□ **Rathnakaran,K.**
■ **Laxman,R.**
Hyderabad 2019
[John Doknjas & Victoria Doknjas]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0 6.0−0 d6 7.Bb3 h6 8.Re1 Kh8 9.h3 Bb6 10.Nbd2 Ng8 Often in the Italian, White's d2−knight goes to f1 and then g3, aiming to control some kingside light squares. However, with Black about to push ...f5 on the next move, this knight maneuver no longer seems to be quite as good. A better idea is to instead move the knight to c4. Here it will attack the b6−bishop, and White could follow up with some aggressive a4 or d4 pawn move. **11.Nc4 f5 12.Nxb6**
[12.exf5 Bxf5 13.a4 was also possible, preparing to attack the

bishop with a5. This will force Black to spend an additional tempo moving it somewhere (as it's already spent one tempo going from c5 to b6 earlier on). For example, Bc5 *(13...a5? 14.Nxb6 cxb6* ruins Black's pawn structure *)* 14.a5 Bg6 15.Bc2 a6 16.Be3 Bxe3 17.Nxe3 Nf6 18.d4 seems roughly balanced.]

12...axb6 13.exf5 Bxf5 14.d4 e4 15.Nh2 d5 White's bishop pair is roughly balanced out by Black's space advantage. White should try to break down the d5−e4 pawn chain, such as with f3. **16.Nf1**

[16.f3 exf3 17.Nxf3 opens up the e−file for the e1−rook, and gives the knight better prospects (it now controls e5). An open position in general is also good for the bishop pair.]

16...Na5 17.Be3 c6 18.Ng3 Bh7 19.Qd2 Qh4 20.Qe2 Nf6 21.Rf1 b5 Black has done well to gain a grip on both sides of the board. He's also managed to keep the position closed, making things more unfavourable for White's bishop pair. **22.Kh2 Nc4**

[22...h5 , preparing to play ...Ng4+ followed by ...Nxe3, deserves consideration. Eliminating the e3−bishop would weaken White's dark−squares (such as g3).]

23.Bxc4 dxc4 24.a3

[Perhaps 24.b3 could have been tried, again with the theme of trying to break down Black's restricting pawn chains.]

24...Nd5 25.Rae1 g5 26.Qg4 Qxg4 27.hxg4 Rae8 28.Bc1 Bg6 29.Ne2 Kg7 30.Kg3 Rf7

[30...e3! 31.fxe3 Rxf1 32.Rxf1 Bd3 33.Re1 Nf6 prepares ...Re4, targeting the g4−pawn.]

31.Be3 Ref8 32.Rh1 Nf4 33.Nc1

[33.d5! was necessary to equalize, but sacrificing a pawn like this isn't an easy decision to make. The opposite−coloured bishops give White drawing chances, but he needs to activate his bishop. Opening up the e3−a7 diagonal gives the bishop access to the rest of the dark squares on the board. Following Nxd5 34.Bd4+ Kh7 , Black is threatening ...e3 (preparing to meet fxe3 with ...Be4), so White should play 35.Ng1! . Then after something like Nf4 *(35...e3? 36.Nf3!* suddenly turns the tables, as White creates the dangerous threats of Nxg5+ and Rxh6+ *)* 36.Nh3 Ne6 37.Be3 , White should hold this endgame.]

33...h5

[33...b6! may have been stronger, preparing to meet a potential d5 with ... c5. This would give Black control over the d4−square; and after he wins the d5−pawn, the d−file would be open.]

34.gxh5 Nxh5+ 35.Kg4 Nf4 36.d5! White seizes his second chance to play this move. **36...Rf5 37.dxc6 bxc6 38.Rd1 Nd3 39.Nxd3 cxd3 40.f3 Re8 41.Rhe1 Rd5 42.Bxg5 e3 43.Bf4?** White had played a series of good moves up to this point, but now errs.

[43.Bxe3 d2 44.Rxd2 Rxe3 45.Rxd5 Rxe1 46.Rd7+ leaves White with three pawns for a piece, and he is equal. His king and rook enjoy good activity.]

43...e2 44.Rd2 Although White's rooks blockade the connected passed pawns, they are quite passive on d2 and e1.

44...c5 45.Bh2 Kf6 46.Kg3 b4?!
[46...Rh5! aims to use zugzwang. Soon the h2−bishop will have to move, allowing the rook to invade on h1. For example, 47.b3 Ke6 48.Bg1 Rh1 49.Kf2 Kd5 leaves White's pieces in very poor positions. Once Black's king manages to break through, it will be over.]
47.axb4 cxb4?! 48.cxb4 Rc8
Although Black has opened up the queenside, this has come at the cost of a pawn. Now his only remaining pawns are on d3 and e2, which reduces his winning potential. **49.Kf2 Ke6 50.g4 Rb5 51.Ke3 Kd5 52.f4?** Surrendering control of the e4−square.
[Sitting tight with 52.Kf2 Ke6 53.Bg3 Rxb4 54.Ra1 was better, and White should hold.]
52...Re8+ 53.Kf2 Kd4 54.Bg1 Ke4 55.f5 Bf7 56.Kg3 Rg8 Black's king is active in White's territory, and White's fortress isn't as airtight anymore. The g8−rook's pin on the g4−pawn gives Black some threats like ...Rxf5 and ...Bh5. If White's king moves off the g−file to h3 (where it could still protect the g4−pawn), then Black's king gains access to f3. **57.Rexe2+!? dxe2 58.Rxe2+ Kd3 59.Re3+ Kd2 60.Rf3 Bh5**
[Capturing the pawn while it was still undefended with 60...Rxb4 was better.]
61.Rf2+ Kd3 62.Rf3+ Kc2 63.Rf4 Rb7 64.f6 Kxb2 65.Bc5
[65.b5! Kc3 *(65...Rxb5?!* allows *66.f7)* 66.b6 would make the b−pawn more dangerous. It's not clear whether Black can win this endgame. The issue is that even if he could trade one of his rooks for White's bishop and three pawns, the resulting K+R+B vs. K+R would be a theoretical draw. Although as we saw in a previous game, this endgame still offers some practical winning chances to the side with the bishop.]
65...Kc3 66.Kf3 Bf7 67.Ke4 Rd7 68.Rf3+ Kc4 69.Kf4 Kd5 70.g5 Bg6 71.Re3 Rh8 72.Re5+ Kc4 73.Re4+ Kb5 74.Re5 Rh4+ 75.Kg3 Rc4 76.Re3 Rd5 77.Rf3 Rxg5+ 78.Kf2 Bf7 79.Be7 Rgg4 80.Rf5+ Kc6 81.b5+ Kd7 82.Kf3 Rg1 83.Re5 Rb1 0−1

C54

□ **Coleman,D..**
■ **Parker,J..**
Isle of Man 1999
[Paul Motwani]

Games galore: where the action really starts...and hardly stops! G12.5: "10... Kf8!: a king−size novelty for Black" D. Coleman−J.Parker, Isle of Man 1999. Italian Game (by transposition). **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4**
At this early stage we find ourselves in The Scotch Gambit, but the opening soon transposes to the Italian Game.
4...Bc5 5.c3
[Black would welcome 5.Ng5 Nh6 6.Nxf7 Nxf7 7.Bxf7+ Kxf7 8.Qh5+ g6 9.Qxc5 d6 because his excellent development more than compensates for the small inconvenience of not being able to castle.]
5...Nf6
[5...dxc3 6.Bxf7+ Kxf7 7.Qd5+ resembles th e line given in the previous note, but this time White's

army possesses real attacking potential, especially because the f3−knight is still alive and eager to leap forward at its first opportunity to unsettle Black's king.]

6.cxd4

[6.e5 d5 worked out very well for Black too in game G9.7.]

6...Bb4+ This situation is often reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 c3 Nf6 5 d4 exd4 6 cxd4 Bb4+. **7.Bd2 Nxe4!**

[I used to regard this move as dubious, but Jonathan Parker's main star follow−up idea will be revealed at Black's 10th move. An immediate 'plus' for 7...Nxe4! is that it avoids the line 7...Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 Na5 11.Qa4+ Nc6 12.Qb3 which is likely to lead to further repetition of position unless Black is willing to make the retreat ... Nce7.]

8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ Kf8!

[This is Jonathan's highly noteworthy new idea. He was aware of various earlier games (mostly from the World Under−10 Championships!) where 10...d5 occurred. Then after 11.Ne5+ Ke6 12.Qxb4 Black can force an exchange of queens via Qf8 However, Jonathan notes the following difficulty: "The problem is that with the knight cemented on e5, White probably has a slight edge". Jonathan's excellent 10...Kf8! willingly sacrifices a tempo so as not to concede control of the e5−square to White.]

11.Qxb4+ Qe7 12.Qxe7+ This is forced, since Black was threatening a horde of discovered checks. **12...Kxe7 13.Na3?!**

[13.0−0 looks more obvious, but after Re8 14.Re1 Kf8 I honestly do slightly prefer Black's position because of the superior pawn structure. *(*one must take care to avoid nightmarish paths such as *14...Kd8 15.Ne5 Nf6 16.Nf7#)*]

13...d6 14.0−0 Re8 15.Rfe1 Kd8 16.Nc4 b6 Almost all of Black's pawns now occupy dark squares, and so they do not impede future manoeuvres of the light−squared bishop. **17.d5** White may have hopes of playing Nd4−c6/e6, but first his d−pawn is about to come under fire from a fianchetto... **17...Bb7 18.Rad1 Nf6 19.Ne3 Kd7**

[Of course 19...Nxd5?? does not work because White's e1−rook is well−protected by the f3−knight.]

20.g4?! This over−ambitious advance leaves White's position looking very loose. Jonathan Parker commented that it would not have been easy for Black to make great progress if his opponent had simply sat tight. In practice, however, there is a tendency to want to do something 'active'. **20...Re4 21.h3**

[After 21.Ng5? Ra4 White's pawns at a2 and g4 find themselves in double trouble. Also]

[21.g5 Nh5 would leave White's position badly over−extended.]

21...Rae8 Now really threatening to win a pawn with 22...Nxd5! 23 Nxd5 Rxe1+ (or 23... Bxd5) 24 Nxe1 Bxd5 25 Rxd5 Rxe1+. **22.Ng5 R4e7!**

[22...Ra4 23.a3 Nxd5 24.Nxd5 Rxe1+ 25.Rxe1 Bxd5 26.Nxh7 is a bit murky. So instead Black chooses a simple, very good, uncomplicated path which also

renews the threat of ...Nxd5.]

23.Rf1

[It's extremely difficult to find a decent answer for White, since even 23.Kf1 protecting the e1−rook fails because of Nxd5! 24.Nxd5 Rxe1+ 25.Rxe1 Ba6+]

[If 23.Ne6 then the recurring nightmare Nxd5! comes back to haunt White by undermining the position of his e6−knight.]

23...Ba6 24.Rfe1 Bc4!

Neatly exploiting the pin on White's e3−knight, and delivering a powerful double blow to the poor pawns at a2 and d5.

25.b3?

[Jonathan Parker points out that only 25.Rd4!! keeps White in the game, because if Bxd5 *(25...Bxa2 26.Ra1)* 26.Nxh7! then Bf3 does not gain the vital tempo which Black wins in the actual game by attacking a rook still on d1.]

25...Bxd5 26.Nxh7 Bf3! Black wins a crucial tempo, and so it's worth reiterating that point. **27.Nxf6+ gxf6 28.Rd4 Rh8 29.Rf4**

[If we imagine giving White an extra pawn on g3, then 29 Kh2?? would walk into the short and sweet finish 29...Rxh3+! 30 Kxh3 Rh7. One might say "With a g3−pawn on the board, White could play 29 h4 for example", but unfortunately back in the real world it doesn't work! Neither does 29.Kh2 which is answered simply by Reh7]

29...Rxh3 30.Rxf3

[30.Ng2 Rxe1+ 31.Nxe1 Rh1# is another way for White to exit.]

30...Rxf3 31.Rc1 c6 A very convincing, smooth performance by IM Jonathan Parker.

□ **Barua,D.**
■ **Ganguly,S.**
4: New Delhi 2009
[Martin Lokander]

1.e4 e5 2.Bc4
[The most common way for us to reach the game is through 2.Nf3 Nc6

3.Bc4 Nf6 4.d3 Be7 .]

2...Nf6 3.d3 Nc6 4.Nf3 After a slightly different move order than we're used to, we've arrived at the key position. **4...Be7 5.0−0** As we saw in our previous game, White earns nothing by delaying castling.

[5.Nc3 d6 6.a3 is very similar to the game; Black can play in similar fashion with Be6 .]

5...0−0 6.Nc3 d6 This is the starting position for our Nc3 coverage. We've already seen this position in our introductory game Dolzhikova−Trent, where we saw what happened to White's position if Black is allowed to play ...Na5 and capture the bishop on c4. Black's last move defended the e5−pawn and thus ...Na5 is a threat. **7.a4** White grabs space on the queenside while giving the bishop a safe home on a2.

[Another critical continuation is the more cautious 7.a3 Be6 8.Re1! . Black's last move prepared the ...d5 break (having the knight on c3 doesn't prevent it forever), so White takes precautions against the black centre. This position is critical for this variation, and Black could easily find himself in a slightly passive position if he continues by playing slow developing moves. Note too that allowing ...Bxc4 is more harmonious for White with a pawn on a3 than on a4, because there is no hole on b4. Here Black has a choice:

A) One move is 8...Qd7 , which looks very natural, but White can play 9.Nd5! and although Black is probably fine, White might just have a tiny edge here.;

B) Bologan mentions 8...Nd4!? which I think is a good, solid move. After 9.Nxd4 exd4 10.Bxe6 fxe6 11.Ne2 Black is probably fine after c5 . If Black feels uneasy with my main recommendation, he can always rely on Bologan's move.;

C) 8...Nxe4!? is a surprising strike worth remembering. After 9.Nxe4 *(9.Bxe6 Nxc3 10.Bxf7+ Rxf7 11.bxc3 Qd7* is very pleasant for Black, who can exert pressure on the kingside *)* 9...d5 10.Bb5! *(10.Neg5 dxc4 11.Nxe6 fxe6 12.dxc4 Qxd1 13.Rxd1 Rad8* is probably about equal; the e−pawns cover some important central squares and Black could even push ...e4 if White isn't careful *)* 10...dxe4 11.Bxc6 bxc6 12.Nxe5 it looks like Black is the one who got tricked by the complications, but we're not done yet: Bd6! 13.Rxe4 Bd5 14.Re1 Re8 . White's rook is forced to retreat and Black can look forward to very decent Marshall−style compensation. On top of a good initiative on the kingside, Black's two bishops can make White's life very uncomfortable.;

D) 8...−−]

7...h6 Generally a useful move, although it's not clear whether it's necessary at this point.

[I would prefer the immediate 7...Be6! , after which 8.Re1 can be met in a similar fashion as after 7 a3, with Nxe4 *(*or Bologan's *8...Nd4!?* . *)*]

8.h3 Be6 Simple moves often do the trick. Black prepares ...Qd7, will centralize his rooks, and might even be

able to strike in the centre as in this game. **9.Qe2** Not very challenging.
[The problems lie in 9.Re1!
, after which it's not completely clear what Black should play:
A) . After 9...Nxe4 10.Nxe4 d5 11.Bb5 dxe4 12.Bxc6 bxc6 13.Nxe5 Bd6 14.Rxe4 Bd5 Black finds it more tough to find a free−flowing initiative on the kingside than with the pawns on h2 and h7. White should be better.;
B) 9...Nd4 isn't pleasant either because of 10.Nxd4 exd4 11.Bxe6 fxe6 12.Ne2 c5 13.Nf4!
. This exploits the big weakness on g6 that was caused by the ...h6 move.;
C) . Maybe Black has to go for 9...Qd7 10.Nd5 when he's a tiny bit worse, but there's a long game ahead. *(10.−−)*;
D) 9...−−]
9...Qd7
[Black could also go for simplifications with 9...Nd4 .]
10.Be3 d5! Black seizes his chance and breaks in the centre. This break is very typical when White has played Be3, but it wasn't clear what White should have done anyway. **11.exd5 Nxd5**
We have a typical Open Games position where Black has more space in the centre and White tries to prove the black centre is weak. Chances are balanced.
12.Bb5 Nxc3 13.bxc3 Bf6 14.d4 exd4 15.cxd4 a6 16.Bc4 Na5 17.Bxe6 Qxe6 White has managed to grab his own space in the centre, but is leaving holes behind. The c4−square is especially weak and while the engine might think the position is equal, Black is the one with the more comfortable position. **18.Rab1 Rfe8 19.Qd3 Rad8 20.Bd2** It looks like White has managed to trick Black by attacking both the a5−knight and the b7−pawn, but Ganguly has seen further. White's centre is about to crumble. **20...Nc4 21.Rxb7 c5!** The enormous pressure in the centre gives Black excellent counterplay.
22.Bc3 Qc6 23.Rbb1 Na3 24.Ra1?! Barua cracks under the pressure and after this error Black's advantage is indisputable.
[White could have kept the position equal with 24.Ba5! Nxb1 25.Bxd8 Rxd8 26.Rxb1 cxd4 27.a5! when he creates counterplay against the pawn on a6.]
24...Nxc2! Ganguly doesn't miss a chance like this. **25.Rac1**
[After 25.Qxc2? cxd4 the pin along the c−file is decisive.]
25...Nxd4 26.Nxd4 Qd6 27.Rfd1 cxd4 After the complications, Black has ended up with a clear extra pawn, but translating an extra pawn into victory isn't always easy. Ganguly does it excellently. **28.Ba5 Rc8 29.Rxc8 Rxc8 30.Rb1 Qc6!** The a4−pawn is weak.
31.Qd1 Qc4 32.Bd2 Re8 33.a5 d3 34.Rc1 Qd5 35.Qf3 Qxf3 36.gxf3 Re2 Black's rook has managed to penetrate to the second rank. White now has trouble defending both d2 and f2.
37.Rd1 Bd4 38.Be1 d2! 39.Bxd2 Rxf2 40.Kh1 Rxf3 Black's extra d−pawn is transformed into two extra kingside pawns. The win is now a technicality, but it still requires care.
41.Be1 Rf1+ 42.Kg2 Rg1+ 43.Kf3 Bf6 44.Kf2 Rg5 45.Rd6 Re5 46.Kf1 Re6 47.Rd7 g5 48.Bb4 Kg7 49.Bc5

Bc3 50.Bb6 Kg6 51.Rc7 Bb4 52.Rc4 Be1 53.Rc8 h5 54.Rg8+ Kf5 55.Rh8 Bc3 56.Rc8
[56.Rxh5 Kg6 is a very cute entrapment of White's rook.]
56...Bb4 57.Rh8 h4 58.Ra8 Kg6 59.Rg8+ Kh6 60.Rh8+ Kg7 61.Ra8 Kg6 62.Kg2 f6 63.Kf3 Kf5 64.Rxa6 Bc5 65.Kg2 Rc6 66.Kf3 Rd6 67.Ra8 Bxb6 68.axb6 Rxb6 69.Ra5+ Kg6 70.Kg2 Rb2+ 71.Kg1 Re2 72.Rb5 Re3 73.Kg2 Re2+ 74.Kg1 Re5 75.Rb6 Kf5 76.Kg2 Re2+ 77.Kg1 Ke5 78.Kf1 Re3 79.Kg2 f5 . A great game by Ganguly.

19: Correspondence 1977
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3 Rb8 9.Bxc6+ Nxc6 10.Qxc6+ Nd7 The key position for this line. Black has sacrificed two pawns, but in return he has very free development and lots of open lines for his bishops and rooks. First things first, what is White going to do about his knight on g5?
[Note that 10...Bd7?! isn't very good because of 11.Qc4! when Black has to defend f7 and this can only be done in an awkward fashion.]
11.Nf3 This position was tried extensively in the correspondence world back in 2007. Not surprisingly, White scored miserably and I think the statistics would be even worse for White in over−the−board games.
[Historically, 11.d3 has been the main move, but it scores terribly too after Be7! when the knight has to move anyway:
A) 12.Nf3 is similar to the main line, but White argues that Black's bishop could have been better placed on c5. While that might be true, Black still has excellent, rapid development after 0−0 13.Qe4 *(* surprisingly *13.0−0* loses to *Nc5!* when the queen on c6 is trapped in the middle of the board; beautiful chess *)* 13...f5 14.Qe2 e4! when 15.dxe4 fxe4 16.Qxe4? loses to Bb4+! with a crushing attack.;
B) 12.Ne4 allows Black to utilize one of the beautiful ideas behind 8... Rb8. After 12...Rb6! 13.Qa4 f5 14.Ng3 0−0 Black's initiative is very dangerous. The rook on b6 will play a key role in the upcoming attack.]
11...Rb6! A common idea. The rook is activated along the sixth rank and Black gains more time to develop his initiative.
12.Qe4
[12.Qa4 only encourages us to sacrifice more pawns. If we've already sacrificed two pawns, a third one won't matter: Rb4! 13.Qxa7 Bc5 14.Qa8 0−0 and I'd like to see anyone withstand Black's attack. Even the materialistic engines think that White is fighting for his life.]
12...Bb7 13.Qe2 Rg6! The rook shifts to the kingside where chances of a successful attack are strong. White is now more or less forced to give up the g2−pawn. **14.0−0??** Except that White fails to see why.
[Instead, 14.Nc3 Rxg2 *(14...Bb4!?* , as in I.Mathe−I.Taras, correspondence 2007, is viable too *)* 15.Nxe5 *(15.d3 Be7 16.Be3 0−0 17.0−0−0 Qa8!* is a very nice battery along the h1−a8 diagonal; Black is at least slightly better *)* 15...Nxe5 16.Qxe5+ Be7 17.Qb5+ Qd7

appears to be the best that White can do in this variation, but here Black is not the one fighting for equality.]
[Likewise, 14.d3 Rxg2 15.Be3 Qa5+ 16.Nbd2 Rg6 leaves Black with some initiative for the pawn.]
14...Rxg2+!! 15.Kxg2 Qg5+ 16.Kh3 Qf5+ 17.Kg3 Qf4+
0−1

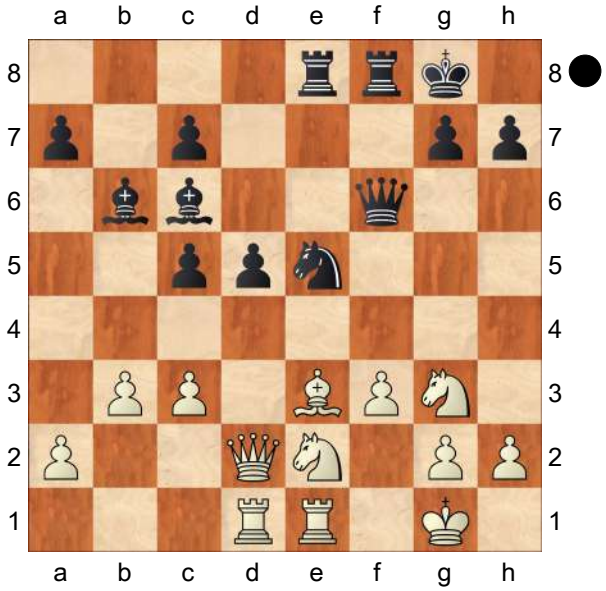
CCLA "Best Played Game − 1989". Also won Fernschach's Best game competition (se FS98/7E p316). **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bc5 8.Be3**
[8.Nxc6 Bxf2+ 9.Kf1 Qh4 10.Nd4+ *(10.Qxd5 Bc5* see Clark−Morss *)* 10...c6 11.Nf3 Ng3+! 12.Kxf2 Ne4+ 13.Ke2 Qf2+ 14.Kd3 Bf5 is given by Palkovi as a winning line for Black. 15.Nd4 Bg6 16.Rf1! is the main line in John Emms' book "Play the Open games with Black": Nd2+!? *(16...Qxg2 17.Ke3 cxb5* unclear or better for Black thinks Emms *)* 17.Kc3 Qe3+ 18.Bd3 Ne4+ 19.Kb3 Nc5+!
A) 20.Ka3 Qxd4 21.Nc3 *(21.Rf4*

Be4!−+) 21...a5!−+ Emms;
B) 20.Kc3 Ne4+= Nunn; both sides must settle for perpetual check]
[8.Bxc6+?! bxc6 9.Nxc6? Bxf2+]
8...Bd7 9.Bxc6 bxc6 10.0−0 Qe7 11.Re1 0−0 12.f3 Ng5 So far a well trodden route. Estrin's book on the Two Knights Defence makes no mention of white's next, though it appears reasonable. **13.Nd2 f6** The pawn on e5 cramps black's game, so removing it is the first aim.
[13...Bb6= Ljubojevic−Averbakh, Palma de Mallorca 1972]
14.exf6
[14.N2b3 Bxd4 *(14...fxe5 15.Nxc5 Qxc5 16.Ne6; 14...Bb6 15.e6; 14...Ne6; 14...Bb4 15.c3)* 15.Bxd4 fxe5 16.Rxe5 *(16.Bc5 Nh3+ 17.gxh3 Qg5+ 18.Kh1)*]
14...Qxf6 15.c3
[⌓15.N2b3]
15...Rae8 Here I thought Black stood better having mobilised his troops more rapidly. **16.Nf1** Solid but purely defensive. Natural appears
[16.N2b3 intending queenside play. However, Bd6!?→ in reply, with a battery against the white king, may have deterred my opponent.]
16...Bb6 17.Qd2 A standard move in this variation, interrogating the knight on g5. In this type of position black usually retreats the knight to e6, to exchange the centralised white knight on d4. Analysis convinced me that 17...♘f7 was a much better plan. The black knight now comes to e5, from which square it is difficult to dislodge. By contrast, the white knight on d4 can easily be repulsed by a timely ...c5. **17...Nf7!**
18.Rad1 Ne5 19.b3 c5 20.Ne2 Bc6 21.Nfg3



The black pieces have all reached their best squares and a sacrifice is now needed to open up the white king's position. **21...Qxf3! 22.gxf3 Nxf3+ 23.Kg2 d4** This genuine queen sacrifice is the strongest continuation but not the only way to play for a win.
[Lambert makes a strange comment here that 23...Nxd2? 24.Bxd2 d4+ 25.Kg1 leaves Black a piece for two pawns down in the ending, since the piece can be regained by d3 with a favourable position. White loses if he tries to save the Knight 26.Nf4 *(26.Nc1 c4+* 4 with mate in *)* 26...c4+ 27.Kf1 g5 and the piece is won back anyway.]
24.Qc1 Reasoning that since his king will suffer anyway, he may as well have a queen to show for it. The alternative is
[24.Kh3 (to avoid the discovered check) when Nxd2 *(24...Ng5+)* 25.Bxd2 Rf2 now gives a strong attack. Here I was unable to calculate a forced win, but White's position is unenviable. A possible continuation is

26.Nf4 *(*Fritz7 thinks Nf4 is a blunder and gives instead *26.Nxd4 cxd4 27.Rxe8+ Bxe8 28.Nh1 Re2 29.cxd4 Bxd4 30.Bf4 c5* but clearly Black stands to win with his extyra pawn and superior pieces. *)* 26...Bd7+ 27.Kh4 Rxh2+ 28.Kg5 Rf8! when the noose has tightened around the white king on g5. The threats include ...h6+ followed by ...♖f6 mate or ...c6 followed by ...♗d8+]

[RR24.Bg1 is no good; Black does not even take the queen because Ng5+ 25.Ne4 Rxe4 forces mate.]

24...Nxe1+?!

[Lambert wrote that "Tempting here is 24...Ng5+ instead, so as to answer However, with the reply of 25 ♘e4, White prolongs the game by giving up a piece to make a flight square on g3 for his king. 25.Ne4 however allows forced mate in at most 8 moves,which would have been a more fitting end in my opinion *(25.Kg1* by *Nh3#)* 25...Rxe4! 26.Nf4 *(26.Kg3 Rf3+ 27.Kg2 Rg4+ 28.Ng3 Rf8+ 29.Kg1 Nh3#)* 26...Rexf4+ 27.Kg3 Rf3+ 28.Kg4 Bd7+ 29.Kxg5 h6+ 30.Kh5 Rh3+ 31.Kg6 Bf5#]

25.Kg1 The alternative

[25.Kh3 Bd7+ 26.Kh4 Ng2+ 27.Kh5 Nxe3 leaves black with a mating attack against the lonely white king.]

25...Nf3+ 26.Kf1 dxe3 27.c4

[27.Ng1 would have prolonged the game.]

27...Nxh2+ 28.Ke1

[28.Kg1 Rf2 with a mating attack.]

28...Rf1+ 29.Nxf1 Nf3#

0−1

■ **Ostrowski,L..**

Polish Team Ch. 1999

[Paul Motwani]

G12.3: "Black day for the Evans Gambit" P.Ilczuk−L.Ostrowski, Polish Team Championship, Suwalki 1999. Evans Gambit. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** The Evans Gambit is named after Welshman William Davies Evans (1790−1872), who invented it in 1824 while captaining on board the first−ever Royal Mail steam packet to sail from Milford Haven to Waterford. The gambit received a special revival when Garry Kasparov used it a few years ago to defeat top grandmasters such as Viswanathan Anand and Jeroen Piket. Neither of them chose the very testing system which Black employs in the current game... **4...Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 Nge7!** Black wisely refrains from grabbing more material, and instead he now concentrates on furthering his development. For many years already, I have regarded the 7... Nge7 system as being one of Black's very best antidotes to the Evans Gambit

8.cxd4

[If 8.Ng5 then 0−0?? loses to *(8...Ne5 9.Nxf7 Nxf7 10.Bxf7+ Kxf7 11.Qh5+* followed by 12 Qxa5 is also unpleasant for Black. Instead, he should prefer*; 8...d5! 9.exd5 Ne5!* which keeps his position very safe and sound. *)* 9.Qh5]

8...d5 Black stops White from kicking the c6−knight with d4−d5 **9.exd5 Nxd5 10.Qb3**

[10.Ba3 Be6 is also excellent for

Black. In some lines he may follow up with ...Bb4 and ...0−0, but ...f6 and ... Kf7 is a noteworthy idea too, especially if White plays 11.Bb5 because then there would be no danger for Black's king on the a2−g8 diagonal.]

10...Be6! 11.Ba3

[If 11.Qxb7 then Ndb4! threatens to win White's queen with 12...Rb8]

11...Bb4

[11...Qd7! is excellent, and indeed Black wins instantly in the case of 12.Qxb7 Rb8 13.Qa6 Rb6]

12.Bxb4 Ncxb4 13.a3

[Black retains some advantage after 13.Bxd5 Nxd5 14.Qxb7 0−0]

13...Nc6 14.Qxb7 Na5 15.Bb5+?

[15.Qb5+ c6 16.Qc5 is sensible for White, and it also gets his queen out of any immediate danger.]

15...Kf8 16.Qa6 Nb3 17.Ra2 Nb6!

Black is partly planning a discovered attack from his bishop pointing towards White's a2−rook, but there is also a much bigger threat... **18.Rc2??**

[...and White misses it! 18.Be2 was imperative, giving the lady on a6 a much−needed flight square at d3.]

18...Bc8 Oops!

□ **Estrin,Y.**
■ **Angelov,P.**
Correspondence 1970

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.0−0 d6 8.cxd4 Bb6 9.Nc3 This more elastic option is probably also the strongest. I must admit that I am quite comfortable sharing this opinion with our great grandfathers Paul Morphy and Mikhail Chigorin. **9...Bg4**
[Besides this move and 9...Na5 (see the next two games), Black also has the following options:]
[9...Bd7 is perfectly possible. One could easily imagine play continuing 10.e5 dxe5 11.Re1 Nge7 12.Ng5!? *(*or *12.Nxe5 Nxe5 13.dxe5 Be6 14.Bxe6 fxe6 15.Qb3 Nd5 16.Ba3* with an unclear position *)* 12...0−0 13.Qh5 Bf5 14.Bxf7+ *(*not *14.dxe5? Bxf2+ 15.Kxf2 Qd4+* and Black wins *)* 14...Kh8 15.d5 Bxf2+ 16.Kxf2 Bg6 17.Qh4 Nxd5 18.Kg1 Rxf7 19.Qxh7+ Bxh7 20.Nxf7+ Kg8 21.Nxd8 Rxd8 22.Nxd5 Rxd5 23.Be3 with an unclear endgame.]
[9...Nf6?! looks dangerous because of 10.e5 dxe5 11.Ba3! when we can imagine the following lines:
A) 11...Na5 (Unzicker's recommendation) 12.Bb5+ c6 13.dxe5 Qxd1 14.Raxd1 Nd7 15.Ne4 Bc5 16.Bxc5 Nxc5 17.Bxc6+ Nxc6 18.Nxc5 and White retains some pressure.;
B) 11...Bxd4 12.Qb3 Qd7 *(*not *12...Be6? 13.Bxe6 fxe6 14.Qxe6+ Ne7 15.Nxd4 exd4 16.Rfe1 Nfg8 17.Nd5* and White won in the blindfold game, P.Morphy−C. Stanley, New York 1857 *)* 13.Nxd4 Nxd4 14.Qb2 with a strong attack.;
C) 11...−−]
10.Bb5
[Weaker is 10.Qa4?! Bd7 and then:
A) . After 11.Qb3? Na5 12.Bxf7+ Kf8 13.Qc2 Kxf7 White has no compensation for the piece, e.g. 14.e5 Nh6 15.Bxh6 gxh6 16.Rfe1 dxe5 17.dxe5 Be6 18.Rad1 Qe8 19.Nd4 Nc6 20.Nxe6 Qxe6 and Black won step by step, A. Dambacher−M.Bock, correspondence 2000.;
B) . White should probably retreat again with 11.Qd1 and then if Nf6 12.e5 dxe5 13.dxe5 Ng4 14.Bg5 Qc8 15.Nd5 Be6 16.Qa4 with some compensation, though the position is not desirable. *(16.−−)*;
C) 11.−−]
10...Kf8 This is the best way.
[Instead 10...Bxf3 11.gxf3 Qf6 12.Be3 0−0−0 13.Nd5 Qg6+ 14.Kh1 leaves White much better]
[while after 10...Bd7 11.e5 Nge7 12.Bg5 dxe5 13.Nd5 Qc8 14.Bxe7 Nxe7 15.Nxe7 Kxe7 16.Re1 Bxb5 17.Rxe5+ Kf8 18.Rxb5 White has good compensation. It is not easy to

see how Black is going to get his pieces to work together.]

11.Be3

[White only got equality out of 11.Bxc6 bxc6 12.Ba3 Bxf3 13.gxf3 Qg5+ 14.Kh1 Ne7 15.Ne2 Ng6 16.Rg1 Qf6 17.Qd3 Kg8 18.Bc1 h6 in J.Blackburne−W.Steinitz, London match 1862.]

11...Nge7 This is the right knight.

[Black never got his pieces to work after 11...Nce7?! 12.Bc4 Nf6 13.Qb3 Bxf3 14.gxf3 Qe8 15.a4 Ba5 16.Ne2 Rb8 17.Kh1 c6 18.Rg1 d5 19.Bd3 h6 20.Ng3 g6 21.e5 Nd7 22.Qa3 and White had excellent compensation in C.Schlechter−Mainter, Vienna 1898.]

12.a4 a5 13.Bc4 Qe8?! This move contains a deep strategic idea. Black is attempting to give mate down the h−file. However, in the process he will have to open up in front of his king, which seems rather dubious.

[Better was 13...Bh5! 14.Kh1 Nb4 15.d5 Ng6 16.Bxb6 cxb6 17.Rc1 when the game remains unclear.]

14.Nb5 f5?!

[Black is following his plan consistently, but it was still better to play 14...Qd7 .]

15.h3 h5 If the Romans had known chess, they would characterise a position like this as 'panta rei' (everything flows).

[It is not yet too late to play 15...Bh5 16.d5 Bxf3 17.Qxf3 Ne5 18.Qe2 Qg6 19.Bxb6 cxb6 20.exf5 Nxf5 21.Bd3 Nxd3 22.Qxd3 , though White is much better now.]

16.hxg4

[16.Re1! was even stronger, e.g. Nb4 *(* if *16...Bxf3 17.Qxf3)* 17.hxg4 hxg4 18.Ng5 d5 19.exd5 Qh5 20.Ne6+ Kg8 21.Kf1 Nexd5 22.Nexc7 Bxc7 23.Nxc7 Rd8 24.Rb1 and White wins. Over the following moves White has so many wins available that there is no reason to give them. Until suddenly White suffers from a sensational breakdown.]

16...hxg4 17.Ng5 d5 18.exd5 Qh5 19.f4 Nb4 20.Nxc7 Bxc7 21.Ne6+ Kf7 22.Nxc7 Nc8 23.d6+ Kg6

24.Nb5? Here a number of moves would still lead to a full point.

[The clearest line is 24.Bf7+! Kxf7 25.Qb3+ Kf8 26.d7 Nd6 27.Nxa8 Ke7 *(* or *27...Qh2+ 28.Kf2 Ke7 29.Nc7 Qg3+!? 30.Ke2 Qxg2+ 31.Rf2 Qe4 32.Rc1 Kxd7 33.Ne6* and wins *)* 28.d8Q+ Kxd8 29.Kf2 g3+ 30.Ke1 Re8 31.Rc1 Qf7 32.Qxf7 Rxe3+ 33.Kd2 Rd3+ 34.Ke2 Nxf7 35.Nc7 Ra3 36.Rf3 Rxa4 37.Rxg3 with a winning endgame.]

24...Nb6 25.Bb3?? A complete meltdown. Some alternatives need investigation:

[25.Rc1 Rae8 leaves White defenceless as well.]

[25.Be2 Qh2+ 26.Kf2 Rh3 is also very bad for White. After 27.Bxg4 Qg3+ 28.Kg1 Qxe3+ 29.Rf2 Nd3 30.Bxh3 Qxf2+ 31.Kh2 Qxf4+ 32.Kg1 Qe3+ 33.Kh2 Rh8 Black is close to winning.]

[25.Be6! N6d5 26.Ra3 seems to be the best chance, but Black still takes the initiative. After Rae8 27.Nc7 Nxc7 28.Bxf5+! Kxf5 29.dxc7 the position is 'equal' according to my computer, but in reality it continues to be very complicated. At

least I have not found a clear win for Black here.]
25...Nd3 26.Qxd3 g3 Now there was nothing to do but resign.
0−1

□ **Popov,I.**

■ **Ragger,M.**

21: Tromsø World Cup 2013

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3 Nd5 9.Nf3 This is the most critical continuation in my view. The knight isn't bothered by ...e4 breaks for now. The downside is White's delayed development, but if White is allowed to play 0−0, Re1 and Nc3, he will slowly be able to consolidate his extra pawn. **9...Bd6!** The best move order. Black simply develops his bishop, prepares to castle and defends the e5−pawn.

[Another big line is 9...Nf4 which could transpose to our main game after 10.0−0 *(* however, White can play the strong *10.Bf1!* when it turns out that maybe the knight on f4 isn't that well placed after all *)* 10...Bd6 .]

10.0−0

[White can't really delay castling with 10.Nc3 0−0 , because 11.Be2 is just met with f5 with a strong initiative. It's very common in this variation that Black's compensation lies in his strong pawn centre, with the question being whether White can undermine it or not.]

10...Nf4! Now that Bf1 is no longer a resource to be bothered by, Black jumps into f4, threatening to capture on d3 to destroy White's pawn structure and obtain the bishop−pair.

[My first idea was to recommend 10...0−0 11.Re1 f5!? , which is a

stunning resource I found mentioned in an excellent opening article by GM Vadim Zviaginsev. He considers this variation to be dangerous for White and with good practical chances for Black, which I totally agree with. The reason I didn't want to recommend this variation is purely theoretical, because I can't find a completely convincing route to equality if White plays optimal chess: 12.Nxe5 Qf6 13.Nf3 g5! (Black's idea is to blow White away on the kingside) 14.g3 g4 *(*it might look more natural to blow the f−file open with *14...f4* , but if White finds *15.Nc3! fxg3 16.hxg3 Nxc3 17.dxc3 Bg4 18.Bxg5 Qxf3 19.Qxf3 Bxf3 20.Re6* then he has the superior harmony and safer king; it's difficult to make Black's extra piece felt, even if White's pawns aren't dangerous yet *)* 15.Nh4 f4 16.Kh1 fxg3 17.fxg3 Nf4!? and now my suggested improvement is 18.Nc3! *(*Zviaginsev only looks at *18.Rf1)* 18...Nxd3 19.cxd3 c5 . Here White has a choice of variations to make Black's life a living hell if White is well enough prepared: 20.d4 *(*or *20.Ne4 Qd4 21.b4!?)* 20...Qxd4 21.d3 c4 22.Be3 .]

11.Re1 The most direct move, and the most popular one.

[Another popular option is to begin with 11.Nc3 . Due to simplicity I recommend Nxd3 12.cxd3 0−0 Otherwise White can transpose to our main game with

A) With this move order White gets the extra option of playing 13.Ne4!? when Black has to play accurately: Bc7! very accurate as now d3 is under attack; *(13...c5 14.b3* followed by Ba3 is uncomfortable for Black whose structure is as weak as White's *)* 14.Qc2 c5! . A wonderful strategical idea. It turns out that the pawn on c6 is more of a liability than a strength, so Black sacrifices the pawn for more activity and harmony. *(14...Ba6* would be met by *15.Nc5* when White has a solid blockade *)* 15.Qxc5 *(15.b3* prepares Ba3 and slowly picking up the c5−pawn; however, *Bg4* followed by ...Bxf3 gives Black great compensation with a potential attack on the kingside*; 15.Nxc5 Bg4* is similar: White can't prevent an ugly kingside structure from arising *)* 15...Ba6 16.Re1 Bxd3 17.b3 when Black has 'only' sacrificed a pawn. His strong bishop−pair and activity provide sufficient compensation. This was the top correspondence game D.Olofsson−H.Repp, correspondence 2011, which ended in a draw.;

B) 13.Re1 .]

11...Nxd3 12.cxd3 0−0 13.Nc3

[Critical is, of course, 13.Nxe5 , when Black is down two pawns. However, White's central pawn structure isn't impressive and Black has much the better development and a nice bishop−pair: c5! *(*the most popular continuation is *13...Re8 14.d4 c5* but I'm not too keen on playing Black's position after *15.d3 cxd4 16.Nf3 Rxe1+ 17.Qxe1 Bf5 18.Nxd4 Bxd3* , as in P.Negi−G. Sargissian, Copenhagen 2009; White has the fun side of a probable draw *)*

14.Nc3 *(*if White now goes *14.d4 cxd4 15.d3* , we don't have to agree to a trade of heavy pieces along the e−file; instead, we can go *Qc7* with decent compensation *)* 14...Bb7 15.b3 . This was all played in A.Smith−F.Urkedal, Norwegian Championship, Oslo 2011, and here Black had Re8 16.Nc4 Rxe1+ 17.Qxe1 Nxc4 18.dxc4 Bxh2+! 19.Kxh2 Qh4+ 20.Kg1 Bxg2 21.Kxg2 Qg4+ with perpetual check.]

[Instead, 13.b3 is a normal idea, but Black has enough time to set−up an effective bind with c5 14.Ba3 f6 *(*or *14...Nc6!? 15.Nc3 Bg4 16.h3 Bh5* when Black seems to have enough counterplay with ...f5 and ...Nd4 *)* 15.Nc3 Ba6 16.Ne4 Bxd3 17.Nxc5 Bxc5 18.Bxc5 Rf7 . Black's central grip seems to give him sufficient compensation.]

13...Re8 Keep in mind that this position can arise from an 11 Nc3 move order as well. Black has defended e5 and will try to put pressure on White's weakness on d3, while White will try to develop and establish some pressure against Black's pawns. **14.Ne4**

[Again, there are alternatives: 14.b3 looks natural, but Ba6! 15.d4 exd4 16.Rxe8+ Qxe8 17.Nxd4 c5 18.Nf5 Bf8 gives Black sufficient compensation for his pawn. He has an excellent bishop−pair, development and open lines, so might well develop an initiative.]

[Nigel Short tried 14.h3 in a blitz game against none other than Garry Kasparov in 2011. It didn't work out very well though. After c5 15.b3 Ba6 16.Ba3 Bxd3 Kasparov was already for preference and went on to win.]

14...c5! Perhaps a slight surprise. The pawn on c5 is obviously a strategical target, but at the same time Black activates his forces and gives his a5−knight an important square on c6. **15.b3**

[15.Nfg5!? is a surprising suggestion by the engine that hasn't been tried yet. Following h6 16.Nxf7! Kxf7 17.Qh5+ this is White's grand idea, namely that the king can't return to g8 because White would take on d6 when e8 is unprotected; *(*instead, White might be tempted into playing *17.Qf3+? Kg8 18.Nxd6 Qxd6 19.Qxa8* , but after *Nc6!* his queen is stuck in the corner *)* 17...Kf8 18.Re3 Bb7 19.Rf3+ Kg8 20.Nf6+ Kf8 21.Ne4+ Kg8 the game seems to end in a draw.]

15...Nc6 The knight is redirected to b4 where it puts heavy pressure on d3 and defends c5 indirectly. **16.Ba3 Bf8!** Very accurate.

[Black can't immediately play 16...Nb4 because of 17.Bxb4 cxb4 18.d4! when White breaks free and his material advantage begins to tell. Black must maximize his pressure along the d−file first.]

17.Bxc5?! A miscalculation by the Russian GM.

[Instead: 17.d4 Nxd4 18.Nxd4 cxd4 19.Bxf8 Rxf8 looks about equal.]

[The most challenging move is 17.Rc1! Nb4 18.Bxb4 cxb4 19.Ng3! , as played by Tatev Abrahamyan in 2014. Here I think Black should play the simple Qxd3 20.Nxe5 Qd5 21.d4 Bb7 when the pair of bishops provides sufficient compensation. White has very few chances of realizing the extra

pawn and ...a5−a4 is on the cards. Moreover, I certainly think that Black can fight for the full point here.]

17...f5! 18.Neg5?

[18.Bxf8? loses material after fxe4 when both f8 and f3 are under attack, but White could have maintained reasonable chances with 19.Bxg7! , when White has some chances of counterplay against Black's weaker king.]

18...Bxc5 19.Qc2 Qd5 20.Rac1 This is probably what White was counting on. Black can't defend both pieces on the c−file, but there's a nice tactical trick in the position. **20...Bxf2+! 21.Kxf2 Nb4** Black wins heavy material. The threats of ...Nxc2 and ...Nxd3 aren't possible to defend against. **22.Rxe5!** The best try. **22...Rxe5 23.Qxc8+ Re8 24.Qc4 Nxd3+ 25.Kg3 f4+**

[It was perhaps easier to go 25...Qxc4 26.Rxc4 h6 27.Nh3 g5! when Black has everything under control. White's knights can't really co−operate to do anything useful.]

26.Kg4 Rad8 27.Qxd5+ Rxd5 28.Rc4 h6 29.Nh3 Black has reached a technically winning endgame, in which White fought on for a long time. I could go into detail with this interesting endgame, but I don't think it's very relevant to the theme of this book, so I'll leave the rest of the game unannotated in case the reader would like to see how the game concluded. **29...Re2 30.Nxf4 Nxf4 31.Kxf4 Rxg2 32.Rc7 Rd8 33.Rxa7 Rf8+ 34.Ke3 Re8+ 35.Kd3 Rf2 36.Nd4 Rxh2 37.a4 Rd8 38.Kc3 Rc8+ 39.Kb4 Rxd2 40.Nf5 Rb8+ 41.Kc3 Rg2 42.b4 Rg5 43.Ne7+ Kh7 44.b5 h5 45.Nc6 Rf8 46.Kb4 Rf4+ 47.Ka5 h4 48.Rd7 h3 49.Rd1 Rgg4 50.Kb6 Rxa4 51.Rh1 Rh4 52.Kc7 Rac4 53.Kd7 Rh6 54.Ne5 Rc5 55.Nf7 Rb6 56.Rxh3+ Kg8 57.Nd8 Rd5+ 58.Ke7 Re5+ 59.Kd7 Rbxb5 60.Nc6 Rbd5+ 61.Kc7 Re6 62.Rc3 Rf5 63.Kd7 Rff6 64.Ne7+ Kf7 65.Nc8 Re1 66.Nd6+ Kg8 67.Rd3 Ra1 68.Nc8 Raa6 69.Re3 Rf7+ 70.Ke8 Ra8 0−1**

□ **Schiffers,Emanuel Stepanovich**

■ **Shumov,Ilia S**

St Petersburg casual 1876

[Petronijevic,Zoran]

1.e4 e5 2.Nf3 Nf6 3.Bc4

[Nowadays more often played are either 3.Nxe5]

[or 3.d4]

3...Nxe4 4.Nc3 Nc6

[After the text move, Black transposes to Two Knights defense opening. Modern theory suggests 4...Nxc3 5.dxc3 f6∓ with a small edge for Black.]

5.0−0?

[After the game move, Black has a clear edge. Stronger was 5.Nxe4 d5 6.Bd3 dxe4 7.Bxe4 with an even play.]

5...Nxc3 6.dxc3 Qe7

[Stronger was 6...f6∓]

7.Ng5?!

[Too violent. More subtle was 7.b4]

7...Nd8 8.Re1 f6

[Very tempting was 8...g6∓]

9.Ne4 c6?

[After the text move White has an excellent position. In old books suggested was 9...Nc6 which also is not the best. White has 10.Bd5 and he is compensated for a pawn.]

[The best is 9...d6!∓ after which Black has a clear edge.]

10.Qh5+! g6 11.Qf3?

[At this time White makes a mistake. Better was 11.Qh4 d5 12.Nxf6+ Kf7 13.Bg5 with an unclear play.]

11...Bg7?

[A mistake. After the best 11...f5 12.Ng5 Bg7 with the next d5, Black has a decisive advantage.]

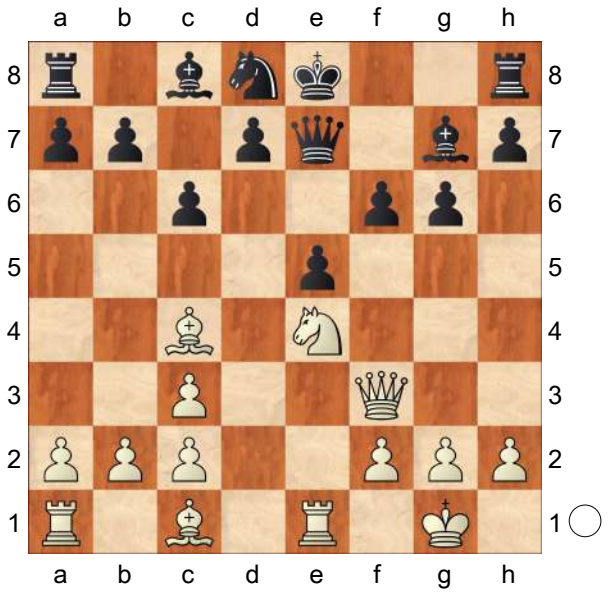
(Diagram)

12.Bh6!! Great tactical blow! White is winning. **12...Rf8?**

[Black cannot take the bishop 12...Bxh6 because of 13.Nxf6+ Kf8 14.Ng8++−]

[Lesser evil was 12...b5 13.Bb3 Nb7 although Black is toasted, he can put a lot of resistence.]

13.Nd6+?



[Premature idea. White wants to earn an exchange, but this is not the best plan. After the best 13.Bxg7 Qxg7 14.Nd6+ Ke7 15.Rad1+− Black is lost.]

13...Qxd6 14.Bxg7 Qe7 15.Bxf8 Kxf8 Black has won an exchange, but the position is not winning anymore: Black has strong pawns in the centre that gives him a decent counterplay.

16.Re3?!

[White should have included his worst piece 16.Rad1±]

16...d5 17.Bf1 Nf7 The position is unclear. **18.Rae1 Kg7 19.Qd1**

[19.c4 seems more sound.]

19...Be6 20.f4

[Again 20.c4 was stronger.]

20...e4 21.c4 Nd6

[21...Nh6!?]

22.cxd5 cxd5 23.g4

[23.Qd2!?]

23...Rd8 24.c3 b6

[Very interesting is wierd 24...h5 25.gxh5 Nf5]

25.Rg3 Kh8

[Stronger was 25...f5 keeping an equality.]

26.h4

[Very strong was the Queen's centralization 26.Qd4]

26...Nb7?!

[Interesting was sharp 26...h5]

27.Qd4 Qg7?

[Better was 27...Nd6 preventing strong c4.]

28.b4

[Black misses a winning move 28.c4!+−]

28...f5 29.g5

[Better was 29.gxf5 Bxf5 30.Rd1+−]

29...Bf7

[Stronger was 29...Nd6±]

30.Ree3

[30.Rd1!]

30...Rd6 31.h5?

[31.Rg2=]

31...gxh5! 32.Be2 Nd8!

[Better than 32...Qxd4 suggested by Linder 33.cxd4 Nd8 34.Ra3 the position is even.]

33.Qxg7+ Kxg7 34.Rh3 Ne6 35.Rh4 d4

[Very tempting was 35...a5!?]

36.cxd4 Rxd4 37.a3?

[Square a3 is necessary for creating a counterplay through it 37.Ra3=]

37...Rd2 38.Kf2?

[The text move loses on the spot. Better was 38.Bc4 keeping an even play.]

38...Nd4−+ 39.Ke1 Rxe2+ 40.Rxe2 Nf3+ 41.Kf2 Nxh4 42.Rc2 Nf3 43.Rc7 h4 44.Rxa7 h3 45.a4 h2 46.Kg2 Kf8 47.a5 bxa5 48.b5 e3 49.b6 e2 50.Rxf7+ Kxf7

C52

□ **Hansen,SB.**
■ **Stefansson,H.**
Copenhagen 1994

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 d6 7.Qb3 Qd7 8.dxe5 dxe5 9.0−0
[This move is more popular than 9.Ba3 , which we will look at in the next game.]
9...Bb6 10.Rd1 The most obvious and best move. The alternatives are not dangerous:
[10.Bb5 regains the pawn, but nothing more. After Qe6 11.Qxe6+ Bxe6 12.Bxc6+ bxc6 13.Nxe5 Ne7 14.Ba3 c5 15.Nd2 f6 16.Nef3 0−0−0 Black's game was preferable in R.Duhrssen−P.Keres, correspondence 1935.]
[10.Ba3 Na5 11.Nxe5!? Nxb3 12.axb3 Qe6 *(*not *12...Qd8 13.Bxf7#)* 13.Bxe6 Bxe6 14.Nd2 a6 is just equal according to Euwe.]
10...Qe7 11.a4?! Black now h as time to bring the dark−squared bishop back into the game. Therefore some alternatives seem to be required:
[11.Rd5?! is no help after Be6! 12.Qa4 *(*if *12.Bb5?! a6 13.Ba3 Qf6* and White's attack has gone; if *14.Ba4 Nge7 15.Bxe7 Qxe7 16.Qc2 f6 17.Bxc6+ bxc6 18.Rd1 0−0* and Black is clearly better *)* 12...Bd7 13.Qb3 Na5 *(13...Be6* repeats *)* 14.Rxa5 Bxa5 15.Qxb7 Rd8 16.Ba3 Qf6 17.Qd5 Bb6 18.Qxe5+ Qxe5 19.Nxe5 Nh6 and only Black has chances to win, e.g. 20.Nd2 Ba4 21.Bd5 f6 22.Nc6 Bxc6 23.Bxc6+ Kf7 24.Bd5+ Kg6 25.Nc4 Ng4 and Black is better.]
[11.Ba3! Qf6 12.Bb5 seems to be strongest here, e.g. Nge7 13.Nbd2 Be6 14.Nc4 0−0 15.Bxc6 bxc6 16.Qa4 Bxc4 17.Qxc4 Rfe8 18.Bxe7 Rxe7 19.Rd3 and White has an edge, despite the pawn minus.]
11...Bc5! The bishop cleverly returns to fight for the a3−f8 diagonal. Other moves have been problematic for Black:
[11...Na5?! 12.Bxf7+ Qxf7?? *(12...Kf8 13.Qa2* was forced *)* 13.Rd8+ Ke7 14.Bg5+ Nf6 15.Qxf7+ Kxf7 16.Rxh8 won the exchange in M. Zulfugarli−S.Dovliatov, Minsk 2000.]
[11...Nh6 12.a5 Bxa5 13.Ba3 Qf6 14.Bb5 Bd7 15.c4 and White has more than enough compensation for the pawns according to Keres, mainly because of the poor position of the bishop on a5.]
[11...a5 seems natural, but gives White the tempo back, e.g. 12.Bd5 Bg4 13.Rd3 0−0−0 14.Ba3 Qf6 15.Nbd2 Nge7 16.c4 Nxd5 17.cxd5 Nd4 18.Qc4 Ne2+ 19.Kf1 Nf4 20.Rb3 Kb8 (G.Tiedt−A.Sickfeld, correspondence 1990) and now after 21.Rab1 White has a terrific attack.]
[11...a6 12.Ba3 Qf6 13.a5 *(*or *13.Bd5!? Nge7 14.Nbd2* intending Nc4, keeping up the pressure *)* 13...Ba7 14.Bd5 Nge7 15.Ra2 0−0 16.Bxc6 bxc6 17.Rad2 with good compensation for the pawn according to Matsukevitch.]
12.a5 a6
[If 12...Nf6 13.a6! bxa6 14.Bd5

with compensation.]

13.Bd5

[If 13.Ba3 Bxa3 14.Nxa3 Nf6 15.Bd5 0−0 16.Bxc6 *(* or *16.Nc4 Bd7 17.Qxb7 Rfb8 18.Qxc7 Ne8 19.Bxf7+ Qxf7 20.Qxd7 Qxc4)* 16...bxc6 17.Qc4 *(* or *17.Nc4 Be6)* 17...Bg4 18.Rd3 Nd7 and Black's position is preferable.]

13...Nf6 14.Bg5?!

[Better was the unattractive 14.Ba3 0−0 15.Bxc6 bxc6 16.Qc4 Bxa3 17.Nxa3 transposing to the previous note. Now White is quickly getting into deep trouble.]

14...0−0 15.Nbd2?!

[Or 15.Bxc6 bxc6 16.Nbd2 h6 and Black is at least slightly better. Now Black retains the knight and brings it to the very useful f4−square.]

15...Nd8! 16.Qa2 Ne6 17.Bh4 Nf4 18.Bc4 Ng6 19.Bg3 Nh5

White's initiative is dead and buried, while the extra black pawn is still alive and kicking. **20.Rab1 Kh8 21.Re1 Nhf4 22.Nf1 Qf6 23.Ne3 b5 24.axb6 cxb6 25.Qc2 b5 26.Ba2 Bd7?!**

[26...Bxe3 27.Rxe3 Be6 28.Bxe6 Qxe6 was simpler, when Black is just technically winning.]

27.Rbd1 Be6 28.Bxe6 Qxe6 29.Nd5 Rad8 30.Ng5 Qe8 31.Bxf4 exf4 32.e5?!

[Better was 32.Qe2 h6 33.Qh5 Kg8 34.Nf3 Qe6 35.Nd4 and White has serious drawing chances.]

32...h6 33.Nf3

[Also after 33.Ne4 Qc6 34.Nxc5 Qxc5 35.Qe4 Rfe8 36.Nxf4 Nxe5 Black is close to winning.]

33...Qc6 34.Qe4?

[34.Qa2 was a better try, though after Qe6 35.Rd2 Rd7 36.Nb4 Rxd2 37.Qxd2 Rc8 Black should still win at the end of ends.]

34...Ne7 Winning a piece. **35.Nf6 gxf6 36.Qxf4 Ng8 37.Nh4 Rxd1 38.Rxd1 Qe6 39.exf6 Rd8 40.Ra1 Qxf6 0−1**

43: Bled 2003

[Martin Lokander]

1.e4 e5 2.Nf3 Nf6 3.Nc3 Nc6

4.Bc4!? This is a controversial move. As far as I'm concerned, almost all literature believes it to be a beginner's mistake and gives it a '?!' symbol or even a plain question mark. I believe the criticism to be slightly over exaggerated and that Black still needs to play accurately. However, it is true that many beginners will play this seemingly natural developing move and continue sub−optimally after Black's 'refutation'.

4...Nxe4! A well−known trick, which is supposed to even refute 4 Bc4, but I don't think it's as bad for White as the books seem to think. **5.Nxe4!**

[Less experienced players might be tempted into 5.Bxf7+? Kxf7 6.Nxe4 , luring Black's king out in the open while regaining material. However, Black's king isn't exposed at all and he will just get a fantastic position by expanding in the centre with d5! followed by ...e4 when White loses a lot of time.]

[The third move, which is actually a respectable gambit, is 5.0−0 and this will be covered in our next game.]

5...d5 6.Bd3! Best.

[The most common move in the database is 6.Bxd5 Qxd5 , but naturally this hasn't been played by many strong players. Black is active and has the bishop−pair in an open position where his advantage

is undeniable.]
[Neither is 6.Bb5? dxe4 7.Nxe5 a good idea, since Black can play Qg5! 8.Nxc6 Qxb5 when he once again has the better development and the bishop−pair.]

6...dxe4
[Kaufman makes a great case for the very uncommon 6...Nb4!? , but after 7.Ng3 e4 8.Be2 exf3 9.Bxf3 it feels like the position can quickly become relatively dull. The structure is similar to the Exchange French or some boring variation of the Berlin Wall and even though both players can fight for a win, I'd prefer a more unbalanced structure.]

7.Bxe4 Bd6 Even though the engines think the resulting positions are about equal, I like Black's aggressive potential. He can easily drum up a kingside attack with ...f5 as in our main game. **8.0−0**
[White has also tried 8.d4 , but things aren't so easy for him after exd4 and now:
A) . After 9.Nxd4 0−0 White's pieces are awkwardly placed: 10.Nxc6 *(10.0−0?* loses a piece to *Nxd4 11.Qxd4 Bxh2+)* 10...Qh4! (a very strong zwischenzug) 11.Bf3 Re8+ 12.Kf1 bxc6 and Black is clearly better.;
B) . Sometimes White starts with 9.Bxc6+ bxc6 10.Qxd4 when we have a classic case of the bishop−pair versus pawn structure, but Black's bishops look really nice after 0−0 11.0−0 c5 followed by ... Bb7 and ...Qf6 with some initiative.;
C) 9.−−]

8...0−0 9.Re1! A very solid continuation, increasing the pressure on the e5−pawn while not declaring anything in the centre. It does slow down a future ...f5 at least.
[9.d3 is a bit passive and after Ne7! White has to be careful about ...f5, trapping the bishop on e4.]
[9.c3 might prepare a future d2−d4, but Black can quickly seize some initiative with f5! 10.Bd5+ Kh8 11.d3 and now h6 followed by ...Qf6, with similar play as in our main game.]

9...Re8 Protecting e5, which is a good idea, but there's another untried idea which might solve Black's problems immediately.
[Indeed, 9...Nb4!? is an important idea, since Black seems to obtain a good position by force: 10.a3 *(10.c3* might looks more natural, but Black will play actively in the centre: *f5 11.Bb1 e4!* with good play *)* 10...f5! 11.axb4 fxe4 12.Rxe4 Bf5 . Black has very active bishops in return for the pawn and White should probably sacrifice the exchange with 13.Qe2 Bxe4 14.Qxe4 , but even though White has some compensation, I definitely don't think he is close to having an advantage.]

10.c3 h6! Useful preparation for ...f5.
[If Black is too hasty and plays 10...f5 , White would quickly seize the initiative after 11.Bd5+ Kf8 12.d4! with ideas of Ng5.]

11.d3 f5 Initially the engine frowns at this idea, but sooner or later it realizes that it's actually not that bad. At least in practice I very much like Black's chances. **12.Bd5+ Kf8 13.a3 Qf6 14.b4 Ne7 15.Ba2 Ng6!** Black has played very sensibly, manoeuvring the knight towards the kingside while White

has been seizing space on the queenside for unclear reasons. **16.Bd2 c6 17.Qc2 Be6 18.c4 Bf7 19.Rab1 Rad8** I don't like White's queenside attack. Indeed, I don't really see what there is to attack on the queenside and meanwhile Black has focused his forces in the centre. White now quickly goes astray in our main game. **20.c5?! Bxa2 21.Qxa2 Bc7** White's d−pawn is clearly retarded, but after... **22.Rbd1?? e4!** ...he had to resign immediately since the knight is trapped on f3.
0−1

2: Oslo 2013
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Nc3!? This natural developing move isn't very common, perhaps because of its somewhat dull reputation. I once played the Sicilian Dragon just to avoid facing this variation, but after looking at it closer, I've realized that Black has plenty of chances to fight for the win. We will look closer at this move in Game 4. **6...d6** This looks obvious, but some might not realize that Black's last move carries a strategical threat. **7.h3** I was shocked to learn that this move has been played over 1,500 times! Black scores a stunning 63% after the next move. White is afraid of ...Bg4 and ...Nd4, but that's not what she should be worried about. **7...Na5!** Here we go! White can't prevent an exchange of the c4−bishop, after which Black will have an easy game and the bishop−pair. Notice how ...d6 enabled this knight lunge by protecting the e5−pawn. **8.Bg5** I assume White wants to control the d5−square, but this fails to worry Black.

[However, 8.Bb5 doesn't help because a6 9.Ba4 b5 forces 10.Bb3 when Black will get the bishop after all.]

8...c6 Black doesn't have to hurry; the bishop on c4 won't go anywhere. **9.a3** White now threatens to save the bishop by playing Ba2. It's time to take it. **9...Nxc4 10.dxc4 Be6 11.b3 Qc7** The opening phase is about to finish. What we notice is Black's bishop−pair and White's semi−open d−file. It might seem like White has decent counterplay against the d6−pawn, but it's very difficult to get to it. When looking closely, we notice that White's knights have a hard time finding useful targets. Black's flexible pawn structure eliminates many good outposts and we will throughout the game see how White's knights struggle. Black has a solid advantage. **12.Nh2** White tries to relocate his knight, but it doesn't turn out very well. **12...Rad8 13.Qf3 h6!** A clever move which forces some sort of commitment from White. **14.Bxf6 Bxf6 15.Ng4 Bg5 16.Ne3 g6!** This nice move kills White's counterplay. It's obvious that White doesn't have a good plan here and although the game continuation isn't the best, it is difficult to suggest anything better. **17.g4?! Qe7** Black goes for a favourable endgame, but this might not have been the best way to punish White's last move.

[17...Kg7 followed by ...Rh8 and ...h5

would have been a very dangerous idea.]

18.Ne2 Qf6 19.Qxf6 Bxf6 Black has managed to reach a favourable endgame where he can grind for hours, but I can't help feeling White got more breathing space than she deserved. **20.Rad1 h5 21.f3 Kg7 22.Rd3 hxg4 23.hxg4 Bg5** An excellent square for this bishop. **24.Ng3 Rh8 25.Kg2 Kf6! 26.Rfd1 Ke7** Black doesn't hurry. He knows that White can't do anything active and thus takes his time to improve his pieces. **27.Rh1 Rxh1 28.Kxh1 Rc8!** After trading one pair of rooks, Black no longer needs his rook on d8. Trent prepares the ...b5 break when the rook would be very well placed on the c−file. **29.Ngf1 b5! 30.cxb5 cxb5 31.Kg2** Black has managed to open the position and now proceeds to fix the queenside structure to his advantage. **31...a5! 32.Kf2 Kd7 33.Ke1 Ra8 34.Kd1 a4 35.b4 Rh8! 36.Nd5 f5?!** Probably a slight inaccuracy in an otherwise very well played endgame.

[Black should probably include 36...Rh3 first, to prevent White's opportunity in the game.]

37.gxf5 gxf5 38.Ng3! White is still worse, but she has been invited back into the game as her knights finally find useful to work on. Unfortunately for White, the very next move spoils it.

38...f4 39.Ne2?

[Dolzhikova could have taken her chance with 39.Nf5! , after which the d6−pawn finally suffers. Should Black take on f5, the d5−knight will relocate to e4 via c3.]

39...Rh1+ 40.Kd2 Bh4! Now White is busted. Black has fully penetrated White's camp and his bishops can start working against White's weaknesses. **41.c3 Rh2! 42.c4** A desperate breakthrough, trying to activate White's passive pieces. **42...bxc4 43.Rc3 Bxd5!** Trent spots his chance and finds a nice tactic. **44.exd5 e4!** A very nice counter breakthrough. **45.fxe4 Bf6!** The point. White can't handle Black's passed pawns. **46.Rf3 c3+ 47.Kd3 c2 48.Nc1 Bb2 49.Rf1** It looks like White is resisting well, dealing with both the f−pawn and the c−pawn, but Black has another pawn coming. **49...Bxa3! 50.Kc3 Bxc1 51.Rxc1 f3 52.Rf1 Re2 53.Kd3 a3!** Three pawns are more than White can handle. **54.Rh1 a2 55.Rh7+ Kc8 56.Rh1 Kb7**

[Renet]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.e5 Ng4 6.0−0 d6 7.exd6 Bxd6 8.Re1+ Kf8! At first White seems to have classic compensation (a pawn for a bad king). In fact Black has active pieces and in many lines can even take the initiative. But he has to be very accurate and this is not so easy in a practical game.

[8...Be7 9.Bb5! Bd7 *(9...0−0 10.Bxc6 bxc6 11.Qxd4±)* 10.Bxc6 Bxc6 11.Nxd4 Bd7 12.Bg5 f6 13.Bf4 0−0 14.Nc3±]

9.c3 This is the best try, in all the other games I mentioned Black lost, but it is quite easy in each case to find improvements for Black.

[9.Na3 Qf6 10.Bg5 *(10.Nb5 Bxh2+! 11.Kf1 Bd6 12.Nxd6 Qxd6∓)* 10...Bxh2+ 11.Nxh2 Qxg5 12.Nf3 Qf4! 13.Nb5

A) 13...Bd7! 14.Nbxd4 *(14.g3 Qf5 15.Nxc7 Rc8 16.Bd3 Qc5 17.Nb5 a6∓)* 14...Nxd4 15.Qxd4 Qxd4 16.Nxd4 Re8∓;

B) 13...Nce5? If Black had played the quiet 13...Bd7 White would have found it hard to prove any compensation. 14.Nxc7 Nxf3+ 15.Qxf3 Qh2+ 16.Kf1 Ne3+ 17.fxe3 Qxc7 18.Bd5± 1−0 Plachetka,J−Smejkal,J/Ostrava 1994 (36)]

[9.h3!? Nge5 10.Bb3 Qf6 11.Nbd2 Bd7

A) 12.Nxe5 Nxe5 13.Ne4 Qg6

14.Ng5 *(14.Nxd6 Bc6!∓)* 14...h6 15.Rxe5 hxg5 16.Rxg5 Qf6 17.Rh5 Rxh5 18.Qxh5 Kg8=;
B) 12.Kh1?! This too slow. 12...Nxf3?! Black has an excellent position and should never lose. 12...Re8 suggests itself with a very comfortable position. But Black embarks on bad exchanges and finishes with a dire position. 13.Nxf3 h6 14.c3 Ne5 15.Nxe5 Bxe5 16.cxd4 Bd6 17.Be3± 1−0 Zelcic,R−Wieser,R/Salzburg 2003 (66)]
[9.Bg5 Bxh2+ 10.Kf1 Qd6 11.Na3 Bd7∓]

9...Qf6! 10.cxd4 Bxh2+ With this move Black not only wins a pawn but also gets serious counterplay against the king. **11.Kf1 Bd6 12.Nc3 Bf5 13.Ne4 Qg6**
[13...Bxe4 14.Rxe4 Qf5!?]
14.Nxd6 Qxd6 15.Bg5?!
[15.Kg1!?⩱ White has some play, but Black can keep the position in a dynamic equilibrium with the active 15...Rd8.]
15...Nh2+! 16.Kg1 Bg4 17.Be2 Nxf3+ 18.Bxf3 h5 19.Re3
[19.d5 Ne5 20.Be2 f6 21.Bf4 Bxe2 22.Qxe2 Re8∞]
19...Kg8 20.Qb3?
[20.d5 was necessary. White decides to grab some pawns on the queenside but leaves the center and the whole kingside to Black.]
20...Nxd4 21.Qxb7 Bxf3 22.gxf3 Kh7∓ From now on White goes downhill quickly because his kingside is too weak. **23.Bh4 Rae8 24.Rae1 Rxe3 25.fxe3 Nf5 26.Bf2 Re8 27.e4 Nd4−+ 28.Re3 Qf4 29.Qxa7 Nxf3+ 30.Kg2 Ne5 31.Qxc7 Re6−+ 32.a4 Rg6+ 33.Kf1 Rf6 34.Re2 Qf3 35.Ke1 Nd3+ 36.Kd2 Nxf2 37.e5 Qf4+ 38.Kc2 Ng4 39.Kb1 Qf1+ 40.Ka2 Qxe2 41.exf6 Qe6+ 42.b3 Nxf6 43.a5 Nd5 44.Qc2+ g6 0−1**

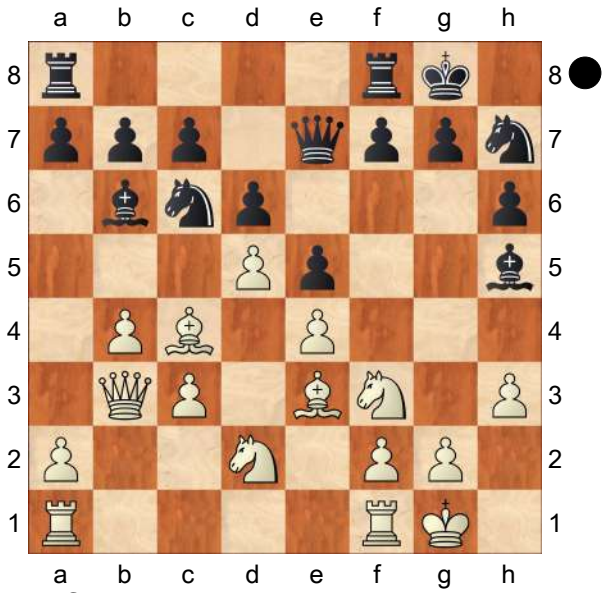
□ **Morris,JP.**
■ **Bridger,W.**
Sussex Chess Association tourney
[Sussex Chess Journal #47; Harding]

Sussex Chess Journal iv no 47 (Nov. 1892) pp 6−7. 'A game played in Sussex Corr. Tourney'. Morris (Midhurst) v Bridger (Lodsworth) **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.b4**
As this advance only drives the B to a safe square and moreover weakens the pawns on the Q side, we consider it much inferior to either P to Q3 or P to Q4. **5...Bb6 6.d3 d6 7.0−0 0−0**
He might safely postpone castling for the present, anyhow until he had brought his Q Kt via K2 to Kt3, where it would be better posted, **8.Bg5 Be6 9.Nbd2 h6 10.Be3 Nh7** It is not easy to see why this should be preferred to the more obvious continuation, beginning
[10...d5]
11.d4 A quiet developing move such as
[11.Re1 was preferable here,]
11...Bg4 For now
[11...exd4 12.Nxd4 Nxd4 13.cxd4 d5 would give Black the superior game,]
12.h3 Bh5 13.Qb3 Qe7 14.d5
Diagram

(Diagram)

14...Bxe3 15.dxc6 Bxd2 16.cxb7?
[RR16.Nxd2 but no comment from the editor − TH]



16...Bxf3 Black here gives up the exchange for an attack, which we believe ought not to have succeeded. TH: It is a winning move! **17.bxa8Q Rxa8 18.gxf3 Qg5+ 19.Kh1 Qh4?!**
TH: this is an error; Black should play
[RR19...Qh5−+]
20.Bxf7+? To this weak move he may attribute the loss of the game, His best play was
[20.Kg2 whereupon, Black by repeating his moves could draw, but if he tried to win by Ng5 the answer *(RR20...d5!?∞)* 21.Rh1 would make everything secure, and give White the best game.]
20...Kh8 21.Be6 Ng5 22.Kg2 Rf8 23.Bg4 Rxf3!
[RR23...h5!?]
24.Qa4 Rf8 25.f3? Only making matters worse, but it is not easy to find a satisfactory move for him.
[RR25.Qd7∓]
25...Bf4 26.Qc2 h5 27.Rh1 Qg3+ 28.Kf1 hxg4 29.hxg4+ Kg8 30.Qd3 Nh3 31.Qd5+ Kh7 32.Ke2 Bh6 33.Rxh3 Qxh3 34.Rf1 Qh2+ 35.Rf2 Qf4 And won later on. 'The game is now

practically won and it is only necessary to say that Mr Bridger's play from the 20th move is exceedingly good.'
0−1

☐ **19) All the Games: 7...h6**
■ **8) Alexey Kulman vs. Ioan Mih,N**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 h6 7.0−0 Qf6 8.Na3 a6?! Again with the wing pawns. See lesson 13 [/variation/13988490] of chapter 17 for this slow move. The thing is, even if an enemy Knight gets to b5 it's not much of a threat there. **9.Bb3!?** Aiming for 10.Nc4 , but Black now reverts to the exchange strategy. The Knight ought to have trotted on with (9. Nc2 as in the previous [/variation/

13827459] game. **9...Bxa3 10.Bxa3 d6∞** Here Ol' Sparky stopped mining Bitcoin long enough to suggest that Black has already equalized. **11.h3?!**
[Probably a wasted move. Best now was 11.dxe5 dxe5 and regroup with 12.Ne1 Nge7 13.Nd3∞ , intending f2−f4 next. Unclear.]
[As usual, the advance 11.d5!? is suspect, met by Na5 12.Ba4+ b5 when we see an exception to our rule about this move. If now 13.Bb4 Nc4 14.Bb3 Nb6∓ with a fine game, about +0.30 for Black.]
11...Nge7 12.dxe5 dxe5∓ 13.Qe2?! 0−0∓ 14.Ne1 It's too late for that now. **14...Re8** Black is completely untangled, holding his clear advantage. **15.f4?**
[A bad mistake; better to have played 15.Nd3 though after Ng6∓ it's Black for choice.]
15...exf4 16.Nd3 Ng6 17.Bc1 Be6 18.Bc2? This makes it worse; Black has no more problems. **18...Bc4 19.Qf2 Bxd3 20.Bxd3 Qxc3 21.Bb1 Qd4**
[Simple and good. Also good but less simple is 21...Nce5 , and especially]
[21...Qxa1!? 22.Bb2 Qxb1 23.Rxb1 Rxe4 , but still winning.]
22.Bb2 Qxf2+ 23.Rxf2 Nd8 Two Knights vs. two Bishops, but the three extra Black pawns will have their say. **24.Bc2 Ne6 25.Re1 Rad8 26.Bc3 Nc5** Black's first job is to get one of the enemy Bishops, or at least blunt their activity. He uses the threatened jump into d3 to set up a fine blockade. The relentless Machine, however, wants to go (26...b5 or else 26...c5 right off. **27.Ree2 Nd3 28.Rf1 Nde5 29.Rb1 b5** Now we're in motion. **30.Kf2 c5 31.Ba5 Rd7 32.a4?!**
[Better to yield a set of Rooks with 32.Rd2 Rxd2+ 33.Bxd2 Nc4 34.Bc1 , though he's still quite lost.]
32...b4 33.Bb6 Rc8
[Very passable, no complaints. Another way is 33...f3 34.gxf3 Nf4 , which wins the Exchange.]
34.Bb3? c4 35.Bd1 Nd3+ 36.Kf1 Nge5 The Knights edge closer, the Bishops are helpless. **37.Rc2 Rc6 38.a5 b3 39.Rc3 Nc5** Finally forcing the trade of Bishop for Knight. **40.Bxc5 Rxc5 41.Bxb3 Rd4?**
[Here 41...Rb5! improves considerably.]
42.Bc2 Rxa5 43.Rb8+ Kh7 44.Ke2 Ra2 A good pin, but Black suddenly gets distracted to the Kingside. He can afford to dither though, and White cracks momentarily. **45.Ke1 g5 46.Rf8 f6?! 47.Rb8 h5 48.Bd1? Ra1 0−1**

14...exd4 15.cxd4 Bxd4+ 16.Be3 In FSCH 12/73 Estrin said this was a complicated position with divided chances. In fact White is lost! **16...Rfb8!** Heyken & Fette give 16...Rab8 17 Q~ Bxb2 '−+!' RR.

[16...Rab8 RR 17.Qd3 Bxb2 Heyken & Fette]

17.Bxd4 Else the exchange is lost '□' RR. **17...Rxb3 18.axb3 c5 19.Be3 Qb5 20.Nd2 Nh7 21.Kf2 Kf6 22.Rfc1 Nf8 23.g3 Ne6 24.Rc4 c6 25.f4 d5 26.exd5 cxd5 27.fxg5+ Kg6 28.Rc2 Rf8+ 29.Bf4 Nxf4 30.gxf4 Rxf4+ 0−1**

C51

□ **19) All the Games: 7...h6**

■ **6) Purimprach Saiai vs. Praka,B**

Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 h6 8.d5 Suspect on positional grounds − White hands over perpetual control of the c5 square. **8...Nb8!?**

[An interesting return to home base. We analyzed a close relative in chapter 3 [/course/80564/3], and the move seems quite sound. Otherwise 8...Na5 is the accepted play, from lesson 1 [/variation/13940695] of chapter 16.]

9.Be3

[Generic development. Worthy of attention is 9.Na3 Bc5!? This idea might be applied elsewhere, for if Black can play 10...d6 next his problems are largely over. But the simple 9...Bxa3 $13 has to be okay as well. In the present case however, White plays 10.d6! crossing Black's little scheme. And if that's not enough, one interesting sideline goes 10.Nb5 Na6 11.d6 c6 12.a4! with untold consequences! Black continues Bxd6 11.Nb5 Ne7 12.Ba3! Bxa3 13.Nxc7+ Kf8 14.Nxa8 Bd6 He has a Bishop and a pawn for his Rook, but the White Knight on a8 looks trapped. 15. a4 Nbc6 16.a5 $13 and uncertainty is the only certainty.]

9...Ne7 10.Bd3!? Ng6!?

[Black might have castled here, or even played 10...c6∓ , with the better game in either case.]

11.c4?!

[Development with 11.Nbd2 is better, though after 0−0∓ Black is good for a 1/3 pawn, according to the Great Calculator.]

11...Na6∓ Now there's no dispute − Black is simply better here, and with his extra pawn intact. **12.Nc3 0−0 13.Na4 b6** White has been obsessed with forcing through c4−c5 since move eleven. The dream is over now. **14.Re1 Nf4∓ 15.Rc1**

[15.Rb1 had to be better.]

15...Ba3 16.Rc2?

[A tactical mistake, but if 16.Rb1 then d6∓ and Black has a clear

advantage.]
16...Nxd3 17.Qxd3 Nb4 Winning. If White takes the Bishop he'll lose both Rooks. **18.Qb3 Nxc2 19.Qxc2 d6 20.Rb1 Bd7** It is instructive to observe how Black converts his advantage. The White pieces are rolled back, the b−file opened, Rooks doubled, and the f−pawn engaged. There is nothing White can do about it either, and resignation is a serious option. **21.Nc3 a6 22.Ne2 Rab8** Preparing to open the b−file. **23.Ng3 Bc5 24.Bxc5 bxc5 25.Re1 Rb6** Now to double the Rooks. **26.Ra1 Rfb8 27.Nd2 Rb2 28.Qd3 Qf4 29.Ngf1 f5** The f−pawn is engaged! **30.g3?! fxe4 31.Nxe4 Qg4 32.Re1?! Bf5 33.f3 Bxe4 34.fxe4 Rxa2 35.Ne3 Qh3 36.Re2 Rb1+ 37.Kf2**
[Of course 37.Qxb1 is met by Rxe2 with checkmate in short order. There is still no sign that White intends to surrender, but wishes to die by the sword. So must it be!]
37...Qxh2+ 38.Kf3 Qxe2+
[A normal human move. However, mate in 9 begins with 38...Qh1+ 39.Rg2 Rbb2 40.Qf1 Qh5+ 41.g4 Qh3+ 42.Rg3 Qh2 43.Nf5 Rf2+ 44.Ke3 Ra3+ 45.Qd3 Re2+ 46.Kf3 Qf2# , and no et cetera needed.]
39.Qxe2 Rxe2 40.Kxe2 Rb2+ 41.Kf3 Rb3 42.Ke2 a5
[He takes the Knight soon enough, but 42...Rxe3+ directly is mate in 16! Aren't computers wonderful?]
43.Kd2 a4 44.Nc2 Rxg3 45.Kc1 h5 46.Ne1 Rg1 47.Kd2 Rxe1 48.Kxe1 a3 49.Kd1 Apparently in a state of shock, the denuded King stumbles from square to square. **49...a2 50.Kc1 a1Q+ 51.Kd2 Qb2+ 52.Ke1 h4 53.Kf1 h3 54.Kg1** Meekly placing his neck on the chopping block. **54...Qg2#** Long live the King!
0−1

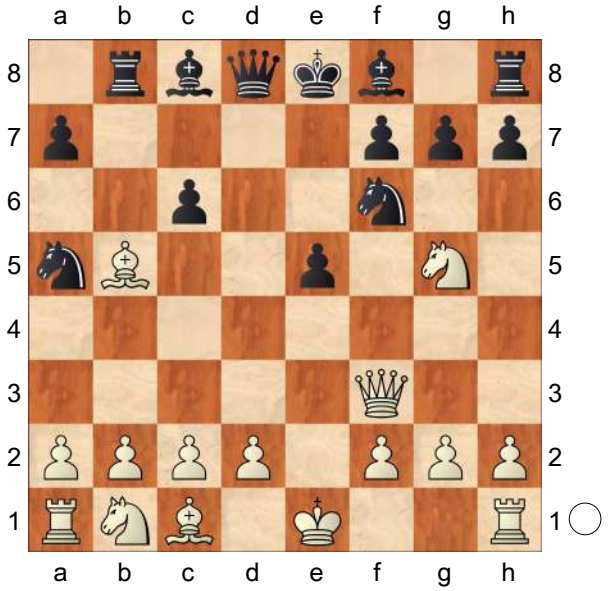
CCOL4 fin−04 1961
[Negyesy, Harding]

1.e4 Notes by Negyesy in Magyar Sakkelet, translated by Arpad Foldeak for FS 5/1964 p104. **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3 Rb8** Diagram

[Originally Black defended the c−pawn by the passive moves 8...Qb6 or]
[8...Qc7]
[Then Black experimented with the dubious exchange sacrifice 8...cxb5 but Colman's move is best.]



This move was discovered and analysed by the English amateur Colman while a prisoner of war of the Japanese in World War II. (I believe there is information about this in Correspondence Chess, Feb 1965 p187. but I don't have a copy of that issue) **9.Bd3**

[Acceptance of the second pawn by 9.Bxc6+ Nxc6 10.Qxc6+ Nd7 subjects White to a very dangerous attack.Black's pieces come into play very fast and he has many open lines.]

9...h6 10.Ne4 Nd5 "With full compensation for the sacrificed pawn" wrote Zagorovsky in 'Romantic Chess Openings'. **11.Ng3 g6 12.b3 h5!**

[12...Nb4 13.Ba3!± Zagorovsky]
[In the game Honfi−Kluger, 17th Hungarian ch, there occurred 12...f5 13.Nxf5!? Bxf5 14.Bxf5 gxf5 15.Qh5+ Kd7 16.Qxf5+ and the game ended in a draw after a long struggle. Zagorovsky's move appears to be better because it leaves the diagonal of the c8−♗ open, makes the white ♕ uncomfortable and gives no opportunity for a sacrifice.]

13.0−0 Bg7 14.Ba3

[With 14.h3 White could hinder ...♗g4, but the black position would be very strong after h4 15.Ne2 f5]

■ **Trenner,R.**

15: Olomouc 2002

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 Finally we reach the main line, where Black has sacrificed a pawn for the centre and quick development. **7.dxc6 bxc6 8.Ba4?!** When I was 10, I received a 30−year−old cut−out from a Swedish newspaper that reported on the Swedish Schools Chess Championships. Apart from the results, I remember a fantastic idea that caught my attention and that opening trap is the one covered in this game. Unfortunately, I've never had the chance to play it in a game.

[White's many alternatives, such as 8.Qf3]

[8.Be2]

[and 8.Bd3 , will be covered in the next few games.]

8...h6 9.Nf3

[White can play 9.Nh3 , but after Bg4! 10.f3 Bxh3 11.gxh3 Bc5 I'm far from envious of his position.]

9...e4! 10.Ne5

[Alternatively: 10.Qe2! is White's best bet at surviving. Black should remain active with Bc5! 11.d3 *(11.0−0* and neither square is particularly inviting, seeing that *0−0* and neither square is particularly inviting, seeing that *12.Ne5 Qd4! 13.Bxc6 Qxe5 14.Bxa8 Bg4* completely winning *)* 11...0−0 12.dxe4 Nxe4! and Black is clearly better.]

[10.Ng1 Bc5 and White already has difficulties surviving. Black's initiative should be decisive after 11.d4 exd3! followed by ...Qb6.]

10...Qd4! The problem behind 8 Ba4. This nasty move forks the bishop on a4 and the knight on e5. **11.Bxc6+ Nxc6 12.Nxc6 Qc5!** The knight is trapped. **13.Nxa7** White takes a third pawn, which sometimes is a fair price for a piece, but Black is just too active here. **13...Bg4!? 14.f3 exf3 15.gxf3 Be6** This is the beautiful idea that attracted me when I was 10. White's knight is still trapped and his kingside is completely destroyed. Indeed, it was definitely one of my favourite openings traps when I was growing up. **16.Nc3 Qxa7 17.Qe2 Be7 18.Qb5+**

[18.Qf2 Bc5 prevents White from castling.]

18...Nd7 19.Qc6 White plays strange queen moves, but his position is already completely wrecked. **19...0−0 20.Nd5 Bh4+ 21.Kd1 Ne5 22.Qb5 Nxf3**

[I would have loved the completely killing 22...Ng4! . That said, Black's

choice in the game is more than satisfactory.]

Correspondence 1969 1969
[Paul Motwani]

G12.14: "Even more wild Wilkes−Barre Traxler excitement!" O.Neikirkh−N. Galiris, correspondence 1969. Two Knights Defence, Wilkes−Barre Traxler Variation. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5**
[A really wild alternative to 4...d5]
5.Nxf7?!
[Obviously tempting, but based on the analysis of many games, "theory" now considers 5.Bxf7+ to be a much better capture.]
5...Bxf2+ I promised you plenty of action! **6.Kxf2**
[For 6.Kf1 see games G12.12 and G12.13.]
6...Nxe4+ 7.Kg1
[G12.14.1: The game G. Werner−S. Kutzner, Bad Marienberg 1993, ended abruptly via 7.Ke1? Qh4+ 8.g3 Nxg3 9.Rf1 Nh1+! 0−1, with White resigning in view of 10.Ke2 Qe4#]
7...Qh4 8.g3
[Reader's Challenge P12.14.1 If 8.Qf1 Rf8 9.d3 Nd6 10.Nxd6+ cxd6 11.Qe2 then can you demonstrate a forced winning continuation for Black?

An answer appears after the game G12.14.]

8...Nxg3 9.Nxh8

[9.hxg3 Qxg3+ 10.Kf1 Rf8 gives Black a raging attack, in spite of his (temporary) material deficit.]

9...d5 Black's pieces on the queenside are eager to get out and join in the assault on White's poor king! **10.Bxd5**

["Nunn's Chess Openings" states that 10.Qf3 Nf5! is better for Black, and I reckon that's basically because there's still enough power in his active pieces to cause a lot of trouble for White's exposed king. It should be very clear by now that material is not Black's primary consideration in the Wilkes−Barre Traxler variation!]

10...Bh3?!

[10...Nd4! is more accurate.]

11.c3? White stops 11...Qd4, and also hopes he has stopped 11...Nd4, but...

[White should have played 11.Bxc6+ bxc6 12.Qe1! intending *(*but not *12.d4? Qe4* or*; 12.Qf3? Ne4 13.Qf7+ Kd8 14.Qf8+ Kd7 15.Qf7+ Kd6* when Black's queen cannot be prevented from delivering a fatal check on the g−file or at e1. *)* 12...Qd4+ 13.Qe3]

11...Nd4! 12.Bf3 0−0−0 13.Nf7 Rf8

It's typical of lines in the Wilkes−Barre Traxler Variation that White finds himself forced to resign in spite of being far ahead on material, because almost all of the surplus forces are practically dormant and unable to stop Black's marauding pieces from slaughtering the defenceless white king. In this particular game, an alternative neat finish was 14 Nxe5 Nge2+! 15 Bxe2 Qf2. Solution to P12.14.1 Black wins via 11...Nd4 12 Qd2 Qg4!, with the deadly dual threats of 13...Ne2+ and 13...Nf3+.

□ **Saint Amant,P.**
■ **Morphy,P.**
Paris 1858
[Gauthier]

1.e4 e5 2.Nf3 Nc6 A game wherein Morphy opens the King file early and doesn't get a chance to use it. This teaches us that our plans have to be flexible since we don't know what our opponent will play. Morphy ends the game with a sterling combination. Black

won, play the board from the winner's side. In dieser Partie öffnet Morphy frühzeitig die e−Linie und bekommt keine Chance, sie zu nutzen. Das lehrt uns, daß unsere Pläne flexibel sein müssen, da wir ja nicht wissen, was unser Gegner spielen wird. Morphy beendet die Partie mit einer funkelnden Kombination. Er hatte Schwarz, also sollten Sie das Brett drehen und aus seiner Sicht spielen. **3.Bc4 Bc5** Opening = Giuoco Piano Eröffnung = Italienisch **4.c3** White sets up the advance d2−d4, hitting at the key quare. A key square is one that the players defend, support, attack, and occupy for a strategic advantage. The position of the key square usually changes during the course of a game. It depends on which opening is played and also how each player decides to develop his pieces. Weiß bereitet den Vorstoß d2−d4 mit Einfluß auf das Zentralfeld vor. Ein Schlüsselfeld ist ein Feld, das die Spieler verteidigen, stützen, attackieren und besetzen, um einen strategischen Vorteil zu erlangen. Die Position des Schlüsselfeldes verlagert sich normalerweise im Lauf einer Partie, je nach dem, welche Eröffnung gespielt wird und wie die Spieler ihre Figuren entwickeln. **4...Nf6 5.d4 exd4** taking the opportunity to open the e−file Nutzt die Gelegenheit, die e−Linie zu öffnen. **6.cxd4** Black now can take the initiative for the next three moves. How does he do it? Nun ergreift Schwarz in den nächsten drei Zügen die Initiative. Wie geht er dabei vor? **6...Bb4+** CHECK SCHACH **7.Bd2 Bxd2+** CHECK SCHACH **8.Nbxd2 d5 9.exd5 Nxd5** This is a different key square, before it was d4. The Knight on d5 is well posted and supported by the Queen. Any time a supported piece is occupying a center square, consider that square a "key square." Dies ist ein anderes Schlüsselfeld, zuvor ging es um d4. Der Springer d5 ist gut plaziert und wird von der Dame unterstützt. Jedes Mal, wenn eine gedeckte Figur ein Zentralfeld besetzt, können Sie dieses als "Schlüsselfeld" betrachten. **10.0−0** White's King is now safer and his Rook is ready for development. Nun steht der weiße König sicherer, und der Turm ist bereit, ins Spiel einzugreifen. **10...0−0** Same story, King safety and development Hier dasselbe− Sicherheit des Königs und Entwicklung. **11.h3** A potential pin is averted. The move restricts the mobility of the c8−Bishop and keeps White's f3−Knight mobile. Eine potentielle Fesselung wird vermieden. Der Zug schränkt die Beweglichkeit des Läufers c8 ein und hält den weißen Springer f3 beweglich.

[11.Rc1 Re8 12.Re1 Rxe1+ 13.Qxe1 Be6 14.Ne4 Nf4 15.Bxe6 ½−½ Heidenfeld,M−Mathe,G/ Nuernberg op 1990/EXT 90op2]

12.Kh2?! Fritz 5.00 (5s): '∓' This is a weak move that doesn't develop a piece. White was afraid of an eventual ...♘−e2 check. Ein schwacher Zug, der keine Figur entwickelt. Weiß hatte Angst vor einem eventuellen ...Se2+.

[⌓12.Ne4!?=]

12...Nxd4 Black's Knight is using a supported center square to advantage: a key square. Der schwarze Springer besetzt vorteilhaft ein gedecktes Zentralfeld: ein Schlüsselfeld. **13.Nxd4 Qxd4** Fritz 5.00 (5s): 'Black terminates the opponent with strong threats' Black takes possession of a key square. Schwarz besetzt ein Zentralfeld. **14.Qc2** Occupying a center square usually means extra mobility and scope to pull off tactical tricks to harass the opponent. Watch White's King run as the Black Queen uses her scope and mobility. Die Besetzung eines Zentralfeldes geht normalerweise einher mit zusätzlicher Beweglichkeit und erhöhtem Wirkungsgrad der eigenen Figuren und eröffnet dadurch die Möglichkeit, dem Gegner mit taktischen Tricks zuzusetzen. Schauen Sie, wie der weiße König flieht, wenn die schwarze Dame ihre Reichweite und Beweglichkeit ausspielt. **14...Qd6** Scope Reichweite. **15.Kh1** This is the second time White loses a tempo (wastes a move) with his King sliding back and forth. **15...Qh6** Mobility **16.Qc3** Black wants to develop his Bishop. Which square would you choose? A good method for selecting the best development square is to choose the one that will give your piece the most scope and mobility. The d7−square adds four additional squares to the scope of the Bishop. The f5−square adds six additional squares to the scope

of the Bishop. Schwarz möchte seinen Läufer entwickeln. Welches Feld würden Sie wählen? Eine gute Methode, das beste Entwicklungsfeld auszuwählen, liegt darin, zu schauen, wo die Figur am wirkungsvollsten und beweglichsten steht. Auf d7 erlangt der Läufer vier zusätzliche Wirkungsfelder, auf dem Feld f5 sind es sechs. **16...Bf5** Morphy takes the best development square. Morphy wählt das beste Entwicklungsfeld. **17.Kh2** White loses yet another tempo (wastes a move). Und wieder verliert Weiß ein Tempo (verschwendet einen Zug). **17...Rad8** The open file allows development which increases the scope and the mobility of the Rook. Durch die Entwicklung auf die offene Linie erhöht sich der Wirkungsgrad und die Beweglichkeit des Turms. **18.Rad1** Fritz 5.00 (5s): '?' Now, Morphy decides it's time to go to work. He sees the results of a combination. The type of combination that only a very strong player would see. Don't worry if you don't get it right away. This is about the opening, not combinations, remember? Morphy beschließt nun, ans Werk zu gehen. Er sieht das Endergebnis einer Kombination, die nur ein sehr starker Spieler finden würde. Keine Sorge, wenn Sie diese nicht sofort verstehen. Vergessen Sie nicht, hier geht es um die Eröffnung, nicht um Kombinationen.

[⌓18.Nb3−+]

18...Bxh3! Fritz 5.00 (5s): 'Do you see the mate threat?' Black gives up a Bishop and a Rook to win the White Queen! Schwarz gibt einen Läufer und einen Turm, um die weiße Dame zu gewinnen. **19.gxh3** he's down a Bishop Er hat einen Läufer weniger. **19...Rd3!!** Fritz 5.00 (5s): '!' Fritz 5.00 (5s): 'Threatening mate... how?' Black is threatening 20...♕x♙+ and 21....♕g2 mate. Play the variation if you would like to see Black's mating threat. Schwarz droht 20. ♕x♙ und 21.♕g2 matt. Spielen Sie die Variante nach, wenn Sie die schwarze Mattdrohung sehen möchten. **20.Qxd3** Black is down a Bishop and a Rook. Morphy now wins the White Queen. Schwarz hat Turm und Läufer weniger, doch nun gewinnt Morphy die weiße Dame.

[20.Qc2?? Qxh3+ 21.Kg1 Qg2# Press the Delete key for the main line. ENTFERNEN bringt Sie wieder in die Partie zurück.]

[20.Bxd3?? Qxh3+ 21.Kg1 Qg2#]

20...Nxd3 He doesn't lose his Knight! Morphy was able to foresee the even exchange from move 18. Dieser Springer geht nicht verloren! Das hatte Morphy bereits im 18. Zug vorausgesehen. **21.Bxd3** Black has a neat trick up his sleeve to regain the exchange. Schwarz verfügt über einen netten Trick, um sich diese Figur zurückzuholen. **21...Qd6+** CHECK, allowing Black to catch the Bishop! SCHACH. Erlaubt Schwarz, den Läufer einzusammeln! **22.f4 Qxd3** White resigns since he's down in material and has two weak, isolated Pawns going into the endgame. Replay the combination until you are satisfied that you understand it. THE END Weiß gibt auf. Er hat Material weniger und zwei schwache isolierte Bauern im Endspiel. Spielen Sie die Kombination so lange nach, bis Sie sie verinnerlicht haben. ENDE **23.Nf3 Qc4−+**

[Sergeant, P.]

ChessCalisthenics: 'C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3' **1.e4** Fritz 5.00 (5s) Fritz 5.00 (5s) Fritz 5.00 (5s): 'Sergeant, P.: 'On the evening before the tournament − October 5 − the club was open for a casual meeting of the players and others interested in the tournament. Many off−hand games were played. Morphy engaged Frederick Perrin, the secretary of the New York Club, in two games. Morphy won the first, but as the second game began, Charles Stanley entered the club and Perrin graciously deferred to Stanley allowing him to play Morphy. Frederick Edges wrote: Who that was present that

evening does not remember Paul Morphy's first appearance at the New York City Chess Club? The secretary, Mr. Frederick Perrin, valorously offered to be his first antagonist, and presented about the same resistance as a mosquito to an avalanche. Then who should enter the room but the warrior, Stanley... Loud cries were made for Stanley! Stanley! and Mr. Perrin [now on the second game] resigned his seat to the newcomer, in deference to so general a request. Thus commenced a contest, or rather a succession of contests, in which Stanley was indeed astonished. "Mate" followed upon "Mate", until he arose from his chair in bewildered defeat. − SBC Bio4" **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.h3 0−0** ChessCalisthenics: 'N' 'N' ChessCalisthenics: 'N' 'N' Fritz 5.00 (5s): 'N' 'N' 'N' 'N'

[Quintiliano, Renato]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5?! 5.d4!? d5! The best reaction, Black also takes his chance to strike in the centre. **6.Bxd5**
[6.exd5? Nxd4 and]
[6.dxc5 dxc4 are harmless for Black.]
6...Nxd4!
[6...Nxd5? 7.dxc5! Black has not enough compensation for the pawn here. Ndb4 8.a3 Qxd1+ 9.Kxd1 Na6 10.b4± 1−0 Karpatchev,A (2460)−Gozzoli,Y (2502) Saint Affrique op 16th 2008 (9)]
7.Bxf7+ Whether White should take with the bishop or the knight on f7 is always a question in this variation. In this case, the text seems the safest option.
[7.Nxf7? seems a risky choice for White now, since after Qe7 8.Nxh8 Bg4! Black's initiative is coming too fast, and although the engine keeps showing its ironic 0.00, I think White's moves are already harder to find, as he needs to show precise calculation, while all that Black needs to do is to keep as many threats as possible 9.Bf7+! An important insertion, preventing Black from ...0−0−0. *(9.f3?* exposes too many squares on the kingside and is already losing: *Nxd5 10.fxg4 Qh4+ 11.g3 Qh3* White can't prevent the invasion on g2. *12.c3 Qg2! 13.cxd4 Nb4! 14.Na3 Qxh1+ 15.Kd2 Qxe4−+; 9.Qd3? Nxd5 10.exd5 Bf5−+; 9.Qd2 0−0−0 10.0−0 c6* White faces a difficult position, he tried *11.Nf7?* 0−1 Deczki,J−Nagy,N Debrecen DEAC op 2001 (8.10) when Black could win in a beautiful way now: *cxd5! 12.Nxd8 Nxe4 13.Qd3 Ne2+ 14.Kh1 Bxf2!* White has too many threats to deal with. *15.g3 Qf6 16.Kg2 Nxc1 17.Rxc1 Qh6!−+)* 9...Kf8 *(9...Kd7? 10.Qd3! Rxh8 11.c3* Black has problems with the pinned knight. *Be2 12.Qg3 Nc2+ 13.Kxe2 Nxa1 14.Bc4+−)* 10.Qd3 Be2! The likely result should be a repetition now, as Black keeps harassing the queen. 11.Qh3 *(11.Qg3? Nxe4 12.Qh3 Qf6 13.Be3 Nxc2+! 14.Kxe2 Qa6+ 15.Kd1 Nxe3+ 16.Kc1 Nxf2−+)* 11...Bg4 12.Qd3 *(12.Ng6+? hxg6 13.Qh8+ Kxf7 14.Qxa8* This is clearly a bad idea, as the White king is abandoned under a unstoppable mating attack. *Nxc2+ 15.Kf1 Qd6! 16.Nc3 Qd4 17.Be3 Nxe3+ 18.Kg1 Nd1! 19.Nxd1 Bxd1−+)* 12...Be2=]
7...Ke7 8.Bc4 White has won a pawn and the Black's king is still in centre. Nevertheless, the second player counts on his easier development and some threats to keep White too busy to consolidate the advantage. **8...b5! 9.Bd3 Rf8** Black aims to develop his pieces as soon as possible, but White has no weaknesses and should be able to organise his forces as well. **10.Be3! h6 11.Nf3 Bg4 12.Nbd2 Qd6 13.h3**
[13.Bxd4 was safe and sound: Bxd4 14.0−0! Bxb2 15.Rb1 Bc3 16.Rxb5! At first sight, it may look as if Bxd2 17.Qxd2 Bxf3 18.gxf3 Nh5 gives better chances for Black, but after 19.Qc3! White still keeps a big

advantage.]

13...Nxf3+ 14.gxf3

[14.Nxf3 was also possible, maybe White was worried about Bxf3 15.Qxf3 Nd5!? , but this is not dangerous for him: 16.Qg3 Bb4+ 17.Ke2 Nf4+ *(17...Nxe3 18.fxe3±)* 18.Kf1 Bc5 *(18...Nxd3? 19.cxd3 Qxd3+ 20.Kg1 Qxe4 21.Qxg7+ Rf7 22.Qg4! Qxg4 23.hxg4±)* 19.Kg1! and the king will find a safe place on h2.]

14...Bxe3 15.hxg4? But this is too optmistic.

[15.fxe3! was safer and more solid, after Be6 16.Qe2 White manages to complete his development with success, for example a6 17.0−0−0 Bxa2!? 18.Rhg1 g5 19.f4!→]

15...Bf4⩲ The play on the dark squares already seems nice compensation for Black. **16.Bxb5?** And after another careless move, White's position is already very difficult.

[⌓16.Qe2 was the last chance to secure the king, although Black is fine after the nice idea Nh7! 17.0−0−0 Ng5 18.Kb1 Bxd2 19.Rxd2 Nxf3 20.Rdd1 a6∓ 21.Bxb5? Nd4!−+]

16...Qb6! 17.Bd3

[17.Qe2 doesn't solve the problem anymore: Bxd2+ 18.Kxd2 Rad8+ 19.Ke1 *(19.Kc1 Rb8)* 19...Nh7! and White's task is very unpleasant, as Black pieces are becoming too active]

17...Nxg4! A precise shot, Black is winning. **18.Qe2**

[18.fxg4 Bg3! Maybe White was counting on 19.0−0 but Rxf2−+ wins anyway.]

18...Bxd2+ 19.Qxd2

[19.Kxd2 Nxf2 20.Rhb1 *(20.Rhf1 Nxd3 21.cxd3 Qxb2+)* 20...Rad8+− seems desperate for White.]

19...Rxf3 20.0−0−0 Nxf2−+ 21.Qc3

[⌓21.Rhf1 Rd8−+]

21...Nxh1 22.Qxe5+ Kf8 23.Rxh1 Re8 24.Qh5 Rf6 25.a4 g5 26.Qh3 Qd4 27.Rf1 Rxf1+

15...Bf5

[Lasker indicated that 15...Be6? (Ciro Fernandez) (Knaak) fails to 16.Re1 Rhe8 17.d5 , ⊕and wins⊞. Perhaps this is not decisive, but there can be no doubt that White is better after regaining the piece and seizing the initiative. is very unpleasant for Black, so Lasker concentrates on developing a piece and gaining time by attacking the white rook.]

[The bishop is better on f5 than d7 after 15...Bd7 (Ciro Fernandez) Knaak 16.Qxc4+ Kg6 .]

16.Qxc4+

[Finally Steinitz diverges from Lasker's analysis, which continued: ⊕ 16.Rf4 (Ciro Fernandez) Knaak h5 17.Qxc4+ Kg6 18.d5 Ne5 19.Qxc7 and although Black is two pawns behind for the piece, and may lose a third, his attack is excellent⊞, which is undoubtedly true after Rhe8 , followed by ...Rac8. As we can see, Lasker always had in mind that he should be prepared to return part of the extra material, or even all of it, to obtain other advantages.]

16...Kg6 17.Re3 Rae8

[Analysis indicates that 17...h5! (Ciro Fernandez) (Knaak) was best. This wasn't obvious, especially not at the board. It required deep calculation to find a precise series of moves and to conclude that Black would emerge with advantage; the engines indicate that after is better, allowing the king to retreat to h7, but Black has to follow up with great accuracy to prevent the attack from breaking through. After 18.Rae1 Black's best course is to play Kh7! 19.d5 Nb8! 20.Qxc7 Nd7 21.Re7 Rhc8 22.Qf4 Bg6 the attack has passed its zenith; for example, 23.Qd2 Nb6! 24.R1e6 Qf5 , and although White has managed to activate his pieces to the maximum, Black has also achieved his objectives: his king has found shelter and almost all his pieces are active. Moreover, Black still has an extra piece for only two pawns, and the d− and c− pawns look vulnerable, although, of course, the position remains complicated. 25.Bc1 Kg8 26.d6 Re8! 27.d7 Red8 28.Qd4 Bf7 29.Rd6 Nc4! leaves White clearly worse.]

□ **Vovk,A.**
■ **Halkias,S.**
20: Metz 2014
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3! A few years ago, when I first learnt about this move, I didn't take it very seriously. After a while, I realized that it's not that bad, and it was only when the work of this book began that I realized how difficult Black's position can become. But how can that be? After all, the bishop appears to do nothing but harm White's own development. However, Black's initiative cannot really develop as quickly as against White's other variations. White can put his knight on both e4 and f3 without getting pushed away immediately, and the spare time White gains from this can be used for his own development. **8...Nd5!** Now White's knight is forced to make a decision, and meanwhile Black prepares both ...f5 and ...Nf4.

[Black also has: Ivan Sokolov has tried 8...h6 9.Ne4 Nd5 twice, but never with good results. White seems to hold some advantage here.]

[I used to think 8...Ng4!? was the solution, because I found the convincing game D.Stellwagen−E. L'Ami, Maastricht 2008. When it turned out that Bologan recommended this in his book, I checked it closer and realized that Black has some serious problems to solve after 9.Ne4 *(9.Nh3!?* is interesting as well *)* 9...f5 10.Be2! h5! 11.h3 fxe4 12.hxg4 Bc5 . Here 13.b4! (a nice idea) *(13.Nc3* is another problem, because after *Qd4 14.0−0 0−0 15.Qe1 hxg4 16.d3 exd3 17.Bxd3 Rxf2 18.Qxf2 Qxf2+ 19.Rxf2 g3 20.Ne4 gxf2+ 21.Kf1* we reach an endgame where Black has very few winning chances *)* 13...Qd4! *(*White is better after *13...Bxb4 14.Nc3* too *)* 14.bxc5 0−0 15.0−0 Qxa1 16.Nc3 e3! is the idea that Black has relied on, but these extremely complicated variations have their problems too. Now 17.gxh5 exf2+ 18.Rxf2 Rxf2 19.Kxf2 Be6 20.Ba3 Qxd1 21.Bxd1 Rf8+ reaches a key position for the entire 8...Ng4 variation. Objectively, Black should perhaps equalize gradually, but I think it's clear that Black is not the one enjoying himself.]

9.h4!? A strange resource. White doesn't want to let his g5−knight be kicked without getting anything in return (like Black weakening the light squares with ...h6). Bologan mentioned that this move was the reason that he didn't want to recommend 8...Nd5, but that sounds strange to me.

[I think 9.Nf3 is much more difficult to face, as we'll see in the next game, although 9 h4 certainly shouldn't be underestimated. Alexandra Kosteniuk has played this move twice, albeit not successfully.]

[Another move is 9.Ne4 , but when the knight has already moved away

from f6, Black just goes f5!
when White has to lose further time with his knight: 10.Ng3 *(10.Nec3 Bd6 11.Nxd5 cxd5 12.Bb5+ Bd7 13.Bxd7+ Qxd7* gives Black excellent compensation with his strong pawn centre *)* 10...g6! 11.0−0 Bg7 12.Re1 0−0 13.Bf1 c5 and once again, Black's activity and space advantage is definitely sufficient compensation for a mere pawn. White has barely developed a piece.]

9...Bc5! Why not? The bishop is placed actively and White has to find some concrete ideas to challenge Black's concept.

[Black should be fine after 9...Nf4 10.Bf1 h6 too, but I like the creative positions that arise in the main game.]

10.Qf3! Creating a very subtle threat. White also applies more pressure on the light squares. **10...f5!**

[Normal moves like 10...Qe7 don't really do the trick because of 11.Nc3 h6 12.Nge4 Bd4 13.Ng3! when White has stabilized himself on the light squares.]

11.Bxf5

[11.Nc3 0−0 12.Nxd5 Qxd5! is pleasant for Black. Indeed, his pawn centre causes some issues for White.]

11...0−0! 12.Bxh7+ Kh8 13.Nf7+ Rxf7 14.Qxf7 Nf4! A wonderful idea. The knight on f4 is extremely strong and to survive the coming attack, White has to trade queens. **15.Qg8+!** Best,

[as 15.Be4? Be6! traps the white queen]

[while 15.Bf5? Bxf5 16.Qxf5 Qd5! lands White in big trouble in any case; g2 is loose and the coming ...Rf8 should spell the end.]

15...Qxg8 16.Bxg8 Kxg8 This is the end of a complicated tactical sequence. Materially speaking, White has a rook and three pawns for two pieces, which should be more than enough. However, in this case, Black can't complain because he has the bishop−pair, active pieces and open lines, while White hasn't even a single piece developed.

17.g3

[White might do better without weakening the light squares, but 17.Rh2!? can be met with Ne6! 18.Nc3 *(* after *18.c3* we can just return with *Nf4!* when there's a wonderful square beckoning on d3 *)* 18...Nd4 19.Kd1 Bf5 20.d3 and now the terrific idea e4! which opens up the position.]

[Instead, 17.d3!? returns the g2−pawn for the sake of development, but after Nxg2+ 18.Kf1 Nf4 White only has two extra pawns, while Black still has the bishop−pair and a strong initiative.]

17...Ne6! The threat of ...Nd4 is very strong and there's only one solution.

[Another possibility is 17...Nh3 18.Rf1 Ba6 and now some wild complications arise after 19.d3 e4 .]

18.c3! Ba6!! A wonderful, creative idea by Sulskis. I can't rule out that this was all home preparation, but that's some preparation if so.

[The calmer continuation is 18...Bb6 19.b4 Nc4 20.d3 Nd6 when Black should be fine as well.]

19.b4 Rf8! Black's pieces coordinate wonderfully. **20.Rh2**

[Critical is, of course, 20.bxc5 Nxc5

, but then White has to defend himself against ...Nd3, which isn't very easy: for example, 21.Rg1 *(*if *21.Ba3 Nd3+)* 21...Nd3+ 22.Kd1 Nxf2+ 23.Ke1 and now Nh3 24.Rh1 c5! with an ongoing attack.]

[Likewise, 20.f3 Rxf3 21.bxa5 Bd3! followed by ...Bf2 and ...Bxg3 looks very dangerous for White.]

20...Bxb4!? The wild stuff just keeps coming.

[There was nothing wrong with 20...Nb7 21.bxc5 Nbxc5 either. After 22.d4 Nd3+ 23.Kd2 Nxf2 24.dxe5 Rd8+ 25.Ke1 Nd3+ 26.Kd1 Nf2+ the game seems to end in a draw, although there are chances for both players to deviate.]

21.cxb4 Nd4! 22.bxa5!?
A very practical solution. White grabs material and walks down a more forcing path.

[After 22.Rh1 we can see the amazing Nab3! 23.axb3 Nc2+ 24.Kd1 Nxa1 when the a1−knight returns via b3 to the game. However, 25.Bb2 Nxb3 26.Kc2 Nd4+ 27.Bxd4 exd4 28.f4 leads to an endgame where Black is probably the one under slight pressure. As such, it is possible that 20...Nb7 is more accurate.]

22...Nf3+ 23.Kd1 Nxh2 24.Bb2

[Maybe White should have gone 24.Ba3 , forcing a rook to f2 instead of a knight. After Rxf2 25.Bc5! Rf7 26.Kc2 Rd7 the game should be about equal.]

24...Ng4! 25.f4? After defending well against some amazing ideas, White starts to trip up.

[He should have run with his king towards the kingside immediately: 25.Kc2 Rxf2 26.Kb3 Rf3+ 27.Nc3 Rxg3 28.Re1 and White should be able to draw, although the position remains complicated.]

25...exf4 26.gxf4 Nf2+ 27.Kc2 Bd3+ 28.Kc3 Rd8! There's an amazing harmony to Black's attack, even if there are only a few pieces left participating in it. **29.Ba3?** The final and decisive mistake.

[White could have tried 29.Kb4! with the idea of Ne4 *(*instead, *29...Rb8+ 30.Kc3 Bf5 31.Na3 Ne4+ 32.Kc2 Nc5+ 33.d3! Nxd3* leaves Black much better, but White can fight on *)* 30.Be5! when he saves himself.]

29...Nd1+ 30.Kb3

[30.Kb4 Bxb1 wins comfortably.]

30...Rb8+ 31.Bb4 c5
0−1

□ **Shaked,T..**

■ **Kaidanov,G..**

Philadelphia 1993 1993

[Paul Motwani]

G12.18: "Shaked shaken by stirring play" T.Shaked−G.Kaidanov, Philadelphia 1993. Italian Game with 4 d3, Code C54.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 The same position is frequently reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 d3 Nf6, and so we class the opening as an Italian Game (rather than a Two Knights Defence).

5.c3

[5.Bb3 featured in game G12.2.]

5...a6

[Black gives his c5−bishop a cosy retreat at a7 if required, but of course alternatives such as 5...d6 in games G12.2.2 and G12.19 are perfectly OK too.]

6.Bb3

[6.d4? exd4 7.cxd4 *(* if *7.e5* then *d5!)* 7...Bb4+ gives Black a favourable version of a well−known line (namely 1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 c3 Nf6 5 d4 exd4 6 cxd4 Bb4+) since he has the extra move ... a7−a6 for "free". This is significant after 8.Bd2 Bxd2+ 9.Nbxd2 d5 10.exd5 Nxd5 11.Qb3 because Be6! is then possible, in view of 12.Qxb7?? Na5 trapping White's queen.]

6...d6 7.0−0 0−0 8.Re1

[I would prefer 8.Nbd2 which doesn't weaken White at f2.]

8...Ba7 9.h3

[If 9.Nbd2?! then Ng4! 10.Re2 Kh8! planning ...f5 has caused White a lot of trouble in certain games, including G12.4 on this site.]

9...h6 10.Nbd2 Nh5! 11.Nf1

[11.Nxe5 Nxe5 12.Qxh5 Nxd3 is excellent for Black, *(* and note that *12...Bg4* would be even better if there wasn't a white pawn on h3! *)*]

11...Qf6 12.Ne3 Nf4 13.Nd5 Nxd5 14.exd5 Ne7 15.d4 Ng6 16.Bc2 exd4 17.Nxd4 Bd7 Black has the easier development, and so he already holds some advantage. **18.Be3 Rfe8 19.Qd3 Re5!** By attacking White's loose d5−pawn, Black effectively gains time for doubling his rooks on the e−file. **20.c4 Rae8 21.Qc3** Quite understandably, White is struggling to find any truly constructive plan that could challenge Black's fully−mobilised, harmonious, active army. **21...Nh4!** There is a highly concentrated and very ominous−looking storm of black pieces homing in on White's trembling king, who is now

facing terrible threats such as 22...Bxh3 23 gxh3 Bxd4, when 24 Qxd4 gets crushed by 24...Nf3+, whereas 24 Bxd4 loses to Black checking with queen, rook or knight landing at g5, e1 or f3 respectively. **22.Red1?** To be honest, White's position was under such extreme pressure that it was almost certainly already beyond saving, but now Black can deliver an instantly−decisive blow... **22...Rxe3! 23.fxe3 Qg5** White resigned in view of 24 Qd2 Bxd4 25 exd4 Nf3+ or 24 Rd2 Rxe3 25 Bd3 Bxd4 26 Qxd4 Nf3+.
0−1

C51

☐ **18) All the Games: 7...Nge7**
■ **1) Cesar Sanchez vs. Marc Cap,B**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6
We have remarked upon the virtues of this move often enough; now the little green circle will serve as a reminder. **7.0−0 Nge7** Our main line starting position − a rarity indeed! **8.Bg5 Qg6 9.d5?!** Pushing forward is natural, and likely to be often played. It is, however, a doubtful advance. See chapter 8 [/course/80564/8] and compare chapter 3 [/course/80564/3] for details. **9...Na5 10.Bd3 f6!?**
[This reinforcement will have to be played before castling, but it's not necessary now. Instead 10...b6∓ is covered in the training sections mentioned.]
11.Be3 b6∓ 12.Nbd2?
[A bad mistake which costs a pawn. Better is 12.c4 , but Nb7∓ is very comfortable for Black.]
12...Nxd5! 13.Nh4 Nxe3 14.fxe3
[Another mistake would be 14.Nxg6? Nxd1 15.Nxh8 Nxc3 and Black wins − the Knight on h8 will not escape.]
14...Qf7 15.Qe2 Bc5 16.Nc4 d6
[This wins, and 16...Nc6 wins too, but it's good policy to trade when ahead so]
[16...Nxc4 17.Bxc4 Qf8 wins even harder.]
17.Nxa5 bxa5 18.Bc4 Be6 19.Bxe6 Qxe6 White is missing two pawns, and those remaining are in poor shape. Additionally, Black has the better minor piece, and the Knight will never find an outpost square. **20.Nf5 Kf8 21.Rf3?! g6 22.Ng3 Kg7** Black gradually unfolds from here. **23.Raf1 Rhf8 24.Qf2 Rf7 25.h3 c6** King safety attended to, Black can now afford to build his center. **26.Ne2 d5 27.exd5 cxd5 28.Qg3 f5** Who has the big center now? **29.Kh1 Bd6** Good. The White King has vacated a threatened diagonal, so Black relocates the King's Bishop and adds support to the b−file. **30.Qe1 Raf8 31.Qb1 Rb8 32.Qc1 Kh8** White is helpless and can only wait for the breakthrough. Black can afford to 'pass' and see what the opponent will do. **33.Qd2 Ba3 34.Qd1 Qc6 35.g4** He cracks, but it hardly makes a difference. **35...Rff8?!**
[This move doesn't hurt, but it's imprecise. Black should have preferred 35...Rb2 or even]
[35...Rg8 , the idea being to control the g2 mating square.]
36.Ng3 fxg4 37.Rxf8+ Bxf8 38.Qxg4 d4+ At last! **39.e4 dxc3 40.Rf7 c2**

Unstoppable.

□ **Demian,Valer Eugen**
■ **Oprisor,Razvan**
cr EEC Cup 2007
[Wei Ming]

Olimpiu Urcan and Marius Ceteras wryly described the move 9.Bxc6 as a gluttonous move which reminded them of the King of Capri who bemoaned that he had only 2 hands but only 1 mouth. Very apt indeed as we see a perfect illustration how White can easily choke on the second pawn... I have taken reference from Urcan and Ceteras's article from NIC Yearbook 86 in my analysis. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3 Rb8 9.Bxc6+?!** Dodgy, as explained by Tony Kosten but Black should be happy to see this move! **9...Nxc6 10.Qxc6+ Nd7!** As Kosten explained in Vallejo−Inarkiev Khanty Mansiyk 2007, this tempo move is absolutely essential. Black cannot afford to give White any time to consolidate and have to proceed in the most energetic way possible. **11.d3 Be7 12.Ne4?!** It's easy to foresee that Black will eventually gain a tempo with ..f5 in the future. In fact, White will go on conceding tempo on almost every move for the next ten moves!

[12.Nf3 is more natural but Black still gains ample counterplay. 0−0 13.Qe4 *(13.0−0?* surprisingly is close to losing after *Nc5!* and White's queen is closed to getting trapped after ..Bb7! *14.Nxe5 Bb7 15.Qb5 Bxg2−+)* 13...Rb4! The remarkable Colman's Rook! 14.Qe2 e4 *(14...Bb7 15.0−0 f5 16.Nc3 Rg4∞)* 15.dxe4 Nc5

A) 16.Nc3 Ba6 17.Qe3 Re8! Black is 3(!) pawns down but his pieces are hyper active. The obvious risk is that if Black did not utilize his initiative to good effect, White is guaranteed a winning position once he manages to consolidate.

A1) 18.e5 Qa8!

A1a) 19.a3 Rg4 20.Rg1 Na4! 21.Nxa4 Rxa4! *(21...Re4* is tempting, but allows White to consolidate *22.Nc3 Rxe3+ 23.Bxe3* and White has 3 pawns, a minor and a rook for Black's queen which should be sufficient though if Black is not satisfied with a draw after 21.. Rxa4, there is still a lot of play left in this variation after *Rd8!* preventing Queenside Castling. *)*;

A1b) 19.b3 f5! A very concrete idea to exploit White's lagging development. As explained earlier, there is really no room for any dilly dally, Black must keep on attacking and not allow any breathing space! 20.Ba3 f4 21.Qd2 Rd8 22.Bxb4 Rxd2 23.Nxd2 Nd3+! 24.cxd3 Bxb4−+;

A2) 18.Nd2 f5! I cannot emphasize enough how important it is that Black must continue his attack. 19.f3 Rd4!?⩱ *(19...fxe4 20.Ndxe4 Qc8! 21.a3 Rb6)*;

B) 16.0−0?! Ba6 17.Qd2 Qb8⩱ with plenty of piece play in Lovholt−Sande, Cr 1998. In all these variations, it is of paramount important that Black plays energetically and not to allow White to rest on his laurels.]

12...Rb6 13.Qc4

[13.Qa4 is slightly riskier. White's queen finds itself short of squares on the queenside.

A) A game by Colman himself went 13...Bb7 14.f3? *(14.Be3 Rg6! 15.Rg1 f5 16.Nc5 Bxc5 17.Bxc5 Bxg2⩱)* 14...f5 15.Nf2 Rb4 16.Qa3 *(16.Qxa7 Bc5 17.Qa3 Qb6* is even worse for White then in the game *)* 16...Re4+ 17.dxe4 Bxa3 18.Nxa3 fxe4 19.fxe4 0−0∓ and Black won easily soon after in Ashcroft−Colman, London 1948;

B) 13...f5 The most active response. 14.Ng3 0−0 15.Nd2? From the following concrete variations, this appears to be already a losing mistake! *(15.Nc3 Nc5 16.Qa5 Be6⩱)* 15...Nc5 Again exploiting the lack of space for the White queen. 16.Qa5? This allows a thematic central breakthrough. *(16.Qc4+ Be6⩱* Yee−Bisguier, Philadelphia 1995 *17.Qc3 Qd5 18.0−0 Na4! 19.Qc7 Rb7 20.c4 Rxc7 21.cxd5 Bxd5* with excellent compensation. *)*

16...e4!∓ As always, Black should take this pawn break into consideration whenever he has already achieved ..f7−f6. 17.0−0 exd3 18.cxd3 f4 19.Nge4 Bh3!! An amazing move, very typical in correspondence chess. This move threatens the terrible 20..Rg6 and there are no satisfactory defences.

B1) 20.gxh3?? Rg6+−+;

B2) 20.Nc4 Qxd3! 21.Nxb6 Qxe4 22.gxh3 Rf6!−+;

B3) 20.Nxc5 Bxg2! 21.Ne6 *(21.Re1 Bh3!)* 21...Bh3!! A beautiful switchback which forces resignation immediately. The queen is immune due to the mating manoeuvre 22.Nxd8 *(22.Qh5 Bxe6−+)* 22...Rg6+ 23.Kh1 Bg2+ 24.Kg1 Bf3+−+;

B4) 20.Ng5 The reply that puts up the most resistance. White's alternatives can hardly hope to inspire: 20...Bxg2! Annihilating White's kingside. Black will soon win back the piece and with it the game. 21.Kxg2 Nxd3 22.Ndf3 Bxg5 23.Qc3 *(23.Nxg5 Qd7! 24.f3 Rf5−+)* 23...Qd7 24.Qc4+ Kh8 25.h3 Bd8 26.Kh2 Rh6 27.Ng1 Bc7 28.f3 Bb6 0−1 Demian, V (2414)−Chiru, I (2494)/ICCF 2007]

13...Ba6 14.Qa4 With the bishop on a6, Black is at least denied any tactics involving ..Rb4. However, there are other avenues of counterplay available.

14...f5 15.Ng3 0−0 16.Nc3

[16.0−0? Nc5 17.Qa5 f4 18.Nh1 An ugly square but White has no choice. f3 and White surely cannot hope to survive this onslaught.]

16...Nc5 17.Qa5 f4!

[17...e4!? The thematic pawn break is of course possible and looks difficult to deal with also but the text is even more difficult to handle.]

18.Nge2

[I am absolutely certain any OTB players would have played 18.Nge4 without any hesitation. However, Black wins beautifully with a slick combination: Nxd3+!! 19.cxd3 Bb4! *(* The hasty *19...Qxd3??* would have been rudely met with *20.Qd5+* and Black can resign. *)* 20.Qxe5 Re8−+ 21.Qh5 *(21.Qxf4 Bxc3+ 22.bxc3 Qxd3−+)* 21...g6 22.Qh3 *(22.Qf3 Bxc3+ 23.bxc3 Bxd3−+)* 22...Bxd3 23.f3 Bxe4 24.0−0 Bd3 25.Rd1 Rbe6 26.Ne4 Qb6+ 27.Kh1 Bxe4 28.fxe4 Rxe4 with a winning advantage.]

18...f3! The start of a forcing sequence of moves which more or less wins for Black. **19.gxf3 Nxd3+! 20.cxd3 Bb4 21.Qxe5**

[21.Qa4 Qxd3 22.Bd2 Qxf3 23.0−0−0 Bxe2−+]

21...Re8∓ 22.Bg5

[22.Qg3? Rxe2+! 23.Kxe2 Qxd3+ 24.Ke1 Qe2#]

22...Qd7 Quietly forcing White to sacrifice his queen. **23.Qxe8+**

[23.Qg3 Bxc3+ 24.bxc3 Rxe2+ 25.Kf1 h6! with the idea of ...Bxg6 and ...Rg6.]

23...Qxe8 24.0−0−0 Bb7 25.Be3 Ra6 26.Rhg1 Bxf3 27.Rd2 Bxe2 28.Rxe2 Qh5 29.Rge1 Qxh2 30.Bd2 h5! 31.a3 Bxc3 32.Bxc3 h4 33.Be5 Rc6+ 34.Kb1 Qh3 35.Re3 Qg2 36.d4 Rg6 37.Rd3 Qxf2 38.Rdd1 Rg2 39.d5 Qc2+ 40.Ka2 Re2 41.Rc1 Qe4

42.Rxe2 Qxe2 43.Rc8+ Kh7
Summary: I know that some of the above variations are practically impossible to find over the board or even to remember during an intense competitive game. What I want to demonstrate with this display is mainly the spirit of the entire variation itself, how absolutely essential it is for Black to continue in the most energetic way possible. It is instructive the way Black attacked White on practically every move without giving him any breathing space. I sincerely believe that the Colman Variation is perfectly sound and can yield tremendous results in tournament play. So, why not give it a shot?

□ **Bierbach,U.**
■ **Knezevic,M.**
22: Moscow 1991
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Qe2!? This is a pet move of the creative Swedish GM Jonny Hector. It has its points, but theoretically it's not very challenging. If White plays a quick d2−d3, we get a Quiet Two Knight's Italian with the queen committed early to e2 which isn't really challenging. That's why this game is going to cover those lines where White goes d2−d4 in one go. **4...Be7** In analogy with our repertoire in the Quiet Two Knights, I want my bishop on e7. **5.0−0**

[Jonny Hector usually plays 5.d4!? which is tricky, but harmless if Black responds with the accurate d5! :

A) . The first time Hector met this, he played 6.Bb5 when Black should have countered with 0−0! because 7.Bxc6 bxc6 8.Nxe5 c5 provides Black with excellent compensation, with his quick development and central pressure.;

B) 6.dxe5 Nxe4 7.0−0 was the later J.Hector−M.Breutigam, Nuremberg 2012, and now Black could have picked up the bishop−pair with the clever and now Black could've picked up the bishop pair with the clever Na5! 8.Bd3 Nc5 . *(8...−−)*;

C) 6.−−]

5...0−0 6.c3 d5! Similar to when White plays c2−c3 in the Quiet Two Knights, this works well now. Black sacrifices the

pawn on e5 for quick development and a potential kingside attack in the spirit of the Marshall Attack.

[Black can also go 6...d6 , but after 7.d4 we have a kind of Worrall Attack from the Ruy Lopez where White looks comfortable.]

7.exd5 Nxd5 8.d3 A clear sign that 6...d5 was correct. Black was able to play ...d5 unpunished and can look forward to a nice middlegame with good chances.

[It's not a surprise that 8.Nxe5? doesn't work out well for White, especially with the queen exposed on e2: Nf4! 9.Qe4 Nxe5 10.Qxf4 *(10.Qxe5 Bd6* is already losing for White *)* 10...Bd6 11.h3 was played in J.Gheng−E.Schunk, German League 2000, and now Ng6! 12.Qd4 Nf4 followed by ...Bxh3 leaves White set to fall victim to a miniature.]

8...Bg4

[Another reasonable idea is to simply go 8...Bf6 followed by ...Bf5, ...Na5 and ...Re8, with central pressure.]

9.a3 This is obviously not a challenge for Black.

[Some players have actually ventured 9.h3 Bh5 10.g4 Bg6 11.Nxe5 Nxe5 12.Qxe5 , but after Nb6 and ...Bd6 White's kingside looks weakened beyond salvation.]

9...Kh8 10.Qe4 Nf6 11.Qe3 Nd7!? One of many interesting ideas. Black's last few moves show that he's eager to involve the f−pawn in the attack, and for some reason White decides to provoke it. **12.h3 Bh5 13.g4 Bg6 14.b4 Bd6 15.Nbd2 f5** Black has got exactly what he wanted and I'm not really sure what White thought would happen. **16.Be6 fxg4 17.hxg4 Qe7 18.Bxd7 Qxd7 19.Nh2 e4! 20.Nxe4 Bxe4 21.dxe4 Bxh2+ 22.Kxh2 Ne5** . At this point, White had had enough and decided to call it a day. With the white king so weak, I can't blame him.

■ **Khruschiov,A.**
44: Moscow 2006
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Nc3 Nf6 4.Bc4 Nxe4 5.0−0 This gambit definitely deserves to be treated with respect. Not because I think it's particularly good, but if Black tries to develop as he usually does he won't get any advantage.
5...Nxc3 6.dxc3 What we've got here is a position where White is ahead in development, but Black has an extra pawn. The problem for Black is that if he tries to develop normally, White will gain an initiative or at least the pawn back with equal prospects. We want to fight for more than that. **6...Qe7!** A very rare move, but I definitely believe in it. Black wants to develop smoothly with ...d6 and ...Be6 when White's attack will be neutralized. Any f−pawn lunges by White won't be a problem since Black just plays ...f6 and ...d6 to keep the position closed.
[Instead: 6...d6 won't do because of 7.Ng5! and Black can't properly defend f7.]
[The most popular move is therefore 6...Be7 , which develops while preventing Ng5, but after 7.Qd5 0−0 8.Nxe5 Nxe5 9.Qxe5 White has regained his pawn and the position has a tendency to become drawish.]
[Instead, the latest trend is to play 6...f6!? when Black wants to go ...Ne7 and ...d5 to claim the centre. Even though Black should be better, White can try to create some chaos with 7.Nh4 followed by launching the f−pawn up the board.]
7.Re1
[Of course, if White tries 7.Ng5 we can simply play Nd8! which is a very cute defence. 8.f4? is principled, but doesn't work because of Qc5+ , picking up the bishop.]
7...d6 8.Ng5 This doesn't seem to give White anything, but Black's position is bullet−proof. There's simply nothing to attack, so I can't blame White for trying.
[Indeed, 8.Nd4 Bd7 doesn't change anything. Black will play ...0−0−0 with a solid position and eventually just consolidate his extra pawn.]
8...Nd8 9.f4 f6! As usual, nothing gets

through to Black's king. **10.Nf3**
[The first game of our variation comes from way back in 1899, but it still shows that Black is doing excellently: 10.Ne4 Be6 11.fxe5 dxe5 12.Bb5+ c6 13.Bd3 Nf7 and Black is just a clear pawn up. He could attack with ... 0−0−0 followed by ...f5 and ...e4, and Black later won in B.Huelsen−E. Schallopp, Berlin 1889.]
10...Be6 Definitely the right idea, but I'd consider avoiding the complications White can now try to stir up.
[I'd prefer to start with 10...Nf7 and only then ...Be6, or even just ... c6 with the idea of ...d5 or ...g6 followed by ...Bg7 and ...0−0. I simply don't see where White is supposed to get his compensation. In our main game White only gets one chance, but he didn't take it.]
11.Bxe6?!
[White has to try 11.fxe5 dxe5 12.Nxe5! fxe5 13.Rxe5 when Black should play Bxc4 14.Rxe7+ Bxe7 when we have a rook and two minor pieces for a queen and a pawn. White isn't close to sufficient compensation, but I believe creating a material imbalance would complicate technical matters for Black.]
11...Qxe6 12.Nd4 Qd7 13.f5
Now Black is simply a clear pawn ahead and with excellent potential in the centre.
13...d5 14.Qg4 Bc5 15.b4 Bxd4+
Black goes for a typical position where he has a good knight versus a bad bishop. And if that wasn't enough, Black is up a pawn as well.
[It would also be fine to go 15...Bb6!? and just develop with ...0−0 and perhaps ...a5.]
16.cxd4 e4 17.c4 c6 18.c5!
White has to prevent a future ...Nf7−d6−c4, and this way he also gains a few outposts for his bishop, even though it might difficult to make anything out of them. **18...a5 19.Bd2?! axb4 20.Bxb4 0−0 21.a3** I can't imagine this is where White wanted his bishop when playing 18 c5, but White's position was bad anyway. In the game he soon blunders, which is logical seeing that he had a worse position from move 5 onwards.
21...Nf7 22.Rf1 Rfe8 23.Rae1 e3! 24.Rf3 Re7 25.Qg3 Rae8 26.Bc3 Ng5 27.Rff1? e2!
0−1

□ **Saint Petersburg**
■ **Vienna,Chess Club**
St Petersburg−Vienna 1897−8 (2) 1897
[Alapin in 'Schachfreund'.]

TH: Played by telegraph 1/12/1897−30/4/1898. Chigorin was probably involved in this match to some extent, but probably not as much as in other matches as St Petersburg was outplayed. See The Field 21 May 1989; cf Pagni volume 1. Verbal notes by Kemeny included with these notes from Alapin. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4**
[4...Bb6 5.a4 a6 6.c3 Nf6 7.d3 d6 8.Be3±]
5.c3 Ba5!
[5...Bc5 6.d4! exd4 7.0−0 Bb6! 8.cxd4]
6.0−0
[6.d4 d6! 7.0−0 Bb6]
6...d6!
[6...Nf6 7.d4 0−0 8.Nxe5 Nxe4

9.Ba3 d6 10.Nxc6 bxc6 11.Qa4 Bxc3 12.Nxc3 Nxc3 13.Qxc6 Be6 *(13...Bd7 14.Bxf7+)* 14.Rfc1 Bxc4 15.Rxc3 Be6 16.Qxc7]

7.d4 Bb6 KEMENY: A move adopted by Lasker. White may regain his pawn by playing 8.dxe5 dxe5 9.Qxd8+ followed by Nxe5 or Bxf7, according to Black's ... Nxd8 or ...Kxd8, but then his attack is over and Black has a very satisfactory development.

[Recommended by Dr. E.Lasker. Better is 7...Bd7!]

8.a4

[Better is 8.dxe5 dxe5 9.Qxd8+ Nxd8 10.Nxe5 Nf6 *(10...Ne7 11.Ba3 f6 12.Nd3 Be6 13.Nd2)* 11.Bg5 Ke7 12.Nd3 h6 13.Bh4 g5 14.Bg3]

8...Nf6

[8...Bg4 9.a5 Nxa5 10.Rxa5 Bxa5 11.dxe5 Bb6 12.Qb3 Bxf3 13.Bxf7+ Kf8 14.gxf3 Qe7−+]

9.Bb5 a6

[9...0−0? 10.Bxc6 bxc6 11.a5]

10.Bxc6+ bxc6 11.a5 Ba7 12.Qa4?

[12.Nbd2! exd4 13.cxd4 0−0 14.Qc2 Bd7 15.Bb2 *(15.Ba3)*]

12...exd4! KEMENY: The best reply. White cannot well proceed with 13 Qxc6+ on account of ...Bd7.

[12...0−0 13.dxe5 *(13.Qxc6 Bd7 14.Qxa6 Bxd4 15.Qd3)* 13...dxe5 14.Ba3 *(14.Nxe5 Qe8! 15.Qxc6? Qxe5! 16.Qxa8 Ng4 17.g3 Nxh2! 18.Qxa7 Nf3+−+)* 14...Re8 15.Rd1 Bd7 16.Nbd2→]

13.cxd4

[13.e5 dxe5 14.Ba3 Qd5 15.c4 *(15.Re1 e4 16.cxd4 Qb5 17.Qc2 Be6 18.Nc3 Qd3 19.Qa4? Qxc3 20.Rac1 Bb3−+)* 15...Qe6 16.Ng5 Qd7 17.Re1 c5 18.Rxe5+ Kf8 19.Bxc5+? Bxc5 20.Rxc5 Qe7−+]

13...Bd7 14.e5

[14.Qc2!? Wiener Schachzeitung Δ0−0 15.Nbd2 Alapin]

14...Nd5! KEMENY: Superior to 14... dxe5, in which case 15.Nxe5 and 16. Nxd7 might have followed.

[14...Ne4 15.exd6 cxd6 16.Re1 d5 17.Nbd2 f5 18.Ba3→]

15.Ba3 0−0 16.Qc4? KEMENY: Had White played 16.exd6 exd6 17.Bxd6, then the eventual . .. c5 move would have at least equalized the position. The text move is more aggressive, however it does not prove satisfactory on account of the 16...Nf4 reply Black had on hand.

[16.exd6 cxd6 *(16...c5 17.Qd1!)* 17.Bxd6]

16...Nf4

[16...Bg4 17.Nbd2 Qd7 18.Rac1 Ne7]

17.Kh1

[17.exd6 Better according to Matsukevich & Pinski, to retain the pressure cxd6 *(17...Be6 18.Qxc6 Bd5 19.Qxc7 Bxf3 20.Qxd8 Ne2+ 21.Kh1 Bxg2+ 22.Kxg2 Rfxd8 23.Ra2 Nxd4 24.Rd1)* 18.Bxd6 Be6 19.Qb4! Ne2+ 20.Kh1 Re8 21.Nbd2 Bd5 22.Bc5 Bb8∓]

17...Be6! 18.Qc1 KEMENY: He could not well play 16.Qxc6 on account of 16... Bd5; if then 17.Qc3, Black answers 17... Ne2, .. .Bxf3 and ...Nxd4. **18...Nxg2!!** KEMENY: Brilliant play, which seems perfectly sound; White is obliged to capture the knight, and the continuation from this point is pretty near forced.

19.Kxg2 Bd5 20.Kg3? KEMENY: Necessary, since ...Qh4, followed by ... Qg4+, was threatening.

[20.Qf4? Bxd4 21.Qxd4? Qg5+ 22.Kh3 Be6+ 23.Qg4 Qxg4#]
[20.Nbd2? Qg5+ 21.Kh1 Qf4 22.Qd1 Bxd4 23.Rc1? Bxe5 24.Kg1 Qg4+ 25.Kh1 Qh3 26.Kg1 Bxh2+]
[20.Bb2 Qh4 21.h3 dxe5 *(21...Bxd4 22.Bxd4 Qxd4 23.Nc3; 21...Bxf3+! 22.Kxf3 Qxh3+ 23.Ke2 dxe5 24.Qe3)* 22.Ra3 exd4 23.Kh2]

20...f5! 21.Nbd2 KEMENY: He could not play 21.exf6, for this would bring the Black Queen and rook into action, after which the attack becomes irresistible.

[21.Qf4 Bxd4! 22.Qxd4? *(22.Nxd4 dxe5 23.Qd2 f4+ 24.Kh3 Qg5 25.f3 Rf6 26.Nf5 Be6)* 22...f4+ 23.Kh3 Qd7+ 24.Kh4 Qe7+ 25.Kh3 Qe6+ 26.Kh4 Qh6+ 27.Kg4 Be6#]

□ **Trumble ('Mr T of Hull'),W. E.**
■ **Ballard,Charles HR**
Hull Miscellany tourney rd1 (1) 1878
[West Sussex County Chronicle 20/11/1878]

West Sussex County Chronicle 20/11/1878. 'The following game occurred in the first round of a correspondence match in connection with the "Huddersfield College Magazine", the winner being a member of the Chichester Chess Club.' (Mr T of Hull v Mr C of Chichester) Brian Denman thinks he saw a correction that it wasn't anything to do with Huddersfield, and indeed this was a game from the Hull Miscellany/ Hull Bellman tourney that began in 1878. C. Ballard of Chichester won that; he was apparently one of the stronger players in Ch. says Denman. There was a W. E. Trumble in the Hull club (see CPC 1878) so he is a candidate for loser of this game. Yes, the Hull Miscellany shows this was a round one pairing, and a somewhat earlier game 'Mr T of Hull v Mr L of Chichester' must have been won by Trumble. Players contested two games in this tournament; the reverse colour game, also won by Ballard, appeared in

the Hull Bellman later in the year. . This game appeared in the Bellman on 20/12/1879. **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.Nxd4?!**

□ **Cava Rodrigues,Bruno**

■ **Santos,Celso da Silva**

Rio de Janeiro Paschoal op (4) 06.09.08

[Cava Rodrigues,Bruno]

1.e4 KeplerCava **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3** Gambito Evans, uma das aberturas mais clássicas da história do xadrez. Ultra−analisada no século XIX, presente no match Steinitz x Tchigorin, ocasionalmente ainda é jogada por super−GMs. **4...Nf6 5.d4 exd4** Variação mais moderna, mas não necessariamente a melhor. O mais usual é 5... Ba5. **6.cxd4 Bb4+ 7.Bd2 Bxd2+?** Este lance concede toda a iniciativa às brancas. Kasparov x Anand, 1995, seguiu: **8.Nbxd2 d5 9.exd5!** Forçando uma transposição favorável. Pior seria: **9...Nxd5 10.0−0 0−0 11.Nb3** Esta mesma posição chega−se com 6... d6 7. dxe5 Cxe5 8. Cxe5 dxe5 9. Dh5! **11...Bg4 12.Be2**

[12.h3 Bh5 13.g3 Kh8 14.Kg2 b6 15.Qd2 f5 16.Ne5 Qd6 17.f4 Rad8 18.Rac1 Nf6 19.Nxc6 Buscando contra−jogo, com possibilidades para ambos. Qxc6+ 20.Kh2 Qd6 21.Qg2 Be8 22.Bd3 c5= 23.Bxf5 Nd5 24.Qe4 Bb5 25.dxc5! E as brancas não podem trocar de damas, face ao rei melhor colocado na ala da dama. O final é levemente superior às brancas pelo rei protegido. Fritz: +0, 81. Qf6! 26.Rfe1 Qxf5 27.Qxf5 Rxf5 28.Nd4 Nxf4 29.Nxb5 Nd3 30.Rcd1 Rfd5 31.Nd6 R5xd6 32.cxd6! Nxe1]

12...Re8 13.Ne5 Bxe2 14.Qxe2 Qg5± Por incrível que pareça, a posição é apenas levemente favorável às brancas, pois as negras estão sólidas. O lance Cd7 é superior ao anteriormente jogado no tour de force de Fischer x Celle, 1964 (simultânea), que seguiu assim: **15.f4 Nxf4 16.Qf3 Nxe5! 17.dxe5 Nxg2 18.Qxg2 Rxe5 19.Qxg5 Rxg5+ 20.Kh1 Kf8 21.Rac1 c6 22.Nc5 Rg6 23.Rf2! b6 24.Nd7+± Ke8 25.Ne5?! Re6 26.Nxf7 h6 27.Nd6+ Kd7**

[27...Rxd6 28.Re1+ Kd7 29.Rf7+ Kd8 30.Rf8+ Para o computador desde Tc6 é um empate morto (0,00/0, 00), mas obviamente muito difícil de calcular em todas as suas variações. Nenhum dos lados percebeu que as brancas têm exatamente o tempo necessário para tablas.]

28.Nf5 g5 29.Rd2+ Kc7!? 30.Rcd1!?
O último lance de cada lado complica enormemente a partida. As negras têm o rei exposto, mas as brancas permitiram temas na oitava fila. **30...Rf8!**
Início de uma linha forçada que leva à troca de damas. Outra opção seria: **31.Nd4 Re7 32.b4 Kb7 33.a3 a6 34.Kg2 h5** Negras têm torres mais ativas e o rei do lado certo. **35.Rc1 Rd8 36.Re2 Rxe2+ 37.Nxe2 h4 38.h3 Rd2 39.Kf2 Rd5 40.Rc3 c5 41.bxc5 bxc5? 42.Kf3?** Perdendo a chance de um empate matemático: **42...Kc6 43.Kg4 Kd6 44.Ng1 Ke6 45.Nf3 Kf6 46.Rb3 Rd6 47.a4 Kg6 48.a5 Rd5 49.Rb6+ Kg7 50.Rxa6 c4 51.Rc6 Rxa5 52.Rxc4 Kh6 53.Rc6+ Kg7 54.Nxg5 Ra4+ 55.Kh5 Rb4 56.Re6 Rf4 57.Re4 Rf6 58.Kxh4 Rf1 59.Kh5 Rh1 60.h4 Rh2 61.Re7+ Kf8 62.Rh7 Ra2 63.Kg6**

Nh4!! Morphy. This 22...♘h4!! ia not my move, it is not a computer move; humour shows me this move! In 1967, Keres and Petrosian took part in the Piatigorksy Memorial tournament (USA). The winner was Paul Keres and his prize was a beautiful red car. In 1971 − after a round of the international tournament in Tallinn − Keres, Petrosian and I (the organiser) arrived at the hotel. Petrosian opened the door of the car and he remembered something: "Paul, beautiful car, but if I play against you ...♘h4!! you have to walk." So, in another position, I play ...♘h4! [TH: nice story but so far I didn't find the position he is referring to in a game between Keres & Petrosian]

[22...Nxe1? 23.Nd2∞]

23.Nc7 Kxc7 24.Qe5+ Kc6!

The king wins the game!

□ **Kogan,A..**

■ **Miles,A..**

Biel Open, Switzerland 1994 1994

[Paul Motwani]

G9.11: "Black is miles better here!" A. Kogan−A.Miles, Biel Open, Switzerland 1994. Scotch Gambit (by transposition). **1.e4 Nc6 2.d4 e5 3.Nf3** On this e4−e5 site, 1 e4 e5 2 Nf3 Nc6 3 d4 would be our 'normal' move−order to reach the given position. **3...exd4 4.Bc4 Bc5 5.c3 Nf6** See game G9.7 for some discussion of alternatives for White and Black, earlier or later in the opening. **6.e5 d5 7.Bb5 Ne4 8.cxd4**

[8.Nxd4 0−0! was excellent for Black too in the aforementioned G9.7.]

8...Bb4+ 9.Bd2 Nxd2 10.Nbxd2 Bd7 With ideas of playing ...Nxe5. **11.Bd3?!**

[11.Be2 would take the sting out of the move ...Bg4, which puts an unpleasant pin on White's f3−knight in the actual game.]

11...Bg4! 12.Bb5

[12.Be2? now loses material to Bxf3 13.Bxf3 Nxd4 intending 14.Qa4+ b5 15.Qxb4 Nc2+ a fatal fork for White's royal couple.]

12...0−0 13.Bxc6 bxc6 14.0−0 Bxd2 15.Qxd2 Bxf3 16.gxf3 Qd7 17.Kh1 f6! The principal difference between White's and Black's position is that the king in the latter case is much safer, whereas the white monarch is about to feel the "heat" as the f−file opens up. **18.f4 fxe5 19.fxe5 Rf3!** The rook lands in front of the f2−pawn like a huge boulder blocking it, and meanwhile the f8−square has been freed for Black's other rook to also exert pressure along the freshly−opened f−file. **20.Rg1 Qf5 21.Rg2 g6** A careful move, designed to nullify the effect of the white rook on the g−file. **22.Rc1 Rf8 23.Rxc6 Qe4! 24.Qc2**

[Black was threatening 24...Rxf2, and intending 24.Kg1 Rd3! 25.Qc2 *(* or *25.Qc1 Qf3* followed by a deadly ... Rd1+. *)* 25...Qe1#]

24...Rd3 Menacing 25...Rxf2!! 26 Qxf2 Rd1+ 27 Qg1 Rxg1+ 28 Kxg1 Qe1, a lovely line. **25.Rf6 Rxf6 26.exf6 Qf3 27.f7+ Kg7** Black's king uses White's f7−pawn for shelter! **28.h4 c6** This move underlines White's helplessness and the fact that he can do almost nothing now. **29.Kh2**

[29.Qxc6 Qh3+ forces 30.Kg1 *(* or *30.Rh2 Rd1#)* 30...Rd1#]

29...Qf4+ 30.Kh1

[If 30.Rg3 then Rd2! finishes White off in a hurry!]

30...Qxh4+ 31.Rh2 Qe4+! 32.Kg1

[32.Rg2 Rh3+ 33.Kg1 Qxc2 is of course unbelievably terrible for White, but *(33...Qe1#* is worse! *)*]

32...Qg4+! White resigned in view of 33 Rg2 Rd1+ 34 Kh2 Qh4.
0−1

□ **Hautot,S..**
■ **Motwani,P..**
Anderlecht rapid−play 1999
[Paul Motwani]

G9.7: "Drama in the Scotch Gambit" S. Hautot−P.Motwani, Anderlecht rapid−play tournament, Brussels 1999. Scotch Gambit. **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3**
[5.Ng5 Nh6 6.Nxf7 Nxf7 7.Bxf7+ Kxf7 8.Qh5+ g6 9.Qxc5 d6 gives Black such an active position that he certainly would not be worried about his king having given up the right to castle]
5...Nf6
[The tactical ideas in the line 5...dxc3 6.Bxf7+ Kxf7 7.Qd5+ resemble those involved in the previous note, but this time it's rather more dangerous for Black because White still has a knight on the kingside.]
6.e5
[6.cxd4 Bb4+ is also fine for Black, as is]
[6.0−0 Nxe4 7.cxd4 d5!]
6...d5! A typical counterpunch from Black, who ignores (for now) the attack on his f6−knight and instead lashes out with an energetic central pawn−thrust which aids his development while also hitting back at White **7.Bb5**
[After 7.exf6 dxc4 8.fxg7 Rg8 Black would have a 'dream' position (although his active pieces look anything but sleepy!).]
7...Ne4 8.Nxd4
[8.cxd4 Bb6 *(* or *8...Bb4+* is also very pleasant for Black. *)*]
8...0−0!
[Instead of 8...Bd7 Black was able to continue much more actively, and it's clear that he now has a really good version of the related line 1 e4 e5 2 Nf3 Nc6 3 d4 exd4 4 Bc4 Nf6 5 e5 d5 6 Bb5 Ne4 7 Nxd4.]
9.Bxc6
[Black was threatening 9...Nxe5, but 9.Nxc6? would have lost instantly because of bxc6 10.Bxc6 Bxf2+ 11.Kf1 *(* or *11.Ke2 Bg4+)* 11...Ba6+]
9...bxc6 10.0−0 f6 11.b4
[Black was planning to meet 11.f3 with fxe5!]
[11.Nxc6 Qd7 is tremendous for Black, since he will actually win the e5−pawn and thereby obtain a superb pawn−centre plus use of an open f−file after ...fxe5]
11...Bxd4 12.Qxd4
[12.cxd4 Ba6 13.Re1 fxe5 14.f3 Qh4! leads to pretty lines for Black like 15.fxe4 *(15.g3 Nxg3* is easy*; 15.dxe5 Qf2+ 16.Kh1 Rf5!!* threatening 17... Ng3+! 18 hxg3 Rh5 *17.fxe4 Bf1! 18.Qg4 Bxg2+ 19.Qxg2 Qxe1+ 20.Qg1 Qxe4+ 21.Qg2 Rf1#; 15.Be3* allows *exd4)* 15...Qf2+ 16.Kh1 Bf1! *(*which is vastly better than *16...Be2 17.Be3!)*]
12...Ba6 13.Re1 fxe5 14.Qxe5 Qh4
Of course Black could have already captured the f2−pawn, but his queen wants a chance to do it! **15.Be3**
[If 15.g3 Qh3 16.Be3 Rae8 17.Qxc7 then Nxf2 creating a multitude of threats including 18...Ng4 18.Bxf2

Rxe1+ 19.Bxe1 Qf1#]

15...Nxf2 After all, it's the black knight that gets food at f2, and the hungry horse hopes to feast more by jumping to d3/g4/h3. **16.Qe6+**

[If 16.g3 then Black should win quite comfortably with Qxh2+ 17.Kxh2 Ng4+ and 18...Nxe5.]

16...Kh8 17.g3 Qh5!

[Especially in a rapid−play game, I did not find it easy to choose between this move and other tempting possibilities such as 17...Nh3+ 18.Kg2 Ng5 *(*or *18...Qh5!?* intending *19.Qxh3 Bf1+ 20.Rxf1 Qxh3+ 21.Kxh3 Rxf1* which puts White's knight into a painful pin. In retrospect, I now think that 17...Qh5 really is the best choice, but some forthcoming analysis will show that I missed an important point during the actual game. *)*]

18.Bxf2 Rae8? Reader's Challenge P9. 7.1 Following the analysis given until 21...Qxg3, how should Black continue after 22 Qf5 by White? An answer appears after the main game G9.7.

[It's a mistake to win White's queen! Instead 18...Rxf2! 19.Kxf2 Qxh2+ 20.Ke3 Rf8! threatening 21...Qf2 wins for Black. In my mind 21.Kd4 seemed unclear during the heat of battle, but later I realised that Qxg3 gives Black overwhelming threats (such as 22...Rf4+ 23 Kc5 Rc4), and 22.Kc5 Qd3! leaves White almost helplessly facing 23...Qc4.]

19.Qxe8!

[It's brave and also necessary to do this, since 19.Qxc6? loses by force to Rxe1+ 20.Bxe1 Qe2 *(*or *20...Rf1+ 21.Kg2 Qf3+ 22.Kh3 Bc8+ 23.Kh4 Qg4#)* 21.Nd2 Rf1+ 22.Nxf1 Qxf1#]

[19.g4? doesn't help White either, in view of Rxe6 20.gxh5 Rxe1+ 21.Bxe1 Rf1+ 22.Kg2 Rxe1]

19...Rxe8 20.Rxe8+ Qxe8 21.Nd2 Basically, White only has R+N for Q+P, but Black's surplus pawn on the queenside is not worth much, because his structure there is very poor. So I now took a radical decision to jettison two pawns in order to open up the a8−h1 diagonal for my Q+B to organise threats against the opponent's king.

21...c5 22.Re1 Qc6 23.Bxc5 d4 24.Bxd4 Bb7 25.Ne4?

[After 25.Re4 the game remains a close fight, but instead White makes a fatal error due to having virtually no time left on his clock]

25...Qe8!

[25...Qe6? lets White 'off the hook' with 26.Rf1! but 25...Qe8! 26 Rf1 Bxe4 27 Bc5 Kg8 wins easily for Black. Solution to P9.7.1 Of course not 22... Rxf5?? because of 23 Re8+, but instead 22...Qh4+! 23 Re4 (23 Kc5 Qc4) 23...Qxe4+ 24 Qxe4 dxe4 wins easily for Black, whose deadly duo of passed g− and h−pawns will be unstoppable.]

□ **Sweet,S.**
■ **Mitchell,Bob (Richard C. MP)**
BCCS−BCCA match (31.1) 2000

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6
4.Nc3?! Not really very good, but I always allow myself a smile when I see it, as it brings back memories of my old friend Ritson. **4...Nxe4 5.Nxe4 d5 6.Bxd5**
[6.Bb5 is another continuation here, when after dxe4 7.Nxe5 I think Qg5! is the best move.]
6...Qxd5 7.Nc3 Qd8 Surprisingly, this seems to be the best square. **8.Qe2**
[8.0−0 Bd6 9.d3 0−0 10.h3 f5 11.Re1 Bd7 12.Qe2 Qe8 13.Be3 Qg6 14.Kh1 f4 15.Bd2 Nd4 16.Nxd4 exd4 17.Ne4 f3! 18.gxf3 Bxh3 19.Rg1 Qh5 20.Rg5 Qh4 21.Kg1 Bh2+! 22.Kh1 Bf1! 23.Qe1 Be2! 0−1, was the beautiful execution in Hermann − Charousek, 1896. Of all the players who ever lived, I think Charousek had the most pure and perfect chess style of all.]
8...Bg4 9.h3 Bxf3 10.Qxf3 Bd6 11.0−0 0−0 12.d3 Re8
[Looks unnecessary. Black could continue with simply 12...Nd4 or]
[12...f5 13.Be3 Qh4]
13.Ne4 Nd4 14.Qd1 f5 15.Nxd6 Qxd6
[15...cxd6 16.c3 Nc6 17.Qb3+ d5 18.Qxb7 Qd6 with compensation for the pawn is worth considering.]
16.c3 Quite rightly not worrying about the 'backward pawn' on d3. It's far more important to get some pieces into play.
16...Nc6
[16...Ne6 17.Qf3=]
17.Qb3+ Kh8 18.Qxb7 a6 19.Qb3 Qxd3 20.Qa4! Qb5 21.Qc2! e4
Now the position is dead level. **22.Be3 Ne5 23.a4**
[23.Rad1!?]
23...Qc4 24.b3 I assume that this and the following game were resigned for non−chess reasons.
0−1

■ **Alekhine,Alexander**

St Petersburg International Preliminary (1) *[Reinfeld,Fred]*

Alle Partien dieses Turniers sind zu finden in Tarrasch: Das Großmeisterturnier zu St. Petersburg im Jahre 1914. − Nürnberg: Tarrasch, 1914 (Reprint Olms 1993) − Engl.: Maxham [Übers.], Yorklyn 1993. **1.e4** Reinfeld in: The unknown Alekhine (bzw. 100 instructive Games), 86. s.a. Kalendovsky I, 218. Varnusz: Aljechin, der Größte <1914/18> Skinner/ Verhoeven: Alexander Alekhine's Chess Games, 316. Tarrasch: Das Großmeisterturnier zu St. Petersburg im Jahre 1914, S. 5f. (T) **1...e5 2.Nf3 Nc6 3.Bc4 Bc5**

[Ich halte 3...Nf6 für die korrektere und stärkere Fortsetzung. (T)]

4.c3 Qe7 Eine alte Verteidigung, die meist gewählt wird, um Überraschungen in der Eröffnung aus dem Wege zu gehen. (T) **5.0−0 d6 6.d4 Bb6 7.a4 a6 8.a5?** Weiß übersieht hierbei wohl den 10. Zug des Gegners. (T) The beginning of an unsound combination, all the more unnecessary since 8.♗e3 or 8. h3 gives White an excellent game. **8...Nxa5 9.Rxa5 Bxa5 10.Qa4+ b5 11.Qxa5 bxc4 12.dxe5 dxe5 13.b3?** Weiß hat die Qualität halb geopfert, halb verloren, würde aber noch kein übles Spiel haben, wenn er jetzt den ♙e5 mit dem ♘ schlüge. Der ♙c4 müßte auch noch fallen und dann hätte er für die Qualität einigermaßen Ersatz in dem Mittelbauern und seiner kompakten Stellung. Bei dem geschehenen Zuge kommt für ihn gar nichts heraus. (T) This superficial move allows Alekhine to seize the initiative in short order.

[13.Nxe5 was the only move to give some chances.]

13...f6! 14.Rd1

[14.Ba3 Qd8 followed by ♘e7 and Black has an easy game.]

14...Be6 15.Ba3 Rd8! Eine fatale Überraschung! (T) **16.Nbd2 Qd7 17.Re1** Weiß hat keine Spur von Angriff und muß verlieren. (T) **17...Ne7 18.Qb4** Um wenigstens die Rochade zu verhindern. (T) **18...a5! 19.Qc5** He wants to stop Black from casteling; but Black's ♔ is perfectly safe in the center. **19...cxb3 20.Nf1 Qd6! 21.Qxa5 Qb6 22.Qa4+ Kf7 23.Bxe7 Kxe7 24.Qa3+ c5 25.c4 Ra8!**

Damit kommt Schwarz zum Gegenangriff und der Freibauer entscheidet schnell. (T)
[25...Bxc4 The text is even stronger.]
26.Qc1 b2! 27.Qc2 Ra1 28.N1d2 Rxe1+ 29.Nxe1 Rd8! Threatening 30.−♖d2: with instant destruction. **30.Nd3**
[30.Nf1 Qb4−+ winning easily.]
30...Qd6 White loses at least a piece. Lucky indeed is the player who can begin a tournament with such a game. **0−1**

□ **Sitnikov,A.**
■ **Romanishin,O.**
6: Kavala 2006
[Martin Lokander]

1.e4 e5 2.Bc4
[Once more, the usual path is 2.Nf3
Nc6 3.Bc4 Nf6 4.d3 Be7 .]
2...Nf6 3.d3 Nc6 4.Nf3 Be7
Again we meet this move order. **5.c3**
Another transposition.
[5.0−0 0−0 6.Bb3 d6 7.c3 d5
is the 'normal' path to the position in
the game.]
5...0−0 6.0−0 d6
[As you will notice in Game 7, in this
particular position (with an early c2−
c3), I like the immediate 6...d5 .]
7.Bb3 d5 And here we are! Black's ingenious tempo loss, played by none other than the inventor himself, Oleg Romanishin. We saw what happened after 8 exd5 in our previous game. In this game we will see what happens if

White maintains the tension in the centre. **8.Nbd2** The most popular move.

[8.Qe2 is quite a logical move too as it protects e4, puts pressure on e5 and prepares a future Rd1. I used to find 8 Qe2 the most challenging move, until I found Be6! , which has only been played once, back in 1990. Now:

A) . Normal developing moves like 9.Nbd2 can never be a refutation of Black's idea. Indeed, Black is definitely not worse after simple developing moves such as Qd7 followed by placing the rooks in the centre.;

B) 9.Ng5 Bg4 is nothing for White either.;

C) . Grabbing the pawn is the obvious challenge to Black's idea, but this also involves some risk−taking: 9.exd5 Nxd5 10.Nxe5 Nxe5 11.Qxe5 Re8 *(11...Bd6* is probably good as well; the nature of the position doesn't change much *)* , and compared to the similar Marshall Attack, Black has aggressive ideas that go beyond mating the white king. He could, of course, hunt down the king, but I also like the following approach: 12.Qg3 a5! (this pawn is a strong, advancing wedge that will weaken the white queenside even further) 13.Nd2 a4 14.Bc2 a3! . It's clear that White isn't in charge. Black has full compensation.;

D) 9.−−]

8...dxe4 The simple equalizer. White can hardly hope for anything substantial in the symmetrical structure that arises.

9.dxe4

[After 9.Nxe4 Black won't be helpful by letting White get rid of his weak d3−pawn. Bf5 is probably to be preferred, with at least equality.]

9...Bc5! A standard idea worth remembering. The bishop goes to the more active a7−g1 diagonal and frees a very natural square on e7 for the queen.

10.h3

[10.Qe2 immediately looks more to the point, but it doesn't change the nature of the position: Qe7 11.Nc4 (in a very similar position, GM Slavisa Brenjo thinks White is slightly better, but he only consider the slightly passive ...a6) a5! 12.Bc2 *(12.Ba4 h6 13.Rd1 Bd7 14.Ne3* is equal as well *)* 12...b6 . This set−up was played in a similar position in E.Alekseev−M.Carlsen, Lausanne 2004, where Black was completely fine. It leads to a rich middlegame with good chances to outplay the opponent.]

10...Qe7 11.Nh4 White wants to put a knight on f5, but this idea is easily parried. **11...g6 12.Qf3 Kh8!?** Romanishin in a nutshell. He has a very creative style and there's a very creative idea behind this move. **13.Ba4 Ng8! 14.Qg3 f5** And there we have it. Reaching a symmetrical structure doesn't mean we have to play boring, manoeuvring chess for 100 moves. Romanishin lunges forward with his f−pawn and creates a strong initiative on the kingside. **15.Nhf3 Bd6 16.Re1 f4 17.Qh2** A clear sign that something has gone wrong for White. **17...Nd8 18.b4?!** Yes, quite. White is facing an uphill task here, but weakening the structure on the queenside isn't the solution. **18...a5! 19.Bb3 Nf6 20.Nc4 a4 21.Bc2 b5 22.Nb2** It's obvious that White has put

his own pieces in a twist and that Black is clearly better here. **22...Nf7 23.a3 c5! 24.bxc5 Bxc5 25.c4?!** After this miscalculation, White's cause can no longer be saved. It is, however, understandable that he cracks under the pressure. **25...bxc4 26.Nxa4 Rxa4! 27.Bxa4 Qa7** Romanishin doesn't miss a chance like that. **28.Re2 Qxa4** Black has two minor pieces for a rook and a huge position to boot. **29.Bb2 c3! 30.Bxc3 Qc4** Another tactical shot. They just keep coming when White's pieces are horribly placed. **31.Rc2 Qxe4**

[Black had an even quicker victory with 31...Bxf2+ 32.Kxf2 Qd3! , but we can't expect Romanishin to play with computer−like accuracy the entire game.]

32.Rac1 Bxa3 33.Bb2 Bxb2 34.Rxc8 Rxc8 . White decided to resign. Note the silly queen on h2, who has been stuck there the entire game.

0−1

□ **Kogan,A..**

■ **Miles,A..**

Open, 1994 Biel 1994

[Paul Motwani]

G9.11: "Black is miles better here!" A. Kogan−A.Miles, Biel Open, Switzerland 1994. Scotch Gambit (by transposition). **1.e4 Nc6 2.d4 e5 3.Nf3** On this e4−e5 site, 1 e4 e5 2 Nf3 Nc6 3 d4 would be our 'normal' move−order to reach the given position. **3...exd4 4.Bc4 Bc5 5.c3 Nf6** See game G9.7 for some discussion of alternatives for White and Black, earlier or later in the opening. **6.e5 d5 7.Bb5 Ne4 8.cxd4**

[8.Nxd4 0−0! was excellent for Black too in the aforementioned G9.7.]

8...Bb4+ 9.Bd2 Nxd2 10.Nbxd2 Bd7 With ideas of playing ...Nxe5. **11.Bd3?!**

[11.Be2 would take the sting out of the move ...Bg4, which puts an unpleasant pin on White's f3−knight in the actual game.]

11...Bg4! 12.Bb5

[12.Be2? now loses material to Bxf3 13.Bxf3 Nxd4 intending 14.Qa4+ b5 15.Qxb4 Nc2+ a fatal fork for White's royal couple.]

12...0−0 13.Bxc6 bxc6 14.0−0 Bxd2 15.Qxd2 Bxf3 16.gxf3 Qd7 17.Kh1 f6! The principal difference between White's and Black's position is that the king in the latter case is much safer, whereas the white monarch is about to feel the "heat" as the f−file opens up. **18.f4 fxe5 19.fxe5 Rf3!** The rook lands in front of the f2−pawn like a huge boulder blocking it, and meanwhile the f8−square has been freed for Black's other rook to also exert pressure along the freshly−opened f−file. **20.Rg1 Qf5 21.Rg2 g6** A careful move, designed to nullify the effect of the white rook on the g−file. **22.Rc1 Rf8 23.Rxc6 Qe4! 24.Qc2**

[Black was threatening 24...Rxf2, and intending 24.Kg1 Rd3! 25.Qc2 *(* or *25.Qc1 Qf3* followed by a deadly ... Rd1+. *)* 25...Qe1#]

24...Rd3 Menacing 25...Rxf2!! 26 Qxf2 Rd1+ 27 Qg1 Rxg1+ 28 Kxg1 Qe1, a lovely line. **25.Rf6 Rxf6 26.exf6 Qf3 27.f7+ Kg7** Black's king uses White's f7−pawn for shelter! **28.h4 c6** This move underlines White's helplessness and the fact that he can do almost nothing now.

29.Kh2
[29.Qxc6 Qh3+ forces 30.Kg1 *(*or *30.Rh2 Rd1#)* 30...Rd1#]
29...Qf4+ 30.Kh1
[If 30.Rg3 then Rd2! finishes White off in a hurry!]
30...Qxh4+ 31.Rh2 Qe4+! 32.Kg1
[32.Rg2 Rh3+ 33.Kg1 Qxc2 is of course unbelievably terrible for White, but *(33...Qe1#* is worse! *)*]
32...Qg4+! White resigned in view of 33 Rg2 Rd1+ 34 Kh2 Qh4.
0−1

■ **Petrov,Al**

1: Warsaw (match) 1844

[Cyrus Lakdawala]

I selected this game for sentimental reasons. It was the first one I ever played over in a chess book. At age eight I was blown away by Black's brilliance. At age 62, however, it beco⊥mes clear the game was closer to a comedy. Yet it is in a weird way a cult classic brilliancy, in the same way that Plan 9 from Outer Space had a shot to win an academy award - not much. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 Ne4?** EXERCISE (critical decision): How can White exploit Black's last move?

[Today, we know to play 6...d5 7.Bb5 Ne4 8.cxd4 Bb6 *(*or *8...Bb4+ .)*]

7.Bd5! ANSWER: Move the bishop to d5, which prevents a defence with ...d7−d5.

7...Nxf2 This sacrifice is relatively best, even though Black doesn't get enough for the piece, since White remains well developed.

[7...f5 8.cxd4 Bb4+ 9.Bd2 is wretched for Black, who is unable to castle.]

8.Kxf2 dxc3+ 9.Kg3! This way White doesn't block f1 with his king and allows his rook the square. **9...cxb2** This picks up a third pawn for the piece, at the cost of helping White develop.

10.Bxb2 Black's three pawns for the piece are not enough, since White was handed a lead in development and the potential for an attack on Black's king.

10...Ne7 EXERCISE (critical decision): On his last move Black threatens to swap away White's powerful light squared bishop, while also adding ... Nf5+ into the mix. How should White respond?

[10...0−0 11.Nbd2 d6 12.Ne4! is terrible for Black.]

11.Ng5?? ANSWER: Simply making luft for the white king leads to a winning position. −−− Principle: Whenever you spot a combination, you would be wise to take Murphy's Law into account. White's idea is unsound, since he forgets about his own king's safety.

[Instead, 11.h3! leaves White's king safe and Black clearly standing worse.]

[The threat to check on f5 should not be ignored: 11.Bb3? Nf5+ 12.Kf4 g5+!! 13.Ke4 *(*if *13.Nxg5?? Be3+ 14.Ke4 Qxg5* wins*;* or *13.Kxf5?? d5+ 14.e6 Bxe6+ 15.Ke5 Qd6+ 16.Kf6 Rg8 17.Bc2 Bd7#* and mates *)* 13...Qe7 14.Kd3 d5 and the advantage swung to Black.]

11...Nxd5 12.Nxf7 The sacrifice on f7 was the point. Now Black's queen and h8−rook hang simultaneously and if Black's king takes the knight, then Qxd5 comes with check. −−− EXERCISE

(combination alert): White's combination is horribly flawed and the engine points out no less than four (!) different ways for Black to win. For this exercise, find Black's optimal response.

[If 12.Qxd5?? (not check) Qxg5+ check, White doesn't have time to pick up the loose c5−bishop, and 13.Kf3 *(13.Kh3 d6+* is also fatal *)* 13...Qe3+ 14.Kg4 h5+ 15.Kf5 g6+ 16.Kf6 Be7+ 17.Kg7 Qh6# has shades of the famous Lasker−Thomas game, but with colours reversed.]

12...0−0! ANSWER: Queen sacrifice by simply castling. −−− The sacrifice is absolutely sound. And the answer to your question is: yes, castling is indeed a legal move, since the black king didn't pass through a check.

[The less optimal lines are also winning: a) 12...Qe7 13.Qxd5 Rf8 14.Nd2 Rxf7 15.Nf3 d6 with an extra pawn.]

[b) 12...Ne3 13.Qf3 Qe7 14.Nxh8 d5 (threat: ...Qg5+) 15.h4 Nf5+ 16.Kh2 Qxh4+ 17.Qh3 Qf4+ 18.g3 Qe3 with a winning attack for Black, although it's still quite complicated.]

[c) 12...Rf8 13.Nxd8 Bf2+ 14.Kh3 d6+ 15.e6 Nf4+ 16.Kg4 Nxe6 17.g3 Nd4+ 18.Kh5 Rf5+ 19.Kh4 Rd5! and the dual threats of ...g7−g5 mate and ...Nf5+, winning White's queen, are decisive.]

13.Nxd8 Bf2+ The remainder is wholesome, family entertainment and it's fun to watch White's king squirm. **14.Kh3 d6+ 15.e6** White is bloody lucky to have this block.

[15.g4?? Nf4# is mate straight away.]

15...Nf4+ 16.Kg4 In such positions we fight for our king's life, as if it were our own at stake. **16...Nxe6** Threatening mate in two, starting with ...Rf4+. Here the PGN splits from the PDF who gives; Threatening mate in two, starting with ... Rf4+. **17.Nxe6** EXERCISE (calculation): As a simple calculation exercise, work out Black's forced mate in four, without moving the pieces.

[Tartakower and Du Mont give a different finish: 17.g3 cutting off the rook check; Nd4+ *(17...Nxd8+ 18.Kh4 Rf4+ 19.Kg5 Ne6+ 20.Kh5 g6+ 21.Kh6 Rh4+ 22.gxh4 Be3#)* 18.Ne6 Bxe6+ 19.Kh4 Nf5+ 20.Kh3 Ne3+ 21.Kh4 Ng2+ 22.Kh5 g6+ 23.Kg5 Be3# .]

[17.Bc1 Nxd8+ also leads to a quick mate.]

17...Bxe6+ ANSWER: Start with the obvious capture on e6, with check. **18.Kg5 Rf5+ 19.Kg4 h5+ 20.Kh3 Rf3#** . Mate, with double check!

□ **Andrade,L.**
■ **Hoffman,A.**
57: Portuguese Team Championship
[Cyrus Lakdawala]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3 Nf6 6.e5 d5 7.Bb5 Ne4 8.cxd4 Bb6 The idea is to later attack White's king with a pawn avalanche on the kingside. **9.Nc3 0−0** This is going to be a bit tricky to remember: Our rule is that we can play our ...c7−c6 and ...d6−d5 plan against all white set−ups, yet when White posts the knight on f3, we have a secondary option to set up with ...Nc6, as in this game.
[9...Bd7]

10.Bxc6 bxc6! It may seem crazy to give White an open c−file, yet remember: A single weakness, in this case c7, can easily be defended. **11.Be3 Nxc3**

12.bxc3 Ba6 Principle: You may want peace, but if your opponent is intent on war, guess which one of you will get their way? With his last move Black loudly announces his mission statement. At first glance such an attack may feel unjustified and we may bloody ourselves more than our opponents when we are stupid enough to attempt a direct World War I−style frontal assault against our opponent's machine−gun nest/rampart. I have not found this to be the case and Black's coming attack is actually rather dangerous. Spassky perfected Black's attacking technique (with colours reversed in the Closed Sicilian) in his Candidates' match against Geller. Here is Spassky's technique: 1. c7 is virtually Black's only weakness, so cover it with ...Bd7 and ...Rc8. −−− 2. Lunge at White's king with ...f5−f4. −−− 3. Transfer the queen to h5, via e8. −−− 4. Then play ...Bh3 and ...Ng4, with massive force arrayed around White's king. **13.Qc2 f6 14.a4** A new move.

[14.h4]

14...Ba5 This is the Spassky playbook. The queen heads to h5. **15.h4**

[15.Nd2 fxe5! (threatening to fork king and queen on e3) 16.Nb3 exd4]

15...Rb8 GM Hoffman wants to lure his opponent's queen to b3 before he sends his own queen to h5. **16.h5 Qc8 17.exf6 Rxf6** The queen's work is done on f7, after having lured White's queen away from her king. **18.Ne5?!** White's pieces' quest for a queenside attack, despite his king being in grave danger, reaches a Manson Family level of detachment from reality, where they believed they could start a race war by murdering a rich Hollywood couple.

18...Re6

[18...Qf5]

19.Kd2?! EXERCISE (planning): White is just asking for it with his last move. What is the strongest continuation of Black's attack? **19...c5!** ANSWER: Don't bother to recapture on f4 and sink your bishop into h3. The threat is ...Qg4. Hoffman takes the Judge Dredd "I am the law!" route, where jury and trial proceed to the "Guilty! Your sentence is death" stage to White's king. **20.Qf5 Bxc3+ 21.Kxc3 cxd4+!** In this battle of greater financial resources versus greater energy, the latter dominates. Threat: ...Nh4. White is helpless. **22.Bxd4** White's non−existent defence is that part of the movie Office Space, where Michael Bolton is driving to work and whichever lane he currently occupies, is slower than all the others.

22...c5

[22...Rc6+ 23.Nxc6 Qxf5 and White lost a rook. Also failing is 24.Ne7+]

23.Qf7+ EXERCISE (combination alert): It's Black to play and force mate. −−− ANSWER: **23...Kh8!** . Annihilation of defensive barrier. Nothing works: a) **24.Rab1** fails to **24...cxd4+ 25.Kxd4 Rxe5!!** (removal of the guard) **26.Kxe5 Qc3+! 27.Kf4 Rc8!** when the rook can't be touched and Black wins. b) **28.g4**

[28.Kg4]

28...Qc5 29.Ke5 d4+

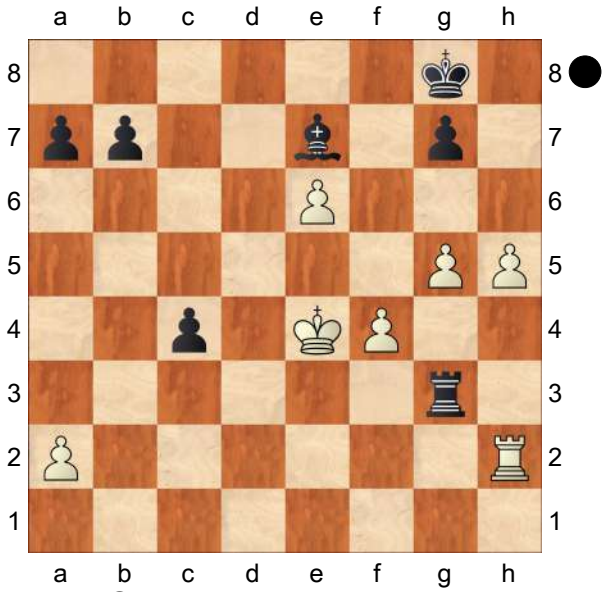
□ **Nash,William (19 cent)**
■ **Farrow,GW.**
unknown event 1873
[White, Recreationist pp39−40; Harding]

Recreationist, April 1873 pp.39−40: 'An interesting partie, just concluded' **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.cxd4 Bb6 8.0−0 d6 9.Nc3 Bg4 10.Qd3?!**
[Staunton's 'Praxis' p136 recommends 10.Qa4]
10...Bxf3 11.Qxf3 Qf6 12.Qxf6 Nxf6∓ 13.d5 Ne7 14.Bd2 Nd7 15.Na4 0−0 16.Bc3 f6 17.Kh1 Rac8 18.f4 Ng6 Black tries to accomplish too much by this and the next move, and thus allows White to equalise the game. **19.h4 h5 20.Be2** From this point to the end, the game abounds in very intricate positions and forms at almost every step positions of great interest to the lovers of end games. **20...Ne7 21.Bxh5 f5 22.Bf3 fxe4 23.Bxe4 Nc5 24.Nxc5 Bxc5 25.Rf3 Nf5 26.Re1 Rce8 27.Kh2 Re7 28.Bxf5 Rxe1 29.Be6+ Rxe6 30.dxe6 d5 31.g4 Bd6 32.Kg3 Re8 33.Re3 c5 34.Ba1 d4 35.Re4 d3 36.Kf3 Be7 37.h5 Rd8 38.Re1□ c4 39.Bc3 d2 40.Rd1 Rd3+ 41.Ke4 Rxc3 42.Rxd2 Rd3 43.Rh2 Rg3 44.g5** Diagram



44...Bxg5? Black here overlooks the effect of White's 46th move, and the oversight nearly proved fatal. The resulting position is, however, a beautiful one, during the following fourteen moves. **45.fxg5 Rxg5 46.Rf2! Rg1 47.Kd5 Re1 48.Kd6 Rd1+ 49.Ke7 c3 50.Rf8+ Kh7 51.Rc8 Rd3 52.Kf8 Rf3+ 53.Ke8 Rd3 54.e7 Kg8**

55.Rc7 a6 56.a4 b6
[Why not RR56...b5 TH: The correct result after this seems to be a draw? 57.axb5 axb5 58.Rd7 Re3 59.Rd8 Kh7 *(59...b4!?)* 60.Rc8 b4]
57.Rd7 Re3 58.Rd8 c2 59.Kd7+
We fancy Black erred at his 57th move. White usually plays an uphill game in good style, but here we believe he threw away his chance of winning. [TH: Surely Black's 57th move was correct and only move? But the editor, James White, is right that Nash missed a win here; the move played should have drawn?]
[Suppose 59.Rc8 Re2 60.Kd7+ Kh7□
A) 61.e8Q Rd2+ 62.Ke7 *(* Also *62.Kc7 c1Q+ 63.Kb8* wins, for White threatens mate in two places, and Black can give no check, except by sacrificing his Q. *)* 62...Re2+ 63.Kf8 Rf2+ 64.Qf7 wins;
B) 61.Rxc2 By playing his 60th move here given before his 59th, White lost a move and his chance of winning. The position here is very difficult.]
59...Kh7 60.Rc8 Rd3+ 61.Ke6 Re3+ 62.Kf5?? TH: very strange that the editor makes no comment on this blunder.
[62.Kf7=]
[62.Kd7=]
62...Rxe7 and Black ultimately won with his extra pawn.
[62...Rxe7 63.Rxc2∓ TH: White could have put up a long fight here?]

□ **Charleton,John**
■ **Fisher,Bernard W**
unknown event 1873
[Staunton, ILN 21/6/1873; Harding]

ILN 21 June 1873; Charleton in Newcastle, Fisher in Malvern. NB in

CPQC volume iv p.38 TCs that Fisher announced the removal/ expansion of his school from Malvern to Cheltenham. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.cxd4 Bb6 8.0−0 d6 9.d5 Na5 10.Bb2 Ne7 11.Bd3 0−0 12.Nc3 Ng6 13.Ne2 c5 14.Rc1 Bc7 15.Qd2 f6 16.Kh1 Rb8 17.h4?!** An imprudent move. His aim should have been the advance of the K B Pawn. **17...b5 18.h5 c4 19.hxg6!?** This also strikes us as an inconsiderate step. He ought to have retreated the attacked Bishop. (Fritz8 seems to prefer the move played.)

[⩲19.Bb1]

19...cxd3 20.gxh7+ Kxh7 21.Qxd3 Rh8 22.Nfd4 Nc4 23.Ba1 f5

TH: Fritz8 thinks this increases White's advantage **24.exf5?!** Why not have played

[⩲24.Qg3 attacking and defending also?]

24...Kg8+ 25.Kg1 Qh4 26.f4?

TH: No comment from Staunton but this is where White goes wrong according to the computer.

[⩲26.Qh3]

26...Bd8 TH: Black in his turn goes wrong but White fails to take advantage and collapses.

[RR26...Bb6∓]

27.Rf3? Simply suicidal; while by the obvious move of

[27.Nf3 he would have had a tolerably secure position. RRBb6+ *(RR27...Qg4)*]

[RR27.Nc6]

27...Qh1+

[RR27...Bb6!?]

28.Kf2 Bh4+ 29.g3? The crowning blunder! This in a game by correspondence!

[RR29.Rg3 and White is better says Fritz8, so Staunton's comment at move 27 is wrong.]

29...Bxg3+!

0−1

C55

□ **Yudasin,L.**

■ **Vladimirov,E.**

8: Tilburg 1994

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1! The most challenging 6th move in my opinion. White takes his time to prevent the ...d5 break. **6...d6 7.c3!?** Now that White has prevented ...d5, this move is critical. The bishop can slip down to c2 if necessary and the central structure is flexible.

[However, 7.a4 is the biggest challenge if you ask me, and this will be analysed in Games 9−11.]

7...Na5! The continuation I like best.

[I'm not a huge fan of 7...Be6 because of 8.Bxe6 fxe6 9.Qb3! when Black is slightly too passive for my taste.]

8.Bb5 a6 9.Ba4 c5! I learned this idea many years ago, but I can't remember where I first read about it. Compared to the Ruy Lopez, Black doesn't have to play the move ...b5. It can just as well be saved for later and I even think the bishop would be better off on c2 than on a4. **10.Nbd2**

[In 2008, Yudasin played 10.d4 , but we have simply reached a main line Chigorin Ruy Lopez where Black

has gained time and White has omitted h2−h3. After b5 11.Bc2 cxd4 12.cxd4 Qc7 Black is ready to play ... Bg4 and after 13.h3 White has a much worse version of the Chigorin.]

10...Qc7 11.Nf1 Be6 I won't exaggerate Black's chances, because this is merely an interesting middlegame with balanced chances. The better player usually wins this type of position. **12.h3**

[12.Ng3 is the most common continuation which should be met with Rad8 13.Bc2 Nc6! . The knight has done its job on a5 and now Black focuses on the ...d5 break. If further preparation is necessary, Black can play ...h6, ...Rfe8 and ...Bf8 to provide the e5−pawn with extra protection. We have a rich middlegame where I like Black's chances.]

12...Rad8 13.Bg5 h6 A common idea in the Open Games. White is forced to make a choice over whether he should retreat the bishop or capture on f6.

14.Bh4

[14.Bxf6 Bxf6 15.Ne3 is a common plan in many similar positions, but here it doesn't make a lot of sense because White doesn't have good control over the d5−square. Black can continue b5 16.Bc2 Qb7! followed by taking the initiative on the queenside with ...b4, which looks like a good idea. Indeed, I like Black's bishop−pair.]

14...g6 We saw a similar idea in Game 2. Black gains some space on the kingside and hems in White's minor pieces.

[14...Nh5 is an interesting alternative: 15.Bxe7 Qxe7 16.Nxe5 (a typical finesse against ...Nh5 lunges, but here the d3−pawn lacks protection) dxe5 17.Qxh5 Rxd3 18.Qxe5 Nc4 19.Qh5 Nxb2 and Black is very comfortable.]

15.d4!? White tries to open up the position.

[He could also go for normal development with 15.Qd2 Kg7 16.Ne3 when we have a complicated middlegame ahead. Now I like Ng8!? . This will be followed by ...f5 with a nice initiative.]

15...Nh5!? Black is happy with the closed centre, seeing that he's closer to establishing a knight on f4 than White is on f5. **16.Bxe7 Qxe7 17.b4!** Yudasin doesn't sit and watch while Black tries to establish his knight on h5. Creating counterplay on the queenside and in the centre must be the correct idea. **17...Nc4 18.Bb3**

[18.bxc5 dxc5 19.d5 Bc8 is a strategical dream for Black's knights, but still perhaps White should have gone for this.]

18...cxd4 19.cxd4 Rc8! Black is in charge on both sides of the board. **20.Rc1 b5 21.Ne3 Nf4 22.Rc2 Nxe3 23.Rxe3 Rxc2 24.Qxc2 Rc8 25.Qd2 Bxb3 26.Rxb3 Rc4** Black has managed to establish a clear advantage. All of his pieces are superior to their white counterparts. Yudasin, a strong 2600−player, cracks under the pressure. **27.Ra3? Rxd4!!** A really nice sacrifice. **28.Qe3**

[28.Nxd4 Qg5 is the tactical point, when White can't prevent both ...Qxg2 mate and ...Nxh3 picking up the white queen. This tactical motif is certainly one to remember.]

28...Rxb4 29.Rxa6 Qc7 30.Qd2 Qc4

31.Qe1 Nd3 32.Qd1 Rb2 33.Kh2 Qxe4 34.Rxd6 Qf4+ 35.Kg1 Nxf2 . A very nice display from Vladimirov. **0−1**

□ **Chigorin,Mikhail Ivanovich**
■ **Steinitz,William**
World−ch02 Steinitz−Chigorin +10−6=1 (5)
[ChessBase]

Petrov,Marian: 'Game 4 − Under the Cuban Sun *** The World Chess Championship 1889 was the second official World Chess Championship, between the Champion Wilhelm Steinitz and Mikhail Chigorin. It took place in La Habana, Cuba. Steinitz successfully defended his world title, by being the first of the two players to reach 10 1/2. He won the match 10 1/2 : 6 1/2. When the dust had settled on Steinitz victorious clash with Zukertort in 1886, the Austrian was widely acknowledged as having reached the pinnacle of world chess and yet, there was no international organisation with whom he could register the formal title of World Champion. Neither was there any authoritative body or forum that would choose him a worthy challenger. If Steinitz had a period of popularity, then it was short−lived. For pretty soon there was a growing number of chess players turning against him, either because of his strategic method of play, or because of his personality. The public had previously championed Zukertort and before him, Morphy; two men with an abundance of charisma and fiery chessboard skills to match. In comparison, the new champion's endorsement of a passive, positional style was, for many, unpalatable. Steinitz had developed a wonderful understanding of "attack and defence" and was able to sit back and invite his opponents to attack him. All too often they were tempted into unjustified onslaughts, which he would parry with remarkable ease, ultimately repelling the invading forces with defensive play of great dexterity. When he had the initiative, he would inflict imperceptible weaknesses on his opponent's structure, stifling their middlegame and endgame survival prospects. His methods, though successful, were unfortunately not spectacular enough to win public support and many of his critics refused to believe that swashbuckling, "blood and guts" chess could be so readily dismissed. On occasion, Steinitz took his strategy too far, by adopting absurdly passive formations that over−stretched his defensive capabilities, or left him with insufficient opportunity for counterplay. When he lost in this manner, it renewed the faith of those who craved a return to attacking chess. The time was therefore right to speculate on who might de−throne Steinitz and the La Habana Chess Club charged themselves with the task. They invited Steinitz to play in Cuba against a challenger of his own choosing. This was the way such matters were conducted prior to 1914; the incumbent champion having final say over the challenger, venue, playing conditions − just about everything. His poor record against Mikhail Chigorin in previous tournament meetings meant that the Russian had good credentials and Steinitz was ready to show that he feared no one. Chigorin was generally toppling everyone in his path and so the announcement of a match between the two met with universal approval. Of added interest was the pitting of

Chigorin's old−fashioned, "bludgeoning" style against Steinitz new teachings. Commentators saw it as a match between the "Romantic" and "Modern" Schools of chess. Chigorin accepted the match conditions and the bookmakers began to take wagers on the outcome. It quickly became apparent that in spite of the public's dissatisfaction with Steinitz, they still believed him to be overwhelmingly the best player. The pre−match betting receipts showed that $52.000 had been placed on Steinitz, compared with a mere $900 on Chigorin. The match was played in Havana, between January 20 and February 24, 1889. The total prize fund for the contestants was a disappointing $1.150, the smallest prize fund of all the world championship encounters.' **1.e4** Petrov,Marian: 'Remarkably, White players won the first 4 games! So, let us see what happened in game 5 of the La Habana match.' Petrov,Marian: 'ChessBase Remarkably, White players won the first 4 games! So, let us see what happened in game 5 of the La Habana match.' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** Petrov,Marian: 'Chigorin loved to play the Evans Gambit and Steinitz was very stubborn in repeating his lines even if they often looked bad. He just had the immense belief in his own chess prowess.' **4...Bxb4 5.c3 Ba5 6.0−0 Qf6 7.d4 Nge7 8.Bg5**

□ **Hoffmann,A.**

■ **Petrov,A.**

Match Warsaw 1844

[Mon Hokmome]

The main feature of this ancient game is the simultaneous assault by White on f7 and Black on f2, the weakest square on each side. Black's maneuvers culminate in a magnificent queen sacrifice and a relentless king hunt. C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 Nowadays 6. cxd4 is preferred. **6...Ne4** 0.72/21

More energetic is the counter−thrust 6... d5.

[6...d5= 0.27/22]

7.Bd5± Looking for adventure, but violating principle by moving the same piece twice. Simply 7. cxd4 Bb4 8. Bd2 Nxd2 9. Nbxd2 would give White a peaceful life. **7...Nxf2 8.Kxf2 dxc3+ 9.Kg3** Exposes the king to some danger. Safer is 9. Ke1. But not 9. Be3 Bxe3 10. Kxe3 cxb2. And now Bd5xf7+! would win. White is better. **9...cxb2 10.Bxb2** aiming for Bd5xf7+! **10...Ne7 11.Ng5?** −3.64/24 Too eager to attack instead of thinking about his own safety. It's time to consolidate with 11. h3 to give the king an escape square on h2.

[11.h3± 0.65/21 keeps the upper hand.]

11...Nxd5−+

[Weaker is 11...Nf5+ 12.Kf4 Be3+ 13.Kxf5∓]

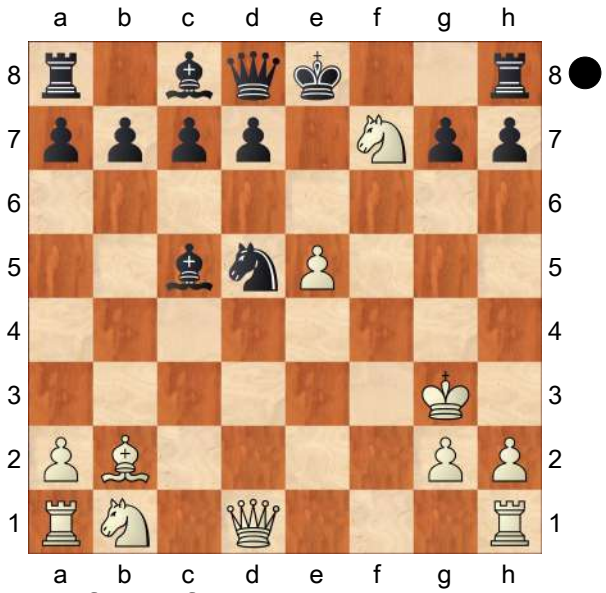
12.Nxf7 −6.42/24

[12.h4 −3.55/23 Ne3 13.Qd3]

(Diagram)

12...0−0! Giving up an entire queen to control the f−file. White didn't reckon with this sacrifice! **13.Nxd8**

There's nothing better. If 13. Nh6 gxh6 14. Qxd5 Rf7 15. Qxc5 Qg5 16. Kh3 d6 wins. Or 13. Qxd5 Rxf7 14. h3 Qg5 15. Kh2 Qf4 16. g3 Qf2 17. Qg2 Qxg2 18. Kxg2 Rf2 followed by Rxb2.

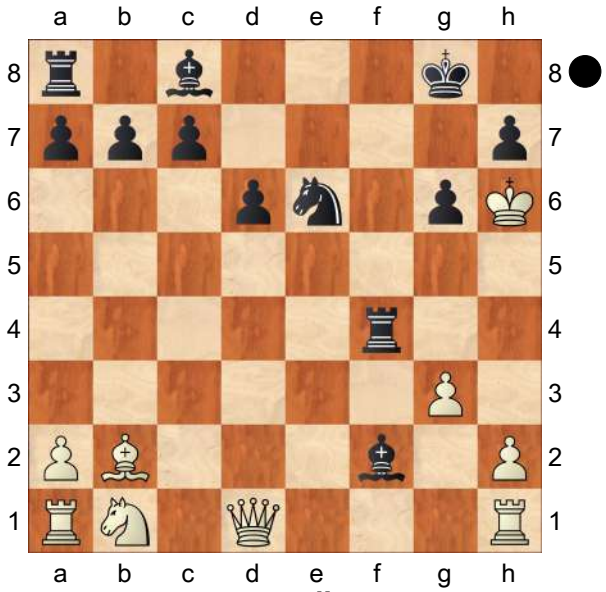


[13.Rf1 Rxf7]

13...Bf2+ 14.Kh3 d6+ 15.e6 Nf4+ 16.Kg4 Nxe6 Threatening mate in two by 17...Rf4 and Rh4. Black mates. **17.g3 Nxd8+N**

[17...Nd4+ 18.Ne6 Bxe6+ 19.Kh4 Nf5+ 20.Kh3 Ne3+ 21.Kh4 Ng2+ 22.Kh5 g6+ 23.Kg5 Be3# 1 Chapter Alexander Petrov−Game 1 Game]

18.Kh4 Rf4+! 19.Kg5 Ne6+ 20.Kh5 g6+ 21.Kh6



Rh4+!! 22.gxh4 Be3# A pretty king hunt. White did not feel at home in the position after the opening. Weighted Error Value: White=1.42/Black=0.02 (flawless)

0−1

C54

□ **Wilhelm Steinitz**
■ **Lasker,Emanuel**
World Championship Match (3) 1896
[Mon Hokmome]

Lasker is the great apostle of common sense in chess. Faced with the dilemma of keeping an extra pawn with an edge or keeping an extra piece with an agonizing defense, he unhesitatingly renounces the greater material possession. Steinitz relaxes when the smoke clears and throws away a likely draw in an opposite colored bishop ending. Finally he falls prey to a positional paralysis known as Zugzwang. C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3 **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3** Sacrificing a pawn. Tamer and safer is 7. Bd2 Bxd2 8. Nxd2. **7...Nxe4 8.0−0 Bxc3 9.bxc3** The main line of the Giuoco Piano is 9. d5 to keep Black cramped, but the line has been defanged and is rarely seen in modern master practice.

[9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 h6 14.Qe2 hxg5 15.Re1 Be6 16.dxe6 f6 17.Re3 c6 18.Rh3 Rxh3 19.gxh3 g6 20.Qf3 Qa5 21.Rd1 Qe5 Gambits−1. e4 e5 [Kostana]]

9...d5 10.Ba3 −0.81/24 This sacrifice is unsound, but what else is there? Black stands well after 10. Bd3 O−O safely

retaining the extra pawn. **10...dxc4∓ 11.Re1 Be6N** Returning the piece without a fight. Lasker senses danger and quickly rejects 11...f5 12. Nd2 Kf7 13. Nxe4 fxe4 14. Rxe4 with a dangerous attack. Even if Black has a decent defense, Lasker won't play into a prepared variation.

[11...Qd5 12.Nd2 Be6 13.Nxe4 0−0−0 #1 17. Italian Game − 4.c3 with −Giuoco Piano 6.cxd4]

12.Rxe4 Qd5 Black is slightly better. **13.Qe2 0−0−0! 14.Ne5 Rhe8 15.Nxc6 Qxc6 16.Re1 Rg8 17.Re5 b6 18.Bc1 g5** −0.01/23 Returning the pawn to open lines on the g−file for an attack. The wrong way to capture would be 19. Bxg5? h6!

[18...Rd5∓ −0.54/20]

19.Rxg5 −0.65/22

[White should play 19.Qh5= −0.01/23]

19...Rxg5∓ 20.Bxg5 Rg8 21.f4 Bd5 22.g3 Kb7 Material is even and White should be able to hold a draw.

[22...Qg6 is more complex. 23.Qe5 c6 24.Qe2 h6]

23.h3 −1.05/24

[23.Qe5∓ −0.56/22]

23...Qb5 24.Kh2 Rg6 And now ...Rg6−e6 would win. **25.Qc2 f6 26.Bh4**

(Diagram)

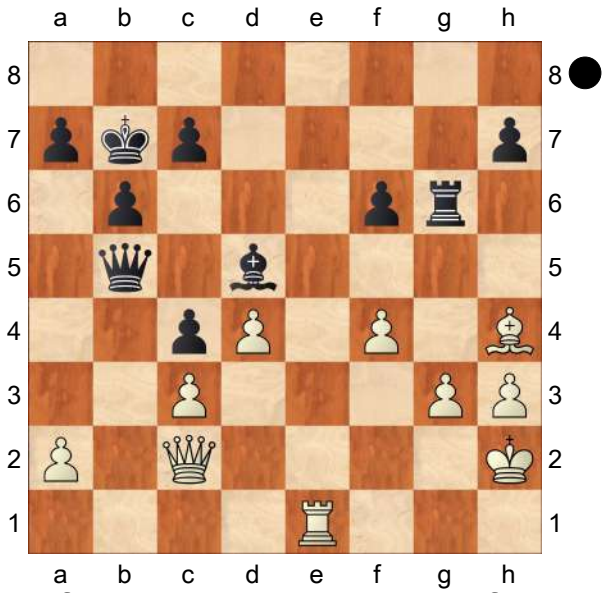
Bc6 −0.55/25

[Better is 26...Rh6!∓ −1.15/27 27.Qb1 Qd7]

27.g4! Qd5 −0.01/26 Regrouping to create mating threats on the long diagonal.

[27...h5∓ −0.91/25 28.f5 Rg8]

28.Qf2 −1.22/25 Leads to trouble. Much better is 28. f5.



[28.f5!= −0.01/26 Rg8 29.Bxf6]

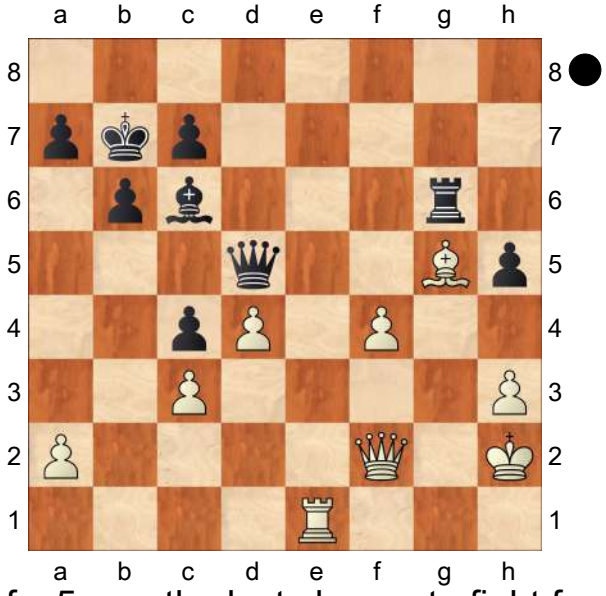
28...h5 −0.47/26

[28...Rh6∓ −1.22/25 ...Rh6xh4! is the strong threat. 29.Bg3 f5 30.gxf5 *(30.g5 Re6∓)* 30...Rf6]

29.g5 −1.94/24 This costs White the game.

[29.f5!∓ −0.47/26 Rg8 30.Kg3]

29...fxg5−+ 30.Bxg5



30. fxg5 was the last chance to fight for a draw. Now White is reduced to marking time. **30...h4! 31.Rf1**

If 31. Rg1? Rxg5! 32. fxg5 Qd6 wins.

31...Rg8 32.Qd2? −6.29/27

[32.Rd1 −2.55/25]
32...a5 Threatens to win with ...Rg8−e8.
33.a4? −6.74/25
[33.Qf2 −3.53/25 Qf5 34.Bxh4]
33...Re8 Strongly threatening ...Re8−e3!
34.f5 Rg8 White is in zugzwang −− any move loses material. **35.Re1 Qxf5 36.Re5 Qf3 37.d5 Qg3+ 38.Kh1 Qxe5 39.dxc6+ Kxc6** −10.61/26
White Resigns. Weighted Error Value: White=0.73/Black=0.29 (precise)

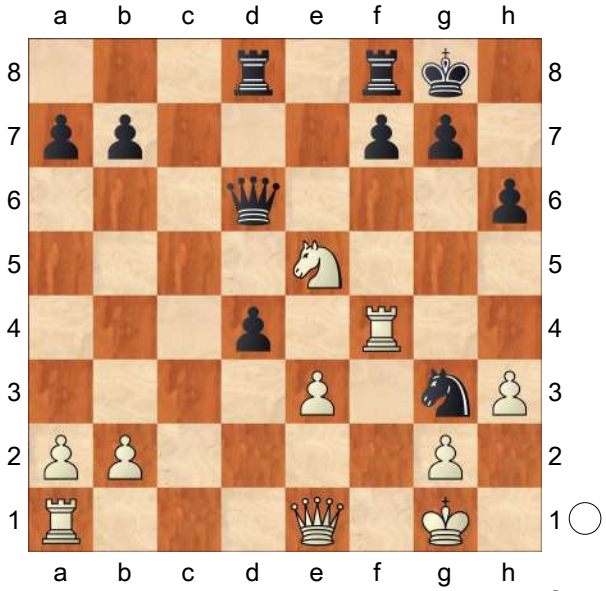
[22...f5 −0.63/22 should be considered. 23.Qc4+ Kh7]

23.Qe1∓ cxd4



By this exchange, Black loses part of his advantage. He ought to have retreated Nh5 at once, and then proceded as in actual play. The difference being that White could not afterward gain time (compare White's 27th move) again by Ne3, this square being blocked by his own pawn, a weak one as it stood, of which, however, he is now relieved. **24.exd4** −0.43/25
[24.Nxf7!= 0.05/23 Rxf7 25.Rxd4 Rf1+ 26.Qxf1 Qxd4 27.exd4 Nxf1 28.Kxf1]

Las Palmas Interzonal 1982

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7 4.d4 d6 5.d5 Nb8
[5...Na5 looks a little suspect. One example: 6.Bd3 c5 7.c4 g6 8.0−0 h5?! (this also seems a bit far out) 9.Nc3 Nh6 10.Ne1 g5 11.a3 b6 12.b4 Nb7 13.Bc2! Kf8 14.Nd3 Kg7 15.Ba4 f5 16.Bc6 and White was clearly better in J.Flis−F.Borkowski, Polish Team Championship 1981.]
6.Bd3 Nf6 Black has a reasonable score from this position as well.
[6...Bg4 7.c4 Nd7 8.Nc3 Ngf6 has also been played a few times, though not enough to give a real theoretical evaluation. Generally I feel that White has good chances of getting an advantage from the opening.]
7.c4 0−0 The most natural. The alternatives are a little worse, I think:
[7...c5!? 8.Nc3 Nbd7 has been played once by Hort. This transposes to the Czech Benoni (1 d4 Nf6 2 c4 c5 3 d5 e5!?) and could prove a good idea against players unfamiliar with these closed positions.]
[7...Nbd7 8.Nc3 0−0 *(*or *8...Nc5 9.Bc2 a5 10.h3 Nfd7 11.Be3 Bf6 12.a3 Nb6 13.b4* and White was better in I.Rogers−P.Jagstaidt, Zürich 1994 *)* 9.Rb1 Nc5 10.Bc2 a5 11.a3 c6 12.0−0 cxd5 13.cxd5 Bg4 14.h3 Bxf3 15.Qxf3 a4 16.Be3 Nfd7 17.Qg4 Kh8 18.g3 h6 19.h4 Bf6 20.Kg2 was also somewhat better for White in Zhang Pengxiang−M.Mancini, Cappelle la Grande 2002.]
[7...Bg4 8.h3 Bh5 9.Nc3 Nbd7 10.Be3 0−0 11.0−0 h6 12.g4 Bg6 13.a3 Nh7 14.Kg2 and White had the advantage in Z.Szabo−Z.Horvath, Gyongyos 1994. Black has no easy breaks on the kingside to provide him with counterplay.]
8.Nc3
[8.h3 has also been played, though White has no reason to fear ...Bg4. Then Black's options are:
A) 8...a5 9.Nc3 Na6 10.Be3 Kh8 11.a3 Bd7 12.Rb1 Ng8 13.g4 g6 14.Rg1 Qc8 15.Qc2 b6 16.b4 was a little better for White in R. Hübner−P.Herb, Swiss Team Championship 1999.;
B) 8...Na6 9.Nc3 c6 10.Be3 Re8 11.a3 h6 12.b4 Nh7 13.Qd2 Ng5 14.Nxg5 Bxg5 did not quite equalise either in S.Shivaji−R.De Guzman, San Francisco 2002.;
C) 8...Nbd7 9.Nc3 Nh5 10.Bc2 g6 11.Bh6 Re8 12.Qd2 Bf6 13.0−0−0 a6 14.Bg5 b5 was quite complicated and probably absolutely fine for Black. W.Mazul−F.Borkowski, Polish Championship 1979. *(14...−−)*;
D) 8...−−]
8...c6 9.0−0 Nbd7 10.Rb1!?
[Or 10.Be3 a6 11.h3 cxd5 12.cxd5 Nh5 *(*here *12...b5 13.a4 b4 14.Nb1 a5 15.Nbd2 Bb7 16.Rc1 Nb6 17.Bb5* gave White a clear plus in A. Ivanov−A.Negulescu, Washington 1998; Black's advances on the queenside have only furnished him with weaknesses *)* 13.Qd2 g6 14.g4 Ng7 15.Nh2 Nc5 16.Bc2 a5 17.a3 f5 with a very unclear game, B.Stein−

G.Scholz Solis, Hamburg 1986.]
10...Re8 11.b4 Nf8 12.Re1 Ng6 13.Bf1 Rf8 14.Qb3
[14.dxc6!? bxc6 15.b5 should have been inserted somewhere - just as Black should probably should have played ...c6xd5 sooner than he did in the game. Now after Bb7 16.a4!? (or most other moves), White has a nice queenside initiative and the d5− square to comfort himself with.]
14...Kh8 15.Bb2 cxd5 At last. **16.cxd5 Ng4 17.h3 Nh6 18.Rbc1 f5!?**
[18...Bd7! was probably more exact, when White should play 19.Rc2!? with chances for both sides.]
19.Nb5 Heading for e6. **19...fxe4 20.Rxe4 Bf5**
[The immediate 20...Nh4! was much stronger. After 21.Nxh4?! Bxh4 22.g3 Bg5 White would be forced into 23.f4 , which is rather uncomfortable for his king.]
21.Rec4 Nh4 22.Nxh4?!
[White could have kept some advantage with 22.R1c3! Nxf3+ 23.Rxf3 , when it is not clear how Black should continue.]
22...Bxh4 23.g3? Bg5 24.Rd1 Qb6! 25.h4?! This loses straight away, but White was in deep trouble anyway.
[If 25.Bc1 Bxc1 26.Rcxc1 Bd7 27.Qe3 Qxe3 28.fxe3 Rxf1+ 29.Rxf1 Bxb5]
[or 25.Nc7 Rac8 26.Bc1 Bg6! 27.Be3 Bxe3 28.Qxe3 Qxe3 29.fxe3 Nf5 and Black has a clear advantage.]
25...Ng4! Now White is just lost.
26.Rdd4 Bh6
[26...exd4 was also fine, of course.]
27.Nc7 Rac8 28.Ne6 Bxe6 29.dxe6 Rce8 30.Be2 Nxf2 31.Rd5 Nh3+ 32.Kg2 Qg1+ 33.Kxh3 Qh1+ 34.Kg4 Qxd5 35.Rf4 Rxf4+

[21: Doubled Pawns]

A whole handful of doubled pawns **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Nc3 d6 6.Bg5 Na5 7.Nd5 Nxc4 8.dxc4 c6 9.Nxf6+ gxf6 10.Be3**
A remarkable position: each side has a doubled pawn already, and White, by his last move, declares his willingness to accept another doubling. He judege, apparently, that the open d−file and the f−file will afford him full compensation.
10...Qb6 11.Qd2 Be6
[11...Qxb2 12.Bxc5!! dxc5 *(12...Qxa1+ 13.Ke2 Qxh1 14.Qxd6+−)* 13.0−0 dangerous attacking chances]
12.0−0−0 0−0−0
[12...Bxc4 13.Bxc5 dxc5 14.Qh6 Ke7 15.Nxe5! fxe5 16.Qd6+ Ke8 17.Qxe5++−]
13.b3 Rhg8 14.Rhg1 a5 15.Bxc5 Qxc5 16.Qe3 Qxe3+ 17.fxe3
White has his wish: he has two doubled pawns against Black's one, but Black also has a backward d−pawn, and an isolated h−pawn This position compresses the ideas of "weak" pawns **17...Rg4!** Forcing White into defensive play, for the Knight move he now has to make deprives him of all play in the d−file **18.Nd2 Rdg8 19.g3 Kd7! 20.Kb2 Ke7** Here the King is ideally placed for guarding both the d−pawn and f−pawn **21.Kc3 h5 22.Rgf1 h4 23.gxh4 Rxh4 24.Rf2 Rgh8 25.Rh1**
[25.Rff1 R8h6 White must still play his ♖h1 to hold the h−pawn]
25...R8h6 26.Kd3 d5! In chess everything is relative. Black now forces the win with the only move which permits White to rid himself of both his doubled pawns! **27.cxd5 cxd5 28.c4**
[28.exd5 Bxd5 29.e4 Rh3+ 30.Ke2 Bc6∓]
28...dxc4+ 29.Nxc4 Rh8! 30.Nxa5

GBR corr 1890
[Fraser]

Myers: This is Game #109 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Be7** [3...Bc5 4.d3 *(4.0−0 Nf6 5.Nc3 d6 6.d3 a6 7.Be3 Nd4 8.Ng5 0−0 9.Nd5 h6 10.c3 Ne6 11.Nxe6 Bxe6 12.Bxc5 dxc5 13.Ne3 Qd7 14.Bxe6 Qxe6 15.f4 Rad8 16.Qe2 exf4 17.Rxf4 Qd6 18.Qf3 Qxd3 19.Rxf6 gxf6 20.Qg4+ Kh7 21.Qf5+ Kg7 22.Qg4+ Kh7 23.Qf5+ Kg7 24.Qf4 Qd2 25.Rf1 Kh7 26.Qf5+ Kg7 27.Rf3 Qc1+ 28.Nf1 Rd6 29.h4 Rh8?? 30.Rg3*+ Fraser game #122. /// 1−0 Monck,W−Billups,R/corr GBR 1890/ *)* 4...Nf6 5.Nc3 d6 6.Be3 Bb6 7.0−0 Ne7?N *(7...Be6 8.Bb3 0−0 9.Re1 Nd4 10.Bxd4 exd4 11.Ne2 Bg4 12.Ng3 Nd7 13.h3 Be6 14.Qd2 Ne5 15.Qf4 Ng6 16.Qd2 c6 17.Rf1 Qd7 18.Kh2 Rae8 19.Ne2 Bxb3 20.axb3 d5 21.Nfxd4 Bxd4 22.Nxd4 dxe4 23.dxe4 Rd8 24.Rfd1 c5 25.Nf3 Qc7+ 26.Kg1 Rxd2 27.Rxd2 a6 28.Rad1 Qf4 29.Re2 h6 30.Kf1 Re8 31.Rde1 Ne5 32.Nd2 Nc6* 0−1 Marx,N−Benmesbah,N/Reims U16 FRA 2004/*; 7...0−0 8.Qe2 Be6 9.Bb3 Bxb3 10.axb3 Bxe3 11.fxe3 d5 12.exd5 Nxd5 13.e4 Nde7 14.Qf2 Ng6 15.Nd5 a6 16.Ra4 Qd6 17.Ne3 f6 18.Nf5 Qe6 19.Qg3 Nce7 20.N3h4 Kh8 21.Rf3 Rf7 22.Nxe7 Nxh4 23.Qxh4 Rxe7 24.Ra1 Rd8 25.Qf2 Qd6 26.g4 Qd4 27.Qxd4 Rxd4 28.g5 Rd6 29.Raf1 Ree6 30.Kg2 Kg8 31.Kg3 Kf7 32.Kg4 g6 33.gxf6 Rxf6 34.Kg5 Rxf3 35.Rxf3+ Kg7 36.Rf2* ½−½ Haag,G−Stopp,H/ Bellheim GER 1994/*; 7...Bg4 8.Nd5 Nxd5 9.Bxd5 0−0 10.h3 Bh5 11.g4 Bg6 12.Kg2 Qe7 13.Qe2 Kh8 14.a4 Nd8 15.a5 Bxe3 16.fxe3 c6 17.Bb3*

16.Raxd1 'QUESTION: I realize you are not covering the middlegame in this chapter, but Nimzowitsch played a passive, lame game so far, correct? ANSWER: I agree. Nimzowitsch normally marched to a drum only he heard. Here though, he plays in a rather meek, un−Nimzo−like, orthodox manner. I remember a line from the television show 'Kung Fu', where that font of wisdom, Master Po, declares: "It is no disgrace to lose - if one has fought to win." Many of Capa's opponents claimed they played below par against him, just as Fischer's opponents did. Fischer once said he never once played a healthy opponent! I remember with amusement, an article Larsen wrote for 'Canadian Chess Chat Magazine' in 1972, titled something like "Heat Wave in Denver" explaining away his 0−6 1971 Candidate's match defeat at Fischer's hands as a fluke! I remember a quote which went something like: "... and Fischer didn't prove to me he could beat me in a single game under normal conditions." Really? 0−6 wasn't good enough proof? It's very difficult to keep your composure when facing a legendary talent. In Nimzo's case we see another of Capa's opponents fall under a self−hypnotic and self−fulfilling prophecy of his own defeat in the belief in the futility of resisting Capa's machine−like accuracy. QUESTION: Who stands better? I see a better−developed White versus a structurally−

superior Black. ANSWER: That is essentially correct. We also have the presence of opposite−coloured bishops which, at the moment, may help White's drawing chances since he may drop a pawn later on. Now the key question is: Can White do anything with his development lead? Capa and the computers say no. Structure matters and Black stands better. Fritz 5.00 (5s): 'Cyrus Lakdawala: 'QUESTION: I realize you are not covering the middlegame in this chapter, but Nimzowitsch played a passive, lame game so far, correct? −−− ANSWER: I agree. □ **Florido,Juan**
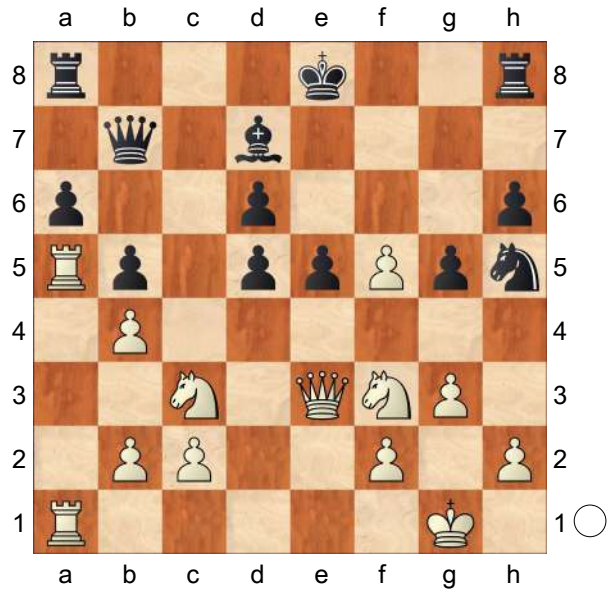
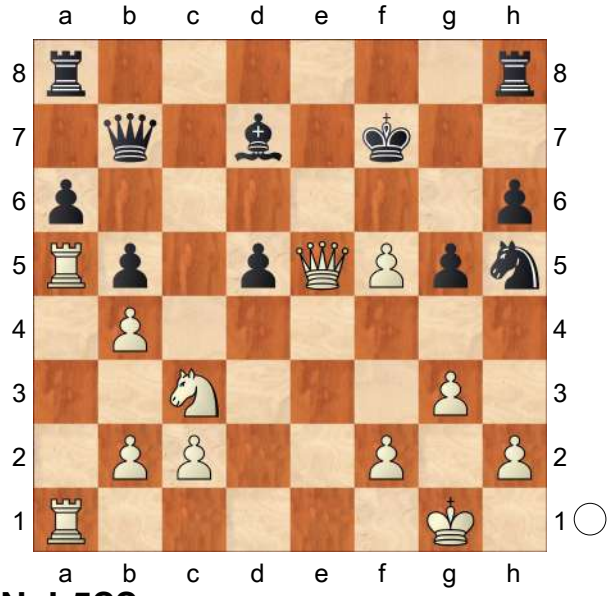
■ **Fischer,Robert James**
Havana (5) 25.02.1956
[Petronijevic,Zoran]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 d6 5.Nc3
[Nowadays, most often played is 5.c3]
5...Nf6
[Interesting is 5...Na5]
6.Bg5 Na5 7.Bb5+?!
[Dubious move. Preferable is 7.Bb3= with an even play.]
7...c6 8.Ba4 b5 9.Bb3 Nxb3 10.axb3 h6 11.Be3 Qb6?!
[Slightly preferable was 11...Bxe3 12.fxe3 a5∓]
12.Bxc5 Qxc5= The position is even.
13.0−0 Bg4 14.Ra5
[14.d4 is an alternative.]
14...g5?
[Fischer's move is too violent. Stronger was either 14...Qb6]
[or 14...0−0 with even play.]
15.Qe2
[After a stronger 15.h3± White has a clear edge.]
15...Qb6 16.b4 Nh5?!
[Stronger was 16...a6±]
17.Qe3!± Qb7
[In the case of 17...Qxe3 18.fxe3 0−0 after 19.Ra6! White has a clear edge.]
18.Rfa1
[18.d4 was slightly preferable.]
18...a6 19.d4 f6 20.d5?!
[Dubious move. After a better 20.dxe5 fxe5 21.h3 Be6 22.Qd3 Ke7 23.Ne2± White is clearly better.]
20...Bd7 21.g3 f5?!
[We can see that Fischer was an aggressive player in his youth. Stronger was 21...Ng7±]
22.exf5?!
[After a better 22.dxc6 Bxc6 23.Qd3 White has a clear advantage: fxe4 24.Qxd6 exf3 25.Qg6+ Kf8 26.Qxh5 Kg7 27.Nd1 Rhf8 28.Ne3±]
22...cxd5

(Diagram)

23.Nxe5!?
[The game move leads to an even position. Interesting is 23.Qd3 although by precise play Black can attain an even position: d4 24.Nxb5 Bxb5 25.Qxb5+ axb5 26.Rxa8+ Kd7 27.R8a7 Kc6 28.R1a6+ Qxa6 29.Rxa6+ Kd5 30.Rb6 Ke4=]
23...dxe5 24.Qxe5+ Kf7
(Diagram)





25.Nxb5??

[Glarring error which loses the game. After a better 25.Nxd5 the position is even: Rae8 26.Qd4 Ra8 27.c4 Bc6=]

25...axb5−+ 26.Rd1 Nf6

IFSB Bundesmeisterschaft 1935

[Keres]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.Nc3 Leads to quiet play. Sharper is 4 d3 etc.

4...d6 5.d3 Nf6 6.Bg5 Na5 7.Bb3 Nxb3 8.axb3 Be6 9.0−0 Bb6! 10.Ne2 h6 11.Be3 0−0 12.h3 Nd7 Leads to big developments. **13.d4!** Otherwise Black plays an early ...f5. **13...f5!** Just the same!

[13...exd4 is no good because of 14.Nfxd4]

14.exf5 Bxf5 15.dxe5 dxe5 16.Qd5+ Kh7 17.Nxe5

[If either 17.Qxb7 Bxc2]

[or 17.Bxb6 cxb6 18.Nxe5 Nxe5 19.Qxe5 Bxc2 Black always has good play.]

17...c6 18.Bxb6! axb6

[18...Qxb6 (with the intention 19 Qd6 Nxe5 followed by ...Rae8) fails to 19.Nxd7!]

19.Qd6

[Better first 19.Rxa8 to displace the black Q.]

19...Rxa1! Threat ...Re4 **20.Rxa1 Nxe5 21.Qxe5 Bxc2 22.Nd4 Re8 23.Qf4 Bg6** Black now has the advantage because of the weakness of the white queenside. He threatens ...Re4. **24.Nf3 Qd5 25.Ra7?** Loses a pawn, but the protection of the b3−pawn was also uncomfortable. For example, on

[25.Qc4 Qxc4 26.bxc4 Re2 Black has excellent winning chances.]

25...Qxb3 26.Rxb7 Qxb2 27.Qc7 Be4! The point. **28.Qf7**

[Now White dare not play 28.Rxb6 because of Qa1+ 29.Kh2 Bxf3 30.gxf3 Re1 etc. with a decisive attack.]

28...Rd8 29.Qe7? A blunder, but the black passed pawns would be decisive in any case. **29...Rd1+ 30.Kh2 Bxf3 31.Qe6**

[31.gxf3 Qxf2#]

31...Bh5 32.Rb8 Rh1+!

[32...Rh1+ White resigned, because if **A)** or 33.Kg3 Qc3+ 34.Kh4 Rxh3+! 35.Qxh3 *(35.gxh3 g5+ 36.Kxh5 Qf3+ 37.Qg4 Qf7#)* 35...Qf6+ 36.Kg3 Qe5+ 37.f4 Qxb8 38.Qxh5 g6 39.Qe2 Qd6 is quite hopeless for White.; **B)** 33.Kxh1 Qc1+ 34.Kh2 Qf4+ and ...Qxb8,]

26: Wroclaw 2010

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.e5 Ng4 6.Qe2

Some surprisingly strong players have played this, but the resulting positions look all but inspiring for White in my view. This line was also the recommendation for White in 'Chess Openings for White, Explained' by Alburt, Dzindzichashvili and Perelshteyn.

[However, treating the position like a Budapest Gambit doesn't really work out because after 6.Bf4 d6 7.exd6 Bxd6 8.Qe2+ Kf8 9.Bxd6+ Qxd6 Black is simply up a pawn. The king on f8 isn't exposed at all and Black has excellent development, with ...Bf5 and ...Re8 on the cards.]

6...Qe7 7.Bf4 f6! Black cracks open White's centre. White's idea is to regain the d4−pawn and try to claim a small edge with well−placed pieces in the centre, but Black is going to make White fight for that pawn.

[There's absolutely nothing wrong with 7...d6 either. After 8.exd6 I believe Black should play cxd6! *(* instead, the most common move is *8...Qxe2+* , but after *9.Bxe2 Bxd6 10.Bxd6 cxd6 11.Na3!* White might just have a tiny pull. The pawn on d4 won't be possible to hold and d6 will be weak *)* , insisting that White should be the one to take on e7: 9.Na3 a6! (it's not so easy for White to get the a3−knight into the game) 10.Rd1 Qxe2+ 11.Bxe2 d5! and the knight is cut off on the rim. Black is absolutely fine here.]

8.exf6 Nxf6 My preference, but not the only move.

[Indeed, 8...gxf6 is unsurprisingly a speciality of Jonny Hector. It might look strange, but Black wants to establish the e5−square for his knight. This variation is fine for Black, although after 9.0−0 Qxe2 10.Bxe2 Nge5 11.Nbd2 followed by Nb3, the position looks equal.]

9.Nbd2 White is trying to recapture his d4−pawn by all means possible. This he'll usually do with Nb3, 0−0−0 and perhaps also Bb5. In the long run, this is a pawn Black can't hold on to, but we can try to obtain other advantages while White recovers the pawn.

[After 9.Bxc7 , the bishop actually gets out after d6 10.Bb5 Kf7 11.Bxc6 bxc6 12.Qxe7+ Bxe7 , but Black's position is clearly superior here. Black's central pawns limit White's minor pieces and 13.Nxd4?! lands White in even more difficulties after Nd5 14.Ba5 Bf6 followed by ...Re8 with a dangerous

initiative.]

9...d5! White scores horribly after this move.

[In practice it's more common to play 9...d6 10.Nb3 Bg4 , but after 11.Qxe7+ Bxe7 12.Nbxd4 Nxd4 13.Nxd4 d5 it looks pretty equal. Of course, this isn't worse for Black, but I want to fight for an advantage.]

10.Bb5 Qxe2+ 11.Kxe2 This is the key position for this variation. At first glance White looks set to recapture his sacrificed pawn and equalize. True, both c7 and d4 are en prise, but Black can create another asset. **11...a6!**

A lovely move. **12.Bxc6+**

[12.Bd3 has been seen as well, but I like the untried Bd6! 13.Bxd6 cxd6 when White doesn't get his pawn back after all. The tripled d−pawns look comical, but they control a lot of squares: 14.h3 *(14.Nb3?! Bg4* was Black's point *)* 14...0−0 15.Nb3 Nh5! (there's a weak square on f4) 16.Nbxd4 *(16.g3* is taking things a bit too far: *Bd7 17.Nbxd4 Nxd4+ 18.Nxd4 Rae8+* and White can't protect his kingside *)* 16...Nf4+ 17.Kf1 Bd7 . After lots of work White has managed to regain his pawn and leave Black with ugly pawns on the d−file, but Black's activity is way more important. He can follow up with ... Ne5 or ...Nxd3 when he's slightly better. Also notice how difficult it is for White to unravel his kingside.]

12...bxc6 Black's structure looks comical, but no matter which pawn White captures, Black will be left with a strong pawn centre that will annoy White's minor pieces for a long time to come.

13.Nxd4

[Instead, 13.Bxc7 c5 14.Rae1 Bf5 15.Kd1+ Kd7 16.Bg3 Bd6 17.Bxd6 Kxd6 was the course of the game L. Hansen−J.Andersen, correspondence 2010. Black is obviously better and went on to win.]

13...c5 14.N4f3 Bd6 15.Bxd6 cxd6 White is clearly struggling. Black's central pawns are very strong and White's knights don't really have anything useful to do. **16.Rhe1 Bf5 17.Rac1 Kd7 18.Nh4 Rhe8+ 19.Kf1 Rxe1+ 20.Kxe1 Be6 21.f4** White is desperate for a plan, but it's difficult to suggest anything else. As we will soon see, though, this lunge just weakens White's position further. **21...Rb8 22.b3 d4 23.c3 dxc3 24.Rxc3** White has managed to get rid of the doubled pawns, but Black's pressure remains. White still has difficulties finding a decent plan.

24...Re8 25.Kf1 Nd5 26.Rf3 Nb4?! This looks very natural, but it might be slightly inaccurate. Now White has some chances for counterplay;

[whereas after 26...Bg4 27.Rg3 g6! White's counterplay is hard to find.]

27.f5 Bd5 28.Rg3 Re7 29.a4?!

[White should have tried to activate her pieces with 29.f6! gxf6 30.Nf5 , but Black is still much better here, even if after Re5 31.Rg7+ Ke6 32.g4 she doesn't have ...Ne3 resource as in the game.]

29...Nc2 30.f6 gxf6 31.Nf5 Re5 32.Rg7+ Ke6 33.Nh4

[33.g4 Ne3+! is what Black was relying on.]

33...Nd4 34.Rxh7 Bxb3 35.Nxb3 Nxb3 Black's strategical advantage has translated itself into an extra pawn, and the central pawns are much more

dangerous than the h−pawn. **36.Ng6 Rf5+ 37.Ke1 d5 38.g4 Rf3 39.h4 d4 40.Nf8+ Kd5 41.h5 d3 42.h6 Kc4 43.Rd7 Rh3 44.h7 Rh1+ 45.Kf2 Nd4 46.Ke3 Rh3+ 47.Kd2 Rh2+ 48.Kd1 Kc3 49.Re7 Nf3**

■ **Flear,Glenn C**

78119 Montpellier 2005

[Glenn Flear]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5 Ne5

I like this move which avoids a great deal of theory. Kasparov apparently suggested this approach to Anand some years ago, before the Indian took on Fritz 6 in a 'Man vs. Machine' match. It does seem to take the sting out of White's play and is simpler than 9...Bf6 (as in the previous game). **10.Qe2!?**

[Otherwise 10.bxc3 Nxc4 11.Qd4 and then 0−0! transposes back to the game. *(*If Black gets greedy with *11...Ncd6* , he will probably be mated very quickly; e.g. *12.Qxg7 Qf6 13.Qxf6 Nxf6 14.Re1+ Kf8 15.Bh6+ Kg8 16.Re5 Nde4 17.Nd2* , J.Blauert−E.Schmittdiel, Königslutter 1988, and Black felt compelled to resign in view of *d6 18.Nxe4! dxe5 19.Nxf6#* . Nice! *)*]

10...0−0 11.bxc3 Nxc4 12.Qxc4

[Black also answers 12.Qxe4 with Nd6 .]

12...Nd6 It isn't totally clear that White really has enough for his pawn here.

[However, he would have following 12...Re8!? 13.Re1 Nd6 14.Rxe8+ Nxe8 15.Bg5 , as with Black being too far behind in development White's initiative would persist. Exchanging a pair of rooks doesn't suit Black if his remaining rook will remain out of play for the duration.]

13.Qd3 There are a couple of other moves, but they aren't dangerous for Black either:

[13.Qf4 Re8 14.Re1 Rxe1+ 15.Nxe1 b5 16.Be3 Bb7 17.Rd1 Nc4 and Black took control, A.Zude−B. Spassky, German League 1990.]

[Or 13.Qd4 Nf5 14.Qd3 d6 15.Bg5 , and now the untried Qd7! could be best.]

13...b6

[In 'Dangerous Weapons: 1 e4 e5' I mentioned 13...Qf6!? as possibly being better. Then White could try 14.Re1 b6 15.Bg5 Qf5 16.Qxf5 Nxf5 17.g4 h6 18.Bf4 Nd6 19.Bxd6 cxd6 20.Nd4 , V.Anicic−B.Abramovic, Bar Sozina 2005, with an analogous position to the next note, where White was struggling to find full compensation.]

14.Bg5! Best, as it forces Black to make a concession;

[whereas 14.Ba3 doesn't test his defences: Qf6 15.Qd4 *(15.Nd4 Re8 16.Rfe1 Bb7* also enables Black to develop comfortably *)* 15...Qxd4 16.Nxd4 Bb7 17.Bxd6 cxd6 18.Nf5 *(*or if *18.c4* , then *Rfc8 19.Rfc1 Ba6)* 18...g6 19.Nxd6 Bxd5 20.Rfe1 Be6 and Black was somewhat better,

Fritz 6−V.Anand, 3rd matchgame, Frankfurt 1999.]

14...f6 15.Bf4 Bb7

[15...Nf7 could be met by 16.d6!? .]

16.Rfe1 Re8 17.c4

[In my opinion the best chance for White is 17.Bxd6 cxd6 18.c4 , locking up Black's bishop for a while, and the further Ba6 19.Nd4 Qc7 20.Nf5 Re5 21.Rxe5 fxe5 22.Qg3 g6 23.Qg5 enabled White to equalize in T.Maas−Yin Hao, Rotterdam 1998.]

17...Rxe1+ 18.Rxe1 Qf8 19.Bxd6 Qxd6 20.Nd4 g6 21.h4 Rf8 22.h5 Kg7 23.Qe3 Although White has persistent pressure for the pawn, Black, who isn't in any real danger, has high hopes of unravelling and ultimately exploiting his material advantage. −−− TIP: In positions where you have survived a gambit onslaught and would like to exploit your extra material, there can be great technical difficulties if your opponent still has the more active pieces, even if he has no direct threats. Often the best way to proceed is to adopt a 'slow but sure' approach; i.e. making sure that that you consolidate, improve your pieces, and nullify any potential avenues of attack before breaking out. **23...Ba6 24.h6+ Kf7 25.Nb5 Bxb5 26.cxb5** As White has control of the e− file, and Black a slightly vulnerable king, any attempts to break free are fraught with danger. So I decided to proceed with caution. **26...Rc8 27.a4 Qf8 28.Qb3 Qd6 29.Qe3 f5 30.Qd4 Qf6 31.Qc4 Qd6 32.Qd4 Rg8 33.Qe3 g5!** Finally showing my hand. The plan is simply to pick off the white h−pawn. **34.Qe2**

[Hebden's suggestion of 34.Qc3! could be best; for example, Kg6 35.Rc1 Kxh6 36.Qxc7 Qxd5 37.Qxa7 Rg6 , and now 38.a5 bxa5 39.Qxa5 yields good drawing chances for White, despite being a pawn down.]

34...Kg6 35.Qd3 Rf8 36.g4 A last attempt to 'stay active', but now White's king becomes the one in most danger. **36...Kxh6 37.gxf5 Qf6 38.Qh3+ Kg7 39.Re3 Rf7 40.Rc3 Qe5 41.Qg3 Qxf5 42.Rxc7 Qxd5 43.Qc3+ Kg6 44.Rc8 Rf4 45.Qc2+ Kh6 46.Rc3 Rh4 47.f3 Rd4 0−1**

GBR corr 1890

[Fraser]

Myers: This is Game #23 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known

whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Fraser #23 Myers Fraser Fraser #23: 'BCM 1893 pp310−2 has a sketch and a lot of biographical info on James Birks (West Hartlepool), taken from the Newcastle Weekly Chronicle. He had just won their chess trophy (OTB: 112 entered).' **1...e5 2.Bc4 Bc5 3.Qe2 Nc6 4.c3 Nf6 5.Nf3 d6 6.d3 0−0 7.Bb3** Fraser #23: '?!' **7...Be6**

□ **Staunton,Howard**
■ **Anderssen,Adolf**
(m/2) London 1851
[Petrov,Marian]

Gunnermuri Tales ***** World Championship Matches − Game Changers? PART I *** In life quite often we ask the question what if... What if i did this, or we said that... I have decided to investigate the history of the World Championship matches and establish what could have happened if some players who lost the matches with small margin had played a bit different. Sometimes the glory is only one or two moves away. Game 1 − The Unofficial Duel for the Crown ***** I want to start this "What if..." series with Howard Staunton (April 1810 − 22. June 1874). He was an English chess master who is generally regarded as the world's strongest player from 1843 to 1851. He promoted a chess set of clearly distinguishable pieces of standardised shape − the Staunton pattern promulgated by Nathaniel Cooke − that is still the style required for competitions in modernday chess. In 1849, Nathaniel Cooke registered a chess set design, and Jaques of London obtained the manufacturing rights Staunton advertised the new set in his "Illustrated London News chess" column, pointing out that the pieces were easily identifiable, very stable, and good−looking. Each box was signed by Staunton, and Staunton received a royalty on each set sold. He was the principal organiser of the first international chess tournament in 1851, which made England the world's leading chess centre. In actual fact, Staunton took the lead in organising the first ever international tournament, as he thought the Great Exhibition of 1851 presented a unique opportunity, because the difficulties that obstructed international participation would be greatly reduced. He may also have been motivated by reports that a few years earlier Ludwig Bledow had proposed to organise an international tournament in Germany, whose winner was to be recognised as the world champion. Staunton and his colleagues had ambitious objectives for this tournament, including convening a "Chess Parliament" to complete the standardisation of various rules and procedures for competitive chess and for writing about chess. Staunton also proposed the production of a compendium showing what was known about chess openings. Before the tournament started "Captain Kennedy and the Liberty Weekly Tribune" in Missouri wrote that the winner should be regarded as "the World's Chess Champion". The organisers obtained financial contributions from Europe, the USA and Asia, enabling the committee to set up a prize fund of GBP 500. Despite the generally enthusiastic response, several elite players were unable to participate, including Von der

Lasa, Saint−Amant and Cochrane. Adolf Anderssen was at first deterred by the travel costs, but accepted his invitation when Staunton offered to pay Anderssen's travel expenses out of his own pocket if necessary. The committee had also organised a "London Provincial Tournament" for other British players, and "promoted" some of the entrants to play in the International Tournament to obtain the right number of players for a knock−out tournament. The tournament was a great success, but disappointing for Staunton personally; in the second round he was knocked out by Anderssen, who won the tournament convincingly; and in the playoff for third place Staunton was narrowly beaten by Elijah Williams. Staunton's defeat by Williams suggests that Staunton had over−stretched himself by acting as both a competitor and the Secretary of the organising committee. It should be noted that the famous Immortal Game, Anderssen − Kieseritzky, London 1851, was played as an offhand game during a break in this tournament. It was not one of the games of their first−round match. Bird, H.: '[Exhibition Tournament, 1851.]'

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5

At those times most players were going for the King's Gambit or Evans Gambit, but here White optioned for more pragmatic approach. At those times most players were going for the King's Gambit or Evans Gambit, but here White optioned for more pragmatic approach. **4.d3 d6 5.c3 Nf6**

Nowdays the Giuoco Piano is a common guest in the top level games and we are familiar with the usual plans − Nbd2 etc., but it was a different time back then and I guess that White was bothered that moving the knight would block his dark−square bishop. Palma de Mallorca 2008
[John Emms]

It would be an understatement to say that the following encounter isn't a good advert for the Italian Game, but the reason for its inclusion is to provide a stark warning. Even though there's a 'system' feel to this opening, White certainly cannot get away with playing on auto−pilot. A plan which works well in a certain type of position might backfire in those which contain seemingly insignificant differences. In this game, it backfires quite spectacularly! It would be an understatement to say that the following encounter isn't a good advert for the Italian Game, but the reason for its inclusion is to provide a stark warning. Even though there's a 'system' feel to this opening, White certainly cannot get away with playing on auto−pilot. A plan which works well in a certain type of position might backfire in those which contain seemingly insignificant differences. In this game, it backfires quite spectacularly! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 Ba7 7.Re1 0−0 8.h3 d6 9.Bb3 Be6** This bishop move needs no introduction, as we've already seen it many times in similar positions. Korchnoi chose ...Be6 against Karpov back in 1981 (with Nbd2 played instead of Re1), and more recently it has been favoured by grandmasters such as Levon Aronian and Vishy Anand. Suffice to say, it's regarded as a reliable choice for Black. Now White must make that typical decision again: does he allow an exchange on b3 if Black wants it, or retreat the bishop to c2? Remember that White needs to avoid 10 Bxe6?! fxe6, as this just gives Black an open f−file and more control of the centre. This bishop move needs no introduction, as we've already seen it many times in similar positions. Korchnoi chose ...Be6 against Karpov back in 1981 (with Nbd2

played instead of Re1), and more recently it has been favoured by grandmasters such as Levon Aronian and Vishy Anand. Suffice to say, it's regarded as a reliable choice for Black. Now White must make that typical decision again: does he allow an exchange on b3 if Black wants it, or retreat the bishop to c2? Remember that White needs to avoid 10 Bxe6?! fxe6, as this just gives Black an open f−file and more control of the centre.

10.Bc2 This is definitely the most challenging move.

[Players who enjoy quiet positions may want to choose 10.Nbd2 , but accurate play by Black in practice, beginning Bxb3 , has shown this to be fairly harmless.

A) Let's follow the game E.Bacrot−L. Aronian, Mainz (rapid) 2007: 11.Qxb3 Rb8 *(*the immediate *11...Qd7* is also good, since *12.Qxb7??* loses the queen to *Rfb8)* 12.Nf1 Qd7! 13.Ng3 Rfe8 14.Bd2 *(*White can reroute the queen to avoid an exchange with *14.Nh2 Qe6 15.Qd1* , but *d5 16.Qf3 dxe4 17.dxe4 Ne7 18.Bg5 Nd7 19.Rad1 f6 20.Bc1 Nf8 21.b3 Rbd8 22.Ng4 Kh8* , as played in Z.Andriasian−B. Socko, Kallithea 2008, is objectively equal *)* 14...h6 15.Rad1 Qe6! and Black has equalized. As usual, bringing the queen to e6 to contest the light squares is an excellent idea after the exchange of bishops.;

B) There's also 11.axb3 to consider. Once again

B1) although Black can also choose 11...Nd7 aiming for ...f5. For example, 12.Nf1 *(*or *12.Nc4 f5 13.exf5 Rxf5 14.Be3)* 12...f5 13.exf5 Rxf5 14.Ng3 Rf8 15.Ra4 Nf6 16.Ne4 Qd7 17.Nxf6+ Rxf6 18.Rg4 Raf8 19.Be3 Bxe3 20.Rxe3 with a roughly equal position, Z. Efimenko−A.Bezgodov, Sochi 2006.;

B2) Returning to 11...d5 , I wonder what the likes of Efimenko would have planned against this.

B2a) One possibility is 12.Nh2 , preparing Qf3 and Ndf1−g3, , preparing Qf3 and Ndf1−g3, but then but then dxe4 13.dxe4 Qd3! is annoying.;

B2b) Perhaps it's simply 12.Qe2 , which did give White a tiny bit of pressure after dxe4 *(12...Qd7!?)* 13.dxe4 Nh5 14.Nc4 Qf6 15.Be3 Bxe3 16.Qxe3 Nf4 *(16...Rfd8!?)* 17.g3! Ne6 *(17...Nxh3+ 18.Kg2* traps the knight *)* 18.Na5 in M.Klinova−M.Ferguson, Port Erin 2007. To sum up, 10 Nbd2 isn't a move to really challenge Black theoretically, but it might appeal to those who are confident of outplaying opponents in quiet positions. in M.Klinova−M. Ferguson, Port Erin 2007. To sum up, 10 Nbd2 isn't a move to really challenge Black theoretically, but it might appeal to those who are confident of outplaying

opponents in quiet positions.;
B2c) 12.−−;
B3) 11...d5 is the most logical equalizing try,;
C) 11.−−]

10...d5

[There's no need for Black to hold back. If he does, White should most certainly push with d3−d4. For example, 10...Ne7 11.d4 Ng6 12.Be3 h6 13.Nbd2 with an edge. Note that if Black plays Nh5? here, White can win a pawn with 14.d5! Bxe3 15.Rxe3 Bd7 16.Nxe5! .]

[10...h6 11.Nbd2 transposes to Areshchenko−Aleksandrov, *(*but *11.d4* threatening d5 might be more promising. Kaidanov gives *exd4 12.cxd4 Nb4 13.d5 Nxc2 14.Qxc2 Bd7 15.Nc3 Nh5 16.Be3 Bxe3 17.Rxe3 Qf6* with a slight advantage for White, and I agree with his assessment. *)*]

11.Nbd2?! In many respects the most natural−looking move, but this is a mistake!

[White should play 11.exd5! , which is covered in the next game.]

11...dxe4! 12.dxe4 Nh5! This is the point. Black returns to the obvious and enticing plan of ...Qf6 and ...Nf4, as seen in the previous game. But this version is so much more favourable for Black because he is better developed and, just as importantly, White no longer has the option of shutting out the dark−squared bishop with the d3−d4 advance. Compare also Gonzalez Vidal−Gomez, where White was in a much stronger position to meet ...Nh5. Here g2−g3 just isn't on! **13.Nh2?!** White wants to play all the usual moves: Qf3, Ng4, N(d2)−f1 etc. The trouble is, Black has some moves too, and they are pretty good ones!

[Karpov chose 13.Nf1 against Korchnoi in their 1981 world championship match, and for some reason Korchnoi dispensed with the possibility of Qf6! in favour of exchanging queens. White can aim to occupy d5 with 14.Ne3 , but after Rad8 *(*or even just *14...Bxe3 15.Bxe3 Nf4)* 15.Nd5 Qg6 (threatening ...Bxh3) 16.Kf1 f5 (Keene, cited by Marin) Black is very active and it's impossible to recommend this for White. Even so, it's better than 13 Nh2!]

13...Qh4! There's no need to settle for the f6−square when h4 is available. Black already has the advantage. **14.Qf3 g6!** Planning to seize the initiative with ... f5, which would be Black's answer to most of White's moves here... **15.Ng4??** ...except this one! This was clearly not a good day at the office for Svetushkin. **15...Bxg4! 16.hxg4 Ng3!** Black is mating on h1. The a7−bishop reigns supreme. To be fair, given how much grief it's been caused by White's play in previous games, it is difficult to begrudge it one moment of glory.

□ **Cava Rodrigues,Bruno**
■ **Santos,Celso da Silva**
Rio de Janeiro Paschoal op (4)06.09.2008
[Cava Rodrigues,Bruno]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Gambito Evans, uma das aberturas mais clássicas da história do xadrez. Ultra−analisada no século XIX, presente no match Steinitz x Tchigorin, ocasionalmente ainda é jogada por super−GMs. **4...Bxb4 5.c3 Be7** Variação mais moderna, mas não necessariamente a melhor. O mais usual é 5... Ba5. **6.d4 Na5 7.Be2 d6?** Este lance concede toda a iniciativa às brancas. Kasparov x Anand, 1995, seguiu:

[7...exd4 8.Qxd4 Nf6 9.e5 Nc6 10.Qh4 Nd5 11.Qg3 g6 12.0−0 Nb6 13.c4 d6 14.Rd1 Nd7=]

8.dxe5 Nc6 9.Bc4! Forçando uma transposição favorável. Pior seria:

[9.exd6 Bxd6 10.0−0 Nf6 11.Nd4 Bd7 12.Nd2 0−0= Quando a compensação pelo peão gambitado pode rapidamente evaporar.]

9...Nxe5

[9...dxe5? 10.Qb3 Na5 11.Bxf7+ Kf8 12.Qa4±]

10.Nxe5 dxe5 11.Qh5 Esta mesma posição chega−se com 6... d6 7. dxe5 Cxe5 8. Cxe5 dxe5 9. Dh5! **11...g6 12.Qxe5 Nf6 13.Ba3 Rf8**

[13...Kf8?? 14.Qxf6 E mate em três. Bxa3]

14.0−0 Nd7± Por incrível que pareça, a posição é apenas levemente favorável às brancas, pois as negras estão sólidas. O lance Cd7 é superior ao anteriormente jogado no tour de force de Fischer x Celle, 1964 (simultânea), que seguiu assim:

[14...Ng4 15.Qg3 Bxa3 16.Nxa3 Qe7 17.Bb5+! c6 18.Nc4 Qe6 19.Rfd1 cxb5 20.Qc7 Bd7 21.Nd6+ Ke7 22.Nf5+! gxf5 23.exf5 Rac8 24.Rxd7+! Qxd7 25.f6+! Nxf6 26.Re1+ Ne4 27.Rxe4+ Kf6 28.Qxd7 Rfd8 29.Qg4+− É a partida 52 das 60 memoráveis do americano do Brooklin.]

15.Qg3 Bxa3 16.Nxa3 Qe7! 17.Nb5 Ne5 18.Be2 a6 19.Nd4 Bd7 20.Rab1 c5 21.Nf3 Nxf3+ 22.Bxf3 Bc6 23.e5! Bxf3 24.Qxf3± 0−0−0 25.Rfe1?!

[25.Rb6! Rd7 26.Rfb1 Rc7 27.Qg4+ Qd7 28.Qc4 Qe7]

25...Qd7 26.Rb6 Qd5 27.Qg4+ Qd7 28.Qf3 Rfe8 29.Reb1 Rxe5!?

30.Rxa6!? O último lance de cada lado complica enormemente a partida. As negras têm o rei exposto, mas as brancas permitiram temas na oitava fila.

[30.Rxb7 Re1+ 31.Rxe1 Qxb7 32.Qe2! E as brancas não podem trocar de damas, face ao rei melhor colocado na ala da dama. O final é levemente superior às brancas pelo rei protegido. Fritz: +0,81.]

30...Qb5! Início de uma linha forçada que leva à troca de damas. Outra opção seria:

[30...bxa6 31.Qa8+ Kc7 32.Rb7+ Kd6 33.Rxd7+ Kxd7=]

31.Ra8+ Kc7 32.Qxf7+ Rd7 33.Qb3 Qxb3 34.axb3 Rd3 Negras têm torres mais ativas e o rei do lado certo. **35.b4**

[35.f4 Ree3 36.Rh8 Buscando contra−jogo, com possibilidades para ambos.]

35...Rxc3 36.bxc5 Rexc5 37.Kf1 h5 38.Ke1 b5 39.Ra6 Rc1+ 40.Rxc1

Rxc1+ 41.Kd2 Rc6? 42.Ra7+?
Perdendo a chance de um empate matemático:
[42.Rxc6+ Kxc6 43.Kc3 Kc5 *(43...g5 44.Kb4 Kd5 45.Kxb5 Kd4 46.Kc6 Kd3 47.Kd5 Ke2 48.f4 gxf4 49.Ke4)* 44.h4 Kd5 45.Kb4 Kd4 46.Kxb5 Kd3 47.Kc5 Ke2 48.f4 Ke3 49.f5 gxf5 50.Kd5 Kf4 51.Ke6 Kg4 52.g3 Kxg3 53.Kxf5 Kxh4 54.Kf4 Para o computador desde Tc6 é um empate morto (0,00/0,00), mas obviamente muito difícil de calcular em todas as suas variações. Nenhum dos lados percebeu que as brancas têm exatamente o tempo necessário para tablas.]
42...Kb6 43.Ra8 b4 44.h3 Kb5 45.g4 b3 46.gxh5 gxh5 47.Rb8+ Ka4 48.f4 Ka3 49.h4 Rc5 50.Rb7 Ka2 51.Rb6 b2 52.Rb8 Ra5 53.Kc2 b1Q+

□ **Hoffmann,A.**
■ **Petrov,Al**
1: (match) Warsaw 1844
[Cyrus Lakdawala]

I selected this game for sentimental reasons. It was the first one I ever played over in a chess book. At age eight I was blown away by Black's brilliance. At age 62, however, it beco⊥mes clear the game was closer to a comedy. Yet it is in a weird way a cult classic brilliancy, in the same way that Plan 9 from Outer Space had a shot to win an academy award - not much. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 Ne4?** EXERCISE (critical decision): How can White exploit Black's last move?
[Today, we know to play 6...d5 7.Bb5 Ne4 8.cxd4 Bb6 *(* or *8...Bb4+ .)*]

7.Bd5! ANSWER: Move the bishop to d5, which prevents a defence with ...d7−d5.

7...Nxf2 This sacrifice is relatively best, even though Black doesn't get enough for the piece, since White remains well developed.
[7...f5 8.cxd4 Bb4+ 9.Bd2 is wretched for Black, who is unable to castle.]

8.Kxf2 dxc3+ 9.Kg3! This way White doesn't block f1 with his king and allows his rook the square. **9...cxb2** This picks up a third pawn for the piece, at the cost of helping White develop.

10.Bxb2 Black's three pawns for the piece are not enough, since White was handed a lead in development and the potential for an attack on Black's king.

10...Ne7 EXERCISE (critical decision): On his last move Black threatens to swap away White's powerful light squared bishop, while also adding ... Nf5+ into the mix. How should White respond?
[10...0−0 11.Nbd2 d6 12.Ne4! is terrible for Black.]

11.Ng5?? ANSWER: Simply making luft for the white king leads to a winning position. −−− Principle: Whenever you spot a combination, you would be wise to take Murphy's Law into account.

White's idea is unsound, since he forgets about his own king's safety.

[Instead, 11.h3! leaves White's king safe and Black clearly standing worse.]

[The threat to check on f5 should not be ignored: 11.Bb3? Nf5+ 12.Kf4 g5+!! 13.Ke4 *(*if *13.Nxg5?? Be3+ 14.Ke4 Qxg5* wins*;* or *13.Kxf5?? d5+ 14.e6 Bxe6+ 15.Ke5 Qd6+ 16.Kf6 Rg8 17.Bc2 Bd7#* and mates *)* 13...Qe7 14.Kd3 d5 and the advantage swung to Black.]

11...Nxd5 12.Nxf7 The sacrifice on f7 was the point. Now Black's queen and h8−rook hang simultaneously and if Black's king takes the knight, then Qxd5 comes with check. −−− EXERCISE (combination alert): White's combination is horribly flawed and the engine points out no less than four (!) different ways for Black to win. For this exercise, find Black's optimal response.

[If 12.Qxd5?? (not check) Qxg5+ check, White doesn't have time to pick up the loose c5−bishop, and 13.Kf3 *(13.Kh3 d6+* is also fatal *)* 13...Qe3+ 14.Kg4 h5+ 15.Kf5 g6+ 16.Kf6 Be7+ 17.Kg7 Qh6# has shades of the famous Lasker−Thomas game, but with colours reversed.]

12...0−0! ANSWER: Queen sacrifice by simply castling. −−− The sacrifice is absolutely sound. And the answer to your question is: yes, castling is indeed a legal move, since the black king didn't pass through a check.

[The less optimal lines are also winning: a) 12...Qe7 13.Qxd5 Rf8 14.Nd2 Rxf7 15.Nf3 d6 with an extra pawn.]

[b) 12...Ne3 13.Qf3 Qe7 14.Nxh8 d5 (threat: ...Qg5+) 15.h4 Nf5+ 16.Kh2 Qxh4+ 17.Qh3 Qf4+ 18.g3 Qe3 with a winning attack for Black, although it's still quite complicated.]

[c) 12...Rf8 13.Nxd8 Bf2+ 14.Kh3 d6+ 15.e6 Nf4+ 16.Kg4 Nxe6 17.g3 Nd4+ 18.Kh5 Rf5+ 19.Kh4 Rd5! and the dual threats of ...g7−g5 mate and ...Nf5+, winning White's queen, are decisive.]

13.Nxd8 Bf2+ The remainder is wholesome, family entertainment and it's fun to watch White's king squirm. **14.Kh3 d6+ 15.e6** White is bloody lucky to have this block.

[15.g4?? Nf4# is mate straight away.]

15...Nf4+ 16.Kg4 In such positions we fight for our king's life, as if it were our own at stake. **16...Nxe6** Threatening mate in two, starting with ...Rf4+. Here the PGN splits from the PDF who gives; **17.Nxe6** EXERCISE (calculation): As a simple calculation exercise, work out Black's forced mate in four, without moving the pieces.

[Tartakower and Du Mont give a different finish: 17.g3 cutting off the rook check; Nd4+ *(17...Nxd8+ 18.Kh4 Rf4+ 19.Kg5 Ne6+ 20.Kh5 g6+ 21.Kh6 Rh4+ 22.gxh4 Be3#)* 18.Ne6 Bxe6+ 19.Kh4 Nf5+ 20.Kh3 Ne3+ 21.Kh4 Ng2+ 22.Kh5 g6+ 23.Kg5 Be3# .]

[17.Bc1 Nxd8+ also leads to a quick mate.]

17...Bxe6+ ANSWER: Start with the obvious capture on e6, with check. **18.Kg5 Rf5+ 19.Kg4 h5+ 20.Kh3 Rf3#** . Mate, with double check!

Thematic telegraph match 9091 (2) 1890
[Harding in '64 Great Chess Games']

TH: This game is published in my book "64 Great Chess Games". Here is the Two Knights Defence from the two−game telegraph match between world champion Steinitz and his principal challenger Chigorin, played from'This game was played by telegraph for a purse of 750 US dollars when Chigorin offered to take Black in this variation (9. Nh3) which Steinitz had claimed was good for White. Steinitz/Tartakower: 'Nigel Davies: 'This game was played by telegraph for a purse of 750 US dollars when Chigorin offered to take Black in this variation (9.Nh3) which Steinitz had claimed was good for White.'" October 13 1890 to April 28, 1891. This was a thematic match, i.e. the players agreed the openings in advance, and in each case the Russian gambited a pawn. The winner was to receive the stakes of US$750. While Chigorin played the Evans Gambit with White, it was agreed that with Black he would defended against Steinitz' new move 9 ♘h3. The games were annotated by Steinitz as a serial while they were in progress; his optimistic comments seem ironic in the light of his eventual crushing 2−0 defeat. Steinitz's view of the games are given in Hanon Russell's 1980 book 'Correspondence Chess' which gives a good acount of the event; Chigorin's comments are available in various sources. G. B. Fraser also annotated it for ILN xcviii (16 May 1891) p. 654 Nigel

Davies: 'This game was played by telegraph for a purse of 750 US dollars when Chigorin offered to take Black in this variation (9.Nh3) which Steinitz had claimed was good for White.' Nigel Davies: 'Steinitz/Tartakower: 'This game was played by telegraph from 13 Oct 1890 to 28 Apr 1891. The stake for the match, won by Chigorin, was $750." **1.e4** Nigel Davies: 'Steinitz/Tartakower: 'Myers, Avery, Harding, Edwards, Russell, Steinitz (International Magazine). Tartakower & du Mont: 500 Master Games of Chess, pp. 47−48.'" **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2** Nigel Davies: 'Steinitz/ Tartakower: 'Tartakower: 'Undoubtedly the best retreat, but the initiative remains with Black. 8....'" **8...h6**

[Black must of course drive back the intruder without delay, for if 8...Bc5 9.Nc3 h6 10.Nge4 ,etc.]

[and if 8...Nd5 (Villeneuve's Variation) 9.d4 with advantage to White.]

9.Nh3 Steinitz wrote in his 1889 book The Modern Chess Instructor (page 95): Much better than 9 ♘f3 which seems to have been assumed, hitherto, as the only move for White. Nigel Davies: 'According to Ste'According to Steinitz in 'The Modern Chess Instructor', this is "much better than Nf3, which seems to have been assumed, hitherto, as the only move for White. Steinitz/ Tartakower: 'Nigel Davies: 'According to Steinitz in 'The Modern Chess Instructor', this is "much better than Nf3, which seems to have been assumed, hitherto, as the only move for White.'" initz in 'The Modern Chess Instructor', this is "much better than Nf3, which seems to have been assumed, hitherto, as the only move for White.'

[Certainly White does not lose time as he does after'Certainly White does not lose time as he does after Steinitz/ Tartakower: 'This bizarre retreat, favoured by Steinitz, is cruelly refuted in the present game. Nigel Davies: 'Certainly White does not lose time as he does after'" 9.Nf3 Nigel Davies: 'Steinitz/Tartakower: 'was indicated." e4 etc, but the knight's position on the rim of the board is controversial.]

9...Bc5

[Nigel Davies: 'Steinitz analysed"Steinitz analysed Steinitz/ Tartakower: 'Here, as later on Nigel Davies: 'Steinitz analysed'" 9...Bxh3 10.gxh3 Nigel Davies: 'Steinitz/ Tartakower: 'would only lighten White's task." Qd5 11.Bf3 e4 12.Nc3 Qe5 13.Bg2 was given in Steinitz's book, e.g. Bd6 14.Qe2 0−0 15.d3 exd3 16.Qxe5 Bxe5 17.cxd3 "White is a P ahead, and after bringing out his B to e3 he may castle on the queenside or even play ♔e2 and his two ♗'s and the extra P on the queenside secure him the advantage". Chigorin saw it differently. he didn't want to take the ♘ because "my ♗ is needed for the attack, while the ♘ will soon be forced to go back to g1. That seemed to be all the more favourable for me as I could, for a long time, prevent the ♘ coming to f3, and it is only after this move that White can develop properly". Nigel Davies: 'is good for White. This seems quite right as White is a pawn up and Black's knight is poorly placed on a5. ']

[According to Steinitz, 9...Bd6 is interesting as after Chigorin's recommendation of 10.d4 Black can play e4]

[9...Bf5 10.0−0 Qd7 is too crude, with Black ending up in all kinds of trouble after 11.Re1 Bxh3 12.gxh3 Qxh3 13.Bf1 etc.]

[For 9...g5!? see Lukin − Tseshkovsky.]

10.d3

[Nigel Davies: 'This looks more flexible than' 10.0−0 was preferred by Steinitz in their 1892 world championship match at Havana, the game continuing 0−0 11.c3? Better 11 d3 as in Fischer−Bisguier, New York State Open 1973, this game that revived Steinitz's idea may be found in Fischer's classic book My 60 Memorable Games. Nb7 12.Qa4 Bxh3 13.gxh3 Qd6 14.d3 Nd5! and Black won. Note that Chigorin only captured the ♘ after White had castled.]

□ **Mareckova,M.**

■ **Jarvenpaa,J.**

24: Brno 2013

[Martin Lokander]

The following game is a very important one, because it covers a variation that's quite popular at club level. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0!?** I've tried this variation myself on various occasions, although only in blitz games as White. Black's position can quickly become critical if he doesn't know what he's doing, but if Black is familiar with the nuances, he has every chance of scoring well. **5...Nxe4!** There are many similar positions where

it's extremely dangerous to take such a pawn, but in this case Black isn't really in danger of losing a piece. **6.Re1 d5 7.Bxd5!**

[7.Nc3?! is the Canal Gambit, which GM Pavel Blatny has tried a few times. Not very surprisingly, it's more spectacular than good. A simple response is dxc3! *(7...dxc4 8.Rxe4+* gives White decent chances of equality as both d4 and c4 might drop *)* 8.Bxd5 Be6 9.Bxe4 Qxd1 10.Rxd1 cxb2 11.Bxb2 f6! , as in P.Blatny−J.Smejkal, Prague 1986. Black is up a pawn and will look forward to consolidating. White is too slow to find any meaningful compensation, as Smejkal showed in the game: 12.Bc3 Bd7! 13.Rab1 0−0−0 and Black had everything protected.]

7...Qxd5 8.Nc3 The tactical point behind White's play. Both the e4−knight and the d4−pawn are pinned, and thus White regains the invested material.

8...Qh5!? My favourite square for the queen,

[but to be fair Black has many options that all assure him of equality: The main line these days seems to be 8...Qa5 , but after 9.Nxe4 Be6 10.Neg5 0−0−0 11.Nxe6 fxe6 12.Rxe6 Bd6 13.Bg5 Rde8 14.Qe2 Kd7 15.Rxe8 Rxe8 16.Qd3 we reach a position where I don't like the black pawn on d4. Black may very well be equal, but White looks the more comfortable to me.]

[8...Qd8 is another popular variation, but I don't like it because of 9.Rxe4+! Be7 10.Nxd4 f5 and now White has many dangerous tries, like 11.Rf4 *(11.Bh6!?;* or even *11.Rxe7+!?* with very unclear positions where Black needs to play accurately. *)*] [That's why I suggest as an improvement, 8...Qd7! . White should probably prefer

A) After 9.Rxe4+ Be7 10.Nxd4 f5 it turns out that the queen is better placed on d7 than d8. For example, 11.Bh6? doesn't work because after fxe4 12.Bxg7 Rf8 13.Qh5+ Rf7 14.Rd1 Black has Qg4! . *(14...−−)*;

B) 9.Nxe4 Be7 10.Bg5 0−0 11.Bxe7 Qxe7 12.Nxd4 Bd7 and in this position Black has a slightly better minor piece (bishop versus knight in an open position), which should give him a very slight advantage, but due to the symmetrical structure it might be difficult to play for a win. Still, Black can be absolutely satisfied with his position.]

9.Nxe4 Be6 10.Bg5! White effectively prevents Black from castling long, and sets a nasty trap.

[10.Neg5?! looks natural, but after 0−0−0 11.Nxe6 fxe6 12.Rxe6 Bd6 Black has a very active game with potential on the kingside and in the centre.]

10...Bd6! An important move to remember. I first saw this move in 2008, when a good friend of mine pointed out that it was recommended in Nigel Davies's book 'Play 1 e4 e5!'.

[The most natural move by far is 10...h6 . However, this runs into the surprising 11.Bf6! when, suddenly, it's not so easy for Black to develop his pieces. After looking at this position a while, I can safely say that this is

something to avoid as Black.]

11.Nxd6+

[The nice idea, mentioned by Davies, is meeting 11.Bf6?! with the surprising Bxh2+! , a tactical solution to Black's problems. After 12.Nxh2 Qxd1 13.Raxd1 gxf6 14.Nxf6+ Kf8 Black is up a pawn and doesn't experience any problems whatsoever.]

11...cxd6 12.Bf4 Qd5 13.c3

I've had this position on the board many times, and in general I've had good results as Black.

[I've also faced 13.c4?! Qxc4 14.Bxd6 Qd5 when Black gets to castle and enjoy his extra central pawn.]

13...Qf5! The best move in my opinion. Black loses a tempo to provoke c2−c3, but as it turns out, this move might be to Black's advantage should the d−file open quickly.

[Alternatives are: The move I've played the most is 13...0−0 , after which 14.Nxd4 Nxd4 15.Qxd4 Qxd4 16.cxd4 d5 was seen in J. Hector−N.Grandelius, Lund 2010. This looks like a position where most grandmasters would agree to a draw pretty quickly, but somehow Hector managed to squeeze and squeeze until the young Swedish GM lost his way. Still, the position should just be a draw and I wouldn't have a problem recommending this if it just wasn't so boring.]

[After knowing about this game, and searching for a more entertaining option, I came across the move 13...Kd7 , recommended by Nigel Davies and played by none other than Jonny Hector himself as Black. The king would be superbly placed in the centre for an endgame and Black wouldn't have to play ...d5, a square he'd much rather use for a piece. I'd love this idea to work, but Black simply looks worse after 14.Ng5 Rad8 15.Ne4 with a dangerous initiative for White.]

[Finally, I discovered 13...Rc8!? , which is a very tricky move order. Unfortunately, if White continues with

A) Most white players go for 14.Nxd4?! Nxd4 15.Qxd4 Qxd4 16.cxd4 , but here we see Black's idea: Kd7! and Black has a very comfortable ending with the king in the centre and the d5−square free to use for a bishop or even the king. *(16...−−)*;

B) 14.b3 , which I think only has been played in correspondence games so far, Black seems to have nothing better than 14...0−0 15.Nxd4 Nxd4 16.Qxd4 Qxd4 17.cxd4 d5 . This gives Black a slightly improved version of the Hector−Grandelius endgame mentioned above, but as it's still extremely difficult to imagine another result than a draw, I'm reluctant to recommend it.]

14.cxd4

[After 14.Bxd6 0−0−0 15.Bg3 we can go dxc3 when White doesn't appear to have enough compensation for the pawn: for example, 16.Qa4 cxb2 17.Rab1 Qa5! 18.Qf4 Rd3 and Black looks slightly better.]

14...0−0−0!? This is the fighting variation. Black keeps the d−pawns on the board, which makes the position slightly

unbalanced. The king can walk to a8 where it will be safely placed and more importantly, Black can use the d5−square for his pieces.

[Another decent option is 14...Qxf4!? 15.d5 0−0 , but I didn't want to recommend this as my main recommendation due to 16.dxe6 fxe6 17.Rxe6 Ne5 18.Rxd6 Nxf3+ 19.gxf3 Qxf3 20.Qxf3 Rxf3 . Black has a minimal advantage, but let's face it: this should just be a draw.]

15.Bg3 h5!? Black displays some early aggression, and it's not so easy for White to cope with. Black can follow up with ...Bd5, ...g5 and ...h4 to begin a dangerous kingside attack.

[Black could also just begin with 15...Kb8 and 16...Ka8 before initiating complications, but as the game shows, the king would be quite useful close to the centre if White decided to trade queens.]

16.Qd2?! Definitely not the right idea. The endgames are good for Black. However, it's not so clear what White should do.

[Probably White should engage in some active play himself with 16.Re3 Bd5 17.b4! when admittedly he has some counterplay, although I still like Black's chances.]

16...Bd5 17.Qg5 Qxg5 18.Nxg5 Rhe8 It might not look like much, but the central structure is hugely favourable for Black and Jarvenpaa shows why throughout the remainder of game. Especially having the d5−square available for the pieces is a huge asset.

19.f3 Kc7 20.a3 f6 21.Nh3 g5! White's minor pieces are severely hemmed in, and Black will begin his focus on the centre. **22.Bf2 Na5 23.Rxe8 Rxe8 24.Re1 Rc8 25.Rc1+ Nc6 26.Be3 Kd7 27.Kf2 Re8 28.Re1 Ne7 29.Bd2 Rc8 30.Rc1 Rxc1 31.Bxc1 Nf5 32.Be3** Black has traded the rooks, which might look like it eases White's defence, but his minor pieces are still much superior to White's and the king can enter the weak light squares on the queenside. White is far from being able to easily cover those squares.

32...Kc6 33.g4 Ng7 34.Ng1 Kb5 35.Ne2 hxg4 36.fxg4 Kc4 37.Bd2 b6 38.Ke3 a5 39.Ng3 Be6 40.h3 d5! This might look like a strange decision, but it's all about making White's pieces useless. White's knight is deprived of the e4−square and Black can look forward to strengthening his positions on both flanks. **41.Kf3 Kd3 42.Bc3 Bd7?!**

[I think this was the appropriate moment for playing 42...Ne8! followed by ...Nd6 when the knight can reach b5, e4 or c4 when White's defences crack. I see no reasonable defence against this plan.]

43.Kf2 f5 44.Kf3

[White could have gained some counterplay with 44.Nh5 Ne8 45.h4! gxh4 46.g5 when the g−pawn provides White with some drawing chances.]

44...f4 45.Ne2 Ne6 46.h4 Ba4! 47.Nc1+ Kc4 48.hxg5 Bd1+ 49.Kg2 . It looks a bit early to resign the game, although White is technically lost. Perhaps White lost on time.

□ **D.Svetushkin**
■ **S.Haslinger**
Palma de Mallorca_2884 2008
[John Emms]

It would be an understatement to say that the following encounter isn't a good advert for the Italian Game, but the reason for its inclusion is to provide a stark warning. Even though there's a 'system' feel to this opening, White certainly cannot get away with playing on auto−pilot. A plan which works well in a certain type of position might backfire in those which contain seemingly insignificant differences. In this game, it backfires quite spectacularly! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 Ba7 7.Re1 0−0 8.h3 d6 9.Bb3 Be6** This bishop move needs no introduction, as we've already seen it many times in similar positions. Korchnoi chose ...Be6 against Karpov back in 1981 (with Nbd2 played instead of Re1), and more recently it has been favoured by grandmasters such as Levon Aronian and Vishy Anand. Suffice to say, it's regarded as a reliable choice for Black. Now White must make that typical decision again: does he allow an exchange on b3 if Black wants it, or retreat the bishop to c2? Remember that White needs to avoid 10 Bxe6?! fxe6, as this just gives Black an open f−file and more control of the centre.
10.Bc2 This is definitely the most challenging move.
[Players who enjoy quiet positions may want to choose 10.Nbd2 , but accurate play by Black in practice, beginning Bxb3 , has shown this to be fairly harmless.
A) Let's follow the game E.Bacrot−L. Aronian, Mainz (rapid) 2007: 11.Qxb3 Rb8 *(*the immediate *11...Qd7* is also good, since *12.Qxb7??* loses the queen to *Rfb8)* 12.Nf1 Qd7! 13.Ng3 Rfe8 14.Bd2 *(*White can reroute the queen to avoid an exchange with *14.Nh2 Qe6 15.Qd1* , but *d5 16.Qf3 dxe4 17.dxe4 Ne7 18.Bg5 Nd7 19.Rad1 f6 20.Bc1 Nf8 21.b3 Rbd8 22.Ng4 Kh8*

, as played in Z.Andriasian−B. Socko, Kallithea 2008, is objectively equal *)* 14...h6 15.Rad1 Qe6! and Black has equalized. As usual, bringing the queen to e6 to contest the light squares is an excellent idea after the exchange of bishops.;

B) There's also 11.axb3 to consider. Once again

B1) although Black can also choose 11...Nd7 aiming for ...f5. For example, 12.Nf1 *(*or *12.Nc4 f5 13.exf5 Rxf5 14.Be3)* 12...f5 13.exf5 Rxf5 14.Ng3 Rf8 15.Ra4 Nf6 16.Ne4 Qd7 17.Nxf6+ Rxf6 18.Rg4 Raf8 19.Be3 Bxe3 20.Rxe3 with a roughly equal position, Z. Efimenko−A.Bezgodov, Sochi 2006.;

B2) Returning to 11...d5 , I wonder what the likes of Efimenko would have planned against this.

B2a) One possibility is 12.Nh2 , preparing Qf3 and Ndf1−g3, but then dxe4 13.dxe4 Qd3! is annoying.;

B2b) Perhaps it's simply 12.Qe2 , which did give White a tiny bit of pressure after dxe4 *(12...Qd7!?)* 13.dxe4 Nh5 14.Nc4 Qf6 15.Be3 Bxe3 16.Qxe3 Nf4 *(16...Rfd8!?)* 17.g3! Ne6 *(17...Nxh3+ 18.Kg2* traps the knight *)* 18.Na5 in M.Klinova−M.Ferguson, Port Erin 2007. To sum up, 10 Nbd2 isn't a move to really challenge Black theoretically, but it might appeal to those who are confident of outplaying opponents in quiet positions.;

B2c) 12.−−;

B3) 11...d5 is the most logical equalizing try,;

C) 11.−−]

10...d5

[There's no need for Black to hold back. If he does, White should most certainly push with d3−d4. For example, 10...Ne7 11.d4 Ng6 12.Be3 h6 13.Nbd2 with an edge. Note that if Black plays Nh5? here, White can win a pawn with 14.d5! Bxe3 15.Rxe3 Bd7 16.Nxe5! .]

[10...h6 11.Nbd2 transposes to Areshchenko−Aleksandrov, *(*but *11.d4* threatening d5 might be more promising. Kaidanov gives *exd4 12.cxd4 Nb4 13.d5 Nxc2 14.Qxc2 Bd7 15.Nc3 Nh5 16.Be3 Bxe3 17.Rxe3 Qf6* with a slight advantage for White, and I agree with his assessment. *)*]

11.Nbd2?! In many respects the most natural−looking move, but this is a mistake!

[White should play 11.exd5! , which is covered in the next game.]

11...dxe4! 12.dxe4 Nh5! This is the point. Black returns to the obvious and enticing plan of ...Qf6 and ...Nf4, as seen in the previous game. But this version is so much more favourable for Black because he is better developed and, just as importantly, White no longer has the option of shutting out the dark−squared bishop with the d3−d4 advance. Compare also Gonzalez Vidal−Gomez,

where White was in a much stronger position to meet ...Nh5. Here g2−g3 just isn't on! **13.Nh2?!** White wants to play all the usual moves: Qf3, Ng4, N(d2)−f1 etc. The trouble is, Black has some moves too, and they are pretty good ones!

[Karpov chose 13.Nf1 against Korchnoi in their 1981 world championship match, and for some reason Korchnoi dispensed with the possibility of Qf6! in favour of exchanging queens. White can aim to occupy d5 with 14.Ne3 , but after Rad8 *(*or even just *14...Bxe3 15.Bxe3 Nf4)* 15.Nd5 Qg6 (threatening ...Bxh3) 16.Kf1 f5 (Keene, cited by Marin) Black is very active and it's impossible to recommend this for White. Even so, it's better than 13 Nh2!]

13...Qh4! There's no need to settle for the f6−square when h4 is available. Black already has the advantage. **14.Qf3 g6!** Planning to seize the initiative with ... f5, which would be Black's answer to most of White's moves here... **15.Ng4??** ...except this one! This was clearly not a good day at the office for Svetushkin. **15...Bxg4! 16.hxg4 Ng3!** Black is mating on h1. The a7−bishop reigns supreme. To be fair, given how much grief it's been caused by White's play in previous games, it is difficult to begrudge it one moment of glory. **0−1**

C54

□ **Albin,A.**
■ **Reti,R.**
2: Vienna 1909
[Thomas Engqvist]

Adolf Albin (1848−1920) was a Romanian player, born in Bucharest. He is mostly known for the interesting counter−gambit 1 d4 d5 2 c4 e5!? which bears his name. Albin's chess career is unusual because he learned the game when he was around 20 and only began playing in international tournaments in his forties. His best result was second place at New York at 1893, behind Emanuel Lasker who scored an unbelievable 13/13. There is a book by Olimpiu Urcan called 'Adolf Albin in America: A European Chess Master's Sojourn, 1893−1895', where those interested can read more about the peak of Albin's career. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.b4 Bb6 7.a4** QUESTION: Should Black move the a−pawn one or two steps? ANSWER: It's really a matter of taste whether one prefers 7...a6 or the move Réti plays. **7...a5 8.b5 Ne7 9.Be3** QUESTION: How should Black react to the tension between the bishops? ANSWER: **9...Ba7!?** Allowing a trade on b6 should be avoided, so as to keep dynamic possibilities for the c7−pawn.

[However, 9...Bxe3! 10.fxe3 is a serious candidate move, despite giving White more control of the centre and a semi−open f−file, although it is vital that this exchange is followed by a quick ...d6−d5. One fundamental goal for Black is to get rid of the opposing central pawn situated

on its fourth rank, never mind that White is now ready with a new one! One plausible line is 0−0 11.0−0 d5 12.exd5 Nexd5 , when White can only defend the e−pawn in a slightly inconvenient way, such as 13.Re1 , after which Bg4 gives Black very good piece play, while the e3−pawn is required to cover the f4−square and keep the black knight out.]

10.Qb3 This looks like a superficial one−move threat; no deep plan seems to be at hand.

[It is more natural to displace the black rook at once with 10.Bxa7 , followed by castling.]

10...0−0 11.Bxa7 Rxa7 12.Nbd2

[The more consequent 12.Ng5 , continuing the attack on f7, is answered by the central counter−thrust d5! *(12...Qe8?!* allows *13.b6 cxb6 14.Qxb6 Nc6 15.Na3* with some pressure on the queenside *)* 13.exd5 Nexd5 , followed by ...h7−h6.]

12...Ra8 Stepping back from any b5−b6 ideas.

[Another option is 12...c6 , preparing ...d6−d5. In the variation 13.0−0 d5 14.b6 dxc4 15.bxa7 cxb3 16.a8Q Qxd3 17.Qxa5 Nxe4 18.Nxe4 Qxe4 , with full compensation for the exchange, the misplaced rook has even "disappeared"!]

13.d4

[If 13.Ng5 then Qe8 is best, intending to meet 14.b6 with h6 *(* rather than *14...c6?* due to *15.Bxf7+! Rxf7 16.Nc4* and Black is in difficulties. *)*]

13...Ng6 14.dxe5 Castling would be normal. The main drawback with Albin's move is that the f4−square might turn out to be a good outpost for a black knight. QUESTION: Should Black recapture with the pawn or the knight? ANSWER: **14...dxe5** Réti wants to keep the knight on g6 so it can occupy the f4−square in the near future.

[Instead, 14...Nxe5 15.Nxe5 dxe5 leads to a position where the black queen has pressure on the d−file and temporarily prevents castling while preparing the manoeuvre ...Nh5−f4. After 16.Rd1 Nh5 , the position is similar to the game, and about equal, but more simplified compared with Réti's choice.]

15.Rd1 It is not at all certain the queen's rook belongs on this square.

[Either 15.0−0]

[or 15.Qc2 seems more to the point, waiting on a decision over where to deploy the rooks.]

15...Qe7 16.0−0 Bg4 17.Rfe1 Nf4 18.Re3?!

[It is better to play 18.h3 Bh5 19.Qc2 Rad8 20.Bf1 , in order to dislodge the actively placed knight with g2−g3. Black might reply Nd7 21.g3 Ne6 , followed by ...Nec5, with a slightly better position as the knight has found another fine outpost.]

18...Rad8 Black has achieved a dream position, and it is clear that the d1−rook is badly placed. **19.Rde1?** White moves his rook off the d−file, but there is a tactical drawback.

[19.Qc2 first was necessary.]

EXERCISE: What is currently wrong with White's rook set−up? **19...Nd7?**

[ANSWER: The problem is 19...Bxf3 20.Nxf3 Ng4 and the e3−rook is trapped. Surprisingly, Réti overlooked

this tactic, presumably being too focused on strategic matters.]

20.Nf1?! Now White plans a faulty knight manoeuvre to g3, which will only hinder the important move g2−g3, chasing the f4−knight from its dominant outpost.

[Again, 20.Qc2 is better, followed perhaps by Bf1 and a timely g2−g3.]

20...Qf6 With tactical ideas of ...Nh3+ and so on, though this is not very dangerous at the moment. **21.Ng3?!**

[Once more 21.Qc2 is correct, defending f2 (so that ...Nh3+ can be met by Kh1), especially seeing as the queen will soon have to move anyway.]

21...Nc5 22.Qc2 Rd7 Black's plan now is simply to double on the d−file, trade on f3, and penetrate the weak d2−square. **23.Rd1** Exchanging one of his passive rooks, but it does not neutralize Black's threats. **23...Rxd1+ 24.Qxd1 Rd8 25.Qc2 Bxf3 26.Rxf3** EXERCISE: Can you locate the weakest point(s) in White's position and find Black's strongest continuation? ANSWER: **26...Qd6!** White's main weakness is the d−file where Black can penetrate on d1 or d2. After the exchange of queens, the a4−pawn will inevitably fall.

[Another possible target is g2, which could be attacked by 26...Qg5! , intending ...h7−h5−h4 (as well as ... Rd2!). White might disrupt this plan with 27.h4 Qxh4 28.Nf5 , but after Qh5 , Black has just won a pawn for nothing, while White's pieces are very badly placed - the f3−rook is particularly useless: it cannot even move because of the deadly ...Rd1+ etc.]

27.Nf1 Qd1 28.Qxd1 Rxd1 29.g3 Nfe6 30.Rf5 EXERCISE: What is the simplest winning continuation for Black? **30...Nxe4?!** The white e−pawn is not very important.

[ANSWER: It was better to go for the queenside pawns with either 30...Rc1 31.Rxe5 Nxa4 32.Bxe6 fxe6] [or 30...Nxa4 31.Bb3 Ra1 32.Bxa4 Rxa4 33.Rxe5 Rc4 , when Black wins easily.]

31.Rxe5 Nd2?!

[Here 31...Nxc3 32.Bxe6 fxe6 33.Rc5 *(* or *33.Rxe6 Kf7)* 33...Nxa4 34.Rxc7 b6 was the correct plan, followed by ...Rd5 or ...Rb1 and so forth.]

32.Rd5! Nf3+ 33.Kg2

[33.Kh1 is answered by Ra1 with good winning chances.]

33...Ne1+ 34.Kg1 Rxd5 35.Bxd5 Nc5 36.Ne3 EXERCISE: What is Black's best continuation now? **36...b6** Réti seems to have had an aversion to taking the a4−pawn.

[ANSWER: 36...Nxa4! was stronger, and if 37.Bxb7?! *(37.Kf1 Nd3 38.Ke2 Ndc5 39.Kd2* is nominally better *)* , then 37...Nxc3 with a straightforward win; for example, 38.Nc4 a4 39.Na3 Kf8 40.f4 Nd3 41.Kg2 Ke7 42.Kf3 Nc5 43.Bc6 Nb3 44.Ke3 Kd6 45.Kd3 Na2 46.Be8 *(* or *46.Kc4 Na5+)* 46...f6 with a winning knight endgame. Note how well the black cavalry danced together in this variation!]

37.Kf1 Ned3 38.Nc4?

[He should have played 38.Ke2 Nb2 39.Ba2 Nbxa4 40.Nd5 Ne6 41.Kd2 with more defensive possibilities than in the game, even if it still looks grim for White]

38...Nxa4 At last. Now it's all over since the c3−pawn cannot be defended either. **39.Bc6 Nxc3 40.f4 a4 41.Kg2 Ne1+ 42.Kf2 Nc2** . The a−pawn is supported all the way to a1, so White would have to give up his knight.
0−1

■ **Bu Xiangzhi**

7: FIDE World Cup, Tbilisi 2017

[Cyrus Lakdawala]

1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Be7 In this Quiet Italian version of the Bishop's Opening, Black generally chooses to develop the f8−bishop to either e7 (as here) or c5 (which we will look at in the next two games). −−− QUESTION: Why develop the bishop to e7 when the c5−square is available? −−− ANSWER: This is a tough question. Putting the bishop on c5 looks more aggressive, but it is also more exposed and may be subject to a tempo loss against any of c2−c3, followed by d3−d4; or c2−c3, followed by b2−b4; or Nc3 and Na4. Both bishop moves are perfectly good, so it's really a matter of taste again. **5.0−0 0−0 6.Bb3 d6**

[Pushing the d−pawn two squares with 6...d5 also leaves the e5−pawn vulnerable; for example, 7.exd5 Nxd5 8.Re1 Bg4 9.h3 Bxf3 *(* after *9...Bh5!? 10.g4 Bg6 11.Nxe5 Nxe5 12.Rxe5 c6 13.Qf3* , it is unclear whether Black really has enough for the pawn *)* 10.Qxf3 Nd4! 11.Qxd5 Qxd5 12.Bxd5 Nxc2 13.Rxe5 Rae8 14.Re2 Nxa1 15.Bxb7 Bd6 16.Be3 f5 17.Bd5+ Kh8 18.g3 f4 19.gxf4 Bxf4 20.Na3 Re5 21.Bg2 and I prefer White's chances, though Black managed to hold in S.Tiviakov−J.Hector, Helsingor 2008.]

7.c3 If chess openings have a capital, then it may be the Italian Game, an ancient city centuries old, which is now back in fashion. "But this is the Bishop's

Opening, not the Italian Game," you point out. Well, yes and no. The currently popular way to play the Bishop's Opening is to toss in c2−c3, rather than develop the knight on that square. The positions resemble a hybrid of the Italian Game and Closed Ruy Lopez with, as we've already noted, the benefit of dodging the mountains of established theory in both those lines.

7...Be6 A good move which neutralizes the power of White's light−squared bishop.

[Instead: a) 7...Na5 seeks to enter a Chigorin structure by clearing the way for ...c7−c5, After 8.Bc2 c5 9.Nbd2 Nc6 10.Re1 , you would swear this position arrived via a Chigorin Ruy Lopez. The difference is that Black's a− and b−pawns are still at home and the white d−pawn is on d3 rather than d4. Black tends to reorganize with ... Re8 and ...Bf8, while White can play in Lopez fashion with h2−h3 and Nf1−g3, or else aim for a queenside advance with a2−a3 and b2−b4. For example, Re8 11.a3 Bf8 12.b4 g6 13.Ba4 cxb4 14.axb4 Bd7 15.Nc4 gave White an edge in S.Tiviakov−L. Bruzon Batista, Calvia Olympiad 2004.]

[b) 7...Bg4 encourages the plan of Re1, h2−h3 and Nbd2−f1−g3. For example, 8.h3 Bh5 9.Re1 Nd7!? (heading for e6) 10.Nbd2 Nc5 11.Bc2 Ne6 12.Nf1 Ng5 13.N1h2 and White looks a shade better, M. Haddouche−L.Rama, Dresden Olympiad 2008.]

[c) 7...h6 (preparing an original way to relieve Black's slight cramp) 8.Nbd2 Nh7!? 9.Nc4 Ng5 10.Nxg5 hxg5?! *(10...Bxg5 11.f4* only looks a shade better for White *)* 11.Qh5 Be6 12.Ne3 Bxb3 13.axb3 f6 14.h4! and the light squares around Black's king are weak, who is also saddled with a bad bishop, T.Radjabov−L.Aronian, Nice (rapid) 2009.]

[d) 7...d5!? tries to claim that the extra c2−c3 worsens White's position in the 6...d5 line, as the d3−pawn is now more vulnerable. White therefore usually switches to 8.Nbd2 here; for example, Bg4 9.h3 Bh5 10.Re1 dxe4 11.dxe4 Bc5 12.Qe2

A) 12...Qe7 looks correct, though I still like White after 13.Ba4 *(*or *13.Nf1)*;

B) 12...h6? 13.Qb5! Qe7?! *(*but *13...Bb6 14.Nxe5 a6 15.Nxc6* still picks off a pawn *)* 14.Qxb7 Na5 15.Qb5 Nxb3 16.Nxb3 Bd6 17.Nh4 and Black didn't get any compensation for the missing pawn, T.Radjabov−S.Karjakin, Nice (blindfold rapid) 2009.]

8.Re1 A standard move. By placing his rook on the e−file, White reinforces the e4−pawn (in order to engineer d3−d4 in the future) , clears the path for a possible Nbd2−f1 manoeuvre, and targets the e5−pawn (should Black be minded to push ...d6−d5). **8...Qd7 9.Nbd2 Rab8!?** An interesting idea. White often throws in Ba4 as preparation for d3−d4 in these positions, and now that can be met simply by ...b7−b5, expanding on the queenside. **10.Bc2 d5!?** Bu Xiangzhi is an aggressive player and offers his e−pawn, in Marshall Gambit fashion. Your cautious writer tends to pause in situations where others dare to proceed − sacrificing on

speculation is pretty low on my personal list of priorities − but many players feel the other way around and live the chaotic life of crisis−mongers. **11.h3!?** Carlsen declines for the moment, preferring to prevent a black piece from appearing at g4.

[However, Bu later finds a way to exploit the forward position of the h−pawn, so there is an argument for immediate acceptance with 11.exd5 Bxd5 12.Nxe5 Nxe5 13.Rxe5 Bd6 14.Re2 , when I'm not sure of Black's full compensation for the pawn, even if he has definite practical chances.]

11...h6!? Black refuses to back down and exchange on e4, so Carlsen accepts the gambit after all. **12.exd5 Nxd5 13.Nxe5 Nxe5 14.Rxe5 Bd6 15.Re1 Bxh3!?** In case you didn't notice, invading wars tend to be expensive, but a promise is a promise. This is the logical extension of Black's previous pawn sacrifice. It was Shakespeare who argued that if a black deed is to be done, it should be done quickly − perhaps because the swifter the decision, the less time we have to contemplate backing off! Bu sacrifices a piece, based on the thought: "Too much civilization dulls the survival instinct if one is suddenly tossed into the wild." −−− QUESTION: Is it sound? −−− ANSWER: Yes and no. Objectively the comp likes White; from a practical standpoint, I would say Black's odds are around 50/50, which aren't so bad. It's easy to dismiss this sacrifice as unsound, just because the comp tells us so, but be careful: so many times we have been misled by the deceptive thought: "In the end, reason will prevail over illogic", and defending is often more difficult than attacking. Bu's move forces Carlsen to find some strong defensive moves, which is not so easy over the board with his clock ticking down. **16.gxh3 Qxh3 17.Nf1** Covering h2. **17...Rbe8 18.d4 f5** Black flings his f−pawn forward, already threatening 19...Rxe1 20 Qxe1 Rf6 and wins. **19.Bb3 c6 20.f4!** Halting the black f−pawn and enabling the queen to come to g3 if Black exchanges on e1. **20...Kh7!** Unpinning his knight and intending ...g7−g5 at some point. **21.Bxd5?** Carlsen prematurely hands over control of the light squares. The de facto by−product of Black's sacrifice is that it is really difficult for White to find the correct moves. Now White's material−up position is about to become the otherwise joyful Christmas family letter, which ends with the announcement that you and your wife are getting a divorce.

[The best defence was 21.Re2! , planning Rh2, or if Bxf4?! then 22.Rxe8! Rxe8 23.Bxd5! (the right moment) Bxc1 24.Bg2! Be3+ 25.Nxe3 Qxe3+ 26.Kh1 and White is clearly better.]

21...cxd5 22.Re3 Now matters get even worse for White.

[22.Re5!? g5! 23.Qe1 Bxe5 24.fxe5 f4 gives Black a nasty attack, yet this still looks like White's best chance of hanging on.]

22...Rxe3 23.Bxe3 g5! 24.Kf2

[After 24.fxg5 f4 25.Qc2+ Rf5! 26.Bxf4 (forced) *(* since *26.Bf2?* loses to *f3 27.Be3 Kg7! 28.gxh6+ Kh8* and White has no reasonable way to halt ...Qg4+, followed by ... Rh5+ *)* 26...Bxf4 , White's king is

seriously exposed and it's unlikely he will survive.]

24...gxf4 25.Qf3! The only way to avoid immediate resignation, even if it's like seeing a natural disaster on TV and then sending a donation to the hurricane, rather than the victims.

[Trying to hang on to the material with 25.Bd2?? is hopeless in view of Qh4+! 26.Kf3 *(26.Ke2 f3+!* forces mate *)* 26...Rg8 27.Qa4 Qg4+ 28.Kf2 Be7! and the engine declares mate in twelve.]

25...fxe3+ 26.Nxe3 Qh2+ 27.Kf1 Rg8! 28.Qxf5+ Rg6 29.Ke1 h5? Maintaining complete accuracy while attacking is obviously not easy either. Here Black gives his king a safe haven on h6 and has ideas pushing the h−pawn down to the promotion square on h1, but the engine shows that he gives White a chance.

[Far stronger is 29...Kg7! , threatening ...Rg1+, while after 30.Qd7+ Kh8 31.Qd8+ Kh7 32.Qd7+ Rg7 33.Qf5+ Kh8 , White runs out of checks and 34.Rb1 Rg1+ 35.Nf1 Kg7! 36.Qd7+ Kf6 37.Qd8+ Be7 38.Qh8+ Kf7 39.Qh7+ Ke6 wins.]

30.Kd1?

[Missing his chance to resist with 30.Rd1! Kh6 31.Rd2 Rg1+ 32.Nf1 ; for example, Qf4 33.Rf2 Qxf5 34.Rxf5 Bg3+ 35.Ke2 Rg2+ 36.Ke3 h4 37.Rxd5 h3 38.Rd7 b6 39.Rxa7 h2 40.Nxh2 Rxh2 and Black doesn't have enough pawns left to win.]

30...Kh6 Now Black is winning again.

31.Nc2? A further mistake;

[he should at least activate his rook with 31.Rc1 .]

31...h4 Still winning;

[but 31...Bf4! is quickly decisive: 32.Qf8+ Kg5 33.Qe7+ Kf5 34.Qf7+ Rf6 35.Qh7+ Kg4 36.Qd3 Re6! 37.Ne1 Qf2! and White can resign.]

32.Ne1 h3 33.Nf3 Qg2! 34.Ne1 Qg4+! The h−pawn can't be stopped with queens off the board. **35.Qxg4 Rxg4 36.Nf3** EXERCISE: How did Bu force the 16th World Champion to resign? −−− ANSWER: Attraction/pawn promotion. **36...Rg1+!** . If the knight captures, then ...h3−h2 follows with promotion, and if White doesn't capture, then he hangs his a1−rook.

■ **Exeter,Literary Society**

Cambridge−Exeter match (1) 1871

[ILN 2/9/1871; Weekly Mail 18/11/1871; Harding]

ILN lix (2 Sep. 1871) p211. 'CHESS BY CORRESPONDENCE. The subjoined Game has been playing for some time between the "Cambridge Staunton Club" and the Exeter Club.' (But only as far as White's 31st move). TH: The complete game was found in Rev Walter Evans's column in the Weekly Mail (Cardiff) 18 Nov. 1871. His notes (WM) are different from those by Staunton in the ILN (HS); the Welsh paper did not mention the missed opportunity at move 28. The

reverse colours game appeared in the Field of 29 Nov 1873. See also ILN 29 July 1871 for De Soyres's letter to Staunton about the club and Eales 'Cambridge Chess' (which actually has very little about Cambridge chess in the early 1870s and earlier. B. Goulding Brown wrote about this for BCM and corresponded with H. J. R. Murray on the subject.) **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.0−0 d6 7.d4 exd4 8.cxd4 Bb6 9.Nc3 Na5 10.Bd3 Ne7 11.d5 0−0 12.Bb2 Ng6 13.Ne2 c5 14.Qd2 f6** WM: The game up to this point has been very correctly opened by both sides. **15.Kh1 Bc7 16.Rac1 Rb8** WM: Apparently, for the purpose of enabling them to advance P to Q Kt 4th. We should, however, have preferred attaining this object by

[16...Bd7]

17.Ng3 b5 18.Nf5 c4 19.Be2 HS: This move has been recommended by Mr Zukertort in a recent analysis of the present opening. **19...Re8!?** TH: This move does not appear to have been repeated in later Victorian games, but it was much later recommended by A. P. Sokolsky. **20.g4?!** WM: This was very hazardous, and, although followed up with great spirit, a line of play not to be recommended in a game by correspondence, where the other side have ample leisure to examine minutely the consequences of every move. **20...Rxe4 21.Rg1 Rxg4** HS: A sacrifice in appearance only; for Black have now three Pawns as compensation for the loss of the exchange. **22.Nh6+** WM: White, having sacrificed three pawns, has no alternative but to proceed with the attack at all costs, and, sooth to say, it is well, though unsuccessfully, maintained. HS: Would it not have been better to capture the Rook? (TH: yes, of course, what White does is totally unsound!)

[RR22.Rxg4 Bxf5 Black seems very solid with a material advantage (TH)]

22...gxh6 23.Nd4 Rxg1+ 24.Rxg1 Qf8

[RR24...b4−+]

25.Bh5 Kf7 26.Qc2 Ke7?? TH: incredibly bad defence; now White has at least a draw. **27.Bxg6 hxg6 28.Rxg6?** HS: White overlooked an opportunity of winning the game, which was very obvious at this point. They ought to have taken this pawn with their Queen. For instance, suppose

[28.Qxg6 Qf7 *(* If *28...Kd8* then follows *29.Qh7* and Black have no resource *)* 29.Re1+ Kf8 30.Qxh6+ &c.]

28...Kd8 29.Nf5! TH: it seems that White still has enough for a draw with correct play and it is risky for Black to play for a win.

[WM: 29.Ne6+ looks promising, but it would not have saved the game. RRBxe6 30.dxe6 Nc6]

29...Bb6 30.Rxf6! WM: Better than

[30.Bxf6+ since, in that case, Black would have played Kc7 and if White then checked with 31.Rg7+ Black could interpose Bd7 and have been perfectly safe.]

30...Qg8 TH:

[RR30...Qe8!? is problematic and maybe best; I need a more powerful computer to analyse it. 31.Nxd6! Qe1+ *(31...Qh5? 32.Qe4)* 32.Kg2 is critical; maybe Black can draw?

A) 32...Bb7 33.Nxb7+ Rxb7 34.Rf8+ Kc7 35.Bc3!+− *(≤35.Rf7+*

draws by perpetual check (TH) *)*;
B) 32...b4 33.Nxc8 *(33.Qh7 Bh3+ 34.Kxh3 Qf1+ 35.Kg4)*;
C) 32...Bd7 33.Be5! Kc7]

31.Qe4 HS: 'and White consider they can at least make a drawn battle' (rest never published in ILN, but ILN 29 July 1871, John de Soyres's letter to Staunton indicated Cambridge expected to win the game.) WM: At this stage White thought they could, at least, draw the game. The result proves their error.

31...Qe8

[RR Fritz 8 thinks White stands better after this, and prefers 31...Kc7 32.Nxh6 Qd8 33.Nf7 Qd7 34.Ng5 b4 35.Rf7 c3 36.Bc1 Qxf7]

32.Rxd6+ Bd7 33.Qe6? TH: this is the real losing move.

[RR: Fritz 8 gives 33.Be5 threatening Rf6, and despite the piece deficit, White still has a very strong attack. So Cambridge's judgment at move 30 was not wrong perhaps? Bc7 34.Ng7 Qf7 35.Ne6+ Kc8 36.Nxc7 Rb6 By returning the piece, Black obtains drawing chances, but White retains some initiative (TH). 37.Rxb6 axb6 and now 38.Bf4 may be best.]

33...Bc5 34.Qf6+ Kc8 35.Be5 Kb7 36.Ra6 Bxf5 37.Rxa5 Be4+ 38.Kg1 Bxd5 and White resigned

0−1

C52

□ **Jobava,B.**
■ **Aronian,L.**
European Championship, Antalya 2004

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.Qb3 A sideline, but an interesting one.
[The main lines here are 6.0−0]
[and 6.d4 .]
6...Qe7 7.d4 Nf6 Black has tried a few other moves here:
[7...exd4 transposes to 6 d4 exd4 7 Qb3!? Qe7 (see the notes to Anderssen−Dufresne).]
[7...Nxd4 8.Nxd4 exd4 9.0−0 Nf6 *(9...dxc3 10.Ba3 Qf6 11.e5 Qf5 12.Nxc3* gives White an excellent attack *)* 10.Ba3 c5 was played in J. Kipping−A.Anderssen, Manchester match 1857. Now after 11.cxd4 Nxe4 12.f3 Nd6 13.Bxc5 0−0 14.Bd5 White would have more than enough compensation for the pawn.]
[7...Bb6 leaves us with:
A) 8.dxe5!? Na5 9.Qb5 a6 10.Qd5 c6 11.Qd3 Qc5 12.Bb3 Qxf2+ 13.Kd1 Qxg2 14.Rf1 with unclear play, e.g. Qg6 15.Qd6 Nxb3 16.axb3 Qxe4 17.Ba3 Qd5+ 18.Nbd2 Qxd6 19.Bxd6 Nh6 20.Ng5 Be3 21.Nde4 b5 22.h4 and the position is really not easy to assess.;
B) 8.Nxe5 Nxe5 9.dxe5 d6! (Black needs to develop) 10.a4! *(* after *10.0−0?! dxe5 11.Ba3 Qf6 12.Nd2 Bd7* the white attack is clearly not so dangerous *)* 10...a6 11.a5 Bc5 12.0−0 dxe5 13.Rd1 Bd6 *(13...Nf6* would be met by *14.Bxf7+! Kf8 15.Bc4 Nxe4 16.Ra2* with a strong initiative *)* 14.Ba3 and White has sufficient compensation for the pawn.;
C) 8.−−]
8.dxe5?! This is heading for a position where White has won the pawn back, but his game lost its momentum.
[A preferable alternative was 8.Ba3!? d6 9.d5 Nd4 10.Nxd4 *(* an improvement over *10.Qa4+? Bd7 11.Qxa5 b6 12.Qa6 Nc2+ 13.Kd1*

Nxa1 14.Nbd2 0−0 15.Kc1 c6! and Black was much better, B. Lundgren−T.Wastfelt, correspondence 1974 *)* 10...exd4 11.Qa4+ Kd8 12.0−0 Bb6 13.Bd3 *(13.f3* is answered with *Nh5!* intending ...Nf4 and ...Qg5 with a deadly attack *)* 13...Nxe4 14.Re1 f5 *(*or *14...Nc5 15.Rxe7 Nxa4 16.Rxf7 g6 17.Bb5 Nxc3 18.Nxc3 dxc3 19.Bb4 Bd4 20.Rc1* with full compensation *)* 15.c4 Qh4 16.Qc2 Re8 17.Re2 Re5 18.Nd2 and White retains the initiative.]

8...Nxe5 9.Nxe5 Qxe5 10.Bxf7+ Ke7

Here we have a position similar to that of the Traxler in the Two Knights Defence (i.e. 3...Nf6 4 Ng5 Bc5!?). There is only one small difference: Black is much better here. **11.0−0?**

[11.f3!? was stronger, but Black can still grab the initiative with d5! *(11...Nxe4 12.fxe4 Qxe4+ 13.Kd1 Qg4+ 14.Kc2 Qe4+ 15.Kd1* is a draw *)* 12.Bxd5 Nxd5 13.Qxd5 Qxd5 14.exd5 Kd6 15.Bd2 Re8+ 16.Kd1 Bd7 when Black's play is more than enough for the pawn.]

11...Rf8 12.Bd5 Bb6 13.h3 d6 14.Na3 Bxh3 15.c4

[If 15.gxh3 Qg3+ 16.Kh1 Qxh3+ 17.Kg1 Ng4 wins.]

15...Bd7 16.c5 Bxc5

[Clearer and cleaner was 16...Ng4! 17.Qh3 *(*or *17.g3 Qh5)* 17...Rxf2 18.Rxf2 Bxc5 19.Rb1 Bxf2+ 20.Kh1 Bc5 and Black wins.]

17.Nc4 Qh5

[42.Nc1! may just save the game for White: Rxg3+ 43.Kh2 Rc3 44.Ne2 Re3 45.Kg2 Kf7 46.Raxa2 Kf6 47.Rc2 Rxa2 48.Rxa2 Rxe4 49.Rb2 b4 50.Nc1 Rc4 51.Nd3 e4 52.Nxb4 Kg5 53.Nc2 Kf4 54.Ne1 Rc3 55.Nc2 Rd3 56.Ne1 Ra3 57.Rf2+ Rf3! 58.Rb2 *(*not *58.Nxf3?? gxf3+ 59.Kf1 g5 60.Ra2 e3 61.Ra4+ Kf5 62.Ra3 e2+ 63.Kf2 g4 64.Ra1 e5 65.Ke3 e4 66.Ra5+ Kg6 67.Ra1 g3* and Black's pawns can't be halted *)* 58...Re3 59.Kf1 Rc3 and Houdini held the position as White.]

42...Rxg3+ So subtle is the ending, that both sides continue to commit inaccuracies. Kritz: 'Cyrus Lakdawala: 'So subtle is the ending, that both sides continue to commit inaccuracies. "

[After the precise 42...b4! 43.Kf2 Kh7 44.Nc4 Rf3+ 45.Kg2 b3 46.Nd2 Rc3! 47.Nxb3 *(*or *47.Kf2 Rb4! 48.Kg2 Rc2 49.Rxc2 bxc2* when there is no defence to the coming ...Rb1 *)* 47...Rb4 48.Raxa2 Rcxb3 we reach the winning ending for Black, covered in the notes to Black's 34th move, above.]

43.Kf2 Rga3 44.Rxb5 Kf7 EXERCISE (planning/critical decision): White has a choice of three candidate moves: a) 45 Ke2, sliding his king to a more central location. b) 45 Rxe5, a free pawn, so why not take it? c) 45 Rb2 dropping back for defence, and also threatening Nc4. This is a clear case for Darwinian natural selection. Which plan should we embrace and which should we allow to die? Kritz: 'Cyrus Lakdawala: 'EXERCISE (planning/critical decision): White has a choice of three candidate moves: a) 45 Ke2, sliding his king to a more central location. b) 45 Rxe5, a free pawn, so why not take it? c) 45 Rb2 dropping back for defence, and also threatening Nc4. This is a clear case for Darwinian natural selection. Which plan should we embrace and which should we allow to die? '' **45.Ke2?** The king steps on one of life's banana peels. He has no interest in reshaping his past, mainly since he isn't certain about his status concerning the statute of limitations. Kritz: 'Cyrus Lakdawala: '?' Cyrus Lakdawala: 'The king steps on one of life's banana peels. He has no interest in reshaping his past, mainly since he isn't certain about his status concerning the statute of limitations.''

[ANSWER: White holds the game after 45.Rb2! (it's crucial for White to tie Black's rooks down to a2) Kf6 46.Rc2! (intending Nc4!) Kg5 47.Nc4 Rh3 48.Kg2 Kf4 49.Raxa2 Rxa2 50.Rxa2 . White holds the draw, since Kxe4 is met with 51.Nd6+! Kf4 52.Ra4+ Kg5 53.Ne4+ Kf5 54.Ng3+ and Black can't make progress.]

[However, after 45.Rxe5? Rb4 46.Rc5 g3+ 47.Ke2 Rb2 (threat: ... g2! and ...g1Q) White is paralysed: for example, 48.Rcc1 Kf6 49.Rf1+ Ke5 50.Rf7 Rc3 51.Rxg7 Rcc2 52.Rd7 Rb1 , winning.]

45...Kf6?! The second best move. Kritz: 'Cyrus Lakdawala: '?!' Cyrus Lakdawala: 'The second best move.''

[Black wins with the immediate 45...Rh3! (this move renders White's intent inoperative) 46.Rb2 Rh2+! and everything loses. For example, 47.Ke3 *(*or *47.Ke1 g3 48.Raxa2 Rh1+ 49.Ke2 g2! 50.Nf3 Rxa2 51.Rxa2 g1Q!* (deflection) *52.Nxg1 Rh2+ 53.Kf3 Rxa2* and Black wins *)* 47...Ra3+! 48.Rb3 Rh3+ wins a piece.]

46.Kd1?! Now the connective tissue which held White's game together begins to decay. Indulging an old, negative propensity encourages new ones. White's king heads the wrong way. Naiditsch is so worried about Black's queenside passers, that he underestimates Black's passed g−pawn on the other side of the board. Kritz: 'Cyrus Lakdawala: '?!' Cyrus Lakdawala: 'Now the connective tissue which held White's game together begins to decay. Indulging an old, negative propensity encourages new ones. White's king heads the wrong way. Naiditsch is so worried about Black's queenside passers,

that he underestimates Black's passed g−pawn on the other side of the board. "
[White should back track with 46.Kf2! .]
46...Rh3! This move shears away a chunk of White's defences. Threat: ... Rh1+. When you set a trap for an opponent, you are the shopkeeper who fears his rich potential customer may walk out the door, without buying anything. Kritz: 'Cyrus Lakdawala: '!' Cyrus Lakdawala: 'This move shears away a chunk of White's defences. Threat: ...Rh1+. When you set a trap for an opponent, you are the shopkeeper who fears his rich potential customer may walk out the door, without buying anything. " **47.Kc2** So the king expended a lot of energy, to post himself on the wrong side of the board, which isn't much of an accomplishment, reminding us of the man who pumps his fists in the air and yells "Sweet!" when he wins a hand of solitaire. Kritz: 'Cyrus Lakdawala: 'So the king expended a lot of energy, to post himself on the wrong side of the board, which isn't much of an accomplishment, reminding us of the man who pumps his fists in the air and yells "Sweet!" when he wins a hand of solitaire. " **47...g3!** Reminding White that he needs to worry about the passer on the kingside as well. Black's ideas include ...g2 and also ...Rh2+, followed by ...Rd4. Kritz: 'Cyrus Lakdawala: '!' Cyrus Lakdawala: 'Reminding White that he needs to worry about the passer on the kingside as well. Black's ideas include ...g2 and also ...Rh2+, followed by ...Rd4. " **48.Rb3**
[48.Kb3 Rd4! 49.Nc4 g2+ 50.Kb4 Rh1 ends the game.]
48...Kg5 Endgame principle: the king is a fighting piece in the ending. Use it. The king's services are needed to help push forward the g−pawn's promotion agenda. Kritz: 'Cyrus Lakdawala: 'Endgame principle: the king is a fighting piece in the ending. Use it. The king's services are needed to help push forward the g−pawn's promotion agenda. " **49.Kb2** The king casts a furtive glance behind his back, to see if his enemies follow him. This fails, but I lack a constructive counterproposal. Kritz: 'Cyrus Lakdawala: 'The king casts a furtive glance behind his back, to see if his enemies follow him. This fails, but I lack a constructive counterproposal. "
[Houdini suggests 49.Rb7 g6 50.Nf3+ Kf6! 51.Rd7 g2 52.Ng1 Rc4+ 53.Kd1 Rb3! 54.Rxa2 Rb1+ 55.Ke2 Rxg1 56.Kf2 Rb1 57.Kxg2 Rxe4 with an easy win.]
49...Kg4 50.Rc3
[50.Rxa2 Rxa2+ 51.Kxa2 g2 52.Rb1 Rh1 ends the game.]
50...g2 51.Rcc1 Covering against ...Rh1. Kritz: 'Cyrus Lakdawala: 'Covering against ...Rh1." **51...Re3 52.Kc2 Kg3** The king continues to press forward, the way my insistently affectionate dogs demands attention when I'm busy working on this chess book. Kritz: 'Cyrus Lakdawala: 'The king continues to press forward, the way my insistently affectionate dogs demands attention when I'm busy working on this chess book. " **53.Kb2 Kf2** "I suggest you reflect well before you again dare to challenge my authority," Black's king warns his b2 brother. The king serves the function of the midwife, who assists in the birth of the g−pawn. Kritz: 'Cyrus

Lakdawala: '"I suggest you reflect well before you again dare to challenge my authority," Black's king warns his b2 brother. The king serves the function of the midwife, who assists in the birth of the g−pawn. " **54.Rc2 Re2**
White's most pessimistic fears have been exceeded and his position lies in ruins. There is no defence to the coming ...g1(Q). Kritz: 'Cyrus Lakdawala: 'White's most pessimistic fears have been exceeded and his position lies in ruins. There is no defence to the coming ...g1(Q)."

GBR corr 1890
[Fraser]

Myers: This is Game #48 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Bd6 11.d4 Qc7 12.f4 exf3 13.Nxf3 Bg4?!**

GBR corr 1890
[Fraser]

Myers: This is Game #47 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.a4 a6 6.c3 Nf6 7.d3 d6 8.0−0 0−0 9.Be3 Ba7 10.Qb3**

■ **Moman,A.**
23: Correspondence 2009
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.0−0?!
This popular move looks logical, but in fact it's a mistake. I must admit that at first I thought this move order was but a transposition to Game 24, and it took me quite some time to realize that it is nothing but an inferior move. But how

can that be? In the Berlin Ruy Lopez with the bishop on b5, this is the clear main move. The reason is simply connected to the move ...d7−d5 which is now very strong. **4...Nxe4!**

[We shouldn't treat the game as a Quiet Two Knight's; I'd like to avoid 4...Be7 5.d4! .]

5.Re1 Very popular at club level, but in fact, White is already clearly worse!

[I think White should play 5.Nc3 which transposes to Game 45.]

[5.d4 is the attempt to transpose to Game 24, and I have to admit that I've used this inferior move order myself in a few blitz games. However, after d5! this is a rather obvious possibility; *(5...exd4* would transpose to Game 24, but we can do better than that *)* 6.Bb5 exd4 7.Nxd4 Bd7 Black is up a clean pawn. White can hope to mix things up with his open e−file and Illescas Cordoba tried 8.Re1 Be7 9.c4! when Black shouldn't be greedy and should play 0−0! 10.cxd5 Nxd4 11.Bxd7 Qxd7 12.Rxe4 Nb5 . Black has a very comfortable positional advantage. The pawn on d5 is doomed to fall.]

[5.Qe2 is less popular than 5 Re1, but at least it doesn't weaken the f2−square. Still, after d5 6.Bb5 Bd6! *(6...Bg4* is more popular, but the text move looks better *)* 7.d3 Nf6 8.Nxe5 0−0! (the key move for Black; once again, he is able to sacrifice a pawn, at least temporarily, and obtain excellent compensation) 9.Bxc6 *(9.Nxc6 bxc6 10.Bxc6 Bxh2+!* gets the pawn back with strong pressure *)* 9...bxc6 10.Nxc6 Qd7 11.Nd4 c5 12.Nf3 Re8 Black will follow up with ...Bb7 and ...d4, with fantastic compensation. Few players could withstand such an attack.]

5...d5 6.Bb5 Bc5 In the 50 games in my database that reached this position, White scored just 11½ points. Indeed, he may very well already be lost. **7.d4**

[7.Re2?! defends f2, but Black crashes through anyway: Nxf2! 8.Rxf2 Bxf2+ 9.Kxf2 e4 with a crushing attack.]

7...exd4 8.Nxd4

[If 8.Nbd2 then 0−0! 9.Nxe4 dxe4 10.Rxe4 Qd5 when Black is a clear pawn up.]

8...0−0 9.Bxc6

[M.Kryuk−A.Popov, Raduzhny 2009, varied with 9.Nxc6 Bxf2+ 10.Kh1 Qh4 11.Rxe4 dxe4 12.Ne5 Bg3 13.Qg1 Bxe5 and White resigned. Very clean and convincing indeed.]

9...Nxf2! This shocking strike ends White's hopes of survival.

[Most players let this possibility slip and after 9...bxc6?! 10.Be3 Black is just a pawn up.]

10.Kxf2

[A correspondence game from back in 1951 went 10.Qd2 Ne4 11.Qd3 Qh4 12.g3 Nxg3 13.Bxd5 Bxd4+ 14.Be3 Nf5 15.Nc3 Nxe3 16.Rxe3 Qg5+ 17.Kh1 Qxe3 0−1, R.Moore−R. Newlander.]

10...Qf6+ White is helpless against all the threats. **11.Qf3**

[11.Ke3 bxc6 followed by ...Re8 should soon lead to mate.]

11...Bxd4+ 12.Kf1 bxc6 13.Qxf6 Ba6+ 14.Re2 gxf6 15.Nd2 Rae8 16.c4 dxc4 17.Nf3 Rxe2 18.Kxe2 c3+ 19.Kd1 cxb2 . Who would have thought that the innocent−looking 4 0−0 could

lead to such disaster?
0−1

■ **Demian,V..**
cr EEC Cup 2007
[Wei Ming]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3 Rb8 9.Bxc6+ Nxc6 10.Qxc6+ Nd7! 11.Nf3
[11.d3 was analyzed in the game Demian V, − Oprisor R cc EEC Cup 2007. In this game, the hunted became the hunter!]
11...Rb6!? Both 11..Bc5 and 11..Bb7 deserve serious consideration and interested readers will do well to look at Olimpiu Urcan & Marius Ceteras's article in NIC 86. **12.Qe4 Bb7 13.Qe2** From here onwards, some of the moves tend to look incredibly outlandish at first sight but this is not uncommon in correspondence chess where much deeper analysis has been conducted before selecting a move. **13...Be7!?**
[At first sight, I would have played 13...Rg6!? which looks really frightening for White to deal with. 14.Nc3! Needless to say, *(14.0−0* would have been over provocative: *Rxg2+! 15.Kxg2 Qg5+ 16.Kh1 Qg4−+)* 14...Bb4! Development is of the essence here. *(14...Rxg2* grabbing a pawn would have allowed White to exchange queens and relieve White of much of his pressure. *15.Nxe5 Nxe5 16.Qxe5+ Be7 17.Qb5+ Qd7 18.d4=)* 15.a3 Ba5 16.d3! Preparing Bd2 & 0−0−0. Black can do nothing to prevent this plan. Bxc3+ Deterring White from castling Queenside is likely the best course of action. *(16...Rxg2 17.Bd2 0−0 18.0−0−0 Qb6 19.Rdf1* and it is not easy to improve Black's position. *)* 17.bxc3 Rxg2 18.Rb1! *(18.Nxe5? 0−0 19.Nxd7 Qxd7 20.Be3 Rg6* is a dream position for Black.*; 18.Be3? Rg6 19.Rf1 0−0 20.Rb1 Bc6∓* This is the sort of position Black should strive towards in this variation. For a pawn, White's pieces are placed clumsily and he is denied any form of active counterplay at all. *)* 18...Ba8! *(18...Qc7?* would have allowed White to escape with *19.Nh4! Rxf2 20.Qxf2 Bxh1 21.Qg1!!* This is particularly difficult to calculate from move 19 and I would imagine OTB players to overlook this important resource in this position. *Qxc3+ 22.Bd2 Qc6 23.Qxg7* and out of nowhere, White has seized the initiative! *)* 19.Kf1! Rg6 20.Rg1 Rxg1+ *(*I imagine *20...0−0 21.Rxg6 fxg6!* could be an important improvement. To me at least, White's position looks really vulnerable but then again, I have not analyzed this position for hours which the CC exponents have undoubtedly done. *)* 21.Nxg1 0−0⩲ with compensation is an appropriate evaluation of the position but White is able to conjure some active play in the next few moves. 22.c4! Bc6 23.Qe3
A) I prefer 23...f5 24.Qxa7 Qe8 with the idea of Qg6 25.Qc7 *(25.f3 e4!)* 25...Qg6 26.f3 h6! and I real ly like Black's chances

here though I admit Black is taking his fair share of risks.;
B) 23...e4!? I didn't understand this initially until I realized Black can displace White's queen from the e3 square and open the h1−a8 diagonal. 24.d4 Nb6! 25.c5 Nc4 26.Qc3 Qd5 27.Be3 f5 28.Nh3! Of course, 28..f4 must be stopped. g5! From what I see, this leads to a forced draw but there is no better move anyway. Black can hardly improve the position of his pieces! 29.Nxg5 f4
B1) Urcan & Ceteras analyzed 30.Bxf4 Rxf4 31.Rb8+ Kg7 32.Qg3! Ne3+ 33.Qxe3 Qxg5 34.c4! Qf6 35.Qg3+ *(35.d5?? Rf3!* Wei Ming *)* 35...Kh6 36.Qh3+ Kg7 37.Qg3+= and a draw by perpetual.;
B2) 30.Bxf4! and a draw was agreed in Mathe−Taras, cr EEC Cup 2007]

14.d3 0−0 15.0−0 f5 For a coup le of pawns, Black is way ahead of development and already successfully "rook lifted"! Needless to say, Black has a very dangerous initiative which is ideal for hackers. **16.Nbd2** Reinforcing the f3 knight but reducing the c1 bishop to a mere spectator over the critical phase of the game.

[16.Nc3 can be met by the logical Qa8! targeting the f3 knight and g2 pawn. 17.Rd1 Rg6 18.Kh1 Rff6! Isn't this a wonderful position? Black threatens 19.. Rxg2, thus forcing White's weakening reply.
A) 19.d4? exd4 20.Rxd4 Re6! 21.Be3 *(21.Qd1 Bxf3 22.gxf3 Qxf3+ 23.Qxf3 Re1#)* 21...Ne5!−+;
B) 19.h4□ h6!? *(19...Re6!?* with the idea 20..Rg4 also looks sensible. *)* 20.d4
B1) 20...Rxg2 21.Kxg2 Rg6+ 22.Bg5 hxg5 23.h5 *(23.Qc4+!? Kh7 24.d5 gxh4+ 25.Kh3 e4* with an absolute mess! *)* 23...Rh6 24.d5 reveals the point of 20.d4 but even this looks good for Black after g4 25.Ne1 *(25.Nxe5?? Re6!)* 25...Rxh5;
B2) 20...exd4 21.Rxd4 Re6 22.Be3 Ne5 *(22...Rxg2 23.Kxg2 Ne5 24.Rf4* and White is hanging on, albeit by a thread. *)* 23.Nxe5 Rxe5 24.Rg1 *(24.f3 Rge6! 25.Nd1 Bc5* wins the exchange. *)* 24...Bxg2+ 25.Kh2 Bc5! 26.h5! Bxd4 27.hxg6 Rxe3! 28.Qc4+ Kh8 29.Rxg2 Be5+ 30.f4 Bxc3 31.bxc3 Qd8!∓ It is really easy to get carried away while analyzing these wild positions. In fact, I am pretty sure none of these will ever appear in any of your games but I've included all these analysis to demonstrate some of the tactical ideas that can surface in the middlegame.]

[16.Nxe5? falls victim to the vicious Re6! 17.d4 *(17.f4 Nxe5 18.fxe5 Bc5+ 19.Kh1 Rg6−+)* 17...Nxe5 18.dxe5 Qd5 19.f3 Rxe5 with a continuous attack.]

16...Rg6 17.Rd1

[17.Nc4 activating the knight, and preparing Na5! after a subsequent.. Qa8 is played is also plausible Qa8 18.Kh1
A) Urcan & Ceteras correctly

pointed out 18...Rff6!→
as a stronger alternative but did not suggest any sample variations. For example, 19.Na5! Bd5 20.c4 Bxf3 *(20...e4!? 21.cxd5 exf3 22.Qxf3 Ne5 23.Qd1 Qxd5 24.Qb3!)* 21.Qxf3 *(21.gxf3 Bb4! 22.Nb3 a5 23.a3 Bd6⩱)* 21...Qxf3 22.gxf3 Nc5 23.Rd1 e4! 24.dxe4 fxe4 25.f4 Nd3 26.Be3 Bd6⩱;
B) 18...e4? 19.dxe4 fxe4 20.Nd4! *(20.Ne1? Ba6 21.Be3 Ne5∓* Krivokapic−Somborski, Budapest 2007 *)* 20...Ba6 21.a4 Ne5 22.Nb5±]

17...Qc7 calmly developing his queen and attacking the c2 pawn. **18.c3**

[18.Nc4 can be met by e4! where a sample variation can continue: 19.dxe4 fxe4 20.Nd4 Ba6 21.b3 Ne5 22.g3 Bc5! 23.c3 *(23.Be3 Bxd4 24.Rxd4 Nf3+ 25.Kg2 Nxd4 26.Bxd4 e3!* ensures White doesn't get sufficient compensation. *27.Qxe3 Bb7+ 28.Kf1 Qc8* and the attack continues *)*]

18...Ba6!⩱ 19.c4 Bb7! An astounding tempo−sacrificing 2 mover. Black reckons it is important to rule 19.Nc4 one and for all before continuing his attack on the kingside. In fact, a cursory glance at the position will reveal how difficult it is for White to unravel his queenside without a compromise of his position. **20.Nf1**

[20.Nb3 is another way to get his bishop out but the knight on b3 would not be contributing to anything important. e4 21.g3 *(21.Nfd4? Rxg2+−+; 21.dxe4 fxe4 22.Nfd4 Ne5→)* 21...Nc5 22.dxe4 Nxe4
A) 23.Be3? f4−+;
B) 23.Nbd4 f4!−+;
C) 23.Bd2 f4 24.Be1 *(24.Ba5 Qb8 25.Be1 fxg3 26.fxg3 Nxg3−+)* 24...fxg3 25.fxg3 Nxg3 *(25...Bc5+ 26.Nxc5 Qxc5+ 27.Bf2 Nxf2* also wins. *)* 26.Bxg3 Rxg3+ 27.hxg3 Rxf3;
D) 23.Kf1 Bd6 with relentless pressure.]

[20.b3! is probably the best option at this juncture. Bf6 21.Ba3 *(21.Bb2? e4−+)* 21...Re8 22.Rac1 e4 *(22...Re6!?* another rook lift! *23.c5! Bd5! 24.Nc4 Qc6* is an extremely complicated position. *)* 23.dxe4 fxe4 24.Ne1 *(24.g3?* is met by a strong tactic *Be7!! 25.Bxe7 exf3 26.Qe3 Nf8−+)* 24...Bg5→ and Black's attack is not done yet though at the very least, White's pieces no longer look as awkward as they did a few moves earlier!]

20...f4! With a concrete idea in mind. In general, I would not have conceded the e4 square this easily if there is nothing specific in return. **21.N1d2 Nc5 22.Ne4 Qc8!** Transferring the queen to the kingside with an irresistible attack was the key idea prepared a couple of moves ago. As Urcan & Ceteras pointed out, there is almost no defence after this tremendous manoeuvre. White is forced to sacrifice his queen to diffuse the attack temporarily. **23.Nxe5**

The alternatives loses by force:

[23.Kh1 Nxd3!! 24.Rxd3 *(24.Qxd3 Rd8 25.Qf1 Rxd1 26.Qxd1 Bxe4−+)* 24...Qg4! 25.Neg5 *(25.Ng3 fxg3 26.hxg3 e4−+)* 25...Rxg5 26.Qf1 e4!−+]

[23.Kf1 Qg4 24.Ne1 f3!−+]

23...f3! 24.Nxg6

[24.Nxf3 Nxe4 25.dxe4 Qg4−+]
24...fxe2 25.Nxe7+ Kh8 26.Re1
White only has a piece and rook for Black's queen and has to deal with Black's continuing attack. The game is effectively over. **26...Qg4 27.h3 Qh4 28.Bg5 Qh5 29.Be3 Nxe4 30.dxe4 Bxe4 31.Nd5 Qg6 32.Rxe2**
Probably a joke to finish the game.
[32.g3 Qh5 33.Nc3 Bf3 34.h4 Qg4 35.Kh2 Rf5 36.Nd5 g5−+]
32...Qxg2# This game had been a massacre but I think it successfully illustrated the many tactical pitfalls awaiting White after the greedy 9.Bxc6?! In summary, the Colman Variation promises dynamic play and is definitely a lot of fun for the second player.
0−1

□ **Chigorin,M.**
■ **Lasker,Emanuel**
43: St Petersburg (3) 1895
[Garry Kasparov]

Christoph Scheerer: 'The End of an Era − The Lasker Defence: In the aftermath of the monumental matches between McDonnell and de la Bourdonnais, the Evans Gambit became pretty popular and was taken up by many leading masters of the 19th Century. These famous players, including Paul Morphy, Adolf Anderssen, Howard Staunton, Joseph Henry Blackburne, William Steinitz and, probably the strongest advocate of all, Mikhail Chigorin, produced many beautiful victories with it. However, it was left to Emanuel Lasker to cast a spell over the Evans Gambit:'
1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5
[For putting the following idea into practice, 5...Ba5! is more accurate.]
6.0−0 Christoph Scheerer: '?!'
[6.d4! . exd4 7.cxd4 Bb6 *(7...Bb4+ 8.Nbd2* is nothing White has to fear as *Bc3?! 9.Bxf7+ Kf8 10.Ba3+ d6 11.Bb3! Bxa1 12.Qxa1* gives him a great attacking position for the sacrificed exchange *)* 8.0−0 d6 we have arrived at the so−called 'Normal Position', which was another opening tabiya for the 19th Century, being played in hundreds of games. Let's have a short look at the different branches:

A) 9.Nc3 is Morphy's move, but only good for a draw at best after Na5 10.Bg5 Ne7 *(*also good is *10...f6 11.Bf4 Ne7! 12.h3 Ng6 13.Bg3 Nxc4 14.Qa4+ Qd7 15.Qxc4 Qf7 16.Nd5 0−0)* 11.Nd5 f6 12.Bxf6 gxf6 13.Nxf6+ Kf8 14.Ng5 Nxc4 15.Qh5 *(*or *15.Qf3 Bxd4!* and White has nothing better than *16.Qh5 Kg7 17.Qf7+* with a draw by perpetual check *)* 15...Kg7 16.Qf7+ Kh6 17.Qh5+ *(17.Ng4+? Bxg4 18.Qf6+ Ng6 19.Nf7+ Kh5 20.Nxd8 Raxd8* gives Black too much material for the queen *)* 17...Kg7 18.Qf7+ .;
B) 9.d5 was long favoured by Anderssen, but has ultimately failed to stand the test of time: Na5! *(*both *9...Qf6 10.dxc6! Qxa1 11.Qb3 Qf6 12.e5;* and *9...Ne5 10.Nxe5 dxe5 11.Ba3! Bd4 12.Nd2 Bxa1 13.Qxa1* are two powerful exchange sacrifices known to lead to a strong white initiative *)* 10.e5 *(10.Bb2 Ne7 11.Bd3 0−0 12.Nc3 Ng6 13.Ne2 c5 14.Qd2 f6 15.Kh1 Bc7 16.Ng3 Rb8 17.Nf5* was played in A.Anderssen−J.Zukertort, Berlin 1868, and after *Bxf5 18.exf5 Ne5 19.Nxe5 dxe5 20.Rac1 b6!* , intending ...Na5−b7−d6, Black obtains a very solid position *)* 10...Nxc4 11.Qa4+ Bd7 12.Qxc4 Ne7 13.Re1!? *(13.e6 fxe6 14.dxe6 Bc6 15.Ng5 0−0 16.Qc2 Ng6 17.h4 Qf6 18.Bb2 Qf4* is better for Black, as analysed by Maróczy *)* 13...0−0 *(13...dxe5?! 14.Rxe5 0−0 15.Bg5 Re8 16.Nc3* gives White rather good compensation *)* 14.Bg5 f6 15.exf6 gxf6 16.Bh6 Re8 17.Nbd2 Ng6 18.Ne4 Qe7 and White's compensation is not entirely clear.;
C) 9.Bb2!? seems to be the most flexible. After Na5 *(*alternatively, *9...Nf6?! 10.Nbd2 0−0 11.e5* is very uncomfortable for Black,*;* while *9...Bg4 10.Nbd2* is similar to the text *)* 10.Bd3 Ne7 11.Nbd2 White has good chances to initiate play on the kingside according to Rohde, even though practical tests are still missing.;
D) 9.−−]

6...d6 7.d4 Bb6! The value of this move, which was tried back in one of the match games McDonnell−La Bourdonnais (London 1834/35), went unnoticed until Lasker played it. Christoph Scheerer: 'This move had already been played by de la Bourdonnais, as we have seen, but it was widely ignored by the leading opening treatises of the time: neither 'The American Supplement to the Sypnosis of Chess Openings' (1885) nor G.H.D.Gossip's 'Theory of the Chess Openings' (1891) mention it. The only reference I could find was in the 'Lehrbuch des Schachspiels' (1894), and even there it is confined to just a small note. It was only due to Lasker that the move became established in general opening theory, and is known today as the Lasker Defence. Note, however, that nowadays this position normally comes about via the move order 5...Ba5 6 0−0 d6 7 d4 Bb6.' Rogozenco,Dorian: 'Lasker played this line several times and in some theoretical books the variation is named Lasker defence.

However, it was first played in 1834 by Louis Charles De Labourdonnais. Rogozenco,D: 'Lasker played this line several times and in some theoretical books the variation is named after his name. However, it was first played in 1834 by Louis Charles De Labourdonnais.'' **8.a4** Christoph Scheerer: '?!' Christoph Scheerer: 'First successfully employed by Blackburne in a simul game in 1875, this move is dubious at best. Over the years, many moves have been tried to get a good game against the Lasker Defence.' Rogozenco,Dorian: '?' Rogozenco, Dorian: 'It is amazing that Chigorin played this move in three games and scored no points at all. 8. a4? was first played by Joseph Henry Blackburne in 1875, when he won easily in a simul game. It took almost 30 years to realize that 8.a4? is simply waste of time and Black is better after that.'

[Alas, Mikhail Ivanovich avoids the current Christoph Scheerer: 'The main alternative is' 8.dxe5 (in the 20th century 8 Ba3 and 8 h3 were also played) Rogozenco,Dorian: 'Much better than the text, although Black is doing fine after that too.' dxe5! Christoph Scheerer: ', which been rejected by de la Bourdonnais, but it turns out that Black has no problems at all:' *(8...Bg4* Rogozenco, Dorian: '!?' Rogozenco,Dorian: 'The modern theory considers 8. ... dxe5 enough for equality.' *9.Bb5 Bxf3 10.Qxf3 dxe5 11.Qg3 Qf6 12.Bg5 Qe6 13.Na3 Nf6 14.Bxf6 gxf6 15.Rad1 Bc5 16.Qg7↑* 1−0 McDonnell,A−De Labourdonnais, L/London 1834 (34)*; 8...Be6;* and *8...Nge7* , which have also occurred, are less natural *)*

A) 9.Qxd8+ Nxd8 10.Nxe5 Be6 , and in view of the weakness of White's queenside pawns, Black has a favourable endgame (Chigorin−Pillsbury, London 1899) 11.Nd2 Ne7 12.Ba3 f6 13.Nd3 Ng6 14.Rab1 Kf7 and Black converted his endgame advantage in M.Chigorin−H.Pillsbury, London 1899.;

B) 9.Qb3 Christoph Scheerer: '!?' Qf6 *(9...Qe7!?* Christoph Scheerer: ', with the idea of' *10.Ba3 Qf6* Christoph Scheerer: ', is an idea of Alapin's that has only occurred a few times' *)*

B1) 10.Rd1 h6!?;

B2) 10.Bb5 h6 *(*or *10...Be6 11.Qa4 Bd7)*;

B3) 10.Bg5 Qg6 11.Bd5 *(11.Bb5 f6 12.Bh4 Nge7* etc. *)* 11...Nge7 *(11...f6!? 12.Bxg8 Na5 13.Nxe5 fxe5 14.Qd5 Nc6* is unclear Christoph Scheerer: 'is unclear according to Kasparov' *)* 12.Bxe7 Kxe7 13.Bxc6 *(13.a4?! Na5 14.Qa3+ Qd6 15.Nxe5? Bc5!* wins for Black *)* 13...Qxc6 14.Nxe5 Qe6 15.Nc4 *(*inferior is Christoph Scheerer: 'inferior are' *15.Nd3 Qxb3 16.axb3 Rd8 17.Nf4 c6* Christoph Scheerer: ', G.Vicente Haro−G.Flear, Castellar 1996,'*;* or Christoph Scheerer: 'and' *15.Qa3+ Qd6! 16.Qxd6+ cxd6* Christoph Scheerer: ', as in M. Ebeling−Y.Rantanen, Jyvaskyla 1987, with an endgame edge for Black in both cases' *)* . Regarding

this, the main variation of the defence, the two players conducted a lively dispute on the pages of the magazines that they edited. Chigorin believed in White's attacking resources, whereas Lasker considered that Black's two bishops and the absence of any weaknesses in his position promised him the advantage - for example, after 15...Rd8 *(*, and now Rohde recommends *15...Bd7 16.Nbd2 Rhd8 17.Kh1 Qc6 18.f4 Qa4* with a slight edge for Black. *)* 16.Qa3+ Ke8 .;

C) 9.Nbd2 Qf6 10.Bd5 Nge7 is unfavourable for White Christoph Scheerer: 'is unfavourable for White.';

D) , and 9.Bxf7+? Kxf7 10.Nxe5+ Ke8! 11.Qh5+ g6 12.Nxg6 Nf6 etc. is altogether incorrect. 13.Qh6 Rg8 14.Nf4 and now Ne5 'nips White's attack in the bud' (Lasker).;

□ **Koivumaki,Marko**
■ **De Jongh,Henk**
TGT 11.01 16.09.1998
[de Jongh]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5 5.Nxf7 Bxf2+ 6.Kf1 Qe7 7.Nxh8 d5 8.Be2 Bb6 End of theory for me. Marko told me he had several games where White did OK. However most of these games continued with 8...Bh4.
9.d3!? Seeing that white intended Bh5+ after all, i think he had better played exd5 first. Black probably hasnt time to capture on d5 for some time. This means that he cannot put his bishop on e6, as in the game. Another idea is to play Bh5+ forcing the king to f8. With b3 white can force the exchange of bishops

because of the threat Ba3.
[9.exd5 Qc5!?
A) 10.Bh5+ Kf8 11.Qf3 *(11.Qe1 Nd4!?)* 11...Nd4 12.Qf2!? *(12.Qd1!? Qxc2! 13.Nc3 Qf5+ 14.Bf3 Qd3+ 15.Be2! Qf5+=)* 12...Nxc2 13.Qxc5+ Bxc5 14.b4 Bd4 15.Nc3 Nxa1 16.Bf3 Kg8∓;

□ **Comp. Fritz 6**
■ **Anand,V.**
Man vs. Machine, Frankfurt (rapid) 1999
[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.d4 This game has a slightly unusual move order.
[Normally we reach the position at move 3.Bc4 Bc5 4.c3 Nf6
A) . By the way, 5 d4 is the most logical move here, since 5.0−0 leaves White struggling to make sense of his position after the equalising Nxe4 . *(5...−−)*;
B) . And 5.b4 does not look right either, as it leads to a position from the Evans Gambit, which is not particularly good for White.;
C) . This leaves only 5.d3 as a serious alternative, which is of practical value, though not really dangerous for Black. We will examine this move in the next chapter.;
D) 5.d4 .]
3...exd4 4.Bc4 Bc5 5.c3 Nf6
These lines might look very sharp and dangerous, but the reality is that the forcing nature of the position quite often leads them into a draw... **6.cxd4 Bb4+**
This check is highly logical, and other moves are simply bad. This check is highly logical, and other moves are simply bad. The main position. White has two sensible moves here.
[For example: 6...Bb6? 7.d5 Ne7 8.e5 Ng4 9.d6 cxd6 10.exd6 Nc6 11.Bg5 Nf6 12.0−0 and White is much better.]
The main position. White has two sensible moves here. **7.Nc3?!**
Objectively speaking, this move is weak; but then objectivity has little to do with the ways of the world, who is elected president in the US, who is selected for junior tournaments, and how an egg should be prepared... 7 Nc3 is dangerous in practice, if Black is not well prepared for it.
[White's second option, 7.Kf1?! , is known as the Krakow Variation. In 1909, chess players from Krakow played a thematic tournament in this line, investigating White's attacking chances. Now we know that 7 Kf1 is somewhat dubious, and that with logical play Black should be able to get a good opening. Let's look at two typical options:
A) 7...Nxe4?! might seem tempting, but all White's play is based on this over−optimistic move. Taking the pawn is unnecessarily risky, and probably even plain bad. White can now seize the initiative by simple means: 8.d5 Ne7 9.Qd4 Nf6 10.Bg5 Ng6 11.Nbd2 h6 12.Re1+

Kf8 13.Bd3 Be7? *(*though *13...Bxd2 14.Bxd2* with a clear advantage to White was not particularly attractive either *)* 14.Bxg6! hxg5 15.Ne5 and White was winning in F.Marshall−A.Burn, Ostend 1905.;

B) . The logical reaction so often in these classical positions is to strike in the centre. Here 7...d5! 8.exd5 Nxd5 is at least slightly better for Black. e.g. 9.Nc3 Be6 10.Qe2 Bxc3 11.bxc3 Nxc3 12.Qe1 Nd5 13.Ba3 a6 14.Rc1 Qd7 and the two bishops are insufficient compensation for the pawn, Bartmansky−Batik, correspondence 1910.;

C) 7...−−]

7...Nxe4 8.0−0 Bxc3 Black needs to go directly for a refutation of the Möller, or he will quickly end up in trouble.

[Here 8...0−0? is weak because of 9.d5 Bxc3 10.bxc3 Ne7 11.Re1 Nf6 12.d6! and White is much better.]

[8...Nxc3 is possible though, and then 9.bxc3 leaves us with a branching:

A) 9...Bxc3 10.Ba3! d5! *(*but not *10...d6? 11.Rc1 Ba5 12.Qa4 a6 13.Bd5 Bb6 14.Rxc6! Bd7 15.Re1+ Kf8 16.Rxd6* and White wins according to Keres;*;* or if *10...Qf6?! 11.Rc1 Bb4 12.Bxb4 Nxb4 13.Re1+ Kd8 14.Qd2* and White is just better *)* 11.Bb5 Bxa1 12.Re1+ Be6 13.Qa4 Rc8 14.Ne5 *(*White can easily go wrong here, e.g. *14.Rxe6+? fxe6 15.Ne5 Qd6! 16.Bxc6+ bxc6 17.Bxd6 cxd6 18.Nxc6 Rc7* and Black wins,*;* while after *14.Rxa1?! f6!* White has problems to prove compensation *)* 14...Qf6 15.Bxc6+ *(*if *15.Rxa1 Bd7 16.Re1 Kd8 17.Nxc6+ bxc6 18.Be7+ Qxe7 19.Rxe7 Kxe7 20.Bxc6 Bxc6 21.Qxc6* and White must now fight for a draw *)* 15...bxc6 16.Nxc6 Bc3 17.Nxa7+ Kd8 18.Nc6+ with perpetual check.;

B) 9...d5! is even simpler. After 10.cxb4 dxc4 11.Re1+ Ne7 12.Qe2 Be6 13.Bg5 Qd5 *(13...c6 14.Ne5 Qd5 15.Bxe7 Kxe7 16.Nxc4* gives White compensation for the pawn *)* 14.Bxe7 Kxe7 15.Qc2 f6 16.Ng5! (White must play energetically to keep the balance) fxg5 17.Re5 Qxd4 18.Rae1 Rae8 19.Rxe6+ Kd7 20.Rd1 Qxd1+ 21.Qxd1+ Kxe6 22.Qg4+ Kf6 23.h4 gxh4 24.Qxh4+ Kg6 25.Qg4+ Kf6 26.Qf4+ Kg6 with a draw in O. Gadia−J.De Souza Mendes, Brazilian Championship 1961.;

C) 9...−−]

9.d5!? This is Möller's idea; invented in 1898.

[After the rather pointless 9.bxc3?! d5 Black has a perfect game. Against Lasker, in their 1896 return match, Steinitz tried to play without pieces. He also played without any hint of success or indication that he was a World Champion. Of course he was also in the later part of his life and surely without the energy of his younger years. The game continued 10.Ba3? dxc4 11.Re1 f5 12.Nd2 Kf7 13.Nxe4 fxe4 14.Rxe4 Qf6 and White does not have any form of compensation for the piece, W. Steinitz−Em.Lasker, Moscow match

1896.]

9...Ne5

[This variation is not as well known in the West as 9...Bf6 (as seen in the next game). Nevertheless, it is quite safe and gives Black a very slight edge without any risk at all. For those happy with a superior position as Black within the first ten moves, and who does not necessarily have to refute their opponent's madness, this is a very safe choice.]

[9...Ne7? looks safe as well, but it only takes a few moves to shatter the illusion. After 10.bxc3 0−0 11.Re1 Nf6 12.d6 cxd6 13.Ba3 White's attack is very strong.]

[9...Ba5 is also playable, though not as good as the text move. Now 10.dxc6 bxc6 11.Ne5 Nd6 gives us two interesting options:

A) 12.Qg4!? Qf6 13.b4

A1) 13...Nxc4 14.Nxc4 Bxb4 *(*not *14...Qxa1?? 15.Re1+ Kf8 16.Qe2* and White wins *)* 15.Bb2 transposes;

A2) 13...Bxb4 14.Bb2 Nxc4 15.Nxc4 transposes Qg6 16.Rfe1+ and, according to Möller, White has a promising attack. The analysis could continue Kf8 17.Qh4 f6 18.Ne5 fxe5 19.Qxb4+ d6 20.Rxe5 c5 21.Qb3 Qf7 22.Re3 Qxb3 23.axb3 and White has compensation enough for draw, but hardly anything more.;

B) . The simple exchange 12.Nxf7!? Nxf7 13.Bxf7+ Kxf7 14.Qh5+ Kg8 15.Qxa5 is more interesting. In my opinion, White has some advantage here. Black has a pawn more, but also problems with his king's position, while the opposite−coloured bishops should help facilitate an attack.;

C) 12.−−]

10.bxc3 Nxc4 11.Qd4 0−0

Anand probably felt little doubt in the practicality of this move. Black is safely developed and White's initiative is already stalling.

[After 11...Ncd6? Black would be made suffer for his greed with the surprising sequence 12.Qxg7 Qf6 13.Qxf6! (Black's extra piece is doing little in the defence) Nxf6 14.Re1+ Nfe4 *(14...Kf8? 15.Bh6+ Kg8 16.Re5 Nfe4 17.Re1* and White wins *)* 15.Nd2 f5 16.f3 0−0 17.fxe4 Nxe4 18.Nxe4 fxe4 19.Rxe4 and White is at least slightly better here.]

[However, Black can choose which knight White can take by protecting the better placed of the two. I firmly believe that 11...f5! is the best way forward. Now play could continue 12.Qxc4 d6 13.Nd4 0−0 14.f3 Nc5 15.Ba3 b6 16.Bxc5 bxc5 17.Nc6 Qf6 18.Rfe1 Bd7 19.Re7 Rf7 20.Rae1 Rxe7 21.Rxe7 Rd8! and Black is for preference.]

12.Qxe4 Nd6

[This is stronger than 12...b5?! when White can play , when White can play 13.a4 c6 14.dxc6 d5 15.Qd3 bxa4 16.Ng5 with the initiative.]

13.Qd3 b6 14.Ba3 Qf6 15.Qd4

White has probably enough compensation to make a draw, but he (it!) will also have to prove it in practice, something computers can have great

difficulties doing in this kind of position.
[Instead after 15.Rfe1 Bb7 16.Ne5 Rad8 17.Ng4 Qf4 18.Ne5 Rfe8 19.Bxd6 cxd6 20.Nf3 Rc8 Black is slightly better.]
15...Qxd4 16.Nxd4 Bb7 17.Bxd6 cxd6 18.Nf5 g6 19.Nxd6 Bxd5 20.Rfe1 Be6 21.f4 a6 22.a4 Ra7 23.Reb1 White is unable to build a fortress. But even if he was, this is a dark spot for computers, which do not understand the concept of fortresses at all, as their horizon are too short. They cannot understand that no improvements can be made to the position, ever, as they cling to what they can calculate.
[After 23.Rab1?! Rb8 24.c4 Rc7 25.Re4 Rc5 26.Kf2 Kf8 27.Rd4 the conquest of the fortress is easy: Ke7 28.Ke3 Bd5! 29.Rxd5 Rxd5 30.cxd5 Kxd6 and Black will win this ending with the passed pawn and good position of his rook.]
23...Rb8 24.a5? The computer can see that he will win back his pawn in the short term; but the grandmaster understands that, in the long term, Black will activate his rook, when the white position is beyond salvation.
[After the stronger 24.c4 Rc7 25.a5 Rc6 26.Rxb6 Rbxb6 27.axb6 Rxb6 28.c5 Rc6 29.Ra5 White would have kept good drawing chances.]
24...b5 25.c4 b4 26.Ra4 b3 27.Ra3 Rc7 28.Raxb3 Rxb3 29.Rxb3 Rc5 30.Nb7?! Now the white pieces will be lost in the far corner of the board.
[Instead 30.Kf2 would have offered more resistance. Rxa5 should be enough to win for Black, but only after a hard fight.]
30...Rxc4 31.Rb6 Rc2 32.Nd6 Kf8 33.Rxa6 Bd5! The a−pawn is nothing but a dissident under state control. **34.g3 Rg2+ 35.Kf1 Rxh2 36.Ra7**
[36.Rb6 Ra2 37.a6 Ke7 and Black wins as the a−pawn cannot escape.]
36...Bc6 37.Nc8 Rg2 38.Nb6 Rxg3 39.Nxd7+ Bxd7 40.Rxd7 Ra3 41.Ra7 Rf3+ 42.Kg2 Rxf4 43.a6 Ra4 44.Ra8+ Kg7 45.Kh2 h5 0−1

■ **Sokolov,I.**
Bled/Rogatska Slatina 1991
[Nigel Davies]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1 Preventing ...d6−d5 whilst playing a useful move. Once again we must resist the temptation to try and sacrifice a pawn, but the good news is that there are other active plans available. **6...d6 7.a4**

[After 7.a3 Black can again play Kh8 . For example, 8.Bg5 h6 9.Bh4 Nh5 10.Bxe7 *(10.Nxe5?? Nxe5 11.Bxe7 Qxe7 12.Qxh5 Bg4* , winning White's queen *)* 10...Qxe7 11.Nc3 Nf4 12.Nd5 Nxd5 13.Bxd5 Bg4 14.h3 Bh5 15.c3 Nd8 16.d4 exd4 17.cxd4 c6 18.Bc4 Ne6 and the pin on the f3−knight was causing White some problems in Kuijf−Nunn, Wijk aan Zee 1990.]

7...Kh8!? With the simple plan of moving the knight from f6 (to g4 or g8) and then pushing the f−pawn. **8.c3**

Other possibilities are as follows:

[8.a5 a6 9.Nbd2 *(9.Nc3* and9 c3seem to be well met by9...Bg4, the latter being analogous to the main line *)* 9...Ng8 10.c3 f5 11.Qb3 Bf6 *(11...g5!?* is worth considering *)* 12.exf5 Nge7 13.Be6 Nxf5 14.Ne4 was played in Le Roux−Fressinet, Paris 2006, and now Bxe6 15.Qxe6 Nh4 would have been at least equal for Black.]

[8.Nc3 Bg4 9.h3 Bh5 10.Be3 was Ivanchuk−Bacrot, Moscow 2005. Here Nb4 looks like a good idea, threatening to mangle White's kingside pawns by capturing on f3. After 11.g4 Bg6 12.Nh4 c6 Black stands well.]

[8.h3 Ng8 9.d4 and now Black gets in his desired pawn break with *(9.Nc3 f5 10.Nd5* looks okay for Black after, say, *Bf6)* 9...f5 . V.Malakhov−B. Predojevic, Sarajevo 2006, continued 10.dxe5 fxe4 11.Rxe4 *(11.exd6 exf3 12.dxe7 Qxd1 13.Rxd1 Ngxe7* would be equal *)* 11...Rxf3 12.gxf3 , and now just Nxe5 would have given

Black good compensation for the exchange.]

8...Bg4

[8...Ng8 is also not bad; for example:

A) 9.a5 a6 10.d4 *(10.Qb3 f5 11.exf5 Rxf5 12.Nbd2 Nf6 13.Be6 Bxe6 14.Qxe6 Qd7* was fine for Black in Tkachiev−Fressinet, Cap d'Agde 2002 *)* 10...f5 *(10...Bg4 11.d5 Nb8 12.Nbd2?! Bg5 13.Qb3 Bxf3 14.Nxf3 Bxc1 15.Raxc1 Nd7! 16.Qxb7? Rb8 17.Qc6* was played in Macieja−L. Johannessen, Bermuda 2002, and now *Nc5* threatening 18...Ne7 would have been strong *)* 11.dxe5 fxe4 12.Rxe4 Bf5 *(12...Rxf3 13.gxf3* was tried in K.Maslak−Radulski, Olomouc 2005, and here simply *Nxe5* would have been best, when Black has compensation *)* 13.Re1 Nxe5 14.Nxe5 dxe5 15.Be3 *(15.Qe2* was played in Macieja−Bauer, Rethymnon 2003, and now *Bd6* followed by 16...Nf6 looks fine *)* 15...Qe8 16.Nd2 Nf6 17.Qb3 Bd6 18.Nf1 Qg6 19.Ng3 Bc2 20.Qxb7 h5 and Black enjoyed a strong initiative in Vlassov−Kuzmin, St Petersburg 1995.;

B) 9.d4 Bg4 10.dxe5 *(10.d5 Nb8 11.h3 Bxf3 12.Qxf3 Bg5 13.a5 a6 14.Nd2 Ne7 15.Qh5 f6 16.Bd3* was a bit better for White in A. Fedorov−D.Blagojevic, Jahorina 2003 *)* 10...Nxe5 *(10...dxe5 11.Nbd2 Bd6 12.a5* would be slightly better for White *)* 11.Be2 Bxf3 12.Bxf3 Bg5 13.Be2 Bxc1 14.Qxc1 Qh4 15.Nd2 Rae8 16.Qc2 *(16.g3 Qh3 17.f4 Ng4 18.Bxg4 Qxg4 19.Qd1 Qh3* gave Black counterplay in Felgaer−Hebden, Port Erin 2002 *)* 16...Nh6 17.Nf3 Nxf3+ 18.Bxf3 Ng4 19.Bxg4 Qxg4 was equal and agreed drawn at this point in Ju. Armas−Hebden, French League 1991.]

9.h3 Bh5 10.Nbd2

[10.a5 Rb8 11.Nbd2 *(11.a6* is answered by *b5)* 11...d5 12.exd5 Nxd5 13.Ne4 f6 was fairly level in V. Spasov−Mozetic, Jagodina 1994.]

10...d5 11.exd5

[11.Bb3 is not a silly move. Black should probably just reply dxe4 12.dxe4 Bc5 with equality.]

11...Nxd5 12.Nf1 f5! 13.Ng3 Bg6 14.Nxe5

[After 14.Bb5 f4 15.Nf1 Bd6 16.Bxc6 bxc6 17.Nxe5 Bxe5 18.Rxe5 f3 Black would break up White's queenside and get good compensation.]

14...Nxe5 15.Rxe5 Nb6 16.Qf3 f4 17.Nf1

[Had White played 17.Ne4?! his rook on e5 would have been embarrassed by Nd7! 18.Rd5 c6 19.Rd4 Ne5 , for if 20.Qxf4? *(20.Qd1* is better, but still quite good for Black after *Qc7* intending 21... ♖ae8. *)* 20...Rxf4 21.Rxd8+ Bxd8 22.Bxf4 Nxc4 winning a piece.]

17...Bd6 18.Re1 Be8! Black's idea is ... ♗c6. **19.a5**

[E.Fossan−Hebden, Gausdal 1992, featured the move 19.Nd2 . In the game Hebden replied with Bxa4 , which doesn't look good after *(*But *19...Bc6 20.Qg4 Nxc4 21.Nxc4 Rf6* , threatening 22...♖g6, would have

given Black a dangerous attack. *)* 20.Qxb7]
[On the other hand White would do well to consider 19.Bb3 , as Bc6 20.Qh5 f3 21.g3 leaves Black with some work to do to justify his pawn sacrifice.]
19...Bc6 20.Qh5 Nxc4 21.dxc4 Qd7 22.c5?
[22.b4 would have been better, so as to dislodge Black's bishop from c6 with a later b4−b5, but even so Black would have good chances after, say, f3]
22...Rf5 23.Qg4 h5 24.Qh4?
[24.Qg6 was mandatory, when Rxc5 is better for Black but not necessarily decisively so.]
24...Bxc5! 25.Bxf4 Qd5! 26.Qg3 Rxf4 27.Ne3 Qf7 28.b4 Bd6 29.Rad1 Rf8 30.Rd2

Jubilee Postal sf−A 2001−2 2001
[Bennett, Tait; CC 155]

1.e4 White is not named in CC155 but can be identified from results in ICCF website. Players against whom bennett has Black are: Carolei (ITA), Labate (USA), Ian P.O'Toole (USA), P.Havira (SLK) and F.Osuna Osuna (ESP). My guess is Labate as the others don't meet the description of the opponent in the magazine. Somebody told me Mathias was White but that would mean they played the game with the wrong colours in error, or else this was a friendly. **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 0−0 14.Nxh7 Kxh7 15.Qh5+ Kg8 16.Rh4 f5 17.Qh7+ Kf7 18.Rh6 Rg8 19.Re1 Bd7?**

□ **City London**
■ **City Edinburgh CC**
match 1824−28 corr (2) 28.04.1824
[Myers]

Myers: This is the second of a 5−game match played between the chess clubs of London and Edinburgh by correspondence. It is perhaps the earliest such match for which a full record of the games has been passed down to us. Edinburgh won the match by a score of 2 wins, 2 draws, 1 loss. This particular game has its place in chess history because London attempted to retract a move which had already been posted. This was not allowed by Edinburgh, establishing the precedent that rules today. The game began April 28, 1824, and ended February 23, 1825.

25...a5 26.Qc5+! Lewis: The 26th, 27th, and 28th moves were sent on the same day to the Edinburgh club. This was done to save time. It so happened that the secretary, whose duty it was to write the letters, had an engagement which compelled him to leave the club two hours earlier than usual−−the letter was therefore posted at three instead of five o'clock. In the meantime, one of the members discovered that the second move (the 27th) had not been sufficiently examined. An application was immediately made at the post office for the letter, which was refused. In consequence, a second letter was transmitted by the same post to the Edinburgh club, retracting the second and third moves, and abiding only by the first. The Edinburgh club, in answer, gave it as their decided opinion, that the London club were bound by their letter, and that no move could be retracted: they therefore insisted on the moves being played. The London club conceded the point, though they differed in opinion! **26...Kg8□ 27.Rxg5+?** The fatal conditional.

IFSB−ch corr 1935

[Keres]

Myers: This game was played in the IFSB individual championship for 1935, which Keres won by a score of 10/13, a half point ahead of Nils Ekstroem (SWE) and Wilhelm Schoenmann (GER). Keres also started up play in the 1936 championship, but did he did not complete the event, in large measure because following his success in the 1935 Warsaw Olympiad his OTB career had begun to take off. **1.e4** Myers Keres **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 d6 7.Qb3 Qd7 8.dxe5 dxe5 9.0−0 Bb6 10.Bb5?!**

□ **Liubarski**
■ **Soultanbeieff,Victor Ivanov**
Liége 1928
[Chernev + Stockfish 12]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Bb6 5.d4 Qe7 6.0−0 Nf6 7.d5?! Tempting, as it will dislodge the C6−knight from its strong post. The move is natural, but to be censured on several counts: 1) The D−pawn blocks the path of White's own C4−bishop, greatly limiting its action. 2) The range of Black's B6−bishop has been increased; now its attack leads straight to White's king. 3) White has moved a pawn while his queenside pieces are crying to be released. In the opening, move only those pawns that help develop the pieces.
[7.b4 a6 8.d5 Nb8 9.Bd3 *(9.Be3? Bxe3 10.fxe3 Nxe4)*]
7...Nb8
[Se 7...Na5?? White captures this piece: 8.Bd3 d6 9.b4 0−0 10.bxa5 Bxa5 11.Qc2 (3.20)]
8.Bd3
[8.Nbd2 d6 9.a4 a6 10.a5 Ba7 11.Re1 0−0 12.h3]
8...d6 9.h3 h6 10.Qe2 g5 A bayonet thrust! The next step is to G4, where the pawn will break White's position.
11.Nh2? To prevent the intended advance. If the pawn moves on, it will be attacked three times and defended only twice.
[11.a4 a6 12.Nh2 g4]
11...g4! If necessary, Black will sacrifice a pawn for the sake of ripping away the defensive screen around White's king. Black was threatening 12 ... g3. **12.hxg4**

White has closed the file, for the time being.

[Black was threatening 12.−− g3 13.Nf3 Rg8 14.Be3 Nh5 15.Nbd2 Bxh3 16.gxh3 Qd7]

12...Rg8 Now it is Black who attacks the G−pawn three times, while only two pieces defend it! Notice that 13. f3 is not possible because of the B6−Bishop.

13.Bxh6?

[13.Nd2 Nxg4 *(13...Bxg4 14.Nxg4 Nxg4 15.Nf3 f5* (−1.00) *)* 14.Ndf3 *(14.Nhf3 a6 15.Nc4 Ba7* (−0.70) *)* 14...Bd7=]

13...Nxg4 Gaining time by threatening the bishop − among other things. **14.Be3**

[14.Nxg4? Bxg4 In this line Black exploits the helplessness of White's pinned pawns.

■ **Janosi,E.**
25: Correspondence 2008
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.Ng5!? It never occurred to me that this move was quite playable for White before I started working on this book. In fact, it's a speciality of the Dutch GM Daan Brandenburg, who has

employed it regularly against strong opposition with good results. **5...d5!** My preferred method of dealing with this variation. Black punishes White's arrogant knight jump by striking in the centre.

[From a purely theoretical point of view, it should be noted that 5...Ne5 might even be better. After 6.Bb3 h6 7.f4 hxg5 8.fxe5 Nxe4 we have a crazy position on the board, and although Black is probably better, there's total chaos which is probably what White wanted. 9.Bd5 is what Brandenburg plays here *(* White has also tried *9.Qxd4;* and the surprising *9.Bxf7+!?)* , when play can go 9...Nc5 10.0−0 Ne6 11.Qf3 Qe7 12.Nd2 . Here Black's best seems to be Nf4! 13.Bxb7 g4! 14.Qe4 Qh4 15.Rxf4 Qxh2+ 16.Kf2 Bxb7 17.Qxb7 Qxf4+ 18.Nf3 Qf5 19.Qxa8+ Ke7 20.Bg5+ f6 21.exf6+ Kf7 and my engine says that Black is slightly better. Mind−blowing stuff and certainly fun to analyse, but I'll leave that to the reader. I'm more than satisfied with the slight edge in the endgame we get in our main line, and I can't really recommend something I cannot fully grasp myself.]

6.exd5 Qe7+! This is the main point behind 5...d5. This check interrupts White's development and he has to choose whether to give away the d5−pawn or greedily take the d4−pawn.

[The tactical idea that every white player dreams of playing is 6...Nxd5? 7.0−0 Be7 8.Nxf7! with which Morphy used to amuse himself in the 19th Century. Definitely something to watch out for.]

7.Kf1 The main line.

[7.Qe2 isn't very inspiring for White after Nb4 8.Na3 Nfxd5 when Black just seems to be a pawn up for nothing.]

[7.Be2 Nxd5 8.0−0 is a slightly more sensible way to sacrifice the d5−pawn as the black queen could become a target along the e−file, but Black retains the advantage with h6 9.Nf3 Bg4! , which prepares castling queenside. The game G.Murawski−F. Barglowski, Ustron 2004, continued 10.c4 Nb6 11.Nxd4 Bxe2 12.Nxe2 Rd8 13.Nd2 , at which point Black played the creative Kd7!? and won a one−sided game, *(* and I think Black can improve his play even further with *13...Nxc4!?* . *)*]

7...Ne5 8.Qxd4 Nxc4 9.Qxc4 At this point Black is down a pawn, but he has excellent compensation. Apart from the weak d5−pawn, White's king has lost the right to castle and Black has a strong bishop−pair in an open position.

9...h6!

[The most common move order is 9...Qc5 , but I think this is inexact due to 10.Qxc5 Bxc5 11.Nc3 when White's g5−knight can return to e4, giving him good chances to equalize. This is no longer an option if Black kicks the knight back to f3 immediately.]

10.Nf3

[While reading through Bologan's book, I came across the stunning 10.Nc3!? hxg5 11.Bxg5 . This certainly looks more tempting than the main line. However, Black can neutralize White's initiative in

many ways. The one I like best is Qb4!? , which is a decent square for the queen, taking away many squares from the white queen and thus hindering White's attack:

A) . Should White play 12.Re1+ we go Kd8 and we develop naturally with ...Bd7 and ...Be7, slowly unravelling our extra piece.;

B) 12.Qxc7 Be7 sees White having grabbed a third pawn, but none of them are particularly dangerous and the piece is definitely worth more in this case. Indeed, after 13.Re1 Kf8 followed by...Bf5, Black's extra piece should soon begin to tell. *(13...−−)*;

C) 12.−−]

10...Qc5! A key idea for Black in this variation. The only badly−placed black piece was the queen and so it is traded for White's only active piece. Apart from this, the d5−pawn and the f2−pawn will require White's attention.

[If Black were to develop normally with, say, 10...Bg4 11.Nc3 0−0−0 , White can simply go 12.Be3 and it's not so easy for Black to develop his initiative further while White catches up in development.]

11.Qe2+

[If White would play 11.Qxc5 Bxc5 , Black's development is very smooth: 12.Nc3 *(12.c4 Bf5 13.Ke2 0−0−0* followed by ...Rhe8+ and ...Ne4 looks crushing *)* 12...Bf5 would at least regain the pawn on c2, but Black should probably aim for ...0−0−0 and ...Nxd5 when the two bishops assure him of some advantage.]

11...Be7 12.Be3 This idea would be brilliant, if it wasn't for the fact that it doesn't solve White's problems. White temporarily gives up his extra pawn to catch up in development, but he has a tactical idea of how to regain it.

12...Qxd5 13.Nc3 Qa5 14.Re1 0−0! 15.Bxh6 And this was White's idea all along. White has got rid of his weak extra pawn on d5 and traded it for the pawn on h6, but let's face it, White can't really go pawn grabbing on h6 with bad development, a king on f1 and facing the bishop−pair. **15...Re8 16.Bd2**

[Houdini wants to play 16.Qb5 Qxb5+ 17.Nxb5 , but it's quite clear to me that after gxh6 18.Nxc7 Be6 19.Nxa8 Rxa8 Black has excellent winning chances as his minor pieces are so well placed and as the h1−rook hasn't joined the game yet.]

16...Bd7 Black's bishops are ready to control the board. **17.Qc4 b5 18.Qb3 b4 19.Ne5 Qa6+ 20.Kg1 Be6 21.Qa4 Qd6 22.Nb1** I suspect White was starting to regret his pawn grabbing around now. **22...a5 23.c3 Bf5 24.Qb3 Bf8!** An ice−cold reaction, but then again this was a correspondence game. Of course, Black has many ways to crush White's position. **25.Qxf7+ Kh7 26.Bf4 Bxb1 27.Rxb1 Rxe5 28.Bxe5 Qxe5 29.Qc4 Bc5 30.g3 Qf5 31.Rf1 Ne4 0−1**

□ **V. Topálov (Bulgaria,2.760).**

■ **So,Wesley**

VIII Clásico de Londres (6) 15.12.2016

Wesley So, de 23 años, cuarto del mundo, logró el sábado el mayor triunfo de su carrera al ganar el Clásico de Londres y el Grand Chess Tour, circuito que termina con este torneo. Frente al decaído Véselin Topálov, en claro declive, arriesgó bastante más de lo normal en una lucha muy interesante. Apertura Italiana (C54): **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.a4 d6 7.Bg5 Ba7 8.Nbd2 h6 9.Bh4 g5 10.Bg3 0−0!?**

[(una decisión sorprendente: So ubica su rey en el flanco donde está atacando, en lugar del plan para enrocar largo, o incluso de dejar el rey en el centro como en esta partida reciente, en la que el jugador de las negras, Jairulin −o Khairulin− tenía 2. 630 puntos Elo: 10...Bg4 11.h3 Bh5

12.b4 Ne7 13.Bh2 g4 14.hxg4 Bxg4 15.Qb3 Rh7 16.Bg3 Qd7 17.Bh4 Nfg8 18.d4 , con ventaja blanca, Pópov−Jairulin, Sochi 2016)]

11.0−0 Nh7 12.h3 h5 13.d4 (una reacción lógica, para no dejar inútil al alfil de g3) **13...exd4**

[(una de las ideas era 13...g4 14.Bh4 Qd7 15.Nh2 exd4 16.cxd4 Bxd4 17.hxg4 hxg4 18.Ra3! , con clara compensación por el peón)]

14.Nxd4 g4!? (So juega muy alegremente; su ataque implica debilitar a su rey; la alternativa era

[14...Nxd4 15.cxd4 h4 16.Bh2 Bxd4 17.Nf3 Bg7 18.e5! g4 *(* −si *18...dxe5? 19.Qc2!* , con ataque tremendo− *)* 19.hxg4 Bxg4 , con una posición muy tensa)]

15.hxg4 hxg4 16.Nxc6 bxc6 17.e5?! (el inconveniente es que, al permitir d5, desclava el peón de f7; entonces, con el dominio de la diagonal a7−g1 y la columna 'h' abierta, las negras tendrán al alfil de g3 como objetivo militar; era mejor trasladar el caballo a d4:

[17.Nb3 Qg5 18.Nd4 Bd7 19.Re1 , con ventaja)]

17...d5 18.Be2 Qg5 19.a5? (para Ta4, pero el ataque negro será más rápido; el mal menor era

[19.Nb3 f5 20.exf6 Rxf6 21.Qc1 Qh5 22.Bf4 , aunque habría clara ventaja negra tras Rb8)]

19...f5! 20.exf6 Nxf6 21.Ra4

[(si 21.Bxc7 Kg7! *(* −mucho más fuerte que *21...g3 22.Bb6* − *)* 22.Bb6 Rh8 , con ataque letal)]

21...Rf7 22.Re1 (diagrama) **22...Nh5! 23.Bxg4 Nxg3 24.Re8+ Kg7 25.Rxc8 Bxf2+ 26.Kh2 Qe5 27.Kh3 Ne2** , y Topálov se rindió.

0−1

■ **Carlsen,Magnus**

FIDE World Blitz CH (20) 20.06.2014

[Italian Game w 4.d3]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5

Magnus has always prefered the black side of the Italian Game instead of playing the 2 Knights.

[3...Nf6]

4.d3 Nf6 5.Nbd2 d6 6.c3 0−0 7.0−0 Be6 Opposing the white light square Bishop has been one of his favorite methods for meeting the quiet variation of the Italian Game/Guioco Pianissimo. One must admit there is a definite logic to Black looking to exchange his undeveloped Bishop for White's best place piece that is also pointing directly at the black King. **8.Bb3** White retreats his valuable light square Bishop and contemplates even hiding it on c2 with hopes of re−emerging with effect at a later date.

[It is a common theme in this variation that inflicting doubled e−pawns on Black does not offer White very much − for example − 8.Bxe6 fxe6 *(* In return for the doubled e−pawns, Black gains a half−open f−file and the e6 pawn helps to bolster the defense of the d5 and f5 light squares − *8...fxe6)* 9.Qb3 A tempting double attack on e6 and b7, which is easily met by Black − Qc8 10.Ng5 Re8= to be followed by booting the white Knight with − 11.−− h6]

8...Bxb3!= Killing White's best piece gives Black clear equality. **9.Qxb3** The Queen recapture on b3 contemplates grabbing the b7 pawn, but the alternative recaptures did not offer White very much either −

[a) 9.Nxb3 Bb6=]

[b) Some White players like to take with the pawn in order to gain a half−open a−file for their Rook − 9.axb3 Black's best response is to "Freeze" the double white b−pawns with − a5! 10.Nc4 b5 11.Ne3 Qd7= and Black's queenside counterplay is well under way.]

9...Rb8 10.Nc4 Qd7 11.Be3 b5? In his rush to get his queenside counterplay moving, Magnus's sense of danger deserts him for a brief moment! **12.Ncd2?!** A passive retreat, which should have been replaced by the nice tactical shot −

[12.Ncxe5!! winning a vital center pawn by capitalising on the overloaded black d6 pawn −]

[a) 12.Ncxe5 Nxe5 13.Nxe5 dxe5 14.Bxc5 Rfe8 15.Rad1± +1.30.]

[b) 12.Ncxe5 dxe5 13.Bxc5 Rfd8 14.Rfd1± +1.10.]

12...Bxe3 13.fxe3 Ne7 A typical maneuver for Black as the c−pawn is freed to fight for the center and the Knight can roll over to the kingside if needed.

[13...a5!? −. 30.]

14.Nh4 Qg4 15.Nf5? The natural inclination to move forward leads to problems.

[White should have maintained the balance with the retreat − 15.Nhf3!?= blocking the black Queen's entry path to e2.]

15...Nxf5 We now see another virtue of the Knight retreat 13...Ne7 as he was in perfect position to exchange off the white f5 intruder. **16.Rxf5 Qe2!+−** The black Queen penetration behind enemy lines creates a deadly triple attack and simply collapses the white position −

[16...Qe2]

17.Qc2 The white Queen retreats to defend her Knight and d3 pawn.

[If 17.Nf1 Qxd3−+ −2.10.]

17...Ng4!−+ −3.10 Magnus plans on capturing the e3 pawn with his Knight,

creating crushing threats.
[17...Ng4 18.Rf3 Nxe3 19.Rxe3 *(19.Qc1 Qxg2#)* 19...Qxe3+ 20.Kh1 f5 With a clear three point material advantage for Black.]
0−1

Polish Team Ch. 1999
[Paul Motwani]

G12.4: "Eating Italian" M.Bus−J.Dubiel, Polish Team Championship, Suwalki 1999. Italian Game. I must admit that although I do enjoy eating Italian, I would not normally have it twice in very quick succession! However, I noticed that a player by the name of Dubiel did a double demolition job of dubious White play in the Italian Game in two really quick recent victories at a Polish team tournament. Enjoy the forthcoming feast of games! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3**
[5.b4 Bb6 6.b5 Na5 is fine for Black, as is]
[5.d4 exd4 6.e5 *(*or *6.cxd4 Bb4+)* 6...d5!]
5...a6 This useful little move is designed to allow ...Ba7 if desired, and it also nullifies in advance any ideas that White may have had of playing b4−b5 in the near future. **6.0−0**
[6.d4?! exd4 7.cxd4 Bb4+ 5 is bad for because Black has the

useful extra move ...a6 'for free' compared with the line given to conclude the earlier notes accompanying d3]

6...Ba7 It is worth pointing out that the ordinary−looking move ...Ba7 actually carries good prophylactic and psychological ideas, because on a7 the bishop cannot now, under any circumstances, suddenly be 'hit' by moves such as b4 or d4, but also White is wondering whether Black's continuing delay in advancing the d7−pawn means that ...d5 rather than ...d6 is about to happen, and this induces an error soon on move 8. **7.Nbd2 0−0 8.Re1?!**

[It would have been better to play 8.Bb3 because d5 9.exd5 Nxd5 10.Nc4 puts the e5−pawn under pressure without White leaving himself weakened at f2 by the move Rf1−e1.]

8...d6 Now that th e e5−pawn is protected, Black is threatening to eliminate White's c4−bishop with 9...Na5

[In White's mind the move 6...Ba7 planted a small seed of doubt which grew quickly into the worried thought 'Perhaps Black is planning the aggressive move ...d5 instead of the "automatic" ...d6 that I have been expecting since move five, so I need to play 8 Re1 intending 8...d5 9.exd5 Nxd5 10.Nxe5 See previous note]

9.Bb3 Ng4! At lightning speed the knight leaps forward like a tiger whose eyes are fixed firmly on the frail f2−pawn **10.Re2 Kh8** Preparing to attack with ... f5 **11.h3**

[G12.4.2 On 28 March 1998 in the Belgian town of Strombeek−Bever, the 'simul' game K.Van Coppenolle−P. Motwani saw 11.Nf1 f5 12.Ne3? *(* G12.4.1: *12.exf5 Bxf5 13.Ng3 Bg6 14.h3 Nf6* planning ...Nh5 gave Black a very pleasant position in the encounter J.Kountz−P.Motwani at Cappelle−la−Grande on 19 February 1996 *)* 12...f4 the black f−pawn ignores an imaginary 'fence' as it crosses over from one half of the board to the other, and lands to cause chaos in White's camp 13.Nd5 *(*After *13.Nxg4 Bxg4* the f3−knight is subjected to a most uncomfortable pin *)* 13...Nf6 creating a new ...Bg4 threat 14.h3 g5! this case of g for 'go for it!' threatens 15...g4 16 hxg4 Bxg4, so it's clear that the c8−bishop is really determined to make a big dent on White!) 15.Nxg5 *(15.Nxf6 Qxf6 16.Nh2* would be a futile attempt to slow down Black's charging kingside pawns because the stampede continues unabated with *h5* and then for example *17.Re1* gets crushed by *g4 18.hxg4 hxg4 19.Nxg4 Qh4)* 15...Nxd5 16.Ne6 *(16.exd5 Qxg5 17.dxc6 Bxh3 18.Bd5 bxc6 19.Bxc6 Bxg2! 20.Bxg2 Rg8 21.Qf1 Qh5* intending 22...f3 is also hopeless for White *)* 16...Bxe6 17.exd5 f3 in its final move of this life, Black's fighting f−pawn throws a grenade at g2 18.gxf3 *(*after *18.Re4* Black's many short paths to victory include the very simple move *Bf5)* 18...Bxh3 19.dxc6 Rg8+ 0−1 White resigned in view of 20.Bxg8 *(*or *20.Kh2 Qh4* threatening 21...Bf1. *)* 20...Qxg8+ followed shortly by ... Qg2,]

11...Nh6 12.Nf1

[G12.4.3: After 12.g4 hoping to stop ... f5 Nxg4! 13.hxg4 Bxg4
then in return for the sacrificed piece Black had two pawns plus a massive attack against White's exposed king in the game T.Popek−J. Dubiel at the same 1999 Polish Team Championship in Suwalki. Incidentally, I witnessed exactly the same thing happening in an encounter A.Hunter−M.Condie at Edinburgh...way back in the 1980s!]

12...f5 13.exf5 Nxf5 14.Kh2 Nh4 15.Nxh4 Qxh4 16.Be3

[16.f3 Rxf3! is a short and sweet finish (for Black at least!). 17.gxf3 Qxh3#]

16...Bg4! 17.f3 Bxf3! This sacrifice destroys the pawn−cover which was sheltering White's trembling king.

18.gxf3 Rxf3 19.Bxa7 Rxh3+ 20.Kg2

[20.Kg1 Rh1+ 21.Kg2 Qh3+ 22.Kf2 Rf8+ takes White to another 'dead end'.]

20...Qg4+ 21.Kf2 Rf8+ 22.Ke1 Rxf1+ 23.Kxf1 Rh1+ 24.Kf2 Qf4+!

Instead of 'only' winning White's queen, Black neatly forces mate **25.Kg2 Rh2+** White resigned in view of 26 Kg1 Qg3+ 27 Kf1 Rh1+ 28 Bg1 Q/Rxg1.

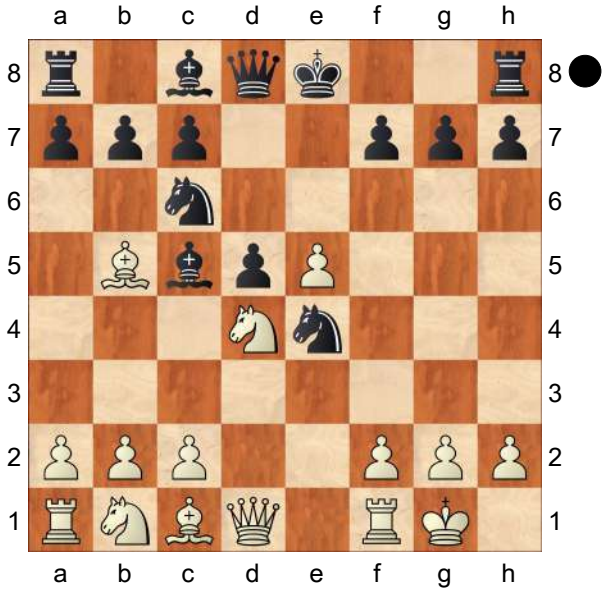
□ **Maxfield,Jack**
■ **Morss,Mark F**
USCF−92CM84 corr 1992
[Morss]

In this game, my opponent was Jack Maxfield of Wichita Falls, Texas, where he is a retired Air Force NCO. Jack and I had the occasion to play OTB in 1973 or thereabouts, at an Air Training Command Championship held at Laredo Air Force Base, Texas. Today at age 86, he is still quite active in correspondence chess, with the rank of Master. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bc5 8.0−0**

[8.Nxc6]

[Recent theory, notably the second, 1991 edition of Harding's book, recommends 8.Be3
−− see Danzanvilliers−Morss]



This was once considered the main line, and was recommended in the first, 1984 edition of Tim Harding's Evans Gambit: and a System vs the Two Knights Defense **8...0−0 9.Nxc6**

[Theory used to recommend 9.Bxc6 bxc6 and now: Received theory is

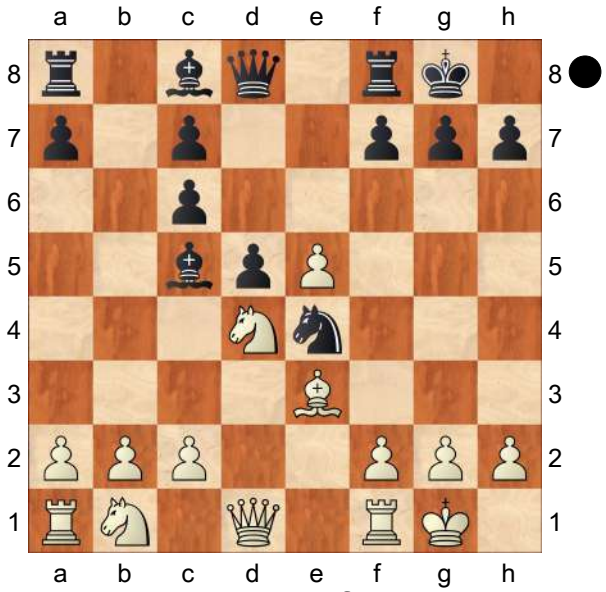
A) 10.Nxc6 is a move conceived by Australian GM Ian Rogers. Rogers−Pavlovic, Sokobanja 1989, went Qd7 *(10...Qh4 11.Be3 Ba6 12.Bxc5! Bxf1 13.Be3! Ba6! 14.Na3!* favored White in Esteves−Peres, Cuba 1991 *)* 11.Nd4 Qe7!

12.Bf4 *(12.Be3 Qxe5 13.c3 Bd6* is good for Black *)* 12...f6! 13.e6 *(13.exf6?! Qxf6 14.Be3 Ba6)* 13...Bxe6 and now: Rogers later recommended

A1) The game with Pavlovic went 14.c3 Bf7 15.Nd2 Rfe8 16.N2b3 *(*best is *16.a4 a5 17.N2b3 Bb6* with approximate equality *)* 16...Bb6 17.a4 c5 18.Nf3 a5! with somewhat better play for Black;

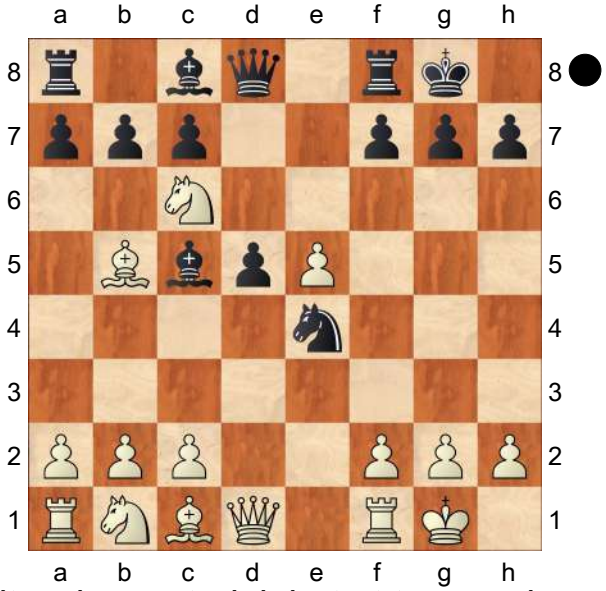
A2) 14.Nxe6 Qxe6 15.Bxc7 Rac8 16.Bg3 *(16.Bf4 Nxf2! 17.Rxf2 Bxf2+ 18.Kxf2 Qf5)* 16...f5 17.Bf4 as favoring White. I think this claim is pretty optimistic. For example, Qb6 18.Qxd5+ Kh8 and Black has terrific play;

B) 10.Be3



Analysis position after 10. Be3.

The critical continuation is 10...Qe8 11.Nd2 Nxd2 12.Qxd2 Qxe5 13.Nxc6 Bxe3 14.fxe3 Qxb2 15.Rab1 Qa3 16.Qd4 Ba6 17.Rf4 and Harding, in his 1984 edition, considers this position as favoring White. Harding gives Qxa2 *(*but Black should be in no hurry to take the a−pawn; he should play *17...Bc4* defending the d−pawn and preparing ...Rae8 when, in my opinion, White lacks sufficient compensation for his weak pawns *)* 18.Ra1 Qc4 19.Ne7+ Kh8 20.Qe5 and White has a strong initiative.]



White wins material, but at too much expense of time, seeing that Black's pieces are already so active. **9...bxc6 10.Bxc6 Ba6 11.Bxa8**

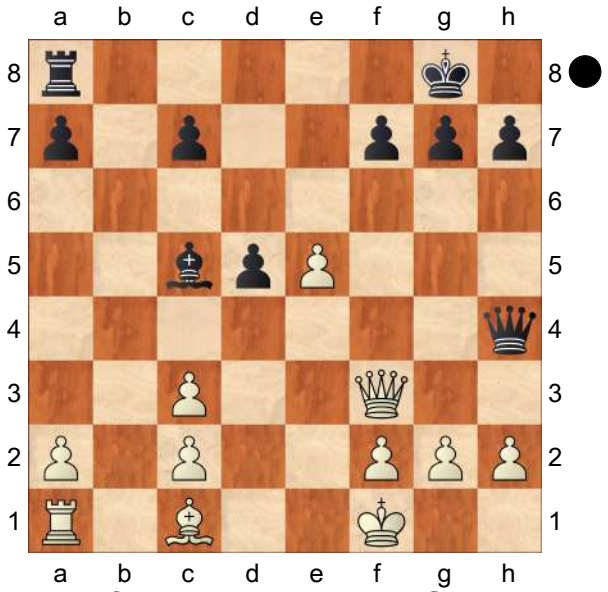
[11.Qxd5 Bxf1 *(11...Qxd5 12.Bxd5 Rad8 13.c4* favored White in Chigorin−Charousek, Budapest 1891 *)* 12.Qxe4 Bb5! 13.Nc3 Bxc6 14.Qxc6 Bd4 and particularly in context of Black's lead in development, White's pawns are not worth the lost exchange. Batanjac−Vujosevic, Yugoslav Champ. 1996.]

11...Bxf1 12.Kxf1 This unbooked move looks reasonable, and it may be the best move in the position.

[12.Qxd5? Bc4]

[12.Be3 Bxe3 13.fxe3 Bxg2

(13...Qg5 14.Kxf1 Qxe3 15.Qe2 Qf4+ was Dufresne−Anderssen, 1st Match Game, Rotterdam 1861 *)*
14.Qg4 Bh3 15.Qxh3 Qg5+ 16.Kf1 Rxa8 and Black was winning in Hermann−Keres, postal 1936]
[12.Qxf1? Bxf2+ 13.Kh1 Qh4]
12...Qh4 13.Qf3 Rxa8 14.Nc3 Nxc3 15.bxc3



Position after 15. bxc3. **15...Qxh2!** Played with the following cute idea. **16.Qxd5 Re8** Indirectly defending the bishop. Black has the advantage based on his better development, better pawns, and more secure king. **17.Bb2 Rxe5 18.Qa8+ Bf8 19.g3 Rf5** This move took some thought. In spite of Black's awkwardness on his back rank, it seems best to claw away at White's king.
20.Qg2 Qh6
[The conservative choice would have been 20...Qxg2+
with an advantageous ending, but I decided to try to exploit White's trouble with his king.]
As it turned out, White could not find a solution to the resulting problems.
21.Qe4 Qf6 22.Qe3 g5 23.Kg2 Bc5 24.Qe8+ Kg7 25.f4 gxf4

B1b) . However, Black can play more strongly with 17...Ng6! 18.Rh3 Rf6! 19.Rg3 *(*if *19.Qh7+ Kf7 20.Re6 Nf8 21.Qh5+ g6 22.Qh8 Bxe6 23.dxe6+ Rxe6 24.Bxe6+ Kxe6* and Black wins *)* 19...Ne5 20.f4 Nf7 21.Re6 , and now after , and now after , and now after Bd7! Black retains his material advantage, *(*instead of instead of instead of *21...Bxe6? 22.dxe6 Qe7 23.exf7+ Rxf7 24.Rh3 Qe1+ 25.Bf1 Rff8 26.Qh7+ Kf7 27.Qxf5+ Kg8* ½−½ A.Nogueira−M.Valverde Lopez, correspondence 1977. So this line does not seem to be playable for White. *)*;

B1c) 17...−−;

B2) 17.Rh3? is Paul Keres' idea, but it does not stand the test of our time: computer analysis, e.g. is Paul Keres' idea, but it does not stand the test of our time: computer analysis, e.g. is Paul Keres' idea, but it does not stand the test of our time: computer analysis, e.g. if f4 18.Qh7+ with equality Kf7 19.Qh5+ g6! *(*if *19...Kg8 20.Qh7+* with equality *)* 20.Qh7+ Kf6 21.Qh4+ g5 22.Qh6+ Ng6 23.Rh5 Rh8 24.Qxg5+ Kg7 25.Bd3 Qxg5 26.Rxg5 Rh6 27.Rc1 Kf6 28.Rxg6+ Rxg6 29.Bxg6 Kxg6 and Black should win.;

B3) . The best option by far is 17.Qh7+ Kf7 18.Rh6 Rg8 19.Re1 when Black has:

B3a) 19...Bd7?? loses to the fabulous loses to the fabulous loses to the fabulous 20.Ree6!! Bxe6 21.dxe6+ Ke8 22.Rg6 d5 23.Rxg7 Qd6 24.Rxg8+ Nxg8 25.Qf7+ Kd8 26.Bb5!? *(*or *26.Qxg8+ Ke7*

27.Qf7+ Kd8 28.Bxd5 Qe7 29.Qg8+ Qe8 30.Qg5+ Qe7 31.Qxf5 and White wins. *)* 26...c6 27.Qxg8+ Ke7 28.Qxa8 cxb5 29.Qxb7+ Kxe6 30.Qxb5 and White wins.;

B3b) 19...Kf8 is met by is met by is met by 20.Rh3 Bd7 21.Rhe3 Nc8 22.Bd3 g6 23.h4 Rg7 24.Qh8+ Rg8 with equality according to Sozin.;

B3c) 19...Qf8! is the best chance according to my analysis, which we will examine in a new subvariation 'c'...;

B3d) 19...−−;

B4) 17.−−;

C) 16...f5! 17.Qh7+ Kf7 18.Rh6 Rg8 19.Re1 Qf8! is critical: is the best chance according to my analysis, which we will examine in a new subvariation 'c'...

C1) . Here White can try to reorganise his troops with . Here White can try to reorganise his troops with . Here White can try to reorganise his troops with 20.Rh3 and then:

C1a) 20...Bd7?! 21.Rhe3 Ng6 *(*necessary if Black is to play for a win; certainly not necessary if Black is to play for a win; certainly not necessary if Black is to play for a win; certainly not *21...Re8? 22.Be2!!* when Black has no decent defence against when Black has no decent defence against when Black has no decent defence against −− *23.Bh5+)* 22.Re6! *(*apparently forced; if apparently forced; if apparently forced; if apparently forced; if *22.Qh5? Rh8 23.Re7+ Qxe7 24.Rxe7+ Kf6!!* and Black wins*,;* or *22.Rg3 Nf4 23.Qh4 g5! 24.Rxg5 Rxg5 25.Qxg5 Ng6* and Black's advantage is close to decisive *)* 22...Bxe6 23.dxe6+ Ke7 24.Qxg6 Rh8 25.Qg3 c6 when White retains some compensation.;

C1b) 20...Kf6!! is one of those truly stunning moves which a computer can sometimes find. The idea is very simple: White is not allowed a check on e7 in the most forcing lines. Instead White can try 21.Qh4+ *(*if *21.Rhe3? Rh8!* and Black wins instantly *)* 21...g5 22.Qd4+ Kg6 23.Qd1 g4 24.Rhe3 Rg7 25.Qe2 Ng8 26.Re8 Qf7 and here Black will win because of and here Black will win because of and here Black will win because of 27.−− Nf6 and White has no counterplay for the piece. I am not too eager to risk my reputation by giving a clear evaluation of this line, since maybe White has a way to strengthen his attack earlier on? I believe in Black's position, but one unpredictable tactic could turn everything upside down.;

C1c) 20...−−;

C2) . And anyway, White can

possibly improve earlier with 20.Bb5! Rh8 *(*it looks as if the simple it looks as if the simple it looks as if the simple *20...a6!?* questions Keres, but here White can play questions Keres, but here White can play questions Keres, but here White can play *21.Ree6! axb5 22.Rhf6+ Ke8 23.Rxf8+ Rxf8 24.Rxe7+! Kxe7 25.Qxg7+ Rf7 26.Qg5+ Kf8 27.Qd8+ Kg7 28.Qg5+ Kh7 29.Qh5+ Kg8 30.Qg5+ Rg7 31.Qd8+ Kh7 32.Qe8!* and there is seemingly no way to escape the perpetual check *)* 21.Qxh8 gxh6 22.Qh7+ Kf6 23.Rxe7 Qxe7 24.Qxh6+ and equality according to Keres. So maybe 13...0−0 does give White a draw after all. and equality according to Keres. So maybe 13...0−0 does give White a draw after all. and equality according to Keres. So maybe 13...0−0 does give White a draw after all.;

C3) 20.−−;

D) 16...−−]

□ **Von Scheve,Theodor**
■ **Teichmann,Richard**
Berlin Jubilee (9) 1907
[Chernev + Stockfish 12]

1.e4 An excellent opening move. White anchors a pawn in the centre of the board and opens lines for his queen and the F1−bishop. Why is the centre so important? Pieces placed in the centre enjoy the greatest freedom of action and have the widest scope for their attacking powers. A knight, for example, posted in the centre, reaches out in eight directions and attacks eight squares. Standing at the side of the board, its range of attack is limited to four squares. It is only half a knight! Occupation of the centre means control of the most valuable territory. One of the reasons many players prefer 1. e4 to any other opening move is that it gets the kingside pieces rolling quickly, enabling early castling on that side. **1...e5**
Black challenges possession of the centre and prevents White from monopolizing it by continuing 2. d4. In the old days this was almost compulsory. It indicated that Black were willing to stand toe−to−toe and slug it out. Only a coward would avoid 1 ... e5 and a possible gambit by White. **2.Nf3**
The knight develops towards the centre, with a threat − attack on a pawn. It exerts pressure on two of the strategically important squares in the centre, E5 and D4. The knight comes into play early in the game, in compliance with the precept: develop knights before bishops!
[What happens if White persists and plays 2. d4? 2.d4 exd4 3.Qxd4 Nc6 4.Qe3 Nf6 and Black has two pieces in play to one of White's, which allows him to take the initiative away from White early in the game.]
2...Nc6 Black brings a piece out and saves the E−pawn without any loss of time. No other option is so good:
[2...f6 Very bad. The F−pawn occupies a square that should be reserved for the knight; and it also blocks the queen's path along the diagonal.]
[2...Qf6 Bad, since it is the G8−knight that belongs at F6, not the queen. Also, it would be a waste the power of the strongest piece to defend a pawn.]
[2...Qe7 This shuts the F8−bishop in, while my queen is doing a job which a lesser piece could handle.]
[2...Bd6 Not good: a piece is developed, but the d−pawn is obstructed, and the C8−bishop may be buried alive.]
[2...d6 Not bad: it gives the C8−bishop an outlet, but it limits the range of the F8−bishop,]
3.Bc4 The bishop seizes a valuable diagonal in the centre and attacks Black's F7−pawn. This pawn is particularly vulnerable as it is guarded by one piece only − the king. It is not unusual, even early in the game, to sacrifice a piece for this pawn, so that the king in capturing it is uprooted, driven into the open and exposed to a violent attack. **3...Bc5** In this position it is the strongest developing of the F8−bishop: it exerts pressure on the centre (D4) and attacks a weak pawn (F2).
[3...Bb4 Inferior: Black's bishop takes

no part in the struggle for control of the centre and has little scope here.]
[3...Bd6 Poor, since the D−pawn is blocked, and the other bishop may have trouble coming out.]
[3...Be7 Not too bad, because the bishop looks out on two diagonals and is well placed for defence. At E7 the bishop has made only one step forward, but it has been developed once it has left the back rank.]
This deployment of the F8−bishop conforms to two golden rules for opening play: Place each piece as quickly as possible on the square where it is most effective. Move each piece only once in the opening. **4.c3** White's primary object is to establish two pawns in the centre and with this move he intends to support an advance of the D−pawn. His secondary aim is to bring the queen to B3, intensifying the pressure on the F7−pawn. **4...Qe7** Black develops a piece while parrying the threat. **5.0−0** White postpones the advance of the D−pawn and moves his king to a safer place.
[If White persists in playing 5.d4 exd4
A) 6.cxd4?! Qxe4+ 7.Be3
A1) 7...Nxd4? 8.0−0 *(8.Nxd4 Qxg2 9.Kd2 d5 10.Bd3 Ne7 11.Nc3 Qh3 12.Rg1 Qh4 13.Kc2 Bxd4 14.Bxd4 Qxd4 15.Bb5+ c6 16.Qxd4 cxb5 17.Rae1* (12.00) *)* 8...Nxf3+ 9.Qxf3 Qxf3 10.gxf3 Bxe3 11.fxe3 Nf6;

5...d6 Strengthens the centre and supports the E−pawn and bishop. Now the C8−bishop can get into the game.
6.d4 Bb6
[6...exd4?! 7.cxd4 Bb6 *(7...Qxe4?? 8.Re1* gaining the queen. *)* 8.Nc3 Bg4 9.Nd5 Qd7 10.Nxb6 axb6 (1.40)]
7.a4 A tricky move: White threatens an attack on the bishop by 8. a5 (see below). General rule is: Develop all your pieces before starting any combinations!
7...a6 Black prepares a retreat for his bishop.
[White was threatening an attack on the bishop by 8. a5. 7...−− 8.a5 Bxa5 *(8...Nxa5 9.Rxa5 Bxa5 10.Qa4+ Bd7 11.Qxa5* and White gained two pieces for a rook. *)* 9.d5 Nd8 10.Rxa5]
8.a5 Ba7
[8...Nxa5 9.Bd3 Nc6 10.d5 Nd8 11.Bg5 Nf6 (0.50)]
9.h3 Nf6 10.dxe5?! White exchanges, and opens up lines for his pieces. Unfortunately this reacts in Black's favour, in accordance with the rule in these cases: "Open lines are to the advantage of the player whose development is superior." Notice that, the disappearance of White's D−pawn has benefited Black's bishop, hidden away at A7: its range has been extended, so that it now controls the whole of the long diagonal leading to White's F2−pawn − and the king is just behind the pawn!
[10.Re1 0−0 11.Be3 Bd7 (1.40)]
10...Nxe5 Much stronger than taking with the pawn. The knight on E5,

beautifully centralized, radiates power in every direction (something a pawn cannot do). What shall White do now? He has done nothing to relieve the plight (bad situation − aperto) of his E−pawn − it is still attacked by one of Black's knights, while his bishop is threatened by the other. **11.Nxe5?!** This looks plausible, as White gets rid of a powerfully placed piece, but in making this exchange, White's own F3−knight, the best defender of the castled position, also comes off the board. The importance of holding on to the knight in such situations was pointed out by Steinitz more than seventy years ago, when he said, "Three unmoved pawns on the kingside in conjunction with a minor piece form a strong bulwark (baluarte, fortaleza) against an attack on that wing." Tarrasch attests to the valuable properties of the F3−knight with a simple emphatic statement: "A knight at F3 [F6 for Black] is the best defence of a castled position on the kingside."

[11.Re1 Nxc4 12.Qa4+ Bd7 13.Qxc4 0−0−0 (−0.40)]

11...Qxe5 Observe that White's knight has disappeared completely from the board, but Black's knight has been replaced by another piece. And this new piece, the queen, is magnificently posted at E5. She dominates the centre, bears down on (pressiona) the hapless E−pawn, and is poised for (preparada, pronta para) quick action on any part of the board. Now, White decided to play 12. ♘d2, hoping that Black will snatch up (agarrar) the pawn by 12 ... ♘xe4, when there would follow 13. ♘xe4 ♕xe4 14. ♖e1, and the pin wins the queen. **12.Nd2?** But Black was not interested in grabbing pawns. His positional superiority was great enough to justify looking for a combination that will conclusively force a win. His bishops exert terrific pressure on their respective diagonals (even though one bishop is still undeveloped !). Each of them attacks a pawn shielding the king. Black's queen is ready to swing over to the kingside, while the knight can leap in if more help is needed. Black controls the centre, a condition that, Capablanca says, is essential for a successful attack against the king. In short, Black is entitled to a winning combination as reward for his methodical positional play. The question is: is there a target available for the explosion of this pent−up power (potência reprimida)?

[SF 11: 12.Qf3 Qxe4 13.Qxe4+ Nxe4 14.Nd2 Ng3 15.Re1+ Be6 16.Nf3 Kd7 (−1.00)]

13...Qg3+! Black has exploited the two main defects of the move 9 h3. He captured the H−pawn itself and utilized the G3−square, weakened by its advance, as a point of invasion. **14.Kh1** White may not take the queen, as his F−pawn is pinned. **14...Qxh3+** In return for the sacrificed bishop, Black has two pawns and the attack. **15.Kg1 Ng4!** Threatening mate at H2. **16.Nf3** To guard H2 and stop mate by the queen. How does Black conclude the attack? He reasons it out this way: I have captured two of the pawns near the king. If I can remove the third pawn it will deprive the king of the last shred of protection, and he will be helpless. This last defender, the F−pawn, is attacked by my knight and bishop, and protected by his rook and king. I must either drive off one of the defenders or attack the pawn a third time. Perhaps I can do both! **16...Qg3+!** Again, exploiting the circumstance that the F−pawn is pinned, Black attacks it with a third piece, the Queen. **17.Kh1** The king must move to the corner and desert the pawn. Only the rook defends it now, against an attack by Queen, kNight and Bishop. The pawn must fall, and with it the game. **17...Bxf2?** Here, White resigned thinking he could do nothing against Black's threat 18 ... ♕h3+ 19. ♘h2 ♕xh2#. He saw that 18. ♖xf2 runs into 18 ... ♘xf2#, but he did not see his saving move 18. ♗xf7+. In fact, the last Black´s move was a blunder that gave White an opportunity to draw − see the following analysis:

[The winning move was 17...Qh3+! 18.Kg1 g5! *(18...0−0?! 19.Bf4 Nxf2 20.Rxf2 Qg4+ 21.Kf1 Bxf2 22.Kxf2 Qxf4 23.Qd5 Rae8 24.Bd3 Re5 25.Qxb7 f5 26.exf5 Qe3+ 27.Kg2 Qxd3 28.Nxe5 dxe5 29.Qb3+ Kh8 30.Rf1 Qd2+ 31.Kg1 Qg5+ 32.Kh1 Qh6+ 33.Kg1 Qe3+ 34.Kh1 Qh3+ 35.Kg1 e4 36.Qe6 Qg4+ 37.Kh2 Rd8 38.Kh1 Qh3+ 39.Kg1 Qg3+ 40.Kh1 Qh4+ 41.Kg1 Qg5+ 42.Kh1 e3 43.f6 gxf6 44.Qxf6+ Qxf6 45.Rxf6 e2 46.Re6 Rd1+ 47.Kg2 e1Q* winning *)* 19.Bxf7+! [On the same lines as the ancient continuation 4...Qe7 5.d4]

5.d4 Qe7 Eine Zugumstellung − gewöhnlich pflegt man ♕e7 schon im 4. Zuge zu spielen. Das hier gewählte Verteidigungssystem ergibt ein für beide Teile schweres Spiel, Weiß behält aber mehr Bewegungsfreiheit. (A) **6.0−0 Nf6!** Gegenüber der üblichen Spielweise ist der Textzug jedenfalls als eine Verstärkung zu betrachten; Weiß wird gezwungen, sich zunächst um seinen ♙e4 zu kümmern. (A) Die 1. Schwalbe, Vorbote des folgenden Ansturms des Nachziehenden auf das Bauernzentrum des Gegners. Tartakower/du Mont/ Alekhine: 'Alekhine: This move, introduced by me instead of the usual 6. . . .d6, leaves White less choice because e4 is not attacked.)'

[6...d6 7.a4 a6 8.Be3± (A)]

7.Re1

[The most lively continuation here is 7.Bg5 exd4 simplifies the game too much,]

[whilst 7.d5 Nb8 results in a

congested position.]

7...d6 8.a4 a6 9.h3

[9.Be3? Ng4! (A)]

[After the energetic 8. a4, this move shows over−anxiety and could prove a weakness in the king's field. An ambitious continuation is 9.Na3]

9...0−0

[9...h6?! Der unmittelbare Angiff mit g5 wäre bei der Schwebestellung im Zentrum zu gewagt. (A)]

10.Bg5

[⌓10.Be3 Jetzt aber war dies folgerichtig, um nicht den folgenden, für Schwarz vorteilhaften Zug h6 direkt herauszufordern. (A, Kotov)]

10...h6 Tartakower/du Mont/Alekhine: 'N'

[RR10...Re8 11.Na3 Bd7 12.Nc2 h6 13.Bh4 g5 14.Nxg5 hxg5 15.Bxg5 exd4 16.cxd4 Nxd4 1−0 Leonhardt, P−Rotlewi,G Karlsbad−02 International Masters 1911 (25)]

11.Be3 Tartakower/du Mont/Alekhine: 'N' Tartakower/du Mont/Alekhine: '[A trap (11....♘xe4 12.d5!, winning a piece]'

[11.Bh4 Tartakower/du Mont/Alekhine: 'RR' Kh8 nebst ♖g8 und g5. (A) *(11...g5? 12.Nxg5! hxg5 13.Bxg5+−; 11...Kh7 12.b4 Rg8 13.Nbd2 g5 14.Bg3 g4 15.hxg4 Bxg4 16.a5 Ba7* 1−0 Anand,V (2770)−Sundararajan,K (2245) Madras sim 1998 *)*]

11...Qd8!! Der schwerste Zug der Partie! Er zwingt den stark postierten feindlichen ♗c4 zu einer Erklärung, denn einerseits droht jetzt oder später die Auflösung ed: cd: d5!, andererseits bereitet er gegen den Normalzug 12. ♘bd2 die Antwort 12.−♘e4: nebst d5 vor; in beiden Fällen würde der Nachziehende ein recht bequemes Spiel erlangen. Nebenbei hat der Textzug auch den Vorteil, daß er dem schwarzen ♖f8 die e−Linie freigibt. (A) Tartakower/du Mont/Alekhine: 'Having fulfilled the task of guarding e5, the queen returns home, leaving the square available for the knight (12. d5 ♘e7). Alekehine: The most difficult move in the game: Black forces the bishop on c4, which is very unpleasant for him, to define its position before White has finished his development; in addition to this now the move ♘bd2 is hampered, on which at the present moment could have followed 12....♘xe4 (or 12....exd4 followed by ....d5); finally at the same time it prepares to activate the king's rook on the e−file. 07: Partially Fixed Formations: '!!'' Tartakower/du Mont/Alekhine: '07: Partially Fixed Formations: 'Alekhine described this as the most difficult move of the whole game. The intention is twofold: he gets his Queen off the file of the enemy Rook and prepares to play ... ♙d5, preceded by ... ♙xd4. Meanwhile, the e−file is reserved for a Black rook''

[11...Nxe4? 12.d5 Na5 13.Bxb6 cxb6 14.Ba2 f5 15.b4+−]

12.Bd3

[Here White had an opportunity of simplifying the game by: 12.dxe5 Nxe5 13.Nxe5 dxe5 14.Bxb6 cxb6± etc. with equal chances.]

12...Re8 13.Nbd2 Ba7!

Um der gelegentlichen Störung ♘c4 vorzubeugen. (A, Kotov) Tartakower/du Mont/Alekhine: 'A fresh preventive manoeuvre. Black's bishop on a7 not only anticipates an eventual 14. ♘c4, but also 14. d5, followed by 15. ♗a7, by which the structure of the black pawn

formation would have deteriorated.' Tartakower/du Mont/Alekhine: '07: Partially Fixed Formations: 'Maintaining the tension. This move robs White of a chance of playing ♘c4 later on with gain of tempo, and also prevents his from eventually breaking up the Black pawns by capturing first on e5 and then on b6'' **14.Qc2?!** Tarrasch empörte sich immer gegen das "Aufgeben des Zentrums", d. h. gegen ein Schlagen mit dem ♙e5 auf d4, weil Schwarz danach einen Zentrumsbauern weniger hat. Mag sein, daß er 14.♕c2 spielte, weil er annahm, der Gegner "hätte nicht das Recht", das Zentrum aufzugeben. Aljechin nutzt geschickt den Umstand aus, daß Weiß auf d4 nicht mit dem ♙c3 schlagen kann, weil darauf 15.−♘b4 folgen würde, und vernichtet das gegnerische Zentrum. Damit weist er nach, daß Weiß die Verteidigung des Zentrums ungenügend durchdacht hatte. Tartakower/du Mont/ Alekhine: '07: Partially Fixed Formations: 'Overprotecting his e−pawn in preparation for the maneuver ♘f1−g3''

[14.Qb1! exd4 15.cxd4! Nb4 16.Bf1 Nxe4? 17.Nxe4 Bf5 18.Bd2!]

14...exd4! Zur rechten Zeit, da jetzt 15. cd: wegen ♘b4 nebst ♘d3: schwach wäre. (A) Tartakower/du Mont/Alekhine: '07: Partially Fixed Formations: '!'' Tartakower/du Mont/Alekhine: '07: Partially Fixed Formations: 'At the correct moment Black abadons the centre'' **15.Nxd4**

[Tartakower/du Mont/Alekhine: 'If' 15.cxd4? Nb4 Tartakower/du Mont/ Alekhine: '07: Partially Fixed Formations: 'exchanging off White's strong King bishop'' 16.Qc3 Nxd3 17.Qxd3 Nxe4! 18.Nxe4 Bf5 19.Bf4! Qe7! *(19...d5 20.Bxc7!)* 20.Nc5 Qf6 21.Ne4 Qg6∓]

15...Ne5 16.Bf1

[Better than this full retreat is 16.Be2]

16...d5! Dieser Zug wird dadurch ermöglicht, daß sich f4 bis auf weiteres verbietet. (A) Tartakower/du Mont/ Alekhine: '↑' Tartakower/du Mont/ Alekhine: 'By this thrust in the centre Black assumes the initiative. 07: Partially Fixed Formations: '!'' **17.Rad1**

[Tartakower/du Mont/Alekhine: 'If' 17.f4 Ng6 Tartakower/du Mont/ Alekhine: '!' 18.e5 ist nicht spielbar wegen Nh5 mit Bauerngewinn. Tartakower/du Mont/Alekhine: 'with advantage to Black.' Tartakower/du Mont/Alekhine: '07: Partially Fixed Formations: 'wins a pawn'']

17...c5! 18.N4b3 Qc7 19.Bf4

Weiß hat bereits kein vollwertiges Spiel. (A) Die richtige Strategie des Nachziehenden hat bewirkt, daß das weiße Zentrum zerstört wurde und die weißen Figuren sich nicht am Kampf um die Zentralfelder beteiligen können. Tartakower/du Mont/Alekhine: 'Hoping to ease the tension by exchanges.'

[⌓19.exd5 Nxd5 20.Nc4 Nxc4 21.Bxc4 Nxe3 22.Rxe3 Rxe3 23.fxe3 Tartakower/du Mont/Alekhine: 'Black retains the two Bishops under favourable circumstances' Qe7!∓ (A), ∓ (Kotov)]

19...Nf3+! Tartakower/du Mont/Alekhine: 'Well thought out, for Black not only succeeds in massing his shock troops on the king side, but his sacrifice of a pawn is well grounded. 07: Partially Fixed Formations: '!'' **20.Nxf3 Qxf4 21.exd5?** Der entscheidende Fehler. (A, Kotov) Tartakower/du Mont/Alekhine: 'Alekhine:

The decisive mistake, after which the games ends rapidly.'

[21.e5□ Tartakower/du Mont/ Alekhine: 'stronger' Bf5 22.Qd2 Qxd2 23.Rxd2 Ne4 24.Rdd1 *(24.Rxd5? Be6!)* 24...Rad8∓ wäre für Schwarz günstig, aber noch nicht ausschlaggebend. (A, Kotov) Tartakower/du Mont/Alekhine: 'bishop pair']

21...Bf5! Tartakower/du Mont/Alekhine: 'The idea underlying this challenging manoeuvre is to turn aside the adverse bishop on e5 from his post of observation and then to pounce upon the denuded king's field.' **22.Bd3** Tartakower/du Mont/Alekhine: 'Plausible, but in the light of the preceding remark, it would have been wiser to play 22 ♕c1 or 22 ♕d2, although in either case Black would have regained his pawn with advantage. 22....'

[22.Qd2? Qxa4 23.Nc1 Bc2 24.Rxe8+ Rxe8 25.Re1 Ne4 26.Qf4 c4 27.Nd4 Bxd4 28.cxd4 Qb4!−+ (A, Kotov)]

22...Bxh3! Tartakower/du Mont/ Alekhine: 'Breaking down the hostile bastions (see note to White's 9th move) and threatening . . . . ♗xg2.'

[22...Bxd3? 23.Qxd3 c4 24.Qd2! (A)]

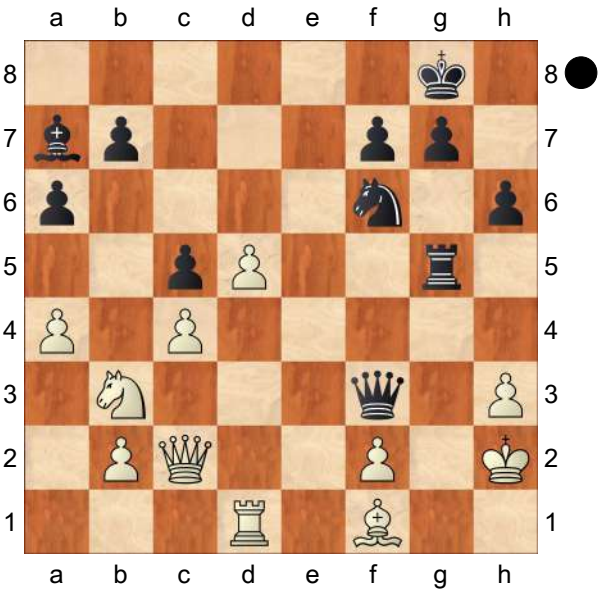
23.gxh3 Tartakower/du Mont/Alekhine: 'Here 23.♕e2, offered more resistance. 23....' **23...Qxf3 24.Rxe8+?** Das weiße Spiel stand natürlich hoffnungslos: aber durch den ♖−Tausch, welcher die e−Linie preisgibt, wird eine sofortige Katastrophe heraufbeschworen. (A, Kotov)

[By playing 24.Bf1 at once with the continuation 24.... Rxe1 25.Rxe1 Qxd5 White would have lost a pawn, but he would have avoided the subsequent catastrophe.]

24...Rxe8 25.Bf1 Tartakower/du Mont/ Alekhine: '07: Partially Fixed Formations: 'White has avoided the loss of a pawn, but now his King will soon fall'' **25...Re5** Tartakower/du Mont/ Alekhine: 'This frontal assault is decisive. ' **26.c4**

[26.d6 Auch dies würde die Textfortsetzung nicht beeinflussen. (A)]

26...Rg5+ 27.Kh2 Tartakower/du Mont/ Alekhine: '



' **27...Ng4+!** Tartakower/du Mont/ Alekhine: 'Super−brilliance.' **28.hxg4**

[After 28.Kg1 there is a mate in two by Nxf2+ dis. ch ; etc.]

28...Rxg4 Aufgegeben; das Matt ist nicht zu verhindern. (A) Tartakower/du Mont/ Alekhine: 'White resigns. Alekhine: Threatening an unavoidable mate. Editor's note: Tartakower shows a 29th move for both sides. Alekhine and the Tournament record shows only 28 moves.' **29.Bh3 Rh4** 0−1 (29) Tarrasch−Alekhine Baden Baden 1925

BCCS−BCCA match (6.1) 2000

1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3 Nc6 5.c3 d6 6.0−0 Bb6 7.Nbd2 0−0
[Interesting − particularly in view of the course of the Hassell − Smith game on bd. 2, is the game Renner − Hort, from the 1997 Bundesliga, whichwent 7...h6 8.Re1 g5 9.Nf1 Be6 10.Bb5 g4 11.N3d2 Nd7 12.Nc4 a6 13.Nxb6 Nxb6 14.Bxc6+ bxc6 15.f4 gxf3 16.Qxf3 Qh4 17.Ng3 h5 18.Rf1 Qg4 19.Qf2 Rg8 0−1, 34.]
8.Re1
[8.h3!?]
[8.Bb3!?]
8...Ng4 9.Re2 Not a comfortable square for this guy. **9...Nf6** In a way, an offer of a draw! **10.b4!?**
[10.Bb3!?]
10...a5 11.b5 Ne7 12.d4 Taking on some responsibilities. **12...exd4**
[12...Ng6!?]
13.cxd4 d5 14.Bb3 Bg4 15.e5
[15.Ba3 could lead to obscure

complications.]
15...Nh5 16.h3 Bd7 17.a4 Nf4 18.Re1 Nd3 19.Re3 Nxc1 20.Rxc1 Black has stolen the Bishop pair in a position where the White Knights have a limited number of good squares. All in all, a pretty good deal for him. **20...Nf5 21.Re1 c6** taking the d−pawn wasn't really a major threat, because the d5 pawn was hanging in return, so Black simply defends it. **22.bxc6 bxc6 23.Nf1 # 23...Rc8!** I like this move. One of the key areas in chess strategy is the pawn breaks available on the files closest to the centre. The one with ....f6 wouldn't be so good here, as it gives white a square for his Knights, so preparing for ....c5 is the logical step. **24.Bc2?!** But taking the pressure off d5 is really encouraging it. **24...c5!?** Perhaps he could have waited with this and played some consolidating moves first. **25.dxc5 Rxc5 26.Qd3 d4** The critical position of the game. **27.g4?!**
[Don't like this.Bringing in the useless Knight, with 27.Ng3 looks more to the point. For example Rc3 *(27...g6 28.Ne4 Rc8 29.Nf6+)* 28.Qe4 Rxc2 29.Nxf5 *(29.Rxc2? Nxg3∓)* 29...Ra2 30.Ra1 Rxa1 31.Rxa1 Bxf5 32.Qxf5 keeps White well in the game, although the d−pawn could well be an asset for Black.]
[RR27.Bb1 5.32 Shredder]
27...Rc3! 28.Qe4 Bc6! 29.Qxf5 g6 30.Qf6 Qxf6 31.exf6 Rxf3 With the Bishops still in hand, a giant passed pawn, and targets in the White position, black is doing very well, thank you.
32.Rb1
[32.Bxg6 Bxa4 doesn't really alter the assessment.]
32...Bd8 33.Be4 Bxe4 34.Rxe4 Bxf6 35.Rb5 Ra8 36.Rb7 h6 37.Nd2 Rd3 38.Nb3 # 38...Rd8 Getting on with it.
39.Nxa5
[39.Kf1 Rxh3]
39...Rd1+ 40.Kg2 d3 41.Nc6 Rd6 42.Ne7+ Kg7
0−1

□ **Aronson,V.**

■ **Umansky,Mikhail Markovich**

USSR ch−13 7778 1977

[Umansky,Mikhail]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.Qb3 The alternative

is 6 d4. **6...Nh6 7.d4 Na5 8.Qa4 Nxc4 9.Qxc4** Until not long before, this continuation, the 'copyright' on which dates back to La Bourdonnais, had been considered to favour White. **9...d5!** As the further course of the game shows, this continuation allows Black to count on an obvious advantage.

[9...Ng4 10.h3 Nf6 11.dxe5 d5∓ a variation suggested by Ravinsky, also gives Black a good game.]

10.exd5 In the endgame after 10 Qxd5 Qxd5 11 exd5 exd4 Black's two bishops and superior pawn formation give him the better chances. **10...e4 11.Ne5 f6!? 12.Bxh6** After

[12.Qb5+ Kf8 13.Nc4 a6 White loses his d5−pawn without any compensation.]

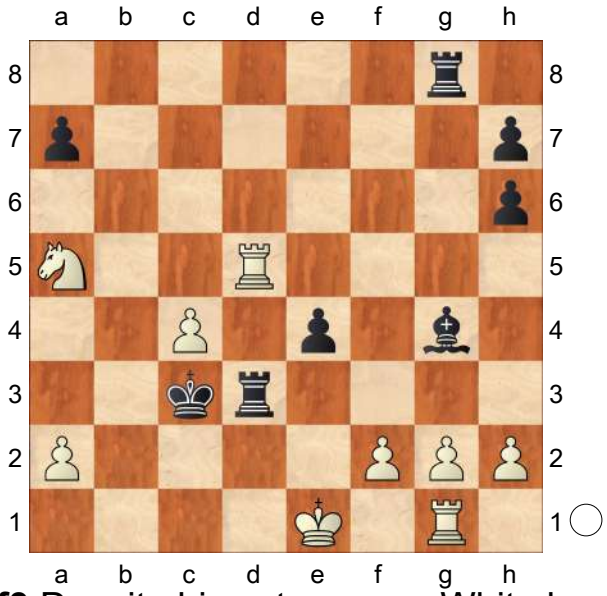
[The transition into the endgame is full of tactics. If 12.d6 there follows Bxd6! *(12...fxe5 13.dxe7 Qxe7 14.Ba3* is bad for Black *)* 13.Bxh6 fxe5 14.Bxg7 *(14.dxe5 gxh6 15.exd6 Qxd6 16.Qxe4+ Be6* favours Black *)* 14...Qg5 15.Bxh8 Qc1+ 16.Ke2 Bg4+ 17.f3 exf3+ 18.gxf3 Bxf3+ 19.Kxf3 Qxh1+ 20.Ke3 0−0−0 and White, despite his extra piece, is helpless.]

12...gxh6 13.d6 fxe5 The attempt to play by analogy with the previous variation − 13...Qxd6 14 Nf7? Qf4! − encounters a refutation: 14 Qf7+ Kd8 15 Qg7 Rf8 16 Qxf8+.

[13...Qxd6 14.Qf7+ *(14.Nf7? Qf4!)* 14...Kd8 15.Qg7 Rf8 16.Qxf8+!+−]

14.dxe7 Qxe7 15.Qb5+ c6 16.Qxe5 Qxe5 17.dxe5 Rg8 18.Nd2 Bf5 19.Rg1 Rd8 20.Nc4 Ke7 Black is aiming for the maximum centralisation of his pieces and in particular his king.

21.Nd6 Ke6 22.Nxb7 Rd5 After 22... Rb8 White consolidates his position by 23 Nc5+ Kxe5 24 Nb3. **23.Rb1 Kxe5 24.c4 Rd3 25.Na5 c5 26.Rb5 Bg4!** Sacrificing a pawn, Black breaks through with his king deep into the opponent's rear. **27.Rxc5+ Kd4 28.Rd5+ Kc3**



29.f3 Despite his extra pawn, White has no defence. Here are a few variations:

[29.Nc6 Rg6 30.Nxa7 *(30.Ne5 Rb6)* 30...Ra6 31.Nb5+ Kxc4 32.Rxd3 exd3]

[29.Nb3 a5

A) 30.Nd2 Rxd5 31.cxd5 Kd3 32.f3 e3 33.Nb3 Rc8 34.fxg4 a4;

B) 30.f3 Bxf3 31.Kf2 a4 32.Nc5 Rd2+ 33.Rxd2 Kxd2 34.h3 *(34.a3 Rc8 35.Nxa4 Bd1)* 34...Rc8 35.Nxa4 Be2;

C) 30.Nxa5 Ra8 31.f3 Rxd5 32.cxd5 Rxa5 33.fxg4 Rxa2]

29...Bxf3 30.Kf2 Bg4 31.Rc1+ Kb2 32.Re1 e3+ 33.Kg1 Also after

[33.Rxe3 Rf8+ 34.Rf3 Bxf3 35.Rxd3 Be4+−+ White cannot save the game.]

33...Kc2 34.Nb3 Rxd5 35.cxd5 Kd3

[35...Kd3 In reply to 36.d6 36...e2 is a mistake because of 37 Kf2, but by playing 36...h5! Black wins without difficulty (37 d7 e2 38 Kf2 Rf8+ 39 Kg3 Ke3). h5! *(36...e2 37.Kf2)* 37.d7 e2 38.Kf2 Rf8+ 39.Kg3 Ke3]

[19.Qh5 !?

A) 19...Kb7 (Ciro Fernandez) (Tartakower/du Mont) After , White could play 20.Bxg5 without any great problems. *(20.−−)*;

B) 19...g4 (Ciro Fernandez) (Tartakower/du Mont) , followed by ...Rg6, ...Kb7, ...Bd5, etc, but White could respond with Bf4, eyeing c7, and there would still be a tense struggle ahead]

19...Rxg5 20.Bxg5 Rg8 21.f4 Khalifman,A: '∞' Ciro Fernandez: 'Tartakower/du Mont: 'Khalifman,A: '∞'' Tartakower/du Mont: 'Khalifman,A: '∞' EXERCISE: White's reply was forced, to defend g2 with the queen. What did Lasker play now? ANSWER:'' **21...Bd5** Threatening 22 .... h6, which would also be available after 22. ♕h5 h6 (instead of 22 .... ♗xg2 23.♕xf7); 23. ♕xh6 ♕xh6 24.♗xh6 ♖xg2+, with advantage to Black. Ciro Fernandez: 'Tartakower/du Mont: 'Threatening 22 .... h6, which would also be available after 22. ♕h5 h6 (instead of 22 .... ♗xg2 23.♕xf7); 23. ♕xh6 ♕xh6 24.♗xh6 ♖xg2+, with advantage to Black. ' Tartakower/du Mont: 'Threatening 22 .... h6, which would also be available after 22. ♕h5 h6 (instead of 22 .... ♗xg2 23. ♕xf7); 23. ♕xh6 ♕xh6 24.♗xh6 ♖xg2+, with advantage to Black. Forcing another weakness in White's castled position, due to the threat of 22...f6 or 22...h6.'' **22.g3 Kb7** Ciro Fernandez: 'Tartakower/du Mont: 'A useful move, preventing any tactics based on a check on the back rank.''

[Nunn gave a sample line: 22...Qd7 (Ciro Fernandez) Tartakower/du Mont 23.Bh4 There were other options: for instance,

A) 23...Qh3 24.Qf1 and now Qxh4? fails to 25.Re8+ . *(25.−−)*;

B) 23...Kb8 , with the plan of ...Bb7 when as well as ...Qd5, Black has the extra option of ...Qc6; the black king could also shelter on a7 after ... a5. In any case, the plans ...Qd7−h3 and ...Bc6 with ...Qd5 are all latent in the position. We can see that the bishops of opposite colour work in Black's favour in this position.]

23.h3 Ciro Fernandez: 'Tartakower/du Mont: 'Steinitz has anticipated one of the ideas mentioned above; with 23 h3 and Kh2 he rules out the possibility of ... Qd7−h3, and furthermore it is now simpler for White to defend the h1− and g2−squares. EXERCISE: How did Lasker continue? ANSWER:''

[23.Qe5 h6 *(23...Bh1 24.Re2 Rg6 25.Bh4 Bf3 26.Rd2 Re6 27.d5 Qc5+ 28.Qd4 Qxd4+ 29.Rxd4 Re2∓)* 24.Bh4 Rg6 25.Qe8 Re6 26.Qxc6+ Kxc6 27.Rxe6+ Bxe6 28.Kf2 Kd5 *(28...Kb5* ?! *29.Ke3 Ka4 30.Be7)* 29.Ke3 =]

[23.Qh5 !? Bh1 24.Qh3∓]

23...Qb5 Ciro Fernandez: 'Tartakower/du Mont: 'Lasker continues with the plan of ...Bc6, followed by ...Qd5.''

[Another idea was possible, taking into account that the exchange of rooks can favour Black if his queen manages to infiltrate; so 23...Qg6 (Ciro Fernandez) (Tartakower/du Mont) was possible, trying to put more pressure on the white king with ...f6 and ...h5: As Nunn indicated, after ⊕

A) which would be lethal in the event of 24.g4 f6 25.Bh4 h5 , for example. *(25...−−)*;
B) Also after, for instance, 24.Kh2 f6 25.Bh4 h5 White is almost paralyzed, and Black can continue with ...Qf5, followed by activating the rook via the route d8−d6−e6. It's worth noting that with the bishop banished to h4, the exchange of rooks would bring the added threat of ...Qd3, since the exchange of queens would lead to the promotion of Black's pawn.;
C) 24.Qe5 Kc6 (threatening ...Qc2, so White must retreat) 25.Qe2 h5 26.Qd2 Qf5 27.Kh2 Rg6 followed by ...Ke6 White's position collapses]

[Not 23...Rg6? (Ciro Fernandez) (Tartakower/du Mont) due to 24.Qe8 .]

24.Kh2 Rg6 Ciro Fernandez: 'Tartakower/du Mont: 'Lasker isn't content to play good moves, such as 24...h5 or 24...Bc6, and tries to play ...f6 to displace the white bishop. This is a good plan, but requires a degree of care. "

[The idea behind 24...h5 (Ciro Fernandez) (Tartakower/du Mont) is a good one, to hinder g3−g4.]

[24...Bc6 (Ciro Fernandez) (Tartakower/du Mont) is also good, since 25.g4 can be answered with h5 , when the pawn is taboo due to ...f6, while after 26.Qe5 Qb2+ 27.Re2 Qb1 Black has successfully infiltrated and the white position is left very weak. Lasker's chosen plan is good, but it requires precision, since once the bishop has been forced back to h4 he will have to bear in mind White's possible idea of playing g4, followed by f5, when the bishop can be reactivated on g3, attacking the weak point on c7, and finally the bishops of opposite colour would give White some help.]

[Smith, Harding, Marin]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.0−0 d6 8.cxd4 Bb6 9.Nc3 Na5 10.Bg5 Ne7

In the second round when these players met again Clarke played 10...f6, and won again. **11.Nd5 f6 12.Bxf6 gxf6 13.Nxf6+ Kf8 14.Ng5! Nxc4**

[14...Ng8?! Chigorin−Urusov, corr 1884]

[14...Nf5? 15.Ngxh7+ Is N6xh7+ the same? Rxh7 16.Nxh7+ Kg7 17.Qg4+ Kxh7 18.exf5 Nxc4 19.Qg6+ Kh8 20.f6 Qf8 *(20...Qg8!?)* 21.Rae1 Ne5 22.dxe5 dxe5 23.Re4 Taylor−Zukertort, London 1874]

15.Qh5
[RR15.Qf3!? Blackburne−Leverson]
15...Kg7 16.Qf7+ Kh6 17.Ngxh7!?
This game was analysed by M. Marin in "Beating the Open games" as an illustration of why the Evans Gambit is dangerous. He was not recommending the line for Black. THe pointed out how the white Ns control squares that prevemnt Blakc's major pieces coming to the king's assistance on the back rank. "White's coordination is almost perfect now?" Blakc's K is completely immobilised and White can threaten mate with the "not very obvious advance of the g−pawn."
[17.Qh5+ Kg7 18.Qf7+ draws (Chigorin)]
[17.Nfxh7? Qg8!]
[17.Ng4+ Bxg4 18.Qf6+ Kh5! 19.Nf7 Ng8□ 20.Qxh8 Qf6 21.Qxh7+ Nh6 22.f3 Bxf3 23.g4+ *(23.Rxf3 Qxd4+)* 23...Kh4−+ Major Edwin Greig in his book Chess Recipes (1906)]
17...Bxd4? ? from Marin
[RR17...Nd2! (Marin) to exploit weakening of f3 when g−pawn advances. 18.g4 Nf3+ Temporarily controlling g5 19.Kg2 Threat Kxf3 followed by g5# *(19.Kh1* Houdini examines yjis *)* 19...Be6! Marin shows Ng5 inadequate 20.Qxe6 Nh4+ 21.Kg3 Rxh7!∞]
[RR17...Be6? 18.Qxe6 Rxh7 19.Nxh7+ Kxh7 20.Rac1 Ng6 21.Qf7+ Kh6 22.Rc3 Qh4 23.Rg3 *(23.Rh3? Qxh3 24.gxh3 Nd2∓)* 23...Qh5 24.Qxc4 Now Rh3 is a serious threat Kg7 25.f4+− Marin]
18.g4 Bxf6 19.Nxf6 Rg8 forced (?) asks Smith.
[19...Qf8 20.g5+ Kxg5 21.Nh7+ *(21.f4+? Kh6∓* 1st ed PEG *)* 21...Rxh7 22.Qxf8 a most unbalanced position which Clarke after long analysis thought might favour White. Fritz5 thinks it definitely is good for White. Nb6 probably *(22...Nd2 23.Kh1* Rg1+ *Nxf1 24.f4+* and Rxf1+−*; 22...Kg6 23.Kh1)* 23.f4+±]
[RR19...Ne5 20.g5+ Kxg5 Marin gives 21.Qg7+ *(21.f4+ Kh4 22.fxe5 dxe5 23.Kh1 Qf8 24.Qb3+−* Smith, to be checked ***)* 21...N5g6 22.f4+ Kh4 23.f5 "with the deadly threat Rf4" *(23.Nh7 Kh5 24.Rf3* Smith, to be checked ***)*]
20.f4 ? from Smith but Marin doesn't query it, finding a win later.
[Smith claimed to have found a win (this needs checking) with 20.Qh7+! Kg5 21.Nxg8
A) 21...Nxg8 22.f4+!? The whole line looks good for White, because White has regained material and still maintains an attack.. Kxg4 *(22...Kf6 23.Qh4+* wins the Q: I missed this move when analysing against P.H. Clarke. *)* 23.Rab1 (Mate in 6 − Chess Genius 4) Nd2 24.Kg2 h3+−. I think you will find this line correct. I have waited for 17 years in vain to play this against someone.;
B) 21...Qxg8 22.Qxe7+ Kxg4 *(22...Kh6 23.Qh4+ Kg7 24.Rac1* leaves Black with a very difficult defensive position: *ΔBe6* is bad because of *25.f4)* 23.Kh1 Kh5 What else is there? 24.Rg1 Bg4 25.Rxg4! Qxg4 26.Qh7+ Kg5 27.Rg1±]

20...Rxg4+ 21.Kh1 Qh8 22.f5?
[RR22.Rg1 "White would gain an irresistible attack" said Marin, to be checked ***]
22...Ne5−+ 23.Nxg4+ Nxg4 24.Qxe7 Qf6 25.Qxc7 Nf2+ 26.Kg1 Nxe4 27.Qa5 Bd7+−

New York State Ch. 1999

[Paul Motwani]

G12.6: "Night, night White!" H.Stenzel−I. Nikolayev, New York State Championship, New York 1999. Two Knights Defence. Black's speedy success in the following game is achieved with the help of the Two Knights Defence, and the same super−sharp opening is also the subject and title of a new Batsford book co−authored by Grandmasters Alexander Beliavsky and Adrian Mikhalchishin. They first help to give the reader a good feel for The Two Knights Defence by providing annotations to 18 typical games. There then follows a theoretical survey, including many references to correspondence chess encounters. "The Two Knights Defence" is reasonably priced at 12.99, making it a particularly tempting buy now in this 12th month of '99! (although I should add a note of caution: there are certain unfortunate omissions or lack of detail in some lines, but the Beliavsky/Mikhalchishin book will still be a useful reference work for many players). **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6**

[The most common alternative 3...Bc5 does not permit the opponent to play 4 Ng5, whereas the move 3...Nf6 actively provokes White's f3−knight to leap forward into the wild world of The Two Knights Defence.]

4.Ng5

[G12.6.1: The sharpest other route here is 4.d4 exd4 5.e5 and then the

"normal" response d5 features in game 18 of the aforementioned Beliavsky/Mikhalchishin book. It's also well−worth exploring the seldom−trodden path of *(5...Ng4!? 6.Qe2 Qe7* which was fine for Black in the game D.Bryson−P.Motwani, Glasgow Congress 1994. *)*]

4...d5

[The Wilkes−Barre Traxler variation 4...Bc5!? would take us into one of the most fascinating and complex mazes in chess theory. One typically razor−sharp continuation is 5.Nxf7 Bxf2+ 6.Kf1 *(6.Kxf2 Nxe4+ 7.Kg1 Qh4 8.g3 Nxg3* is also fun *)* 6...Qe7 7.Nxh8 d5 8.exd5 Nd4 9.d6 cxd6 10.c3 Bg4 11.Qa4+ Kf8! 12.cxd4 exd4 menacing ...Qe1 13.Kxf2 Ne4+ 14.Kg1 Qh4 which is incorrectly assessed as being equal by Beliavsky and Mikhalchishin. In this case, "Nunn's Chess Openings" looks deeper, and shows that White is lost after 15.h3 *(*or *15.g3 Qf6)* 15...Qf2+ 16.Kh2 Qg3+ 17.Kg1 Bf3 18.Bf1 Ng5!! Black then threatens 19...Bxg2! 20 Bxg2 Nf3+ 21 Kf1 Qe1, and the manoeuvre ...Ra8−e8−e1/e2 is also ready if required to quickly join in the relentless assault against White's shaken king.]

5.exd5 Nd4

[This Schlechter variation is one of four principal paths here, the other trio being 5...Na5]

[5...Nxd5 and]

[5...b5 which are of course all examined by Beliavsky and Mikhalchishin.]

6.c3

[G12.6.2: 6.d6?! Qxd6 7.Nxf7 *(7.Bxf7+ Ke7 8.Bb3 Nxb3 9.axb3 h6 10.Nf3 e4 11.Ng1* left White in a mess in the clash E.Bogolyubov−R. Reti, Stockholm 1919. *)* 7...Qc6! is tactically good for Black]

6...b5 7.Bf1

[G12.6.3 7.cxd4 bxc4 8.dxe5 can be met by Qxd5 and Black also obtained great activity after]

[7.Bd3 Bf5! 8.Bxf5 Nxf5 in the super−GM encounter A. Morozevich−J.Timman, Amsterdam 1996.]

7...Nxd5 8.Ne4

[G12.6.4: 8.cxd4 Qxg5 9.Bxb5+ Kd8! 10.Qf3 Bb7 11.0−0 Rb8! gave Black good play for his one−pawn deficit in A.Shabalov−A.Ivanov, USA Championship 1996,andnotethat 12.Qxf7?? loses to Nf6 with the deadly duo of threats 13...Qxg2 and 13...Bd5.]

8...Ne6

[This move has a better reputation than 8...Qh4]

9.Bxb5+ Bd7 10.Bxd7+ Qxd7 11.0−0 f5!?

[This vigorous example of my favourite "f for forward!" motto might even be a novelty, since my various sources only mention 11...Be7 or]

[11...Ndf4]

12.Ng3 g6 13.d4 exd4 14.cxd4 Bg7 15.Re1 0−0 16.Nc3

[Since 16.Ne2 would be terribly passive, instead White reluctantly lets Black immediately win back a pawn.]

16...Nxd4 17.Be3 Nxe3! 18.fxe3 f4

A strong and necessary follow−up to Black's last move. **19.exf4 Rab8 20.f5?** White should not allow Black's b8−rook

to invade at b2. **20...Rxb2 21.fxg6 Rff2** White is in really deep double trouble along the second rank. **22.gxh7+ Kh8 23.Nf1 Rxg2+ 24.Kh1 Qh3 25.Ne2 Rbxe2 26.Rxe2 Rxe2** and now came White's resignation, somewhat overdue. **0−1**

□ **Pridorozhni,A.**
■ **Ponkratov,P.**
18: Khanty−Mansiysk 2014
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Qf3!? This variation was popularized by van der Wiel in the 80's. White develops his queen, while simultaneously pinning the c6−pawn.
8...Rb8! The rook moves out of the pin and now White really does have to move his b5−bishop. In this game we will take a look at those lines where White doesn't capture on c6. We'll save those complications for the next game.
[8...Be7!? has also been popular lately and I see nothing wrong with this move either, but I really enjoy the positions after 8...Rb8 and think White even has to work very hard to equalize. Besides, I feel that 8...Rb8 carries some very nice and creative ideas.]
9.Bd3 Clearly the most popular retreat, taking control of the e4−square.
[Others: 9.Be2 doesn't challenge Black in any way. After Be7 10.Nc3 0−0 11.d3 Black can play Ng4! when he is ready to go ...f5 and the knight on g5 isn't very stable.]
[9.Ba4 is the only move that scores a respectable result for White, but Black has a very creative response in Rb4! . This idea is a common motif behind the move 8...Rb8. The rook can shift along the fourth rank to disturb White's coordination. Following 10.Nc3 h6 11.Nh3 , I like the untried Rd4! when the rook is centralized(!), and it's not so easy for White to get rid of. White should perhaps go 12.0−0 Bd6 13.d3 0−0 and with ...Bg4 in the air, Black looks a little better. Karpov would have been proud of this rook.]
9...Bd6! The latest practical games show that this slightly unusual move is the course of the future. **10.Nc3** The main move,
[but let's have a look at a few alternatives: 10.Ne4 is nothing to be bothered by. Black just goes Nxe4 11.Bxe4 0−0 followed by ...f5 with a strong initiative.]
[10.Bf5!? is an interesting attempt to trade off a light−squared piece. That would make White's development easier, but it also takes more time. Black should go Black should go h6 11.Bxc8 hxg5! . The open h−file provides Black with even more dynamic opportunities and he obtains a strong initiative after 12.Bf5 g6 13.Bd3 g4 14.Qe2 Kf8 15.Nc3 c5 16.Bb5 e4 .]
[10.h3!? was played by my old team mate Helge Wademark. It's a sensible move that eliminates all ...Bg4 threats. Black should respond with the accurate 0−0 11.Nc3 Bc7! which is clever prophylaxis. Black prepares ...e4 breaks should the white king stay in the centre, while against 12.0−0 we go h6 13.Nge4 Nd5! followed by ...f5 and the bishop is already tucked into safety on c7.]
10...Bg4! Now White has to choose where to put his queen. All the available squares have their problems. **11.Qe3**
[White's main try has been 11.Qg3 , which looks like a blunder due to e4 , but he can go 12.Qe3! when tactics

save him, temporarily at least. The problem is that White's development is very slow and after 0−0 13.Ngxe4 Re8! 14.f3 *(14.h3 Bf5 15.f3 Nd5* looks terrible for White *)* 14...Nd5 15.Nxd5 cxd5 16.fxg4 dxe4 17.Be2 Nc6 White has two extra pawns, but his pieces aren't playing. All of Black's pieces are active and, frankly, White should count himself lucky if he survives the next 10 moves.]

11...Nd5 12.Qg3!? A very nice idea. The g5−knight can be taken, but doing so would put Black's queen in an awkward pin. Unfortunately, these ideas rarely work out well for the side offering the bait.

[12.Nxd5 cxd5 is obviously not a solution, though, as Black's compensation is overwhelming.]

12...f5! A move any Two Knights player should enjoy. Now the g5−knight really is threatened, as well as ...e4. **13.Ne6?!** Under heavy pressure, White commits an understandable mistake.

[White's best try is 13.Nge4! which hasn't yet been played in practice. fxe4 14.Nxe4 might look like a desperate piece sacrifice, but White will win the g7−pawn, with some compensation. It does look like Black can get a sizeable advantage here as well, but the game is far from over: for instance, h5! 15.h3 Be6 16.Qxg7 Rg8 and now 17.Qxa7? *(* here White ought to prefer *17.Nxd6+ Qxd6 18.Qxa7* , but after *Nb7* Black's pieces start coming alive and the extra piece will soon be felt *)* , fails to 17...Be7! Surprisingly the white queen is completely cut off.]

13...Qd7 14.Nxg7+ Qxg7 15.Bxf5 This is the tactical idea White was relying on, but he's not going to get his piece back.

[However, 15.h3 can be met with Qe7! when the threat of ...e4 is quite serious.]

15...Rg8! 16.Ne4 Be7

[Maybe Black should have preferred 16...Nb7! when his advantage is clear.]

17.Bxg4 Qxg4 18.f3! This idea provides White with some counterplay. Black shouldn't exchange queens as then the h7−pawn would be extremely weak and Black's extra piece should really make itself felt in the middlegame. **18...Qe6! 19.Qf2 c5 20.d3 Nc6 21.0−0 Rg6 22.c3 Qf5 23.Kh1 Nf4 24.Bxf4 exf4** White is clearly in trouble, especially since Black has some initiative in the centre and on the kingside. **25.Rad1 Rd8 26.d4 cxd4 27.cxd4 Nb4!** The black knight would be splendidly placed on d5, where it looks towards e3. This can't be allowed by White, who tries to complicate matters. **28.d5! Nxd5 29.Qxa7 Kf8 30.Rf2 Rc8 31.Qa5 Ne3 32.Qxf5+ Nxf5** We have reached a complex endgame where White has three pawns for the piece, but Black is still the one with all the chances. White's pawns on the kingside are severely restricted and the pawns on the queenside are far from dangerous yet. **33.a3 Bd8!** Redirecting the bishop to a dangerous diagonal. **34.b4 Bb6 35.Ra2 Rc4 36.Nd2??** A terrible blunder. Because we're close to move 40, it's very possible that White was in bad time trouble. **36...Ng3+** . A neat finish. **0−1**

□ **18) All the Games: 7...Nge7**
■ **3) Maximo Ramos vs. Marc Cape,B**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 Nge7 8.Bg5 Qg6 9.Be3 This retreat is discussed in chapter 11 [/course/80564/11]. **9...0−0 10.Nbd2 Kh8!?**
[A high−class prophylactic waiting move? For 10...b6 see the trainable sections in chapter 11 [/course/80564/11] and chapter 13 [/course/80564/13].]
11.Nh4!?
[White apparently loses a move by this adventure. Pulling back to 11.Bd3 makes sense, and then Black's normal Queenside fianchetto looks a bit too ' $14 ' normal, compared to the chapters mentioned above. Black may as well take advantage of another plan behind his last move − the pawn at f7 is now free to join the battle. The immediate 11...f5 , and the delayed version with 11...exd4 first, are covered in lessons 5−7 of chapter 9 [/course/80564/9]; in lesson 4 [/variation/14308798] of chapter 13 we get here by an alternate move order.]
11...Qf6 12.Nhf3 h6
[In the spirit of our old−school [/course/80564/15] variation. He might have tried 12...b6∞ instead, going with the basic formula.]
13.Rb1
[Or 13.Bd3 Ng6 14.Nc4 b6∞ with a level game. Compare lesson 2 [/variation/13943385/#/11/w] of chapter 16.]
13...Ng6 14.g3 Good play − White

controls f4 and envisions the h2−h4−h5 march. Also 14.Bd3 is reasonable, answered by 14...Be7 $13 and stability when (...d7−d6 follows.

[Another scheme is the pressure move 14.Bd5 , an often seen maneuver indirectly touching e5 along with anything on the d5−a8 diagonal. Black can respond 14...exd4 15.cxd4 Bf4 $13 , with equilibrium and a pawn.]

[But answering 14.Bd5 with b6?! , pinning one's own Knight, looks doubtful after 15.Nxe5 Bxe5 16.dxe5 Qxe5 17.f4± and White is taking over the board.]

14...b6 15.Bd3 Na5 16.Ne1

[White seems to falter. He avoided 16.Nb3 when Nxb3 17.axb3 repairs his pawn structure at least, but leaves little compensation. Then Bb7∓ and Black's game is preferable − he has all of his pawns!]

16...c5?!

[No need to lash out at White's center; develop 16...Bb7! is best, and find out what the opponent is thinking. 17.Ng2 Oh, that. Red alert! Rae8 18.f4 exf4 19.gxf4 Nh4 The only way. 20.e5 Qd8 21.Ne1 g6! 22.f5 Rg8 23.f6 Black's h−pawn was bait, a tactical trap. Bf8∞ and unclear. Very unclear.]

17.d5?!

[After 17.dxc5 Bxc5 18.Bxc5 bxc5 White stays in the game by 19.Qa4∞ or 19.Rb5 $13 with Queenside activity.]

17...Nf4∓ 18.Ndf3!? Nxd3 19.Qxd3 g5

[Active and good, but 19...Bc7∓ is a path to consolidation.]

20.h4?! g4∓ 21.Nh2 Rg8?

[21...Qg6!∓ is much better, preventing h4−h5 by White, which he misses anyway.]

22.Ng2∞ Bf8?

[Black might have chosen 22...Qg7∞ or]

[22...Be7∞ , fighting on in either case.]

23.f3±

[White enjoys a clear advantage now, as he would if 23.f4± instead.]

23...gxf3 24.Rxf3 Qg6 25.Rbf1 d6 26.Bd2 Threatening Black's f−pawn for real now. **26...Rg7 27.Rf6?**

[The text changes everything! Instead 27.g4! is an excellent move, e.g. Rh7 Nothing is any better. Not 27...Bxg4? 28.Rf6+− winning. Now 28.h5 Qg8 29.R1f2 and White has worked up a strong attack. Black must resort to Nb7 30.Qf1 Nd8 when 31.Nh4 is simply winning for White.]

27...Qxg3∞ Unclear...again. **28.Qxg3 Rxg3 29.Rxf7 Bg7 30.Kf2?**

[He had to play 30.Be1 and then Rd3 31.Rc7 Bh3 32.Rff7 Rg8∞ is dangerous for all concerned parties.]

30...Rh3 Now Black is winning. **31.Nf3 Kg8 32.Rc7 Bg4 33.Nge1 Nc4** A dream outpost for the Black Knight!

34.Bc1 Kh8?!

[This wasted move drains a lot of mojo from Black's game. He stands better, of course, but the obvious 34...Rf8 wins after 35.Kg2 a5 , etc.]

35.Rg1 h5∓ 36.Ng5? Rf8+ Winning... again. **37.Kg2 Rxc3 38.Ne6 Bxe6 39.dxe6 Rxc1** The Bishop had nowhere to go anyway. **40.e7 Re8 41.Rd7 Kh7**

[41...Bf6 directly is even quicker.]

42.Rf1?! Ne3+
0−1

C51

□ **Pirrot,D.**
■ **Jenni,F.**
Cappelle la Grande 2002

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.Qb3!? This was Labourdonnais' novelty in 1835. It is interesting that it was almost another 100 years before 6 Qb3 was tried again in a tournament game. **6...Nh6 7.d4 Na5 8.Qb5**
[8.Qa4 is strongly met by Nxc4 9.Qxc4 d5! *(*not *9...exd4?! 10.Bxh6 gxh6 11.cxd4 d5 12.exd5 Rg8 13.g3 Bh3 14.Ne5 Bd6 15.Nc3 Kf8 16.f4 f6 17.Nd3 Qe8+ 18.Kf2* and White is better *)* 10.exd5 e4 11.Ne5 f6 12.Bxh6 gxh6 13.d6 fxe5 14.dxe7 Qxe7 15.Qb5+ c6 16.Qxe5 Qxe5 17.dxe5 Rg8 18.Nd2 Bf5 and the game was more or less equal in V.Aronson−M.Umansky, correspondence 1978.]
8...Nxc4 9.Bxh6 gxh6
[Or 9...Nd6 10.Qxe5 Nxe4 11.Bxg7 Rg8 12.Qxe4 *(12.0−0 d5 13.Nfd2 a5!* is good for Black, who threatens the manoeuvre ...Ra6−g6 in some lines: *14.Nxe4 dxe4 15.Bh6 Bh3 16.Bg7 Ra6! 17.gxh3 Re6 18.Qxa5 Rxg7+* and Black was much better, G. Binder−M.Rocius, correspondence 2001 *)* 12...Rxg7 13.0−0 d5 14.Qe5 Kf8 15.Re1 Qd6 16.Qe2 Bh3 17.g3 f6 18.Nbd2 Kg8 19.c4 c6 with a mess in A.Morozevich−E. Bacrot, Sarajevo 2000.]
10.Qxc4 exd4 11.cxd4 c6!
[This is much better than 11...d6?! 12.0−0 0−0 13.Nc3 c6 14.Rab1 , which gives White the superior game.]
12.d5! White has no choice here. This is chess, and often you have to prevent your opponent's ideas with simple moves.
[Instead after 12.0−0 d5! 13.exd5 Qxd5 14.Qe2 Bg4 15.Nbd2 Be6 16.Rfc1 0−0 Black is slightly better, R. Zelcic−D.Sermek, Pula 2001.]
12...Bf6 13.e5 Bg7 14.d6?
[White needs to fight for control of the centre and after this move he loses all his flexibility. Probably he was afraid of something like 14.0−0?! d6 15.dxc6 dxe5 16.Nxe5 0−0 17.c7 Qd6 18.f4 Be6 19.Qc3 Qb6+ 20.Kh1 Rac8 and Black has the advantage.]
[However, White had a stronger option in 14.Nc3 f6 *(*if *14...0−0?! 15.0−0 d6 16.dxc6 bxc6 17.Rfd1 Be6 18.Qa4 d5 19.Rac1* and White is at least slightly better *)* 15.Ne4 Qa5+ 16.Kd1
A) not 16...cxd5? 17.Nd6+ Kd8 *(*or *17...Ke7 18.Qg4)* 18.Qxc8+ Rxc8 19.Nxb7+ and White wins;
B) 16...Qxd5+ 17.Qxd5 cxd5 18.Nd6+ Ke7 *(*if *18...Kf8 19.Re1!* and White retains the pressure *)* 19.Nf5+ Kf7 20.Nxg7 Kxg7 21.Re1 with fine compensation for the two pawns. I do not want to give a more conclusive evaluation than this, though it seems likely to me that White could be a little better.]
14...b5! 15.Qg4 0−0 16.Nbd2
[Also after 16.0−0 f6! 17.a4 fxe5

18.axb5 e4 19.Nd4 Qf6 20.Ra4 e3 Black has a clear advantage.]
16...f6! 17.0−0 fxe5 White does not have compensation for the material. It is as simple as that. **18.Rae1 Qf6 19.Qb4 a5 20.Qc5 Qe6 21.a4 bxa4 22.Nxe5 Qd5 23.Qxd5+ cxd5 24.f4 Ra6 25.Ra1 Rxd6 26.Rxa4 Ra6** Black is winning. **27.Nb3 d6 28.Nf3 Bd7 29.Rxa5 Rxa5 30.Nxa5 Rxf4 31.Rd1 d4 32.Nb3 Ba4 33.Rd3 Bb5 34.Rd2 d3 35.Nc1 Bc3 36.Rd1 d2 37.Nxd2 Bxd2**
0−1

□ **Corzo y Prinzipe,J.**
■ **Capablanca,J.**
8th matchgame 1901
[Cyrus Lakdawala]

Corzo, our hero's early rival, later went on to become one of Capablanca's biggest fans, even writing a regular column in - what else? - 'Capablanca Magazine'. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6** QUESTION: Still a Vienna? ANSWER: The game transposed to a line of the King's Gambit. We choose our openings as a way of reflecting our natures. The King's Gambit and Colle player are two very different people. **5.d3 d6**
What 12−year−old isn't delighted to enter the violent Hamppe−Allgaier Gambit on either side? QUESTION: Isn't it an unsound gambit? ANSWER: Relax and allow Corzo his fun. I believe it was H.L. Mencken who defined puritanism as a fear that someone, somewhere, was having a good time! A century ago, the line was exceedingly dangerous to Black. Today, the computers have proven you correct and ruined White's fun with powerful defensive schemes favouring Black. Just as people are born, live their lives, and pass away, the same holds true for some chess openings. GM Nigel Short has an amusing theory about the King's Gambit in general: "The only reason the King's Gambit is playable is because Black has about ten good lines, but he can only play one at a time. That's actually why it's okay." **6.0−0**
We are reminded of the Men at Work song: "Who can it be knocking at my door? Go away! Don't come round here no more!" QUESTION: A blunder? White's knight is trapped. ANSWER: The knight is on a suicide mission, a deliberate piece sac for initiative and attack. **6...0−0 7.Bb3 a6 8.Nbd2**
Others: **8...h6** A pawn is a tiny investment if he gets rapid development in exchange. **9.Re1 Ba7 10.Nf1 Be6! 11.Ng3** Now the h1−rook remains unused for the remainder of the game. **11...d5!!** This brilliant return sac takes firm control over the initiative. **12.exd5** QUESTION: What compels White to accept? He can just pick off f4 instead. **12...Nxd5 13.Bd2 Qd6!** The point. Black threatens the devastating ...Bc5. **14.Qe2 Nf6 15.Bc2** After the queen exits, the knight proves to be an unreliable understudy. **15...Rfe8 16.h3**
EXERCISE (planning): The fight for d4 is the centre of gravity in the universe. It looks like White has everything under control. He doesn't. There is an odd but strong way for Black to increase the pressure on d4. How? ANSWER: **16...Rad8!** Threat: ...Rxd4!. **17.b4**
His king needs air. **17...b5 18.a4 Bb6**
How annoying for White: f4 remains defended. Even from an early age, Capa's pieces magically coordinate despite raging complications. **19.a5**
Threatening to poke both black rooks along the a1−h8 diagonal. **19...Ba7 20.Rac1 Qd7 21.Be3** White fires a bullet into the wall to test the forensics of the position. The move is also a diversionary tactic designed to try and throw the young Capa off. EXERCISE (critical decision): It looks like White managed to develop and now hopes to grab some initiative. What should Black do about it? ANSWER: The exchange

sac gives Black a crushing attack. **21...Bxe3! 22.fxe3 Bd5!** Clearance. A powerful early display of Capa's nimble feel for where his pieces should go: f4 is ripe for occupancy. **23.e4 Be6 24.Qf2** ANSWER: The white king's fevered dreams conjure very real phantoms, as he tosses in his sweat−soaked bed. **24...Qe7! 25.Re3 Rd6 26.Rf1 Red8 27.Nd2 Nd7 28.Rd1! g6 29.Ngf1** leaves White completely helpless. Are you ready for a mindblower fact? Hooper and Brandreth claim in 'The Unknown Capablanca', that the prodigy consumed just five minutes on his clock for the entire game. **29...Ncb8 30.Nb3** ! **30...Bxb3 31.Bxb3! c5 32.Rg3!** and White is curiously helpless against the inevitable ...Ne2 mating pattern. EXERCISE: White's defences - layers on an old wedding cake - crumble. After **32...cxb4** Black can force resignation in a few moves. How would you play here? The tricky **33.Ne3** is met by the counter−tricky **33...Kh8!** . Black's initiative also rages on after **34.Nd5 Qe6 35.Rf3!** (the only move) **35...bxc3 36.Rxf7 Nc6! 37.Rf1 Nd4** . ANSWER: Let's take a look at your line: **38.Kh2**

[38.Ba2 Qxf7 39.Qxf7 Rf8 40.Qxf8+ Nxf8 41.Rxf8+ Kg7 42.Rf1 c2 43.Kf2 b4 44.Rc1 b3 45.Bxb3 Nxb3 46.Rxc2 Nxa5 47.Rc7+ Kf8 48.Rc8+ Kf7 49.Nb4]

38...Nxb3 (threatening a nasty queen check on c5) **39.Nc7 Nd2**

[39...Qxf7 40.Qxf7 Rf8 41.Qe7]

40.Nxe6 Nxf1+ 41.Qxf1 (to make air for the king) **41...Rxe6 42.Rh7+ Kxh7 43.Qf7+ Kh8** and White's initiative comes to an end. Corzo's attempted improvement over his unsound **44.Qxe6? c2 45.Qc6 Nf8 46.Qxc2 Re8** , which gave Capa a winning position in the sixth game, although he botched it and only drew. Capablanca writes: "Corzo analyzed the position and told someone that he should have played K−B2 (10 Kf2). When I heard this I analyzed the situation myself and decided to play it again, as I thought that Black should win with the continuation that I put in practice in this game." Very sneaky! So the prodigy went home and began studying the position and came up with a fantastic idea in his home prep. **47.Qc5** looks better than Corzo's choice, but even here White is hard pressed to prove he gets full compensation for the piece. a) **47...Kg8 48.h4!** (a quick ...d7−d5, even at the cost of a pawn, is standard operating procedure in Black's simple goal of survival) **48...Re6 49.d4**

[49.g4 Kf7 *(49...h5 50.gxh5 gxh5 51.Qf2 b4 52.Qf5)* 50.Qc1

A) 50...Kg7 51.Qc7+ Kg8 *(51...Kf6)* 52.Kg3 Nh7 53.g5 hxg5 54.hxg5 Nf8 *(54...Nxg5 55.Qd8+)* 55.Kf3 Re8 56.Ke3 Re6 57.d4;

B) 50...Nd7 51.Qxh6]

49...exd4 50.Qxd4 (goading White forward) **50...Kf7 51.g4**

[51.Qa7+ Ke8]

51...Ke8 52.Kg3 g5 53.hxg5

[53.Qd5 gxh4+ 54.Kxh4 Ng6+ 55.Kg3 Nf8]

53...hxg5 54.Qd5 , when Black achieved a light−square blockade and stood clearly better, G.Welling−V. Mikhalevski, Gibraltar 2008. **54...Rg6 55.Qe5+** comes to the same thing b) **55...Kd7 56.Kf3 Kd8 57.Ke3!**

looked like shaky compensation for the invested piece, T.Kalisch−L.Hazai, Gold Coast 1999. QUESTION: Why not **57...Kd7** ? ANSWER: White gets reasonable compensation for the piece after **58.Qd5+ Ke8 59.e5 Ke7 60.Ke4** , J.Goetze−D.Rupel, Seattle 1984. Today, the Vienna Game is more commonly met by **60...Re6 61.Kf5 Rg6** . **62.e6**
[62.Qb7+ Ke8 63.Qc7]
62...Rf6+
[62...Rxe6 63.Kxg5 Ng6 64.Qc5+ Ke8 65.Qc8+ Kf7]

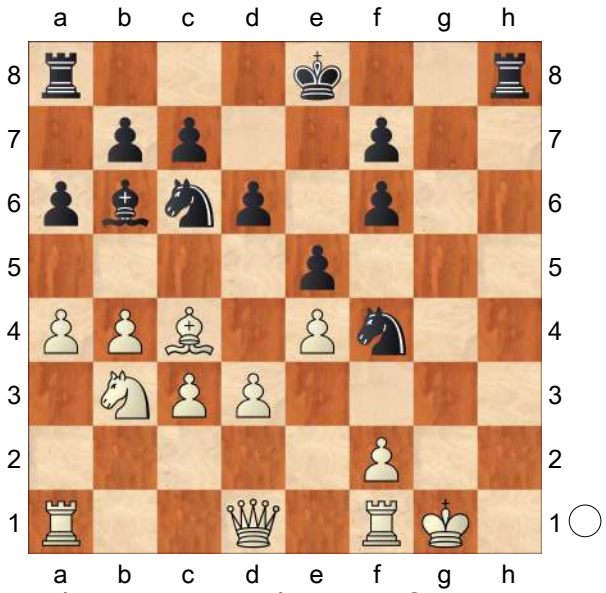
□ **Belmonte,Italo**
■ **Melao,Hindemburg**
Itau Mercosul Cup 3rd (5) 18.10.1999
[Melao,Hindemburg]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4!? Bb6 Creio que a Defesa proposta por Lasker seja a melhor maneira de combater o Gambito Evans, mas eu não estou a par das novidades nessa variante, por isso achei melhor jogar algo mais tranqüilo. **5.0−0 d6 6.c3 Bg4 7.a4**
[uma interessante combinação surgiria com 7.d4 Nxd4! *(7...exd4!?)* 8.cxd4 Bxd4 9.Bxf7+ Kxf7 10.Ng5+ Qxg5! 11.Qxd4! Qxc1 12.Qd5+ Be6 13.Qxe6+ Kxe6 14.Rxc1 c6−+ e as Pretas devem vencer o final]
7...a6
[7...a5 8.b5 Nb8 *(8...Nce7? 9.Bxf7++−)* 9.d3 Nf6 10.Be3 Nbd7=]
8.d3 Qf6!? 9.Nbd2=
[9.Be3!?]
[9.Bg5!?]
9...Nge7 10.h3 h5 11.Qb3?
depois desse lance aparentemente natural, não vejo de que modo as Brancas podem salvar a partida.
[11.Nb3
A) 11...Ng6 12.hxg4 *(12.Bg5?! Bxf3 13.Qd2 Bxg2! 14.Bxf6 Bxf1 15.Kxf1 gxf6⩱)* 12...hxg4
A1) 13.Ng5? Nf4 14.Qxg4 *(14.Nxf7 Rh1+! 15.Kxh1 Qh4+ 16.Kg1 g3−+)* 14...Qxg5! 15.Qxg5 Ne2#;
A2) 13.Bg5! gxf3 14.Bxf6 fxg2 15.Kxg2 Nf4+ 16.Kf3! *(16.Kg1 gxf6⩱*
(Diagram)



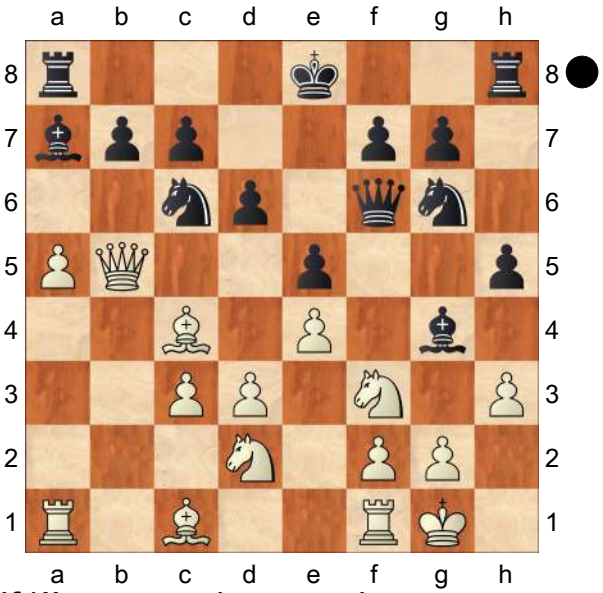
) 16...Rh3+ *(16...gxf6 17.Rh1+−)* 17.Kg4 gxf6 18.Rh1 0−0−0 19.Rxh3 Rg8+ 20.Kf3 Nxh3 21.Qh1+−;

B) 11...Bxf3 12.Qxf3 Qxf3 13.gxf3=]

11...Ng6−+ O plano das Pretas é muito claro, enquanto as Brancas não dispõe de um contra−jogo bem definido. A única maneira das Brancas conseguirem se manter no partida é provocando rupturas na ala da Dama, caso contrário, as Pretas desenvolverão tranqüilamente um ataque vitorioso na ala do Rei.

12.Bxf7+ pode−se argumentar que esse lance é mau porque perde uma peça, mas que outra alternativa tinham as Brancas? Vejamos algumas possibilidades:

[12.a5 conduziria a um jogo muito animado e rico em complicações, mas não seria suficiente para que as Brancas pudessem sobreviver. As Brancas abririam linhas pela ala da Dama e fatalmente ganhariam material, enquanto as Pretas apostariam todas as suas fichas num ataque ao roque. A melhor coordenação entre as peças Pretas lhes confere vantagem suficiente para vencer. Vejamos: Ba7 *(12...Nf4 13.axb6 Bxh3 14.Bxf7+! Ke7 15.gxh3 Raf8 16.h4 Rxf7 17.Ng5+−)* 13.b5 axb5 14.Qxb5



Nf4!! em vez de se resignar a um papel passivo, as Pretas precisam jogar energicamente, mesmo que isso custe material pesado. 15.Qxb7 0−0!

□ **T.Warakomski**
■ **M.Bartel**
Polish League, Karpacz 2008
[John Emms]

The previous five games covered the 'main line' with Re1 and h3. In the next few games we consider alternative options for both colours, beginning with some kingside aggression from Black: **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3** This could, and often does, lead to the main line after 8...0−0 9 Re1. But get ready for something a bit different...

[Clearly what follows is a line we need to avoid, at least if we are playing White! But how should we do this? As far as I can see, the safest way - assuming our aim is to reach the main lines - is to play 8.Re1 instead of 8 h3. If Black plays h6 we can reply with 9.Nbd2! . It's true that Black can still insist on kingside aggression by playing g5 , but the key difference here is that White has avoided presenting Black with a 'hook' (h2−h3) and this means Black has to work that much harder to engineer activity on the kingside. Here's an example: 10.Nf1 g4 11.N3d2 *(*if *11.Nh4* , Black has *Nxe4)* 11...h5 12.Nc4 h4 13.Be3 Bxe3 14.Ncxe3 Bd7 15.a4 Rg8 *(*if *15...h3* , White blocks things up with the simple *16.g3)* 16.Ba2 Ne7 17.d4 h3 *(17...Nxe4 18.dxe5 dxe5 19.Nd5* opens the centre up, which can only be in White's favour *)* 18.dxe5 *(*the safer *18.g3* still looks good *)* 18...hxg2 19.Ng3! dxe5 20.Qb3 Rg7 21.Qxb7 Bc6 22.Qb4 Rb8 23.Qc4 and White was clearly on top in the game A.Minasian−A. Aleksandrov, Podolsk 1990.]

[After 8.Re1 , there's another caveman−style approach to consider: Ng4!? .

A) I must confess that until a couple of days ago I didn't think much of this move at all. I realized that White needed to avoid 9.d4? exd4 10.cxd4 , on account of the typical trick Nxd4! 11.Nxd4 Qh4 , when White is in some trouble. However, after 9 Re2, surely Black's knight is misplaced on g4 and he will lose time in the long run, won't he?;

B) Judging by a severe lack of games with 9...Ng4, many players must have agreed with me on this point, and when Sam Collins played it against me (British League, 2010) I was genuinely surprised. More to the point, as far as I can see, he has found a way to make this playable for Black! The game went 9.Re2 Qf6! *(*if *9...0−0* , White plays *10.Bg5!* intending *Qe8 11.h3)* 10.Nbd2 *(*Mickey Adams suggested *10.Na3*

to prevent Black's next move *)* 10...g5! . This is a key idea, without which White would just play Nd2−f1 and then h2−h3 only when the time is right. The point is that Black is now simply threatening to win material with 11...Nxf2! 12 Rxf2 Bxf2+ 13 Kxf2 g4, and this forced me to take action in centre earlier than I might have wanted to. The game continued 11.d4! Bd7 *(11...exd4 12.e5! dxe5 13.Ne4* is very promising for White *)* 12.Nf1 Rg8 . At this moment I was tempted by the idea of getting a knight to d5, but 13.Ne3?! *(*I should have kept the knight on f1 and chosen *13.Be3* , when White can meet *Nxe3* with *14.fxe3!* strengthening d4, blocking the a7−bishop and preparing to use the f−file *)* 13...0−0−0 14.Nd5? Qh6 took too much time. The knight was achieving little on d5 and Black was developing some nasty threats on the kingside. There are alternatives for both sides earlier on, but judging from this evidence 9... Ng4 cannot be dismissed as a bad move.;

C) 9.−−]

8...h6!? Fair enough. Black often plays this move. **9.Re1?! g5!** But not this! Suddenly it becomes clear that Black doesn't have to castle kingside after all, and White's early h3 has provided enough encouragement for this aggressive pawn lunge. The roles have been reversed: Black is trying to do to White what White often did to him in Chapter One! **10.Be3**

[10.Nh2 tries to prevent ...g4, but fails. This move hasn't fared well in practice: Rg8 *(*Black can also play *10...g4* immediately: *11.hxg4 Rg8 12.Qf3 Qe7 13.Be3 Bxe3 14.fxe3 Bxg4 15.Nxg4 Nxg4* with at least equality for Black, M.Adams−A.Shirov, Elista 2007 *)* 11.Be3 g4 12.Bxa7 gxh3! was played in Hou Yifan−P.H. Nielsen, Amsterdam 2009.

A) In the game the young Chinese grandmaster accepted a clear disadvantage after 13.g3 Nxa7 14.Nd2 h5 15.Kh1 Qe7 .;

B) Let's see what might happen if White's tries to hold on to the extra piece: 13.Be3 Rxg2+ 14.Kh1 Ng4! 15.Nxg4 *(15.Nf3* is met by *Rxf2!* followed by ...Qf6 *)* 15...Bxg4 16.Qc1 *(16.f3 Qh4!* is crushing *)* 16...Qf6 17.Nd2 0−0−0 18.Bd1 Rg8 19.Bxg4+ R8xg4 . With ...h2, ...Qh4 and ...Rg1+ on the horizon, it's difficult to see how White can escape unharmed.;

C) 13.−−]

10...Bxe3 11.Rxe3 g4! Simple, direct and very strong. **12.hxg4 Nxg4 13.Re2 Qf6 14.Nbd2 Bd7 15.Bd5** Getting out of the way of the b−pawn and thus enabling the plan of b4, a4 and b5. **15...0−0−0** Let's take stock of the position. The players have castled on opposite sides, and as usual the key factor is how quickly each side can organize his attack. Black enjoys a clear advantage simply because the open g−file gives him a significant head start. **16.b4 Ne7! 17.Ne1**

[A sad retreat. White would rather avoid an exchange on d5, but after 17.Bb3 Ng6 (threatening ...Nf4) 18.g3 h5 followed by ...h4 things are going to turn ugly.]

17...Nxd5 18.exd5 h5 Planning ...h4 and ...Qf4, and also the following piece sacrifice: **19.f3 Qf4! 20.Nf1**
[If White accepts the knight, the attack down the newly opened h−file proves to be too strong. For example, 20.fxg4 hxg4 21.Re4 Qh2+ 22.Kf2 f5 23.Rc4 f4 24.Nf1 g3+ etc.]
20...Nf6 21.Qb3 Rdg8 22.a4 h4 Now it's full steam ahead for Black. In contrast, White's demonstration on the queenside looks a bit lame. **23.b5 h3 24.bxa6 bxa6 25.Qc4**
[Or 25.Rb1 Kd8 and White's 'attack' reaches a dead end.]
25...hxg2 26.Rxg2
[If 26.Qxf4 , Rh1+! 27.Kf2 g1Q# is a good zwischenzug!]
26...Rxg2+ 27.Nxg2 Qxf3 28.Rb1 Ng4 29.Rc1
[Not waiting for the inevitable 29.Rc1 Qf2# .]

□ **Euwe,Max**
■ **Reti,Richard**
Match Reti−Euwe +3−1=0 (1) 30.05.1920
[ChessBase]

Paul Motwani: 'G9.17: "Reti repeat of a yeti−like crush!" Scotch Gambit, Code C56. Recently I was studying GM Lasha Janjgava's extremely detailed GAMBIT book, "The Queen's Gambit & Catalan for Black", and I found myself thinking about the enormous increase in chess data that is readily available to competitors nowadays in comparison to the relatively tiny quantity of information which even GMs of the past had to make do with. To take a particularly potent example, if ChessBase had existed in the days of the late great GM Richard Reti (28.5.1889−6.6.1929), then it's unlikely that Dr Max Euwe (World Champion 1935−37) would have been checkmated in a mere 22 moves as White by Reti at Amsterdam in 1920−−− since ChessBase would have 'told' him

that the first 14 moves of the game had already happened six years previously in another yeti−like crush: the encounter P.Kruger−R.Reti, Mannheim 1914!! Let's now do a time warp back to the 20th century to experience that double dose of fighting chess.' **1.e4** Das kleine Match zwischen dem jungen Euwe und dem schon erfahrenen Reti hatte es in sich. Sehen Sie z.B. wie die zweite Partie verlief:

[1.d4 f5 2.e4 fxe4 3.Nc3 Nf6 4.Bg5 g6 5.f3 exf3 6.Nxf3 Bg7 7.Bd3 c5 8.d5 Qb6? Unsolide. 9.Qd2 Qxb2 10.Rb1! Nxd5 Hat Weiß nicht etwas übersehen? *(10...Qa3 11.Nb5 Qxa2 12.0−0)* 11.Nxd5! Qxb1+ 12.Kf2 Qxh1 Erinnerungen an die "Unsterbliche" von Anderssen werden wach. 13.Bxe7 Der Angriff ist tödlich. d6 14.Bxd6 Nc6 15.Bb5 Bd7 16.Bxc6 bxc6 17.Qe2+ 1−0 Reti,R−Euwe,M/Amsterdam 1920/HCL (17)]

1...e5 Paul Motwani: 'In a sense 1 d4 d5 is a "mirror image", and for lots of information relating to it, I refer you to the aforementioned GAMBIT book, "The Queen's Gambit & Catalan for Black"... or check out GM Ruslan Scherbakov's excellent 1 d4 d5 site within www.chesspublishing.com!' **2.Nf3 Nc6 3.Bc4 Nf6 4.d4**

[Anyone going in for 4.Ng5 d5 *(*or the ultra−wild *4...Bc5!?* should first do a great deal of analysis at home! *)*]

4...exd4

[The opening has transposed to the Scotch Gambit, since the same position can also be reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 d4 exd4 4 Bc4 Nf6. Note that in the game Reti was right to stay clear of 4...Nxe4?! 5.dxe5 which gets really black for Black after Bc5?? 6.Qd5!]

5.0−0

[If 5.e5 then Black's reasonable response−options include d5 *(*or *5...Ne4;* or *5...Ng4)*]

5...Nxe4

[5...Bc5 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 is the tricky Max−Lange Attack, in which one of many pitfalls to avoid is Qxf6?? 10.Nxe6 fxe6 11.Qh5+ winning the loose c5−bishop.]

6.Re1 d5 7.Bxd5

[After 7.Nc3 dxc3 8.Bxd5 if Black is at all fearful for his king on the e−file, then an ultra−safe answer is Be6 intending 9.Rxe4?? Ne7! and White can already resign without waiting for his pinned d5−bishop to be devoured.]

7...Qxd5 8.Nc3 Qa5

[A few years ago at FM Tim Upton's home in Luxembourg, Tim and I were looking at a game in "Informator" which went 8...Qh5 9.Nxe4 Be6 10.Bg5 Bd6!? and after 11.Bf6? we were surprised to learn that Bxh2+! was a (rather obvious) "novelty" which leaves White in dire straits because of 12.Nxh2 Qxd1 13.Raxd1 gxf6]

9.Nxd4?

[9.Nxe4 ist der Hauptzug. Be6 10.Bd2 Qd5 *(10...Bb4* is much safer for Black *)* 11.Bg5 after which Bc5? allowed 12.c4!! in the game A. Pomarleanu−M.Izdebska, 1986 European U−18 Girls Championship.]

9...Nxd4 Paul Motwani: '!'

[9...f5? sets the trap

A) but this backfires on Black because of 10.Nxc6 bxc6 11.Qh5+! g6 12.Rxe4+! intending fxe4?? *(*or *12...Be7 13.Qg5)* 13.Qxa5;
B) 10.f3?? Nxd4]

10.Qxd4 f5 11.Bg5
[11.Nxe4?? Qxe1#]
[or 11.f3?? Bc5 immediately take White to a "dead end".]

11...Qc5 Paul Motwani: '!' **12.Qd8+ Kf7** Paul Motwani: 'OK, so Black's king cannot castle, but being a piece up is more important!' **13.Nxe4 fxe4 14.Rad1**
[If 14.Rxe4 then Bf5 15.Qxa8 Bxe4 wins easily for Black.]

14...Bd6!
[G9.17.2: Even stronger than 14...Bg4 which Reti had played six years before in the game P. Kruger−R.Reti, Mannheim 1914!]

15.Qxh8 Qxg5 droht 16...♗h3 **16.f4**
[Desperation from White, seeing that it's also "curtains" for him after 16.Rxe4 Bh3]
[or 16.Qxh7 Bf5 17.h4 Qg4]

16...Qh4 17.Rxe4
[Reti might have hoped to get the pretty line 17.g3 Bc5+ 18.Kh1 Bg4! intending 19.Qxa8 Bf3#
but he couldn't have been too unhappy with the actual finish in the game!]

17...Bh3!! 18.Qxa8 Es ist wirklich unglaublich: Euwe räumt die gegnerischen Türme ab, wobei er die eigenen behält. Und in der zweiten Partie − s.o. − tut er es noch einmal. Allerdings geht es jeweils schief.

18...Bc5+ 19.Kh1
[Other ways for White to bow out were 19.Kf1 Qf2#]
[or 19.Rdd4 Bxd4+ 20.Rxd4 Qe1#]

19...Bxg2+! Paul Motwani: 'This final sacrifice quickly forces mate.' **20.Kxg2 Qg4+ 21.Kf1**
[Or 21.Kh1 Qf3#]

21...Qf3+ 22.Ke1 Qf2#

Polish League 2008

[John Emms]

The previous five games covered the 'main line' with Re1 and h3. In the next few games we consider alternative options for both colours, beginning with some kingside aggression from Black:

The previous five games covered the 'main line' with Re1 and h3. In the next few games we consider alternative options for both colours, beginning with some kingside aggression from Black:

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3 This could, and often does, lead to the main line after 8...0−0 9 Re1. But get ready for something a bit different...

[Clearly what follows is a line we need to avoid, at least if we are playing White! But how should we do this? As far as I can see, the safest way − assuming our aim is to reach the main lines − is to play Clearly what follows is a line we need to avoid, at least if we are playing White! But how should we do this? As far as I can see, the safest way - assuming our aim is to reach the main lines - is to play Clearly what follows is a line we need to avoid, at least if we are playing White! But how should we do this? As far as I can see, the safest way − assuming our aim is to reach the main lines − is to play 8.Re1 instead of 8 h3. If Black plays instead of 8 h3. If Black plays h6 we can reply with we can reply with 9.Nbd2! . It's true that Black can still insist on kingside

aggression by playing . It's true that Black can still insist on kingside aggression by playing g5 , but the key difference here is that White has avoided presenting Black with a 'hook' (h2−h3) and this means Black has to work that much harder to engineer activity on the kingside. −−− Here's an example: , but the key difference here is that White has avoided presenting Black with a 'hook' (h2−h3) and this means Black has to work that much harder to engineer activity on the kingside. Here's an example: , but the key difference here is that White has avoided presenting Black with a 'hook' (h2−h3) and this means Black has to work that much harder to engineer activity on the kingside. Here's an example: , but the key difference here is that White has avoided presenting Black with a 'hook' (h2−h3) and this means Black has to work that much harder to engineer activity on the kingside. −−− Here's an example: 10.Nf1 g4 11.N3d2 *(*if *11.Nh4* , Black has , Black has *Nxe4)* 11...h5 12.Nc4 h4 13.Be3 Bxe3 14.Ncxe3 Bd7 15.a4 Rg8 *(*if *15...h3* , White blocks things up with the simple , White blocks things up with the simple *16.g3)* 16.Ba2 Ne7 17.d4 h3 *(17...Nxe4 18.dxe5 dxe5 19.Nd5* opens the centre up, which can only be in White's favour *)* 18.dxe5 *(*the safer the safer *18.g3* still looks good *)* 18...hxg2 19.Ng3! dxe5 20.Qb3 Rg7 21.Qxb7 Bc6 22.Qb4 Rb8 23.Qc4 and White was clearly on top in the game A.Minasian−A. Aleksandrov, Podolsk 1990.] [After 8.Re1 , there's another caveman−style approach to consider: Ng4!? .

A) . I must confess that until a couple of days ago I didn't think much of this move at all. I realized that White needed to avoid I must confess that until a couple of days ago I didn't think much of this move at all. I realized that White needed to avoid . I must confess that until a couple of days ago I didn't think much of this move at all. I realized that White needed to avoid 9.d4? exd4 10.cxd4 , on account of the typical trick , on account of the typical trick Nxd4! 11.Nxd4 Qh4 , when White is in some trouble. However, after 9 Re2, surely Black's knight is misplaced on g4 and he will lose time in the long run, won't he?;

B) . Judging by a severe lack of games with 9...Ng4, many players must have agreed with me on this point, and when Sam Collins played it against me (British League, 2010) I was genuinely surprised. More to the point, as far as I can see, he has found a way to make this playable for Black! The game went Judging by a severe lack of games with 9...Ng4, many players must have agreed with me on this point, and when Sam Collins played it against me (British League, 2010) I was genuinely surprised. More to the point, as far as I can see, he has found a way to make this playable for Black! The game went Judging by a severe lack of games with 9...Ng4, many players must have agreed with me on this point,

and when Sam Collins played it against me (British League, 2010) I was genuinely surprised. More to the point, as far as I can see, he has found a way to make this playable for Black! The game went . Judging by a severe lack of games with 9...Ng4, many players must have agreed with me on this point, and when Sam Collins played it against me (British League, 2010) I was genuinely surprised. More to the point, as far as I can see, he has found a way to make this playable for Black! The game went 9.Re2 Qf6! *(*if *9...0−0!* , White plays , White plays *10.Bg5!* intending *Qe8 11.h3)* 10.Nbd2 *(*Mickey Adams suggested *10.Na3* to prevent Black's next move *)* 10...g5! . This is a key idea, without which White would just play Nd2−f1 and then h2−h3 only when the time is right. The point is that Black is now simply threatening to win material with 11...Nxf2! 12 Rxf2 Bxf2+ 13 Kxf2 g4, and this forced me to take action in centre earlier than I might have wanted to. The game continued . This is a key idea, without which White would just play Nd2−f1 and then h2−h3 only when the time is right. The point is that Black is now simply threatening to win material with 11...Nxf2! 12 Rxf2 Bxf2+ 13 Kxf2 g4, and this forced me to take action in centre earlier than I might have wanted to. The game continued 11.d4! Bd7 *(11...exd4 12.e5! dxe5 13.Ne4* is very promising for White *)* 12.Nf1 Rg8 . At this moment I was tempted by the idea of getting a knight to d5, but . . At this moment I was tempted by the idea of getting a knight to d5, but At this moment I was tempted by the idea of getting a knight to d5, but 13.Ne3?! *(*I should have kept the knight on f1 and chosen I should have kept the knight on f1 and chosen *13.Be3* , when White can meet , when White can meet *Nxe3* with *14.fxe3!* strengthening d4, blocking the a7−bishop and preparing to use the f−file *)* 13...0−0−0 14.Nd5? Qh6 took too much time. The knight was achieving little on d5 and Black was developing some nasty threats on the kingside. −−− There are alternatives for both sides earlier on, but judging from this evidence 9... Ng4 cannot be dismissed as a bad move. took too much time. The knight was achieving little on d5 and Black was developing some nasty threats on the kingside. □ **Speijer,Abraham**
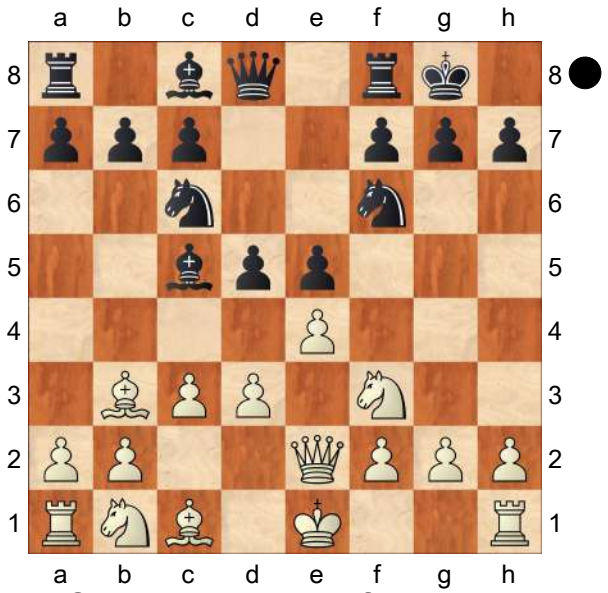
■ **Janowski,Dawid**
Nederland 1901
[Prusikin,Michael]

Positional Queen Sacrifice Generally speaking, the material is only one of the elements we must take into account when we are evaluating any position on the board. The other criteria such as the activity of the pieces, weak squares and pawns are often equally important as the material count. In volume 143 of the Informant series we examined the topic of positional pawn sacrifice in some detail. Now, we shall "promote" this pawn to a queen sacrifice and analyse a few games, where only two minor pieces successfully resist a mighty queen. David Janowski was one of the strongest players in the beginning of the 20 century. He lost two world championship matches to the great Emmanuel Lasker, but demonstrated some brilliant play in those encounters. His main strengths were vibrant attacking skills and creativity. The following game is an excellent example of these qualities. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 0−0 6.Qe2**
A rare, but perfectly playable move. Speijer wants to develop his bishop to g5 before playing Nbd2.
[The immediate 6.Bg5 could be answered by h6 7.Bh4 Be7! 8.Nbd2 d6 9.Bb3 Nh5! with a reasonable position for Black.]
6...d5 7.Bb3 Diagram

(Diagram)



7...Bg4?! A wrong place for the bishop in this pawn structure. The problem with this move is, that Black does not want to exchange the bishop on f3. Also, he does not want to retreat it to g6, where it would be very passive.

[7...a5 8.0−0 a4 9.Bc2 h6∓ Rathnakaran,Kantholi 2452 − Ragger, Markus 2686, Wien 2016]

8.Bg5

[8.h3! Bh5 9.Bg5 d4 10.g4 Bg6 11.Nbd2± would have been the correct move order.]

8...d4 9.Nbd2

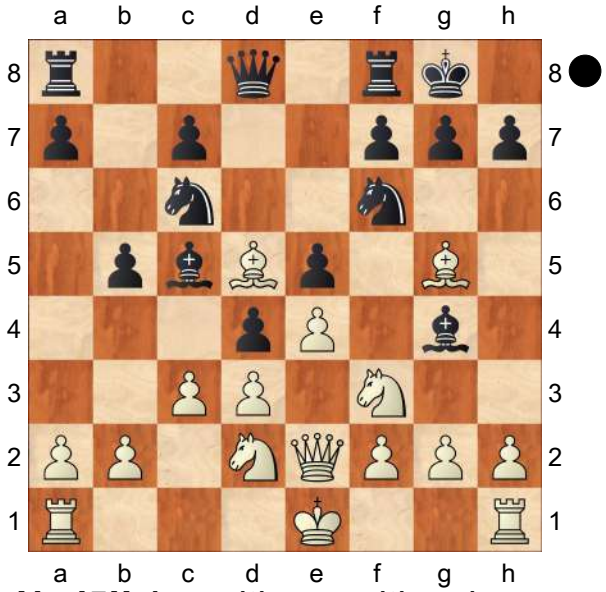
[Now it is too late for 9.h3 due to Bxf3 10.Qxf3 dxc3 11.bxc3 Nd4! 12.Qg3 a5! 13.Nd2 *(13.Qxe5 a4! 14.Qxc5 axb3−+)* 13...a4 14.cxd4 Bxd4 15.Rc1 axb3 16.Nxb3 Bb6 17.0−0 Qd6∓]

9...b5?! A bit too optimistic!

[9...h6 was called for 10.Bh4 g5 11.Bg3 Nh5 12.h3 Nxg3 13.fxg3 Bc8∞ with a complicated and unclear position.]

10.Bd5? This is a huge mistake, but 120 years ago it was not easy to anticipate Black's idea. Diagram

[10.h3 Bxf3 11.Nxf3 dxc3 12.bxc3 b4 13.Ba4 Qd6 14.Bxc6 Qxc6 15.Nxe5 Qe6 16.Nf3 bxc3 17.0−0±]



10...Nxd5!! An exiting positional queen sacrifice by David Janowski! His decision deserves a double exclamation mark for its bravery and the sheer power of imagination.

[10...dxc3!? 11.Bxc6! *(11.bxc3?! Nxd5!! 12.Bxd8 Nxc3 13.Qf1 Rfxd8−+)* 11...cxd2+ 12.Bxd2 Rb8 13.Rc1 Qd6 14.Be3! Bxe3 15.fxe3 Rb6 16.Qc2 Rd8 17.0−0 Bxf3 18.gxf3 Qxd3 19.Qxd3 Rxd3 20.Rc5 Nd7 21.Bxd7 Rxd7 22.Rxe5= does not promise much.]

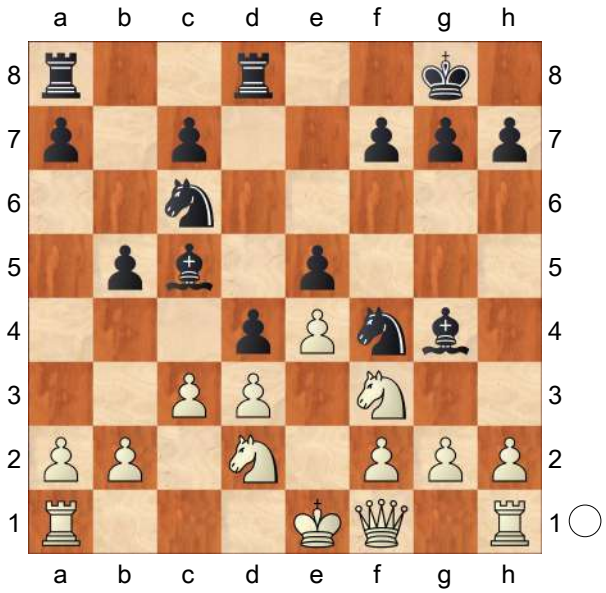
11.Bxd8 Nf4 12.Qf1 Rfxd8 Diagram

(Diagram)

With only two minor pieces for the queen Black is pressing, because all of his pieces are perfectly placed while the white queen is doomed to passivity.

13.Nb3? A natural move, and at the same time a decisive mistake.

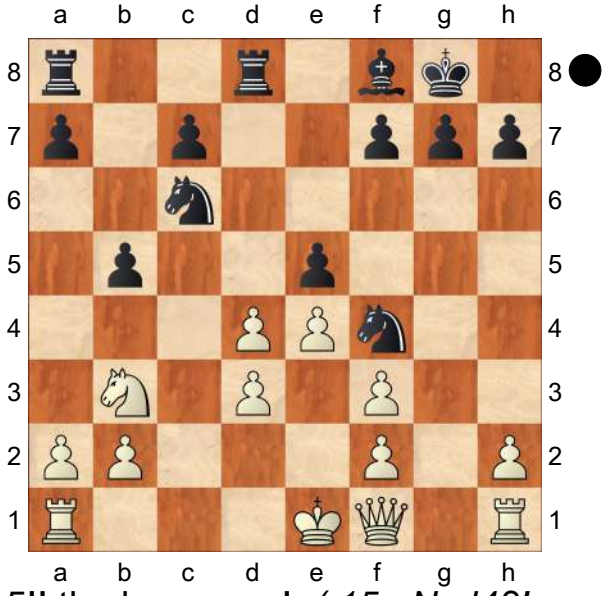
[13.c4 Nb4 14.0−0−0 Nxa2+



15.Kb1 Nb4 still looks very dangerous for White, but he seems to be able to hold with the only move 16.cxb5!∞ *(16.Nxe5? Be2! 17.Qe1 Bd6−+)*]

13...Bf8 14.0−0−0

[14.cxd4!? Bxf3! 15.gxf3 Diagram



a5!! the key move! *(15...Nxd4?! 16.0−0−0∞)* 16.d5 a4! 17.Nd2 *(17.dxc6 axb3−+)* 17...Nb4 18.Kd1 c6−+]

14...a5−+ Now Black's task is rather easy. Janowski converts convincingly.

15.Kb1 a4 16.Nc1 a3 17.cxd4 axb2 18.Nb3 Nb4 19.Nxe5 Bxd1 20.Qxd1 Rxa2 21.Qf3 Rda8 22.Nc5 Bxc5 23.dxc5 Ne2 24.Qxe2 Ra1+ 25.Kxb2 R1a2+ 26.Kb3 Rxe2 27.Kxb4 Rb2+ 28.Kc3 Rxf2

■ **Zukertort,Johannes Hermann**

Leipzig Anderssen Masters (8) 20.07.77

[Schallopp,Emil]

ChessCalisthenics: 'C52: Evans Gambit Accepted: 5 c3 Ba5' 047 Italienische Partie . **1.e4** ChessCalisthenics **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 dxc3 8.Qb3 Qf6 9.e5 Qg6 10.Nxc3 Nge7 11.Ba3**

[Die Theorie erklärt diesen Zug für nicht besonders stark und zieht 11.Ne2 vor.]

11...0−0 12.Rad1

[Weiß konnte auch recht gut den Königsturm nach 12.Rfd1 −− ziehen, um später den Damenturm auf 13.Rac1 zu setzen.]

12...b5 13.Nxb5

[≤13.Bxb5 ChessCalisthenics Rb8 14.Nd5 Ba6 15.Nxe7+ Nxe7∓]

13...Rb8 14.Bxe7

[Statt dieses Abtausches kommt 14.Nfd4 in Betracht. Geschieht alsdann Nxd4 15.Rxd4 Bb7 , so stellt sich Weiß mit 16.Qh3 nicht ungünstig.]

[Auf 14.Nfd4 a6 dagegen könnte 15.Nxc6 Nxc6 16.Bxf8 Kxf8 *(*Falls *16...axb5* so *17.Bd3* und der ♗f8 rettet sich. *)* 17.Bd3 Qh5 18.Rc1 axb5 19.Rxc6 dxc6 20.Qa3+ Kg8 21.Qxa5 die Folge sein, da nun Qxe5 an 22.Re1 scheitert.]

14...Nxe7 15.Qa3 Nc6 16.Nbd4

[Weiß hätte hier einfach den ♙a7 nehmen sollen. 16.Nxa7 Wir sehen nicht, wie dann Schwarz wider in Vorteil kommen will. Auf Bb4 17.Qa4 Nxa7 18.Qxa7 Bb7 würde 19.Nh4 −− nebst 20.Qd4 folgen.]

16...Bb4 Schwarz hat jetzt einen Bauern behauptet und den Angriff erlangt.

17.Qc1 Bb7

[17...Bb7 droht jetzt 18.−− Nxe5!]

18.Bd3 ChessCalisthenics: '??' Ein Fehler, durch welchen ein Offizier verloren geht.

[Mit 18.Qf4 konnte Weiß das Spiel noch recht gut halten.]

[⌓18.Nxc6 ChessCalisthenics Bxc6 19.Bd5∓]

18...Nxd4 19.Nh4

[Auf 19.Bxg6 folgt natürlich Ne2+ ,

20.Kh1 ChessCalisthenics Nxc1 21.Bb1−+]
[auf 19.Kh1 dagegen Qg4 20.h3 Qh5]
19...Qxd3
[Auch 19...Qg4 hätte, und zwar vielleicht noch schneller, zum Siege geführt.]

'

[White's second option, White's second option, 7.Kf1?! , is known as the Krakow Variation. In 1909, chess players from Krakow played a thematic tournament in this line, investigating White's attacking chances. Now we know that 7 Kf1 is somewhat dubious, and that with logical play Black should be able to get a good opening. Let's look at two typical options: , is known as the Krakow Variation. In 1909, chess players from Krakow played a thematic tournament in this line, investigating White's attacking chances. Now we know that 7 Kf1 is somewhat dubious, and that with logical play Black should be able to get a good opening. Let's look at two typical options: Glenn Flear: '(Jan Pinski) , is known as the Krakow Variation. In 1909, chess players from Krakow played a thematic tournament in this line, investigating White's attacking chances. Now we know that 7 Kf1 is somewhat dubious, and that with logical play Black should be able to get a good opening. Let's look at two typical options:'

A) 7...Nxe4?! might seem tempting, but all White's play is based on this over−optimistic move. Taking the pawn is unnecessarily risky, and probably even plain bad. White can now seize the initiative by simple means: 8.d5 Ne7 9.Qd4 Nf6 10.Bg5 Ng6 11.Nbd2 h6 12.Re1+ Kf8 13.Bd3 Be7? *(*though though *13...Bxd2 14.Bxd2* with a clear advantage to White was not particularly attractive either *)* 14.Bxg6! hxg5 15.Ne5 and White was winning in F.Marshall−A.Burn, Ostend 1905.;

B) . The logical reaction so often in these classical positions is to strike in the centre. Here . The logical reaction so often in these classical positions is to strike in the centre. Here 7...d5! 8.exd5 Nxd5 is at least slightly better for Black. e. g. is at least slightly better for Black. e.g. 9.Nc3 Be6 10.Qe2 Bxc3 11.bxc3 Nxc3 12.Qe1 Nd5 13.Ba3 a6 14.Rc1 Qd7 and the two bishops are insufficient compensation for the pawn, Bartmansky−Batik, correspondence 1910.;

C) 7...−−]

7...Nxe4 8.0−0 Bxc3 Black needs to go directly for a refutation of the Möller, or he will quickly end up in trouble. Black needs to go directly for a refutation of the Möller, or he will quickly end up in trouble.''Black needs to go directly for a refutation of the Möller, or he will quickly

end up in trouble. Glenn Flear: 'Jan Pinski: 'Black needs to go directly for a refutation of the Möller, or he will quickly end up in trouble.'" '

[Here 8...0−0? is weak because of is weak because of is weak because of is weak because of Glenn Flear: '(Jan Pinski) is weak because of is weak because of ' 9.d5 Bxc3 10.bxc3 Ne7 11.Re1 Nf6 12.d6! and White is much better. and White is much better.]

[8...Nxc3 is possible though, and then is possible though, and then is possible though, and then is possible though, and then Glenn Flear: '(Jan Pinski) is possible though, and then is possible though, and then ' 9.bxc3 leaves us with a branching:

A) 9...Bxc3 10.Ba3! d5! *(*but not but not *10...d6? 11.Rc1 Ba5 12.Qa4 a6 13.Bd5 Bb6 14.Rxc6! Bd7 15.Re1+ Kf8 16.Rxd6* and White wins according to Keres;*;* or if or if *10...Qf6?! 11.Rc1 Bb4 12.Bxb4 Nxb4 13.Re1+ Kd8 14.Qd2* and White is just better *)* 11.Bb5 Bxa1 12.Re1+ Be6 13.Qa4 Rc8 14.Ne5 *(*White can easily go wrong here, e. g. White can easily go wrong here, e.g. *14.Rxe6+? fxe6 15.Ne5 Qd6! 16.Bxc6+ bxc6 17.Bxd6 cxd6 18.Nxc6 Rc7* and Black wins, and Black wins,*;* while after while after *14.Rxa1?! f6!* White has problems to prove compensation *)* 14...Qf6 15.Bxc6+ *(*if *15.Rxa1 Bd7 16.Re1 Kd8 17.Nxc6+ bxc6 18.Be7+ Qxe7 19.Rxe7 Kxe7 20.Bxc6 Bxc6 21.Qxc6* and White must now fight for a draw *)* 15...bxc6 16.Nxc6 Bc3 17.Nxa7+ Kd8 18.Nc6+ with perpetual check.;

B) 9...d5! is even simpler. After is even simpler. After 10.cxb4 dxc4 11.Re1+ Ne7 12.Qe2 Be6 13.Bg5 Qd5 *(13...c6 14.Ne5 Qd5 15.Bxe7 Kxe7 16.Nxc4* gives White compensation for the pawn *)* 14.Bxe7 Kxe7 15.Qc2 f6 16.Ng5! (White must play energetically to keep the balance) fxg5 17.Re5 Qxd4 18.Rae1 Rae8 19.Rxe6+ Kd7 20.Rd1 Qxd1+ 21.Qxd1+ Kxe6 22.Qg4+ Kf6 23.h4 gxh4 24.Qxh4+ Kg6 25.Qg4+ Kf6 26.Qf4+ Kg6 with a draw in O.Gadia−J.De Souza Mendes, Brazilian Championship 1961.;

□ **Kasparov,G.**
■ **Lautier,J.**
Spain (13) 1994
[Lautier,Joel]

In the 90s top players got younger and younger. French prodigy Joel Lautier made his debut at the super−tourney in Linares with a 7−6 plus score. In the last round he scored a well−deserved victory over the world champion that the teenager is sure to treasure for a long time. **1.e4** Lautier Lautier Ftacnik Blatny, P Lautier: 'Lautier,Joel Ftacnik Blatny,P Lautier,Joel: 'Lautier Ftacnik Blatny,P''
1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3
Kasparov later successfully revived the

Evans Gambit 4. b4!? in some critical games. **4...Nf6 5.d3** This slow system is more popular nowadays than 5. d4 exd4 6. cxd4 Bb4+ which resolves the central tension too soon. Also see Waitzkin−Xie Jun, 1995. **5...d6 6.Bb3 h6 7.h3N**

corr Olympiasieger−Champions League *[Hartl,Hermann]*

Als ich gebeten wurde, für die Fernschachpost zwei Partien zu kommentieren, wollte ich eigentlich Partien aus der abgelaufenen 46. DFM verwenden. Da aber schon in einer vergangenen Ausgabe eine meiner Gewinnpartien gezeigt wurde, habe ich mich entschlossen als Zweite hier eine andere (Kurz−) Partie von mir zu wählen. Gespielt wurde sie im Rahmen eines Wettkampfes Olympiasieger−Champions−Leaguesieger (Underdogs). Allerdings ist die Bezeichnung Champions−Leaguesieger für mich definitv zu hoch gegriffen. Ich war (und bin immer noch) bei den Underdogs aktiv und wurde von unserem Mannschaftsführer gebeten mitzuspielen. Diese Partie gegen einen Gegner, der wesentlich stärker als ich ist, zeigt trotzdem, dass man in Zeiten des Computerfernschachs auch in der Eröffnung immer auf der Hut sein muss.... **1.e4 e5 2.Nf3 Nc6** Ich war zu dieser Zeit nach einigen Versuchen mit der Berliner Mauer bei der Suche nach einer guten Eröffnung für Schwarz gegen starke Gegner beim Marshall−Gambit angelangt und dieses wollte ich auch hier anbringen. Allerdings ging es mir hier wie so oft

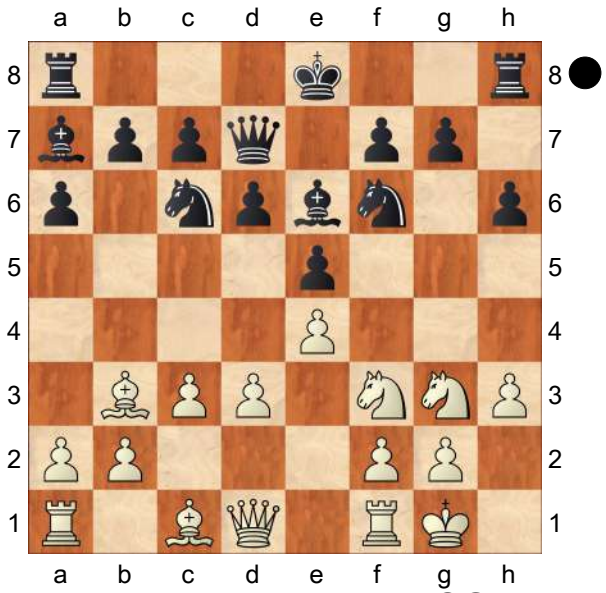
wenn ich Eröffnungen auf meinen Gegner hin aussuche: es kommt völlig anders als gedacht.... **3.Bc4 Nf6 4.d3** Meine Einladung zum Zweispringerspiel wurde abgelehnt. Nach 4.Sg5 entstehen völlig andere, forciertere und weit ausanalysierte Varianten als nach dem Textzug. **4...Bc5 5.c3 a6 6.Bb3 d6 7.h3** Häufiger wird

[7.Nbd2 0−0 8.h3 Be6 9.0−0 h6 10.Re1 Re8 11.Nf1 d5 12.Qe2 Qd7 13.N3h2 dxe4 14.dxe4 Bxb3 15.axb3 a5 16.Qf3 Qe6 17.Ng3 Rad8 18.Nf5 Bf8 19.Be3 Kh7 20.Nf1 1−0 (54) Mamedov,R (2709)−Quesada Perez,Y (2627) chess.com INT 2018; oder]

[7.0−0 h6 8.Re1 0−0 9.Nbd2 Be6 10.Nf1 Bxb3 11.Qxb3 Re8 12.Be3 Bxe3 13.Nxe3 Qd7 14.h3 Ne7 15.Nh2 c6 16.Nhg4 Nxg4 17.hxg4 d5 18.Rad1 Rad8 19.d4 exd4 20.Rxd4 1−0 (42) Vitiugov,N (2724)−Sasikiran,K (2638) Doha 2015]

gespielt, aber oft gibt es hier auch nur Zugumstellungen. **7...Ba7 8.Nbd2 h6 9.Nf1 Be6 10.Ng3 Qd7** Wir haben auf schon häufig benutzen Wegen diese kritische Stellung erreicht. Der nächste, eigentlich natürliche Zug von Weiß ist ein schwerer Fehler, der im Prinzip schon die Partie verliert. Interessant ist, dass die Rochade u.a. auch im Hiarcs−Onlineeröffnungsbuch hier immer noch die Top−Empfehlung für Weiß ist. Offenbar hat die Partie, trotzdem sie schon recht lange her ist, noch nicht den Weg in die Theorie gefunden. **11.0−0?**

(Diagram)



Bxh3! Ich kann mich noch erinnern, dass ich mich seinerzeit mit FSGM Robert Bauer vor meinem 10. Zug im Teamforum über diese Stellung ausgetauscht hatte. Wir hatten beide, unabhängig voneinander, dieses Opfer nach 0−0 gefunden. Die Partie wird nun hochtaktisch, leider muss ich mich bei den möglichen Varianten auf die mir Wichtigsten beschränken. Wer mag, kann versuchen eine Rettung für Weiß zu finden. Mir ist es nicht gelungen.

12.gxh3□ Qxh3∓ 13.Nf5□ Ng4 14.d4

[14.Qe2 g6 15.Ne3 f5 16.Re1 h5 17.Bd1 f4 18.Qf1 Qxf1+ 19.Kxf1 fxe3 20.Bxe3 *(20.fxe3 0−0−0∓)* 20...Bxe3 21.fxe3 Ke7∓]

□ **19) All the Games: 7...h6**
■ **11) Eleuterio Daimiel vs. Mar,S**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 h6!? 8.Na3 a6?!
[Black might have had two extra moves for development in our main line [/course/80564/2] repertoire, instead of this maneuver of the wing pawns. But even here 8...Bxa3 9.Bxa3 d6∞ is apparently equal − see chapter 17 [/course/80564/17], the first two lessons.]

9.Nc2 Nge7 10.a4!?
[Other variations come to mind, such as 10.Ne3 in Game 7 [/variation/13827459/#/10/w], but this is a familiar cramping move. Black needs to castle now, and castling is his answer to]
[10.Re1 as well.]

10...Na5?!
[Castling 10...0−0 and then 11.Ne3 is the expected course of play. White can vary with 11.Re1 and 11.a5, but Black will look for stability by ...Ne7−g6, and possibly ...Rf8−e8, while awaiting events. For example Ng6 12.Nf5 Nge7! It's important to challenge the Knight immediately, and in the right way. If 12...Nce7?! 13.g4 $16 as in the note below. If instead 12...Re8?! then 13.g4! launches a strong attack, e.g. 13...Nf4 The best chance. Black resolves to give up his Bishop for two additional pawns. 14.Bxf4 exf4 15.e5 Bxe5 16.dxe5 Nxe5 17.Nxe5 Rxe5 A pause in the action, but White continues pushing. 18.Re1!

d6 19.Rxe5 dxe5 20.Qd5 $14 and we're in the +0.40 range for White. Now if 13.Nxd6 Qxd6 14.a5 Qf6∞ and Black intends 15...d6 next with excellent chances.]

11.Bd3?!

[This square is the usual rally point when attacked, but here 11.Ba2± is better, disallowing Black's next.]

11...Nb3 12.Rb1 Nxc1 13.Qxc1 Ng6 14.Ne3 Nf4?!

[Let's develop first. Simple castling 14...0−0 and with 15.Bc4 White corrects his eleventh move. Options: If 15.Nd5!? Qd8 $15 If 15. Nc4 b6 $15 Black now proceeds Qf4 16.Qc2 c6 17.Nf5 exd4 18.Nxd6 Qxd6 19.cxd4 Qe7∞ equal, with a bias to Black − he'll straighten out his Queenside pawns soon enough.]

15.Bc4 h5!?

[Returning 15...Ng6⩲ is also viable.]

16.Qc2⩲ 0−0?!

[Black volunteered for this straightjacket and now has to wriggle out of it. The best try is 16...c6 17.Bb3 and only now castle 0−0 continuing 18.g3 Ne6 19.Nf5 Bc7 20.dxe5 Bxe5 21.Nxe5 Qxe5 with ugly pawns, and after 22.Rfd1⩲ White stands somewhat better, up maybe +0.40 in the decimal system.]

17.Nf5?!

[Drive the Knight back with 17.g3! Ng6 and then 18.Qe2± is very good for White. It's worth noting that both 18.Nd5?! and 18.Nf5?! are weaker moves, offering but a slight edge.]

17...g6?

[He had reasonable chances in the line 17...b5! 18.axb5 axb5 19.Bxb5 c6 20.Bc4 Other retreats are no better. White could take 20.Nxd6 Qxd6 and then 21.Bc4 , but 21...Qg6 22.g3 d6 $13 is also unclear. There may follow Bc7 21.g3 d5∞ and Black is okay.]

18.Nxd6± White is on the verge of winning no matter how Black recaptures − which should be with his Queen.

18...cxd6!? 19.d5?

[19.Rb6 is a powerful invasion which Black can hardly repel.]

19...b5! An excellent activity generator, throwing the game into turmoil. **20.axb5 axb5 21.Bxb5∞ Ba6!?**

[A good move, but so is 21...h4 , and if 22.g3 Nxd5! 23.Nxh4∞ or 23.Be2 $13 with positions hard to decipher in either case.]

22.Rfe1?! The path to an energized position is 27.c4! Rfc8 23.Qd2 Stepping out of the pin. Interesting is 23.Ra1!? Bxb5 24.Rxa8 Rxa8 25.cxb5 h4! 26.g3 White can't roll with his passed b−pawn on account of a sacrifice on the g2 square. (26...Nxd5 27.Nxh4 Nb6 $13 unclear. Now 23...Bxb5 24.cxb5 Ra3! looks scary, but 25.Ne1 h4 26.Qb2 follows − chasing away the Rook is safest for White. After 26...Ra7 $13 the position flatlines at 0.00, but not in a drawish way! **22...Bxb5 23.Rxb5 Rfc8∓ 24.Re3 Rc4?** Bad. **25.Nd2?** Bad

25...Qg5 There was a disturbance in the Force after that case of double blindness, but Black recovers first and maintains his steady $15 edge. He needs to keep up the Kingside pressure however.

26.g3 Ra1+!?

[26...Rca4∓ is better.]

27.Rb1 Rxb1+? A poor move.

28.Nxb1?

[And a poor answer. Replace that with

28.Qxb1 Rxc3 29.h4± and White's position is very strong.]

28...h4∞ 29.Nd2 hxg3 30.hxg3 Rc8 31.Nf3!?

[Also quite obscure is 31.Kf1∞]

31...Nh3+ 32.Kg2 Qh5 33.Ng1?! Nxg1 34.Kxg1 Kg7∓ Black now has a significant advantage. **35.Qe2 Qh6?!**

[Take 35...Qxe2 36.Rxe2 and then Rxc3∓ with every chance to win.]

36.Qf3 Ra8 37.Re1 Ra2?! 38.Kg2 Qd2 39.Qe3?!

[Misapprehending the position, and handing Black a slightly favorable Rook endgame. White should look for a draw here, which could be had by 39.Rh1! and next 40.Rh7+ with perpetual Queen checks following.]

39...Qxe3 40.Rxe3 Rc2 The game ought to end in a draw, but White has to prove the case by releasing his Rook at the right moment. **41.g4**

[The right idea, and 41.Rf3 also maintains equilibrium.]

41...Kf6

[He could strike with 41...f5 immediately, leading to 42.gxf5 gxf5 43.exf5 Kf6 when 44.Rf3 is nicely balanced. Now Black has the instructive choice between e4 to start. Or if the Black Rook switches to 44...Rd2 White counters 45.Rh3 to equalize. Next 45...Rxd5 46.Rh7 Kxf5 47.Rxd7 Ke6 48.Rc7= is a draw. After the ...e5−e4 push, White's attacked Rook steps up to 45.Rf4 and then 45...e3 46.c4 e2 Quite a pawn charge! Instead 46...exf2 Kf1= holds. Now 47.Re4 Kxf5 48.Re8= is also drawn.]

42.Rf3+ Ke7 43.Re3!? f5 44.gxf5

[Pushing 44.g5 is good as well. After fxe4 45.Rxe4 Rxc3 46.Rh4 White has enough counterplay. Observe that in the previous note this g4−g5 option was ineffective − but only because Black's King sat on g7 instead of e7!]

44...gxf5 45.exf5 Rd2

[If 45...Kf6 instead White has 46.Rh3 Kxf5 47.Rh6! equal.]

46.c4 Rd4 47.Rc3!?

[Active play by 47.Rg3! Rxc4 48.Rg7+ Ke8 49.f6 is more attractive.]

47...Kf6 48.f3 Kxf5 49.Kg3 Kf6 50.Kf2 Ke7 51.Ke3 Kd8 52.f4??

[An unfortunate episode of wrongthink. White could actually loiter about on the c−file, but the clean way forward is 52.c5 Rxd5 and simplify. If 52...dxc5 then 53.Rxc5 d6 54.Rc2 Rxd5 55.f4= is equal. Now exchange again with 53.cxd6 Rxd6 and advance 54.Ke4 Re6 55.Ra3 Ke7 56.Kf5 again with a draw well in hand.]

52...Rxf4 53.c5 Kc7 54.c6 Rd4 55.cxd7+ Kxd7 56.Ra3 Rxd5

Black has reached a simplified won position, a textbook example of this ending. His connected passed center pawns will advance in good order while shielding his King from endless checks. And since White is asking for a demonstration, let's see it! **57.Ra8 Rd4 58.Ra7+ Kc6 59.Ra6+ Kb5 60.Ra8 Ra4 61.Rd8 Kc5 62.Rb8 Rb4 63.Ra8 Kd5 64.Ra5+ Kc6 65.Ra6+ Rb6 66.Ra8 d5 67.Ra3 Kd6 68.Kd3 Ke6 69.Rc3 Ra6 70.Rb3 e4+ 71.Kd4 Ra4+ 72.Ke3 Ke5 73.Rb5 Ra3+ 74.Kd2 e3+ 75.Ke2 Ke4 76.Ke1 d4 77.Rb1 Ra2 78.Rb3 Ra1+ 79.Ke2 d3+ 80.Rxd3**

Ra2+ Winning the Rook and the game.
0−1

□ **Geier,V.**
■ **Seibold,Matthaus**
Bundesmeisterschaft I 1928
[Kagans (Fernschach)]

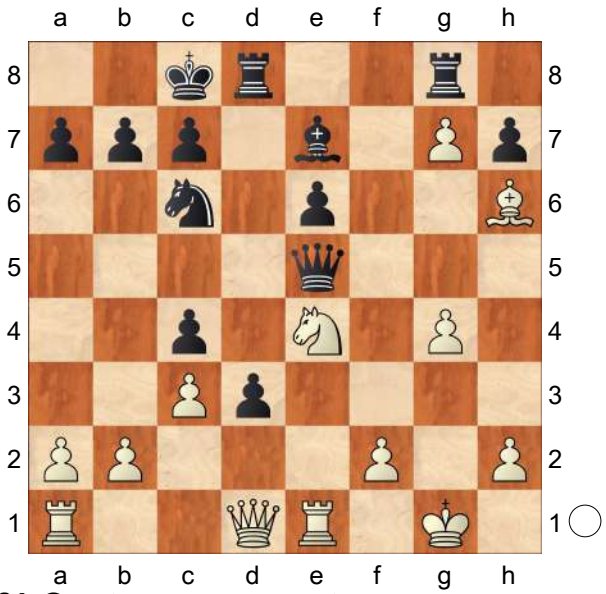
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0 Bc5 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5 10.Nc3 Qf5 11.Nce4 0−0−0 12.Nxe6 fxe6 13.g4 Qe5 14.fxg7 Rhg8 15.Bh6 d3 16.c3 Be7

[16...d2 thought to force a draw: 17.Re2 Rd3 *(17...Bb6* Also playable is *18.Kg2 Rd3 19.f3 Nd8 20.Rxd2 Nf7 21.Rxd3 cxd3 22.Qd2 Nxh6 23.Qxh6 Rxg7 24.Qf6 Qxf6 25.Nxf6* when Bilguer says Black loses a pawn. This, however, is an error as the following shows: *c5 26.c4 Bc7 27.Ne4 Be5 28.Rb1 b6 29.b3 a5! 30.Rd1 Rd7 31.Nf2 d2 32.Ne4 Bf4 33.Kf2 Rd3! 34.Ke2 Re3+ 35.Kf2 Rd3*= Dr. Duehrssen−Schlage, 1924 *)*

A) 18.Qf1 has been the focus of attention in the late 20th century, but it is no improvement. The critical line goes Qd5 19.Rd1 Ne5 20.Qg2!? *(20.Nf6 Qf3 21.Nxg8 Qxg4+ 22.Kh1 Qf3+ 23.Kg1=)* 20...Nf3+ 21.Kf1 Nh4 22.Qg1 Nf3 23.Qg3 Bd6 and at best White will get a draw (Nunn, British Chess Magazine 9/1992).;

B) 18.Nxc5 Qxc5 19.Rxd2 Ne5 20.Rxd3 *(20.Qe2? Qd5)* 20...cxd3 is reckoned to be about equal. I haven't seen the following variation anywhere else: 21.Qa4! Qd5 22.Qf4 d2 23.Qf8+ Kd7 24.Qxg8 Nf3+ 25.Kf1 d1Q+ 26.Rxd1 Qxd1+ 27.Kg2 Ne1+ 28.Kf1 Nf3+ etc =]

[16...Bd6? 17.f4 followed by (Q moves) ♘f6; hence the text move.]



17.f4 Contemporary notes now say: "Already the decisive mistake; the white ♔ position is weakened." However, in later years 17 f4 became established as the main line, superseding 17 Qf3 as known from Marshall−Capablanca, New York 1910. (This was a thematic match to test Marshall's new discovery, 15 ♗h6). **17...Qd5 18.Ng3?** This is the real error; White must blockade the pawn by 18 ♕d2 with chances of some advantage.

[18.Qd2 (Friedmann−Marthinsen, corr 1984) Bh4 19.Re3 Ne7 idea ..Qc6, ... Nd5 and Black is better (Pinski)]

18...d2! 19.Re4 Bf6!∓

[8...Qh5]

9.Rxe4+ Be7 10.Nxd4 f5 11.Bh6!?N Cette idée peu jouée a été reprise par Mestel contre Bronstein dans une partie du match URSS−GB en 1976. A cette époque de pénurie en URSS, il y avait trés peu de livres publiés au début des années 20 et en particulier de traduction de livres étrangers. Vers 1925, 1926, quelques livres ont commencé à être disponibles et c'était à chaque fois un évènement pour les amateurs. Parmi ceux publiés, il y a eu notamment en 1924 celui de TARTAKOWER "Die hypermoderne Schachpartie" consacré à cette révolution échiquéenne née quelques années auparavant. Or, le polonais avait recommandé cette ligne dans ce livre connu du futur Champion du Monde.

□ **Morrison,C..**
■ **Horner,J..**
British Championship 1985
[Paul Motwani]

G12.1: "Early castle and hassle quick pin and win!" Italian Game, 5 0−0. **1.e4** **e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3**
[4.0−0 Nf6 5.d4!? is a tricky gambit, as the following quick games demonstrate emphatically:− G12.1.1 Nxd4? *(*G12.1.2: *5...exd4 6.e5* (the Max Lange Attack, which is more often reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Nf6 4 d4 exd4 5 0−0 Bc5 6 e5) *d5 7.exf6 dxc4 8.Re1+ Be6 9.fxg7* (deviating from the "main" line, 9 Ng5) *Rg8* occurred in A.Glukharev−V. Murakhveri, Moscow 1969. Then *10.Bg5* confused Black, who lost quickly with *Qd5?* (10...Be7 is correct, intending 11 Bxe7 Kxe7!) *11.Nc3 Qf5 12.Ne4 Rxg7 13.Nh4!* 1−0 and Black

resigned faced with the unavoidable loss of his queen.*; 5...Bxd4 6.Nxd4 Nxd4* (6...exd4? allows 7 e5!, planning 7...Nxe5 8 Re1) *7.Bg5* did not seem particularly dangerous for Black at first in the game A. Rosentreter−M.Hoffer, Berlin 1899, but suddenly he was virtually lost after the plausible−looking *h6 8.Bh4 g5?* because of *9.f4!!* a stunning case of "f for forward"! The abrupt finish was *gxf4* (White also has an overwhelming position and attack after 9...gxh4 10 fxe5) *10.Rxf4! exf4 11.Qxd4 0−0* (there is no significantly better alternative) *12.Bxf6 Qe8 13.Bh8* 1−0. *)* 6.Nxe5 saw Black already in trouble in Y. Estrin−K.Klaman, Leningrad 1957, where the continuation was 0−0? (6...Ne6 is more tenacious, although 7 Bxe6 fxe6 8 Nd3! followed by e5 is still very good for White, and of course 7...dxe6?? 8 Qxd8+ Kxd8 9 Nxf7+ gives an immediate win) 7.Be3! Qe7 (White also wins material after 7...Ne6 8 Bxe6 Bxe3 9 Bxf7+) 8.Bxd4 Bxd4 9.Qxd4 c5 10.Qc3 Nxe4 11.Qe3 Qxe5 12.Nc3 1−0, and Black resigned in view of Re8 13.Rfe1]

4...Nf6 5.0−0 5 c3 or 5 Nc3 are constructive moves which do not commit White to castling so early **5...d6 6.a4** The main purpose of this move is that it allows White's c4−bishop to drop back to the a2−square if Black plays ...Na5. **6...Bg4 7.h3 Bh5 8.c3 a5** Black nullifies White's threat of 9 b4 Bb6 10 a5. **9.Re1 Qd7 10.Nbd2!?** This lets Black start a dangerous kingside attack, and instead 10 Bg5 merits consideration. **10...g5** Jeff Horner is aiming for a quick win with this example of my motto "g for go for it!". **11.g4?** This allows Black to play a sacrifice which destroys the pawn−cover around White's king, but 11 Nb3 is more tenacious. **11...Nxg4! 12.hxg4 Qxg4+ 13.Kf1** White could not let his opponent play 13...Bxf2, but Black has a simple and crushing alternative... **13...Qh3+ 14.Ke2** 14 Kg1 Qg3+ is also hopeless for White. **14...g4 15.Ng5 Qh4** Ouch! White is really hurting at f2 and g5. **16.d4 exd4 17.f4 gxf3+ 18.Ndxf3 Ne5 19.Bxf7+** Desperation from White, who can only hope for 19... Bxf7?? 20 Nxh4. **19...Nxf7 20.cxd4 Nxg5 21.Bxg5 Qxg5 22.dxc5 Rf8 23.Rf1 0−0−0 24.Ra3 dxc5 25.Qb3** [White lets Black deliver instant checkmate at d2 instead of suffering longer in 25.Qc2 Rxf3 26.Raxf3 Qg2+ 27.R1f2 Bxf3+ 28.Ke3 Qg1 29.Kxf3 Rf8+]
25...Qd2#

□ **Sveshnikov,E..**

■ **Kholmov,R..**

Sochi 1974

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7 4.d4 d6 5.Nc3 Nf6

[5...exd4 6.Nxd4 Nf6 7.0−0 would transpose to 4...exd4 (see Pieri−Chiburdanidze and Kalashnikov−Grachev).]

[Instead, 5...Bg4 does not seem too reliable: 6.h3

A) 6...Bh5 7.d5! Nd4 *(* or if *7...Nb8 8.Be3 Nd7 9.a4* with a slight edge *)* 8.g4 Nxf3+ 9.Qxf3 Bg6 10.Bb5+ must be better for White;

B) 6...Bxf3 7.Qxf3 Nf6 8.Bb5!? *(8.d5* is good too *)* 8...exd4 9.Ne2 Nd7 10.Bxc6 bxc6 11.Nxd4 Ne5 12.Qe2 and White had a pleasant advantage in A.Rutman−N.Segal, Ozery 1997.]

6.h3 0−0 7.0−0 a6

[7...Nxe4 8.Nxe4 d5 9.Bxd5 Qxd5 10.Nc3 Qa5 11.d5 Rd8 seems to gives Black reasonable counterplay, though after 12.Nd2! (the best test) Nb4 13.a3! Nxd5 14.Nb3 Nxc3 15.Qxd8+ Bxd8 16.Nxa5 Ne2+ 17.Kh2 Nxc1 18.Raxc1 and White is slightly better in the endgame.]

8.a4 h6 9.Re1

[9.Be3 Re8 10.Qe2 Bf8 11.Rad1 Bd7 12.Bb3 exd4 13.Nxd4 Nxd4 14.Bxd4 Be6 was also close to equality in D.Barua−K.Mokry, Frunze 1983.]

[However, I believe White can prove an advantage with... 9.d5 Na5 10.Ba2!? *(10.Bd3 c5 11.Nd2 Bd7* gives Black good counterplay *)* 10...c5 11.dxc6 bxc6 12.b4 Nb7 13.Be3 Qc7 14.Qd3 and White looks better organised. A future b4−b5 will take control over d5 and hopefully leave some black pawns weakened on the queenside.]

9...Re8 10.b3 exd4

[Or 10...Bf8 11.Bb2 Bd7 12.Kh2 exd4 13.Nxd4 g6 14.Nxc6 Bxc6 15.Qf3 Bg7 with even chances, M. Corden−J.Mestel, British Championship 1978.]

11.Nxd4 Bf8 12.Bb2 Nxd4

[12...Ne5!? , with chances for both sides, looks more appealing.]

13.Qxd4 Be6 14.Bxe6 Rxe6 15.Nd5 c6

[15...Nd7! with a slight disadvantage was necessary.]

16.Nxf6+ Rxf6

[16...Qxf6 17.Qxf6 gxf6 18.f3 Rae8 19.Kf1 gives White a very promising endgame. But objectively, this was Black's best option.]

17.Qb4! d5 18.Qxb7 Rg6 19.Re3?? An incredible blunder; only this move loses the tempi required to drop the game.

[Instead, after something like 19.exd5 Qxd5 *(*or *19...Bc5 20.dxc6 Ra7 21.c7!)* 20.g4 Rd8 21.Qxa6 h5 22.Rad1 White is very close to winning.]

19...Bc5 20.Rf3 Ra7! The white queen is trapped.

0−1

□ **Mendheim,Julius**
■ **Angerstein**
Germany corr 1831
[Harding (Includes Berlin−Breslau)]

Here we have two games in one. Max Lange's 1872 edition of Bledow's collection of CC games (actually signed intro Oct 1871) began with the first game of the match between the Chess Club of Berlin (leader: Julius Mendheim) and the Chess Club of Breslau. This game started on Jan 15, 1829 and ended Oct 20, 1831; the second game, with reversed colours, was played 1831−33 and Berlin won both games. Breslau (now the Polish city of Wroclaw) was home town of Adolf Anderssen, the great German master of the next generation; he was only about 11 when this game was played but we shall see him feature later in the book. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6** Strongest says Lange, as given by Damiano (1512) to hinder White forming large pawn centre **5.d4 exd4 6.e5** Lange says that Lewis is right to prefer 6 cxd4. After 6 e5 best is 6...d5 he says. Modern theory concurs. **6...Ne4?!**

[6...Ng4? 7.Bxf7+ Kxf7 8.Ng5+]

7.Bd5! Black now has difficulties and is practically forced to sacrifice the N for three pawns.

[RR7.cxd4 Bb4+ 8.Bd2 Bxd2+ 9.Nbxd2 d5 10.Bd3 f5 11.0−0 (intercity corr. match Insterburg−Königsberg, circa 1862−63) 0−0= Given in Estrin and other modern sources, e.g. 12.Nb3 b6 13.Ne1 Bb7 14.f3 Ng5 15.Rc1 Rc8 (Handbuch)]

[7.Qe2 d5 8.exd6 0−0 9.dxc7 Qd7 10.0−0 Re8 gave Black a strong attack in Moor−Hartlaub, Wiesbaden 1913, according to Estrin.]

7...Nxf2

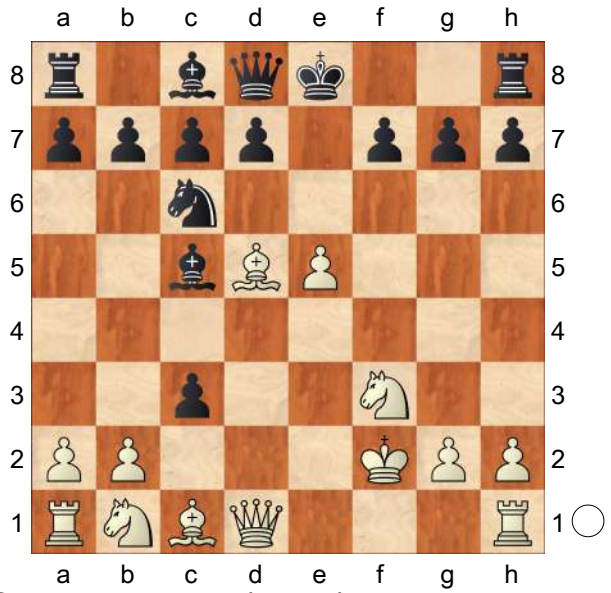
[7...f5 is bad as, due to the weakness on the a2−g8 diagonal, Black won't be able to castle for the forseeable future after 8.cxd4 Bb4+ 9.Nbd2 (given by various sources, following Handbuch)]

8.Kxf2 dxc3+ Diagram

(Diagram)

9.Ke1!? This is playable, but the K gets in the way of his own development on e1. Most books agree with Lange that "far better than this retreat, recommended by Anastasia and Lolli, would be

[9.Kg3! a move which apparently was first mentioned by Ghulam Kassim from Madras in his chess book of 1829 and later recommended by Mendheim in his 'Aufgaben fur



Schachspieler' (1832). Bledow remarked explicitly in his old edition (1843) that 9 Kg3 hinders the development of White's pieces less than 9 Ke1 does.

A) RR9...Ne7 Potsdam−Berlin, intercity corr 1850−51; now instead of 10 h3, Estrin recommended 10.Nxc3 Nf5+ 11.Kf4! and "the white K advances bravely to the front" − this also seems to be a Handbuch recommendation. *(11.Kh3 d6 12.g4* suggested by the Italian CC master G.Porreca, might be cooller. *)*;

B) 9...cxb2 10.Bxb2

B1) RR10...0−0 11.Qc2 d6 12.Be4 h6 13.Nbd2 Bb6 14.Bxc6 bxc6 15.Nc4 Bc5 16.Qd2 Be6 17.Ne3 d5 18.Bd4 Be7 19.h4 g6 *(19...c5!)* 20.Ng4 Bxg4 21.Kxg4 f5+ 22.exf6 Bxf6 23.Qxh6 Qd7+ 24.Kg3 Qd6+ 25.Kh3 Bxd4 26.Nxd4 Rf4 27.Nf3 Rf7 *(27...Raf8!)* 28.Qe3 Re7 29.Qg5 Kg7 30.Rae1 Re4 31.Rxe4 dxe4 32.Qe5+ Qxe5 33.Nxe5 c5 34.Rc1 e3 35.Rxc5 e2 36.Rxc7+ Kf6 37.Nf3 1−0 Koralek−F.Audap, France corr 1887−9;

B2) RR10...d6 11.Bxc6+ bxc6 12.Bd4 Bb6 13.Kf2 c5 14.Be3 Rb8 and Black has some compensation for the piece according to Junior 7.;

B3) 10...Ne7

B3a) Not, however 11.Ng5? Nxd5 12.Nxf7 0−0! and Black has a winning attack: *(12...Kxf7 13.Qxd5+* 14 and Qxc5 *)* 13.Nxd8 *(13.Qxd5? Rxf7 14.Qxc5? Qg5+ 15.Kh3 d6+)* 13...Bf2+ 14.Kh3 *(14.Kg4 Rf4+ 15.Kg5 h6+ 16.Kh5 Rh4+ 17.Kg6 Ne7#)* 14...d6+ 15.e6 Nf4+ 16.Kg4 Nxe6−+ There are several versions of how this famous miniature ended. According to Estrin, this one is correct:

B3a1) 17.g3 Nxd8+! *(17...Nd4+ 18.Ne6 Bxe6+ 19.Kh4 Nf5+ 20.Kh3 Ne3+ 21.Kh4 Ng2+ 22.Kh5 g6+ 23.Kg5 Be3#* is given in the ChessBase Megabase? *)* 18.Kh4 Rf4+ 19.Kg5 Ne6+ 20.Kh5 g6+ 21.Kh6 Rh4+ 22.gxh4 Be3# was given (says Estrin) in the "Schachzeitung" (1849) and "La Régence" (1851). It would seem some gilding of the lily occurred in creating this version.;

B3a2) 17.Nxe6 Bxe6+ 18.Kg5 Rf5+ 19.Kg4 h5+ 20.Kh3 Rf3# following K.

Jaenisch in the chess column of the paper "St. Petersburg's Wedomosti" of 29 April 1856, and also in the magazine "Shakhmatny Listok" 9/1859.;

B3b) 11.h3!? 0−0 12.Rf1 d6 13.Be4 Bf5 14.Qd3 Bxe4 15.Qxe4 Ng6 16.e6 fxe6 17.Qxe6+± was another Hoffman−Petroff 1844 match continuation (in Palkövi);

B3c) Here Estrin (and later Heyken & Fette) remarks that after 11.Qc2 (Bilguer) or also after 11 Be4 or 11 h3 (Ghulam Kassim) Black has insufficient compensation for the sacrificed piece. (Of course all this was in the future when Berlin and Breslau were starting their game.) 11...d6 *(11...Nxd5 12.Qxc5 Ne7 13.Ba3 Nc6 14.Re1±* Handbuch *)* 12.Be4

B3c1) 12...d5 13.Bd3 *(13.Rd1!?)* 13...Bb6 14.Nc3 *(14.h3)* 14...f5 15.Rhe1?! 0−0 *(15...f4+!?)* 16.h3 f4+ 17.Kh2 Bf5 18.Rad1± but White eventually lost after some rash play in the intercity correspondence match Memel−Hannover, 1865−66.;

B3c2) 12...Ng6 13.Nbd2 c6 14.Rad1 "and White has the better game" − Gufeld & Stetsko, 'The Giuoco Piano' (1996) following 'Bilguers Handbuch'.]

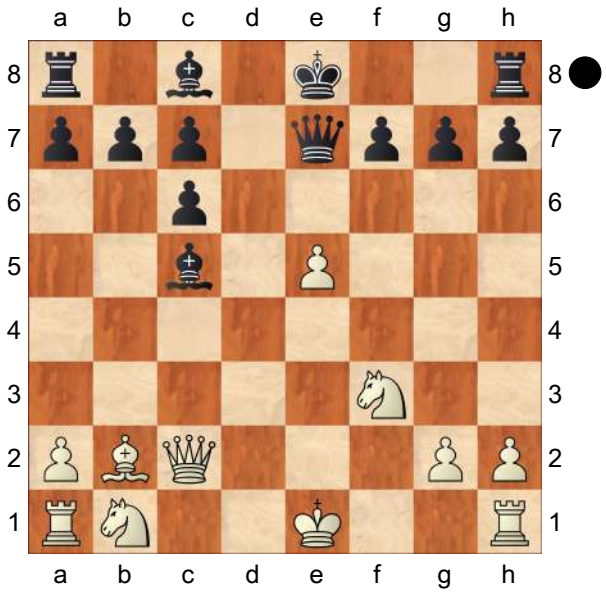
[9.Kf1 intending g3 and Kg2 comes into consideration (Handbuch). Junior7 now comes up with some counterplay for Black, viz. cxb2 10.Bxb2 Qe7 11.Nc3 *(RR11.g3!?)* 11...Nxe5 12.Nxe5 Qxe5 13.Na4 Qf4+ 14.Qf3 Qxf3+ 15.gxf3 Bf8 16.Re1+ Kd8 17.Bxf7 Bb4 18.Nc3 Rf8∞]

9...cxb2

[9...Qe7!? Δ10.Nxc3 Nxe5 11.Nxe5 *(11.Kd2 c6∞* 0.18/16 Junior 7 might be examined...*; 11.Qe2 Nxf3+ 12.Bxf3)* 11...Qxe5+ 12.Qe2 *(12.Kd2 0−0 13.Kc2)*]

10.Bxb2 Qe7 11.Bxc6 dxc6 12.Qc2

Diagram



White stands better according to Estrin, Heyken & Fette etc. **12...Be6 13.Nbd2 0−0−0 14.Ke2 g6 15.Ne4?!**

[15.Rhd1 ΔBf5 16.Ne4 Bb6 17.Qa4 Tait]

15...Bb6 16.Qa4 Bd5 17.Rhc1 f5!

Bledow commented that this was a good move, but incorrectly followed up.

18.Ned2 Bxf3+?!

[⌓18...g5 However RR19.Nc4 Bxc4+ 20.Rxc4 g4∓ This is no better for

Black than what happened in the game, but possibly White missed a chance to improve at move 20.]

19.Nxf3 g5 Here White might have a chance of getting back in the game if he organised the defence of his K and development of his rooks efficiently, e.g. 20 Rc2 Rhe8 21 Re1 or 20 Ne1. Even 20 h3 Rhg8 21 g4 and 20 Qb3 g4 21 Nd2 come into consideration. **20.Rf1?!** The point of this seems to be that if Black plays the obvious 20...g4 then after 21 Ne1 the f5−pawn is attacked. Then 21..Qe6 is still not bad for Black, but Breslau decided to activate their rooks, with a view to doubling them on the d−file. **20...Rd5!? 21.Rad1** Diagram

[21.Qc2 looks better at first, as it threatens to take the f−pawn with check, so gaining a tempo for defence, but Black can press on with g4 ignoring the threat, since after 22.Qxf5+ Kb8 23.Nd2 Qb4 (TDH) Black will soon win material, e. g.

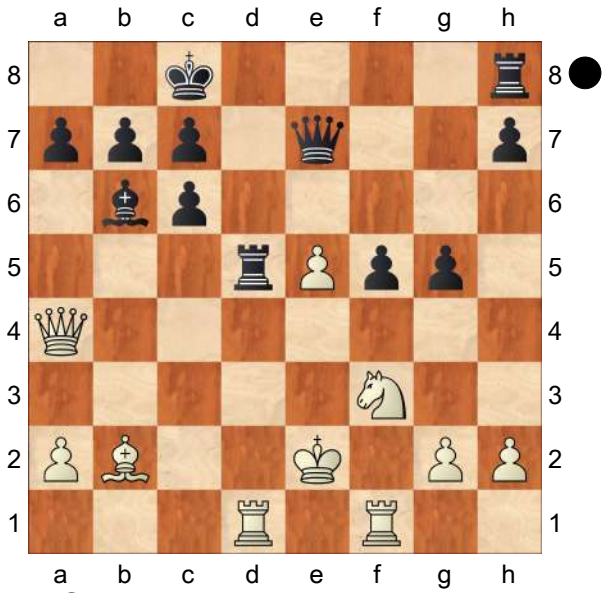
A) 24.Nb3 Rhd8 25.Rfd1 *(25.Rad1? Qc4+)* 25...Rf8 26.Rxd5 cxd5 27.Qd3 Rf2+ 28.Kd1 Rxb2;

B) 24.Qc2 Rxd2+! 25.Qxd2 Qe4+ 26.Kd1 Be3 27.Qd7

Other Q moves allow ...Rd8+ Qxg2 and Black gains a decisive material advantage, e.g. 28.Qd3 Qxb2 29.Rb1 Qxe5 30.Re1 Re8 31.Rb3 Qa1+ 32.Rb1 Qf6! Δ33.Rxe3 Rd8]

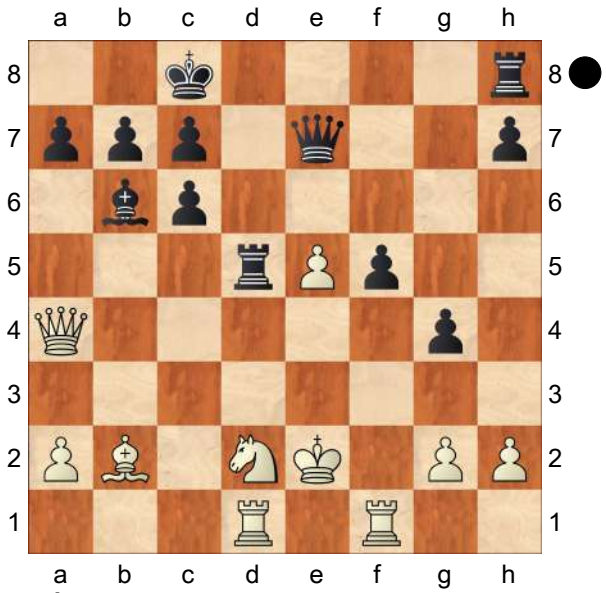
(Diagram)

It is hard to suggest anything else..



21...h5?! Diagram

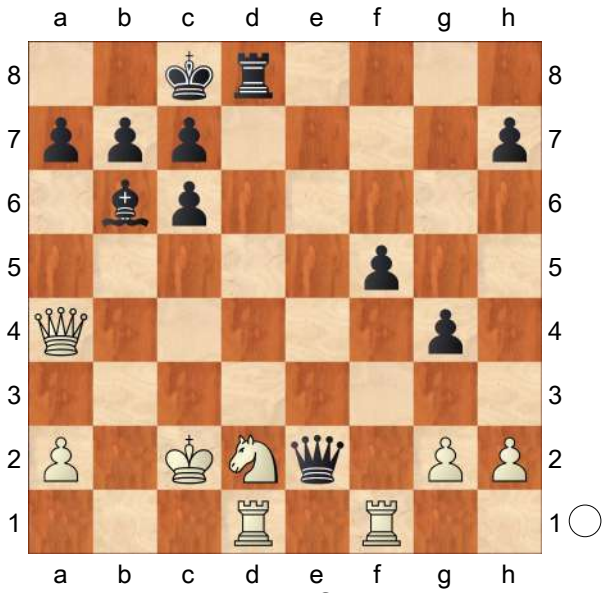
[21...g4! was played in the Berlin−Breslau match. 22.Nd2 Diagram



A) 22...Rxe5+ "must have won without difficulty" claimed Staunton, but what precise continuation had he in mind? Presumably he intended the continuation 23.Bxe5 Qxe5+ 24.Kd3 Rd8+ 25.Kc2 Qe2 Diagram

(Diagram)

Seems crucial and what Staunton



must have meant? TH: Fritz8 says −0.94/12 but look deeper. Black has four pawns and a strong pin for the rook. White faces an uncomfortable defence but matters are not entirely clear? Junior 7: 1) 26.Rfe1 *(* Junior 7: 2) *26.Kb1 Rxd2 27.Rxd2 Qxf1+ 28.Qd1 Qb5+ 29.Qb3 Be3 30.Rd3 f4 31.g3 Qxb3+ 32.axb3 a6 33.gxf4 Bxf4 34.Kc2 Bxh2 35.Rd1* −1.31/19*;* Junior 7: 3) *26.Qb3 Be3 27.Rfe1 Rxd2+ 28.Kb1 Rxd1+ 29.Rxd1 b5 30.h3 Bg5 31.Qc2 Qe4 32.Rf1 Qb4+ 33.Qb3 Qe7 34.Qc2 gxh3 35.gxh3* −1.33/19*; 26.Qb4* relatively best according to Hiarcs but... *Be3* regains the sacrificed material e.g. *27.Rfe1 Qd3+ 28.Kc1 Bh6* zugzwang position discovered by Hiarcs8!? What can White do?*; 26.−− Be3)* 26...Rxd2+ 27.Rxd2 Qxe1 28.Qb3 Qe8 Here Black has four pawns for the exchange and should eventually win. 29.Qd3 Qe4 30.Re2 Qxd3+ 31.Kxd3 Kd8 32.h3 g3 33.Re5 f4 34.Re1 −0.90/19 Fritz blundercheck;

B) 22...Qe6 This move also mentioned by Staunton but only = says Hiarcs 23.Nc4 *(23.Qf4 Rhd8 24.Nb3 a6 25.Bc3 Kb8 26.g3 c5 27.Nc1 c4 28.Rxd5 Qxd5 29.Qxf5∓* −0.91/12 *)* 23...Kb8 24.Qc2 Rf8 25.Nxb6 axb6 26.Qb3 f4 27.Rf2 f3+ 28.gxf3 gxf3+ 29.Rxf3= 0.00/13;

When the answer to White's 21st move in the Berlin−Breslau game was published in the German press (says Bassi) a strong player living in Brandenburg, Angerstein (first name unknown?), pointed out that in his opinion 21...h5! was far stronger than 21...g4. He challenged Mendheim, the leader of the Berlin team, to play out the variation in a private CC game. Later Staunton claimed that Black was still OK with 21...g4 and missed the win at the next turn (but Bassi and Pagni do not remark on this.) If Staunton is right (as he appears to be), the real error was the next move. **22.Nd2** Fritz8 thinks this was immediately a mistake:

[The 19th century German commentators seem to have overlooked Staunton's solution and also failed to note that Angerstein's idea could have been made doubtful by 22.Rxd5! cxd5 23.Qa3

A) 23...Bc5? 24.Qd3 and Black cannot defend all his main pawns;

B) 23...Qd7 Tait 24.Re1 *(24.Nxg5 Qb5+ 25.Ke1 Ba5+* draws *)* 24...c5 *(24...g4 25.Nd4)* 25.Nxg5 is less clear, maybe +=;
C) 23...Qxa3 24.Bxa3 Re8 25.Bb2 d4 26.Kd3 c5 27.Kc4 g4 and now Hiarcs8 recommends returning the piece by 28.Nxd4! cxd4 29.Rxf5± after which material equality will soon be restored and White's kingside pawns seem stronger in the endgame than Black's queenside majority, since here the kings are on the queenside.]

[22.Qc2 is also playable according to Hiarcs8; White is no worse and could have a small edge.]

22...Qe6 This is quite good but the Staunton method

[22...Rxe5+ is very strong here too according to Hiarcs 23.Bxe5 Qxe5+ 24.Kd3 Rd8+ 25.Kc2 Qe2]

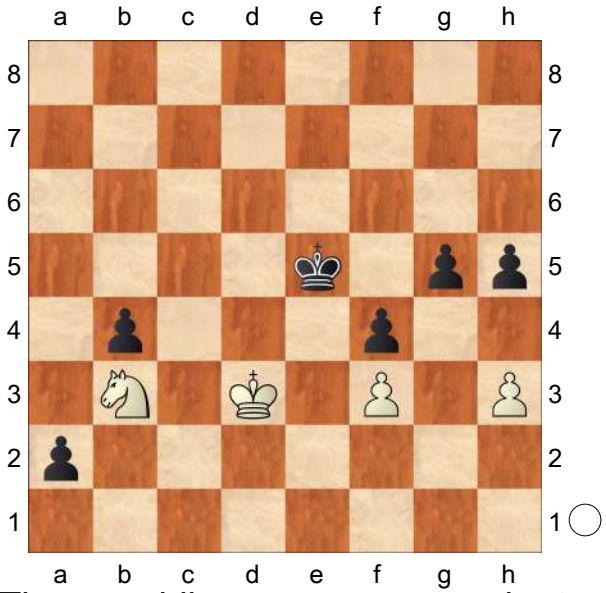
Diagram

[48...Kxe5 Diagram



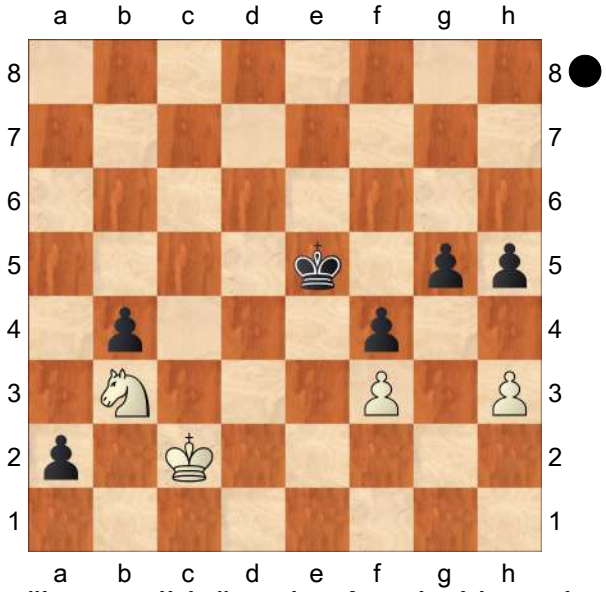
"Three mobile pawns are superior to a N" said Fine generalised, giving some of the Handbuch variations and a few of his own. Averbakh and Chekhover gave a more precise evaluation: "The N is tied down by the e−pawn and on the kingside White has constantly to reckon with the ...g4 breakthrough. This forces us to evaluate the position in Black's favour".

A) 49.Kc4 g4 50.fxg4 Ke4! 51.g5 f3 52.g6 f2 53.Nd2+ Kf4 54.g7 f1Q+ 55.Nxf1 a1Q 56.g8Q Qa2+ and wins − Handbuch;

B) 49.Na1 Kf5 50.Ke2 g4 51.hxg4+ hxg4 52.Nb3 gxf3+ 53.Kxf3 Ke5 "when White is helpless" − Averbakh & Chekhover; "...and the white K is tied down to the f−file, so that Black is free to go to the support of his queenside pawns" − Fine;

C) 49.Ke2 Kf6 50.Kd3 *(50.Kf2 Kf5* and if *51.Nd4+ Ke5* followed by ...Kd5−c4 etc. − Handbuch *)* 50...g4 51.fxg4 hxg4 52.hxg4 Kg5 53.Ke2 Kxg4 54.Kf2 f3 55.Na1 Kf4 56.Nb3 Ke4 (Handbuch) 57.Kf1 Kd5 58.Kf2 Kc4−+ Fine; "and Black won" − Averbakh. But Bledow (1843) clearly states the game ended at move 48.;

D) 49.Kc2! Diagram

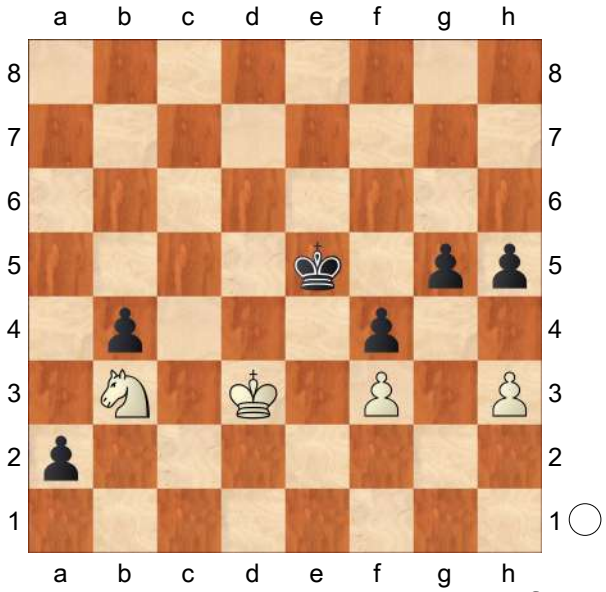


"is possible", write Averbakh and Chekhover, but nevertheless they prove Black can win.

D1) 49...Kf5 50.Kb2 g4 51.fxg4+ hxg4 52.hxg4+ Kxg4 53.Kxa2=;

D2) RR49...g4 50.fxg4 hxg4 51.hxg4 f3 52.Kb2 f2 53.Nd2 b3 54.g5 Kd4! *(54...Kf5 55.Ka1 Kxg5?? 56.Ne4+* draws *)* 55.g6 Kd3 56.g7 Kxd2 57.g8Q f1Q also wins since the a−pawn will promote, but it clearly more complicated allowing White a queen as well.(J. A.Tait);

D3) 49...Kd5! 50.Kb2 *(50.Kd3 g4 51.fxg4 hxg4 52.hxg4 f3 53.g5 f2 54.Ke2 Kc4 55.Na1 b3 56.g6 b2 57.g7 f1Q+ 58.Kxf1 bxa1Q+)* 50...Kc4 51.Kxa2 Kd3 52.Nc5+ Ke3 53.Ne6 Kxf3 54.Nxg5+ Kg2 55.Kb3 f3−+]



"Herr Mendheim giebt die Partie auf," wrote Bledow. Bassi article (Chapter 3 in Mail Chess p340) says this endgame became a classic, cited in all 8 editions of the Handbuch, Berger's 'Treatise' and even Fine − though these sources do not refer to the game but just cite Bledow, 1843 (the book in which the game was first published). Compare Walker, Chess Studies, p72 nos 25−26 (386, 387). Also Fine p.95, Avebakh p175 etc. If it had been a competitive game, White might have continued a bit longer perhaps. The variations given in the Handbuch probably stemmed from Mendheim himself, a noted problem composer.

A2) 19.Qxe4 fxe6 *(RR19...Rhd8)* 20.Nc3 Rhd8 21.Qxh4+ Bxh4 22.b3 Nd3

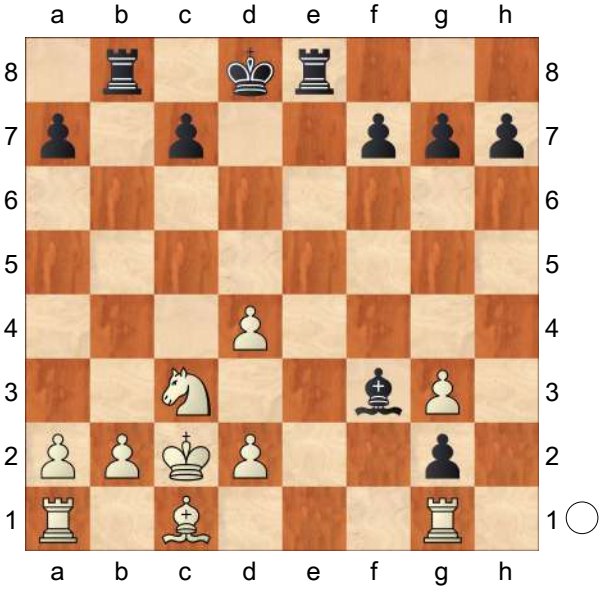
23.Ba3+ Kf7 24.Kc2± Palkövi but Fritz thinks Black has compensation for the pawn;

B) 15...exf3 Berliner recommends this move, which is only a sideline for Pálkövi who obviously hasn't seen the "Deathbed".

B1) 16.Bxa8 fxg2 17.Rg1 Qg4+ 18.Kc2 Qe4+−+;

B2) 16.gxf3 Qxd4 *(*Alternative line *16...Ne7 17.Qb7 Rc8 18.d5 Bf5* is in the appendix to Berliner's monograph [Hitech opening book] *)* 17.Bxa8 *(17.hxg3 Nb4 18.Qa4 Nxc6 19.Qxc6? Bd5−+)* 17...Bf2 threat ...♘e3+ 18.Qb8+ *(18.Bxd5 Bxd5 19.Qa3 Qc4* "and I can't find a useful continuation for White" *)* 18...Ke7! 19.Qxh8 Qd3! 20.Bxd5 Bxd5 21.Re1+ Bxe1 22.Nc3 Bxf3+ 23.Kxe1 Qd4! 24.Kf1 Qd3+ 25.Kf2 Bc6 and Black will draw by perpetual check claims Berliner but after 26.Ke1 he doesn't even have a check;

B3) 16.Bxd5! fxg2 *(*In my original (1960s) analysis, Berliner thought that *16...Qh5?!* won for Black, but White can play *17.Qxf3! Bg4 18.Bxa8* getting too much material for the ♕ *)* 17.Qxg3! The Hungarian theoretician stops here, claiming clear advantage to White. That might not seem unreasonable as White is a piece for a pawn ahead and the queens are coming off. However, it is too early to evaluate the line. Dr. Berliner has a lot more to say about it. Qxg3 *(17...gxh1Q+ 18.Bxh1 Qxg3 19.hxg3 Rb8 20.d3 h5 21.Kc2 f6 22.d5 Bg4 23.Be3 h4 24.gxh4 Rxh4 25.Nd2 Kd7 26.Be4 f5 27.Bg2 Rh2 28.Rg1 Rg8 29.Kc3 g5 30.Nc4 Be2 31.Ne5+ Kc8 32.Bxa7 f4 33.Be4 g4 34.Bd4 Rh5 35.Ng6 Rxg6 36.Bxg6 Rg5 37.Be4 g3 38.Bf6 Rh5 39.Bd4 Rg5 40.Kd2 f3 41.Ke3 f2 42.Kxe2 fxg1N+ 43.Bxg1 Kd7 44.Kf1 Kd6 45.Be3 Rg4 46.Kg2 Ke5 47.Kf3 Rg7 48.Bf4+ Kd4 49.Bxg3 c5 50.dxc6* 1−0 Pilgaard,K−Pedersen,N/Greve DEN 2002 *)* 18.hxg3 Bxd5 19.Rg1 Re8! cuts off white K from kingside 20.Nc3 Bf3+ 21.Kc2 Rb8! Diagram



In my Kibitzer 60 Internet column at www.chesscafe.com, I wrote "This is now a (the?) critical position of the Berliner variation." 22.d3 Maybe some other moves can also be considered but this is the most plausible.

B3a) 22...Rb6 23.Bf4 *(23.Bd2 Rg6 24.Be1 Rh6!∓* Berliner, cited in the 1998 Deathbed monograph p.13 and in the Mammoth Book *)* 23...h5 "was a main line of Berliner's analysis, which he considered about equal"

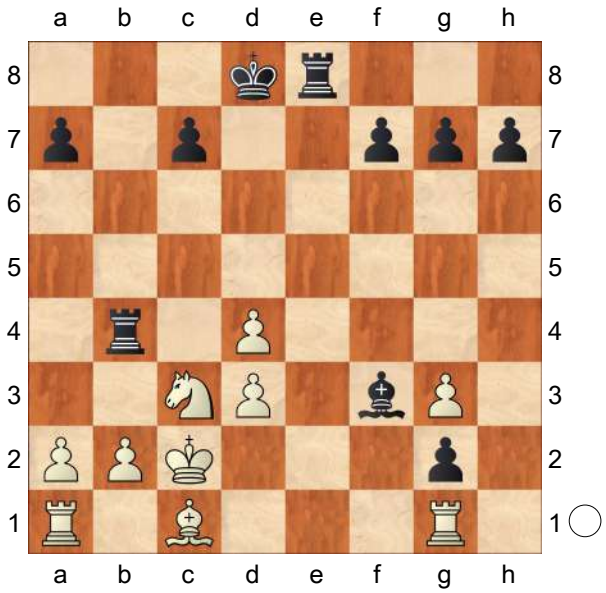
B3a1) 24.Rae1 Rxe1 25.Rxe1 f6 26.Ne4 Re6 27.Rg1 g5 28.Bd2 h4 29.gxh4 *(29.Nxg5* "leads to a draw" *)* 29...gxh4 30.Bf4 *(30.Nxf6 h3)* 30...h3 Threat ...Bxe4 31.Nc3 Be2 32.d5 Re8 33.Kd2 Bf1 "and I see no reason why Black should lose this position";

B3a2) 24.Ne4 f5! 25.Nc3 Rg6 26.Kd2 Rg4 27.Rae1! Rxe1 28.Kxe1 h4 29.Kf2 Bb7 30.d5 h3 31.Re1 g5 32.Be5 f4 33.Kg1 *(33.gxf4 h2)* 33...fxg3 "and Black is in great shape" − Berliner, but 34.Re4 Black can resign − Tait Rh4 *(34...Rxe4 35.dxe4 c6 36.d6)*;

B3b) RR22...h5!? might be considered but clearly White has some advantage. (TH);

B3c) 22...Rb4! Diagram

(Diagram)



TH Kibitzer comment: "Black's hopes rest partly on winning back a pawn or two, but principally on supporting the outpost on g2 and trying to break the blockade." This move is better than ♖b6 as originally analysed by Berliner on pages 12−13 of his 1998 monograph, and cited in the Mammoth Book of Greatest Games

B3c1) Dr Berliner's line goes instead 23.Bf4 Rxd4 24.Bxc7+ Kd7 but computers tend to think 24...Kc8 is slightly better *(RR24...Kxc7?? 25.Nb5+)*

B3c11) 25.Bf4 h5 26.Rae1 *(26.Rge1 Rxe1)* 26...Rxe1 27.Rxe1 h4 28.Be3 h3 "but the placement of the bishop on f4, encouraging this ...h4 tactic, is obviously faulty." (TH, 2001);

B3c12) 25.Rae1 Rxe1 26.Rxe1 Rg4 27.Bf4 h5 TH, 2001: "(Here we go again). It's very hard to follow the analysis in Berliner's monograph and

he doesn't give assessments, but I think a deep scepticism on both his conclusions and those of the computers would be justified.";

B3c2) RR23.Ne4

As I analysed in 2001 in 'The Kibitzer', number 60, saying: "This could be a key move".

B3c21) 23...h6

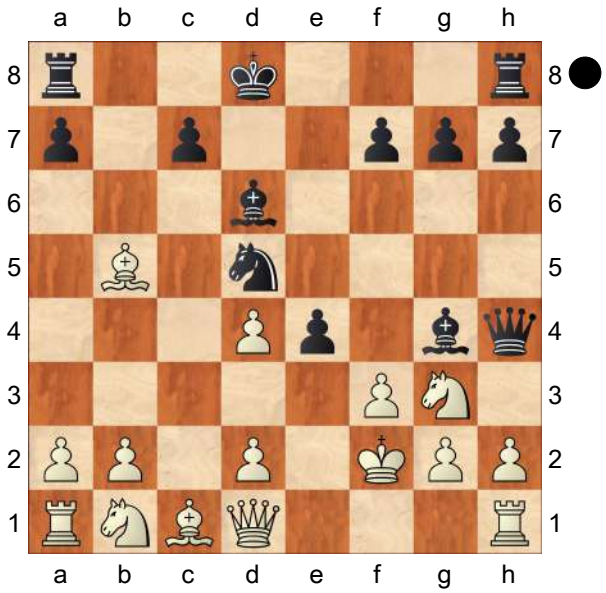
(to stop Ng5) White has the long−winded but possibly effective knight manoeuvre 24.Nd2!? *(24.Bf4!?)* 24...Bd5 25.Nc4 Idea N−e3xg2 Re2+ 26.Bd2 Rf2 27.a3 Rb8 28.Rae1±;

B3c22) 23...Rb6!?;

B3c23) 23...Rxd4

Best? My 2001 text ran: 24.Bg5+ Kd7 Nevertheless, 13 Qb3 does seem to be the cutting edge of the Berliner variation at present, and will quite possibly turn out in the end to be a bust of the whole idea. 25.Be3 and it is not clerar whether Black can maintain his initiative since *(25.Rae1* may be better *)* 25...Rexe4 26.dxe4 Bxe4+ 27.Kc1□ Rd6 *(27...Rc4+ 28.Kd1 Rc2 29.Bd4)*]

[Moreover, 13.Kf2 Diagram



has had to be reassessed in recent years.

A) Originally HB said: 13...f5∓ "yields an overwhelming attack" according to Berliner in the book of 5th World Ch. but this is unsound and he has changed his mind.

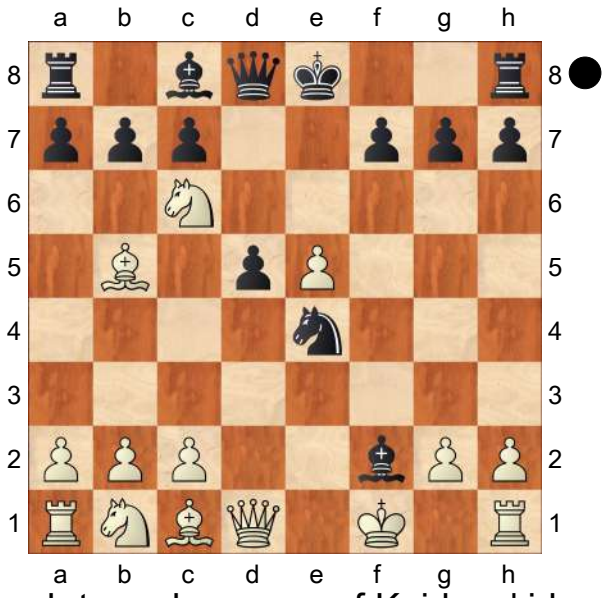
□ **Clark,Robert William**
■ **Morss,Mark F**
USCF 92CM76 corr 1992
[Morss/ Harding etc.]

White in this game was Robert Clark of Austin, Texas. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4** The same position can arise from 1. e4 e5 2. Nf3 Nc6 3. d4 exd4 4. Bc4 Nc6! or 1. e4 e5 2. Bc4 Nf6 3. d4 exd4 4. Nf3 Nc6! **5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bc5!** This is much better than 7...Bd7, but it requires a good deal of theoretical knowledge. **8.Nxc6!?** An extraordinary move that attracted attention in the early 1990's, after lying dormant in chess opening theory for more than 75 years. During all that time it was considered highly dubious, and as the Italian Game shrank in significance, the analysis supporting this conclusion was gradually pruned from the openings manuals. **8...Bxf2+ 9.Kf1**

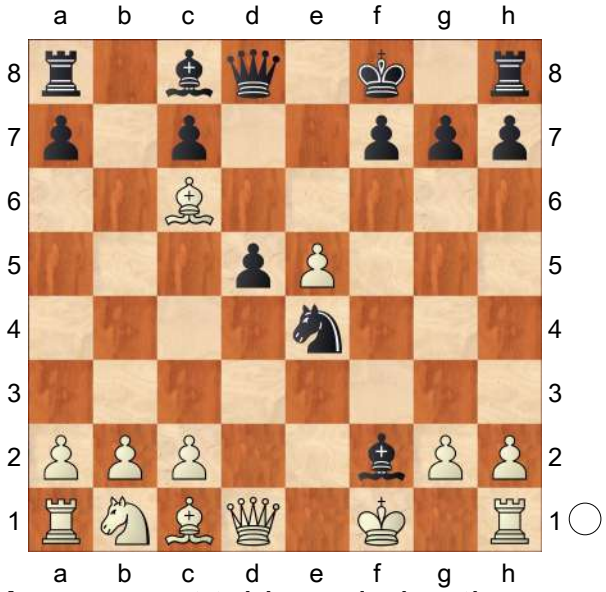
(Diagram)

Qh4! The "Kaidanz Variation," and one almost lost to chess theory. Modern manuals contain just one or two brief continuations after 9...Qh4, not nearly



enough to make sense of Kaidanz' idea. But when this game was played, I happened to recall a remark concerning this variation by Edward Winter in a letter to Larry Evans' Chess Life column. Normally I don't save back issues of CL, but I was able to dig this one up. Apparently, Dr. Hermann Kaidanz authored an analysis of this line that appeared in the Wiener Schachzeitung in 1904. Desperate for sources, I telephoned the Cleveland Public Library, which has one of the world's premier chess collections. Yes, they said, they did have the Wiener Schachzeitung for 1904−1905. I was exultant, but as it turned out, I didn't need to make the two−hour drive to Cleveland, because I discovered a more recent, very extensive analysis in the 1916 edition of the Handbuch des Schachspiels (Karl Schlechter, ed.), of which I had a copies of all the pages relevant to the Italian Game. Schlecter writes that the lines given there are "the main variations of an analysis by Dr. Herman Kaidanz."

[In 1991, Rini Kuif, a Dutch IM writing in New in Chess Yearbook 20, expressed distrust of 9...Qh4 (without being aware of Kaidanz' analysis) and recommended 9...bxc6 10.Bxc6+ Kf8



My opponent told me during the game that he regarded this as Black's best continuation. The game caused him to change his mind. Schlechter in the Handbuch claims that Kuijf's idea is refuted by 11.Qd3 and now: *(11.c4 Ba6 12.b3 dxc4 13.Ba3+ Kg8 14.Qxd8+ Rxd8 15.Bxe4 Bd4 16.Nc3 cxb3+ 17.Ne2 Bxa1 18.Kf2 Rd2 19.Bf3 Bd4+ 20.Kg3 Bxe2 21.Bxe2 bxa2 22.e6 Rxe2* 0−1 Pinedo J.−Anderssen A., Amsterdam 1861 *)*

Clark had prepared this great winning try which, amazingly considering the exhaustiveness of Kaidanz' analysis,

Kaidanz did not think of! Kaidanz gave (again I quote Schlechter's summary in the Handbuch, in all cases with advantage for Black): **11...Ng3+!** Safe and solid, but seemingly not sufficient for advantage! For a long time after the game was played, I was sure I had refuted Clark's idea, and during the game, Clark thought so too. But my latest appraisal is that the game is even.

[11...Bxe3?! 12.g3

A) 12...Nxg3+ 13.hxg3 Bh3+ 14.Ke2 Qxg3 and now it appears that White has two different ways to secure a big advantage *(14...Bg4+ 15.Kxe3 Qxg3+ 16.Kd4* and Black's task is hopeless *)*

A1) 15.Nd4+ Ke7 16.Qf3 *(16.Qc5+ Kd8 17.Qd5+ Ke7* and White makes no progress *)* 16...Qg5 *(16...Qxf3+ 17.Nxf3 Bg2 18.Rd1)* 17.Rxh3! Bxd4 18.Rh5 Qc1 19.Bc4 Raf8 20.Rf5 Bxb2 *(20...Qxc2+ 21.Nd2 Bxb2 22.Rxf7+* is similar *)* 21.Rxf7+ Rxf7 22.Qxf7+ Kd8 23.Nd2!;

A2) 15.Nb4+ and now:

A2a) 15...Ke7 16.Rxh3 Qxh3 17.Qxb7 Qg4+ 18.Kxe3 Qxb4 19.Qxc7+ Kf8 20.Qd6+ Qxd6 21.exd6 The situation with the pawns is strange, but White is certainly winning;

A2b) 15...Kf8 16.Rxh3 Qxh3 *(16...Qf2+ 17.Kd3 Qf1+ 18.Kxe3 Qxh3+ 19.Kd2)* 17.Bc4 and White has a material advantage and the initiative;

A2c) 15...c6 16.Bxc6+ Kf8 17.Rxh3 Qxh3 18.Bxb7 Bb6 *(18...Re8 19.Nd3* also favors White *)*

A2c1) 19.Qf3 Qxf3+ 20.Bxf3 *(*equal is *20.Kxf3 Rb8 21.Be4 Bd4)* 20...Re8 21.Nd3 Bc7 22.Nc3 Bxe5 23.Bc6 Re7 24.Nxe5 Rxe5+ and White is better in this ending, in part because of his more active king;

A2c2) 19.Qe4 followed soon by Nd3, and Black has insufficient compensation for his material deficit;

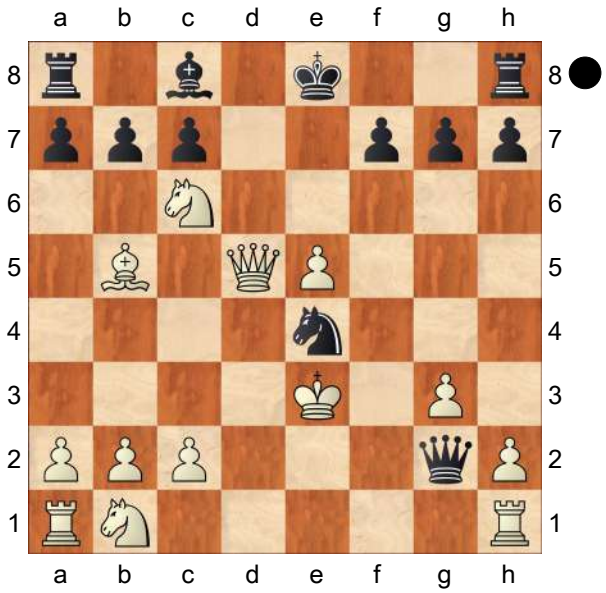
B) 12...Bh3+ 13.Ke2 Qg4+ *(13...Nxg3+ 14.hxg3* transposes into A above *)* 14.Kxe3 Bg2 15.Nd4+ Ke7 16.Rf1! Bxf1 17.Bxf1 with a big advantage for White;

C) 12...Qh3+! 13.Ke2

C1) Necessary but dreary is 13...Bg5! 14.Qxe4 Qg4+ 15.Kd3 *(*similar is *15.Qxg4 Bxg4+ 16.Kf2 a6 17.Ba4 Bd7 18.h4 Bh6 19.Nc3 bxc6 20.Rhd1±)* 15...a6 16.Ba4 Qxe4+ 17.Kxe4 Bd7 18.h4 Bh6 19.Nc3 bxc6 20.Rhd1 Ke7! *(20...Rb8 21.Rd4 Rxb2 22.Rad1 Bg4 23.Bxc6+ Ke7 24.Rd7+! Bxd7 25.Rxd7+ Ke6 26.Nd5* and White wins *)* 21.Rd4 and Black's two bishops don't quite make up for his weak queenside pawns and White's active pieces;

C2) 13...Qg2+ 14.Kxe3

(Diagram)



Analysis position It seemed to me during the game that Black is not attacking with nearly enough wood here, and I looked no further. But I believe the following analysis proves the correctness of this judgement. Qf2+ 15.Kd3 Qf3+ *(15...Bf5? 16.Nd4+)*

C2a) All is well for White if he plays 16.Kd4! Qf2+ *(16...Bh3 17.Nc3 Qf2+ 18.Kd3)* 17.Kc4 Qxc2+ *(17...Be6 18.Nd8+; 17...0−0? 18.Ne7+ Kh8 19.Qxe4)* 18.Nc3 and I don't see how Black can preserve his attack. For example Nd2+ 19.Kd4 0−0 20.Ne7+ Kh8 21.Ke3;

C2b) But not 16.Kc4? 0−0 (threatening ...Be6)

C2b1) 17.Ne7+ Kh8

C2b11) 18.Nxc8 Qxh1 19.Ne7 *(*or *19.Bd7 c6)* 19...c6 and Black is winning;

C2b12) 18.Nd2 Qe2+ 19.Kb3 Nxd2+ 20.Kb4 Qg4+ 21.c4 a5+ 22.Ka3 c6 23.Qxd2 cxb5 24.cxb5 Qc4 and Black has a powerful initiative;

C2b2) 17.Qd1 Be6+ 18.Kb4 a5+ 19.Nxa5 c5+ 20.Ka4 b6 and White is in some really serious trouble.]

[Note that Fritz5 after overnight CC analysis prefers 11...0−0 12.g3 *(12.Bxc5 bxc6 13.Qxc6 Qf4+ 14.Kg1 Qc1+ 15.Bf1 Nxc5 16.Qxc5 Qxb2 17.Nc3 Qxa1 18.Nd5 Be6 19.Nf4 Rfb8−+ −3.19/11)* 12...Qg4 *(12...bxc6 13.gxh4 Bh3+ 14.Ke1 cxd5 15.Bxc5 Nxc5 16.Nc3 Rab8 17.Rd1 Ne4 18.a4 Nxc3 19.bxc3 Rb6∓ −1.19/11)* 13.Be2 Qf5+ 14.Bf4 bxc6 15.Qd3 Qh3+ 16.Ke1 Nf2 17.Qc4 Nxh1 18.Qxc5 Qxh2 19.Qe3 Be6−+ −1.97/11 This all needs to be examined.]

12.hxg3

[Not 12.Ke1 Bxe3 13.Nd4+ c6 14.Bxc6+ bxc6 15.Qxc6+ Bd7 16.Qxa8+ Ke7 17.Nc6+ Bxc6 18.Qxc6 Rd8 19.Qf3 Nxh1+−+ −5.16/11 Fritz5]

12...Qxh1+ 13.Kf2

[13.Ke2? Bg4+]

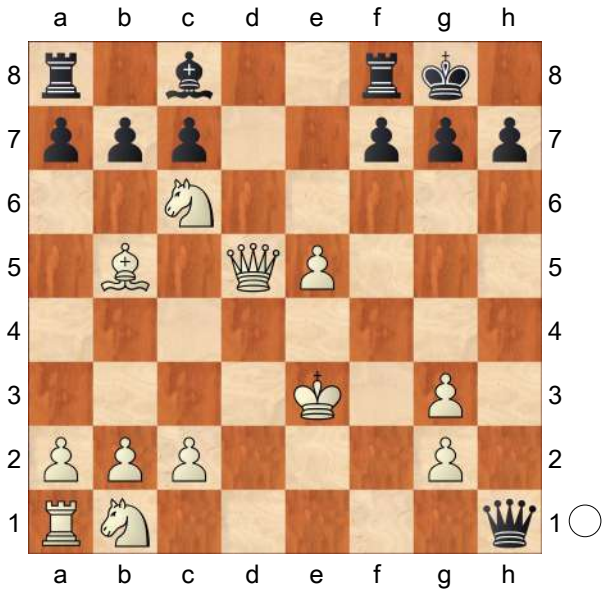
13...Bxe3+ 14.Kxe3 0−0

[14...Bd7 15.Nb8!]

[According to Fritz5, Black should play 14...Qh6+ 15.Ke2 *(15.Kf2 Bd7 16.Nd4 c6∓)* 15...Bg4+ 16.Kf1 Qc1+ 17.Kf2 Qxc2+ 18.Nd2 0−0 19.Qd3 Qxd3−+ −1.91/11]

(Diagram)

Black has only a rook versus two minor



pieces, but White's insecure king, weak pawns, and difficulties along the back rank are at least adequate compensation. **15.Ne7+ Kh8 16.Nxc8?** This gives Black a win. Why exchange an active piece for an inactive one, at the same time uniting Black's rooks?

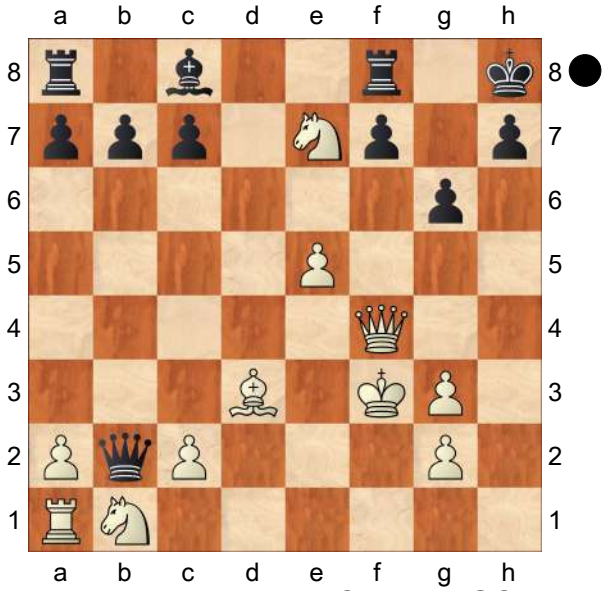
[Necessary was 16.Qe4! attacking the kingside. I didn't see this during the game, or for some time afterward. Risky but apparently necessary is

A) 16...c6?! 17.Bd3 Qe1+ *(17...Be6 18.Nc3* with a material advantage, and the initiative, for White*;* the same is true after *17...Re8 18.Nxc8 Raxc8 19.Nd2)* 18.Kf3 Qxe4+ 19.Kxe4 favors White;

B) 16...Qh6+ 17.Ke2 c6 18.Nxc8 Raxc8 19.Bd3 Qh5+ *(19...Rce8 20.Nd2* favors White *)* 20.Kf2 Rce8 21.Nc3 Rxe5 22.Rh1 Qxh1 23.Qxe5 and Black's pawns are very vulnerable;

C) 16...Qe1+ 17.Kf3 Qxe4+ 18.Kxe4 is better for White;

D) 16...Qc1+! 17.Kf3 Qxb2 18.Bd3 g6 *(18...f5? 19.Ng6+ hxg6 20.Qh4+ Kg8 21.Bc4+)* 19.Qf4 *(19.Nc3 Qxa1 20.Ncd5 Qd1+* and White's attack seems unlikely to succeed*; 19.Qh4? Qxe5)*



Analysis position after 19. Qf4.

D1) 19...Kg7? 20.Qf6+ Kh6 21.g4 Qxa1 22.g5+ Kh5 23.Kg3 Qd4 24.Be2+ Bg4 25.Nf5;

D2) 19...Bf5 looks extremely dangerous, but maybe Black can hold the draw: 20.Nxf5

D2a) 20...f6

D2a1) 21.Qh6 gxf5 *(21...Rg8? 22.Ne7)* 22.Bxf5 Rf7 23.Qh5 Qxe5! 24.Qxf7 Qxf5+;

D2a2) 21.e6 Qxa1 22.Qxc7 Rg8 23.Nh6 Rgf8 24.Qxb7;

D2b) 20...Qxa1 21.Ne7 Rg8 22.Nxg8 Kxg8 and the game looks about even, for example 23.c3 Rd8 *(*or *23...Qb2)* 24.Bc4 Rf8;

D3) 19...Rg8 appears to be the most solid: 20.Qf6+ *(20.Nxg8*

Kxg8 21.Bc4 Be6 and White will have insufficient compensation for the exchange *)* 20...Rg7 21.Nxg6+ in this way White can force perpetual check *(21.Nd2 Bg4+ 22.Kxg4 Qxa1* and Black's not−very−active rooks and solid pawns are stronger than White's active minor pieces and not−very−solid pawns *)* 21...fxg6 *(21...hxg6 22.Qh4+=)* 22.Qf8+ Rg8 23.Qf6+ Rg7= And so, based upon my present understanding, I believe that the Kaidanz Variation leads to equality.]

[16.Bd3 Qe1+ *(16...Qc1+ 17.Kf3 Qxb2 18.Qe4* transposes into (C) above. *)* 17.Kf3 f6 18.e6 Bxe6 and Black has a nice game, for example 19.Qh5 Qd1+ 20.Be2 Qxc2 21.Na3 g6 22.Nxc2 gxh5]

16...Qc1+ 17.Qd2 Otherwise Black retains the threat of ...c6. **17...Qxb2 18.Qd4**

[Worse is 18.Nc3 Qxa1 19.Ne7 Rad8]

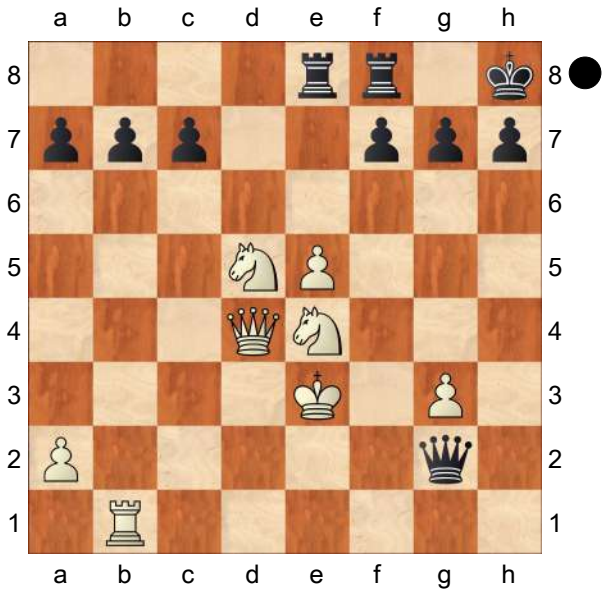
18...Qxb5 19.Ne7 Rae8 Black intends to break through on the e− and f−files. **20.Nc3 Qb2 21.Rb1 Qxc2 22.Ned5 Qxg2**

[Also sufficient for the win is 22...f6 23.e6 Rxe6+ 24.Kf3]

23.Ne4

(Diagram)

Position after 23. Ne4. White seems to have a pretty solid setup. **23...c5! 24.Qxc5 f5** and here White resigned. During the game, I expected 25. Nd6 Rxe5+ 26. Kd4, but then 26...Qf2+! (a



move pointed out to me later by the editors of the Dark Horse News, a now−defunct chess publication here in Columbus in which I published an earlier set of notes to this game).

[24...f5 25.Nd6 Rxe5+ 26.Kd4 Qf2+!−+]

[Berliner]

Myers: This game is given as #1 by GM Soltis in "The 100 Best Chess Games" and #55 (in date order) by Burgess/Nunn/Emms in "The World's Greatest Chess Games". In 1998−9, "Chess Mail" readers voted it the best correspondence chess game ever played. /// Soltis: Hans Berliner (1929−) was one of the strongest genuine amateurs in a century that saw chess surge towards professionalism. Born in Berlin, his family emigrated to the United States as World War II approached, and Berliner was naturalized as an American citizen at age 14. Berliner became one of the earliest computer programers [to work on chess playing computers]: he developed a world computer championship program and earned a PhD with a thesis on "Chess as Problem Solving". He also developed a program for backgammon that defeated the reigning World Champion in a seven−point match. Berliner also was [a strong enough over−the−board chess player] to qualifiy for US Champoinships and for the United States team that competed in the 1952 Olympiad. But Berliner turned to postal chess in 1955, and during 1965−1968 he won the 5th World Correspondence Championship with a huge 3−point margin−−and then essentially retired from all competition. In this key game from the postal championship, he faced many−time Moscow champion Yakov Estrin, one of the renaissance men of Soviet chess. Estrin (1923−1987) earned the International Master title in over−the−board play and the International Grandmaster and International Arbiter titles in correspondence play, and was an accomplished trainer and prolific writer, particularly on openings. He became the 7th postal World Champion in the 1972−1976 series. **1.e4** Myers Harding Burgess Russell Soltis Berliner **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 b5!? 6.Bf1! □ **City Insterburg**
■ **City Vienna**
match 1865−66 corr (1) 1865
[Myers]

Myers: The Wiener Schachgesellschaft was founded in 1857 and during the 1800's played several short matches with other clubs in Europe, including Berlin and London. Vienna won both games in the the match with Insterburg, a city not very well−known today. In 1865, Insterburg was part of Prussia, later part of Germany; and today it is called Chernyakovst, located in Kaliningrad Oblast, Russia. **1.e4** Myers **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Bd6 11.d4 Qc7 12.Bf4 Nd7**

□ **Pieri,F..**
■ **Chiburdanidze,M..**
Forli 1990

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7
This move characterises the Hungarian Defence. **4.d4 exd4**
[4...d6 is examined in Rogers−Ivkov and the two subsequent games.]
5.Nxd4 d6 6.0−0 Nf6 7.Nc3 0−0 8.h3 Ne5!?
[8...Bd7 is covered in the next game.]
[Black has also tried: 8...Nxd4 (slightly passive, but still playable) 9.Qxd4 c6 *(* the exchange of White's most active piece by *9...Be6* gives Black problems on the light squares and therefore cannot be recommended, e.g. *10.Be3 Qd7 11.Rad1 Bxc4 12.Qxc4 Qc6 13.Qd3 Rae8 14.Bd4 Bd8 15.Rfe1 Nd7 16.Nd5* with a clear edge for White in A.Krutko−S.Dzhambulatov, Dagomys 2004 *)* 10.a4 Nd7 11.Be3 b6 12.Rad1 Qc7 13.f4 a6 and it is hard to see any advantage for White, B. Spassky−V.Hort, Reykjavik match 1977. White's play in this game I think was probably too slow.]
[8...Re8 9.Re1 Bd7 10.Bf4 *(* or *10.Bg5 h6 11.Bh4 Nxd4 12.Qxd4 Bc6* with more or less even chances, A.Zude−Y.Balashov, German Bundesliga 1996 *)* 10...Bf8 11.Qd2 h6 12.Rad1 a6 13.a4 Ne5 14.Bf1 Rb8 and Black had decent counterplay in J.Palkovi−J.Stocek, Czech Team Championship 1997.]
9.Be2
[After 9.Bb3 c5! 10.Nf3 c4 11.Nxe5

*(*not *11.Ba4? a6* and Black wins *)*
11...cxb3 12.Nd3 bxc2 13.Qxc2 d5 Black is at least equal, J.Arni−D.Lima, Imperatriz 2003.]

9...Re8
[9...Ng6!? 10.Re1 Re8 11.Bf1 Bf8 12.a4 a5 13.g3 c6 14.Bg2 gave even chances in P.Kazakov−V. Shinkevich, Tomsk 2001. However, I would be surprised if White can find a more aggressive way to play the position.]

10.f4 Ng6!? The knight is a teaser here. It does not appear to be very active, it but is nevertheless well prepared to meet most of White's advances.
[I am not certain that White is really better in these positions, e.g. 10...Ned7 11.Bf3 Bf8 12.Re1 c6 13.b3 Nb6 14.Bb2 d5 was equal in B. Rogulj−M.Knezevic, Yugoslav Championship 1977.]

11.g4!? Bf8 12.f5 Ne5 13.g5 Nfd7 14.Qe1 c6
[14...Nb6!? with chances for both sides was another viable option.]

15.Be3 b5
[Or 15...Nb6!? again.]

16.Qf2? Is White manoeuvring or something?
[Here 16.a3 looks slow, but then Black has to play two more moves to reinstate the threat of ...b5−b4.]

16...b4! When allowed, why not?

17.g6?? Unnecessary desperation.
[17.Nb1 c5 18.Nf3 Bb7 19.Nbd2 Nxf3+ 20.Qxf3 d5! with the initiative was something White had to endure. And after 21.Qg3!? dxe4 22.Nc4 the position is not that clear.]

17...bxc3 18.Nxc6 Qc7!?
[Black could take the knight as well, since after 18...Nxc6 19.gxf7+ Kxf7 20.Bc4+ Ke7! it is hard to see anything for White.]

19.gxh7+ Kh8 20.Nxe5 Nxe5 21.bxc3 Bb7 22.Bd3 d5 23.f6 dxe4 24.Be2 Nf3+ 25.Kh1 Re6

□ **Rogers,I..**
■ **Ivkov,B..**
Bor 1984

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7 4.d4 d6 This is the other main line of the Hungarian Defence. **5.dxe5** Usually, books claim that White has an advantage by entering the endgame, but a closer look shows that the strongest players do not find any real advantage there at all, and often soon concede a draw.

[Therefore we shall look at the more ambitious 5.d5 in the next game]
[while 5.Nc3 is seen in Sveshnikov−Kholmov.]

5...dxe5 6.Qxd8+ Bxd8 7.Bd5 This game is an example of how Black can win with this line, even against a strong opponent. Ian Rogers is a famous attacking player, but clearly less dangerous once the queens comes off. By creating weaknesses in his own position, White slowly makes the position difficult for himself, though he could have probably made a draw all the way to the end. Other options for White are:

[7.Bb5 Bd7 8.0−0 Bf6 9.c3 Nge7 10.Be3 Nc8 11.Nbd2 ½−½ R.Kuczynski−M.Krasenkow, Polish Championship 1996.]
[7.Ng5 Bxg5 8.Bxg5 Nd4 9.Na3 Be6 10.0−0−0 Bxc4 11.Nxc4 f6 12.Be3 0−0−0 13.c3 Nc6 14.Rxd8+ Nxd8 15.a4 gave White a slight edge in L.Yudasin−Y.Lapshun, New York (rapid) 2004, but the a game ended in a draw. It is very hard to win such a symmetrical position.]
[7.Nc3! is clearly the main line, when Black has tried a lot of different moves:

A) 7...Nf6 8.Be3! 0−0 *(8...Ng4 9.Bd2 0−0 10.h3 Nf6 11.0−0−0* was better r White in Y.Yakovich−A. Kovalev, Gistrup 1996; Black is not ready to face a Nd5 jump *)* 9.Bc5 Re8 10.Ng5 Be6 11.Nxe6 fxe6 12.Bb5 Nd7 13.Bxc6 bxc6 14.Ba3 Nb6 15.b3 White had an enjoyable advantage in E.Vasiukov−F. Gheorghiu, Manila 1974.;
B) 7...f6 8.a3 Nge7 (generally I find this way of developing dubious) 9.Be3 Bg4 10.0−0−0 Nc8 11.Rd3 Nd6 12.Ba2 Be7 13.Nd2 0−0−0 14.f3 and White was better and eventually won in D.Bronstein−V. Kozlov, Daugavpils 1978.;
C) 7...Nge7 8.Be3 Ng6 9.0−0−0 0−0 10.h3 Na5 11.Be2 Be6 12.Ng5 Bc4 , was V.Stoica−V.Hort, Porz 1991, and here maybe 13.Bg4! gives White a real plus.;
D) 7...Bg4!? looks respectable, e.g. 8.Be3 Nf6 9.Bb5 Nd7 10.0−0−0 Ncb8 11.h3 Bxf3 12.Bxd7+ ½−½ A.Shirov−D.Campora, Biel 1995.;
E) 7...−−]

7...Nge7 8.Bb3 f6 9.c3 Na5 10.Ba4+ Kf7 11.Nbd2 Be6 12.b4!? This move is rather committal and doesn't really achieve a lot. **12...Nc4 13.Nxc4 Bxc4 14.Bb3 Be6!?** Black does not want to open the a−file for the white rooks. It is clear anyway that Black is not worse. **15.Bxe6+ Kxe6 16.a4 Nc8 17.Be3 a5!?** Black does not want White to advance too far. On the minus side Black now has some pawns on dark

squares. The chances are still level.
18.Ke2 Be7 19.Rhb1 Nd6 20.Nd2 b6 21.f3 g6 22.b5
[Here 22.bxa5 Rxa5 23.c4 Rha8 24.c5 Nc8 25.cxb6 Nxb6 26.Bxb6 cxb6 27.Rxb6+ Kf7 is just a draw.]
22...Rhd8 23.Rd1 Nb7 24.c4 Rac8
[24...Bc5!? was also possible.]
25.Nb3 Rxd1 26.Rxd1 Bb4
Black is ready to advance the c−pawn, and White will never be able to put a knight on d5. Now White plays for a full point (for the opponent!). **27.c5?! bxc5! 28.Rc1 c6!** Suddenly White is in trouble. **29.b6 c4 30.Nd2?!** The white bishop is not very good and Black takes this as an invitation to exchange into a promising endgame.
[Instead 30.Rxc4 c5 was better for Black, who will probably try to win the b6−pawn very slowly.]
30...Bxd2
[30...Nd6!? was also promising.]
31.Bxd2 c5 32.f4 Rd8 33.fxe5 fxe5 34.Rf1? A blunder, probably made in severe time trouble (look at when White resigns).
[Black was also better after 34.Bc3 Rd6 35.Rb1 Rd3 36.Rc1 , but White could still offer some resistance.]
34...Rd4 35.Bg5
[If 35.Ke3 Rd3+ 36.Ke2 Ra3 37.Rf8 c3 and wins.]
35...Rxe4+ 36.Kd1 c3 37.Rf6+ Kd5 38.Rf7 Nd6 39.Rxh7 Rxa4 40.Bd8 Rb4 41.Bc7
0−1

GBR corr 1890

[Fraser]

Myers: This is Game #51 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident

that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4**

□ **Sveshnikov,E..**
■ **Agzamov,G..**
Tashkent 1984
[Nigel Davies]

15.Nb3 had been condemned on the basis of this game but once again it seems far from clear after 19.Qf4. **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bd7 8.Bxc6 bxc6 9.0−0 Bc5 10.f3 Ng5 11.f4 Ne4 12.Be3 Bb6 13.Nd2 Nxd2 14.Qxd2 c5 15.Nb3** This move was somewhat discredited by this game, though it's by no means clear that it's unplayable.
[For 15.Ne2 see Zelcic − Ivic and for]
[15.Nf3 see Gurevich − Polovodin and Masternak − Klovans.]
15...d4 16.Bf2 Bb5!
[After 16...0−0 White can play 17.c4! and then bring his knight to d3 via c1.]
17.Rfe1 Qd5 18.f5 h6 Preventing White's queen from landing on g5.

19.Kh1? This looks too slow.
[White should play 19.Qf4 after which Bc6 *(19...0−0−0!?)* 20.Qg4 looks interesting and double−edged.]
19...Bc6 20.Bg1 0−0−0 21.Qe2
[21.Rad1 Rhe8 would also be very nice for Black.]
21...f6
[21...Rhe8 would also have been strong.]
22.c4 Qxe5 23.Qd3?
[White's best chance was to enter an endgame with 23.Qxe5 fxe5 24.Rxe5 . Black would then have to find Rhe8 25.Rae1 Rxe5 26.Rxe5 Ba4! *(26...Re8?! 27.Rxe8+ Bxe8 28.h3!* isn't easy to win for Black *)* 27.Bf2 Bxb3! 28.axb3 d3 29.Re1 d2 30.Rd1 Ba5! 31.Kg1 *(31.Bxc5? Re8!)* 31...Re8 32.Kf1 Re4 to bring home the bacon.]
23...Qf4 24.Re6 Rd6 25.Rf1
[Or 25.Rae1 Rxe6 26.fxe6 Re8 with grim prospects for White.]
25...Qg5 26.Re2 Rdd8! 27.a4
[Or 27.Qh3 Rhe8 28.Re6 Be4 etc.]
27...a5 28.Nd2 Rhe8 29.Nf3
[After 29.Ne4 there follows Qg4 30.Rfe1 Re5]
[whilst 29.Rfe1 is met by Re5 30.Nf3 Bxf3 31.Qxf3 Qxf5 32.Qxf5+ Rxf5 etc.]
29...Qg4 30.h3 Be4! 31.Qb3 Qxf5 32.Nd2 Qg6 33.Nxe4 Rxe4 34.Rxe4 Qxe4 35.Bf2 Qe2 36.Kg1 d3 37.Re1 Qc2 38.Qxc2 dxc2 39.Be3 Rd4!
Nice touch. If White captures the rook he will face two connected passed pawns. **40.Rc1 Rxc4 41.Kf1 Kd7**
Black is three pawns up.
0−1

□ **19) All the Games: 7...h6**
■ **1) Charles Snow vs. Franklin,B**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.0−0 h6!? 7.d4 Qf6
Black's ...h7−h6 is not recommended this early on, if at all, but typical maneuvers and patterns of play are evident. **8.Re1** We considered this move [/variation/13943386] in chapter 16 [/course/80564/16]. **8...g5?!** Here it is, the 'secret sauce' in this 7...h6 dish! We imagine that Black's full−on charge saw plenty of action in the Boston clubs 150 years ago. By any real world standard, however, this lunge forward is...less

than optimal. **9.Na3 b6!?**
[It's a bit late for the usual recipe, and the least damaging play at this stage is 9...Bxa3! 10.Bxa3 d6 when Black may actually be okay. For example 11.Re3 Nge7 12.Nxe5 Nxe5 13.dxe5 Qxe5 14.Qa4+ Kf8± and Skynet authorizes less than 1/2 a pawn to White's account.]
[But he may as well forget about 9...g4?! here because of 10.Nxe5 Nxe5 11.Nb5! An unexpected shot. Nxc4 12.e5 Bxe5 13.Nxc7+! Black is punished for his tardy development. Kf8 14.dxe5 Qc6 That e−pawn was poisoned! 15.Nxa8 b6 16.Qxg4 Bb7 and though Black emerges with two Knights for a Rook and couple of pawns, he's struggling uphill − White gets credited +0.75 at least if 17.Rd1± in this position. Of course, Bishops of opposite color do add to the fun!]
10.Nb5 Bb7 11.Bd5±
[Also 11.Nxd6+ cxd6 12.Ba3 Nge7 13.Rb1± gives White much the better game. Observe that in corresponding positions with the Black Kingside pawns unmoved, the second player enjoys dynamic equality.]
11...Nge7 12.g3?
[It's not the time or place for this move. White should have gone 12.Nxe5 Bxe5 13.dxe5 Qxe5 14.Be3 0−0−0 The only chance. 15.Bd4± when he could enjoy many pleasant endorphin rushes.]
12...0−0−0∞ Now it's all up in the air.
13.a4!? Rdg8?
[A happy, carefree over−estimation of his attacking chances. By means of 13...exd4 14.Nxd6+ Qxd6 15.Ba3 Qg6 16.Bxe7 Nxe7 Black obtains a solid position. Following 17.Bxb7+ Kxb7 18.cxd4 Nc6∞ his Knight will live on the a−file after White advances d4−d5 or a4−a5 next. Unclear.]
14.a5± h5 15.axb6 axb6 16.Nxd6+ cxd6 17.Ba3!?
[17.Rb1 is a noticeable improvement; White should win.]
17...h4 18.g4 h3?!
[Black is at the tipping point anyway, but 18...Kc7± was relatively best.]
19.Re3??
[A blunder in view of 19.Nd2! heading Queenside, and White is winning. As it is, the position is 'unclear' again, offering equal chances.]
19...exd4!?
[We think 19...Qf4∞ immediately is somewhat better.]
20.cxd4 Rh4?
[But now only 20...Qf4± offers hope for the future.]
21.Nxh4 Winning. **21...gxh4 22.f3?**
[White needed to trade 22.Bxc6 dxc6 and only then 23.f3 , which ought to win.]
22...Qf4?
[Because now 22...Nxd5 23.exd5 Ne7 would have erased White's winning chances. After White redeployed 24.Bc1 Nxd5 25.Rea3∞ the players could settle in for the long haul.]
23.Rd3?!
[23.Rb3 wins.]
23...Nxd5 24.exd5± Nxd4?!
25.Rxd4??
[A terrible tragedy. Even here 25.Bb2 wins without much difficulty. Now

Black will sacrifice everything for the cause.]

25...Rxg4+ White is toast, burnt toast. Rather than face an ending three pawns down, he elects to go out in a blaze of glory. **26.fxg4 Qe3+ 27.Kh1**

[27.Kf1 holds out longer, but Ba6+ leads to mate in 16 moves! And yes, we figured that out one evening in a séance with candles.]

27...Bxd5+! 28.Rxd5 Qe4+ 29.Kg1 Qg2#

0−1

□ **Barczay,L..**
■ **Portisch,L..**
Hungarian Championship, Budapest
[Christoph Scheerer]

Coming down to earth: Over the years the theory of the Greco−Möller Attack has evolved as the variation was subject to many gruelling games. Eventually it seemed that the main line after 13...0−0 (see below) should lead to a draw, albeit only after massive complications, but the following game demonstrated a

significant improvement for Black which has rendered the Greco−Möller Attack close to unplayable. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5!**

[9.bxc3?! was played two years before the discovery of 9 d5 by none other than Steinitz in his World Championship return match against Emanuel Lasker in 1896. Unfortunately, after d5! 10.Ba3 dxc4 11.Re1 Be6 12.Rxe4 Qd5 13.Qe2 0−0−0 Black's position was perfectly fine.]

9...Bf6

[In 'Dangerous Weapons 1 e4 e5', 9...Ne5!? is advocated by Glenn Flear. After the pretty much forced 10.bxc3 Nxc4 11.Qd4 0−0 12.Qxe4 Nd6 13.Qd3 Qf6 he gives:

A) 14.Bg5 Qf5 15.Qxf5 Nxf5 16.g4 Nh6 17.Bxh6 *(*or *17.Be7 Re8 18.Rfe1 d6 19.Bxd6 Rxe1+ 20.Rxe1 Bxg4)* 17...gxh6 18.Nd4 d6 19.f3 Bd7 20.Rae1 Rfe8 21.h3 c5 with total control in S. Iermito−J.Pierrot, Villa Ballester 2001.;

B) 14.Ba3 b6 15.Qd4 Qxd4 16.Nxd4 Bb7 17.Bxd6 cxd6 18.Nf5 g6 19.Nxd6 Bxd5 20.Rfe1 Be6 21.f4 a6! 22.a4 Ra7 23.Reb1 Rb8 24.a5 b5 25.c4 b4 26.Ra4 b3 27.Ra3 Rc7 28.Raxb3 Rxb3 29.Rxb3 Rc5 30.Nb7 *(*or *30.Ra3 Kf8)* 30...Rxc4 with an endgame advantage in Fritz 6−V.Anand, Frankfurt (rapid) 1999.;

C) 14.−−]

10.Re1 Ne7 11.Rxe4 d6 12.Bg5

[The bayonet attack style 12.g4 is easily met by 0−0! 13.g5 Be5 14.Nxe5 dxe5 15.Rxe5 Ng6 with a good game as 'recommended long ago by Keres' (Harding).]

12...Bxg5 13.Nxg5 h6!

[13...0−0 has been analysed by generations of players, but ultimately leads to draw after 14.Nxh7 Kxh7 15.Qh5+ Kg8 16.Rh4 f5 . On this position Vladimir Vukovic in his 'Art of Attack' observes: 'White must try to justify the sacrifice of the knight. Admittedly, he controls the square h7, but at the same time, he cannot prevent the black king from escaping via f7 when it is checked. If the game is continued correctly, White can only obtain perpetual check, not mate'. Indeed, there are quite a number of ways to draw:

A) . One of the older lines is 17.Qh7+ Kf7 18.Rh6 Rg8 19.Re1 Qf8 20.Bb5 Rh8 21.Qxh8 gxh6 22.Qh7+ Kf6 23.Rxe7 Qxe7 24.Qxh6+ and White forces perpetual check.;

B) 17.Rh3 f4! 18.g4 fxg3 19.Qh7+ Christoph Scheerer: 'and again we have a perpetual.' Kf7 20.Qh5+ Kg8 *(*or *20...g6 21.Qh7+ Kf6 22.Qh4+ Kf7)* 21.Qh7+ and again we have a perpetual.;

C) . After 17.Be2 Black should not play Re8 *(*Black has to play *17...Ng6 18.Qh7+ Kf7 19.Rh6 Nf4 20.Bh5+ Nxh5 21.Qg6+ Kg8 22.Qh7+* when again White forces a draw *)* 18.Re1! Kf8 19.Bb5 Bd7 20.Re6 Ng8 . Vukovic states here that 'White's attack is driven back', but 21.Qxf5+ Nf6 22.Bxd7 Qxd7

23.Rxf6+ actually wins.;
D) 17.−−]

14.Bb5+
[14.Qe2 is no improvement. After hxg5 15.Re1 Be6! 16.dxe6 f6 17.Re3 *(17.f4 d5 18.fxg5 Qd6!* is also good for Black − Harding *)* 17...c6 18.Rh3 Rxh3 19.gxh3 g6! Black threatens to consolidate with ... Ke8−f8−g7. Another way to treat the position was seen in the game Z. Kovacs−Z.Hajnal, Paks 2000, which continued 20.Qd2 d5 21.Qc3 Nf5 22.Bd3 Qe7 23.Bxf5 gxf5 24.Qf3 0−0−0 25.Qxf5 Rd6 when Black returned the pawn to bring his king to safety, thereby retaining an enduring endgame advantage.]

14...Bd7 15.Qe2 Bxb5 16.Qxb5+ Qd7 17.Qe2
[After 17.Qxb7 0−0 18.Rae1 Ng6 19.Nf3 Rfb8 20.Qa6 Rxb2 21.Nd4 White has at least some practical chances to fight for a draw thanks to his active pieces. Now all Black has to do is to neutralize the pressure down the e−file.]

17...Kf8 18.Nxf7? Kxf7 19.Re1 Ng8 20.Re6 Kf8 21.f4 Nf6 22.Re7 Re8! 23.Rxe8+ Qxe8 24.Qf2 Qb5
. Having realised that he is a piece down, White finally called it a day.
[24...−− Conclusion: The Greco−Möller Attack is an important piece of art typical for those times in which romanticism was still written in capital letters. Nowadays, however, it is merely a piece for the museum. −−− Shock value 5/5, Effectiveness Rating 5/5, Longevity Rating 5/5, Creativity Value 4/5.]

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.d3!? This move stems back to Kieseritzky's match with Andersen in 1851, even though the variation bears the name of Paul Morphy. In fact, Morphy played it several times with the white pieces before switching sides. He probably decided it was easier to defend Black's cause. **6...h6 7.Nf3 e4** An immediate hit. **8.Qe2!**
[For the surprisingly common 8.dxe4?! , see the next game.]
[That leaves: 8.Nd4 Bc5 9.Be3 was J.Trapl−J.Smejkal, Prague 1986. Here Black should play the calm Nxd5 10.Bxd5 Bxd4! 11.Bxd4 Qxd5 with a slight edge.]
[8.Nfd2?! leads to an uncomfortable position for White after Bg4 9.f3 exf3 10.Nxf3 Nxc4 11.dxc4 Bc5! when Black has rapid development and White hasn't castled yet. This position has been reached twice and Black has won both games pretty quickly.]
8...Nxc4 9.dxc4 Bc5 The most active square for the bishop, simultaneously preventing Nd4. This position is a kind of tabiya for this variation. **10.Nfd2** White retains the possibility of castling long and keeps the f1−square free. This has lately become the main line and should lead to complex middlegames where Black definitely isn't worse.
[10.0−0 is actually uncommon, even though it looks very natural. However, after 0−0 11.Nfd2 Bg4 White has to go with the slightly inharmonious 12.Qe1 when Qd7! is a very strong idea, as pointed out by Bologan:
A) . White should probably plump for 13.Nc3 Rfe8 14.Nb3 when Black can go Bd6 *(*or even *14...Bf3!? .)*;
B) . The critical 13.Nb3? was spectacularly refuted in L. Bakos−L.Toth, Hungarian League 2011. Bf3!! was a stunning move, after which White is more or less lost. Moreover, 14.Bf4 *(14.h3 Qf5* followed by ...Qg6 doesn't save White *)* 14...Qg4 15.Bg3 Nh5 16.Nxc5 Nf4 17.Nxe4 Qh3!! was a splendid final move, after which White resigned.;
C) 13.−−]
[10.c3 prepares Nd4, as well as b4. Here Bologan makes a strong case for b5! which effectively undermines White's centre. Black is already a little better here.]
[10.h3 0−0 11.Nh2 is the old main line, which isn't very popular nowadays. Once again, Bologan has found a stunning resource that puts this variation under a cloud: c6! 12.dxc6 e3!! . Full marks for creativity! White can't open up the e−file, and thus the following variation is forced: 13.Bxe3 Bxe3 14.fxe3 Ne4 15.0−0 Ng3 . Black regains the invested material and remains actively placed.]
10...0−0 11.Nb3

[11.0−0 transposes back to 10 0−0, above.]

11...Bg4 12.Qf1 A curious square for the white queen, but Black's bishops are both going to get kicked back quite soon.

[Of course, not 12.Qd2? e3! and White loses.]

12...Bb4+! A very important check and one that prepares the ground for future counterplay. Black provokes c2−c3 which severely weakens the key square, d3. Note that White can't control this square because his light−squared bishop has gone. **13.c3**

[13.Nc3 a5! prepares a quick rush by the a−pawn and Black can also open up the position with ...c6 quickly.]

13...Be7 Seeing that Black's counterplay is connected with the move ...b5, this retreat leaves the d−file open. **14.Be3** White prepares Nbd2, h3, g4 and 0−0−0 when his pieces would be developed and the pawn consolidated.

[The critical variation goes 14.h3 Bh5 15.g4 Bg6 16.Be3 when Black transfers his knight towards White's weaknesses: Nd7 17.N1d2 Ne5 18.0−0−0 Nd3+ 19.Kb1 and now it's time for b5! . So far, things have been relatively forced. Black has some initiative on the queenside which should offer him an edge: for example, 20.Nd4 bxc4 21.Nc6 Qd7 22.Nxc4 Bf6 23.f4! Qxd5 24.N4e5 Rfe8 and Black should be slightly for choice with his monstrous knight on d3. He can continue with either ...Bxe5 and ... Rab8, or by ...a5 and ...Ra6 to get rid of White's annoying knights. It's a complicated game, but Black is for preference.]

14...b5!? Debray goes immediately for the centre.

[As Bologan mentions, 14...Bh5 threatens ...Ng4 when 15.h3 transposes to the complicated 14 h3 variation, above.]

15.h3

[White should probably have preferred 15.Nd4 bxc4 16.Nc6 followed by Qxc4 when his position unravels, although Black shouldn't be worse after Qe8! 17.Qxc4 Bd6 .]

15...bxc4 16.Qxc4

[16.Nd4 could be met with Bd7! 17.Qxc4 Qb8 followed by ...Qb7 and ...Bd6 with a nice position. The d5−pawn is difficult to defend.]

16...Bh5 17.g4 Bg6 18.N1d2 Nxd5 Black has regained his pawn and has a comfortable position. **19.0−0−0 Nxe3 20.fxe3 Bg5?!**

[Due to White's opportunity in the game, I think 20...c5! is a far superior way for Black to take the initiative. 21.Nxe4 Qc7 provides more than enough compensation, thanks to Black's strong bishop−pair and the coming queenside attack.]

21.Nf1?! Returning the favour.

[21.Qc5! is actually slightly annoying for Black to face because h3−h4 and Nd4−f5 will establish a small white advantage.]

21...Qf6 Now White's f1−knight is unharmoniously placed. **22.Qc5 Rfd8 23.Nd4 Qf2 24.Nc2??** A horrible blunder in a bad position. **24...Rxd1+ 25.Kxd1 Qf3+**

0−1

C51

□ **Bademian Orchanian,J.**
■ **Servat,R.**
Mar del Plata 1992

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.b5?! White should calm down a bit; it is too early for an attack. This game is a classic example of why you should mobilise your forces before attacking. **5...Na5!**
[5...Nd4 6.Nxd4 Bxd4 7.c3 Bb6 with equality is also possible, but Black wants more.]
6.Nxe5 Well, this is why White has played 5 b5.
[Instead, after 6.Be2?! d5! 7.Nc3 dxe4 8.Nxe4 f5 9.Nc3 e4 10.Ng1 Nf6 11.Nh3 Qd4 12.0−0 Be6 13.Qe1 Nc4 Black has a clear advantage, R.Spielmann−A.Burn, Carlsbad 1911,]
[while after 6.Na3 Nxc4 7.Nxc4 d6 8.d4 exd4 9.Nxd4 Be6 10.Ne3 Qh4 Black is at least slightly better.]
6...Nh6! The simplest and most definitely the coolest. Of course Black has a high number of likeable alternatives here. However, we will focus on the main move. **7.d4 d6 8.Bxh6 dxe5!**
[8...gxh6?! would allow White to unleash his idea:
A) not 9.Nxf7? Qf6 10.Nxh8 *(*or *10.Qh5? 0−0 11.Nxh6+ Kg7 12.Ng4 Qf4!* and Black wins *)* 10...Nxc4 11.c3 Be6 12.0−0 0−0−0 and Black is better;
B) 9.Bxf7+! Ke7 10.Nc3 dxe5 11.Qf3 Bg4 12.Qxg4 Kxf7 13.dxe5 Qg5 14.Qd7+ Kf8 15.f4 Rd8 16.Qh3 Qg6 17.Rd1 Rxd1+ 18.Kxd1 c6 and the position is pleasantly unclear.]
9.Bxg7 Rg8
[Black could also play 9...Qxd4 10.Qxd4 Bxd4 11.Bxh8 Bxa1 12.Bd3 Ke7 with equality.]
10.Bxf7+ Kxf7 11.Bxe5 Qg5 According to some old analysis by D.N. Pavlov, White is almost equal after 12 Nd2. Four pawns can be more than enough to compensate for the piece. However, the weak coordination of his pieces is the lasting minus of White's position. **12.Qf3+**
[If 12.Nd2 Qxg2 13.Qh5+ Kf8 14.0−0−0 Qh3 15.Qxh3 Bxh3 16.c4 Re8 and Black is just better.]
12...Ke8 13.Nd2 Bg4 Black needs to play energetically.
[If instead 13...Qxg2?! 14.Qxg2 Rxg2 15.c4 c5 16.d5 and White is better, because of the weak position of the knight on a5.]
14.Qf6 Qh5
[Not 14...Qxf6?! 15.Bxf6 Be6 16.Rg1 Nc4 17.Nxc4 Bxc4 18.c3 and White is at least equal.]
15.0−0?? This plays straight into Black's hands.
[Better was 15.f3 Bd7 16.c4 *(*not *16.g4? Qh3 17.c4 Rf8 18.Qg5 Nxc4 19.Nxc4 Qxf3* and Black wins *)* 16...c6 17.g4 Qh3 18.Bd6 Bd8 19.Qe5+ Kf7 20.Qf4+ *(*or *20.0−0−0 cxb5 21.c5 Rc8 22.Qg3 Qh6 23.h4* with an unclear game *)* 20...Ke8 21.Qe5+ Kf7 with equality.]
15...Rd8
[Or 15...Kd7!? 16.Bg3 Raf8 17.Qh4 Qxh4 18.Bxh4 Bxd4 19.Rab1 Bc3 20.f3 Bh3 21.Bg3 Bxd2 22.gxh3 Nc4 and Black wins.]
16.f3 Bh3 17.Rf2 Rd7?? Black returns

the favour.
[After 17...Rg6 18.Qf4 *(*or *18.Qh8+ Kd7)* 18...Rxd4! 19.Bxd4 Bxd4 20.Kh1 Bxf2 21.gxh3 Qxb5 Black is winning.]
18.g4 Rg6
[If 18...Qg6 19.c3 Qxf6 20.Bxf6 Rf7 21.e5 h5 22.Ne4 hxg4 23.f4 Nc4 24.f5 and White is much better.]
19.Qf5
[19.Qh8+!? is a cute trap: Ke7? *(*Black should reply *19...Kf7 20.c3 c5* with unclear play *)* 20.Bf6+! Kf7 21.Re1 Rd6 22.e5 and White wins.]
19...Qh6 20.Bf4 Qg7 21.Be5
[Or 21.c3 Rf7 22.Qe5+ Qxe5 23.Bxe5 h5 24.a4 c5 with an unclear game.]
21...Qe7 22.c3 Rg5 23.Bf6?!
[After the exchange of queens by 23.Qf6 Qxf6 24.Bxf6 Rxb5 25.e5 Nc6 26.Nc4 , it looks as if White is a little better.]
23...Rxf5 24.Bxe7 Rxb5 25.Bf6
White loses a tempo compared with 23 Qf6. **25...c5! 26.c4?** Suddenly White is collapsing completely.
[Instead, after 26.d5 c4 27.Bd4 Bxd4 28.cxd4 c3 29.Nb1 Rc7 30.Na3 Rb2 31.Rc1 Nc4 32.d6 Rc6 33.d5 Rc5 34.Nxc4 Rxc4 35.Rfc2 White keeps drawing chances.]
26...Rb4 27.d5 Nxc4 28.Nxc4 Rxc4 29.Re2 Bc7 30.Rd1 Bf4 31.e5?
[After 31.Kf2 Black is much better, but White is still fighting.]
31...Rxd5! Now everything becomes clear. **32.Rde1**
[If 32.Rxd5 Rc1+ 33.Kf2 Rf1# .]
32...Rc3 33.Rb2 b6 34.Rb3 Rc2 0−1

Rilton Cup, Stockholm, Sweden 1998
[Paul Motwani]

G12.30: "Two bishops cause double trouble in the Two Knights Defence!" Ris, Robert: 'Paul Motwani: 'G12.30: "Two bishops cause double trouble in the Two Knights Defence!"'' **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 b5**
[Black's actual move is closely related to 5...Nd4 6.c3 b5 , another sharp possibility which starred in game G12. 6.]
6.dxc6?! This capture looks inferior, as White will sorely miss his precious light−squared bishop which is about to be eliminated by a black pawn. Ris, Robert:

'Paul Motwani: '?!' '?!' Paul Motwani: 'This capture looks inferior, as White will sorely miss his precious light−squared bishop which is about to be eliminated by a black pawn.'' Ris, Robert: 'Paul Motwani: '?!' Paul Motwani: 'This capture looks inferior, as White will sorely miss his precious light−squared bishop which is about to be eliminated by a black pawn.'' Ris, Robert: 'is harmless.'

[''Theory'' tends to focus on 6.Bxb5 Qxd5]

[and 6.Bf1 Nd4 *(* or *6...h6)* 7.c3 Nxd5 which transposes to the aforementioned game G12.6.]

[6.Bb3 Nd4]

6...bxc4 7.Nc3

[7.Qe2 Qd5 8.0−0 Bd6

A) 9.b3 Qxc6!? 10.Qxc4 Qxc4 11.bxc4 h6 12.Nf3 e4 13.Re1 0−0 14.Nd4 Be5 15.c3 *(15.Bb2?* fails to *c5* and Black wins a piece. *)* 15...Re8∓ with the idea of rerouting the knight to c5 with excellent compensation, while White's pieces are still stuck.;

B) 9.Nc3 Qxc6∓ This position has been reached in a couple of games, but I think Black is totally fine here already by move 9. In order to complete development White either has to move his d− or b−pawn, which enables Black to get rid of his only weakness (pawn on c4). The bishop pair offers Black a clear advantage. 10.d4 cxd3 11.cxd3 0−0]

[7.0−0 h6 brings the knight in trouble. A fun line goes 8.Nf3 e4 9.Re1 *(9.Ne1 Bd6∓)* 9...Be6 10.Ne5 Bd6 11.Nd7 Bxh2+! and Black is winning in Baer−Hellmueller, DESC email 2006. 12.Kxh2 Ng4+ 13.Kg1 *(13.Kg3 Qg5−+)* 13...Qh4−+ and White will have to give up his queen.]

7...h6 8.Nge4 Ris, Robert: '?!' '?!' Ris, Robert: 'The knight on e4 isn't stable at all.'

[An earlier game of the Swedish GM featured 8.Nf3 Bd6 9.Qe2? With the idea of wrapping up the pawn on c4, but it turns out White has no time for it. *(* Better is *9.0−0 0−0 10.d4 cxd3 11.cxd3 Bg4⇄* but also here Black is good shape in Gretencord−Gohla, DESC email 2006. *)* 9...0−0

9: Moscow 2010
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1 d6 7.a4
White's best try for an advantage, if you ask me. He creates a bind on the light squares and prevents Black from seizing too much space on the queenside.
7...Kh8!? My recommendation, after plenty of thought. This is a semi−waiting move, waiting for White to declare his intentions. If White plays c3 or too slowly, Black can play ...Ng8 and ...f5, which looks slightly artificial but is certainly effective, while if White puts his knight on c3, ready to jump to d5, Black should switch or at least delay this plan in favour of natural development. **8.Nc3** This move is an effective antidote against the ...Ng8 and ...f5 idea, so now we should switch plans.
[Instead: 8.h3 was recently tried by GM Fedorchuk, and it's a sneaky try. After long consideration, I came to the conclusion that Black should play another semi−waiting move, h6! . Now White lacks useful waiting moves *(* whereas if Black goes *8...Ng8* , White is ready to play *9.Nc3 f5 10.Nd5 Bf6 11.b4* with an advantage, although even here Black has decent practical chances against an unprepared opponent *)* 9.c3 *(9.Nc3* should be met with *Na5! 10.Ba2 c5* when White would much rather have his pawn on c3 than his knight *)* 9...Nh7! followed by ...f5 and ...Ng5 leaves Black very active on the

kingside. This knight manoeuvre from f6 to h7 and then g5 is quite typical for this variation because a trade of minor pieces generally favours Black, although he has aggressive intentions as well.]

[Including 8.a5 a6 without playing c2−c3 is interesting as well and it changes certain details:

A) 9.Nc3 doesn't change things much compared to 8 Nc3. Black can still play Bg4 10.h3 Bh5 when 11.g4? *(* instead, the more prudent *11.Be3* can be met in many different ways. One I like is *Nb4 12.Bb3 c5 13.Na4 Bxf3 14.Qxf3 Nd7* followed by ...Bg5 *)* , is again a bad mistake because of 11...Nxg4! .;

B) 9.h3 tries to improve on Fedorchuk's 8 h3, but the inclusion of a5 and ...a6 gives Black another opportunity: 9...Ng8! *(9...h6 10.Nc3* would actually be slightly annoying now that ...Na5 isn't an option *)* 10.Nc3 f5 11.Nd5 Bf6 . This position is favourable for White if a5 and ...a6 isn't included, because White finds it much easier to claim space on the queenside. As it is, Black seems to be able to create good counterplay:

B1) 12.exf5 Bxf5 13.c3 Qd7 14.d4 e4 is equal.;

B2) 12.b4 is the critical move when a5 and ...a6 haven't been inserted, but one important big difference here is that after fxe4 13.dxe4 Nce7 Black can meet 14.Nxf6 Nxf6 15.Ng5 Qe8 16.f4 with the strong Nc6! . Without a5 and ...a6 inserted this would be met with a quick b4−b5. A very concrete difference, but an important one.;

B3) 12.c3 can be met in similar fashion: fxe4 13.dxe4 Nce7 14.Nxf6 Nxf6 15.Ng5 Qe8 16.f4!? *(16.Qb3 h6 17.Ne6 Bxe6 18.Bxe6 Ng6* followed by ...Nh4 and ...Qg6 is fine for Black *)* 16...h6! *(16...Nc6* isn't as good because the b4−pawn isn't hanging and *17.f5* followed by Ne6 is simply good for White *)* 17.Nf3 Qh5 and Black has good kingside counterplay.;

B4) 12.−−]

8...Bg4! An annoying pin. **9.h3 Bh5 10.g4?** This simply loses.

[White should prevent ...Nd4 with 10.Be3 when Black can go for either Nd4 *(* or *10...Nb4 11.Bb3 a5)* 11.Bxd4 exd4 12.Nb5 c5 13.c3 dxc3 14.Nxc3 Bxf3 15.Qxf3 Nd7 with equal chances.]

10...Nxg4! A surprising strike that works well. The pin will be deadly with ...Nd4 and ...f5 on their way. **11.hxg4 Bxg4 12.d4** The best try.

[12.Be3 prevents ...Nd4, but f5! is just terrible for White, who can already resign.]

12...Nxd4 13.Be2 Nxe2+ 14.Qxe2 f5! 15.Qe3 f4!? An interesting move. Black is not interested in regaining his material immediately, as he sees that an immediate kingside attack will succeed against White's unprotected king.

[15...fxe4?! 16.Nh2 is still terrible for White, but it would invite him back into the game.]

16.Qd3 Rf6 17.Kf1 Rh6 18.Nb1

Creative defending in a tough position from the young Russian prodigy. White can protect the vital f3−knight via Nbd2 and Ra3. **18...Rh3 19.Nbd2 Qe8 20.Ra3 Qh5 21.Ke2 Rg8!?** White is certainly stuck in jam and there's very little he can do about Black's g−pawn rushing down the board. **22.Rg1 g5 23.Qc4 c6 24.Rb3 Bc8 25.Rc3 g4 26.Ne1 Rh2 27.Kd1 Rxf2 28.b4 g3+ 29.Ndf3 Bg4 30.Qb3 Qh2 31.Qf7 Rxf3 32.Rxf3 Qxg1**
0−1

Miskolc_59077 2004
[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4
[By the standard route, 4.c3 Nf6 5.d3 d6 6.b4 Bb6 7.a4 , the move here would have been a6?! , *(* which in my opinion is weaker than *7...a5* . Black should not allow White to occupy all this space on the queenside. *)*]
4...Bb6 5.a4 a6 6.c3 Nf6 7.d3 d6?!
This time the Italian Game has taken a short trip through the Evans Gambit Declined. Another move order can be seen in Yudasin−Lenderman. This time the Italian Game has taken a short trip through the Evans Gambit Declined. Another move order can be seen in Yudasin−Lenderman. , **8.Qb3**
I do not like this move too much. It is hard to see what good the queen is doing on b3 this early on, and later it might very well find itself better placed somewhere else.
[Simpler is 8.0−0 0−0 9.a5 Ba7 , when we have a branching:
A) 10.Nbd2 Ne7 11.Bb3 Ng6 12.Nc4 Re8 13.Re1 h6 was played in C.Lutz−P.Leko, Cap d'Agde 1994, and now 14.Ne3 Nf4 15.Rb1 gives White some advantage.;
B) 10.Re1 h6 11.Nbd2! *(11.h3* is only required in this structure if you want to play d3−d4; here Black can reply *Nh5! 12.d4 Qf6 13.Be3 Nf4* with unclear play, G. Timoshenko−P.Jaracz, Koszalin

1999 *)* 11...Ne7 12.Nf1 Ng6 13.Ng3 and White is slightly better.;

C) 10.−−]

[8.Bg5?! is weaker, as it can be strongly met by h6! 9.Bh4 g5 , where Black exploits the fact that he has not yet castled kingside. After 10.Bg3 Nh5 11.h4 g4 12.Nh2 Rg8 13.Nf1 Qf6 Black was much better in J.Timman−J.Smejkal, Wijk aan Zee 1975.]

8...0−0

[8...Qe7 9.0−0 a5!? is also interesting. This seems reasonable even with a lost tempo (... a7−a6−a5), as the white queen might not be too well placed on b3 here. After 10.b5 Nd8 11.Nbd2 0−0 we have an unclear game, though White can avoid it by flicking in 9 a5!?.]

9.a5 Ba7 10.0−0 Ne7 11.Ng5

[Also after 11.Be3 c6!? 12.Bxa7 Rxa7 13.Qc2 would White have no advantage.]

11...Qe8 12.Be3 c6 13.Bxa7 Rxa7 14.d4 exd4

[Here Black can sharpen the game with 14...Ng6!? 15.dxe5 Nxe5 16.f4 Nxc4 17.Qxc4 h6 18.Qd4 Ra8 19.e5 with an unclear position.]

15.cxd4 h6 16.e5 hxg5 17.exf6 gxf6 18.Nd2 d5 19.Bd3 Ng6 20.Qc2 Nf4

21.g3?! White is too optimistic here, hoping his structure will prove superior.

[The simple 21.Rfe1 Qd7 22.Re3 was better, when the position is unclear.]

21...Nxd3 22.Qxd3 Here it looks as if White is much better. His main plan is to play a game of hide and seek and end up torturing Black in a gruelling ending. Black is faced with the question of how to defend the b7−pawn and get the Ra7 into play. He solved this with an imaginative idea... **22...b5!! 23.axb6** White needs to test Black's idea.

[After 23.Rfe1 Re7 24.Re3 Rxe3 25.fxe3 Qe6 26.Nb3 Re8 27.Re1 f5 Black is at least slightly better.]

23...Re7! White can surely still save the game, but now it is very difficult. **24.Rfc1 Kg7 25.Nf1?** This is too passive.

[White needs some counterplay, which could be obtained with 25.Nb3! , even though after Qd7 26.Nc5 Qh3 27.Qf1 Qh5 28.Nxa6 *(28.f3!?* , with the idea of Qf2, is probably much better and should give White some chances *)* 28...Rh8 29.Qg2 Bh3 30.g4! Bxg4 31.Nc5 Bf3 32.Qg3 f5 33.Nd3 Be4 34.Nf4 Qh4 Black's attack is very unpleasant.]

25...Qd7 26.Qc3

[Also after 26.Re1 Rxe1 27.Rxe1 Qb7 28.Ne3 Qxb6 29.Qc3 Bd7 30.Ra1 Rb8 31.Nc2 Bf5 32.Ne3 Be4 Black would be much better.]

26...Rfe8! 27.Qxc6 Qh3 28.Qc3

[White cannot play 28.b5? because of Bf5! 29.b7 *(*or *29.bxa6 Be4)* 29...Be4 30.f3 Bxf3 31.Rc2 Re2 and Black wins.]

28...Bg4 29.b7 Be2 30.Rc2 Rxb7 31.Rxe2?

[White is falling over, but after 31.f3 Rbe7 Black would also be close to winning.]

31...Rxe2 32.Rxa6

[Since Black wins after both 32.Rxa6 Qf5 *(*and *32...Rc7 .)*]

0−1

[10...Re8 is also usual 11.Be3 Be6 12.Bxa7 Rxa7 13.Ng3 Ra8 *(13...d5 14.exd5 Bxd5 15.d4 Bxb3 16.Qxb3 exd4 17.Rxe8+ Qxe8 18.cxd4 Qe6 19.Qxe6 fxe6 20.Rc1 Ra8 21.Ne2=* 0−1 (53) Ponomariov,R (2694)−Fressinet,L (2662) Riadh 2017 *)* 14.d4 Bg4 15.Qd3 Na5 16.Bc2 c5 17.d5 b5 18.h3 Bd7 19.b3 Nb7 20.Qd2 a5 21.Bd3 b4 22.a4 Nh7 23.Rf1 Nf8 24.c4 Ng6 ½−½ (24) Zhigalko,S (2656)−Leko,P (2707) Berlin 2015]

[10...Nh5 is the active try 11.Be3 Qf6 12.Bxa7 Rxa7 13.Ne3 Nf4∞ Jakubiec−Jaracz, Zakopane 2000]

11.Ng3 is the most popular move. Black got nice play after

[11.Ba4 Ne7 12.h3 Ng6 13.d4 c6 14.Ng3 Qc7 15.Be3 Rfe8 16.Bc2 Rad8 17.Qc1 Bb8 18.dxe5 dxe5 19.Bb3 Bxb3 20.axb3 Nf4 21.Qc2 g6 22.Nf1= ½−½ (36) Svidler,P (2738)−Wang Yue (2704) Sochi 2008]

[11.Be3 Qd7 *(*Taking on e3 is also possible: *11...Bxe3 12.Nxe3 Qd7 13.Qe2 Bxb3 14.axb3 a5 15.Rad1 Rfe8∞* Potapov−Malakhov, Olginka 2011 *)* 12.Ba4 White pins the knight and provokes b5. *(12.Bxa7* was played in a game *Rxa7 13.Ng3 Raa8 14.Bc2 Rad8∞* Woudt−Lacrosse, Ghent 2012 *)* 12...b5 13.Bc2

A) 13...Bxe3 has been played before 14.Nxe3

A1) 14...Rfe8 15.d4±;

A2) 14...d5 seems interesting, as otherwise White plays d4 and gets strong in the centre 15.exd5 Bxd5! *(15...Nxd5 16.Nxd5 Bxd5 17.Nxe5)* 16.Nxd5 Qxd5 and White should have a little advantage, but the position isn't so easy.;

A3) 14...Ng4 15.d4 Nxe3 16.Rxe3 Bg4 17.h3 Bxf3 18.Rxf3 Qe7 19.Qd2 Na5 20.b3± with a pleasant position for White, because of his strong pawn centre, Valkesalmi−Bjerke, Espoo 1988.;

B) 13...Ne7 This is the novelty. 14.d4 White occupies the centre and wants to improve his position. *(*White shouldn't exchange the ♗s before d4, as his ♗ seems more useful in this position: *14.Bxa7 Rxa7 15.d4 Ng6=)*

B1) If Black gives up the centre, White also has some advantage after 14...exd4 15.cxd4 *(15.Nxd4* is also good according to the computer, but taking with the ♙ is more human *Rfe8 16.h3±)* 15...d5 16.e5 Ne4 17.Ng3 Nxg3 18.hxg3 Bf5 19.Bxf5 Nxf5 20.Rc1±;

B2) 14...Ng6 Black wants to hold the centre. 15.h3! White prevents ♘g4 or ♗g4. c6 16.Ng3 Qc7 17.Qd2±

White has achieved a dream position. He has a strong centre and Black's a7−bishop is slightly passive. He will follow up with ♖ad1 and ♘f5. Rfe8 18.Nf5! White immediately seizes the initiative. White has a serious advantage. *(18.Rad1!?* is also good. *)* 18...Bxf5 *(18...d5* was an interesting try, but White is slightly better after *19.exd5 Bxf5 20.Bxf5 exd4 21.Bxd4 Bxd4 22.Qxd4±; 18...exd4* loses to *19.Bxh6!!→)* 19.exf5

B2a) 19...Nf8 is no better 20.Bxh6! N8h7 *(20...gxh6 21.Qxh6→)* 21.Be3±;

B2b) 19...Nf4 20.Bxf4 exf4 21.Qxf4± ½−½ (55) Ivanchuk,V (2726)−Kryvoruchko,Y (2706) Lvov 2014]

[11.Bxe6 fxe6 12.Be3 Bxe3 13.Rxe3 Qd7 14.Ng3 Rad8 15.h3 Kh8 16.Qb3 Na5 17.Qc2 Qf7 18.b4 Nc6 19.a4 Nh5 20.b5 axb5 21.axb5 Ne7 22.Nxh5 Qxh5 23.Ra7± 1−0 (64) Eljanov,P (2734)−Bindrich,F (2598) Douglas 2017]

[Ftacnik]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3

[5.d4 '!?' This move is very old and has almost disappeared from modern tournament praxis. I decided to give it

a try as a surprise weapon. Bxd4 *(5...exd4 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5 10.Nc3 Qf5 11.g4!?* with extremely complicated game. *)* 6.Nxd4 Nxd4 7.f4 d6 8.fxe5 dxe5 9.Bg5 Be6 10.Na3 Qe7 11.c3 This can be considered as the "main line" in this rare variation.

A) 11...Nc6?! Michael was spending quite a lot of time in the opening and decided to keep the white−squared bishops on the board. 12.Kh1 Rd8 *(12...h6 13.Bxf6 gxf6 14.Bb3 Rg8 15.Nc2 Rg6 16.Ne3 Rd8 17.Qe2 a6 18.Rf2 Qc5 19.Bxe6 fxe6 20.Qh5 Kf7 21.Ng4 Kg7 22.Rxf6 Rxf6 23.Nxf6 Qf2=* ½−½ (54) Saric,I (2680)−Miton,K (2601) Doha 2014 *)* 13.Qe2 h6 14.Bxf6 gxf6 15.Rf2 Rg8 16.Raf1 Rg6 17.Nc2! The white knight is heading to e3, from where it can move to both d5 and f5. Kf8 18.Ne3 Nb8! Black has to re−group the pieces in order to defend his kingside. 19.Qh5 Kg7 20.Qf3 Kh7 21.Nd5 *(* Interesting was also the "materialistic" *21.Nf5!? Bxf5 22.exf5 Rg7 23.Qxb7 Qc5 24.Qe4* winning back the pawn with a slight advantage. *)* 21...Bxd5 22.exd5 e4 23.Qf4± 1−0 (38) Movsesian,S (2751)−Adams,M (2712) Wijk aan Zee 2009;

B) 11...Bxc4 is considered to be best here: 12.Bxf6 gxf6 13.Nxc4 Ne6 14.Ne3 *(* e.g *14.Qa4+ c6 15.Ne3 Rg8 16.Kh1 Nc5 17.Qc2 0−0−0 18.Rad1=* Minckwitz−Anderssen,Vienna 1878*; 14.Kh1 Qc5 15.Na3 Rg8 16.Rxf6 Nf4↑* Anderssen−Fleissig,Vienna 1873 *)* 14...Qc5 15.Qe1 0−0−0 16.Kh1 Nf4 17.g3 Rd3 18.Nf5 Ne6 19.Qe2 Rhd8 20.Nd4 R3xd4 21.cxd4 exd4 22.Rad1± 0−1 (38) Movsesian,S (2723)−Leko, P (2741) Moscow 2008]

5...0−0 6.Re1 It is interesting that the players repeat the opening which they played with the reversed colours in round 3 of the same tournament. ♖e1 is a comparitively rare move, tried by Caruana and Anand in blitz games previously but now it is being used by the young guns in longer versions of the game. The most common move here is 6. c3 while 6.♗g5, 6.♘c3, 6.♘bd2 etc. are also quite popular.

[6.Bb3 d5 7.exd5 Nxd5 8.h3 Nb6 9.Re1 a5 10.a4 Bd6 11.Nc3 Bf5 12.Nb5 Bg6 13.Bg5 Qd7 14.Nh4 Nd4 15.Nxd4 exd4 16.Qf3 c6 17.Nxg6 hxg6 18.Re4 Bb4 19.h4 Rae8 20.h5 Rxe4 21.dxe4 gxh5 22.Qxh5± 1−0 (34) Movsesian,S (2717)−Naiditsch,A (2686) Odessa 2010]

[6.h3 Re8 *(6...a6 7.c3 Be7 8.Re1 d6 9.a4 h6 10.Nbd2 Be6 11.b4 Qd7 12.Qb3 b5 13.Bxe6 Qxe6 14.c4 bxc4 15.dxc4 Rfb8 16.b5 axb5 17.cxb5 Na5 18.Qc3 c6 19.Rb1 Nd7 20.Ba3 Rc8 21.Rec1 Nb6 22.bxc6 Rxc6∓* 0−1 (51) Saric,I (2628)−Postny,E (2631) Bastia 2013*; 6...d5 7.exd5 Nxd5* but it's not the best timing, as d3 is solidly protected. So I would prefer 6...d6. *8.Nbd2±)* 7.Nbd2 h6 8.Re1 Bf8 9.a3 d6 10.Nf1 Ne7 11.Nh4 Be6 12.Ng3 Qd7 13.Qf3 Nh7 14.Nhf5 Nxf5 15.Nxf5 Bxf5 16.exf5 c6 17.Bb3 d5

18.c4 e4 19.dxe4 dxe4 20.Qg3 Qxf5 21.Bxh6 Re6= 0−1 (54) Eliseev,U (2550)−Malakhov,V (2707) Moscow 2013]

[6.Nbd2 is okay too, but it blocks the bishop from developing. Black can play

A) 6...d6 7.c3 Bb6 *(7...a5 8.Re1 Be6)* 8.Bb3 Ne7 9.h3 c6 10.Re1 Ng6 11.d4 h6 12.Bc2 Be6 13.Nf1 Qc7 14.Be3 Rad8 15.Qc1 Rfe8 16.Ng3 Qd7 17.a4!± 1−0 Radjabov,T (2744)−Harikrishna,P (2669)/Ningbo 2011 (38);

B) 6...Re8 7.c3 Bf8 8.Ng5 Re7 9.f4 exf4 10.d4 d5 11.exd5 Na5 12.d6 cxd6 13.Bd3 h6 14.Nge4 Nd5 15.Nc4 Nxc4 16.Bxc4 Nb6 17.Bd3 d5 18.Nc5 Nd7 19.Nxd7 Bxd7 20.Bxf4 Qb6 21.Qf3 Bb5 22.Bxb5 Qxb5 23.Rf2= 1−0 (42) Kurnosov,I (2648)−Khismatullin,D (2660) Apatity 2011;

C) 6...a5 7.c3 d5 8.exd5 Nxd5 9.Re1 Bg4 10.h3 Bh5 11.Ne4 Be7 12.Ng3 Bg6 13.Nxe5 Nxe5 14.Rxe5 Nb6 15.Be3 Bd6 16.Rb5 Nxc4 17.dxc4 Bxg3 18.fxg3 Re8 19.Qxd8 Raxd8 20.Re1± ½−½ (38) Zhigalko,S (2667)−Naiditsch,A (2712) Istanbul 2012;

D) 6...a6 7.c3 d5 8.exd5 Nxd5 9.Re1 Bg4 10.h3 Bh5 11.Ne4 Be7 12.Ng3 Bxf3 13.Qxf3 Nb6 14.Bb3 Bg5 15.Ne4 Bxc1 16.Raxc1 Qe7 17.Qh5 h6 18.Re3 Rad8 19.Rf3 Na5 20.Nf6+ Kh8 21.Ng4 f6 22.Bc2± 1−0 (53) Dragun,K (2595)−Banusz,T (2621) Katowice 2016;

E) 6...d5 An odd choice by Bacrot. He tries to solve all his problems drastically 7.exd5 Nxd5 8.Re1 *(8.Ne4 Be7 9.Re1 Bg4 10.c3 Nb6 11.Bb3 Qd7 12.a4 a5 13.h3 Be6 14.Be3 Nd5 15.Nc5 Bxc5 16.Bxc5 Rfd8 17.Nxe5 Nxe5 18.Rxe5 Nf4 19.Re4 Bxb3 20.Qxb3 Ne6 21.Ba3± 1−0 (85) Giri,A (2714)−Bacrot,E (2714) Melilla 2011)* 8...Nf6!?

This is considered the best according to engines. It must be the move for which Bacrot decided to enter this position. 9.h3

E1) 9...a6

E1a) 10.Nxe5? Qd4 *(10...Bxf2+ 11.Kxf2 Qd4+ 12.Kg3 Nxe5 13.Nb3 Qd6 14.Bf4 Nfd7 15.Qh5 b5 16.Bxe5 Nxe5 17.Qxe5 Qg6+ 18.Kh2 bxc4 19.dxc4 Qxc2 20.Rac1 Qf2 21.Nc5±* 1−0 (30) Shanava,K (2586)−Bacrot,E (2706) Deizisau 2012 *)* 11.Qe2 Nxe5 12.Nb3 Qxf2+ 13.Qxf2 Bxf2+ 14.Kxf2 Nxc4 15.dxc4 Bf5∓;

E1b) 10.a3 b5 11.Ba2 Bb7 e5 is still untouchable 12.Nf1 e4 13.dxe4 Qxd1 14.Rxd1 Nxe4 the position is roughly equal 15.Be3 Bd6 16.N1d2 Ne5 17.Nxe4 Bxe4 18.Nxe5 Bxe5 19.c3 Rfd8 20.Bg5 Rxd1+ 21.Rxd1 Bc6 22.Kf1 ½−½ Movsesian,S (2715)−Bacrot,E (2705)/Rogaska Slatina 2011;

E2) 9...Bd6?! An unfortunate choice. Not long after this game, Bacrot improved his play: 10.a3! This is the point! White has not weakened his pawn structure yet,

therefore, he frees a2 for his bishop and prepared a queenside assault with b4. a6 11.Ba2 Bf5 12.b4 Re8 13.Bb2 h6 14.Ne4 *(14.Nc4 e4* This is the only move that might have stopped Radjabov from playing his move. Otherwise, it is evident that after ...♘d7 White is clearly better. *15.Nxd6 Qxd6 16.Nh4 Bh7 17.dxe4 Qxd1 18.Raxd1 Nxe4* White is clearly better thanks to his pair of bishops, on the other hand, it is not evident how White would increase his pressure. Radjabov prefers to keep the queens on the board. *)* 14...Be6 15.Bxe6 Rxe6 16.c4 Nxe4 17.dxe4 a5 18.c5 Bf8 19.Qb3 axb4 20.axb4 Black has no evident weakness, nevertheless a plan! Rxa1 21.Rxa1 b6 22.b5 Nd4 23.Nxd4 exd4 24.Qd5 The critical moment.

E2a) 24...Qg5! would have kept things in place for Bacrot.

E2a1) 25.cxb6? Qxd5 26.exd5 Rxb6∓ White loses a pawn;

E2a2) 25.Bxd4 bxc5 26.Qxg5 hxg5 27.Bc3 Rxe4 28.Ra8 f6 29.Rc8 Ra4! 30.Rxc7 Ra3 31.Be1 *(31.Bd2?? Ra1+ 32.Kh2 Bd6+)* 31...Rb3 32.Rb7 Bd6 33.Kf1=;

E2a3) 25.c6 Bc5 26.Bxd4 Bxd4 27.Qxd4 Qxb5 28.Qd8+ Kh7 29.Qxc7 Qxc6 30.Qxf7 Qxe4=;

E2b) 24...Qxd5?? A horrible miscalculation by Bacrot. 25.exd5 Re5 26.d6! Rxc5 27.Bxd4 Black loses an exchange. Bxd6 *(27...Rc4 28.dxc7 Rxc7 29.Bxb6 Rb7 30.Ra6 f6 31.g4 Kf7 32.Kg2 Ke6 33.Bc5+ Kf7 34.Bxf8 Kxf8 35.b6 Rb8 36.h4* The endgame is just hopeless for Black. *)* 28.Bxc5 Bxc5 29.Ra8+ Kh7 30.Kf1± 1−0 (48) Radjabov,T (2744)−Bacrot,E (2710) Khanty−Mansiysk 2011]

[With both our kings castled short 6.Bg5 does not look dangerous, after h6 7.Bh4 Black can just go g5 8.Bg3 d6 9.c3 And here there are many possibilities, but I like a6 to reserve a safe square for my bishop.]
