Sinquefield Cup 7th (10) 27.08.2019
[Nielsen,Peter Heine]

1.e4!? GM Arturs Neiksans Starting off with 9 draws the strategic situation for the world champion was pretty simple, nothing short of 2 wins would leave any chance of first place. This being his 6th white, it was still the first game where Magnus opened with the king's pawn, having recently preferred a more 1.d4 based approach, but in the moment of need, it felt like time for a surprise. **1...e5 2.Nf3 Nc6** Wesley is loyal to his solid approach, inviting to a Berlin. **3.Bc4** GM Arturs Neiksans: 'In the recent years the Italian opening has become quite popular at the highest level, evenly competing with Ruy Lopez. Perhaps the reason is that Black can't setup the dreadful Berlin system?' This used to be considered basically inferior to 3.Bb5 and the Ruy Lopez, but as this position appeared 10(!) times in the Sinquefield Cup, it indicates the present preferences of the top players. Compared to 3.Bb5 it has the advantage of leading to less forced lines. **3...Bc5 4.0−0 Nf6 5.d3 0−0 6.c3 d6 7.h3 h6!?**

[Earlier in the tournament Wesley had tried the more extravagant 7...a6 8.a4 Ba7 9.Re1 Kh8!? ambitiously aiming for ...Ng8 and ...f5, but fearing Magnus preparation he sensibly chooses one of the main lines.]

8.Re1 a6 GM Arturs Neiksans: 'it's all about nuances but I believe that 8...a5 currently is more popular. If Black would play it outright, obviously White wouldn't continue with a2−a4 which now would feel like a waste of time.'

[8...a5!? GM Arturs Neiksans 9.Nbd2 Be6 10.Bb5 Qb8 11.Nf1 Qa7 is a highly contested line]

9.a4 GM Arturs Neiksans: 'otherwise Black might think about Na5 and trade away that annoying light−squared bishop. ' **9...a5!?** GM Arturs Neiksans: 'amazing, isn't it? Black voluntarily gives up a tempo to stop White's advancement ideas of b2−b4 but a closed position the loss of a tempo is not considered to be that important.' Obviously a strange looking move, moving the a−pawn continiously. But there is logic behind it:

[After the immediate 9...Be6 , then 10.Bxe6 fxe6 11.b4 Ba7 12.Nbd2 leads to troubles for Black like in e.g. Anand−Carlsen from Stavanger 2017 as White's expansion on the queenside makes a lot of difference in the ...fxe6 structures. The space itself obviously, but also that a rook on a2 will defend the f2−pawn eventually.]

Now, however, Black uses the possibility to fix the queenside structure. One could argue why not 8...a5 then? It is a reasonable move, played by Ding, but there potentially White has the option of a3+b4, while now the b4−square is definitely under Black's control. **10.Nbd2 Be6** As explained previously, the benefit of having played ...a5 is that Black now can play ...Be6 without fearing the ... Bxe6 fxe6 structures, and So obviously exploits that: **11.Bb5!?** GM Arturs Neiksans: 'White is thinking about ideas to play Nf1 and d3−d4−d5 so Black's response is logical.' **11...Na7 12.d4 Nxb5**

[if Black opts for 12...exd4 (GM Arturs Neiksans) then White manages to grab the centre, save his light−squared bishop and start a promising−looking attack at the kingside. 13.cxd4 Bb4 *(13...Nxb5 14.dxc5 Na7 15.cxd6 cxd6 16.Nd4 Nc6 17.Nb5±)* 14.Bd3 d5 15.e5 Nd7 16.Re2 c5 17.Nf1 cxd4 18.Bc2 Nc5 19.Nxd4 Nc6 20.Ng3↑ 1/2−1/2 (76) Vachier Lagrave,M (2789) −Svidler,P (2751) Tbilisi 2017]

13.dxc5!? Earlier this year in Wijk Aan Zee, Giri took back on b5 against Anand, with the game ending in a quick draw.

[13.axb5 (GM Arturs Neiksans) probably is harmless for Black as now White will be missing his light−squared bishop. exd4 14.Nxd4 *(14.cxd4?! Bb4∓)* 14...Re8 15.Nf1 Bc4 16.Ng3 d5 17.e5 Ne4 18.Nxe4 dxe4 19.Rxe4 Qd5 20.Qf3 Bxd4 21.cxd4 Re6 22.Rf4 1/2−1/2 (22) Giri, A (2783) −Anand,V (2773) Wijk aan Zee 2019]

13...Na7 14.b3 GM Arturs Neiksans: '!' GM Arturs Neiksans: 'a great move − now cxd6 and Ba3 is a serious threat.'

14...Re8 Still common ground, White's concept is that 14...Nc6 is met by 15 cxd6 cxd6 (15...Qxd6? 16 Ba3! wins an exchange, and is the point of 14 b3) 16Ba3 Re8 17 c4! when the resulting pawn structure heavily favours White, explaining why So had to put his rook on e8, in order to be able to take back on d6 with the queen. **15.cxd6 Qxd6**

[15...cxd6 GM Arturs Neiksans 16.c4 structure−wise this position is extremely dangerous for Black − Black's pawn on d6 will make an easy target, combined with the weakness on b5.]

16.Ba3 c5 GM Arturs Neiksans: 'Wesley follows Karjakin's footsteps from a known blitz game a year before, and there must have been something that he didn't like in the previous World Cup game between MVL and Grischuk where the latter played 16...Qa6. You can be pretty sure that Carlsen had prepared something here as well.' Grischuk played 16...Qa6 against MVL in the 2017 World Cup, but while he got a good position in the game, the computer very much prefers 16...c5.

[16...Qa6 GM Arturs Neiksans 17.b4 axb4 18.cxb4 b5 19.Bb2 Nc6 20.Nxe5 Nxb4 21.Re3 bxa4 22.Rg3 Red8 23.Qf3 Kh7 24.Ndc4 Nc2 25.Rxg7+ Kxg7 26.Nc6 Nd4 27.Nxd4 Bxc4 28.e5 Rg8 29.Nf5+ Kh7 30.Ne7 Rab8 31.exf6 Qb7 32.Qxb7 Rxb7 33.Nxg8 Rxb2 34.Rxa4 Kxg8 35.Rxc4 Rb6 36.Rxc7 Rxf6 1/2−1/2 (56) Vachier Lagrave,M (2789)−Grischuk,A (2783) Tbilisi 2017]

17.Nc4!? GM Arturs Neiksans: 'N!' GM Arturs Neiksans: 'Surprise! The World champion fires out a novelty.' Over the board inspiration, and making the inclusion of b3 having a positive effect. MVL had a later game with Karjakin in 2019 where he continued 17.Qe2, but Magnus' move is, despite the exchange of queens, somewhat more aggressive.

[17.Qe2 GM Arturs Neiksans b6 18.Nc4 Bxc4 19.Qxc4 Rad8 20.Re3 Nc6 21.Rae1 Rd7 22.Bc1 Red8 23.g3 Ne7 24.Nd2 Nc8 25.Qf1 Qe6 26.Nc4 Ne8?! *(26...Nd6! 27.Nxb6 Rb7 28.Nd5 Rxb3 29.Nxf6+ Qxf6 30.Rd1 Nb7=)* 27.f4 exf4 28.gxf4

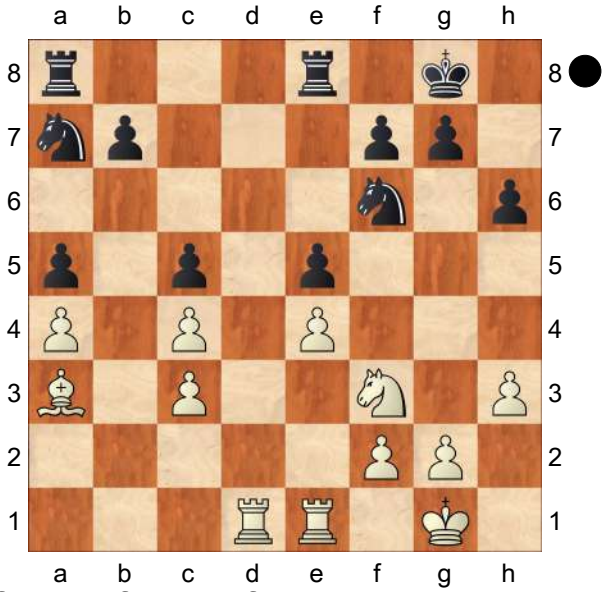
17...Qxd1 18.Raxd1 Bxc4

For a human, an obvious choice, but the computers actually insists that 18...Nd7 also is a reasonable move as after 19 Ne3, which seems to nicely give White control over the d5 square, after 19... Red8 20 Nd5 Rb8, it indeed is difficult for White to make any reasonable progress. Being a human being, So, however, obviously took the knight.

19.bxc4 GM Arturs Neiksans: '



so far all of this is forced. White plan's drawbacks are obvious − the pawn structure is shattered but at the same time it's White who has an easy plan − reroute his knight to d5.' Explaining the games to the commentators, Magnus said that this was paying a bit of hommage to Mikhail Botvinnik who in numerous games showed the dynamic potential of this exact pawn structure where the doubled pawns obviously are potential weaknesses and thus the position is much sharper than it appears at first sight: Black needs to hurry, as seen in the game White's potential is huge if the position stabilizes. **19...b6?!**

[The computers strongly suggest 19...Rac8! GM Arturs Neiksans: 'the Silicon beast says this is better and perhaps he's right − Black could keep the b6 square for his knight, just in case.' the idea being to protect the b7−pawn from c7, and then regrouping with ...Nc8/d6 immediately attacking White's fragile c4−pawn. At first the computers says Black is better, but after a while settles on 20.Nh2 *(20.Nh4 g6 21.f3* followed by g4/Ng2−e3 leads to similar positions. *Rc7* GM Arturs Neiksans *22.g3 Nc8 23.Ng2 Nb6 24.Ne3 Nxa4 25.Rb1 Nxc3 26.Rb6∞)* 20...Rc7 21.Nf1 Nc8 22.Ne3 Nb6 23.Rb1 Nxa4 24.f3 when White has sacrificed a pawn, and offers a second on c3, but as compensation gets serious initiative combing threats via the b−line with the knight landing on d5. White is neither better nor worse, but the position is very interesting with rich possibilities for both to outplay the opponent.]

So instead chooses solidity, but this permanently places the initiative with White. **20.Nh4 Rad8 21.f3 g6 22.g3** 22.g4 intending the same knight regrouping as in the game, but at the same time stopping Black's ...Nh5 had merits, but Magnus wanted to keep his own kingside structure as flexible as possible.

[22.g4 (GM Arturs Neiksans) to me looks even better but Carlsen refrains on making commital decisions. The pawns don't go back after all.]

22...Nh5 23.Kf2 Nc6?! GM Arturs

Neiksans: '?' GM Arturs Neiksans: 'the wrong defence − Black senses that he should trade both rooks at the d−file but he won't make it. If this plan fails, his knight on c6 will be clearly misplaced as he has nowhere to go.' Again Wesley's choice is more solid than good.

[23...Nc8 23...Nc8!? would reroute the knight to d6, attacking the c−pawn and after 24.Ng2 Nd6 25.Ne3 f5 GM Arturs Neiksans: 'with about equal chances.' create some counterplay.]

But So believes in the solidity of his position. **24.Bc1** GM Arturs Neiksans: 'White reroutes the bishop to e3 with a tempo and stops Black's intentions to trade both rooks.' **24...Kg7 25.Be3 Rxd1**

[Once again 25...Ne7 26.Ng2 f5! was called for, creating some counterplay, but its repeating the previous remark, as Black's play is based on the wrong assumption that he has an impregnable fortress.]

26.Rxd1 Rd8 27.Rb1! GM Arturs Neiksans: 'of course! Otherwise Black will build a fortress' Keeping a pair of rooks is an absolute neccesity. **27...Rb8** GM Arturs Neiksans: 'if Black had seen this position from afar, he never would have gone for it. Thus I can only imagine that So missed the Ba3−c1−e3 rerouting idea with a tempo.' **28.Ng2** GM Arturs Neiksans: 'now the white knight is heading to d5.' **28...Nf6 29.Ke2 Ne8 30.Bf2 Nd6 31.Ne3 Ne7?** Blacks position was bad, much worse than it looks, but with this it becomes just plainly lost. But again: Black thinks he has a fortress. **32.Nd5! Nxd5 33.cxd5 Rb7 34.Kd3** GM Arturs Neiksans: 'it's incredibly difficult to suggest for Black something better.' One could argue a slight inaccuracy, the computer prefers 34 c4!?. **34...f5** This created a weakness on e5, but as White anyway could force that with f4xe5 after a black ...f6, it makes no difference.

[But even after 34...c4+ 35.Kd2 Nc8 36.Bc5! followed by the f4 break, Blacks position will collapse rather quickly.]

35.c4 fxe4+!? Facing reality, So alternates his plan, tries to complicate.

[The problem is, as Magnus happily explained after the game, that the "fortress" after 35...Kf6 36.g4 f4 37.Be1 g5 38.Bc3! has one problem: Yes, everything is solididly protected and White can do no harm to Black's position on his own. But as Black is not allowed to "pass", Zugzwang here plays its deadly consequence. Black has to make a move, and that makes his position instantly collapse. The rook needs to protect the b−pawn, but if it goes to b8, it allows Bxa5. The knight on d6 is needed there to protect the rook on b7, else Bxa5 again is possible, and as the king is stuck on f6 protecting e5, and Black has run out of pawn moves, this is a pure and illustrative zugzwang. Black's position will fall like a cardhouse, when removing one bit, will eventually make it all fall.]

36.fxe4 Rf7 GM Arturs Neiksans: 'Black's only chance is to go for an active defence, otherwise, he'll lose a pawn by force anyway.' A good try, even allowing the hope for the trap below. **37.Rxb6**

[37.Be3 Rf3 38.Rxb6?? Rxe3+!]

37...Rxf2 38.Rxd6 Rf3+ 39.Ke2?! GM Arturs Neiksans: '?' GM Arturs Neiksans: 'the only mistake of the so−far flawless game by Magnus Carlsen.' Sloppy technique.

[39.Kd2 GM Arturs Neiksans: '!' GM Arturs Neiksans: 'Was a lot more precise, keeping the c−pawn alive. Here the white g and h pawns are irrelevant as White's central pawns will roll forward much faster.' Rf2+ *(39...Rxg3* GM Arturs Neiksans *40.Rc6 Rxh3 41.Rxc5 Rh2+ 42.Ke3 Rh3+ 43.Kf2 Kf6 44.Rc6+ Kg5 45.c5 Kf4 46.Rf6+ Kxe4 47.d6)* 40.Ke3 Rc2 41.Kd3 Ra2 *(41...Rg2* GM Arturs Neiksans *42.Rc6 Rxg3+ 43.Ke2 Rxh3 44.Rxc5 Rh4 45.Kf3 Rh3+ 46.Kg2 Rc3 47.d6 Kf7 48.Rxe5 Rxc4 49.Re7+ Kf8 50.e5* the white pawns are unstoppable. *)* 42.Rc6 was a very trivial win. as White gets connected passed pawns while keeping Black's counterplay to a minimum.]

39...Rc3 GM Arturs Neiksans: '!' GM Arturs Neiksans: 'The c−pawn is a priority!' **40.Re6 Rxc4 41.Rxe5 Rxa4 42.Re7+ Kf6?** GM Arturs Neiksans: '??' GM Arturs Neiksans: 'A very strange mistake which ends the suffering immediately − most likely Wesley thought he's losing anyway. Black could have played much more stubbornly. A sample line' Returning the favour and making the win trivial.

[42...Kf8! would surprisingly force a huge degree of precision on White's part.

A) After 43.d6? Rd4 GM Arturs Neiksans: '!' 44.e5 a4 45.Ke3 a3 46.Ra7 Rd5! White cannot successfully advance his connected passed pawns, as after 47.Ke4 *(*or *47.Kf4)* 47...Rd4+! GM Arturs Neiksans: 'strangely is a draw!' the king is forced back, and Black will just return the rook to d5, again attacking the e5 pawn forcing a repetition.;

B) 43.Re6! is the only winning move. 43...Rb4 GM Arturs Neiksans: '!' GM Arturs Neiksans: 'Black needs to push those pawns forward as quickly as possible, even at the expense of his kingside pawns.' again forces precision, as 44.Kf3! is needed. The difference is that after a4 45.Rxg6 a3 46.Ra6 Rb3+ *(46...c4* GM Arturs Neiksans *47.Ke3 Rb3+ 48.Kd4 c3 49.Kd3 c2+ 50.Kxc2 Rxg3 51.e5* probably White is winning anyway. *)* now 47.Kg4! is available, the point being that after c4 48.d6 c3 49.Ra8+ Kf7 50.d7 c2 White simply plays 51.d8Q soon mating the black king, but if the white king were on f4, then 51... c1Q would be a check, reversing the table. Very much a line that the World Champion would be able to calculate, but still an unneccesary risk to take indeed.]

43.d6 GM Arturs Neiksans: 'the white pawns are advancing forward without resistance.' 44.e5+ follows next, and the pawns marches through.

[Earlier we considered 11.b4 in Kramnik,V (2811)−Adams,M (2761) Shamkir AZE 2017 [Mikhalevski,V]]
11...Bxe3 12.Nxe3 Be6 13.Bxe6 Rxe6 14.b4 White takes some space on the queenside and gets ready for 14...d5.

[14...d5 15.Qc2 Qd7 16.h3 Ne7 17.Rab1 Ng6 18.c4 d4 19.Nf5 Qd8 20.c5± with some edge for White in Fleetwood,D (2561) −Kovalenko,I ICCF email 2016]
15.b5! Carlsen's improvement. Magnus wants to retain his space advantage.
[In the only preceding game White played 15.Rb1 , but after axb4 16.cxb4 d5 17.b5 Nd4 18.exd5 Nxd5 19.Nxd5 Qxd5 20.Nxd4 Qxd4 21.Re4 Qd5 the chances were equal in Giri,A (2771)−Anand,V (2786) Leuven 2017]
[15.Qb3!? is worth attention, as this way White protects b4 and stops d5.]
15...Ne7 A typical transfer of the knight to g6. **16.Qc2 Ng6 17.g3** A useful move, which restricts the knight on g6.
[The immediate 17.c4!? looks good, as it stops the ...d6−d5 advance.]
17...d5 Vladimir takes his chance to break through in the centre before White plays c4.
[Kramnik could also start with 17...c6 , but after 18.c4! *(18.bxc6 bxc6 19.Rab1 Qc7 20.Rb2 Ree8 21.Reb1 Rab8* is less challenging for Black. *)* 18...cxb5 *(18...Nf8 19.bxc6 bxc6 20.c5±* is also better for White. *)* 19.cxb5 Rc8 20.Qb3± White's chances are higher.]
18.c4!? White asks some questions. Black has to decide either to close the position with 18...d4 and agree to a slightly passive, but playable position, or support the centre with 18...c6, as in the game.
[A better way to put pressure on Black is 18.exd5! Nxd5 19.Qb3! Nf6 20.Rad1±]
18...c6?! A wrong choice.
[18...d4!? 19.Nf5 Nd7! 20.c5 Kh7 21.Nd2 Ngf8 with the idea of pushing the f5−knight back by means of ...g6 would have been safer.]
19.cxd5 The World Champion takes control of the c−file.
[White could also open the b−file for his pieces. 19.bxc6!? bxc6 20.c5 Nd7 21.Rab1 d4 22.Nf5±]
19...cxd5 20.Rac1± White controls the only open file and so his chances are better. **20...Re7** Kramnik covers the seventh rank.
[20...d4 21.Nf5 Nd7 22.Qc7 b6 23.Nd2 also leads to a comfortable advantage for White.]
21.Qb3 Now Magnus is putting pressure on the d5−pawn and trying to distract Black from the c−file.
[It would be even more unpleasant for Black if White kept the queen on the c−file. 21.Kg2! Rb8 22.Nf5 Rd7 23.Qc5±]
21...Rd7?! The Russian player underestimates his opponent's idea.
[21...dxe4 22.dxe4 Rc7 was worth a

try, although White retains the upper hand with the help of *(22...Nxe4?* runs into *23.Nf5+−)* 23.Rc4!±]

22.exd5! Nxd5 23.Nc4 After Black's rook left the e−file the e5−pawn comes under attack. It turns out that its defence is connected with a serious weakening of Black's position. **23...f6**

[23...Rc8 promised more practical chances, although Black is already suffering. 24.Nfxe5 Nxe5 25.Nxe5 Rxc1 26.Rxc1 Re7 27.Qb2± with a healthy extra pawn.]

24.d4! exd4 25.Nxd4 Now the e6−square and the a2−g8 diagonal are weak. **25...Nf8 26.Rcd1!+−** Black was completely outplayed and can only wait for the decisive blow. **26...Kh7 27.Nc6** An unnecessary finesse, although it doesn't miss the win yet.

[The straightforward 27.Nf5! Ng6 28.Nfd6! would win on the spot. For example, Nde7 runs into *(* while *28...Rxd6 29.Nxd6 Qxd6 30.Qxd5* leads to big material losses. *)* 29.Nxb7+−]

27...Qc7 28.N6xa5

28...Ng6 29.h4 Rxa5 30.Nxa5 Qxa5 31.Qd3?! A slight inaccuracy.

[After 31.Qc2! Nb4 *(31...h5 32.Qf5+−)* 32.Qb1 Rxd1 33.Rxd1 Qxa4 *(33...h5 34.Rd4!+−)* 34.h5 Qc2 35.hxg6+ Kxg6 36.Qxc2+ Nxc2 37.Rd7+− White wins easily.]

31...Nb6 32.Qb1 Rxd1 33.Rxd1 h5 34.Rd4! Qc3 35.Rd6? A big mistake, which lets Black off the hook.

[35.Rd3! was strong. Qc8 36.Qd1 Kh6 37.a5 Nc4 38.Rd4! was very strong. Now the a5−pawn is untouchable and the c4−knight is hanging in the air. Nge5 *(38...Nxa5 39.Qd2++−)* 39.Rd8! Qf5 40.a6! bxa6 41.bxa6 Ng4 42.Qe2 Qb1+ 43.Rd1 Qb6 44.Ra1! Qa7 45.Ra2! Nge5 46.Qe4+− and soon White will be able to convert his advantage.]

35...Nc4 36.Rd3 Qe5 37.Rd7 b6 38.Qd1 Qf5! 39.Qd3 Qh3 40.Qd1 Qf5 41.Qd3 Qe6 42.Qd1 Qf5

A happy escape for Kramnik, but his opening play has to be improved. I could suggest 18...d4, but it seems that Black was already under some pressure and so a possible improvement lies at an early stage of the game. The ball is in Black's court now.

[15...Qf5? ½−½ De Silva,L (2085)−Assaubayeva,B (2381) Asian Hybrid 2021 (4) might look like a clever way to face White's move creating a tactical threat, also counting with a repetition after the queen goes back to e2. That was precisely what

happened in one game. Things look nice for Black, but achieving a draw against the World Champion would never be such an easy task. White can also retreat his queen to an unusual square here, and after 16.Qf1! the threat of g2−g4 is very unpleasant. Then Qc8 is almost the same position, but the queen is already on f1 and White can exploit this detail by means of 17.Nh4!± when ideas like ♘e4 or even the same ♕b5 become very unpleasant.]

16.Nh4N The knight can sometimes go to f5, but the main idea of this move is to prepare ♘e4, disrupting Black's coordination and trying to use White's minor pieces to exert some pressure on Black's camp.

[Another possible continuation was 18.Ndf3 Rfe8 19.Bf4 Nc5 20.Bc2 Ne6 when 21.Bf5!? still keeps some pressure on Black's camp.]

18...Rfe8 Wesley decides to give up the bishop pair in order to force some exchanges.

19.Nxe7+ Rxe7 20.Rxe7 Nxe7 21.Ne4 White has got the bishop pair, but in view of the symmetrical structure and Black's solid position, it seems hard to turn this into a real advantage. Still, Carlsen does his best to make Black's life harder. **21...Bg6 22.f3**

29...Rxg4 30.g3 It is a commonly used trick by seconds for upcoming World Championship matches to refuse to say anything about the opening moves claiming the need for secrecy and not revealing any secrets. Using that privilege to skip the first 30 moves is indeed taking it too far, but the only thing to report til now is that Karjakin has a strategically winning position and that after e.g the retreat 30...Qd8!? the Norwegian computer "Sesse" always following Magnus games, gave as much as +3(!) for Black. But simply ...h4−h3 next would undermine White's defences and win trivially. But having already beaten Magnus once during this event, Karjakin thought why not make it 2−0 and in style? **30...exd4?!** 0.47/25 Magnus won 4 games in a row at Stavanger, and while in other sports or even in earlier stages of chess history that would not be seen as something special, in modern top−level

tournaments it certainly is. Streaks requires a mixture of luck and skill, and as Larsen once pointed out, it is easier to win a bad position than a completely equal one.

One can understand Karjakins attraction to this move. Not only is it beautiful, but also logical. White has a stranded rook on the queenside, while all black pieces join the attack on the white king. It would not be unreasonable if Black was just winning, but Magnus has a resource: **33.Re7!** Absolutely neccesary amd modest−looking, but excactly enough fence off the black attack! 33...Bxg2 perhaps was what Karjakin intended, hoping for 34 Nxh4 Rxf2 but 35 Ng5+! turns the tables, as in this version of Black sacrificing his queen, after 35... Qxg5 36 Bxg5 Rxf2 suddenly 37 Qxf2 has become available. The computer suggests the calm 33...Kg8!? with an ultimately balanced position, but Karjakins ove also is not bad:

[40.a4= 0.01/26 Nielsen, Peter Heine, Mon Hokmome]
40...f5? Nielsen, Peter Heine, Mon Hokmome: '∓?' When Karjakin played his 30th move, he had considerably more time left on is clock than Magnus, but in the ensuing complications he caught up and being short on time blunders the game with his last move before the time−control. 40...Re7! was possible as 41 Qg5?? then loses to 41... Rxe1+ as 42 Bxe1 leaves the queen unprotected on g5. Thus 41 Qc3 would be neccesary but after 41...Rd7 white would according to the computers not have better than a repetition draw after 42 Qe3. **41.Re2** Now, however, White just wins trivially. There thraet of exchanging queens as well as h5 and f5 hanging, is more than the black position can handle. **41...Rh8** Nielsen, Peter Heine, Mon Hokmome: '!' **42.a4 Kg7 43.Rxg6+!** −0.32/26 Perhaps looking passive, but defending the b−pawn was neccesary. And as Larsen said: while opposite colored bishop endings often are drawn, when they are winning, the often win easily! Kapnisis,Spyridon, Mon hokmome: 'C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3 ' Going into the seventh round, Carlsen had a clear lead over the rest of the field. Moreover, having the white pieces against Wei Yi must have seemed a good opportunity for him to extend his lead in the tournament. Diagram
After a quiet opening we have reached a typical Grunfeld middlegame where White has more space and the two bishops, while Black has good control of the dark squares and a strong knight on d6. Though my preference is for White, as Black⇗s position is slightly passive, breaching Black⇗s fortress is not at all easy. **1.e4** Kapnisis,Spyridon, Mon hokmome Carlsen correctly tries to restrict Black⇗s knights by denying them access to the important c4 square. **1...e5 2.Nf3 Nc6** Wei Yi tries to improve his worst placed piece, whilst at the same time making way for his queen to go to the a5 square. **3.Bc4N** Carlsen prevents ...Qa5 but this comes at a price, since he is forced to exchange a pair of rooks. **3...Bc5 4.c3 Nf6 5.d3 d6 6.0−0 h6 7.Re1 0−0 8.Nbd2 a5 9.Nf1** Diagram

9.h3 Ne7 The knight goes to a better square. **10.d4 Ng6 11.Nbd2 c6** Now White has to reckon with d6−d5.
12.Bf1 Black has equalised, but the position remains complex. **12...a5** This move is questionable, as the a5−pawn might become weak after ♘d2−c4.
[It might have been better to play 12...Be6]
[or 12...Re8]
13.dxe5! White correctly assumes that the control of the c4−square might bring him some initiative.
[13.b3 was also possible, but Qc7 14.Qc2 Be6 15.Nc4?! is not to be recommended in view of exd4 16.cxd4 d5 17.exd5 Bxd5 , when Black obtains comfortable play.]
13...dxe5
[13...Nxe5!? was not bad, either.]
14.Qc2 Be6 15.Nc4 Qc7 16.b4 axb4 This does not equalise, but the alternatives did not look any better.
[The computer shows that 16...h6! was fully playable, as 17.Nxa5 c5 gives Black full compensation, but this is very hard to realise and evaluate correctly.]

20...Rxa4 21.Qxa4 Nxe4 22.Rc1 Bd5 23.b5 cxb5 Sergey choses a radical solution. His position was far from easy.
[23...c5 leaves Black a pawn up, but White's passed pawn and his bishop pair outweigh the minimal material disadvantage. White remains somewhat better after both 24.Bc4 *(* and *24.Qc2 Qb7 25.Nd2* , even though there remain some issues. *)*]
[23...Qd6 24.b6! is also unpleasant for Black. *(24.bxc6 Rc8 25.Bb5 Ne7* might lead to an exchange of the c6−pawn for the e5−pawn. The resulting positions should be easy to hold. *)*]
[23...Nd6 24.b6⩲]
24.Qxe4! Qxc1 25.Qxd5 Qc7 26.Qxb5± The smoke has cleared.

White has a minimal material advantage and can play for the win without any risk. His bishop pair is really powerful, whereas Black's rook is not so useful when the play goes on the kingside only. I believe that very few people would be able to save such a position against Magnus. Unlike his opponent, Sergey was already short of time. He deserves credit for his tenacious defence.

26...Rb8 . **27.Qd5 Rd8** 70 **28.Qb3 Rb8 29.Qa2 h6 30.Qd5 Qe7 31.Qe4 Qf6 32.g3 Rc8 33.Bd3**

[33.h4! might have been slightly stronger, as Qc6 34.Qxc6 Rxc6 35.h5 Ne7 36.Nxe5 leaves more pieces on the board, which should favour White. It is easy to recommend this with the engine, but quite hard to play such a position accurately in a rapid game.]

33...Qc6! The queen swap would help Black to release the tension and to protect his king. **34.Qf5**

[34.Qxc6 Rxc6 35.Bxg6 Rxg6 36.Nxe5 Ra6 looks tenable for Black. A similar endgame appeared in a recent game Nisipeanu − Kramnik. The top Russian player pressed hard with his bishop and knight against the rook, but eventually had to agree to a draw. The Karjakin − Anand game from the Candidates Tournament 2014 in Khanty−Mansiysk also comes to one's mind.]

34...Re8

[34...Rd8! 35.Be4 Qc8 36.Qh5 Qe6 (Komodo) might have been more accurate, but it would be unfair to criticise Sergey for omitting this.]

35.Be4

[35.h4!? Qe6 36.Qe4! was a serious option.]

35...Qe6 36.Qh5 Ne7!? This was a clever defence. I consider it a good practical decision, but you might disagree with me. **37.Qxe5?!** This is tempting but not the best. With the queens off the board, Black can probably hold.

[37.Bh7+ Kh8 38.Bd3 Kg8 39.Qxe5?! *(39.Ng5!)* 39...Qxe5 40.Nxe5 Nf5! 41.Bxf5 *(41.Bf4?! Nd4* also leads to further exchanges. *)* 41...Rxe5 was similar to the game.]

A) 42.Nc5 Qd5 43.Qxe5!? is nice but less convincing: Rc8 *(43...Qxe5?? 44.Nd7#)* 44.Qc3?! f5!;

B) 42.Bc5! and Black can hardly resist White's attack.]

37...Qxe5 38.Nxe5 Ng6! 39.Bxg6

[39.Nxg6?! Rxe4 was less promising, as it is hard to attack Black's kingside pawns.]

39...Rxe5 40.Bd3 White's bishop pair is really powerful, but it is questionable whether it can successfully attack Black's kingside pawns. White might attack the weakest pawn with his king and one of his bishops, but Black can defend it with his two pieces. White would need to use his second bishop to cut off the rook from the weakest pawn, but this is easier said than done. I cannot tell you whether the position is drawn or winning, as it is still fairly complex. **40...f6** Sergey probably takes

the correct decision. During the game I expected h6−h5 and g7−g6, but the f7−pawn would not be any safer than the g7−pawn in the game. Apart from that, Black would need to reckon with White's king's penetration through g5 or with the pawn break f2−f4−f5. **41.Kg2**
The g7−pawn is really hard to reach. White probably needs to put his bishop on f8. He would like to push his opponent's king on to h8, move his king to g6, bishop to f8 and finally play ♗f7 with the Black's rook on the 7th rank, but this is not easy to achieve. I guess that Black can prevent it. At least in the game he did. **41...Kh8** Black refrains from making committal moves like g7−g5. **42.Kf3 Rd5 43.Bg6 Ra5 44.Ke4 Rb5 45.h4 Re5+ 46.Kd4 Ra5 47.Kc4 Re5 48.Bd4 Ra5 49.Bc5 Kg8 50.Kd5 Rb5 51.Kd6 Ra5 52.Be3 Re5 53.Bf4 Ra5 54.Bd3 Ra7**

[54...g5!? deserved serious attention, here. True, 55.Be3 gxh4 56.gxh4 Kg7 The further weakens Black's position, but the pawn exchange could simplify the defence. I do not know whether 54...g5 is good or not. White might have avoided it.]

55.Ke6 Rb7 56.Kf5 Rd7 57.Bc2 Rb7 58.Kg6! A great move. The king's activity is more important than the f2−pawn, here.

[58.Be4 looks stronger, even though Re7 59.f3 Kh7! considerably complicates White's further progress]

58...Rb2 59.Bf5 Rxf2 60.Be6+ Kh8 61.Bd6 Re2

[61...Rg2 62.Kf7 does not change much.]

This position is a theoretical draw. White would need to deprive Black's king of the squares g8 and h7 to force g7−g5 and then take the pawn en passant. However, it is not possible to protect g8 and h7 without attacking g7 as well, which leads to a stalemate after h5xg6 e. p. If White had two light−squared bishops, he could put one of them on g8 or h7 while defending it with the other one, thus winning. FTX Crypto Cup KO 2021 (1.21) 27.05.21

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.Re1 Carlsen chooses a relatively rare move order. **6...Ng4!?** An aggressive line. Black moves the knight from the f−file in order to play ... f5 as quickly as possible. This line hasn't been seen on our pages yet.

[Earlier we considered only 6...d6 is the most common reply, which usually transposes to the Giuoco Piano mainlines. Kadric,D (2558)−Mikhalevski,V (2578) St Louis 2019 [Mikhalevski,V]]

7.Re2 Kh8!? This move initiates sharp play. The f−pawn is now unpinned and Black is ready to play...f5. **8.h3** The critical continuation. **8...f5!** The point of the previous play.

[8...Nh6?! is too soft for this position. White would meet it with 9.Bg5 Be7 10.Bxe7 Qxe7 11.d4!⩲ and then the idea of 7...Ng4 wouldn't make much sense.]

9.Bg5! It's clear that Magnus was familiar with the line. Black's reply is forced.

[White can't capture the knight by means of 9.hxg4? due to fxg4 10.Ng5 g3 11.c3 h6! with a decisive advantage.]

[9.Nc3 may lead to a transposition to the game after Nf6

A) White also tested 10.Be3 Be7!? *(10...Bxe3 11.fxe3 fxe4 12.dxe4 d6* was roughly equal in So,W (2770)−Giri,A (2785) Bilbao 2016. *)*

11.d4 fxe4! 12.Nxe5 d5
and Black shouldn't have
problems.;
B) 10.Bg5]

9...Nf6

[In case of 9...Qe8? 10.exf5! Nxf2
11.Rxf2 Bxf2+ 12.Kxf2 Rxf5 13.Kg1
d6 14.Nbd2± Two pieces are more
important than a rook and a pawn
here.]

10.Nc3! d6! The position starts to look like a reversed 2...Bc5 King's Gambit line. **11.Nd5** The most challenging again. White attempts to take advantage of the pin. **11...fxe4 12.dxe4 Be6** Black is ready to put more pressure on d5 by means of 13...Ne7 and so **13.Nxf6 gxf6**

[13...Bxc4 is also playable. 14.Nxh7
Bxe2 15.Qxe2 Rxf3 16.Bxd8 Rxf2
17.Qxf2 Bxf2+ 18.Kxf2 Rxd8 19.Ng5
Rf8+ 20.Ke3 and a draw was agreed
in Stalmach,K (2569)−Perevertkin,V
(2603) ICCF email 2018]

14.Bxe6 fxg5 15.c3! Once again the champion demonstrates how deep his preparation may go. The idea behind this move is to cover the d4−square and prepare the b2−b4 advance.

[In the only preceding game White's
play was less convincing. 15.Rd2 Qf6
16.Bg4 Ne7 17.Qe2? Qg6!∓
with a clear advantage for Black in
Abrahamyan,T (2358)−Kosteniuk,A
(2471) Chess.com INT 2020]

15...Qf6 16.Bg4 Ne7?! This move is inaccurate.

[Stockfish prefers 16...a5!
, which restricts White's activity on the
queenside. Play may continue 17.g3
Ne7 18.Qd2 Rg8 19.Kg2 Qg6
20.Rh1 Raf8 *(20...h5? 21.Bd7±*
is good for White, as the bishop
escapes, while the g5−square is
weakened. *)* 21.h4 gxh4 22.Rxh4
Qf6! with equal chances.]

17.Qd2 Rg8

[17...h6!? is a logical alternative.
18.Bh5!? *(18.b4!? Bb6 19.Rc1! a5
20.a3⩲* preparing an advance of the c−
pawn is also slightly better for White. *)*
18...Qg7 19.Rf1 Ng8 20.Bg4⩲
with some slight edge for White.]

18.b4! Bb6 19.a4 An inaccuracy, which allows Black to equalise.

[19.Rc1! was strong, preparing an
advance of the c−pawn again. For
instance, Rad8 20.c4 Bd4 21.Nxd4
exd4 22.Rd1 b6 23.b5! c5! 24.bxc6
Nxc6 25.Bf5⩲ and his better pawn
structure offers White the upper
hand.]

19...a5!= Now the plan with c4−c5 makes no sense. **20.Qa2?!**
Magnus goes for an exchange of queens.

[Instead it was better to play 20.Qd3
Rgf8 21.bxa5 Rxa5 22.Rb2! Qg6
23.Rab1! h5 *(23...Rxa4 24.Rxb6
cxb6 25.Rxb6 Qxe4 26.Qxe4 Rxe4
27.Rxb7=* leads to sufficient
compensation for the sacrificed
material. *)* 24.Bd7 with a position of
dynamic equality.]

20...Qg6! Hikaru creates a threat of 21... h5. **21.Qe6 Qg7?!**

[21...h5! was tactically possible.
22.Bf5! and only now *(22.Qxg6?*
is just bad as after *Nxg6−+*
White can't stop ...Nf4 with an
advance of the g−pawn to g3. *)*
22...Qg7! planning ...Ra8−f8−f6.]

22.bxa5! Bxa5 23.Rb1!⩲
Now the initiative is back in White's hands. **23...Ra7 24.Qc4**

[24.Reb2! looks more precise. Nc6 *(24...Bxc3? 25.Rxb7+− is in White's favour, as he creates a passed pawn on the a−file.)* 25.Qc4 Bb6 26.g3± and White prepares 27.Kg2 and Be6−d5 at the right moment.]

24...Qg6? Black prepares 25...h5, but misses a nice tactical possibility.

25.Rb5?! White misses a chance to bring his knight into play, but creates a threat of 26.Rxa5.

[25.Nd4! was very strong and was missed by both players. Rga8 *(25...exd4?? is impossible, as after 26.Qxd4+* White wins the a7−rook. *)* 26.Nf5 Nxf5 27.Bxf5 Qg8 28.Qd3± and White is better thanks to the weakened kingside.]

25...c6?

[Both 25...Rga8]

[and 25...Bb6 were better as they prevented White's idea without weakening Black's position.]

26.Nxe5?! An unnecessary finesse.

[26.Rb1± was stronger, as now the d6−pawn is a target.]

26...dxe5 27.Rxe5? This is already a big mistake. Carlsen definitely missed Black's reply.

[27.Rxa5! was necessary. Rxa5 28.Qb4 A double attack on a5 and e7. Ra7 29.Qxe7 Qg7 30.Qe6 Rxa4 31.Rd2! with sufficient counterplay for an exchange.]

27...Rd8!−+ Now it turns out that the knight is untouchable. **28.Re6**

[28.Rxe7? Rd1+ 29.Kh2 Qd6+ is what Magnus missed when he sacrificed a piece.]

28...Qg7 White only has two pawns for a piece and not much compensation.

29.g3! Raa8! 30.Kg2 Ng6! 31.e5 Bc7

[31...Rf8!?−+]

32.Bf5 Nxe5 33.Qb4 Rf8 34.Re7 Rf7 35.Qxb7 Raf8 36.Rxf7 Qxf7 37.Be4 h5

[37...g4!−+ would be more accurate.]

38.Bxc6 Qc4 39.Bb5 Qxc3 40.Qe4! White tries his best to stay in the game. A reduced number of pawns yields him some practical chances. **40...Qc5! 41.Rc2 Qd6 42.Be2**

[It would be better to target the bishop in order to force it away from the b8−h2 diagonal. 42.Qb7!∓]

42...h4! 43.gxh4 Ng6! 44.Kf1 Bb6! 45.Bf3 Ne5! 46.Rd2 Qc5!−+ Surprising precision for this part of the game. White's defence collapses.

47.Rc2 Nxf3! 48.Rxc5 Nd2+ 49.Ke2 Nxe4 50.Rc6 Bxf2 51.hxg5 Nxg5 52.a5 Ne4 53.Kd3 Nc5+ 54.Kc4 Nb7 55.Rh6+ Kg7 56.Rh5 Ra8 57.Rf5 Nd6+ 6...Ng4!? is an interesting line, which sharpens the position. Black seems to be able to equalise if he plays 16...a5 instead of 16...Ne7.

Tata Steel−A 78th (9) 26.01.2016
[Carlsen,Magnus]

1.e4 The first time I've ever tried 1.e4 against Mickey in classical chess **1...e5 2.Nf3 Nc6 3.Bc4** But alas, the free day before the game was not spent refuting his Ruy/Berlin repertoire **3...Bc5 4.0−0 d6** Avoiding the Max Power (Max Lange) attack after ...♘f6 d4. **5.c3 Nf6 6.d3** I remembered that Saric got an

advantage with d4 ♗b6 dxe5 against Aronian in last year's Tata, but I assumed Mickey had that covered. **6...h6** Avoiding ♗g5. Against the Italian such liberties can often be taken. Besides he stays flexible on the queenside, deciding whether to play ...a6 or ...a5 only after I've shown some of my cards. **7.a4** I spent more than 25 minutes combined on this and the next move, time that I would later curse myself for having wasted. Part of the time was spent pondering whether the extra h6−move could somehow be used to my advantage after d4 ♗b6 (I cannot imagine why I thought it maybe could). But mostly I was trying to figure how I could favourably expand on the queenside.

[7.b4 Bb6 8.Nbd2 was one of the lines I considered, as if I get time for ♗b3 and ♘c4 I will have a little something. Ne7 However looked fine to me, as Black will be in time to meet ♘c4 with ...♗c7.]

[7.Nbd2 a6 also gives Black a normal Italian. *(7...Ne7 8.d4* is probably an achievement for White *)*]

7...a5 Probably the right decision. If ...a6 (one of the two naturally had to be played to avoid me trapping his bishop) then I would follow the same plan, with a little more space than in the game. **8.Na3** Once again I spent time considering d4, but finally decided to just play normally. **8...0−0** I actually thought he might consider just chopping off my knight, as my rook would be temporarily misplaced, and I was not sure my dark−squared bishop would have such a bright future. The bishop pair will soon be gone after ...♗e6. **9.Nc2 Re8** I was quite happy to see this move, as I will be able to pin his rook after ... ♗e6 ♗b5.

[9...Be6 10.Bxe6 fxe6 was naturally quite possible, but White could claim to be slightly better after ♗e3 ♗xe3 ♘xe3, probably without justification.]

10.Re1 As he cannot go ♗e6 ♗xe6 ♖xe6 due to d4−d5, it makes sense to make a waiting move before going ♗e3. **10...Ba7 11.Be3 Be6 12.Bb5 Bd7** Now I felt that I just needed to make another waiting move, and he would have to make a slight concession. **13.Bxa7** After a frustrating half an hour of thinking I could not find anything better.

[13.h3 is the move that suggests itself. But I did not want to weaken f4 Ne7 14.Bxa7 Rxa7 15.d4 Ng6 It seemed to me that I would not be able to exploit the undefended position of his rook on a7 after dxe5, and otherwise Black is solid, and might find some counterplay with ... ♘f4 later.]

[13.Rc1]

[13.g3]

[13.Nd2]

[13.Qd2]

[13.Qe2 were other more sophisticated means I considered in the fight for a tempo, but none of them came close to convincing me.]

13...Nxa7 14.Bc4 Be6 Very logical. He could also go ...♘c8 immediately, but then I might go hide the bishop:

[14...Nc8 15.Ne3 Nb6 16.Bb3 Be6 17.Bc2 with d4 coming, although it is naturally not much.]

15.Bxe6 Rxe6 16.Ne3 Nc8 The best route for the knight.

[16...Nc6 17.Qb3 with ♘d5 looming,

is a little uncomfortable.]

17.Nf5 The white pieces are a little better placed, but with such a symmetrical structure my slight advantage will naturally disappear. That's why I took the chance to force matters a little. **17...Ne7 18.d4** The idea of my previous move.

[18.N3h4 is pointless, as without the dark−squared bishops I cannot make use of the knight on f5.]

18...exd4 19.N3xd4 Re5? A mistake, though neither of us really understood that during the game.

[19...Rxe4 20.Rxe4 Nxe4 21.Qg4 At first seemed to me quite promising for White, as I somehow only considered ♘xf5 here Ng5! I discovered that this was possible only after I played 17.♘f5 *(21...Nxf5 22.Nxf5 Ng5 23.Re1!* is what I liked for White; h4 is now a serious threat and after *Qf6 24.Ne7+ Kh8 25.Nd5 Qd8 26.Qf5! Qc8 27.Qxc8+ Rxc8 28.Re7* White's initiative persists without queens *)* 22.Re1 *(22.h4 Nxf5 23.Nxf5 Ne6 24.Nxh6+ Kf8 25.Nf5 Qf6* is objectively the best, with equality *)* 22...Ng6! 23.h4 Nh7 and there is nothing concrete while Black remains a pawn up.]

20.Ng3 Ng6 It's easy to understand why Mickey did not feel the need to play concretely, Black seems very solid, while my space advantage (e4 vs d6) does not feel very significant with two pairs of minor pieces exchanged. Besides it appears that the space advantage could disappear at any moment after a timely d6−d5. His last move is quite necessary to avoid f4, as rolling with a Lasker rook on c5 understandably seemed a bit too funky. **21.Qc2** I spent seven minutes on this move, partly hesitating between going c4 immediately and bringing my rook into play first, and partly cursing myself having wasted so much time earlier in the game and now wasting more precious time (I had about half an hour left before this move) on a decision that did not seem particularly significant.

[21.c4 I finally decided against it because of c6 with ...♕b6 coming, even after 22.Ndf5 Qb6 and ...♖d8 follows after either capture.]

21...c6 Not a great move, but very logical. Engines start suggesting moves like ♕b8−a7, which is not very intuitive while White has a square on b5.

22.Rad1 Now I was very surprised and happy to discover that I was actually better! It's hard to play ...d5 under favourable circumstances and my plan in the game is surprisingly powerful.

22...Qc7

[22...d5 does not quite work 23.Nf3 Re8 24.exd5 Rxe1+ 25.Nxe1 cxd5 *(25...Nxd5 26.c4)* 26.Nf3 is comfortably better for White. Normally it would not be much, but the inclusion of a4 a5 helps me enormously, as there will be a square on b5 and additional targets.]

23.Ndf5 Rd8

[23...d5 24.exd5 Nxd5 *(24...cxd5* is better, but again by no means equal *)* 25.Nh5 is not difficult, but it was somehow aesthetically pleasing during the game. g7 cannot be defended. Rae8

A) 26.Rxe5 Qxe5 27.Qb1! is also possible *(27.g3 Qe2)*;

B) 26.Rf1 Re2 27.Qb1 and Black's temporary activity is

extinguished, while g7 falls.]

24.Qd2 Going c4 was also possible, with a nice grip on the position, but I was excited about the prospect of attacking d6 and threatening f4 with one move.

24...Kh7 Played after 18 minutes of thinking, a sure sign that he realised that his position was getting really unpleasant.

[24...Qb6 25.Kh1 does not seem to change much. *(25.Nxd6 Re6* is much too hasty *)*]

25.f4 Qb6+ Normally one would like to save such a check for later, but here it is absolutely forced.

[25...Ree8 26.Nxd6 Qb6+ 27.Qf2 Now I can safely block the check, since the rook on e8 is hanging.]

26.Kh1

[26.Qf2 Now f4 is simply hanging: Qxf2+ 27.Kxf2 Nxf4]

26...Ree8

[26...Re6 27.e5 is absolutely terrible for Black, as long as I avoid a nasty little trick Ng4 28.Rf1! I was going to play this on general grounds, as one should not take the rook off the last rank for no reason! *(28.Re2?? Nxf4! 29.Qxf4 dxe5* This is the point; because of the last rank weakness the tables are turned. *)*]

27.h3 By far the best move, but again I invested a large part of the time I had left.

[27.Nxd6 Ng4 28.Rf1 Rxd6 *(28...Ne3 29.Qf2!)* 29.Qxd6 Nf2+ 30.Rxf2 Qxf2 and I am only temporarily a pawn up as both f4 and b2 are hanging.]

27...Rd7 This came as a major surprise to me. Black cannot defend d6 as both ... d5 and ...♖e6 run into e5, but while maybe not objectively better,

[27...h5 is what I spent all my time calculating before I played h3 and would have been a very interesting try. I investigated several options:

A) 28.Qc2 or ♕d3 were other moves that I briefly touched on, with the idea of answering h4 with 29.Nxh4 Nxh4 30.e5+ But if he simply defends the pawn with ... ♕c7 or ...♕c5 instead, I was not convinced about my advantage;

B) 28.Nxd6 This is the simplest. After the forced h4 29.Ngf5 Nxe4 I saw 30.Nxe4! Rxe4! but I could not evaluate *(30...Rxd2 31.Ng5+* mates: *Kg8 32.Rxe8+ Nf8 33.Ne7+ Kh8 34.Rxf8#)* 31.Rxe4 Rxd2 32.Rxd2 properly. With more time I would surely have realised that all the entry points for his queen are covered and my threat of ♘d6 is very strong, but with little time and a possibly unsafe king, I'm always a bit wary of playing against the queen.;

C) 28.Qe2! The surprising move is the one I liked the most during the game 28...h4 *(28...Nxf4* Normally one would stop calculating here, but since my queen is now no longer pinned on the d−file *29.Qf3* followed by ♘xd6 is now very strong *)* 29.Nh5 Nxe4 30.Qf3! I saw this idea, but I was still apprehensive, as I could not really believe that it would work. But it does! Nf2+ *(30...Qc5* This is a much better defence, but it does not solve his problems *31.Nhxg7 Ng3+ 32.Nxg3 Rxe1+ 33.Rxe1 hxg3 34.Nh5 Qf2 35.Qxg3 Qxg3*

36.Nxg3 and since ...♘xf4 is met by ♖f1 White has good winning chances *)* 31.Kh2 Nxd1 32.Nf6+! gxf6 33.Qh5+ Kg8 34.Qh6 and mates.]

28.Nxd6 Rxd6 The only chance:

[28...Red8 29.e5 Ne8 30.Ngf5 is just a pawn.]

29.Qxd6 Qf2 Since all my attention had been focused on 27...h5, I only now realised that even I was still a long way away from a win.

[29...Qxb2 Even this is not so bad 30.f5 *(30.Qd2 Qxd2 31.Rxd2 Nxf4 32.e5 N6d5* also does not look too convincing *)* 30...Ne5 31.Qd2 Qa3 32.Ra1 Qe7 and while I suspect White should be technically winning, Black has a solid blockade for the moment, and with eight moves still to go till move 40 one never knows what could happen.]

30.Qd3 There is nothing better than to return a couple of pawns. Additionally, after blundering both mate on g2 and the knight on g3 in different lines, getting the queens off seemed like a very wise idea. **30...Nxf4 31.Qf3 Nxh3 32.Re2** 32.♖f1 was also possible, but I liked the idea of doubling rooks on the d−file. **32...Qxf3 33.gxf3 Ng5 34.Kg2 Ne6 35.Red2 g6** He has managed to set up a solid defence for the moment, but the following knight manoeuvre is surprisingly strong.

[He should perhaps have tried 35...g5 immediately, as ♘f5 and ♘d6 can be met by ...♖e7. Practically speaking, Black certainly has drawing chances.]

36.Nf1 h5 Since there is no good way to meet ♘e3−c4 anyway, Mickey has to go for it after all. **37.Ne3 h4 38.Nc4 g5 39.Nxa5 g4 40.Nxb7** I decided to be really greedy, as it seemed to me that his h3−g3 pair would not really be dangerous. **40...g3 41.Nd6 Rg8 42.Nf5 Nf4+ 43.Kh1 h3 44.a5** So far so good. I have a lot of extra material, and he has no threats. Additionally, my a−pawn is running very fast. **44...N6h5 45.a6 Ne6** Now however, I sank into thought and began seeing all sorts of ghosts. **46.a7**

[46.Rd6 This had been my original intention preventing ...♘g5 and game over I thought. But then I saw Nhf4 with the idea of ...♘e2, and it spooked me a lot more than it should have 47.Nxg3 Rxg3 48.a7 and game over, one would think? ...♖g8 ♖d8 is easy enough. But then you start seeing lines like *(48.Rg1 Ng2 49.a7 Rg8 50.Rxc6* is still completely winning, which I more or less realised during the game. But some doubts still remained: For what did I give up my knight!? *)* 48...Ne2! 49.a8Q?? Rg2 and once you find one line in which are suddenly mated, you start looking for other options.]

46...Ra8 47.Ra1 Ng5 48.Nh4 So this is the idea that I settled on. I have to remove the knight from its best post on f5, but I could still not see any ideas for Black.

[48.Rd3 Nf4 49.Re3 would have been a very clean solution, were it not for g2+ *(49...Ng2* was what I feared, but this is very easily solved by *50.Re2 Nf4 51.Nxg3* and the rook is protected *)* 50.Kh2 Ne2! I naturally did not see this 51.Rxe2 Nxf3+ 52.Kg3 *(52.Kxh3 g1Q 53.Rxg1 Nxg1+* and I lose both rooks *)*

52...Rxa7 53.Rb1 g1Q+ 54.Rxg1 Nxg1 and he has suddenly regained all his material, even if not solving all his problems as the knight is rather stuck on g1.]

48...Nf4 49.b4? Panic, confusion... I just decided to get rid of the pawns once and for all.

[49.Ra5 would still have been a clean win, as Mickey pointed out to me after the game. I rejected it because of c5 but now 50.b4 which I somehow failed to consider works much better Ng6 *(50...g2+ 51.Nxg2 hxg2+ 52.Rxg2 Nxg2 53.Kxg2 cxb4 54.cxb4* and with the c6−pawn gone, the pawns are unstoppable *)* 51.Nxg6 Nxf3 52.Rg2 and this works even here.]

49...g2+ Because of ♔h2/g1 ♘g6, I am forced to give up a full rook. **50.Nxg2 hxg2+ 51.Rxg2 Nxg2 52.Kxg2 Ne6 53.c4 Nc7** And the pawns are reasonably well blockaded. It still felt like I should be winning, as his pieces are very passive and my king and f/e−pair will manage to create something before his king can get to the queenside.

54.Kg3 Kg6 55.Kf4 Kf6 56.e5+ Ke7

[56...Ke6 57.Ke4 f6 would have been very logical, seemingly exchanging off the e5−pawn without letting my king take up a dominating position on e5. But I had seen in advance that it would fail to 58.Kd4 and since he does not have the e6−square for the knight, my king decisively penetrates on the queenside.]

57.Ke4 f6 Quite logical, but not the best try.

[57...Kd7 58.f4 Kc8 59.f5 Kb7 60.e6 with the idea of fxe6 f6 and f6 61.Kd4 But I missed

A) 61...Na6 62.Rxa6 seemed to win still. *(62.Rxa6)*;

B) 61...Kb6! stopping ♔c5 and making a draw. My father told me after the game that a Norwegian supercomputer gave me +4 even after 57...♔d7, so I guess I'm still winning. Am I going to find out how, or stick to the old cliché that this would have given better chances for a draw, but should still lose? The latter obviously. Deal with it.]

58.f4 fxe5 59.Kxe5 Ne8 60.f5 Nd6 Now I'm winning by force.

[60...Nf6 and the win, while attainable, is still not quite easy.]

61.f6+ Kd7 62.Rd1 Re8+ 63.Kd4 The point. While breaking the pin does not look logical, I am threatening ♔c5 and after the forced. **63...Kc7 64.Re1** White wins a crucial tempo **64...Nf5+** As Peter and I agreed on after the game, resigning instead of trying this would have been unprofessional. **65.Kc3**

[65.Kc5 Fortunately I had a lot of time... Rxe1 66.a8Q Re5#]

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.d3 Bc5 5.Ba4 A surprising novelty in a well−known position, which the World Champion introduced in a rapid game. Curiously, it was picked up two days later and tested in four more games that same day, all of which were blitz games! White is just striving to get a Giuoco Piano type of position while avoiding both the ...Nd4 and ...d5 lines.

5...0−0 6.0−0 d6 A good solid move.

[In most of the other games Black preferred the more flexible 6...Re8 keeping the d−pawn on d7 in order to play ...d5 in one move.

A) 7.c3 d5! 8.Nbd2 dxe4 This move can be delayed. *(8...a6!?)* 9.Nxe4 Nxe4 10.dxe4 Qe7 11.h3 a5! 12.Qe2 Bd7 *(12...Rd8!)* 13.Bc2 f6 14.Bb3+ Be6 and Black was fine in Salgado Lopez,I (2629)−Roiz,M (2605) World Blitz St Petersburg RUS 2018;

[6...d5!? is interesting, too. This way Black questions the entire idea of 6. Ba4. 7.exd5 Qxd5 8.Nc3 Qd6 9.Bxc6 bxc6 10.h3 Bb6 *(10...Re8!?)* 11.Re1 Re8 12.Be3 Svidler,P (2737) −Nakamura,H (2746) St Petersburg RUS 2018 *(12.Nd2!?)* Now 12...Bxe3! 13.Rxe3 Nd5 14.Re1 Nf4 seems to equalise.]

7.c3 We've just transposed into a couple of old games from Ekaterina Lagno, the current Women's World Blitz Champion.

7...Bb6 The most logical. The bishop moves away from any attack from the d−pawn.

[7...Ne7 is also reasonable. 8.Nbd2 *(8.d4 Bb6 9.Bc2 Ng6 10.h3 c6=* Black prepares ...d5 and equalises. *)* 8...Ng6 9.d4 Bb6 10.Bc2 Re8 11.Re1 c6 12.h3 h6 13.a4 Be6 *(13...a5! 14.Nc4 Bc7* was more accurate. *)* 14.Nf1 Qd7 15.Ng3± and Black found himself under pressure. Karjakin,S (2753) − Jakovenko,D (2735) World Blitz St Petersburg RUS 2018]

[In one of the aforementioned games a draw was agreed after 7...h6 8.Nbd2 Lagno,K (2507) −Eljanov,P (2716) Mainz 2008]

8.Nbd2 Ne7! Black is ready to allow an exchange of his dark−squared bishop.

[8...a6 is a waste of a time in combination with ...Bb6.]

9.Nc4 Ng6 10.h3 Since the bishop can't escape from b6 White isn't obliged to rush with capturing it. **10...h6** Before placing the light−squared bishop on e6 Andreikin takes control of the g5−square in order to avoid Ng5.

[The immediate 10...Be6!? was also possible,]

11.Bc2 Be6 12.Nxb6 axb6 13.d4 Probably Magnus hadn't even considered this move to be a pawn sacrifice, but in fact Black can afford to take the a2−pawn.

[However, 13.a3!? deserved attention. For example,

A) 13...Qd7 14.Re1! *(14.d4* may run into *Bxh3!* with a strong attack. *)* 14...c5 15.d4;

B) 13...Re8 14.Re1 b5 15.d4

Bd7 16.Bd2 with a tiny edge for White.]

13...b5 Dmitry takes some space.

[13...Bxa2! was possible. 14.b3 c5! Black's idea is to free the bishop by means of 14...c4.

A) 15.dxe5 dxe5 16.Qxd8 Rfxd8 17.c4? is strongly met by *(17.Be3!?)* 17...b5! 18.cxb5 c4∓;

B) 15.Be3 c4 16.Nd2 b5! and Black is fine.]

14.Be3

[Once game Carlsen avoids 14.a3!? , which deserved attention in view of the same capture on a2.]

14...c6

[14...Bxa2! 15.b3 Qe7! 16.Qc1 Ra6= Black is ready to protect the bishop on a2 by means of ...Rfa8, while also planning ...c5−c4.]

15.Re1

[15.a3!?]

15...Qc7 Black makes more preparations for ...Bxa2, but doesn't get a chance to capture the pawn any more.

[15...Bxa2! 16.b3 Ra6 was still reasonable for Black.]

16.a3!± Now White is slightly better thanks to the favourable tension in the centre and his bishop pair. **16...Rad8 17.Qd2 Rfe8 18.Rad1 Qe7 19.Qc1 Nh5** Black's plan is obvious− he wants to bring the knight to f4. **20.dxe5?!** This simplification doesn't promise much.

[20.Kh2! was strong, with the idea to meet Nhf4 with 21.Ng1!±]

20...dxe5 21.Rxd8 Rxd8 22.Rd1 Nhf4

[22...Rxd1+ 23.Qxd1 Nf6= with the idea of 24... Ne8 and 25... Qd8, deserved attention.]

23.Kh2 f6 Slightly inaccurate.

[23...Rxd1!? 24.Qxd1 Nh4 25.Ne1 Nhg6 promised good drawing chances.]

24.Rxd8+ Qxd8 25.Qd2 Now Black's knight on f4 starts to look awkward.

25...Qc8 The threat of 26...Bxh3 is easy to meet and so it would make sense to place the queen on c7.

[25...Qc7!?]

26.Ng1! Bf7 Time to prepare a retreat of the f4−knight to e6. **27.g3 Ne6 28.h4±** A typical Carlsen position. He is a little better and can press forever.

28...Qd8 29.Qxd8+ Nxd8 30.Nf3 Nf8 31.Nd2 g5?! This wasn't necessary as it creates additional weaknesses in Black's position, in particular h6.

[31...Nd7 was better.]

10.Bxe6 fxe6 11.b4 A fashionable line at the top−level these days. It seems as Black should have rich counterplay along the semi−open f−file but things are not as simple. **11...Nh5 12.Ra2 Qe8N**
[Anther short draw was seen in the predecessor: 12...Qf6 13.Na3 Ne7 14.Bg5 Qf7 15.Be3 Nf4 16.Kh2 Qg6 17.Nh4 Qh6 18.Nf3 Qg6 19.Nh4 Qh6 20.Nf3 Qg6 1/2−1/2 (20) Vachier Lagrave,M (2779)−Ding,L (2805) Stavanger 2019]
13.Na3 Nf4 14.Bxf4 Rxf4
[Black needs to avoid the locking of his bishop possible after: 14...exf4?! 15.d4]
15.Nc4 Qg6 16.b5 Raf8! Just in time to transfer the rook on the correct side of the board and avoid the consequences of the pin along the a−file.
[Bad was: 16...axb5 17.axb5 Ne7 Due to: 18.b6! When Black's centre collapses: cxb6 19.Nxd6]
17.Ncd2
[There is no time for: 17.bxc6 Rxf3 18.cxb7 Bxf2+ 19.Rxf2 Rxf2 As: 20.b8Q?? Qxg2#]
17...Ne7 18.d4 Once again hoping to lock the bishop. **18...Qf6** To which Grischuk strongly disagrees.
[The computer suggests the counter−intuitive way of counterplay with: 18...exd4 19.cxd4 c5]
19.dxe5 dxe5 20.bxa6 bxa6 21.Qe2 Finally, Caruana could not solve the problem of the a7−g1 diagonal, but at least created some weaknesses to work on. Strategically, White should have the advantage because of the crippled black pawn structure but the eternal delicacy of the white king's position makes the game roughly balanced. **21...a5 22.Rf1** The weak point on f2 needs overprotection.
[One example being the line: 22.Nc4 Ng6
A) Better is: 23.Rd1 But then Black also retains enough counterplay with: Nh4 24.Ncxe5 Nxf3+ 25.Nxf3 Qg6 *(* Or *25...Qxc3)*;
B) 23.Nxa5? Nh4 24.Nxh4 Rxf2 when Black wins.]
22...g5 23.Nc4 Ng6 24.Nh2

[If: 24.Rb2 Then Black opens the game with: g4 25.hxg4 Rxg4 and has dangerous threats.]

24...Qg7 25.Qd3

[Not 25.Nxa5? Rxf2]

25...Nh4?!

[Objectively better seems: 25...h5 When Back needs not to worrry about: 26.Nxa5 As his kingside attack runs smoothly with: Qf6 27.Qe2 g4 28.hxg4?! Qh4! 29.gxh5 Bxf2+ 30.Rxf2 Rxf2 31.Qxf2 Rxf2 32.Rxf2 Qxh5]

26.Ng4 Caruana is fixated to his plan and misses a good opportunity.

[He could have finally taken the pawn: 26.Nxa5! The pawn itself, however, is not as important, the best thing about this capture is that White gets a chance to kick the bishop away from the diagonal in the line: h5 27.Nc6 Bc5 28.Qc4 with advantage for White.]

26...h5 Now White also wins a pawn, but the bishop remains on the diagonal and Grischuk is in time to open the kingside.

27.Ngxe5 g4 28.hxg4 hxg4

This pawn wants to go even further.

29.Qg3 Qg5 30.Re2

[After: 30.Nc6 Bc5 31.N4xa5 Nxg2! Black crashes through: 32.Qxg2 *(*Or *32.Kxg2 Rf3 33.Qxc7 Qh4)* 32...g3]

30...Kg7 31.Nd3 The game remains extremely sharp and any accuracy can be the last one. Needless to say, both players were very short of time already here. **31...R4f6** Grischuk commits the first inaccuracy, which led him... straight to the victory.

[Objectively best was: 31...Rf3! 32.gxf3 Nxf3+ 33.Kg2 Nh4+ When if White wants to avoid the repetition of moves, he needs to risk with: 34.Kh1 *(34.Kg1 Nf3+* is a perpetual. *)* 34...Rf3 35.Qxc7+ Kh6 36.Qg3 Rxg3 37.fxg3 Nf3 and having the queen here might be more beneficial due to the weak white king.]

32.Qxc7+ The obvious capture is not the best!

[Correct was: 32.Rb1! One idea is to attack along the seventh rank in the line: Ng6 *(*The other idea is to attack along the fifth rank in case of: *32...R8f7 33.Rb5!)* 33.Rb7 Then White does not need to worry about: Rxf2 34.Rxf2 Bxf2+ 35.Nxf2 Qc1+ 36.Kh2 Qh6+ *(*Or *36...Rh8+ 37.Nh3 gxh3 38.Qxc7+ Kh6 39.Qg7+ Kg5 40.Rb5+ e5 41.Rxe5+)* 37.Nh3 gxh3 38.Rxc7+ and in both cases White is in time and has a significant advantage.]

[32.Rb2! would have done the same good job for White too.]

32...R8f7 33.Qe5 One more obvious move and this time it is a lethal mistake.

[The only move was: 33.Qg3! Kg8 *(*Or: *33...Rh6 34.Nde5* whe White manages to swap the queens of before he gets checkmated: *Qh5 35.Qxg4+)* 34.Nde5 Rg7 35.Rd1 when it is still anyone's game.]

33...Qh6!! That is the thing. The queen is better placed along the h−file. Grischuk is mating now.

[Therefore he rejected the beautiful draw in the line: 33...Nf3+!? 34.gxf3 Qh4 35.Qh2 Qxh2+ 36.Kxh2 Rh6+ 37.Kg3 gxf3 38.Rb2 Rg6+ with perpetual check.]

34.Qg3 Kh8! The king should be away from the g−file.

[In the line: 34...Kg8 35.Rb1 Nf3+ 36.gxf3 There is no pawn capture on f3 due to the pin and White saves himself after: Rxf3 37.Qg2 Rxd3 38.Ne5]

35.Rb2 Nf3+! Now it is a forced win after: **36.gxf3 gxf3 37.Rfb1 Rg7 38.Qxg7+ Qxg7+ 39.Kf1 Rh6 40.Ke1 Qxc3+**

[40...Qxc3+ 41.Kd1 Rh1+ 42.Ne1 Rxe1#]

[Some White players delay Nbd2 in order to follow−up Bxe6 fxe6 with 11.Be3 , forcing the exchange of both bishops. The rook on e3 protects the f3−knight, which makes a later g2−g3 possible. [Rogozenco,Dorian]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 The Queen's Gambit Declined became fashionable again on the very top level thanks to the Candidates matches in Kazan, where Black was able to neutralise White's opening advantage. Carlsen was happy that he found a way to break through this rock solid classical opening. **4.c3 Nf6 5.d3 0−0 6.0−0** This is a popular move order: White prevents his opponent from developing the bishop on f5. Recently Nakamura himself played this move against Ponomariov. **6...d6** A rare move. Black insists on transferring the bishop to the diagonal b1−h7. Magnus Carlsen admitted after the game that the move was new to him. **7.h3 Ne7 8.Re1**

[8.d4 Bb6 9.dxe5 Nxe4]

8...Ng6 9.Nbd2! An important change of structure for the strategy of White, who will be able to open the h−file later on. From this point of view the similarity with the aforementioned game is amazing. **9...c6 10.Nf1 d5 11.exd5!** # **11...Nxd5**

12.Ng3

[12.Nxe5 Nxe5 13.Rxe5 Bxf2+]

12...h6 Nakamura's desire to postpone short castling is understandable, since then at some moment White will start advancing the h−pawn. However, Black's problem is that sooner or later he will have to hide the king anyway, since White's play in the centre is simple and clear.

10.h3 Mikhalevski, V: 'Caruana chooses a rare move order, although it's likely to transpose to the main line, 10.Nbd2. White avoids a pin along the d1−h5 diagonal and keeps the option of developing the dark−squared bishop before the queen's knight.'

[Judith played 10.Bg5 Ng6 11.Nbd2 h6 12.Be3 c6 13.Ba2?! which gave Black a chance to claim an edge by means of

A) 13...d5 was less convincing. 14.Bxb6 Qxb6 15.Re1 was correct with just a slightly more pleasant position for Black. *(15.exd5?! cxd5∓* Polgar, J (2705) −Carlsen, M (2848)/Mexico City 2012. *)*;

B) 13...Bxe3 14.fxe3 Qb6! 15.Nc4 Qc7 with the consequent 16...Be6 and eventually ...d5 at the right moment.]

10...c6 Mikhalevski, V: 'Vishy answers with a very rare continuation, but nevertheless logical move. This way Black has been preparing ...d5.'

11.Bb3 Mikhalevski, V: 'Caruana goes on with his strategy of most flexible moves. This time he's freeing the c4−square for the queen's knight and moves his bishop away from a possible attack in the centre by means of ...d5.'

[Typical for the Italian 11.Bg5?! Ng6 12.Nh4 is dubious here in view of d5!∓ and in order to hold the centre White would have to commit a couple of unfavourable exchanges.]

[17...cxb5!? was the alternative 18.Qxd8+ Bxd8 19.axb5 Rc7 20.Rd1= with a nearly equal position.]

[17...Rd7!? would have been better. 18.Qf3 cxb5 19.axb5 Qc7 20.Be3 Nf4!= with a position of dynamic equality.]

18.Rb1 Mikhalevski, V: 'White returns the favour and misses his only chance to set certain problems.'

[It's surprising that Caruana didn't start with 18.Qxd8+! Bxd8 and only then *(* or *18...Rxd8 19.Rb1 cxb5 20.Bxe6 Rxe6 21.Rxb5)* 19.Rb1 and Black still has to be accurate to retain the balance.]

18...Rd7 Mikhalevski, V: '!' Mikhalevski, V: 'Now Black is fine again.' **19.Qc2 Nf8** Mikhalevski, V: 'Anand is trying to play as solid as possible.' The ♘ already wasn't useful on g6. Now he protects the e6 ♗, and sometimes ...♗xb3 followed by ...♘e6 can be fine for Black.

20...Bxe3 Mikhalevski, V: '?!' Mikhalevski, V: 'A slight concession, but the Tiger from Madras felt he is not going to lose this solid position even being a little worse.'

[The natural 20...Qc7 was also possible, 21.Bxe6 Nxe6 22.bxc6 bxc6 *(22...Qxc6 23.Nd5)* 23.Nc4 Bc5 Anand was probably scared of some sort of position like this, in which the ♘ on c4 can attack a5 and e5, but his position is solid, White can't improve his position so easily.]

[20...Bc5!= is much safer.]

21.Bxe3 h6 22.Red1

[The engine suggests 22.bxc6!? bxc6 23.Bxe6 Nxe6 24.Rb6 with some pressure on the queenside, for example c5 25.Qb3 and however Black is solid, still it is not so easy for him to equalise.]

22...Rc8 Mikhalevski, V: '!' Mikhalevski, V: 'Black shows that White also has weaknesses.' **23.Rxd7**

[23.bxc6 Rxc6 and the ♖ is fine on the c−file.]

25.bxc6 Qxc6 The symmetrical structure is a little bit changed, but still the position is equal. **26.Bd5** Mikhalevski, V: '!?' An ambitious reaction. Caruana tries to complicate the position.

26...Qxc3 Mikhalevski, V: '!'

[In the event of 26...Bxd5 27.Rxd5 Nd7 *(27...Qxc3?!* is dubious, because of *28.Qxc3 Rxc3 29.Rxe5±* and White will be a ♙ up, moreover the ♗ is stronger than the ♘. *)* 28.Rxa5 Qxc3 29.Qxc3 Rxc3 30.Rb5 Rc7 and Black can hold his position.]

27.Qxc3 Rxc3 28.Bxb7 Mikhalevski, V: 'White has temporarily obtained the advantage of the bishop pair, but Black's knight is coming to c5 to force White to part with his dark−squared bishop.' **28...Nd7!** It's important to bring the ♘ back into the game. **29.Ba6**

Tata Steel−A 85th (4) 17.01.2023
[Praggnanandhaa, Rameshbabu]

This was the 4th game of the event. In the previous round I drew with Vincent Keymer where I missed a huge chance with white, So for this game I just wanted to play solid game . I was excited to play Ding in classical game for the first time. Last year we played lot of online rapid matches so we knew each other style very well. Dies war die 4. Partie der Veranstaltung. In der vorherigen Runde spielte ich gegen Vincent Keymer remis, wo ich mit Weiß eine große Chance verpasste, also wollte ich in dieser Partie einfach solide spielen. Ich war aufgeregt, zum ersten Mal gegen Ding in einer klassischen Partie zu spielen. Letztes Jahr haben wir viele Online−Schnellschachpartien gespielt, also kannten wir den Stil des anderen sehr gut. **1.e4** Praggnanan dhaa,Rameshbabu Ding plays 1.d4 mainly but recently he started playing 1. e4 and earlier in the event he played 1. e4 against Parham, so I kind of expecting him to go e4 Ding spielt hauptsächlich 1.d4, aber vor kurzem hat er angefangen, 1.e4 zu spielen und früher in der Veranstaltung spielte er 1. e4 gegen Parham, also erwarte ich irgendwie, dass er e4 spielt. **1...e5 2.Nf3 Nc6 3.Bc4** This came as a slight surprise as he had played the Ruy Lopez 3.Bb5 earlier in the event Dies war eine kleine Überraschung, da er zuvor Spanisch 3.Lb5 gespielt hatte. **3...Bc5 4.0−0 Nf6 5.d3 d6 6.c3 a6 7.Re1 Ba7 8.a4 0−0 9.h3** This is the critical position in the a6−Ba7 plan. 10.h3

[10.Bg5± Ng6 11.Nbd2± White has a plethora of plans available to him here. One option would be to play g4−g5 on his next move, in order to later attack the h7−pawn with both rooks. If Black then plays e.g. 17...h6, the obvious thing is to first attack the black pawn on d5, e.g. by means of 18.♗f4 ♗xf4 19.♘xf4 or also via ♖f1−h1−h5. Black may be able to defend the pawn with ♘c6−e7, but then White can, e.g., simply double his rooks on the e−file. The move f7−f6, on the other hand, often palpably weakens the e6−square, for which after ♗f4, ♗xf4, ♘xf4 White has his knight available. The white knight on e6 can also be supported by f4−f5. Weiß verfügt hier über eine Vielzahl von Plänen. Eine Möglichkeit wäre, im nächsten Zug g4−g5 zu spielen, um danach den Bauern auf h7 mit beiden Türmen anzugreifen. Spielt

Schwarz nun z.B. 17...h6, ist es naheliegend, zunächst den schwarzen Bauern auf d5 anzugreifen, z.B. mittels 18.♗f4 ♗xf4 19.♘xf4 oder auch über ♖f1−h1−h5. Mit ♘c6−e7 ist der Bauer zwar verteidigbar, aber Weiß kann dann z.B. einfach die Türme auf der e−Linie verdoppeln. Der Zug f7−f6 hingegen schwächt oft empflindlich das Feld e6, das Weiß nach ♗f4, ♗xf4, ♘xf4 für den Springer zur Verfügung hat. Der weiße Springer auf e6 kann auch durch f4−f5 gestützt werden. h6 probably makes it slightly simpler for Black to defend the position. The defensive plan is ♘c6−d8−e6, in order to contest the white knight's occupation of the f4−square. macht es dem Nachziehenden vermutlich etwas einfacher, die Stellung zu verteidigen. Der Verteidigungsplan ist ♘c6−d8−e6, um dem weißen Springer das Feld f4 streitig zu machen. 12.Be3 c6 13.Ba2

18...Rd7± Black's position is critical on account of his inferior pawn structure. But with very precise play he can probably consolidate to some extent. It

is hard to say which move now offers White the best chances. Schwarz steht aufgrund der schlechteren Bauernstruktur kritisch. Bei sehr genauem Spiel kann er sich aber vermutlich noch einigermaßen konsolidieren. Es ist schwer zu sagen, welcher Zug nun die besten Chancen für Weiß bietet. **19.Qc2** With this move White prevents g6−g5 and apparently plans with ♗f4 to reserve a square on f4 for his knight. However, the chance is here for Black to free himself from a difficult situation with a pawn sacrifice: Mit diesem Zug unterbindet Weiß g6−g5 und plant offenbar, sich mit ♗f4 ein Feld für den Springer auf f4 zu reservieren. Allerdings bietet sich hier für Schwarz die Chance, sich mit einem Bauernopfer aus der schwierigen Lage zu befreien:

12.Bd3!? Kramnik's idea is to leave the bishop on the b1−h7 diagonal, although if the bishop gets attacked it may retreat to f1.

[12.Bf1 is a more popular retreat. It was played by Carlsen, So, Fedoseev and two other players.]

12...Re8?! An inaccuracy from the World Champion. This move turns out to be too slow and allows White to seize the initiative.

[For example, 12...Nf4?! is dubious due to 13.Bf1= and the central e5−pawn is hanging.]

[However, 12...Nh5! deserved serious attention. 13.Nf1 *(13.Bf1 Nhf4 14.Nc4 exd4 15.cxd4 d5 16.exd5 Nxd5* and Black equalises. *)* 13...Nhf4 14.Bc2 exd4 15.cxd4 d5 16.e5 f6 and Black equalises.]

[Now after 13...Nh5 14.Nf1! Nhf4 15.Ng3 exd4 16.cxd4 d5 17.e5⩲ the rook on e8 is misplaced for the idea of 17... f6.]

14.Nf1!? This move also leads to a pleasant edge for White.

[However, 14.a5! looks more accurate, first fixing the queenside and only after Qc7 15.Nf1 Bd7 16.Be3⩲]

14...exd4 15.cxd4 c5 Magnus is looking for some counterplay on the queenside.

[15...d5 16.e5 Ne4 17.N1d2!⩲ leads to an unpleasant position for Black.]

16.d5! Carlsen would be happy to take on d4 and obtain typical Spanish counterplay with the isolated pawn on d6. **16...b5** Black is taking some space on the queenside. **17.axb5 axb5 18.Ng3!**

[18.b3?! allows Black to create counterplay c4 19.Be3 cxb3 20.Bxb3 Qd7 21.Ng3 Qb7! with some favourable exchanges for Black.]

18...Bd7 19.Be3?! Vlad is stopping an advance of the c−pawn, but it's easy for

Black to protect the dark−squared bishop with the idea of 20...c4.

[Now it was the right moment for 19.b3 as after c4 White can play 20.Bb2± and the e4−pawn is protected in case of an exchange on b3.]

19...Bb6! The most accurate. **20.Rxa8 Qxa8 21.b4** White is trying to use a temporary pin, but once again Black has no problem to protect the bishop.

21...Qa7?! Another inaccuracy from the World Champion, who missed a simple tactical blow in his calculations. Fortunately, his position remains defendable.

[21...Qb8! was more accurate.]

22.Qa1! A clever way to set some problems. **22...Qc7! 23.Bxh6!** If I remember well Carlsen claimed that he missed this move. **23...cxb4**

24.Bxg7! The bishop is untouchable.

[After 24.Rc1 Qc3 Black is ok.]

24...Qxc2!

[24...Kxg7?? 25.Nh5+ is disastrous for Black.]

25.Qxf6 Qxf2+? Only this move is a mistake.

[It wasn't easy to find the correct defence. 25...Bxf2+! 26.Kh2 Qc3! 27.Re2 Bxg3+ 28.Kxg3 Bf5!! The most difficult move to find and very unusual. 29.Qxc3 bxc3 30.Bxc3 Rxe4 31.Rxe4 Bxe4 32.Nd4 Bd3!= with good chances to survive.]

26.Kh2± Now Black faces serious problems. **26...Bd8!?**

[26...Ne5!? Another clever defence against 27.Bh6. 27.Nxe5 Qxf6 28.Bxf6 dxe5 29.Nh5! Bc7 30.Rb1± isn't much fun for Black either.]

27.Qxd6! Nh4? An unfortunate attempt to complicate matters.

[27...Bxh3! is a better practical chance. 28.Kxh3 Kxg7 29.Re2! Qa7 *(29...Rh8+?* turns out to help White, as after *30.Kg4 Qa7 31.Nf5+* the king has to retreat to h7 and blocks the h−file. *Kh7 32.g3+−)*]

28.Nxh4 Bxh4 29.Nh5! Bxh3! Probably Magnus connected his hopes to this move, but after the cold−blooded **30.Rg1!+−** Black is lost.

[Instead, 30.Kxh3?? would lead to Black's win. Qxe1 31.Qh6 Qh1+ 32.Kg4 Qxg2+ 33.Kxh4 Rxe4+ 34.Nf4 Qxg7]

30...Bg5 Preventing 31.Qh6. **31.Bf6!** Kramnik is very precise. **31...Bg4 32.Bxg5 Bxh5 33.Qh6!** The only winning move again. **33...Rxe4**

[33...Bg6 loses to 34.d6! Qd4 35.d7! Qxd7 36.Bf6 Qd6+ 37.e5+−]

34.Qxh5 Qf5 35.Qh6! b3 36.Bf6 Qf4+ 37.Qxf4 Rxf4 38.d6! Rxf6 39.Rd1! Rh6+ 40.Kg1 A very well played game by Kramnik! The opening idea of 12.Bd3 forces Black to play 12...Nh5, which Carlsen failed to realise. I expect more practical tests of this line.

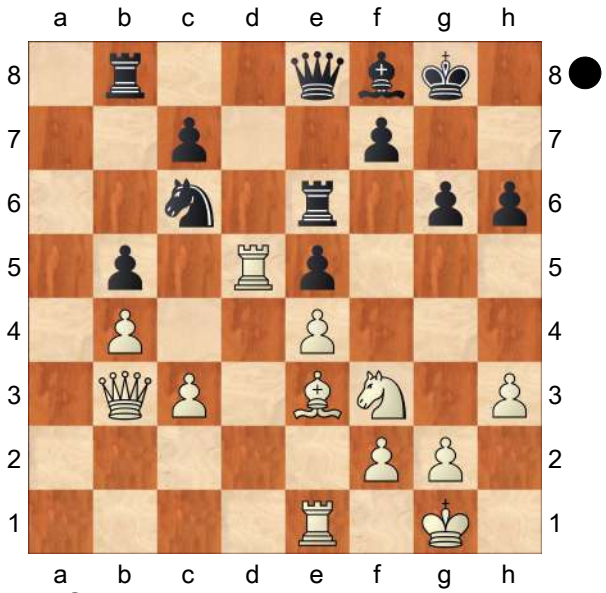
In this type of symmetrical structures,



Black often invests time on improving the position of his c6−knight. Meanwhile, White further activates his pieces, thus building a dangerous initiative. Such an initiative can be annoying even in the endgame. This scenario is well illustrated by the top−level game Kramnik − Anand. In this position, Anand played **26...Nd8** A typical maneuver. Anand is trying to improve the position of his problematic knight. His idea is to proceed with ...c7−c6 followed by ...Nb7−d6−c4. This idea, however, takes a lot of time. Meanwhile, Kramnik seizes the initiative. **27.Ra1** Planning to invade via the 7th rank. **27...Nb7 28.Ra7 c6 29.Rd1 Nd6 30.Nd2 Ra8 31.Rda1 Rxa7 32.Rxa7 Re7 33.Ra6** Of course, White should keep at least a pair of rooks. It turns out that Black cannot easily neutralize White's initiative. The control of the a−file gives White a huge advantage. **33...Rc7 34.Qa2 Kg7 35.Bb6 Rb7 36.Bc5 Be7 37.Ra8 Rb8 38.Ra7** As we have already seen in the previous example, repeating the position and making waiting moves is a highly practical approach. The idea is to reach move 40 without spoiling the advantage. **38...Rd8 39.Bb6 Rc8 40.Bc7 Qd7 41.Bb6 Qe8 42.g3 Bg5 43.Bc7 Bxd2?!**

[Probably 43...Be7 was more accurate, however 44.c4 bxc4 45.Nxc4± is slightly better for White.]

44.Bxd6 Bxc3 45.Re7! Once again, we see an application of the principle of two weaknesses. In order to cover the vulnerable queenside, Black has put his pieces on passive positions. Now, Kramnik switches to the kingside. **45...Qg8** It is already difficult to give Black a good piece of advice.

[After 45...Qf8 46.Qe6! Ra8 47.Qd7 Bd4 48.h4 White is dominating. The black rook can never leave the 8th rank because of Re8.]

46.Qe6! Qf8 47.Kg2! Since Black is completely tied, Kramnik does not need to rush.

[Another possibility was 47.Rc7 Rxc7 48.Bxf8+ Kxf8 49.Qd6+ Re7 50.Kg2+− which is winning. Kramnik was probably afraid of allowing Black to build some kind of a fortress.]

47...Rd8 48.Bc5 Bd4 49.Qxc6 Kg8? A mistake in a difficult position.

[More tenacious would have been 49...Bxc5 50.Qxc5 Kg8 51.Qxe5+− Even in this case, however, White enjoys a healthy extra pawn.]

[11...exd4 12.Nb3 Ba7 13.Nbxd4 Nxd4 14.Nxd4 Giri−Tomashevsky, September 2016 where White had the better of it. White's pressure stems from the space advantage on the queenside and the weakness on e6. 12.dxe5 Nxe5 13.Nxe5 fxe5 14.Nf3
[14.Ne4 seems natural, but it releases the pressure on e5. ♘f3 is a bit more ambitious but it clearly has a couple of problems, mainly the weakness on f2.]
14...c6
[14...Bxf2+ was already possible, but not entirely clear 15.Kxf2 Qh4+ 16.Kg1 Qxc4 17.Rxe5 and after a forced sequence White's position is still slightly more comfortable. His pieces are a bit more active, even though again, Black should be ok.]
15.Bg5 Choices aren't easy in chess, and Kramnik presents his opponent with three distinct ones:
[15.Bxd5!? cxd5 16.Rxe5 Bg4 looks a bit dodgy. White will retain extra material (at least one pawn, more if he wants) but his structure on the kingside will be shattered and his

king permanently exposed. These kinds of positions sometimes boil down to style, and Kramnik here prefers the initiative.]

15...Qb6?! Not the most precise. Kramnik ditches the f2−pawn for piece activity and central control.

[15...Bxf2+ 16.Kxf2 *(16.Kh1 Qd6 17.Re2 Be6! 18.Rxf2 e4* is also wildly unclear *)* 16...Qxg5 17.Kg1 Qd8 18.Nxe5± seems to be a bit better for White.]

A) 16...Be6= (Justin Tan) There are some subtle but key differences between this position and the one after 14...Bf6. The main one is that White has not played h5 yet, so Black is in time to play . ..Nf6, .. .h5 himself. It was better to play directly against Black's queenside with the sequence 17.Bxh6 Justin Tan *(17.Ne5!?⇄* which prevents the cramping move h4−h5 from White. *)* 17...gxh6 18.Bxd5! Bxd5 19.Ne5 Qd6 20.Qg4+ Kh7 21.Qf5+↑ Black still has work to do! Bc2, Qd3 is in the air, as well as Ne5. Kg7 22.Ra3 Rg8 23.Rg3+ Kf8 *(23...Kh8 24.Nxf7+ Bxf7 25.Qe5+ Kh7 26.Qxd6* Somehow I don't feel that Black has fully equalised just yet, as White will always have the idea of g4 in mind and there are a few useful moves still, such as Rh1, Ne5, Ne2 (though for the time being there is a small inconvenience about the bishop on d3). Quite surprisingly, the engine wants to play for ...g6 in these positions. *Bxh5* (Justin Tan) is the engine top choice. *27.Qe7+ Kh8* Black organises their play on the a−file immediately. *28.Qe5+* and now, as I provide later in the game, I'm impressed by the idea *)* 24.Nd7+∞ Ke7? 25.Re3+! Kd8 26.Nf6± Rxg2+ would have been my choice as White generally doesn't allow Black o play ...Bc4 and ...b5 is these positions. However, it seems Ding's choice as fine as eventually Black took on d3 a few moves later. 27.Kf1 Justin Tan Be6 forces Black to take on d3. Black does not yet need to commit to the move . ..h6, but it seems to be useful in most lines. 28.Qxa5+ Justin Tan b6 29.Qe5 Qxe5 30.dxe5 Rg5;

That said, there is some logic to it: the bishop is not doing much on e7, and may as well eye the b8−a7 diagonal instead of the queen. 21.Qc1± Justin Tan; **B2)** 17...Nd5 18.Ra3 (preparing the next move) Bf5 19.Rh5 Bg6 20.Ne5!]

15...Bxd2 16.Qxd2 Be6 17.a5 a6 18.Ne5 Re8 19.Nd3 Qf6 20.Re5 Ne7 Surely Black saw ideas like Bxc4 dxc4 f5/d5 cooming and thought he needs to exchange bishops anyway.

[It was apparently best to exchange a set of rooks with 20...Rad8! (Justin Tan) then the engine wants its 21.Rae1 and the line continues]

21.Bxe6 A great setup for White. The engine only gives him a symbolic advantage, but Black lacks space and doesn't have a way to use the a−file efficiently. **21...fxe6?!** A useless move − on the other hand apart from sitting and waiting, what can Black do? **22.Qe3** Justin Tan: '!'

[22.Nc5 Nc6!!= Still 23.Re4?? [27.Re5□ Now there are various ways to make a draw, but the most amazing is Nf7]

27...Qg5 28.Rg4 Qb5 A brilliant plan. The c3−knight will travel trough d2 and the white rooks will prevent ...Ra2. For

now it is crucial for White to keep all rooks on the board: as he is in full control of the positiion and Black has too many rooks he doesn't know what to do with! If rooks disappear, then the black queen could get in! **29.Qc2 Re7 30.b3 Qf5 31.Rf4 Qg6 32.Rg4 Qf5 33.Rf4 Qg6 34.Qe2 Qg5** Justin Tan: 'Black has defended well and has no problems.' **35.h4!?** An interesting move order. It's always been the question when is White going to finally push his kingside pawns! **35...Qb5 36.Qc2 Nf5** It is true: because of the white pawn on f3, White is lacking an efficient plan, as in case of g4−g5, the h5−pawn would be hanging. **37.Qc3 Rd5?! 38.h5 Red7 39.g4!** The right timing for White to try to obtain a favourable rooks exchange, so that c6 remains a huge target at the end of the day. **39...Ne7 40.Nc5 e5?** Justin Tan: '?!' **41.Nxd7 exf4 42.Ne5** Justin Tan: '⩲' **42...Qe2** Justin Tan: '??' The last move ...Qd8! could be pretty annoying as Rxh5? 47.gxh5 followed by ...Ra1 or ...Ra3 just loses for White. An idea that Black could have tried to apply through different move orders, but 35... Be5 seems to me like the cleanest path. Qxh5 (Justin Tan) Black is the one with an initiative now. London Classic 8th (6) 15.12.2016

[Roiz,Michael]

1.e4 Roiz,M **1...e5 2.Nf3 Nc6 3.Bc4** This time Maxime deviates from his main weapon the Ruy Lopez and goes for another fashionable opening. **3...Bc5 4.0−0 Nf6 5.d3 0−0 6.a4**

[I guess, the more popular 6.c3 would be met by d5 which is the most aggressive and suits Levon's style.]

6...a5 7.c3 d5 Still, the same approach!

[The more modest 7...d6 8.Bg5 h6 9.Bh4 g5 10.Bg3 also leads to a very complex struggle. In the following recent game White got a better position after Bg4 11.h3 Bh5 12.Nbd2 Bg6 13.Bb3 Nh5 14.Bh2 Qf6 15.Nc4 Nf4 16.Ne3± Cornette,M (2597)−Hector,J (2488) London ENG 2016]

8.exd5 Nxd5 The e5−pawn is a cause of problems, so Black should be careful now. **9.Re1 Bg4 10.Nbd2**

[10.h3 hardly has any independent significance, since Bh5 11.Nbd2 Nb6 12.Bb5 Bd6 might transpose to the text.]

10...Nb6 11.Bb5 Bd6 12.h3

[In his previous encounter in this line Levon didn't manage to fully solve his problems after 12.Ne4 Na7 13.h3 Bh5 Roiz,M: 'would transpose to a position from the above−mentioned note.' 14.d4 Nxb5 15.axb5 exd4 16.Nxd6 Bxf3 17.Qxf3 Qxd6 18.Rd1 Rfe8 19.Bf4 Qc5 20.Qxb7 dxc3 21.bxc3± Giri,A (2782)−Aronian,L (2792) Leuven BEL 2016]

12...Bh5 Roiz,M: 'might transpose to the text.' **13.Ne4 f5!N** This ambitious advance is an important novelty.

[13...Ne7 is too passive: 14.d4 exd4 15.g4 Bg6 16.Nxd6 Qxd6 17.Qxd4± Anand,V (2770)−So,W (2770) Leuven BEL 2016]

[13...Na7 would transpose to a position from the above−mentioned note.]

14.Ng3

[14.Bg5 was interesting, but hardly after Qe8 15.Qb3+ Kh8 16.Nxd6 cxd6 17.Nd2 Bf7 18.Nc4 Nxc4 19.dxc4 Qe6⇄ White can be better wish such a weird placement of pieces.]

14...Bxf3 15.Qxf3 Exchanging the powerful bishop and avoiding the pin of the f3−knight is White's indisputable achievement, but... **15...Ne7!**
It turns out, that the b5−bishop is misplaced. **16.Bg5?**

[Grabbing the pawn − 16.Qxb7! looks scary for a human eye, but it is what Maxime should have played. The resulting complex lines are spectacular: Rb8 17.Qf3 c6! 18.Bxc6 e4 19.dxe4 Nxc6 20.exf5 *(20.Nxf5 Qf6⇄)* 20...Ne5 21.Qe2 Qc7⇄]

16...c6 17.Bc4+ Nxc4 18.dxc4 e4 Now Black has a clear advantage due to a better pawn structure. **19.Nxe4**
A desperate attempt to complicate matters.

[After 19.Qh5 Qd7 20.Rad1 Qe6 21.Be3 Rae8∓ Black would be firmly in control.]

19...fxe4 20.Qxe4 Rf7? Luckily for Maxime, his opponent doesn't manage to handle this complex position properly.

[Possibly, Levon had rejected 20...Qd7! in view of 21.c5 *(21.Bxe7 Rfe8−+)* 21...Bxc5 22.Bxe7 Bxf2+ 23.Kh2 Bxe1 24.Bxf8 , but in this line Black still can gain the pawn: Bxc3! 25.Qc4+ Qf7 26.Qxc3 Qc7+ 27.Kh1 Rxf8∓]

21.Rad1 Qc7 22.Rxd6 Qxd6 23.Bxe7 Qd2 It looks like GM Aronian was still in an aggressive mood.

[23...Qf4 was quieter, liquidating into an equal endgame: 24.Bc5 Qxe4 25.Rxe4 Rd7 26.g4=]

24.Bc5 h6

[After 24...Qxb2 White can force a draw by means of: 25.Qe8+ Rf8 26.Qe6+ Rf7 27.Qe8+=]

25.Qe2 Rd8 26.Bd4 Qg5 27.Qg4

[27.Qe6!?]

27...Re7 28.Rxe7 Qxe7 The resulting position is equal, but it contains definite danger for both players. **29.Qf5 Re8** Levon is ready to give up another pawn in order to activate the rook.

[29...Qc7=]

30.Qxa5 Qf7 31.Kh2 Qf4+ 32.g3 Qf7 33.Kg2 Re1

[33...Qxc4 was safer: 34.Be3 Qe4+ 35.Kh2=]

34.g4 Rd1? Alas, this inaccurate move leads to disaster.

[34...Kh7 35.b4 Ra1 36.Qe5 Rxa4=]

35.Qe5! White's pieces are dominating over the board now, so the passers should decide the game. **35...Qg6 36.b4 b6** Desperation.

[The most stubborn was 36...h5 37.g5 h4 38.a5 Ra1 39.Qb8+ Kh7 40.Qf4 , but even then White should be able to convert the material advantage into a full point.]

37.Bxb6 c5 38.Bxc5 Qc6+ 39.f3 Rd3 40.Qb8+ Kh7 41.Qf4

[7...a6 8.a4 Ba7 White is pushing here. 9.0−0! Qe7 10.Nbd2 g5 11.Bg3 Nh7 12.b4 Intending Kf1−Ke1 and Rd2, would have Black having to defend by the skin of his teeth here. Nf8 13.d4 Ng6 14.b5 Na5 the rook endgame is equal actually, with the Black king coming to the center. 15.h3 h5]

Activating both rooks was a good attempt to play for a win in a risk free fashion. **31.Rf3?! Ne6 32.Raf1 Rf8** Now White has a much worse version, with the knight pinned on d6 and he should already be accurate to not get worse. **33.Qxb7? Ke3 is met by Nb4!. **82...Kd7 83.Kb1 Nb3 84.Ka2 Nd2** The king on g4 is in the way of White's counterplay. **85.Rh4 Ke6 86.Rg4 Kf5 87.Rh4 Kg5 88.Rh8 Nxc4** White has some saving chances here, thanks to counterplay. Next he will go g4 and then try to push the kingside pawns, either by deflect the g−pawn with f5, or throwing in some side checks first with the rook, which is an important resource as well.

6...Nxd5 7.Bxd5 d6N This logical move is a novelty.

[Previously: 7...0−0 8.Bg5 Be7 9.h4 d6 10.Qd2 Bg4 11.c3 Qd7 12.0−0−0 has been tested in Benda,H (2274)−Kilgus,G (2354) Austria 2007]

8.Be3 Bxe3 9.fxe3 0−0

Now an approximately equal game emerges. White's plan is clear− to castle then bring the queen on g3, the knight on h4 and eventually f5, double the rooks on the f−file and eventually mate. Black on his turn has many ways to try and prevent this. **10.0−0 Nb8!?**

A nice manoeuvre.

[Safer looks 10...Ne7 11.Bb3 Ng6 12.Qe1 Be6 although then the knight on g6 does not do much.]

11.b4 An aggressive try, which however makes it easier for Black to find counterplay on the queenside.

[After 11.a3 Nd7 12.Qe1 Nf6 13.Ba2 Be6 the position will be equal.]

Indjic,Aleksandar: 'All at stake! The Race to the Candidates By GM Aleksandar Indjic The fourth and last tournament of the FIDE Grand Prix series was held in Palma de Mallorca, Spain. 18 strong Grandmasters competed and succeeded in creating a great number of impressive games! Dmitry Jakovenko and Levon Aronian shared the first place in the Tournament, as both of them scored 5.5 out of 9. Ultimately, it was Jakovenko who clinched the victory because of the better score according to the additional tie−break criteria. Both of them showed great stability throughout the tournament, and were able to finish the competition undefeated! Despite their success, all eyes were on Radjabov's and Vachier−Lagrave's struggle for the place among the "chosen 8" in 2018 Candidates.

Everything was at stake in the last round, but neither of them, unfortunately, was able to qualify! It was really the most exciting finish of the tournament, especially because Mamedyarov and Grischuk who didn`t compete in Palma leg of the Grand Prix series, were the ones who profited the most! The Candidates Tournament will take place in Berlin, Germany on March 10−28, 2018, and the participants are: Karjakin, Aronian, Ding Liren, Caruana, So, Mamedyarov, Grischuk and Kramnik (the wildcard choice). The whole chess world is looking forward to it with great enthusiasm! Being unable to convert a few chances in previous rounds, this was a "do or die" game for Vachier_Lagrave. Only victory was a satisfying result, and after a couple of draws in other games of the last round, he was in control of his own destiny. Let's see what happened..."All at stake! TCh−FRA Top 12 2017 (7.3) 24.05.2017
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a5 A pretty rare option, which was introduced at the GM level by Boris Spassky in 1989. The ideas behind the move are to create an escape square for the dark−squared bishop, stop White's b4 and prevent White from grabbing space on the queenside. The line has mostly been discussed in computer chess.

[5...0−0 is part of the current update. Salem,A (2633)−Inarkiev,E (2727)/ Moscow RUS 2017[Mikhalevski,V]]

6.0−0 The most logical reply. **6...d6 7.Bg5** The lines with this move gain popularity. So, in this update you'll see at least two examples.

[The aforementioned game of the 10th world champion saw 7.Re1 0−0 8.Nbd2 Kh8 *(8...Ng4!?* deserved attention. *9.Re2 h6 10.h3 Nf6)* 9.Nf1 Be6 10.Bb5 Bd7 11.Ng3 with slightly better chances for White in Ehlvest,J (2620)−Spassky,B (2580)/ Clermont Ferrand 1989.]

7...h6 8.Bh4 g5 9.Bg3 0−0 10.a4

[In all the preceding computer games White played 10.Nbd2 considering 11. a4 on the very next move. Ba7 11.Re1 *(*White can also start with *11.a4!?)*]

10...Bg4 This pin was considered good for Black in those positions with ...h6 and ...g5, as White doesn't have an idea of h3 and g4.

[Black had a couple of reasonable alternatives at his disposal. For example, 10...g4!?

A) 11.Bh4 gxf3 12.Qxf3 Kg7 13.Nd2 *(*White can also force a draw by means of *13.Qg3+ Kh7 14.Qf3)* 13...Be6= with a position of dynamic equality.;

B) 11.Nh4 Nh5 12.Kh1 Qg5 13.Na3 Ne7 with a complex position.]

[or 10...Be6 11.Nbd2 Ba7]

11.h3 Bh5

[11...Be6 was still possible.]

12.Na3 White transfers the knight to e3.

[12.Nbd2 looks like a better option. Nd7 13.Re1 Qf6 14.Qc2 and the weakness of the f5−square may eventually tell.]

[Probably it's even more accurate to start with 12.Re1! Re8 and then 13.Nbd2 since d5? isn't working any more in view of 14.exd5 Nxd5 15.d4!+− and White wins a pawn for nothing.]

12...Qd7 Gledura misses his chance to play 12...d5.

[12...d5! deserved serious attention. 13.exd5 Nxd5 14.Re1 Nf4 with an interesting fight.]

13.Nc2 Bb6 Benjamin takes the bishop away from a possible attack by the d−pawn.

[Now it's already too late for 13...d5? 14.exd5 Nxd5 15.Nxe5+− and Black's position collapses.]

[13...Bg6 14.Ne3 Kg7 15.Qb3 Rae8 would be more accurate, although White retains the upper hand with 16.Rae1]

14.Ne3 MVL has transferred the knight to a nice square on e3, which explains Black's reply. **14...Ne7!** This way Black is covering both the f5 and d5−square.

15.Bb3! Time for the bishop transfer. Maxim is planning to bring it to c2 in order to support the e4−pawn and thus to prepare an advance of the d−pawn.

15...Kh8 16.Bc2 Rg8 17.d4 exd4 18.cxd4 Rae8 19.Re1!± Ba7? It's difficult to explain this move. Maybe Black couldn't find a move which doesn't worsen his position and decided to wait with the bishop.

[19...Nc6! was necessary, and could lead to very interesting complications. For example, 20.e5 *(20.Nf5!?±* is also better for White. *)* 20...dxe5 21.d5 e4 22.dxc6 Qxc6 23.Rc1! exf3 *(* or *23...Rd8 24.Bb3!±)* 24.Bh7 Bc5 25.Bxg8 fxg2 26.Qc2 Bb4! 27.Qxc6 bxc6 28.Bxf7 Bxf7 29.Red1 Bh5 30.Rd3 Bg6 31.Rd4 c5 32.Rdd1 Bh5 33.Bxc7 Bxd1 34.Rxd1± with a slight edge to White thanks to the misplaced bishop on b4.]

20.Ra3!? A useful rook lift.

[However, 20.Rc1!± looks more accurate.]

20...Bg6?! Black misses a nice tactical idea.

[20...Nc6! is a better try, but Black is under pressure anyway. 21.Nf5 Kh7 22.e5 Bg6 23.Ne3±]

21.Ne5!± Qc8? After this inaccurate retreat Black is helpless.

[The knight is untouchable. 21...dxe5? 22.Bxe5 with the idea to meet Kg7 with 23.Ng4+−]

[So, 21...Qd8!± was the only chance to stay in the game.]

22.Nxg6+ fxg6

[22...Nxg6 doesn't help either. 23.Nf5 Kh7 24.Rc3! Qd7 25.e5 dxe5 26.dxe5 Qxd1 27.Rxd1+− and White wins.]

23.e5 Nfd5

[Unfortunately for Black, 23...dxe5 is impossible because of 24.Bxe5 Rgf8 25.Ng4 Ned5 26.Nxf6 Nxf6 27.Rf3 Re6 28.Qd3!+−]

24.exd6!?

[Another way to do it is 24.Nxd5! Nxd5 25.Bb3! c6 *(25...Qe6* runs into *26.Ra1!+−)* 26.Bxd5 cxd5 27.exd6 Rxe1+ 28.Qxe1 Bxd4 29.Be5+ Bxe5 30.Qxe5+ Kh7 31.Rc3+−]

24...cxd6 25.Bxd6+− This is why the queen had to be on d8. Now Black is completely helpless. **25...Qd7 26.Be5+ Kh7 27.Be4 Rd8 28.Ng4! Rgf8**

29.Rf3! h5 30.Ne3 Nxe3 Missing a checkmate in a completely hopeless position. **31.Rf7+!** Black resigned, not waiting for 32. Qxh5+ or 32.Rg7+. A relatively easy win for the French number one player, while the opening with 5...a5 is an interesting line, although probably it's not the best way to deviate from known theory.

Moscow Candidates (4.2) 15.03.2016
[Rensch,Danny]

[Annotations by IM Danny Rensch] So far for the tournament, this game wins the award for the "1.e4 opening most likely to be confused by viewers joining in the middlegame for some kind of obscure 1.d4 closed Benoni or Old Indian." And yes, that's an award I just made up! #yourewelcome **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3** Fabiano clearly missed the memo that he's no longer representing Italy as his chess federation, and therefore, not required to feature this opening once per tournament any longer... **5...d6 6.c3 h6 7.a4 a5 8.Re1 0−0 9.Na3 Re8 10.Nc2 Ba7 11.Be3 Be6 12.Bb5 Bd7 13.Bxa7 Nxa7 14.Bc4** All theory leading to the tiniest of edges for White until... **14...Nc8** ...which, has he admitted afterward, surprised Caruana a bit.

[14...Be6 15.Bxe6 Rxe6 16.Ne3 Nc8 17.Nf5 Ne7 18.d4 exd4 19.N3xd4 Re5 Carlsen,M (2844) − Adams,M (2744) Wijk aan Zee 2016]

15.Ne3 Nb6 16.Bb3 c6 17.h3 Be6 18.Bc2

[The computer seems to prefer playing like Carlsen did against Adam (mentioned above) with 18.Bxe6 Rxe6 19.Qd2 followed by ideas of Nf5 and a manufactured attack on the kingside. But maybe Caruana figured if Magnus couldn't beat the Englishman with a similar plan at Wijk, he didn't feel he had enough to play for against Topalov now.]

18...Qc7 19.d4 Nc4 20.Nxc4 Bxc4 21.Qd2 Rad8 22.Rad1 Be6

[Perhaps it's my own need to always look to create an attack where there likely isn't one, but I wonder if, in several positions around this time, Black could not have tried 22...Nh5 with the clear goal of creating weaknesses and threats on the kingside. Lines like 23.Qe3 *(*while *23.g3* makes me fear for White's life if Black can somehow make a d5−pawn push work and open up lines toward the kingside. *)* 23...Nf4 24.Kh2 Be6 show that Black can successfully stop the pawn from going to g3 to kick the knight (at least for now).]

23.Qe3 b6 24.Nd2 With clear intentions of pushing the f−pawn and relocating the knight to the kingside via f1 and g3 (not sure what would come first). But Topalov felt he over−extended here with **24...c5?!** saying he didn't like this move.

[Sitting on the position to see if White really wants to push f4 or show another plan is 24...Bc8 which I think maintains equality pretty easily.]

[Also interesting is 24...b5 but I feel that unlike the solid, waiting move 24.

Bc8, White might get a slight pull with 25.axb5 cxb5 26.d5 Bd7 27.Bd3 Where I think Black's queenside pawns might become targets in the long run.]

25.Bd3?! Returning the favor of a small mistake? I think Caruana should have just played 25.d5 immediately, as analysis below shows.

[25.d5 Bd7 26.Qe2! A possible improvement (I think?) found by me and Komodo. Why? White can execute a similar plan as in the game to open the queenside, but better placement of the pieces for White as the f6−knight is denied it's route to h5−f4! g6 *(26...Rf8 27.Ra1 g6!* trying to get that f6−knight where he belongs by protecting h5. *28.Nc4 Nh5 29.Qd2 Kh7 30.Ne3* and f5 is more or less prevented. White can focus on pushing b4 again. *)* 27.Nc4 Nh5 28.h4 Nf4 29.Qe3 Kg7 30.g3 Nh5 31.Qe2 And the knight has been denied access to f4 and f5 will be harder to play. White is a little better.]

25...Re7 26.d5 The American rights his wrong in the Italian. Poetic, I think ;) − However, with the tempo Black now gains on the a4−pawn, Caruana never has time to deny the Nh5−f4 maneuver I so deperately wanted in the variations following 25.d5. **26...Bd7 27.Ra1 Nh5 28.b4** Fabiano's gone Honey Badger: He doesn't care about Nf4! **28...Nf4 29.bxa5 bxa5 30.Reb1 Rf8** I admit with time pressure approaching, I shifted towards the edge of my seat and hoped against hope for some fireworks and blunders... **31.Bb5?!** And I got it, but in the wrong direction! Not that I was rooting for my countryman or anything :) but given that White had more potential for an edge, I hoped he might hold onto it. I don't think this is the right diagonal for the bishop. White wants to be ready to challenge the f5−pawn push and grab hold of the light−squares if Black dares to push.

[For example 31.Bc2 can meet 31...f5 with f5 32.exf5 Bxf5 *(32...Nxd5 33.Bb3* is good.*; 32...c4* opens up *33.Qb6* and "Fabi thinks he likes it". *)* 33.Bxf5 Rxf5 34.c4 When the b−file and e4−square seem to secure White a slight edge. Even Rg5 can be aggressively met with 35.g4 h5 36.Ne4 Rg6 37.g5 and things just got real! (Danny−Speak for White has a clear edge.)]

[Also giving up the bishop but trying to be more aggressive on the b−file with 31.Nc4 is also interesting.]

31...Bc8 32.Bf1 f5 33.c4 The black knight looks strong on f4 "but in fact it's interrupting Black's play." (Topalov). True, but Black is not worse at all here as he could have been if White had kept the bishop on the correct c2−h7 diagonal. **33...Ref7 34.Ra3** In the next few moves White gets the upper hand, and even though the players couldn't really point out a clear mistake or find a good alternative for Black, I think his issues start with **34...fxe4?!** as there was no real reason to break the tension here and bring White's knight into e4.

[A simple move like 34...Bd7 eyes the a−pawn and asks White what his plan will be. For example, at the very least Black can release some of White's b−file pressure should Caruana try for the same ideas as in the game with 35.exf5 as after Black

recaptures with a tempo on the b1−rook, he can challenge the b−file for trades. Bxf5 36.Ne4 Rb8 and Black might be closer to equality than in the game.]

35.Nxe4 Bf5 36.Rab3 Bg6 37.Rb6 Qe7? Wait! Blunders? Fireworks? I'm getting my wish! Yay!!! **38.Nxd6 Nxh3+**

[Topalov had 38...Nxd5 39.cxd5 Rf3 in mind but "completely forgot the pawn was on g2."]

39.Qxh3 Rf6 40.Nc8! Refuting everything. White is on the way to winning until **40...Qd8 41.R1b5?** "I kind of hallucinated that I was two pieces up here and [Black] would get one back," was how Caruana explained his mistake. Very, very strange. But at least we got the "time pressure carwreck" we hoped for as spectators. I admit the back and forth made watching the games live more fun!

[41.Rxf6 Qxf6 *(41...Rxf6 42.Rb7)* 42.Rb2 was rather simple, as pointed out by Topalov.]

41...Rxf2 42.Rxg6

[Though 42.Qe6+ was defended by Caruana as not enough anyway (sighting the view of the perpetual that occurs after 45.Nxg6) I'm not sure this wasn't still the best way, and would wonder how "affected" the American was by his previous terrible blunder. Kh8 43.Ne7 Rxf1+ 44.Kh2 R1f6 (Caruana). And indeed, the Lizard confirms equality with

Hess, R: '[Annotations by GM Robert Hess] In this encounter between Anish Giri and Hikaru Nakamura, the Dutch grandmaster eschews his normal 1. d4 in favor of the Giuco Piano. Giri likely was hoping to catch Nakamura by surprise, hence his decision to enter an opening that is infrequently tested at the elite level.' **1.e4** Mekhitarian,K Hess, R Hess, R Mekhitarian,K **1...e5 2.Nf3 Nc6 3.Bc4** The Giuoco Piano, (or Italian Opening) has become quite fashionable lately, running away from forced lines of the Ruy Lopez (or Spanish) with 3.♗b5. And White has been doing very well, as did Giri in this game. **3...Bc5 4.0−0**

[4.c3 (Hess, R) is considered the main line. For just one example of a line that has been viewed as relatively level, if not providing white the slightest of edges: Nf6 5.d4 *(5.d3* is often the move of choice these days, resulting in a position where both sides maneuver a lot. [4.b4 (Hess, R) can be played if the player with the white pieces is feeling particularly frisky. In fact, Nakamura has used the Evans Gambit to beat your humble annotator.]

4...Nf6 5.d3 d6 6.c3 a6 7.a4

Hess, R: 'After seeing Giri make this pawn push, I wondered why more players don\'t opt for this move. I have had the black side of this position many times, and my opponents tend to continue with ideas like Bc4−b3−c2 and Re1, Nbd2−f1−g3. I\'m a fan of what the Dutchman did.' Normally White plays 7. ♗b3 to save the bishop (from a possible ...♘a5). But this is a standard alternative as well. **7...0−0 8.Re1**

[8.Bg5!? isn't supposed to be a great move here, because Black plays h6−g5 quickly, but I think the sacrifice on g5 is underrated and could be interesting for White: h6 9.Bh4 g5 10.Nxg5 *(10.Bg3∞* this is what we see normally after h6−g5, with a complex game *)* 10...hxg5 11.Bxg5 Kg7 12.Qf3 and I feel like there is a lot to be explored here. Also note that it is very difficult to find active plans for Black without making a legitimate compromise.' **16...d5 17.exd5!** Suddenly Black starts getting into trouble, there is no good way to take the pawn back.

[17.e5 Hess, R: 'would have been the wrong idea, since the closed center makes the black pawns better and the white pawn on d4 more of a backward target. Nakamura would be the one with the opportunity to break the chain with a future ...c5, and the open f−file certainly works in Black\'s favor. 21...Qxd6 22.Re3 Rae8 23.Ne5 Qc7

[23...Qb4 (Hess, R) was a more active try. 26.b5 axb5 27.axb5 cxb5 28.Qxb5±

Now White has a big advantage, with nicely placed pieces, and Black has a horrible pawn structure and a weakened king. But probably both players were approaching time trouble, so it wasn't easy to be precise. Besides, this is the kind of position that I personally think is one of the most difficult in chess. Maybe not only for me, but for everybody. The reason is that there are no pawn breaks, and the board is wide open with major pieces on it, meaning there are a lot (and by that I mean a lot!) of options in every single move, and we, humans, can not find patterns in such positions. Even with a computer, it is very hard to analyse and come to a sensible explanation about what is going on. In any case, it goes to show how strong these players are, because the game maintains a good level, despite the difficulty of the position, and the probable time trouble they were under.

28...Nd6 . . Hess, R: 'All pawns are covered, but Nakamura will have a tough task defending. The queenside pawns are both isolated, and the light squares on the kingside feel quite exposed.'

29.Qb3 b5 30.Rce1 Qa5 31.Qb1 Qb6

[31...Qa4 (Hess, R) feels more precise, if only because it is far more active. Nakamura was playing outstanding defense throughout this game, but sometimes the best defense is a good offense. 32.Qc1 Nc4 33.R3e2 Qb3 Black is coming back here. White is better, as he is in every variation, but this one feels hard to win.]

32.Qg6?! This gives Black a golden opportunity to fight for equality.

[45.Neg6! (Hess, R) It seems very strange to move this knight, but trading rooks turns out to be very good for White at this particular moment. 45...Nxe5 46.dxe5 Rf7 47.Nh5
[47.g3 (Hess, R) was my preference. It makes sense to keep this knight solidly on f4, from where it simultaneously attacks d5 and supports the e5−e6 push.]
47...Qe7 48.Qd4
[48.Qg4 (Hess, R) was also a strong move. Qe6 *(48...Ref8? 49.Nf6+ Kh8 50.Nxd5 Qa7 51.e6 Rxf2 52.e7* is too easy for White. *)* 49.Qg3 Rd8 50.Nf4 Qe8 51.e6 allows White to crash through. The e−pawn is overwhelming.]

50...Qxg7 51.Rg3 Rg5! And there is nothing decisive. **52.Rxg5 hxg5 53.Qxd5** Hess, R: 'Nakamura can even play on here with 53...Ne7, but draw was agreed here, with Giri undoubtedly disappointed by yet another blown opportunity. The jokes were pouring in about how he can draw any position, and this result especially hurts. A win would have put Giri just half a point back of the

10.h3 White prevents 10...Ng4, which is possible after 10.Bb5.
[10.Bb5 is a popular alternative.
A) After 10...Ng4
A1) 11.d4 exd4 12.cxd4 Nxd4 13.Nxd4 Nxf2!? *(13...c6!?* is interesting. *)* 14.Kxf2 Qf6+ 15.Kg1 Bxd4+ 16.Be3 Bxb2 17.Rb1 Be6 with compensation for the sacrificed piece in Anand, V (2773)−Hovhannisyan,R

(2637) St Petersburg 2018;
A2) 11.Re2 makes sense, although it hasn't been played yet.;
B) 10...a3 11.b4 Bb6 12.h3 Ne7 13.Ba4 Ng6 and Black was fine in Duda,J (2730) −Giri,A (2780) chess.com INT 2019]

10...Ra5 Black prepares 11...b5. **11.d4** Earlier White tested a few alternatives. The text is a novelty. White's idea is to prevent ...Be6, which is possible, for example, after 11.a3 or 11.Ng3.

[11.Bd2]

[11.a3]

[11.Ng3 are all reasonable options.]

11...Bb6 12.b4!? This move is necessary in order to remove the bishop from c4. Otherwise, Black could have played 12...exd4 13.cxd4 Nxe4!

[The aforementioned idea works even after 12.Ng3 exd4 13.cxd4 Nxe4! 14.Nxe4 d5 15.Bd2 Ra8 16.Bxd5 Qxd5 17.Bxh6 Nxd4 with roughly equal chances.]

12...axb3 13.Bxb3 Ra8?! This is a little slow, as after White's reply Black is under some pressure and doesn't have the option of fighting for the centre by means of ...exd4 cxd4 ... d5. This latter could have been played right away.

[It makes sense to fight for the centre by means of 13...exd4! 14.cxd4 d5 15.e5 Ne4 16.Ne3 Be6 with equal chances.]

14.Ng3 Re8

[Now 14...exd4? 15.cxd4 d5 doesn't work as after 16.e5 The e4−square is unavailable for the f6−knight.]

15.Bb2

[15.Rb1!⩲ is more flexible, leaving the dark−squared bishop on c1.]

15...Bd7

[15...Na5!? looks strong as it forces an exchange of the b3−bishop. Probably Nakamura didn't like 16.dxe5 *(16.Bc2? Nc4 17.Bc1 Ba5 18.Qd3! exd4! 19.Qxc4 Bxc3 20.Bd2 Bxa1 21.Rxa1 c5* and Black looks fine thanks to the strong pawn centre. *)* 16...dxe5 17.Qxd8 Rxd8 18.Nxe5 , but in fact Black is doing well after Nxb3 19.axb3 Rxa1 20.Bxa1 *(20.Rxa1?* runs into *Rd2 21.Nc4 Bxf2+ 22.Kf1 Rc2∓)* 20...Rd2 21.Rf1 Nxe4! 22.Nxe4 Re2 23.Nc4 Rxe4 24.Nxb6 cxb6 with equality.]

16.Qc2 Ding Liren prepares 17.Rad1.

[16.a4 with the idea of creating an escape square for the light−squared bishop doesn't promise any advantage either. Na5 17.Ba2 Be6 18.Bxe6 Rxe6 19.Qd3 Re8 and Black looks fine.]

16...Nh7! A strong idea. The knight comes to g5, which creates more pressure on the d4−pawn. **17.Rad1 Ng5 18.Nxg5 Qxg5** Now White has to deal with ideas of ...h5−h4 and ...Na5.

19.Kh2

[It would be safer to keep the light−squared bishop. 19.a3!? h5 *(19...Be6!? 20.Rd3=)* 20.Kh1 Ra5!? *(* or *20...Na5 21.Bd5 Nc6=)*]

19...Na5 Hikaru doesn't forget about this idea, but allows a favourable exchange in the centre for White.

[19...h5! 20.Bc1 Qg6 21.Ne2! Na5 22.f3 Nxb3 23.axb3 h4=]

20.Bc1?! A slight inaccuracy.

[20.dxe5! was stronger, as Black can't recapture with a pawn. Nxb3 21.axb3 Qxe5 22.c4 Using the dark−

squared bishop. After 20.Bc1 this move is less effective. Qf4 23.Re2 with slightly better chances for White thanks to the strong centre.]

20...Qg6 21.dxe5 Nxb3 22.axb3 Rxe5 23.f4 Rea5! 24.f5?! Over−optimistic. In fact the move is more weakening than creating any real threats.

[24.Qe2! Ra2 25.Rd2 Rxd2 26.Qxd2 is still equal.]

24...Qf6 25.Bb2 Ra2! Black prevents 26.c4. **26.Re2 Qe7?!** Hikaru loses an important tempo.

[26...Qg5! with the idea of 27...Be3−f4 yielded Black the upper hand. 27.Qd3 *(*After *27.Qd2 Bc6! 28.c4 Be3! 29.Qxe3 Qxe3 30.Rxe3 Rxb2∓* Black's advantage is obvious. *)* 27...Be3! 28.Qxe3 Qxe3 29.Rxe3 Rxb2∓ and Black's chances are better thanks to his active rooks.]

27.c4 f6! Now the chances are equal.

[27...Qg5?! is no longer dangerous for White due to 28.Qc3! Be3 29.Rxe3 Rxb2 30.Qxb2 Qxe3 31.e5±]

28.Nh5 A nice transfer of the knight to f4. **28...Be8?** A serious mistake.

[28...Bc5! 29.Qd3 Qf7 30.Nf4 b5! allowed to create counterplay.]

29.Nf4 c6 30.Qb1 The threat of 31.Bxf6 forces the a2−rook back. **30...R2a6 31.Rd3** The Chinese player prepares a rook lift.

[31.Qd3! transferring the queen to g3 was stronger. Bf7 32.Qg3 Bc7 33.Qg4±]

31...Bf7! 32.Rg3 Bc7 33.Ng6?! This move leads nowhere.

[33.Kh1 removing the king from the b8−h2 diagonal would be better.]

33...Bxg6?! Black misses a chance to set problems, although it wasn't easy to realise.

[After the cold−blooded 33...Qd8! White has to deal with the threat of 34... d5. 34.Kg1 d5 35.e5 d4 36.Rg4 fxe5 37.Nxe5 Bh5 38.Rxd4 Bb6 39.Ree4 Qg5!∓]

34.Rxg6 d5+ 35.e5 Ra2! 36.cxd5 cxd5 37.Re3 Rxb2 38.Qxb2 Bxe5+

[38...Bxe5+ and a draw was agreed. The game could continue 39.Rxe5 Qxe5+ *(39...Qc7 40.Qc3!! Qxc3 41.Re7* and Black has nothing better than *Qe5+* transposing to 39...Qxe5. *)* 40.Qxe5 fxe5 41.Re6 d4 *(*or *41...e4 42.Rd6 Ra3 43.Rxd5 Rxb3 44.Re5 e3 45.g4 Kf7 46.Kg2 h5 47.Re6!=)* 42.Rxe5 Rd8 43.Kg3 d3 44.Re1 d2 45.Rd1 Rd3+ 46.Kf4 Kf7 47.Ke4 Rd8 48.g4 Kf6 49.Kf4 Rd3 50.b4 b5 51.Ke4 Rd7 52.Ke3 h5 53.Rxd2 Rxd2 54.Kxd2 hxg4 55.hxg4 Kg5 56.Ke3 Kxg4 57.Ke4= 11.d4 doesn't look scary for Black. Probably the most accurate reaction should be 13. .. exd4.]

[Earlier we analysed for you 9...Ne7 See Kramnik,V (2808)−Carlsen,M (2832) Stavanger 2017 [Mikhalevski, Victor]]
[9...h6 can be found in the current update. See Ding Liren−Giri.]

10.Bb3
[The main tactical idea behind the move is 10.axb5?! axb5 11.Bxb5? Bxf2+ 12.Kxf2 Rxa1 13.Bxc6 Rxb1 and Black wins an exchange.]

10...b4 Black's idea is to put pressure on the b−file by means of 11...Rb8.
[Nakamura twice deviated from the text with 10...h6 , although one of his games transposed back again. 11.axb5 axb5 12.Be3 Bd7 13.Bxa7 Rxa7 14.Nbd2?! *(14.Rxa7 Nxa7 15.Nbd2 c5* is fine for Black. *)* 14...Rxa1 15.Qxa1 Nh5! 16.Nf1 Qf6 with some initiative in So,W (2810)−Nakamura,H (2792) Saint Louis USA 2017]

11.a5 White is taking some space and the a5−square, which Black can occupy with his knight or pawn. **11...Rb8** **12.Nbd2 Be6** Three games reached this position and in all three White reacted differently. **13.Bc2**
[Jakovenko traded bishops. 13.Bxe6 fxe6 14.Nc4 Qe8 15.Be3 Bxe3 16.Rxe3 Qg6 17.Ncd2 Nh5 18.Qf1 Rb5 *(18...Nf4!?* is more accurate, and after *19.g3 Nh5* with roughly equal chances. *)* 19.Kh2 *(19.d4!* was better. *)* 19...Qh6 20.Kg1 Qg6 21.Kh2 Qh6 22.Kg1 Kh8 23.d4 Nf4 24.h4 g5! 25.hxg5 Qh5 with an initiative for Black in Jakovenko,D (2703)−Aronian,L (2809) Geneva SUI 2017]

13...h6 Levon secures the position of his bishop on e6. **14.Nf1** The same position was reached by transposition in one of Nakamura's games. **14...d5**
[The American GM played 14...b3 15.Bb1 d5 16.exd5 Qxd5 17.Be3 Bxe3 18.Nxe3 *(18.fxe3!* with the idea of 19.d4 is the only chance to fight for any opening advantage. *)* 18...Qd6 and Black equalised in a rapid game Anand,V (2783)−Nakamura,H (2792) Saint Louis USA 2017]

15.exd5 Nxd5 16.Bd2
[or 16.d4 b3! 17.Bb1 exd4 18.Qd3! Nf6 19.Qxa6! Qd5! 20.cxd4 Ra8 21.Qe2 Nxd4 and Black is fine.]

16...b3!? Black forces the light−squared bishop to a passive position.
[16...Qd6 17.Ba4 Nde7 18.Qe2 Rfd8 19.Bc2 b3 20.Bb1 Rb5 21.Ng3 Nf5 is still roughly equal.]

17.Bb1 Qd6 18.Qe2 White puts pressure on the e5−pawn, a typical idea after the exchange of e and d−pawns. **18...Rbe8!** This defence is based on simple tactics. **19.Ra3!** After Black left the b−file it makes sense to attack the b3−pawn.
[19.Nxe5? would be bad because of Bc8 20.d4 f6∓]

19...f5! Meanwhile Black creates counterplay in the centre. **20.Nxe5** Now Black has to choose the right retreat for the light−squared bishop. **20...Bd7**

[20...Bf7 seems to be correct. For example, 21.d4 Nxd4! 22.cxd4 Bxd4 23.Nxf7 Rxe2 24.Nxd6 Bxf2+ 25.Kh1 Bxe1 26.Nc4 Bxd2 27.Ncxd2 Nf4 28.Rxb3 Rf2 with a complicated endgame.]

21.d4 Nxd4

[21...Nxe5 22.dxe5 Qc5 23.Rxb3 Rxe5 24.Qf3 Rxe1 25.Bxe1 Bc6 26.c4! Qxc4 27.Ba2!±]

22.cxd4 Bxd4 23.Rxb3! Rxe5?!

This move is dubious and leads to White's edge.

[23...Bb5! was better. 24.Rxb5 axb5 25.Qxb5 *(* or *25.Ba2 Bxe5 26.Qxb5)* 25...Bxe5 26.Ba2 c6 27.Qd3 Kh7 with a position of dynamic equality.]

24.Qc4! Rxe1 25.Bxe1± Re8!?

[White also retains the upper hand after 25...Qe5 26.Rd3! Qxe1 *(26...c5 27.Bc3 Bb5 28.Bxd4 cxd4 29.Qxd4 Qxd4 30.Rxd4±* leads to an extra pawn for White. *)* 27.Qxd5+ Be6 28.Qxd4 Qxb1 29.Rd1 Qa2 30.Qe5±]

26.Bb4!?

[26.Bd2! was more accurate. Qc5 27.Qxc5 Bxc5 28.Ba2! Be6 29.Rb7± and White retains the upper hand.]

26...Qe5 27.Rd3! Bb5! 28.Qxd4 Bxd3 29.Qxd3 Nxb4 30.Qc4+ Nd5 31.Ba2 White wins back the knight on d5.

31...Kh7 32.Qxd5 Qxd5 33.Bxd5 Re5 I wonder if Black calculated up to this position when he played 25...Re8.

34.Bc4 Rxa5 Now Black just needs to place his rook on a1 and advance the a−pawn, forcing an exchange for the b−pawn. **35.f4 Ra1**

[35...g5!?]

36.Kf2 a5 37.Nd2

[37.Ne3 a4 38.Bd3 *(38.Nxf5?* allows *Rb1−+)* 38...g6 39.h4 a3 40.bxa3 Rxa3 41.Bc2 h5 and Black shouldn't have problems holding this.]

37...Kg6

[37...a4!? 38.Bd3 g6 39.Nc4 Kg7 is also close to equal.]

38.Bd3

[or 38.h4 h5 39.Nf3 Kf6 and the advance of the a−pawn can't be stopped.]

38...Kf6 39.Nc4 a4 40.g4 fxg4 41.hxg4 Ke6

[41...g5!? also deserved attention. 42.f5 Rh1 43.Nd2 Rh2+ 44.Ke3 Rh3+ 45.Kd4 c5+ 46.Kc3 Rh4 47.Be2 Rh3+ 48.Kc2 Rh2 with a draw.]

42.Be4 Rc1 43.Ne3 Ra1 44.Nc4 Rc1 45.Ne3 Ra1 An interesting fighting draw, which was well played by both players. The line with 9...b5 is definitely playable and requires more practical tests.

14.c4 Ding follows the game Radjabov, T−Kramnik,V and plays against ...d5.

[14.Nf1!

A) In case of 14...Nh5 White has 15.Bc1 *(15.Ng5!? Rf6 16.d4 Nf4 17.Nf3* is also interesting. *)*;

B) 14...Ng6 15.c4 in Giri,A (2764)−Petrosyan,M (2607) Lichess.org INT 2020 looks more accurate.]

[14.d4 seems to be a little premature in view of Ng6 and it's unclear what to do with the tension in the centre.]

14...a5 Before bringing the knight to g6 Black wants to use it on e7.

[White's last move looks less accurate than 14.Nf1 in view of 14...Nh5! Black brings the knight to f4 and equalises. 15.Nf1 Nf4 16.Bc1 Neg6]

[14...Ng6 15.Nf1 in Radjabov,T−Kramnik,V Wijk aan Zee 2019, transposed to 14. Nf1.]

15.bxa5

[15.b5! was better, and promised an edge for White after Ng6 16.g3±]

15...Nc6 Suddenly the knight comes back.

[15...Nh5! 16.Nb3 Nf4 17.Bc1 Neg6 yields Black good compensation for the sacrificed pawn.]

16.Bc3? A big mistake, which wasn't spotted by the World Champion.

[16.Nb3! was necessary. Bc5 17.Bc3 Bb4 18.Bxb4 Nxb4 19.Nh4 with some slight edge.]

16...Nd7? Carlsen misses a good chance to create serious problems.

[Once again 16...Nh5! was very strong. It turns out 17...Nf4 can't be stopped. Moreover, White can't force the knight away from f4 without losing the d3−pawn. 17.Nb3 *(17.Nxe5?* is strongly met by *Qf6!)* 17...Nf4 with a big threat of 18...Rg6. 18.Kh2 *(18.Bd2 Nxd3∓* isn't better. *)* 18...Bxf2 19.Rf1 Ba7∓ with a healthy extra pawn.]

17.Rb1! Nc5 This looks like the most natural move. Black prepares 18...Rg6 with 19...Ne6 to follow. This way Black takes control of the d4−square and brings the knight towards the f4−square.

[17...Kh7 deserved attention, although after 18.Nf1 Bd4 19.Bxd4 Nxd4 20.Nxd4 exd4 21.Nd2!± White is better.]

18.Nf1 Rg6 19.Ne3 Ne6 20.Nd5!± Ding takes control of the f4−square and his extra pawn gives him the upper hand.

[In case of 20.Rxb7?! Nf4 is annoying.]

20...Rb8 21.Rb2?! An inaccuracy. White prepares doubling rooks on the b−file, but allows some simplifications, which are useful for Black.

[21.h4!? was interesting, with the idea

of 22.h5.]
21...Ng5?! Magnus returns the favour.
[21...Ncd4! was correct. 22.Nxd4 Bxd4 23.Bxd4 Nxd4 24.Ne3! Kh7 25.Kh2 c6 26.Nf5! Nxf5 27.exf5 Rf6± with a slight edge for White.]
22.Nxg5 Qxg5 23.Qf3?!
This inaccuracy allows Black to win the a5−pawn back.
[23.Ne3! was more accurate. Now the rook on b2 protects the g2−pawn in case of a capture on e3.]
23...Bd4! 24.Reb1
[24.Bd2 allows Qh4 25.Rbb1 Rg3]
24...Bxc3 25.Nxc3 Nxa5 Finally, Black won back the a−pawn, but he is still under some pressure. **26.Nd5! Nc6?** Black creates a threat of 27...Nd4, but leaves the b7−pawn unprotected. So, if White protects his king Black will have both the c7 and b7−pawns hanging.
[26...Qd8!± was necessary.]
[Surprisingly, 26...Rc8?!
can be strongly met by 27.Rxb7 Nxb7 28.Rxb7± with a White advantage thanks to the active knight on d5, rook on the seventh rank and passed pawn on the a−file.]
27.Ne3? Too passive. White had to keep pressure on the c7−pawn.
[27.g3! was way better. Now after Nd4 28.Qe3 Qd8 29.Rxb7 Rxb7 30.Rxb7 Qa8 31.Rb1! Kh7 32.Nxc7 Qxa4 33.Nb5!+− White is a healthy pawn up.]
27...b6 Now Black is fine again.
28.Nf5?!
[White had to come back to d5, even with a loss of two tempi, in order to retain the balance. 28.Nd5 Ra8 *(28...Nd4 29.Qg3!=)* 29.g3=]
28...Ra8∓ The a4−pawn is weak now and Black is better. **29.h4 Qf4**
[29...Qd8! was better.]
30.Qxf4? Probably the Chinese player was already low on time and underestimated Black's threats.
[30.Qd1! was correct. Qg4 31.Qxg4 Rxg4 32.Ra2 Kh7 33.f3 Rg6 34.Ne3 Ra7 35.Kf2 Re6 36.Nd5 with roughly equal chances.]
30...exf4 31.d4 Rxa4
[31...f3! 32.g3 Rxa4∓ is more accurate.]
32.d5 Ne5 33.Ne7+ Kh7 34.Nxg6 Kxg6 White has won an exchange, but his weak pawns and the strong knight on e5 make his defence difficult. **35.c5?**
[White had to try keeping the c4−pawn. 35.Rc2! Kh5 36.Rcc1! Preparing an exchange of rooks. Ra5! 37.Rb5 Ra8 38.Rbb1! Kxh4 39.Ra1 Rc8 40.Ra7∓ with chances to survive.]
35...bxc5 36.Rb8 The game ended here. Probably White realised he doesn't have many chances after losing both e4 and d5.13.Bb2 is an interesting line, which requires more practical tests. I can suggest 13...Qd7 as a safer option than the text.

[Mikhalevski,Victor]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 0−0 7.Re1 Ne7
A very rare continuation, which was played by Aronian in the recent World Cup. This idea hasn't escaped the attention of the world champion. Black is transferring the knight to g6, while 8.d4 doesn't look dangerous.
[Earlier we considered more popular alternatives 7...a6 and 7...a5. 7...a6 So,W (2812)−Carlsen,M (2832) Paris FRA 2017 [Mikhalevski,V]]
[7...a5 So,W (2792) −Ding,L (2771) Tbilisi GEO 2017 [Mikhalevski,Victor]]
8.d4 The critical continuation.
[In the aforementioned game Hou Yifan played 8.Nbd2 , but after Bb6 9.Bb3 c6 10.Nf1 Ng6 11.Ng3 h6 12.h3 d5 13.exd5 Nxd5 14.d4 exd4 15.Nxd4 Be6! a draw was soon agreed in Hou Yifan (2652)−Aronian,L (2799) Tbilisi GEO 2017, although the position remains complicated.]
8...Bb6 9.a4 A new move in the current position. White is threatening to trap the dark−squared bishop by means of 10.a5.
[Let's have a look at the alternatives. 9.h3 Ng6 10.Bd3 *(10.Bb3 h6 11.Nbd2 Re8 12.Nc4* Saric,I (2644)−Mastrovasilis,D (2609) Chalkidiki 2015. [After 9.Bg5 Ng6 10.Nh4 A typical way to meet ...Ng6 in many Giuoco Piano positions. Re8 *(10...Kh8!?* is an interesting reaction, with the idea to meet *11.Nxg6+* by *fxg6)* 11.a4 a5 12.Nxg6 hxg6 13.Na3 Qd7 with a reasonable position for Black in Wall,G (2338)−Illingworth,M (2360) Istanbul 2012]
9...c6 Carlsen is creating an escape square for his dark−squared bishop.
[9...a5! looks safer. 10.dxe5 Ng4 11.Rf1 dxe5 12.Qxd8 Rxd8 13.Bg5 Kf8= and the threat of 14...Nxf2 doesn't let White play 14.h3.]
10.dxe5! Ng4! This intermediate move allows Black to retain the material balance.
[Black's compensation for a pawn after 10...Nxe4 11.Rxe4 d5 12.Bxd5 Qxd5 13.Qxd5 Nxd5 14.Nbd2 looks insufficient. For example, Bf5 15.Re1 Nf4 16.a5 Bc7 17.Nc4 Nd3 18.Rd1⩲]
11.Rf1 dxe5 12.Qxd8!
[12.Qc2 Ng6 13.h3 Nf6 14.Rd1 Qe7 15.a5 Bc7 16.Be3 Be6 17.Nbd2 Rfd8 doesn't look scary for Black, although White may hold a slight edge thanks to having more space on the queenside.]
12...Bxd8!
[12...Rxd8? would be wrong in view of 13.a5 Bc7 14.Ng5 Nh6 15.Be3± and Black is under pressure.]
13.h3 Nf6 14.Nxe5 Nxe4 15.Re1
[White could try to set some problems by means of 15.Nd2!? Nxd2 16.Bxd2

Nd5 17.a5± and White's spatial advantage promises him the slightly better chances.]

15...Nd6 16.Bb3 Re8! Now White has to solve the problem of a possible pin along the e−file. **17.Nf3** MVL prefers to pin Black instead of being pinned.

17...Nd5! Since the rook on e8 is protected Black can easily unpin his e7−knight. **18.Rd1!** Maxime is trying to keep more pieces on the board.

[After 18.Rxe8+ Nxe8 19.Bxd5 cxd5 20.Bf4 Bd7 21.Nbd2 Nc7 Black's bishop pair compensates for the isolated pawn on d5.]

18...Ne4?! A slightly inaccurate pawn sacrifice.

[18...Nf5 makes more sense, as after 19.Bxd5 cxd5 20.Rxd5 Be6 21.Re5 comes without tempo. *(* After *21.Rd3 Bc4 22.Rd7 Be6 23.Rd1 Bc7* Black obtains good compensation for a pawn as well. *)* 21...Bc7 22.Re1 Bd5 with compensation.]

19.Bxd5 cxd5 20.Rxd5 Be6 21.Re5!± Unfortunately for Black he has to remove his knight from an active position in the centre. **21...Nf6 22.Re1 Bc7 23.Na3!?** The French GM is ready to gain a tempo by means of 24.Nb5, which explains Black's reaction.

[23.Be3!? Nd5 24.Nd4 deserved attention.]

23...a6! 24.Nc2! The knight is heading for d4. **24...Nd5 25.c4!?**

[25.Bd2!? looks more flexible. Rad8 26.b3! f6 27.c4 Nf4 28.Ncd4 Bc8 29.Rxe8+ Rxe8 30.Re1± , when Black's compensation isn't sufficient for equality.]

25...Nf4

[25...Ne7± with the idea of 26...Nc6 deserved attention.]

26.Bxf4! Bxf4 27.b3± White is a healthy pawn up, while Black's bishop pair can only partly compensate the material deficit. **27...Rad8 28.Rad1 Kf8 29.Nb4?!**

[29.Nfd4! Bc8 30.Rxe8+ Kxe8 31.Ne3± transferring the knight to d5 promised White a clear edge.]

29...Bc7! Magnus takes advantage of White's inaccuracy immediately. The bishop is aiming at a5. **30.Nd3?** This is already a mistake, which gives up all of White's edge.

[After 30.Nd5 Bxd5 31.Rxe8+ Kxe8 32.cxd5 Bd6 it's not easy to break through, but White keeps an extra pawn.]

30...Bf5!? Now the unfortunate position of the knight on d3 yields Black good counterplay.

[Another interesting option would be 30...Ba5!? and only after 31.b4 Bf5! 32.bxa5 Bxd3 33.Rxe8+ Kxe8 34.Ne5 Bc2 35.Rxd8+ Kxd8 36.Nxf7+ Ke7 37.Ng5 h6 38.Nf3 Bxa4 39.Nd4 Bd7 40.c5! g5! with the idea of ...Kf6−e5 allows Black to create sufficient counterplay.]

□ **Radjabov,T.. 2788**
■ **Naiditsch,A.. 2712**
40th Olympiad Open (4.3) 31.08.2012
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.Nbd2 a6
[Earlier I analysed a game for you in which Radjabov faced 6...d6 Radjabov, T (2744) −Harikrishna, P (2669)/Ningbo CHN 2011/[Mikhalevski, V].]
[In a relatively recent game White encountered a pet line of the French GM Bacrot. 6...d5 Shanava, K (2586)−Bacrot, E (2706)/Deizisau GER 2012/[Mikhalevski, V].]
7.c3 d6 8.Bb3 Ba7 The players have transposed to a much more popular line of the Italian. **9.h3 h6** One of the most

popular positions in the Italian. Black takes control of the g5−square and thus prepares 10...Be6.

[9...Nh5 Hou, Y (2578)−Karpov, A (2651)/Cap d'Agde FRA 2008/ [Mikhalevski, V].]

[9...Be6 is a reasonable alternative and may even transpose to the text as happened in the Grischuk gane, which you'll find below.]

10.Re1 White vacates the f1−square, which he usually uses to transfer the queen's knight to g3. **10...Be6**
One of the possible options. **11.Nf1 Re8**
Now we've transposed to 9...Be6.
12.Bc2 Radjabov saves the light−squared bishop from exchange before proceeding with Ng3.

[Below are White's alternatives. 12.Ng3 Vorobiov, E−Grischuk, A (2705)/Moscow 2004/[Olivier Renet].]

[12.Be3 Ivanchuk, V (2748) −Svidler, P (2740)/Beer Sheva ISR 2005/ [Olivier Renet].]

[12.N3h2 Efimenko, Z (2612)−Navara, D (2725)/Bremen GER 2006/[Olivier Renet].]

12...d5 A pretty logical reaction oto White's retreat. **13.exd5** An interesting solution, which complicates matters. White gives up the centre, but puts pressure on the e5−pawn. **13...Qxd5**
Other recaptures also make sense and were tested in practice. **14.Ng3**
Finally the knight arrives at g3.
14...Rad8 Black completes development and puts pressure on the backward pawn on d3. **15.Qe2**
Another transposition, the third in this game. Suddenly we reach a position from a game which Radjabov played four years ago in the Dresden Olympiad 2008. **15...Qd7** An interesting idea. Black vacates the d5−square for the knight.

[Aronian played the clever, but not necessarily the best 15...Bc5 avoiding an exchange of the dark−squared bishops, which occurred in this game. Radjabov, T (2751)−Aronian, L (2757)/ Dresden 2008. Now White could have continued with 16.b4!? Bf8 17.a4 taking space on the queenside and thus exploiting Black's 15th move. b5 18.Ne4 Nxe4 19.dxe4 Qc4 20.Qxc4 Bxc4 21.Be3 Bd3 22.Rec1 Bxc2 23.Rxc2 Rb8 24.Nd2 Nd8 25.Nb3 Ne6 26.Rd2 Rec8 27.axb5 axb5 28.Rd5 f6 29.Ra7 c6 30.Rdd7 Ra8 31.Ra5 Rab8 32.Kf1 Rd8 33.Rxd8 Nxd8 34.Ke2 Nb7 35.Ra6 Rc8 36.Ra7 Nd6 37.f3 Nc4 38.Bf2 Nb2 39.Bc5 Rd8 40.Bxf8 Kxf8 41.Rc7 Nc4 42.Ra7 Nb2 43.Ra6 Rd6 44.Na5 Rd1 45.Rxc6 Rg1 46.Kf2 Rc1 47.Rc8+ Kf7 48.Rc7+ Kg6 49.Kg3 Rc2 50.Nc6 Nd3 51.Ne7+ Kh5 52.Nf5 Ne1 53.Nxg7+ Kg6 54.h4 Rxg2+ 55.Kh3 Rf2 56.Nf5 Rxf3+ 57.Kh2 Nd3 58.Rg7+ Kh5 59.Ng3+ Kxh4 60.Nf5+ Kh5 61.Ng3+ Kh4 62.Nf5+ Kh5 63.Ng3+ ½−½ Volokitin, A (2623)−Henrichs,T (2475) Austria 2017]

16.Be3 After the transpositions only this move is new. White exchanges the dark−squared bishops in order to bring the f−pawn closer to the centre and thus support the d3−d4 advance. An interesting, but not new concept for the Italian.

[In the only preceding game White played 16.Nh2 Ne7!? While the f6−

knight guards the g4−square the other one is going to d5. 17.Be3 Bxe3 18.fxe3 c5 19.Rf1 Nf5 with a pretty good position for Black who prevented the d3−d4 advance. Matlakov, M (2487)−Goganov, A (2385)/St Petersburg 2009.]

[Obviously 16.Nxe5?? fails to Nxe5 17.Qxe5 Bd5−+]

16...Bxe3 17.fxe3 White has obtained a flexible pawn chain, which isn't easy to play against. **17...Nd5?!** Probably this natural move is inaccurate as the knight turns out to do nothing after 18.d4, but comes under attack from the c−pawn.

[17...Bd5!? , which prevents a recapture on d4 with the e−pawn after 18.d4, is an interesting alternative. Now after 18.e4 Be6 White's light−squared bishop is restricted by his own pawns.]

18.d4! White is trying to force a favourable exchange of the e−pawns, which opens the e−file for his pieces and allows him to get rid of the e3−pawn. The threat of 19.c4 doesn't leave much choice unless Black wants to move the d5−knight again. **18...exd4 19.exd4⩲** Suddenly it's White who has the centre and a strong light−squared bishop. After making some natural moves Black finds himself under some pressure. **19...Bf5?** Black initiates complications, but gets into trouble. **20.Ne5!±** A strong intermediate move, which was either missed or underestimated. **20...Nf4** An attempt to justify the previous move, but Black gets even more stuck with his pieces.

[20...Bxc2 loses an exchange to the simple 21.Nxd7 Rxe2 22.Rxe2±]

21.Qf2! The best square for the queen, from where she attacks the knight on f4 and protects the bishop. **21...Nxe5** Black loses a piece, though good advice was already very costly.

[21...Rxe5 22.dxe5 Bxc2 is the last practical chance. Then some hopes might be linked to the weakness on e5.]

22.Bxf5 Too many pieces are hanging and Black loses one of his knights after **22...Ned3 23.Rxe8+**

[There was also nothing wrong with the immediate 23.Qd2+−]

23...Qxe8 24.Qd2 Qb5 Black is trying to save his lost knight. **25.b3!+−** The illusions disappear. **25...c5** Resignation.

[25...Re8 would be the very last attempt to save the knight. Now Black's idea is to play ...Ne2, exchanging one of his hanging knights for the strong bishop. 26.Rf1!± *(26.Rd1?* is wrong in view of *Ne2+ 27.Nxe2 Qxf5 28.Ng3 Qf4! 29.Qxd3 Re3* and Black equalizes. *)*]

26.Bxd3 Qxd3 27.Qxf4 Qxc3 28.Rc1 Qxd4+ 29.Qxd4 cxd4 30.Kf2!+− White brings the king closer to the passed pawn and wins easily. **30...Rd5 31.Ne4 Re5 32.Nd2 d3 33.Re1 Ra5 34.a4 Rf5+ 35.Nf3 b5 36.Re5** A well−played game by Radjabov, who prepared an innocent−looking, but strong idea. 17...Bd5 would have been better.

Candidates Tournament (10) 23.03.2016
[Mekhitarian,Krikor Sevag]

1.e4 The English Opening, extensively discussed in the 2016 Candidates Tournament. [10...Re8!⇄ 11.Nf1 followed by ♖ad8 was also possible.The ♕c8−♗h3 idea could be prepared later, after bringing the rook to d8. Be6 12.Bxe6∞ Rxe6 13.Be3 Bxe3 14.Nxe3 probably wasn't too attractive for White. If c5, Black is able to regroup with ♗b8, and then the d4−pawn could become a weakness. d5 was played in the other twin game of the round 15.Qc2 Qd7 Black is not scared of e4, because that would simply weaken d4 too much 16.Rad1 Rd8 17.Nf5 Qe8 18.b4 b5 19.axb5!? defines the position rather quickly, it was also possible to keep everything more flexible, as did Aronian in his game. axb5 20.Nd2 Ne7]

11.Nf1 This is the spirit, keeping a very flexible position, Black has to be watching d4 or ♘h4−f4 as well. Also, Black's dark−squared bishop becomes somewhat awkward, since White is the one who will decide if he is going for d4, and when. I think the whole point is that White can gradually improve his position by pushing his pawns (like the ones I mentioned, or even a3−b4). And that is annoying for Black, who doesn't have a clear pawn break. His pieces eventually will lack space. **11...Ng6 12.Ng3 c6 13.Ba2!?** Avoiding ...♗f5 and asking Black how is he going to develop from here. **13...Be6** A kind of mysterious way to reorganise the pieces, the queen just came from d8!

[17...Nxd5 18.Rxe6± and ♔e4 followed by d5 (or ♗a3−♗d6) most likely will be decisive. Nh4 19.Ra3]

18.Qd3 Ne7 19.Bd2 The problem for Black is that White gradually improves his position, and Black has to be waiting. Topalov did try to take immediate action, but ended up in a worse position.

19...Bb8!? 20.Bb4 Now there is a positional threat of d5, and Black has to be creative to avoid going into a worse position. **20...Bd6?** Seemingly natural, this move puts Topalov in big trouble, because of his lack of development.

[Roiz,M]

1.e4 Roiz,Michael Roiz,Michael Roiz, Michael: 'Roiz,M' Levon Aronian rarely starts the game with this move, but I guess, Michael wasn't shocked and went for his usual opening. **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 d6 6.Bg5** Quite a rare contiunation. In most cases, pinning the f6−knight is more effective after short castling. **6...h6 7.Bh4 a6 8.Nbd2**

[8.a4 Ba7 9.0−0 can lead to a fashinable position which was recently tested on the top level.]

8...Ba7 9.Bb3 White hardly can pose Black any problems without seizing space on the queenside.

[9.a4 , switching to the above−mentioned theoretical position seems more challenging.]

9...Qe7! Michael is leaving the king in the centre for a while, keeping in mind the opportunity of queenside castling.

[But 9...Be6?! seems dubious: 10.Bxe6 fxe6 11.Qb3± Hristodoulou, H−Markidis,K (2275) Kavala 1999]

10...Be6 11.Ne3 g5 12.Bg3 0−0−0 Since White didn't push the q−side pawns, Black's monarch feels safe now.

13.Ba4 Nb8! One more excellent manoeuvre à la Breyer by GM Michael Adams. Black's setup seems more harmonious now. **14.Qc2**

15.fxe3 Nh5 16.Bf2 f5 17.exf5 Bxf5 18.Qe2 Bxd3?! An untypical positional mistake by GM Michael Adams. Perhaps,

26.Bg3! I guess, this strong move was underestimated by GM Adams. White gives up a pawn in order to maintain the tension.

Such a type of position with this piece constellation is to be avoided. Romantic exchange sacrifices on f3 won't happen any time soon, since White can set himself up with N1h2, g3 and Kg2. Later on, White can slowly push d4 or just keep waiting for Black to do something rash. So einen Stellungstyp mit dieser Figurenkonstellation gilt es zu vermeiden. 22.Bd3 Bxf3?! Tempting, but White gets good play on the kingside. After

this game Naka came up with the correct strategy:

[22...Nc6! 23.Qe3 Nb4 24.Nd4 Nxd3 25.Qxd3 Qb6 At first sight it looks very good for White with a strong knight against a potentially bad bishop. Furthermore Black has an isolated d−pawn. On the plus side Black has the c−file and some counterplay on the queenside. In two games Nakamura held the position without too much trouble.

12.c3 Qf7?! More a defense than a prophylactic against Qb3, since the queen on f7 is not really well placed. In the first games Dubov played in this variation, he mostly seemed a bit hesitant to enforce ...d5. In my estimation, however, Black should by no means shy away from playing ...d5. In more recent games Dubov is also somewhat more optimistic about ...d5, which in a way reinforces my hypothesis. Mehr eine Verteidigung, als eine Prophylaxe gegen Db3, da die Dame auf f7 nicht wirklich gut steht. In den ersten Partien, die Dubov in dieser Variante spielte, wirkte er meist etwas zögerlich ... d5 durchzusetzen. Meiner Einschätzung nach sollte sich Schwarz allerdings keinesfalls davor scheuen, ...d5 zu spielen. In jüngeren Partien geht Dubov auch etwas optimistischer mit ...d5 um, was meine Hypothese gewissermaßen bekräftigt.

13.Be3 Interestingly, the bishop is probably somewhat better on d2 than on e3. On d2 the bishop would already control the b4 square after later d4 cxd4 cxd4 and on the other hand a rook on the e−file could be more effective if no bishop stood in its way.
Interessanterweise steht der Läufer wohl auf d2 etwas besser als auf e3. Auf d2 würde der Läufer nach späterem d4 cxd4 cxd4 bereits das Feld b4 kontrollieren und zum anderen könnte ein Turm auf der e−Linie mehr Wirkung entfalten, wenn ihm kein Läufer im Weg stünde.

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.a4 h6 This move is the least popular of five moves tried in the current position. Its idea is pretty obvious− Black covers the g5−square in order to prevent a pin by means of Bg5 before playing ...d6.

[Earlier we considered 6...a5 7.c3 d5

Nepomniachtchi,I (2767)−Aronian,L (2785)/Doha QAT 2016/[Mikhalevski, V].]

[and 6...d6 Carlsen,M (2853)−Karjakin,S (2772)/New York USA 2016/[Mikhalevski,V]]

7.c3 The most natural option. **7...a5** This move is also logical as it stops both the b4 and a5 ideas.

[7...a6 8.Re1 d6 This position usually arises after an early ...a6.]

[Obviously 7...d6?? is a blunder in view of 8.b4 Bb6 9.a5 trapping the dark−squared bishop.]

8.h3 d6 The players transposed into a game of Nepomniachtchi. **9.Re1 Ba7** This position has been seen only once before. The bishop has been removed from c5 in order to avoid the d4−idea, which may become strong after Ne7.

[9...Bb6 10.Nbd2 Ne7 11.Nf1 Ng6 12.Ng3 c6 13.Bb3 d5 14.exd5 Nxd5 15.Qc2 Re8 and Black was fine in Nepomniachtchi, I (2767)−Cheparinov, I (2689)/Doha QAT 2016.]

[In most of the preceding games Black played 9...Re8 although over 90% of the those games were played online.]

[9...Be6 10.Na3 Bxa3 11.Bxe6 Bxb2 12.Bxf7+ Rxf7 13.Bxb2 Qd7 was roughly equal in Hou Yifan (2649)−Caruana,F (2813)/Douglas ENG 2016.]

[Thus, the immediate 9...Ne7 would be met by 10.d4±]

10.Nbd2 Ne7 Kramnik transfers the knight to g6, which he wants to follow with ...c6 and ...d5.

[The aforementioned game featured 10...Be6!? 11.Qb3 Qd7 12.Nf1 Ne7 13.Bxe6 fxe6 14.Be3 Ng6 15.Bxa7 Rxa7 16.d4 Nh5 17.Re3± with a slightly more pleasant position for White in Geller,J (2488) − Kryvoruchko,Y (2702)/Novi Sad SRB 2016.]

11.Nf1 Ng6 12.Ng3 c6 13.d4 White is the first to create some tension in the centre, but Black has no problems answering it with ...d5 in a couple of moves.

[13.Ba2 d5 14.exd5 Nxd5 would lead to the game Nepomniachtchi−Cheparinov, which can be found above, with only one difference− the bishops are on a2 and a7 instead of b3 and b6. 15.d4 exd4 16.Nxd4]

13...exd4 14.Nxd4 Re8! A useful preparatory move.

[The immediate 14...d5 15.exd5 Nxd5 16.Nb5! cxb5 17.Bxd5± look slightly better for White.]

15...d5! 16.exd5 Rxe1+ 17.Bxe1 Nxd5= Black has equalised. The position is almost symmetric. **18.Nb5** Karjakin's idea is to create an isolated pawn in the centre. **18...Bb6**

[18...Bc5!? deserved attention.]
19.Bxd5 Qxd5
[19...cxd5 should also be equal.]
20.Qxd5 cxd5 21.Ne2 This endgame is a little more pleasant for White thanks to the isolated pawn on d5, but the pair of bishops seems to be sufficient to compensate for it. **21...Bd7 22.Nbd4**
[22.Rd1 would be met by Bxb5 23.axb5 a4! fixing a weak pawn on b2, and after 24.Rxd5 Re8 25.Rd2 Ne5 the knight is coming to c4 with a good position for Black.]
22...Re8
[or 22...Bc5]
23.Kf1 Ne5 The knight is coming to c4 to provoke a weakening of the queenside. **24.Bd2** The bishop is coming back to c1. **24...Nc4 25.Bc1 g5!** Black takes control of the important f4−square. **26.b3** White can't do without this move, but now the c3−pawn is becoming vulnerable. **26...Nd6 27.Ba3**
[27.Be3 looks safer, keeping the position in the centre stable. Ne4 28.Rd1 Rc8 29.Rd3 Nc5 30.Rd1 Ne4=]
27...Ne4 28.Rd1 f5 Black takes some space on the kingside. **29.f3 Nf6 30.Ng3 Bxd4 31.Rxd4 f4 32.Ne2 b5!** Vlad is trying to set problems, but White's position is solid enough. **33.axb5 Bxb5 34.c4 Ba6**
[34...dxc4!? 35.bxc4 Ba6= is also equal, but the Russian GM had a nice idea in mind.]
35.Nc3 a4!? 36.Kf2 Probably being short of time Karjakin decided to avoid the ...Nh5−g3+ idea.
[36.Nxa4 is safer. Nh5 37.Nc3 dxc4 38.bxc4 Ng3+ 39.Kf2 Re3 40.Bb4 Nh1+ 41.Kf1 Ng3+ leads to a perpetual.]
36...axb3 37.cxd5 Rc8 38.Bb2 Nd7 39.d6 Rc6 40.g3! White simplifies the position. **40...fxg3+ 41.Kxg3 Kf7 42.f4 Kg6 43.fxg5 hxg5 44.h4** No material is left on the board and so after **44...gxh4+ 45.Kxh4 Rc4 46.Rxc4 Bxc4 47.Ne4 Kf5 48.Nd2 Bd5** a draw was agreed. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 a6 7.a4 0−0 8.Re1 a5!? A very modern idea in an opening that is evolving day by day. Grischuk is credited with this plan, although it was played in a slightly different move order. Black, bizarrely, moves the a−pawn for a second time in three moves. He argues that White's 'extra' a2−a4 move is not as useful as it looks, and the tempo was a worthwhile investment as he now takes the b4−

square under control.

[8...Ba7 and]

[8...h6 are both regularly seen alternatives.]

9.h3 h6 10.Nbd2 Be6 11.Bb5 Na7 12.d4 Nxb5 This has all been seen before, with most of the games featuring Maxime Vachier−Lagrave on the White side. There is now a crossroads:

13.axb5 The most natural choice.

[13.dxc5 Initially seems innocent, but some strategic complexities lurk beneath the surface: Na7 14.b3! An idea of MVL's. Re8 *(14...dxc5 15.Nxe5±)* 15.cxd6 Qxd6 16.Ba3 and White exerts a modicum of pressure. Vachier−Lagrave has scored against formidable opposition (Grischuk and Karjakin) from this position.]

13...exd4 14.Nxd4

[14.cxd4?! Bb4∓ finally shows the idea behind Black's idea of playing 8... a5. The b4−square is a strong outpost for the bishop.]

14...Re8 15.Nf1 Giri follows a game in which Leko beat Kasimzhanov in the 2018 Olympiad.

[15.N2f3 is also worth considering.]

15...Bc4 Anand's prepared improvement.

[15...Bd7 16.Ng3 c6 17.bxc6 Bxc6 18.Qf3 d5 19.e5 eventually led to a white win in Leko−Kasimzhanov, Batumi 2018.]

16.Ng3 d5 Again this seems to be Anand's preparation, although I still find it hard to believe he had memorised the entire messy variation that we will see below (if White had played 20.Qg4).

[16...a4]

[or 16...Qd7 would have been sensible alternatives.]

17.e5 Ne4 18.Nxe4 dxe4 19.Rxe4 Qd5 Anand was still playing his moves at a brisk pace, which clearly unnerved Giri. Here he paused for a deep think before opting for a suboptimal move:

20.Qf3?!

[20.Qg4! was critical, and would have demanded great energy (and accuracy!) from Anand to prove equality: h5! 21.Qf4 Bd3 (other moves exist, but this is clearly the most forcing − in the style of Anand himself) 22.Re3 Bxb5 23.Rg3 Rxe5 24.Qf6 Re1+ 25.Kh2 Bf8 26.Nf5 Qe5 and it appears that Black is fine, although further analysis shows that the position is still full of intrigue: 27.Nh6+ Kh7 28.Qxf7! Qe6□ 29.Qxh5 gxh6 30.Qxb5 *(30.Bxh6* leads to a beautiful variation: *Re5 31.Bg5+ Qh6□ 32.Qf7+ Qg7 33.Qh5+ Qh6* with a draw *)* 30...Bd6 31.f4 Rg8 32.Qd3+ Rg6 33.h4 Qf6 34.h5 Qh4+ 35.Rh3 Bxf4+ 36.Bxf4 Qxf4+ 37.Rg3 Qh4+ 38.Rh3 Qf4+ with a draw. Could Anand really have analysed this deeply? Many of the above moves are forced, so it is quite possible, although it would have been a great feat of memory to get this far.]

20...Bxd4 21.cxd4

[21.Rxd4 Qxf3 22.gxf3 Bxb5∓ Is very pleasant for Black due to his superior pawn structure.]

21...Re6! 22.Rf4 And Giri offered a draw, which was quickly accepted. To be honest, I would have been very tempted to continue, as Black appears to be running no risk at all:

[22.Rf4 Qxb5! 23.Qg3 *(23.Rxf7?* Perhaps Anand missed that this was impossible, otherwise he might have played on: *Rg6!*−+ with ...Bxf7 or ... Bd5 to follow, Black is winning. *)* 23...Rg6 24.Rg4 Raa6!∓]

9.h3 h6 10.Nbd2 Be6 I wonder if this move is really required. **11.Bb5 Na7 12.d4** Slowly White is losing track.

14...Re8 15.Nf1

[15.N2f3]

15...Bc4 Now we have an equal position according to comp, although I feel black's position is easier to handle as he has more potential to create something.

[15...Bd7 16.Ng3 with a complex battle. c6 17.bxc6! A typical idea to fight against the expansion. Bxc6 18.Qf3 Black was already superior in (Moro−Zvjaginsev Rapid 2018) d5!? offered better chances to fight for advantage. Comp's insane preference is 19.e5!?]

16.Ng3 A huge error. **16...d5!** White's over extended pawn structure start to feel the heat!

[Morozevich chose 16...a4!?]

[16...Qd7]

17.e5 Ne4 18.Nxe4 Desperation.

18...dxe4 19.Rxe4 Qd5 20.Qf3

[20.Qg4 looks pretty hopeless for White. and h5 21.Qf4 Bd3 22.Re3 Bxb5 was better maintaining the balance, though Black can fight for something with 23.Rg3!?

Also possible is the dark−squared positional approach with Rxe5 24.Qf6 Re1+ 25.Kh2 with equal endgame. Once again Bf8! was stronger. 26.Nf5 Qe5!? with better position. More to the point was 27.Nh6+ though Black is completely fine after Kh7 28.Qxf7 Qe6 29.Qxh5 gxh6 30.Qxb5 was a better way to fight for the intiative. *(30.Bxh6 Re5 31.Bg5+ Qh6 32.Qf7+ Qg7* with a nice position for Black. *33.Qh5+ Qh6* now Black can focus on the queenside. *)* 30...Bd6 was better although Black could continue in the same spirit with 31.f4! Nepo missed an interesting possibility in form of Rg8! 32.Qd3+ Rg6 33.h4 Qf6 34.h5 Qh4+ 35.Rh3 Bxf4+ 36.Bxf4 Qxf4+ 37.Rg3 Qh4+ Black comes out slightly better out of the mess. 38.Rh3

doesn't work due to Qf4+]
20...Bxd4 White doesn't have enough compensation... **21.cxd4**
[21.Rxd4 An important win for Nepo putting him and Vishy tied for the first spot...although the middlegame phase could have been played better by both the "Masters"! Qxf3 22.gxf3 here both Bxb5]

I chose this encounter to show how creativity and tenacity could change a game. This position is better for Black as White's misplaced bishops are easy to trade, after which, it will be only Black who can rule the board. London Classic 9th (9) 11.12.2017
[So,Wesley]

London was cold, snowy, sleety, rainy and windy. Although I fought hard in my games I couldn't seem to create much heat. What to do? People seem to think that strong players can and should win whenever they want. My guess is the people who think that have never played the best chess players in the world in a lengthy tournament. Everyone fights to the death and more often than not, a win or loss can hang on one single move. Anyway, I had some great battles that did not end decisively and now I was at the last game. My last chance and I'm playing black against the great Anand. Hope dies hard and of course I had a flickering hope that I might crack a win this time but hey ... I'm sure Vishy did too. 11.Nbd2 Ba7 12.Nf1 The knight is going to e3 to underline the weakness of the e3−square. **12...Be6 13.Bb5!?** A typical move in the lines with ...a5. White pins the c6−knight and prepares d3−d4.
[13.Bxe6! Rxe6 14.h4! looks strong as it allows White to exploit Black's weaknesses on the kingside.
A) In case of 14...Nh5 White can choose between 15.hxg5 *(* and *15.Nxg5 Nxg3 16.Nxe6 Qxh4 17.Nxg3 fxe6 18.d4! exd4 19.Qb3!±)* 15...Rg6 16.Bh2 hxg5 17.Nxe5! Nxe5 18.Bxe5 dxe5 19.Qxh5± and Black's compensation seems to be insufficient.;

[15.Bxd7! Qxd7 16.a4± trading the light−squared bishops looks more promising, as it weakens Black's light squares, in particular f5.]

20...gxf4 21.e5? The Armenian player sets serious practical problems, although from a computer's point of view this move leads to a lost position. So, the question mark is for the objective value of the move, although practically it might be strong.

11.c3 Nh7 This is the point of ...♔h8. Now Black tries to play for the kingside initiative. **12.Qb3 f5!** According to Playchess, Black spent 12 minutes here. This is a pawn sacrifice though.

[12...Qe8 Maybe Black also considered something like this but of course this is an awkward move and a concession. 13.Nbd2±]

B) 14.Nbd2 Rb8 15.Rae1 with a playable position for both.]
14.Be6 The principled move.
[14.Nbd2!? was also possible.]
14...Ne7 15.Nh4 Qe8 16.Bxc8 Rxc8 17.Ng6+ Nxg6 18.fxg6 Qxg6 19.Qxb7 Ng5!? Black continues to play ambitiously, down a pawn for long−term compensation in the form of piece activity and the initiative. It worked great in this game. Very brave play by Aronian!
[19...Qxd3 20.Qb5 e4 *(20...Qxb5 21.axb5 Ra8 22.Nd2±* is of course not great for Black since White simply has the better game without facing much counterplay. *Rfb8 23.c4 Ng5 24.Ra2±* and Black's pawn on a5 is weak as well as his bishop on f6. 20.h4 Ne6 21.Qe4 Qh5 22.Nd2 Nf4! Of course Black has to play energetically here to try to prove he has compensation for his pawn. **23.Bxf4 exf4 24.Qf3?!** This move seems to be the first inaccuracy by White since eventually the queen on f3 might not be ideally placed and Black will take on h4 eventually anyway.
[24.d4!? g5! seems like Black's best reply. *(24...Bxh4 25.b4!±* The point of d4. [26.Rab1 g5 27.Qc6 g4 28.Qxc7 Be5 29.Rxe5 dxe5 30.Qxe5+ Kg8 is also very unclear and as such is unlikely to be an improvement for White.]
26...g5! Now Black starts his initiative. Objectively the position is roughly equal but probably Black has the edge here since he has the initiative. **27.Re6 Bg7 28.Rg6?!** Now this is probably already a serious practical inaccuracy since now the e−file goes to Black and Black at the very least will have a serious initiative if not already an advantage.
[28.Qh3= This was the simplest route to clean equality. Qxh3 29.gxh3 d5 30.Nxa5 Rxb2 31.d4=]
[28.Rae1 g4 29.Qe4 f3 30.g3 Qh3 31.Ne3 Rxb2 32.Re8 is also level.]

28...Rbe8! 29.d4 Kh7! 30.Qd3 Kg8 After this nice sequence of moves White is already in some trouble. However

White's next move doesn't make it easier for him. **31.d5?!**

31...f3 This move is good enough for an advantage and it's very difficult for White to play, but I wanted to mention that Black seemed to have another interesting viable alternative here.

[31...g4!? would also be quite hard to meet. 32.Rd1! seems like practically the only move. *(32.g3? Qh5 33.Re6 Rxe6 34.dxe6 fxg3 35.Qxg3 Rf3−+; 32.Nxa5? 32.gxf3?! This makes matters worse for White.

B) 34.Qb1? Qxd5]

32...Rf4 33.Kg2?! Likely following a faulty plan. At this point Sergey was already in serious time pressure and this position is very unpleasant to play. Sergey probably missed some of Levon's ideas.

[33.Nd2 After this more resilient move White can still fight on, although honestly speaking probably not for that long. Qh3! This is probably why Sergey played ♔g2. 34.Qf1 Qh5 35.Re6 Rb8−+ and Black is winning but at least White doesn't have to resign right away. He's not losing by force yet.]

Diesmal 0−0 vor d6! **6.Nc3 d6 7.a3!? h6 8.Re1 Re8!?** Dubov refrains from playing ...Be6, since this would be answered by Nd5 anyway, after which he has no good answer anyway. His new approach is to first clear the e7−square and then play ...Le6, whereupon after Nd5 he would always have ...Bxd5 and ...Ne7 at his disposal. In a sense, he lets Giri run into the void. Dubov verzichtet auf ...Le6, da dies sowieso mit Sd5 beantwortet werden würde, woraufhin er ohnehin keine gute Antwort hat. Marin,Mihail: 'Exchanging Queens During A Sacrificial Attack *** For obvious reasons, the traditional attacking picture involves the participation of the attacker's strongest piece − the queen. Her presence is needed even more if the attacker sacrificed material, because he has no possibility of switching to a favourable endgame from the position of force. *** There is a reverse side of the coin, too. Sacrifices without immediate tactical consequences are usually possible when a great number of the enemy pieces are far from the king's residence. Many times, the defender's best chance is using his queen's mobility to transfer it closer to the king, with certain possibilities of the queen exchange. However, if the attacking operation is objectively sound, the exchange will not lower its strength. In actual fact, in some cases it will increase it! The latter can be explained abstractly if we imagine that the attacker has the material superiority in the combat area, which becomes even more relevant with the queens off. *** In some cases the attacker has a choice, but it is most practical to opt for a clean technical solution, thus allowing (or even provoking) the exchange of queens. We will start, as usual, with a very recent game.' **1.e4** Marin,Mihail Marin,Mihail Marin,Mihail **1...e5 2.Nf3 Nc6 3.Bc4** At the top level, this move usually leads to slow manoeuvring play. [Earlier we considered 9.Re1 , which was fine for Black in Mamedyarov,S (2804)−Kramnik,V (2787) Wijk aan Zee NED 2018 [Mikhalevski,Victor]]

9...Nb6 This is almost forced. Black attacks both d3 and b5. **10.Bb5 Bxd3** The principled continuation.

[In the preceding game Black played 10...Ne7!? , which is a worthy alternative.

A) 11.a5!? An attempt to improve over White's play. a6 12.axb6 axb5 13.Rxa8 Qxa8 14.bxc7 Bd6 15.d4 Ng6! 16.Re1 *(16.dxe5!? Nxe5 17.Nxe5 Bxe5 18.Nf3 Bxc7 19.Qd5 Qc8 20.Qxb5 Be4* with compensation for the pawn thanks to the bishop pair. *)* 16...exd4 17.Nxd4 Bd7 18.Qb3 Qa5 looks playable for Black.;

11.Re1 e4! Quite surprisingly Black has nothing better than to give up a pawn and the bishop pair.

[An attempt to protect the e5−pawn by means of 11...f6?? would be a blunder in view of 12.Nb3!+−]

12.Nxe4 Bxe4 13.Qxd8 Rfxd8 14.Rxe4 Rd1+ 15.Re1 Rxe1+ 16.Nxe1 This sequence was rather forcing.

16...a6!?

[Black can also try to improve the position of the knight. 16...Nd5!? 17.Nd3 Bd6 18.a5 a6 19.Bc4 Nf6 20.f3 h6 and Black is close to equalising.]

17.Be2 MVL keeps the bishop pair, which yields him slightly the better chances in an open position.

[The main alternative is 17.Bxc6 bxc6 18.a5 Nd5 19.Nd3 Bd6 20.Bd2 *(20.Ra4 c5 21.Rc4 Rb8 22.Nxc5 Rb5 23.Ne4 Rxa5 24.Nxd6 Ra1!=* is equal. *)* 20...c5! This way Black creates a target on b2. Otherwise, White can play b4. 21.c4 Nf6 22.Be3 Nd7 and although Black is slightly worse White's chances to win are not that big.]

17...Nd5 18.Nd3 An important moment, as Black has to choose between several retreats. **18...Ba7** Probably the least accurate of the possible retreats.

[18...Bb6!? deserved attention, as it would prevent the advance of the a−pawn to a5.]

[18...Be7!? 19.a5 Rd8 20.g3 g6 is also playable, as despite allowing a4−a5 Black would place the bishop better than in the game.]

19.a5!± White takes some space on the queenside, which is important when one has the bishop pair. **19...Re8 20.Kf1 Ne5?!** This natural exchange of knights

is also dubious.

25...h6!? Stopping 26.Bg5.
[25...Rd7!? 26.Bg5 Bc5 27.Rc4 Be7± also promised good chances to equalise.]

14.Ncxe5 Nxe5 15.Nxe5 Re8 16.Qxd8 Raxd8 17.Bc2± White is a pawn up, but Black is completely developed. The next few moves are crucial for the evaluation of the position. **17...g5 18.Nf3 g4** Let's pause for a minute and look carefully at this position. White is a pawn up here. What he would really like to do is take the pawn on g4 with h3. However, for that you must look deeper. Anand chose ♘d4. [10...Re8 is a more popular line.]

11.Ng3 c6 An extremely rare move order, which might be aimed against 12. d4, although this doesn't look dangerous.

[In most of the preceding games Black played 11...Ng6 Grischuk,A (2764)−Wen Yang (2586) China CHN 2019 [Mikhalevski,V]]

12.Bb3 Ng6 The game has transposed to 11...Ng6. **13.h3** Now we transposed to an even more popular position with an early h3.

[The only preceding game at the high level saw 13.d4 As we know, it's important to create tension in the

centre this way. Both sides fight for the right to do it before their opponent. Re8 *(13...Bg4!?* is the critical way to meet 13.d4 and it explains why Grischuk preferred to start with 13.h3 in the game. *14.h3 Bxf3 15.Qxf3 exd4 16.Nf5 Ne5 17.Qf4! dxc3 18.Qg3!* with compensation for the sacrificed material. *)* 14.h3 After this move the game transposes to a more popular line with an early h3. The text also stops 14...Bg4. d5 *(14...Be6 15.Bc2 c5 16.d5 Bd7 17.c4* with a better position for White in So, W (2770)−Caruana,F (2835) Lichess.org INT 2020 *)* 15.Nxe5 Nxe5 16.dxe5 Nxe4 17.Nxe4 dxe4 18.Qxd8 Rxd8 Topalov,V (2761)−Fressinet,L (2687) Paris 2016, and now the most accurate would have been 19.a5!⩲ Fixing the queenside and taking some space.]

13...d5 The most logical. Black is the first to create tension in the centre.

[The alternative 13...Re8 allows 14.d4 , which transposes to a good version of 13.d4 for White.]

14.exd5 Nxd5 15.d4 exd4 16.Nxd4 This position is almost symmetric and White's advantage is minimal. **16...Be6!** Another logical continuation. Korobov takes advantage of the fact that after a trade on e6 the f2−pawn is vulnerable. **17.Bc2** White creates a threat of taking on g6 and e6 and so Black's reply is very logical. **17...Bd7** This retreat is not a waste of a tempo as the d5−knight is not under attack any more. **18.Bb3** It seems that Grischuk doesn't mind repeating moves, but Black rejects the repetition. **18...Qa5**

[18...Qc7!? deserved attention, although Anton preferred to avoid 19. Bxd5. Nevertheless, after 19.Bxd5 cxd5 20.Be3 Rae8 21.Qd2 Bb8 with the idea of 22...f5, Black is doing fine.]

19.Bxd5 Alexander decides to simplify the position.

[19.Nh5!? was an interesting attempt to create some problems. Now White's idea is to take on d5 and h6. Black can answer it with Kh7!? 20.Qd3 Rad8 21.Bc2 Nb4 22.cxb4 Qxh5 23.Be3 Kg8 and Black doesn't seem to have many problems.]

19...Qxd5 20.Ndf5! Qxd1 21.Rxd1 Bxf5

[There was also nothing wrong with 21...Be6 22.a5 Rae8 23.Be3 Bxe3 24.fxe3 *(24.Nxe3?* runs into *f5!∓)* 24...Bxf5 25.Nxf5 Re5 26.Nd6 Rxe3 27.Nxb7 Re2 28.Nc5 Ra8 29.b4 Nh4 with counterplay on the kingside.]

22.Nxf5 Rfd8 The Ukrainian player is fighting for the d−file.

[22...Rad8 looks like a logical alternative. 23.Be3 Bxe3 24.Nxe3 Rfe8 This is one of the reasons 22... Rad8 would make sense.]

23.Be3 Bxe3 24.Nxe3 b5!= Korobov demonstrates why leaving a rook on a8 makes sense too. The point is to prevents a fixation of the queenside by means of 25.a5. **25.Nf5** The knight is well−placed here, but Black equalises by means of exchanges.

[25.Kf1!? is a logical alternative.]

25...Rxd1+ 26.Rxd1 bxa4! 27.Ra1 Rb8 28.Rxa4 Rb5!? Before capturing the b2−pawn Black prefers to force the f5−knight to a passive position.

[28...Rxb2 29.Rxa6 Ne5 30.Ne7+

Kh7 31.Nxc6 Nd3 32.Ra7 Rb1+ 33.Kh2 Nxf2 34.Rxf7 White seems to win a pawn, but Rh1+ 35.Kg3 Ne4+ is completely equal.]

29.Nd4 Rxb2 30.Nxc6 Rc2 31.Nd4

[31.c4 Nf4 would have been equal too, but Alexnder didn't see any point in playing on in such a drawish position.]

31...Rxc3 Logical play by both sides. White needs to improve on his play if he wants to create opening problems. 13.d4 is one of the attempts to do so. Meanwhile the ball is in White 's court.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0–0 Nf6 5.d3 d6 6.c3 0–0 7.Re1 a5 8.Nbd2 Be6 9.Bb5 Ba7!? This move is in the Marshall Gambit spirit. Black is ready to sacrifice a pawn for the initiative.

[9...Qb8 10.Nf1 Qa7]

10.Nf1 Ne7 11.Ng3 The 2nd most popular move after 11.♘xe5. White makes a natural developing move **11...c6!** Black continues to not defend the e5–pawn. **12.Ba4** Attacking the b5–pawn and clearing a2 for his bishop in the Ruy Lopez is very natural. **12...Ng6!** Black defends the e5–pawn, and threatens ..♘a5. **13.h3**

[13.d4 Bg4]

13...d5 14.exd5! White should normally not exchange the light–squared bishop in the Spanish. **14...Nxd5 15.Bc2**

[15.d4 exd4 16.Nxd4 Qc7 17.Nxe6 Bxf2+ 18.Kxf2 fxe6+ 19.Kg1 Qxg3]

15...Qc7! The most precise way to equalise. Obviously, Ding was still in his home preparation.

[15...f5]

16.d4 exd4 17.Nxd4!? This funny trick is the tactical point of White's strategy, but Black with correct play keeps control of the situation. **17...Rae8!** It is better to keep the dark–squared bishop on the board.

[17...Ndf4 18.Nge2 *(18.Nxe6 Bxf2+ 19.Kxf2 Nxh3+ 20.gxh3 fxe6+ 21.Bf5 Rxf5+ 22.Nxf5 Qh2+ 23.Ke3 exf5)*]

[18.Be4 Nf6 19.Bxg6 hxg6 20.Nxe6 Bxf2+ 21.Kxf2 fxe6 22.Nf1 Ng4+ 23.Kg1 Rxf1+]
18...Ndf4
[18...h6 19.Bd2 Ndf4]
19.Qd2 Bd5! The pin was already annoying, so 19..♔h8 was necessary. White's extra pawn is not so significant as Black is active and White's pawns are weak. **20.Rxe8**
[20.Bxg6 Nxg6 21.Ndf5 f6 22.Be3]
20...Rxe8! 21.Re1 Re5! Black is simplifying the position. After exchanging the light−squared bishops the c2−pawn is a target.
[21...Rxe1+ 22.Qxe1 Kf8 *(22...Ne6 23.Ngf5)*]
22.Bxf4 Rxe1+
[22...Nxf4 23.Be4]
23.Qxe1 Probably, Black's preparation was based on following correspondence game: **23...Qxf4 24.Qe8+**
[24.Ngf5 Bc5 25.a3]
24...Nf8 25.Bb3
[25.Ngf5 Bc5 26.Bb3 Bxb3 27.axb3 g6 28.Qe3 Qxe3 29.Nxe3 Bxd4 30.cxd4 Ne6]
25...Bxd4 26.cxd4 Bxb3 27.axb3! In the simplified position White is trying to create some problems for Black, but with precise play Ding held the draw.
27...Qf6
[27...h6 28.Ne4 Qc1+ 29.Kh2 Qxb2]
28.Qe4 g6
[28...Qe6 29.Qxe6 Nxe6 30.Ne2]
29.Ne2 Ne6= There is no doubt both players knew the result of the game at this point. White has some symbolic advantage due to his better pawn structure, but it is even hard to imagine player of Ding's level would lose such a position. Still, as a sign of modern chess, game continued for quite a long time.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Bg5 h6 7.Bh4 a5!?
Black surprises his opponent with an extremely rare move. It has never been seen at a high level. You can just find a few examples of correspondence chess. Black's idea is similar to the 7...a6 line. Black vacates the a7−square for the dark−squared bishop, but this time he also fights for space on the queenside. The main drawback is, as usual, the weakening of the b5−square.
[Earlier we considered two main lines: 7...a6 in Giri,A (2768)−Kovalev,V (2660) Wijk aan Zee 2020 CB05 2020 [Mikhalevski,V]]
[and 7...g5 in Salem, A (2656)−Ding,L (2760) Sharjah UAE 2017 [Mikhalevski,V]]
8.Nbd2 Grischuk delays short castling, as he is afraid of a possible attack on the kingside. **8...Ba7** Black is also not in a hurry to castle short. **9.h3**
A prophylactic move, which doesn't seem to promise any advantage. Although it's difficult to prove this after other moves, too.
[After all, 9.0−0!? can be played. g5 10.Bg3 0−0

[Another possible way of playing is 9.a4]
9...g5 10.Bg3 0−0 Despite weakening his position on the kingside Giri isn't afraid of castling short. This is, in fact, a typical idea in the Giuoco Piano with Bg5. **11.Qe2!?** Alexander prepares long castling.
[11.Bh2!? makes sense, preventing 11...Nh5 idea. a4 *(*Now *11...Nh5?* runs into *12.Nxe5!±* This idea wouldn't work with the dark−squared bishop on g3 in view of 12... Nxg3 13. Nxc6 Bxf2+ 14.Kxf2 Nxh1+. *)* 12.Bb5 a3 13.bxa3 Ne7 with mutual chances.]
11...Kg7?! Probably too slow.
[11...Nh5!? is interesting.
A) 12.Nxe5? still doesn't work. Nxg3 13.Nxc6 Nxe2 14.Nxd8 Nf4 and the knight in d8 is trapped, while 15.Nxf7 runs into *(*or *15.g3 d5!−+)* 15...d5!−+;
B) 12.Bh2 Ng7! getting ready for the ...f7−f5 advance.]
12.0−0−0 Bd7! Black completes development and prepares queenside play. **13.Bb5!±** This way the Russian

GM wants to stop Black's queenside attack and anticipates an exchange of the light−squared bishops which leads to a weakening of the f5−square.

[13.Kb1!? deserved serious attention.]

13...Qe7

[After 13...Ne7 14.Bxd7 Qxd7 15.Kb1! Ng6 16.d4 Qe6 17.dxe5 dxe5 18.Nc4 Nf4 19.Bxf4 exf4 20.e5!± Black experiences problems.]

14.Bh2!? A useful waiting move. Grischuk asks his opponent to demonstrate a plan. **14...a4! 15.a3!±** White stops the advance of the a−pawn, declining the offer correctly. Sasha has outplayed his opponent. Black doesn't have any active plan, while White can exploit the f5−square by bringing his knight via f1 to e3 and prepare the d3−d4 break or a kingside attack.

[15.Bxa4? would allow Black to open the a−file and create an initiative. Bc5! 16.Bb3 b5 17.a3 Rfb8 with serious counter chances on the queenside.]

15...Nb8?! A risky exchange of the light−squared bishop, as it weakens the f5−square.

[An attempt to get rid of the annoying bishop on b5 by means of 15...Bc5 16.Kb1 Ra5 is strongly met by 17.d4! exd4 18.cxd4 Rxb5 19.Qxb5 Bxd4 20.Qxa4 Bxf2 21.Rhf1 Bb6 22.Qc2± and Black's compensation is insufficient.]

16.d4 This thematic break in the centre could be delayed for a few moves. Exchanging the light−squared bishops was more important. Nevertheless, White retains a clear edge.

[The direct 16.Bxd7! Qxd7 17.Nf1 Nc6 18.Ng3 Ne7 19.d4+− leads to a strategically winning position for White.]

16...exd4 17.cxd4 Nc6 Black attacks the d4−pawn and keeps the light−squared bishops. **18.e5** Probably it wasn't necessary to rush with this move either.

[18.Qd3!? retaining his central dominance was a good alternative.]

18...dxe5 19.dxe5 Nd5 20.Ne4 Be6 21.Rhe1? This "natural" move is a mistake.

[Instead White had to double rooks on the d−file in order to deal with the strong knight on d5. For example, 21.Rd3! Rfd8 22.Rhd1 Nf4 *(22...Bb6 23.g4!±)* 23.Bxf4 gxf4 24.Bxc6 bxc6 25.Qd2! Rxd3 26.Qxd3± and Black's pawn weaknesses promise White the upper hand.]

21...Rfd8 Surprisingly, Black is already doing fine. **22.Qc2?** White misses a strong tactical idea.

[22.g4! was correct, preparing an attack on the kingside by means of 23.h4. Na5 23.Kb1 Nb4! 24.Nc3! *(24.axb4? Qxb4−+* leads to a decisive attack. *)* 24...Nd5 with equal chances.]

22...Ncb4! 23.axb4 Nxb4 24.Rxd8

[24.Qe2 Na2+ 25.Kb1 Qb4!−+ leads to a powerful attack.]

24...Nxc2 25.Rxa8 Nxe1 26.Nxe1? The decisive mistake in a dangerous position.

[26.Nfd2! stabilizing the position was necessary. Bf5! 27.Kd1! Bh7!! This move, which has the point of covering the g8−square against White's Nf6, is extremely difficult to find. This is also the only way to an

advantage. 28.Nf6 Qc5 29.Nxh7 Kxh7∓]

26...Qb4!−+ Now White is in trouble.

27.Nd3 Qxe4 28.Rxa7 c6 29.Rxa4 Qxg2 A short, but very interesting game. Grischuk reacted well against Black's rare 7...a5 and obtained an edge, but then missed Black's counter attack and his position collapsed quickly. 11...Nh5 is worth a try for Black, as his slow play in the game led to a stable edge for White.

Stohl,Igor Giri,Anish: 'I had annotated this game in 2017 and I had put so much effort into it that time that there isn't much I can add now, only to confirm that the engines of today agree with all the assesments. Not that surprising, I mean it is 2017 after all, not the 90's or anything.' **1.e4 e5 2.Nf3 Nc6 3.Bc4** Stohl,Igor Giri,Anish: 'Philosophically speaking, I always found this move less logical than 3.Bb5, as it doesn't constitute a threat. The f7 point is going to be firmly protected after the eventual 0−0, while in the Spanish Black needs to spend a few tempi protecting the cornerstone of his position, the vulnerable e5 point. The difference between these moves surely runs deeper than this simple logic, but it is a fact that for the moment Black has found various antidotes against the Italian, whereas time and again Black is suffering after 3.Bb5, having to remember 40 moves of opening theory in the Berlin endgame. Nowadays people who don't play 1.e4 and only focus on the closed openings with White are scarce, like endangered species that we have to treat with love and care. "Mr. Dortmund" Vladimir Kramnik, has introduced 1.e4! into his repertoire and although there are a couple of top players who still didn't (remember, love and care!), my opponent in this game, decided to follow in the footsteps of the Russian giant. 1.e4 is new in Ding Liren's opening repertoire.' **3...Bc5 4.0−0** The popularity of the Giuoco Piano remains unabated, with various move−orders being refined and explored in depth. Last year I commented on Anand−Giri, Moscow Candidates 2016 and Karjakin−Navara, Baku olm 2016; Carlsen also mostly prefers immediate castling. I'll follow up on my earlier notes from CBM 172 and 175 respectively.

[However, despite the numerous transpositional options, there can be some differences between the text−move and 4.c3 Nf6 5.d3 , when Black is at a crossroads: In CBM 176 we analysed Topalov−So, London 2016, which went

[Black also has some alternatives. Thus both Aronian and yours truly played 9...Be6
A) 10.g4? is hardly a good idea as White is not yet ready for aggression as his king is still in the centre. d5! 11.Qe2 Na5 12.g5?! Nxb3 13.gxf6? Nxc1 *(13...Nxa1* is also enough for a win. *)* 14.Rxc1 Qxf6−+ and soon Black won. Strohhaeker, R (2439)−Mikhalevski, V (2631)/Zurich 2009.;

[9...Ne7 transferring the knight to g6 is also playable.]
10.Qe2 White has to keep the queens on if he's thinking of an opening advantage.
[After 10.Ng3 dxe4 11.dxe4 Qxd1+ 12.Bxd1 h6 13.0−0 Be6
Black experienced no problems in Atlas, V (2460)−Almasi, Z (2595)/ Austria 1997.]
10...Be6 The most natural, Black gets on with development.
[10...dxe4 11.dxe4 Nh5
is an interesting alternative. For example 12.Bg5 Qd6 13.Ne3 Landa, K (2600)−Akopian, V (2706)/ Sochi 2006, and here Black should have played h6 , which after 14.g4 hxg5 15.gxh5 leads to a double−edged position.]
11.Ng3 dxe4 An attempt to equalize by means of exchanges.

12.dxe4 Bxb3 13.axb3 Ne8 Transferring the knight to d6.

Qe6 15.b4 h6 as in Malakhov, V (2663)−Najer, E (2605)/Moscow 2007.]

14.Nd2!? Ivanchuk is going to exchange the newcomer to d6 in order to have access to the f5−square.

15.Nc4 Qf6 A multi−purpose move. First, Black connects rooks, second he transfers the queen to e6, and finally he frees the d8 square for one of the rooks.

[In the only preceding game Black played 15...Nxc4 16.bxc4 Ne7 *(16...Qd7!? 17.0−0 Rad8 18.Nf5 Ne7* should be about equal. *)* 17.0−0 Qd6 18.b3 Rfd8 19.Ba3 Qf6 McShane, L (2620)−Werle, J (2575)/ London 2009 and now 20.Bxe7 Qxe7 21.b4 playing against the dark−squared bishop could have set some problems.]

16.Nxd6

[16.0−0!?]

[Karjakin,Sergey]

I started the tournament with 4 unimpressive draws. Zakhar Efimenko, who was also Kramnik's second in Kazan, at the same time had been playing in the Ukraine championship. He started with a couple of draws too, but just one day before managed to win a game! With Black against Ivanchuk I was not in an aggressive mood, but somehow I got the feeling that my series of draws would also finish soon... John Emms: 'For this second update of "Beating 1 e4 e5" I've continued to look for new developments and interesting games in the Italian Game over the last few months. We begin with a great game by Sergey Karjakin (but not such a good one by Ivanchuk!).' **1.e4** Karjakin Karjakin,S Karjakin **1...e5 2.Nf3 Nc6 3.Bc4** Having Black versus Vasily Mikhailovich is not an easy task but even more difficult is just to guess the opening. This move was already a surprise for me! **3...Bc5** It was my turn to surprise him! Before I had played only 3...♘f6, and if 4.d3 then 4...♗e7. **4.c3 Nf6 5.d3** Here I knew the theory very fluently and that's why I decided to make more moves off my own bat. The problem was that every move cost me a couple of minutes and Vassily's time advantage started to increase. **5...0−0 6.0−0 d6**
[Karjakin decides to avoid the trendy 6...d5 . It would have been interesting to see what Ivanchuk had planned against this.]

7...Ne7 John Emms: '!?' '!?' John Emms: 'Switching the knight to the kingside is of course a typical plan for Black, but doing it so quickly is quite unusual. In practice Black has normally played 7...a6 or 7...h6, but here Karjakin tries to do without any kind of preparation. The only way I can see for White to try to exploit an early ...Ne7 is with a quick d3−d4 before ...Ng6, and the strength of this idea really depends on White's 7th move

(see the variations above and below).' Over the board I had the idea not to lose time for ...a6 and ...♗a7 and instead transfer the knight to g6. **8.Re1** John Emms: 'Ivanchuk carries on with the normal plan.'

[8.d4 Bb6 9.dxe5 *(9.Re1 Ng6 10.Nbd2 h6* is okay for Black *)* 9...Nxe4 John Emms: 'looks like a slightly more favourable version (for Black) of the 7 Bb3 variation above. If' looks fine for Black. 10.Ng5 Nxg5 11.Bxg5 h6 12.Bxe7 Qxe7 13.exd6 cxd6 Black is fine and White's pawn on h3 could be vulnerable to tactics.]

8...Ng6 9.Nbd2 c6 John Emms: 'By this stage it's clear that Black can play more actively than ...a6 and ...Ba7, and Karjakin lines up a quick ...d5.'

[If 9...a6 10.Nf1 Ba7 11.Ng3 h6 12.Bb3 Be6 13.d4 we would transpose to Korneev−Campora, which is covered in the book.]

10.Nf1 White is making his plan, but Black is ready to start an operation in the centre. **10...d5** John Emms: '!?' '!?' John Emms: 'Karjakin decides to be the one to take action in the centre.'

[If Black delays then eventually White will push with d3−d4 and have chances of an edge, e.g. 10...Re8 11.Ng3 h6 12.Bb3 Bb6 13.d4 Qc7 14.Bc2 Be6 15.Be3 Rad8 and we have transposed to Radjabov−Harikrishna (see next game).]

11.exd5 Nxd5 Exploiting the fact that the e5−pawn is untouchable.

[I don't like 11...cxd5 12.Bb3 John Emms: '"appeals to me less, as the d5 and e5 pawns become targets for the white pieces." − Karjakin in 'New In Chess'.' and Black's pawns on d5 and e5 become a target for the white pieces.]

12.Ng3

[Of course White can not play 12.Nxe5? Nxe5 13.Rxe5 Bxf2+! with Black's advantage!]

12...h6

[It was also possible to play slowly 12...Qc7 but I wanted to prepare ... ♗e6.]

13.Bb3 John Emms: '?!' '?!' John Emms: 'I get the feeling that Ivanchuk − quite uncharacteristically − plays the next few moves on a kind of auto−pilot, selecting moves which he would probably choose in a simul display. Before he knows it, he's in position which might be beyond saving.' Not very ambitions.

[John Emms: 'When Black plays a quick ...d5, White must always try to play as actively as possible with his pieces; this is the only way to put pressure on Black.' Viorel Iordacescu offered a more interesting move: 13.Nh5!? John Emms: '!' '!' John Emms: 'as suggested by GM Viorel Iordachescu, looks the most challenging move. The key point is that against the natural' with the main idea Re8? John Emms: 'White can exploit the ...h6 move:' *(13...Qb6? 14.Qd2!* is also dangerous for Black.*;* something like *13...Qc7* is better, but White has interesting ideas like *14.Nxe5 Nxe5 15.Bxd5 cxd5 16.d4)* 14.d4 John Emms: '!' '! exd4 15.Rxe8+ Qxe8 16.Bxd5 cxd5 17.Bxh6!± John Emms: '!' '!' John Emms: 'winning at least a pawn and leaving Black in big trouble.' So Black should prefer 13...♕c7 with an

about equal position.]
[13.Nxe5? fails to a typical tactic: Nxe5 14.Rxe5 Bxf2+! 15.Kxf2 Qf6+]
13...Re8= Now I think we can judge the result of the opening. Black has completely equalised and has an easy game. **14.Bd2**
[John Emms: 'Karjakin was expecting' I expected more 14.d4 exd4 15.Rxe8+ Qxe8 16.Bxd5 cxd5 17.Nxd4 John Emms: '"with a roughly equal position". This was actually played in H. Elwert−O.Rause, ICCF email 2002, and was soon drawn.' with a balanced position where the weak pawn on d5 is compensated for by the advantage of the two bishops.]
14...Bb6
[It was also possible to start from 14...Be6 with good play for Black.]
15.Qc2?! John Emms: 'Another "simul" move.' Starting a wrong plan.
[John Emms: 'Had he spotted the danger, Ivanchuk would have definitely played' It was time to think about equalising: 15.d4 exd4 16.Rxe8+ Qxe8 17.Bxd5 *(17.Nxd4* with an equal position. *)* 17...cxd5 18.Nxd4=]

16.Rad1? Continuing with a wrong plan which has a tactical refutation! White had to try to equalise.
[John Emms: 'White's should still play' After 16.d4 exd4 17.Nxd4 John Emms: 'although by this stage Black can probably claim a slight edge after' Bxd4 18.cxd4 Ndf4 John Emms: 'as indicated by Karjakin.' Black is a bit better.]
[Probably the most presice was 16.Re4 Nf6 17.Re2 Bxb3 18.axb3 Qd7 19.Rae1 and White is close to equalising.]
16...Bxh3! John Emms: 'A tactical shot out of seemingly nowhere, giving Black an advantage even against best defence by White (which Ivanchuk fails to find).' A nice and unexpected blow! Mainly because Black has just played ...♗e6 and is now "losing" a tempo with ♗e6−h3! It was funny that I did not see this idea on the previous move, but in this position, I noticed that White's queen is far from the king's flank and I suddenly found this idea! **17.c4?** We both thought that this move is the strongest, but after it, Black is clearly better!
[John Emms: 'Karjakin gives' 17.d4 Bg4 18.c4 John Emms: 'as White's path of strongest resistance, and suggests' Rc8! John Emms: 'as the way to keep an advantage for Black. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Nakamura is one of the very few modern top players who may play any gambit. However, we shouldn't forget that Kasparov also used to play the Evans Gambit. **4...Bxb4** Black accepts the challenge. **5.c3 Bd6** The fourth most popular system, though it was even played by Grischuk. Black's idea is to protect the e5−pawn and finish development as quickly as possible, though I can't help but evaluate this move as dubious since the position of the bishop in front of the d−pawn is so ugly. **6.d4 Qe7**
[The main line 6...Nf6 occurred in Petrosian, T (2623)−Volokitin, A (2671)/Budva MNE 2009/[Mikhalevski, V].]
7.0−0 Nf6 This position has been known since the middle of the 19th century!
8.Nbd2!? A very interesting idea. It turns out that it's difficult to find a constructive idea for Black. It's also curious that this position is already almost new.
[Both Morphy and Anderssen played 8.Bg5]
8...0−0 9.Re1 Ba3? Black is trying to get rid of the bad bishop, but loses the central pawn. **10.Nxe5 Nxe5**
[10...Bxc1 11.Nxc6 dxc6 12.Rxc1± is also in White's favour who is controlling the centre.]
11.dxe5 Ne8 12.f4?! This natural move allows Black to untie his position.

12...Bxc1 13.Rxc1 d6 The queen is much better situated on e7 than on a3.

14.exd6 cxd6 Now Black will suffer from a weak pawn on d6.

[14...Nxd6 15.Bd3 Rd8 was better, though White is still slightly better after 16.e5 Nf5 17.Ne4]

15.Nf3

[15.Qb3!? deserved attention.]

15...Bg4! 16.h3 Rc8 17.Bb3 Bxf3 18.Qxf3± White is better due to the strong centre, a weak pawn on d6 and also the superior bishop. **18...Rc5**

27.c4! Qb1+ Black goes for a poisonous pawn.

[27...Rc7!? was better.]

28.Kh2± Qxa2? Loses instantly.

31...Kxg7 32.Rg3+ Kf8 33.Qh7 and Black resigned as he gets mated. Nakamura's 9.Nbd2 seems to set Black problems and so my evaluation of 5... Bd6 seems to be confirmed, at least in the 6...Qe7 line − probably Black has to prefer 6... Nf6.

[6...exd4 used to be the main line.]
7.Qb3 This idea has been known since the game Morphy, P−Ayers, T/Alabama 1855! **7...Qd7!** The main line. Black is protecting the f7−pawn.
[Morphy's opponent played 7...Qe7!? , which leads to wild complications. This move requires a lot of analytical work. 8.d5! Nd4 9.Bb5+?! *(9.Nxd4!* is more challenging. *exd4 10.Qa4+ Bd7 11.Qxa5 Qxe4+ 12.Kd1* and White seems to be better, although the position remain sharp. Morphy, P−Ayers, T/Alabama 1855]
8.dxe5 White wins back the pawn which he sacrificed a few moves ago.
[8.Nbd2!? was played in Short, N (2645) −Sargissian, G (2676)/Wijk aan Zee NED 2008/[Tony Kosten]. You can find this game in our PGN Archive.]
[8.0−0 is a logical alternative.]
8...Bb6! 9.a4!? I'm pretty sure that Nakamura came to this idea with the help of a computer, as 9.a4 is the first choice of Houdini. It looks anti−intuitive to allow an exchange of the strong light−squared bishop and so the text has never been tested before. White is trying to compensate this exchange by some concrete play. **9...Na5 10.Qa2 Nxc4 11.Qxc4 Ne7** Black has to finish development. **12.exd6 cxd6** The first achievement: White has created an isolated pawn. **13.0−0**
[13.a5 Bc5 14.0−0 0−0 15.Nbd2 Qc7 also looks good for Black.]
13...0−0 14.Qd3 This retreat might be inaccurate.
[14.a5!? Bc5 would transpose into 13. a5.]
14...Ng6!? The knight is going to e5.
[Black could have also considered 14...d5 15.a5 Bc7 16.Ba3 Re8 17.Rd1 *(17.Bxe7?* is strongly met by *dxe4!∓)* 17...Ng6! 18.Qxd5 Qxd5 19.exd5 Bxa5 20.h3 with roughly equal chances.]
[14...Nc6!? deserved serious attention, with the possible follow−up: 15.Nbd2 Ne5 *(*After *15...Rd8 16.Nc4 Ne5! 17.Ncxe5 dxe5 18.Qxd7 Bxd7 19.Nxe5 Be8* when Black's compensation is sufficient for a pawn, but no more than that. *)* 16.Qd5 Qc7!∓ with a slight edge for Black.]
15.a5 Bc5 16.Be3! It makes a lot of sense to exchange one of Black's

bishops. **16...Re8! 17.Nbd2**
[17.c4 with the idea of 18. Nc3 is a natural alternative, although Black can still force the queen's knight to d2. Qc6 18.Nbd2=]
17...Bxe3
[After 17...Qc7! with the idea of ... Bd7−c6 Anand would retain chances to obtain an advantage.]
18.Qxe3 d5= Vishy is equalising.
19.Rfe1! dxe4 It wasn't necessary to hurry with this move.
[19...Qc7!? would be more accurate. 20.Qd4 dxe4 21.Nxe4 Bg4=]
20.Nxe4 Qe7 It's understandable that Vishy wants to develop his queenside as soon as possible, but he could have started with 20... Re7.
[20...Re7 with the idea of 21...Qc7 was better. Black finishes his development and soon equalises. For example, 21.Qd4 Qxd4 22.Nxd4 Be6 23.Nxe6 Rxe6 24.Nc5 Rxe1+ *(24...Rc6!?)* 25.Rxe1 b6 26.axb6 axb6 27.Nd7 b5=]
21.Nd6! Qxe3 22.fxe3! Rd8 23.Red1 Now there is some pressure on the queenside, but the ex−World Champ solves the problem without any visible effort. **23...Rb8! 24.Rd4**
[24.c4 b6 25.axb6 axb6 26.Ra7 Be6 is similar to the game.]
24...Be6 25.c4 b6! It's important to make this move before White plays 26. c5. **26.axb6 axb6 27.Ra7** White has activated his rook, but there are no pieces to support it.
[After 27.Ng5 Ne5 28.Nxe6 fxe6= White can't play 29.Ra7?? because of Nc6−+]
27...h6!? Covering the g5−square Black prevents 28.Ng5.
[There was also nothing wrong with the immediate 27...Ra8!?=]
28.h3 Ra8 29.Rb7 Rdb8 30.Rc7 Ra5
[or 30...Ra2=]
31.Kh2 Rc5 32.Ra7 Kf8 33.g4?!
This move was slightly inaccurate and allowed Black to play on.
[33.Re4!? deserved attention, with the idea to meet Ne7?! with *(33...Rc6 34.Rd4 Rc5*= is equal. *)* 34.Nd4±]
33...Ra5 Vishy forces a draw.
[33...Ne7! 34.Rf4 Nc8! 35.Nxc8 Rbxc8 although it's hard to believe that Black can win after 36.Rb7 Bxc4 37.Rxb6 with pawns on one side.]
34.Rc7 Rc5 35.Ra7 Ra5 36.Rc7
The Evans gambit might be a dangerous weapon if one doesn't know how to deal with it, but Anand showed that if Black plays correctly he is the side with chances (17...Qc7).

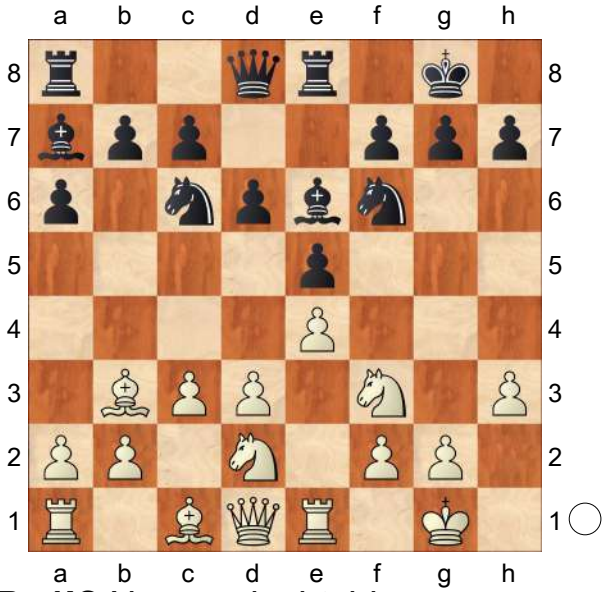
Sinquefield Cup 7th (8) 25.08.2019
[Kapnisis,Spyridon]

In the current game Nepomniachtchi came up with an interesting idea (11. ♗a4!?) in a well known position of the Italian, leading the game into uncharted waters. Aronian didn't react in the most solid way and Nepomniachtchi got the chance to get a serious positional grip on the queenside which proved enough to give him the win. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.0−0 d6 6.c3 a6 7.Re1 Ba7 8.Bb3 0−0 9.h3 Re8!?** Aronian decides to refrain from playing

the usual h6 and go for the immediate ♖e8, ♗e6.

[9...h6 is more common]

10.Nbd2 Be6



11.Ba4!? Nepomniachtchi comes up with an interesting new idea. White provokes b5 before retreating his bishop to c2.Curiously enough White players haven't used this idea more although the current game was rather successful.

[11.Nf1]

[11.Bc2]

[11.Bxe6 are more common options]

11...b5 12.Bc2 h6

[12...d5?! 13.Ng5! is good for White]

[13.a4!?

A) 13...d5 14.d4!? is an interesting pawn sacrifice dxe4 *(14...exd4 15.e5 Nd7 16.Nb3 dxc3 17.bxc3⩱* I like White's chances of an attack on the kingside. *)* 15.Nxe4 Bd5 16.Nxf6+ Qxf6 17.axb5 axb5 18.Qd3 e4 19.Qxb5 *(19.Qe2 Bc4! 20.Qe3 Kf8! 21.Rxa7 Rxa7 22.Ne5 Qe6!* Black should be fine *)* 19...Nxd4! 20.Nxd4 *(20.cxd4 Bc6⇄)* 20...Bxd4 21.cxd4 Bc6 22.Bg5! hxg5 23.Qc5∞;

[14...Qxd5 15.Ng3 Rad8 16.Qe2 The inclusion of ♗a4 b5 seems to be in white's favour since Black's queenside (especially the ♘c6) is a bit more loose than usual.]

[14...Nxd5 15.Ng3]

15.Ng3

[15.Be3!?]

15...Nh7?! Aronian starts a rather slow manoeuvre, bringing his knight to g6 in order to support even further his pawn on e5.

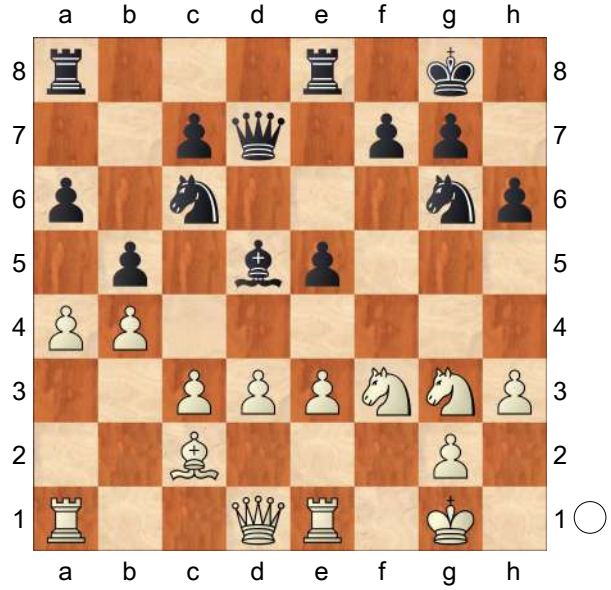
18.Be3! Nepomniachtchi decides to provoke the exchange of dark−squared bishops which is in his favour. **18...Bxe3**

19.fxe3! Nepomniachtchi restricts Aronian's knight which is not allowed access to f4.

[19.Rxe3 Nf4∞ Black is quite active

and there is no clear way for white to put pressure on e5.]

19...Qd7



20.Nd2! White's knight is redirected to b3 or e4 in order to reach the important outpost on c5.Black's position looks rather uncomfortable and it seems difficult to me to find a good plan. Aronian's plan to bring the queen to c6 failed to equalise. **20...Nce7 21.Nb3**

[21.Nge4!? Qc6 22.Qe2 f5 23.Nc5±]

21...Qc6 22.Qd2 Nh4?!

Aronian decides on placing his knight on h4 and vacating the−g6 square for his queen creating some threats against g2. As the game progresses it will be proven that the knight on h4 will cause Black some additional problems.

[26.Qf2!? f4 27.Nf1 Qf6 28.d4 Black's position will soon collapse.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0–0 Nf6 5.d3 0–0 6.Bg5 Surprisingly we have never considered this in the current position, although it is common. As usual in positions with Bg5 White transfers the bishop to g3 to put pressure on the e5−pawn and play d4 at an appropriate moment.

6...h6 7.Bh4 Be7 This typical retreat makes sense, as Black unpins the f6−knight, although at the cost of a tempo.
8.Bg3 d6 9.a4 White avoids an exchange of the light−squared bishop by means of ...Na5. Now it obtains an escape square on a2. **9...g6?!** Probably not the most accurate move. Black's idea is to take control of the h5−square in order to play 10... Nh5.
[9...Nh7 10.h3 Ng5 11.Nbd2 Be6 is another way of playing. 12.Nxg5 Bxg5 13.Bxe6 fxe6 14.Nf3 Bf4 Demchenko,A (2626)−Najer,E (2648) Sochi 2020 and now 15.a5!? promised some edge for White.]
[My computer suggests a new move 9...g5!? 10.c3 g4 11.Ne1 *(11.Nh4* is strongly met by *Nxe4!∓)* 11...Nh5 12.Nc2 Bg5 13.a5 a6 14.f3 Nxg3 15.hxg3 gxf3 16.Qxf3 Kg7 with equal chances.]
[The immediate 9...Nh5? would be wrong due to 10.Nxe5! Nxg3 11.Nxc6±]
10.h3!± Now White saves the dark−squared bishop from exchange.
10...Kg7?!
[10...a6 11.a5 is similar to the game.]
[10...Nh5 11.Bh2 Bg5! 12.Nc3 Bf4 was worthy of attention.]
11.a5 Giri takes more space on the queenside.
[In the only preceding game White played 11.Re1 Na5 12.Ba2 c5 13.c3 Be6 14.Bxe6 fxe6 15.d4± with a clear edge for White in Supi,L (2570)−Gustafsson,J (2640) chess24.

11...a6 Mamedyarov stops the advance of the a−pawn to a6. **12.Nc3 Be6** Black eliminates the strong light−squared bishop. **13.Bxe6 fxe6 14.d4!⩲** Black is already under serious pressure.

14...Nh5

[14...exd4!? was worth a try, although after 15.Nxd4 Qd7 16.e5! Nh5 *(16...Nxe5 17.Re1 c5 18.Bxe5 cxd4 19.Bxd4 e5 20.Be3±* yields White a a clear edge as well. *)* 17.exd6 Bxd6 18.Nxc6 Qxc6 19.Qd4+ Kh7 20.Bh2!⩲ White is better thanks to the weak e6−pawn and the unsafe king.]

15.Bh2!? White keeps pressure on the e5−pawn and provokes an exchange on d4.

[15.d5! was even stronger. For example, exd5 16.exd5 Nb8 *(16...Nxg3 17.fxg3 Nb8 18.Ne4 Nd7 19.Qd3 Nf6 20.Nfd2* leads to a decisive edge for White. *)* 17.Ne4 Nd7 18.c4 Ndf6 19.Nfd2± with an obvious advantage for White.]

15...exd4

[15...Bf6?! 16.d5 would be extremely unpleasant for White.]

16.Nxd4 Qd7! 17.f4 Now it's time to take space on the kingside.

[17.e5! Once again this move, which creates weaknesses in Black's pawn structure, was very strong. Rad8 *(17...Nxe5?* is a blunder due to *18.Bxe5+ dxe5 19.Nf5+* and White wins a queen. *)* 18.Nxc6 Qxc6 19.Qg4! d5 20.Ne2! The knight is going towards d4. Bc5 21.Ra3! Kh7 *(21...Bxa3?* is bad due to *22.Nd4+−)* 22.Rc3!± with a clear positional advantage for White.]

17...Nxd4

[17...Rad8 was useful.]

18.Qxd4+ Kh7 19.Qd3 White prepares the f4−f5 break. **19...Rf7**

[19...Ng7⩲ was a better way to cover the f5−square, although Black's position remains passive.]

20.Rf3 A slight inaccuracy. Anish makes a quiet move, which throws away part of his advantage.

[20.f5! was asked for. A pawn sacrifice will be compensated extremely well. exf5 21.exf5 Rxf5 22.Nd5! Ng7 *(22...Rxf1+ 23.Rxf1 Rf8 24.Rxf8 Bxf8 25.g4)* 23.g4 Rff8 24.Rae1± with a clear edge for White.]

20...Raf8 21.Raf1 Ng7 22.g4 White insists on the break f4−f5. **22...c6 23.Ne2! d5!** Black creates counterplay in the centre. An exchange of the e−pawn will make the f4−f5 break impossible. **24.c4 dxe4?!** An inaccuracy.

[24...Bb4! exploiting the weakness of the a5−pawn was more precise. 25.cxd5 cxd5 26.f5 exf5 27.exf5 gxf5 28.Be5 Qe6 29.Bxg7 Kxg7 30.Re3 Qd6 31.Nd4 Bc5! with equal chances.]

25.Qxe4 Qd2!? A double attack on the a5 and d2−pawns.

[Both 25...Bd8]

[and 25...Bf6 deserved attention.]

26.Kh1! Qxa5 27.Nc1 White transfers the knight to e5 via d3. This clever manoeuvre is not very effective.

[In case of 27.Nd4!? Bf6 28.f5 *(28.Bg1 Re8)* 28...exf5 29.gxf5 g5 30.Ne6 Re8 Black equalises.]

27...Bf6?! An inaccuracy.

[The bishop would be better placed on d6 and so 27...Bd6 had to be

preferred.]
28.Nd3 Rd7 29.Bg1 Rfd8 30.Ne5
A slight inaccuracy.
[A waiting move, such as 30.Bf2! was a better try to create some problems, although they should be solvable thanks to the correct b5! 31.b3 bxc4 32.bxc4 Bd4! 33.Bh4 with some slight pressure.]
30...Bxe5 31.fxe5 Rd1! An important move. now the position is equal. **32.Rf6 Rxf1 33.Qxg6+ Kg8 34.Qf7+**
Giri decides to repeat moves.
[34.Rxf1 Qxe5= is also fine for Black.]
34...Kh7 35.Qg6+ Kg8 36.Qf7+ Kh7 37.Qg6+ 6.Bg5 is an interesting way to create some problems, but Black shouldn't play 9...g6. Instead, both 9... Nh7 and 9...g5 deserve attention.

23.Nh2 d5 Starting activity in the centre but weakening the c5−square. There is a difference between 17...d5 and now. At move 17 the b4−pawn was unsupported which made ...d4 more powerful. The knight on f3 was another target (for ... ♘xh3) if White moved the queen from d1 and the rook on e3. 14.b4N A logical novelty by Karjakin. White's idea is to play on the queenside with ♗b2, c4.

[14.Nf1 is the straightforward continuation, Bd7 15.Ng3 c5 16.Be3 exd4 17.cxd4 c4 18.Qd2↑ Grandelius−E.Hansen, Wijk aan Zee 2017, with the initiative.]

14...Bb7 15.Bb2 Qd7 16.c4

This is the idea of White's setup. Normally it is very rare that White has 5 pawns next to each other on the 4th rank. **16...exd4?!** A dubious move, because Black will have problems on b5.

17.cxb5! The right reply! **17...d3?!** Another inaccuracy. At first sight 17...d3 is a logical intermediate move, because ...♘f4 will come with tempo. On the other hand the light−squared bishop will be strong on the a6−f1 diagonal.

[However 17...axb5 18.Nxd4 bxa4 19.Bxa4 c6 20.Qc2± is also comfortable for White.]

18.Bxd3 Nf4 19.Bf1! This is the right square for the bishop. White sacrifices the e4−pawn, because on the queenside he will be stronger. **19...Nxe4**

[19...axb5 20.Bxb5± is also better for White.]

20.Nxe4 Bxe4 21.bxa6 Qf5
Threatening ...♘xh3. **22.Ra3!**
A great move, White activates his ♖ from the 3rd rank and protects the f3−knight. **22...c5 23.Nh4** A strong intermediate move! Now it is not easy to choose for Black where he will put his queen, moreover ♖g3 can be unpleasant at an appropriate moment. **23...Qe6**
[23...Qg5? loses, as 24.Rg3 Qxh4 25.Rxg7+ Kf8 26.Qxd6++− and wins.]
24.b5+− White's queenside pawns are very dangerous. a5, b5 is his main threat. **24...c4 25.Bd4** The best practical move. White frustrates all counterchances; now he neutralises the a7−bishop.
[25.a5 Bc5]

14.Qc2 Qd7]

13...Qd7 14.Nc4 The text is a novelty. White puts pressure on the e5−pawn, but it doesn't prevent Black from pushing the d−pawn.

[14.Nf1 is more common. d5 15.Ng3 Rd8 16.Bb2 b5= Swiercz,D (2655)−Jumabayev,R (2609) Astana 2019]

14...d5! The correct reaction. **15.exd5** White forces Black to capture with his queen.

[15.Ne3!? Is another attempt to set problems, but after Bxe3 16.Bxe3 Ne7!= Black should be ok.]

15...Qxd5 16.Ne3 Qd7? A mistake.

[16...Bxe3! was necessary. 17.Bxe3 Rae8 18.Rad1 e4 19.dxe4 Qxe4 20.Qb3 b5!?= and Black seems to be fine.]

17.Nc4?!

[White could play 17.b5! right away, avoiding ...Bxe3.]

17...Qd5 18.Ne3 Qd7? Grischuk repeats the same mistake again.

[Once again Black had to play 18...Bxe3!]

19.b5! After this move Black will be under pressure. **19...Na5** Alexander attacks the b5−pawn.

[19...Ne7 loses a pawn to 20.bxa6 bxa6 21.Nc4 and there is insufficient compensation. For example, e4 22.dxe4 Ng6 23.e5 Qd5 *(23...Nd5 24.Bd2±)* 24.Ne3 Bxe3 25.c4! Qe4 *(25...Qa5? 26.exf6! Bxc1 27.Rxe6 fxe6 28.Qxg6+−)* 26.Qxe4 Nxe4 27.Rxe3 Ng5 28.Nd4! Ree8 29.Nc6±]

20.c4 Bd4! The best practical chance.

[20...Rd8? is wrong in view of 21.Bd2+− In fact, White created this threat with his last move.]

21.Rb1!± White has created a serious threat of 22.Nf5, which is difficult to deal with. **21...axb5 22.axb5 Ree8** This way Black stops 23.Nf5

[After 22...c5 23.Nf5 b6 24.N5xd4 exd4 25.Rxe6 Qxe6 26.Bf4± White is clearly better thanks to the misplaced knight on a5.]

23.c5! Now the knight on a5 starts to feel lonely, as he won't be able to enter the game in the near future. **23...Nd5** This trade only helps White, but good advice for Black was already costly.

[Perhaps 23...Bxe3 24.Bxe3 Qd5± is relatively better.]

24.Nxd5 It makes a lot of sense to leave Black with the knight on a5 by means of a trade of all the other minor pieces.

24...Qxd5 25.Nxd4 exd4?! An inaccuracy in a difficult position.

[25...Qxd4 26.Re4 Qd5 27.Be3 Re6± is the lesser evil.]

26.Rxe8+ Rxe8 27.Bf4 Re7 28.Qa4 b6 29.c6 The knight is trapped on a5, the rook can't move away from e7 and White easily wins the d4−pawn. The game is over. **29...Kh7 30.Rb4 Qe6 31.Rxd4 f5 32.Be3 g5 33.Qb4 Rg7 34.Rd8 Nb3 35.Bd4**

[35.Rd7!+− would be more in the spirit of the previous play.]

35...Re7? This move loses on the spot, but Black is lost anyway.

[35...Nxd4 36.Qxd4 Kg6 37.Rd7 Re7 38.g4!+− is hopeless too.]

36.Qxe7+ A well−played game by Nepomniachtchi. 16...Bxe3 is a must for Black in this line, while 16...Qd7? leads to an unpleasant position.

1.e4 Giri,Anish **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.0−0 d6 6.c3 a6 7.Bb3** Giri,Anish: 'The old−fashioned way of playing. As far as I remember, in 2015 the trend of going a4 was not yet around.' **7...0−0 8.Nbd2** Mikhalevski, V: 'Here Black has at his disposal a few options.' **8...Be6**

[8...Re8 occurred in Harikrishna, P (2727)−Radjabov, T (2734)/Beijing CHN 2014/[Mikhalevski, V].]

[8...Ba7 is the most popular one, which after 9.h3 h6 10.Re1 Be6 11.Nf1 Re8]

9.Bc2 Giri,Anish: 'Keeping the bishops is the most ambitious way of playing with White. Black usually gets the d5 break and ends up to be the side with more space in the center, but White in turn gets some kingside initiative and/or play against the e5 pawn.'

[White also tested 9.h3]

[9.Re1]

[and 9.Nc4]

9...Ba7 Mikhalevski, V: 'Before playing ... d5 Anand wants to place his pieces on safe positions. In particular this move avoids the Nxe5 idea after ...d5.' Giri, Anish: 'This move is always OK, but more sophisticated is to play h6/Re8/d5 with the bishop on c5, keeping the option of the solid Bf8 later on.'

[The immediate 9...d5!? was introduced into GM practice by Aronian in a blitz game in 2009. 10.h3 h6 11.Re1 Re8 12.Qe2 Bf8 13.exd5 Qxd5 14.Ne4 Nxe4 15.dxe4 Qb5 16.Bd3 Qa4 17.Bc2 Qb5 18.Bd3 Qa4 19.Bc2 Qb5 with an early draw in Gelfand, B (2758)−Aronian, L (2786)/Moscow 2009.]

10.h3 Mikhalevski, V: 'A useful move. Before playing Re1 Giri covers the g4−square in order to prevent the ...Ng4 idea.' **10...Re8** Mikhalevski, V: 'A very rare move order.'

[Usually Black starts with 10...h6 in order to prevent 11.Ng5, however Vishy isn't afraid of it.]

11.Ng5 Giri,Anish: 'empty shot here.'

11...Bd7 12.Ngf3

[12.Bb3!? deserved attention, with the idea of provoking Black's rook to a less reliable square and thus trying to get a better version of the game. Giri, Anish: 'was the plan, but after' Re7 Giri,Anish: 'Black will push h6 and go Be6 and I likely just lost some time.' 13.Re1 h6 14.Ngf3 Na5 15.Bc2 Nc6 Now Black's bishop is on d7 instead of e6, while the rook is on e7 instead of e8. Both factors seem to be in White's favour.]

12...Be6

[Once again Black could start with 12...h6 in order to avoid the aforementioned line with Bb3.]

13.Re1 Mikhalevski, V: 'Anish isn't interested in a repetition of moves and prepares a typical (for these positions) transfer of the queen's knight to g3 via f1. ' **13...h6** Mikhalevski, V: 'The players have transposed to some better known lines with an early ...h6 or ...Re8.' Giri, Anish: 'Black decided to play h6 after all, as d5 is met with Ng5 when there is some potential for tactics.'

[After the immediate 13...d5

Black didn't like 14.Ng5 when he has to part with his light squared bishop as Bc8? is strongly met by 15.exd5 Nxd5? *(15...Qxd5 16.Bb3+−)* 16.Qh5+− and White wins.]

14.Nf1 Mikhalevski, V: 'This position is even more popular as some other transpositions have occurred.' Mikhalevski, V: 'transposed into the text in Radjabov, T (2788)−Naiditsch, A (2712) / Istanbul TUR 2012/[Mikhalevski, V]. See below.' **14...d5** Mikhalevski, V: 'The main line. Now everything is ready for this central break.' **15.exd5** Mikhalevski, V: 'The most critical line.' Giri,Anish: 'The other plan is to go Qe2 and keep the pawn on e4. I used it in an important blitz game against Magnus Carlsen once and the game was very messy, but at some point I was doing very well.'

[15.Qe2 is less popular and can be found in the recent game Naroditsky, D (2633) −Jakovenko, D (2742)/ Tsaghkadzor ARM 2015/ [Mikhalevski, V].]

15...Bxd5 Mikhalevski, V: 'Black had tested all three recaptures, while the text is the most popular option.'

[Earlier I looked at 15...Qxd5 Radjabov, T (2788)−Naiditsch, A (2712)/Istanbul TUR 2012/ [Mikhalevski, V].]

16.Ng3 Mikhalevski, V: 'As soon as I thought that we had left the official theory of ChessPublishing I suddenly realised that the players transposed into a game which was annotated by my predecessor in charge of this section, Paul Motwani. White's knights are heading to f5 and what can be more natural than Black's reply.' Giri,Anish: 'White can also play Be3, trade the bishops and claim that Black's space advantage is not so relevant, the knight on c6 is worse than the knight on f3 and the e5 pawn is slightly weaker than the pawn on d3.' **16...Qd7** Mikhalevski, V: 'Black both covers the f5−square and connects his rooks, hoping to bring the queen's one to d8.' **17.Nh4** Mikhalevski, V: 'A pretty logical move. The f5−square is a good outpost for White's knight as it creates chances for a kingside attack.' Giri,Anish: 'Again Be3 was possible, but I felt inspired to play for attack.'

[The aforementioned game saw the most popular continuation 17.Be3 Hamdouchi, H−Van Hoolandt, P/Nice FRA 2002/[Paul Motwani].]

[In a recent game White introduced a new move, 17.b4 Re6 18.a4 Qe8 19.Be3 Bxe3 20.Rxe3 Rd8 21.Qe1 Bxf3 22.Rxf3 led to a slight edge for White, but Black's play can be improved. Kryvoruchko, Y (2692)−Goganov, A (2605)/Jerusalem ISR 2015.]

17...Rad8 Mikhalevski, V: 'The most natural again.' **18.Nhf5 Kh8N** Mikhalevski, V: 'Only this move is new, but Vishy could still be in his book.'

A big compliment and although this game was five years ago and I don't 100% remember the state of my knowledge of this line at that time, I am pretty sure it was mostly improvisation.' **19...exd4** Mikhalevski, V: 'Black has to accept the challenge.' **20.Nxg7** * * * Mikhalevski, V: '!?' 1.e4 Roiz,M Roiz,M Roiz,M: 'Roiz, Michael Roiz,Michael: 'Roiz,M'' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.c3 d5 7.exd5 Nxd5 8.a4**

This fresh idea recently has recently gained some popularity at the highest level. **8...a6**

[The more consistent way to secure the bishop − 8...a5 was tested by Levon Aronian and was well known for Anish, since he was on White's side: 9.Nbd2 Nb6 10.Bb5 Bg4 11.h3 Bh5 12.Ne4 Bd6 13.Re1 Na7 14.d4 Nxb5 15.axb5 exd4 16.Nxd6 Bxf3 17.Qxf3 Qxd6 18.Rd1 Rfe8 19.Bf4 Qc5 20.Qxb7 dxc3 21.bxc3± Giri,A (2782)−Aronian,L (2792) Leuven BEL 2016]

9.a5

[Possibly, 9.Nbd2!? is a more promising way of handling the position. Indeed, in the following games Black was unable to equalize: Nb6 10.Ba2 Qxd3 *(10...Bf5 11.a5 Nc8 12.Ne4 Be7 13.Re1±* Vitiugov,N (2724)−Zhukova,N (2488) Doha QAT 2015 *)* 11.a5 Nd7 12.Bb1 Qd6 13.Ng5 Nf6 14.Qc2 Ne7 15.Nge4 Bf5 16.Nxd6 Bxc2 17.Nxb7 Bxb1 18.Nxc5± Cornette,M (2583)−Naroditsky,D (2634) Ajaccio FRA 2016]

9...b5 This advance is connected with a significant strategic risk, but I guess it was still a part of Giri's preparation.

[Still, quite logical seems 9...Bf5!? 10.Nbd2 Nf6 11.b4 Ba7 12.Qc2 h6 with complex battle.]

10.axb6 Nxb6 11.Bb3 Bg4N

A logical innovation − the pin of ♘f3 causes White definite problems.

[In one preceding game Black didn't get compensation for the exposed kingside pawn structure: 11...Bf5 12.Bc2 Qd7 13.Qe2 Rfe8 14.Nbd2

a5 15.Ne4 Bf8 16.Ng3 Be6 17.Ng5 Bd5 18.Qh5 h6 19.N5e4± Piorun,K (2591)−Lampert,J (2469) Dresden GER 2016]

12.Qe2 This move seems somewhat slow − Black gets an important tempo for protecting the ♙e5.

[It looks like the energetical 12.h3 Bh5 13.Bg5! would pose Black some problems: Be7 *(13...Qd6 14.Nbd2! Qxd3 15.Nxe5 Nxe5 16.Qxh5±)* 14.Bxe7 Qxe7 15.Re1 Qd6 16.Nbd2 Qxd3]

12...Kh8! 13.Be3

[13.h3 Bh5 14.Be3 Bxe3 15.Qxe3 f6 16.Nbd2 a5⇄]

13...Bd6!? An ambitious choice. Anish's play is mainly based on the k−side attack, so he prefers to keep more pieces on the board.

[The more quiet way of handling the position was: 13...Bxe3 14.Qxe3 f6 15.Nbd2 a5=]

14.h3 Bh5 15.g4 Quite a risky continuation, but it was hard to do with a pin of ♘f3 any longer.

[15.Nbd2 f5 16.Bxb6 cxb6 17.Bd5 Qc7 18.Qe3 Rae8 19.Rxa6 *(19.Bxc6 Qxc6 20.Rxa6 Bc7⩲)* 19...Nb8 20.Ra4 Nd7⩲]

15...Bg6 16.Nbd2 Be7! An excellent prophylactic move. Now, when the g5−spot is under control, Black feels free to touch the f−pawn.

[Premature seems 16...f5 17.Ng5 Qe8 18.h4! fxg4 19.Nde4↑]

17.Ne4 f5 18.gxf5 Bxf5 19.Kh2 The control over e4−spot allows Sergey to maintain the ballance. **19...Qe8**

[19...Nd5!? 20.Ba4 Qe8⇄]

20.Nfd2

[The more aggressive 20.Nfg5!? Nd8 21.f4 would force Anish to play very precisely in order to neutralize the activity of White's knights: Qb5! *(21...h6 22.fxe5 hxg5 23.Bxg5 Nc6 24.Bxe7 Nxe7 25.Rf4→)* 22.Ba2 exf4 23.Rxf4 Nd5 24.Bxd5 Qxd5 25.Raf1 Ne6=]

20...Qd7 21.Rg1 Bxh3? This time Anish doesn't trust his excellent sense of danger and grabs the "poisoned pawn"!

[Correct was 21...a5 22.Qf3 Bg6 23.Qg3 Nd5 24.Ba4 Nxe3 25.fxe3 Rab8⇄ with very complex, double−edged play.]

22.Qh5

[Another way to admit the lack of harmony in Black's camp was: 22.Rg3!? Be6 23.Bxe6 Qxe6 24.Rag1 g6 *(24...Nd5 25.Rxg7 Nf4 26.Bxf4 Rxf4 27.R7g3±)* 25.Nf3 Nd5 26.Rh3 Qd7 27.Nfg5 Bxg5 28.Nxg5 Nf6 29.Bc5±]

22...Bf5 23.Rxg7? This decision was definitely connected with miscalculation!

[At the same time, another tactical resourse 23.Bh6! Rg8 The lesser evil *(23...gxh6 24.Qxh6 Bg4 25.f3 Rf4 26.fxg4+−; 23...g6 24.Bxf8 Rxf8 25.Qh6+−)* 24.Rxa6! *(* Less offers *24.Bxg8 Rxg8 25.Bg5 Rf8±)* 24...Rab8 25.Bxg8 Rxg8 26.Qf7 Bg4 27.Be3± would let Sergey to acquire the material advantage and keep all his pieces very active.]

23...Kxg7 24.Rg1+ Kh8 25.Qh6 Bd6

[Correctly rejecting 25...Rg8? 26.Ng5 Rg7 27.Nf7+ Rxf7 28.Bxf7 Bg4 29.Bg6 Bf8 30.Qh4+−]

26.Bxb6? One more wrong decision − there was no reason for exchanging such a powerful bishop.

[26.Nxd6 cxd6 27.Bxb6 Qe7 28.Bd5 Rf6 29.Qh4 would force Black to accept a draw: Rg6 30.Qxe7 Rh6+ 31.Kg3 Nxe7 32.Bxa8 Rg6+ 33.Kh2 Rh6+=]

26...Bxe4 27.Nxe4 cxb6 28.Rg6 Na5? Returning the favour!

[Anish has a golden opportunity of converting his material advantage into a full point: 28...Bc5! 29.Rxc6 Rf4 30.Qg5 *(30.Rf6 Rxf6 31.Qxf6+ Qg7−+)* 30...Qxc6 31.Qxe5+ Rf6 32.Qxf6+ Qxf6 33.Nxf6 Bxf2−+]

29.Rxd6 Qg7 30.Qxg7+ Kxg7 31.Rd7+ Kh8 32.Be6 Despite the limited material ballance, the activity of White's pieces offers full compensation for the exchange now. **32...h6?!** Anish is playing with fire!

[He had to force a draw by repetition: 32...Rad8 33.Ra7 Ra8]

33.b4 Nc6 34.Bd5 Rac8 35.Rb7?!

[Stronger was 35.Nd6! Rcd8 *(* After *35...Nb8 36.Nf7+ Kg7 37.Rb7 Rxc3 38.Nxe5+ Kf6 39.f4+−* White is just dominating over the board! *)* 36.Bxc6 Rxd7 37.Bxd7 Rxf2+ 38.Kg3 Rd2± − The a−pawn offers Black decent drawing chances, but White's advantage is undisputable!]

35...b5 36.Kh3 All White's pieces are perfectly placed, but it's hard to make further progress. **36...Rf4 37.Kg2**

[37.Kg3!? was more tricky, avoiding the rook's transfer to g7. In this case Black should have played: a5! 38.bxa5 Nxa5 39.Rxb5 Nc6 40.Rb7 Rff8 41.Kg4 Nb8! (It's tough to find such a defensive idea!) 42.Kh5 Na6! 43.Rb6 Nc7 44.Rxh6+ Kg7 45.Rg6+ Kh8=]

37...Rg4+ 38.Kf1 Rg7 39.Rb6 Ne7 40.Rxh6+ Rh7 41.Rd6 Nxd5 42.Rxd5 Re7 Black was able to consolidate, so the position is drawn now. **43.Rd6 Ra8 44.Kg2 Rf7 45.Kf1 Re7 46.Ke2 a5** Inviting further simplifications. **47.bxa5 Rxa5 48.Rb6 Rc7 49.Ke3 Kg8 50.Re6 b4 51.cxb4 Rb5 52.Nc5 Ra7**

[Of course, not 52...Rxb4? 53.Na6+−]

53.Rxe5 Rxb4 54.Ne4 Kf7 55.f4 Ra1 56.f5 Re1+ 57.Kd2 Rf1 58.Nd6+ Kf8 59.Re8+ Kg7 60.Re6 Rbf4 61.f6+ Kg6 62.f7+ Kg7 63.Re8 Rf6 64.Rg8+ Kh7 65.Rd8 Kg7 66.Ke2 R6f2+ 67.Ke3 Rxf7 68.Nxf7 Kxf7=

[In two preceding games Black tested 16...Kh8]
[and 16...Na5 , when the latter transposes to 15...Na5.]
17.Rae1 Qd6 18.Bc1!±
Aronian introduces a novelty.
[In the aforementioned game White played 18.Nd2 , but after Bxe2 19.Rxe2 Na5 20.g3 Qd7 21.Kg2 c6 22.Rfe1 Bc7 Black was fine in Giri,A (2776)−Karjakin,S (2754) Bucharest 2019]
18...Ba5 Black creates a threat: he is going to capture on f3, e1 and then on d4.
[In a blitz game, which followed the rapid part of the tournament, Karjakin deviated with 18...Re6 The Armenian reacted incorrectly 19.Nh4 , which allowed *(19.Qd2!* was more accurate, with the idea to answer *Rfe8* with *20.Bd1 Rxe1 21.Rxe1 Rxe1+ 22.Qxe1* with a slight edge for White. *)*
A) In fact, 19...Bxe2 was also fine. 20.Rxe2 Rxe2?! For some reason Black gives up the e−file. *(* After *20...Rfe8 21.Rxe6 Qxe6* the chances are roughly equal. *)* 21.Qxe2± Aronian,L (2772)−Karjakin,S (2754) Bucharest blitz

2019;
B) 19...Bxd4! 20.Bxh5 Bxf2+ 21.Qxf2 Rxf2 22.Kxf2 Re5! 23.Rxe5 Qxe5 24.Bg4 Qf6+ 25.Nf3 Ne5 with sufficient compensation for the sacrificed material.]

19.Qd2 Aronian protects the d4−pawn and prepares 20.Bd1.

[19.Bd2 , which prevents the aforementioned threat, deserved attention. Now Black has to prove that his bishop on a5 is doing something.]

19...Re4 20.Bd1 Bxf3 Sergey was attracted by the win of a pawn, but soon his rook will find itself misplaced. Nevertheless, the text is perfectly playable.

[The Russian GM had an interesting alternative at his disposal. 20...b5 The idea is not only to control the c4−square, but also to break through with ...b4. 21.Re3 Rxe3 *(* or *21...b4 22.c4 b3 23.Qb2 Rxe3 24.c5 Re2! 25.Bxe2 Qe6 26.Be3 Bxf3 27.Bxf3 Rxf3 28.gxf3 Qxh3 29.Qxb3 Qxf3 30.Qd1 Qh3* with full compensation for the exchange. *)* 22.Qxe3 Bg6]

21.Bxf3 Rxd4 22.Qc2 Rc4

[After 22...Rh4?! 23.Bg4± the rook doesn't feel safe on h4.]

23.Ba3! Bb4? The only real mistake in the game, which turns out to be decisive.

[It wasn't easy to realise that 23...Nb4 was the correct move. Who would like to pin himself this way? However, White can't take advantage of the pin. For example,

A) An attempt to keep the c3−pawn protected 24.Qd2? runs into Rxf3! 25.Bxb4 *(25.cxb4 Bb6! 26.gxf3 Qg3+ 27.Kh1 Qxh3+ 28.Kg1 Qg3+ 29.Kh1 Rh4#; 25.gxf3 Qg6+ 26.Kh2 Nd3!−+* is also bad for White. *)* 25...Bxb4 26.cxb4 *(* or *26.gxf3 Qg6+ 27.Kh2 Qf5* with a decisive attack. *)* 26...Rf5∓ with a healthy extra pawn for Black.;

B) 24.Qd1 Rxc3 25.Bxb4 Bxb4 26.Bxd5+ Kh8=]

24.Qd3! Probably Black missed this idea. **24...Rxf3** Maybe Karjakin connected his hopes to this move, but it just doesn't work.

[After 24...Bxa3 25.Bxd5+ Kh8 26.Qxc4 Black is lost.]

[24...Nd4 looks like an interesting attempt to complicate matters, but after the cold−blooded 25.cxb4 Nxf3+ 26.gxf3 Rh4 27.f4 Qd7 28.Re3+− Black doesn't have enough resources to create threats.]

25.Qxf3 Bxa3 26.Re8+ Kh7 27.Qf5+ Now Black either gets mated or loses his queen. So, he resigned. An easy win for Aronian, but the line tried by Black, with 15...Rae8, looks playable.

Olympiad−43 Batumi (2.1) 25.09.2018

[Ganguly,Surya Shekhar]

2006 Turin was the last Olympiad where Anand played for India. After a huge gap finally the Tiger is back which is a tremendous boost for the team. **1.e4** TA **1...e5 2.Nf3 Nc6 3.Bc4**

Italian nowadays is as popular as Spanish specially at the top level.

3...Bc5 4.c3 Nf6 5.d3 0−0 6.Bg5

Although this was first played in 1841, it only got huge popularity after MVL recently started using the idea heavily in this position as well as in some other similar positions. I personally had this position a few times as White with a4−a5 included. **6...h6** 5 TA: 'C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and d3' **7.Bh4 Be7** The old conception was that after this Black has no issues, hence ♗g5 ideas were not that popular. Thanks to MVL's effort it is now clear that though Black is still fine here, White does have many interesting tries.

8.Nbd2 d6 9.a4

[Earlier we only considered 9.Bb3 Kramnik,V (2787)−Matlakov,M (2718) Wijk aan Zee NED 2018 [Mikhalevski, Victor]]

9...Nh5 TA: 'LiveBook: 8 Games'

10.g3!? Mikhalevski,Victor: 'An interesting idea from the Indian GM Sethuraman, who implemented it in a rapid game last December. White's idea is very simple − he wants to prevent 10. ..Nf4.' A rare and very interesting idea from my good friend Sethu. He used this idea to beat Inarkiev in the last World Rapid in Saudi Arabia. The point is White simply protects the bishop and asks Black to show his plans.

[Mikhalevski,Victor: 'In all the other games White played' 10.Bg3 MVL played this against Kramnik which is when this whole ♗g5 line started picking up rapidly. Since then many games have been played with tries from both sides. Nxg3 *(10...g6* is the latest trend from the black side which was seen in Hari − Inarkiev and Sethu − Giri *)* 11.hxg3 Nb8 12.Nf1 c6 13.Ne3 Na6 14.g4 was the MVL − Kramnik game from where it all started.]

10...Nf6 A natural response. Now Black threatens g5. Another interesting move is ...Bh3 which I am sure was prepared too. **11.Bxf6** TA: '!' **11...Bxf6 12.h4**

That is the idea of this whole g3 business! White gives up the bishop and tries to launch a kingside attack.

13.Nh2 The most natural way to follow. White has a pretty straightforward plan in this line. **13...d5**

[13...Qd7! stopping Ng4 deserved serious attention. For example, 14.Bb3 c6 15.Nc4 g6 16.h5 d5 17.Ne3 Bg7 and Black is just fine.]

14.Bb3 From the human point of view this is most natural. However, the engine insists on taking on d5.

A counter−intuitive suggestion from the machine. Why would anyone give up the centre and open the diagonal for the bishop! Practically it could be easier to play from the white side, irrespective of the computer evaluation.

A) 15.Qf3 Nc6 16.Bd5 Ne7=;

C) 15.Qe2]

15.Ng4 Qd6 16.Qf3 Bxg4 17.Qxg4
Both sides are playing very logically. White's bishop is clearly stronger than its counterpart, but Black holds the centre very strongly and there is no kingside attack coming either. **17...g6**
Not sure if this was needed right away.
[17...Rad8 Mikhalevski,Victor: '!?' Mikhalevski,Victor: 'also makes sense. ' Mikhalevski,Victor: '!?' '!?' Mikhalevski,Victor: 'also makes sense. ' Mikhalevski,Victor: '!?' Mikhalevski, Victor: 'also makes sense.' Black could play ...g6 later at anytime.]
18.h5 After 10 minutes of thought Anand decides to close the kingside and make the black bishop even more passive.
18...g5 A committal decision but a fairly justified one. Black agrees to lock in the dark−squared bishop totally but makes sure the kingside is completely closed. His solidity in the centre always compensates for the passivity of his minor pieces.
[18...Bg7 would have changed the character of the position completely: 19.hxg6 fxg6 20.0−0−0 can get wild soon]
19.Qf3
[19.Qe2 with a similar idea as in the game is also doable.]
19...Bg7 Mikhalevski,Victor: 'Black is ready to play 20...f5, so' **20.g4**
Now the position is completely closed on the kingside. Both squares f4 and f5 are weak, but White will get his knight faster towards f5 than Black his to f4. Thus, Black's knight must not move, but rather stay at e7 from where it controls both f5 and d5. White's bishop is also stronger than its counterpart. However, Black still has solid control over the centre which compensate all other things. As long as he can maintain that, there is nothing to be worried about. **20...Rad8 21.Ke2!?**
It is debatable where the king would be ideally placed. It does look safe at e2 as of now. **21...a5**
[21...Qc7 was interesting, preparing 22...Rd6.]
22.Rhd1 Rd7 23.Nf1 Rfd8
[23...Qc7!? Now that White has moved the knight, Black perhaps could have started to harass the b3−bishop. 24.Qe3 *(24.Ne3 Qb6)* 24...Rfd8 with a balanced position.]
24.Ne3
[24.Ng3!? It is not clear how to break further, but if I had to pick a colour I would pick White.]
24...Qf6? Mikhalevski,Victor: '?!' Mikhalevski,Victor: 'Up to here the position remained equal, but this was already dubious.' Mikhalevski,Victor: '?!' '?!' Mikhalevski,Victor: 'Up to here the position remained equal, but this was already dubious.' Mikhalevski,Victor: '?!' Mikhalevski,Victor: 'Up to here the position remained equal, but this was already dubious.' A strategic error. The only way for White to make some progress is to open up the game but with queens on the board it would have been very difficult to do so. Now it will be much easier to create play on the queenside and suddenly the king on e2 becomes so much more active.
[24...Qc7 Mikhalevski,Victor: '=' Mikhalevski,Victor: 'was correct.' Mikhalevski,Victor: '=' '=' Mikhalevski, Victor: 'was correct.' Mikhalevski, Victor: '=' Mikhalevski,Victor: 'was correct.' Just keeping the queen on b6

would suffice to stop White from opening another front. For the moment its not clear how White will breakthrough. The position remains balanced.]

26...Bg7

[26...Ra8!? Mikhalevski,Victor: 'was worth a try, preventing b4.' , stopping b4 for the moment, would have been more tenacious, although White has all the time in the world to regroup and play b4 eventually.]

[26...dxe4 Changing further major pieces doesn't solve the problem of passive minor pieces that Black has. 27.dxe4 Rxd1 , and now both ♘xd1 and ♖xd1 are good for White. 28.Rxd1 *(28.Nxd1* and no need to calculate any furher variation: *Nc8 29.f3±)* 28...Rxd1 29.Kxd1 White still keeps some pressure.]

Ding Liren was in great form in the World Cup and he had a splendid tournament. As they say, in such tournaments you need some luck and here is where I played my part! Online Olym KO Stage rapid (3.1)

[So,Wesley]

The 2020 Olympiad was very strange for me. The Rapid format, the structure of national teams, playing these games in my home office, never meeting in person with my teammates.... It was a bit unsettling along with the fact that the USA did not have the strongest team it could have had. The good part of that was that it gave exposure to players who ordinarily would not have had the chance and they did a stupendous job! This game was played in the Semi−Finals of the 2020 Online Olympiad. Our opponents are the mighty Russian Team with a full force lineup consisting of their best men's and women's players coupled with talented Junior players (Esipenko and Sarana). This is the second match. We lost the first to a narrow margin of 3.5−2.5 and had to make up for it in this one in order to reach the tiebreak Armageddon. Die Olmpiade 2020 war sehr seltsam für mich. Das Rapid−Format, die Struktur der Nationalmannschaften, diese Partien in meinem Homeoffice spielend, meinen Teamkameraden nie persönlich begegnend... Es war ein bisschen verwirrend, hinzu kam die Tatsache, dass die USA nicht das stärkste Team hatte, das möglich gewesen wäre. Das Gute daran war, das sich Spieler zeigen konnten, die normalerleise keine Chance bekommen hätten, und sie schlugen sich fabelhaft! Diese Partie wurde im Halbfinale der Online−Olympiade 2020 gespielt. Unsere Gegner sind das mächtige russische Team mit einer kraftvollen Besetzung, bestehend aus ihren besten Spielern und Spielerinnen, gepaart mit talentierten Junioren (Esipenko and Sarana). Dies ist das zweite Match. Das erste verloren wir knapp mit 3.5−2.5 und mussten nunmehr aufholen, um den Armageddon−Stichkampf zu erreichen.

1.e4 Since we were lower rated in all boards except the Boys U20 (Xiong vs Esipenko) I knew I had to try to win the White game for our team to have a realistic chance of coming back. Da wir an allen Brettern mit Ausnahme von Boys U20 (Xiong vs Esipenko) elomäßig unterlegen waren, wusste ich, dass ich versuchen musste, die Weißpartie für unser Team zu gewinnen, um eine realistische Chance zu haben

zurückzukommen. **1...e5** Alexander also plays the Sicilian Najdorf but obviously playing Black in a team event players tend to prioritise solidity above all else. Alexander spielte auch Najdorf−Sizilianisch, aber offensichtlich neigen Schwarzspieler bei Mannschaftswettbewerben dazu, Solidität über alles zu stellen. **2.Nf3 Nc6** Played with the idea to go for the Berlin Defence (I assume). Mit der Idee gespielt, die Berliner Verteidigung anzusteuern (vermute ich). **3.Bc4** These days in top level chess and Email games the Italian 3.♗c4 is just as popular as 3.♗b5. You can see it played in many games month after month. The usual positions which arise after both moves tend to be similar, as White develops his bishop actively and puts his pawns on c3 and d3. Heutzutage ist im Spitzenschach und in E−Mail−Partien Italienisch 3.♗c4 genauso populär wie 3.♗b5. Man sieht, wie es Monat für Monat wieder und wieder gespielt wird. Die üblichen entstehenden Stellungen sind tendenziell ähnlich, denn Weiß entwickelt seinen Läufer aktiv und stellt seine Bauern auf c3 und d3. **3...Bc5** This move is solid, as even though Black has no problems after 3...♘f6 4.♘g5, he has to know some weird lines and the knight gets misplaced on a5. Dieser Zug ist solide, denn obwohl Schwarz nach 3...♘f6 4.♘g5 keine Probleme hat, muss er doch ein paar seltsame Varianten kennen, und sein Springer wird auf a5 deplatziert. **4.c3 Nf6 5.d3 d6 6.0−0 0−0 7.Re1 a5 8.h3** We both reached this tabiya (standard opening position) more or less quickly. Actually I thought that he would go for the ...a6 setup, but instead he went for ...a5. ...a5 has the advantage that it fights for more space on the queenside. Wir beide erreichten dies Tabiya (Standarderöffnungsstellung) mehr oder weniger schnell. Tatsächlich dachte ich, dass er den ...a6−Aufbau wählen würde, aber stattdessen entschied er sich für ...a5. ...a5 hat den Vorteil, dass es um mehr Raum am Damenflügel kämpft.

8...Ba7 Mikhalevski,V: 'An extremely rare move in this position. Previously it was played just once by an unknown player. The idea is to remove the bishop from a possible attack by the d−pawn. It seems that Grischuk also wanted to provoke 9.Bg5.' This is a very rare move. I'm curious to find out whether Alex specifically prepared this move, or just had some ideas. It's not clear to me what the idea is or the difference between the bishop here or on b6. Maybe it's a prophylactic move, with the idea to transfer his knight to the kingside later via e7−g6. Anyway the main line is 8...h6. Dies ist ein sehr seltener Zug. Ich wäre neugierig zu erfahren, ob Alex ihn speziell vorbereitet oder einfach ein paar Ideen hatte. Mit ist nicht klar, was die Idee bzw. der Unterschied zwischen

dem Läufer hier oder auf b6 ist. Vielleicht ist es ein prophylaktischer Zug, mit der Idee, später seinen Springer über e7−g6 zum Königsflügel zu transferieren. Die Hauptvariante ist jedenfalls 8...h6.

19.d4?! Mikhalevski,V: '?' Mikhalevski,V: 'So returns the favour.' This very natural move is a mistake. It's very tempting to play, but the position is so concrete that both sides need to play precisely. In addition I was getting low in time, so I just played it after more than three minutes of thought. More testing is 19.♗f4. Dieser sehr natürliche Zug ist ein Fehler. This was a very fun and creative game for both players. I actually miss games like this, and competing with top players like Grischuk. Thanks to Covid competitive chess has all but disappeared, and what we have are online blitz/semi−blitz games which for the most part are similar to video games for me. They are for kids. Still, I'm grateful to the organizers and to the FIDE President Arkady Dvorkovich for taking the initiative and putting up strong online tournaments. I mean he didn't have to make the effort. A lot of other tournaments just outright cancelled and he could have done the same with the Olympiad. Instead he tried hard to pull something together that involved as many players as possible and I am sure it was a lot of work for him and his team. In short, I am grateful he did it and made the best of the circumstances. In the end this win was not enough as we lost the match to Russia 3.5−2.5 and 3−3. But I felt anything could have happened in the match and at some point we had a good chance. I would like to congratulate the winners Russia and India for a well deserved victory! Dies war eine sehr amüsante und kreative Partie für beide Spieler. Ich vermisse solche Begegnungen, und das Sichmessen mit Topspielern wie

Grischuk. Dank Covid ist Wettkampfschach praktisch verschwinden, und was wir haben, sind Online−Blitz−/Semiblitzpartien, die in meinen Augen größtenteils Videospielen ähneln. Sie sind für Kids. Dennoch bin ich den Veranstaltern und FIDE−Präsident Arkady Dvorkovich dankbar, dass sie Initiative ergreifen und starke Online−Turniere auf die Beine stellen. Ich meine, die Mühe musste er sich ja nicht machen. Viele andere Turniere wurden einfach abgesagt, und genauso hätte er auch mit der Olympiade verfahren können. Stattdessen setzte er alles daran, etwas zu organisieren, wo so viele Spieler wie möglich dabeisein konnten, und ich bin sicher, es war eine Menge Arbeit für ihn und sein Team. Kurz, ich bin dankbar, dass er es tat und das Beste aus den Umständen machte. Am Ende war dieser Sieg nicht genug, denn wir verloren das Match gegen Russland 3.5−2.5 und 3−3. Aber ich meine, dass alles hätte passieren können und wir an einer Stelle eine gute Chance hatten. Ich möchte den Gewinnern Russland und Indien zu einem wohlverdienten Sieg gratulieren!
