can try to change the character of the position by playing 16...Bxe3!? . Exchanging the a7−bishop for a knight on e3 is an underrated defensive resource in many lines. The bishop on a7 looks impressive, but when White goes for an all−out assault on the kingside there's a danger it might become an uncomfortable spectator. It's a fierce battle between the bishop and knight pairs after 17.Bxe3 *(* alternatively, if White is unwilling to alter the pawn structure, the slower *17.Nxe3* is possible, planning Kf1−g2 and/or g3−g4 followed by Nf5 *)* 17...Bxf5 18.exf5 Qd5 19.0−0 e4 20.f3!? .]

17.g4 It's still possible to castle kingside, but Tiviakov senses blood! **17...Ng6 18.Ng2!** Preventing ...Nf4 - sometimes you have to go one step backward before going two steps forward. Black is afflicted by a typical malaise. His pieces look well placed and there seems to be nothing much wrong with his position. In fact, objectively maybe there's isn't; it's just irritatingly difficult to come up with an effective plan. In the game, Buhmann begins to drift. Meanwhile, Tiviakov slowly edges forward on the kingside. **18...Nd7**

[18...Qd7 intending ...Rad8 looks stronger.]

19.h4 Nc5 20.Qf3 Re8 21.Bd2 c6 22.b3! White wants to castle queenside before going any further, so he blocks the attack on a2. This seems to invite ... a5, but Tiviakov has calculated that his attack will be the quicker. **22...a5 23.0−0−0 a4**

[This doesn't work, but after 23...Qc7 24.h5 White's attack is breaking through very quickly: Nf8 *(* or *24...Ne7 25.Nxh6+! gxh6 26.Bxh6 Bc8 27.Qf6 Ne6* , and now *28.Bf4!* is the move Rybka wants to win with! *)* 25.Nxg7! Kxg7 26.Bxh6+ Kxh6 27.Qf6+ Kh7 28.h6 and Qg7 mate.]

24.Bxh6 Qb6 25.Nxg7 axb3 26.Nxe8 bxa2

[Or 26...Rxe8 27.Qf6 .]

27.Nf6+ Kh8 28.Kd2!

[This is much stronger than 28.Kb2? b4! .]

28...Nf4

[Perhaps Buhmann had initially thought that 28 Kd2 was impossible because of 28...Rd8+ . Here 29.Nd5! is the only move, but it's a very effective one.]

29.Nxf4 exf4 30.Qxf4 Bc4 31.Ke1 Rd8 32.Ra1 Qa5 33.Nd5! A wonderful attacking display by Tiviakov, and a great advert for the Modern Variation. There's no doubt that this opening requires a certain amount of subtlety. But if you get it right, as Tiviakov does here, it can be very rewarding.

□ **Mihalik,J.**
■ **Schulz,B.**
GER corr 1930
[Mihalik]

1.e4 e5 2.Bc4 Nc6 3.Nf3 Bc5 4.c3 Bb6 5.d4 Qe7 6.0−0 Nf6 7.Re1 d6 8.h3 0−0 9.Bg5 h6 10.Bh4 Re8 11.Na3 exd4 12.cxd4 Qd8 13.Qb3!! Mit der Doppeldrohung auf f7 und gleichzeitig e5. Schwarz glaubt, alles verteidigen zu können, aber es folgt
13...Na5 14.Bxf7+! Kf8 15.Qc2 Kxf7 16.e5 g5 Erzwungen. Falls zuerst
[16...dxe5 so 17.dxe5 g5 18.Rad1!]
17.exf6 Rxe1+ 18.Rxe1 Qxf6 Auf
[18...gxh4 gewinnt 19.Qh7+ natürlich sofort.]
19.Nxg5+ Da nach
[19.Bg3 Schwarz durch Bf5 meine Pläne durchkreuzt hätte, entschloss ich mich, durch kühnes Opferspiel den Angriff kraftvoll fortzusetzen, wobei ich berechnete, dass ich mehr als ein Remis nicht riskiere. Das Doppelopfer ist daher keineswegs durchdringend.]
19...hxg5 20.Qh7+ Kf8 21.Bxg5! Qxg5 22.Qh8+ Kf7 Natürlich sind nach
[22...Qg8 23.Re8+ Kxe8 Turm und 2 leichte Offiziere kein Ersatz für die Dame, so lange ♖a8 und ♗c8 eingesperrt sind ...]
23.Qe8+ Kf6 24.h4! Ein für die Fortsetzung des Angriffs sehr wichtiger Zwischenzug. Weiss muss verhindern, dass Schwarz sich mittels ♗h3 entlastet.
24...Qg7 Offenbar das Beste. Schwarz darf die Dame von der g−Linie nicht entfernen, da dies die Entlastung nur erschwert und Weiss grössere Aktionsfähigkeit einräumt. **25.Qd8+ Kf5**
[25...Kg6 ist wegen 26.Qg5+ nebst ♖e7 ungünstig.]
26.Nc2 Nc4 Weiss benutzt die Gelegenheit (der Weg des ♗c8 nach h3 ist nicht frei) und entwickelt noch eine Streitkraft. (Schwarz findet die richtige Antwort, da z.B.
[26...Nc6 an 27.Ne3+ Ke4 *(27...Kg6!)* 28.Qe8+ Kxd4 29.Rd1+ Kc5 30.Rd5+ nebst Matt in einigen Zügen scheitert). Damit nimmt Weiss allerdings durch die eintretenden Komplikationen weiteres Risiko in Kauf, das zum Glück bei vorsichtigem Spiel und der offenen schwarzen Königsstellung noch immer keine Verlustgefahr bedeutet. Am besten hätte Schwarz vielleicht doch 26....♘c6 mit der Folge 27.♘e3+ ♔g6! geantwortet und es ist kein Gewinn für Weiss zu sehen. Der folgende Textzug aber war auch zum Remis genügend.]
27.Qe8 Kf6! 28.Qd8+ Es gibt nichts Besseres als diese Zugwiederholung.

28...Kf5 29.b3 Hiermit stellt Weiss eine Falle, in welche Schwarz mit **29...c6** richtig hineinfällt. Dagegen hätte
[29...c5 das remis gesichert. Die Folge wäre dann 30.Qe8 Kf6! 31.bxc4 Bh3 32.Qe4 Qxg2+ 33.Qxg2 Bxg2 34.Kxg2 cxd4 und Weiss hat wegen des drohenden ♖c8 wohl nichts Besseres, als 35.Rd1 Ke5 36.Re1+ usw. mit Remis.]
30.Qe8 Ne5
[30...Kf6 haette nun ebensowenig genuetzt]
31.Ne3+ Kf6? Das verliert rasch die Partie, aber auch nach
[31...Ke4 32.dxe5 wäre die Lage rettungslos.]
32.dxe5+ dxe5 33.Nd5+!! Mit diesem Zuge gab ich dem Gegner folgende Analyse an **33...cxd5 34.Qxe5+ Kf7 35.Qxd5+ Kf6 36.Qe5+ Kf7 37.Qe7+ Kg8 38.Qe8+ Qf8 39.Qg6+ Kh8 40.Re8 Bxf2+ 41.Kh1 Bc5 42.Rxf8+ Bxf8 43.Qe8 Kg8 44.h5 b5 45.Qc6 Rb8 46.Qd5+ Kh7 47.Qf7+ Bg7 48.h6 Rb7 49.Qe8 Bd7 50.Qe4+** und gewinnt, worauf Schwarz die Partie aufgab. J. Mihalik, dessen Anmerkungen wir vorstehend wiedergeben, hat kühn und ideenreich gespielt und vier Figurenopfer gebracht, die alle so genau berechnet werden mussten, wie es bei beschränkter Bedenkzeit am Brett gar nicht möglich ist. □ **18) All the Games: 7...Nge7**
■ **4) Miguel Munoz vs. Marc Cape,B**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 Nge7 8.Bg5 Qg6 9.Re1 See chapter 14 [/course/80564/14] for details about this quiet Rook move. **9...0−0**
[Automatic, considering that new neighbor on the e−file. But in the first five lessons of chapter 14 [/course/80564/14] we recommend 9...b6 , and even consider]
[9...f6!? in lesson 6 [/variation/20716754], instead of castling. The

text move is certainly playable, thought it can weaken the e5 strong point; for example lesson 8 [/variation/14257223] of that chapter is interesting.]

10.d5?!

[Black will likely see this advance often in various settings. It's not very good. Developing 10.Nbd2 is examined in chapter 14 [/course/80564/14]. If instead]

[10.Be3 then either Kh8∞ or 10...b6 $13 is played, as in chapter 11 [/course/80564/11].]

10...Na5∓ 11.Bd3

[Taking 11.Bxe7? is a mistake now in view of Bxe7 12.Nxe5? Qd6∓ winning something.]

11...f6 12.Be3 b6 13.Nh4 Qf7 14.Nd2 Ba3?!

[This sortie is ill−conceived. Black should begin chipping operations by 14...c6 15.c4 Nb7∓ with excellent chances.]

[Equally good is 14...Nb7 15.Nc4 Bc5∓]

15.Qa4 Bb2?! 16.Rab1 Bxc3 17.Rec1± Black's greedy smash and grab raid has handed the advantage to his fully mobilized opponent. **17...Bxd2 18.Bxd2 Nb7 19.Rxc7 d6 20.Bb4** An enemy breakthrough on the c−file is only the beginning of sorrows for Black. Now other targets begin to appear. **20...a5 21.Ba3 Nc5 22.Bxc5 bxc5 23.Rb6** In particular, Black's d−pawn is a source of terminal trouble. **23...Rd8 24.Nf3 Kf8 25.Nd2 Qg6 26.Bf1**

[The too hasty 26.Nc4 is answered by Nxd5!∞ and Black is back.]

26...f5 27.Nc4 Qf6?!

[Doubtful, but if 27...fxe4 then 28.Rxc5± anyway.]

28.Rxc5 White is cashing in. **28...fxe4 29.Rxa5 Rxa5 30.Qxa5 Nf5 31.Rb8** Material is even, but Black can hardly move. **31...Qe7 32.Qb6!? Re8**

[32...Kg8 holds out longer.]

33.a4 Kg8 34.a5 Nh4 35.Qxd6 Nf3+ Desperation, but White's a−pawn is going all the way. **36.gxf3 Qg5+ 37.Kh1 Qf5 38.Ne3 Qxf3+ 39.Bg2** Attacking the Queen and threatening to take the Bishop next. **39...Qf7 40.a6 Rf8 41.a7 Qxf2 42.Qxf8+!**

14.d4!?

[14.Nh2]

[14.Bxa7 Rxa7]

14...Na5 Owing to the possibility of ...b4, White's e4−advance is hindered temporarily.

[with Nh6+ to follow, but 14...Bd7! seems to cover everything. White should prefer 15.Bxf4 Qxf4 *(15...exf4 16.e5)* 16.Nf5!? with chances to retain the initiative It is often a handy idea to bring this piece out of harm's way round to the f2−square, where it again supports e2−e4 while aiming to jump to g4. However, sharper was Bxf5! *(* H.Danielsen−J.Gunnarsson, Reykjavik 2006, continued *16...gxf5)* 17.g3 Qxe4 18.Rxe4 Bxe4 19.Qe2 Bxf3 20.Qxf3 exd4 with a slight edge to White, who probably need not worry too much about his a3−pawn coming under attack. 21.Qf6? Kh7 22.Re1 Rg8 23.Kg2 dxc3 is awkward for Black. Generally Black must think twice about offering this central exchange when White's major pieces are bearing down on f6. 24.bxc3 Ne5 25.f4 is also reasonable, but White has time to improve his queen position first, since....e5 from Black would now

invite awkward pressure against the knight on f6. A standard developing move, but in view of White's aggressive intentions, transposing to the previous note with Nd7 might have been a more active choice. 26.Qe7! is more challenging when Nc5 , contesting the d4−square, is a flexible response. Now: 27.f5]
[14...Re8 15.Bxf4 Qxf4 *(15...exf4!? 16.e5)* 16.Nf5 (otherwise e4−e5 creates a nice central pawn wedge) Bxf5 17.g3 Qxe4!? 18.Rxe4 Bxe4 19.Nd2 Bf5 20.g4 and here White could have snatched a pawn with Bd7 21.Qf3]
[14...Ne7 . 15.Nh2! allows the bishop on b7 maximum influence, and requires delicate handling from White: for example, *(15.Kh1* , but was none too convincing for White*;* The Polish grandmaster is not one to hang around! A 'pure' Polar Bear with *15.Bxf4* is playable too, but against Black's modest defence, the dangerous approach is to get kingside action underway at once. However, on limited evidence *Qxf4!?* seems a promising alternative (and is almost certainly a good reply to 6...b5, when Black's queenside would be looser): for example, *16.Nf5 Nxf5)* 15...h5

A) 16.Qf3 and now Kg7!? may have been too impatient from Black in A.Rodriguez Vila−P. Barrionuevo, Villa Martelli 2007, since the continuation 17.Rad1! Rh8 *(17...Nc6)* 18.Ne2 g5 *(18...Nxe2+ 19.Qxe2)* 19.dxe5 dxe5 20.Nxf4! gxf4 21.Bxa7 looks attractive for White. rather than the game's Rxa7 22.Qd3 Ng6 23.Nf3 Nh4 24.Rd2;

B) 16.Qd2! H.Danielsen−P.H. Nielsen, Aalborg 2000, continued creatively with Kg7 17.Nf3 Nxh3+ 18.gxh3 Qxf3 19.Bd1 Qf6!? 20.Bg5 Qe6 21.Bb3 Qxh3 22.Bh6+ Kg8!? 23.Qg5;

C) 16.−−]

[14...h5 15.a4 *(15.Bxf4 Qxf4 16.Nf5 gxf5 17.g3)* 15...a5 *(15...Kg7 16.Qd2 Nxh3+ 17.gxh3 Qxf3 18.Bh6+ Kg8 19.Qg5)* 16.Bc4 Ne7 17.Nh2 Be6 18.Bxe6 with a pleasant space advantage for White in M.Lim−Z.Rahman, Asia 1989. TRICKY TRANSPOSITION: Black could, however, avoid this possibility with the subtle move order 5...b6 6 d3 Bb7, probably transposing to the main text. with a pleasant space advantage for White in M.Lim−Z.Rahman, Asia 1989. TRICKY TRANSPOSITION: Black could, however, avoid this possibility with the subtle move order 5...b6 6 d3 Bb7, probably transposing to the main text. *(18.Ba2 Bxa2 19.Rxa2 c5)* the exchange sacrifice 18...Nxe6 *(18...fxe6 19.dxe5 dxe5 20.Bxa7 Rxa7 21.Ne2 Nc6 22.Nxf4 exf4 23.e5 Nxe5 24.Qd4 Nc6 25.Qc4 Re8 26.Re4)* 19.Nf3 Nf4!? 20.Qd2 Nxh3+ 21.gxh3 Qxf3 probably isn't quite sufficient 22.Bg5 f6 23.Re3]

15.Bc2!?

[15.Bxf4 Qxf4 intending Nh2−g4 keeps an edge while ruling out the next note. *(15...exf4* is more natural. Black probably feared *16.e5)* With this exchange Black hopes to saddle his opponent with a bad bishop on g2 - not guessing that this piece

has a glorious future. The tension typical of the Polar Bear, with pieces remaining on for a long time, has thrown Black off balance. He perhaps feared an invasion on f6 after 16.Nf5 gxf5 17.g3 Qxe4 18.Rxe4 , but this is a very tough position with no clear plan for either side. better than fxe4 19.Nd2!]

15...Nc4 16.Bc1 c5! This time White was certainly ready to advance in the centre, so Rozentalis puts a stop to it.

[16...h5 17.a4]

17.b3 Na5 18.Bxf4 Qxf4?!

[18...exf4 19.e5]

19.Nf5 Bxf5 20.g3 By this time Jakubiec was surely happy that he'd chosen the Polar Bear rather than a 'normal' opening. The position is not yet clear, but moves like Nh2−g4 and Bf3 are becoming menacing, while Black's gains on the queenside aren't likely to amount to more than a pawn. **20...Qxf3 21.Qxf3! Bd7! 22.dxe5 dxe5 23.Rad1 Be6? 24.Rd6 Rae8? 25.Red1 Bb8 26.R6d2! Nc6 27.Kg2!** DANGEROUS WEAPON! Black is mangled by the e− and f−pawns - the front paws of the Polar Bear! **27...Kg7 28.Bd3 b5 29.Bc2! b4 30.Qe3 Rc8 31.cxb4** This really opens the floodgates, but **31...cxb4 32.Bd3 Ba7 33.Qe1 Nd4 34.Bxa6 Rc3 35.Rd3** intending Nh6+ is overwhelming for White too. Doubtless short of time, Black cracks under the pressure. But here is one sample line to show how difficult his task was: **35...Rc2 36.R1d2 Rc7 37.Rb2 Rb8 38.Rd1 Rc3?! 39.Rc1 Nf3 40.Qd1 Ng5 41.h4 Nxe4 42.Bc4 Rc8 43.Rxc3 bxc3 44.Re2** and White wins. or **44...Bxc4 45.bxc4 Nd2 46.Rxe5** and it is becoming very hard for Black to find any moves: ...a5 can be met by Ra1, while Rg1 and Nh6+ is unpleasant to meet **46...Rxc4!?** (eyeing f7) **47.Qc2 Bd4 48.Rd5 Bf6** is a safer method, but Jakubiec understandably focuses on the main plan. Better would have been **49.Rd7** : for example, **49...Rb4 50.Qd3! Nc4 51.Rc7 Nb6** when Black can hope that after Bf3xh5 and Qxh5, the capture ...Qxe4 might give him sufficient play. **52.Qd6 Rb5** puts White a tempo down on the game The exclamation mark is for the plan; the timing is debatable, as **53.Qe6!?**

Hastings Hastings ENG (10) 17.08.1895

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3

[pgndiagram] Sharp gambits such as this one were quite popular in the 19th century. **7...d5** Not a critical reply

[7...Nxe4 "The best way of refuting a gambit is to accept it" 8.0−0 Bxc3 And now White has a choice *(8...Nxc3 9.bxc3 Bxc3 10.Qb3* Is very dangerous for Black *)* 9.bxc3 [pgndiagram] And the tabiya of the variation is reached *(9.d5!?* Is probably playable, especially if Black doesn't know what he is doing *)* 9...d5 *(9...Nxc3 10.Qe1+)* 10.Bd3]

8.exd5 Now White has the initiative

8...Nxd5 9.0−0 Be6

[9...Bxc3 Here Black can't go for the pawn 10.bxc3 Nxc3 loses to 11.Qe1+]

[9...Nxc3 Again loses to 10.bxc3 Bxc3 11.Qb3]

10.Bg5 Be7

[10...Qd7 Was arguably better 11.Nxd5 Bxd5 12.Qb3 Bxf3

[pgndiagram] *(12...Bxc4 13.Qxc4 0−0 14.d5)* 13.Qxf3 0−0 And Black will have to suffer, but his position is definitely defensible]

11.Bxd5! [pgndiagram] A very counterintuitive exchange. You can feel the understanding Steinitz had for the game from moves like these. His games are full of deep strategic ideas.

11...Bxd5 The right recapture

[11...Bxg5 Is horrible for Black 12.Bxe6 fxe6 13.d5 And Black is close to being lose exd5 14.Re1+ Kf7 15.Nxd5 [pgndiagram] With such a king and undeveloped rooks, Black is doomed]

12.Nxd5 Qxd5! Once again the right choice

[12...Bxg5 Is bad due to 13.Re1+ The most clear cut *(13.Nxg5* But not *Qxd5; 13.Nxc7+* Wins a pawn *Qxc7 14.Nxg5)* 13...Be7 14.Qb3 [pgndiagram] And White has a winning position. Here it pays not to go for an endgame, but to continue building up some pressure]

13.Bxe7 Nxe7 14.Re1 [pgndiagram] If only Black could castle, he would have no problems whatsoever. As it is, White has the initiative **14...f6**

[14...Qd7 Would allow the extra tempo on the knight 15.Ne5 Qd8 16.Qf3 And White is winning]

[14...Qd6 Would likely transpose, although the queen on d6 is subjecto to knight attack from e4 or c4 15.Qe2 f6]

15.Qe2 Qd7 16.Rac1? [pgndiagram] So far the game has been of a rather high quality. This move releases the tension

[16.d5 Kf7 17.Rad1 With the idea of d6 push would maintain White's initiative]

16...c6? And immediately Bardeleben returns the favour

[16...Kf7 Was correct. Black shouldn't have feared the potential sacrifice of the knight 17.Ne5+ fxe5 18.dxe5 Qe6 19.Qf3+ Kg8 20.Rxc7 [pgndiagram] Although this is highly unpleasant, he should be able to unravel his forces and fight for the draw]

17.d5! [pgndiagram] A thematic clearance move.Now White is winning. The way Steinitz concludes the game is highly spectacular **17...cxd5 18.Nd4** The knight is coming to e6 with great effect **18...Kf7 19.Ne6 Rhc8**

[19...Nc6 Was no better, due to the weakness of d5 pawn 20.Nc5 Qd6 *(20...Qc7 21.Qh5+* Wins immediately *)* 21.Nxb7 Qd7 22.Nc5 And White retains the dominating position]

20.Qg4 Now the g7 also is weak **20...g6**

21.Ng5+! [pgndiagram] A highly attractive finish and one of the most remarkable combinations in the history of chess. **21...Ke8 22.Rxe7+!!** A fantastic blow. At first sight it seems that White will overextend himself, because his back rank is weak. But Steinitz has calculted everything precisely **22...Kf8!** [pgndiagram] The best chance

[22...Kxe7 23.Qb4+ Wins Ke8 24.Re1+ [pgndiagram] Kd8 25.Ne6+ And Black has to give up his queen due to mate on f8. And luckily for him, White has Re1 to prevent back rank mate after he takes on e6 Qxe6 26.Rxe6 Rc1+ 27.Re1]

23.Rf7+! The combination continues **23...Kg8 24.Rg7+** Naturally, now Black can't take the rook on g7 due to capture on d7 with check **24...Kh8 25.Rxh7+** [pgndiagram] Here Bardeleben left the game. Steinitz willingly demonstrated the spectators what awaited his opponent had he continued the game **25...Kg8 26.Rg7+ Kh8**
[26...Kf8 27.Nh7+]
27.Qh4+ Kxg7 28.Qh7+ Kf8 29.Qh8+ Ke7 30.Qg7+ Ke8 31.Qg8+ Ke7 32.Qf7+ Kd8 33.Qf8+ Qe8 34.Nf7+ Kd7 35.Qd6# [pgndiagram] And at the end of the story, everything concludes with an epaulette mate. Fantastic **1−0**

C51

□ **Wildman,Frank Preston**
■ **Turnbull,William**
Match/Club Leeds CC−Sheffield CC
[Leeds Mercury/RR]

[source: Evening Star (Washington) 1901/JUL/17] The notes are from the "Leeds Mercury": **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Nxb4** No doubt merely played for variety. Black could not seriously expect a player of White's caliber to snatch at the defenceless e−pawn. **5.c3 Nc6 6.0−0 d6 7.d4 exd4 8.cxd4 Bb6** We arrive now at what is called the "normal" position of the Evans. **9.Nc3**
[Very pretty play usually arises from 9.d5 Na5 10.Bb2 etc. Other moves are available for White here.]
9...Na5 10.Bd3
[White plays here 10.Bg5 , the variation is known as Göring's attack.]
10...Ne7 11.d5 0−0 12.Bb2 Ng6 White is preparing to clear the diagonals for his bishops, and this move is made to prevent e4−e5. **13.Ne2 f6** One of the comparatively few instances in which this move is unobjectionable. Here ist is a good move. **14.Qd2 Ne5 15.Nxe5 fxe5 16.Ng3 c5** This is also good, the idea being to get an advantage on the queen's wing with the pawns, and also to get the bishop to assist on the king's side. **17.Kh1 Bc7** Now the White king has been moved with the intention of throwing up the f−pawn, the bishop is wanted here. **18.f4 c4 19.Bc2 b5 20.fxe5 dxe5 21.Rxf8+** White believes the exchange of rooks to have been injudicious
[and that 21.Nf5 instead would have been better.]
21...Qxf8 22.Rf1 Qe7 23.Bc3
[RR The engines found a beautiful and easy to overlook shot here: 23.d6! , the point being that after
A) more prosaic is 23...Bxd6 24.Qd5+ and a8 falls *(* or *24.Nf5 Bxf5 25.Qd5+* and a8 falls again, but this time with check *)*;
B) 23...Qxd6 White has another beautiful move at his disposal: 24.Ba3!! Qxa3 *(24...Qxd2 25.Rf8#)* 25.Qd5+ Kh8 26.Qxa8 and Black, already an exchange down, can't protect his c8−bishop.]
23...Nb7 24.Nf5 Bxf5 25.Rxf5 a5 Black is bent on making the assemblage of pawns a menace to White.
[Probably 25...Rf8 would have simplified matters and tended to bring about the natural win in this form of the Evans; that is, by the extra pawn

force on the queen's wing.]
26.Qf2 Ra6 27.Bd2 Rg6 28.Qa7 This move apparently wins a pawn. Black's defence is very intricate just here. **28...Nd6 29.Bxa5 Nxf5 30.exf5 Rd6** A most critical point of the game.
[If Black plays 30...Qa3 a pretty and long variation ensues, but White wins.]
[RR According to the engines, Black's only defence was the rook sacrifice 30...Rxg2!! which leeds to a draw by perpetual check:
A) 31.Qxc7? Qxc7 32.Bxc7 Rxc2 33.d6 Rd2−+;
B) 31.d6 is White's best try, but with best (computer) play Black can hold: Rxh2+! 32.Kxh2 Qh4+ 33.Kg2 Qg4+ 34.Kf2 Qf4+ 35.Ke1 Qg3+ 36.Kd2 Qf4+ 37.Kd1 *(37.Kc3?? Qd4+ 38.Qxd4 Bxa5+−+)* 37...Qf3+ 38.Kc1 Bxd6 39.Qb6 *(39.a4 b4 40.Qb6 Qa3+=)* 39...Ba3+ 40.Kd2 Qg2+=;
C) 31.Kxg2 Qg5+
C1) 32.Kf3 e4+ 33.Kf2 *(33.Bxe4?? Qf4+−+)* 33...Qf4+ 34.Ke2 Qf3+ 35.Ke1 Qh1+ 36.Ke2 Qf3+=;
C2) 32.Kf2 Qf4+ 33.Ke2 Qc1! 34.Bxc7 Qxc2+ 35.Ke1 Qc1+ 36.Ke2 Qc2+=]
31.Bxc7 Rd7 32.Qa8+ Kf7 33.d6 Qg5 34.Qd5+ Kf8 35.Qd1 Qe3 36.f6 Qd4 An ingenious attempt once more to save the game by massing the pawns.
[Perhaps 36...c3 would have been more powerfull still, and difficult for white to parry.]
37.Qxd4 exd4 38.Bf5 c3 39.Ba5 Rxd6 40.Bb4 Resigns. The game has been a most instructive one and full of points.
1−0

■ **Hesseling,M.**

75: Netherlands 1983

[Cyrus Lakdawala]

We are taking votes on the craziest game in the book. This one is a strong candidate for first place. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5** Going for the Fried Liver Attack, which is even suitable for vegetarians like me.

4...Bc5!? This is the Wilkes−Barre or Traxler Counterattack, an ideal choice for those of us who are mentally unstable, and/or with suicidal tendencies. It used to be great fun in the good old pre−computer days of not−knowing. But, of course, the engines came along and ruined all our fun by working out clearly favourable lines for White.

[Needless to say, 4...d5 is far safer.]

5.Nxf7 Consistent;

[yet not as good as either 5.Bxf7+!]

[or 5.d4!? , which the engines show are both good for White.]

5...Bxf2+! Black is actually okay in this line. **6.Kxf2!?**

[The alternative is 6.Kf1 Qe7 7.Nxh8 d5! 8.exd5 Nd4 . Black scores well from this position, even though the engine assesses it as at 0.00.]

6...Nxe4+ 7.Ke3 Qe7?
[7...Qh4 was necessary, and seemingly balanced after 8.g3 Nxg3 9.hxg3 Qd4+ 10.Kf3 0−0 11.Rh4 e4+ 12.Kg2 d5 .]
8.c3?
[Why not grab the rook? After 8.Nxh8! Qg5+ 9.Kxe4 d5+ 10.Bxd5 Qf4+ 11.Kd3 Bf5+ 12.Ke2 Nd4+ 13.Ke1 Nxc2+ 14.Qxc2 Bxc2 15.Bxb7 Black stands worse, since White has almost a whole army for the queen, E. Blom−S.Lifshitz, correspondence 2006.]
8...Nd4? What?! Principle: Create confrontation and open the game when leading in development.
[After 8...d5! 9.Bxd5 Qc5+! 10.Kxe4 Bf5+! 11.Kxf5 Qxd5 12.Nxh8 Ne7+ 13.Kg5 Qxg2+ White is in deep trouble since he must hand over the h1−rook to evade mate.]
9.Kxe4? I strongly urge both players to switch to decaf. Clearly, both sides are greedy for danger and confusion, and I wonder if anyone but Tal could truly be "at home" in such a position. In truth, a lot of these moves deserve two question marks rather than one.
[Black is busted after 9.d3! .]
9...Qh4+?!
[Again 9...d5+! is much stronger: 10.Bxd5 Qh4+ 11.Ke3 *(11.Kxe5 0−0!* doesn't look like much fun for White either *)* 11...Qf4+ 12.Kd3 Bf5+ 13.Kc4 b5+ 14.Kc5 Qh4! 15.Nxe5 0−0−0 leaves Black with a decisive attack.]
10.Ke3?
[White had to play 10.Kd3 , though d5 11.Bb5+! Nxb5 12.Kc2 Bf5+ 13.d3 Kxf7 14.Rf1 Ke6! is still in Black's favour, due to the lead in development, safer king, and extra pawn.]
10...Qf4+ 11.Kd3 d5! At last, and with the threat of ...Bf5 mate. **12.Bxd5**
[Or 12.cxd4 Bf5+ 13.Ke2 Bg4+ and wins.]
12...Bf5+ 13.Kc4 You asked for irrational chess in this book, so here it is! Our mental muscles are going to be taxed beyond their natural limits.
13...b5+! 14.Kc5
[14.Kb4? just gives Black a free move in a5+ . White's king must move up to c5 all the same, since 15.Ka3?? allows b4+ 16.cxb4 Nc2+! (clearance) 17.Qxc2 Qxb4# .]
14...Qh4! Threat: ...Qe7+ and ...Qxd6 mate. **15.Nxe5** The only move.
15...0−0−0! Stockfish already calls a forced mate in 25 for Black! **16.c4 Rxd5+!** Eliminating White's only active piece. **17.cxd5**
[Not 17.Kxd5? Qd8+ 18.Nd7 Qxd7+ 19.Ke5 Qd6# .]
17...Rd8! 18.Nc3 The tension level has risen to the point where an explosion is imminent. **18...Nc6?** Black needs to remove the white king's escape hatch on b4, but not like this.
[18...a5! is correct, intending 19.Nxb5 *(* or *19.Nf3 Qe7+ 20.Kxd4 c5#)* 19...Rxd5+! 20.Kc4 Rc5+! 21.Kxc5 Ne6+ 22.Kd5 Qe4# .]
19.Qa4? Keep in mind that Vegas icons Liberace and Elvis never, ever said: "I can't wear that! It's too out there!" GM Andy Soltis called this "Probably the most stunning theoretical novelty on record", and I must agree. It's also a bad one! The solution lies dormant, at the edges of White's awareness.
[Instead, 19.Qg4!! is White's best

chance to survive. 19...Bxg4 20 Nxc6 even led to a win for White in T. Szafranski−D.Dudzik, correspondence 1998, while after Qf2+! 20.d4 Bxg4 21.Nxc6 a6 (threat: ...Qf8+) 22.Kb4! , White's king is suddenly safe and it's not so clear who stands better or worse. (The engine still thinks it's Black.)]

19...Qe7+!

[19...bxa4?! 20.Nxc6 Bd3 21.b3 Rd6 22.Nxa7+ Kb7 23.Nc6 is a complete mess. I would be okay taking White, despite the engine's claim that Black has an edge.]

20.Kxb5 EXERCISE (critical decision): Are you going to take on e5 with your queen or your knight? −−− ANSWER: Capturing with the knight wins.

20...Qxe5?? It's a laughable delusion to believe we are in control over our destinies in irrational positions. All we can do is to grasp intuition, make an educated guess. Oh, and it may also be helpful to pray, even if you are an atheist. Black goes from completely winning to clearly worse in a single move.

[Black missed 20...Nxe5! 21.Qa6+ *(*if *21.Qxa7* then *Bd7*+ *22.Ka5 Nc4*+ *23.Ka6 Qd6*+ mates *)* 21...Kb8 22.Ka4 *(*or *22.d4 Bd3*+ *23.Ka5 Bxa6* and wins, since White is mated if he takes either piece *)* 22...Rd6! 23.Qa5 Rb6 (threat: ...Bd7+ or ... Qh4+) 24.Nb5 a6 25.Qc3 axb5+ 26.Kb3 Qd6 and White is busted, P. Kloskowski−T.Szafranski, correspondence 1995.]

21.Qc4?!

[Stronger is 21.Qa6+! Kb8 22.Qxc6! Bd7 23.Qxd7 Rxd7 24.Kb4! Rxd5 25.a4! , when White stands better because he is up material, while Black lacks the firepower to get at White's king.]

21...Nd4+?

[Here 21...Qd6! 22.Qxc6! Bd7 23.Re1 Bxc6+ 24.dxc6 a6+ 25.Ka4 Qxc6+ 26.Kb3 Qxg2 27.Re2 Qg6 28.a4 is close to balanced.]

22.Ka4? This gives Black another free move.

[Instead, after 22.Ka5! (intending Re1!) Qf6 23.Qa6+ Qxa6+ 24.Kxa6 Bd3+ 25.Ka5 Nc2 (threatening White's rook, as well as ...Rd6) 26.b4! Nxa1 27.Re1 Nc2 28.Re5 Rd6 (threat: ...Ra6 mate) 29.b5 Black's attack is at an end and White's two extra pawns should win eventually.]

22...Bd7+ 23.Ka5!?

[23.Ka3 Nc2+ 24.Kb3 Nxa1+ 25.Ka3 Nc2+ is perpetual check.]

23...Nc6+ This is only possible because the knight is now defended by the bishop. **24.Ka6** White must have been comforted that he finally carved out a certain measure of security for his king. I'm kidding of course. If I were playing White, my phone would be on speed dial to my cardiologist. **24...Nb8+** What level of risk are you willing to take to settle a score? Should White accept a draw after 25 Ka5 Nc6+ etc, or go for the full point with 25 Kxa7 − ?

25.Kxa7?? White should accept the draw by perpetual since taking on a7 allows mate in five! −−− EXERCISE (combination alert): Okay, find Black's forced mate. **25...c6??** Threat: ...Qc7 mate. Now is not a good time to falter! I'm getting writer's cramp from pushing the "?" and "??" on my annotation pallet

this game. Obviously the players' complications−addled brains were overloaded by mass stimuli from all sides.

[ANSWER: 25...Qd6! gets the job done. The threat is ...Qb6 mate, while if 26.Na4 *(*or *26.Qd4 Qa6#)* 26...Bxa4 27.Qg4+ Bd7 , it's mate in two since b6 and a6 cannot both be covered.]

26.Nb5! How annoying for Black. There is no mate since c7 is covered. **26...Bf5 27.d4**

[The engine nonchalantly trots out 27.Re1!! Qxe1 28.dxc6 Bd3 29.Kb6!! Bxc4 *(*or *29...Qf2+ 30.Qc5* and White wins *)* 30.Na7# .]

27...Rd7+

[If 27...Qe7+ 28.Kb6 Qb7+ 29.Ka5 Rxd5 30.Kb4! Rxb5+ 31.Kc3 and White will consolidate.]

28.Ka8 Qe7 29.dxc6

[29.Bf4! is more accurate.]

29...Be4 30.d5

[While noting that it's a relative term, "simpler" is 30.Qg8+! Rd8 31.Na7+! Qxa7+ *(31...Kc7 32.Bf4+ Kb6 33.Qb3+* is mate in two *)* 32.Kxa7 Nxc6+ 33.Kb6 Rxg8 34.Re1 with an extra exchange and pawns for White and an easy win.]

30...Bxd5 31.Qxd5! The only move, but one which should win. **31...Rxd5 32.Na7+ Kd8 33.Kxb8??** There is no time to grab the knight. Now White's diet is missing a desperately needed nutrient and his position becomes king−safety−deficient. −−− EXERCISE (planning): White just walked into a mate in six. Try and find it.

[Correct is 33.Re1! (the rook is tactically protected due to a discovered check on g5) Qb4 34.a3 Qd6 35.Bg5+! Rxg5 36.Rad1 Rd5 37.Rxd5 Qxd5 38.Kxb8 Qb3+ 39.Ka8 (threat: Re5, followed by Rb5) Qxb2 40.Rd1+ Ke8 41.Rd7 , followed by Rb7 and Black is busted.]

33...Qc7+?? With this blunder Black goes from mate in six to being down by +7 07!.

[ANSWER: The mating net is constructed with 33...Qb4+! 34.Ka8 Kc7! , threatening ...Qb8 mate as well as ...Rd8+, which White can only stall with spite checks.]

34.Ka8 Ra5 It still appears that White is mated. He isn't! **35.Bg5+!** A person lost in the desert and dying of thirst can still dream of a soft drinks vending machine, even though it will only appear as a mirage. In this case, White's miracle counterattack is no mirage and it is Black who is now completely busted.

35...Rxg5

[Or 35...Ke8 36.Rae1+ Kf8 37.Rhf1+ Kg8 38.Re8# .]

36.Rad1+ Ke8 37.Rhe1+ Kf8 38.Rd7! Qxh2 39.Ree7

[Or 39.Rf1+ Ke8 40.Rb7 Rc5 41.Rff7 and wins.]

39...Qxg2 40.Rb7 Miracle of miracles. Despite White's suicidal king walk, it is Black who is now dead lost due to his own insecure king and White's threat to promote the c−pawn. **40...Rc5 41.c7** This wins;

[if not as easily as 41.Red7! (threatening mate two separate mates in one) Re5 42.Rd8+ Re8 43.c7 and it's game over.]

41...Qg4 42.Rf7+ Ke8 43.b4 Rc2 44.a4 h5 45.a5 h4 46.b5 h3 47.Nc6

h2 48.Rxg7
[Or 48.Re7+ Kf8 49.Rb8+ and mate next move. Damn! What a game!]
1−0

■ **Harman,Kenneth B.**
corr WS/O/1328 01.05.2021
[Büßing,Olaf]

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 Die Berliner Verteidigung **4.d3 Bc5 5.c3 d6** Die traditionelle Reihenfolge ist 5...−0−0 6.0−0 d6, Schwarz dachte vielleicht, plötzlich in die Zugfolge 6.♗xc6!? bxc6 7.♘xe5 zu geraten?
[5...0−0 6.Bxc6 bxc6 7.Nxe5 aber Schwarz hätte hier mit d5 antworten können und reichlich Komplikationen.]
6.d4!? Schwarz steht trotzdem nicht in wirklichen Schwierigkeiten. **6...exd4** Schwarz muss das Zentrum aufgeben.
[6...Bb6 7.d5 Nxe4 8.dxc6+−]
[6...Nxe4 7.Qe2! f5 8.dxc5 Nxc5 9.Nd4!+−]
7.cxd4 Bb4+ 8.Bd2 Die richtige Art, auf Vorteil zu spielen, obwohl 8.Kf1!? sehr verlockend aussieht, um Material zu gewinnen.
[8.Kf1!? Doch die Engine kommt zu dem Schluß das nach d5! Einziger Zug! 9.e5 Ne4 10.Qa4 Weiß scheint immer noch etwas Material zu gewinnen, aber Schwarz hat aufgrund des geschwächten weißen ♔önigs auf f1 einige Möglichkeiten, sein Gegenspiel zu organisieren. Eine lehrreiche Beispielpartie lautet. a5 11.Bxc6+ bxc6 12.Qxc6+ Qd7! 13.Qxa8 Qb5+ 14.Kg1 0−0 15.h3 Bb7 16.Qa7 Ra8 17.Na3 Qe2! 18.Qxb7 Qxf2+ 19.Kh2 Qg3+ Mit einer ständigen Kontrolle. Alles Theorie, wie man so schön sagt.]
8...Bxd2+?! Während 5...−d6 nur etwas ungenau ist, ist die Entscheidung, die Verdopplung der c−Bauern nicht zuzulassen, bereits ein schwerer Fehler. Da Schwarz das Zentrum bereits aufgegeben hat, ist er nicht in der Lage, abstrakte Drohungen wie ♗xc6 zu verhindern und sollte versuchen, schnell Gegenspiel zu entwickeln, um die strategischen Probleme wie Raummangel im Zentrum und potenzielle Bauernverdopplung zu kompensieren.
[8...0−0 9.Bxc6 Bxd2+ 10.Nbxd2 bxc6 11.0−0 This is the critical position, where Black has to act fast, to try to come up with some counterplay before White gets to fully consolidate their center.]
9.Nbxd2 Bd7?! Abgesehen davon, dass Schwarz ein entscheidendes Tempo verliert, ist es auch die Tatsache, dass die Bauernverdopplung, so schlecht sie auch ist, eine Figur abtauscht, was eine große Erleichterung für Schwarz ist, da er keinen Raum hat. Ich bin mir also nicht sicher, ob Schwarz dies fürchten sollte.
[Etwas besser ist 9...0−0]
10.0−0 0−0 11.Re1 Dieser Zug liegt auf der Hand. **11...Bg4?!**
[11...Re8 12.h3 Weiß kann die ♗g4− Idee verhindern, aber die Entwicklung des anderen ♖urms mit 12.♖c1 ist schwieriger für Schwarz . *(12.Rc1!)*]
[Die Engines zeigen hier 11...a5

(ein typischer Engine Zug ,die Raumgewinn und Flexibilität sehr hoch Bewerten).]
[11...a6]
[oder 11...Ne7 an.Die Bewertungen der Züge liegen alle knapp unter 1.00 für Weiß.Der Textzug bei]
12.h3 Bxf3 13.Nxf3 Ne7 14.Qb3 c6 15.Bd3 Qb6 16.Qc2 Ng6 17.e5 dxe5?!+− Hier steigt der Pegel der Engine ! Schwarz muß sich latent um den Bauern h7 Kümmern .
[17...Nd5 18.a3 *(18.Bf5)* 18...dxe5 19.dxe5 Ndf4 20.Bc4 Rad8 21.Rad1 Ne6! 22.Bxe6 fxe6 23.Ng5**±** und Schwarz muß mit einer schlechteren Stellung leben.Aber eine Gewinnstellung hat Weiß noch nicht!?]
18.dxe5!
[18.Bxg6? fxg6 19.dxe5 Nd5**±** mit Gegenspiel!]
18...Nd5 19.Bf5! mir der Idee e6 zu spielen. **19...Ndf4**
[19...Nde7 ist zäher]
20.h4! Idee h5 **20...h6?** Löst das Problem h7, aber jetzt geht stark
[Deutlich besser war 20...Rfe8 21.g3 Ne6 22.Bxe6 fxe6 23.Ng5 aber auch hier steht Weiß gut]
21.e6! Ne7 22.Bh7+ Kh8 23.exf7 Rxf7 24.Ne5 Schwarz verliert MATERIAL und gibt auf!

□ **Helms,Hermann**
■ **Stone,Henry N**
Continental tourn prel corr 1894
[Avery]

Avery: In 1894 Walter Penn Shipley organized a tournament under the auspices of the Continental Correspondence Chess Association. By today's standards, the event was fairly small: 70 players divided into five 14−man round−robin sections, with the five section winners playing another round for the championship. The event, won by C. W. Phillips of Chicago, was the largest such event in America to that time; Hermann Helms always referred to it, even 50 years later, as the "the great Continental Chess Association tournament of 1894." **1.e4** Myers Avery Bulletin 1 Myers Avery **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Nf6 7.dxe5 Nxe5?**

Ne5* Lunn,S−Flear,C (2160) Guernsey 1990, 0−1 (23). *)* 18...Bd6! 19.Nxd6+ cxd6 which is equal, and, indeed, White can propose a repetition here by 20.Qf8+ Rd8 21.Qf4 Rd7 22.Qf8+]
9...Rg8 10.Ng5?!
[10.Bg5! Be7 transposes above.]
10...Qd5 11.Nc3 Qf5 The addition of the capture on g7 actually helps Black.
12.g4?! This is one of the highest scoring moves here, but it is actually a mistake!

[12.Nce4 0−0−0 is also a bit better for Black:

A) 13.Nxe6 fxe6 14.Nxc5 Qxc5 transposes.;

B) 13.Ng3 Qg6 14.Nxe6 fxe6 15.Qh5 Qxh5 *(15...Rd5!)* 16.Nxh5 Hausner,I (2428)−Kozlovsky,L Rakovnik 2001, 1/2−1/2 (46), Rd5! 17.Nf6 Rxg7 18.Nxd5 exd5 favours Black.;

C) 13.g4?! can simply be met by Qxg4+! 14.Qxg4 Bxg4 15.Nxc5 Rxg7 16.h3 Bxh3 17.Kh2 Bf5 18.Nce4 Nb4 Sebban,J (2118)−Le Roch,D Aubervilliers 2000, 0−1 (26).;

D) 13.Nxc5 Qxc5 14.Nxe6 fxe6 15.Bh6 Qf5! 16.g4 Qg6 17.g5 Manesh Chandran, P−Haddad,M (2240) Cannes 1997, 1−0 (38), d3]

12...Qf6?

[12...Qg6! is forced, and good, 13.Nce4 Be7 14.f4 h6 *(14...Qxg7* is also good, *15.f5 h6* transposing. *)* 15.f5 Qxg7 16.fxe6 hxg5 17.exf7+ Qxf7 18.Nxg5 Qd5 *(18...Qg6!)* 19.Ne6 Kd7 20.Qe2 *(20.Bf4 Bd6 21.h3 Rae8 22.Bxd6 Qxd6* 0−1 Feenstra,J (1933)−Haase,G (1800) Dunedin 1999. *)* 20...Bd6 21.b3 Rae8 0−1 De Herdt,Y (2078)−Beukema,S (2222) Bruges 2012.]

13.Nd5 A new move, and good enough.

[13.Nce4! is strongest: Qe7 14.Nxh7 *(14.Nxf7! Qxf7 15.Nxc5)* 14...Rxg7 15.Bg5 *(15.Nef6+! Kd8 16.Bh6)* 15...Rxg5 16.Nhxg5 0−0−0 17.Nxe6 fxe6 18.Nxc5 Qxc5 19.Rxe6 Cunningham,T (2167)−Southam,T (1939) Toronto 1983, 1−0 (25).]

13...Qd8??

[13...Qxg7 is best, although 14.Nxc7+ Kd7 15.Nxa8 is hardly joyful for Black.]

14.Nxe6 fxe6 15.Rxe6+ Kd7 16.Qe2 Be7

[16...Rxg7 17.Nf6+ Kc8 18.Re8]

17.Rxe7+ Nxe7 18.Nf6+ Kd6

[18...Kc8 19.Nxg8 Nxg8 20.Qe6+ Kb8 21.Bf4 is also crushing.]

19.Bf4+

[19.Qxc4! is mate in 9, apparently.]

19...Kc5 20.b4+ Kxb4

[20...cxb3 21.axb3 Kb6 22.Qc4]

21.c3+

[21.Rb1+ Kc5 22.Qe6 is quicker.]

21...Ka5 22.Qxc4 Nc6 23.Rb1 a6 24.a4 Na7 25.Qb4#

1−0

C51

□ **18) All the Games: 7...Nge7**

■ **2) Mariana Solis vs. Keren Pa,G**

Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 Nge7 8.Bg5 Qg6 9.Bxe7 This capture does not intimidate; White is too anxious to recover his gambit pawn. See chapter 9 [/course/80564/9]. **9...Nxe7!?**

[More correct is 9...Bxe7! as discussed in lesson 1 [/variation/13686377] of chapter 9.]

10.h4?!

[In chapter 9, lesson 2 [/variation/13686435/#/10/w], we look at 10.dxe5 Bc5 11.Nbd2 0−0∞ unclear, and even 11...a6!? $14 yields but a small edge to White. In both cases Black has returned the pawn, perhaps temporarily, but owns the Bishop pair and the more solid pawn formation.]

10...h6!?
[It's hard to see the point just yet. Instead 10...Nc6 should consolidate without much trouble after 11.Nbd2 0−0 12.Re1 exd4 13.cxd4 Bb4∓ and fewer pieces mean fewer problems for Black.]
11.dxe5 Bc5∓ 12.e6?
[A grave error, but even after 12.Nbd2 0−0∓ the position still favors Black, likely transposing to the previous note.]
12...fxe6∓ 13.Ne5?! Qf6?
[The brazen 13...Qxe4 wins. Now it's a bit more complicated.]
14.Qh5+ There is an unprotected Bishop on the c5 square. **14...g6 15.Nxg6 Qxg6?!**
[Take 15...Nxg6 and if 16.Qxc5 then take Qxh4∓ as well, with a clear conscience and a clear advantage.]
16.Qxc5 Rg8 Black's game is still preferable. **17.g3 Nc6 18.Nd2 b6 19.Qe3 Bb7** Things have settled down; it's time for a plan. **20.a4!?**
[Somewhat hopeful, but a bad plan is better than no plan. White isn't in position to launch an assault, but should regroup by 20.Be2 and 21.Kh2 next. In that case Black's game would still be better, by more than half a pawn. As it happens, however, Black now underestimates the enemy potential.]
20...0−0−0?!
[He should definitely play 20...a5∓ and only then castle. White isn't breaking in, at least not before Black can strike first.]
21.Bd3?
[No time to pause for a pointless move! Pushing on with 21.a5! presses the attack, and after the classic central rejoinder d5 play might continue 22.Bd3 when Qf6 is best. Quite interesting however is 22...d4!? 23.cxd4 Nxd4 24.Ra2 $13 and it's anybody's game! Now following 23.exd5 exd5 24.axb6 cxb6 25.Ra4 Kb8∓ we would choose Black.]
21...Ne5 22.Be2 h5?!
[He creates a target here. Instead, fixing the opponent's a−pawn by 22...a5∓ still offers good chances.]
23.a5 Nc6??
[Much too defensive, this move amounts to a blunder. By means of 23...Ng4 24.Bxg4 Qxg4 25.Kh2 e5∓ Black retains an edge.]
24.axb6 axb6 25.Ba6± e5?!
[Faced with a sudden reversal, Black responds feebly. He could try 25...Bxa6 26.Rxa6 Rdf8 but it's White in charge. Black at least sidesteps the landmine 26...Kb7?? 27. Rxb6+! cxb6 28.Nc4+− and wins! Continuing simply 27.Nf3± , and White is better. Black has shed his gambit booty, and a strong attack is coming.]
26.Qe2 Nb8 27.Bxb7+ Kxb7 28.Nc4?!
[Double Rooks with 28.Ra4±]
28...Qe6?!
[There is some improvement in 28...Nc6 , but then 29.Ne3± leaves White in control.]
29.Rfb1 Kc8?! 30.Ra8 Winning. Black's King is under pressure, and his h−pawn will fall soon. **30...Qc6 31.Rba1 d6 32.Nd2** The Knight will take up residence on g5, where it provides defensive cover until delivering the coup de grâce some dozen moves later.

32...Rdf8 33.Nf3 Qxc3 34.Ng5 Qc6 35.Qxh5 See Black's 22nd move. **35...Qd7 36.Qe2 b5 37.Qa2 Qc6 38.Qe6+** The maneuvers of White's Queen are forcing further concessions from Black. **38...Kb7 39.Qb3?**

[The right way is 39.R1a7+ Kb6 40.Qa2 Qc3 41.Rxb8+ Rxb8 42.Qa6+ Kc5 43.Rxc7+ and wins.]

39...Qc4 40.Qe3?

[We dislike sprinkling question marks all over a game score, but White should not go here nor here again two moves from now. To be fair, the players seem to be in zeitnot mode so we'll pass over a few moves without the ugly diacritical marks. White could have finished things now with 40.Qa3 Kb6 Or 40...Kc8 41.Rxb8++− etc. 41.Ne6 winning without trouble.]

40...Qc5?

[Alright, one more mark. Black overlooks a defensive resource here, and again in the duplicate position on move forty−two. He can make a good fight by 40...Nc6 41.R8a6 b4 42.Ne6 and then Rf7 is best. Certainly not 42...Qxe6? 43.Qc1+− winning. Now after 43.R6a4± White's advantage has been reduced to a mere half pawn.]
