41.Qe2 Qc4 42.Qe3 The two previous notes apply to this position and to Black's reply. **42...Qc5 43.Qxc5** Not best, but winning. Presumably White was gaining time on the clock, but he now proceeds to the execution. **43...dxc5 44.Ne6 Re8 45.R8a7+ Kb6** He had three choices − two are bad news, and one is really bad news. The text is merely bad news. **46.Nxc7 Rc8 47.Nd5+ Kc6 48.Ne7+** A fine family fork to end a very difficult game! **1−0**

Corinth 2004
[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6
[Black should not overstate the harmlessness of 5 d3 with 5...d5?! , as White can then claim an advantage after 6.exd5 Nxd5 7.Qb3! *(* this is stronger then theoretical *7.0−0 0−0 8.Re1* after which *Nf6!* leads to an unclear game *)* 7...Nf4 8.Bxf4 exf4 9.Bxf7+ Kf8 10.0−0 Qxd3 11.Re1 and White is much better.]
6.Bb3 Ba7 7.Nbd2 0−0!? Black's plan is simple. He wants to play ...d7−d5 in one move. Therefore White should forget about his extravagant plans and just castle. **8.h3 d5**
[8...d6 transposes to Iordachescu−Gyimesi.]
9.Qe2
[9.0−0 leaves us with two interesting options to analyse:
A) 9...Re8?! makes little sense as the ideal square for this rook is d8. Black should focus on getting it there instead of playing this kind of 'wrist−chess'. Now after 10.Re1 dxe4 *(* if *10...h6? 11.exd5 Nxd5 12.d4* with a clear advantage *)* 11.Ng5 Re7 12.Ndxe4 Nxe4 13.Nxe4 Qd7 *(* not *13...h6? 14.Qh5! Qf8* and White wins after *15.Bg5! Re8 16.Nf6+ gxf6 17.Bxh6)* 14.Bg5 Re8 15.Qh5 Rf8 16.d4 and White is much better.;
B) 9...dxe4 10.dxe4?! *(* the knight on d2 is unemployed after this move, and what is more important White has already lost his social insurance; instead *10.Nxe4 h6 11.a4 Nxe4 12.dxe4 Qf6* is just equal *)* 10...Qe7 11.Nh2?! *(* White does not control the centre so the attack on the kingside is condemned to defeat; more sensible was *11.Qc2 Be6 12.Rd1* with good chances for equality *)* 11...Rd8 12.Qf3 Be6 13.Bc2 Rd6 14.Re1 Qd7 15.Ndf1 Ne7 16.b3 Ng6 17.Bg5 Ne8! 18.Rad1 Qc6 19.Ng4 h6 20.Rxd6 Nxd6 21.Bd2 Nb5 22.Rc1 Rd8 and Black is slightly better, V.Bologan−M.Adams, German Bundesliga 1995.;
C) 9...−−]
9...dxe4 10.dxe4
[If 10.Nxe4 Nxe4 11.dxe4 Qf6 with equality.]
10...Nd7!?
[Or 10...Qe7 11.Nc4
A) 11...Be6 12.Ng5 Bd7 13.0−0 Rad8 with equality;
B) , but not 11...b5?! (the white knight wants to go to e3, so why provoke this?) 12.Ne3 Na5 13.Bc2 Nb7 14.g4! (an old idea by Wilhelm Steinitz - White has a stable centre can therefore start a kingside attack) (an old idea by Wilhelm Steinitz - White has a stable centre can therefore start a kingside attack) (an old idea by Wilhelm Steinitz − White has a stable centre can therefore start a kingside attack) g6 15.Rg1 Nd6 16.g5 Nh5 17.Nd5 Qd8 18.Nxe5 with a clear advantage, V. Komliakov−M.Marin, Rumanian

Team Championship 1993.
(18.−−);
C) 11...−−]

11.0−0 Nc5 12.Bc2 Ne6 13.Nc4 Qf6 14.g3 b5 15.Ne3 Ng5?! Black does not benefit from this exchange.
[Better was 15...Qh6 16.h4 Qh5 17.Nd5 Rd8 18.a4 Bd7 with an unclear game.]

16.Nxg5 Qxg5 17.Kg2 Now White is slightly better. **17...Qh6**
[After 17...Be6 White puts pressure on the queenside with 18.a4 . Unfortunately for Black he cannot simplify the position, since if Bxe3 19.Bxe3 Qg6 20.axb5 axb5 21.Rxa8 Rxa8 22.Qxb5! Rb8 23.Qd3 Rxb2? 24.Ba4! and White wins.]

18.Rh1 Qd6 19.Rd1 Qe6 20.Nf5 Ne7 21.Bb3 Qf6 22.Ne3 Bb7?! This allows White to simplify the position himself and retain his agile knight.
[Better was 22...Rb8 23.Ng4 Bxg4 24.hxg4 Rfd8 25.Rxd8+ Rxd8 26.a4 and White has some plus.]

23.Ng4 Qg6 24.f3!?
[Here White could have played 24.Nxe5 Qxe4+ 25.Qxe4 Bxe4+ 26.f3 Bf5 27.a4 and in the endgame Black is under pressure in the centre and on the queenside. White has the advantage in the game as well though.]

24...Nc6 25.Bd5 Rfe8 26.a4! bxa4
[Black has great problems organising his pieces. He could quickly go wrong with 26...h5?! 27.axb5 axb5 28.Ne3 b4 29.Nf5 bxc3 30.bxc3 and White is much better because Bb6? does not work, i.e. 31.Rxa8 Bxa8 32.Qa2 Kf8 33.Nh4 Qf6 34.Bg5 Qxg5 35.Bxf7 and White wins.]

27.Rxa4 Bb6 28.Ne3 a5 29.Nf5 Nd8
[29...Ba6 is possible, but then 30.Qd2 h6 31.b3 Bb5 32.Ra2 Rad8 33.c4 and White retains the pressure.]

30.Bxb7 Nxb7 31.Qb5 Qe6 32.Rc4 Rad8 33.Rxd8 Nxd8 34.Be3 g6?
Here Black misses his chance.
[After 34...c6! 35.Qa4 Bxe3 36.Nxe3 Qh6 Black has counterplay.]

35.Bxb6 cxb6 36.Ne3 Nb7?!
This loses directly.
[Better was 36...Re7 37.Nd5 Rb7 38.Rc7 Rxc7 39.Nxc7 Qd6 40.Nd5 and Black has some illusory chances for a draw.]

37.Rc6 Qe7 38.Rxb6 Nd6 39.Rxd6 1−0

EU/MSM/VI/3−01 1999
[E Van Leeuwen]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Nf6 5.e5 d5 6.Bb5 Ne4 7.Nxd4 Bd7
The alternative is
[7...Bc5 8.Be3 0−0 *(8...Bd7* is back to the main variation *)* 9.Nxc6 bxc6 10.Bxc5 Nxc5 11.Bxc6 Rb8 12.Qxd5 Qe7 13.0−0 Rxb2 and white won in Ye Jiangchuan−Svidler 2001]
8.Bxc6 bxc6 9.0−0 c5
[9...Bc5 is most frequently played here]
[9...Be7 is another possibility]
10.Nb3! Estrin gives this move a ! and evaluates it as better than
[10.Ne2 Bc6 11.f3 Ng5 12.f4 *(12.Ng3)* 12...Ne4 13.f5 Qe7]
10...Bb5 This unusual move is mentionned by Estrin as a less good alternative to
[10...c6 11.c4! dxc4 12.N3d2 Nxd2 13.Nxd2 Be6 14.Qa4 Qb6 15.Qc2!±]
11.Re1 c4
[11...Be7 12.f3 Ng5 13.Nc3! c6 14.f4 Ne6 15.f5 with strong attack (Estrin)]
12.Nd4 Bc5?! black gives his two bishops in exchange for rook and pawn, an unfavourable trade if there is no other compensation. Better is
[12...Bd7 13.Nd2 Nxd2 14.Bxd2±]

13.Nxb5 Bxf2+ 14.Kh1 Bxe1
[14...0−0 15.Rxe4 dxe4 16.Qg4±]
15.Qxe1 0−0 white has the better position, his plan is first to recycle the hanging knight to defend the important e5 pawn, then to attack the advanced c pawn and to develop the Q side pieces.
16.Nd4 Qe7 17.Nf3 f6 18.b3 attacks c4 and opens the way for the bishop **18...cxb3**
[18...fxe5 19.Ba3 c5 20.bxc4±]
19.axb3 Qc5 20.Ba3 Qb6
[20...Nf2+ 21.Kg1 Nh3+ 22.Kf1 Qb5+ 23.Qe2 Qxe2+ 24.Kxe2 Nf4+ 25.Ke3+−]
21.h3 Rfe8 22.Nbd2 it was a difficult choice between the textmove and
[22.Nc3 with as possible follow up : Qc6 23.Bb4 *(23.Bb2 fxe5 24.Rc1 Nf6)* 23...a5 24.Rxa5 Rxa5 25.Bxa5 fxe5 26.Nxe4±]
22...Qc6 23.c4 Nxd2 24.Qxd2 dxc4
[24...fxe5 25.cxd5 Qb5 26.Qc3 e4 27.Bb2+−]
25.exf6 c3
[25...Qxf6 26.Bb2 Qf7 27.Ne5±]
[25...cxb3 26.f7+ Kxf7 27.Rc1+−]
26.Qd3 Qxf6 27.Bc5 aiming at d4
27...c2 28.Bd4 Qc6 29.Rc1 Re7
[29...Rad8 30.Rxc2 Rxd4 31.Nxd4 Re1+ 32.Kh2 Qd6+ 33.g3 was not dangerous for white]
30.Rxc2 Qg6 under pressure, black wants to exchange queens even at the cost of doubling the kingside pawns, speculating on drawing chances by exchanging white's b pawn. Although my analysis led to the conclusion that white has a winning advantage after 31. Qxg6, white has a better and more interesting move : **31.Qb5!**
[31.Qxg6 hxg6 32.Bc5 *(* not : *32.Rc6 a5 33.Rxg6 a4=)* 32...Rd7 33.Ra2 a5 34.Ra4 Rd5 35.b4±]
31...Rd8
[31...Qxc2 32.Qd5+±]
[31...Rae8 32.Qc4+ Qf7 33.Bxa7±]
[31...Qe6 32.Rc6±]
32.Qc4+ Qf7 33.Bxa7 Qxc4 34.Rxc4 Rd1+ 35.Kh2 Rd3 36.b4 white's plan is clear now : the black c pawn will be captured and the passed b pawn will decide in white'sfavour **36...Re2 37.Kg3**
[37.Nd4? Ra2 38.Rxc7 *(38.Bb8 Rdd2)* 38...Rxa7 39.Rxa7 Rxd4 would be a draw with black's rook behind the pawn]
37...Rd6 38.Nd4 now this N move aiming at c6 is OK **38...Ra2 39.Bb8 Rd2 40.Nc6 Rg6+ 41.Kf4 Rgxg2 42.Bxc7 Rde2**
[42...Rgf2+ 43.Ke4 Rfe2+ 44.Kf5]
43.b5 Rgf2+ 44.Kg4 Rf6
[44...Rg2+ 45.Kf5 Kf7 46.b6 g6+ 47.Kf4 Rgf2+ 48.Kg4 Rg2+ 49.Kh4+−]
45.Rf4 The rook takes an active position and cannot be exchanged by black. White has still to be careful, black would obtain drawing chances if he could exchange a rook for bishop and b pawn. An important factor in white's favour is that the promotion square of the b pawn has the right colour. **45...Rg6+**
[45...Rc2 46.Rxf6 gxf6 47.b6+−]
[45...Rg2+ 46.Kf3+−]
46.Kf3 Rge6
[46...Re1 47.Kf2 Rgg1 48.b6 and the king escapes from checks on g4 and f5]
47.Rb4 R2e3+ 48.Kg4 Re1 49.Bf4
[not 49.b6 Rg6+ 50.Kh4 Rh6+ 51.Kg3 Rxc6 52.b7 Re8 53.b8Q Rxb8 with drawing chances for black]

49...Rf6 50.h4
[50.b6 Rg1+ 51.Bg3 Rg6+ 52.Kf5 Rxc6 53.b7 Rf6+ 54.Ke4 Rf8 55.b8Q Rxb8 56.Bxb8 Kf7±]
[50.Bg5 Rg1+ 51.Kh4 Rf3 52.Ne5 Rf5 *(* or *52...Rff1 53.b6 Rb1)* 53.b6 are not clear either]
50...h6 51.h5 at this point my analysis proved the win for white **51...g6** best
[51...Rg1+ 52.Bg3 Re6 *(52...g6 53.Ne7+ Kf7 54.Nxg6 Rb6 55.Nf4 Rd1 56.Bf2 Rb7 57.b6+−; 52...g5 53.b6 Rf4+ 54.Rxf4 gxf4 55.b7 Rb1 56.b8Q++−; 52...g6 53.Ne7+ Kf7 54.Nxg6 Rb6 55.Nf4 Rd1 56.Bf2 Rb7 57.b6+−; 52...Kf7 53.Ne5+ Ke6 54.b6+−)* 53.Nd4 Rb6 54.Ne2 Rh1 *(54...Rf1 55.Bc7 Rb7 56.b6 Kf7 57.Rf4++−)* 55.Nf4 Rd1 56.Bf2 Rb7 57.b6 Rd6 58.Ng6 Rf6 59.Rf4+−]
[51...g5 52.b6 Rxc6 *(52...Rxf4+ 53.Rxf4 gxf4 54.b7+−; 52...gxf4 53.b7 Rf8 54.Rxf4 Rg1+ 55.Kh3+−)* 53.b7 Re8 54.b8Q Rxb8 55.Rxb8+ Kf7 56.Be5 Ke6 57.Bb2 Rc4+ 58.Kf3 Rc6 59.Bd4 Kd5 60.Bg7+−]
52.hxg6 Rg1+
[52...Rxg6+ 53.Kf5 Rg7 all king moves would lose 54.Be5 Rf7+ *(54...Rf1+ 55.Ke6 Rg6+ 56.Kd5 Rd1+ 57.Nd4+−)* 55.Ke6 Rg1 56.b6 Rg6+ 57.Kd5 Rb7 58.Bc7+−]
53.Kh3 Rh1+ 54.Kg2 Re1 55.Be5 Rxg6+ 56.Kf2 Rgg1 57.b6 Rgf1+
At this point the game had to be adjudicated. The win for white can be demonstrated in a rather straighforward way. Black will run out of checks and the advance of the b pawn will then be decisive. Black has to give a rook for the queening pawn after which white has a mating potential with bishop and knight. After having sent my analysis, Mr. Elyakim announced his resignation. The main variation of the analysis went :
58.Kg3 Rg1+ 59.Kf3 Rgf1+ 60.Kg4 Rg1+ 61.Kf5 Ref1+ 62.Ke6 Rg6+ 63.Kd5 Rd1+ 64.Nd4 Kf7 65.b7 Rg8 66.b8Q Rxb8 67.Rxb8 h5 68.Rb7+ Kg6 69.Rg7+ Kh6 70.Ke6 and mate in 4 moves
1−0

□ **Vysochin,S.**
■ **Klovans,J.**
Cappelle la Grande 2005
[Jan Pinski]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6
[Normally we would reach the position after 8...0−0 via the move order 3...Bc5 4.c3 Nf6 5.d3 d6 6.0−0 0−0 7.Bb3 a6 8.Nbd2 Ba7 .]
4.d3 Bc5 5.c3 a6 6.0−0 d6 7.Bb3
The manoeuvre Bc4−b3 is standard in this position. Now the game is more or less reminiscent of the Ruy Lopez.
7...Ba7 8.Nbd2 0−0 . 9.h3 Be6 10.Re1
[Keeping the bishop with 10.Bc2!? is the most dangerous idea. Black's light−squared bishop has no real scope, and while the white bishop might also seem buried at the moment, it can later prove to be quite strong. Now we have the following practical examples:
A) 10...d5 11.Re1 dxe4 12.dxe4 Nh5 13.Nf1 Qxd1 14.Rxd1 Rad8 15.Be3 f6 16.Bxa7 Nxa7 17.Ne3 Nf4 18.h4! and White was slightly better, A.Karpov−V.Korchnoi,

Merano match 1981.;
B) 10...h6 11.Re1 Ne7 12.d4 Ng6 13.Nf1 c6 14.Ng3 Re8!? 15.Nf5 Qc7 16.Be3 d5! 17.exd5 *(*if *17.Nxe5 dxe4 18.Nxg6 Bxf5 19.Bf4 Qb6 20.Ne5 Qxb2* and Black is a little better, H. Hamdouchi−F.Braga, Mancha Real 2000 *)* 17...Nxd5! *(*if *17...Bxd5? 18.Nxe5 Nxe5 19.Bf4* and White has a clear advantage *)* 18.Bd2 Bxf5 19.Bxf5 exd4 20.Nxd4 Bxd4 21.cxd4 with an unclear game.;
C) 10...−−]

10...Re8
[Black can also take the chance to exchange bishops with 10...Bxb3 11.Qxb3 Qd7 12.Nf1 *(*not *12.Qxb7?? Rfb8 13.Qxa6 Bxf2+* and wins *)* 12...h6 13.Ng3 Rfe8 14.Nh4 d5 15.Nhf5 dxe4 16.dxe4 Na5 and Black is at least equal, J. Hjartarson−A.Aleksandrov, Groningen 1997.]

11.Nf1 h6 12.Ng3 d5 13.Qe2 Na5
Black wants to keep the game complicated, but it is White who turns out to be better off. **14.Ba4 b5 15.Bc2 Nc6 16.d4 dxe4 17.Nxe4 Bf5?**
This just drops a pawn.
[Instead 17...exd4! looks good to start with, since if 18.Qd3 *(*after *18.Nxf6+ Qxf6 19.Qe4* White has some threats and probably the advantage too; e.g. *dxc3 20.bxc3 Qxc3 21.Qh7+ Kf8 22.Bd2 Qc5 23.Be4!* with a very strong initiative for the pawn *)* 18...Kf8 19.Nxf6 Qxf6 20.Bd2 Bd5 21.Qh7 g5 and Black is much better.]

18.Nxf6+ Qxf6 19.Bxf5 Qxf5 20.dxe5 Rad8 21.Be3 Bxe3 22.Qxe3
White retains the pawn and has great winning chances. **22...Rd5 23.a4 b4**
[Or 23...Nxe5 24.Nd4 Qd7 25.axb5 axb5 26.f4 c5 27.Nb3 and White wins.]

24.Rac1 bxc3 25.bxc3 Qd7 26.c4 Rd3 27.Qe4 Nb4 28.c5 a5 29.c6?
A tactical mistake.
[Here the elegant 29.e6! Qxe6 30.Qb7 Qc8 31.Qb5 Rxe1+ 32.Rxe1 would leave White close to winning.]

29...Qd5 30.Qf5
[After 30.Qxd5 Rxd5 31.Re3 Re6 32.Rec3 White does not have not real winning chances.]

30...Re6 31.Qg4 Rxc6? Black misses his chance.
[After 31...Rxf3! 32.Qxf3 Qxf3 33.gxf3 Nd3 34.f4 Nxe1 35.Rxe1 Rxc6 36.Re4 Rb6 37.Kg2 the draw is certain.]

32.Rxc6 Qxc6 33.Qc8+ Kh7 34.Qf5+ Qg6 35.Qf4?
[Stronger was 35.Qxg6+ fxg6 *(*if *35...Kxg6? 36.e6 fxe6 37.Ne5+ Kf6 38.Nxd3 Nxd3 39.Rd1* and White wins *)* 36.e6 Rd8 37.Nd4 and White has great winning chances.]

35...Nd5 36.Qe4 c6 37.Nh4
[White probably won on time, since after 37.Nh4 Qxe4 38.Rxe4 Nc3 Black is slightly better.]

1−0

☐ **19) All the Games: 7...h6**
■ **3) Dariusz Sikorski vs. Macie,K**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 h6!? 7.0−0 Qf6 8.Re1 We discuss this Rook move in lesson 3 [/variation/13943386] of chapter 16. **8...Nge7 9.a4!?**
[This cramping probe can't be bad. Otherwise 9.Na3 at once is the earlier [/variation/13943386] lesson just mentioned.]
9...b6 10.Na3 a6?!
[No immediate purpose; indeed, the opposing Knight is forced onto the path more dangerous for Black. Instead he could castle or complete the fianchetto and reach familiar ground − but with a White a2−a4 thrown in. Besides which, a top candidate move here is likely to be 10...Bxa3 11.Bxa3 d6 and after 12.dxe5 dxe5∞ the game looks fairly level. Except for that extra Black pawn!]
11.Nc2 g5
[Another example of the 'kamikaze' attack, but here it's possibly best on the board. Compare the Snow v. Young [/variation/13827450] game. Instead, the normal−looking 11...0−0 12.Ne3 Bb7 reaches an unexplored node. A bit of fantasy follows, mostly good for White. Now 13.Ng4 is the critical move. Pushing 13.d5 is also fine, leading to 13...Na5 14.Ng4! Qg6 15.Nfxe5 Bxe5 16.Nxe5 Qd6 17. f4 $16 with advantage. Continuing Qg6 14.Nh4 Qh7 15.Nf3 Best. Tempting is 15.Bxh6?! but then simply 15...Kh8! $13 unclear! exd4 16.e5 Bc5 17.cxd4 Bb4 18.d5± , and White is clearly better.]
12.h3!?
[Inaccurate; again 12.Ne3± is good for a steady advantage. Once the White steed gets loose from its stall, Black will come to regret his excessive pawn moves.]
12...Ng6!?
[And if 12...Bb7 then 13.Ne3± of course, but here White will hear objections if he claims even a small edge. We think that Qg7∞ then castling Queenside is mostly unclear. Black's text move, however, begins a maneuver favorable to White.]
13.Ne3± Finally! The Knight is a

warhorse here. **13...Nce7?! 14.Ng4 Qg7 15.Qb3?!**
[After this move Black might have wriggled off the hook. White should begin active operations with 15.dxe5± , etc.]
15...Rf8?
[15...f6!∞ is the needful move, bolstering his pawn formation and preparing for an equal middlegame.]
16.Bd5 c6 17.Bc4 Bc7?! 18.Be3?
[Slack development. More active is 18.dxe5 Nxe5 19.Ngxe5 Bxe5 20.Nxe5 Qxe5 followed up then by 21.Be3 and White is very close to winning.]
18...Rb8?
[Passive. The carpe diem move is 18...h5! and then 19.Ngxe5 g4 brings on a sharp attack. For example trading 20.Nxg6 is probably best. But not 20.hxg4? hxg4 21.Nh2 Better than taking the Greek gift. 21...Nxe5 22. dxe5 Bxe5 $17 and Black is doing well indeed. Continuing Nxg6 21.hxg4 hxg4 when Black can be satisfied, seeing that 22.Nd2 Nh4∞ is very threatening. Quite unclear.]
19.Nfxe5 Nxe5 20.dxe5± b5?
Another mistake. **21.axb5 axb5 22.Be2** White is winning now. **22...Ng6 23.Bc5 Nxe5 24.Qa3?! b4? 25.Qa7?**
[He should simply take 25.Bxb4 and continue winning. From here White does manage to keep most of his advantage, but it's more complicated now.]
25...Rb7 26.Qa8 Rb8 27.Qa7 Rb7 28.Bxf8 After a couple of repetitions White takes the material, assuring a clear advantage. **28...Kxf8 29.Qd4± bxc3!?** A faint hope. **30.Qxc3 Nxg4 31.Qa3+ Ke8 32.Bxg4** White is up the Exchange for a pawn and stands much better. There's some fight left, but the game ends in two moves, possibly by zeitnot. **32...Qe5 33.g3 Bb8 1−0**

■ **City Rio de Janeiro**
telegraph match corr 02.1933
[Kashdan]

Myers: My source for this fascinating game is "Chess Review", May 1933. It was played by telegraph at the rapid (for correspondence chess) pace of one move per day. **1.e4** Myers Kashdan **1...e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3 Nf6 6.e5 d5 7.Bb5 Ne4 8.Bxc6+ bxc6 9.cxd4 Bb6 10.Nc3** Myers: There are a fair number of games on record in which White reaches this position, often classified as a Gruenfeld, with a tempo less. In any case, the position is probably original, with or without the extra move.

☐ **19) All the Games: 7...h6**
■ **9) Francesco Frugoli vs. Vale,P**
Break the Evans Gambit: The Stone−Ware

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bd6 6.d4 Qf6 7.0−0 h6!? **8.Na3** Reaching a position examined in chapter 17 [/course/80564/17]. **8...a6?!**
[Again, we propose that 8...Bxa3 9.Bxa3 d6 is most correct.]
9.Kh1 This possibly premature prophylaxis was also seen in Game 4 [/variation/13827454]. **9...Nge7 10.Nc2 Ng6 11.Ne3 0−0** A standard layout, except for those wing pawns! **12.Nd5 Qd8 13.Bb3⩲** White is ready − when combinations erupt there will be no loose Bishop or sudden checks against his King. Now he can execute his campaign plan, to trade on e5 and push f2−f4 with a winning attack. **13...Be7??**
[Those early pawn moves have left Black with only one reasonable option, and the text move isn't it. He has to resolve the center himself before White does, and so 13...exd4 is required. Play unfolds with 14.cxd4!? as in almost every such case. In this position however 14. Nxd4 may be slightly better, for example 14...Nxd4 15.cxd4 c6 16.e5 cxd5 17.exd6 results in a most unusual pawn structure. Black sees that his forward d−pawn is doomed, sometimes with check, and therefore prepares a b−pawn push with 17... Rb8! and then 18.f4 f5 19.g4 $14 is

worthy of analysis. If anyone wants a little vacation he can bring his pet processor and explore this undiscovered country − about +0.40 for White. After White's pawn recapture Black has the brilliant a5! at his disposal. The reason it's brilliant is above X_Master's pay grade, of course, but a few variations might bring the puzzle pieces into view. White continues 15.e5 Be7 16.Qc2 Kh8 17.Qf5! a4 Ah, there's a hint. The automatic 17...d6?! fails to 18.Qh5 $16 with a major incursion coming. White retreats 18.Bc2 d6 19.Qe4! because.... In this case 19. Qh5?! offers no attack, e.g. 19...dxe5 20.Nxe7 Qxe7 21.Bxh6 gxh6 22. Qxh6+ Kg8 23.Ng5 looks frightening indeed, though apparently Black holds, e.g. 23...f6 24.Bd3! fxg5 25.Bc4+ Be6 26.Qxg6+ Kh8 27.Bxe6 Rf6 $15 , and Black repels the invaders. Now Re8 20.Rd1± builds the tension, and the all−seeing eye sees a mere +0.25 for White.]

14.Nxe5 Ngxe5 Either Knight, the answer is the same. **15.dxe5**

[Yes, and 15.f4 wins also.]

15...Nxe5 16.f4 White has a won game now; his army gathers around the Black King. **16...Nc6 17.f5 Bf6 18.Qg4?**

[Lifting 18.Rf3 is much better. We can guess where the Rook will go next.]

18...Na5??

[The beginning of sorrows. Of course he should centralize with 18...Ne5 when 19.Qg3 Kh7 20.Nxf6+ Qxf6 21.Rf4± is very good for White, but the game remains to be won.]

19.Qg3

[Breaking in by 19.Bxh6 wins on the spot, in view of the threatened capture at g7 , followed by f5−f6, etc.]

19...Kh7? 20.Bf4??

[A pure blunder. Instead 20.Nxf6+ Qxf6 21.e5 Qc6 22.f6 leads to mate in seven moves!]

20...d6∞ That was a remarkable turn − the position is completely unclear now.

21.Rad1?! c6??

[Terrible. Simply 21...Nxb3 22.axb3 Re8∓ gives Black an excellent game, roughly +0.40 in his favor.]

22.Nxf6+ Qxf6 23.Rxd6

1−0

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.0−0 d6 8.Re1
[The game's actual move order was 8.Nbd2 0−0 9.h3 Be6 10.Re1 Re8 11.Nf1 h6 12.Ng3 Qd7 13.Bc2 d5 14.Qe2 .]
8...0−0 9.h3 h6 As we have seen previously, this pawn move is often a precursor to ...Nh5. However, it's also a useful waiting move if Black wants to play ...Be6. **10.Nbd2 Be6** We are faced with that perennial choice again: do we allow an exchange of bishops or avoid it with Bc2? **11.Bc2**
[In comparison to the position after 9... Be6, it seems to me that there's slightly more appeal to allowing an exchange here. White is one move further down the road with his kingside plans, whereas Black's extra ...h6 may only prove to be semi−useful, or even a hindrance if White is lucky. In truth, the difference is fairly insignificant and Black's position is solid. Even so, this remains an option for the those preferring quieter positions: 11.Nf1 Re8 *(* or *11...Bxb3 12.axb3 Re8* , if Black doesn't want to allow White to change his mind and play 12 Bc2! *)* 12.N3h2 *(* so that White can answer ...d5 with Qf3; both *12.Ng3;* and *12.Be3* are also possible *)* 12...Bxb3 13.axb3 Qd7
A) what follows is model defence by Kramnik, and objectively Black must be okay in this line, but perhaps it's not as easy as Kramnik makes it look; indeed, when Leko decided to switch sides he wasn't able to display the same accuracy: 14.Ng3 Ne7 15.b4 c6 16.Ng4 Qe6 17.Be3!? *(17.Qf3* would transpose to Leko−Kramnik *)* 17...Bxe3 18.Nxe3 d5 19.exd5 Nexd5 *(19...cxd5* looks stronger *)* 20.Nc4! Nd7 21.Ne4 Nf4 22.Qf3 b5 23.Na5 *(23.Ncd6!?)* 23...f5 24.Nc5 Nxc5 25.bxc5 Nd5

26.Nb7! e4 27.dxe4 fxe4 28.Qg3 Nf6 29.Nd6 Re7 30.b4 with a clear advantage, V.Ivanchuk−P.Leko, Nice (rapid) 2009; as I've stressed previously, Black should be okay but there is certainly enough scope in these positions to outplay your opponents;

B) 14.Qf3 Qe6 15.Ng3 Ne7! *(*avoiding *15...Qxb3?! 16.Nf5!* 17 when White threatens both 17 Nxh6+ and Bxh6 *)* 16.b4 c6 17.Ng4 Nxg4 18.hxg4 d5 19.Nf5 Rad8 20.g3 f6 21.Kg2 dxe4 22.dxe4 Nxf5 23.gxf5 Qc4 24.Be3 Bxe3 and ½−½, P.Leko−V.Kramnik, World Championship, Mexico City 2007.]

11...Re8 This move, in conjunction with ...d5, is Black's most consistent follow−up.

[If Black plays 11...Ne7 it's White who advances in the centre. Here 12.Nf1 Ng6 13.Ng3 Re8 14.d4 reaches Korneev−Campora. This is an example of how the Modern Variation can transpose to the Classical Main Line, and vice−versa.]

12.Nf1 d5 Another typical decision to make: capture or keep the tension?

13.Qe2

[13.exd5!? looks like a totally innocuous version of the pawn capture, but even here there is a drop of poison in the position: Bxd5 (the two other recaptures are also possible, but this looks the most natural) 14.Ng3 Qd7 15.Be3 Bxe3 16.Rxe3 Re7?! *(*Black showed much greater accuracy in J.Degraeve−J. Votava, Erfurt 2009: *16...Rad8! 17.Qe2 Bxf3 18.Qxf3 Nd5 19.Ree1 Re6 20.Rad1* , with a roughly level position *)* 17.Nh4! Be6 18.Nh5! Nxh5 19.Qxh5 Qd6 20.Rg3! Kf8 21.Re1 and suddenly White has drummed up a fierce attack from seemingly nowhere. H.Hamdouchi−P.Van Hoolandt, Nice 2002, concluded Bd7 22.Ree3 e4 23.dxe4 Qd2 24.Bb3 Qxb2 25.Ref3 Ne5 26.Ng6+ Nxg6 27.Qxg6 1−0.]

13...Qd7

[Black must also decide when or if he should release the tension. In E. Alekseev−F.Caruana, Khanty−Mansiysk 2009, Black did so straight away: 13...dxe4 14.dxe4 b5 *(14...Nh5?* can be safely answered by *15.Nxe5* here *)* 15.N3h2 *(15.Ng3* would allow Black the option of forcing a queen exchange with *Bc4)* 15...Ne7 16.Rd1 Qc8 17.Qf3 Nh7 18.Ng4 Ng6 19.Nfe3 Rd8 20.Nf5 Rxd1+ 21.Qxd1 Qd8 22.Qe1 h5 23.Nh2 Nf4 24.Bxf4 exf4 25.Rd1 Qe8 26.Qd2 Bxf5 27.exf5 and White was better. There might well be some possible improvements here, but to me 13...Qd7 followed by ...Rad8 looks more flexible.]

14.Ng3 Rad8 15.Kh2!?

[The idea behind this move is to prepare Nh4 - the immediate 15.Nh4 allows Bxh3! 16.gxh3 Qxh3 17.Nhf5 Ng4 18.Be3 Qh2+ 19.Kf1 Qh3+ 20.Kg1 with perpetual check, N. Sedlak−B.Predojevic, Zlatibor 2007. However, Black has nothing to fear providing he finds the right response, and it is possible that 15 Kh2 isn't the best move objectively, even though it works very well in this game. Blitz games aren't always helpful

pointers but when they involve the World's elite, they do at least reveal the first move which goes through a super−grandmaster's mind. Here are a couple of recent examples from this position:]

[a) 15.Bd2 Bc5 (a typical move - if White begins action on the kingside, this bishop may want to return to f8 to provide cover...) 16.Rad1 d4!? (...especially if White plays an eventual c4, when the bishop would look silly on a7) 17.Bb1 b5 18.Rc1! dxc3 *(* this is committal - perhaps Black didn't want to be left with a pawn on d4 after *18...Bf8 19.cxd4; 18...Bb6!?* is an alternative *)* 19.bxc3 Bf8 20.Be3 and White's plan now is d3−d4, B.Gelfand−V.Kramnik, Moscow (blitz) 2008.]

[b) 15.Nh2 b5 *(15...Ne7!* , intending to meet *16.Qf3* with *Ng6* , looks like a stronger defence to me *)* 16.Qf3 (threatening Bxh6) Nh7 17.Ng4 d4 18.Nf5 Bxf5 19.exf5 , as played in L.Dominguez Perez−S. Mamedyarov, World Blitz Ch., Almaty 2008, is the kind of promising kingside action White is looking for.]

15...Kh8 Is it possible that Aleksandrov was unaware of the significance of 15 Kh2, and thought it was just a waiting move?

[15...Qe7! , as played in A.Minasian−S.Galdunts, Yerevan 1982, cuts across White's plan (16.Nh4?? is rudely met by Ng4+!) and forces him to rethink.]

16.Nh4! Now things begin to run like clockwork on the kingside. White gradually strengthens his position and Black drifts into passive defence.

16...Ng8

[Perhaps Aleksandrov was worried about 16...Ne7 17.Qf3 , but this still looks tenable for Black after dxe4 18.dxe4 Ng6 .]

17.Qf3 Bc5 18.Ngf5 Bf8 19.g4! g6 Black's previous play (...Ng8 and ...Bc5−f8) clearly showed that he was basing his hopes on kicking the knight away from f5. But... **20.Rg1!** A star move. Areshchenko is in no mood to retreat! It's difficult for Black to do anything apart from accept the piece sacrifice, but then he runs into a fierce and ultimately decisive attack, perfectly executed by the Ukrainian grandmaster. **20...dxe4 21.dxe4 gxf5 22.gxf5 Bc4 23.f6! Re6 24.Rxg8+! Kxg8 25.Be3 Ne7** White was threatening simply 26 Rg1+ Kh8 27 Qg4 and mate on either g8 or g7. **26.fxe7 Bxe7 27.Rg1+ Bg5 28.Qh5 Rf6 29.b3! Bb5 30.a4! Bc6 31.Rxg5+ hxg5 32.Qxg5+ Rg6 33.Nxg6 fxg6 34.b4!** The light−squared bishop joins the party and there's simply no defence for Black. **34...Re8 35.Bb3+ Kh8 36.Qh4+ Qh7 37.Bh6! Rf8 38.Qg5! Rxf2+ 39.Kg3 Rf7 40.Qxe5+ Rg7 41.Qg5 Be8 42.Bxg7+ Qxg7 43.Qh4+ Qh7 44.Qf6+ Qg7 45.e5 g5 46.a5 Qxf6 47.exf6 Bd7 48.Bd5 Bc8 49.Bf3 b6 50.Bg4 Bb7 51.Bf5 1−0**

□ **Anderssen,Adolf**
■ **Mayet,Carl**
Berlin m1 1851
[Eliskases/Schluricke]

1.e4 Bird, H. **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** This opening with its pawn sacrifice, the Evans−Gambit", was named after an English ship's captain, who introduced it about 1840. It is based on the idea of achieving a lead in development and in any case setting up a strong pawn centre. Openings of this sort are called gambits, from the Italian "dare un gambetto" (to trip someone up). At one point they were the meat and drink of chess − at a time when all play was aimed at either mate or achieving an overwhelming advantage. Even today when they are not so frequently played, they are still a dangerous weapon in the hands of an inventive attacking player. Bei dieser Eröffnung, dem "Evans−Gambit", benannt nach einem englischen Seekapitän, der sie um etwa 1840 herum aufgebracht hat, treffen wir ein Bauernopfer an. Es beruht auf dem Gedanken, einen Vorsprung in der Entwicklung zu erreichen und sich auf jeden Fall ein starkes Bauernzentrum zu bilden. Eröffnungen dieser Art nennt man "Gambite", eine Bezeichnung die vom italienischen "dare un gambetto" (ein Bein stellen) herrührt. Sie waren einstmals, d.h. zu Zeiten, in denen man nur darauf spielte, entweder zu siegen oder einer Übermacht zu erliegen, gang und gäbe. Heute hingegen werden sie nur noch selten gespielt, sie sind aber in den Händen eines erfindungsreichen Angriffsspielers immer noch eine scharfe Waffe. **4...Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 d3**
[Mayet was well aware that after Es war Mayet gut bekannt, dass Weiss nach 7...dxc3 White can bring about a powerful attack with mit 8.Qb3 Qf6 9.e5 einen mächtigen Angriff in die Wege leiten kann.]
[After Nach 7...d6 8.cxd4 Bb6 9.Nc3 White has a strong, mobile pawn centre. besitzt Weiss ein starkes, bewegliches Bauernzentrum.]
The continuation he has chosen is not better that the first one and without

doubt weaker than the second one since it neither achieves anything concrete nor aoes it advance his development. Die von ihm gewählte Fortsetzung ist jedoch nicht besser als die erste und zweifellos schwächer als die zweite, denn weder bringt sie was ein, noch fördert sie die Entwicklung. **8.Ng5 Nh6 9.e5 Nxe5?!** And a knight is lost... even if he gets three pawns in return. Und darauf geht, wenn auch für drei Bauern, gar ein Springer verloren. **10.Re1 Qe7 11.f4! Bb6+**

[Possibly Mayet had overlooked that after Möglicherweise hatte Mayet übersehen, dass er nach 11...Qc5+ 12.Kh1 Qxc4? 13.Rxe5+ he either loses material or is mated: entweder Material verliert, oder Matt wird: After Nach

A) Schlecht ist ≤13...Kf8? is bad on account of wegen 14.Qe1! g6 15.Re8+ Kg7 16.Qe5+ f6 17.Qe7+ and Black has to sacrifice the queen, because after und Schwarz muss die Dame opfern, weil auf Nf7 there follows 18.Rxh8 with mate in a few moves. e.g. folgt mit Matt in wenigen Zügen, z.B.: Kxh8 *(18...Kh6 19.Rxh7#; 18...fxg5 19.fxg5)* 19.Qf8#;

B) 13...Kd8 the king's bishop is gone. steht der Königsläufer ein.]

From now on he has to bank on the strength of the three pawns he got for his piece. But since the strength of the pawns is not evident in this sort of position but comes to the fore only in simplified positions, the prospect is not all that rosy. This explanation tells us the goals of the protagonists. Anderssen will try to bring about a decision by a violent attack since he has an extra piece to play with. Mayet on the other hand will aim for multiple exchanges and at the same time will have to secure the position of his king as best he can. Von nun an muss er auf die Kraft der drei Bauern hoffen, die er für die Figur erhält. Doch da die Bauern ihren vollen Wert nicht in einer Stellung wie dieser, sondern erst in vereinfachten Stellungen erhalten, ist diese Aussicht wenig beruhigend. Aus der vorangegangenen Erklärung ergeben sich bereits die Ziele der beiden Streitenden. Anderssen wird es darauf anlegen, die Entscheidung in einem heftigen Angriff herbeizuführen, den er mit einer Figur mehr spielen kann. Mayet wird dagegen einen mehrfachen Abtausch anstreben und zugleich seine Königsstellung so gut wie möglich sichern müssen. **12.Kh1 Nhg4 13.Nh3! d6 14.Bxd3 0−0 15.fxe5** It is generally advantageous not to capture a piece before you have to. This had become the case, because Black was threatening no less than 15...♘xd3, 16.♖xe7 ♘df2+, 17.♘xf2 ♘xf2, 18.♔g1 ♘xd1+ shaking off the pin and emerging with a won game. Es ist im allgemeinen vorteilhaft, einen Stein nicht eher zu schlagen, als bis es notwendig wird. Das war aber jetzt der Fall geworden, denn Schwarz drohte nicht weniger als 15...♘xd3, 16.♖xe7 ♘df2+, 17.♘xf2 ♘xf2, 18.♔g1 ♘xd1+ mit Abschüttelung der Fesselstellung und einem gewonnenem Spiel.

[15.Bd2?? Nxd3 16.Rxe7 Ndf2+ 17.Nxf2 Nxf2+ 18.Kg1 Nxd1+−+]

[15.Bc2 Nf2+ 16.Nxf2 Bxf2 17.Re4 *(17.Re2 Bg4)* 17...Bf5∓]

15...Nxe5 Bird, H.: '[Black has three pawns for his piece, and we should think

as good a game as his adversary.]'
16.Nf4 c6
[16...Bd7 Bird, H. appears better.]
17.Nd2 g5?! By weakening his king position, Mayet is doing exactly the reverse of what he should. By weakening his king position, Mayet is doing exactly the reverse of what he should. Bird, H.: '[This risky move entails the loss of the game.]' Indem Mayet seine Königsstellung schwächt, tut er gerade das Gegenteil dessen, was er tun sollte. **18.Qh5 f5??** This new mistake is the final straw. Dieser neue Fehler schlägt dem Fass den Boden aus.
[Black should have overprotected his knight on e5 with Schwarz hätte seinen Springer auf e5 mit ⌓18...f6 We will soon see why. überdecken müssen. Warum, das wird man gleich sehen.]
19.Bc4+! Now White is even ready to give back a piece for three pawns. But only because he will be clearly winning after the exchanges. Jetzt ist sogar Weiss dazu bereit, eine Figur für drei Bauern herzugeben. Das aber nur deshalb, weil er nach der Abwicklung klar auf Gewinn steht. **19...Kg7** Mayet hardly has any defence left and chooses the best of the remaining possibilities. Check out the variations: Mayet kann sich kaum noch wehren und wählt die beste der verbliebenen Möglichkeiten. Man prüfe folgende Varianten:
[19...d5 20.Nxd5 cxd5 21.Bxd5+ Kh8 22.Nf3 Bc7 23.Bxg5
A) After Auf 23...Qd6 then gewinnt 24.Nxe5 wins and und Qxd5? would be a mistake on account of wäre ein Fehler wegen 25.Ng6+ Kg8 *(25...Kg7 26.Qh6+ Kf7 27.Qxh7#)* 26.Ne7+;
B) 23...Qd7 24.Nxe5 Bxe5 25.Rxe5;
C) 23...Qe8 24.Bf6+ Rxf6 25.Qxe8+ Kg7 26.Qg8+ Kh6 27.Qg5#;
D) ⌓23...Qg7 24.Nxe5 Bxe5 25.Bh6+− and White wins. und Weiss gewinnt.]
[19...Kh8 20.Rxe5]
20.Nf3! That the sacrifice linked to this move is excellent can be seen from the following moves. Dass das hiermit verbundene Opfer vorzüglich ist, das zeigen uns die folgenden Züge. **20...h6**
[20...Qf6 21.Nxg5 h6 22.Nfe6+ Bxe6 23.Nxe6+ Kh7 *(23...Kg8 24.Rxe5 d5 25.Bxh6)* 24.Nxf8+]

BCCA v BCCS match 2002−3 (44.1) 2002

Two games out of sequence − sorry!

1.e4 e5 2.Nf3 d6 3.Bc4 Be7 4.0−0 Nf6 5.Re1 0−0 6.d4

[6.c3 in the style of Steinitz gives White a clear edge, in my view.]

6...exd4 7.Nxd4 Nbd7 8.Nc3 Ne5 9.Bb3

[9.Be2± preparing f4, is simpler.]

9...Bd7

[9...c5

A) 10.Nf3! Bg4 *(10...c4 11.Nxe5 cxb3 12.Nf3 bxc2 13.Qxc2 Bg4 14.Nd4±)* 11.Bf4;

B) 10.Nf5 Bxf5 11.exf5 c4 12.Ba4 a6 13.f4 Neg4 14.Qe2 d5! 15.Qxe7 Qb6+ 16.Be3 d4!∓;

C) 10.Nde2 c4 11.Ba4 *(11.f4 cxb3 12.fxe5 bxc2∓)* 11...a6 12.f4 Ng6∓]

10.Bf4

[10.f4 Ng6 11.Qd3±]

10...Ng6 11.Be3?!

[11.Bg3!?]

11...a6

[11...Ng4! solves most of Black's problems.]

12.a4 Nh4 Likewise!. **13.Nd5 Nxd5**

[13...Nxe4 simply drops a piece. 14.Bf4 *(14.Bc1 c6 15.Nxe7+ Qxe7 16.f3+−)* 14...c6 15.Nxe7+ Qxe7 16.f3 c5 17.Rxe4+−]

14.exd5 Ng6

[14...Nf5 15.Nxf5 Bxf5 16.Qf3 Bg6 17.Bd4 Re8±]

15.c4 Bf6

[15...Bg5 16.Qd2 Bxe3 17.Rxe3 Qf6±]

16.Qd2

[16.Bc2!? preparing to push the c−pawn is playable, and probably better, since Ne5 17.f4 Nxc4?? fails to 18.Qd3]

16...Ne5 17.h3 Qc8

[17...c5!? 18.dxc6 bxc6 19.f4 Ng6 20.Bc2 Rb8 21.Rab1 Re8 22.b4 c5 23.bxc5 Rxb1 24.Bxb1 dxc5 25.Nf3∞]

18.f4 Ng6 19.Bf2

[19.Bc2!? c5!? 20.dxc6 bxc6 21.Rad1±]

19...Re8 20.Rxe8+ Bxe8 21.Re1 Bd7 22.Bc2 Ne7

[22...c5!? 23.dxc6 bxc6 24.b3±]

23.b4 c5

[23...Nf5 24.Qd3 g6±]

24.dxc6 Bxc6

[24...bxc6! 25.Nf3 Qc7 26.Qd3 g6 27.g4± *(27.Rd1 d5±)*]

25.Qd3 g6

[25...Ng6 26.Nxc6 Qxc6 27.b5 axb5 28.axb5 Qd7 29.Bc5 Be7 30.Bb4 Ra2 31.Qb3 Ra8 32.Bxg6 hxg6 33.Qd3±]

26.Nxc6 bxc6??

[26...Qxc6 27.g4 Qc7 28.Re4 Rd8 29.Bb3 Nc6 30.b5±]

27.Qxd6

[And Black resigned, rather than treat us to 27.Qxd6 Kg7 28.Qxf6+!! Kxf6 29.Bd4#]

□ **Muir,Dorothy Eleanor**
■ **Freitag,HL.**
Canada Nth Am Class A sect B 6364
[W.Muir; Harding; Myers,D]

1.e4 Dorothy Muir was the wife of CCIM Walter Muir. This game is in his book W. Muir "My 75 Year Chess Career" but he spelled the opponent's name "Frietag." It should be Dr. H. L. Freitag, NOT De Freitas as annotated by D. Myers in the ChessBase database. Dorothy (nee Saunders) began playing postal chess in 1940, and numerous successes would follow, including winning the CCLA Woman's Championship in 1958, 1959, and 1960. She died in 1994, according to Avery. **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5 5.Bxf7+ Ke7 6.Bb3 Rf8 7.d3 d6 8.c3** First played in W.Muir−Ruys, 1959 says Walter.

[Myers]

Myers: Dorothy Muir was the wife of CCIM Walter Muir. She began playing postal chess in 1940, and numerous successes would follow, including winning the CCLA Woman's Championship in 1958, 1959, and 1960. She died in 1994, according to Avery.

CCLA Gambit Tournament corr 1950

[Sturm]

Myers: Harding mentions that Dr "Sturm was British consul in Trinidad and an active player in the 1950s." Harding identifies Black as "Mr Lee Magee of Kansas." Sturm; Harding & Cafferty: 'Sturm was British consul in Trinidad and an active player in the 1950s. This game is rather famous. It appeared in Mail Chess (Dec 1951) under the headline: 'A Sensational Discovery in the Evans Gambit − the "Rubicon" Variation'. Sturm wrote about it again in Correspondence Chess, January 1954 with a longer and revised set of notes in CC July 1956.. Black was Mr Lee Magee of Kansas.' **1.e4** Myers Harding Cafferty Sturm **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.d4 exd4 7.0−0 d6 8.cxd4 Bb6 9.Nc3 Na5 10.Bg5 Qd7** Sturm; Harding & Cafferty: 'Neglected possibility, see story on p137 of 1st ed Play the Evans Gambit (Cafferty/Harding). Some players had a seance to ask the ghost of Morphy what he would have played here...' **11.Bb5N** Sturm; Harding & Cafferty: '!?' Sturm;

Harding & Cafferty: 'This move introduces what Sturm sometimes called the Rubicon Variation and sometimes the Ghost Variation.'

[⩲11.Bd3 Sturm; Harding & Cafferty: 'possibly best; BCO says unclear/ compensation'

□ **City Berlin**
■ **City Breslau**
match 1829−31 corr 15.01.1829
[Pagni]

Myers: This is the first of two games played between the Chess Club of Berlin and the Chess Club of Breslau. The game began on 15.01.1829 and was concluded on 20.10.1831. Prominent in the Berlin club was Julius Mendheim who lived from 1788−1836. At the time this game was played, Breslau was part of Prussia. The city was assigned to Poland by the Potsdam Conference (1945) and is now known as Wroclaw.

□ **V.Bologan**
■ **E.Tomashevsky**
Aeroflot Open, Moscow 2006
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6
[Black wants to develop with ...g6, ... Bg7, ...d6 etc. Although it's unusual for Black to fianchetto in 1 e4 e5 openings, it's not difficult to appreciate the merits of this approach, especially when you consider that ... Rfe8, ...B(e7)−f8, ...g7−g6 and ...Bg7 is a typical regrouping manoeuvre in the main lines. Why not save time by playing ...g6 and ...Bg7 straightaway? Of course, it's not quite as straightforward as that. For one thing, after 4 d3 Black first has to deal with a serious threat. Yes, it hasn't been mentioned before, but 4 d3 carries a threat! For example, 4...d6? , which is not such a rare blunder, can be punished by 5.Ng5! . The best Black can do is d5 6.exd5 when he is a whole tempo down on the ultra−sharp 4 Ng5 variation of the

Two Knights. If Na5 *(*or *6...Nxd5 7.0−0* and Black is already in big trouble *)* 7.Bb5+ *(*or even *7.0−0)* 7...c6 8.dxc6 bxc6 9.Ba4 h6 10.Ne4 with zero compensation for the pawn.]

[Similarly, 4...g6? is also met by 5.Ng5! , and this is the reason Black spends a move on ...h6.]

5.0−0 d6 I think that this is Black's most accurate move order.

[If Black plays 5...g6 , White has no need to prepare d4 with c3 because the immediate 6.d4! looks even stronger. This reminds me of 4 d4 against the Two Knights. True, White has wasted a tempo by spending two moves instead of one advancing his pawn to d4, but Black has arguably wasted two tempi on ...g6 and ...h6. Here's one example: exd4 7.Nxd4 *(7.e5 d5 8.Bb5 Ne4 9.Nxd4* also looks reasonable *)* 7...Bg7 8.Nxc6 bxc6 9.e5! Nh7 10.Qd3! (preventing 10...0−0) Qe7 was A.Tuzhik−G.Evtushenko, Novosibirsk 2007, and in this position 11.Nc3 looks good. Black can hardly contemplate playing Bxe5 , in view of 12.Re1 g5 13.f4 .]

6.c3 g6 7.d4! A quick d3−d4 is the most challenging response to Black's slow development. What's more, playing d4 here and now more or less obliges Black to make a further prophylactic move (...Qe7, to go with ...h6) that he wouldn't have chosen to do in an ideal world.

[After the slower 7.Re1 Bg7 8.d4 Black can probably dispense with ... Qe7, at least for the moment, in favour of the more desirable 0−0 .]

7...Qe7 By defending e5 (and f7) Black cuts out any tricks and is now able to finish his development in relative peace. Let's take a look at other moves:

[a) Black must avoid 7...Bg7? 8.dxe5! .]

[b) 7...Nxe4?! 8.dxe5 must also be good for White.]

[c) 7...Bg4 is very strongly met by

A) I recently reached this position (against Gavin Wall, London League 2010) but failed to spot 11 d5 in my calculations. Instead I chose 8.Bb5?! , which is good enough for an edge, but nothing like 8 Qb3!. I got lucky with a trick after Nd7!? 9.d5 Ne7? *(*Black should play *9...Bxf3 10.Qxf3 Ne7)* 10.Nxe5! .;

B) 8.Qb3! . For example, 8...Qd7 9.Bxf7+! Qxf7 10.Qxb7 Kd7 11.d5! Ne7 12.Qxa8 Nxe4 13.Nbd2 and White already enjoys a decisive advantage, S.Fedorchuk−S.Bednarek, Warsaw 2005.]

[d) The paradoxical 7...exd4 isn't as bad as it looks: 8.cxd4 Bg7 *(8...Nxe4?* is met by *9.Re1 d5 10.Bxd5!)* 9.Nc3 0−0 10.Bb5!? *(10.d5 Ne7 11.h3 c6 12.dxc6 bxc6* was V.Genba−V.Malaniuk, Moscow 1995, and now *13.Re1* gives White an edge*,;* but *10.h3?! Nxe4!* is something to avoid *)* 10...Bg4 11.Bxc6 bxc6 12.h3 Bd7 13.Be3 Rb8 14.b3 with a small advantage, R. Kuczynski−M.Bartel, Bydgoszcz 2001.]

[e) 7...Nd7!? is another move which you would think Black shouldn't be able to get away with, but again it's not bad at all - certainly good enough

to have been used by grandmasters Alexander Graf and David Howell: 8.Be3 *(*to prevent Black from castling easily; *8.dxe5 Ndxe5 9.Nxe5 Nxe5 10.Bb3 Bg7 11.f4* is a decent alternative *)* 8...Bg7 9.Qc1 Qe7 10.Re1 Nf6 11.Bd5!? Nb8!? *(*this came as a shock; I was counting on something like *11...g5 12.Bxc6+ bxc6 13.dxe5 dxe5 14.Nbd2)* 12.Na3 g5

A) after the game David suggested that 13.Bb3 was a better try for White; if Black cannot capture on e4, White must have a typical edge, but Nxe4 does look risky in view of 14.Qc2 f5 *(*or *14...Bf5 15.Bd5!)* 15.dxe5 dxe5 16.Bd5;

B) 13.dxe5 dxe5 14.Qc2 Nxd5 15.exd5 0−0 16.Nc4 f6! with an unclear position, J.Emms−D. Howell, Southend 2008. Black's kingside pawns are not only rock−solid, they also possess considerable potential to expand.]

8.Re1 Bg7 9.Nbd2 0−0 10.h3

Let's try to briefly sum up this position. Black has employed a King's Indian/Pirc set−up, and the natural pawn break to gain counterplay is ...f5. However, as it stands it's difficult for Black to arrange this move effectively. It requires at least two moves' preparation. What's more, even when the move becomes legal, Black must be careful he isn't simply opening the position in White's favour. The ...f5 break becomes much more desirable and practical if White closes the centre with d5. Therefore, White must try as hard as possible to maintain the tension in the centre, and should not be tempted by d5 unless the rewards are significant. **10...Bd7** Black has tried many moves here, although the plans are all quite similar. Here are a few possibilities:

[a) 10...Kh8 11.Nf1 Bd7 12.Ng3 Nh7 13.Be3 Rae8 14.Qd2 h5 , as played in V.Bologan−S.Halkias, Plovdiv 2008, is similar to the main game.]

[b) The plan of 10...Nh5 followed by ... Qf6 and ...Nf4 backfires here: 11.Nf1 Qf6?! 12.Ne3! (eyeing both d5 and g4) Ne7 *(12...Nf4 13.Nd5!)* 13.Ng4! Bxg4 (forced, but not what Black would have wanted) 14.hxg4 Nf4 15.g3 Ne6 16.d5 Ng5 17.Nxg5 hxg5 18.Kg2 (I've seen better black queens!) Bh6 19.Rh1 Kg7 20.Be3 Rh8 21.Qd2 Ng8 22.Rxh6! Nxh6 23.Bxg5 and White won, B.Heberla−I. Cheparinov, Litohoto 1999.]

[c) 10...Nh7 intends ...Ng5, an idea we've seen previously in Nevednichy−Mitkov. Black wants to add pressure to d4 and induce the d5 advance, but White doesn't have to comply: 11.Nf1 Ng5 and now:

A) 12.N1h2 Nxf3+ 13.Nxf3 Kh7 14.a4 f5 15.dxe5 dxe5 was M.Ghinda−A.Beliavsky, Lviv 1981, and I think Parma's suggestion of 16.Bd5 looks best.;

B) 12.Bxg5!? (an interesting decision; by taking with the bishop on g5 rather than the knight, White is able to hold d4 and at the same time try to exploit the weakness of g5 - something Black fails to prevent...) hxg5 13.Ne3 Rb8?! *(*Atlas suggests *13...Na5* as an improvement, although after *14.Bf1* it's not clear how Black

proceeds,*;* while Rybka suggests the paradoxical *13...Qf6!?* intending *14.Nd5 Qd8 15.Qd2?! g4)* 14.Qd2! b5? 15.Bb3 Na5 16.Nd5 Qd8 17.dxe5 Bxe5 18.Qxg5 Qxg5 19.Nxg5 c6 20.f4 cxd5 21.fxe5 Nxb3 22.axb3 dxe5 23.exd5 and White soon won in S. Tiviakov−D.Sermek, Beijing 1997.; **C)** 12.−−]

11.Nf1 Rae8 12.Ng3 Qd8

[12...Kh8 13.a4 Nh7 14.dxe5! Nxe5 *(*or, similarly, *14...dxe5 15.b3!)* 15.Nxe5 dxe5 *(*if *15...Qxe5* , White plays *16.Be3* intending Bd4 or f2−f4 *)* 16.b3! followed by Ba3 is annoying for Black. Rd8 17.Ba3 c5 18.Qd5! b6 19.Qb7 Qf6 was J.Nunn−L.Christiansen, London 1982, and here 20.Qxa7 Bxh3 21.a5! (Nunn) is very strong.]

13.Bb3 Notice how Bologan patiently improves his position. On b3 the bishop is less prone to an attack, and in fact next move it goes to c2 to further protect e4 and thus enable Be3.

[13.d5?! is exactly what Black is hoping for, and something that should be avoided. After Ne7 everything is in place for a typical King's Indian style attack on the kingside, whereas White will take a while to get going on the other wing.]

13...a6 Tomashevsky waits, and also it's useful to have the a−pawn away from a7 in some lines after Be3. Even so, Black should probably be trying to play a bit more actively.

[The more direct 13...Kh7 14.a3 Ng8 was played in L.Yudasin−I.Efimov, Reggio Emilia 1997. It's worth seeing how this game progresses, as it demonstrates how difficult it is for Black to organize ...f5 unless White plays d5: 15.Bc2! (indirectly pointing at the black king) a6 *(*if *15...f5?!* , *16.exf5 gxf5 17.dxe5 dxe5 18.Nh4 e4 19.Qh5 Nce7 20.Bg5!* and some nasty sacrifice on e4 is likely *)* 16.Rb1 Qc8 17.b4 (White gradually expands on the queenside) Nd8 18.Be3 Ne6 *(18...f5* is again unwise: *19.exf5 gxf5 20.dxe5 dxe5 21.Bc5 Rf7 22.Nh4 e4 23.Qh5 Ne7 24.Bb3* and Black is getting hit from all angles... *)* 19.Qd2 f6 (...so he settles for ...f6) 20.Rbd1 Re7 21.Nh2 Qe8 22.d5 (finally White advances, but only after much preparation on the queenside, and even here there were many other ways to play it) Nd8 23.c4 Kh8 24.c5 (White's attack is quicker, but there's still much to play for) f5 25.exf5 gxf5 26.f4! (killing the d7−bishop) Qg6 27.Bf2 e4 28.Nhf1 Bf6 29.Ne3 Rg7 30.Kh2 Ne7 31.Rg1 Rfg8 32.a4 Nf7 33.Qe2 Ne5!? 34.Kh1 Be8 *(*this sacrifice feels a bit desperate, but *34...Nf7* is answered strongly by *35.Nh5!)* 35.fxe5 Bxe5 36.Ngf1 Qg5 37.Nc4 Bh5 38.g4 fxg4 39.Nxe5 g3 40.Nf7+ *(40.Qxe4* should win *)* 40...Rxf7 41.Bd4+ Rgg7 42.Qxe4?? *(42.Bxg7+! Kxg7 43.Nxg3!* wins *)* 42...Bf3+ (oh dear!) 43.Qxf3 Rxf3 44.Bxg7+ Qxg7 45.Be4 Qc3 46.Rg2 Rf2 47.cxd6 cxd6 48.b5 axb5 49.axb5 Nf5 and White resigned.]

14.Bc2 Continuing the plan. Now White is ready to increase the pressure with Be3, Qd2 and Rad1.

[Whereas a premature d5 should be

avoided, exchanging on e5 can be considered, especially if White prefers a position without tension. Here 14.dxe5 Nxe5 15.Nxe5 dxe5 *(*or *15...Rxe5 16.Bf4 Ree8 17.Qd2)* 16.Be3 , as suggested by Lukacs, promises White a small advantage.]

14...Nh7 15.Be3 h5 White is quite happy to see Black weaken the g5−square, and this makes any subsequent ...f5 less desirable.

[Lukacs suggests 15...Ng5!? as an improvement. I think Bologan would have reacted with 16.Nxg5 hxg5 17.d5 . The advance is justified here because Black is denied the possibility of ...Ne7, and on b8 the knight is very poorly placed. Furthermore, after Nb8 18.b4 Black still can't play f5 , as 19.exf5 gxf5 20.Qh5 is a strong reply.]

[Note that 15...f5? 16.exf5 gxf5 17.dxe5 dxe5 18.Bc5! *(*or even *18.Nh5!* leaves Black struggling. *)*]

16.Qd2 Qf6 17.Kh2 Black was threatening 17...Bxh3. **17...Bc8 18.Rad1**

[18.a3!? followed by b4 would be a typical idea to gain space on the queenside, but Bologan's plan proves to be very effective indeed.]

18...Kh8 19.Ne2 Qe7 20.Ng5! White wants to free up the f−pawn and is happy to accept an exchange of knights to do so. **20...Nxg5 21.Bxg5 f6**

[Or 21...Bf6 22.Bxf6+ Qxf6 23.f4 (Lukacs).]

22.Be3 f5 23.Bg5 Bf6 24.Bxf6+ Rxf6 25.f4! At first sight it may look like this position, full of tension, offers equal chances for both sides, but there are two key factors which swing the game almost decisively in White's favour: 1. White's pieces are better positioned than their counterparts. For example, Black's rook on f6 would prefer to be on f8 defending its partner; and his queen is uncomfortable on the e−file, as demonstrated by 25...exf4? 26 exf5. 2. Black's king is weaker than White's. His decision to play ...h5 has done him no favours at all, and he experiences some problems with dark−squared weaknesses, especially after the exchange of dark−squared bishops. Let's see how Bologan ruthlessly exploits his advantages: **25...Qg7 26.fxe5 dxe5 27.exf5 Bxf5 28.Bxf5 Rxf5**

[28...gxf5 29.dxe5 Rxe5 30.Nf4 (Lukacs) is even worse.]

29.Ng3 Rff8 30.d5! Nd8 31.Ne4 Now White has a juicy outpost for his knight to add to all his other advantages. **31...Rf4 32.Qe3 Ref8 33.Nc5! e4**

[33...R4f5 hangs on to the e5−pawn, but 34.d6 is a strong reply *(*and so is *34.Ne6 Nxe6 35.dxe6 Re8 36.Rd7 Qf8 37.Rxc7 Rxe6 38.Rxb7 .)*]

34.Nxe4 Qe5 35.g3 R4f7

[35...Rf3 loses to 36.Qh6+ .]

36.Kg2 Kg7 37.Qd2 c6 38.c4 cxd5 39.cxd5 h4 40.gxh4 Qh5 41.Qc3+ Kg8 42.Qg3 Rf4 43.Rd2

[Black's position is hopeless. If 43.Rd2 Rxh4 there's 44.Rf2 Rxf2+ 45.Qxf2 with no decent defence to the threat of 46 Nf6+. An exceptionally well played game from Bologan. He didn't seem to give his opponent any chances at all.]

□ **Kramnik,V..**
■ **Krasenkow,M..**
Corus Chess Tournament 2003 2003
[Nigel Davies]

Several books have been written about Kramnik's White repertoire based on 1. Nf3, so he effectively scuppered sales by playing 1.e4 in the recent Corus tournament in Wijk aan Zee. To make matters worse he is quoted as having said that he would have liked to play 1. e4 in his match against Kasparov but did not have enough time to prepare it.... Given the amount of theory in the Ruy Lopez, many players have found the Giuoco Piano rather tempting. One can in fact find Kramnik games in this opening from the late 1980s with many of the positions being reminiscent of the Spanish. One of the big questions is whether or not Black can play ...d7−d5 and successfully free his game. In the Spanish this involves sacrificing a pawn in the Marshall Attack, and here too it is not altogether painless. Several books have been written about Kramnik's White repertoire based on 1. 25...dxc4 26.Rxd7 cxb3 27.Rxb7 Neil McDonald: 'At move 17, Kramnik converted his (potential) activity advantage into a structural advantage. Now White's structural advantage has been converted back into an advantage in activity: namely a rook on the seventh rank. It might be argued that the b3− pawn is a structural defect, but any weakness of the pawn is inextricably linked with White's dominance of the seventh rank. After all, if Black rather than White had a rook on the seventh rank, we might be describing White's b2− pawn as a structural weakness and the b3−pawn as an asset for Black: a far advanced pawn with the potential to become a queen. In fact, any judgement

about the weakness or strength of a pawn structure has to take into account the activity or passivity of both sets of pieces. We must always bear this in mind when we talk about an advantage in activity or an advantage in structure: they aren't two mutually exclusive assets - indeed, the fact that one type of advantage is so readily converted into the other type shows their interconnectedness. Having said all that, for the sake of clarity we shall continue to refer to structural and activity advantages as distinct entities. '

29.Rxf7 Rxb7 30.Rxb7 Re4 31.Rxb3 Rxa4 Lukacs: 'Lukacs,Peter: 'If Black can exchange the pawns on the «, the ⊥ is drawish.'' Neil McDonald: 'White's advantage has undergone a third transformation: piece activity has been converted into an advantage in material. Nevertheless, the game remains finely balanced between a win for White and a draw for Black. If Black succeeds in liquidating the queenside pawns without suffering any misfortune on the kingside, White's 3−2 majority of pawns is unlikely to be enough for victory: Black would only need to give up his knight and two pawns for White's three pawns in order to achieve the theoretical draw of rook versus rook and knight (with no pawns on the board). Therefore, Kramnik is planning another conversion of advantage, for which he will need to utilize his kingside pawns. ' Lukacs, Peter: 'If Black can exchange the pawns on the «, the ⊥ is drawish.''If Black can exchange the pawns on the «, the ⊥ is drawish. □ **Ivanchuk,V.**
■ **Khalifman,A.**
28. Reggio Emilia 1991
[Junior Tay]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5
[3...Nf6 is the Two Knights' move order or
A) intending 4.d3 Bc5 5.c3 a6 , but of course White has many other possibilities in that sequence: *(5...−−)*;
B) such as 4.d4;
C) 4.Ng5 .]
4.c3 Nf6 5.b4 In the Giuoco Piano (or Italian Game), White frequently elects to seize queenside space by gaining time on the dark−squared bishop and, very often, he uses the manoeuvre Nd2−c4 to put pressure on e5 and the bishop simultaneously. If Black wants to avoid this version of it, he can adopt the Two Knights' move order 3...Nf6 (see above).
5...Bb6 6.d3 d6 7.a4 Once again gaining space by threatening to trap the bishop. **7...a5** QUESTION: Clearly Black has to advance his a−pawn to give the bishop a retreat square. Are there significant differences between 7...a6 and 7...a5 − ?
[ANSWER: With 7...a6 , Black relies on a solid position without weaknesses, accepting the restricted space on the queenside, which White has effectively gained 'for free' and may reduce further with a4−a5 at some point. The text move is more challenging, as Black stakes a claim on the queenside as well, and more−or−less forces White to commit to 8 b5, giving up the c5−square. On the flipside, the b6−bishop and a5−pawn may become targets when White executes the Nbd2−c4 manoeuvre.]
8.b5 Ne7 9.0−0 Ng6 The queen knight's foray to g6 is thematic in this variation (irrespective of Black's choice with the a−pawn on move 7) and has the following purposes: 1. Overprotecting the e5−pawn, if Black decides to hit back in the centre with ... d6−d5 or if White gets d3−d4 in. 2. Making designs on the white kingside with ...Nf4. 3. Add pressure on the kingside pin ...Bg4 with ...Nh4. 4. Meeting Bg5 with ...h7−h6, when Bh4

would result in the bishop being traded off. In any case, Nbd2−f1−g3 is a common manoeuvre for White in Ruy Lopez, so Black's ...Nc6−e7−g6 is a similar knight dance. **10.Nbd2 0−0 11.Ba3?!**

[The standard plan here for White is to retreat his light−squared bishop with 11.Ba2]

[or 11.Bb3 , clearing the c4−square for the d2−knight to attack b6 and a5. In that case Black usually responds with c6 , so as to meet 12.Nc4 with Bc7 , and preparing ...d6−d5.]

[With 11.Ba3 , Ivanchuk anticipates that plan by applying pressure along the a3−f8 diagonal, which can be increased by d3−d4. The drawback is that the bishop is rather missed on the kingside. White now has less cover of f4, which an enemy knight is poised to seize, and no longer has the option of opposing Black's strong b6−bishop with Be3.]

11...Nh5! Khalifman immediately seizes the chance to play for an attack by targeting the f4−square.

[As an alternative, Israeli GM Victor Mikhalevski came up with an interesting concept to press White on the d−file after 11...Qe7 12.Re1 Bc5!? 13.Bxc5 dxc5 14.Qb3 Rd8 15.Rad1 Nd7 16.Qa3?! Nb6 17.Re3 Nxc4 18.Nxc4 b6 19.h3 Qf6 20.Qc1 Be6 21.Nb2 Nf4 with strong attacking chances, L.Yudasin−V.Mikhalevski, Beersheba 1993.]

12.d4 The most logical and consistent response; White reacts to the flank attack with his intended break in the centre. QUESTION: Why can't he play 12 Nxe5, exploiting the loose position of the h5−knight?

[ANSWER: After 12.Nxe5?? Nxe5 13.Qxh5?? Bg4 , White loses his better half and there's not much point playing on.]

12...Nhf4! A strong gambit - Khalifman offers the e−pawn to accelerate his attack. **13.Re1** Prudent play by Ivanchuk, who realizes that it is high time for him to take defensive measures.

[Three years later, German GM Christopher Lutz chose to accept Khalifman's sacrifice: 13.dxe5 Bg4! *(*better than *13...Nxe5 14.Nxe5 Qg5 15.g3 Nh3+ 16.Kg2 Qxe5 17.Bd5! Qxc3 18.Nc4* with strong attacking chances for White after 19 Bb2, J. Hjartarson−N.Short, Manila Olympiad 1992 *)*

A) 14.g3 Nxe5! 15.gxf4 Bxf3 16.Nxf3 Nxc4 17.Qd5 Nxa3 18.Rxa3 Qf6 19.f5 g6! 20.Qxb7 gxf5 21.c4 Kh8 22.Kh1 Rae8 23.exf5 Rg8 gave Black a powerful initiative, C.Lutz−A.Khalifman, Wijk aan Zee 1995. *(23...−−)*;

B) Instead, 14.exd6 is possible, but Lutz was worried about Nh4!? 15.dxc7 Qxc7 16.Bxf8 Rxf8 with a strong attack for the exchange.;

C) Alternatively, after 14.exd6 , Black could just play cxd6 , still with an impressive build−up on the kingside, and options such as ...Rc8 or ...Ne5 (hitting c4 and adding pressure to the f3−knight).;

D) White might have to resort to 14.Qc2 , when 14...Qd7 15.Kh1 Bxf3 16.Nxf3 Qg4 17.Rg1 Nh3 18.Rgf1 Nhf4 led to a draw by repetition in G.Cardelli−M.Voss,

correspondence 2004.]

13...Bg4! Natural and best, intending to increase the pressure with ...Nh4.

14.h3!? At least three publications attach the "?!" (dubious) mark to this move, which, for the price of a bishop, allows Black to get a huge attack by decimating the white king's entire pawn cover. QUESTION: So why did Ivanchuk play it? ANSWER: The alternatives aren't that great. If White tries to dig in and defend, Black would have an easy, risk−free squeeze.

[Let's take a look: 14.Bb2 Nh4 15.Bf1 Qf6 16.Re3 Rae8 17.Qe1 Nxf3+ 18.Nxf3 Nh3+ 19.Kh1 Qf4! 20.Nxe5! *(* after *20.Bd3* , Black has *Re6!* , intending ...Rh6 *)* 20...Nxf2+ 21.Kg1 dxe5 22.Qxf2 Qxf2+ 23.Kxf2 Rd8 and Black has the superior game due to his strong pressure on White's centre.]

[14.Qc2 Nh4 15.Nxh4 Qxh4 16.Re3! (setting up a pawn sacrifice to free his position, which Black should be decline) h5! (keeping the pressure up) *(* after *16...exd4 17.Nf3 Bxf3 18.Rxf3 dxc3 19.Qxc3 Ne6 20.Re1 Bd4 21.Qd2 Be5 22.g3 Qg4 23.Rd3* , White has good compensation for the pawn, thanks to his bishop pair and central presence *)* 17.Nf3 Qf6 18.Bb2 *(* not *18.dxe5?? Qg6!)* 18...c6 , when Black maintains the tension with the better chances.]

14...Bxh3 15.gxh3 Nxh3+ 16.Kh2!? QUESTION: Isn't this highly risky, since White loses the f−pawn as well? ANSWER: White can play the safer, more defensive 16 Kf1, but the resulting positions don't give him any chances to play for the win. Ivanchuk obviously prefers to duke it out with active defence where Khalifman has a greater likelihood of going wrong.

[After 16.Kf1 Qf6 17.Nb3! Nh4! 18.Re3 Rae8! 19.Bd5 *(* or *19.Qd3 h5!* and Black simply arranges to run the h−pawn down *)* 19...Qg6 20.Ng5! Nxg5 21.Qg4 Ngf3 22.Qxg6 hxg6 23.Ke2 Ng5 24.Bxb7 Ng2 25.Rg3 Nf4+ 26.Kf1 f6 , Black has an extra pawn and a slight edge.]

16...Nxf2 This is the risk that Ivanchuk has assumed: Black has three kingside pawns for a piece and the white king has been stripped of its entire pawn cover.

[16...Ngf4 is less accurate, since White can reorganize and use three minor pieces for shielding: 17.Nf1! Qf6 18.Ng3 Nxf2 19.Qd2 Ng4+ 20.Kg1 Qh6 21.Bf1 with a defensible position.]

17.Qe2?! Ivanchuk keeps the queen near the king for defensive duties.

[It is difficult to appreciate that sending the queen away from action is the stronger, but... well, that's why the computer engines are Elo 3000+ strength. Houdini spews out 17.Qc2! Ng4+ 18.Kg3 h5! 19.Nf1 Qf6 *(* after *19...exd4 20.cxd4 Qf6 21.Qd2 Nh4! 22.Nxh4 Bxd4 23.Nf3 Bxa1 24.Rxa1! Qxa1 25.Bb2 Qb1 26.Bxg7! Kxg7 27.Qg5+ Kh7 28.Qf5+* , the game ends in perpetual check *)* 20.Bc1 d5! 21.exd5 *(* or *21.Bxd5 exd4 22.Bg5 Qd6+ 23.Kg2 c6 24.Ba2 d3* and Black keeps the edge *)* 21...exd4 22.Bg5 Qd6+ 23.Kg2 dxc3 24.Qxc3 Rae8 25.Rxe8 Rxe8 26.Re1 Rxe1 27.Qxe1 Qd7 and according to the engine, Black

has a slight edge.]

17...Ng4+ EXERCISE: Where should White place his king? ANSWER: The king advances fearlessly! **18.Kg3!** Instead of trying to keep the king safe on the back rank, Ivanchuk plays actively and forces Khalifman to work for the win (if there is one).

[Passive back rank retreats just hand the win to Black on a platter: 18.Kh1? Nf4 19.Qf1 exd4 20.cxd4 Bxd4! and White is lost.]

[18.Kg1?! Nf4 19.Qf1 Qf6 20.Bb2 *(* or *20.Ra2 Rae8 21.Nb3 Qg6 22.Kh1 Qh5+ 23.Nh2 Qh4 24.Bc1 Kh8!* , intending ...f7−f5 *)* 20...Rae8 21.Ba2 Qh6 and the threat of ...Re6 is impossible to meet; for example, 22.Rad1 Re6! 23.Bxe6 fxe6 24.Re2 Rf6 and ...Rg6 wins.]

[18.Kg2?? Nf4+ just wins the queen, of course.]

18...Nf4?! Ivanchuk's brave Steinitzian king advance ("the king is a fighting piece - use it!") has worked! Now he gets to the time required to bring his queen over to defend the king and even mount a counter−attack. QUESTION: What is Khalifman's best way of meeting Ivanchuk's brazen king advance?

[ANSWER: He should coolly secure his g4−knight with 18...h5! (as in Houdini's 17 Qc2 line above). Let's have a look at a few variations: 19.Qf1 *(* after *19.Rh1 Nf4 20.Qf1 Qf6 21.Re1 g5* , the white king will always be in danger, being stuck on g3 *)* 19...exd4 *(* the immediate *19...Qf6* may be even better *)* 20.Qh3 Qf6 21.Qxh5 Qf4+ 22.Kh3 N6e5 23.Rf1 g6 *(* or *23...Nf6 24.Qh4 Qxh4+ 25.Kxh4 Ng6+ 26.Kg3 dxc3 27.e5!)* 24.Qh4 dxc3 25.Nxe5 Nf2+ 26.Rxf2 Qxh4+ 27.Kxh4 Bxf2+ 28.Kg4 cxd2 and at this moment Black has a material advantage of rook and four pawns for bishop and knight, though the position remains highly chaotic and unclear.]

19.Qf1! Ivanchuk's queen performs a 'square root' journey' (d1−e2−f1−h1−h4) where it shields the king from a frontal assault. **19...Qf6 20.Qh1**

[EXERCISE: Work out the win for Black after 20.Kxg4?? . ANSWER: Qg6+ 21.Ng5 *(* if *21.Kh4* then *c5!* and ...Bd8+ is decisive *)* 21...Qh5+ 22.Kg3 Qxg5+ 23.Kf3 exd4 24.Qg1 Qh6! (keeping the queens on is the simplest) 25.cxd4 Nh3! 26.Qe3 Qf6+ 27.Kg3 Bxd4 28.Qf3 Qh6 and Black wins.]

20...Qg6 21.Qh4! Ivanchuk's idea is to trade queens with Qg5, but he had to work out that it is possible to allow Black a discovered check.

[Actually, there is another option in 21.Rg1! Nf6+ 22.Kf2 Nxe4+ 23.Ke1 Qf5 24.Nxe4 Qxe4+ 25.Kd2 exd4 26.Nxd4 , when Black has four pawns for the bishop but his attack is over.]

[However 21.Nh4? should be avoided due to Nh5+ 22.Kf3 Qg5 .]

21...Nh5+

[After 21...Ne3+ 22.Qg5 Nh5+ 23.Kh2 Qxg5 24.Nxg5 exd4 25.cxd4 Nc2 26.Ndf3 Nxa1 27.Rxa1 h6 28.Nh3 , it's anybody's game.]

22.Kg2!? Remarkably sangfroid.

[Ivanchuk is not satisfied with repeating the position after 22.Kh3 Nf4+ 23.Kg3 and plays for keeps, sacrificing the exchange on e1.]

22...Ne3+

[Now 22...Nf4+ would be pointless, as the king just goes back to h1.]

23.Kf2 Ng2 24.Qh2 Nxe1 25.Rxe1 Nf6

[QUESTION: How does White continue after 25...Nf4 − ? ANSWER: By massing everything on the kingside with 26.Nh4! Qf6 *(*after *26...Qh6 27.Ndf3 Ne6 28.Bc1 Qh5 29.Qg3 Kh8 30.Kg2* , White's huge kingside offensive outweighs his material deficit *)* 27.Nf5 Ne6 28.Rh1 h6 and now, for instance, 29.Kf1!? *(29.Qg3 Ng5 30.Kg2 exd4 31.cxd4 Bxd4 32.Nf3 Nxe4 33.Qf4 Qg6+ 34.Kh2 Qh5+ 35.Kg2 Qg6+* is a draw by perpetual check *)* 29...exd4 30.Nf3! dxc3 31.Bc1 Rfd8 32.Qg3 Kf8 33.Bxe6 Qxe6 *(*or *33...fxe6 34.Nxg7!)* 34.Qxg7+ Ke8 35.Rxh6 Qc4+ 36.Kg2 Kd7! 37.Qg4 with dangerous threats. Houdini claims a draw here too, but over the board anything might happen.]

26.Qg2 QUESTION: What do you think of Ivanchuk's decision to go for an endgame? ANSWER: It's a strong idea. Once the queens come off, the white minor pieces grow in strength, while Black's extra kingside pawns are not easy to advance. Furthermore, the white king ceases to be a liability, harassed by the black minors, and becomes a useful piece in the ending.

[All the same, 26.Qg3! looks more accurate. Then if Black swaps queens on g3, the white king is more active; while after Ng4+ *(26...Rfe8?! 27.Qxg6* transposes to the game *)* 27.Kg2 , the king is happier off the b6− bishop's diagonal.]

26...Rfe8?! In my opinion, this is the turning point of the game. By allowing his g−pawns to be doubled, Black's extra ones lose their effectiveness.

[If he doesn't mind the queens coming off, Black would do better to swap them himself; i.e. 26...Qxg2+ 27.Kxg2 , when exd4 28.cxd4 Rfe8 29.e5 d5 30.Ba2 Nh5 31.Kh2 c6 32.bxc6 bxc6 33.Rc1 Rac8 leaves him on (slightly) the favourable side of equal.]

[QUESTION: Should Black keep the queens on the board then? ANSWER: That's a very tough question. My gut feeling is that, yes, Black's chances are probably better with the queens on, for the reasons given in the previous answer. And after 26...Ng4+ , followed by ...h7−h5, the new knight on g4 (it's actually the queen's knight this time) will be a nuisance to the white king too. Having said that, I can't find a line that guarantees Black an advantage. For example, 27.Kg1 *(*putting the king in the middle with *27.Ke2?!* looks rather dangerous after *exd4 28.cxd4 Kh8!* , followed by ...f7−f5 *)* 27...h5 28.Bb3! exd4 29.cxd4 Rac8 30.Nc4! Rfe8 31.Nxb6 cxb6 32.Bb2 Rc7 *(32...Rxe4* is met by *33.Bxf7+! Qxf7 34.Rxe4* with equal chances *)* 33.Nh2! Kh7 34.Nxg4 Qxg4 35.Qxg4 hxg4 , and what is there to say about this position except (cop out with) the overused term "unclear"?]

27.Qxg6 hxg6 28.Bb3 Now White's extra piece becomes more prominent, as Black's extra f− and (doubled) g− pawns are static and cannot be easily mobilized. **28...d5!?** A logical but risky policy. Khalifman seeks to open the

central files in order to utilize his extra rook. The drawback is that White's minor pieces now become very active.

[Perhaps Black should have preferred the safer 28...exd4 29.cxd4 Rac8 30.Kg3 d5 31.e5 Nh5+ 32.Kg4 c6 with good counterplay in a roughly equal position.]

29.exd5 exd4 30.Rxe8+ Rxe8 31.cxd4 Rd8? This move, regaining the front white d−pawn, was what Khalifman was counting on, but it's almost a losing mistake.

[He should have played 31...g5! (threatening to push the f3−knight away from defence of the d4−pawn) 32.Bc5 *(*if *32.d6 cxd6 33.Bxd6 Rd8 34.Be5 Nd7 35.Bg3 Nf6* , Black's chances are as good as White's *)* 32...Nd7! 33.Bxb6 Nxb6 34.Nxg5 Rd8 35.d6 Rxd6 36.Bxf7+ Kf8 37.Bb3 Ke7 38.Ngf3 Rh6 , when the active rook gives Black sufficient counterplay.]

[31...Ng4+ and 32...Ne3 looks okay too.]

EXERCISE: How did Ivanchuk throw a spanner in the works? ANSWER: A powerful rejoinder renders the black rook irrelevant. **32.d6!! cxd6** Now the rook has neither entry points into the white camp, nor targets to aim at, so White's minor pieces get to rule the board.

[It was too late to play 32...g5 , as after 33.Nc4! g4 34.Nxb6 cxb6 35.Ne5 Ne4+ 36.Ke3 Nxd6 37.Bxd6 Rxd6 38.Nxf7 Rf6 39.Ne5+ Kh7 40.Nxg4 , White has a huge advantage.]

33.Nc4 How swiftly the tables turn. Black is forced to back−pedal and guard against White's queenside majority. **33...Bc7 34.b6 Bb8 35.Nxa5 Rd7 36.d5!** Imprisoning the black bishop on b8. **36...Ne4+**

[Another option was 36...Re7 37.Nd4 Ne4+ 38.Kg2 Nc5 *(*if *38...Kf8* then *39.Ndc6!* wins *)* 39.Bxc5 dxc5 40.Nb5 Rd7 . EXERCISE: How does White deliver the killing blow in this case? ANSWER: After 41.Nxb7!! Rxb7 42.a5 Kf8 43.d6 Ke8 44.Bd5 , the white pawns cannot be denied their quest for glory.]

37.Kg2 Nc5 38.Bd1 It seems that Ivanchuk is playing safely before reaching time control but he has something up his sleeve.

[Alternatively, Houdini finds a nice tactic, enabling White to trade pieces favourably: 38.Ne5! dxe5 *(*or *38...Nxb3 39.Nxd7 Nxa5 40.Bb2!* and the b8−bishop is a dead duck *)* 39.Bxc5 Bd6 40.Bxd6 Rxd6 41.Nc6! Rd7 *(*or *41...bxc6 42.b7)* 42.a5! and the pawns are unstoppable.]

38...Re7 EXERCISE: White to play and win - on move 39! ANSWER: We've seen this trick twice already in the notes, so it shouldn't have been too difficult to find. Ivanchuk unleashed the whopper... **39.Nc6!** What a move to play before the time control! This shows guts and confidence in one's calculations. **39...bxc6**

[Allowing connected passed pawns might seem like a mistake, but retreating with 39...Re8 would just permit Ivanchuk to win even more brilliantly: 40.Nfe5!! (putting a second knight en prise) f6 *(*taking either knight loses too: *40...dxe5 41.Bxc5;* or *40...bxc6 41.Nxc6 Nd3 42.a5*

Re3 43.Bb4! Nxb4 44.Nxb4 Ra3 45.a6 Kf8 46.Be2 Ke8 47.Nc6 and Black can resign *)* 41.Nxg6 Nd3 42.Nxb8 Rxb8 43.Bxd6 Ra8 44.Ne7+ Kh8 45.Be2 Ne5 46.Bb5 Nf7 47.Bc7 and White nurses the d−pawn home.]

40.dxc6 The passed pawns cannot be restrained. **40...Na6 41.Nd4 Re4 42.Be2 Rxd4 43.Bxa6 Rd2+ 44.Kf1 Rc2 45.Bb5 Kf8 46.a5** An exquisite finish by Ivanchuk. SUMMARY: After being outplayed in the opening by the Russian GM (who would be FIDE World Champion in 1999) and facing a strong attack, Ivanchuk took the bull by the horns, conducting an extremely vigorous defence by upping the tempo, even to the extent of using his king to help complicate matters. Finally, the tension got to Khalifman, who allowed his extra pawns (for the piece) to become static after trading queens and then failed the right way to activate his rook, after which Ivanchuk's endgame technique took over.

□ **Larsen,B..**
■ **Ochsner,T..**
Danish Championship, Esbjerg 1997

1.e4 e5 2.Nc3 Nf6 3.Nf3 Nc6 4.Bc4 Bc5 5.d3 d6 6.Bg5 I know, I know, why do we have to look at this boring line once again? Well, although this is all rather harmless and toothless, White still managed to win our main games; and I also want to find space to include a little more theory:

[6.Be3 Bb6 *(6...Nd4!?* gives interesting play, as after *7.Bxd4 exd4 8.Na4 Bb4+ 9.c3 dxc3 10.bxc3 Ba5 11.0−0 0−0* Black stands well *)* 7.Qd2 Be6 8.Bb5 0−0 9.Bxc6 bxc6 10.0−0 Nd7 11.d4 f6 12.h3 Qe8 with equality.]

[6.Na4 Bb6 7.c3 Be6 8.Bb5 0−0 9.Bxc6 bxc6 10.Bg5 Qe7 11.0−0 h6 12.Bh4 Bc8! . Black shrewdly avoids problems on the h4−e8 diagonal. Now after 13.h3 Qe6 he had equality in Y. Rantanen−Y.Razuvaev, Helsinki 1984.]

[6.h3 Be6 7.Nd5 h6 with equality.]

6...Na5 This is also good for Black. And more importantly, it changes the nature of the position, so it becomes a little more interesting. **7.Bb3**

[Another practical example: 7.Nd5 Nxc4 8.dxc4 c6 9.Nxf6+ gxf6 10.Be3 Qb6 11.Qd2 Be6 *(*if *11...Bxe3 12.fxe3 Qxb2 13.0−0* with compensation *)* 12.0−0−0 0−0−0 with unclear play, V.Korchnoi−D. Bronstein, USSR Championship 1952.]

7...c6 8.0−0

[White can also strike immediately in the centre with 8.d4 . Then after Nxb3 9.axb3 exd4 10.Nxd4 h6 11.Bh4 0−0 12.0−0 g5 13.Bg3 Re8 14.Re1 d5 15.e5 Ne4 16.Qd3 , as in A. Morozevich−Kir.Georgiev, Tilburg 1994, Black should play Nxg3! *(*instead of *16...Bxd4?! 17.Qxd4 Bf5 18.Nxe4 Bxe4 19.Rxa7 Rxa7 20.Qxa7 Bxc2 21.Qxb7* when it would be White who is better *)* 17.hxg3 Qc7 with the advantage.]

8...0−0 9.Ne2 Nxb3

[Or 9...Bg4 10.Ng3 h6 11.Be3 with equality.]

10.axb3 h6 11.Be3 Bb6 12.Ng3 Be6 Black is slowly getting into trouble against his legendary opponent.

[Here 12...Re8! guaranteed equality, thanks to the pressure against the e4−pawn.]

13.Qd2 Kh7?! Black is apparently afraid of a sacrifice on h6, but I cannot see how that would ever work. Black can always play ...Ng4 in the end.

[Therefore 13...Re8!? 14.Bxb6 Qxb6 15.d4 Bg4 16.dxe5 dxe5 17.Qc3 Bxf3 18.Qxf3 Qb4 with equality was better.]

14.Bxb6 Qxb6 15.d4 exd4 16.Nxd4 Rfe8?!

[Black is apparently too complacent, while it was time to do something to stay in the game; e.g. 16...d5!? 17.Qd3 Kh8 18.e5 Nd7 19.f4 f6! with unclear play.]

17.Rfe1 g6? This completely unnecessarily creates a weakness.

[17...d5 was better, when White can reply 18.e5 Nd7 19.Qf4 with the initiative.]

18.Rad1 Kg7 19.h4! A typical move, using the g−pawn as a hook. **19...Re7**

20.Ndf5+! Bxf5
[The tactical justification for the knight sacrifice was 20...gxf5? 21.exf5 Qc5 22.b4 Qc4 23.fxe6 Rxe6 24.Nf5+ Kg8 25.b3 Qb5 26.Qf4 and White wins.]
21.exf5 Rae8 22.Rxe7 Rxe7 23.fxg6 fxg6 24.h5! Nxh5 25.Qc3+ Kh7 26.Nxh5 gxh5 27.Rxd6 Qb5 28.Rxh6+ Kxh6 29.Qf6+ Kh7 30.Qxe7+ Kg6 31.Qe3 In the end material superiority decides. **31...Qa5 32.Kh2 Qa1 33.Qe6+ Kg7 34.Qd7+ Kf8 35.Qc8+ Ke7 36.Qxb7+ Kd6 37.Qb4+ Kd5 38.Qc4+ Kd6 39.Qd4+ Kc7 40.b4 Kb7 41.c4 Qc1 42.b5 cxb5 43.Qd7+ Kb6 44.Qxb5+ Kc7 45.Qc5+ Kb7 46.b4 Qf4+ 47.g3 Qg4 48.b5 Qe2 49.Qd5+ Kb8 50.Kg2 Qe8 51.Qd3 Kc7 52.Qe3 Qa8+ 53.f3 a6 54.bxa6**

Correspondence 2003

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Qe7 This move isn't an attempt to prevent or discourage d4 - as we shall see, accepting the gambit carries too much risk. Black's idea is to offer the e5−pawn extra protection so that he doesn't have to give up the centre after White's advance. Here's a brief round up of other rare moves:

[a) 4...Bb6 5.d4 *(* White can also choose to play with d2−d3, probably transposing to lines we've previously covered: for example, *5.0−0 Nf6 6.d3 d6 7.Nbd2 0−0 8.Bb3* intending Nc4,*;* or *5.d3 Nf6 6.Bb3 d6 7.Nbd2* with the same idea, which is a logical way to meet an early ...Bb6 *)* 5...Qe7 is another move order to reach the same position (in fact, this was the one chosen in the game).]

[b) Does 4...Qf6 prevent White's

advance? 5.d4! *(*No it doesn't! There's nothing wrong with *5.0−0 d6 6.d3* , though. *)*

A) If 5...exd4 , 6.e5! is strong: Qg6 *(6...Nxe5* is met by *7.Qe2)* 7.cxd4 Bb4+ 8.Nc3 d6 *(*or *8...Qxg2 9.Rg1 Qh3 10.Bxf7+!)* 9.0−0 Bg4 10.h3 *(10.Nb5!?)* 10...Bxf3 11.Qxf3 dxe5 12.Nb5 0−0−0 13.Bd3 Qf6 14.Qg4+ Kb8 15.Bg5 Qe6 16.Bxd8 and 1−0, V. Karavaev−D.Metlyakhin, Moscow 1994.;

B) 5...Bb6 has similar motives to 4...Qe7 5 d4 Bb6, but the queen is more vulnerable on the f6−square and Black has to lose more time: 6.0−0 h6 *(*if *6...d6* White has *7.Bg5 Qg6 8.dxe5 dxe5 9.Nxe5!* and here *Qxg5 10.Nxf7 Qc5 11.Bd5 Nf6 12.Nxh8 Bg4 13.Qb3* - Bilguer - looks very good for White *)* 7.a4 a6 8.dxe5!? Nxe5 9.Nxe5 Qxe5 10.Qb3 , V.Egin−B. Saidov, Tashkent 2009. Black has some problems here. Qe7 is the natural way to defend f7, but how does Black continue after 11.e5 ?;

C) Now: 5...−−]

[c) 4...d6 is usually condemned on the grounds that Black is forced to give up the centre after 5.d4 ,

A) since 5...Bb6 6.dxe5! wins a pawn.;

B) However, 5...exd4 6.cxd4 Bb6! isn't quite as attractive for White as it first looks, as his centre could easily come under some pressure. I think White still needs to play one or two accurate moves, and this should be enough to give him some advantage: 7.Bb5! *(7.h3* - to prevent ...Bg4 - *Nf6 8.Nc3 0−0 9.0−0 Nxe4! 10.Nxe4 d5* is the kind of thing White needs to avoid*,;* but *7.Nc3 Nf6 8.d5 Ne5 9.Nxe5 dxe5 10.Bg5* might be sufficient for an edge *)* 7...Bd7 8.0−0

B1) or 8...Nf6 9.Nc3 *(9.e5!?)* 9...0−0 10.h3 Re8 , J.Szabo−L. Hazai, Hungarian League 1996, and now just 11.Re1;

B2) 8...Nge7 9.Nc3 0−0 10.h3 and White's classical centre must count for something, M.Krakops−J.Pinter, Elista Olympiad 1998.;

C) 5...−−]

5.d4 Of course White doesn't have to play d4. He can settle for d3 and reach positions similar to those in previous chapters, and indeed this is something Tiviakov has done. White can even argue that in this case Black has committed his queen to e7, something he wouldn't necessarily want to do in the main lines. This probably isn't a huge issue for Black, but a tempo does count for something, and furthermore Black is deprived of the typical ...Ne7−g6 idea.

[Let's take a look at an example: 5.0−0 Nf6 6.d3 *(6.d4 Bb6* transposes to the main game *)* 6...d6 7.Nbd2 0−0 *(*if *7...a6 8.Bb3 0−0 9.Re1 Be6 10.Nf1 Bxb3 11.axb3!?* , Black's queen isn't well placed for the typical ...d5 advance: *d5? 12.exd5 Nxd5 13.d4!)* 8.b4!? Bb6 9.Bb3 (intending Nc4) a6 10.Nc4 Ba7 11.Bg5 h6 12.Bh4 Nd8 13.Ne3! c6 14.Kh1 Kh8 15.Nf5! Bxf5 16.exf5 g5 (otherwise how does Black get his

knight on d8 back into the game?) 17.fxg6 fxg6 18.d4! e4 19.Nd2 g5 20.Bg3 and Black's position was beginning to look shaky in S.Smagin−Duong Thanh Nha, Montreal 2000. After Nf7 21.f3 e3 22.Re1 Rae8 23.Re2 Nh5 24.Nf1 White won a pawn.]

5...Bb6!

[5...exd4 6.0−0! is known to be promising for White. It's basically a Scotch Gambit where Black's queen has found herself on e7! d3 *(* if *6...dxc3 7.Nxc3 d6* White plays the obvious and strong *8.Nd5;* or *6...Ne5 7.Nxe5 Qxe5 8.f4! dxc3+ 9.Kh1 cxb2 10.fxe5 bxa1Q 11.Qd5 Nh6 12.Bxh6 Rf8 13.Qxc5* F.Wiltenburg−K.Woschkat, correspondence 1999, intending *gxh6 14.Na3 Qb2 15.Nb5)* 7.e5! (not allowing Black to consolidate) d6 8.Bg5 f6 9.exf6 Nxf6 10.Nbd2 Bg4 11.b4 Bb6 12.a4 a5 13.h3 Bxf3 14.Qxf3 was V.Chekhover−V.Panov, Tbilisi 1937. Black has no option but to castle long, but this is hardly ideal given that it's likely to open up there in the near future.]

6.0−0 A few sources give a 'refutation' based on d5 followed by d6, a pawn sacrifice to clog up Black's queenside. While I agree that this is an attractive idea, I'm not 100% convinced it's so great for White, or even his best option. A centre pawn is a centre pawn after all!

[One line is 6.Bg5 Nf6 7.d5 Nd8 *(7...Nb8 8.d6!* is a more favourable version for White - compare below *)* 8.d6 cxd6 9.Na3!? *(* if *9.0−0* , Black plays *Ne6* justifying his decision to choose d8 instead of b8, and here *10.Bxf6 Qxf6! 11.Qxd6 Bc7* looks okay for him *)* 9...Bxf2+ 10.Ke2! Bb6 11.Nh4 d5! 12.Nf5 Qc5 13.Be3 d4 14.Nxg7+? *(14.cxd4!* is much stronger *)* 14...Kf8 15.Bh6 Kg8 16.Rf1? d5! and Black went on to win in D.Spence−R.Parker, British League 2006. In the final analysis, the complications in this line might well favour White, but I can't help feeling that Black's chances have been underestimated.]

6...Nf6

[6...d6 7.h3 Nf6 8.Re1 would transpose.]

7.Re1 d6 8.h3 I don't think White can dispense with this move, as ...Bg4 would be too annoying. It's no longer easy for Black to find an effective role for his light−squared bishop, especially since White is ready to meet ...Be6 with d5.

8...h6!? Shades of Warakomski−Bartel. Black's idea is not to prevent Bg5, but rather to play ...g5−g4! Before you get too nervous, I should say that this is under much less favourable circumstances for Black, as the game amply demonstrates.

[If 8...0−0 White has to solve the typical problem of how to develop his queenside while keeping his centre intact. Let's see how Bologan achieves this: 9.Na3 *(* planning Nc2 to support d4; *9.Bg5* isn't effective here, and *h6 10.Bh4 g5 11.Bg3 Kh7 12.Qd3 Nh5 13.Bh2 Rg8 14.Nbd2 Qf6 15.Bd5 Nf4 16.Bxf4 gxf4 17.Kh1 Ne7* , M.Della Valle−M. Eckstein, correspondence 1999, provides a good reason why this is so *)* 9...Nd8 10.Nc2 c6 11.Bd3 Ne6 12.a4! a5 13.b3! Rd8 14.Ba3 Qc7

15.Qd2 Nf4 16.Bf1 Be6 17.c4 h6 18.Rad1 with a pleasant space advantage for White in V.Bologan−D. Sekulic, Igalo 1994.]

9.a4 Threatening to win a piece with 10 d5 Na5 11 Ba2 followed by b2−b4. **9...a6**

[If 9...a5 I think White should play 10.Na3 , as in the game.]

10.Na3

[10.b4!? worked tremendously well in D.Tyomkin−I.Zugic, Montreal 2004. After g5?! *(* against 10 b4 Black should probably abandon any aggressive ideas on the kingside; after *10...0−0! 11.Ba3 Nd7 12.b5 Na5 13.Ba2 Qf6* , as played in E. Torre−R.Ekstroem, Lugano 1989, it looks like White should be a bit better, although it's not totally clear how effective his queenside advance really is *)* 11.a5 Ba7 12.b5! Nd8 13.Ba3 Nd7 14.dxe5 Nxe5 15.Nxe5 Qxe5 16.b6! Black's position was already verging on the point of collapse.]

10...g5

[It's possible that Black was just following previous games, perhaps unsurprisingly if you consider that Black won the earliest six games I could find reaching this position! On the evidence of this particular game, though, I have to say I favour the idea of reverting back to the solid approach with 10...0−0 . After all, ...h6 can hardly be considered a wasted tempo. Still, White can fight for the advantage if he develops in a similar way to Bologan, above: 11.Nc2 Re8 12.Bd3 Qf8!? 13.Be3 *(* I quite like *13.b4!?;* or even *13.b3)* 13...exd4 14.cxd4 d5! *(14...Nxe4?* loses to *15.d5!)* 15.e5 Ne4 16.Nh2 Ba5 17.Re2 f6 18.Bxe4 dxe4 19.exf6 Qxf6 20.b4 Bb6 21.d5 Bxe3 22.Rxe3 Ne5 23.Rxe4 Bf5 with compensation for the pawn, G.Sax−E.Nagy, Balatonlelle 2003.]

11.Bf1! Logical and very strong. On f1 the bishop provides rock−solid support for the g2−pawn, which is important in view of the impending ...g4. What's more, the c4−square becomes available and Nc4 is a move White really wants to play. All of this overrides any 'passive' barbs which could be aimed at the bishop retreat.

[11.Nxg5? hxg5 12.Bxg5 Rg8 13.h4 exd4 , A.Reggio−S.Tarrasch, Monte Carlo 1903, is just an unsound sacrifice.]

[11.dxe5?! dxe5 12.Nh2?! g4! 13.hxg4 Rg8 14.g5 hxg5 15.Be3 Bxe3 16.Rxe3 Rh8 , K.Honfi−M. Damjanovic, Sarajevo 1966, is an example of another success for Black.]

11...g4

[There's no going back. After 11...0−0 12.Nc4 Ba7 13.Be3 , Black would have a half decent position only if he were allowed to play ...g5−g7!]

12.hxg4 Bxg4 13.Nc4 Ba7

[In V.Spasov−D.Kontic, Niksic 1991, Black took the plunge with 13...Bxd4!? 14.cxd4 Nxd4 15.Be2 Nxe2+ 16.Qxe2 Rg8 . I don't quite believe in Black's compensation, and neither does Rybka. I wonder why Kontic chose to go 'all in' like this. Did he overestimate the objective value of the sacrifice? Did he consider Black's practical chances to be reasonable? Or did he become aware that Black is in some trouble if he

just plays 'normally'.]

14.Be3!

[Simple stuff, and a huge improvement over 14.b4!? exd4 15.e5? *(15.b5!* is still quite promising *)* 15...Nxe5 16.cxd4? Bxf3 17.gxf3 Rg8+ 18.Bg2 Nxf3+! and Black wins, N.Rossolimo−M. Campos Lopez, Skopje 1972.]

14...Bxf3 Taking on f3 is positional suicide, but Black does at least win a pawn. The problem for Black is that his position is more difficult than it looks. Natural moves don't seem to work for various reasons:

[a) 14...Nxe4? loses a piece to 15.d5 .]

[b) 14...0−0−0 15.d5! Bxe3 16.dxc6! Ba7 17.Na5 and Black is facing serious problems on the queenside.]

[c) 14...Rg8 15.dxe5 *(15.d5 Nb8 16.Bxa7 Rxa7 17.Ne3* also looks good *)* 15...Nxe5 *(* or *15...dxe5 16.Bxa7 Rxa7 17.b4)* 16.Ncxe5 dxe5 17.Bxa7 Rxa7 18.Qd3 Ra8 19.Qe3 and Black is worse, although this line might represent his best bet. The key thing to remember here is that castling is illegal!]

15.Qxf3 exd4 16.cxd4 Nxd4

[16...Bxd4? is worse: 17.Bxd4 Nxd4 18.Qc3 Nc6 *(* or *18...Ne6 19.Ne3!* and either Nd5 or Nf5 *)* and here 19.e5 is very strong.]

17.Qd1 Ne6?

[17...Nc6 was Black's best chance for survival: 18.e5! dxe5 *(* if *18...Nxe5* , *19.Bxa7 Rxa7 20.f4* wins the knight *)* 19.Bxa7 Rxa7 20.Nxe5! Nxe5 21.Qd4 c5 22.Qxe5 Qxe5 23.Rxe5+ Kf8 24.Rxc5 and White's advantages (stronger minor piece, better structure) offer him good winning chances.]

18.Bxa7 Rxa7 19.e5! dxe5 20.Nxe5 Black has no hope of surviving. The position has been blown open and White is ready to unleash a series of threats. There will be no good way of dealing with them because Black's pieces are totally uncoordinated. **20...c6**

[If 20...0−0 , White plays 21.Bc4 intending Nxf7 or Ng6.]

21.Qb3 Kf8

[Maybe Black just couldn't bring himself to castle kingside - it would have been a final admission that his strategy had been a complete failure. In any case, it also loses immediately to 21...0−0 22.Qg3+ Kh8 23.Qe3 .]

22.Ng6+! fxg6 23.Rxe6 Qd8 24.Rd1

[24.Rd1 Nd5 25.Qf3+ Kg7 26.Bd3 wins.]

Hastings 2008

[Simon Williams]

We'll begin with a game which involved a nice little idea that Black must have missed. Even in quiet positions you need to keep your wits about you and it seems that here Black wasn't on the ball at a critical moment towards the end of the opening stage. We'll begin with a game which involved a nice little idea that Black must have missed. Even in quiet positions you need to keep your wits about you and it seems that here Black wasn't on the ball at a critical moment towards the end of the opening stage. **1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3**

[White can also try White can also try White can also try 4.f4!? as Aronian did in a rapid game against Anand in 2006. Black should counter aggressively as quiet play would allow White to generate unpleasant pressure. Indeed, the game saw as Aronian did in a rapid game against Anand in 2006. Black should counter aggressively as quiet play would allow White to generate unpleasant pressure. Indeed, the game saw as Aronian did in a rapid game against Anand in 2006. Black should counter aggressively as quiet play would allow White to generate unpleasant pressure. Indeed, the game saw d5! 5.exd5 Ng4!? (striving for complications) 6.d4 Bxd4 7.Nf3 Bf2+ 8.Kf1 Bb6 9.fxe5!? with an extremely messy and unclear position.]

4...Nc6

[Many top players prefer Many top players prefer Many top players prefer 4...d6 , which is more flexible as the black knight on b8 may wish to develop to d7 in order to support its comrade on f6. That way Black can also play ...c6 followed by either ...d5 or ...b5 later on.]

5.c3 White prepares to play either b2−b4 or d3−d4. White prepares to play either b2−b4 or d3−d4. White prepares to play either b2−b4 or d3−d4. **5...a6** Black gives his dark−squared bishop an escape square on a7. Black gives his dark−squared bishop an escape square on a7. Black gives his dark−squared bishop an escape square on a7. **6.0−0 d6 7.Bb3** Now that Black has played ... d6, which gives extra protection to his pawn on e5, White has to prepare himself for ...Na5. He does not really want to allow the exchange of his light−squared bishop for Black's knight, as that bishop is his best minor piece. Now that Black has played ...d6, which gives extra protection to his pawn on e5, White has to prepare himself for ...Na5. He does not really want to allow the exchange of his light−squared bishop for Black's knight, as that bishop is his best minor piece. Now that Black has played ...d6, which gives extra protection to his pawn on e5, White has to prepare himself for ...Na5. He does not really want to allow the exchange of his light−squared bishop for Black's

knight, as that bishop is his best minor piece. **7...Ba7** The bishop moves here to get out of the way of d3−d4. Now if White plays d3−d4 anytime soon, Black will be able to meet it with ...Bg4, placing White's centre under unpleasant pressure. The bishop moves here to get out of the way of d3−d4. Now if White plays d3−d4 anytime soon, Black will be able to meet it with ...Bg4, placing White's centre under unpleasant pressure. The bishop moves here to get out of the way of d3−d4. Now if White plays d3−d4 anytime soon, Black will be able to meet it with ...Bg4, placing White's centre under unpleasant pressure. **8.Be3** White has played a number of moves here, but the text is very sensible, exchanging off Black's raking bishop. White has played a number of moves here, but the text is very sensible, exchanging off Black's raking bishop. White has played a number of moves here, but the text is very sensible, exchanging off Black's raking bishop. **8...0−0**

[Again this move cannot be faulted. Instead Again this move cannot be faulted. Instead Again this move cannot be faulted. Instead 8...Bxe3 9.fxe3 strengthens White's centre and gives him chances to attack along the f−file.]

9.Nbd2 White brings his last minor piece into play. This system has been a favourite of Tiviakov's, but it shouldn't threaten Black too much. White brings his last minor piece into play. This system has been a favourite of Tiviakov's, but it shouldn't threaten Black too much. White brings his last minor piece into play. This system has been a favourite of Tiviakov's, but it shouldn't threaten Black too much.

9...Ne7

[We are still in theory, as Black brings his knight around to the kingside while freeing his c−pawn. Perhaps Black's other common approach is better, though, namely We are still in theory, as Black brings his knight around to the kingside while freeing his c−pawn. Perhaps Black's other common approach is better, though, namely We are still in theory, as Black brings his knight around to the kingside while freeing his c−pawn. Perhaps Black's other common approach is better, though, namely 9...h6 , taking control of the g5−square.]

10.Nh4!

[A standard reply, preparing to meet ... Ng6 while freeing the f−pawn. Note that A standard reply, preparing to meet ...Ng6 while freeing the f−pawn. Note that A standard reply, preparing to meet ...Ng6 while freeing the f−pawn. Note that 10.Bxa7 Rxa7 11.Nh4 is not as strong as the game continuation, because Black can exploit his control of the g5−square to go is not as strong as the game continuation, because Black can exploit his control of the g5−square to go is not as strong as the game continuation, because Black can exploit his control of the g5−square to go g5! .]

10...Ng6? Black's main mistake in this game. The text loses too much time and allows White to launch a nasty attack. Better options included:

[a) With a) With a) With 10...Be6

Black tries to take the sting out of White's attack by exchanging the light−squared bishops. The game Z. Efimenko−B.Avrukh, European Club Cup, Saint Vincent 2005, continued Black tries to take the sting out of White's attack by exchanging the light−squared bishops. The game Z. Efimenko−B.Avrukh, European Club Cup, Saint Vincent 2005, continued Black tries to take the sting out of White's attack by exchanging the light−squared bishops. The game Z. Efimenko−B.Avrukh, European Club Cup, Saint Vincent 2005, continued 11.Bxa7 Rxa7 12.f4 , retaining some pressure.]

[b) 10...Bxe3 aims to stop White from playing f2−f4, but again White probably has a small advantage after aims to stop White from playing f2−f4, but again White probably has a small advantage after aims to stop White from playing f2−f4, but again White probably has a small advantage after 11.fxe3 Ng6 12.Nf5 .]

11.Nxg6 After a number of exchanges White starts a dangerous attack along the f−file. After a number of exchanges White starts a dangerous attack along the f−file. After a number of exchanges White starts a dangerous attack along the f−file. **11...hxg6 12.Bxa7!** This is an important part of White's plan, misplacing the black rook and making it possible for him to play f2−f4. This is an important part of White's plan, misplacing the black rook and making it possible for him to play f2−f4. This is an important part of White's plan, misplacing the black rook and making it possible for him to play f2−f4. **12...Rxa7**

13.f4 The standard follow−up. White's bishop on b3 and rook on f1 X−ray Black's pawn on f7, which can often become a weakness in this opening. The standard follow−up. White's bishop on b3 and rook on f1 X−ray Black's pawn on f7, which can often become a weakness in this opening. The standard follow−up. White's bishop on b3 and rook on f1 X−ray Black's pawn on f7, which can often become a weakness in this opening. **13...c6?!**

[It's hard to suggest a good plan for Black here, but I am not a great fan of this move as it seems rather irrelevant and loses more time. Better may have been It's hard to suggest a good plan for Black here, but I am not a great fan of this move as it seems rather irrelevant and loses more time. Better may have been It's hard to suggest a good plan for Black here, but I am not a great fan of this move as it seems rather irrelevant and loses more time. Better may have been 13...exf4 , which concedes the centre and so guarantees that White will have an edge, but at least this way Black can dig in with , which concedes the centre and so guarantees that White will have an edge, but at least this way Black can dig in with , which concedes the centre and so guarantees that White will have an edge, but at least this way Black can dig in with 14.Rxf4 Qe7 15.Qe2 Be6 , unpleasant though this is.]

14.Qf3 Lining up another piece against f7. Lining up another piece against f7. Lining up another piece against f7. **14...Qb6+?!**

[Another time−consuming move.

Black is basing his whole play on a tactic that does not work. A better idea would have been Another time−consuming move. Black is basing his whole play on a tactic that does not work. A better idea would have been Another time−consuming move. Black is basing his whole play on a tactic that does not work. A better idea would have been 14...b5 when the rook on a7 provides some extra protection to Black's weak pawn on f7. Perhaps White should then aim to create a weakness on the queenside that he can attack with when the rook on a7 provides some extra protection to Black's weak pawn on f7. Perhaps White should then aim to create a weakness on the queenside that he can attack with when the rook on a7 provides some extra protection to Black's weak pawn on f7. Perhaps White should then aim to create a weakness on the queenside that he can attack with 15.Qe3 Re7 16.a4! .]

15.Kh1 Bg4 16.Qg3 Be2 The move that Black was relying on, but it has a serious drawback. The move that Black was relying on, but it has a serious drawback. The move that Black was relying on, but it has a serious drawback.

17.fxe5!

[White is winning after this. However, White is winning after this. However, White is winning after this. However, 17.Rfe1? would have allowed Black to play would have allowed Black to play would have allowed Black to play Nh5 18.Qh4 Nxf4 which should be fine for him.]

17...Bxf1 18.exf6 The combination of White's light−squared bishop, pawn on f6 and queen on g3 leaves Black in a hopeless state. The combination of White's light−squared bishop, pawn on f6 and queen on g3 leaves Black in a hopeless state. The combination of White's light−squared bishop, pawn on f6 and queen on g3 leaves Black in a hopeless state. **18...Be2**

[Unbelievably this position had been reached before, in D.Sadvakasov−H. Melkumyan, Dubai 2007, which continued Unbelievably this position had been reached before, in D. Sadvakasov−H.Melkumyan, Dubai 2007, which continued Unbelievably this position had been reached before, in D.Sadvakasov−H.Melkumyan, Dubai 2007, which continued 18...Bxg2+ 19.Kxg2 d5 20.fxg7 Re8 21.Rf1 and Black lost very quickly.]

19.Qxg6 Qxb3 20.Qxg7# Black's plan of moving his knight around to g6 was quite risky, losing a fair bit of time. Hendriks reacted well with 10 Nh4!, at which stage Ledger should have given serious thought of how to continue, rather than making the mistake of continuing on autopilot which landed up costing him the game. When faced with an idea which is new, try to crawl inside your opponent's mind, work out what his plan is and, if necessary, the best way to stop it. Black's plan of moving his knight around to g6 was quite risky, losing a fair bit of time. Hendriks reacted well with 10 Nh4!, at which stage Ledger should have given serious thought of how to continue, rather than making the mistake of continuing on autopilot which landed up costing him the game. ■ **Krasenkow,M.**
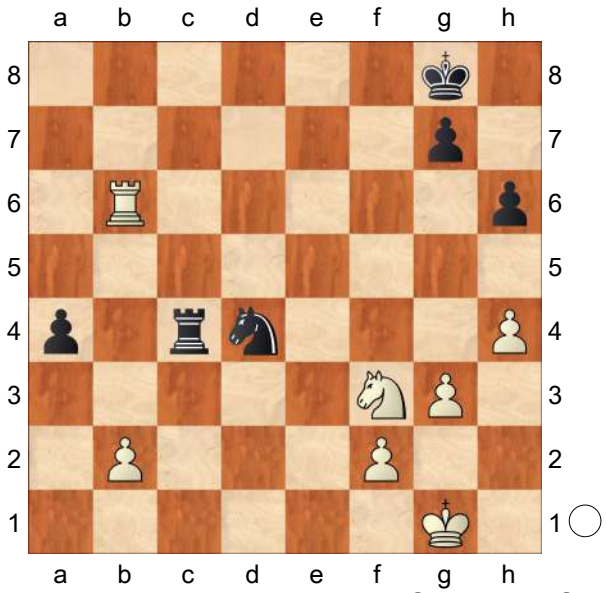
15.19 Wijk aan Zee 2003
[Glenn Flear]

(Diagram)

Kramnik is able to produce a strong kingside attack in the next example.

35.Ne5

[It's better to avoid the exchange of knights since 35.Kg2 Nxf3 36.Kxf3 a3! doesn't leave White with very much.]



35...Rc5 36.Rb8+ Kh7 37.Nd7 Rb5 38.Ra8 Ne2+ 39.Kg2 Rxb2 40.h5! A strong move;

[whereas the routine 40.Rxa4 Nc3 41.Ra7 Nd1 looks about equal.]

40...Nc3 41.Ne5 With the firm intention of playing Ng6 and Rh8 mate. **41...Rb5 42.f4**

[It's too soon for 42.Ng6? as Black just takes the h−pawn.]

42...Ne4 43.g4! Kramnik reinforces his vice−like grip on the kingside, and Black can do little to combat it. **43...Nf6 44.Ng6 Ng8** Black's knight and king are now completely tied down;

[but 44...Nxh5 doesn't help Black at all after 45.f5! .]

45.Nf8+ Kh8 46.Ng6+ Kh7 47.Kf3 White is still not interested in the a−pawn! **47...Rb3+ 48.Ke4 a3 49.Nf8+ Kh8 50.Ng6+ Kh7 51.g5! hxg5 52.fxg5 Rb4+ 53.Kf5 Rb5+ 54.Kg4 Rb4+ 55.Kf5 Rb5+ 56.Kg4 Rb4+ 57.Nf4** With several attacking options in the air. **57...a2 58.Rxa2 Ne7 59.Ra8**

Ng8 Horrible, but necessary. **60.Ra7 Kh8 61.Ra8 Kh7 62.Rf8 Kh8 63.Kf3 Rb3+ 64.Ke4 Rb4+ 65.Ke5 Rb5+ 66.Nd5 Ra5 67.Rd8 Kh7 68.g6+ Kh8 69.h6!** A clever move that avoids any stalemate traps. **69...Ra7**
[After 69...gxh6 , 70.Rd7 is curtains.]
70.Ne3
[One doesn't really expect Kramnik to fall for 70.h7? Re7+! and draws.]
70...gxh6 71.Nf5 Ra5+ 72.Kf4 Ra4+ 73.Kf3 Ra3+ 74.Kg4 Ra4+ 75.Kh5 Ra7
[Or 75...Ra5 76.Rf8 Rb5 77.Rf7 etc.]
76.Rf8 Rb7 77.Kh4?!
[The clinical finish was 77.Rf7! Rxf7 78.gxf7 Nf6+ 79.Kg6 Nd7 80.Kxh6 Nf8 81.Nh4 and mate next move.]
77...Rb4+?!
[After 77...Rg7 , White would have to find 78.Kh5 Rb7 79.Rf7! as in the previous note.]
78.Kg3 Rb6
[If 78...Rb7 , then 79.Rf7 anyway!]
[Instead, after 78...Rb3+! , White has to steer his king to h5 and win as in the note to 77 Kh4?!.]
79.Ne7 Kg7 80.Rf7+ and mate next move!
1−0

match 1834−36 corr (2) 1834

[Russell]

Myers: This is the second game of a two−game match played for a stake of 5000 francs (50 pounds, according to George Walker), won by Paris. George Walker particularly mentions St Amant, Boncourt, Alexandre, and Chamouillet directing the play for the Parisians, while the Londoners understandably prefer to remain anonymous. According to some sources, Paris played the black pieces in this game, but moved first. **1.e4**

C54

□ **Kariakin,S.**

■ **P. Leko (Hungría,2.693).**

Mundial Relámpago (19). Doha (Catar) blitz

"Esto significa mucho para mí", dijo el viernes Kariakin tras ganar el Mundial Relámpago por mejor desempate que Carlsen un mes después de perder el desempate del Mundial de Nueva York. Una de sus victorias decisivas .

Apertura Italiana (C54): **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.a4 a6 7.c3 0−0 8.h3 Ba7 9.Nbd2 Ne7 10.Re1 c6 11.b4 Ng6 12.d4 exd4 13.cxd4 d5** (las negras han igualado; aunque las blancas tengan un tiempo de desarrollo −la torre en e1−, la disposición de sus otras piezas no es armónica) **14.exd5 Nxd5 15.Qb3 Be6 16.b5!** (contribuye a la activación de la torre de a1 y el alfil de c1) **16...axb5?!**

[(una respuesta automática que ayuda al plan de Kariakin; era mejor 16...Re8

, ya que si 17.bxa6 bxa6 18.Bxa6 Ndf4 19.Bc4 Bxd4 , con buen juego)]

17.axb5 Ndf4 18.Bxe6 Nxe6 19.Ba3?

[(era mejor 19.Bb2 , con la potente amenaza Ta3, y doblar torres)]

19...Nxd4! 20.Nxd4 Bxd4 21.Rad1 Re8 22.Ne4 Qb6 (las negras están ahora un poco mejor, por la gran potencia del alfil en d4, pero la posición es muy difícil de jugar en una partida relámpago, por las enormes complicaciones tácticas posibles)

23.Nd6!?

[(Kariakin sabe que necesita ganar esta partida para ser campeón del mundo, y se lanza al riesgo; la jugada objetivamente mejor y más sólida era 23.Qc4)]

23...Rxe1+ 24.Rxe1 Bxf2+ 25.Kh1 (diagrama) **25...Bxe1??**

[(un error fatal, pero comprensible en esta modalidad; para un jugador ultraconservador como Leko es muy fácil ver 25...Qc7! , pero sólo las máquinas pueden calcular tan rápidamente 26.Rf1 Qe7! 27.Bb4 Ne5!! , y las negras estarían muy bien, porque si 28.Rxf2? Ra1+ 29.Kh2 Ng4+! 30.Kg3 Nxf2 31.Kxf2 Qf6+ , con ataque ganador)]

26.Qxf7+ Kh8 27.Bb2 Rg8 28.Nf5 , y Leko se rindió porque el ataque era de mate.

1−0

□ **L. Aronián (Armenia,2.785).**
■ **Adams,Michael**
VIII London Classic (1). Londres 09.12.16

Estrategia y táctica del más alto nivel. Apertura Italiana (C54): **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 d6 6.Bg5 h6 7.Bh4 a6 8.Nbd2 Ba7 9.Bb3 Qe7 10.Nc4 Be6 11.Ne3 g5** (necesario, porque si no las blancas jugarían Cd5) **12.Bg3 0−0−0 13.Ba4 Nb8 14.Qc2 Bxe3?!**

[(una decisión siempre difícil y discutible: ciertamente, el caballo de e3 estaba muy bien ubicado ahí, pero el alfil de a7 era una pieza importante; a juzgar por lo que ocurrió en la partida, es probable que en este caso concreto fuera mejor 14...Nbd7)]

15.fxe3 Nh5 16.Bf2 (este alfil está dormido, de momento: si las negras rompen en f5, se activará tomando en f5 y jugando e4 cuando se pueda; si no, las blancas se enrocarán en corto con el plan d4−c4−c5 y, si las negras no abren el centro este alfil podrá activarse algún día por el flanco de dama) **16...f5 17.exf5 Bxf5 18.Qe2!**

[(tras 18.e4?! Be6 19.0−0−0 Rhf8 , el caballo de h5 estaría muy bien en f4)]

18...Bxd3?!

[(una combinación muy profunda pero con una evaluación más bien errónea de la posición resultante: Adams logrará las excelentes casillas e4 y e5 para sus caballos, pero mientras es cierto que las blancas tendrán que cambiar su alfil de casillas negras por el caballo en e5, las negras nunca conquistarán e4 realmente, lo que dejará un caballo claramente inferior al alfil; en todo eso influye mucho que las negras deberán perder un tiempo en retroceder con el caballo de h5; era mejor 18...Rhf8)]

19.Qxd3 e4 20.Qd4 c5 21.Qd1 exf3 22.Qxf3 Nf6 23.Bc2! Nbd7 24.0−0−0 Ne5 25.Qe2 Qe6 (diagrama) **26.Bg3!!** (Aronián evalúa muy bien lo que va a ocurrir: su control de las casillas blancas valdrá más que el ataque a su rey, aunque las negras dispondrán de un recurso táctico salvador muy oculto) **26...Qxa2?!**

[(era mejor 26...Rhf8)]

27.Rhf1 Nd5 28.Bxe5! dxe5 29.Bb1 Qb3 30.Bc2 Qa2 31.Qg4+ Kb8 32.Qe4 Nb6 33.Qxe5+ Ka8?

[(para un humano es muy difícil ver que el rey estaría mejor en a7, a pesar de que la dama blanca clavará el caballo al tomar en c5, porque la torre podrá expulsarla desde d5: 33...Ka7! 34.Rxd8 Rxd8 35.Qxc5 *(* −la diferencia esencial con la partida es que ahora no valdría *35.Qf6?* porque la captura en d8 no sería jaque: *Nc4!! 36.Qxd8 Qa1+ 37.Bb1 Qxb2+ 38.Kd1 Nxe3+ 39.Ke1 Nxg2+ 40.Kd1 Ne3+ 41.Ke1 Qxb1+ 42.Ke2 Nxf1* , ganando− *)* 35...Rd5 , y ante el gran ataque negro no habría nada mejor que 36.Qb4 Qa1+ 37.Bb1 Rb5 38.Qa3 Qxa3 39.bxa3 Nc4 40.Bd3 Rb3 , con probable empate)]

34.Rxd8+ Rxd8 35.Qf6 Nc4 36.Qxd8+ Ka7 37.Qd3 Nxb2 38.Qf5 Qa1+ 39.Kd2 Nc4+ 40.Ke2 Qxc3 41.Qxc5+ , y Adams se rindió.

□ **Emms,J.**
■ **Flear,Glenn C**
Jack Speigel Memorial, Southend 2009
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2

[So far we've only considered 7.h3 . This knight move offers White some new possibilities.]

7...0−0 The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump.

[If 7...d6 , White can of course transpose to the main lines with 8 h3, but there's also 8.Nf1!? inviting Black to play Ng4 . Now:

A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S.Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;

B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 - White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5 Nxd5 14.h3 Be6* is equal *)* 13...Ne4 14.Bc2 *(* this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3 17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−]

8.Nc4!? This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked.

[White normally chooses either 8.h3 (see Oratovsky−Gozzoli),]

[or 8.0−0 , reaching the Classical Main Line.]

8...d6 Can this natural move really be classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz, 2000), after which 10.0−0?! *(* later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* let Black off the hook following 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5 I would have been very tempted to play just like in the game, with

A) however, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V.Zhelnin−A.Kolev, Odessa 1989: Bg4 *(*perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a significant advantage without having to do anything spectacular.;

B) 11.Nxg5!? hxg5 12.Bxg5 .]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(*I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(*White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(*the problem for Black is that *21...exd4* allows mate with *22.Re7+ Kh8 23.Ng6#)* 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(*or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G.Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+)

Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(*or *18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .] **16.Qxf5 Nbd7 17.h4!** With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**

[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]

28.Rh3 Bb6 29.Rg3 Bd8 Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**

[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]

32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

Speigel Memorial, Southend 2009

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2

[So far we've only considered 7.h3 . This knight move offers White some new possibilities.]

7...0−0 The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump.

[If 7...d6 , White can of course transpose to the main lines with 8 h3, but there's also 8.Nf1!? inviting Black to play Ng4 . Now:

A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S.Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;

B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 - White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5*

Nxd5 14.h3 Be6 is equal *)* 13...Ne4 14.Bc2 *(*this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3 17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−]

8.Nc4!? This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked.

[White normally chooses either 8.h3 (see Oratovsky−Gozzoli),]

[or 8.0−0 , reaching the Classical Main Line.]

8...d6 Can this natural move really be classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz, 2000), after which 10.0−0?! *(*later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* let Black off the hook following 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5 I would have been very tempted to play just like in the game, with

A) however, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V.Zhelnin−A.Kolev, Odessa 1989: Bg4 *(*perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a significant advantage without having to do anything spectacular.;

B) 11.Nxg5!? hxg5 12.Bxg5 .]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(*I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(*White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(*the problem for Black is that *21...exd4* allows mate with

22.Re7+ Kh8 23.Ng6#) 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(*or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G. Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+) Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(*or *18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .]

16.Qxf5 Nbd7 17.h4! With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**

[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]

28.Rh3 Bb6 29.Rg3 Bd8 Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**

[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]

32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

□ **4) One Tempo Tragedy**
■ **Steinitz,Wilhelm Vs Von Bar**
Opening Compass for Black and White

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 White is preparing to capture the center with d2−d4. Usually, only White can afford to do such moves in the opening. This move takes the square away from the knight and loses one tempo. **4...Nf6 5.d4!** However, the pawn comes to the center with tempo. **5...exd4 6.cxd4**
[The main alternative would be 6.e5 Black has to be careful to not get into big trouble. The only good move is d5! Counterattacking the bishop. 7.Bb5!? Ne4 The knight goes to a great square. 8.cxd4∞ White got some space but Black enjoys easy development.]
6...Bb4+! 7.Nc3 White got the center

and developed pieces to great squares. The only problem is that the pawn on e4 is hanging. **7...d5?!**

[Black fights for the center. 7...Nxe4 The only move that keeps the balance. The mainline of this move is fun and interesting to play: 8.0−0 Bxc3 9.d5∞ White is one piece and one pawn down. This is only the beginning of the line. White will win back the piece and has great compensation and an initiative for the missing pawn.]

8.exd5! Nxd5 Black is exploiting the pin. **9.0−0!** The World Champion does not waste time! **9...Be6**

[○ 9...Nxc3? 10.bxc3 Bxc3 10...Be7 11.d5+− White is using the central pawn to get more space. 11.Qb3 Wins for White. Bxa1 12.Bxf7+ Kf8 13.Ba3+ Ne7 14.Rxa1]

[○ 9...Bxc3 10.bxc3 0−0 10...Nxc3? 11.Qe1++− White wins because the king is not castled. 11.Re1± White has two bishops and control over the center. The pawn on c3 is apparently poisoned. Nxc3? 12.Qb3 b5 13.Qxc3 bxc4 14.Ba3 Re8 15.Rxe8+ Qxe8 16.Re1 Qd8 17.d5 All the pieces and the pawn are attacking. White is winning.]

10.Bg5?!

[This logical forcing move was not the best. Here is the Stockfish's line of only winning moves: 10.Re1! 0−0 11.Ng5! Qd7 12.Rxe6! fxe6 13.Nxe6! Bxc3 14.Nxf8! Rxf8 15.bxc3 With an extra pawn and two bishops in an open position.]

10...Be7?! Now Steinitz is on fire again! **11.Bxd5! Bxd5 12.Nxd5! Qxd5 13.Bxe7! Nxe7 14.Re1!** White ensures that the king will not castle today! One tempo! Black just needed one more move... **14...f6 15.Qe2** Steinitz is aiming for more. That is good news! Otherwise, we would not have had this masterpiece.

[Steinitz could have won the pawn with 15.Qa4+ Qd7 16.Qb4 Kf7 16...c6?? 17.Rxe7+ Qxe7 18.Re1+− That is what happens when you leave your king in the center. 17.Qxb7 Rab8 17...Rhb8 18.Qe4+− With a healthy extra pawn. 18.Qxa7 Rxb2 19.h3±]

15...Qd7 16.Rac1

[16.Rad1! Apparently this was better where the main idea is to prevent Kf7. Kf7? 17.Qc4+! Nd5 18.Ne5+!! fxe5 19.dxe5]

16...c6? Here Steinitz finds the sequence of only correct moves. Try to feel the energy with which he was launching his attack.

[Black missed his chance to connect the rooks with 16...Kf7 Black should have had a sense of urgency! The king is not safe! The rooks are not developed! They are not even connected!]

17.d5!! All white's pieces are ready for action! Open the position for your pieces! **17...cxd5 18.Nd4!** The knight is going for a walk :−) **18...Kf7 19.Ne6!** The knight is great here! **19...Rhc8** It was too late to finish development! **20.Qg4!** The queen enters the stage. **20...g6**

[20...Rxc1 21.Qxg7+ Ke8 22.Qf8#]

21.Ng5+!! Ke8 22.Rxe7+!! Boom!! That is one crushing sacrifice! White wins in all the lines. **22...Kf8** That was one good try! Black is trying to exploit White's

back−rank problems.
[○ 22...Qxe7 23.Rxc8+! Rxc8 24.Qxc8+ Wins the rook.]
[○ 22...Kxe7 23.Qb4+!? Also wins 23. Re1+!? Kd6 23...Kd8 24.Ne6+ Ke7 25. Nc5++− 24.Qb4+ Rc5 24...Kc7 25. Ne6+ Kb8 26.Qf4+ Rc7 27.Nxc7 Qxc7 28.Re8 25.Re6+ Qxe6 26.Nxe6 Kxe6 27.Qxc5+− Ke8 23...Kd8 24.Qf8+ Qe8 25.Nf7+ Kd7 26.Qd6 23...Qd6 24. Qxb7++− 24.Re1+ Kd8 25.Ne6+ Qxe6 26.Rxe6 Rc1+ 27.Re1
It is critical that White is in time to secure the back rank. White simply did not have time to play h2−h3.]

23.Rf7+!
[○ 23.Qxd7?? Rxc1+ 24.Re1 Rxe1#]
[○ 23.Rxd7?? Rxc1+ 24.Qd1 Rxd1#]

23...Kg8
[23...Qxf7 24.Rxc8+ Wins the rook.]

24.Rg7+!! That is one lovely dance of the king and the rook! **24...Kh8**
[○ 24...Qxg7 25.Rxc8+]
[○ 24...Kxg7 25.Qxd7+]
[○ 24...Kf8 25.Nxh7+ Kxg7 26.Qxd7+]

25.Rxh7+! Kg8
[25...Qxh7 26.Rxc8+ Rxc8 27.Qxc8+]

26.Rg7+! Kf8
[The king cannot return to the corner anymore! 26...Kh8 27.Qh4+! Kxg7 28.Qh7+! Kf8 29.Qh8+! Ke7 30.Qg7+! Ke8 31.Qg8+! Ke7 32.Qf7+! The queen is naturally approaching the king. Kd8 33.Qf8+ Qe8 34.Nf7+ Kd7 35.Qd6#]

27.Nh7+! Kxg7 28.Qxd7+!
Black resigned. White won the queen with a check. Why did Black lose? Black needed only one tempo to castle the king. One tempo!
1−0

□ **Short,Nigel D**
■ **Korchnoi,V.**
Zagreb 1987
[Mon Hokmome]

In 1987, the decidedly youthful British phenomenon Nigel Short did well in a strong international event in Zagreb, Yugoslavia. The sport of chess will be much worse off due to the conflict in Yugoslavia; clearly funding chess tournaments is no longer a priority there. C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3 Inf 42/(387) **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3**
The Giuoco Piano, an ancient opening. The original idea was to get in d2−d4 as fast as possible, often at the cost of a pawn or two. Nigel chooses a more modern treatment here, expanding on the Queenside. **4...Nf6 5.b4 Bb6 6.d3 a6**
[6...d6 7.0−0 *(7.a4 a5 8.b5 Ne7 9.Nbd2 Ng6 10.0−0 0−0 11.Bb3 d5 12.Ba3 Re8 13.exd5 Nxd5 14.Ne4 Ndf4 15.Nfg5 Be6 16.Nxe6 Nxe6 17.g3 Kh8 18.Qf3 f6 19.h4 Ngf8 20.Rad1 Qd7 21.Rfe1 Rad8* Jonsson,H−Aziz Ortego,O Salou ESP 2018 CBM 85 ext [Lane, CCYB6] *)* 7...Ne7 8.Nbd2 c6 9.Re1 0−0 10.a4 Ng6 11.a5 Bc7 12.Bb3 d5 13.exd5 Nxd5 14.Ne4 h6 15.Bc4 Bf5 16.Bd2 b6 17.axb6 axb6 18.Rxa8 Qxa8 19.b5 cxb5 20.Bxb5 Ndf4 21.Bc4 Alexander Alekhine (2505)−11. ♗d2_10022 (2725) chess24.com (Int.−m1/3−rapid) 151/118 1988 Telechess CBM 89 [HB] (68)]

□ **Wagner,R..**
■ **Meier,D..**
US Amateur West Ch. 1999
[Paul Motwani]

G12.7: "h for Hungarian, h−file, and heavy artillery!" R.Wagner−D.Meier, U. S. Amateur West Championships, Tucson, Arizona 1999. Hungarian Defence. **1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Be7**
[The Hungarian Defence is more acceptable when reached via the move−order 1 e4 e5 2 Nf3 Nc6 3 Bc4 Be7 4 d4 d6. In the current game, the passive move 4...Be7 is certainly inferior to 4...Bc5 which featured well in game G12.5 for example.]
5.0−0
[Reader's Challenge P12.7.1 After 5.c3!? dxc3? *(*or *5...Nf6 6.e5 Ne4 7.Bd5 Ng5?* how should White continue? An answer appears after the main game G12.7. *)*]
5...d6 6.Nxd4 Ne5?! For the moment, Black's knight occupies a central position and attacks White's c4−bishop, but the threat of being driven back by f2−f4 will cause headaches for the e5−knight. **7.Bb3 c5 8.Ne2 Nf6**
[8...c4 would be answered simply by 9.Ba4+ but IF we imagine White's c2−pawn to instead be on c3, then 9 Bxc4! demonstrates a noteworthy tactical idea: 9... Nxc4 10 Qa4+.]
9.Nbc3 This simple developing move defends e4 and puts the spotlight on the glaring weakness of the d5−square in Black's camp. **9...0−0 10.a3** Since the move Ba4 no longer gives check, White instead wants to play Ba2 in response to ...c4. **10...Bg4 11.f3**
[I also rather like 11.h3 planning to trap the enemy bishop if it retreats to h5, since then White throws forward his f− and g−pawns with gain of time, creating havoc among Black's pieces. Bxe2 12.Qxe2 would also be simply very good for White (master of the light−squares, especially d5, in the absence of Black's light−squared bishop).]
11...Be6 12.Bd5!? White does not mind letting his own light−squared bishop be captured at d5, because it will immediately be replaced on the strong outpost there by a happy knight.
12...Nxd5 13.Nxd5 Qd7 14.Nef4 Rad8
[14...f5? not only doesn't 'look right', but actually loses outright to 15.Nxe6 Qxe6 16.Nc7]
15.Qe1! The white queen is heading towards g3, from where she will exert strong pressure against Black's king.
15...Rfe8 16.Qg3 Kh8 17.b3 Ng6
18.Bb2 White has steadily constructed a 'dream' position, with all of his pieces now occupying very purposeful posts.
18...Rg8 19.h4!? An imaginative way of increasing the pressure. White threatens 20 h5, and so Black decides to capture the pawn while it's still on h4, but consequently he will soon be subjected to bombardment from heavy artillery on an opened h−file... **19...Bxd5**
[19...Bxh4?? loses a piece to 20.Nxg6+ fxg6 21.Qxh4]
20.Nxd5 Bxh4 21.Qh2 Be7
[21...h6 loses instantly to 22.g3 Bg5 23.f4 Be7 24.Qxh6#]

22.Kf2! The white monarch makes way for his rooks to slide across onto the h−file. **22...Qe6 23.Rh1 Nf8** Reader's Challenge P12.7.2 Just imagine this position with Black's queen back on d7 instead of e6. What would be White's strongest 24th move? An answer appears after the main game G12.7. **24.Nf4! Qc8 25.Qxh7+!!** It's the dream of many−a−chessplayer to sacrifice one's queen in such elegant fashion! **25...Nxh7 26.Rxh7+ Kxh7 27.Rh1+** White was no−doubt extremely happy, but it would have been even sweeter to see 27...Bh4 28 Rxh4 on the board! Solution to P12.7.1 If 5 c3!? dxc3?, then 6 Qd5! forces 6... Nh6. Interestingly, although 7 Bxh6 0−0 puts Black a piece down, he shouldn't resign! The point is that 8 Bc1 (to protect b2) can be answered by 8...Nb4!, threatening ... Nc2+ and intending 9 Qd1 c2. However, 8 Bxg7 Kxg7 9 Nxc3 is one simple way for White to give back surplus material and emerge with a very obvious positional advantage instead. In the case of 5...Nf6 6 e5 Ne4 7 Bd5 Ng5?, White wins instantly with 8 Nxg5 Bxg5 9 Qh5!, producing a deadly double attack against Black's f7−pawn and g5−bishop. Solution to P12.7.2 White could win beautifully with 24 Qxh7+!! Nxh7 25 Rxh7+ Kxh7 26 Rh1+ Kg6 27 Nf4+ Kg5 28 Rh5+! Kxf4 29 g3. Black could only slightly delay the inevitable checkmate by interposing his bishop and/or queen at h4 or h3 respectively. However, note that if Black's queen is on e6 instead of d7, then the important defensive resource 26...Qh6 becomes available. **1−0**

C54

□ **David Janowski**
■ **Alphonse Goetz**
Paris 1891
[Mon Hokmome]

C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3 **1.e4** Notes by Chigorin. A certain Mr. Janowski, a young Russian amateur, has made his appearance at the Cafe de la Regence and defeated many of the regular players there. From this game against Goetz, my readers will see that his style is most appealing. The play is quite lively in character although not entirely solid on Janowski's part. **1...e5 2.Nf3 Nc6 3.d4 exd4 4.c3** White⇗s pawn sacrifice in this situation ought not to achieve its main aim - an attack. By continuing 4...dxc3 5 Bc4 Nf6 6 Nxc3 Bb4 7 O−O O−O, Black retains his extra pawn in a quiet position **4...Bc5 5.Bc4 Nf6** The game has now transposed into a well−known variation of the Giuoco Piano (1 e4 e5 2 Nf3 Nc6 3 Bc4 Bc5 4 c3 Nf6 5 d4 exd4 etc.). **6.cxd4 Bb4+ 7.Bd2 Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 10.0−0** 10 Qb3 is rightly considered best; White wants to force Black to defend his knight with Nc6−e7. An inferior reply would be 10...Na5 11 Qa4+ c6 12 Bxd5 Qxd5 13 O−O O−O 14 Rac1 Qb5 15 Qa3 b6 16 Qc3 Bd7 17 Ne5 Rad8 18 Ndf3 (White needs to defend his own d−pawn before he can threaten the black c−pawn), and if now 18...f6, White continues 19 Nxd7 Rxd7 20 b4 etc. **10...0−0 11.Re1** Now 11 Qb3 would be met by 11...Na5 and Na5xc4. **11...Nf4N** 0.26/18 [⌓11...Nb6! −0.14/22 12.Re4 Nxc4

13.Nxc4 Bf5 14.Rh4 Be6 15.Ne3 Ne7 16.Qc2 Ng6 17.Rh5 c6 18.Rd1 Qf6 19.Ng5 h6 20.Nxe6 fxe6 21.Rh3 Rad8 22.Rg3 Nf4 23.Ng4 Qh4 24.Qe4 e5 25.Nxe5 Nh3+ 26.Rxh3 Qxe4 Garcia,E (2172)−9. ♖b1 / 9.♘h3 (with g3)_6 (1998) Wijk aan Zee 2023 Chess Today CT−735 [John Watson] 0−1]

12.Ne4= Ne7 0.67/20 Black is manoeuvring aimlessly with his knights. Once the other one has gone to f4, it would be more logical to follow with 12... Be6. Then if White exchanges bishops, opening the f−file for Black, the knight on f4 will be very strongly placed −− for example 13 Bxe6 fxe6 14 Nc5 Qd5 15 Nxb7 Rab8 16 Nc5 Rxb2, etc. Black was evidently afraid of having an isolated pawn; he failed to assess the benefits that his position would acquire at the same time.

[12...Bg4= 0.23/21 was preferrable.]

13.Qd2 0.34/21

[⩲13.Rc1 0.67/20]

13...Neg6 White is slightly better. **14.h3 Nd5** ? Here too, 14...Be6 or 14...c6 would have been better. **15.Rac1 c6 16.Bxd5 Qxd5 17.Rc5** By giving up his a−pawn White obtains a kingside attack, but with faultless defence Black could have repelled it and retained his extra material. **17...Qxa2 18.Rh5** −0.23/22

[White should try 18.h4⩲ 0.33/22 b6 19.Rxc6]

18...f6 The best move. On 18...h6 White plays 19 Rxh6! gxh6 20 Qxh6 and should win, as Black can't parry the threats of Ne4−f6 mate or Ne4−g5 without giving up his knight. **19.Nd6 b6** 0.41/25 Probably aimed at preventing Rh5−a5. At this point Black had the chance to repulse the attack by 19...Rd8. If White replies 20 Ra5 Qb3 21 Re3 Qb6 22 Nc4, it's clear that after 22...Qc7 his attack is at an end. To sustain it, he would therefore have to defend the knight from b4 with his queen. An interesting point is that after 20 Qb4 a5 Black wins the knight but loses the game: 21 Qc5 Nf4 22 Rh4 Ne6 23 Qh5 Rxd6 24 Qxh7+ Kf7 25 Rg4 Bd7 26 Nh4, and on 26...Rg8 White has 27 Nf5, threatening Nf5−h6+ etc. So after 19... Rd8 20 Qb4 Black ought to play 20...Nf4 21 Ra5 Nd5! 22 Qd2 Qb3, and White's attack is beaten off. Against Rh5−a5

[Better is 19...Rd8= −0.29/23 20.Ra5 Qb3 21.Nxc8 Rdxc8]

20.Qc2 0.01/25 ! A powerful move. By threatening to take the pawn on c6 and immobilizing the knight on g6, White gains time to occupy the seventh rank with a rook. Janowski conducts the final attack with unerring skill.

[20.d5⩲ 0.41/25 cxd5 21.Rxd5 *(21.Qxd5+ Be6∓)*]

20...Bd7 1.00/24

[20...Be6= 0.01/25 keeps the balance.]

21.Re7 0.01/25 **Rad8 22.Nh4** &Bianco is much more active. Pair of Knights! **22...Be8** 2.37/24

[22...f5± 1.06/26 23.Nxg6 hxg6]

23.Nhf5+− Really sharp!

□ **Shirov,A..**
■ **Speelman,J..**
London Lloyds Bank 1991
[Alexei Shirov]

These notes were made in 1991, with the assistance of, and translated by, Jon Levitt. **1.d4 d6 2.e4 Nf6 3.Bd3**
[Normally I play 3.Nc3 , but the game Anand−Timman, Linares 1991, had made a big impression on me.]
3...e5 4.c3 Nc6 5.Nf3 Be7
[In the aforementioned game Timman continued 5...Bg4 , but after 6.d5 Ne7 7.c4 Ng6 8.g3 Be7 9.Nc3 White had an edge.]
6.d5 Nb8 7.c4 Black has lost two tempi with his queen's knight, whereas White has lost only one with the c−pawn, so White has a clear advantage. **7...0−0 8.Nc3 Nbd7 9.Bc2**
[Usually such a move is only played after ...Nc5, but I was afraid that after 9.0−0 , Nh5 is possible (with the plan ...g7−g6, ...Ng7, ...f7−f5).]

[I thought that 9.Bc2 prevented Nh5 in view of 10.Nxe5 Nxe5 11.Qxh5 (when White's bishop on d3 is no longer en prise). It was only after Black's reply that I saw Bg4 . However, 9 Bc2 is quite a good move anyway, since it improves the position of the bishop.]

9...Nh5

[Perhaps 9...c6 was better, but after 10.Rb1 a5 11.a3 White has the more attractive prospects.]

10.h3 Threatening 11 Nxe5. **10...c6**

[Now 9 Bc2 is shown as more flexible than 9 0−0 after 10...g6 11.Bh6 Ng7 12.g4 Kh8 13.Qe2 Nf6 14.0−0−0 Ng8 15.Bd2 f5 16.gxf5 gxf5 17.exf5 Bxf5 *(*or *17...Nxf5 18.Ne4)* 18.Bxf5 Rxf5 19.Ne4 Qf8 20.Nh2 and White is better.]

11.Nxe5

[Another plan would have been 11.Ne2 , with the idea of g2−g4 and Ng3.]

11...Nxe5 12.Qxh5 Nxc4 13.0−0 Re8 Probably this is the correct move, but only if played in conjunction with a subsequent ...Bf8.

[Speelman was worried about 13...Bf6 14.f4 , but after Bxc3 15.bxc3 g6 16.Qe2 cxd5 17.exd5 b5 both sides have chances.]

[After 13...Bf6 , stronger is 14.Qe2 Nb6 *(*but not *14...Bxc3? 15.Qxc4 Bf6 16.dxc6 Be6 17.Qd3* and White wins since *bxc6* is met by *18.e5)* 15.dxc6 bxc6 16.Qd3 g6 17.Bh6 Re8 18.Rad1 d5 19.Bb3 Be6 20.exd5 .

A) . In this variation neither 20...Nxd5 21.Qf3 Bxc3 22.bxc3 Qh4 23.Bc1 *(*or *23.Bd2)*;

B) , nor 20...cxd5 21.Qf3 d4 22.Ne4 Bg7 23.Bg5 offer Black much hope.;

C) 20...−−]

14.Rd1

[I also considered playing 14.Bb3 , but after Na5 15.dxc6 Nxb3 16.cxb7 Bxb7 17.axb3 Bf6 Black is okay.]

14...Bf6

[As I have already indicated, 14...Bf8! was correct. Then 15.Qe2 Nb6 16.Be3 cxd5 17.Bxb6 axb6 18.Nxd5 Be6 19.Bb3 Ra5 is not so bad for Black]

[but after 14...Bf8 15.Qe2 Nb6 16.Be3 cxd5 17.Bxb6 axb6 18.Nxd5 Be6 , 19.b4! keeps White's advantage.]

15.Qe2 Nb6 16.dxc6 bxc6 17.Qd3 Winning the d6 pawn in view of the threat of 18 e5. **17...g6**

[17...Bxc3 18.bxc3 would not have helped Black.]

18.Qxd6 Qxd6 19.Rxd6 Be5 20.Rd1

[20.Rxc6?! allows Black great activity after Bb7 21.Rc5 Bd4 22.Rg5 Rac8 .]

[[AS - Now I realize that after 20.Rxc6 Bb7 21.Rc5 Bd4 , instead of 22 Rg5?, 22.Rc7 is winning. I should have been greedy.]]

20...f5

[After 20...Be6 I would have played 21.Bb3 , since if Black wins his pawn back with Bxb3 22.axb3 Bxc3 23.bxc3 Rxe4 , White would have a won endgame after 24.c4! .]

21.Bb3+ Be6

[21...Kg7 22.exf5 Bxf5 23.Be3 is hopeless for Black.]

22.exf5 gxf5 23.Be3 Nc4 24.Bxc4

Bxc4 Black has the two bishops, but no less than four pawn islands as well! White should be able to win comfortably. However ... **25.Bd4 Bc7 26.b3 Bf7 27.Kf1** With time−trouble approaching, I wanted to protect my back rank. **27...f4 28.f3 Bg6 29.Rac1** Threatening 30 Nd5. **29...Re7 30.Bc5 Re6 31.Rd7 Be5 32.Re1**

[Now Black gets some counterplay, as would also have been the case after 32.Rxa7 Rd8 .]

[Much better was 32.Ne4 , which could have been followed by Rc4, after which the black position is hopeless.]

32...Bf5 33.Na4 When it rains, it pours!

[I was worried by 33.Ne4 Bc3 , but after 34.Rc1 Rxe4 35.fxe4 Bxd7 36.Rxc3 White should win.]

[The same is true after 33.Ne4 Bc3 34.Rc1 , and the interpolation Bb2 35.Rc2 .]

33...Ree8 34.Rxa7 Bd3+

[White would be winning after 34...Rad8 35.Re7 Bd3+ 36.Kg1]

[but now 34...Rad8 35.Kg1 fails to Bd4+ .]

35.Kf2 Rad8 36.Nb6 Bf6

[36...Bf5 might have caused me serious problems in time−trouble. After 37.Nc4 Bf6 38.Rxe8+ Rxe8 White does not have 39 Ra8 (as in the game)]

[and 36...Bf5 37.Re2 Bd3 38.Rd2 is precarious: Bf6! 39.Kg1 Re1+ 40.Kh2 Bc3!]

[It was necessary after 36...Bf5 , to find 37.Ra8! when Black can choose between Rxa8 38.Nxa8 Rxa8 39.Rxe5 Rxa2+ 40.Re2 Ra1 *(40...Rxe2+ 41.Kxe2* and the f4 pawn will go *)* 41.Rd2 Be6 42.Rd8+ Kf7 43.Rf8+ Kg6 44.b4 , winning for White]

[and 36...Bf5 37.Ra8 Rd2+! 38.Kg1 Rxa8 39.Nxa8 Bc3! with drawing chances.]

37.Rxe8+ Rxe8 38.Ra8 Bd8 39.Kg1

[Not 39.g3? Kf7 .]

39...Kf7 40.Ra7+ Kg6 41.Bf2 Eliminating any counterplay. **41...Re1+** The opposite−coloured bishops ending is lost but Black saw no reasonable option. **42.Bxe1 Bxb6+ 43.Bf2 Bxa7 44.Bxa7 Kf5**

[If 44...Bb1 then 45.a4 wins: Bc2 46.a5 Bxb3 47.Bb8 Kf5 48.a6 c5 49.a7 Bd5 50.Kf2 , and White puts his king on c3 and then plays Bd6, winning.]

□ **Charlick,Henry**
■ **Mann,John**
Australia corr 1881
[Melbourne Leader, 1881; GA MacDonnell; Lane]

Main notes are from Melbourne paper but GA MacDonnell also published it in ISDN for 3 Sept 1881 − he has got it from Adelaide Observer. 'A very interesting game played by correspondence a short time ago between Messrs H. Charlick and J. Mann.' The variations preceded by "RR" were given by Gary Lane in an internet article on the Jerome Gambit at www.chesscafe.com in 2008. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.Bxf7+** ML: This ingenious sacrifice was invented by Mr. Jerome, an American player, in 1874, and, unless correctly answered, yields a strong attack. It seems rather rash to venture on it in a correspondence game. − Not clear yet if the original notes from the Melbourne Leader chess column by Andrew Burns were by Burns or by Charlick. Reprinted in the Adelaide Observer, and subsequently by Mackenzie in his St. Louis Daily Globe−Democrat column. Research by Paul Dunn. Submitted to Chess Mail by Rick Kennedy, who is looking for information about early Jerome Gambit games. GAM: An ingenious but weak invention by "Legion", godfathered by Jerome. **4...Kxf7 5.Nxe5+ Nxe5**
[5...Kf8 is, we think, better.]
6.Qh5+ Ng6 GAM says 'More comfortable for the K than K to K3' but Melbourne paper said
[6...Ke6 is preferable. RR7.f4 d6! 8.fxe5 dxe5 9.Nc3 Nf6 10.Qh4 Rf8 11.d3 Kf7 12.Bg5 Kg8−+ Lane]
[RR6...Kf8 also playable said Lane: 7.Qxe5 d6 8.Qg3 Nf6 'when White has very little for the piece']
7.Qd5+ Ke8 8.Qxc5 d6 9.Qe3 The authorities give 9. Qc3 but White prefers the text move. **9...Nf6 10.d4 Qe7**
[10...Kf7 is surely stronger, bringing his R in to immediate action, and threatening to take KP with Kt.]
11.0−0 Ng4 This only assists White in developing his game by driving back the Kt presently.
[11...b6 seems the best method of getting his forces into action.]
12.Qe2 Qh4 13.h3 Nf6
[RR13...h5 would have saved the K Kt's honour and have bettered Black's game.']
14.f4 White has now a most formidable attack.
[RR14.Nc3]
14...Nh5 15.Qf2 Qxf2+ 16.Rxf2 Rf8 17.f5 Ne7 18.c4 c6 Again we should have preferred 18...b6. (MacDonnell agrees) **19.g4 Nf6 20.Nc3 d5 21.e5** White's pawns now look quite irresistible. **21...Nd7 22.cxd5 Nxd5 23.Ne4 N7b6 24.b3 a5 25.e6** This, we believe, is premature. 25.Bg5 is a very strong move. **25...h6 26.Bb2 Ke7 27.Re1 Ra7** ML: Black's game is so cramped that defeat is inevitable. GAM: Sacrificing dignity to provide recreation ground for the neighbouring Kt. **28.Nc5** White might also have obtained a fine game by advancing the h−pawn here. **28...Na8 29.Nd3 b5 30.Ne5 Kd6 31.Rc1 Ra6 32.Rc5 Bb7 33.Rfc2 Rc8 34.Bc1 a4 35.b4** ML: Very well played. GAM: Sound and subtle. **35...a3**

Had he taken P with Kt, White would have gained a winning position by
[35...Nxb4 36.Bf4 GAM continues this variation: Nd5 37.Bg3 Ke7 38.Ng6+ Ke8 39.Be5 Nf6 40.d5 Nxd5 41.Bxg7 Nac7 42.Bxh6]
36.Bd2 Nab6 37.Be1 Na4 38.Bg3?
[RR38.Ng6!+− ΔKc7 39.Rxd5]
38...Ke7 39.Nd7 GAM: White conducts the latter part of the game with great ability. **39...Nxc5 40.dxc5 Rg8**
[GAM: If 40...Nxb4 White gets a winning position, thus: 41.Bd6+ Ke8 42.Rf2 Nd5 43.f6 gxf6 44.Nxf6+ Nxf6 45.Rxf6]
41.Bd6+ Ke8 42.Rd2 Ra4 This, we believe, is his best play; had he moved
[42...Nf6 White could have replied with 43.Be5 forcing the game in a few moves, while if]
[42...Nxb4 White wins off−hand by 43.f6]
43.Rxd5 Well played, obtaining a winning position, through it still requires great care to bring about that result.
43...cxd5 44.f6 gxf6 45.Nxf6+ Kd8 46.e7+
[RR46.Nxg8]
46...Kc8 47.Nxg8 Bc6 48.Nf6 Rxb4 49.e8Q+ Bxe8 50.Nxe8 Rb1+ 51.Kf2 Rb2+ 52.Kf3 Rxa2 53.Nc7 b4 54.Nxd5 b3
[GAM: 54...Rd2 would have made it difficult if not impossible for White to win, thus if 55.Nxb4 Rb2]
55.c6 Rc2 must **56.Bxa3 Ra2** GAM: throwing away his last chance; he ought to have played ...b2. **57.Bd6 Rc2 58.Be5 b2 59.Nb6+ Kd8 60.c7+ Rxc7 61.Bxb2 Rc5 62.Bd4 Rb5 63.Nc4 Ke7 64.h4 Ke6 65.Ke4 Rb1 66.Ne3 Kf7 67.h5 Kg8 68.Nf5 Kh7 69.Be3 Re1 70.Nxh6 Rxe3+ 71.Kxe3 Kxh6 72.Kf4** The whole of the endgame has been played by White with the greatest precision.
1−0

Fraser CC tourneys ca.1891−6 1891
[Fraser #53]

Fraser: 'Myers: This is Game #53 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.' **1.e4** Fraser Fraser: 'Myers Fraser' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 d6 5.c3 Bg4 6.Qb3 Na5**

GBR corr 1890
[Fraser]

Myers: This is Game #99 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair

number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4**

□ **Luciani,C..**
■ **Petrovic,M..**
Nova Gorica 2001

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nd4?
This line is nothing but a stupid trap... which has, however, been successful in many junior games. **4.Nxd4!**
[The trap consists of 4.Nxe5?? , which loses to Qg5! 5.Nxf7 *(5.Bxf7+ Ke7 6.0−0* is the best chance now, though Black is still close to winning after *Qxe5)* 5...Qxg2 6.Rf1 Qxe4+ 7.Be2 Nf3# . The number of people who missed the mate is astonishing − and I do not mean on the 4th move, but on the 7th! *(* Still, when people take the queen with *7...Nxc2+* , they usually win too. *)*]
4...exd4 Now we have a position from a dubious line in the Spanish with an extra move for White. Somehow this is not good news for Black. **5.c3!** White has a lead in development and for this reason wants immediate confrontation. **5...Bc5?** Another mistake. It is not easy to guess that Black is rated 2210.
[Strongest was 5...dxc3 , though after 6.Nxc3! c6 7.d4 Nf6 8.Qf3 White has a clear advantage, in space and development.]
6.Bxf7+! Ke7
[If 6...Kxf7 7.Qh5+ and 8 Qxc5 of course.]
7.0−0 Nf6 8.Bb3 d5 9.d3 h6 10.cxd4 Bxd4 11.Nc3 Ng4? Now what is this?
12.Nxd5+ Ke8 13.Bf4 Rf8?!
Another sacrifice. **14.Nxc7+ Ke7 15.Qd2 Rxf4** And another one. **16.Qxf4 Be5 17.Qf7+ Kd6 18.Ne8+ Kc6**
Mate is coming.

□ **Chigorin,Mikhail**
■ **Steinitz,William**
London IT (17.1) 01.06.1883
[ChessBase]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 d6 7.d4 exd4

[7...Bb6 Lasker's famous defence. Black offers an exchange of pieces in order to exploit White's fractured queenside pawns. 8.dxe5 dxe5 9.Qb3! *(9.Qxd8+ Nxd8 10.Nxe5 Nf6!)* 9...Qf6 10.Bg5 Qg6 11.Bd5 Nge7 12.Bxe7 Kxe7 13.Bxc6 Qxc6 14.Nxe5 Qe6 15.Nc4∞ Keres]

8.cxd4 Bb6 9.Nc3 Na5 10.Bg5

[Another interesting strategic idea is 10.Bd3!? Ne7 11.Nd5 0−0 12.Nxb6 axb6 13.d5 in order to dominate the black knight on a5. After Ng6 14.Qc2 c5 15.Rb1 Bg4 16.Be2 White had fair compensation for the pawn in H. Bird−M.Chigorin, London 1899.]

10...f6

[10...Qd7 11.Bd3 h6 *(*if *11...f6 12.Bh4 Ne7 13.e5 fxe5 14.dxe5 0−0 15.e6!* with better play for White *)* 12.Bh4 Ne7 13.Bxe7 Qxe7 14.Re1 c6 15.d5 Bg4 16.e5 dxe5 17.Qd2 Bxf3 18.Rxe5 Qxe5 19.Re1 Qxe1+ 20.Qxe1+ Kf8 21.gxf3 h5 22.Qe5 Rh6 23.Ne4 cxd5 24.Ng5 and White maintained the initiative, J. Von Minckwitz−W.Steinitz, Baden Baden 1870.]

[10...Ne7 leads to very violent play after 11.Nd5 f6 12.Bxf6 gxf6 13.Nxf6+ Kf8 14.Ng5 Nxc4 15.Qh5 Kg7 16.Qf7+ Kh6

A) . Now White has to choose between a draw with 17.Qh5+ and different ways to continue the attack.;

B) . The direct 17.Ng4+?! Bxg4 18.Qf6+ Kh5 19.Nf7 Ng8 20.Qxh8 Qf6 21.Qxh7+ Nh6 22.Nxh6 Qxh6 23.Qf7+ Qg6 24.Qxc4 Bf3 25.g3 Bxe4 seems to leave Black better.;

C) . But White might try 17.Rac1! and if Ng6 18.Rxc4 d5 19.exd5 Kxg5 20.Qg7! with a strong attack. *(20.−−)*;

D) 17.−−]

11.Bf4 Nxc4

[11...Ne7 is seen in the next game.]

12.Qa4+ Qd7 13.Qxc4 Qf7

[13...g5!? 14.Bg3 h5 15.h4 Qg7 16.Nd5 Bg4 17.Qa4+ Bd7 18.Qa3 Rc8 19.Rfe1 g4 looked unclear, but these kinds of position usually seem very dangerous for Black. And here White can start a winning attack with 20.e5! .]

[13...Ne7 is the natural developing move, and is what Black probably should play here. I think unclear is the appropriate evaluation.]

14.Nd5! Analysed by Rosenthal in " La Vie Moderne" **14...g5?**

[14...Be6 leaves White with two ways to keep up the pressure:

A) 15.Qa4+ Bd7 16.Qc2 Rc8 17.a4 Ba5 18.Rfb1 and White had a strong initiative in the game M. Chigorin−Dorrer, correspondence 1884. and White had a strong initiative in the game M. Chigorin−Dorrer, correspondence 1884.;

B) 15.Rfe1 Bxd5 16.exd5+ Ne7 *(*if *16...Kd8 17.Re6! g5 18.Bxd6!* with a clear advantage*,;* or *16...Kd7 17.a4 a6 18.a5 Ba7 19.Rab1* wins*,;* while after *16...Kf8* (as in M.Vidmar−Poljanec, Ljubljana 1901) *17.a4 Ba5 18.Reb1* and White is much better *)* 17.a4! and White is much better. Black cannot really improve on this.;

C) 15.−−]

15.Bg3 Be6

□ **Velicka,P..**
■ **Blatny,P..**
Czech Team Championship 1997

1.e4 e5 2.Nf3 Nc6 3.Bc4 h6?!
Of course this is not very strong; at least it is not losing by force. **4.d4!**
I will ignore other moves, as they hardly

make sense. **4...exd4 5.Nxd4**
Again this move makes most sense.
Others:
[5.c3 d3 6.0−0 d6 7.Bxd3 Be7 8.c4 Bf6 9.h3 Nge7 was P.Svidler−P. Blatny, Gausdal 1992, and I am not convinced that White is better at all here.]
[5.Bxf7+ Kxf7 6.0−0 ½−½ M.Munoz Sanchez−J.Guerrero, Guayaquil 2003, was probably some kind of joke, but I don't get it...]
[5.0−0 d6 *(5...Bc5 6.c3 d3* was also played by Blatny a few times, when White has a slight edge; to have real theory on this seems ridiculous *)* 6.Nxd4 Be7 7.Nc3 Bf6 8.Be3 Nge7 , C.Schlingensiepen−P.Blatny, Austrian Team Championship 1995, was of course worse for Black, though the grandmaster still made a full point out of his favourite line.]
5...Qf6 This is apparently Blatny's idea, but honestly... **6.Be3** Natural, but missing the option to force an advantage.
[Here 6.Nb5! looks crushing!
A) 6...Bc5 7.0−0 Bb6 8.Be3 Ne5 9.Bb3 Ne7 10.a4! and Black is suffering.;
B) 6...Bb4+ is surprisingly hard to refute, but I will try all the same: 7.Bd2 Qe5 8.N1c3! (with the plan of 9 Nd5) Nd4 9.Nxd4 Qxd4 10.Qe2 Nf6 11.0−0−0 with a clear plus for White. *(11.−−)*;
C) 6...−−]
6...Bc5 7.c3 Ne5 8.Be2 Qg6?
I do not believe this.
[Instead 8...d6 is just a bit better for White.]
9.0−0?
[9.Nb5! again seems critical: Bxe3 *(9...Qxg2 10.Rf1! Bxe3 11.Nxc7+ Kd8 12.Nxa8* transposes *)* 10.Nxc7+ Kd8 11.Nxa8 Qxg2 12.Rf1 Bf4 13.Nd2 Nf6 14.Qa4 should favour White, although these things are never entirely simple, e.g. Nfg4 15.Qa5+ b6 16.Qxa7 Nxh2 17.Qxb6+ Ke7 18.Nc7 Bxd2+ 19.Kxd2 Nxf1+ 20.Rxf1 Qxe4 21.f4! and White has a winning attack.]
9...Nf6 10.Nd2
[10.Nb5 Bxe3 11.Nxc7+ Kd8 12.Nxa8 Bf4 13.Qa4!? again looks very dubious for Black.]
10...0−0?
[Instead 10...d5?! 11.Bf4 Bd6 12.exd5 was also good for White in M. Senff−P.Blatny, Budapest 1999.]
[But 10...d6! is probably not too bad anymore.]
11.Nf5! White is already winning.
11...Bd6 12.f4 Neg4 13.Bd4! h5 14.h3 Nh6 15.Nxh6+ Qxh6 16.e5 Nd5 17.exd6 Nxf4 18.dxc7 Qg5 19.Rxf4
[19.Bf3!? was obviously winning too.]
19...Qxf4 20.Bxh5 d5 21.Qe2 Qxc7 22.Qe5 Qxe5 23.Bxe5 Re8 24.Bd4 Bf5 25.Rf1 Bg6 26.Bxg6 fxg6 27.Nf3 Re2 28.Rf2 Re6 29.Rd2 Rae8 30.Kf1 b6 31.Bf2 Rd6 32.c4 Red8 33.Bg3 R6d7 34.Bh4

Game 22 1898
[Doe,John]

Systematic strangulation ⊕This is a game in which there are no combinations. Yet, after a modest beginning, White cramps his op ponent⇗s game more and more until it is completely crippled - and all this without any noticeable blunder on Black⇗s part. That is the highest triumph of chess strategy.⊞ Tarrasch said this, believed it and lived by it. In this positional masterpiece, Tarrasch does not let Showalter develop his pieces pro perly, stifles attempts at counter attack, cramps his opponent⇗s

game move by move, and finally crushes him to the wall. There are combinations in the game, despite Tarrasch⇗s assertion, but they are hidden away in the notes. They show what might have happened to Showalter, had he not played as well as he did. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7**

[3...Bc5 leading into the Giuoco Piano, but Black wants to avoid openings familiar to Tarrasch.]

4.d4 Blocks the King Bishop, but the alternative 4 Δ exd4 surrenders the center. **4...d6**

[4...exd4 5.c3!]

5.d5 ⊕White plays to stalemate his opponent,⊞ says Tarrasch, ⊕who has himself made a start toward that object by playing 3 Δ ♗e7 and 4 Δ d6.⊞ **5...Nb8** One would now expect Tarrasch to proceed by 6 ♘c3, developing another piece. This is what a lesser master would do automatically and unthinkingly. Tarrasch is interested though in maintaining his Pawn chain (Pawns at e4 and d5) which has a restraining effect on Black⇗s game. So he moves a piece twice in the opening! **6.Bd3!** ⊕The first principle of attack - ⊞ says Reuben Fine, ⊕Don⇗t let the opponent develop!⊞ White⇗s move prevents 6 Δ f5, an attack on the base of the Pawn chain. It also prepares to meet 6Δ c6 (an attempt to break up the center Pawns) with 7 c4. Then if Black plays 7 Δ cxd5, the recapture by 8 cxd5 keeps the Pawn chain intact.

[6.Nc3 f5!]

6...Nf6

[6...c6 7.c4 cxd5 8.cxd5]

7.c4 0−0 8.h3! Another prophylactic move! This one prevents Black from developing his Queen Bishop by 8 Δ♗g4, and limits it to the square d7. It also prepares for the advance g4, against an attempt by Black to free himself with 8 Δ ♘e8 and 9 Δ f5. **8...c6**

[8...Ne8 9.g4!]

9.Nc3 Na6 Black hopes for counter−play by 10 Δ ♘c5 11 ♗c2 a5. His Queen Knight would then be strongly posted, and not easily driven away. **10.Be3** Puts an end to that idea, since 10 Δ ♘c5 **10...Nc7**

[10...Nc5? 11.Bxc5 dxc5 12.Nxe5]

11.0−0 Nfe8 Black⇗s intention is to free his cramped position by getting in Δ f5 after suitable preparation, say by Δ g6 followed by Δ ♘g7. Tarrasch will of course direct all his energies to make this break through impossible. **12.Qc2!** The Queen backs up the Bishop and e−Pawn in bearing down on the key square. **12...cxd5 13.cxd5** Obviously the proper way to recapture

[13.exd5 f5]

13...g6 Black prepares to play Δ f5 either next move, or after the Knight reaches g7 and adds its support to the advance. How does White play to restrain the f−Pawn? **14.Bh6!** This attack on the Rook will force the Knight to interpose at g7. The Knight⇗s support of the f−Pawn will then be meaning less, as it will be pinned and helpless to move or capture. **14...Ng7 15.g4!** Definitely puts an end to Black⇗s hopes of playing 15 Δ f5. The next step for Tarrasch is to reap the benefit of his positional advantage, which now consists of his greater command of space **15...Nce8**

[The desperate 15...f5 leads to 16.Bxg7 Kxg7 *(16...fxe4 17.Bxf8* wins a whole Rook for White *)* 17.gxf5

gxf5 18.exf5 and White has won a Pawn]

16.Kh2 Kh8 17.Rg1 Tarrasch (always a careful man) places his Rook on the g−file, so that he can benefit from the opening of the file, if Black does manage to get Δ f5 in. **17...Bd7 18.Rg2 Rc8 19.Rag1 b6?!** Good moves are getting scarce, and this one does not help, as it weakens Black⇗s a6, b5, and c6 squares. Tarrasch of course takes this into account, and will exploit the weaknesses of these white squares later on. In the meantime, Tarrasch would like to cramp his opponent still more on the King side by playing ♘e1 followed by f4 and f5. But if he were to play 20 ♘e1 at once, the reply 20 Δ ♗g5 would force an exchange of Bishops and free Black⇗s game some what. The plan needs a preparatory move, so Tarrasch plays Δ **20.Qd2!** Now that the square g5 is con trolled by Queen and Bishop, White⇗s King Knight is free to move away, releasing the f−Pawn.

[20.Ne1 Bg5!]

20...Nf6 21.Ne1 Ng8 22.Be3 g5 This prevents the advance 23 f4, but the cost is high. For one thing, the square f5 has been weakened, and will surely be seized as an outpost by one of White⇗s Knights. For another, the Pawn placed at g5 stands in the way of Black⇗s King Bishop, greatly limiting its activity. **23.Nf3** Now that 23 f4 is not feasible, the Knight returns to the attack. **23...f6 24.h4! h6** This and the previous move weaken Black⇗s white squares more and more, and allow his pieces less and less mobility, but the prospect after 24 Δ gxh4 25 ♘xh4 followed soon by ♘f5 was not appetizing.

[24...gxh4 25.Nxh4]

25.Rh1 Kh7 The King prepares to flee, rather than face the possibility of the h−file being opened against him. **26.Kg1 Kg6 27.Nh2** The Knight is headed for f5, which he will reach by way of f1 and g3. **27...Rc7 28.Nf1 Qc8** Attack on White⇗s g−Pawn - Black⇗s first threat in the game! **29.Qe2** This way of protecting the g−Pawn is superior to the natural move 29 f3. The square f3 must not be blocked by a Pawn, but left open for use by pieces.

[29.f3]

29...Kf7 30.Ba6 Qb8 31.Nb5! This attack on the Rook (which has no safe square to run to) forces an exchange of Bishop for Knight. **31...Bxb5 32.Bxb5** The foregoing exchange of pieces highlights certain features in the position: (1) The disappearance of Black⇗s Queen Bishop (which travelled on white squares) accentuates the weakness of Black⇗s white squares. Tarrasch can now settle pieces on those squares without fear of their being dislodged. (2) Black⇗s remaining Bishop is completely imprisoned by Pawns standing on black squares. (3) Black⇗s King cannot flee to safety by way of e8. (4) White has two active Bishops against Black⇗s two ineffectual Knights **32...Rfc8 33.hxg5 hxg5 34.Bc6!** Blockade! The Rooks are doubled on the open file, but can make no use of it. **34...Bf8 35.Qf3! Rxc6**

[35...Kg6? 36.Rgh2

A) 36...Rd8 37.Rh8 Be7 38.R1h7 Qc8 *(38...−− 39.Qf5+ Nxf5 40.exf5#)* 39.Rxg7+ Kxg7 40.Qh3 Kf8 41.Qh6+ Kf7 42.Rh7#;

B) 36...Ne7 37.Rh6+ Kf7

38.Qxf6+ Kg8 39.Rh8#]

36.dxc6 Ne6 37.Rh7+ Bg7

[37...Ke8 38.Qf5 Nf4 39.Bxf4 gxf4 40.Qd7#]

38.Ng3 Rxc6 39.Nf5! Finally the Knight arrives at the ideal square! **39...Qc8**

40.Rgh2 Ne7

[40...Kg6 41.Bxg5 fxg5 *(41...Nxg5 42.Rxg7#)* 42.Ne7+! *(42.Nh4+! Kxh7 43.Qf5+ Kh8 44.Ng6#)* 42...Nxe7 43.R2h6+ Bxh6 44.Qf7#]

41.Nxg7 Nxg7 42.Bxg5 Qe6

Showalter made this move and then resigned without waiting for a reply.

[42...Qe6 43.Bxf6 *(*Tarrasch might have played the simple *43.Bh6)* or the more interesting 43...Qxf6 44.Rxg7+ Ke6 *(44...Kxg7 45.Rh7+ Kg6 46.Rh6+)* 45.Rxe7+! Kxe7 *(45...Qxe7 46.Qf5#)* 46.Rh7+ Ke6 47.Qb3+ d5 48.Qxd5#]

1−0

C54

□ **Bruzon Batista,L..**

■ **Mekhitarian,K..**

9: Cochabamba 2013

[Cyrus Lakdawala]

1.e4 e5 2.Nf3

[As you may have guessed by now, our move order would be 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 , when Bc5 5.c3 d6 6.0−0 transposes below.]

2...Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6

If Black has no intention of playing ...d7−d5 in one go (as in the previous game), there is no reason to delay putting the d−pawn on d6, its most most natural and common square. **6.c3 a6** Now ...Na5 will bag White's light−squared bishop, so he needs to secure it somehow. **7.Bb3** The modern era slips back into prehistoric times. People played this way in 1850; then the variation's popularity went dormant for nearly a century and a half; today it is all the rage again. This is one of the key tabiyas that arises from the Bishop's Opening as well as the Italian Game. To claim that I truly understand these positions is to claim that I understand Japanese history and culture because I drive a Toyota Prius. This line, which seems so simple from the outside, can be difficult to master, since all the variations look alike (to me at least), and yet they aren't.

[A key alternative is to give the bishop some air with 7.a4 . One recent example, V.Anand−H.Nakamura, Tal Memorial, Moscow (rapid) 2018, went 0−0 8.h3 Ba7 9.Nbd2 h6 10.Re1 Ne7 (switching this knight to the kingside is a standard plan for Black) 11.Bb3 Ng6 12.d4 Re8 13.Bc2 Bd7 14.Nf1 c5 (seeking to resolve central tension) 15.dxc5 dxc5 16.Ne3 b5 17.axb5 axb5 18.c4! Bc6? *(*after *18...Bb6! 19.Rxa8 Qxa8 20.b3* White holds only a microbe of an edge *)* 19.cxb5! Bxb5 20.Qxd8! (deflecting the e8−rook from coverage of e5) Rexd8 21.Nd5! Nxd5 22.exd5 c4 23.Bd2 Bd4 24.Rxa8 Rxa8 25.Bxg6 fxg6 26.Bc3 Rd8 27.Nxe5 Bxe5?! *(*Black's drawing chances are higher after *27...Rxd5 28.Nxg6 Kf7)* 28.Rxe5 Re8 29.f4 g5 30.Rxe8+ Bxe8 31.fxg5 hxg5 32.g4! , fixing g5 as a perpetual target. Anand converted expertly, despite the presence of opposite−coloured bishops.]

7...h6 When an opening sees both sides getting ready for a forthcoming confrontation, the move order tends to be very flexible.

[For instance, 7...Ba7 (or 7...0−0 first) 8.Nbd2 0−0 9.h3 h6 10.Re1 Via this one, S.Ganguly−S.Kayumov, World Rapid Championship, Doha 2016, deviated with

A) 10...Re8 11.Nf1 Be6 are alternative routes to the position at move 11 below; *(11...−−)*;

B) or 10...Be6 11.Nf1 Re8 .;

C) 10...Nh5 11.Nf1 Qf6 12.Be3 Nf4 13.d4 Ne7 14.Ng3 Neg6 15.Bc2 Nh4 16.Nxh4 Qxh4 17.Qf3 , when the coming Nf5 is an issue, so Black must either hand over the bishop pair or weaken his king with ...g7−g6.]

8.Re1 White reinforces the e4−pawn in preparation for a possible d3−d4 and makes way for the thematic Ruy knight manoeuvre. **8...Ba7** So that White's d3−d4 won't arrive with tempo. **9.Nbd2 0−0**

[Seeing as Black hasn't yet committed to castling, he might try for a kingside pawn storm with 9...g5!? 10.Nf1 g4 11.N3d2 h5 12.Ne3 h4 , but after 13.Ndf1 Rg8 14.g3! , S.Martinovic−M. Trifunovic, Belgrade 1988, White's king is well defended and I feel that Black is in greater danger of overextension than White getting mated.]

10.Nf1 The knight may later be posted to e3, g3, or even h2 and then on to g4.

10...Re8

[In a later game Mekhitarian opted for 10...Be6 11.Ng3 *(*now *11.h3* might be met by *d5!?)* 11...Re8 12.Bxe6 Rxe6 13.Be3 Bxe3 14.Rxe3 d5 15.Qb3 Rb8 16.h3 Qd7 17.Rae1 dxe4 18.dxe4 Na5 19.Qc2 Rd8 and equalized in Ma.Carlsen−K. Mekhitarian, Caxias do Sul (rapid) 2014, but the world champion is rarely put off by that. After 20.b3 g6 21.R3e2 Nc6 22.Nf1 Nh5 23.Ne3 Nf4 24.Rd2 Rd6 25.Red1 Qe6 26.b4 Kg7 27.a4 (White begins to expand on the queenside) Rxd2 28.Nxd2 h5?! 29.Nf3 Rd6 30.h4 Qd7 31.Rxd6 Qxd6 32.g3 Ne6 33.Nc4 Qd8? *(33...Qe7 34.Nfxe5 Nxe5 35.Nxe5 Nc5! 36.Nxg6 Qxe4* should still hold *)* 34.Ncxe5 Nxe5 35.Nxe5 , Carlsen won a clean pawn and converted without a problem.]

11.h3 Be6 Black challenges White's most active piece and prepares to strike first in the centre with ...d6−d5. **12.N3h2** Bruzon is after a Ruy Lopez−like kingside build−up with Qf3, Ng3 and either Nf5 or Ng4.

[White has also tried: a) 12.Ng3 Qd7 13.Bc2 d5 14.exd5 Bxd5 15.Nh4!? (initiating a direct attacking plan) *(15.Be3* is more steady *)* 15...Rad8 16.Nhf5 Kh8 17.d4!? exd4 18.Nxg7! Rxe1+ 19.Qxe1 Kxg7 *(*the comp shows the counter−sacrifice *19...Bxg2!? 20.Kxg2 d3* to be a satisfactory defence *)* 20.Bxh6+ Kh8 21.Qd2 Rg8 22.Qf4 Qd6?? a fatal blunder; *(*after *22...Nh5! 23.Bg7+! Kxg7 24.Nxh5+ Kf8 25.Qh6+ Ke7* the game should still be drawn *)* 23.Qh4 Qxg3 24.fxg3 and Black had to resign in A.Giri−V. Anand, Stavanger (blitz) 2015.]

[b) 12.Bc2 d5 13.exd5 (White cedes central control in order to turn Black's e5−pawn into a potential liability) Bxd5

14.Ng3 Bc5 15.b4 Bf8 (the bishop was better off remaining on the a7−g1 diagonal) 16.a4 and if nothing else White's queenside expansion makes his position easier to play, V.Kramnik−V.Anand, Moscow 2016.]

12...d5 Principle: Meet a wing attack with a counter in the centre. Although White hasn't really started attacking yet, the principle is still applicable. **13.Qf3 dxe4** I'm not so keen on this. Resolving the position in the centre seems to allow White to build up leisurely on the kingside. Any other move that retains the central tension feels more appropriate. **14.dxe4 Bxb3** This reduces White's attackers at the cost of weakening the f5−square.

15.axb3 Qe7

[15...Qd6 16.Ng3 Ne7 might be more accurate.]

16.Ng3 Qe6 17.Nf5

[White doesn't need to play 17.b4 yet, after which Ne7 18.Ng4 Nxg4 19.hxg4 Red8 20.Nf5 f6 was level in V.Bologan−V.Akopian, World Rapid Championship, Khanty−Mansiysk 2013, though White went on to win anyway.]

17...Ne7! Fighting for the f5−square.

[Not 17...Qxb3?? in view of 18.Bxh6 and wins.]

18.Ng4 Nxg4 White was threatening to take on h6 with check, winning a pawn.

19.Qxg4

[On 19.hxg4? Black would take the b3−pawn.]

19...Nxf5 20.exf5 Qf6

[Again 20...Qxb3?? loses instantly to 21.Bxh6 .]

21.Qf3 c6 22.Ra4! The rook can now be transferred to either e4 or g4. White's position feels a tad more comfortable, despite the comp's steady "0.00" assessment. **22...Rad8 23.Rae4 Rd5 24.g3** Whether the players realized it or not, this was actually the first new move.

[A month before, O.Korneev−P. Maletin, Tashkent 2013, had gone 24.c4 Rd4 25.Be3 Rxe4 26.Qxe4 Bxe3 27.Rxe3 Rd8! 28.Qxe5 Rd1+ 29.Kh2 Qxe5+ 30.Rxe5 Kf8 and White was unable to do anything with his extra pawn.]

24...g6?! It's unwise to denude your king's position without a solid promise of gains elsewhere. This sharp response looks like an unjustified attempt to complicate and play for a win from an otherwise passive position.

[I'm not sure how White makes progress if Black sits tight with a sequence like 24...Red8 25.Kg2 Rd3 26.Qh5 Bb8 . Now the only plan I can see is to slowly push the kingside pawns, but it stalls after 27.h4 c5 28.g4? (all this accomplishes is to put the queen out of play) a5 and the trouble is that White's intended g4−g5 is always met by ... Qxf5.]

25.g4 gxf5?! 26.gxf5 Kh7 Black has gambled that the white king is less secure than his own, which isn't the case since White has access to ideas like Qh5 and Rh4. **27.Kf1! Red8?**

[He should recruit his bishop for kingside defensive duties with 27...Bc5! , heading for f8.]

28.Qh5 There are two mind states to attacking: 1. That of a belligerent drunk who throws punches wildly in the bar. −−− 2. That of a hired mob killer, who coldly plots a hit without emotion. −−−

White's coming attack is a case of number two on the list. **28...R5d6** This just hands over a pawn.

[Black's problem is that 28...R8d6? allows 29.Bxh6! Qxh6 30.Qxf7+ Qg7 31.Rh4+ Rh6 32.Rxh6+ Kxh6 33.Qe6+ Kh5 34.Re4 and White has a decisive attack due to the twin threats of Rg4 and Qe8+.]

29.Rxe5 Rd1! A move played with the thought: A bad ending is better than getting mated. Black finds a way to reduce material and safeguard his king somewhat. **30.Rxd1?!** A soldier, no matter how brave, is incomplete if he is left without weapons. This exchange makes White's win harder.

[Stronger was 30.Bf4! Rxe1+ 31.Rxe1 , retaining a pair of rooks on the board so he can keep attacking.]

30...Rxd1+ 31.Qxd1 Qxe5 32.Qd7 With a double attack on f7 and b7.

32...Qd5?! The bishop ending is lost.

[Black can put up more resistance by entering a queen ending after 32...Kg7! 33.Qxb7 Bxf2 34.Bxh6+ Kxh6 35.Qxc6+ Kh7! 36.Kxf2 Qxf5+ , which won't be so easy for White to convert.]

33.Qxd5 cxd5 At first glance White's measly extra doubled f5−pawn doesn't look like it's enough to win the game. Bruzon proves otherwise with efficient technique. **34.Ke2 Kg7 35.Be3! Bb8**

[The pawn endgame after 35...Bxe3 36.Kxe3 is also winning for White: Kf6 37.Kd4 Kxf5 38.c4! *(*this gains a crucial tempo and is much stronger than the obvious *38.Kxd5 Kf4 39.Kc5 Kf3 40.Kb6 Kxf2 41.c4 f5 42.c5 f4 43.Kxb7 f3 44.c6 Kg1 45.c7 f2 46.c8Q f1Q* , when White will have to navigate a queen endgame, needing always to watch out for perpetual check tricks *)* 38...dxc4 39.bxc4 Kf4 40.Kc5 Kf3 41.Kb6 Kxf2 42.c5 f5 43.Kxb7 f4 44.c6 and Black is too slow in the race, mainly since his king blocks promotion.]

36.Kf3 h5

[After 36...Kf6 37.Kg4 h5+ 38.Kxh5 Kxf5 39.Kh6 , White's h−pawn will win the game.]

37.Bf4 Ba7

[Not 37...Bxf4? 38.Kxf4 Kf6 39.b4 and Black will soon be in zugzwang.]

38.Be5+ Kf8 39.Kg3! Targeting the h−pawn. **39...Ke7** The path to victory remains an incomplete puzzle. White has a critical choice between either saving his f−pawn first or letting it drop and going after the black h−pawn right away. −−− EXERCISE: Our choices are: (a) 40 f3; (b) 40 Bd4; and (c) 40 Kh4. In such situations I often apply the acronym WWCD. (What would Capa do?) We must channel our inner Capablanca and choose wisely. −−− ANSWER: White can't afford to waste a tempo protecting the worthless f2−pawn and should go after h5 immediately. **40.Kh4!** In this instance it is the moderate who is deemed the extremist. Your writer possesses an encyclopaedic knowledge of how to screw up a chess game, mainly through personal experience of being on the wrong end so many times.

[If my time on the clock were low, I would 100% have attempted to hang on to the f2−pawn with either of the "safe" lines (a) and (b), both of which allow Black to draw: a) 40.f3?? Be3! 41.Kh4 f6! 42.Bd4 Bxd4 43.cxd4

Kf7 44.Kxh5 Kg7 45.b4 b5!
. Day suddenly turns to night and darkness engulfs White's position. His king is unable to penetrate and Black holds the draw two pawns down in a pawn ending, a sight you don't see too often.]
[b) 40.Bd4?? Bxd4 41.cxd4 f6 42.Kh4 Kf7 43.Kxh5 Kg7 44.b4 b5! is essentially the same drawn ending as in line 'a',]

40...Bxf2+ Plaster, concrete and shards of glass come tinkling down, as the explosion rips through the building. I'm kidding. White's f2−pawn is meaningless, whereas Black will sorely miss his h5−pawn. **41.Kxh5 b5 42.Bd4 Be1**
[Black can't afford to swap bishops now, since he is unable to establish his fortress: 42...Bxd4 43.cxd4 Kf6 44.Kg4 Kg7 45.f6+! Kxf6 46.b4 Kg6 47.Kf4 Kf6 48.h4 wins.]

43.b4 This runs Black out of queenside pawn moves, while White can always effect a breakthrough on the queenside with b2−b3 and c3−c4. **43...Bd2 44.b3 Bf4 45.Kg4 Bd2 46.Kf3 Bg5 47.Be5 Bh6 48.h4 Bc1 49.Ke2 f6 50.Bd4 Bf4 51.h5 Kf7 52.Be3!** Seizing control over the key h6−square. White's h−pawn is the small child left alone in the house by his parents, yet completely safe under the protection of the fiercely loyal e3−watchdog. Black's king is unable to pass as both the g6− and h6−squares are cut off. **52...Be5 53.Kd3!** White's winning plan is to pry open the queenside, while Black's king is tied down on the other side, keeping the h−pawn from promoting. **53...Kg7 54.c4 dxc4+ 55.bxc4 bxc4+ 56.Kxc4 Kf7 57.Bd2!** White's bishop protects b4, leaving his king to run around elsewhere, and also prevents any ...Bc7 and ...a6−a5 ideas. **57...Bd6 58.Kd5 Bf8**
[Black's best chance was 58...Be5! , since it sets up a drawing trap: 59.Kc6 Kg7 60.Kb6 Bd6 Instead, White wins by using his bishop to safeguard his b−pawn:
A) 61.Kxa6?? Bxb4! 62.Bxb4 Kh6 63.Be7 Kxh5 64.Bxf6 Kg4 and draws. *(64...−−)*;
B) 61.Ka5! Be7 62.Be3 Bd6 63.Bc5! Bg3 64.Kxa6 Kh6 65.b5 Kxh5 66.b6 Kg5 67.Be7! Kxf5 68.Bd8! (intending Bc7) Bf2 69.b7 Bg3 70.Kb6 (threatening Bc7 again) Bf2+ 71.Kc6 Ba7 72.Bc7 and there is no remedy to the coming Kb5−a6.]

59.Kc6 Kg7 60.Kd7 Kg8 61.Ke6 Bg7 62.h6 Bf8
[After 62...Bh8 63.Ke7 Kh7 64.Kf7 , tentacles wrap around Black's king and bishop, choking off their air supply. Zugzwang.]

63.Kxf6
1−0

8.h3 −0.20/22

[⌓8.a4 0.11/21]

8...0−0 0.11/21

[8...h6 −0.20/22 is more appropriate. 9.Bh4 g5]

9.Nbd2= Be6 The position is equal.

10.0−0 Kh8 11.Qb3 Bxc4 12.Nxc4 Ba7 13.Ne3 Ne7 14.Kh1 0.09/21

14. Bxf6 followed by Nh4 is better. &Bianco is more active.

[14.Bxf6± 0.66/21 gxf6 15.Rad1]

14...c6 0.69/21

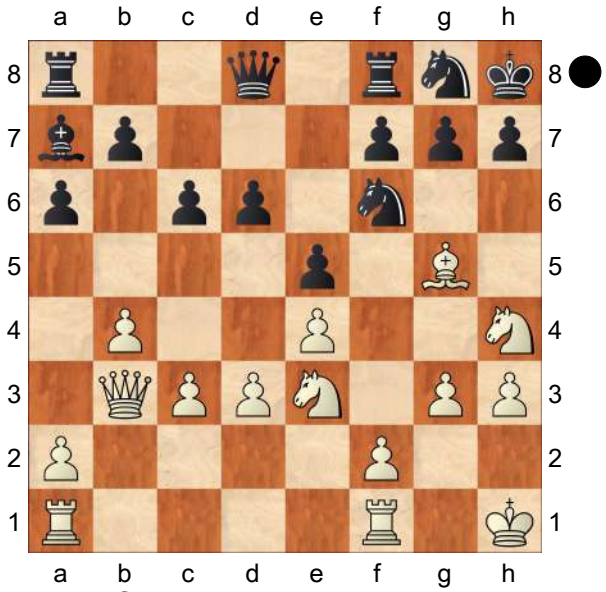
[Better is 14...Bxe3= 0.09/21 15.fxe3 Nd7]

15.Nh4 0.02/21

[15.Bxf6± 0.69/21 gxf6 16.Nh4]

15...Neg8 What would you play as white? **16.g3** −0.73/21

[16.Nhf5= 0.28/20]



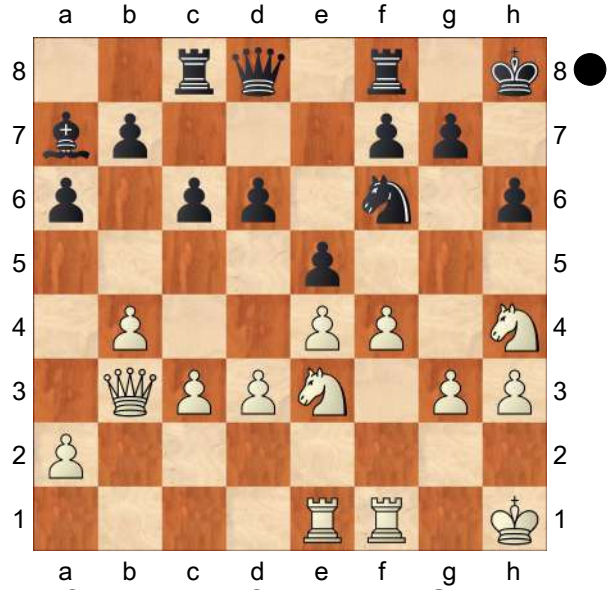
Preparing f4. **16...h6** −0.28/22

[Black should try 16...Qd7!∓ −0.73/21 17.Kh2 Nxe4 18.dxe4 f6]

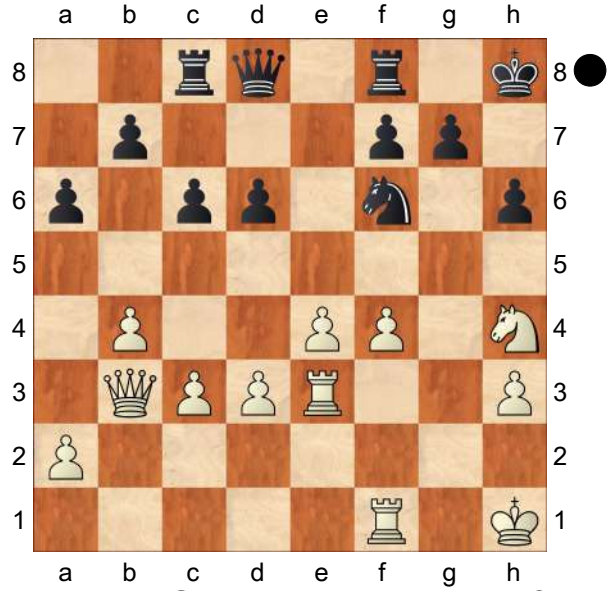
17.Bxf6 Nxf6 18.Rae1 Rc8 0.09/18

[18...d5∓ −0.33/21]

19.f4 −1.18/23
[19.Kg2= 0.09/18]



19...exf4!∓ 20.gxf4 What is Staunton's best move now. **20...Bxe3** 20...Bxe3 stars an excellent combination. **21.Rxe3**



Can you see Staunton's next move?
21...Ng4! Did you see this one? **22.hxg4**
[22.Ng6+ fxg6]
22...Qxh4+ 23.Kg2 Qxg4+ 24.Rg3
What should black play next? **24...Qe2+**
Black should play 24...Qe6 with the idea of f7−f5. 24...Qe2+ is the turning point in the game. Staunton's queen now is short of squares. **25.Rf2 Qh5** What did Saint−Amant play next? **26.f5** This keeps Staunton's queen trapped. **26...b5**
27.Qb2 c5 0.07/22 What is white's next move?
[27...f6∓ −0.68/22]
28.Rf1!= With the idea of Rh1. **28...Qh4**
28...f6 is better but still not easy for black.What did white play next?
Threatening ...Qh4−f6. **29.f6↑**
White has good play. **29...g6** 7.03/29
Can you find Saint−Amant's next move?
[29...gxf6= 0.00/27 30.Qf2 Rg8 31.Qxf6+ Qxf6 32.Rxf6 Rxg3+ 33.Kxg3 cxb4 34.cxb4 Rc6]
30.Qd2 With the idea of Rh1. **30...Kg8**
What did white play now? **31.Qf2**
If 31.Rh1 Qxf6. Threatening mate with Rf1−h1.
[Worse is 31.Rh1 Qxf6 32.Qxh6 Qg7=]
31...Qh5 32.Rh1 Skewer, Deflection
32...Qe5 33.Rxh6 cxb4 34.Rgh3
[Stronger than 34.cxb4 Rc1=]
34...Qg5+ 35.Kh2 Qxh6 36.Rxh6
Staunton resigned. The first match was a victory to the Frenchman.In the next TWIC PLAYER PROFILE we shall see how Staunton gained his revenge and dominated European chess in the 1840s.

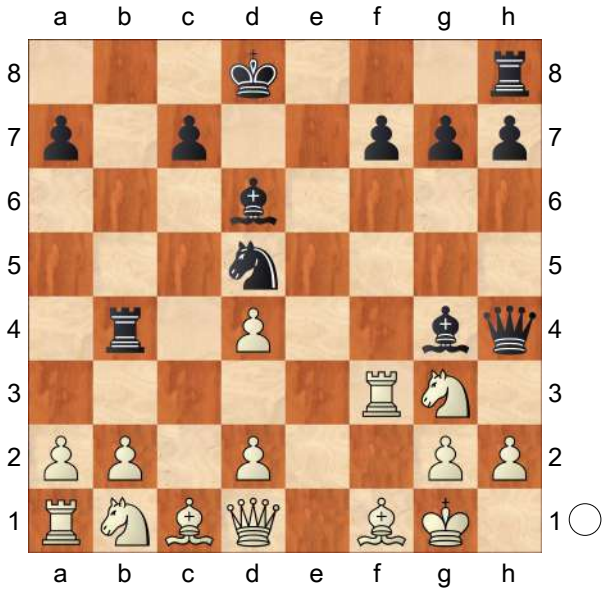
Partie 5, S.5. 2) Lawson: Paul Morphy. p.22. ..the first Paul Morphy game to be published. Ernest Morphy send it to Kieseritzky, together with a letter, and both were published in the January 1851 issue of La Régence Journal des Échecs. Dear Sir, I send you herewith a game of chess played on the 28th instant between Mr.R. and the young Paul Morphy, my nephew, who is only twelve. This child has never opened a work on chess; he has learnt the game himself by following the parties played between members of his family. In the openings he makes the right moves as if by inspiration, and it is astonishing to note the precision of his calculations in the middle and endgame. When seated before the chessboard, his face betrays no agitation even in the most critical positions; in such cases he generally whistles an air through his teath and patiently seeks for the combination to get him out of trouble. Further, he plays three or four severe enogh games every Sunday (the only day on which his father allow him to play) without showing the least fatigue. Your devoted friend rnest Morphy.' **1...e5 2.Nf3 Nc6 3.Bc4 f5** This not highly recommende line is named after the Black player: The Rousseau Variation. 6.Bf1 Nd4 7.c3 Nxd5 8.Ne4 Qh4 9.Ng3 Bg4 10.f3 e4 This was Berliner's big idea. White hardly has any development to speak of whereas Black is well on the way to complete mobilisation. However the variation is extremely forcing, accuracy is more important than creativity. The dark side of Black's game is that he will lose the knight d4 and his king will have to stay in the centre. **11.cxd4 Bd6 12.Bxb5+ Kd8 13.0−0 exf3 14.Rxf3**
[In spite of Berliner's assertion 14.Qb3!! does actually look better, certainly the lines he gives in his monograph are not totally convincing.]
14...Rb8 15.Bf1
[15.Be2 Estrin− Berliner, 5th CC World Championship final 1965−8.]
[The other main line now is 15.a4 a6]
15...Rb4
[A) 15...Bxg3 16.hxg3 Bxf3 17.Qxf3 Qxd4+ 18.Qf2 Qxf2+ 19.Kxf2 Re8 20.Bc4 Nb4 21.Nc3 Rb6 is better for White, possibly winning.]
[B) 15...Re8 16.Nc3
A) 16...Nf6 17.d3 Bxf3 18.Qxf3 Ng4 19.h3 Bxg3 is apparently refuted by 20.Qd5+ (Dr Richard Cantwell) Kc8 21.Qf5+ Re6 22.Ne4 *(*not *22.d5 Bf2+ 23.Kh1 g6)*;
B) 16...c6 17.d3 f5 *(*on *17...Nxc3 18.bxc3 Rb5 19.d5 Rxd5 20.Qa4* White draws easily according to Berliner. It looks even better than that, but that is beside the point − MF. *)* 18.Nxd5 cxd5 19.Bd2 is excellent for White.]



16.Nc3
This is the move indicated by Berliner in Chess Mail 6/1999. I did a good deal of work on this before the game had even started. I quote an edited version of my researches in these notes. **16.Nc3 Rxd4**
[16...c6 is inadequate: 17.Nce4 Bxf3 18.Qxf3 Bxg3 19.Nxg3 Qxd4+ *(*or *19...Re8 20.Qxf7 Qxd4+ 21.Kh1 Re1 22.d3)* 20.Kh1]
17.Nxd5
[17.Qb3 loses to Bxf3 18.Qb8+ Kd7 *(*not *18...Ke7 19.Nf5+ Ke6 20.Nxh4 Bxh2+ 21.Kf2 Rxb8 22.Nxf3 Be5 23.Nxd4+ Bxd4+ 24.Kf3)* 19.Bb5+ c6 20.Qxh8 cxb5 21.Qxg7 Bc5 22.Qxf7+ Ne7 23.Qxf3 Rf4+ 24.Qe3 Bxe3+ 25.dxe3 Rc4]
17...Rxd5 18.Qa4

[18.Qb3 Bxf3 19.Qxf3 c6 20.d3
A) The ending after 20...Bxg3 21.hxg3 Qd4+ 22.Qe3 c5 *(22...Re8 23.Qxd4 Rxd4 24.Bd2 f5 25.Re1 Rxe1 26.Bxe1 c5 27.Bc3 Rd7)* 23.Qxd4 cxd4 24.Bf4 Re8 25.Rc1 is favourable, perhaps winning, for White.;
B) 20...Re8 21.Bd2 Qd4+ 22.Qf2 Bc5 *(*Not *22...Qxf2+ 23.Kxf2 Bc5+ 24.Kf3)* 23.Qxd4 Bxd4+ 24.Kh1 Bxb2 25.Rb1 Bd4 26.Rb7 Re7 27.Rxe7 Kxe7 28.a4 h5 29.Be2 h4 30.Ne4 f5 31.Ng5 c5 32.Nf3 Bf6 33.Kg1 g6 34.Kf2 a6 35.g3 hxg3+ 36.Kxg3 Rd7 37.d4 cxd4 *(37...Bxd4 38.Bxa6)* 38.Bxa6 Kd6 39.a5 Kd5 40.Bd3 Rb7 41.Kf2 Rb2 42.Ke2 Kc5 43.a6 Ra2 was the best I could come up with, White seems to be better here but perhaps he is not winning.]

□ **Van der Wiel,J..**

■ **Baumgartner,U..**

Holzoster am See 1981

1.e4 e5 2.Nf3 Nc6 3.Bc4 g6

[This semi−Philidor variation can also be reached with 3...d6 , though there are some marginal differences, as can be seen from the notes.]

4.d3 In this game we shall look at the more quiet options. It does not seem logical to allow Black to slowly build up his position, as structurally he will be OK. Instead:

[4.d4! is considered in the next two games.]

[4.0−0 seems a bit slow. I firmly believe that White's only chance for an advantage is to put pressure on the black centre immediately. After Bg7 5.Re1 d6 6.c3 Nf6 (the knight belongs here; e7 is for the queen now that no knight can come to d5) 7.h3 0−0 8.Bb3 Na5 9.Bc2 c5 10.d4 Qc7 R.Basirov−S.Voitsekhovsky, Kstovo 1994 had reached a Spanish style position with approximately equal chances.]

[4.c3 leaves us with two main lines:

A) 4...Bg7 5.d4 d6 6.0−0 *(*after *6.dxe5 dxe5 7.Qb3 Qe7 8.Ng5 Nd8 9.0−0 h6 10.Nf3 Nf6 11.Re1 0−0* Black had equalised and later won in A.Shchekachev−Ye Rongguang, Antwerp 1996 *)*

A1) 6...Nf6 (I cannot see any other satisfactory moves here; it is difficult for Black to develop satisfactorily) 7.dxe5 Nxe5 8.Nxe5 dxe5 9.Qxd8+ Kxd8 10.Bxf7 Nxe4 11.Be3 with a slight White advantage in the endgame. Of course it is possible to play like this as Black. We all know that you need two weaknesses to win a game, and right now Black only has one. But then again it is hardly advisable to enter an endgame that is already 'half lost'.;

A2) 6...h6?! does not make it easier for Black: 7.Be3 Nge7 *(*after *7...Nf6 8.dxe5!* then *Ng4* is probably necessary and following *9.exd6 Nxe3 10.fxe3 Qxd6 11.Qxd6 cxd6 12.Na3* , White's extra pawn should count for something *)* 8.dxe5 dxe5 9.Qe2 Be6?! *(*though if *9...0−0 10.Rd1 Qe8 11.Nbd2* and White is better *)* 10.Bxe6 fxe6 11.Rd1 Qc8 12.Na3 with a clear advantage for White in Wu Xibin−Ye Rongguang, Chinese Team Championship 1987.;

A3) , and now: 6...−−;

B) 4...d6!? 5.d4 Qe7! (played like this, the variation seems like a sound version of the Three Knights with 4...h6 and later ...g7−g6; for those wanting to avoid theory, this

kind of position must be very attractive) 6.dxe5 *(6.d5 Nd8!* should give Black a perfectly playable position; the white pieces are not ideally placed, and the black knight will go to f7 and support ...Bg7−h6 later on *)* 6...Nxe5 7.Nxe5 dxe5 8.0−0 Nf6 9.Qf3 Be6 10.Bg5 Bg7 and the question is whether White has any advantage at all here. I doubt it. E. Mednis−V.Korchnoi, Vienna 1986, continued 11.Nd2 h6 12.Bxf6 Bxf6 13.Bxe6 Qxe6 14.Nc4 Bg5 15.b3 0−0−0 16.Rad1 c6 17.Rxd8+ Rxd8 18.Rd1 h5 19.Rxd8+ Bxd8?? *(19...Kxd8* was quite even *)* 20.Qxf7! Qxf7 21.Nd6+ Kc7 22.Nxf7 Bf6 23.Kf1 1−0.;

C) 4...−−]

4...d6

[Or 4...Bg7

A) 5.Ng5!? Nh6 6.a3 is worth trying when White might be a bit better; *(* instead *6.h4 Na5!* is probably OK for Black, if somewhat unconventional *)*;

B) 5.Bg5 Nf6 6.Nc3 h6 7.Be3 d6 8.Qd2 Na5 and there is no real argument to counter the claim that Black is absolutely fine, R.Greger−J.Hvenekilde, Danish League 1994.]

5.c3

[5.Ng5 Nh6 6.h4 *(* again *6.a3!?)* 6...Na5 does not appear to be too dangerous for Black here either.]

5...Bg7 6.h4!? h6

[6...Nf6 7.Ng5 0−0 8.h5! would give White a very strong attack, based on Nxh5? 9.Rxh5! and wins.]

7.h5 g5 This is a slight weakening of the kingside pawn structure, of course, but there are more important things in the position. **8.Nbd2 Nf6**

[8...Nge7!? 9.Nf1 Na5 10.Bb5+ Bd7 11.Bxd7+ Qxd7 12.Ne3 f5 with unclear play was also interesting.]

9.Nf1 d5!? 10.exd5 Nxd5 11.Qb3 Nce7

[11...Na5 12.Qa4+ Nc6 with approximately even chances was interesting too.]

12.Be3 Be6

[12...c6!? was a good alternative, and if 13.0−0−0 *(* probably *13.d4!?* with unclear chances would be the best way for White to respond *)* 13...b5 14.Bxd5 Qxd5 15.c4 bxc4 16.dxc4 Qa5 with good play for Black.]

13.0−0−0 c6?! Black is playing slowly, and sacrificing a pawn at the same time. White should just take it! **14.Qxb7! 0−0 15.Bc5!** Now Black is tied up and White has a clear advantage. **15...Re8 16.Qa6 Qc7 17.Ng3 Bc8 18.Qa3 Nb6?! 19.Bd6!** Picking up another little one. **19...Nxc4 20.dxc4 Qb7 21.Bxe5 Bxe5 22.Nxe5 Nf5 23.Ng4 Kg7 24.Qc5 Nxg3 25.Qd4+ Kf8**

[Black resigned as 25...Kf8 26.Qh8+! is mate in four moves.]

□ **Henderson,John B**
■ **Braithwaite,W.**
CAN corr 1873
[Hebert]

Hebert, J (ICCF Gold): 'John Henderson was the winner of the first round robin CC individuals event ever held in Canada in 1878. Unfortunately we could not find any of his games from that event, but we find some examples of his play from a few years earlier. Here is one of his best efforts. After early difficulties in the opening, Black defends with great poise against a vigorous attack, only to falter when the worst seemed behind

him.' **1.e4** Myers Hebert **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 Bxc3?** Hebert, J (ICCF Gold): 'Considered bad since Morphy,P − Morphy,E, New Orleans 1850. Of course exchanging Ba5 for the undeveloped Nb1 is at least suspect.'

Match Petrov−Urusov (17) 1859
[Petronijevic,Zoran]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.0−0 d6 6.c3 Nf6
[After the best 6...Bg4 Black has a slight edge.]
7.cxd4 Bb6 8.Nc3 Bg4
[8...0−0 is most often played.]
9.Be3 0−0
[Urusov considers the following moves to be good 9...Nxe4]
[and 9...d5 In fact, this move is bad: 10.exd5 Ne7 11.a4 a5 12.h3 Bxf3 13.Qxf3 White is dominant.]
10.Qd3
[This position was already well−known. In Anderssen's game, played was 10.a3 Qe7 11.Qd3 Bxf3 12.gxf3 Here, the pawn structure is similar to the one in our game. Qd7 *(12...Nh5)* 13.Kg2 Nh5 14.Ne2± 1−0 (35) Anderssen,A−Staunton,H London 1851]
[Probably best is 10.h3]
10...Bxf3
[Stronger is 10...Nb4 11.Qd2 d5∓]
11.gxf3 Qd7
[Preferable is 11...Nh5!?]
12.Kg2 Ne7
[Very strong was 12...d5 13.Nxd5 Nxd5 14.exd5 *(* Suspicious is *14.Bxd5?!* due to *Nb4 15.Qb3 Nxd5 16.exd5 Qd6∓* White's pawn structure is awkward. *)* 14...Ne7= with an even play.]
13.Ne2?!
[Better was 13.Rg1∞]
13...Ng6

[Good alternative is 13...d5]

14.Bg5 Nh5

[In this position, even stronger was 14...d5∓]

15.Qd2?

[Mistake which leads to losing position. Better was 15.Kh1−+ Kh8∞]

15...Kh8?

[In his annotations, Petrov suggests 15...h6 which is really the best move. Ursov sugested 16.Ng3 *(* Neither *16.Nf4* can help *Nhxf4+ 17.Bxf4 d5 18.Bxd5 c6 19.Bb3 Nh4+ 20.Kg3 Qe7 21.Be5 Ng6* and Black has a strong initiative. *)* 16...Nhf4+ *(* Slightly better is *16...hxg5 17.Nxh5 Nh4+ 18.Kg3 Qe7−+)* 17.Bxf4 Nh4+ 18.Kh1 Qh3 19.Rg1 Nxf3−+ Petrov]

16.Ng3 Nxg3?

[Decisive mistake after which Black is lost. Better is 16...f6 17.Nxh5 fxg5 18.Qxg5 Bxd4∓ with a clear advantage for Black.]

17.hxg3 f5?

[Urusov correctly pointed out that this move is a mistake. Better was 17...f6]

18.Rh1!+− Rf7 19.Bxf7

[This bishop is much stronger than Black's rook. Modern masters would never give it for a rook: 19.Qc2 was stronger.]

19...Qxf7 20.Rh2 fxe4 21.fxe4 Re8 22.f3 Qc4 23.Rah1 Qxd4

[Slightly preferable is 23...Nf8 although Black is lost after 24.Be3 Qxa2 25.g4+−]

24.Rxh7+ Kg8 25.Qc2 Re5 26.R7h5 Rb5 27.Bf6! Very nice tactical blow.

C51

□ **Anderssen,Adolf**
■ **Steinitz,William**
Baden−Baden (5) 22.07.1870
[Huebner]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4

[4.d3!?=]

4...Bxb4 5.c3 Bc5 The Evans Gambit, which was one of the most popular openings for White in the 19th century, disappeared from tournament praxis, when it was discovered that Das Evansgambit, das im vorigen Jahrhundert zu den populärsten Eröffnungen für Weiß zählte, verschwand aus der Turnierpraxis, als man entdeckte, daß

[5...Ba5 offered better defensive possibilities. The advance d2−d4 does not win a tempo, so that Black is not forced to play e5xd4 and grant White a strong pawn centre as compensation for the sacrificed pawn. In many cases, he can return the pawn, for example after bessere Verteidigungsmöglichkeiten gewährt: Der Vorstoß d2−d4 geschieht nicht mit Tempogewinn, so daß Schwarz nicht gezwungen ist, e5xd4 zu spielen und dem Weißen ein starkes Bauernzentrum als Kompensation für den geopferten Bauern zu überlassen. In manchen Fällen kann er den Bauern zurückgeben, zum Beispiel nach 6.d4 *(6.Qb3 Qe7 7.Bd5∓)* 6...d6 7.dxe5 dxe5 8.Qxd8+ Nxd8 9.Nxe5 Be6 when he retains a better

game, because with 4.b4 White has ruined the pawn structure of the entire queenside. In 1995 Kasparov used the Evans Gambit twice: Kasparov−Piket, Amsterdam 1995 and Kasparov−Anand, Riga 1995. Although he won both games, this did not lead to a renaissance of the Evans Gambit. The move 5...♗a5 is not a modern discovery. It was already used by both players in the matches between De la Bourdonnais and McDonnell. Anderssen himself chose this move in most of the games in which he faced the Evans Gambit as Black. But at that time, players were not completely aware of the importance of the move. In 1912, H. von Gottschall could still write: "5...♗c5 has as many exponents as the text move. It is perhaps quite indifferent which of the moves the player may choose, since after a few moves the positions reached can be identical. One can also meet 5...♗e7." er behält hier das bessere Spiel, weil Weiß mit 4.b4 die Bauernstruktur des gesamten Damenflügels ruiniert hat. Im Jahre 1995 griff Kasparov zwei Mal zum Evansgambit: Kasparov−Piket, Amsterdam 1995 und Kasparov−Anand, Riga 1995. Obwohl er beide Partien gewann, führte dies nicht zu einer Renaissance des Evansgambits. Der Zug 5...♗a5 ist keine neuzeitliche Erfindung. Er wurde schon in den Wettkämpfen zwischen De la Bourdonnais und McDonnell von beiden Seiten angewandt. Anderssen selbst hat in der Mehrzahl der Partien, in denen er als Schwarzer gegen das Evansgambit zu kämpfen hatte, diesen Zug gewählt. Man erkannte damals aber seine Bedeutung nicht vollständig. H. von Gottschall schreibt noch 1912: "5...♗c5 hat ebensoviel Anhänger wie der Textzug. Vielfach wird es überhaupt gleichgültig sein, welchen der beiden Züge der Spieler wählt, da die Stellung nach wenigen Zügen dieselbe werden kann. Auch 5...♗e7 kann geschehen."]

6.d4 exd4 7.0−0

[7.cxd4 Bb4+ 8.Bd2 Nf6∓]

7...d6

[7...Na5 8.Bd5 c6 9.cxd4∓]

8.cxd4 Bb6 9.d5 Anderssen much preferred to play this move; there remain some fifty games in which he employed it, mainly against G. R. Neumann and J. Zukertort. He was obviously making use of series of off−hand games against these players to advance his research on the possibilities offered this variation. Since he had examined it in such depth, he naturally did not avoid playing it in competitive games. Positionally speaking, the move looks suspicious: it removes the flexibility of White's pawn centre, limits the effectiveness of the white squared bishop. But it is motivated by a very profound idea: by posting his bishop on b2, White wishes to force the advance f7−f6. This will weaken some of the white squares in Black's position, especially e6; the possibility of ♘f3−d4−e6 mut be taken into account. Moreover the closing of the centre should allow White to carry out an attack on Black's kingside without problems. However, I do not believe that White can carry out these ideas if Black defends with due care; in the game we are considering,

the opening is quite satisfactory for Black, although he did not employ the usual main line of the day. I feel that 9.♘c3 holds out more prospects than 9.d5. Für diesen Zug hatte Anderssen eine große Vorliebe; es sind etwa fünfzig Partien erhalten, in denen er ihn anwandte, hauptsächlich gegen G. R. Neumann und J. Zukertort. Offenbar benutzte er Serien von freien Partien gegen diese Spieler, um seine Forschungen über die Möglichkeiten, die diese Variante bietet, voranzutreiben. Da er sie so gründlich untersucht hatte, ging er ihrer Anwendung in Turnierpartien natürlich nicht aus dem Wege. Der Zug sieht positionell verdächtig aus: Dem weißen Bauernzentrum wird seine Flexibilität genommen, der weißfeldrige Läufer in seiner Wirkung beschränkt. Ihm liegt aber eine tiefe Idee zugrunde: Der Weiße will durch Postierung seines Läufers auf b2 den Aufzug f7−f6 erzwingen. Danach werden im Lager des Schwarzen einige weiße Felder schwach, insbesondere e6; der Möglichkeit ♘f3−d4−e6 muß Beachtung geschenkt werden. Im übrigen soll die Abschließung des Zentrums es dem Weißen ermöglichen, in aller Ruhe die Erstürmung des schwarzen Königsflügels durchzuführen. Ich glaube allerdings, daß Weiß diese Ideen nicht verwirklichen kann, wenn Schwarz sich sorgfältig verteidigt; auch in der vorliegenden Partie ist der Eröffnungsverlauf für den Nachziehenden durchaus befriedigend, obwohl er nicht zu der damals üblichen Hauptvariante greift. Meinem Gefühl zufolge ist 9.♘c3 aussichtsreicher als 9. d5.

[9.Bb5!? a6 10.Ba4∓]

9...Nce7 The text move, which was not often chosen, has been generally criticised. I quote: 1) "Steinitz' predilection for capricious moves comes out once more. The text move is worthless and gives White an easy advantage, all the more so since Steinitz continues the game in a peculiar fashion" (H. von Gottschall) 2) "It was not then so well known, that this move is weak. However, Steinitz loved such bizarre continuations − and suffered many painful defeats because of this inclination of his!" (L. Pachman) I cannot see what is so capricious or so bizarre as a move which keeps the knight in the centre and ready to spring to the defence of the kingside on g6, rather than placing it on a5 on the edge of the board. As well as the advantages mentioned above, the move does have one disadvantage: Black does not win a tempo by attacking the white squared bishop, with the result that White finds time to open the position. Whether 9...♘a5 or 9...♘ce7 is to be preferred could only be cleared up by extensive and tedious analysis; but in any case, the text moves leads to a quite excellent game for Black as will be made clear by the game continuation and the annotations. Der Textzug, der nicht oft gewählt wurde, ist generell verurteilt worden. Ich zitiere: 1) "Die Vorliebe von Steinitz für kapriziöse Züge bricht immer einmal durch. Der Textzug taugt nichts und bringt Weiß mühelos in Vorteil, um so mehr, als Steinitz das Spiel noch sonderbar weiterführt." (H. von Gottschall) 2) "Daß dieser Zug schwach

ist, wußte man sogar damals genau. Steinitz liebte jedoch solche bizarren Fortsetzungen − und erlitt als Folge dieser Neigung so manche schmerzliche Niederlage!" (L. Pachman) Was kapriziös oder bizarr daran sein soll, den Springer im Zentrum zu halten und auf g6 zum Schutze des Königsflügels einsetzen zu wollen, statt ihn auf a5 an den Rand zu stellen, ist mir nicht ersichtlich. Neben den soeben genannten Vorteilen hat der Zug einen Nachteil: Schwarz gewinnt kein Tempo durch den Angriff auf den weißfeldrigen Läufer, so daß Weiß Zeit findet, die Stellung zu öffnen. Ob 9...♘a5 oder 9...♘ce7 vorzuziehen ist, könnte nur durch umfangreiche und langwierige Untersuchungen geklärt werden; aber jedenfalls führt der Textzug durchaus zu vorzüglichem Spiel für Schwarz, wie die Partiefortsetzung und die Anmerkungen dazu zeigen werden.

[At this point the most common move was Meist wurde an dieser Stelle der Zug 9...Na5 Steinitz himself played it five times in his 1866 match against Anderssen. Thereafter angewandt; Steinitz selbst hat ihn in seinem Wettkampf gegen Anderssen 1866 fünf Mal gespielt. Danach pflegte 10.Bb2 Ne7 11.Bd3 0−0 12.Nc3 Ng6 13.Ne2 c5 14.Qd2 f6 was the usual continuation. <cf. also ECO C 51/6 (2nd edition).> The situation is unclear. White may have no immediate threats, but it will be a long time before the opposing knight on a5 and the bishop on b6 can play an effective role in the game. He must try a pawn storm on the kingside; it is doubtful whether this offers sufficient compensation for the pawn he has sacrificed. zu geschehen. <Vgl. auch ECO C 51/6 (2. Auflage).> Klar ist die Lage nicht; Weiß hat zwar keine unmittelbaren Drohungen, doch wird es lange dauern, bevor der gegnerische Springer auf a5 und der Läufer auf b6 wirksam ins Spielgeschehen eingreifen können. Er muß einen Bauernsturm am Königsflügel versuchen; es bleibt zweifelhaft, ob diese Möglichkeit eine ausreichende Kompensation für den aufgegebenen Bauern gewährt.]

[9...Qf6!? 10.dxc6 Qxa1−+]

10.e5 White must try to open up the position at once; furthermore, the text move deprives Black's king's knight of its natural developing square f6. Weiß muß sich um die sofortige Öffnung der Stellung bemühen; überdies nimmt er mit dem Textzug dem Königsspringer des Schwarzen das natürliche Entwicklungsfeld f6.

[After Nach 10.Bb2 Black has two satisfactory possibilities: hat Schwarz zwei befriedigende Möglichkeiten: f6 *(10...Nf6 11.Bxf6 gxf6 12.Nc3 0−0* with advantage to Black. mit Vorteil für Schwarz. *)* 11.Nd4 Bxd4 12.Qxd4 Nh6 followed by ♘h6−f7 with a solid position. gefolgt von ♘h6−f7 mit fester Stellung.]

10...Nh6 1−0 Fischer,R−Bisguier,A Poughskeepie 1963 Black completes the development of his kingside; he is not put off by the fact that White has the possibility of playing ♗c1xh6 to ruin the pawn structure on the side to which he has castled. Naturally at this point, we immediately remember the move 9.♘h3 (after 1.e4 e5 2.♘f3 ♘c6 3.♗c4 ♘f6 4.

♘g5 d5 5.ed5: ♘a5 6.♗b5+ c6 7.dc6: bc6: 8.♗e2 h6), which was thought up by Steinitz and successfully employed by Fischer (Fischer−Bisguier, USA 1963; see R. Fischer, Steinitz' feeling for the position is admirable; in both cases the manoeuvre is sound. Accurate defence will see the king avoid danger behind his mangled pawns. Schwarz beendet die Entwicklung seines Königsflügels; es schreckt ihn nicht, daß Weiß die Möglichkeit besitzt, mit Lc1xh6 seine Bauernstellung am Rochadeflügel zu ruinieren. Natürlich erinnert man sich hierbei sofort an den Zug 9.Sh3 (nach 1. e4 e5 2.♘f3 ♘c6 3.♗c4 ♘f6 4.♘g5 d5 5. ed5: ♘a5 6.♗b5+ c6 7.dc6: bc6: 8.♗e2 h6), der von Steinitz erdacht und von Fischer mit Erfolg angewandt wurde (Fischer−Bisguier, USA 1963; s. R. Fischer, My Sixty Memorable Games, Partie Nr. 45). Das Positionsgefühl von Steinitz ist bewundernswert; das Manöver ist in beiden Fällen gesund. Bei sachgemäßer Verteidigung gerät der König hinter der zerschlitzten Bauernmasse nicht in Gefahr.

[10...dxe5 11.Nxe5 Nf6
can obviously not be recommended; White does not continue with 12.♗b5+ (P. R. von Bilguer, Handbuch des Schachspiels, 8th edition, Berlin und Leipzig 1922, p. 366), but with 12.d6. ist offenbar nicht empfehlenswert; Weiß fährt nicht mit 12.♗b5+ (P. R. von Bilguer, Handbuch des Schachspiels, 8. Auflage, Berlin und Leipzig 1922, S. 366), sondern mit 12. d6 fort.]

[After Nach 10...Ng6 White obtains a dangerous initiative with erhält Weiß mit 11.e6 fxe6 12.dxe6 N8e7 (12...Df6 wird mit 13.Dc2 pariert) 13.Ng5 <cf. P. R. Bilguer, loc. cit.; P. Keres, Theorie der Schacheröffnungen, Offene Spiele I, Berlin 1952, p. 82.> eine gefährliche Initiative. <Vgl. P. R. Bilguer, loc. cit.; P. Keres, Theorie der Schacheröffnungen, Offene Spiele I, Berlin 1952, S. 82.>]

[10...Bg4 11.Qa4+ Qd7 *(11...Bd7 12.Qb3 Ng6 13.Re1* (Naturally 13.e6 is also worth considering) (Auch 13.e6 kommt natürlich in Betracht) *dxe5 14.d6* with a dangerous attack. mit gefährlichem Angriff. *)* 12.Bb5 c6 13.dxc6 bxc6 14.Be2 d5 15.Ba3 White has managed to open up the position, and has a powerful initiative. The text is the most solid and the strongest. Weiß hat eine Öffnung der Stellung erreicht, und seine Initiative hat große Kraft. Der Textzug ist am solidesten und stärksten.]

11.Nc3

[I feel that Genauer scheint mir 11.Bxh6 gxh6 12.Nc3 is more accurate. zu sein...]

11...0−0 ... because here, in addition to the game continuation, Black could have chosen 11...♘hf5 12.g4 ♘h6 13.h3 0−0 or 11...♘g4 12.e6 0−0. In both cases he gets a good game; the text move is not worse, however. ... denn hier hatte Schwarz neben der Partiefortsetzung die Wahl, 11...♘hf5 12.g4 ♘h6 13.h3 0−0 oder 11...♘g4 12.e6 0−0 zu versuchen. In beiden Fällen erhält er gutes Spiel; der Textzug ist indessen nicht schlechter.

[11...dxe5 12.Nxe5 0−0 13.Bxh6 gxh6 14.Ng4∓]

12.Bxh6 gxh6 13.Ne4?

[In the game Anderssen−Winawer, Baden−Baden 1870, which was played in a later round, Black tried to improve his game with In der Partie Anderssen−Winawer, Baden−Baden 1870, die in einer späteren Runde gespielt wurde, versuchte der Anziehende, sein Spiel mit 13.Qd2 (13.♕d2 looks better to me than 13.♘e4, because this move decoys the opposing king on to a less favourable square. Afte 13...♔g7 White should try the continuation 14.♘e4. To be sure, he cannot expect more than bare equality in this line either.) (13.♕d2 gefällt mir besser als 13.♘e4, weil der gegnerische König mit diesem Zuge auf ein ungünstigeres Feld gelockt wird, doch sollte der Anziehende nach 13...♔g7 die Fortsetzung 14.♘e4 versuchen. Mehr als einen dürftigen Ausgleich kann er freilich auch bei dieser Folge nicht erwarten.) Kg7 14.Rae1 There then followed zu verbessern. Es folgte dxe5 15.Rxe5 (Instead of 15.♖e5: worth considering is 15.♘e5:, but here too after 15...♘g6 White's prospects do not look good.) (An Stelle von 15.♖e5: kommt 15.♘e5: in Betracht, doch sind auch hier nach 15...♘g6 die Aussichten des Weißen nicht gut.) Bg4 (This move is directed against the threat of 16.♖h5). Now there are several plausible continuations: (Dieser Zug ist gegen die Drohung 16.♖h5 gerichtet). Jetzt gibt es mehrere plausible Fortsetzungen:

A) 16.Qf4 was recommended as being better by H. von Gottschall, <H. von Gottschall, Adolf Anderssen, Leipzig 1912, p. 358.> but Black simply replies wurde von H. von Gottschall als besser empfohlen,<H. von Gottschall, Adolf Anderssen, Leipzig 1912, S. 358.> doch antwortet Schwarz einfach h5 , and the threat of 17...♘g6 is even stronger. , und die Drohung 17...♘g6 hat verstärkte Kraft.;

B) 16.h3 Bxf3 17.gxf3 Qd6 18.Rh5 *(18.f4 Qb4 19.Qd3 Ng6* , and White is in some difficulty. , und Weiß ist in Schwierigkeiten.*; 18.Rfe1 Ng6 19.Rh5 Qf4* with advantage to Black. mit Vorteil für Schwarz. *)* 18...Qg3+ 19.Kh1 Qxf3+−+;

C) 16.Nd4 Ng6 17.Re4 Bd7] **13...dxe5 14.Nf6+** This move has been rightly criticised, because it gives away a tempo. It would be extraordinarily optimistic to believe that Dieser Zug hat zu Recht Kritik erfahren, denn er verschenkt ein Tempo. Es zeugt freilich von erstaunlichem Optimismus zu glauben, nach

[14.Nxe5 Fritz 5.00 (5s): '!?' would give an advantage to White, as is maintained in Bilguer [see above]: habe Weiß Vorteil, wie bei Bilguer an der erwähnten Stelle behauptet wird:

A) 14...Nf5 15.Ng4 Kh8 16.Rb1 Bd4 *(16...Qh4 17.Rxb6 axb6 18.Qa1+* occurred in the game Neumann−Steinitz, Paris 1867; apparently the judgement in Bilguer is based on this game. In fact Black may at this point have some troubles, although things do not seem so clearcut to me. geschah in der Partie Neumann−Steinitz, Paris 1867; auf dieses Beispiel stützt

sich offenbar das bei Bilguer abgegebene Urteil. Hier mag Schwarz in der Tat Ungelegenheiten bekommen, obwohl mir die Sache keineswegs klar scheint. *)* 17.Nxh6 Bg7 gives Black an excellent position. gibt dem Schwarzen eine vorzügliche Stellung.;

B) 14...Ng6 is even stronger than 14...♘f5; there is little diffrence from the actual continuation in the game. ist noch stärker als 14...♘f5; der Unterschied zur tatsächlichen Partiefortsetzung ist gering. 15.Nd3∓]

14...Kh8 15.Nxe5 Ng6 There were other strong moves: Auch andere Züge waren stark:

[15...Qd6 16.Neg4 *(16.Nfg4 f5 17.Qf3 Kg7* is no better for White. ist nicht besser für Weiß *)* 16...Bxg4 17.Nxg4 f5 18.Ne3 f4 19.Nc2 *(19.Ng4 h5)* 19...f3 20.g3 Ng6 Black should be winning. Schwarz dürfte auf Gewinn stehen.]

[15...Nf5 16.Nh5 Bd4 17.Nf3 *(17.Qg4 Qg5* is no more favourable for White. ist nicht günstiger für Weiß *)* 17...Bxa1 18.Qxa1+ f6 Black is winning. The text move also leads to a decisive advantage for Black. Schwarz steht auf Gewinn. Der Textzug führt ebenfalls zu entscheidendem Vorteil für Schwarz.]

16.Nxg6+ "Whether this is the strongest way to continue the attack is however doubtful as far as we are concerned. Worth considering was "Ob dies die stärkste Fortsetzung des Angriffs ist, scheint uns jedoch sehr zweifelhaft. In Betracht kam

[16.Neg4! , after which White continues attacking and easily wins back the sacrificed pawn." (L. Pachman) , wonach Weiß bei fortdauerndem Angriff den geopferten Bauern leicht zurückerobert." (L. Pachman)]

[After Auf 16.Neg4 Black replies entgegnet Schwarz Bxg4 17.Nxg4 h5 18.Ne3 *(18.Nh6* leads nowhere; Black replies 18...♕g5 führt zu nichts; Schwarz antwortet 18...♕g5 *)* 18...Qg5 Not only does he retain his extra pawn, but he also has a lead in development and an attack. White's position is lost. But the annotator cannot admit this, not after treating Black's 9th move with complete scorn and since he was unable to indicate any substantial improvement for White. Er behält nicht nur seinen Mehrbauern, sondern hat auch Entwicklungsvorsprung und Angriff. Die Stellung des Weißen ist eben verloren; aber das kann der Kommentator nicht zugeben, nachdem er den 9. Zug des Schwarzen in unqualifizierter Weise schmähte und seitdem keine wesentliche Verstärkungsmöglichkeit für den Weißen angeben konnte.]

16...hxg6 "Worse would be 16...fg6:" (DSZ). Certainly this does not appear to be the case to me, because in addition Black gets pressure on the f2−square. "Minder gut wäre 16...fg6:" (DSZ). Sicher scheint mir dies nicht, weil Schwarz zusätzlich Druck gegen den Punkt f2 erhält:

[16...fxg6 17.Ne4 Bf5 18.Ng3 Qf6 etc. Moreover the text move cannot be blamed; Black retains the extra pawn and has the better position. usw.

Indessen verdient der Textzug keineswegs Tadel; Schwarz behält einen Mehrbauern bei besserer Stellung.]

17.Ne4 f5 "Absolutely necessary, since the penetration by the White queen via d2 to c3 is ominous. Also to be avoided is 18.d5−d6 then 19.♘e4xd6." (NBS) "A serious error in a position in which Black could have taken over the initiative by 17...♗f5! then ♕f6." (L. Pachman) "Durchaus nothwendig, da sonst das Eingreifen der weißen Dame über d2 auf c3 verhängnisvoll wird. Auch 18.d5−d6 nebst 19.♘e4xd6 muß vermieden werden." (NBS) "Ein schwerer Fehler in einer Stellung, in der Schwarz nach 17... ♗f5! nebst ♕f6 die Führung hätte übernehmen können." (L. Pachman)

[17...Bf5

A) 18.Ng3 Bd7 *(18...Qf6 19.Qf3)* 19.Qf3 intending to play 20.♘e4; Black has made no noticeable progress. der Absicht, 20.Se4 zu spielen; Schwarz hat keinen wesentlichen Fortschritt erzielt.;

B) 18.Qf3 Bxe4 (If White can manage ♕f3−c3+, his prospects improve considerably) (Wenn Weiß zu ♕f3−c3+ kommt, verbessern sich seine Aussichten beträchtlich) 19.Qxe4 Qf6 20.Rae1 Kg7 *(20...Rfe8 21.Qxe8+ Rxe8 22.Rxe8+ Kg7 23.Bb3* Nor is this position clearly won for Black. Auch diese Stellung ist keineswegs klar gewonnen für Schwarz. *)* 21.d6 White has drawing chances. The text move is stronger and leads to a win. Weiß hat Remisaussichten. Der Textzug ist stärker; er führt zum Gewinn.]

[It should be noted that the move Es sei erwähnt, daß auch der Zug 17...Qh4 was also worth considering: in Betracht kam: 18.Qf3 *(18.Qe2 Bf5 19.Ng3 Bd7* with a decisive advantage for Black. mit entscheidendem Vorteil für Schwarz. *)* 18...Bf5 19.Qc3+ f6 20.Ng3 Bd4 winning the exchange. mit Qualitätsgewinn.]

[17...Kh7 18.Qd2 1−0 (37) Anderssen,A (2600)−Steinitz,W (2590) Baden Baden 1870 [Fritz 5.00 (5s)]]

18.Qd2 Kh7 The moves 18...♔g7 and 18...g5 were also playable, but I do not think I have to examine the consequences of these moves. Auch 18...♔g7 und 18...g5 waren spielbar, doch scheint es mir nicht erforderlich, die Konsequenzen dieser Züge zu untersuchen. **19.Nc3 Qf6**

[After Nach 19...Qg5 White continues erlangt Weiß mit 20.Qxg5 hxg5 21.Rae1 Bc5 22.Nb5 c6 23.dxc6 bxc6 24.Nc7 Rb8 25.Ne6 and reaches a drawn position. eine Remisstellung.]

20.Rfe1 Bd7? White can equalize after the text move. Nach dem Textzug kann Weiß ausgleichen.

[By Mit 20...Ba5 Black could reach a winning position. konnte Schwarz eine Gewinnstellung erreichen:

A) 21.Re3 f4 22.Rd3 *(22.Rf3 Bg4)* 22...Bf5;

B) 21.Rac1 Bd7

B1) 22.Qb2 Rae8 *(22...Bb6* is also sufficient. genügt ebenfalls *)* 23.Rxe8 Rxe8 24.Qxb7 Bxc3 25.Qxc7 Re7 26.d6 Rg7 and Black wins. und

Schwarz gewinnt.;
B2) 22.d6 cxd6 and White has no more tricks. und Weiß hat keine weiteren Schwindeleien.;
B3) 22.h3 Rae8 with an easy win. mit mühelosem Sieg.;
C) 21.d6 cxd6 transposes to line I or II. mit Übergang in Abspiel I oder II. *(21...Bxc3? 22.Re7+ Rf7 23.Rxf7+ Qxf7 24.Qxc3 Qg7 25.Qxg7+ Kxg7 26.dxc7* and White wins; 26...♗d7 fails to 27. ♖d1. und Weiß gewinnt; 26...♗d7 scheitert an 27.♖d1. *)*]

[20...Bd4!? 21.Rac1 Be5∓]

21.d6 This "square sweeper" (to use Kmoch's terminology) gives White sufficient counterplay for a draw. Previous annotators of the game considered the move to be winning. "This final attack makes up to the reader for any previous positional failings." (L. Pachman). "The decisive breakthrough." (G. Pollak). Durch diesen "Feldfeger" (nach Kmochs Terminologie) erhält Weiß zum Remis ausreichendes Gegenspiel. Die bisherigen Bearbeiter der Partie hielten den Zug für siegbringend. "Durch diesen Schlußangriff wird der Leser für bisherige positionelle Unzulänglichkeiten entschädigt" (L. Pachman). "Der entscheidende Durchbruch" (G. Pollak). **21...Rae8** The text move constitutes a satisfactory defensive possibility. Der Textzug stellt eine ausreichende Verteidigungsmöglichkeit dar.

[At this point, NBS gives the variation Hier gibt die NBS die Variante 21...cxd6 22.Nd5 Qd4 23.Re7+ Kh8 24.Qxd4+ Bxd4 25.Rd1 winning a piece − and astonishingly it can also be found in H. von Gottschall, G. Pollak and L. Pachman, although 24. ♕h6:+ then mate on the move seems more obvious than 24.♕d4:+. The reasons why all these players independently of each other suffered the same case of chess blindness will have to examined by some qualified psychologist − because one may not assume that one copied from another, since there is a complete lack of sources quoted. mit Figurengewinn an − und erstaunlicherweise findet sie sich auch bei H. von Gottschall, G. Pollak und L. Pachman, obwohl 24. ♕h6:+ nebst matt im nächsten Zuge naheliegender zu sein scheint als 24. ♕d4:+. Die Gründe dafür, daß alle diese Spieler unabhängig voneinander dem gleichen Fall von Schachblindheit erlagen, sollten von einem kundigen Psychologen untersucht werden − denn daß etwa einer vom anderen abgeschrieben hätte, darf man angesichts des völligen Mangels von Quellenangaben nicht vermuten.]

[Another line for Black Auch mit 21...Qxd6 22.Qxd6 cxd6 23.Re7+ Kh8 24.Rxd7 Rac8 also allowed him to draw. konnte Schwarz remis erreichen.]

[21...Rfe8!? 22.dxc7 Bc6∓]

22.dxc7 Bc6 23.Nd5 Bxd5 24.Qxd5?!

[Better was Besser war 24.Bxd5 Fritz 5.00 (5s): '!?' Bxc7 25.Bxb7 Fritz 5.00 (5s): '∓' and a totally drawn position has arisen. und es ist eine tote Remisstellung entstanden.]

24...Bxc7

[With Mit 24...Rc8 Black could have hung on to a sound extra pawn, because hätte Schwarz einen

gesunden Mehrbauern behalten können, denn

A) 25.Qd7+ Kh8 26.Qd2 Rxc7 27.Rac1∓ *(27.Qxh6+ Rh7 28.Qd2 Qh4∓)*;

B) 25.Qxb7 Rxc7 26.Qd5 Qh4 is unfavourable for White. ist ungünstig für Weiß.]

25.Qd7+

[Better was Besser war 25.Qxb7 with an absolute drawn position after mit einer ausgesprochenen Remisstellung nach Qg7 *(25...Qd6 26.g3 a5=)*]

25...Qg7 26.Rxe8 "We consider the sacrifice of the queen for two rooks to be decisve here," NBS. I do not. "Das Opfer der Dame für zwei Thürme halten wir hier für entscheidend." (NBS). Ich nicht.

[26.Qxg7+ Kxg7 27.Bd5 b6∓]

26...Bxh2+ L. Pachman gives this move an exclamation mark and writes: "A little trap: 27.Kh2: Qd7: 28.Rf8: Qd6+ would lead to defeat for White." L. Pachman versieht diesen Zug mit einem Ausrufezeichen und schreibt: "Eine kleine Falle: 27.Kh2: Dd7: 28.Tf8: Dd6+ würde zum Verlust für Weiß führen."

[The text move is enough to draw, but I would have loved to know how, after the simple reply Der Textzug genügt zum Remis, aber es hätte mich gereizt zu erfahren, wie die Kommentatoren nach der einfachen Antwort 26...Rxe8 commentators would have proved an advantage for White. For my part, I can see nothing better than Vorteil für Weiß nachgewiesen hätten. Ich sehe nämlich nichts Besseres als 27.Qxe8 Qxa1+ 28.Bf1 White manages a draw, because Black cannot avoid the exchange of queens. Weiß erreicht remis, weil Schwarz den Damentausch nicht vermeiden kann.]

[26...Qxd7 27.Rxf8 Bxh2+]

27.Kh1 Qxd7

[Now Black has no choice, since Jetzt hat Schwarz keine andere Wahl mehr, denn 27...Rxe8 28.Qxe8 Qxa1+ 29.Kxh2 costs him a piece. kostet ihn eine Figur.]

28.Rxf8 Be5?

[Here "Hier käme "Ein Fehler, der aber den Verlust nur beschleunigt. Längeren Widerstand bot 28...Qd4 would have been worth considering, to which White's best reply is 29.Re1. Anderssen can count himself, that he won the game, and once more Steinitz threw away the first prize!" (DSZ) in Betracht, worauf Weiß wohl am besten 29.Te1 spielt. Anderssen kann von Glück sagen, daß er die Partie gewinnt, und Steinitz wirft wieder den ersten Preis weg!" (DSZ) "Ein Fehler, der aber den Verlust nur beschleunigt. Längeren Widerstand bot 28...Dd4." (NBS)]

["A mistake, but it only hastens defeat. The move "Ein Fehler, der aber den Verlust nur beschleunigt. Längeren Widerstand bot 28...Qd4 offered longer resistance." (NBS) " (NBS)]

[but even aber auch 28...Qd4 29.Rb1 b6 30.Rf7+ Kh8 31.Kxh2 Qxc4 32.Rxa7 would not have saved the game, on account of the unfortunate position of the black king." (L. Pachman) hätte die Partie angesichts der unglücklichen Stellung des schwarzen Königs nicht gerettet." (L. Pachman)]

[I) Pachman's variation was the one that surprised me most. After I) Pachmans Variante hat mich am meisten erstaunt. Auf 28...Qd4 29.Rb1 came folgt Qxc4 with an easy win for Black, because after mit leichtem Gewinn für Schwarz, denn nach 30.Rxb7+ Bc7 the threat of 31... ♕f1 mate is decisive, and 30.♔h2: ♕c7+ then 31...h5 is hopeless for White. ist die Drohung 31...♕f1 matt von entscheidender Kraft, und 30. ♔h2: ♕c7+ nebst 31...h5 ist hoffnungslos für Weiß.]

[II) 28...Qd4 29.Re1 h5 also leaves Black the better game. überläßt dem Schwarzen ebenfalls das bessere Spiel.]

[III) The correct reply to III) Die richtige Entgegnung auf III) Die richtige Entgegenung auf 28...Qd4 is ist 29.Rf7+

A) 29...Kh8 30.Re1 Be5 31.Rf8+ Kh7 32.Rf7+ Kh8 *(32...Bg7 33.Ree7* with advantage to White. mit Vorteil für Weiß.*; 32...Kg8 33.Bb3* just plunges Black into danger stürzt den Schwarzen nur in Gefahren. *)* 33.Rf8+ with a draw. mit remis.;

B) 29...Kg8 30.Rc1 (There is nothing better; 30.♖c7+ ♔h8 leads to an advantage for Black, because both White's rooks are hanging) (Es gibt nichts Besseres; 30.♖c7+ ♔h8 führt zum Vorteil für Schwarz, weil beide Türme von Weiß hängen) Qh4 *(30...Bd6* fails to scheitert an *31.Bb3 Qh4+ 32.Kg1 Qh2+ 33.Kf1 Qh1+ 34.Ke2 Qxc1 35.Rc7++−)* 31.Rf6+ *(31.Bb3 Bf4+ 32.Kg1 Bxc1=)* 31...Kg7 32.Rf7+ Kh8 33.Rf8+ with a draw. mit remis.]

28...♕d4 would thus have led to a draw; the text move loses. 28...♕d4 hätte also zum Remis geführt; der Textzug verliert.

29.Rb1 Qd4 Black cannot prevent the white rooks from infiltrating the seventh rank. Schwarz kann nicht verhindern, daß die Türme des Weißen auf der siebten Reihe eindringen.

[29...Qc6 30.Rf7+ Kh8 31.Rbxb7+−]

Correspondence 1884

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.0−0 Nf6

[Normally Black plays 6...d6 to reinforce his centre and remain more flexible.]

7.d4 After only six and a half moves in the one of the oldest openings, we have landed in a slightly unusual position.

7...Nxe4

[7...exd4? is asking for trouble after

8.Ba3 d6 9.e5 Ne4 10.exd6 cxd6 *(*or *10...Nxd6 11.Re1+ Ne7 12.Ng5 0−0 13.Qh5 Bf5 14.Nxf7 Nxf7 15.Bxe7* with a clear advantage *)* 11.Re1 d5 12.Nbd2 Bxc3 *(*if *12...f5 13.Nxd4 Nxd4 14.Nxe4 dxe4 15.Rxe4+! fxe4 16.Qh5+ Kd7 17.Qd5+ Kc7 18.Qe5+ Kc6 19.Qc5+* wins *)* 13.Nxe4 Bxe1 , as in D.Rybak−J.Svoboda, Plzen 1999, then 14.Qxe1! Be6 15.Nd6+ Kd7 16.Bb5 Qb6 17.Rb1 Rhb8 18.Ne5+ Kc7 19.Bxc6 bxc6 20.Rxb6 is the easiest way to win.]

[7...0−0 was successful after 8.Qc2 *(*or if *8.d5 Ne7 9.Nxe5 d6 10.Nf3 Nxe4 11.Qd3 f5 12.Ng5 Nxg5 13.Bxg5 h6 14.Bd2 Ng6* with the advantage*;;* White can play more strongly with *8.Nxe5! Nxe5 9.dxe5 Nxe4 10.Ba3)* 8...Qe7 9.dxe5 Nxe5 10.Nxe5 Qxe5 11.Bd3 Ng4 12.g3 Bb6 13.Na3 d5 and Black was better in J.Dufresne−A.Anderssen, Berlin match 1851.]

8.dxe5?! This gives White an interesting, but incorrect attack.

[The critical line runs 8.Nxe5! 0−0 *(*not *8...d5? 9.Nxf7 Kxf7 10.Qh5+ Ke7 11.Bxd5* and White wins *)* 9.Ba3 Nxe5 *(*or *9...d6 10.Nxc6 bxc6 11.Qa4 Bxc3 12.Nxc3 Nxc3 13.Qxc6* with compensation *)* 10.dxe5 d6 11.Qf3 Qh4 12.Bd5 Ng5 13.Qd3 Rd8 14.exd6 cxd6 15.Bc1 Ne6 16.Qf3 Re8 17.Na3 and White has excellent compensation for the pawn.]

8...0−0 9.Bd5

[After 9.Qc2?! Black should seize the day with d5! 10.exd6 *(*if *10.Rd1 Be6 11.Bxd5 Bxd5 12.c4 Nb4 13.Qb2 Bb6 14.Be3 Bxe3 15.fxe3 Ng5* and Black is better, as after *16.Ne1 Nh3+! 17.gxh3 Qg5+ 18.Kf2 Qf5+ 19.Kg1 Bxc4 20.Nd2 Nd3* Black is completely dominant *)* 10...Nxd6 11.Rd1 h6 12.Ba3 Qf6 13.Bd5 Ne7 , Z.Stojanovic−B. Pavlovic, Bor 1983. White is facing a big challenge in order to prove compensation here.]

[9.Ba3!? d6 10.Qc2 is the same idea in a slightly different move order, and now Black must play more carefully: Nc5 11.Nbd2 *(*or *11.Bxc5!? dxc5 12.Bd3* with compensation *)* 11...Re8 12.Rad1 Bb6 13.exd6 cxd6 14.Bd5 Be6 *(*the alternatives do not work, e. g. *14...Qf6?! 15.Ne4 Qf5 16.Nh4 Qg4 17.Nxd6 Re7 18.Nhf5 Bxf5 19.Qxf5 Qxf5 20.Nxf5 Rc7 21.Rfe1* and White is much better*;* , or *14...Ne7? 15.Ng5 Nxd5 16.Qxh7+ Kf8 17.Qh8+ Ke7 18.Qxg7* with a crushing attack in S.Ratzmann−D.Rosner, correspondence 2001 *)* 15.Nc4 and White has a decent initiative.]

9...Nc5

[9...Nxc3? 10.Nxc3 Bxc3 is worthless as White has a strong attack after 11.Ng5 Bxa1 *(*or *11...Nxe5 12.Qc2 Ng6 13.Qxc3* and wins *)* 12.Qh5 h6 13.Nxf7 Rxf7 14.Bxf7+ Kf8 15.Ba3+ d6 16.exd6 cxd6 17.Bb3 and White wins.]

[But 9...Bxc3 is a serious alternative. After 10.Bxe4 Bxa1 11.Bxh7+ we have:

A) 11...Kh8? 12.Ng5 g6 13.Qg4 Bxe5 14.Qh4 Kg7 15.Ne6+ dxe6 *(15...fxe6? 16.Qh6+ Kf7 17.Bxg6+ Ke7 18.Qh4+ Rf6 19.Ba3+ d6 20.Qh7+ Kf8*

21.Qh8+ Ke7 22.Qg7+ Rf7 23.Qxf7# was played in M.Chigorin−S.Alapin, St. Petersburg 1883 *)*
16.Qh6+ Kf6 17.Bg5+ Kf5 18.Bxd8 Rxd8 19.h4
with a dangerous attack;
B) 11...Kxh7! 12.Ng5+ Kg6 *(*after *12...Qxg5 13.Bxg5 Bxe5 14.Be3* White was better in M.Chigorin−V. Manko, correspondence 1900 and 1901 *)*
B1) 13.Qd3+ f5 14.exf6+ Kxf6 15.Nh7+ Kf7 16.Ng5+ Ke7 *(*or *16...Kf6* with equality *)* 17.Re1+ Ne5 18.Nc3 d6 19.Rxe5+ dxe5 20.Nd5+ Kd6 21.Nc3+ Ke7
with a draw.;
B2) 13.Qg4!? Nxe5 14.Qg3 Kf6 15.f4 Bd4+ 16.Kh1 Nc4 17.Nh7+ Ke7 18.Re1+ Kd6 19.Nxf8 c5 *(*not *19...Qxf8? 20.Rd1 Kc6 21.Rxd4*
with an extremely strong attack *)* 20.Nh7 with unclear play.;
B3) , and we have reached a new branching: 13.−−]

10.Ng5 Ne6? Black is wasting precious time, merely to replace one attacking white piece with another.
[Better was 10...Qe7! 11.Qc2 *(*if *11.Qh5 h6 12.Nf3 d6 13.exd6 Qxd6 14.Be3 Bb6 15.Rd1 Be6 16.Na3 Rad8 17.Nc4 Qe7* and White is fighting for a draw *)* 11...g6 12.f4 Bb6 13.Kh1 d6 14.f5 *(*or *14.exd6 cxd6 15.Qd2 Bf5* with the advantage *)* 14...Nxe5 15.f6 Qd8 16.Qd2 Ng4 and Black is much better here. One example is 17.Nxh7 Kxh7 18.Qg5 Qe8! 19.Qh4+ Kg8 20.Bh6 Nd3 21.Nd2 Ndf2+ 22.Kg1 Nh3+ 23.Kh1 Ngf2+ 24.Rxf2 Nxf2+ 25.Kg1 Ng4+ 26.Kh1 Qe5 and Black is winning, E. Schiffers−A.Romashkevich, correspondence 1894.]
[10...Nxe5 11.f4! looks dangerous for Black.]
11.Qh5 Nxg5 12.Bxg5 Qe8 13.Bf6! Ne7
[If 13...gxf6 14.Be4 and White wins.]
14.Nd2 d6 Black is now out of options.
[If 14...Nxd5? 15.Qg5 Nxf6 16.exf6 g6 17.Qh6 wins]
[or 14...Bxc3 15.Ne4 Bxa1 16.Bxg7 Kxg7 17.Nf6 and White wins again.]
15.exd6 Nxd5 16.Qxd5 gxf6 17.Qxa5 cxd6 Black has an extra pawn, but his position is lost. **18.Rae1 Qc6 19.c4 Qc5 20.Qc3 Bf5 21.Nb3 Qb6 22.Nd4!**
[This is stronger than 22.Qxf6 Bg6 23.Re7 Rae8 24.Rfe1 when White only has a clear advantage.]
22...Bg6 23.f4 Rfe8 24.f5 Rxe1 25.Rxe1 Bxf5 26.c5! Qxc5 27.Qxc5 dxc5 28.Nxf5 h5 29.Re7 Rd8 30.Rxb7
1−0

Qg6∓) 13...Be5 14.Qg5 Ne7 *(*if *14...Nf6?! 15.Qh6+ Ke7 16.Qd2* and White has great compensation *)* 15.Qh6+ Bg7 16.Qd2 and White has compensation for the pawn, e.g. he is threatening Nb5.]

12.Nd4!?

[Or 12.Ng5 Donev h6 *(12...Bxg5 13.Bxg5 Qxe4 14.Re1↑)* 13.Nh7!?

A) not 13...Qxe4?? 14.Qxg8+ Rxg8 *(14...Ke7 15.Nxf6 Kxf6 16.Bf3+−)* 15.Nxf6++− and wins;

B) 13...0−0−0 14.Nxf6 Nxf6 15.Nd2 and White is slightly better.]

[12.Nbd2 Blatny,P Bxc3 13.Rb1 Nf6]

12...0−0−0

[Black can also try 12...Qxe4 , but after 13.Nd2⩲ [%draw arrow,d2,e4,green] [%draw full,e2] Qg6 14.Qe3+ Ne7 15.Bd3 Qg7 16.Ne4 White has compensation.]

13.Nd2 [%draw arrow,a1,b1,green] [%draw arrow,b1,b7,green] [%draw full,c8] Im volgende Mittelspiell führenden Plan für beide seiten ist Angriff des gegnerisches König.Schwarz hat offene g−Linie auf Königsflügell,weiß offene b−Linie am Damenflüggel.Es ist wichtig wer die Initiative zuerst erobert. **13...Nc6** [%draw full,d4] [%draw arrow,d4,c6,green] [%draw arrow,d7,c6,green]

[After 13...h5 14.Rb1! [%draw arrow,g3,d3,green] [%draw arrow,d3,a6,green] <xml✕:>with the idea 15 Qd3! <nag>140</nag✕sym>Q</sym>d3</:✕/xml> with the idea 15 Qd3! Δ♕d3 h4 15.Qe3 *(15.Qd3 Nh6 16.Qa6 bxa6 17.Bxa6+ Nb7 18.Bxb7+ Kb8 19.Nc4* [%draw arrow,c4,a5,green] *)* 15...h3 16.g3 White's attack looks much more dangerous.]

14.Qe3

[14.Qd3 Ne5∞ *(14...Ne5* Blatny,P *15.Qe3 c5⇄)*]

14...h5

[14...Nxd4 15.cxd4 [%draw full,d4,green] [%draw full,e4,green] [%draw arrow,c1,c8,green]]

15.Rb1 Nh6 [%draw arrow,h6,g4,green] [%draw arrow,d8,g8,green] [%draw full,g1] **16.Qd3!?** True to his style Shirov is more interested in attacking than in grabbing material. [%draw full,a5] [%draw full,a6,green] [%draw arrow,a5,b7]

[After the long line 16.Nxc6 Bxc6 17.Qxa7 Qe5!⩲ 18.Rb3 *(18.f3)* 18...Ng4 19.f4 Qc5+ 20.Qxc5 dxc5 21.e5 Be7 22.c4 Rhg8 23.Bf3 Bxf3 24.Nxf3 Nh6 Black has compensation for the pawn.]

16...b6 With this move Black gives White a point to attack, so although it seems 'normal', 16... b6 might be questionable.

[Instead, 16...Ne5? Blatny,P 17.Qa6!+− and White wins is a trick worth remembering]

[but 16...Rdg8 is a logical move, setting an elegant trap at the same time: 17.Rxb7? *(* better is *17.N2f3±* with a continuing struggle*; 17.Nc4±* Blatny,P *)* 17...Nxd4

A) 18.Rxa7 Nxe2+ 19.Qxe2 Kd8 *(19...Kb8? 20.Qa6 Bc6□ 21.Ba3 Rxg2+ 22.Kxg2 Bxe4+ 23.f3 Rg8+ 24.Kh1+−)* 20.Ra8+ Bc8∓;

B) 18.Qa6 Nxe2+ 19.Kh1 Qe6! <xml✕:✕nag>140</nag✕sym>K</sym>d8−e7−+</:✕/xml> Δ♔d8−e7−+ 20.Rxa7+ Kd8 Black and wins.]

17.a4! Kb8
[Now after 17...Rdg8 White has 18.a5 Nxa5 19.Qa6+ Kd8 *(19...Kb8 20.Qxa5)* 20.Qxa7 Ke8 21.Nb5 Bxb5 22.Qa8+ Qd8 23.Bxb5+ Ke7 24.Qxd8+ Rxd8 and the two bishops gives him the better chances. 25.Bb2±]
18.a5 Mit dem Bauernopfer öffnet weiß noch eine Linie gegen der schwarze Monarch. **18...Nxa5 19.Qa6** [%draw arrow,a6,a5,green] Der Anziehende beherscht die Initiative.
19...Ka8? 2 This is a fatal error. Shirov, A: '2'
[Black should play 19...Bxd4 20.cxd4 Ka8 21.Bb2 Bc8 22.Qb5⩲ , when White has compensation for the material according to Shirov.]
20.e5! Opening the long diagonal for White's light−squared bishop and starting one of those classical all−destructive Shirov attacks. Mit dem Bauernopfer räumt weiß die Diagonale h1−a8 der von starke weißfarbige Läufer e2 besetz wird.
[20.Nc4 Bc8 21.Qxa7+ *(21.Qb5 Bd7 22.Qd5+ c6 23.Qxd6 Qxd6 24.Nxd6 Be5)* 21...Kxa7 22.Nxa5 Qxe4 23.Nac6+ Kb7 24.Nxd8+ *(24.Ba6+ Ka8)* 24...Rxd8 25.Bf3 Qxf3 26.Nxf3 Bg7]
20...Qxe5 In this kind of positions words can only tell so much. We need a few variations to understand what is really going on here...
[20...dxe5 21.Bf3+ Gegen die abgeschwächte schwarze König bekommt weiß starke angriff. c6 Blatny,P *(* if *21...Kb8* [%draw arrow, a6,a5] [%draw arrow,d4,b3] *22.Qxa5 exd4 23.Qxa7+ Kxa7 24.Ra1++−* and mates *)* 22.Ba3 *(22.Rxb6 exd4 23.Qxa5 dxc3 24.Rxc6! [Glenn Flear]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.Nc4!? A tricky move that requires a vigorous response. For other moves see the next game. **8...d6?!** Too routine.
[Here Black should react in the centre with the immediate 8...d5! ; e.g.
A) 9.Ncxe5 Nxe5 10.Nxe5 dxe4 11.d4 c5 (hitting back at White's centre) 12.Be3 Nd5 13.dxc5 Nxe3 14.fxe3 Qh4+ 15.g3 Qe7 16.Qd6 Bxc5 17.Qxe7 Bxe7 18.0−0 Bf6 is equal, M.Klinova−Qin Kanying, FIDE World Ch., New Delhi 2000. *(18...−−)*;
B) . During the game I was aware that 8...d5 was the right idea but wasn't sure what to do after 9.exd5 Nxd5 10.0−0 f6 11.Re1 . In fact the right follow−up is Kh8! (keeping away from any tactical ideas on the a2−g8 diagonal) 12.h3 b5! (challenging for the initiative) 13.Ne3 Nf4 14.d4 exd4 15.cxd4 Ne7 , as in A.Tzermiadianos−H. Gretarsson, European Cup, Rethymnon 2003, and Black was fine.;
C) 9.−−]
9.Bg5 Now Black suffers because the pin is extremely annoying, to the point of poisoning his whole set−up. −−− WARNING: Be careful about pins in front of kings. Now Black suffers because the pin is extremely annoying, to the point of poisoning his whole set−up. WARNING: Be careful about pins in front of kings.
9...h6 10.Bh4 Be6
[It's risky to advance pawns in front of one's king in such positions, but 10...g5 may be a lesser evil as White's knight (on c4) is then further away from my king! Note that if the sacrifice on g5 then isn't clear, White could also retreat his bishop and aim to

open lines with an early h2−h4. In such positions, this generally offers White an initiative if he hasn't already castled, as action on the wing puts Black's kingside defences under pressure.]

11.Ne3 g5? Asking for trouble, but I was short of ideas!

[Instead, 11...Kh7! , followed perhaps by 12...Rg8 (when ...g7−g5 would finally be on), would avoid any serious damage.]

12.Nxg5! hxg5 13.Bxg5 Retaining the deadly pin is worth a small material investment. **13...Kg7 14.Qf3 Nb8**

[14...Rh8 is well met by 15.Bxe6 fxe6 16.Ng4 .]

15.Nf5+

[After 15.Bxe6 , Black has Bxe3 16.Qxe3 fxe6 17.Bh6+ Kf7 with chances to wriggle out.]

15...Bxf5 16.Qxf5 Nbd7 17.h4! Preparing to bring up the next wave.

17...Rg8 18.Rh3 Qe7 19.Rf3 Kh8!? 20.Ke2! Keeping the bind rather than winning material.

[Objectively, White would be doing quite well after 20.Qxf6+ Nxf6 21.Bxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 , but with opposite−coloured bishops and some activity, Black would have drawing chances.]

20...Rg6 21.h5 Rxg5 22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 The presence of the h−pawn is now the most serious problem for Black. **26...Kh8 27.Rh1 c6**

[Or if 27...Nc5 28.Rh3 Nxb3 29.Qg5! and White soon mates.]

28.Rh3 Bb6

[If 28...d5 , the most incisive is 29.Rg3 , threatening Rg7.]

29.Rg3 Bd8 30.Rg7 d5 31.exd5 Nc5 32.dxc6 Nxb3 33.axb3 bxc6 34.g4! The rest is just Black trying to mix things in mutual time trouble, but White maintains his iron grip on events. **34...e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1**

[38...Qxb2 would be met by 39.Qf1! and White gets there first.]

39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3

1−0

Game 4, p.26: Berlin 'Evergreen' 1852

[Garry Kasparov]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 exd4 7.0−0 d3 8.Qb3 Qf6 9.e5 Qg6 10.Re1 Nge7 11.Ba3 b5 12.Qxb5 Rb8 13.Qa4 Bb6 14.Nbd2 Bb7 15.Ne4 Qf5 16.Bxd3 Qh5 17.Nf6+ gxf6 18.exf6 Rg8! 19.Rad1!

[Lasker's recommendation 19.Be4!? In Volume 1 I gave the variation Qh3 20.g3 Rxg3+ 21.hxg3 Qxg3+ 22.Kh1 Bxf2 23.Bxe7! *(23.Re2? Nd4!!)* 23...Qh3+! 24.Nh2 Bxe1 25.Rxe1 Qh4! 26.Qd1! Nxe7 27.Bxb7 Qxf6

A) Better is, according to Zaitsev, 28.Bd5!? Qxc3 *(28...Rb6? 29.Qh5!;* less clear is *28...Rb2 29.Qh5 c6 30.Ng4 Qf4)* 29.Qe2 *(29.Bxf7+? Kxf7 30.Qh5+ Kg8* with a draw. *)* 29...Qb4 *(29...Qc5?! 30.Qe5!)* 30.Ng4 *(30.a3?! Qd6!)* 30...Kd8 *(* Apparently *30...Kf8!* is more accurate. In short, a vicious circle arises, where it is hard to find a draw, but, in view of the limited material, even harder to demonstrate a win! *)* 31.Qe5! c6 *(31...Qxg4? 32.Qxe7+)* 32.a3! Qxg4 *(32...f6? 33.Nxf6 Qh4+ 34.Kg1* and wins *)* 33.Qxb8+ Nc8 34.Qe5! Qh4+ 35.Kg1 cxd5 36.Qe8+ Kc7 37.Rc1+ Kd6 38.Rxc8;

B) 28.Qg4 "with the initiative". It turns out that this position had been studied some time ago by Murey and Fridstein (in 64, 1975 No. 38) and after them also by Zaitsev, who thought that after 28...Kd8! White has nothing real. 28...Kd8!]

19...Qxf3?

[19...Rxg2+? 20.Kxg2 Ne5 21.Qxd7+! would also have lost]

[but 19...Rg4 (Lipke) was much stronger. The main line is

A) More consideration should be given to 20.Re4!? Rxe4 21.Qxe4 d6 22.Re1! Qg6! and Black's defences hold.;

B) Now after 20.c4?

B1) instead of 20...Rf4? 21.Bg6! (Hoppe, Heckner) winning *(* or *21.Qb5* (Neishtadt) winning *)*;

B2) but in my opinion, the immediate 20...Rxg2+! is even better: 21.Kxg2 Qg4+ 22.Kf1 Qxf3 23.c5 *(* Zaitsev's move *23.Rxe7+ Nxe7 24.Qxd7+ Kxd7 25.Bf5+ Ke8 26.Bd7+ Kf8* and wins *)* 23...Qh3+ 24.Kg1 *(24.Ke2 Ba5 25.Bb5 Nd4+!)* 24...Ne5

with a decisive attack.;
B3) 20...Bd4!? with the threat of ...Rxg2+ (Zaitsev) is not bad;
C) 20.Bc4 Qf5! 21.Rxd7
and here, fearing the variation *(*Then he tried to improve White's play with *21.Rd2* but he himself parried it with the thematic move *Bd4!)*
C1) Zaitsev suggested 21...Rxg2+!? 22.Kxg2 Qg4+ 23.Kf1 Qh3+ 24.Ke2 Qxd7 25.fxe7 or *(25.Bxe7 Nd4+!)* 25...Nd4+ 26.Nxd4 Qxa4 27.Bb5+ Qxb5+ 28.Nxb5 Ba6 29.c4 c6 30.Rg1 Kd7 31.Rd1+ Ke8 32.Nd6+ Kxe7
with a draw.;
C2) 21...Kxd7 22.Ne5+ Kc8 23.Nxg4 Nd5 24.Qd1 Nxf6 *(24...Nd8? 25.Bd3!)* 25.Bd3 Qxg4 26.Qxg4+ Nxg4 27.Bf5+ Kd8 28.Rd1+ Nd4 29.Bxg4 Bd5 30.cxd4 Bxa2 with equality)]
[In addition Zaitsev found that after 19 Rad1 good was 19...Bd4! 20.cxd4 *(20.Nxd4 Rxg2+ 21.Kxg2 Nxd4+)* 20...Qxf3 21.Be4 Rxg2+ 22.Kh1 Rxh2+ 23.Kxh2 Qxf2+ 24.Kh3 Qxf6 with a draw. It only remained to check once again Lasker's recommendation 19 Be4!?.]

20.Rxe7+! Nxe7!? Another proof that chess masterpieces require the generous cooperation of the loser! Nowadays a professional player and, of course, a computer, would have without hesitation resorted to
[20...Kd8 21.Rxd7+! Kc8! 22.Rd8+! Kxd8 23.Be2+! etc. is more prosaic]

21.Qxd7+!! Kxd7 22.Bf5+ Ke8
[22...Kc6 23.Bd7#]

23.Bd7+ Kf8 24.Bxe7#
1−0

■ **J.Hector**

Politiken Cup, Copenhagen 2002

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.0−0 Ba7 7.Bb3 d6 8.Re1 0−0 9.h3 Ne7 Again we see the typical ...Ne7−g6 manoeuvre by Black.

[One other idea worth mentioning is 9...Kh8!? , breaking the pin on the f−pawn and planning ...Ng8 (or ...Nh5) and ...f5. White can certainly continue with

A) but against such a non−developing move 10.d4!? seems justified. With action happening in the centre, Black is distracted from his plan, and a bonus for White is that ...Re8 isn't possible with the f−pawn hanging. Qe7 11.Be3 h6 *(11...Nxe4? 12.d5!* wins material *)* 12.Nbd2 Bd7 13.Nf1 *(13.Bc2!?* pre−empting ... Na5 looks sensible *)* 13...Na5 14.Bc2 b5 15.Ng3 *(15.a4!?)* 15...c5 16.dxe5 dxe5 17.Nh4 Nc4 18.Bc1 Nd6 19.Qf3 c4 20.a4 was solid for Black in V. Nevednichy−V.Tkachiev, Manila 1992, but White may have stronger options and even here he might still have a slight edge.;

B) 10.Nbd2 ,]

10.Nbd2 Ng6 11.Nf1 Now if Black chooses a move such as 11...Be6, 11...Re8 or 11...h6, White replies with 12 Ng3 and we transpose to positions seen in Korneev−Campora. With this move order, though, Black has a serious alternative: **11...Nh5!?** Clearly ruling out Ng3 for the moment! There are certainly some similarities here to the lines discussed in Frois−Korneev. Black's basic plan is once more ...Nhf4 and ...Qf6. He might even be able save a tempo by avoiding ...h6. Or maybe not...

12.d4 This is again White's most effective plan. The d4 advance creates central tension and blocks out the a7−bishop.

[12.Bg5 more or less forces Qe8 . It looks tempting but in reality White doesn't gain a great deal from this insertion of moves, as the bishop is vulnerable to ...h6 possibilities. Also, 13.Nxe5 Nxe5 14.d4 Nf6 15.Bxf6 gxf6 16.dxe5 fxe5 17.Ng3 Kh8 is okay for Black, A.Grosar−S.Polgar, Bled 1994.]

12...Nhf4

[Of course Black has to avoid 12...Qf6?? 13.Bg5! .]

[12...Qe8 has been played a few times, and even by Shirov, but it does look a bit strange to move the queen here without being forced to by Bg5. True, White is discouraged from

playing Ng3, but 13.Ne3! planning Nd5 or Nf5 does the job just as well. Nhf4 *(13...exd4 14.Nd5!)* 14.Nf5 exd4 15.N3xd4 *(15.cxd4* also looks promising *)* 15...Qd8 16.Qf3 Ne6 was Z.Efimenko−A.Shirov, German League 2006, and here White looks pretty active after 17.Be3 .]

13.Ng3 Qf6? This is certainly Black's most natural follow−up to his previous play. What's more, it's worth noting that, according to databases, 13...Qf6 has been Black's most popular choice here. Everything seems to be looking rosy: the e5−point is securely defended, the knights seem well placed and the queen enjoys being on the f6−square. But...

[In view of the following trap, it's clear now that ...Qf6 requires some preparation. 13...h6! is a logical move, preventing the Bg5 idea.

A) It's worth comparing this to the 12...Ne7 variation in Frois−Korneev, and indeed it leads to a direct transposition after 14.Be3! Qf6 15.Bc2 .;

B) This might be White's best option, since 14.Bxf4 Nxf4! 15.dxe5 dxe5 16.Qxd8 *(16.Nxe5? Qg5!)* 16...Rxd8 17.Nxe5 Rd2 18.Bxf7+ Kf8 (Marin) is unclear,;

C) while the immediate 14.Nf5 can be met by exd4 intending 15.cxd4 d5 .;

D) 14.−−]

[Another possibility is 13...Bd7?! , but after 14.Be3 Black is no nearer to playing

A) in the game V.Ivannikov−E. Gafner, St Petersburg 2000, Black decided he couldn't do without 14...h6 anyway, but this admission really questions the value of 13... Bd7; after 15.Qd2 Black still has problems to solve: after the game's Qc8!? *(* note also that *15...Qf6? 16.dxe5!* highlights another problem with Black's 13th move *)*
White could have even gained an advantage with the simple 16.Bxf4 exf4 17.Nh5 Bxh3 18.Nxf4 Nxf4 19.Qxf4;

B) 14...Qf6 as it still runs into 15.Nh5! .]

[Finally, one of the earliest games reaching this position featured a very young Vladimir Kramnik displaying his understanding of the intricacies in this line. V.Kramnik−D.Campora, Moscow 1989, went 13...Qe7?! 14.Be3 Rd8 15.Bc2! h6 16.Nf5 Qf6 with a clear plus for White - Black has basically wasted a tempo with his queen. Here 17.g3 forced the knight to retreat, since Nxh3+? 18.Kg2 Ng5 19.Nxg5 hxg5 20.Qh5 would have been virtually winning for White. Incidentally, the earliest game I could find reaching 13 Ng3 featured a similarly young Gata Kamsky. His opponent played 13...Qf6?, but Kamsky didn't punish him with 14 Nh5!.]

14.Nh5! A shocking move for Black to face. **14...Qe7**

[Since 14...Nxh5 allows 15.Bg5! winning the queen, Black is forced to retreat and must allow a damaging exchange of pieces on f4. 13...Qf6 is simply a blunder, and evidently White's two−move trap is sophisticated enough to have snared a number of highly−rated victims!]

15.Bxf4! Black's e5−pawn will end up on

f4, and this will leave him with no pressure on the d4−pawn and a miserable bishop on a7. It's payback time for what happened in Svetushkin−Haslinger! **15...Nxf4**

[Black even loses the f−pawn after 15...exf4 16.Qd2 .]

16.Nxf4 exf4 17.Qd2 Qf6

[Or 17...g5 18.e5 h6 19.exd6 Qxd6 20.h4 Bg4 21.Qd3 Bxf3 22.Qxf3 , V.Belikov−M.Novik, Sochi 1990. In all of these lines White is enjoying a power play with one black piece 'sitting on the bench'.]

18.e5 dxe5 19.Rxe5

[19.Nxe5 is also pretty good, but this move looks even stronger.]

19...c6 A desperate defensive try based on ...Bb8 ideas. It's hardly a surprise that there's a refutation, and there's probably more than one.

[19...Bd7 20.Rae1 c5 , as played in P.Tishin−J.Geller, Samara 2002, also tries to reawaken the dark−squared bishop before it's too late. But 21.R1e4! *(*instead of the game's *21.d5? Rad8 22.Bc2 Bb8)* 21...Bb8 22.Rxf4 , if not quite as destructive as the main game, should still give White a near decisive advantage.]

20.Rae1 h6 21.R1e4! Bb8

[If 21...g5 22.h4 and Black's position collapses: for example, Bf5 23.hxg5 hxg5 24.Nxg5! .]

22.Rxf4 White is happy to self−skewer (is that the right term?). Even if Black were able to win the exchange, White's pressure on f7 would more than compensate. As it is, White gets to play a decisive combination on that square.

22...Qg6 23.Rxf7! Rxf7 24.Re7 Qb1+ 25.Ne1 Bf4 26.Qe2!

[Not falling for 26.Qxf4? , when the amazing defensive resource of Be6! , intending 27.Bxe6?? Qxe1+ 28.Kh2 Qxe6! , allows Black to fight on.]

26...Bf5 27.Rxf7 Kh8 28.g4 Bd3 29.Qxd3 Qxe1+ 30.Kg2

[If Black saves the bishop by playing 30.Kg2 Bg5 , 31.Bc2 mates quickly. Don't be fooled by these apparently quiet lines. There are many traps lurking.]

1−0

□ **Berlin,Schachgesellschaft**
■ **Breslau (Wroclaw),S**

Berlin−Breslau match (1) 1829

[Lange #1 p3; Harding]

Max Lange's 1872 edition of Bledow's collection of CC games (actually signed intro Oct 1871) began with the first game of the match between the Chess Club of Berlin (leader: Julius Mendheim) and the Chess Club of Breslau. This game started on Jan 15, 1829 and ended Oct 20, 1831; the second game, with reversed colours, was played 1831−33 and Berlin won both games. Breslau is now the Polish city of Wroclaw. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6** Strongest says Lange, as given by Damiano (1512) to hinder White forming large pawn centre **5.d4 exd4 6.e5** Lange says that Lewis is right to prefer 6 cxd4. After 6 e5 best is 6...d5 he says. Modern theory concurs. **6...Ne4?!**

[6...Ng4? 7.Bxf7+ Kxf7 8.Ng5+]

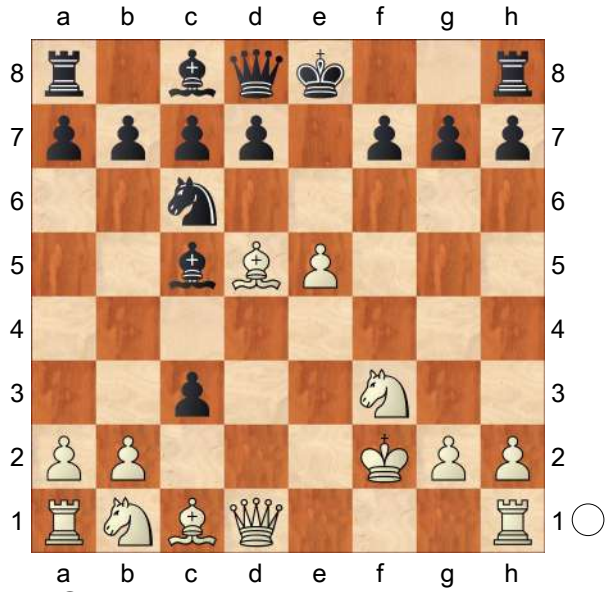
7.Bd5! Black now has difficulties and is practically forced to sacrifice the N for three pawns.

[RR7.cxd4 Bb4+ 8.Bd2 Bxd2+ 9.Nbxd2 d5 10.Bd3 f5 11.0−0 (intercity corr. match Insterburg−Koenigsberg, circa 1862−63) 0−0= Given in Estrin and other modern sources, e.g. 12.Nb3 b6 13.Ne1 Bb7 14.f3 Ng5 15.Rc1 Rc8 (Handbuch)]
[7.Qe2 d5 8.exd6 0−0 9.dxc7 Qd7 10.0−0 Re8 gave Black a strong attack in Moor−Hartlaub, Wiesbaden 1913, according to Estrin.]

7...Nxf2

[7...f5 is bad as, due to the weakness on the a2−g8 diagonal, Black won't be able to castle for the forseeable future after 8.cxd4 Bb4+ 9.Nbd2 (given by various sources, following Handbuch)]

8.Kxf2 dxc3+ Diagram



9.Ke1!? This is playable, but the K gets in the way of his own development on e1. Most books agree with Lange that "far better than this retreat, recommended by Anastasia and Lolli, would be

[9.Kg3! a move which apparently was first mentioned by Ghulam Kassim from Madras in his chess book of 1829 and later recommended by Mendheim in his 'Aufgaben fur Schachspieler' (1832). Bledow remarked explicitly in his old edition (1843) that 9 Kg3 hinders the development of White's pieces less than 9 Ke1 does.

A) RR9...Ne7 Potsdam−Berlin, intercity corr 1850−51; now instead of 10 h3, Estrin recommended 10.Nxc3 Nf5+ 11.Kf4! and "the white K advances bravely to the front" − this also seems to be a Handbuch recommendation. *(11.Kh3 d6 12.g4* suggested by the Italian CC master G.Porreca, might be cooller. *)*;

B) 9...cxb2 10.Bxb2

B1) RR10...0−0 11.Qc2 d6 12.Be4 h6 13.Nbd2 Bb6 14.Bxc6 bxc6 15.Nc4 Bc5 16.Qd2 Be6 17.Ne3 d5 18.Bd4 Be7 19.h4 g6 *(19...c5!)* 20.Ng4 Bxg4 21.Kxg4 f5+ 22.exf6 Bxf6 23.Qxh6 Qd7+ 24.Kg3 Qd6+ 25.Kh3 Bxd4 26.Nxd4 Rf4 27.Nf3 Rf7 *(27...Raf8!)* 28.Qe3 Re7 29.Qg5 Kg7 30.Rae1 Re4 31.Rxe4 dxe4 32.Qe5+ Qxe5 33.Nxe5 c5 34.Rc1 e3 35.Rxc5 e2 36.Rxc7+ Kf6 37.Nf3 1−0 Koralek−F.Audap, France corr 1887−9;

B2) RR10...d6 11.Bxc6+ bxc6 12.Bd4 Bb6 13.Kf2 c5 14.Be3 Rb8 and Black has some compensation for the piece according to Junior 7.;

B3) 10...Ne7

B3a) Not, however 11.Ng5? Nxd5 12.Nxf7 0−0! and Black has a winning attack: *(12...Kxf7 13.Qxd5+*

14 and Qxc5 *)* 13.Nxd8 *(13.Qxd5? Rxf7 14.Qxc5? Qg5+ 15.Kh3 d6+)* 13...Bf2+ 14.Kh3 *(14.Kg4 Rf4+ 15.Kg5 h6+ 16.Kh5 Rh4+ 17.Kg6 Ne7#)* 14...d6+ 15.e6 Nf4+ 16.Kg4 Nxe6−+ There are several versions of how this famous miniature ended. According to Estrin, this one is correct:

B3a1) 17.g3 Nxd8+! *(17...Nd4+ 18.Ne6 Bxe6+ 19.Kh4 Nf5+ 20.Kh3 Ne3+ 21.Kh4 Ng2+ 22.Kh5 g6+ 23.Kg5 Be3#* is given in the ChessBase Megabase? *)* 18.Kh4 Rf4+ 19.Kg5 Ne6+ 20.Kh5 g6+ 21.Kh6 Rh4+ 22.gxh4 Be3# was given (says Estrin) in the "Schachzeitung" (1849) and "La Régence" (1851). It would seem some gilding of the lily occurred in creating this version.;

B3a2) 17.Nxe6 Bxe6+ 18.Kg5 Rf5+ 19.Kg4 h5+ 20.Kh3 Rf3# following K. Jaenisch in the chess column of the paper "St. Petersburg's Wedomosti" of 29 April 1856, and also in the magazine "Shakhmatny Listok" 9/1859.;

B3b) 11.h3!? 0−0 12.Rf1 d6 13.Be4 Bf5 14.Qd3 Bxe4 15.Qxe4 Ng6 16.e6 fxe6 17.Qxe6+± was another Hoffman−Petroff 1844 match continuation (in Palkoevi);

B3c) Here Estrin (and later Heyken & Fette) remarks that after 11.Qc2 (Bilguer) or also after 11 Be4 or 11 h3 (Ghulam Kassim) Black has insufficient compensation for the sacrificed piece. (Of course all this was in the future when Berlin and Breslau were starting their game.) 11...d6 *(11...Nxd5 12.Qxc5 Ne7 13.Ba3 Nc6 14.Re1±* Handbuch *)* 12.Be4

B3c1) 12...d5 13.Bd3 *(13.Rd1!?)* 13...Bb6 14.Nc3 *(14.h3)* 14...f5 15.Rhe1?! 0−0 *(15...f4+!?)* 16.h3 f4+ 17.Kh2 Bf5 18.Rad1± but White eventually lost after some rash play in the intercity correspondence match Memel−Hannover, 1865−66.;

B3c2) 12...Ng6 13.Nbd2 c6 14.Rad1 "and White has the better game" − Gufeld & Stetsko, 'The Giuoco Piano' (1996) following 'Bilguers Handbuch'.]

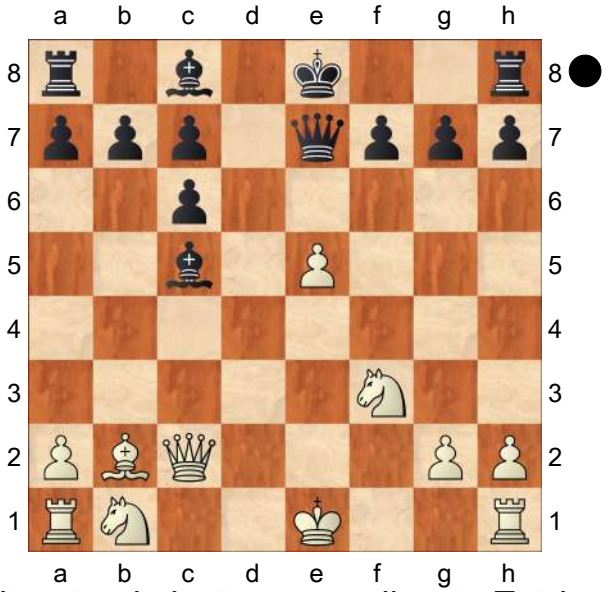
[9.Kf1 intending g3 and Kg2 comes into consideration (Handbuch). Junior7 now comes up with some counterplay for Black, viz. cxb2 10.Bxb2 Qe7 11.Nc3 *(RR11.g3!?)* 11...Nxe5 12.Nxe5 Qxe5 13.Na4 Qf4+ 14.Qf3 Qxf3+ 15.gxf3 Bf8 16.Re1+ Kd8 17.Bxf7 Bb4 18.Nc3 Rf8∞]

9...cxb2

[9...Qe7!? Δ10.Nxc3 Nxe5 11.Nxe5 *(11.Kd2 c6∞* 0.18/16 Junior 7 might be examined...*; 11.Qe2 Nxf3+*

12.Bxf3) 11...Qxe5+ 12.Qe2 *(12.Kd2 0−0 13.Kc2)*]

10.Bxb2 Qe7 11.Bxc6 dxc6 12.Qc2 Diagram



White stands better according to Estrin, Heyken & Fette etc. **12...Be6 13.Nbd2 0−0−0 14.Ke2 g6 15.Ne4?!**

[15.Rhd1 ΔBf5 16.Ne4 Bb6 17.Qa4 Tait]

15...Bb6 16.Qa4 Bd5 17.Rhc1 f5! Bledow commented that this was a good move, but incorrectly followed up.

18.Ned2 Bxf3+?!

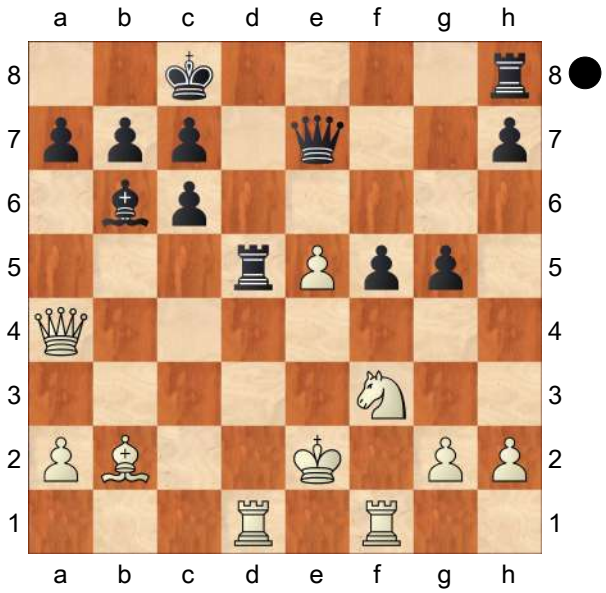
[⌓18...g5 However RR19.Nc4 Bxc4+ 20.Rxc4 g4∓ This is no better for Black than what happened in the game, but possibly White missed a chance to improve at move 20.]

19.Nxf3 g5 Here White might have a chance of getting back in the game if he organised the defence of his K and development of his rooks efficiently, e.g. 20 Rc2 Rhe8 21 Re1 or 20 Ne1. Even 20 h3 Rhg8 21 g4 and 20 Qb3 g4 21 Nd2 come into consideration. **20.Rf1?!** The point of this seems to be that if Black plays the obvious 20...g4 then after 21 Ne1 the f5−pawn is attacked. Then 21..Qe6 is still not bad for Black, but Breslau decided to activate their rooks, with a view to doubling them on the d−file. **20...Rd5!? 21.Rad1** Diagram

[21.Qc2 looks better at first, as it threatens to take the f−pawn with check, so gaining a tempo for defence, but Black can press on with g4 ignoring the threat, since after 22.Qxf5+ Kb8 23.Nd2 Qb4 (TDH) Black will soon win material, e. g.

A) 24.Nb3 Rhd8 25.Rfd1 *(25.Rad1? Qc4+)* 25...Rf8 26.Rxd5 cxd5 27.Qd3 Rf2+ 28.Kd1 Rxb2;

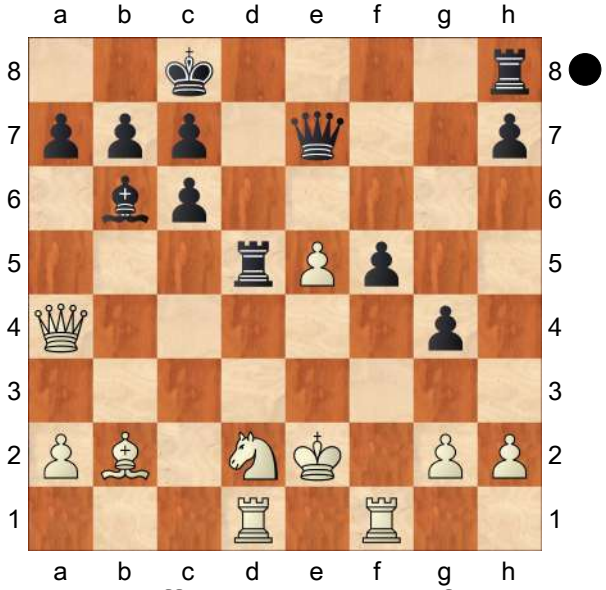
B) 24.Qc2 Rxd2+! 25.Qxd2 Qe4+ 26.Kd1 Be3 27.Qd7 Other Q moves allow ...Rd8+ Qxg2 and Black gains a decisive material advantage, e.g. 28.Qd3 Qxb2 29.Rb1 Qxe5 30.Re1 Re8 31.Rb3 Qa1+ 32.Rb1 Qf6! Δ33.Rxe3 Rd8]



It is hard to suggest anything else.. **21...g4!** was played in the Berlin−Breslau match.

[21...h5?! see Mendheim−Angerstein spin−off game from this match.]

22.Nd2 Diagram

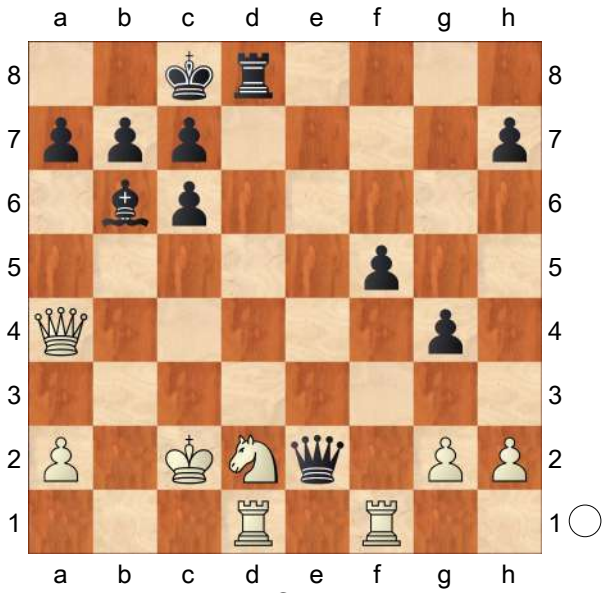


22...Ra5 A different account of this game is given in Staunton's Chess−Player's Handbook (1872 edition page 124, citing an edition of the Handbuch). Staunton says 22...Qe6 was the move played but that is obviously not the case as all sources give Ra5 as played. See Staunton's review of that book in CPC 1844 (p284) where he writes that game 386 in Walker's collection... "is a well−contested giuoco−piano [sic] between Berlin and Breslau, remarkable for the twenty−second move, where the latter party missed a manifest opportunity of winning, and finally lost the game."

[22...Rxe5+ "must have won without difficulty" claimed Staunton, but what precise continuation had he in mind? Presumably he intended the continuation 23.Bxe5 Qxe5+ 24.Kd3 Rd8+ 25.Kc2 Qe2 Diagram

(Diagram)

Seems crucial and what Staunton



must have meant? TH: Fritz8 says −0.94/12 but look deeper. Black has four pawns and a strong pin for the rook. White faces an uncomfortable defence but matters are not entirely clear? Junior 7:1) 26.Rfe1 *(*Junior 7:2) *26.Kb1 Rxd2 27.Rxd2 Qxf1+ 28.Qd1 Qb5+ 29.Qb3 Be3 30.Rd3 f4 31.g3 Qxb3+ 32.axb3 a6 33.gxf4 Bxf4 34.Kc2 Bxh2 35.Rd1* −1.31/19*;* Junior 7:3) *26.Qb3 Be3 27.Rfe1 Rxd2+ 28.Kb1 Rxd1+ 29.Rxd1 b5 30.h3 Bg5 31.Qc2 Qe4 32.Rf1 Qb4+ 33.Qb3 Qe7 34.Qc2 gxh3 35.gxh3* −1.33/19*; 26.Qb4* relatively best according to Hiarcs but.. . *Be3* regains the sacrificed material e.g. *27.Rfe1 Qd3+ 28.Kc1 Bh6* zugzwang position discovered by Hiarcs8!? What can White do?*; 26.−− Be3)* 26...Rxd2+ 27.Rxd2 Qxe1 28.Qb3 Qe8 Here Black has four pawns for the exchange and should eventually win. 29.Qd3 Qe4 30.Re2 Qxd3+ 31.Kxd3 Kd8 32.h3 g3 33.Re5 f4 34.Re1 −0.90/19 Fritz blundercheck]

[22...Qe6 This move also mentioned

by Staunton but only = says Hiarcs
23.Nc4 *(23.Qf4 Rhd8 24.Nb3 a6 25.Bc3 Kb8 26.g3 c5 27.Nc1 c4 28.Rxd5 Qxd5 29.Qxf5∓ −0.91/12)*
23...Kb8 24.Qc2 Rf8 25.Nxb6 axb6 26.Qb3 f4 27.Rf2 f3+ 28.gxf3 gxf3+ 29.Rxf3= 0.00/13]
[22...Rb5 also wins says Hiarcs
23.Ba1 Rxe5+ 24.Bxe5 Qxe5+ 25.Kd3 Rd8+ 26.Kc2 Qe2 27.Rfe1 Rxd2+ 28.Rxd2 Qxe1 29.Qb3−+ −1.50/13]

23.Qc4 Rb5
[23...Rf8 might have been better at once. White is starting to get on top.]

24.Ba1 Rf8 25.Qf4 Rb4 26.Nc4 Kb8 27.Qc1 Bc5
[27...Qe6 28.Rf4 Bc5 29.a3± Hiarcs8]

28.a3
[⩲28.Qc2 f4 29.a3 Hiarcs8]

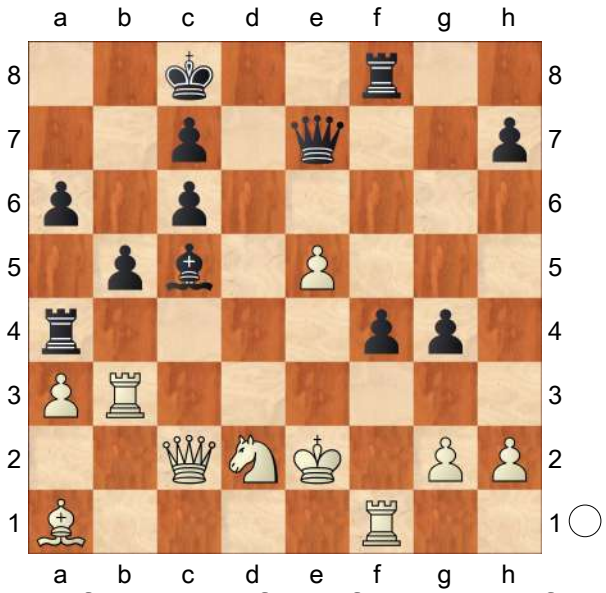
28...Ra4 29.Qc2 b5 30.Rb1 Kc8 31.Nd2 f4 32.Rb3
[32.Rbc1 suggested in some old sources is no good because of Bd4 33.Qxc6 Qxe5+ 34.Kd1 Re8]

32...a6 Diagram
[32...Bd4 doesn't work with the R on the b−file: 33.Qxc6 Qxe5+ 34.Kd1 Re8 35.Rxb5 so Black defends the b−pawn.]

(Diagram)

33.Re1
[33.Rd1 again allows Bd4 34.Bxd4 *(34.Kf1 Qxe5)* 34...Rxd4 35.Qxc6 Qxe5+]

33...Bd4? Unremarked by the 19th century commentators, Black missed a great chance for counterplay here:



[33...f3+! 34.gxf3 gxf3+⩱ 35.Rxf3 *(35.Nxf3 Rc4)* 35...Rxf3 36.Nxf3 Rxa3 *(36...Qf8)*]

34.Qxc6 Consistent. White is on top again but it takes a lot of work to win.
[34.Bxd4 Rxd4 35.Kf1 also possible]

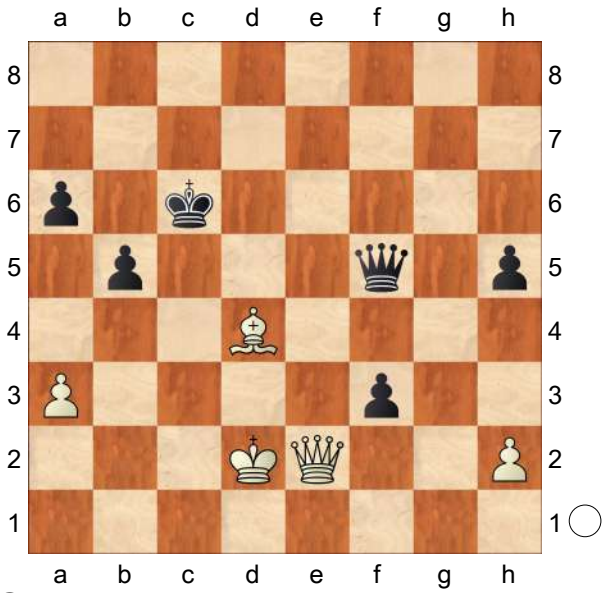
34...Qxe5+ 35.Kd1 Qd6 36.Re8+ Rxe8 37.Qxe8+ Kb7 38.Rd3 Qd5 39.Qe2 h5 40.Bb2 c5 41.Nb3 Qf5 42.Nxd4 cxd4 43.Ke1
[43.Bxd4 Rxd4! 44.Rxd4 Qb1+ 45.Kd2 Qb2+ 46.Kd3 Qb3+ 47.Ke4 Qe6+ perpetual check]

43...Rc4 44.Rxd4 Rxd4
[44...f3 45.gxf3 gxf3 46.Qe7+ *(46.Qd3? Qxd3 47.Rxd3 Re4+ 48.Kf1 Re2* and ...Rxh2 *)* 46...Rc7 47.Qe4+ Qxe4+ 48.Rxe4 Rc2 49.Be5 keeps the h−pawn and wins]

45.Bxd4 Kc6 46.Kd2 f3
[46...Kd5 is the lesser evil says Fritz, but after 47.Qd3 Qe4 48.Bf6+ Qxd3+ 49.Kxd3 surely White must win?]

47.gxf3 gxf3 Diagram

(Diagram)



48.Qe5
[48.Qe8+!? is possible but win is probably easier with queens off]
48...Qg4
[48...Qxe5 49.Bxe5 Kd5 50.Bf6 Ke4 might present some technical difficulties; White must keep his h− pawn and eliminate the rest of the pawns in order to win but this should not be too hard.]
49.Bf2 Kd7 50.Ke3 Kc8 51.Qe8+ Kc7 52.Qf7+ Kc8 53.Bg3 Qg5+ 54.Kxf3 Qg4+ 55.Ke3 Qg5+ 56.Kd4 Qd8+ 57.Ke4 h4 58.Be5 a5 59.h3

□ **Rabbitt,Michael**
■ **Birkbeck,Billy F**
BCCS−BCCA corr0102 (1.1) 2001
[ChessBase II]

Grateful thanks to Brian Birkbeck for the game scores. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3**
[On 4.Nc3 Brian may well have played Na5 as he did in a game against me. The move order in the game is really designed to reach this position, without allowing the Petroff, for example.]
4...Bc5 5.c3 d6 6.b4 This move has been a bone of contention for well over a hundred years. Some authorities thinking it's good, some thinking it's bad. You can make up your own mind!
6...Bb6 7.a4
[7.Nbd2 intending to transfer this Knight to c4 quickly, is best met by Ne7 8.Bb3 c6 e.g. 9.0−0 0−0 10.a4 Ng6 11.Nc4 Bc7 12.Re1 Re8 13.Qc2 Nh5 14.Ne3 Nhf4 15.d4 Qf6 16.dxe5 Nxe5 17.Nxe5 Qxe5 18.Nf1 a5 19.Be3 axb4 20.cxb4 Be6

21.Ng3 g6 22.Rad1 Bxb3 23.Qxb3 h5 24.Bc1 h4 25.Nf1 h3 26.gxh3 Bb6 27.Qf3 Ne6 28.a5 Ba7 29.Qg4 Rad8 30.Kg2 Qc3 31.Bd2 Qb2 32.Rb1 Qc2 33.Rbc1 Qd3 34.Rc3 Qd4 35.Rf3 Qe5 36.Rd3 Qb5 37.Qg3 d5 38.Bc3 Qxd3 0−1 Bastian,H−Berezovsky,I/ch−GER 2001.]

7...a5 8.b5 Ne7 9.h3 0−0 10.0−0 Ng6 11.Nbd2 It would be more usual to play Re1, either here or on the next move, preparing for Black's plan of ....c6 and .... d5. White comes up with a different approach to the question. He is going to put the other Rook on b1 quickly, so that in that event, Black has to keep an eye on the Bishop on b6. **11...c6 12.Rb1 d5 13.Ba2 Re8 14.Re1 Nf4**

[Perhaps the mysterious 14...Rb8!? is an option here!?]

15.Nf1 dxe4 16.Ng5 Now things get very complicated. **16...Re7**

[16...Nxd3 is very difficult to analyse. I took some help from fritz on this one!

A) 17.Bxf7+ Kh8 18.Bxe8?! *(18.Be3!?* looks like the move. *Rf8 19.bxc6 Nxe1 20.Qxd8 Bxd8 21.cxb7 Bxb7 22.Rxb7)* 18...Bxf2+ 19.Kh2 Qxe8 20.Re2 Ng4+! 21.Kh1 Bc5 22.Nxe4 Ngf2+ 23.Nxf2 Nxf2+ 24.Rxf2 Bxf2 with an extra pawn for Black.;

B) 17.Nxf7 Bxf2+ 18.Kh1 Qe7 19.Nxe5+ *(19.Re2 Nd5∓)* 19...Be6 20.Bxe6+ Qxe6 21.Nxd3 Bxe1 22.Nxe1 Nd5 23.Qd4∞]

17.Bxf4! exf4 18.dxe4 Qxd1 19.Rexd1! The right Rook. As before, White wants the other one staring at the b6 Bishop. **19...cxb5**

[I don't like this so much, but Black has some problems, as he can't get the c8 Bishop into play at the moment. 19...c5 trying to keep the b−file closed was worthy of serious consideration, despite making the b6 Bishop look bad.

A) 20.e5!? Rxe5 *(20...Ne8!?)* 21.Nxf7 Re2 22.Rd2 Rxd2 23.Nxd2 Kf8 24.Re1 with a slight edge for White, despite the Bishops;

B) 20.Nd2!?]

[19...Bc7? at once, fails to 20.b6! Be5 21.Rd8++−]

20.Rxb5 Bc7 21.e5! Nd7

[21...Ne8 22.Rd4! *(22.Nxf7 Rxf7 23.Rd4 g5!)* 22...Bxe5 23.Bxf7+ Rxf7 *(23...Kf8 24.Be6!*+− with the idea *Bxd4 25.Nxh7#)*]

22.Nxf7 Kf8 23.e6 Nf6

[23...Nb6!? hitting the a−pawn, as well as the e6 pawn looks a good scrambling try, as the attempt to storm through with 24.Ng5 g6 25.Rd4 h6 26.Rxb6? *(26.Ne4 Bxe6 27.Bxe6 Rxe6 28.Nc5 Rc6* and Black seems to be surviving. *)* 26...Bxb6 27.Rxf4+ Kg7 28.Rf7+ Rxf7 29.Nxf7 gives White nothing.]

24.Nh2

[24.Re1!? keeping the pawn!? b6 25.Ne5±]

24...Ne4 25.Ng5! Nxg5

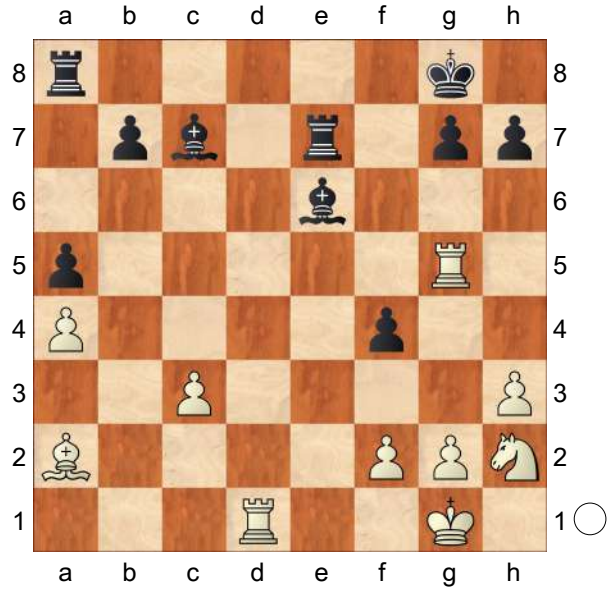
[25...Nxc3 26.Rf5+ Kg8 *(26...Ke8 27.Nxh7*+− *)* 27.Rf7!+−]

26.Rf5+!

[Is there a reason why 26.Rxg5 at once is less good!? Well, White probably wants the King on the same diagonal as his Bishop, that's obvious enough. Examine the line Bxe6 27.Bxe6 Rxe6 28.Rd7 Be5!

and Black is still fighting hard]

26...Kg8 27.Rxg5 Bxe6



28.Rd7 There we go! Very pretty!.

28...Rxd7 29.Bxe6+ Rf7 30.Rc5

[another subtlety, since 30.Rf5 Raf8 31.Nf3 h6 doesn't seem to give White anything.]

30...Bd8

[On 30...Bb6 31.Rf5 Raf8 32.Nf3 h6 now, and White has 33.Ne5 of course.]

[30...Bd6 31.Rf5 Raf8 32.Nf3 h6 33.Rd5! Bb8 34.Rd7 g6 35.Rxb7 looks like a clear win to me, so now Black is forced to shut his redundant Rook out of things for a moment.]

31.Rf5 Bf6 32.Ng4 Kf8 33.Bxf7 Kxf7 34.Nxf6 gxf6 35.Rxf4 Well, all that work, and all White has come away with is a rather straggley pawn. Is it enough to win? I honestly don't know! **35...Rd8**

[35...Rc8 36.c4 *(36.Rf3 Rc4)* 36...b6 37.Kf1 Rc7 just waiting, is an alternative approach, but Black wants to get active as quickly as he can, and that's normally the best idea in the endgame.]

36.Rc4 Rd1+ 37.Kh2 Ra1 38.Kg3 Ke6 39.Kf3

[39.Kf4 Ra2]

39...Kd5 40.Rd4+ Ke6 41.Ke2 Ra2+ 42.Ke3 Rc2 43.Rc4 Ke5 44.Rc7 Kd6 45.Rc8

[45.Rxb7 Rxc3+ 46.Kd4 Ra3 *(46...Rc2!?)* 47.Rb6+ *(47.Rxh7 Rxa4+ 48.Ke3 Ra3+ 49.Ke4 Ra2)* 47...Ke7 is probably holding. Brian tell me that he was considering claiming a draw here, but felt that tha adjudication would probably go against him. Personally, I think that Black's drawing chances are excellent, but he's a rather better judge than I am!!]

■ **Baxter,Daniel**
GBR corr 1890
[Fraser]

Myers: This is Game #64 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5 6.d4 b5!?N 7.Bd5** [7.Bxb5 Nxd4 *(7...Nge7 8.d5 Rb8 9.Qa4 a6 10.Bd3 Rxb1 11.Rxb1 Bxc3+ 12.Bd2 Bxd2+ 13.Kxd2 Nd4 14.Nxd4 exd4 15.Qxd4 0−0 16.f4 d6 17.Rhe1 c5 18.dxc6 Nxc6 19.Qa4 Bd7 20.g3 Ne5 21.Qxa6 Nf3+ 22.Ke2 Bg4 23.Rh1 d5 24.h3 Nd4+ 25.Kf2 Bf3 26.Rhe1 dxe4 27.Bxe4 Bxe4 28.Rxe4 Nf5 29.Qb5 g6 30.Rbe1 Nd6 31.Qd3 Nxe4+ 32.Qxe4 Qa5 33.Re2 Rd8 34.g4 Qb6+ 35.Qe3 Qf6 36.Kg2 Ra8 37.Rf2 Qc6+ 38.Kh2 Qd6 39.Rd2 Qf6 40.Qe4 Ra5 41.f5 gxf5 42.gxf5 Qe5+ 43.Qxe5 Rxe5 44.f6 h6 45.Kg3 Kh7 46.Rd4 Kg6 47.Rf4 Re3+ 48.Rf3 Re2 49.a4 Ra2 50.Rf4 Ra3+ 51.Kg4 Rc3 52.Rf3 Rc4+ 53.Rf4 Rc3* ½−½ Della Morte,G−Miserendino,A/Vicente Lopez ARG 2003/ *)* 8.Nxe5 *(8.Nxd4 exd4 9.Qxd4 Qf6 10.e5 Qb6 11.Qd3 Ne7 12.0−0 0−0 13.Ba3 Re8 14.Kh1 Ng6 15.f4 Rb8 16.Bc4 Qc6 17.Bd5 Ba6 18.c4 Qa4 19.Bxf7+ Kxf7 20.Qd5+ Re6 21.f5 Bxc4 22.fxe6+ Kg8 23.Qe4 dxe6 24.Rc1 Bb5 25.Qxa4 Bxa4 26.Nc3 Bc6 27.Ne2 Bd5 28.Rab1 Rxb1 29.Rxb1 Nxe5 30.Rb8+ Kf7 31.Rf8+ Kg6 32.Nf4+ Kg5 33.Bc1 Kg4 34.h3+ Kg3 35.Nxd5 exd5 36.Bf4+* 1−0 Muzychuk,A−Zlatanova,E/Varna BUL 2002/ *)* 8...Nxb5 9.Qd5 Qf6 10.Qxa8? □ **Steinitz,W..**

■ **Bardeleben,C..**

33: Hastings (10) 1895

[Garry Kasparov]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3!?

Greco's ancient gambit variation.

[The 'main' continuation 7.Bd2 Bxd2+ 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 is harmless in view of Na5! *(* this is simpler than *10...Nce7 11.0−0 0−0 12.Rfe1 c6)* 11.Qa4+ Nc6 with equal chances.]

7...d5?!

[Bardeleben avoids repeating the game Steinitz−Schlechter, played at the start of the tournament, where after 7...Nxe4! 8.0−0 Bxc3

A) 9.bxc3 d5 10.Ba3?! Be6? *(* the correct way for him was found later, in the Steinitz−Lasker return match (Moscow 3rd matchgame 1896): *10...dxc4! 11.Re1 Be6 12.Rxe4 Qd5 13.Qe2 0−0−0 14.Ne5 Rhe8* , remaining a sound pawn to the good *)* 11.Bb5 Nd6 12.Bxc6+ bxc6 13.Ne5 0−0 14.Nxc6 Qf6 Black maintained the balance with difficulty.;

B) . I should add that in 1899 the clever Møller Attack 9.d5!? (instead of 9 bxc3) made its appearance, while exactly one

hundred years later two noteworthy games on this theme were played in Fritz 6−Anand (Frankfurt rapidplay 1999):

B1) 9...Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 *(*instead of *12...0−0? 13.Bxf6 gxf6 14.Qd2)* 13.Nxg5 h6 14.Qe2 *(*Black stands better after *14.Nf3 0−0;* or *14.Bb5*+ *Bd7 15.Qe2 Bxb5! 16.Qxb5*+ *Qd7 17.Qe2 Kf8* Bárczay−Portisch, Hungary 1969 *)* 14...hxg5 15.Re1 Be6 16.dxe6 f6 with sharp play;

B2) 9...Ne5! 10.bxc3 Nxc4 11.Qd4 0−0! *(*but not *11...Ncd6? 12.Qxg7 Qf6 13.Qxf6 Nxf6 14.Re1+;* also not good is *11...f5* , Schlechter−Lasker, London 1899 *)* 12.Qxe4 Nd6 *(12...b5!?* is sharper, Djindjihashvili−Karpov, Mazatlan rapidplay 1988 *)* 13.Qd3 b6! (this had already been played many times) 14.Ba3 Qf6 15.Qd4 Qxd4 16.Nxd4 Bb7 17.Bxd6 cxd6 18.Nf5 g6 19.Nxd6 Bxd5 , and Black converted his extra pawn. This is the modern way of combating gambits: the timely return of part of the 'booty', - and it is all over... This opening information explains why the classical 'Italian' with 4 c3 and 5 d4 occurs so rarely nowadays.;

B3) 9...−−;

C) 9.−−]

8.exd5 Nxd5 9.0−0 Be6

[White stands better after 9...Bxc3 10.bxc3 0−0 11.Qc2 h6 12.Re1 Be6?! 13.Bxh6! (Steinitz−Schiffers, Rostov−on−Don match 1896)]

[or 9...Nb6 10.Re1+ Be7 11.Bb3 0−0 12.d5 Na5 13.Bc2 Nac4 14.Qd3 f5 15.Bb3 Nd6 16.Bf4 Nd7 17.Qe3 Rf7 18.Nd4 Nf6 19.Rad1 (Steinitz−Blackburne, Nuremberg 1896).]

[Black also does not gain complete equality with 9...Nxc3 10.bxc3 Be7 *(*not *10...Bxc3? 11.Qb3! Bxa1 12.Bxf7*+ *Kf8 13.Ba3*+ *Ne7 14.Rxa1)* 11.Bf4 (Bilguer) .]

10.Bg5 Be7?!

[In the light of what follows, 10...Qd7 is better, for example: 11.Bxd5 Bxd5 12.Re1+ Kf8! *(12...Be7? 13.Nxd5 Qxd5 14.Bxe7 Nxe7 15.Qe2 Qd6 16.Qb5*+ *)* 13.Re3 Bxc3 *(*or *13...f6 14.Nxd5 Qxd5 15.Bf4)* 14.bxc3 f6 15.Bf4 Re8 16.Nd2 with a slight advantage to White.]

11.Bxd5! Bxd5 12.Nxd5

[If 12.Bxe7 Nxe7 13.Re1 0−0 14.Rxe7 , then Bxf3! 15.Qe1 Bc6 16.Qe5 Re8 with equal chances.]

12...Qxd5 13.Bxe7 Nxe7

[After 13...Kxe7

A) , White retains a clear advantage by 14.Rc1 Rhe8 *(14...Kd7 15.Qa4!)* 15.Rc5 Qd6 *(15...Qxa2 16.Qc2 Kd6 17.Rb5)* 16.Qc2;

B) , although in Weiss−Seibold (correspondence 1933) he was successful with 14.Re1+ Kf8 15.Qe2 f6 16.Rac1 Rc8? *(16...Kf7!?)* 17.Rc5 Qd6 18.Qc4 *(18.Qb5!?)* 18...Nd8 19.Rd5 Qc6 20.Qe2! Nf7 21.Qe7+ Kg8 22.Rd7 Qc4 23.d5! .;

C) 14.−−]

14.Re1 f6 The critical position of the opening variation. **15.Qe2?!**
An imperceptible 'scratch on a sparkling diamond'. For nearly a whole century commentators looked for a more efficient way of attacking.
[In 1978 Igor Zaitsev suggested 15.Qa4+! , but after
A) 15...c6?;
B) or 15...Qd7 - 16.Qb4!;
C) while if 15...Kd8?! there is a choice between 16.Re2 *(16.Nd2;* and *16.Qb4 Re8 17.Rac1)*;
D) 15...Kf7
D1) 16.Rac1 Qd6! 17.Qb3+ Nd5;
D2) , or 16.Qb4 Rhe8 17.Rac1 a5! 18.Qa3 Nc6 etc.;
D3) . And only in 1983 did Geller discover 16.Ne5+! fxe5 *(16...Kf8 17.Nd3!* with the threat of Nf4, while if *g5* , then *18.Rac1 c6 19.Qa3* wins *)* 17.Rxe5 Qd6 18.Qc4+! Kf8 19.Rae1 Ng8 *(19...Ng6? 20.Rf5+;* and *19...Re8 20.R1e4 g6 21.Re6!* are both winning for White *)* 20.Rd5 Qc6 21.Qb4+! Kf7 22.Rc5 Qd6 23.Qc4+ Kf8 24.Rxc7 and wins.;
D4) 16.−− , he came to a standstill:]

15...Qd7
[But not 15...Qd6? in view of 16.Qb5+ Qc6 17.Qb4 Qd6 18.Qxb7 .]

16.Rac1
[Here Keres suggested 16.Qe4 c6 17.Re2 Kf7 18.Rae1 Nd5 19.Qh4 with some pressure]
[and Romanovsky - 16.d5 Kf7 17.Rad1 Rad8 *(17...Rhd8!?)* 18.Qe6+! *(18.Nd4 Nxd5)* 18...Qxe6 19.dxe6+ Kg6 20.Nh4+ Kh5 21.Rd7 Nd5 22.Rxd8! *(22.Nf5 Rxd7 23.exd7 Rd8 24.Nxg7+ Kh6!* is equal *)* 22...Rxd8 23.Nf5 Kg6 24.g4 with an extra pawn, but there is still the question of whether it is enough for a win.]
[16.Rad1!? also looks logical.
A) . Now, according to analysis by Zaitsev, bad are both 16...Kf7 17.Qc4+ Kf8 *(17...Nd5? 18.Ne5+! fxe5 19.dxe5* and wins *)* 18.d5 with a great advantage;
B) 16...Kd8 17.d5;
C) , and 16...Rd8 17.Qc4 c6 *(17...Kf8 18.Qb4 c6 19.d5! cxd5 20.Nd4 Kf7 21.Ne6 Rde8 22.Qg4 Nf5 23.Nxg7* wins *)* 18.Rd3 Kf8 19.Ng5! fxg5 20.Rf3+ Nf5 21.g4 g6 22.gxf5 gxf5 23.Qc5+ etc.;
D) . However, after 16...Kf8!
D1) 17.Qc4 Nd5! 18.Nd2 *(*and *18.Re2 c6 19.Rde1 Kf7)* 18...Kf7 19.Ne4 Rhe8 are both equal;
D2) 17.d5!? Nxd5 18.Ng5! Re8 *(*inferior is *18...fxg5 19.Qf3+ Qf7 20.Qxd5;* or *18...c6 19.Ne6+ Kg8 20.Nf4 Rd8 21.Qh5 Qf7 22.Qf3)* 19.Qf3 c6 20.Qa3+ Kg8 21.Ne4 *(21.Qh3 Qc8!)* 21...b6 22.b4! White has no more than the initiative for the pawn. True, Black has to play very accurately: for example, f5? is bad on account of 23.Ng5 Rxe1+ 24.Rxe1 g6 *(24...h6? 25.Qxa7* wins *)* 25.b5! .;
E) 16...−−]

16...c6?
[16...Kf7! was essential
A) , not fearing the exchange

sacrifice 17.Qxe7+?! Qxe7 18.Rxe7+ Kxe7 19.Rxc7+ in view of Kd6 20.Rxg7 *(*even worse is *20.Rxb7? Rhb8 21.Rxg7 Rxb2 22.h3 Rxa2 23.Rxh7 a5!* etc. *)* 20...Rac8! 21.g3 Rc7 , when Black has a good endgame.;

B) . And if 17.Qc4+ there is (in contrast to the variation with 16 Rad1) the reply Nd5 .;

C) . The immediate knight sacrifice also gives nothing real: 17.Ne5+ fxe5 18.dxe5 Qe6 19.Rxc7 Rhd8! 20.Rxb7 Kg8;

D) , or 17.Ng5+ fxg5 18.Qf3+ Nf5! 19.g4 Rhe8 (Neishtadt).;

E) . I have tried to find an advantage after 17.Nd2 , but without success: c6 18.Ne4 b6! (restricting the knight) 19.Qc4+ Kg6! 20.Qd3 *(*or *20.Rc3 Nf5)* 20...Kf7 21.Qb3+ Nd5 22.Nc3 Rac8 is level.;

F) 17.−−]

17.d5!! A classic breakthrough in the centre, strictly in accordance with Steinitz's own theory: the player holding an advantage is obliged to attack! Especially if this wins by force...

17...cxd5

[Fortunately for chess, Bardeleben had no suspicion of Steinitz's brilliant idea, otherwise he would surely have played 17...Kf7 . However, even here after 18.dxc6 bxc6 *(18...Nxc6 19.Rcd1)* 19.Red1 *(19.Qc4+ Qd5 20.Qxd5+ cxd5 21.Rc7 Rhe8 22.Nd4* is also unpleasant *)* , the computer everywhere indicates 'winning for White': 19...Qe6 *(*or *19...Nd5 20.Nd4 Rac8 21.Qc4* with the unavoidable Nxc6 (for example, *Qg4 22.h3 Qf4 23.g3 Qe4 24.Re1 Qg6 25.Nxc6*) *)* 20.Qxe6+ Kxe6 21.Nd4+ Kf7 22.Nxc6 etc.]

18.Nd4 Kf7 19.Ne6 (with the threat of Rc7) **19...Rhc8**

[Black also fails to save the game by 19...Rac8 20.Qg4 g6 21.Ng5+ Ke8 22.Rxc8+]

[or 19...Nc6 20.Nc5! Qf5 *(20...Qc8 21.Qh5+)* 21.Nxb7 Qd7 22.Nc5 Qf5 23.Ne6 Rac8 24.Qa6 Ne7 25.Rxc8 Rxc8 26.h3 Rc4 27.f3! .]

20.Qg4! g6 21.Ng5+ Ke8 22.Rxe7+! An astounding combination! **22...Kf8!**

[After 22...Kxe7 Steinitz calculated the variation

A) but the computer shows that 23.Qb4+ would have won more quickly: Ke8 *(*or *23...Qd6 24.Qxb7+ Qd7 25.Re1+ Kd6 26.Nf7+)* 24.Re1+ Kd8 25.Ne6+;

B) 23.Re1+ Kd6 *(23...Kd8 24.Ne6+ Ke7 25.Nc5+)* 24.Qb4+ Kc7 25.Ne6+ *(*or *25.Rc1+)* 25...Kb8 26.Qf4+ Rc7 27.Nxc7 Qxc7 28.Re8# .]

23.Rf7+!

[Of course, not 23.Qxd7?? Rxc1+]

[and not 23.Rxc8+? - why, we will see in the note to White's 25th move.]

23...Kg8!

[23...Qxf7 24.Rxc8+ Rxc8 25.Qxc8+ Qe8 26.Nxh7+ is hopeless for Black.]

24.Rg7+! Kh8!

[Avoiding 24...Kf8 25.Nxh7+! Kxg7 26.Qxd7+ .]

25.Rxh7+! The final point! More precisely, Bardeleben... suddenly stood up and silently walked out of the room (later he sent a note by special delivery a note tendering his resignation).

[But Steinitz willingly demonstrated to the spectators that which awaited Black: 25.Rxh7+ Kg8 26.Rg7+! Kh8 27.Qh4+ Kxg7 28.Qh7+ Kf8 29.Qh8+ Ke7 30.Qg7+ Ke8 *(30...Kd8 31.Qf8+ Qe8 32.Nf7+* and 33 Qd6 mate*; 30...Kd6 31.Qxf6+* , and the rook at c1 prevents the king from escaping onto the c−file *)* 31.Qg8+! Ke7 32.Qf7+ Kd8 33.Qf8+ Qe8 34.Nf7+ Kd7 35.Qd6# .]

1−0

□ **Anderssen,Adolf**

■ **Dufresne,Jean**

Berlin 'Evergreen' 1852

[Kasparov]

Yasser Seirawan: 'This is one of the most famous games in chess history. It is known as the Evergreen Game.' Today we will look at a game that bewitched its contemporaries and became known as the "evergreen". Dufresne was a german law student and journalist whose "Kleines Lehrbuch des Schachspiels" has been read by generations of chess players.. Yasser Seirawan: 'Jan Pinski: This is one of the most famous games in chess history. It

is known as the Evergreen Game. ' Heute werden wir eine Partie betrachten, die ihre Zeitgenossen bezaubert hat und als "Immergrüne" in die Geschichte eingegangen ist. Dufresne war ein deutscher Jurastudent und Journalist, dessen "Kleines Lehrbuch des Schachspiels" ganze Generationen von Schachspielern begleitet hat. **1.e4** Steinitz, W. Yasser Seirawan: 'Jan Pinski' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4** Yasser Seirawan: 'The Evans Gambit is another old−time favorite. White sacrifices a pawn so that he can gain time by pushing around Black's Bishop.'

[Modern Grandmasters prefer 4.d3 for a quieter game.]

4...Bxb4 5.c3 Ba5 6.d4

Yasser Seirawan: 'Yet another pawn sacrifice. White blows apart the center in the hope that the newly−opened lines will provide access to the Black King.'

6...exd4

[The main alternative 6...d6 (Jan Pinski) is seen in Short−Hübner and the two subsequent games. Black has also tried:]

[6...Bb6 (Jan Pinski) , with the idea of 7 0−0 d6 and Black welcomes himself to the lounge of the Lasker Defence, is ineffective as White plays more strongly with 7.dxe5 , and then:

A) 7...h6?! 8.Qd5 Qe7 9.Ba3 Qe6 10.Qd3 Nxe5 11.Nxe5 Qxe5 12.f4 Qh5 13.Nd2 d6 14.Bb5+ Bd7 15.Bxd7+ Kxd7 16.e5 Re8 17.Nf3 Qg4 18.g3 Kc8 19.0−0−0 and White had a strong initiative in S.Tartakower−O.Chajes, Carlsbad 1923.;

B) 7...Nge7 8.Bf4 0−0 9.0−0 Ng6 10.Bg3 Qe7 11.Qd5 with a bind, e. g. Re8 12.Nbd2 Ncxe5 13.Nxe5 Nxe5 14.Bxe5 Qxe5 15.Qxf7+ Kh8 16.Nf3 Qe7 17.Ng5 g6 18.Qf4 Rf8 19.Qh4 c6 20.Kh1 Bd8 21.f4 h5 22.Rae1 Kg7 23.Qf2 Bc7 24.Qd4+ 1−0 W.Muir−R.Peeples, correspondence 1983. *(24.−−)*;

C) 7...−−]

[6...Qe7?! (Jan Pinski) does not seem to work either. After 7.0−0 Bb6 8.Ba3 Qf6 *(* or *8...d6 9.Bb5 Bd7 10.Bxc6 Bxc6 11.Nxe5 Bb5 12.Re1 Qe6 13.Nf3 0−0−0 14.Bb2 a5 15.Nbd2 Qd7 16.c4* and White was much better in E.Sveshnikov−A.Sofieva, Cappelle la Grande 1995 *)* 9.dxe5 Nxe5 10.Nxe5 Qxe5 11.Qb3 Nh6 12.Nd2 Bc5 13.Nf3 Qe7 14.Bc1 0−0 , V.Ragozin−G.Levenfish, USSR Championship 1949, and now 15.Bxh6 gxh6 16.e5 d6 17.Rae1 Bg4 18.exd6 Qxd6 19.Ne5 Bh5 20.Qxb7 with the advantage.]

[6...b5!? (Jan Pinski) is a strange counter−gambit. After 7.Bxb5 Nxd4 8.Nxd4 exd4 9.Qxd4 Qf6 *(*or *9...Nf6 10.Ba3)* 10.e5 White is better according to Matsukevitch - and he really is!]

7.0−0

[7.Qb3!? (Jan Pinski) is an interesting alternative, and then:

A) 7...Qf6!? 8.0−0 Bb6 *(8...d3* would be the Evergreen Game again*; 8...dxc3* is De Boer−Van der Kooij*;* , while *8...d6* transposes to the Waller Attack in the notes to Karpatchev−Renner *)* 9.e5 Qg6 10.cxd4 Na5 *(*improving on *10...Nxd4?! 11.Nxd4 Bxd4 12.Nc3*

Nh6 , H.Bird−M.Chigorin, Hastings 1895, when *13.Ba3!* would give White good compensation for the pawn *)* 11.Qa4 Nxc4 12.Qxc4 Ne7 13.Ba3 Qe6 14.d5 Qxd5 *(*if *14...Nxd5 15.Ng5!* is strong *)* 15.Qe2 Ng6 16.Nc3 Nf4 17.Qb2 Qd3 18.Rae1 Qg6 19.Nh4 Qg4 20.g3 Nd3 21.Qc2 Nxe1 22.Rxe1 Kd8 23.Nd5 Re8 , N.Short−J.Piket, Zürich 2001, and now after 24.Bc5! White would have maintained a dangerous initiative according to Lukacs.;

B) 7...Qe7 (the main line, but not necessarily stronger) 8.0−0 Bb6 9.cxd4 and then:

B1) 9...Na5 10.Qa4 Nxc4 11.Qxc4 d6 12.a4 c6 13.Nc3 Qd8 *(*or *13...Nf6 14.a5 Bc7 15.d5)* 14.a5 Bxa5 15.Bg5 f6 16.Bd2 Ne7 17.Rfe1 b5 18.Qb3 Bb6 19.e5! d5 20.exf6 gxf6 21.Nxb5 0−0 *(*not *21...cxb5?* when *22.Bb4* wins *)* 22.Bb4 Nf5 *(*unnecessary; *22...Rf7 23.Nd6 Rg7* would have been unclear *)* 23.Bxf8 Qxf8 24.Nc3 and White was clearly much better in E.Sutovsky−S.Smagin, Essen 2001.;

B2) 9...Nxd4 10.Nxd4 Bxd4 11.Nc3 *(*after *11.Bb2?! d6 12.Nc3 Nf6 13.Rad1 Bxc3 14.Qxc3 Qe5!* and Black has no problems *)* 11...Nf6 12.Nb5

B2a) 12...Be5 13.Ba3 gives White good attacking chances, e.g. d6 *(*or *13...c5 14.Rac1 a6 15.Bxc5 d6 16.Bxd6! Bxd6 17.Nxd6+ Qxd6 18.e5* and White wins - Lukacs *)* 14.Rac1 c6 15.f4!;

B2b) 12...d5 13.exd5 Bxa1 14.Ba3 Qe5 15.f4 Bd4+ 16.Kh1 Qe3 17.Nxd4! Qxb3 18.Re1+ Kd8 19.Be7+ Kd7 20.Nxb3 (White has excellent compensation even without the queens on) c6 21.d6 b6 22.Bxf7 c5? *(22...Nd5* was necessary *)* 23.Nd2 Kc6 24.Nc4 Bf5 25.Ne5+ Kb7 26.a4? *(*overlooking *26.Re3!* intending Rg3 and Rxg7 when Black has hardly any defence *)* 26...h5 27.Bxf6 gxf6 28.Bd5+ Ka6 Jan Pinski: 'with a draw by perpetual check, N.Short−P.H.Nielsen, Skanderborg 2003.' 29.Bc4+ Kb7 30.Bd5+ Ka6 with a draw by perpetual check, N.Short−P.H.Nielsen, Skanderborg 2003.;

B3) 9...−−;

C) 7...−−]

7...d3 Yasser Seirawan: 'Black loses time in order to prevent White from playing c3xd4, with a classical pawn center. '?!' Jan Pinski. '?!'' Steinitz, W.: '[Many experiments have been made to stop the progress of the attack in the Evans' gambit, of which the one adopted by Herr Dufresne is apparently very feasible, for at any rate it prevents the formation of a strong center; yet it, like most other defenses, has not stood the test of experience or analysis, and it has been found that it only enables Black to tide over the difficulties of the early part of the game without breaking finally the superiority of White's position.]'

[7...dxc3? Jan Pinski 8.Qb3 Qf6

Jan Pinski: 'is De Boer−Van der Kooij' 9.e5 Qg6 10.Nxc3 Nge7 11.Ba3! has been tried numerous times and, according to Garry Kasparov, Black is in trouble (see the next game).]

[The more prudent 7...Nge7 (Jan Pinski) is considered in Morozevich−Adams and Bronstein−'Heuristic Alpha' below.]

8.Qb3 Yasser Seirawan: 'White eschews recapturing the pawn and threatens 9. Bxf7+, which will win a pawn and check the King. Jan Pinski: 'White should build up his attack. ''

[8.Re1 Jan Pinski Bb6 9.e5 h6 10.Nbd2 Nge7 11.Ne4 was also strong in L.Prins−A.Fuderer, Rogaska Slatina 1948.]

[But 8.Ng5?! Jan Pinski Nh6 9.e5 Nxe5! 10.Re1 (as in A.Anderssen−C. Mayet, Berlin match 1851) is shown to be too hasty after d6 11.f4 Nhg4 12.Nh3 0−0 13.fxe5 Nxe5 and Black is at least slightly better here.]

8...Qf6 Yasser Seirawan: 'Black defends the f7−pawn by placing his Queen on a vulnerable square. Jan Pinski: 'would be the Evergreen Game again''

[8...Qe7 Steinitz, W. at this stage has also been tried, but is considered inferior on account of the reply 9.Ba3 followed, in answer to d6 by 10.Re1 threatening the formidable advance 11. e5.]

9.e5

[Also interesting is 9.Re1!? Jan Pinski Nge7 10.Bg5 Qg6 11.Bxe7 Kxe7 12.e5 Kf8?! *(* better is *12...Re8* with an unclear position *)* 13.Nbd2 Bb6 14.Ne4 Nd8? *(* Black could have played more strongly with *14...d5* , but after *15.Bxd5 Bg4 16.Neg5* White still enjoys a wonderful attack *)* 15.Qa3+ Ke8 16.Nf6+ gxf6 17.exf6+ 1−0 A.Anderssen−S.Rosenthal, Vienna 1873.]

9...Qg6

[Black doesn't fall for White's trap and play 9...Nxe5?? , which leads to 10.Re1 d6 11.Nxe5 dxe5 12.Qa4+ , followed by 13.Qxa5 and the loss of the Black Bishop. Black knows that when your King is in the center, you shouldn't open up any new files.]

10.Re1

[This is better then 10.Nbd2?! Jan Pinski Nge7]

10...Nge7

[Yasser Seirawan: 'After ' 10...Bb6 − Anderssen−Dufresne, Berlin 1855 Yasser Seirawan: '(Jan Pinski) White responds ' 11.Qd1! Nh6 12.Bxd3 Qh5 13.h3 with an initiative according to Kasparov.]

11.Ba3

[11.Nbd2 − Conquest−Narciso, Pamplona 2001 0−0 12.Ne4 d5 13.exd6 cxd6 14.Bxd3 d5 15.Nc5 Qh5 16.Bg5 Ng6 17.Bd2 Bb6 18.Qb5 Bg4 19.Ng5 h6 20.h3 hxg5 21.hxg4 Qxg4 22.Be2 Qf5 23.Bd3 Qf6 and Black had a big advantage in S.Conquest−M.Narciso Dublan, Pamplona 2001. Now why would anybody try to improve on one of the greatest games ever? Well, if you did not look, would you remember the exact moves of this game?]

11...b5?! Yasser Seirawan: ''?' Jan Pinski. Jan Pinski: 'The extra move does little good for Black - in the coming play the white queen seems better placed at a4 anyway. ' '?'' Steinitz, W.:

'[This is the key move to the chief counterattack in the compromised defense (after the third pawn has been taken on Black's seventh move), and evidently the discovery of its force is due to M. Dufresne, who early adopted it in the present form of the defense. The sacrifice of the pawn (in this variation) is bold and ingenious but unripe, for thereby Black virtually abandons his surplus of pawns, since his advanced pawn at d3 must ultimately fall, and the forces will therefore be even, while the position is manifestly in the first player's favor.]'

[11...a6 Lukacs/Hazai 12.Qd1⩲]

[Yasser Seirawan: 'Instead of getting his King to safety with Jan Pinski: Instead, after ' 11...0−0 Euwe Yasser Seirawan: ', Black tries to counterattack. He's forgotten the principle that you should avoid opening lines when your King is in the center.'

A) 12.Qd1!? Lukacs/Hazai Yasser Seirawan: '(Jan Pinski) White would also have a strong initiative' d5 *(12...Re8 13.Bxd3 Qh5 14.Re4)* 13.exd6 cxd6 14.Bxd3 Bf5 15.Nh4 Qg5 16.Nxf5 Nxf5∞;

B) 12.Nbd2 Bb6 13.Qb1→]

[Yasser Seirawan: 'but' ⌓11...d5 Yasser Seirawan: '!' Yasser Seirawan: '(Jan Pinski) is interesting:' 12.exd6 cxd6 Δ 0−0 Junior 13.Rd1 Bg4 14.Bxd3 Qf6 15.Be4 with an unclear game ahead.]

12.Qxb5 Rb8 13.Qa4 Bb6

[Steinitz, W.: 'He is bound to seek protection for his Bishop if he wishes to castle on the Kingside, for otherwise' 13...0−0?? Steinitz, W.: 'a piece would be lost, as White would capture' 14.Bxe7]

14.Nbd2

[14.Qd1 Lukacs/Hazai 0−0 15.Bxd3↑]

14...Bb7?!

[Steinitz, W.: 'The development of the Bishop was of no use, for he had no time to open the diagonal by removing the Queen's Knight. Not a moment longer should castling have been delayed, and against the main line play, which was apparently at White's command, the defense could then proceed thus:' 14...0−0 15.Ne4 Kh8 Steinitz, W. 16.Bxd3 f6 17.Rad1 Qe8 and as soon Black gets rid of the e−pawn, either by capturing or else by the opponent exchanging it for the f−pawn, the diagonal of the adverse Queen's Bishop will be closed by ... d7−d6, with a satisfactory game, and we do not see that the equilibrium can be disturbed by any sacrifice on White's part, for supposing 18.exf6 gxf6 19.Nxf6 Rxf6 20.Qh4 Qf7 and White cannot proceed with 21.Ng5 on account of Bxf2+]

15.Ne4 Qf5? Yasser Seirawan: 'Black continues to waste time and to leave his King in the center.'

[Steinitz, W.: 'A feeble move, but he was already bound to submit to some loss. Probably castling was still the best resource, though it would have involved the loss of the Exchange, e.g. ' 15...0−0 16.Bxd3± Kh8 Steinitz, W. *(*this seems best, for if *16...Qh5* Steinitz, W. or 16...♕h6, the answers are respectively *17.Ng3* or 17.♗c1*;* and if *16...Qe6* Steinitz, W. the attack by *17.Neg5* obtains an irresistible

advantage *)* 17.Nc5 f5 18.Nxd7 Nd4 19.cxd4 Bxf3 20.g3 and, as the King's Bishop can come back to f1 in case of need, there is no danger for White's position, and Black will gain nothing by maneuvering the Queen to h3.]

[15...d2! 16.Nexd2 0−0 17.Ne4 Rfe8 18.Rad1 Na5 *(18...Rbd8 19.Neg5+−)* 19.Bd3±]

[15...Nd4? 16.cxd4 Bxe4 17.e6!! fxe6 18.Bxd3 Bxd3 19.Ne5+−]

16.Bxd3 Yasser Seirawan: 'White threatens 17.Nd6+, with a discovered attack on Black's Queen.' **16...Qh5** White has a huge advantage and it is time for decisive action. Weiß hat einen gigantischen Vorteil, die Zeit ist reif für den Sturm.

[17.♘f6 or 17.♘d6 was threatened, and he had apparently nothing better, for moving the King to 16...Kd8 Steinitz, W. would manifestly not have secured his position.]

In accordance with his own romantic style and public demand Anderssen played Seinem eigenen romantischen Stil getreu, und dem Publikumsgeschmack gehorchend, spielte Anderssen **17.Nf6+** ?!! Yasser Seirawan: '!' Yasser Seirawan: 'White wants to force Black to capture the Knight on f6. (White will take the Black Queen on h5 if Black resists.) The reason for this sacrifice is that, after 18. exf6, White has blasted open the e−file and enabled his Rooks to join in the hunt for Black's King. The possibility of opening lines against the enemy King, especially when he is in the center, should always be considered. '!?' Jan Pinski. Jan Pinski: 'The beginning of one of the most beautiful combinations in chess history. Nevertheless, it is also entering completely unnecessary complications. ' '!?'' The two exclamation marks are for one of the most beautiful combinations in chess history, which was started with this move. But objectively the search for beauty created unnecessary complications. Steinitz, W.: '[Attention. The initiatory sacrifice would now be considered not uncommon in a similar position, and a tyro might perhaps hit upon it in actual play after having seen many examples of the same character; but it was new at the time when this game occurred.]' Zwei Ausrufezeichen, weil eine der glanzvollsten Kombinationen der gesamten Schachgeschichte mit diesem Zug eingeleitet wurde. Aber objektiv gesehen kann das Streben nach Schönheit unnötige Komplikationen schaffen.

[Yasser Seirawan: 'White could do much better with simple play: ' The prosaic Das prosaische 17.Ng3 Yasser Seirawan: 'Jan Pinski' Qh6 18.Bc1 Yasser Seirawan: '!' Qe6 19.Bc4 Nd5 *(19...Qg6 20.Nh4 Qg4 21.Bxf7+)* 20.Ng5 Yasser Seirawan: 'or' Qg4 *(20...Nxc3 21.Qb3 Qe7 22.Nf5 Nd4 23.Nxg7+ Kf8 24.Qxc3 Kxg7 25.Qg3 Kf8 26.Nxf7* and White wins easily. *)* 21.Re4 Yasser Seirawan: 'and wins' would finish the game without any troubles, but then chess would have lost one of the jewels from its crown! hätte die Partie ohne weitere Schwierigkeiten beendet. Aber damit würde heute dem Schachspiel ein Juwel in der Krone fehlen.]

17...gxf6 18.exf6 Rg8! At first sight an open g−file gives Black excellent counter−attacking chances, but Anderssen's calculations were beyond the fears of an ordinary human being. Auf den ersten Blick bietet die offene g−Linie Schwarz ausgezeichnete Chancen für einen Gegenangriff. Aber die Berechnungen von Anderssen waren jenseits der Ängste von normalen Menschen. **19.Rad1!** Yasser Seirawan: "!?' Jan Pinski. '!?" I'll spare you hundreds of analyses by following generations of chess players. After endless debate they have agreed that 19.♖ad1 was better than the alternative 19.♗e4. Now the best reply was 19... ♖g4!, which would pose some difficult problems for White, but in the emerging wild complications White would, in my opinion, retain the upper hand. Steinitz, W.: '[An evergreen in the laurel crown of the departed chess hero. This introduction would excite admiration in a problem to the construction of which the composer might have devoted weeks of labor; yet here it is in actual play, and for depth and brilliancy united, the combination of which it is pregnant has hardly its equal in the records of hand−to−hand contest.]' Ich werde Ihnen die unzähligen Analysen von Generationen von Schachspielern ersparen. Nach endlosen Debatten haben sie beschlossen, daß Anderssens Zug besser als die Alternative 19.♗e4 war. Danach wäre 19...♖g4! der beste Zug. Weiß hätte einige schwierige Probleme zu meistern, aber nach meiner Meinung behält er in den wilden Komplikationen, die folgen, eindeutig die Oberhand.

[19.Bxe7 Lukacs/Hazai Qxf3 20.Bd6+ Ne5! 21.Rxe5+ Kd8−+]

[19.Be4 Yasser Seirawan: '!' Yasser Seirawan: '(Jan Pinski) was Emanuel Lasker's recommendation, after which the position is rather unclear. Again Anderssen seems to be playing towards his combination, and Black helpfully takes whatever is on offer. Some people do not know that a lot of these famous old games were friendly games, played between the rounds of a tournament, and that the defence was therefore less proactive, more willing to see whatever the sacrificing player was up to on the board, than in advance in the head.' Qh3 20.g3 Rxg3+ 21.hxg3 Qxg3+ 22.Kh1 Bxf2 23.Bxe7! Kasparov *(23.Re2* +− Lasker *Nd4!!* Kasparov *)* 23...Qh3+ 24.Nh2 Bxe1 25.Rxe1 Qh4! 26.Qd1! Nxe7 27.Bxb7 Qxf6 28.Bd5!**±**]

19...Qxf3? Yasser Seirawan: 'Black can't resist taking this Knight because he can now threaten to checkmate White on g2.' Now White's king is suddenly just one step from decapitation. But how can we reproach Dufresne from not recognising the magic of a genius? Jetzt steht der weiße König nur einen Schritt vor seiner Hinrichtung. Aber können wir Dufresne einen Vorwurf machen, weil er die magischen Fähigkeiten eines Genies nicht erkannt hat?

[23...Kd8 Jan Pinski 24.Bxe7# .]

24.Bxe7# Yasser Seirawan: 'Checkmate.

If these two famous games are anything to go by, Anderssen must have been fond of checkmating his opponents by placing a Bishop on e7!' It is not surprising that chess players of the time, impressed by this kind of greatness, did not want to listen to dull positional advice. But the old combinational school, led by its first knight Anderssen, was doomed in the battle against the modernized warfare techniques of Paul Morphy, whose tactics had a much better positional foundataion. Es ist nicht verwunderlich, daß die Schachspieler jener Zeit angesichts solcher großartigen Angriffspartien wenig Neigung hatten, stumpfe strategische Regeln zu lernen. Aber die alte kombinatorische Schule, geführt von ihrem strahlendsten Ritter Anderssen, war letztendlich zum Untergang verdammt. Ihre Vertreter konnten den fortschrittlicheren Techniken eines Paul Morphy, dessen taktische Schläge ein viel solideres positionelles Fundament besaßen, nicht lange widerstehen.

□ **A.Frois**
■ **O.Korneev**
Malaga 2005
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 d6 7.Bb3 Ba7 8.Re1 0−0 9.h3 h6 Black plans aggressive action on the kingside with ... Nh5, ...Qf6 and ...Nf4. This is an appealing option and it's no surprise that it has been Black's most popular choice over the years.

[9...h6 is a necessary precursor to the plan, because the immediate 9...Nh5 is met convincingly by 10.Bg5! forcing an awkward queen move. After Qe8 , if nothing else there's 11.d4 *(11.Nh2!?)* 11...h6 12.Be3 and White could end up a tempo ahead of the main lines: Qe7 13.Nbd2 Qf6 14.Nf1 Nf4 15.Ng3 etc. This demonstrates one of the advantages of playing 8 Re1 instead of 8 Nbd2 - the immediate 9...Nh5 is a major possibility for Black after 8 Nbd2 0−0 9 h3.]

10.Nbd2 Nh5 11.Nf1

[Note that 11.Nxe5?? is a blunder because of Nxe5 *(*or, even worse, *11...Qh4!)* 12.Qxh5 Nxd3 .]

11...Qf6 12.Be3!

[12.Ne3 is also possible, but the feeling is that White's best chance of finding an advantage lies with this offer to trade the dark−squared bishops. However, it should be pointed out that White's isn't always going to force the exchange of these bishops. Indeed, if Black avoids exchanging on e3, which he tends to do in practice, White will often play d3−d4. In this case, as we've seen before, a significant part of White's strategy is to block the a7−bishop out of the action. What's more, all the time White has the option to exchange bishops with dxe5 followed by Bxa7, whereas Black doesn't. This tension in the centre undoubtedly favours White.]

12...Nf4 Occupying f4 straight away looks attractive, and this is Black's most popular choice here. However, worthy alternatives do exist:

[a) 12...Bxe3 is committal but it does at least clarify the position to some extent. If Black wants to exchange on e3, now is probably the time to do so; after ...Nf4, any exchange on e3 only encourages fxe3 to force the knight to retreat. White can recapture in either way:

A) 13.Nxe3 Nf4 14.Kh2 *(14.Nd5 Nxd5 15.exd5 Ne7 16.d4 Ng6* is equal *)* 14...Ne7 15.a4 Be6 16.Bxe6 fxe6?! *(*after *16...Nxe6!* - Karpov - the position is equal *)* 17.Ng1! . This knight retreat is one point of 14 Kh2; indeed it's a typical plan for White. The idea is to kick the knight back with g3 and slowly make progress on the kingside: Rad8 18.g3 Nfg6 (now this knight is a poor piece, restricted by the pawn on g3) 19.Rf1 d5 20.Qe2 Nc6 21.Ng2 Rf7 22.h4 Rdf8 23.Rad1 Nge7 (A.Karpov−A. Yusupov, Bugojno 1986) and here 24.f4! (Karpov) would have

maintained an edge for White.;
B) 13.fxe3!? is perhaps more challenging. Black can no longer carry out his ...Nf4 plan and needs to regroup, while White will begin action on the kingside: Qe7 (to give the knight a square) 14.g4 Nf6 15.Ng3 Be6 16.d4 *(*I'd be tempted to hold the centre and continue with *16.Rf1!?* , intending *d5 17.exd5 Nxd5 18.Qe2)* 16...Bd7! 17.Qe2 Nh7 18.Qg2 Kh8 19.Rf1 with an unclear position, D. Svetushkin−C.Marcelin, Yerevan 1999. White is the more active but Black's position is solid enough.;
C) 13.−−]

[b) 12...Ne7 (providing reinforcements for the kingside) 13.d4 *(13.Bxa7 Rxa7 14.Ne3 Nf4 15.Kh2 Ra8* transposes to note 'a', above *)* 13...Nf4 *(13...Ng6?* fails to the tactic *14.Nxe5! dxe5 15.Qxh5* , since *exd4 16.cxd4 Bxd4?* loses to *17.Bxd4 Qxd4 18.Qxg6)* 14.Ng3 Neg6 15.Bc2! . The decision to retreat the bishop looks strange at first sight (how many times have I said that?), but it's actually a strong move. The key idea for White (see note 'b') is to interfere with Black's kingside action by playing Nf5:

A) 15...Nh4 16.Nxh4 Qxh4 17.Qf3 g6 18.Rad1 Kg7 19.Bb3 Qf6 20.Kh2 Re8 21.Rd2 Be6 22.Bxe6 (finally the time is right to release the tension) Rxe6 23.dxe5 dxe5 24.Rd7 Bb6 25.Red1 and White's control of the d−file gave him the edge in L.Dominguez Perez−Y. Quezada Perez, Havana 2008.;
B) 15...c6 16.Nf5 Re8 17.Nh2!? h5 18.Kh1 *(*planning g3; returning with *18.Nf3!?* now that g5 has been weakened may be stronger, and this position looks a bit better for White *)* 18...d5! 19.dxe5 Qg5 *(*Rybka wants to play *19...Rxe5! 20.Bxa7 Rxa7 21.Qd4 b6 22.Qxb6 Rb7 23.Qxa6 Rb8 24.Qa4 Rxb2* with counterplay *)* 20.Ng3! h4? 21.Nf3 Qh6 22.Nf5 (White is already winning here, but according to the database there now came...) Qg5?? 23.Nxg5 and 1−0, Hou Yifan−W.Spoelman, Wijk aan Zee 2007.;
C) 15...−−]

[c) 12...Be6 13.Bc2 could easily reach positions similar to those in note 'b' where White voluntarily plays Bc2. *(*Here *13.Bxa7 Rxa7 14.Ne3 Nf4 15.Nd5;* and *13.d4 Bxb3 14.axb3* are also possible. *)* For example, 13...Nf4 14.d4 Ne7 15.Ng3 g5!? *(15...Neg6* is met by *16.Nf5* ,*;* and *15...g6* by *16.Nh2 h5 17.Qd2)* 16.Nh2! Rfd8 (A.Olsson−K.Ong, Gothenburg 2005) and here 17.Nf5! is a good move, because Nxf5 is met by the strong zwischenzug 18.Ng4! .]

13.Ng3

[13.d4 is a good alternative. Black usually meets it with Ne7 which transposes to 12...Ne7, above.]

After 13 Ng3, initially there appears to be no danger at all for Black, but watch out for some hidden traps lurking in this position! **13...g6** Not the first idea you would think of, but this pawn move is almost a necessity!

[The first thing to note is that an

innocent move such as 13...Be6 can be met by 14.Bxf4! *(14.d4* is also good *)*

A) Here 14...Qxf4?? 15.Nh5 , trapping the queen in mid−board, is easy to miss. (This explains the reasoning behind 13...g6.);

B) 14...exf4? is also a mistake, losing a pawn after 15.Nh5 Qe7 *(*or *15...Qg6 16.Nxf4 Bxb3 17.Qd2! Qg3 18.d4)* 16.Nxf4 . The well−known Spanish grandmaster Vallejo Pons once fell for this, albeit in a blindfold game.;

C) Actually, Black can escape real harm with 14...Bxb3! 15.axb3 exf4 , intending 16.Nh5 *(*but *16.Nf1!* followed by d3−d4 allows White to achieve his positional goal of blocking out the a7−bishop, with some advantage *)* 16...Qg6 17.Nxf4 Qg3 18.Qd2 Bxf2+ 19.Qxf2 Qxf4 .;

D) . 14...−−]

[13...Ne7 is met by a similar response: 14.Bxf4! exf4 15.Nh5 Qg6 16.Nxf4 Qg3 17.Qd2 Bxf2+ 18.Qxf2 Qxf4 . Black has regained his pawn, but after 19.e5! White stands better.]

[Perhaps the most important alternative for Black is 13...g5!? further supporting the strong knight and thus eliminating any tricks. Black will hope to organize some action on the kingside, but 13...g5 does saddle him with light−squared weaknesses which White can justifiably expect to exploit after the logical response 14.Nh2! . White's long−term goals are to occupy the 'real outpost' on f5 and to force the f4−knight from its 'pseudo outpost' with a timely g2−g3 advance.

For example, Qg6 15.d4 Kh8 16.Bc2 Ne7 *(*or *16...f6 17.Nf5! Bxf5 18.exf5 Qh5 19.Ng4! Kg7 20.Bb3 Na5? 21.dxe5! fxe5* , D.Svetushkin−K. Pilgaard, Ubeda 1999, and here *22.Bc2* intending Bxf4, Qd3 and f6+ looks precarious for Black *)* 17.Qf3 f6 18.Kh1 Bd7 19.Rad1 Bc6 20.Rd2 Qh7 *(*Black is in no position to play *20...f5?* - after *21.dxe5 dxe5 22.Bxa7 Rxa7 23.Qe3! Raa8 24.Nf3* it's difficult for him to hold his position together *)* 21.b4 Neg6 22.Nf5 Ne7 23.Nxe7 Qxe7 24.Nf1! (one knight replaces the other) Bd7 25.Ng3 Qh7 26.Nf5 Rg8 (V.Sikula−B.Marzolf, Metz 2007) and here 27.Bb3 Rg6 28.g3 Nxh3 29.Qg4 is complicated but might simply be good for White: Nf4 30.dxe5! h5 31.Qd1 Bxe3 32.fxe3! Nh3 33.exd6 h4 34.g4! etc.]

14.d4! This move, blocking out the a7−bishop, seems to give Black the most problems, certainly at least in practice.

[14.Nh2 planning Qf3 and/or Ng4 is a decent alternative,]

[but White should certainly avoid 14.Bxa7?! Rxa7 when there is no way to dislodge the f4−knight for the foreseeable future. As a rule of thumb, if White quickly exchanges on a7, the knight should go to e3 rather than g3.]

By playing 14 d4, White introduces another positional threat which isn't immediately apparent. Can you spot what it is? **14...Na5?!**

[An innocent−looking move like 14...Bd7? allows White to carry out his threat: 15.Bxf4! Qxf4 *(*if *15...exf4* , *16.e5!* followed by Ne4 is strong - this

is a reoccurring theme *)* 16.Nf5!! . A bolt from the blue. Black was probably feeling very comfortable, but now his queen is trapped in mid−board! Bxf5 *(16...gxf5* is met in the same way *)* 17.g3! Qxe4 18.Rxe4 Bxe4 19.Qe2 with a clear advantage for White, G.Todorovic−M.Pavlovic, Belgrade 2009. The game ended Bxf3 20.Qxf3 exd4 21.Qf6 Kh7 22.Re1 Rg8 23.Kg2 dxc3 24.bxc3 Ne5 25.f4 Nd7 26.Qe7 Nc5 27.f5 and 1−0.]

[14...Re8? meets the same fate: 15.Bxf4! Qxf4 *(*or *15...exf4 16.e5!)* 16.Nf5! Bxf5 17.g3 Qxe4 18.Rxe4 Bxe4 19.Nd2 Bf5 20.g4! Bd7 21.Qf3 (Lukacs) and again White is clearly better. Note that the trap only works once White has played d4; without this Black could take the pawn on g3 exploiting the pin on the f−pawn.]

[There are a couple of moves Black can play to avoid the trick, and these represent his best options: a) 14...Ne7 15.Nh2!? *(*maybe *15.Kh1!? ,;* but Black can now meet *15.Bxf4 Qxf4 16.Nf5* with *Nxf5!* ; however, with ... Neg6 no longer an option, it's not clear whether e7 is such a good square for this knight *)* 15...h5 and now:

A) 16.Qf3 Kg7 17.Rad1 Rh8 *(17...Nc6!?)* 18.Ne2! g5! *(*if *18...Nxe2+ 19.Qxe2* followed by Nf3, when the g5−square is inviting *)* 19.dxe5 dxe5 was D.Howell−L.Johannessen, Oslo 2008, and here 20.Nxf4 gxf4 21.Bxa7 Rxa7 22.Qd3 Ng6 23.Nf3 Nh4 24.Rd2 looks unclear.;

B) 16.Qd2!? is a promising alternative to 16 Qf3. If Black carries on with Kg7 , White can play 17.Nf3! increasing the pressure on e5 and f4. The point is that Nxh3+? fails here, to 18.gxh3 Qxf3 19.Bd1! Qf6 20.Bg5! Qe6 21.Bb3 Qxh3 22.Bh6+ Kg8 23.Qg5! .;

C) 16.−−]

[b) 14...h5! is perhaps Black's best move, and in all likelihood this limits White to a small edge: 15.a4 *(*planning to gain space on the queenside with a5; note that *15.Bxf4 Qxf4 16.Nf5 gxf5 17.g3* no longer works - Black has sneakily vacated the h6−square! *)* 15...a5 *(15...Kg7* can be met by *16.Qd2!* and again *Nxh3+?* fails to *17.gxh3 Qxf3 18.Bh6+ Kg8 19.Qg5!)* 16.Bc4 Ne7 17.Nh2 Be6 18.Bxe6 *(*this looks more challenging to me than *18.Ba2 Bxa2 19.Rxa2 c5* , which left White's a2−rook slightly misplaced in A. Delchev−Z.Almasi, Sibenik 2006 *)* 18...Nxe6 *(*or *18...fxe6 19.dxe5 dxe5 20.Bxa7 Rxa7 21.Ne2! Nc6 22.Nxf4* intending *exf4 23.e5 Nxe5 24.Qd4 Nc6 25.Qc4 Re8 26.Re4)* 19.Nf3 and the tension in the centre still favours White. If Nf4 20.Qd2! Nxh3+ 21.gxh3 Qxf3 22.Bg5 f6 23.Re3! and Black's queen is trapped.]

15.Bc2!?

[Even here White can play 15.Bxf4! , although in this instance the trick doesn't lead to quite such an overwhelmingly favourable outcome: Qxf4 *(15...exf4* is once again met by *16.e5!)* 16.Nf5! gxf5 17.g3 Qxe4

18.Rxe4 fxe4 19.Nd2 with some advantage for White, as indicated by Lukacs. Frois decides that the threat is stronger than the execution, and the evidence from this game suggests he's right!]

15...Nc4 16.Bc1 True, White has been forced backwards temporarily, but Black's knight on c4 is on a poor circuit - it lacks protection and will soon be forced to retreat. **16...c5?!** It becomes clear after this move that Korneev was completely oblivious to White's idea. That makes it at the minimum two experienced grandmasters that have fallen for White's cleverly concealed trick.

[16...h5! gives the queen the h6−square (compare 14...h5) and keeps Black in the game. White maintains some advantage with 17.a4 .]

17.b3 Na5 18.Bxf4! Qxf4?

[Good or bad (and it is probably bad), Black had to allow 18...exf4 19.e5! .]

19.Nf5! This version of the trap is simply winning for White, who gains the queen in return for only two minor pieces. Korneev battles on gamely but the result was never seriously in doubt from this moment. **19...Bxf5 20.g3 Qxf3 21.Qxf3 Bd7 22.dxe5 dxe5 23.Rad1 Be6 24.Rd6 Rae8 25.Red1 Bb8 26.R6d2 Nc6 27.Kg2 Kg7 28.Bd3 b5 29.Bc2 b4 30.Qe3 Rc8 31.cxb4 cxb4 32.Bd3 Ba7 33.Qe1 Nd4 34.Bxa6 Rc3 35.Rd3 Rc2 36.R1d2 Rc7 37.Rb2 Rb8 38.Rd1 Rc3 39.Rc1 Nf3 40.Qd1 Ng5 41.h4 Nxe4 42.Bc4 Rc8 43.Rxc3 bxc3 44.Re2 Bxc4 45.bxc4 Nd2 46.Rxe5 Rxc4 47.Qc2 Bd4 48.Rd5 Bf6 49.Rd7 Rb4 50.Qd3 Nc4 51.Rc7 Nb6 52.Qd6 Rb5 53.Qe6 1−0**

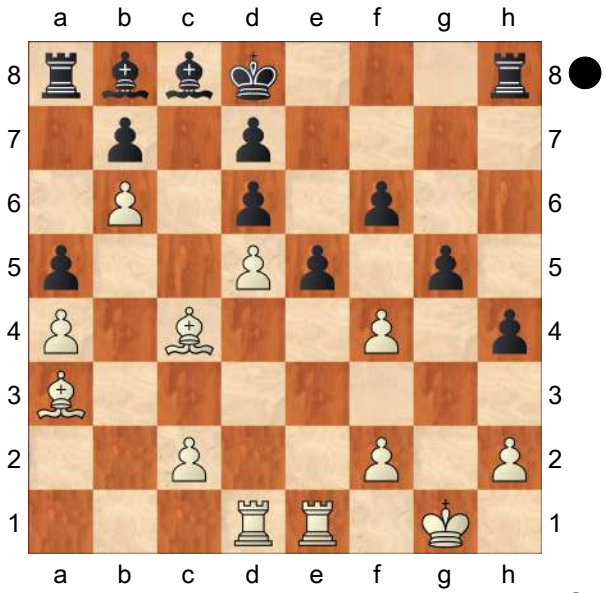
(Diagram)

1−0 R.Smith−W.Brandhorst, US CC Ch Final 1999; a comical final position.]

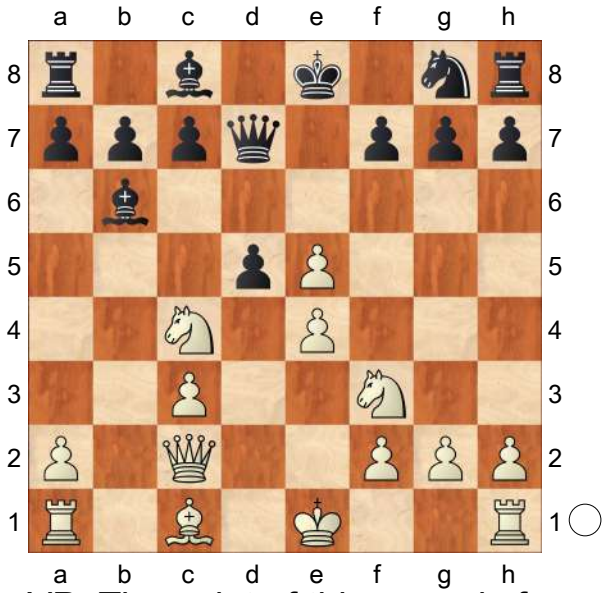


5.c3 Bc5 This is not the best square for the B, although it was often played here in the 19th century. The most fighting retreat is to a5 (setting up a pin on the a5−e1 diagonal in some lines) while 5... Be7 is solid but unambitious.

[One of the most theoretically important Evans Games ever played by correspondence was Estrin−Palciauskas from the 10th World Championship Final, 1978. It really put a whole approach for White out of business: 5...Ba5 6.d4

A) 6...exd4 7.0−0 *(7.Qb3!?* has had some successes but is more suited to OTB play. *)* 7...d6 *(7...Nge7!?* is arguably best once Black has committed to taking the d−pawn.*; 7...dxc3* is very risky, especially in CC. *)* 8.cxd4 Bb6 leads back to the game, but there are several other oprions for both players.;

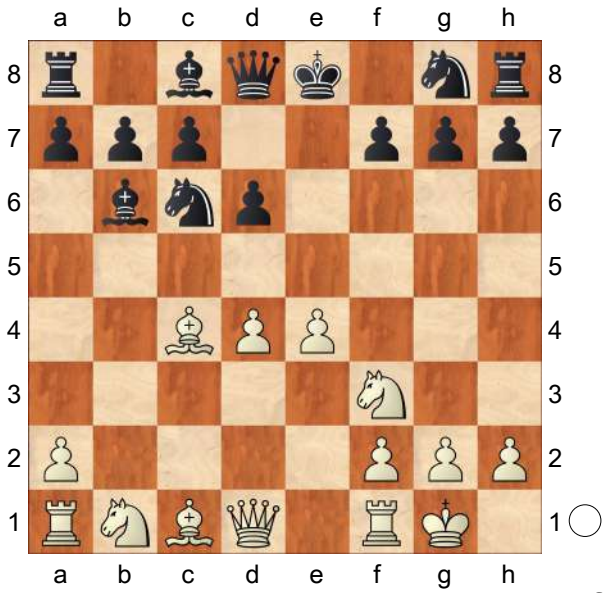
B) 6...d6 7.Qb3 Qd7 8.dxe5 Bb6 This is one of the safest ways of meeting the Evans and it is very hard for White to circumvent it. 9.Nbd2 Na5 10.Qc2 Nxc4 11.Nxc4 d5!N Diagram *(*TH: This is a big improvement on the old line *11...dxe5?! 12.Nfxe5 Qe6 13.Ba3!* (Cafferty−Clarke, British Ch 1970) when White has a strong attack. *)*



VP: The point of this move is for Black to dominate the light squares. 12.Nxb6 Later, attempts were made to improve White's chances by 12 exd5 or 12 ♗g5 but no really convincing answer to Palciauskas's innovation has ever been demonstrated. axb6 13.0−0 dxe4 14.Qxe4 Qg4 15.Qe3 *(15.Qxg4* The endgame after *Bxg4 16.Nd4 Ne7* offers White the prospect of being ground down slowly on the queenside, the pawn structure being the same as in Lasker's Defence, 6 0−0 Bb6 7 d4 d6 etc. *)* 15...Ne7 16.Nd4 0−0 17.h3 Qg6 18.f4 c5!∓ Black gains control of the d−file and in particular the weak d3−square 19.Nb5 Rd8 20.Nd6 Nf5 21.Nxc8 *(21.Nxf5? Bxf5* and White has no defence to ... ♖d3. *)* 21...Raxc8 22.Qf3 h5

B1) The pawn sacrifice 23.g4 hxg4 *(23...Rc7!?)* 24.hxg4 Nh6 25.f5 leads at best to a somewhat worse endgame for White after Qxg4+ 26.Qxg4 Nxg4;
B2) 23.Qxb7 After this White loses without much of a fight. 23...Rc6 24.Qa6 c4 25.Qa4 Rd3 26.Rb1 Rxh3 27.e6 Rxe6 28.Qxc4 Qg3 0−1]

6.d4 exd4 7.0−0 d6 8.cxd4 Bb6
Diagram



This is the so−called Normal Position of the Evans Gambit, which can arise from various move orders. The merits of this position have been debated in hundreds (if not thousands) of games from the McDonnell−Labourdonanis matches of 1834 onwards, probably because it gives chances to both sides and even now best play has not been established with complete certainty. **9.d5**
White follows the Adolf Anderssen formula.

[9.Nc3 was the preference of two of the greatest 19th century Evans gambiteers, Paul Morphy and Mikhail Chigorin. However, in the main line that had been established by the end of Chigorin's career, a draw seemed almost inevitable, yet even here there are some nuances that did not become apparent until late in the 20th century. Na5 *(9...Bg4 10.Bb5* leads to a different sort of game where White has compensation for the pawn but no clear attack. *)* 10.Bg5
The Göring Attack, which was tested in two games between the English players P.W.H.Smith and P.H.Clarke in the late 1970s. (Clarke was then an ICCF IM and got the GM title in 1980.) The players met in the first round and semifinal of the BPCF Grand Open. On the first occasion, winter of 1978−9, Clarke defended by

A) 10...f6! 11.Bf4 Ne7 12.h3 Ng6 13.Bg3 Nxc4 14.Qa4+ Qd7 15.Qxc4 Qf7 16.Nd5 0−0 17.a4 *(17.Nxb6 axb6 18.Rfc1 Qxc4 19.Rxc4* with a very drawish ending is probably White's safest line (1/2−1/2, 38) R.Smith−M.Morss, 13th US CC Ch Final 1999. *)* 17...Be6! 18.a5 c6 was played by Clarke in the second game, following the classic encounter Chigorin & Polner v.Hardin & Alapin, St Petersburg 1888, which Black won in 58 moves although the position after 18 moves is usually considered about equal. Smith varied at move 21 but eventually lost. No fully satisfactory line for White against 10...f6 has yet been demonstrated.;
B) 10...Ne7 11.Nd5 f6 12.Bxf6 gxf6 13.Nxf6+ Kf8 14.Ng5!

10.Bb2 A little finesse; inbstead of moving the B at once, White threatens Bxg7. **10...Ne7 11.Bd3** Black has a little joke of his own; now if

[11.Bxg7 Rg8 12.Bf6 Nxc4 13.Qa4+ Qd7 14.Qxc4 Rxg2+! 15.Kh1 *(15.Kxg2? Qg4+* and mates *)* 15...Qh3 16.Nbd2 Bg4∓ Anderssen]

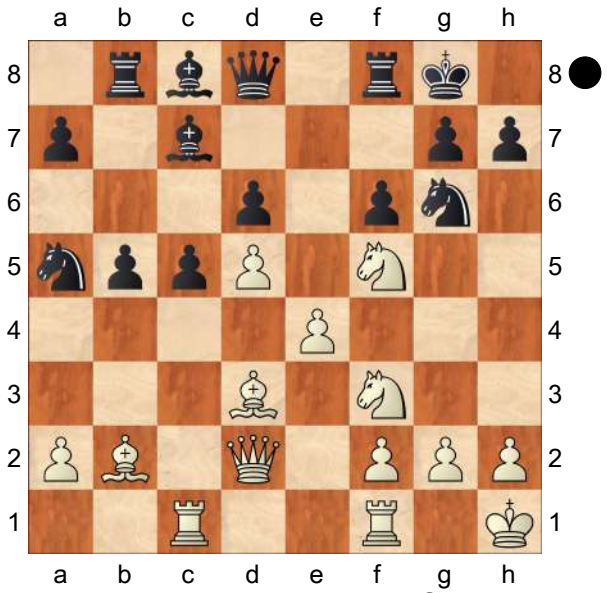
11...0−0 12.Nc3 This line was tested countless times in the 19th century, especially in the games of Adolf Anderssen (with both colours). Over the next few moves, each player develops his plan in his sphere of influence; move order is flexible and there are other options but nothing clearly better than reaching the next diagram position was ever found for either side. **12...Ng6 13.Qd2** 13 Ne2 c5 14 Qd2 f6 was the move order approved by the 'Handbuch'. **13...f6!?** This move, played almost automatically at one time (here or after 13...c5 14 Qd2), looks inferior to modern eyes. Black takes control of e5 and g5 but weakens e6 and some squares near the black K. We shall see that if the g−file later becomes opened, or if White advances a pawn to g5, then the f6 bulwark can crumble. **14.Ne2** The N moves away to reopen the a1−h8 diagonal and it heads for the important attacking focal square f5. **14...c5 15.Rac1** Here the immediate Kh1 could be more precise.

[15.Kh1 Bc7 16.Rac1 *(16.Rae1* Romashkevich−Alekhine, corr *)* 16...Rb8 17.Ng3 b5 18.Nf5 was the old Handbuch main line (our game transposes to this).]

15...Rb8

[15...Bd7 was in vogue at the Paris 1867 tournament, leading to positions similar to the present game after Black's 18th move. 16.Ng3 Bc7 17.Nf5 b5 18.g4∞ G.Neumann−C.

Golmayo, in which White won eventually but may have stood worse here. Golmayo did not play ...Rb8 in this game.]
[15...Ne5! 16.Kh1 *(16.Nxe5* Neue Berliner Schachzeitung 1869 p. 155 transposing to a game Neumann−Mortimer after *fxe5 17.Kh1 Qh4)* 16...Nxd3 17.Qxd3 Qe8 18.Nh4 Bd8 19.Nf5 Bxf5 20.exf5 b5 21.Nf4 Nc4 22.Ba1 Ne5 23.Qg3 Rf7 24.Ne6 c4 25.Rce1 Qd7∓ Handbuch 8th ed *(*but not *25...Nd3?? 26.Nxg7+−)*]
16.Ng3 Bc7 The B retreats to restrain an e4−e5 break and prepare the advance of the b−pawn. **17.Nf5 b5 18.Kh1** Diagram



Up to here the variation was frequently played in the past e.g. **18...Bd7?!** This is not really a developing move. The B achieves nothing and White just gains a free tempo for the attack as the B will probably soon be obliged to capture the white N on f5.. Black's idea appears to have been to defend the b−pawn in order to retreat the offiside N, as in Neumann−Golmayo, but Dr Schapiro has lost a tempo by comparison with that game because he has also played ... Rb8. Where is the N going? Golmayo played the manoeuvre ...c4, ...Na5−b7−c5 but that is too slow now (see the note to move 21). Black perhaps "knew" that his opponent's attack had been refuted several decades earlier but was unsure exactly how, or perhaps he didn't have all the requsite references to hand (it is easier now, with databases). Or perhaps he just failed to prerceive the nuances that make the difference between a successful defence and a brilliant defeat. Experience from the 19th century shows that Black is committed to advancing his queenside pawns in order to obtain counterplay. However, Dr Schapiro can be given for his doubtful move because it facilitated a beautiful finish in the style of Anderssen himself.
[18...b4? 19.Rg1 Bxf5 *(19...Bb6 20.g4!* Anderssen−Zukertort, Barmen 1869 (one of Anderssen's most famous brilliancies) *)* 20.exf5 Ne5 21.Bxe5 fxe5 22.Ng5 Qd7 23.Ne6 Rfc8 24.g4 b3 25.g5 bxa2 26.g6 Nb3 27.gxh7+ Kh8 28.Qg5 Bd8 29.Nxd8 Nxc1 30.f6 Rc7 31.f7 Qxf7 32.Nxf7+ Rxf7 33.Rxc1 Rxf2 34.Qe7 Rbf8 35.Qxa7 R8f7 36.Qb8+ Rf8 37.Qxd6 e4 38.Bxe4 c4 39.Qb4 c3 40.Rg1 R2f7 41.Qxc3 Rf6 42.d6 1−0 the 9th match game Anderssen−Steinitz, London 1866]

1893]

19.Rg1 Nb7 20.g4 c4 21.Bb1 Ne5

[21...Nc5 could be played by analogy with Neumann−Golmayo, but after 22.g5 the comparison breaks down because Black's wasted move ...Rab8 is matched by White's very useful Rf1−g1, so that Ne5? is refuted by *(⌓22...Ba5)* 23.gxf6 Qxf6 *(23...Nxf3?? 24.Nh6+ Kh8 25.fxg7#; 23...Rxf6? 24.Rxg7+ Kh8 25.Qg5; 23...Bxf5? 24.Rxg7+ Kh8 25.exf5)* 24.Rxg7+ or *(24.Nxe5 Bxf5 25.Nxc4 Bxe4+ 26.Bxe4 Nxe4 27.Bxf6)*]

22.Rg3 White's initiative is growing although computers may think he is losing. Defending this position in the human world against a determined attacker is not to easy because of the concentration of force that White can achieve. White's queenside−posted pieces can particiipate in the attack whereas Black's queenside pieces cannot influence events around the K, except indirectly.

[The original notes in 'Fernschach' point out that the immediate 22.g5 (planning the pretty combination 22... Nxf3 23 gxf6) fails to Bxf5 23.exf5 *(23.gxf6 Rxf6)* 23...Nxf3 24.Bxf6 Rxf6]

22...Nc5 23.g5 A computer will probably suggest exchanging Ns (with a good game for Black) but Evans Gambit players understand that White must not close the long diagonal by exchanging on e5. **23...Bxf5** Black is forced to admit that his ...Bd7 lost time.

[23...Ba5 does not force the Q to move; instead White plays 24.Nh6+! Kh8 *(24...gxh6 25.gxf6+!* transposes *)* 25.gxf6 gxh6 26.Qxh6 Qxf6 27.Nxe5! dxe5 *(27...Qxh6 28.Nf7#* would be a nice way to go *)* 28.Qxf6+ Rxf6 29.Bxe5 Rbf8 30.Rcg1 Bd8 31.Bd4 would be a classic combination in the style of Anderssen.]

[23...fxg5 also comes into consideration as it avoids the sort of debacle that occurs in that last variation and in the actual game. As White does not want to exchange his dark−squared B, the best move is probably 24.Nxg5 with excellent compensation for the pawn, but still a lot of play ahead. If Ba5 25.Qe2]

24.exf5 Nxf3

[24...Ba5!? 25.Qe3 c3 offers back the pawn to exchange Bs, but White can also consider continuing the attack by the very unclear plan 26.gxf6!? Qxf6 27.Rcg1 Rf7 *(27...cxb2 28.Rxg7+)* 28.Bc1 Nc4 *(28...Nxf3 29.Qxf3* threatening Bg5 *)* 29.Qf4]

[24...Na4 doesn't work because Black gets no time to take on b2: 25.gxf6 Qxf6 *(25...Rxf6 26.Rcg1)* 26.Bxe5 So the B must go, but in exchange for the strong N while the other one is stranded on a4. dxe5 27.Rcg1 Rf7 28.Ng5 The game remains very sharp but White has a strong initiative based on a N going to either e6 or e4, depending on Black's response.]

B) 14...Rf8 15.Rxd4+ Bd6 16.Qxh7 Rf7 17.Qh3+ Kc6 Run for the hills 18.Rc4+ Kb6 19.Nd5+ one good check deserves another Ka6 20.Ra4+ Kb5 21.Qb3+ Kc6 Heading home 22.Rc4+ Kd7 23.Qh3+ Ke8 Been around the world 24.Rxe4+ Be7 25.Qh5 Qxd5 26.Qxd5 Rxg7 27.Qh5+ 1−0 A.Llopis−Palau Viol, corr 1988]

[With the black pawn on c4 (Canal Variation) RR12...Kf7! was recommended by Keres and may be almost a refutation. Palkövi recommends it in the present position, giving the continuation 13.Bxh8 Qxh8 14.Qh5+ Kf8 15.Nxc6 bxc6 16.Qh6+ Qg7 *(16...Kf7 17.Qh5+* drawing *)* 17.Qxc6 Rb8 18.Qxc7 Ra8 19.Qc6 White can try to play for a win with 3 pawns against a piece but it may be risky. *(RR19.Nd5 Bf5 20.Nxe7 Qxe7 21.Qf4 Qf7 22.Rd1; RR19.Nxe4 Qxb2 20.Re1)* 19...Rb8 drawing by repetition]

13.Qh5+ Rf7

[If 13...Kd7 14.Nxc6 bxc6 15.Nxe4

and White wins on either

A) or 15...Qe8 16.Rd1+ Bd6 17.Qg4+ Kd8 *(17...Ke7 18.Qg5+ Ke6 19.Re1)* 18.Qg5+ Qe7 19.Bxf8;

B) 15...Bd6 16.Re1]

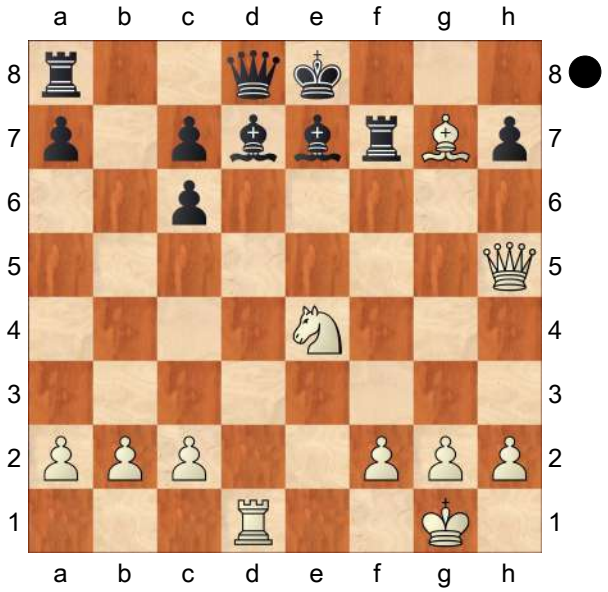
14.Rd1! Bd7 Both 14...♕d6 and 14...♗d6 fail as White gets a positional edge.

[Black's more radical try 14...Nb4!? leads to even more radical positions after 15.Nxe4 Qd5 16.Nb5! (a lot of horseplay here) and every piece including White's queen, Black's queen is in the breeze. Chaos.]

[RR14...Bd6 may be best in the Canal line with the black pawn on c4.]

[RR14...Qd6 may nevertheless be the right move. A possible continuation is 15.Ndb5 Qf4 16.Nd5 Qxf2+ 17.Kh1 Bd7 18.Nf6+ Bxf6 19.Nxc7+ Ke7 20.Nd5+ Ke6 21.Nc7+ Ke7 22.Nd5+ Ke6 with a draw by repetition]

15.Nxc6 bxc6 16.Nxe4 Diagram

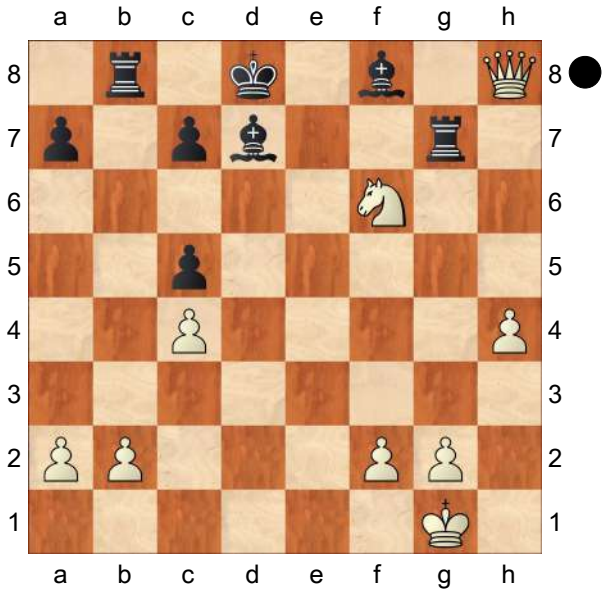


This is the position I had prepared before the game with analysis. My plan was to win a third pawn for the rook and then with a bind march my kingside pawns to glory. **16...Rb8 17.c4** To prevent Rb5 **17...c5 18.Qxh7 Bf8** Pin and win? **19.Re1!** White has numerous alternatives as early as 15 ♘xe4 instead of ♘xc6 but I keep to the basic theme. Timing of the capture of the pawn at h7 must be carefully done so not to lose the bishop at g7 to Black's pin. Now Black must sacrifice his queen.

19...Qe7 20.Nf6+

[20.Nd6+ is unclear RRcxd6 21.Rxe7+∓]

20...Kd8 Only move **21.Rxe7 Rxe7 22.h4!** I now thought I would win this easily but now Black puts up stiff resistance sending us into deep tactics and miraculous moves yet to come. But it's a long way to Tipperary. **22...Rxg7 23.Qh8** Diagram



23...Ke7

[23...Rf7 is very complicated but White wins after two pages of analysis. ** NEED TO CHECK THIS **

[Or if 25...Bc6 26. h6 Rf7 27. Qg8+− 26.h6 Rf7 27.Qg8+−]

26.h6 Rf7

[26...Rg6 27.Qh7]

27.f4 Kd7 28.h7

[Instead, White can get a draw with 28.Qe5 Bd6 29.Nf6+ Ke7 30.Nd5+]

[White could also try 28.g3 and there are 6 pages of possibilities; however passed pawns must be pushed.]

28...Rc8! TH: A "mysterious R move" but on this square the R is defended so that the f8−B is unpinned. MAX:A superb defensive move. Other moves by Black were losing. For example:

[28...Rg7 29.Nf6+ Ke7 30.Nh5 Rf7 31.Qg8]

[28...Bxd5 29.cxd5 c4 30.d6!! a pawn in time saves nine Rg7 31.Qg8 Rxb2 32.g4+− etc.]

29.f5

[29.Nf6+ falls short]

29...Bxd5

[29...Rxf5 takes the eye off the ball 30.Qf6! followed by promotion on h8 because Rxf6 31.Nxf6+ is check]

[29...Bxf5?? 30.Qg8 Rxh7 *(30...Rg7 31.Nf6+* 32 and Qd5 *)* 31.Nf6+ and Nxh7]

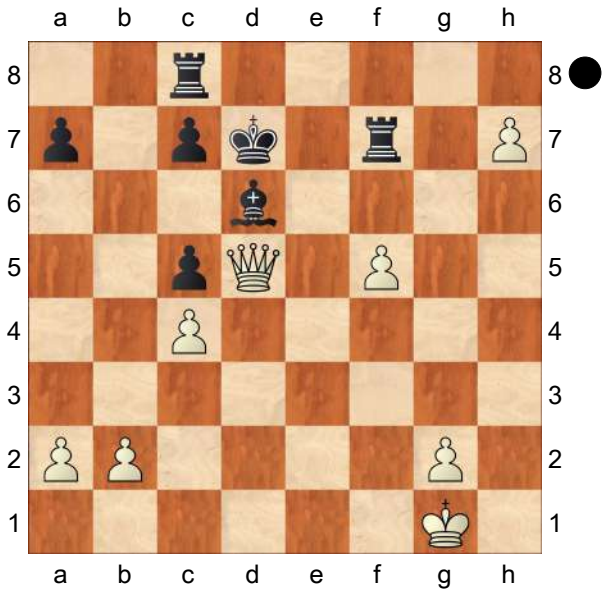
30.Qe5 Bd6

[Black's chances to grab the h7 pawn is a trap: 30...Rxh7? 31.Qxd5+ Ke8 *(31...Ke7 32.f6+! Kxf6 33.Qf3+ Ke5 34.Qe3+ Kf6 35.Qf4+)* 32.Qe6+ Kd8 33.Qg8 Re7 and the killer 34.f6 for White.]

31.Qxd5 Diagram

(Diagram)

Normally, two rooks and a B would eventually outgun a Q but here there is the little matter of White's three extra pawns − connected passed pawns − which not only mean that he has promotion potential, but also serve to give his K much more protection than its



opposite number. Nevertheless, nursing the pawns to victory is no easy matter.

31...Rff8

[31...Rxh7 would cost a R because of 32.Qe6+ Kd8 33.Qg8+]

[Instead of ...Rff8, Black can do better with 31...Re7!

A) Not now 32.f6 which makes the pawn too vulnerable Re1+ 33.Kf2 Re6 *(33...Re5?!; 33...Rce8? 34.Qh5)* 34.Qg5 *(34.Qf5= RRBe5 35.g4 Bxf6 36.g5 Bxb2 37.g6 Rf8! 38.Qxf8 Rf6+ 39.Qxf6 Bxf6)* 34...Be5 35.Qg7+ Kd6 36.Qg8 Rxf6+ 37.Ke2 *(*not *37.Kg1? Bd4+ 38.Kh2 Rff8)* 37...Rcf8 38.Qd5+ Ke7 39.Qxc5+=;

B) 32.Qg8 is equal;

C) 32.b4!?

C1) Δ32...Re1+ 33.Kf2 Re5 34.Qd3 almost transposes to 32... Rce8 says Max ("sneaky") *(RR34.Qf7+ Re7* and *35.Qg8* does not work because after *Rce8!* Black will have a perpetual check*; 34.Qf3 Rh8 35.Qh3 cxb4∞)* 34...Rf8 35.g4 cxb4 36.Qd4 c5 37.Qd1 TH: I find it hard to believe that White can be winning this;

C2) 32...cxb4 33.c5 Re1+ 34.Kf2 Re5 35.Qf7+ Be7 36.Qc4 "winning later";

C3) 32...Rce8 33.Qd3 *(33.g3±* is better says Max *)* 33...Re3! On either 33...Kc8 or 33...cxb4 White is probably winning later. I have a zillion lines here before I discovered how good ...Re3! is. 34.Qd2 *(*Not *34.Qxe3 RRRxe3 35.h8Q Bg3* Black threatens mate by ...Re1 and White must keep checking *)* 34...R3e5 *(*Not *34...Re1+ RR35.Kf2* and the R must go back *)* 35.Qh6 *(*Not *35.Qg5* as *cxb4;* Perhaps *35.bxc5* is okay *)* 35...Rxf5 and Black is looking fine. The position still makes me dizzy; it would take hours to figure out.]

32.Qe6+ Kc6 33.g4 Qe4+ is another wave of possibilities. We opt for simplicity − push the pawns!) **33...Rce8 34.Qh6** White must be careful as Black has drawing lines if one mis−step. For example

[34.Qg6? Re1+ 35.Kg2 Rfe8 and I cannot queen without getting perpetually checked.]

34...Kd7 35.f6! Be5 36.g5 Again I considered a check first (Qg7) but with so many complications, strategy must rule. (Push the ever loving pawn.) **36...Bxb2** To drive his pawns forward, White needs some more support. Send for the K! **37.Kf2 a6 38.Kf3 c6 39.Kg4 Bd4 40.Kf5 Bc3 41.Kg6** Very interesting was

[41.Qg7+ Kd6 42.Qg6 as Black's 42...Re5+ loses. So does 42...Re2 but

he plays 42...Kd7 and again too many choices.]

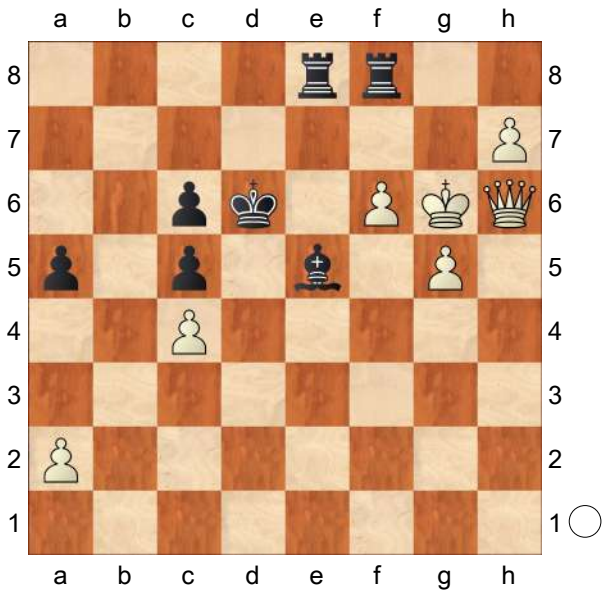
41...Kd6 Black must move his king as on [41...Bd4 there is the backdoor 42.Qh3+ Kd6 43.Qg3+ Kd7 (the threat all along) *(*if *43...Be5* (to block the check from Qg3+) then *44.Qa3 Ra8 45.Qd3+ Bd4 46.Qg3+ Be5 47.Qe1* (the point is e7) Which is the real attack, not the pawn at a6 and now we have forced the same position as in the Kd7 line. *)* 44.Qa3 Ra8 45.Qh3+ Kd6 46.Qg3+ Kd7 47.Qe1 Rae8 48.Qa5 Ra8 and the white queen is in behind the lines for mayhem. For example 49.Qb6 Kd6 *(49...Rfb8 50.h8Q! ΔRxh8 51.Qb7+ Kd6 52.Qe7#)* 50.Qb7 Rae8 51.Qxa6 and now another footloose pawn. Anyway that is general idea so Black must be very careful to avoid the end around trick.]

42.Qg7 Max now forces Black to put his pieces on inferior squares by tempoing back and forth. **42...a5 43.Qh6?**

[RR43.a4!]

43...Be5? Diagram

[RR43...a4! After 43...a4! can White simply go back to a7 now that the pawn can't be protected by the bishop? (pushing it to a3 would allow forks with Qh3+ or Qg3+). The answer is no. 44 Qg7 Rh8 45 Qa7 Bd2! is the same as 42...Rh8 43 Qa7 Bd2!. In that line White plays 43 Qb7 and answers 43...Bd2 with 44 Qb2!. But after 43...a4 44 Qg7 Rh8 of course 45 Qb7 does nothing. Therefore, in the note to 43 Qh6?, third paragraph, after "so that Qe1 can be met by ...Rae8" add: ", while if 44 Qg7 Rh8 45 Qa7 Bd2! 46 Qxa4 Re5 succeeds again."]



And now not 44 a4 which could be a draw but instead the surprise **44.Kf5!** Exploiting the black bishop as a target.

44...Bd4

[44...Kd7? 45.Qxf8 Rxf8 46.Kxe5]

45.f7+ Discovered check.

[Also winning is 45.h8Q Rxh8 46.f7+ Kd7 47.fxe8Q+ Rxe8 48.g6]

45...Kc7

[If 45...Kd7 46.g6 Rb8 47.Ke4]

46.g6 Kd7 47.Kg4! One of my best games. It required everything from home cooking to long range strategic planning and fighting chess to the very end to avoid a draw against an undefeated opponent.

[47.Kg4 1−0. If Re4+ 48.Kh3 Re3+ 49.Qxe3 Bxe3 50.g7 and three pretty pawns like peas in a pod.]

1−0

□ **S.Tiviakov**
■ **I.Ivanisevic**
Greek Team Championship, Kallithea
[John Emms]

In the next three games we consider lines where Black plays an early ...d5, the most popular of which is 6...d5. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3 d5 7.exd5**
Capturing is definitely the most challenging response to 6...d5.
[If 7.Nbd2 , Black's most straightforward course of action is dxe4 8.dxe4 Bc5! 9.c3 Qe7 reaching a position with equal chances. I should stress that, as we've seen in similar positions, there's still plenty of scope for either side to outplay his opponent.]
7...Nxd5 8.Re1
[This is White's sharpest try, and perhaps the most critical. The safer 8.h3 is considered in the next game.]
8...Bg4
[8...Bf6 looks like the only decent alternative, although even here Black soon feels obliged to pin the f3−knight: 9.Nbd2 *(9.h3* 9 is also possible, transposing to 8 h3 Bf6 Re1 *)* 9...Bg4 10.h3 Bh5 11.Ne4 Nf4 *(* if *11...Re8* I like *12.c3 Bg6 13.a3* with Ba2/Qb3 ideas,*;* while *11...Nd4* is met by *12.g4)* 12.Ng3 Bxf3 *(12...Bg6 13.d4!* undermines the knight on f4 *)* 13.Qxf3 Nd4!? *(13...Rb8 14.Qe4 Ng6 15.c3 Bg5 16.Nf5* left White with strong light−squared control in A.Beliavsky−G. Agzamov, Spartakiad 1981 *)* 14.Qxb7 Rb8 ("intending ...Rxb3" - Beliavsky) and now I think White has a promising queen−for−pieces exchange: 15.Qe4 Rb4 *(* or *15...Rxb3 16.cxb3 Nc2 17.Be3 Nxa1 18.Rxa1 Qxd3 19.Bxf4 Qxe4 20.Nxe4 exf4 21.Nxf6+ gxf6 22.Rc1)* 16.Bd2! Nde2+ 17.Rxe2 Rxe4 18.Rxe4 .]
[8...f6?! is unwise. Both 9.d4! *(* and *9.Nc3 Be6 10.d4!)* 9...exd4 10.Nxd4 should lead to at least some advantage for White. As a rule of thumb, Black should avoid ...f6 if White can answer immediately with d4.]
9.h3
[If White wishes to avoid the sharp positions arising after this move, he can play 9.Nbd2!? . This shouldn't lead to any significant advantage as long as Black is careful, but again there are enough possibilities to keep things interesting. f6 10.h3 Bh5 11.c3 (White must prevent ...Nd4) Kh8 12.Ne4 Qd7? *(* instead Black should play something like *12...Na5 13.Bc2 c5)* was D.Pikula−Z.Petronijevic, Cetinje 1993, and here both players overlooked the possibility of 13.Nxe5! winning a pawn - Nxe5 14.Qxh5 Nxd3 loses to 15.Rd1 .]
After 9 h3 Black has to make a big decision: should he exchange on f3 and enter a long forcing sequence, or retreat and sacrifice his e−pawn to induce a weakness on White's kingside? Both choices lead to very complicated positions, albeit ones which are quite different in character. **9...Bxf3**
[9...Bh5 offers a Marshall−style gambit: 10.g4! *(10.Nbd2* is likely to lead to the 9 Nbd2 note, above, after *f6)* 10...Bg6 11.Nxe5 Nxe5 12.Rxe5

c6 . White's kingside is compromised because of the advanced g−pawn. On the other hand, in contrast to the Marshall Gambit in the Ruy Lopez, White is able to develop his queenside much more quickly. Indeed, a recurring theme here is how White tries to overcome his weaknesses by striving for piece activity. Accurate play is required, but objectively White could be doing well here. For example, 13.Qf3!

A) 13...Bf6 14.Re2 Kh8 15.Bxd5 cxd5 16.Nc3 Bxc3 17.bxc3 Rc8 was seen in no lesser game than V. Kramnik−G.Kasparov, Novgorod 1995, and here Kramnik indicates that White can maintain an advantage with either 18.Bd2 *(*or *18.Be3 Rxc3 19.Bd4 Rc6 20.Rae1)*;

B) 13...Bd6! 14.Re2! and now:

B1) 14...Qh4 15.Bxd5 cxd5 16.Nc3 Kh8 *(16...d4 17.Nb5)* 17.Qxd5! Rad8 18.Bg5 Qxh3 19.Qg2 Qxg2+ 20.Kxg2 with an extra pawn and a significant advantage for White, J. Nunn−J.Fernandez Garcia, Lugano 1983.;

B2) 14...Kh8 15.Nc3 Nxc3 16.bxc3 f5 *(16...Qh4 17.Bd2 f5 18.Rae1 fxg4 19.Qxg4* forces Black to lose time retreating his queen, V.Dimitrov−M.Vucic, Elenite 1986 *)* 17.g5 *(*Dolmatov assesses *17.Qg2* as a "⩲" but I prefer this more active move *)* 17...f4 18.h4 . If Black now plays h6 , White can go on the offensive: 19.Bb2 hxg5 20.c4 gxh4 21.Kh1 . Suddenly, with Rg1 and c5 looming, it's Black's king which is being attacked!;

B3) 14...f5 15.Nc3! (again active development is key) fxg4 *(*or *15...Kh8 16.Nxd5 cxd5 17.g5!)* 16.Qxg4 Rf5 *(16...Bf5 17.Qh5)* 17.Ne4! (this is a strong square for the knight...) Be5 18.d4!? (...not so strong now, but this move is tactically justified) Bxd4 19.Ng3! Qf6 20.Nxf5 Bxf5 21.Qg2 Kh8 22.Bg5 Qg6 23.Bxd5 cxd5 24.c3 Bb6 25.Bh4 Qc6 26.Re7 Rg8 27.Rae1 Be4 28.Qg4 Bc5 29.Rd7 b5 30.Be7 Bb6 31.Bd6 Bc5 32.Be5 Bf8 33.Rxa7 and 1−0, M.Mathias−K.Elison, correspondence 1997. Because the positions are so complicated it would be nice to see some more games, preferably involving someone like Tiviakov, before making a definitive judgement. At the moment, though, the signs are looking promising for White.;

B4) 14...−−]

10.Qxf3 Nd4! If Black just retreats the knight from d5, White can count on some advantage due to his gain of the bishop pair and light−squared control.

11.Qxd5

[Other queen moves allow Black comfortable equality. For example, 11.Qe4 Nxb3 *(*or *11...c6!? 12.Qxe5 Bf6 13.Qh5 Nb4 14.Qd1 a5 15.Na3 b5* with decent compensation, I. Nepomniachtchi−A.Naiditsch, European Championship, Dresden 2007 *)* 12.axb3 Bf6 .]

11...Qxd5 12.Bxd5 Nxc2 13.Rxe5! It's the discovery of this move which has breathed new life into 8 Re1, although at the time of writing I have found only three games with it, two by Tiviakov. Instead of trying to win the a1−bound knight straightaway, White grabs two key pawns (e5 and b7). He will be the exchange down, but the knight on a1 will remain trapped and White will still hope to capture it at a later stage. Furthermore, it will be difficult for Black's rooks to enter the game. It's difficult to make a judgement with any certainty because the material is still quite scarce, but it's reassuring for us that Tiviakov has been willing to enter this position more than once. Just as reassuring is the fact that 13 Rxe5 is Rybka's preference!

[Previously White had chosen 13.Bd2 , but Nxa1 14.Rc1 Rad8 15.Nc3 c6 16.Bf3 Rxd3 17.Be3 Bb4 18.Be2 *(*maybe *18.Be4!?* , intending *Rd7 19.Bf5* , is an improvement *)* 18...Rd7 19.Rxa1 Ba5! , intending ...Bb6, probably ensures Black of at least equality, S.Dizdar−A.Mikhalchishin, Zenica 1989.]

13...Bd6 Alternatively:

[a) 13...Rae8 14.Re2 Nxa1 15.Bxb7 Bd6 16.Be3 transposes to the game.]

[b) 13...Rfe8 14.Re2 Nxa1 15.Bxb7 Bg5! (! - Naiditsch) 16.Be3 Rad8 is assessed as unclear by Naiditsch. As far as I can see, White's best course of action is to play the position 'normally', just ignoring the trapped knight on a1 for the moment. For example, 17.Ba6 g6 18.Bc4 Kg7 19.Nc3 Bxe3 20.fxe3 Rb8 21.b3 f5 22.Kf2 and now White is finally ready to win the knight with Ke1−d2 and Re1. It's not clear what Black can do to prevent this, and Rybka's evaluation increases once it begins to appreciate Black's problem.]

[c) 13...Bf6 14.Re2 Nxa1 15.Bxb7 Rab8 *(*if *15...Rae8* , White must of course avoid a rook exchange by playing *16.Be4)* 16.Be4 Rb6 17.Na3! Rfb8 18.Nc4 Ra6 19.b3 Nxb3 (this looks like a radical solution, but it's difficult to suggest what else Black should do) 20.axb3 Ra1 21.Rc2 Rxb3 22.Kh2 a5 23.Bf4 a4 24.Be5 Re1 25.Bxf6 gxf6 26.Ne3 a3 27.Rxc7 Rb8 28.Ra7 Re2 29.Rxa3 Rxf2 30.Kg3 Rfb2 31.Ra7 h5 32.Nf5 Rd8 33.Nh6+ and 1−0, G. Souleidis−J.De Jong, Dutch League 2007.]

14.Re2 Rae8

[14...Nxa1 15.Bxb7 Rae8 16.Be3 comes to the same thing.]

15.Be3 Nxa1 16.Bxb7 Re5?

[Tiviakov's previous outing in this line went 16...f5 17.Bd5+ Kh8 18.g3 f4 19.gxf4 Bxf4 20.Na3 Re5 21.Bg2 Bxe3 22.fxe3 Rd8 23.Re1 Rxd3 24.Nc4! Nc2 25.Rc1 Rexe3 26.Rxc2 Re7 and White definitely has winning chances, although Black eventually managed to hold in S.Tiviakov−J. Hector, Helsingor 2008. In any case, this looks like a better defence for Black than the game continuation.]

17.Nc3 Rb8 18.Bc6 Ra5 19.g3 Kf8 20.d4 This reminds me of the Souledis−De Jong game. White slowly improves his position, doesn't even acknowledge the knight's existence in the corner and simply pretends that he has an extra

piece. Black, whose rooks are not making any headway at all, soon runs out of patience, but I think he is already in some trouble here. **20...h6 21.Na4 g5 22.b3! Nxb3 23.Rb2! Ra6 24.d5 1−0**

[7.Bd2 Nxe4 8.Bxb4 Nxb4 9.Qb3 d5 10.Qxb4 dxc4 11.0−0 Nd6 12.Re1+ Kf8 (0.30)]

7...0−0?! Castling early in the game is generally sound strategy. In this case it is inappropriate, as White's centre is formidable and must be destroyed. Black must play 7 ... Nxe4, accepting the offer of a pawn, and take his chances of surviving whatever attack might follow. It cannot be worse than this passive castling, which results in both his knights being evicted from their fine posts. Pillsbury gave as his rule, which he said was absolute and vital: "Castle because you want to or because you must, but not because you can."

[7...Nxe4! 8.0−0 Bxc3 9.bxc3 d5 10.Qc2 0−0 11.Bd3 Re8 12.Rb1 (−0.30)]

8.d5 Ordinarily, such moves are suspect, as D5 should be occupied by a piece, but here the pawn dislodges the knight and prevents Black forever from freeing his game by ... d5.

[8.e5 Ne4 9.0−0 Nxc3 10.bxc3 d5 11.Bd3 Bxc3 12.Bxh7+ Kxh7 13.Qd3+ Kg8 14.Ng5 g6 15.Qxc3 f6 16.Nf3 Bg4 17.Nh4 Bh5 18.Re1 fxe5 19.Qg3 Qf6 20.dxe5 Qe6 (1.00)]

[8...Na5?! 9.Bd3]

9.e5! Ne4! The second attack on the C3−kNight. **10.Qc2!** Protects his own knight and threatens the enemy's.

10...Nxc3

[10...f5?? 11.d6+ Kh8 12.dxe7]

11.bxc3 This recapture gains a tempo: Black's bishop must lose a move retreating, while White's advantages multiply. Now he enjoys an open B−file for his rook and an extra diagonal (C1−A3) for his dark−squared bishop.

11...Bc5 This offers better chances than moving to a5, the only other flight square. A comparison of the two sides' positions shows that White's is decidedly superior. He has more pieces in play, and they have far more mobility than Black's. He also has better prospects of bringing more pieces into the battle. The recommended recipe now is to occupy Black with threats − keep him on the run and give him no time to put up effective resistance. **12.Ng5!** Ostensibly to scare Black by the threat of mate (on H7); actually, the purpose is to induce a weakening advance of one of the king's retinue of pawns. If one of these pawns does move, Black is done for! For example, 12 ... f5 13. d6+ wins a piece, or if 12 ... g6, then 13. Ne4 forces 13 ... Bb6, when 14. Bh6 drives the rook to E8, and 15. Nf6+ wins the exchange.

12...Ng6! The only defence! The kingside pawns remain intact, but Black

has been compelled to place his pieces where White wants them. Under such circumstances the chances of Black putting up a good fight are not too bright. White must avoid Black's error of castling as a matter of routine development. Such a quiet course would give Black time to play 13 ... d6 or 13 ... h6, beating the knight back. White must not give his opponent a moment to catch his breath. He must attack, attack, attack! **13.h4!** Threatening to move on to H5, dislodging the knight, and then mate with the queen. **13...h6??**

[13...Qe7 14.h5 Qxe5+ 15.Kd1 d6 16.hxg6 Bf5 17.gxf7+ Rxf7 18.Qe2 Re7 19.Qxe5 Rxe5 20.Bf4 Re7 21.Re1 Rae8 22.Rxe7 Rxe7 23.f3 h6 24.Ne6 Bxe6 25.dxe6 g5 26.Bd2 (4.00)]

[13...d6 14.h5 Qe7 15.hxg6 Qxe5+ 16.Kd1 hxg6 17.f3 Bf5 18.Qd2 Qg3 19.Qf4 (3.20)]

14.d6! A powerful stroke! Black's bishop is cut off from the defence, while a line is opened for White's bishop. White now threatens 15. Qxg6, as the pinned F−pawn could not capture the queen.

14...hxg5?

[14...Kh8 15.Bxf7 Rxf7 16.Nxf7+ Kg8 17.Nxh6+ Kh8 18.Nf7+ Kg8 *(18...Kh7 19.h5 Bxf2+ 20.Kxf2 Kg8 21.hxg6 cxd6 22.Rh8#)* 19.Qxg6 cxd6 20.Bh6 Qf8 21.Ng5 Qxf2+ 22.Kd1 Kf8 23.Nh7+ Ke7 24.Bg5+ Qf6 25.Bxf6+ gxf6 26.Qxf6+ Ke8 27.Qf8#]

15.hxg5 The knight will not run away (the penalty being 16. Qh7#). Meanwhile, the rook has a lovely open file, and the queen still threatens to capture the knight.

[15.Qxg6 Qe8 16.hxg5 Qxe5+ 17.Kf1 Bxf2 18.Qh7#]

15...Re8 The king needs more room!

16.Qxg6 Regaining the piece without relaxing the pressure. White threatens one mate in one, and two mates in two: 17. QXf7# 17. Qh7+ Kf8 18. Qh8# 17. Bxf7+ Kf8 18. Rh8# **16...Rxe5+ 17.Kf1** And Black resigned.

[17.Be3 Rxe3+ 18.fxe3 Qe8 19.Qh7+ Kf8 20.Qh8#]

□ **S.Tiviakov**
■ **R.Buhmann**
Neustadt an der Weinstrasse 2009
[John Emms]

Sergei Tiviakov is one of the Italian Game's greatest advocates. He's always coming up with new and interesting ideas, and it's no coincidence that his games are featured more than anyone else's in this book.
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d6 8.Nbd2 0−0 9.Nf1 d5 10.Qe2 Be6
This is a good move. Black increases the tension by introducing the possibility of a bishop exchange after a trade on e4. White can react either solidly or aggressively.
[If 10...h6 , White can continue with **A)** but 11.g4!? is an attractive alternative, especially now that Black has given White's attack a 'hook' with ...h6. The game V. Komliakov−I.Yagupov, Russia 1995, demonstrates some of White's attacking possibilities: dxe4 12.dxe4 Nd7 (the typical reaction to g2−g4 - Black's knight heads for e6) 13.Ng3 *(* I quite like *13.Ne3!? Nc5 14.Bc2* , when the knight can also go to d5 - compare Gonzalez−Gomez *)* 13...Nc5 14.Bc2 Ne6 15.Nf5 Re8 16.h4 Nf4 17.Bxf4 exf4 18.Rd1 Qf6 19.g5 hxg5 20.hxg5 Qg6 21.N5h4 Qh5 22.Qd2 Bc5 23.g6 Bd6 24.gxf7+!? *(* Rybka prefers the paradoxical *24.Qd5!* , because even after an exchange of queens White keeps an initiative: *Qxd5 25.Rxd5 Be6 26.Rh5* etc *)* 24...Kxf7 25.Rg1 Bg4 26.Bb3+ Kf6 27.Rxg4!? Qxg4 28.Qd5 Ne5 29.Nxe5 Rxe5?? *(* after *29...Bxe5* there's nothing obvious for White; now the attack is decisive *)* 30.Qf7+ Kg5 31.Kd2! Kh6 32.Rh1 Qh5 33.Nf5+ Rxf5 34.exf5 and Black resigned.;
B) 11.Ng3 ,]
[10...Re8 is more solid.
A) Black doesn't fear 11.Bg5 because he plans to meet it with dxe4 12.dxe4 Be6 , followed typically by an exchange of bishops on b3 and the queen working her way to e6. For example, 13.Rd1 *(* I haven't found any games with *13.Bc2!?* , but this looks like the sort of move Tiviakov might choose *)* 13...Qe7 14.Ne3 Bxe3 15.Qxe3 Bxb3 16.axb3 Qe6 17.Bxf6 Qxf6 18.0−0 Qe6 19.Rd5 f6 with a level position, V. Iordachescu−Z.Gyimesi, Romania 2004.;

B) If 10...Re8 is met by 11.Ng3 , Black can play h6 safe in the knowledge that White no longer has aggressive g2−g4 ideas at his disposal. Even so, there are some interesting possibilities here:

B1) 12.0−0 Be6 13.Rd1 (otherwise Black might play ... Na5, ...dxe4 and ...Bc4) Qe7 14.Nh4 dxe4 15.Nhf5 Qf8 16.dxe4 Bxb3 17.axb3 Ne7 18.Qf3 (threatening Nxh6+) Nxf5 19.Nxf5 Re6 (K.Landa−M. Adams, Enschede 2006) and here 20.b4 introduces the possibility of b5 at some point. White's position is the more comfortable, even if Black might be able to equalize with accurate play.;

B2) White can also begin kingside action with 12.Nh2!? . This move offers more chances for both sides to unbalance the position. For example, Be6 13.Ng4 dxe4 14.dxe4 Bxb3 15.axb3 Re6!? *(15...Nd7?* allows *16.Bxh6! gxh6 17.Nxh6+ Kf8 18.Qg4* - Kobalija - which is very good for White *)* 16.Bd2 Ne7 17.0−0−0!? Qe8 (M.Kobalija−M.Sorokin, Russian Championship 2005) and here Kobalija gives 18.Nf5!? Rd8 19.Be3 Bxe3+ 20.Qxe3 with an unclear and roughly level position.;

B3) After 12.Nh4 White has to watch out for ...Nxe4 tricks. For example, Na5 13.Bc2 Nxe4!? 14.dxe4 Qxh4 15.exd5 Nc4 .;

B4) 12.−−;

C) 11.−−]

Let's return to 10...Be6. What should White play? **11.Bc2!?** Here's that 'mysterious' bishop move again!

[11.Ng3 has been White's most popular choice in practice. With accurate play Black has very good chances of reaching a level position, but this move might still appeal to those who prefer more simplified positions. Play normally continues dxe4 *(*there's also *11...Na5!? 12.Bc2 dxe4 13.dxe4 Bc4! 14.Qd2 Qxd2+ 15.Nxd2 Be6 16.Nf3 Nd7* , as in E.Vorobiov−V.Diu, Krasnodar 2002; this looks fairly level and I'm surprised we haven't seen it more often *)* 12.dxe4 Bxb3 13.axb3 and now:

A) 13...Qd7 14.0−0 Qe6 15.b4 h6 and here the plan of 16.Nh4 intending Nf5 forces Black to defend with some accuracy: Kh7! 17.Nhf5 Ne7 18.Be3 *(*perhaps *18.Nxe7 Qxe7 19.Nf5 Qe6 20.Qf3)* 18...Nxe4!? *(18...Bxe3* looks wiser, and equal *)* 19.Qg4 g6 20.Qxe4 Nxf5?! *(*better is *20...gxf5! 21.Qxb7 Bxe3 22.fxe3 c6* with g−file counterplay *)* 21.Nxf5 Qxf5 22.Qxb7 Bxe3 23.fxe3 Qd3 24.Qxc7 Qxe3+ 25.Kh2 Kg8 26.Rf6 with some advantage for White, L.McShane−Z.Gyimesi, German League 2006.;

B) 13...Ne8! again reroutes the knight to d6, a more favourable square. This seems to be a reliable option for Black:

B1) 14.Nf5 Nd6 15.0−0 *(15.g4* is aggressive, but after *Qf6 16.h4 Qe6 17.b4 f6! 18.h5*

Rad8 19.N3h4 Rd7 , V.Bologan−V.Malakhov, Kemer 2007, it's not clear what White does next *)* 15...Ne7 16.Nxd6 Qxd6 17.Rd1 Qe6 18.Qc4 Qxc4 19.bxc4 Rad8 with equality, V.Bologan−V. Georgiev, Wijk aan Zee 2007.;

B2) 14.Nd2!? Nd6 15.Nc4 Nxc4 16.bxc4 Ne7 17.0−0 Qd6 18.b3 Rfd8 19.Ba3 Qf6 , again with a level position, L. McShane−J.Werle, London 2009.;

B3) 14.−−;

C) 13...−−]

[Against 11.Bg5 Black can employ a similar plan to reach a level position: dxe4 12.dxe4 Bxb3 13.axb3 Qd6 14.Ng3 Qe6 15.b4 Ne8 16.0−0 f6 , S.Movsesian−V.Topalov, Tripoli (rapid) 2004.]

[Finally, although in some positions White can contemplate meeting ...Be6 with Ng5, I don't think this is one of them. There are various pros and cons to weigh up about an exchange of knight for bishop on e6, but here the debate might even be redundant, due to tactical reasons: 11.Ng5 dxe4!? *(11...Qe7 12.Nxe6 fxe6* is solid *)* 12.Bxe6 *(*or *12.Nxe6 exd3 13.Nxd8 dxe2)* 12...exd3 13.Nxf7 Rxf7 *(13...Qe7 14.Ng5+ Qxe6 15.Nxe6 dxe2 16.Kxe2 Rf7* is equal *)* 14.Bxf7+ Kxf7 with good compensation for the exchange.]

11...dxe4

[11...d4 must be a consideration here.]

[There's also 11...b5!? with the intention of playing ...Bc4 - after exchanging pawns - to force a queen exchange: 12.Ng3 *(*White could try *12.Ng5* , the idea being that after *Qe7 13.Ng3* the queen now has space on f3: *dxe4 14.dxe4 Bc4 15.Nf5 Qd7 16.Qf3* etc *)* 12...dxe4 13.dxe4 Bc4 14.Qd2 , as in A.Maier−A.Stoer, Augsburg 2003.]

12.dxe4 Nh5 We've already seen this idea in a similar position (Gonzalez Vidal−Gomez), and White's response is the same.

[12...Qe7 13.Ng3 would transpose to Tiviakov−Sargissian.]

13.g3 h6 This move certainly has its uses, but Black must always be a bit wary about playing it unprovoked.

[In D.Howell−M.Mchedlishvili, Dresden Olympiad 2008, Black instead chose 13...Nf6 . The young English grandmaster responded with the bold 14.Bg5!? h6 15.Bh4!? - bold, because it gives Black the opportunity to trap the bishop with ... g5. Having said that, it's possible that the execution is weaker than the threat, because g5 16.Nxg5 hxg5 17.Bxg5 Kg7 18.f4! left White with tremendous play for the piece. Indeed, after Qd6 19.f5! Bc8 20.Rd1 Qc5 21.Ne3 Rh8 22.Nd5 Nxd5 23.Rxd5 Qb6 24.Bb3 Kf8 25.h4 Rg8? , White could have reached a winning position with 26.Qh5! . Black doesn't have a decent defence to the threat against f7 after the d5−rook moves: for example, Ke8 27.Rd6!! Rf8 28.Bxf7+! Rxf7 29.Rf6 Qf2+ 30.Kd1 etc. It's very possible that Black should avoid ...g5 at that moment and instead choose something like 15...Qe7 (or 14...Qe7 a move earlier)

when the position remains doubled edged.]

14.Ne3

[White must avoid 14.Nxe5? Nxe5 15.Qxh5 Nd3+ 16.Bxd3 Qxd3 .]

14...b5 15.Nh4! Tiviakov carries on with the typical attacking plan on the kingside. **15...Nf6 16.Nhf5 Ne7**

[Black can try to change the character of the position by playing 16...Bxe3!? . Exchanging the a7−bishop for a knight on e3 is an underrated defensive resource in many lines. The bishop on a7 looks impressive, but when White goes for an all−out assault on the kingside there's a danger it might become an uncomfortable spectator. It's a fierce battle between the bishop and knight pairs after 17.Bxe3 *(* alternatively, if White is unwilling to alter the pawn structure, the slower *17.Nxe3* is possible, planning Kf1−g2 and/or g3−g4 followed by Nf5 *)* 17...Bxf5 18.exf5 Qd5 19.0−0 e4 20.f3!? .]

17.g4 It's still possible to castle kingside, but Tiviakov senses blood! **17...Ng6 18.Ng2!** Preventing ...Nf4 - sometimes you have to go one step backward before going two steps forward. Black is afflicted by a typical malaise. His pieces look well placed and there seems to be nothing much wrong with his position. In fact, objectively maybe there's isn't; it's just irritatingly difficult to come up with an effective plan. In the game, Buhmann begins to drift. Meanwhile, Tiviakov slowly edges forward on the kingside. **18...Nd7**

[18...Qd7 intending ...Rad8 looks stronger.]

19.h4 Nc5 20.Qf3 Re8 21.Bd2 c6 22.b3! White wants to castle queenside before going any further, so he blocks the attack on a2. This seems to invite ... a5, but Tiviakov has calculated that his attack will be the quicker. **22...a5 23.0−0−0 a4**

[This doesn't work, but after 23...Qc7 24.h5 White's attack is breaking through very quickly: Nf8 *(* or *24...Ne7 25.Nxh6+! gxh6 26.Bxh6 Bc8 27.Qf6 Ne6* , and now *28.Bf4!* is the move Rybka wants to win with! *)* 25.Nxg7! Kxg7 26.Bxh6+ Kxh6 27.Qf6+ Kh7 28.h6 and Qg7 mate.]

24.Bxh6 Qb6 25.Nxg7 axb3 26.Nxe8 bxa2

[Or 26...Rxe8 27.Qf6 .]

27.Nf6+ Kh8 28.Kd2!

[This is much stronger than 28.Kb2? b4! .]

28...Nf4

[Perhaps Buhmann had initially thought that 28 Kd2 was impossible because of 28...Rd8+ . Here 29.Nd5! is the only move, but it's a very effective one.]

29.Nxf4 exf4 30.Qxf4 Bc4 31.Ke1 Rd8 32.Ra1 Qa5 33.Nd5! A wonderful attacking display by Tiviakov, and a great advert for the Modern Variation. There's no doubt that this opening requires a certain amount of subtlety. But if you get it right, as Tiviakov does here, it can be very rewarding.

□ **Mackenzie,H..**
■ **Daniel,S..**
Birmingham (rapid) 2012
[Adam Hunt]

The following was a really good battle from the recent National Girls Rapidplay finals at which I was coaching. White (graded 102) embarks on a direct attack against the uncastled king. Here we are going to put ourselves in Hannah's shoes and see if we can attack the black king! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3** A well−known position from the Giuoco Piano has arisen. **7...Nxe4!** The critical challenge to White's opening strategy.
[Instead 7...0−0 8.Bg5 *(8.e5 Ne4 9.Qc2 d5!)* 8...d6 gives White a very pleasant position after 9.0−0 .]
8.0−0 Nxc3?!
[8...Bxc3! is correct, with the following variations:
A) 9.d5! leads to some absorbing lines:
A1) 9...Ne5 10.bxc3 Nxc4 11.Qd4 Ncd6?! *(11...0−0* was the choice of both Anand and Karpov and certainly seems like the safest *)* 12.Qxg7 Qf6 *(12...Rf8 13.Re1 Qe7* also seems playable *)* 13.Qxf6 Nxf6 14.Re1+! Kf8 *(14...Kd8 15.Bg5* is curtains *)* 15.Bh6+ Kg8 16.Re5! Nfe4 , and now it seems that *(16...Nde4* is beautifully met by *17.Nd2!! d6 18.Nxe4 dxe5 19.Nxf6#)* 17.Nh4 with the idea of f2−f3 is crushing: for instance, b6 *(17...f6 18.Re7)* 18.f3 Ba6 19.fxe4 f6 20.Re7 Nf7 21.Nf5 with a winning position for White. Just look at the rook on h8 if you don't believe me!;
A2) 9...Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 h6 *(13...0−0 14.Nxh7 Kxh7 15.Qh5+ Kg8 16.Rh4* is unclear after *f5)* 14.Qe2 hxg5 15.Re1 Be6 16.dxe6 f6 17.Re3 is about equal.;
A3) 9...−−;

B) 9.bxc3? d5! is what Black wants, grabbing back space in the centre when White is just a pawn down.;
C) 9.−−]

9.bxc3 Bxc3 EXERCISE: Perhaps you are well versed in the games of Greco from the 17th century where this position was first seen? −−− If not, how would you continue here? −−− ANSWER: The good news is that there are lots of options and most of them are good! **10.Qb3**

[10.Ba3 , keeping the black king in the centre, is also very dangerous: d5 this seems relatively best; *(10...Bxa1 11.Re1+ Ne7 12.Bxe7 Qxe7 13.Rxe7+ Kxe7 14.Qxa1* is winning for White *)* 11.Bb5 Bxa1 12.Re1+ Be6 and now the new idea 13.Qc2! . White is a rook and two pawns down, but all the pieces are playing! It seems as though Black has to give up the queen to survive: Qd7 *(*if *13...Rc8 14.Ne5 Qf6 15.Bxc6+ bxc6 16.Qxc6+ Kd8 17.Rxa1)* 14.Ne5 Bxd4 15.Nxd7 Kxd7 16.Rc1 with a very unclear position, although I would take White due to Black's exposed king.]

[10.Bxf7+ should have suggested itself as well, but Black is probably okay after Kxf7 11.Qb3+ d5 12.Qxc3 Re8 .]

10...Bxa1 11.Bxf7+ Kf8 QUESTION: So we are a rook down. How to continue? −−− ANSWER: **12.Bg5!** The most energetic. **12...Ne7**

[Sacrificing the queen may again be best: 12...Nxd4 13.Qa3+ Kxf7 14.Bxd8 Rxd8 , although after 15.Ng5+! Kg8 16.Qd3 we can see the effectiveness of the queen and knight as an attacking combination.]

13.Ne5 Hannah revealed after the game that she was still in her preparation!

13...d5

[13...Bxd4 14.Bg6 d5 15.Qf3+ Bf5 16.Bxf5 Bxe5 17.Be6+ is winning for White.]

14.Qf3! Again not letting up.

[The lazy 14.Rxa1 would allow Black some time to reorganize with Qd6 15.Qf3 Nf5 .]

14...Bf5 15.Be6 Despite being a rook and pawn down, White is completely winning. All the white pieces are participating in the attack. **15...h6**

[15...Bxd4 16.Bxf5 Bxe5 leads to disaster on the f−file after 17.Be6+ .]

16.Bxf5 hxg5 17.Bg6+ Nf5! The only move

[17...Kg8 18.Qf7# is mate.]

18.Qxf5+ Ke7 EXERCISE: Can you find the most direct win?

[18...Qf6 loses the queen to 19.Nd7+ .]

19.Qf7+? White gets carried away momentarily and forgets about her rook! It is worth making the point that players are all too often tempted into throwing in checks when other moves are stronger.

[ANSWER: 19.Re1! , introducing the last piece into the attack, forces mate quickly: Kd6 *(*if *19...Bxd4 20.Nc4+ Be5 21.Rxe5#)* 20.Nf7+ Kc6 21.Qc2+! Kb5 *(21...Kd7 22.Bf5#)* 22.Qc5+ Ka6 23.Bd3+ b5 24.Qxb5# .]

19...Kd6 20.Bf5 QUESTION: Black needs a good defensive move and fast! Any ideas? **20...Qe8** The right idea (to exchange queens), but probably the wrong square as it doesn't force the

swap.

[ANSWER: 20...Qe7! would have been the best practical try. The computer doesn't even want to swap after this! −−− EXERCISE: Find a way to keep the queens on! −−− ANSWER: 21.Nc4+!! *(*after *21.Qg6+ Qf6 22.Nf7+ Kc6* Black can breathe more easily *)* 21...dxc4 22.Qxc4 (threatening mate on c5) b6 23.Rc1 .]

21.Qxg7 c6 22.Nf7+ Kc7 23.Nxh8+ Now White is material up with a strong attack. The rest needs no comment. **23...Kb6 24.Rb1+ Ka6 25.Bd3+ b5 26.Ng6 Bb2 27.Bf1 Ba3 28.Qf6 Rd8 29.Rxb5 Rd6 30.Rb4+ Ka5 31.Qxd6 Bxb4 32.Qc7+ Ka4 33.Qxa7+ Ba5 34.Ne5** . Summary: This concludes our discussion of the king hunt. I hope these examples have given you a few ideas that can be useful in your own games as you look to attack the uncastled king. **1−0**

C54

□ **V.Yemelin**
■ **S.Klimov**
St Petersburg 2009
[John Emms]

Now we consider three games in which Black chooses to delay, or completely dispense with, the ...d6−d5 advance. In this first game, White goes all out for an attack - and succeeds! **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.h3 d6 8.Nbd2 0−0**

[If Black plays 8...Be6 (a move earlier than in our main game), White has the possibility of 9.Ng5!? . −− *(*If Black has already castled this move makes little sense. But here *9...Bxb3 10.Qxb3 0−0 11.Qxb7* wins a pawn, as indicated by Ivanchuk, even though Black is not completely devoid of compensation.*;* Instead, the imbalances caused by *9...Qd7 10.Nxe6 fxe6* are not easy to assess. I'm still not 100% certain which side has been favoured more by the exchange on e6. However, White's play in R.Slobodjan−Z.Gyimesi, German League 1997, is certainly worth noting, especially the way he slowly shuts the a7−bishop out of the game: *11.Nf3 0−0 12.0−0 Rae8 13.Kh2 Ne7 14.Nh4 h6 15.g3! g5 16.Ng2 Ng6 17.f4! gxf4 18.gxf4 exf4 19.Nxf4 Nxf4 20.Bxf4 Kh7 21.Qe2 Qf7 22.d4! Qh5 23.Qxh5 Nxh5 24.Be3 Rf6 25.Rxf6 Nxf6 26.Rf1 Rf8 27.Kg2 Rg8+ 28.Kf3 d5 29.exd5 exd5 30.Bc2+ Kg7 31.Bf5 b6 32.Bf4 c6 33.Re1 Re8 34.Rg1+* and Black resigned. *)*]

9.Nf1 Be6 The ...d6 and ...Be6 idea is seen in many lines of the Italian Game. It's a solid option for Black and is favoured by many strong players. In this particular position, for example, both Carlsen and Aronian have played 9... Be6.

[Black sometimes prefaces ...Be6 with 9...h6 , perhaps to avoid the possibility of 9...Be6 10 Bg5 (see below).

A) Here 10.Ng3 Be6 would transpose to the main game,;

B) but White has another option in 10.g4!? . As we've already seen, this aggressive lunge is often a promising way to respond to ...h6.

Here's a young Viktor Bologan demonstrating White's attacking potential and making it all look very easy: Nh7 *(10...d5 11.Qe2* transposes to the note on 10...h6 in Tiviakov−Buhmann *)* 11.Ng3 Be6 12.Rg1 d5 13.Qe2 Re8 *(13...dxe4 14.dxe4 Bxb3 15.axb3 Qd7* followed by ...Qe6 or ...Rad8 might be stronger *)* 14.exd5!? Bxd5 15.Ne4 Bxb3 16.axb3 (I prefer White here) f6 17.h4 Kh8 18.Be3 Bxe3 19.Qxe3 Qd5 20.0−0−0! Qxb3 21.g5 f5 22.Nc5 Qb6? *(22...Qd5* offers a better chance; now the queen is hopelessly out of play *)* 23.gxh6 Rad8 24.Rxg7 e4 25.Ng5 Nxg5 26.Qxg5 Ne5 27.Rh7+! and 1−0, V.Bologan−G. Prakash, Mamaia 1991.;

C) 10.−−]

Let's return to the position after 9...Be6:

10.Ng3

[10.Bxe6?! fxe6 needs to be avoided, here and in many similar positions after ...Be6, for obvious reasons. White shouldn't present Black with an open f−file and extra control of centre squares unless there is a good reason to do so. One good reason is if White can trade his f3−knight instead of his light−squared bishop. Black still gets an open file and some central control, but this time White gains the bishop pair and Black loses some influence over the light squares.]

[10.Bg5 is rare in this position, but part of me is tempted by it. This move is a standard way of trying to exploit Black's lack of ...h6. However, compared to the similar position reached in Emms−Flear, it might not be so effective, since h2−h3 isn't such a vital move here. Even so, I think it deserves attention. It certainly worked out well for White in A.Purtov−R. Farakhov, Alushta 2004:

A) preparing ...Bxb3 followed by Qe6; 10...h6 11.Bh4 g5 12.Bg3 *(* I don't trust *12.Nxg5 hxg5 13.Bxg5* , if nothing else because of *Bxf2+!)* 12...Nh5 is unclear;

B) 10...Qe7 11.Bc2 *(11.Ne3!?)* 11...h6 12.Bh4 d5 *(12...g5!?)* 13.Qe2 dxe4 14.dxe4 Qc5!? 15.Bxf6 gxf6 *(15...Bc4 16.Qd2 gxf6 17.Ne3 Rfd8 18.Qc1* is a critical line - I think I prefer White here *)* 16.Ne3 Rfd8 17.Bb3 Na5? (a blunder, although by now White's advantage cannot be disputed) 18.Bxe6 fxe6 19.Nh4! . This wins a vital pawn: Qe7 20.Qg4+ Qg7 21.Qxe6+ Qf7 22.Qg4+ Qg7? 23.Nhf5 and Black resigned.]

[Finally, 10.Bc2 is also possible. For example, if d5 11.Qe2 we have transposed to Tiviakov−Buhmann.]

10...h6 The most popular choice. Black decides to prevent the possibility of Bg5, and this makes it easier for him to play ...d5 if needed (see the note to Black's 11th move, below).

[The immediate 10...d5 is risky because it invites the pin with 11.Bg5!? *(11.Qe2* is, of course, also possible *)* . Here 11...dxe4 12.Nxe4 Bxb3 13.axb3 appears to be precarious for Black, and it would be without the resource Nxe4! 14.Bxd8 Nxf2 , as played in F.Nemeth−I.

Danilov, Eforie Nord 2008. Even so, White kept an edge in the game after 15.Qc2 Raxd8 16.0−0 Ng4+ 17.Kh1 Ne3 18.Qe2 Nxf1 19.Rxf1 .]

[There's a strong case for Black to exchange bishops immediately, and perhaps significantly 10...Bxb3 is what both Carlsen and Aronian have chosen to do when reaching this position:

A) After 11.axb3 Ne7 12.Nh4 Kh8 13.0−0 d5 14.Qe2 Qd6 15.Bg5 Qe6 16.b4 h6 17.Be3 Bxe3 18.Qxe3 Rad8 19.Ngf5 Nxf5 20.Nxf5 Rd7 21.Rfe1 dxe4 22.dxe4 Kh7 *(22...Rfd8 23.Qg3 Ne8* also looks okay *)* 23.Ra5 b6!? 24.Rxa6 Rfd8 25.Qf3 g6 26.Ne3 Kg7 Black had sufficient play for the pawn to hold the balance in I. Nepomniachtchi−L.Aronian, Mainz (rapid) 2009.;

B) However, 11.Qxb3 Qc8 *(11...Rb8!?)* 12.0−0 Ne7 13.d4 Ng6 14.Bg5 Nd7 15.Nf5 gave Black more problems to solve in K.Kulaots−M.Carlsen, Gausdal 2007.;

C) 11.−−]

Returning to the game, and 10...h6, how should White proceed from here?

11.Nh2! Operations on the kingside begin! This knight can hop into g4, offering a trade of minor pieces. Black has to be careful because an exchange on g4 gives White the opportunity to open the h−file for his rook. One significant advantage White enjoys is that, in contrast to several positions where the queen has to go to e2 and only later f3, here she can reach the more desirable attacking post in one jump.

[Note that this is one of those positions where 11.Nh4? is impossible - it simply loses a pawn to the typical tactic Nxe4! .]

11...Ne7 Black responds by moving another minor piece to the kingside, to help out in defence. Just like White's Nd2−f1−g3, Black's ...Nc6−e7−g6 is a typical manoeuvre in the Italian Game.

[Action in the centre with 11...d5 is still a serious option here. White replies with 12.Qf3 and now:

A) 12...Na5 13.Bc2 dxe4 14.dxe4 Nc4 15.Ng4 Nd7 16.0−0 *(16.Nf5!?)* 16...Qh4 17.Nf5 Bxf5 18.exf5 Nd6 19.f6! Nxf6 20.Nxf6+!? *(20.Nxe5)* 20...gxf6 21.Kh2 f5 22.g3 Qf6 23.Qh5 Kg7 24.g4 f4? *(* Black should play *24...e4 25.Bf4* , when White has promising compensation for the pawn *)* 25.g5! Qe6 *(25...hxg5 26.Qh7#)* 26.Bxf4! with a big advantage for White in view of exf4 27.Rae1 , A.Morozevich−M.Adams, Yerevan 2008.;

B) 12...dxe4 is more solid: 13.dxe4 Bxb3 14.axb3 Nh7 15.h4 *(* perhaps White can apply more pressure with *15.Ng4 Ng5 16.Qf5)* 15...Qd7! *(* Black loses quickly after *15...Qxh4? 16.Ng4 Qd8 17.Nf5* - a nasty accident is going to happen on h6 or g7, or both! *)* 16.Ng4 Rad8 17.0−0 Qd3! , V.Tkachiev−G.Flear, Clichy 1995. This defensive resource with ...Qd3, offering the exchange of queens, is well worth remembering, and Black is very close to equality here. I think White's best chance is 18.Be3

Bxe3 19.Nxe3 when the possibilities of Nf5 and Nd5 still give Black something to think about.;

C) 12...−−]

12.Ng4 Ng6

[The Brazilian grandmaster Vescovi has played 12...Nh7 here, but in a later game he preferred the text move (see below). I wonder whether this is because of 13.Nh5!? *(13.Qf3 Qc8 14.Ne3 Bxe3! 15.Bxe3 Bxb3 16.axb3 f5* was okay for Black in V. Iordachescu−G.Vescovi, Bermuda 2004 *)*

A) or 13...Bxb3 14.Qxb3! with pressure *(*White must avoid *14.axb3 f5!)* , and if 14...Kh8 , White could consider 15.Nxg7!? Kxg7 16.Bxh6+ Kh8 and now 17.Bxf8 *(*or *17.0−0−0!?)*;

B) . For example, 13...Qd7? 14.Bxh6! Bxg4 *(*if *14...gxh6* , White plays *15.Ngf6+)* 15.hxg4 gxh6 16.Qd2 Qxg4 17.Qxh6 Qg6 18.Nf6+! .]

13.Nf5 Nh7

[The game J.Cubas−G.Vescovi, Sao Paulo 2006, provides another example illustrating the problems Black can face here: 13...Re8 14.Qf3 h5 15.Nxf6+ Qxf6 16.g4! *(16.Qxh5 Bxf5 17.Qxf5 Qxf5 18.exf5 Nf4* is okay for Black *)* 16...Bxb3 17.axb3 Nh4 18.Qg3 Nxf5 19.gxf5 d5 20.Rg1 Bc5? (this should lose, but with Bg5 on the cards Black was already under some pressure) 21.Bg5 Qb6 *(*or *21...Qc6 22.Be7!)* 22.Be3! (preventing ...Bf8!) g6 23.fxg6 f6 24.Bxc5 Qxc5 25.Qh4 dxe4 26.Qxh5 Re7 , and here White could have forced an immediate win with 27.Rg4 intending Rh4.]

[The risky attempt to win a pawn with 13...Bxf5 14.exf5 Nh4 backfires after 15.g3 Nxf5 16.Qf3 Nxg4 17.hxg4 Ne7 18.g5! etc.]

14.h4!

[White is slowly beginning to turn the screw. 14.Bxe6 fxe6 15.Nxg7 is tempting, but Kxg7 16.Bxh6+ Kh8 17.Bxf8 Qxf8 looks unclear to me and lets Black off the hook to some extent.]

14...Qd7

[Against 14...h5 I prefer 15.Nh2 *(*to *15.Nge3* , *)* so that after 15...Nf6 White can set up an annoying pin by playing 16.Bg5 .]

15.h5 White's attack seems to be building up steam, but surely it's not yet hopeless for Black? **15...Ne7?** It is now!

[It looks like Black's only chance lies with 15...Bxf5 16.exf5 Nf4! *(16...Ne7* is strongly met by *17.f6!)* . Perhaps Klimov was worried about the knight being trapped with 17.g3 , but Black can save himself here with Qc6! , even though White must still be better after 18.Rf1 Nh3 19.Qe2 N3g5 20.Bxg5 Nxg5 21.0−0−0 . In any case, this is infinitely superior for Black compared to what happens in the game.]

16.Ngxh6+! Kh8

[Of course! Somehow Black had missed that 16...gxh6 is met by the crushing 17.Qg4+ . Unfortunately for Black, declining the knight is no help at all.]

17.Qg4 g6 18.Bxe6

[18.Nxf7+ Rxf7 19.hxg6 is even more decisive: Nxg6 20.Qxg6

Bxb3 21.axb3 Rg8 22.Rxh7+! Rxh7 23.Qf6+ Rgg7 24.Bh6 etc.]

18...Qxe6 19.Nxe7 Qxe7 20.hxg6 fxg6 21.f3 White is just going to play Bd2 and 0−0−0, with a good extra pawn and a decisive advantage. Black seemed to put up very little resistance in this game, and you would be forgiven for thinking this was the work of an inexperienced player. Yet Sergey Klimov is a grandmaster, rated over 2500. It just goes to show that it's not that easy for players, even very strong ones, to deal with the pressure of having to defend against White's obvious attacking intentions on the kingside.
1−0

German Bundesliga 2003

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 d6 5.b4 Bxb4 6.c3 Ba5 7.d4
The move order with 4 0−0 d6 5 b4!? was rather unusual, but we have transposed to a more normal position now. **7...Bg4**

[Instead, 7...Bd7]

[and 7...Bb6 are seen in Chigorin−Alapin and Skotorenko−Ahman respectively.]

[We should also have a look at: 7...exd4 and now:

A) 8.cxd4 Nf6?! *(8...Bb6!* reaches the standard position of Chapter *)* 9.Qa4 Bd7 10.d5 Ne5 11.Qxa5 Nxc4 12.Qb4 Nb6 13.a4 c5 14.Qb3 Qc7 (Pavlov & Levitsky−W.Steinitz, Moscow 1896) and now after 15.a5 Nc8 16.Bb2 Nh5 17.Nfd2 White is much better according to Chigorin.;

B) 8.Qb3!? (the Waller Attack) Qf6 9.e5 dxe5 10.Re1

B1) ; the text is better than 10...Bb6?! 11.Bg5 Qf5 12.Nxe5 Nxe5 13.f4 dxc3+ 14.Kh1 Bd4 15.Nxc3 with a huge attack in P. Morphy−Kipping, Birmingham 1858;

B2) ; but 10...Bd7!? is also possible, e.g. 11.Bg5 Qf5 12.Qxb7 Rb8 13.Rxe5+ Qxe5 14.Qxb8+ *(*or *14.Bxf7+ Kf8 15.Qxb8+ Nxb8 16.Nxe5 Bb6* with an unclear endgame *)* 14...Nxb8 15.Nxe5 Be6;

B3) 10...Nge7 11.Bg5 Qd6 *(*not *11...Qg6? 12.Bxe7 Nxe7 13.Nxe5 Qb6 14.Bb5+ c6 15.Qxf7+ Kd8 16.Nxc6+* and wins, I.Kolisch−T.Barnes, London 1860 *)* 12.Bxf7+ Kf8 is all rather unclear, e.g. 13.Nbd2 Bxc3 14.a3!? Bf5 15.Rac1 h6 16.Nc4 Be6 17.Bxe6 Qxe6 18.Bxe7+ Kxe7 19.Re4 Qd5 20.Qxb7 Qxc4 21.Qxc7+ Kf6?? *(21...Kf8 22.Nxd4 exd4 23.Rxc3 Qxc3 24.Qd6+ Kg8* is a draw *)* 22.Nxe5 Nxe5 23.Qxe5+ Kf7 24.Rxc3! and wins, L.Oms Fuentes−F. Farran Martos, Barcelona 2003.;

C) 8.−−]

[7...Nf6 8.Qa4!? and now:

A) 8...Bd7? 9.d5 Nd4 10.Qxa5 Nc2 11.Bd3 Nxa1 12.c4 and White is much better.;

B) 8...a6?

B1) 9.d5? is naïve after b5

10.Bxb5 axb5 11.Qxb5 0−0 12.Qxc6 Ba6 , J.Blackburne−H. Block, England (simul) 1878, with a good game for Black, e.g. 13.c4 *(*if *13.Re1? Qb8! 14.a4 Bd3* and the white queen has landed herself in a trap *)* 13...Nxe4 14.Be3 Qc8 15.Qa4 Bb7 16.Qc2 f5 with a huge advantage.;

B2) . Instead White should play 9.Bd5! Bb6 10.dxe5 dxe5 11.Bxc6+ bxc6 12.Rd1 Nd7 13.Qxc6 and White is much better.;

B3) 9.−−;

C) 8...exd4! is the correct reaction, when after the continuation 9.Nxd4 *(*or *9.e5 Nd7 10.Bg5 Nb6!)* 9...Bb6 10.Bb5 0−0 11.Nxc6 bxc6 12.Bxc6 Rb8 Black is at least equal.;

D) 8...−−]

8.Qa4?! The queenside action does not seem to be too dangerous.

[8.Qb3? is also dubious, when after Bxf3! 9.Bxf7+ Kf8 10.gxf3 Bb6 11.Bxg8 Rxg8 12.d5 Ne7 13.Qc2 g5 Black is much better according to Sokolsky.]

[8.Bb5!? is objectively the best move. After exd4 9.cxd4 Bd7 10.Bb2 Black has two important lines to consider:

A) 10...Nce7?! 11.Bxd7+ Qxd7 12.Na3 Nh6 13.Nc4 Bb6 14.a4 c6 15.e5 d5 16.Nd6+ Kf8 17.Ba3 Kg8 18.Rb1 and White was much better in M.Chigorin−W.Steinitz, Havana match (game 1) 1892.;

B) 10...Nf6 11.Na3 Nxe4 *(11...0−0* led to draws in games 3 and 5 of the match *)* 12.d5 Ne7 13.Qa4? *(13.Bxg7* is better *)* 13...Bc3! 14.Rab1 Bxb2 15.Rxb2 Nc5 16.Qd4 0−0 and Black was two pawns up in M.Chigorin−W. Steinitz, Havana match (game 13) 1892. As you can see Steinitz gave up upon attacking with the queen later on in his career, which was probably quite wise.;

C) 10...−−]

8...a6! This puts the most pressure on White to perform.

[8...exd4 9.cxd4 a6 *(9...Bxf3 10.gxf3* is the next note *)* 10.Bd5 Bb6 11.Bxc6+ bxc6 12.Qxc6+ Bd7 13.Qc3 Ne7 14.Na3 0−0 15.Nc4 d5 16.exd5 Nxd5 and Black achieved equality, M. Chigorin−W.Steinitz, Havana match (game 15) 1892. But maybe he wants more?]

[8...Bxf3 9.gxf3 exd4 10.cxd4 a6?! *(*more reliable is *10...Qf6 11.Bb5!? Qxf3 12.Bxc6+ bxc6 13.Qxc6+ Ke7 14.Qxa8 Qg4+* with a draw − Chigorin *)* 11.Bd5 Nge7 12.Bxc6+ Nxc6 13.d5 b5 14.Qa3 Nb4 *(*or *14...Nd4 15.Qxa5 Qf6 16.Qa3 b4 17.Qd3 Nxf3+ 18.Kg2 Nh4+ 19.Kh3! Ng6 20.Qb3* and White is better according to Chigorin *)* 15.Qxa5 Qf6 16.Qa3 Nc2 (or 16...) 17.Qd3 Nxa1 18.Qe2 0−0 19.Bb2 Qh6 20.Bxa1 with advantage to White, M.Chigorin−W.Steinitz, Havana match (game 17) 1892.]

9.Ng5

[Incorrect is 9.d5?! b5 10.Bxb5 axb5 11.Qxb5 Nge7 12.dxc6 0−0 and Black is just better.]

9...Nh6 10.Bd5

[10.d5? is even worse this time

around. After b5 11.Bxb5 axb5 12.Qxb5 Qb8 13.Qxc6+ Bd7 14.Qc4 Bb5 15.Qb3 Bxf1 and Black is much better.]

10...Bb6 11.dxe5 0−0?

An understandable decision, but there was little reason not to recapture immediately.

[After 11...dxe5! 12.Bxc6+ *(* Black is also better after *12.h3 Bd7 13.Nf3 Qf6;* or *12.Nf3?! 0−0 13.Bxc6 Bxf3 14.gxf3 bxc6)* 12...bxc6 13.Qxc6+ Bd7 14.Qd5 0−0 15.h3! *(* if *15.Nf3? Bb5 16.Re1 Ng4* with a clear advantage *)* 15...Bb5 16.Re1 Re8 the two bishops give Black an excellent game.]

12.Bxc6 bxc6 13.h3 Be2 This also looks a bit strange. Black must have had some fantasy about attacking f2, but surely the rook move is to White's overall advantage? **14.Re1 Bh5 15.Na3**

[15.exd6 Qf6 16.Qc2 cxd6 17.e5 Bg6 18.exf6 Bxc2 19.Na3 Bg6 20.Nc4 Bc5 21.fxg7 Kxg7 22.Bf4 is also good for White.]

15...dxe5 16.Qxc6 Qd3 17.Be3 Rfd8 18.Nc4 f6? This is just complete capitulation. White will happily use the e6−square to create mayhem around the black king.

[Necessary was something like 18...Qxc3 19.Rac1 Qb4 20.Nxe5 Bxe3 21.Rxe3 Qa5 22.Qc3 Qxc3 23.Rexc3 f6 24.g4 Be8 25.Ne6 fxe5 26.Nxd8 Rxd8 27.Rxc7 Nf7 and Black still has some drawing chances.]

19.Bxb6 cxb6 20.Re3 Qc2 21.Ne6 Rd1+

[Or 21...Rdc8 22.Qd7 Nf7 23.Nxb6 and wins.]

22.Rxd1 Qxd1+ 23.Kh2 Ra7

[After 23...Re8 24.Rg3 is another road kill.]

24.Qc8+ Kf7 25.Nd8+

1−0

Fraser CC tourneys ca.1891−6 1891

[Fraser #118]

Fraser: 'Myers: This is Game #118 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I

have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes.' **1.e4** Fraser: 'Myers Fraser' **1...e5 2.Nc3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.Nf3 d6 6.Be3 Bb6 7.Qe2 Be6 8.0−0**

[Colin Crouch]

An 'unpublishable' game, except to the extent that a chessplayer has to go through, and understand, his own mistakes. And there might yet be some entertainment value for the reader. An 'unpublishable' game, except to the extent that a chessplayer has to go through, and understand, his own mistakes. And there might yet be some entertainment value for the reader. **1.e4 e5 2.Bc4 Nc6 3.Nf3 Bc5? 4.c3 Nf6 5.d3** Now I am just a pawn up. Now I am just a pawn up. Now I am just a pawn up. **5...a6 6.Bb3 Ba7 7.Nbd2 0−0 8.h3 d6 9.Nf1** Reluctantly conceding that I was not going to find a quick fifteen−move win, followed by a suburban train to Harrow, and a relaxing visit to the club. **9...Ne7 10.Ng3 Ng6 11.0−0 b5 12.a4**
[12.d4 gives White an advantage, after any of the sensible queen moves. He decides he might just as well gambit a pawn, given that He decides he might just as well gambit a pawn, given that He decides he might just as well gambit a pawn, given that Bb7 *(12...c5* , and only then , and only then , and only then *13.Bc2* , is a reasonable line. *cxd4 14.cxd4 Bb7 15.Be3 Re8 16.Re1)* 13.Bc2 *(* Slightly frivolous. *13.d5)* 13...Re8 gives White a clear advantage in development. And this is quite simply bad. And this is quite simply bad. And this is quite simply bad. 14.Re1 h6 15.a4 equalizes quickly.]
12...Bb7 13.Re1 Re8 14.Nh2
[14.Nf5 d5]
14...d5
[14...Nd7 15.Qf3 *(15.Nf5 Nc5 16.axb5 axb5* , and Black is already winning, as if , and Black is already winning, as if , and Black is already winning, as if *17.Ng4 Nxb3 18.Qxb3 Bxf2+* , picking up a rook. *19.Kxf2*

Rxa1 20.Nfh6+ gxh6 21.Nxh6+ Kg7 is also uncomfortable for White's king here *22.Qxf7+* is possible, but I decided in the game not to give the bishop check first I had of course checked that the piece gambit I had of course checked that the piece gambit I had of course checked that the piece gambit *Kh8 23.Bg5)* 15...Rf8 16.a5 *(*, with obvious threats, does not work well after *16.Nf5! Nc5? 17.Bc2)* 16...Nc5 , and White is well ahead. Everything has gone smoothly up to now. I am a pawn up, and my opponent's king is exposed, but how can I find a win? Not easy, and it can't be done quickly. If, for example, a direct attack with Everything has gone smoothly up to now. I am a pawn up, and my opponent's king is exposed, but how can I find a win? Not easy, and it can't be done quickly. If, for example, a direct attack with Everything has gone smoothly up to now. I am a pawn up, and my opponent's king is exposed, but how can I find a win? Not easy, and it can't be done quickly. If, for example, a direct attack with 17.Ba2 , Black can handle the pressure with , Black can handle the pressure with , Black can handle the pressure with Ne6 18.Nf5 Ngf4 19.Bxf4 *(19.d4?)* 19...Nxf4 20.d4 . All I felt I could do, after some thought, was to complete my queenside development, before his pieces could create some threats. . All I felt I could do, after some thought, was to complete my queenside development, before his pieces could create some threats. . All I felt I could do, after some thought, was to complete my queenside development, before his pieces could create some threats. White has to be careful to recognize that Black is ahead in development, and so that he cannot give back the extra pawn for a speculative attack. Indeed, White has to be careful to recognize that Black is ahead in development, and so that he cannot give back the extra pawn for a speculative attack. Indeed, White has to be careful to recognize that Black is ahead in development, and so that he cannot give back the extra pawn for a speculative attack. Indeed, Qf6 21.Rad1]

15.Qf3 Nh4

[15...h6 16.Nf5 wins for White Does c5

A) 17.Bxh6 keeps a good grinding edge. gxh6!? (also perhaps 28 d6+) is probably the best, although it is difficult to make that move, as I have only just played 27 Rad1. After all, who wants to give away a tempo for nothing? The point is, however, that now White is opposing Black's open rooks with his own rooks, and when the files are opened up, White has excellent chances to simplify, not least because Black has tried to use the c−file with 27...Rac8. A continuation might be (also perhaps 28 d6+) is probably the best, although it is difficult to make that move, as I have only just played 27 Rad1. After all, who wants to give away a tempo for nothing? The point is, however, that now White is opposing Black's open rooks with his own rooks, and when the files

are opened up, White has excellent chances to simplify, not least because Black has tried to use the c−file with 27...Rac8. A continuation might be (also perhaps 28 d6+) is probably the best, although it is difficult to make that move, as I have only just played 27 Rad1. After all, who wants to give away a tempo for nothing? The point is, however, that now White is opposing Black's open rooks with his own rooks, and when the files are opened up, White has excellent chances to simplify, not least because Black has tried to use the c−file with 27...Rac8. A continuation might be 18.Bxd5 Bxd5 *(18...Nxd5 19.Nxh6+)* 19.exd5;

B) 17.exd5

B1) 17...Bxd5 18.Bxd5 Qxd5 *(18...Nxd5* , to consolidate the pawn, is much more sensible. Then , to consolidate the pawn, is much more sensible. Then , to consolidate the pawn, is much more sensible. Then *19.axb5 axb5 20.Bxh6)* Still aiming for open play. 19.Nxh6+ is sensible, but my choice was also good;

B2) 17...c4 18.dxc4 make any difference? Black has the option of trying make any difference? Black has the option of trying make any difference? Black has the option of trying e4! . The slight difference in the king's position makes a difference. Indeed, White has to play more quietly with . The slight difference in the king's position makes a difference. Indeed, White has to play more quietly with . The slight difference in the king's position makes a difference. Indeed, White has to play more quietly with 19.Qe2! , and Black will eventually get squashed after , and Black will eventually get squashed after , and Black will eventually get squashed after Qd7 20.Nd4 . *(20.Nxh6+)* if 20...Bxd4?! 21.cxd4 , Black is ahead bxc4 22.Bxc4! again wins for White if Nxd5 23.b3 , and Black will be unable to defend his king: for example, , and Black will be unable to defend his king: for example, , and Black will be unable to defend his king: for example,]

16.Qe2 Ng6

[16...h6!! 17.Ng4 Nxg4 18.Qxg4 *(18.hxg4 .)*]

17.Ng4 And I was happy. I have consolidated and developed, while still keeping my extra pawn. My next few moves are clear enough, and I shall only add to any commentary when I start to make mistakes or show signs of indecision. At this stage, I was still hoping for an early visit to the club that evening. And I was happy. I have consolidated and developed, while still keeping my extra pawn. My next few moves are clear enough, and I shall only add to any commentary when I start to make mistakes or show signs of indecision. At this stage, I was still hoping for an early visit to the club that evening. And I was happy. I have consolidated and developed, while still keeping my extra pawn. My next few

moves are clear enough, and I shall only add to any commentary when I start to make mistakes or show signs of indecision. At this stage, I was still hoping for an early visit to the club that evening. **17...Nf4 18.Qf3 Nxg4 19.hxg4 dxe4 20.dxe4 Qf6**

[20...Qd3 There is an attractive geometrical win for White after There is an attractive geometrical win for White after There is an attractive geometrical win for White after 21.Be3 Bxe3 22.fxe3]

21.Nf5 g6

[21...Ng6 22.g5 Qb6 23.Bxf7+ Kxf7 , much as in the game. This would have been slightly more accurate for Black than the game, which gives chances of a good sideline. All the same, it seems that White is winning either way. , much as in the game. This would have been slightly more accurate for Black than the game, which gives chances of a good sideline. All the same, it seems that White is winning either way. , much as in the game. This would have been slightly more accurate for Black than the game, which gives chances of a good sideline. All the same, it seems that White is winning either way. He has to try for the checks. If He has to try for the checks. If He has to try for the checks. If 24.Nh6+?? Ke7 , and White wins quickly. 25.Qf7+!? is also a try, if not quite successful. After is also a try, if not quite successful. After is also a try, if not quite successful. After Kd6 26.Nf5+ Kc5 27.Be3+ Kc6 (the best square) 28.Qd5#]

[21...Ne6 22.g5 Nxg5 *(22...Qd8* , and Black holds. After 25.Rxa7 Rxa7 , Black's best chance is , Black's best chance is , Black's best chance is 26.Nh6+ , gxh6 so that if so that if so that if 27.Qxf7+ Kh8 , and the rook on a7 is covered. White can of course continue with , and the rook on a7 is covered. White can of course continue with , and the rook on a7 is covered. White can of course continue with 28.Qxe8+ Kg7 29.Qg8+ Kf6 , and readers can try to speculate whether, with the extra pawn, White is winning, or whether Black can hold, with all the pawns being on the same side of the board. White can try to do better with his pieces, though not White can try to do better with his pieces, though not White can try to do better with his pieces, though not 30.Qf7#?]

22.Nh6+ Kg7 23.Nxf7 Rf8 24.Bxf4

[The computer suggests that The computer suggests that The computer suggests that 24.axb5 axb5 *(24...Rxf7 25.Bxf7 Qxf7 26.bxa6 Bc6 27.Be3* , and then perhaps , and then perhaps , and then perhaps *)* 25.Bxf4 exf4 is a draw, but if we play on, White still has a clear edge after is a draw, but if we play on, White still has a clear edge after is a draw, but if we play on, White still has a clear edge after 26.e5]

24...exf4 25.axb5 a5

[25...axb5 26.e5 , and a safe victory. The straightforward capture, The straightforward capture, The straightforward capture, Qxf7! , is however safer and better. Black has no safe squares for his checks, apart from , is however safer and better. Black has no safe squares for his checks, apart from , is however safer and better. Black has no safe squares for his checks, apart from 27.Qxb7 . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a move, with . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a move, with . White's queen, rook and bishop are not necessarily all that good in protecting each other, but they are highly effective in covering the checking squares. Move on a move, with Qxb3! , and there are no further checks. Black could still try , and there are no further checks. Black could still try , and there are no further checks. Black could still try 28.Rxa7 , when there is a wide choice for White, the simplest being , when there is a wide choice for White, the simplest being , when there is a wide choice for White, the simplest being Rxa7 29.Qxa7 Qxb2 . White is covering the h1, g1 and f2 checking squares for the queen. This line is visually complicated, and quite probably most players would find it highly uncomfortable in trying to play through such a variation in their head, with White's king wide open against queen and rook. On reflection, I have no longer given my move, my pawn push, a question mark. It is a good practical move, and I considered at the time that the queen and pawn ending was winning for me. I could not see any successful perpetual check for Black, and I still do not. There are several stages in this game where I can be criticized over many of my moves, and certainly this game dragged out for a long time, even though I was a pawn up in the opening. This was bad, but at least I managed to keep an edge every move throughout the game, and indeed quite probably a decisive edge. At no stage did my opponent equalize. . 185350 Moscow 2007
[Glenn Flear]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4!

[Here 7...d5 is inferior, as after 8.exd5 Nxd5 9.0−0 White has the advantage in all lines; e.g. Bxc3 10.bxc3 0−0 11.Qd3 Nce7 12.Ba3 Re8 13.Ng5 Bf5 14.Qf3 and Black is under intolerable pressure, C.Garcia Fernandez−G.Yanez Acin, Lorca 2001.]

8.0−0 Bxc3

[Again Black has only one good move, since 8...Nxc3?! 9.bxc3 d5 *(*after *9...Bxc3?! 10.Ba3!* White has a strong attack *)* 10.cxb4 dxc4 11.Re1+ Ne7 12.Qe2 Be6 13.Bg5 seems to favour White; e.g. Qd5 14.Bxe7 Kxe7 15.Qc2 f6 16.Ng5! fxg5 17.Re5 Qxd4 18.Rae1 as pointed out by Bogoljubow.]

9.d5! This is known as the Møller Attack.

[Otherwise 9.bxc3 d5 leaves White short of compensation.]

9...Bf6 The main line, in which Black retains his bishop. **10.Re1 Ne7 11.Rxe4 d6** Many games have reached this position. For the pawn deficit White has the better development and more space and Black will have to defend precisely to keep his head above water. Objectively, though, I have to prefer Black.

[Actually Black can also play 11...0−0 here (or on the previous move), since 12.d6 isn't as dangerous as previously thought; e.g. cxd6 13.Bg5 *(13.Qxd6 Nf5 14.Qd5 Ne7 15.Qd6 Nf5* is a draw by repetition *)* 13...d5 14.Bxd5 Nxd5 15.Qxd5 d6 16.Bxf6!? *(*otherwise *16.Rd4* is near equality *)* 16...Qxf6 17.Nd4 Rb8 18.Rae1 b6 , as in J.Iruzubieta−G.Milos, Elgoibar 1993, leaves White slightly worse even after his best line 19.Nc6 Bb7 20.b4 .]

12.Bg5

[The self−weakening tactical try 12.g4 isn't quite correct: 0−0 13.g5 Be5 14.Nxe5 Bf5!? *(14...dxe5 15.Rxe5 Ng6* is also fine for Black *)* 15.Re1 dxe5 16.Rxe5 Qd7 17.Qf3 Ng6 18.Re1 Rfe8 and Black is for preference, C.Velasquez−C.Salas, Santiago 1997.]

12...Bxg5 13.Nxg5 h6 14.Qe2

A practical necessity.

[Instead, 14.Nf3 0−0 just leaves Black a clear pawn up]

[while 14.Qh5 is also met by the cool−headed 0−0! .]

14...hxg5 15.Re1 White's tripled −up major pieces ensure that he regains the piece, so Black now blocks the e−file to ease the pressure. White's tripled−up major pieces ensure that he regains the piece, so Black now blocks the e−file to ease the pressure. **15...Be6! 16.dxe6**

[16.Re3!? is a recent nuance, but after c6! 17.dxe6 f6 play transposes back to my recommended defence in the main line.]

16...f6 White must have mixed feelings about his passed pawn on e6. On the one hand it ties his opponent down to defence, but on the other it blocks the activity of his own pieces. Furthermore, White will always be a pawn down now

and, with few prospects of launching any immediate attack, will need patience to probe away on all fronts, trying to provoke an error. Meanwhile Black is a long way from completing development and has yet to find a secure shelter for his king, so unravelling will require due care and attention. −−− It used to be thought that White could generally create enough play to justify his material deficit, but the most recent analyses suggest that with best play Black should come out on top. White must have mixed feelings about his passed pawn on e6. On the one hand it ties his opponent down to defence, but on the other it blocks the activity of his own pieces. Furthermore, White will always be a pawn down now and, with few prospects of launching any immediate attack, will need patience to probe away on all fronts, trying to provoke an error. Meanwhile Black is a long way from completing development and has yet to find a secure shelter for his king, so unravelling will require due care and attention. It used to be thought that White could generally create enough play to justify his material deficit, but the most recent analyses suggest that with best play Black should come out on top. **17.Re3 g6?!** Probably not the best.

[Similar but preferable is 17...Kf8 18.Rh3!? (a typical plan to shake up the kingside) Rxh3 19.gxh3 g6 , when Black comes out more happily: 20.Qf3 Kg7 *(20...f5?* is bad due to *21.Qc3)* 21.Qxb7 Qc8 22.Qf3 Rb8 23.b3 Qb7 24.Qd3 Rh8 with good play, A.Pyhala−L.Dobrovsky, Odessa 1989. Things seem easier for Black to handle now that a pair of rooks have been exchanged.]

[However, this is all just for the record. Instead, 17...c6! is best, as after 18.Rh3 Rxh3 19.gxh3 g6 White doesn't seem to be able to worry his opponent; e.g. 20.Qf3 *(20.b4 Qb6 21.Qb2 0−0−0 22.b5 Rf8* is complicated, but Black is on top *)* 20...Qa5 21.Kf1 *(21.Rd1* is also calmly met by *Qf5;* , while *21.Qxf6 Qxe1+ 22.Bf1 0−0−0* , R.Bancod−S.Iuldachev, Jakarta 1997, is even worse *)* 21...Qf5 22.Qg4 0−0−0 and White runs out of steam, G. Sergeev−M.Novikov, Tula 2006.]

18.Qf3 Forking the f6− and b7−pawns. **18...0−0** Black gets to castle but the pawn on e6 keeps his pieces tied up, so it's not evident that he is really any closer to co−ordinating his forces. **19.Qxb7 d5 20.Bd3 Qd6 21.Rc1 c6 22.Rh3!** The rook is quite actively placed here, which is one of the reasons it's often better for Black to eschew castling and leave his rook on the h−file. **22...Rfb8**

[The e−pawn is taboo: 22...Qxe6?? 23.Re3 etc.]

23.Rxc6! A strong blow that ensures some advantage for White. **23...Qxh2+**

[Otherwise 23...Rxb7 24.Rxd6 Rxb2 25.Rd7 Re8 26.Rxa7 is complex, but the outside passed a−pawn gives White an edge.]

24.Kxh2 Rxb7 25.Rc2 Rb6 26.Re3 Rab8 27.b3 Material is now equal, and Black is still restricted by the passed e6−pawn. **27...f5?!**

[27...R8b7 would keep White's advantage down to a minimum.]

28.Rc7 R8b7 29.Rd7 Kf8 30.Ba6! A neat move that soon leads to a

significant material gain. **30...Rxd7**
31.exd7 Rd6 32.Bb5 d4
[32...Kf7 33.Rc3 Ke6 34.Rc8 Rxd7 35.Bxd7+ Kxd7 was a lesser evil, but White should eventually be able to win here too.]
33.Re6! Rd5 34.Rf6+ Kg7 35.Rf7+! Kxf7 36.Bc4
[If Black insists on struggling on with 36.Bc4 Nc6 , then 37.Bxd5+ Ke7 38.Bxc6 d3 39.b4 d2 40.Ba4 and White comes out a piece to the good.]
1−0

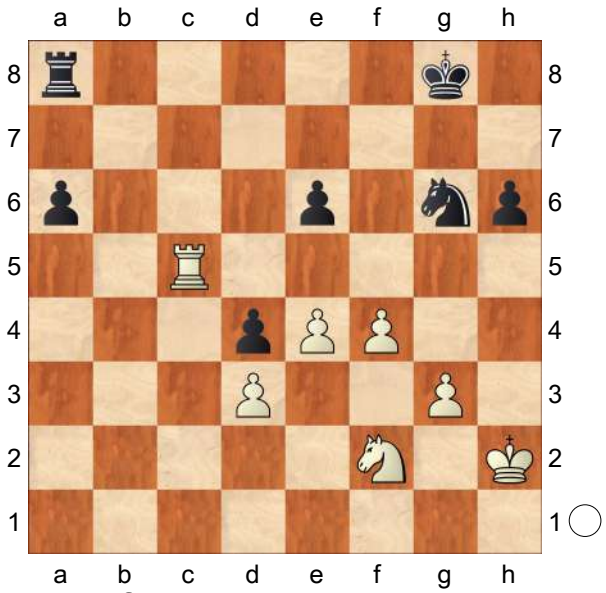
□ **Karpov,Anatoly**
■ **Jussupow,Artur**
15.8 Bugojno 1986
[Glenn Flear]



The idea of creating a mating net with rook, knight and pawn is not uncommon... −−− ...but here the preliminary play is unusual. Karpov first holds up the a−pawn with his rook, which gains time for his knight to be brought up to the front, and then the rook switches back to participate in the attack. Most of the following variations are heavily influenced by Karpov's notes.
40.Ra5
[The immediate 40.Ng4 is less clear after a5 41.f5 exf5 42.exf5 Nf8! , when Black's a−pawn would yield useful counterplay.]

40...Ne7 41.Ng4 Nc6 The best shot;
[as 41...Kg7 42.Ne5 would leave Black totally passive.]
42.Rc5! Dynamic play!
[Instead, after 42.Ra4 a5 43.Nxh6+ Kg7 44.Ng4 Rb8 , Black would obtain good play for the pawn, intending to follow up with ...Rb8−b4, ...a5−a4 and ...Nc6−a7−b5.]
42...Ne7
[If the knight wanders over to the queenside his king's fate would be sealed: 42...Nb4 43.Rc7! a5 *(* after *43...Nxd3* , the white king marches in: *44.Kh3 a5 45.Nf6+ Kf8 46.Kg4 a4 47.Kh5 a3 48.Kg6 a2 49.Rf7#)* 44.Nxh6+ Kf8 45.g4 Nxd3 46.Kg3 and White wins by pushing the g−pawn.]
43.Rc7!
[More to the point than 43.Nxh6+ Kf8 44.Ra5 Nc6 45.Rg5 Ke7 , which is far less clear.]
43...Kf8 44.Ne5! The initiative is more important than the h−pawn. **44...a5**
[44...h5 holds up the g−pawn, but then White can play 45.f5! directly.]
45.g4 a4 46.f5 exf5
[After 46...Ra5 , White has the neat tactic 47.Rxe7! which leads to a winning rook ending: Rxe5 *(* if *47...Kxe7* then *48.Nc6+* is decisive *)* 48.Ra7 h5 49.Kg3! hxg4 50.fxe6 Rxe6 51.Kxg4 .]
47.gxf5 Nxf5
[47...a3 would provoke an attractive finish: 48.f6 a2 49.Rxe7 a1Q 50.Ng6+ Kg8 51.Rg7# .]
48.exf5 Ra5 49.Rc5! Yet another forking combination. **49...Rxc5**
[Or if 49...Ra6 50.f6! Rxf6 , White again has 51.Nd7+ .]
50.Nd7+ Ke7 51.Nxc5 a3 52.Kg3 Kd6 53.Nb3 Ke5 54.Kg4 h5+
[Zugzwang is Black's undoing after 54...a2 55.Na1! , e.g. Kf6 56.Kf4 h5 57.Nc2 h4 58.Kg4 h3 59.Kxh3 Kxf5 60.Kg3 etc.]
55.Kg5 h4 56.f6 Ke6
[Or similarly 56...h3 57.f7 h2 58.f8Q h1Q 59.Qe7+ Kd5 60.Qb7+ .]
57.Kg6 h3 58.f7 h2 59.f8Q h1Q 60.Nc5+ Ke5 61.Qb8+
[After 61.Qb8+ Kd5 , simply 62.Qa8+ wins the queen with a skewer.]
1−0

42.Qh8 Rf8 43.Qc3 Kd8 44.Qg7 Ke8 45.a3 Rf7 46.Qh8+ Rf8 47.Qd4 Rf5 48.Qa7 c5?!

[After Im Falle von 48...Rh5 49.Qxc7 Rxd5 50.Ke4 Rd1 Ludek Pachman avoids losing the pawn and the fortress holds out. verhindert Ludek Pachman den Bauernverlust und die Festung hält.]

49.dxc6 Bxc6 50.Qc7 According to my information, Pachman resigned at this point. Why? Was he annoyed with 48... c5 and the loss of a pawn which follows it? In any case, I cannot see a way for White to win after ♗d7. Nach meinen Informationen gab Pachman an dieser Stelle die Partie auf. Warum? War er verärgert über den 48...c5 und den damit verbundenen Bauernverlust? Ich sehe jedenfalls nach ♗d7 keinen Gewinnweg für Weiß.

1−0

Jack Speigel Memorial, Southend 2009

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2

[So far we've only considered 7.h3 . This knight move offers White some new possibilities.]

7...0−0 The theoretically recommended response. Black keeps open the possibility of playing ...d5 in one jump.

[If 7...d6 , White can of course transpose to the main lines with 8 h3,

but there's also 8.Nf1!? inviting Black to play Ng4 . Now:

A) 9.Ne3 Nxe3 10.Bxe3 Bxe3?! 11.fxe3 0−0 12.0−0 left White with a useful open f−file in S. Tiviakov−E. Van den Doel, Dutch Championship 2000. However, as Tiviakov notes, Black would be okay after any reasonable move instead of 10... Bxe3.;

B) 9.d4!? looks more testing from a theoretical viewpoint. For example, exd4 10.cxd4 Nf6! *(10...Qf6 11.h3! Nxf2 12.Kxf2 Bxd4+* worked out well for White after *13.Be3 Bxe3+ 14.Nxe3 Qxb2+ 15.Qd2 Qxd2+ 16.Nxd2* in J.Degraeve−D.Marciano, Belfort 1997 − White's extra piece is worth more than the three pawns *)* 11.Ng3 Bg4 12.Be3 d5 13.e5 *(13.exd5 Nxd5 14.h3 Be6* is equal *)* 13...Ne4 14.Bc2 *(*this might be too committal; perhaps simply *14.0−0 0−0 15.Rc1!* is stronger *)* 14...f5 15.exf6 *(15.h3!?)* 15...Nxf6 16.h3 Bxf3 17.Qxf3 Bxd4 18.Nf5 Bxb2 19.Rb1 Bc3+ 20.Kf1 and White didn't have enough for his material investment in J.Degraeve−V.Tkachiev, Corsica 1997. However, there is certainly some scope for improvement here.;

C) 9.−−]

8.Nc4!? This move is quite rare but after spending some time studying it, I began to appreciate that it was trickier than it initially looked.

[White normally chooses either 8.h3 (see Oratovsky−Gozzoli)]

[or 8.0−0 , reaching the Classical Main Line.]

8...d6 Can this natural move really be classed as a mistake? I'm not totally sure, but what is clear is that Black has to deal with some problems which aren't easily solved.

[It seems that Black experiences fewer difficulties after 8...d5 (see the next game).]

9.Bg5! The point. Black is forced to endure the usual pin on the knight, again in awkward circumstances. Compare Tiviakov−El Taher, and the problems Black faced there. This current situation might be even more unfavourable for Black because ...h6 followed by ...g5 is even riskier (see below). **9...h6**

[Previously, Tony Miles had played 9...Ne7 against me (Mondariz 2000), after which 10.0−0?! let Black off the hook following *(*later on I realized that White would have more chance of an advantage by playing *10.Ne3!?* , which discourages *Ng6* in view of *11.Nd5)* 10...Ng6 11.Nh4 Kh8! .]

10.Bh4 Be6

[Against 10...g5

A) , I would have been very tempted to play just like in the game, with 11.Nxg5!? hxg5 12.Bxg5 .;

B) . However, there's also nothing wrong with the simple 11.Bg3 ; let's see how this worked out well for White in the game V. Zhelnin−A. Kolev, Odessa 1989: Bg4 *(*perhaps *11...Be6* is wiser *)* 12.Ne3 Bxe3 13.fxe3 Qe7 14.h3 Bd7 15.Nh2 Kg7 16.Qe2 a5 17.a4 Rab8 18.0−0 Be6 19.Bc2 Ng8 20.Rf2 f6 21.Nf1 Qe8 22.Bh2 Bf7 23.Ng3 Nce7 24.d4 and White had built up a

significant advantage without having to do anything spectacular.; **C)** 11.−−]

[10...Ne7 is also possible a move later. 11 Ne3 no longer makes sense because of 11...Ng6, but with the pawn on h6 rather than h7 weakening Black's structure, 11.Bxf6! becomes more desirable: gxf6 12.Nh4 *(*I quite like *12.Qd2!?)* 12...d5 13.exd5 Nxd5 14.Qf3 *(*White mustn't get too excited: *14.Qh5?? Nf4! 15.Qxh6 Qxd3!* and it's White's king which is the terminally weak one *)* 14...Nf4 15.0−0−0 Qd5 (White was threatening both 16 g3 and 16 d4) 16.Qxd5 Nxd5 17.Nxe5 Nxc3 18.bxc3 fxe5 19.Rd2 Kg7 *(19...Re8!?* may be stronger *)* 20.Re1 f6 21.d4! (now White is definitely better) h5 *(*the problem for Black is that *21...exd4* allows mate with *22.Re7+ Kh8 23.Ng6#)* 22.Rd3! Kh6 23.Rg3 Bg4 24.h3 exd4 *(*or *24...Bd7 25.Rg6+ Kh7 26.Bc2 Kh8 27.Re3!* etc *)* 25.hxg4 dxc3 26.Nf5+ Kg5 27.gxh5+ and Black resigned, G. Sax−M.Brancaleoni, Bratto 2003. Black might have been doing okay somewhere in that game, but it's clear that he's under some pressure.]

11.Ne3! Still not committing the king. However, if Black were to play 11...Bxe3 12 fxe3 then of course kingside castling and utilizing the newly−opened f−file suddenly becomes highly attractive.

11...g5? The pin is very annoying and it's difficult to refrain from playing this move, but it's likely that Black is now in some trouble.

[Glenn suggested 11...Kh7! intending ...Rg8 and only then ....g5 as a creative way for Black to solve some of his problems.]

12.Nxg5!

[Again 12.Bg3 was possible, but this sacrifice was simply too difficult to resist!]

12...hxg5 13.Bxg5 White has fabulous compensation for the piece: Black's king is unsafe; the pinned knight on f6 is a constant source of concern; and the bishop on a7 is more or less out of the game. If Black ever takes on e3, White recaptures with the f−pawn after which Rf1 is going to be decisive. True, Black can defend initially, but White's initiative lasts for a very long time. **13...Kg7 14.Qf3 Nb8** To support the f6−knight with ...Nbd7.

[In general Black would welcome an exchange on e6, to provide cover for f5 and d5, but he must still be wary of some concrete lines. For example, 14...Rh8? 15.Bxe6! fxe6 16.Ng4 Rf8 17.Qh3! and White wins.]

15.Nf5+ Bxf5

[The knight must be taken: 15...Kg6? loses to 16.Bh4 (threatening Qg3+) Rg8 17.Qg3+ Kh7 18.Bxf6! Qxf6 *(*or *18...Rxg3 19.hxg3+ Kg6 20.Rh6#!)* 19.Qh3+ Kg6 20.Qh6# .]

16.Qxf5 Nbd7 17.h4! With two ideas: h5−h6+ and Rh3 followed by Rf3 or Rg3. White doesn't have to castle kingside to activate the rook. **17...Rg8! 18.Rh3 Qe7 19.Rf3 Kh8!** The best try. **20.Ke2!** Planning to bring in the final piece with Rh1−h3−g3.

[There's no hurry to take on f6, and indeed 20.Bxf6+?! Nxf6 21.Qxf6+ Qxf6 22.Rxf6 Rxg2 23.Ke2 Rf8 would offer Black good chances for survival.]

20...Rg6 21.h5 Rxg5 What else can Black do? **22.Qxg5 Kh7 23.Rg3 Rg8 24.Qf5+ Kh8 25.Rxg8+ Kxg8 26.h6 Kh8 27.Rh1 c6**
[Or 27...Nf8 28.Rh3 Ng6 29.Rf3 Nf4+ 30.Rxf4! exf4 31.Qg5 and White wins.]
28.Rh3 Bb6 29.Rg3 Bd8
Finally Black's dark−squared bishop is back in the action, but it's too late to save him. **30.Rg7! d5 31.exd5 Nc5**
[31...cxd5 can be met simply by 32.Bxd5 . Glenn's one remaining chance here was that both players were in some time trouble, but I managed to keep everything together.]
32.dxc6 Nxb3 33.axb3 bxc6 34.g4 e4 35.d4 e3 36.fxe3 Qd6 37.g5 Qh2+ 38.Kd3 Qh1 39.Kc2 Qe4+ 40.Qxe4 Nxe4 41.Rxf7 Bxg5 42.Kd3 1−0

□ **Alekhine,A.**
■ **Tarrasch,S.**
Mannheim 1914
[Alekhine,Alexander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Qe7 According to standard theory this move leads to equality. In my opinion White is at least slightly better. Black has also tried some alternative methods of solving his opening problems at this early stage, other than the sane development of his knight. Though they have little theoretical importance, it would be wrong not to have a glance at them. Diese alte Verteidigung ist sicher weniger schlecht als ihr Ruf, aber sie erfordert seitens des Schwarzen ein besonders sorgsames Spiel.

[4...Qf6?! was once a frequent visitor to international tournaments, but these days we know that White can more or less refute it brutally with 5.d4! Bb6 *(*if *5...exd4?! 6.e5 Qg6 7.cxd4 Bb4+ 8.Nc3* and White is much better as the g2−pawn is untouchable, i.e. *Qxg2? 9.Rg1 Qh3 10.Bxf7+!* and Black is in real trouble *)* 6.0−0 h6 7.a4 a6 8.dxe5 Nxe5 9.Nxe5 Qxe5 10.Qf3 Nf6 11.a5 Ba7 12.Re1 and White has a clear advantage according to Max Euwe.]

[4...f5?! looks very dubious. White surely has a lot of sound options here, but instead of looking for an refutation, I will recommend the simple 5.d3 , when play can continue Nf6 6.b4 Bb6 7.a4 a6 *(7...fxe4? 8.dxe4 Nxe4 9.0−0 a5 10.Qd5 Nd6 11.Nxe5* with a terrible attack *)* 8.0−0 d6 9.Nbd2 and White is much better, as Black has problems with his king.]

[4...d6 5.d4 exd4 has been played once in a while as well. Now after 6.cxd4 Bb4+ 7.Nc3 Bg4 8.0−0 Qd7 9.d5 Nd8 10.h3 Bh5 11.Qd4 Bxc3 12.Qxc3 White is slightly better according to 'ECO'.]

5.d4 Bb6

[Black cannot give up the centre with Ganz unlogisch wäre hier 5...exd4?! . Strategically it is a catastrophe, and it does not work out tactically either, after the energetic worauf Weiss durch 6.0−0! when we should look at the following lines:

A) 6...dxc3 7.Nxc3→ eine starke Angriffsstellung erhalten würde. d6 8.Nd5 Qd8 9.b4! Bxb4 10.Nxb4 Nxb4 11.Qb3 and White is much better.;

B) 6...Ne5 7.cxd4 Nxc4 *(*or *7...Nxf3+ 8.gxf3 Bb6 9.Nc3 c6 10.Re1* with a clear advantage *)* 8.Qc2! Bb6 9.Qxc4 d6 10.Nc3 and White is better.;

C) 6...−−]

6.0−0

[6.Bg5!? is quite a tricky move, which should probably be met with the anti−

structural 6...f6!?. I have doubts about Black's prospects after Nf6 , when I would be quite tempted to go for the following pawn sacrifice, in order to get supreme control over the light squares in the centre: 7.d5 Nd8 8.d6 cxd6 *(*Black cannot stand the exchange of queens, as his pawn structure is a total ruin after *8...Qxd6?! 9.Qxd6 cxd6 10.Bxf6 gxf6* , when *11.Nh4 d5 12.Bxd5* gives White a clear advantage *)* 9.Na3 and here we should probably look at the two lines separately:

A) 9...a6 10.Bd5 Ne6 11.Nc4 Bc7 12.Ne3 and White is just much better.;

B) 9...Bxf2+ 10.Ke2! d5 *(*I think this might be forced; after *10...Bc5 11.Nh4 Ne6 12.Nf5 Qf8 13.Bxf6 gxf6 14.b4 Nf4+ 15.Kf3* White is much better *)* 11.Qxd5 Nxd5 12.Bxe7 Kxe7 13.Bxd5 Bc5 14.b4 Bd6 15.Nc4 f6 16.Ne3 and White has very good compensation for the pawn.;

C) 9...−−]

6...d6 As I said, I think this position is slightly better for White. Der gebräuchlichste Zug, aber nicht der beste.

[Mit 6...Nf6 konnte Schwarz ein wichtiges Tempo durch die Bedrohung des Bauern e4 gewinnen und dadurch den gegnerischen Entwicklungsplan einigermassen erschweren.]

7.a4 This is not too testing of course.

[Instead I will here risk my neck and dubious reputation on the underestimated 7.d5! , claiming it will guarantee White a small advantage after Nd8 8.Bd3 *(8.a4 c6 9.a5 Bc7 10.Bg5 f6)* 8...Nf6 9.Nbd2 c6 *(*Black should of course avoid *9...Nh5? 10.Nxe5 Qxe5* when *11.Nc4* wins *)* 10.Nc4 Bc7 and now White has two interesting possibilities to consider:

A) 11.Bc2!? h6 12.Ne3 0−0 13.h3 cxd5 14.exd5 Nh7 15.Nf5 Qf6 16.Qd3 Bxf5 17.Qxf5 Qxf5 18.Bxf5 g6 19.Bc2 Kg7 20.Nh2 f5 21.Rd1 Nf6 22.Nf1 Nf7 23.c4 and White was slightly better in A. Tzermiadianos−M.Lazic, Kavala 1996.;

B) 11.dxc6 bxc6 12.b3 Be6 13.Qe2 0−0 14.Ba3 and White is slightly better, A.Becker−C.Ahues, Munich Olympiad 1936. So I have some confidence that White is seriously fighting for an advantage here, or let us say that Black is struggling to equalise, and will probably have to come up with something else on move 9, but I am not really aware of what it would be. and White is slightly better, A. Becker−C.Ahues, Munich Olympiad 1936. So I have some confidence that White is seriously fighting for an advantage here, or let us say that Black is struggling to equalise, and will probably have to come up with something else on move 9, but I am not really aware of what it would be. *(14.−−)*;

C) 11.−−]

7...a6

[7...a5 8.Be3 exd4 9.cxd4 Nf6 *(9...Qxe4 10.Re1+−)*]

[7...−− **Δ**8.a5 Bxa5 *(8...Nxa5 9.Rxa5 Bxa5 10.Qa4+±)* 9.Rxa5 Nxa5 10.Qa4+ Nc6 11.d5 a6

12.dxc6 b5 13.Bxb5+−]

8.Be3

[8.a5? Nxa5 9.Rxa5 Bxa5 10.Qa4+ b5 11.Qxa5 bxc4 12.dxe5 dxe5 13.b3? *(⌓13.Nxe5 RRNf6 14.Nd2 0−0 15.f3 Re8 16.Ndxc4)* 13...f6 14.Rd1 *(14.Ba3 Qd8)* 14...Be6 15.Ba3 Rd8! 16.Nbd2 Qd7 17.Re1−+ Gunsberg,I−Alekhine,A/St. Petersburg−1 1914]

8...Bg4?! I do not see a great future for the bishop on g4. Wie die Folge zeigen wird, ist dieser Läuferzur Verteidigung des Bauern b7 notwendig. Infolgedessen wäre es besser gewesen, zunächst den Königsspringer zu entwickeln. I do not see a great future for the bishop on g4.

[Instead I would recommend leaving the square vacant for the knight. After ⌓8...Nf6 9.Nbd2 Ng4 10.Qe2 Nxe3 11.fxe3 0−0 12.Rf2 the position is more or less equal.]

9.d5 Nb8 10.a5! Weniger gut wäre der Läufertausch, da in diesem Falle Schwarz zu einem Gegenspiel auf der geöffneten c−Linie gelangen und dadurch einen Ersatz für die Schwäche seiner Bauernstellung gefunden haben würde. Der Textzug hingegen erzwingt entweder den Läuferrückzug nach a7, was zu einer unangenehmen Deplazierung des Turmes führen würde, oder aber − was in der Partie geschieht − die Öffnung der f−Linie, welche dem Anziehenden die Initiative auf beiden Flügeln sichert. **10...Bxe3**

[10...Ba7 11.Bxa7 Rxa7 ×Ta7]

11.fxe3 Nf6 12.Nbd2

[12.Qb3 Bc8]

12...Nbd7 13.Qe1 Einfacher war zunächst b2−b4 und dann erst Dd1−e1 usw. Der Textzug, der auch ansich objektiv kaum schwächer ist, wird in der Tat sogar mit grösserem Erfolge gekrönt, da der Gegner naun auf die seltsame Idee kommt, seinen Damenläufer nach c8 heimzuführen, und dadurch dem Weissen freie Hand auf dem Königsflügel überlässt.

[⌓13.b4 ΔDe1 Alekhine]

13...Nc5 14.Qb1! White is not ashamed of regretting the placement of the queen, as Black's knight will shortly be driven back to the stables with a stick.

[After something stupid like 14.Qg3?! '?!' h5! Black is better because of the weakness of the e4−pawn. One line goes Alekhine Black is better because of the weakness of the e4−pawn. One line goes 15.Ng5 h4 16.Qf2 h3 17.g3 Rh5 18.b4 Rxg5 19.bxc5 dxc5 and Black is clearly better.]

14...Bc8?! Black obviously has trouble getting something useful out of his bishop. This total retreat, however, is not the best way to deal with the issue. '?!' Black obviously has trouble getting something useful out of his bishop. This total retreat, however, is not the best way to deal with the issue.

[After the more respectful ⌓14...0−0 it is true that 15.b4 Ncd7 16.Bd3 Δc4 Alekhine Rfe8 17.c4 gives White better play, but Black can still hold the position.]

15.b4 Ncd7 16.Nh4! g6

This weakness is hard to avoid. Schwarz zieht es also vor, eine nicht unbedenkliche Schwäche seines Königsflügels in Kauf zu nehmen, um das lästige Eindringen des Springers nach f5 zu verhindern.

[After 16...Ng4 17.Nf5 Qg5 18.Nf3 White is better.]

[16...Nf8 17.b5! Alekhine]

17.Qe1 c6 Dieser gegenstoss im Zentrum ist hier wohl die einzige Möglichkeit, einigermassen zum Gegnspiel zu kommen. **18.Nhf3 cxd5 19.exd5 e4 20.Ng5!?** The knight begins a long journey, eventually ending up at d4. Though there is nothing wrong with this, it seems quite logical also to consider going there directly. '!?' The knight begins a long journey, eventually ending up at d4. Though there is nothing wrong with this, it seems quite logical also to consider going there directly. Keineswegs naheliegend! Anstatt den Springer sofort nach d4 zu spielen, verwendet Weiss darauf 5 Züge − aber dann besetzt er diesen Punkt mit sofort entscheidender Wirkung! Die Idee ist, zunächst durch einen kombinierten Angriff gegen e4 eine weitere Schwäche der gegnerischen Bauernstellung zu erzwingen und womöglich auch das Feld f5 zu erobern.

[After 20.Nd4 Ne5 21.Rf4! '!' , e.g. *(* White is much better; but after *21.Bb3 Bd7 22.Qe2 Rc8* Black would be able to keep the position together*; 21.Qh4 Nxd5!)*

A) 21...0−0?= '?' RR22.Qh4 and White wins *(22.Nxe4?? Nxe4 23.Rxe4 f5∓* Alekhine *)* 22...Nxc4 23.Nxc4 Nxd5;

B) , e.g. 21...Kd8 22.Qf2 Neg4 23.Qe2 g5 24.Rff1 Qe5 25.g3 etc.]

20...h6

[20...Ne5 21.Bb3! Bf5 22.Ba4+ Kf8 23.Bc2!± Alekhine]

21.Nh3

[Here White should not fall for 21.Qh4?? '??' Nh7 and Black wins. Alekhine and Black wins.]

21...Qe5 Schwarz überschätzt die Bedeutung seines Gegenangriffs.

[Er hätte sich doch zu ⌓21...Ne5 entschliessen müssen, worauf Weiss nach 22.Nf4 Bf5 23.h3 h5 24.Bb3 Rc8 25.c4 zwar immer noch besser stünde, aber es doch noch nicht ganz leicht gehabt hätte, seinen Vorteil entscheidend zu verstärken. ΔSe2−d4 ±/± Alekhine]

22.Rc1! Ng4

[22...Nxd5 23.Bxd5! Qxd5 24.Nf4 Qc6 *(RR24...Qe5 25.Nc4+−)* 25.c4 ΔSd5± Alekhine]

[⌓22...0−0]

23.Nf4 g5 24.h3 Ngf6 Erzwungen!

[Falls 24...gxf4 25.exf4! Δh3 Alekhine]

25.Ne2 The white knight is getting to the end of its long journey, and will land on d4 and exploit the recent weakening of the f5−square. Now Black should have utilised the weaknesses he has created on the kingside to obtain counterplay. Instead he fell pray to materialism.

25...Nxd5? '?' Schwarz steht so schlecht, dass er nun diesen bauern ohne Risiko nehmen kann.

[Better was 25...g4 , though after 26.Qg3 Qe7 27.Nd4 Ne5 28.hxg4 Bxg4 29.Nf5 Bxf5 30.Rxf5 Rg8 31.Qf4 White has a clear advantage.]

26.Bxd5 Qxd5 27.Nd4!+− Qe5? This is nothing but a stupid blunder. '?' This is nothing but a stupid blunder. Danach gewinnt Weiss durch direkten Königsangriff.

[Black should have played 27...Nf8 28.Qf2 *(28.Qe2* ΔSc4−b6 *Be6 29.c4 Qe5 30.c5 d5! 31.c6! bxc6 32.Rxc6* ΔTa6+− mit entscheidendem

Übergewicht am Damenflügel *)* 28...Rh7 29.Nf5 Qxf5 30.Qxf5 Bxf5 31.Rxf5 and White is much better.] [27...0−0 28.Rf5 Qa2 *(28...Ne5 29.c4+−)* 29.Ra1 Qb2 30.Nc4+−]

28.Nc4 Qd5 29.Nf5 Kf8 30.Nfxd6 Now White wins. **30...Rh7 31.Rd1 Qc6 32.Rd4!**

9.Be3 [%draw arrow,c6,e7,green] [%draw arrow,e7,g6,green] The novelty on the high level. Earlier white developed bishop on e3 without Bg5.

[the main move is 9.Bh4 g5 10.Bg3 *(10.Nxg5!? hxg5 11.Bxg5 Kh7 12.Qf3 Kg6 13.Bh4 Rg8∞)* 10...Bg4 *(10...Ba7 11.Nbd2 Bg4 12.Kh1 Bh5 13.Qe1 Kg7 14.Bd1 Bg6 15.Nc4 Re8 16.Bc2 Qd7 17.Qd2 Rad8 18.a4 Nh5 19.b4 d5 20.exd5 Qxd5 21.b5 e4 22.Ne3 Bxe3 23.fxe3 Nxg3+ 24.hxg3 exf3 25.bxc6 Rxe3 26.Qxe3 fxg2+ 27.Kh2 gxf1N+ 28.Rxf1 Qxc6 29.Qe5+ Kg8 30.Rf2 Re8* 0−1 Chandler,M (2485)−Karpov,A (2710)/Bath 1983/MCD *)* 11.Nbd2 Nh5 12.Kh1 Ng7 13.h3 Bh5 14.Bh2 Kh8 15.Nc4 Qf6 16.g4 Bg6 17.Ne3 Ne6 18.Nf5 Ba7 19.Qe2 Rae8 20.Rae1 Bh7 21.Nd2 Ne7 22.Qf3 h5 23.Nc4 Nf4 24.Bc2 Neg6 25.Nce3 h4 26.Ng2 Nxg2 27.Kxg2 Qd8 28.Bb3 f6 29.Kh1 Ne7 30.Nh6 Kg7 31.Nf5+ Nxf5 32.gxf5 Bg8 33.Qh5 Bf7 34.Bxf7 Rxf7 35.Rd1 c5 36.c4 Kf8 ½−½ Shanava,K (2532)−Sargissian,G (2651)/Dresden GER 2007]

9...Ng4!? Very interesting move. Black exchange advantage for strengthening white's center and giving half−open line "f"

[other way was 9...Bxe3 − see 8.Be3 Bxe3 10.fxe3 Ne7 11.Nbd2 Ng6 12.Qe1 c6]

10.d4

[10.Bxc5 with pawn on c3 this exchange is not good, because d3−pawn became week. dxc5 [%draw full, d3]]

10...Ba7 11.Nbd2 Ne7 One's again standard maneuver for this variation

[But It is interesting to try 11...Na5!? with idea to take away pressure from f7−pawn 12.Bc2 c5= Black's position is not worse]

12.h3 Forces exchange **12...Nxe3**

13.fxe3 exd4 Black tries to open position to show the power

[<xml✕:>Â ñëó<nag>13</nag>àå</:✕/xml> 13...Ng6 14.Qe1 Kh7 15.Qg3 f5 16.exf5 Bxf5 17.h4!? Bd3 *(17...e4? 18.Ng5+! hxg5 19.Rxf5! Rxf5 20.Qg4±)* 18.Rf2± [%draw full, a7] White saves some advantage, 'cause bishop on a7 is off as before. *(18.Ng5+ hxg5 19.hxg5 d5 20.Qh3+ Kg8 21.Qe6+=)*]

14.exd4 c5 Landa continues to "clear the road" for bishop

[14...d5 15.Kh1 c5]

15.Kh1 cxd4?!
[15...d5! is more perspective − blocks bishop on b3 16.dxc5 Bxc5 17.exd5 Nf5 *(17...Nxd5? 18.Ne4)* 18.Ne4 Ne3 19.Qd3 *(19.Qe1 Ba7)* 19...Nxf1 20.Rxf1⩲]
16.Nxd4! 2 white pieces have already attacked f7−square...
[16.cxd4 d5=]
16...d5 17.N2f3 dxe4? Black obvious underestimate white's pressure on f7. It was necessary to take control over e5−square
[17...Qd6 18.Qe2 Be6 19.Rae1±]
[17...Bb8!? 18.Qd3 dxe4 19.Qxe4 Qd6 20.Rad1±]
18.Ne5± [%draw arrow,f1,f7,green] [%draw arrow,b3,f7,green] [%draw arrow,e5,f7,green] [%draw full,f7] **18...Be6**
[18...Kh7 19.Nxf7 Qa5 20.Qe2+−]
19.Nxe6 Qxd1 20.Nxf8!! Nice and strong shot!
[worse was 20.Raxd1 fxe6 21.Bxe6+ Kh7 22.Nf7↑ but white saving the iniciative too *(22.Rxf8 Rxf8 23.Rd7?? Rf1+ 24.Kh2 Bb8!)*]
20...Qxb3
[20...Qxf1+ 21.Rxf1 Rxf8 *(21...Kxf8 22.Rxf7+ Ke8 23.Rxg7+−)* 22.Nxf7 Rb8 23.Nd6+ Kh8 24.Nxe4 White has extra pawn+initiaciative]
21.axb3 Rxf8 22.g4 [%draw full,e4,green] [%draw arrow,f7,f5,green] Harikrishna tries to prevent conection of black pawns.
[The other way was 22.Rad1!? e3 23.Rd7 e2 24.Re1 Nf5 25.g4□ Bf2 26.Rxe2 Ng3+ 27.Kg2 Nxe2 28.Kxf2 b5 29.Kxe2 Re8 30.Rd5 f6 31.Ke3 fxe5 32.Rd6 and because of their very active pieces, white must win]
22...Nd5 23.Rae1 Re8 24.Rf5 g6?
[24...Ne3?? 25.Rxf7 Rxe5 26.Rxb7+−]
[the only way was 24...Ne7 25.Rf4 e3 with some compensation]
25.Nxg6! Ne3?!
[⌓25...Nxc3 but after 26.Nf4 Nb5 27.Nh5+− [%draw arrow,h5,f6,green] White has wining position]
26.Re5+− Russian GM probably missed this move **26...Rd8 27.Nf4 Nd1 28.Rd5 Nf2+ 29.Kg2**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Bd6 11.f4 exf3 12.Nxf3 0−0 13.d4 c5 14.dxc5 Bxc5 15.Qxd8 Rxd8 16.Bd2 Nc6 17.Nc3 Ng4 [I played this move because I had read somewhere that it was a recommendation by Jan Timman. The apparently natural move 17...♘b4 had been tried without success in a game Timman−Bisguier, Sombor, 1974].

[17...Nb4 18.0−0−0 Bf5 19.Ne1 Ng4 20.a3 Nc6 21.Nd3 Bb6 22.h3!±]

18.Ne4 Bb6 19.0−0−0! [A strong move that took me by surprise. Apparently White is willing to allow the fork ...♘f2 at some point. A strong initiative and activity of the white pieces will be sufficient compensation for the exchange]. **19...f5 20.Bb5 Ne7 21.Nc3 Nf2 22.Rde1!** [The point of White's maneuvre. The white rook on the seventh is bound to exert a paralyzing effect on Black's game. In addition, Black's knight at h1 will be left out of the game for a long time, maybe for the whole game!] **22...Nxh1 23.Rxe7± Bc5 24.Bc4+ Kh7 25.Rc7 Bd6 26.Rf7 Bd7?** [Black's game is almost critical, but this inaccurate move will render Black's position untenable. White's rook ought to have been forced to withdraw from its dangerous position on the seventh rank. Hence 26...♖f8 was in order].

[26...Rf8 27.Rxf8 Bxf8 28.Bd5 Rb8 29.Be3 a5 30.Ba7

A) 30...Bd6 31.Bxb8 Bxb8 32.Kd2 Kg6 *(32...Nf2 33.h3 Kg6 34.Ke2 Bg3 35.Nd2 Ba6+ 36.Kf3 Nh1□ 37.a4 Be1 38.Nb3 Ng3 39.Nb5!+−)* 33.Nd4 Bf4+ 34.Ke1 Bxh2 35.Nc6 Bd6 (Δ 36 ♘xa5 ♗b4). 36.a3 a4 37.Nxa4 Bb7 38.Nc3 Bxc6 39.Bxc6±;

B) 30...Rb4 31.a3 Rg4 32.g3 (Δ 33 ♘e5). Bd6 33.Nb5!+−]

[26...Nf2!? 27.Bd5 *(27.Nd5 Ne4)* 27...Rb8 28.Be3 Ng4 29.Bxa7 Rb4 30.a3 Rf4 31.Bd4 Rxd4 32.Nxd4 Bxh2 33.Be6 Ne3 34.Bxc8 Rxc8 35.g3! Bxg3 36.Nxf5 Nxf5 37.Rxf5 Kg6± (This could probably have been Black's best practical chance. Analysis performed with the aid of computer program Genius 4 running in a 486/DX4 −100 MHz).]

27.Nd5! [A crushing move against which Black finds himself unable to put up a defence] **27...Be8 28.Nf6+ Kh8 29.Ne5!!** [The point of White's attack. Naturally, after 29 ...♗xf7 30 ♘xf7 mate!]. **29...gxf6 30.Ng6+ Kg8 31.Re7+** [A very fine game on the part of 13−year old Arturo López].

[31.Re7+ Bf7 32.Rxf7 and checkmate follows.]

14.d4!?

[14.Nh2]

[14.Bxa7 Rxa7]

14...Na5 Owing to the possibility of ...b4, White's e4−advance is hindered temporarily.

[with Nh6+ to follow, but 14...Bd7! seems to cover everything. White should prefer 15.Bxf4 Qxf4 *(15...exf4 16.e5)* 16.Nf5!? with chances to retain the initiative It is often a handy idea to bring this piece out of harm's way round to the f2−square, where it again supports e2−e4 while aiming to jump to g4. However, sharper was Bxf5! *(* H.Danielsen−J.Gunnarsson, Reykjavik 2006, continued *16...gxf5)* 17.g3 Qxe4 18.Rxe4 Bxe4 19.Qe2 Bxf3 20.Qxf3 exd4 with a slight edge to White, who probably need not worry too much about his a3−pawn coming under attack. 21.Qf6? Kh7 22.Re1 Rg8 23.Kg2 dxc3 is awkward for Black. Generally Black must think twice about offering this central exchange when White's major pieces are bearing down on f6. 24.bxc3 Ne5 25.f4 is also reasonable, but White has time to improve his queen position first, since....e5 from Black would now

invite awkward pressure against the knight on f6. A standard developing move, but in view of White's aggressive intentions, transposing to the previous note with Nd7 might have been a more active choice. 26.Qe7! is more challenging when Nc5 , contesting the d4−square, is a flexible response. Now: 27.f5]
[14...Re8 15.Bxf4 Qxf4 *(15...exf4!? 16.e5)* 16.Nf5 (otherwise e4−e5 creates a nice central pawn wedge) Bxf5 17.g3 Qxe4!? 18.Rxe4 Bxe4 19.Nd2 Bf5 20.g4 and here White could have snatched a pawn with Bd7 21.Qf3]
[14...Ne7 . 15.Nh2! allows the bishop on b7 maximum influence, and requires delicate handling from White: for example, *(15.Kh1* , but was none too convincing for White*;* The Polish grandmaster is not one to hang around! A 'pure' Polar Bear with *15.Bxf4* is playable too, but against Black's modest defence, the dangerous approach is to get kingside action underway at once. However, on limited evidence *Qxf4!?* seems a promising alternative (and is almost certainly a good reply to 6...b5, when Black's queenside would be looser): for example, *16.Nf5 Nxf5)* 15...h5

A) 16.Qf3 and now Kg7!? may have been too impatient from Black in A.Rodriguez Vila−P. Barrionuevo, Villa Martelli 2007, since the continuation 17.Rad1! Rh8 *(17...Nc6)* 18.Ne2 g5 *(18...Nxe2+ 19.Qxe2)* 19.dxe5 dxe5 20.Nxf4! gxf4 21.Bxa7 looks attractive for White. rather than the game's Rxa7 22.Qd3 Ng6 23.Nf3 Nh4 24.Rd2;

B) 16.Qd2! H.Danielsen−P.H. Nielsen, Aalborg 2000, continued creatively with Kg7 17.Nf3 Nxh3+ 18.gxh3 Qxf3 19.Bd1 Qf6!? 20.Bg5 Qe6 21.Bb3 Qxh3 22.Bh6+ Kg8!? 23.Qg5;

C) 16.−−]

[14...h5 15.a4 *(15.Bxf4 Qxf4 16.Nf5 gxf5 17.g3)* 15...a5 *(15...Kg7 16.Qd2 Nxh3+ 17.gxh3 Qxf3 18.Bh6+ Kg8 19.Qg5)* 16.Bc4 Ne7 17.Nh2 Be6 18.Bxe6 with a pleasant space advantage for White in M.Lim−Z.Rahman, Asia 1989. TRICKY TRANSPOSITION: Black could, however, avoid this possibility with the subtle move order 5...b6 6 d3 Bb7, probably transposing to the main text. with a pleasant space advantage for White in M.Lim−Z.Rahman, Asia 1989. TRICKY TRANSPOSITION: Black could, however, avoid this possibility with the subtle move order 5...b6 6 d3 Bb7, probably transposing to the main text. *(18.Ba2 Bxa2 19.Rxa2 c5)* the exchange sacrifice 18...Nxe6 *(18...fxe6 19.dxe5 dxe5 20.Bxa7 Rxa7 21.Ne2 Nc6 22.Nxf4 exf4 23.e5 Nxe5 24.Qd4 Nc6 25.Qc4 Re8 26.Re4)* 19.Nf3 Nf4!? 20.Qd2 Nxh3+ 21.gxh3 Qxf3 probably isn't quite sufficient 22.Bg5 f6 23.Re3]

15.Bc2!?

[15.Bxf4 Qxf4 intending Nh2−g4 keeps an edge while ruling out the next note. *(15...exf4* is more natural. Black probably feared *16.e5)* With this exchange Black hopes to saddle his opponent with a bad bishop on g2 - not guessing that this piece

has a glorious future. The tension typical of the Polar Bear, with pieces remaining on for a long time, has thrown Black off balance. He perhaps feared an invasion on f6 after 16.Nf5 gxf5 17.g3 Qxe4 18.Rxe4 , but this is a very tough position with no clear plan for either side. better than fxe4 19.Nd2!]

15...Nc4 16.Bc1 c5! This time White was certainly ready to advance in the centre, so Rozentalis puts a stop to it.

[16...h5 17.a4]

17.b3 Na5 18.Bxf4 Qxf4?!

[18...exf4 19.e5]

19.Nf5 Bxf5 20.g3 By this time Jakubiec was surely happy that he'd chosen the Polar Bear rather than a 'normal' opening. The position is not yet clear, but moves like Nh2−g4 and Bf3 are becoming menacing, while Black's gains on the queenside aren't likely to amount to more than a pawn. **20...Qxf3 21.Qxf3! Bd7! 22.dxe5 dxe5 23.Rad1 Be6? 24.Rd6 Rae8? 25.Red1 Bb8 26.R6d2! Nc6 27.Kg2!** DANGEROUS WEAPON! Black is mangled by the e− and f−pawns - the front paws of the Polar Bear! **27...Kg7 28.Bd3 b5 29.Bc2! b4 30.Qe3 Rc8 31.cxb4** This really opens the floodgates, but **31...cxb4 32.Bd3 Ba7 33.Qe1 Nd4 34.Bxa6 Rc3 35.Rd3** intending Nh6+ is overwhelming for White too. Doubtless short of time, Black cracks under the pressure. But here is one sample line to show how difficult his task was: **35...Rc2 36.R1d2 Rc7 37.Rb2 Rb8 38.Rd1 Rc3?! 39.Rc1 Nf3 40.Qd1 Ng5 41.h4 Nxe4 42.Bc4 Rc8 43.Rxc3 bxc3 44.Re2** and White wins. or **44...Bxc4 45.bxc4 Nd2 46.Rxe5** and it is becoming very hard for Black to find any moves: ...a5 can be met by Ra1, while Rg1 and Nh6+ is unpleasant to meet **46...Rxc4!?** (eyeing f7) **47.Qc2 Bd4 48.Rd5 Bf6** is a safer method, but Jakubiec understandably focuses on the main plan. Better would have been **49.Rd7** : for example, **49...Rb4 50.Qd3! Nc4 51.Rc7 Nb6** when Black can hope that after Bf3xh5 and Qxh5, the capture ...Qxe4 might give him sufficient play. **52.Qd6 Rb5** puts White a tempo down on the game The exclamation mark is for the plan; the timing is debatable, as **53.Qe6!?**

World Cup (rapid), Khanty−Mansiysk
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3 d6 7.c3 Be6
[Black's other bishop move, 7...Bg4 and then 8.h3 Bh5 , has more merit here than in similar positions. The reason is that Black has a clear plan to release some pressure via exchanges with ...Nd7−c5(−e6) and, depending on the situation, ...Ng5, ... Bg5, or ...Bxf3 followed by something to g5.
A) For example, 9.Re1 Nd7 10.Be3 Bxf3! *(*if *10...Nc5* , White's idea is *11.Bxc5 dxc5 12.g4 Bg6 13.Bd5* followed by Bxc6 to ruin Black's pawns, leading to an edge *)* 11.Qxf3 Bg5 12.Ba4 Bxe3 13.Qxe3 Ne7 14.d4 , S.Dolmatov−V.Kupreichik, Sverdlovsk 1984. Black has succeeded in his aim of exchanging some minor pieces, although White is still slightly more comfortably placed.;
B) More recently, Tiviakov has dispensed with Re1 to good effect, preferring 9.Be3!? :
B1) 9...Nd7 10.Nbd2! Nc5 *(*it's too late for *10...Bxf3 11.Nxf3!* , when ...Bg5 is prevented *)* 11.Bxc5! Bxf3 *(*or *11...dxc5 12.Bd5!)* 12.Nxf3 dxc5 13.Bd5! Qd6 14.Bxc6 bxc6 , S.Tiviakov−E.Bacrot, Ajaccio (rapid) 2008. The only thing standing between White and a decisive positional advantage is his d3−pawn. There might be other ways to proceed, but even Tiviakov's radical solution - just to give it up! - has some promise: 15.Qc2 Rfd8 16.Rfd1 Bf6 17.Nd2!? Qxd3 18.Qxd3 Rxd3 19.Nc4 Rad8 20.Rxd3 Rxd3 21.Kf1 Kf8 22.Ke2 Rd8 23.Rd1 Rb8 24.Rd7 Rc8 25.Na5 Ke8 26.Rd2 and only White has chances to win this position. (I should add that in the game Tiviakov went horribly wrong and ended up fortunate to draw!);
B2) Judging by that evidence, 9 Be3 looks like a good way to cut across the ...Nd7−c5 plan. Should Black consider changing plans with 9...d5 here? If White captures on d5, his bishop isn't ideally placed on e3. Development with 10.Nbd2 makes more sense. For example, d4!? *(*if *10...a6* , White could play *11.Qe2*

and then, say, *Qd7 12.Rfd1 h6 13.Nf1 d4 14.Bd2 Rad8 15.Ng3)* 11.cxd4 exd4 *(11...Nxd4 12.g4!)* 12.Bf4 Bd6 *(12...Nd7!?)* 13.Bxd6 Qxd6 14.Qc2! Bxf3 15.Nxf3 , as played in E.Torre−C.Becx, Lugano 1989. White is better here because of his strong bishop, the open c−file and pressure against d4 and c7.;

B3) 9...−−;

C) 9.−−]

Let's return to the position after 7...Be6. Once again White is faced with a familiar conundrum: should he keep the bishop on b3 or avoid the possibility of an exchange? **8.Bc2** In earlier times players tended to keep the bishop on b3, at least for the moment, but it's noticeable that grandmasters such as Malakhov and Tiviakov prefer to hide the bishop on c2.

[After 8.Nbd2 (8 Re1 often transposes) here are some typical lines:

A) 8...Bxb3 9.Qxb3 Rb8 10.Re1 Nd7 11.Nc4 h6 12.d4 Bf6 13.Be3 (White has a slight edge here) exd4?! *(* Lukacs prefers *13...Nb6)* 14.cxd4 Nb6 (S.Dolmatov−S. Agdestein, Tilburg 1993) and now 15.d5 (Lukacs) would have left White in control.;

B) 8...Qd7 followed by centralizing the rooks is a typical plan. 9.Re1 and now:

B1) 9...Rae8 intending ...Bd8 followed by ...Ne7−g6, has been played a few times but it looks a bit artificial: 10.Nf1 *(* or *10.Ba4 a6 11.d4 exd4 12.Nxd4* with a slight advantage - Yudasin *)* 10...Bd8 11.Ng3 d5 *(* after *11...a6 12.Bc2 Qc8 13.d4 Bg4 14.Be3 d5 15.h3 exd4 16.cxd4 dxe4 17.hxg4 exf3 18.Bf5* the position had opened up nicely for White's bishops in J.Nunn−E.Geller, London 1982 *)* 12.Ba4! . This is a key idea, and a recurring theme. I can say from experience that it's not so easy to remember this possibility over the board (especially if the bishop has previously retreated to c2). The pin on the c6−knight can cause Black grief, and for this reason he often spends a tempo on ...a6 so as to answer Ba4 with ...b5. A.Cherniaev−Ma. Tseitlin, Biel 1999, continued Qd6 13.d4! dxe4 14.Nxe5 and Black could find nothing better than to give up material with Nxe5 15.dxe5 Qxe5 16.Bxe8 Rxe8 .;

B2) 9...Rad8 10.Ba4!? (here it is again; this time White's aim is to play d4 while avoiding the exchange of bishops) a6 11.d4 b5 12.Bc2 Bg4 13.h3 Bh5 14.d5 Nb8 *(* Lukacs prefers *14...Na5* which does look more natural; perhaps Balashov was concerned about *15.a4)* 15.Nf1 c6! (Black must fight back in the centre; play is similar to that in the 9 d4 Lopez, except that Black's light−squared bishop is a bit misplaced) 16.dxc6 Nxc6 17.Ng3 Bg6 (A.Jakubiec−Y. Balashov, Wisla 1992) and here

18.Nh4 d5 19.Nxg6 hxg6 20.exd5 Nxd5 looks good enough for a slight advantage for White, in view of his bishop pair.;

B3) 9...−−;

C) 8...−−]

8...d5 This advance is Black's most natural response to 8 Bc2, and also the most popular choice.

[If 8...Nd7 preparing ...f5, White strikes in the centre with 9.d4! and Black has to deal with the threat of d5. L.Totsky−V.Golod, Moscow 1991, continued exd4 10.Nxd4 *(* also possible is *10.cxd4 d5 11.Nc3 dxe4 12.Nxe4)* 10...Nxd4 11.cxd4 Nb6 12.Nc3 c5 *(* if *12...d5* , White advances with *13.e5)* 13.d5 Bc8 14.f4 *(* White can also play more positionally with *14.a4)* 14...Bf6 15.e5!? dxe5 16.fxe5 Bxe5 17.Bxh7+ Kxh7 18.Qh5+ Kg8 19.Qxe5 and White maintained an edge.]

9.Nbd2 In comparison to some of the ... Be6, Bc2 lines of previous chapters, White could argue that Black's dark−squared bishop is more passively placed on e7 and it's not so straightforward for Black to organize his forces. This is at least partially true, although one way for Black to try to remedy the problem is to play ...Re8, ...h6 (to prevent Bg5 or Ng5) and ...Bf8.

[Tiviakov has played 9.Qe2 , and this move has the merit of accelerating Rd1 if Black chooses to release the tension.

A) For example: 9...dxe4 10.dxe4 Nd7! (the best way to reorganize) 11.Rd1 *(11.Nbd2* would transpose to the main game *)* 11...Qc8 *(11...Qe8! 12.Ng5 Bxg5 13.Bxg5 f6 14.Be3 Qf7* , as played in M. Ohme−C.Billing, Kelheim 2007, effectively gains a tempo and White's advantage based on the two bishops is small *)* 12.Ng5! Bxg5 13.Bxg5 f6 14.Be3 Qe8 15.Nd2 a5 16.Nc4 Qf7 17.Na3 b6 18.Rd2 Rfc8?! 19.Ba4 Na7 20.Rad1 and White was in total control, S.Tiviakov−M.Van der Werf, Dieren 2006.;

B) What happens if Black tries to keep the tension in the centre? Let's see: 9...Re8 10.Nbd2 *(10.Ba4!?)* 10...a6 (prophylaxis against Ba4) 11.h3 h6 12.exd5!? *(12.Rd1 Bf8 13.Nf1 Qd7 14.Ng3 Rad8* is roughly equal *)* 12...Nxd5 *(12...Bxd5* intending *13.Re1 Bf8* looks like a decent alternative *)* 13.Nc4 and now:

B1) 13...f6 is met by 14.d4 .;

B2) If 13...Bd6 , I wonder whether White can grab the pawn: 14.Ncxe5 Nxe5 *(* or *14...Bf5 15.Nxc6! Rxe2 16.Nxd8 Rxc2 17.Nxb7)* 15.Nxe5 Bf5 16.f4 , intending f6 17.Qh5! .;

B3) 13...Nf4 14.Bxf4! exf4 15.d4 Bd5 16.Rfe1 Bf6 17.Qd3 g6 18.Rxe8+ Qxe8 19.Ncd2 , when White's strong centre and better structure is worth more than Black's bishop pair, L.Hoyos Millan−V.Nasybullin, correspondence 2007. Overall, I feel that Black should be okay if he is careful but I would still prefer to be White.;

B4) 13...−−;
C) 9...−−]

9...dxe4 Black can also consider keeping the tension here:

[a) 9...Qd7 10.Re1 Rad8 11.Ba4! (this move, again!) Bd6 12.h3 *(*I don't see anything terribly wrong with *12.exd5 Bxd5 13.Nxe5)* 12...a6 13.Ng5!? b5 14.Bb3 Ne7 *(14...Bc5!?)* 15.d4! Ng6 16.Nxe6 fxe6 17.exd5 exd5 18.Ne4! c6 19.Nxd6 Qxd6 20.dxe5 Nxe5 21.Bf4 Nfd7 22.Bg3 Rde8 23.Re3 Qf6 24.Qe2 Re7 25.a4! and Black was beginning to feel the pressure in D. Sermek−M.Zelic, Pula 2001.]

[b) 9...Re8 10.Re1 *(10.Qe2* transposes to 9 Qe2, above *)* 10...Bf8 11.h3 h6 *(11...a6 12.Ng5!)* 12.Ba4 *(*expanding Philidor−style with *12.b4!? a6 13.Bb2* looks interesting, intending a3, exd5 and c4 *)* 12...dxe4 13.dxe4 Nd7! 14.Nf1 *(*I'm tempted by *14.Qe2* followed by Bxc6 and Nc4 *)* 14...Na5 *(*Lukacs suggests *14...Qf6* , aiming for ...Nc5 and ... Rad8 *)* 15.Ne3 c6 16.Bc2 Nc4 17.Ng4! h5 18.Ngh2 f6 19.Qe2 Bf7 20.Nh4 (White is marginally better, but the game ends dramatically...) g6?? 21.Nxg6! and 1−0, A.Lutikov−A. Tuzovsky, Frunze 1973.]

10.dxe4 Nd7! It might appear that Black has quite a few decent options here, but in reality it's difficult to find another way to reorganize effectively and to deal with White's plan of Qe2, Nc4, Rd1 and possibly Ba4.

[The plan of ...Bc5 and ...Qe7 has some appeal, but it seems that Black doesn't have enough time to arrange this together with the necessary prophylactic moves like ...h6 and ...a6/ ...a5. For example, 10...Bc5 11.Qe2 Qe7 12.Nc4 Nd7 13.b4 *(*or *13.Ng5)* 13...Bd6 14.Rd1 Nb6 15.Ne3!]

[or 10...a5 11.Qe2 Bc5 12.Nc4 Nd7 13.Ng5 ; in both cases White can count on at least a small advantage.]

11.Qe2 Qe8 Planning ...f6, usefully preventing Ng5, followed by ...Qf7, after which Black's pieces enjoy some coordination.

[11...Nb6 prevents Nc4, but there's still Nf1−e3 (or g3). I think that White's most challenging plan here involves a pawn advance on the queenside: 12.b4 Bd6 13.Rd1 a5 14.b5 Ne7 (L.Mazi−V.Srebrnic, Aschach 1994). Here, I was engrossed by a long Rybka−inspired line: 15.Ng5 Bd7 16.Nxh7! Kxh7 17.Qh5+ Kg8 18.Nf3 g6! *(18...f6 19.Bb3+)* 19.Qh6 f6 20.Bb3+ Rf7 21.Bg5! *(21.Be3 Nbd5! 22.Bxd5 Nxd5 23.Rxd5 Rh7! 24.Qxg6+ Rg7 25.Qh6 Rh7* is a draw by repetition *)* 21...Qf8!? 22.Qh4! Ned5! 23.Rxd5 a4! 24.Rxd6 axb3 25.Rxf6 Qg7 26.Rxf7 Kxf7 and who knows what is happening? A bit of tangent, I realize, but fun to analyse!]

12.Nc4 f6 13.Ne3

[Heading for d5. 13.Rd1 Qf7 14.Ne3 comes to the same thing.]

13...Qf7 14.Rd1 Rfd8 15.Nd5 Rac8

[Lukacs suggests that 15...Nb6 16.Nxe7+ Nxe7 restricts White's advantage to a minimum, and it's hard to argue with this. White can play 17.b3 followed by Be3 and hope to slowly make some inroads using his bishop pair.]

16.Be3 Carlsen clearly believed in

Black's position to some extent, because he was happy to repeat the line right up to this point against the same opponent in the same mini−match. Having said that, I guess there would have been precious little opportunity to prepare thoroughly between the rapidplay games. **16...Bc5?** This is a blunder, which loses material to a simple tactic.

[Carlsen's improvement in the next game was simply 16...Bf8 , but after 17.Rd2 a6?! *(*Black has problems to solve even after *17...Ne7 18.Rad1* , but this looks like a wiser choice *)* 18.Rad1 he was under some pressure. If Bc5 , 19.Bxc5 Nxc5 20.b4 Nd7 21.Bb3 keeps White on top.]

17.Bxc5 Nxc5 18.Qb5! If the knight moves, White just takes on b7. Carlsen's creative attempt to trap the queen is met by a solid refutation. **18...b6!? 19.b4 a6 20.Qxc6 Rd6 21.Nxf6+!** Winning. **21...gxf6 22.Rxd6 cxd6 23.Qxb6 Nd7 24.Qxd6 Rxc3 25.Bb3 Bxb3 26.axb3 Rxb3 27.h3 Nf8 28.Rxa6 Ng6 29.Ra8+ Kg7 30.Rc8 Kh6 31.Rc7 Rd3 32.Qc6 Qf8 33.b5**
1−0

C54

□ **V.Bologan**
■ **B.Heberla**
European Championship, Plovdiv 2008
[John Emms]

In the next two games we consider lines where Black castles quickly, either on move five or six. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 a6 6.Bb3 0−0** We've seen this idea of quick castling before, in Tiviakov−El Taher. The only difference here is that h2−h3 and ...Ba7 haven't been played, but this slight change could be more significant than it initially appears to be.

[6...d5 7.exd5 Nxd5 8.0−0 0−0 9.h3 *(*or *9.Nbd2* transposes to lines considered below. *)*]

7.h3!? White keeps all his options open, and this move is useful in preventing ... Bg4 later on. Alternatively:

[a) Judging by what we've seen in previous games, there's a great temptation to play 7.Bg5!? h6 8.Bh4 here.

A) Indeed, after 8...d6 9.Nbd2 Black suffers the usual pains from the pin. For example, Ne7 10.Bxf6 *(*or *10.d4!?)* 10...gxf6 11.Qe2 f5 12.0−0−0 Kh8 13.d4 exd4 14.cxd4 Ba7 15.e5 and Black's king remains a concern, M.Kobalija−A.Kharlov, Internet 2004.;

B) Alternatively, 8...g5 9.Bg3 d6 10.Nbd2 Bg4 *(*I prefer *10...Nh5)* 11.h3 Bh5 12.Qe2 Bg6 13.h4 Nh5 14.hxg5 Nxg3 15.fxg3 hxg5 16.0−0−0 , again with some advantage to White, V.Ivanchuk−M.Marin, Canada de Calatrava (blitz) 2007.;

C) However, Black has a strong defensive resource in 8...Be7! . Even though this move breaks the pin, it might not be easy at first to understand its real strength. After all, hasn't Black just given up a tempo with ...B(f8)−c5−e7 in an otherwise normal looking position? That's a fair question, but it's not quite as simple as that. It could be argued in Black's favour that

White's bishop on the h4−d8 diagonal is now somewhat misplaced, since it offers Black opportunities to relieve some pressure via exchanges. S. Tiviakov−M.Marin, Reggio Emilia 2007, continued 9.Nbd2 d6 *(9...Nh5 10.Bg3 Nxg3 11.hxg3 d6* , as indicated by Marin, bypasses White's possibility on the next move *)* 10.Bg3!? *(10.0−0 Nh5! 11.Bxe7 Qxe7* sees Black's exchanging plan in action *)* 10...Re8 *(*Tiviakov's idea was to meet *10...Nh5* with *11.Nxe5! Nxe5 12.Bxe5 dxe5 13.Qxh5 Qxd3 14.Qxe5* with some advantage, since *Bg4* can be answered safely by *15.Bc4)*

C1) Here Tiviakov's 11.Nf1?! looked too slow and cumbersome with the bishop on g3 blocking its natural route, and with d5! (Marin) Black's position already looks comfortable.;

C2) I would prefer 11.0−0 , planning typical central action with h3, Re1, d4 etc. Black can grab the bishop pair with Na5 *(*but not *11...Nh5? 12.Nxe5!)* 12.Bc2 Nh5 , but as compensation White can gain space on the queenside after 13.b4 Nxg3 14.hxg3 *(14.fxg3!?)* 14...Nc6 15.Bb3 .;

C3) . 11.−−;

D) 8...−−]

[b) 7.Nbd2!? intending d5 *(7...Ba7* transposes to the last three games *)* 8.exd5 Nxd5 9.0−0 is also possible. Now:

A) We've seen previously that White must be wary of ...Nf4 ideas, but here 9...Nf4?! 10.Ne4! gains a key tempo attacking c5, and if Nxd3?! there follows 11.Nfg5! . Suddenly Black is facing a fierce attack: for example, h6? *(*Black has to play *11...Nxc1!* , although even here *12.Qh5! Bf5 13.Bxf7+ Kh8 14.Raxc1 h6 15.Nxc5 Qxg5 16.Qxg5 hxg5 17.Bd5* is very good for White *)* 12.Qh5! Qe7 13.Qg6! hxg5 14.Nxg5 and Black is forced to give up his queen.;

B) 9...Bg4 is logical and has been played a few times: 10.h3 Bh5 11.Ne4 Ba7 12.Re1 *(*or *12.Ng3!? Bg6 13.Re1)* 12...f6 13.Be3! Bxe3 *(*if *13...Kh8* , *14.Bxa7 Rxa7 15.Ng3 Bf7 16.d4!* opens up the centre to White's advantage *)* 14.fxe3 Bf7 15.Qd2 h6 16.d4 and White's centre pawns promise him a slight advantage, P.Svidler−T. Ernst, Gausdal 1991.;

C) 9...−−]

Let's return to the position after 7 h3:

7...d5 In many ways this is the consistent follow up to 6...0−0, especially since 7 h3 appears to do little to discourage this advance (in comparison to, say, 7 0−0).

[If 7...Ba7 White shouldn't hesitate to reply with 8.Bg5! (see Tiviakov−El Taher).]

[Likewise, 7...d6 can and probably should be met by 8.Bg5! . In either case Black has lost the possibility to unpin with ...Be7.]

8.exd5! Again we see White choosing Plan B.

[If 8.Qe2 h6 9.Nbd2 Be6 10.Nf1

Black has gained a tempo by playing ...d5 in one go, and he might even find a better move than the usual ...Bc5−a7.]

8...Nxd5 9.0−0

[This time White must avoid 9.Nbd2? Nf4! .]

9...Nde7 By removing the knight from its potentially vulnerable post on d5, Black hopes to avoid some tactical possibilities and also expose the d3−pawn. What's more, Black can now reinforce the e5−pawn if need be by playing ...Ng6. Some other moves have been tried here:

[a) 9...Ba7 transposes to Roy Chowdhury−Skjoldborg.]

[b) 9...Nf6 10.Re1 Qd6 11.Nbd2! Qxd3 12.Nxe5 Nxe5 13.Rxe5 Ba7 *(* if *13...Bd6??* , *14.Bc2!* traps the queen in mid board! *)* 14.Qf3! Qxf3 15.Nxf3 with an edge for White, R. Mainka−R.Stern, Höckendorf 2004. The 'exchange' of pawns in the centre often benefits White, whose pieces tend to be a bit more actively placed. There's pressure against f7, and possibilities of Ng5, Re7 and Bf4 or Bg5.]

[c) 9...Nb6 10.Re1 h6 11.Nbd2! *(* not *11.Nxe5?! Bxf2+! 12.Kxf2 Nxe5 13.Rxe5? Qf6+)* 11...Qxd3 12.Nxe5 Qg3 13.Qf3! Qxf3 14.Ndxf3 , as played in V.Kramnik−M. Krasenkow, Wijk aan Zee 2003, is similar to the previous note. After Krasenkow's Ne7 *(* Black can improve with *14...Nxe5 15.Nxe5 Bd6* , but here *16.Ng6 Rd8 17.Ne7+ Kf8 18.Nxc8 Raxc8 19.Be3* , as indicated by Lukacs, gives White the advantage of the bishop pair in an open position *)* , I think Kramnik could have won a pawn with 15.Nxf7! Rxf7 16.Rxe7! Bxe7 17.Ne5 - I really can't see anything wrong with this.]

10.Nxe5!?

[10.Re1 Ng6 11.Ng5!? is another possibility. For example, h6 12.Qh5! hxg5 *(* or *12...Nce7 13.Ne4 Bb6 14.Bxh6!)* 13.Qxg6 Na5!? *(13...Qf6!* keeps the material balance, and after *14.Qxf6 gxf6 15.Nd2 Bb6 16.Ne4 Kg7 17.Be3 Rd8 18.Rad1* the position looks equal to me *)* 14.Qxg5 Nxb3 15.axb3 Qxd3 16.Qxe5 Bd6 17.Qe3 Qc2 18.Nd2 Bf5 19.b4 , R.Mainka−H.Bastian, Hoeckendorf 2004. White is threatening to unravel with Nc4 or Nf3−d4, and I don't think Black has got quite enough compensation for the pawn.]

10...Nxe5 11.d4 Bxd4 12.cxd4 N5c6

We've reached an IQP position. Will White's d−pawn be a strength or a weakness? In the game Black soon manages to capture it, but the cost of doing so it too great. **13.Bg5**

[I wonder about 13.d5 Na5 14.Nc3 here. White wants to increase the pressure with Re1, Bg5 etc.]

13...Be6

[I think Black can obtain a more favourable version of the game by flicking in 13...h6! here. If 14.Bh4 *(14.Bxe7 Qxe7 15.Nc3 Bf5 16.d5 Ne5* looks equal *)* 14...Be6 , the insertion of ...h6 and Bh4 seems to help Black. For example, 15.Nc3 Bxb3 16.Qxb3 Qxd4!? *(* or *16...Qd7)* , and because the bishop is attacked on h4, White has to settle for the less threatening 17.Bxe7 Nxe7 18.Rad1

*(*or *18.Qxb7 .)*]

14.Nc3 Bxb3

[It's a bit late for 14...h6 now, since 15.d5! hxg5 16.dxe6 f6 is something Black would rather avoid.]

15.Qxb3 Qxd4? Too greedy! Now Bologan is able to whip up a fierce initiative.

[15...Nxd4 16.Qxb7 is only a bit better for White,]

[and there's also nothing wrong with 15...Qd7 : 16.Bxe7 *(16.Qxb7?? Rfb8* traps the queen,*;* or *16.d5 Nd4 17.Qc4 Ndf5* and the knight heads for d6 *)* 16...Nxe7 17.Qxb7 Nc6 18.d5 Nd4 19.d6! Qxd6 20.Rad1 Rab8 21.Qe4 c5 and the position is equal.]

16.Rfe1! Na5 17.Qa3 Nec6 18.Rad1! Qa7 Not a pleasant move to have to play! With the black queen and both knights stranded on the queenside, Bologan isn't slow to seek action on the other side of the board, with decisive results. **19.Nd5 Nc4 20.Nf6+!**

[This striking sacrifice leads to a mating attack, although to be fair White is spoilt for choice here. 20.Qc3! is also strong: Nd6 21.Nf6+! Kh8 *(21...gxf6 22.Bxf6* is even quicker *)* 22.Qd3 g6 23.Qc3 Nb5 and now the attack on the queen can be ignored with 24.Ng4+!! Nxc3 25.Bf6+ Kg8 26.Nh6# .]

20...gxf6 21.Qg3! fxg5 22.Qxg5+ Kh8 23.Qf6+ Kg8 24.Rd5! N4e5 25.Rdxe5 Nxe5 26.Rxe5 Despite being a rook ahead, Black's position is hopeless.

26...Rfe8

[If 26...Rfd8 , White finishes Black off with 27.Rg5+ Kf8 28.Rf5 Rd7 29.Qh8+ Ke7 30.Re5+ Kd6 31.Qf6# .]

[The only way to avoid mate is with 26...h6 , but 27.Qxh6 Qb6 28.Rg5+ Qg6 29.Rxg6+ fxg6 30.Qxg6+ is an easy win.]

27.Rg5+ Kf8 28.Rf5

[White mates after 28.Rf5 Re1+ *(28...Re7 29.Qh8#)* 29.Kh2 Ke8 30.Qxf7+ Kd8 31.Rd5+ Kc8 32.Qf8+ . Plan B can be just as dangerous as Plan A!]

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 d6 6.Bb3 0−0 7.c3 h6

This little pawn move is sometimes played just to prevent Ng5 when Black is planning the typical regrouping manoeuvre ...Re8, ...Bf8 and possibly ...g6 and ...Bg7, so that he is better placed to fight in the centre (the rook adds pressure down the e−file; the bishop influences events down the long diagonal). In this particular line, though, 7...h6 is normally used in a different way - to free h7 for the knight! It might not be the first idea that comes to mind, but there's some solid logic behind it. Black wants to play ...Nh7−g5 to exchange at least one pair of minor pieces, and maybe two, in order to ease the congestion in his position and also to loosen White's control of the dark squares in the centre. Black has also tried other plans involving moving the f6−knight:

[a) 7...Nd7 frees f6 for the bishop and also aims for ...Nc5. With the pressure off e4, 8.d4 is a logical response. Now:

A) The tempo−losing 8...Nf6!? is actually not as bad as it looks, since 9.Nbd2 Bg4 pressures White's centre. Even so, I was slightly worse after 10.d5 Nb8 11.h3! Bc8 *(*if *11...Bh5* , White plays *12.Re1* followed by Nf1−g3, or g2−g4 *)* 12.Re1 Nbd7 13.Nf1 Ne8 14.Bc2 g6 15.Bh6 Ng7 16.g4! Nf6 17.Qd2 Kh8 18.Ng3 Ng8 19.Be3 in A.Minasian−J.Emms, Paris 1994.;

B) 8...Bf6 9.Be3 Na5 *(*or *9...Re8 10.d5 Ne7 11.c4 Ng6 12.Nc3 Nh4 13.Ba4* with an edge for White, L.Psakhis−E.Geller, Soviet Championship 1983 *)* 10.Bc2 Nc4 11.Bc1 and White can build slowly here because there's not a huge amount of pressure on his centre. The continuation of the game D. Pikula−S.Smagin, Biel 1996, is worth noting: Re8 12.a4!? Nf8 13.b3 Nb6 14.a5 Nbd7 15.Nbd2

Ng6 16.b4 a6 17.Nc4 exd4 18.cxd4 Nb8 19.Ne3 Nc6 20.Rb1 . White has gradually seized more and more space whereas Black seems to have been going round in circles.;

C) 8...−−]

[b) 7...Kh8 unpins the f−pawn in preparation for ...Ng8 and ...f5. White must react energetically in the centre to have a chance of gaining an advantage: 8.Nbd2 *(*development is key; *8.h3?! Ng8! 9.d4 f5* is what Black is hoping for *)* 8...Ng8 9.d4! (everything else is too slow and Black just breaks with ...f5). Here Black has a choice:

A) 9...f5 (consistent, but...) 10.dxe5 dxe5 11.Nc4 *(*or even *11.exf5 Bxf5 12.Bc2 Qd7 13.Re1)* 11...Qxd1 12.Rxd1 Bf6 13.exf5 *(*or *13.Ne3 fxe4 14.Nd2)* 13...Bxf5 14.Ne3 Bg6 15.Nd5 Rac8 16.Be3 a6 17.h3 Bh5 18.Bc2 Nge7 19.Be4 with some advantage for White in view of his greater activity and better structure, D.Sermek−N.Pedersen, Groningen 1993.;

B) Black can change course with 9...Bf6 , but then even the simple 10.dxe5 is enough for some advantage, because of Black's less than optimally placed pieces: Nxe5 11.Nxe5 dxe5 12.Nc4 (M.Magomedov−V.Malaniuk, Koszalin 1999) Be6!? 13.Ne3 *(13.Be3!?)* 13...Qxd1 14.Rxd1 Rad8 15.Rxd8 Rxd8 16.Bxe6 fxe6 17.Kf1 (Magomedov). White will organize himself with Ke2 and Bd2 etc, and the weakness of Black's doubled e−pawns isn't going away.;

C) 9...−−]

8.Nbd2

[8 Re1 and 8.h3 are also viable, and indeed there are transpositional possibilities if Black follows up with ...Re8 and ...Bf8. However, with 8 Nbd2 White has something else in mind against Black's main plan.]

[8.Re1 Nh7 9.Nbd2 Ng5 10.Nxg5 Bxg5 11.Nc4 Be6 12.d4 Bxc4 13.Bxc4 Bxc1 14.Rxc1 Qf6 15.Bd5 Ne7 16.Bb3 was ever so slightly better for White in L.Psakhis−O. Romanishin, Lviv 1984.]

8...Nh7

[8...Re8 is Black's other main choice here. For example, 9.Re1 Bf8 10.h3 g6 *(*if *10...Na5 11.Bc2 c5* , White can again consider the a3 and b4 plan *)* 11.d4 *(*White could play more slowly with *11.Nf1 Bg7 12.Ng3)* 11...Bg7 12.a3 *(*to prevent ...Nb4, which Black plays after *12.Bc2 exd4 13.cxd4)* 12...a5! (gaining counterplay on the queenside) 13.Bc2 Bd7 14.Nf1 a4 15.d5 *(15.Bxa4 exd4 16.cxd4 Nxd4!* was Black's intention *)* 15...Ne7 16.c4 Nh7 17.Ng3 b5!? 18.cxb5 Bxb5 19.Bd2 c6 20.dxc6 Bxc6 21.Bc3 with a complex and roughly level position, S.Kudrin−K.Thorsteins, Gausdal 1982.]

9.Nc4!? Ng5

[9...Bg4 can be met aggressively by 10.Ne3 Bh5 11.g4! . This is difficult for Black to face, even though it might be okay for him after accurate defence: Bg6 12.Nf5 Bxf5 13.gxf5

A) 13...Ng5 looks better and Black

was close to solving his problems after 14.Kh1 Kh8 15.Nxg5 *(*why not *15.Rg1* here? *)* 15...Bxg5 16.f4 Bxf4 17.Bxf4 exf4 18.Rxf4 Qf6 in C.Gorals−P.Haba, Internet (freestyle) 2006;

B) 13...Bg5 14.Nxg5 hxg5 15.Kh1 Na5 16.Bc2 g6 17.Rg1 Kh8 18.fxg6 fxg6 19.Be3 Qf6 20.Rg3 Nc6 21.Qg4 Qe7 22.Rh3 Kg7 23.Rxh7+! Kxh7 24.Bxg5 Qg7 25.Qh4+ Kg8 26.Bb3+ and Black resigned in J.Emms−M.Pein, Southend 2005, in view of Rf7 27.Bf6 g5 28.Bxg5 and Rg1.]

10.Nxg5 Bxg5 11.f4! This is the point and the justification behind White's previous play (avoiding Re1 and not spending a move on h3). It's easy to forget that d3−d4 isn't White's only pawn break!

[11.Re1 would transpose to Psakhis−Romanishin, above.]

11...exf4 12.Bxf4 Bxf4

[A.Onischuk−P.Blatny, Elista Olympiad 1998, instead continued 12...Be6 13.Ne3!? *(13.d4 Bxf4 14.Rxf4 Qg5 15.Qf3* reaches the main line *)* 13...Bxf4 14.Rxf4 Qg5 *(*Onischuk prefers *14...Ne7* , but still assesses *15.d4 Ng6 16.Rf3 Qh4 17.Bc2* as a clear advantage for White *)* 15.Rf3 h5?! 16.d4 Ne7 17.Qd3 c6 18.Bc2 and White was slowly building up the pressure in the centre and on the kingside. This King's Gambit pawn structure is certainly favourable for White, which is why it's worth keeping in mind the idea of f2−f4.]

13.Rxf4 Qg5 14.Qf3 b5!? Black wants to kick the knight away so that he can land his own knight on e5. White must react vigorously otherwise he loses his advantage.

[14...Be6 is more solid, but White's exchange sacrifice in S.Roy Chowdhury−A.Filippov, Manama 2009, looks very promising: 15.d4 Ne7 16.h4!? *(*this is committal, and *16.Qf2* intending *Ng6 17.Rf3* is a decent alternative *)* 16...Qb5 17.d5 Bd7 18.Rf1 Qc5+ 19.Kh1 f6 20.e5! (not allowing Black to consolidate) Ng6 21.e6! Nxf4 22.Qxf4 Be8 *(*or *22...Bb5 23.Qf5! Bxc4 24.Bc2 Rf7 25.Qh7+ Kf8* and now the brilliant *26.Rxf6!!* and White wins - Golubev *)* 23.Ne3 Bg6 24.Nf5 Rae8 25.Rf3 Bxf5 *(*or *25...Kh7 26.h5! Bxh5 27.Rh3 Bg6 28.Rxh6+)* 26.Qxf5 Re7 27.Bc2 g6 *(*if *27...g5* , *28.hxg5 hxg5 29.Rh3! Qb5 30.Rh7 Qe8 31.Qh3* wins - Golubev *)* 28.Qxg6+ Rg7 29.Qxh6 f5 30.e7! Re8 31.Qe6+ Kh8 32.Rxf5 and Black resigned.]

15.h4!

[15.Ne3?! Ne5! 16.Qf1 Nxd3! , overloading the queen, was Black's idea. White can save himself with 17.Rxf7! Qxe3+ 18.Kh1 , and here Be6 19.Rxf8+ Rxf8 20.Bxe6+ Kh7 21.Qxf8 Nf2+ 22.Kg1 Ng4+ 23.Kh1 Nf2+ is perpetual check.]

15...Qg6 16.Ne3 Ne5 17.Qe2 Qg3

[The immediate 17...Be6 , accepting a disadvantage, is the safer option.]

18.Raf1 Be6 19.d4! White is happy to sacrifice the h−pawn, as he is fully coordinated and ready to attack fiercely on the kingside. **19...Ng6 20.R4f3 Qxh4 21.Nf5! Qd8**

[After 21...Bxf5 22.Rxf5 , Rybka wants to play Nh8

which sums up Black's position!]

22.Qxb5 Rb8 23.Qe2!

[White could have played 23.Qa4 , but this pawn sacrifice looks even stronger.]

23...Bxb3 24.axb3 Rxb3 25.Rg3!

The threats on the kingside begin to mount. The first one Black has to prevent is 26 Qc4 threatening the rook and the knight. **25...d5**

[25...Kh7 would be the most natural try, but then 26.Nxh6! is very strong: gxh6 *(26...Kxh6 27.Qg4!)* 27.Qh5 Kg7 *(* if *27...Qe7* , White plays *28.Rh3)* 28.Rxf7+! Rxf7 29.Rxg6+ Kf8 30.Qg4 Rb8 *(30...Qd7* loses to *31.Rg8+ Ke7 32.Qh4+ Ke6 33.Rg6+)* 31.Rxh6! (White doesn't need to rush to win the queen) Ke8 32.Rh8+ Ke7 *(* or *32...Rf8 33.Rh7!)* 33.Rxd8 Rxd8 34.b4 with good winning chances.]

Black's choice in the game allows him to defend on the kingside for the moment, but only at a cost of giving back the pawn, and a powerful central one at that.

26.exd5 Rb6 27.c4! Kh7 28.Qd3 Rf6 29.b4 Re8 30.Rgf3 Kh8?

[Black can hardly make a move here. 30...Qd7 doesn't lose immediately, but 31.b5 keeps up the intense pressure. If Kh8 , White can even play the simple 32.Ng3 Rxf3 33.Qxf3 Kg8 34.Nf5 followed by c5.]

Black's choice in the game fails to meet White's main threat. **31.Nxg7!**

This is winning. **31...Rxf3 32.Qxf3 Rg8 33.Nf5 Qg5 34.d6 cxd6 35.Nxd6 Qh4 36.Qf6+ Qxf6 37.Rxf6**

7: Middleton 2018
[Joshua Sheng & Guannan Song]

This game mainly revolves around building an advantage based on a few positional mistakes from the opponent. It is entirely possible to win without an extreme dynamic advantage. −−− **1.e4 e5 2.Nf3 Nc6 3.Bc4** Although I have played the Italian as my principal weapon against 1...e5 for much of my career, I underwent a new study of it in 2018. Since then, I have had excellent results with it. I do not consider the opening to be super impressive, but I like most of the positions that arise from it. **3...Bc5 4.0−0 Nf6 5.d3 a6 6.c3 Ba7 7.a4** This scheme is the more modern way to play the Italian. White will soon need to think of some way to guard the c4−bishop from a potential Black ...Na5. Historically, this was usually done by withdrawing the bishop to c2 via b3, but it is quite popular nowadays to leave the bishop on the more active a2−g8 diagonal with a4.
7...d6 8.Re1 h6
[Nothing is wrong with 8...0−0 . I assume that Black feared 9.Bg5 , which is a common enough way to play against Black's early castling. However, in this case, h6 10.Bh4 g5 11.Bg3 Nh7! should lead to a Black advantage; White is not properly organized to deal with an upcoming advance of the h−pawn.]
9.Nbd2 0−0 10.h3 Re8 All moves have been very standard so far. Black's latest move aims to support ...Be6 with his rook, but this is far from the only plan.
[10...Be6 is also possible. Here we can see a virtue of the a4 system where White can play something like 11.Bxe6 fxe6 12.b4 ; this position is pretty debatable but is often regarded as pleasant for White because of Black's slight central congestion.]
[10...Ne7 is another prevalent idea, trying to transfer the knight to the solid g6−square: 11.Nf1 Ng6 12.Ng3 c6 13.Bb3 and this position is close to equal, though White may have some d4 ideas shortly.]
11.b4 Taking more space on the queenside. **11...Be6 12.Bxe6 Rxe6 13.Nb3** This move is a bit mysterious. I think I intended to play something like b5 in the future, but I am unsure why this is such a big deal. However, it does

complicate Black's usual central break.

13...Ne7

[13...d5 is viable, but White is properly positioned to meet it: 14.Qc2 and it is not easy to determine how Black should proceed. dxe4 15.dxe4 Nh5 occurs quite frequently, but after 16.Kh2 White is doing well.]

14.Qc2 Ng6 15.c4?! I played this move to lock down on ...d5, and I thought that d4 would be inevitable on the next move.

[15.d4 is safer. I was concerned about something like Nh5 , but White is solid after 16.Be3 .]

15...c6 Preparing ...d5. However, it is a bit slow.

[15...Nh5! would have forced some concessions. 16.Be3 *(16.d4* is what I would prefer to play, but after *Nh4!* Black suddenly has a lot more pieces on the kingside than White would like *)* 16...Rf6 and the threat of ...Rxf3 forces a retreat such as 17.Qd1 , which is obviously undesirable. This position is about equal.]

16.d4 Re8?! This move steps away from White's d5 push but gives too much.

[16...d5! was necessary. 17.exd5 cxd5 18.dxe5 is the most apparent continuation, but after dxc4 19.Qxc4 Rc8 20.Nc5 Bxc5 21.bxc5 Nd7 Black is doing fine. In the game, I believe I considered my bishop to be stronger here than it is. After 22.Be3 Ngxe5 23.Nxe5 Nxe5 24.Qb3 Rc7 Black does not have much to worry about.]

17.dxe5 Now Black must concede central control or face exploitation of his queenside pawn structure. **17...Nxe5**

[17...dxe5 is a worse version of the game.]

18.Nxe5 dxe5 Black chooses to maintain the central pawn. However, the loss of the d6−pawn allows White another opportunity, which will entomb the a7−bishop for the rest of the game.

[18...Rxe5 19.Bf4 Re6 20.c5! would lead to a White advantage on account of the weakness of the d6−square: dxc5 21.Nxc5 Bxc5 22.bxc5 and now the b7−pawn is exposed.]

19.c5! The black bishop's presence on the a7−g1 diagonal is sealed, and it is not easy to see where it can reroute. Additionally, any attempt to free it with ... b6 can either be ignored or result in a severely weakened black queenside after cxb6. The knight on f6 also suffers; it would love to come to d4, but it is far from reaching there. Meanwhile, no such impediments exist for White's minor pieces; the white knight is within close striking distance of the somewhat backward b−pawn through a5. Additionally, the a5−square also allows an inroad to c4, from where it exerts pressure over the key points b6, d6, and e5. Admittedly, the white bishop has fewer prospects, but it will do a fine job defending relevant squares (such as d4 and b6) from e3. White has a definite advantage. **19...Qe7?** Not the most efficient redeployment.

[19...Bb8 was more to the point. Black should prioritize ...Bc7 as soon as possible, from where it defends Black's dark−squared weaknesses: 20.Na5 Qc8 21.Nc4 Bc7 and while White is better after virtually any move here because of Black's futile minor pieces, Black's queenside

structure is more solid than in the game.]

20.Be3

[20.Na5 is also possible, but I did not see a big hurry, given that the b7−pawn's positioning ensures that ... Bb8−c7 is not feasible yet.]

20...Nd7 Attempting to reroute the knight to e6 via f8, but this plan is a bit too ambitious.

[However, if 20...Bb8 21.Na5 , because ...Bc7 would hang the b−pawn, Black is twisted into knots again.]

21.Na5 Nf8 Most of White's pieces are placed about as well as they can be. Rad1 is optically pleasing but would allow Black to trade pieces with ...Rad8. The first move to consider is likely Nc4, but this move releases the b7−pawn and permits the black bishop back into the game through b8. That being said, White must engage in an active plan before Black can coordinate his pieces with a sequence like ...Ne6 and ...Rad8.

22.Nc4! Although the black bishop can escape from its prison, it is more important to pursue the b5−break.

22...Bb8 23.Nb6 Ra7 24.Rab1 Not the most obvious square for the rook, but it prepares the pawn break b5. This exposes the b7−pawn to further attack, which will force some concessions from Black.

[Instead, 24.Rad1 is also possible and is rated more highly by the computer. However, it requires some concrete details that are not readily noticeable, and it is hard for me to recommend it when the alternative is straightforward and strong. After Bc7 25.Rd2! (usually, it would be sinful to allow this minor piece exchange, but the computer soon reveals its idea) Bxb6 26.cxb6 Raa8 27.Bc5! Qf6 28.Bxf8! the white rook's penetration to d7 will spell doom for Black, but to see this from the start is not easy, and it is much simpler to preserve White's static advantages.]

24...Bc7 25.Nc4 As mentioned before, the trade on b6 should be avoided when there is no urgent threat.

[25.b5 axb5 26.axb5 does not immediately allow ...Bxb6 because of the weakness of the c6−pawn, but I feel that this opening of the position is premature: Ra5 27.bxc6 bxc6 and White's advantage has diminished significantly.]

[25.Red1 is strong despite allowing Black to take on b6, with similar ideas to the previously explored line: Bxb6 26.cxb6 Raa8 27.Bc5 Qf6 28.Bxf8 etc.]

25...Raa8 The rook is useless on a7 and was in the line of the e3−bishop. **26.b5 axb5 27.axb5 cxb5 28.Rxb5** Despite pawn exchanges often overly simplifying the position, the weakness of the b7−pawn justifies White's play.

28...Ne6 29.Qb2?! Minor improvements are sensible, but this move does little and misses some resources. For starters, it does not really attack e5.

[Note that 29.Rxb7? Nxc5 would spoil White's position. Although the black minor pieces are configured precariously, there is no direct way to take advantage of this, and the disappearance of the queenside pawns would minimize White's winning chances.]

[29.Qb3 may be best, and if Nd4?!

30.Bxd4 exd4 31.e5 , the white queen is better placed on b3 than b2.]

29...f6?! This move is unnecessary because e5 is not currently under direct attack. It receives its dubious marking primarily for weakening the light squares, not the existence of the unbelievable engine tries below that are not too realistic. It is technically the losing move, though it is hard to criticize it that harshly.

[Instead, after 29...Nd4! 30.Bxd4 exd4 31.Qxd4 Rad8 Black somehow gets reasonable compensation for the pawn due to White's temporary back−rank weakness.]

[29...Ra6!? is a very enigmatic try. It is hard to figure out what to do next; if 30.Nxe5 , then Nxc5 and Black would equalize.]

30.Rc1 With the rook pointing along the c−file, Black's indirect defense of b7 is neutralized, and he must undergo passive maneuvers. **30...Nd8 31.Qd2!** This move has multiple purposes: it prepares an incursion along the d−file with Rd1, organizes an entry into the d5−square, and prepares a potential Nd6. **31...Ra6 32.Qd5+ Kh7 33.Rd1** The first two of the above points are promptly realized; Black cannot contest the d−file because of his lame knight on d8. **33...Qe6 34.Qxe6!** We typically are advised not to trade queens when we hold the initiative, but here it allows White a winning penetration. **34...Rexe6 35.Rd7 Rec6 36.Nb6!** This move threatens Nd5, which would decisively demonstrate Black's inability to guard his bald head. c7, e7, b7, and d8 would all be critically weak. Black is practically forced to trade his bishop for the knight, which would be good on paper but fatally weakens d8 and, by extension, b7. **36...Bxb6**

[After 36...Ne6 37.Nd5 Black has far too many holes to survive.]

37.cxb6 Ra8 38.Rbd5 Ne6

[38...Rcc8 suggests itself, but this protection of the eighth rank has its own problems: 39.Re7! and, to avoid the pigs from reaching the seventh, Black must part ways with the b7− pawn.]

39.Rxb7 The rest of the game should be quite trivial. **39...Ra1+ 40.Kh2 Rb1 41.Rdd7 Rb4 42.Ra7 Rbxb6 43.Bxb6 Rxb6 44.g3 h5 45.f4** In theory, all chess games end with attacks, as checkmates should be preceded by attacks... **45...exf4 46.gxf4 Nxf4 47.Rxg7+ Kh6 48.Rh7+ Kg5 49.Rag7+** . −−− Even in this game, which I would consider being very slow, there were many tactics. I believe that this should prove educative to the reader as, so far, we have treated tactics separately from the logical model we have demonstrated.

□ **Ding,Liren**
■ **Li,Shilong**
22: Chinese Team Championship 2010
[David Vigorito]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 a6 7.Re1 h6 8.a4 0−0 9.Nbd2 Re8 This direct approach has made a comeback in recent years.
10.h3 Be6!? KEY DEVELOPMENT: While this move is hardly new, more strong players have noticed it recently. It looks totally viable to me, and it could

actually be the most straightforward answer to 8 Rb1. However, Black's king will come under direct attack, so it is not so surprising that this method of play does not suit everyone. **11.Bxe6 Rxe6 12.b4 Ba7 13.Bb2**

[13.Qc2]

13...Ne7 This is the critical position. White has two approaches.

[13...b5 14.d4 Re8 *(14...exd4!* but perhaps *15.cxd4!?* is a better try *Nxb4* has been White's main try. After *16.Qb3 c5 17.axb5 axb5* Black has: *18.d5 Re8!?* (with the idea of ...Qg4) *19.Ra3?)* 15.axb5 and ½−½ in Y. Shulman−G.Kamsky, Saint Louis 2010, which looked very easy for Black. Flear suggests axb5 with the idea of 16.Qe2 exd4 17.Qxb5 dxc3 18.Bxc3]

[13...Qd7 14.d4 Ree8 and Black was just up a piece in Sa.Williams−S. Knott, British League 2007. *(14...exd4 15.cxd4 d5* with some compensation for the pawn *16.e5 Ne4 17.Nxe4* and here: *dxe4 18.d5?* has had universal success in practice, but it is a mistake. After *)* White should probably try 15.Qb3!? b5]

14.c4

[14.Nf1

A) 14...Nh5 15.Bc1 *(15.Ng5 Rf6 16.d4 Nf4 17.Nf3)*;

B) 14...Ng6 15.c4]

[14.d4 Ng6]

14...a5

[14...Nh5 15.Nf1 Nf4 16.Bc1 Neg6]

[14...Ng6 15.Nf1]

15.bxa5 Black must be careful.

[15.b5 Ng6 16.g3]

15...Nc6! This is the most reliable.

[15...Nh5! , as played in C.Gibson−S. Knott, Hastings 2007/08 The main alternative is 16.Nb3 Nf4 and now 17.Bc1 would repeat, but White can also try: Neg6]

16.Bc3 White takes the most violent approach.

[16.Nb3 Bc5 17.Bc3 Bb4 ½−½, A.Greet−S.Knott, Douglas 2005. worse is 18.Bxb4 Nxb4 19.Nh4]

16...Nd7

[16...Nh5 17.Nb3 *(17.Nxe5 Qf6)* 17...Nf4 18.Kh2 *(18.Bd2 Nxd3)* 18...Bxf2 19.Rf1 Ba7]

17.Rb1 Nc5? This loses. It is surprising that such a strong player would go into this line with Black without being properly prepared. WARNING: In sharp lines where one's king is under attack, any mistake is fatal, and both good preparation and concentration over the board must be maintained. There are two alternatives and they both look completely satisfactory for Black... if he has done his homework.

[17...Kh7 18.Nf1 is pretty level as shown by a couple of 10...Bxc3+ specialist Simon Knott's games: Bd4 19.Bxd4 Nxd4 20.Nxd4 exd4 21.Nd2]

18.Nf1! This wins; **18...Rg6?** This loses in a relatively straightforward manner, but Black could not save the game anyway. **19.Ne3! Ne6** There is nothing to be done. **20.Nd5!** By now a familiar theme.

[20.Rxb7 Nf4]

20...Rb8 21.Rb2

[21.h4]

21...Ng5

[21...Ncd4 22.Nxd4 gives Black a pleasant choice between Bxd4 23.Bxd4 Nxd4 24.Ne3 Kh7 25.Kh2

c6 , which leads to a perpetual check. and 26.Nf5!? Nxf5 27.exf5 with counterplay Rf6]
22.Nxg5 White threatens Qe6+.
22...Qxg5 23.Qf3
[23.Ne3]
23...Bd4 24.Reb1
[or 24.Bd2 Qh4 25.Rbb1 and now: Rg3]
24...Bxc3 The white queen will soon be replaced with another attacker. **25.Nxc3 Nxa5 26.Nd5 Nc6**
[26...Qd8]
[but not 26...Rc8? 27.Rxb7 when White wins after either Nxb7 28.Rxb7]
27.Ne3!
[27.g3 Nd4 28.Qe3 Qd8 29.Rxb7 Rxb7! 30.Rxb7 Qa8 31.Rb1 Kh7 32.Nxc7 Qxa4 with a repetition. Black wards off the attack after 33.Nb5?]
Instead **27...b6 28.Nf5** changes little
[28.Nd5 Ra8 *(28...Nd4 29.Qg3)* 29.g3]
while **28...Ra8 29.h4 Qf4**
[29...Qd8]
30.Qxf4 also leads to mate.
[as does the imaginative 30.Qd1! which threatens both 19 Rh8+ and 19 Kf1 with the idea of Qh5. After Qg4 31.Qxg4 Rxg4 32.Ra2 Kh7 33.f3! Rg6 34.Ne3 White wins. Ra7 35.Kf2 Re6 White also wins after 36.Nd5]
At least **30...exf4** would have tested White, but there is still a win with **31.d4!** which protects the g6−pawn and threatens Rh8+ : **31...Rxa4**
[31...f3 32.g3 Rxa4 there is no mate]
32.d5! Ne5 33.Ne7+ Kh7 34.Nxg6 Kxg6 . The only way to win (and in fact, the only way to not lose) is to find
35.c5!!
[or 35.Rc2 Kh5! or 36.Rcc1 Ra5! after the immediate 37.Rb5 Ra8 38.Rbb1 Kxh4 39.Ra1 Rc8 40.Ra7]
35...bxc5 36.Rb8! .

□ **Chigorin,Mikhail**

■ **Steinitz,William**

World Championship 02nd (17) 24.02.89

[Steinitz]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Ba5

[It is good at least that he didn't play 5...Bf8?! 6.d4 Qe7?! 7.0−0 d6 8.Qb3 g6 9.dxe5 dxe5 10.Rd1 Bh6 11.Nbd2! Qf6 12.Ba3 Nge7 13.Bd5! with an agonising death on the 41st move (Chigorin−Steinitz, Vienna 1882).]

6.0−0

[Before Lasker it was not known that 6.d4! is more accurate.]

6...Qf6 Garry Kasparov: '?!'

[6...d6 7.d4 Bb6! - Game No.43.]

7.d4 Nge7 Garry Kasparov: 'An artificial defence, which before this Steinitz called 'in principle correct and sound', and even 'the best', but for some reason, with the exception of one instance, he did not employ it on any subsequent occasions...' **8.d5** Garry Kasparov: '!'

[In the first game Steinitz lost after 8.Ng5?! , but not on account of the opening.]

[The aforementioned 'instance' was 8.Qa4?! Bb6 9.Bg5 Qd6 10.Na3 exd4 11.Nb5 Qg6 12.cxd4 a6 13.d5 Ne5 14.Nxe5 Qxg5 15.Nf3 Qh6 16.Bb3 0−0 17.Rac1 c6 18.Nbd4 c5 19.Ne2 d6 , and Black gradually won (Gunsberg−Steinitz, 18th matchgame 1890/91).]

8...Nd8 9.Qa4 Garry Kasparov: '!'

[Less accurate is 9.Bg5 Qd6 10.Qa4 , but the world champion was able to demonstrate this only after two defeats:

A) 10...Bb6?! 11.Na3 Qg6 12.Bxe7 Kxe7 13.Nxe5 Qf6 14.Nf3 Qxc3 15.e5 c6 16.d6+ Kf8 17.Bb3! h6 18.Qh4 g5 19.Qh5 Qd3 20.Rad1! (seventh game);

B) 10...b6?! 11.Na3 a6 12.Bd3! Bxc3 13.Rab1! Bb7 *(13...Qg6 14.Bxe7 Kxe7 15.Qc4)* 14.Nc4 Qc5 *(14...Qg6 15.Bxe7 Kxe7 16.Qa3+)* 15.Be3 etc. (11th game);

C) 10...f6! (the correct way) 11.Bc1 Bb6 12.Na3 c6 13.Bb3 *(13.Rd1!?)* 13...Bc5 with an unclear game: if 14.Rd1 Black has b5 15.Qa5 Nb7 16.Qa6 Nd8 with equal chances (13th game). However, Black avoided the repetition of moves and... once again lost!;

D) 10...−−]

9...Bb6 10.Bg5 Qd6 11.Na3 c6

[11...f6?! 12.Nb5 .]

12.Rad1 Qb8

[If 12...f6 13.dxc6 Qxc6 14.Nb5! .]

13.Bxe7 Kxe7 14.d6+ Kf8 15.Qb4

Garry Kasparov: '!'
[In the 15th game 15.Nxe5?! was played, after which Bc5 was possible. But now White has excellent compensation for the pawn and, what's more, Chigorin is in his element!]
15...f6 16.Bb3

Paulsen−V.Hort, Porz 1982 *)* 9...Kxd8 10.Rd1+ Bd7 11.Be3 (now Black wriggles to harmonize his pieces) Ke7 12.Na3 Be6 13.Rdc1 Rhd8 14.Nxc4 Rd5 with an edge to Black, B.Stein−O. Moen, Gausdal 1986.]
6...d5 7.Bb5 Ne4 8.cxd4 Bb6!
[Many players have opted for 8...Bb4+ , but from bitter experience I find the resulting positions unpleasant to play with Black: 9.Bd2 Nxd2 *(*or *9...Bxd2+ 10.Nbxd2 Bd7 11.Bxc6 Bxc6 12.0−0 0−0 13.Rc1 a5 14.Re1 a4 15.Re3* and Black lacks a good plan, N.Ninov−G.Flear, Gien 2004 *)* 10.Bxc6+ bxc6 11.Nbxd2 0−0 12.Rc1! (a Ninov speciality) c5 13.dxc5 Bg4 14.0−0 Bxd2 15.Qxd2 Bxf3 16.gxf3 c6 17.f4 and Black was just a pawn down in N.Ninov−J. Zawadzka, Kalamaria 2006.]
9.Be3
[White often starts with 9.Nc3 , and only after 0−0 does he play Be3;
A) ; for example, 10.Be3 Ne7 *(*more dynamic is *10...Bg4!? 11.Bxc6 bxc6 12.h3 Bh5 13.0−0 f5 14.Ne2 g5 15.Ng3 Bg6* with chances for both sides, N. Ninov−P.Schlosser, French Team Ch. 2008 *)* 11.0−0 c6 12.Bd3 Nxc3 13.bxc3 Bf5 with solid equality, B. Macieja−L.Aronian, European Ch., Antalya 2004.;
B) . If White interposes 10.Bxc6 bxc6 before playing 11.Be3 , Black has an enticing option in f5! 12.exf6 Qxf6 13.Nxe4 dxe4 14.Nd2 Ba6 15.Nxe4 Ba5+ 16.Nc3 Bxc3+ 17.bxc3 Qg6 , when he obtained a strong attack on the light squares, B.Macieja−G. Vescovi, Bermuda 2004.;
C) 10.−−]
9...0−0 10.Bxc6 bxc6 Black has to live with damaged pawns, so in order to compete he will need to find a way to stoke up counterplay, which will in turn involve getting his light−squared bishop working. **11.0−0 Bg4 12.Qc1** Unpinning while attacking a pawn.
12...f6
[Alternatively, 12...f5!? 13.Nc3 f4 14.Bxf4 Bxf3 15.gxf3 Nxc3 16.bxc3 Rf5 17.Be3 Qh4 was complex in S. Cramton−V.Kosyrev, Internet (freestyle) 2005.]
13.Qxc6 Bxf3 14.Qe6+ Kh8 15.gxf3 fxe5! Rizouk's big idea; Black burns his bridges seeking an attack. **16.fxe4 exd4 17.Bd2 Qh4 18.e5**

[Instead, 18.f3 holds onto certain squares but cedes others. Then a plausible line such as Rae8 19.Qxd5 Qh3 20.Ba5 Re6! leaves the white king in dire straits, and the further 21.Rf2 c6 enables Black to win back his piece with interest.]

18...d3 19.Be1 A sad retreat, but f2 needs defending. **19...Rae8 20.Qxd5 Rf5 21.Qxd3**

[Here 21.Qc6!? comes into consideration but is ultimately suspicious: Rfxe5 22.Nd2 R5e6 *(* note that at present *22...Rxe1? 23.Raxe1 Rxe1??* fails because of the back rank mate after *24.Qa8+)* 23.Qf3 Bd4 24.Rb1 *(24.Qxd3* now allows *Rxe1!)* 24...Be5 25.h3 Rf6 and the attack is more than worth the piece; e.g. 26.Qxd3 *(* not *26.Qg4?? Rg6)* 26...Qf4 27.Nf3 Qxf3 28.Qxf3 Rxf3 29.Kg2 Rd3 and Black is better.]

21...Rg5+ 22.Kh1 Qg4 White now has little choice. **23.Qd5 Rgxe5 24.Qg2 Qxg2+ 25.Kxg2 Rxe1 26.Nc3 R1e5** Black has regained his piece but the exchange of queens has put paid to his attacking ambitions. **27.Rad1 h6 28.Rd3 R8e6 29.Rfd1 Rf5 30.R1d2 Kh7** . A creative effort by Black. **½–½**

Amsterdam 6/325 1968
[Ivkov,Borislav]

1.e4 John Emms John Emms **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Nbd2**
[6.Bb3 Even if White is planning to castle kingside under most circumstances, I think 6 Bb3 is a good move against 5...d6 because: −− 1. It forces Black to be careful with move orders. More specifically, 6...0−0 can be answered by 7 Bg5!. −− 2. With ... d5 much less likely after ...d6, White can afford to delay castling for a move or two. h6 7.0−0 *(7.Nbd2* , together with sixth−move alternatives for Black, was discussed in Erenburg−Kreizburg, where White delayed castling. *)* 7...0−0 8.Nbd2 *(* Of course there's nothing wrong with John Emms: 'Of course there's nothing wrong with ' *8.Re1* , but in this game White tries something a bit different. *)* 8...Be6 *(* Even here Black often plays John Emms: 'Even here Black often plays ' *8...a6* , when *9.Re1* would transpose to normal lines.*;* If Black plays *8...Bb6* , *9.Nc4* is a logical reply after which *Be6* transposes to the main game. *)* 9.Nc4!? This is an attempt to both utilize the early Nbd2 and exploit Black's omission of ...a6 and ...Ba7. White avoids the exchange of bishops and now Black must be wary of d4−d5.

A) 9...b5!? is double−edged: it forces the exchange of light−squared bishops but at a cost of offering White something to attack on the queenside. 10.Ne3 Bb6 *(10...Qd7!* is better *)* 11.Bxe6! fxe6 12.a4 a6 13.axb5 axb5 14.Rxa8 Qxa8 15.Qb3 , forking b5 and e6, is the type of line that Black has to avoid.;

B) Strangely enough, the risky−

looking John Emms: 'Strangely enough, the risky−looking ' 9...a6 is actually playable here. If John Emms: 'is actually playable here. If ' 10.d4 *(10.Re1* and*; 10.a4* are decent alternatives *)* 10...exd4 11.cxd4 , Black doesn't have to play John Emms: ', Black doesn't have to play ' Bxc4 to avoid losing a piece *(* − he can play John Emms: '- he can play ' John Emms: '- he can play' *11...b5!?* . Here *12.dxc5 bxc4 13.Ba4 Ne5 14.Nxe5 dxe5* was roughly level in M.Maric−F. Izeta Txabarri, Oviedo (rapid) 1993. *)*;

C) 9...Bb6 ½−½ (29) Bronstein,D−Ivkov,B Amsterdam_177770 1968 [John Emms] John Emms: 'transposes to the main game.' 10.Nxb6 axb6 is less challenging for Black because White cannot keep the bishop pair; for example, John Emms: 'is less challenging for Black because White cannot keep the bishop pair; for example, ' 11.Re1 Bxb3 12.Qxb3 Re8 13.Qc2 Qd7 with a level position, K. Asrian−V.Korchnoi, Dagomys 2008.]

6...Bb6? 7.Bb3 Be6?

[7...a6]

8.Nc4 h6 9.a4!± 0−0 John Emms: '½−½ (29) Bronstein,D−Ivkov,B Amsterdam 6/325 1968 CI1−130 [Ivkov, Borislav]' **10.0−0 Re8** John Emms: 'Lining up the possibility of...d5.'

[The impatient John Emms: 'The impatient ' 10...Bxc4?! is inadvisable, and in R.Ramesh−M.Lodhi, New Delhi 2007, Black was soon regretting his loss of control of the light squares: 11.Bxc4 a5 12.Re1 Ne7 13.Nh4! Qd7 14.h3 g5 *(*if *14...c6* , White plays John Emms: ', White plays ' *15.Ba2* and Qf3 *)* 15.Nf3 Ng6 16.d4 Kg7 17.Be3 Qe7 18.Nd2 Nf4 19.Bf1 Nd7 20.Nc4 f6 21.g3 Ne6 22.Be2 Rh8 23.Kh2 Rad8 24.Bh5 Kh7 25.Bg4 Qf7 26.Bf5+ Kg7 27.b3 with a large advantage.]

[10...Nd7 11.Nxb6?! *(11.Ba2* intending b4 looks stronger to me *)* 11...Bxb3 12.Qxb3 axb6 was level in Y.Kosashvili−Y.Kraidman, Tel Aviv 1989, but I think White again took on b6 too readily.]

11.Bc2! John Emms: 'This is unusual, and a nice example of Bronstein's renowned creativity. Black is invited to double White's c−pawns, but at a cost of ceding the light squares and giving White a bind on d5.'

[11.Re1 Bc5!? 12.a5 *(12.Ba2!?)* 12...Ng4! 13.Ne3 Bxe3 resulted in a quick draw in S.Movsesian−A. Morozevich, Sarajevo 2008. I wonder whether either player was aware of this earlier game.]

11...Nd7?!

[John Emms: 'In his notes for 'Chess Informant 6', Ivkov prefers' John Emms: 'In his notes for 'Chess Informant 6', Ivkov prefers ' 11...Bxc4 12.dxc4± John Emms: ', although he still evaluates this position as a clear advantage for White. I'm not convinced that Black's position is so bad − he is after all quite solid. That said, I do still prefer White, who can slowly improve his position and also think about Nh4−f5 ideas. Ivkov, Borislav: '±' '±'' John Emms: ', although he still evaluates this

position as a clear advantage for White. I'm not convinced that Black's position is so bad - he is after all quite solid. [Instead, 7...Nxe4!? is my favourite way of handling this position; e.g. 8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ , when Black should be able to equalize, though obtaining winning chances involves some risk:

A) 10...Kf8 11.Qxb4+ Qe7 12.Qxe7+ Kxe7 13.0−0 Re8 14.Re1 Kf8 15.Na3 and now c6! *(15...Nf6 16.Nb5 Nd5* was slightly precarious for Black in V.Berlinsky−P.Motwani, Istanbul Olympiad 2000 *)* 16.Ne5 d5 equalizes;

B) 10...d5!? (the ambitious choice) 11.Ne5+ Ke6 12.Qxb4 c5!? *(12...Qf8* is comfortable for Black *)* 13.Qb5!? (a fairly new idea which caught me out recently) a6 14.Qe2 cxd4 15.Nf3 Re8 16.0−0 with chances for both sides, E.Lie−M.Thinius, Gausdal 2003. Black's king needs to scurry away to safety and White will win back the d4−pawn.]

8.Nbxd2 d5 This liberating move is considered to offer Black a reasonable game. **9.exd5 Nxd5** , and **10.Qb3** and so on which may not suit everyone as Black. I personally don't like allowing this type of possibility in my own games.

10...Nce7

[Although 10...Na5 is perfectly playable, it allows the repetition 11.Qa4+ Nc6

A) , and 12.Qb3 and so on which may not suit everyone as Black. I personally don't like allowing this type of possibility in my own games.;

B) . White can of course try for more; e.g. 12.Bb5 Qe7+ 13.Ne5 Bd7 14.0−0 Nb6 15.Nxc6 bxc6 16.Qc2 cxb5 17.Rae1 Be6 18.d5 0−0 19.dxe6 fxe6 20.Qb3 Rad8 , R.Zelcic−S.Mamedyarov, European Team Ch., Leon 2001;

C) , or 12.Ne5 0−0 13.Nxc6 Qe8+ 14.Kf1 Nb6 , J.Cubas−S.Mareco, Mario Covas 2008, but in both cases Black has a comfortable game. *(14...−−)*;

D) 12.−−]

11.0−0 0−0 12.Rfe1 c6 Black has a solid grip on the d5−square and his opponent's attacking chances, typical of IQP positions, are not a major worry.

13.Ne4

[Here 13.a4 is often played. The motive is not to prevent ...b7−b5, which Black isn't intending for the time being, but to give White the options of Qb3−a3 (keeping the queens on) as well as a4−a5 (gaining space).]

[If, for example, White instead plays the natural−looking 13.Ne5 , Black can respond with Qb6 when the exchange of queens ensures comfortable equality, while 14.Qa3?! Qxd4 15.Nef3 Qf6 16.Ne4 Qf4 17.Nd6 Nf5 gave White insufficient compensation in D. Smerdon−D.Prasenjit, New Delhi 2007.]

[After the more critical Here 13.a4

, Black has to decide how to react: is often played. The motive is not to prevent ...b7−b5, which Black isn't intending for the time being, but to give White the options of Qb3−a3 (keeping the queens on) as well as a4−a5 (gaining space).

A) . If now 13...Qb6 , both 14.a5 *(*and *14.Qa3* aren't straightforward for Black. *)*;

B) 13...a5 is perhaps simplest; e.g. 14.Ne5 Qc7 15.Ndf3 h6 16.Re2 Be6 17.Rae1 Rad8 18.Nd3 b6 with a rock−solid set−up, G.Arold−J.Gustafsson, Internet (blitz) 2004.;

C) 13...Rb8!? , keeping the tension, is another try: 14.Ne4 *(*or *14.a5 f6!? 15.Ne4 Kh8 16.Qa3 Bg4 17.h3 Bh5 18.Nc5 Re8 19.Ne6* and despite the ugly hole on e6 Black was solid in C.Garcia Fernandez−O.Korneev, Madrid 2002 *)* 14...Bf5 15.Qa3 h6 16.Rac1 a5 17.Ne5 Bxe4 18.Rxe4 Nf5 , J.Nun−L. Keitlinghaus, Czech League 1994, and as in many IQP positions, White's pieces are slightly more active but Black has the better structure.;

D) 13...−−]

13...Nb6

[Now after 13...Qb6 White is able to sidestep the exchange of queens (as d4 isn't en prise); i.e. 14.Qa3 Bf5 15.Nc5 Qc7 16.Rac1 a5 17.Ne5 Rad8 18.Qf3 with an enduring initiative, R.Mamedov−A.Czernowski, Internet (blitz) 2004.]

14.Bf1 A solid but somewhat slow way of reorganizing.

[However, the impatient 14.Bxf7+!? Rxf7 15.Neg5 Nbd5 , R.Zelcic−B. Golubovic, Rijeka 2001, shouldn't be a problem for Black]

[while 14.Bd3 just encourages Bf5! (an opportune moment to develop the bishop) *(*and stronger than *14...Ned5 15.Nc5 Rb8 16.Rac1 Nf4 17.Bb1 Qf6 18.Ne5 Qg5 19.Qf3 f6 20.Ned3 Nbd5 21.Nxf4 Nxf4 22.h4!* , E.Van den Doel−I.Sokolov, Dutch Ch. , Leeuwarden 2004, when Black's pseudo−active pieces were shown to be vulnerable *)* 15.Nc5 Bxd3 16.Qxd3 Rb8 17.Qa3 Nec8 18.Rad1 Nd6 19.Ne5 Qc7 20.Qg3 Rbd8 with equality, Nay Oo Kyaw Tun−A. Stefanova, Surabaya 2002.]

14...Nf5 15.Rad1 Nd6 16.Nc5

[Exchanging a pair of knights with 16.Nxd6 Qxd6 17.h3 Be6 suits Black fine, since if White fails to obtain anything concrete from his initiative, Black may start to think about how to exploit his superior structure.]

16...Bg4 The bishop finally finds a way to develop. **17.h3 Bxf3 18.Qxf3 Re8 19.Re5 Nd7** Forcing further exchanges. **20.Rxe8+ Qxe8 21.Qb3 Nb6 22.g3** The bishop will be redeployed to g2 to bear down on d5. **22...Qe7 23.Qa3** Threatening Nxb7!. **23...Qc7 24.Bg2 Rd8 25.b4 h6 26.Qb3** White has a positional threat of a well−timed advance d4−d5 (leading generally to a slight pull despite a symmetrical structure), but Black avoids this possibility. **26...Nb5 27.Qb2 Nc4 28.Qc1 Nb6 29.Qe3 Nc4 30.Qc1 Nb6 31.Qe3 Nc4 32.Qc1 Nb6 33.Qe3 Nc4** . Not very exciting, but a typical example of White's play being nullified if Black can obtain harmonious

development.

□ **Gunsberg,Isidor**

■ **Steinitz,Wilhelm**

New York (wch−m/14) 1891

[Petrov,Marian]

Yet Another Rival Dispatched The third World Chess Championship was held in New York City in late 1890 and early 1891. The title holder Wilhelm Steinitz narrowly defeated his Hungarian challenger, Isidor Gunsberg. Chess journalist Leopold Hoffer asked Steinitz why he hadn't chosen George Henry Mackenzie or Gunsberg for the earlier match. Steinitz replied that the former had refused and the latter had a worse record than Chigorin. In support of Gunsberg, Chess Monthly declared that Chigorin should have played Gunsberg instead of Steinitz. The La Habana Chess Club announced it would host a match between Gunsberg and the Russian, even if the latter lost to Steinitz. Gunsberg drew the La Habana match against Chigorin in early 1890. That result was enough to convince Gunsberg to challenge Steinitz to a title match. The Manhattan Chess Club served as intermediary for the preliminary negotiation, and Steinitz settled in principle to play for a stake of $1,500. James Mason objected to the choice on the grounds that Steinitz favoured challengers who were both fellow Jews and weaker players than himself. Steinitz labeled the objection "impudent" and insinuated that Mason was drunk when he made it. At New York 1889, Gunsberg had performed considerably better than Mason, but Mason suggested that Gunsberg should play him first as a condition for a match against Steinitz. However, the Champion rejected this proposal. The conditions were agreed upon on December 6, 1890. The winner would be first to 10 games (draws not counting), or most wins after 20 games. A draw would be declared in the case of 9 wins each. The stakes were $1,500 with 2/3 for the winner. The winner of a game received $20, the loser $10 and in case of a draw, they both got $10. British amateurs contributed 75 pounds towards Gunsberg's share of the prize fund. The match began on December 9, 1890 in the Manhattan Chess Club. Club Vice President Colonel G. F. Betts opened the proceedings and introduced the players. The referee was Isaac Leopold Rice, and the umpires were Holladay for Steinitz and August Vorrath for Gunsberg, while Fred Mintz was in overall control of the match. They played in a small room between 13:30 to 17: 00 and 19:00 to 22:30, while the spectators followed the games on a wallboard in a larger room downstairs. Initially, the match received less interest than expected because Steinitz was considered a huge favourite. Steinitz took an early lead with a win in game 2.

The match was suspended after game 4 because Steinitz had a bad cold. In game 5 Steinitz lost with the white pieces in a Queen's Gambit, after which he vowed to keep playing this opening until he won with it. With Gunsberg pulling ahead, interest in the match increased. Still not fully recovered from his cold, Steinitz managed to win game 6. During this game, Gunsberg exceeded the time limit but Steinitz refused to claim a win. Steinitz reached his goal of winning with the Queen's gambit in game 7 and retained the lead for the rest of the match. After a brief Christmas break, Gunsberg struck in game 12 with the Evans Gambit. Curiously, prior to the match, Steinitz had challenged Gunsberg to a theoretical duel in this opening. The contested position had also previously arisen in the adjourned Steinitz − Chigorin cable match and the public had been looking forward to Gunsberg taking up Steinitz's challenge. Steinitz did not show up for game 18. The telegram he had sent to excuse himself had been delayed. Gunsberg could have claimed the game but did not. Those were some peculiar noble days! ***Yet Another Rival Dispatched*** The third World Chess Championship was held in New York City in late 1890 and early 1891. The title holder Wilhelm Steinitz narrowly defeated his Hungarian challenger, Isidor Gunsberg. Chess journalist Leopold Hoffer asked Steinitz why he hadn't chosen George Henry Mackenzie or Gunsberg for the earlier match. Steinitz replied that the former had refused and the latter had a worse record than Chigorin. 10...dxe4

[10...Be6]

[10...Re8]

11.dxe4! Qe7

[11...Nh5?!]

12.Ng3 h6 Very committal as Black has lost the option of castling queenside. In other words he is rather forced to sacrifice the exchange on c3, or at least that is what I thought! Black's other options include:

[12...Be6]

13.Nh4 Whether this helps White or not is the question. In one sense Black becomes slightly more cramped with his rook on f8, but the white queen may also become a target on g7. As Tarrasch once said, 'the threat is stronger than the execution', so maybe White should keep Qg7 as an option. **13...Kh7**

[13...Be6 14.Ngf5 22...Qxb3+ was the threat. Qd7 15.Qf3]

14.Nhf5 Qe8?! A bit slow and Black really needed to take some action. Thus

we should consider:
[14...Qd8! White aims to open up Black's king.]
15.Qf3?! Ng8 16.Nxg7?! This move comes rather late now. **16...Kxg7 17.Nh5+**
[17.Nh5+! Yes, yes, yes! Kg6 *(17...Kh8 18.Qg3)* 18.Qg3+ Black has a big advantage, but that quickly changes! Kxh5 19.Bd1+?]
½–½

Bxa5 13.Ba3 c5 14.Qxb7 Rc8 15.Bb5 Rc7 16.Qb8+ Qd8 17.Bxd7+ Rxd7 18.Qxe5+ Qe7 19.Qxg7 Qf6 20.Qg3 Bb6 as in S.Winawer–S.Alapin, Warsaw 1890. Now White should play 21.Nbd2! with compensation for the material investment according to Matsukevich.]
[9.Ba3?! is too sketchy, however. After Nh6 10.dxe5 Nxe5 11.Nxe5 Qxe5 12.Qxb7 Ng4! Black is better, as 13.f4 Qh5 14.h3 Bb6+ 15.Kh1 0–0 allows him a crushing attack.]
9...dxe5 10.Rd1
[Also interesting is 10.Ba3!? Qf6 11.Nbd2 Nge7 *(* or *11...Bb6 12.Bb5 a6 13.Bxc6 Bxc6 14.Nc4* and White has fine compensation *)* 12.Bb5 0–0

13.Nc4 Bb6 14.Bxc6 Bxc6 15.Ncxe5 Rfe8 with an unclear game.]

10...Bb6

[Here 10...Rd8! can be met in two interesting ways (at least it has in practice):

A) . The first is the most controversial: 11.Ba3 Qf6 12.Nbd2 Nge7 13.Bb5 0−0 14.Nc4 Bb6 15.Bxc6 Bxc6 16.Ncxe5 Bxe4 when we have a position that was the starting point of a quarrel between the two Russian greats Alapin and Chigorin. Alapin believed that Black has a better game, while Chigorin thought that White should come out on top. Chigorin was of course the better chess player, but on this occasion Alapin was right. Even in the strongest line 17.Rxd8 Rxd8 18.Qxf7+ Qxf7 19.Nxf7 Re8! White needs to use all his influence in heaven (or hell) to even make a draw.;

B) . More sensible is 11.Rd5!? Bb6 12.Bb5 Qe6 13.Bxc6 Qxc6 14.Nxe5 Qe6 15.Rxd7 Rxd7 16.Qxe6+ fxe6 17.Nxd7 Kxd7 18.Kf1 Nf6 19.f3 Rc8 20.Nd2 Ba5 21.Bb2 with plain equality, St. Petersburg−Paris, telegraph match 1894. *(21.−−)*;

C) 11.−−]

11.Ba3 Qf6 12.Bxf7+ Qxf7 13.Qxf7+ Kxf7 14.Rxd7+ Nge7

[14...Kg6? 15.Nbd2 Nf6 runs into 16.Nh4+ Kh5 17.Rxg7! Kxh4 18.Nf3+ Kh5 19.Rg5+ Kh6 20.Bc1 and White wins.]

15.Kf1?!

[Not 15.Nxe5+?! Nxe5 16.Rxe7+ Kf6 , when 17.−− Rad8 gives Black strong counterplay]

[but 15.Bxe7 Ke6 16.Rd5 Kxe7 17.Nxe5 nets a pawn.]

15...Rad8 16.Rxd8 Rxd8 17.Nbd2 The position is more or less equal. The white c3−pawn and the black e5−pawn balance each other out. **17...Ng6** Not the best position for the knight. **18.g3 Ba5 19.Rc1 h6?!**

[Better was 19...Kf6 20.Ke2 Nh8 21.Rb1 g5!? 22.h3 b6 23.Bb4 h5 and Black has nice play.]

20.Ke2 Rd7 21.Nb3 Bb6 22.Bc5 Kf6 23.Rc2 Nh8 24.Rd2 Rxd2+ 25.Nfxd2 g5 26.Nc4 White has a small edge here, but did not make anything of it in the game. **26...Nf7 27.Ne3 Ke6 28.Nd5 Kd7 29.Nf6+ Ke6 30.Nd5 Kd7 31.Kd3 Ncd8 32.f3 Bxc5 33.Nxc5+ Kd6 34.Nb3 c6 35.Ne3 b6 36.Nf5+ Ke6 37.Ke3 Kf6**

■ **Van Perlo,Gerardus C**

Dick Smit mem corr 2001

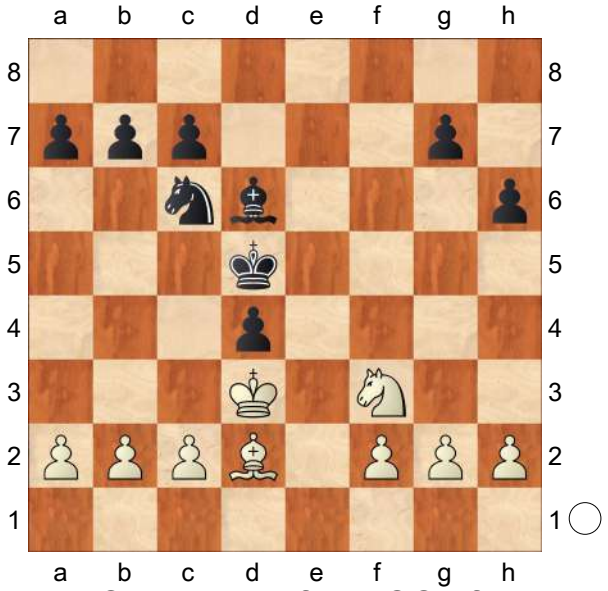
[Van Perlo]

1.e4 e5 2.Bc4 Nf6 3.d4 exd4 4.Nf3 Nc6 5.0−0 Nxe4 6.Re1 d5 7.Bxd5 Qxd5 8.Nc3 Qa5 9.Nxe4 Be6 10.Neg5 0−0−0 11.Nxe6 fxe6 12.Rxe6 Bd6 13.Bg5 Rde8 Deliberately following the main line. If Black wanted to avoid the following ending he should have played 13...♖df8 as in Engelbert−Westerinen, Gausdal 1997. **14.Qe1 Qxe1+ 15.Raxe1**

[15.Rexe1!? Rossolimo's 15 Ree1!?

should really be considered, but I did not expect White to play this move.]

15...Rxe6 16.Rxe6 Kd7 17.Re4 Re8 18.Rxe8 Kxe8 19.Kf1 Kf7 20.Bd2 h6 21.Ke2 Ke6 22.Kd3 Kd5 Diagram



23.Nxd4!? A novelty from CC I found in the NIC YIB−46 survey, played in the game Isaev−Gordon, 1989. A.C. van der Tak refers in this survey to an article by Benko in Chess Life 1997/7 about the forthcoming pawn−ending. Benko assesses this ending as a draw, but he advises "Black" to analyse it thoroughly before playing it!! I did so before playing 13...♖d8−e8 and it rather interested me, so let's play it ! **23...Nxd4** No way out!, because

[23...Ne5+? 24.Kc3 Ng4 25.f4 cannot be recommended for Black.]

24.c4+ Ke5 25.f4+ Kf5 26.Kxd4 Bxf4 27.Bxf4 Kxf4 28.b4 g5! In Isaev−Gordon and in Kameri−Langreck, 1996

[28...Kf5? 29.Kd5 has been played, with fatal results. The text move is an improvement given in the article of Benko.]

29.Kd5! Remarkable that Benko did ignore this obvious move. He only gives

[29.b5 g4 30.Kd5 but after this loss of time it is White who has to fight for a draw !]

29...Ke3! Part of my preparation: I did not overlook 29 Kd5! However, Black does have some problems.

[29...g4 (Benko's move) 30.Ke6! g3 31.hxg3+ Kxg3 32.Kd7 Kxg2 33.Kxc7 h5 34.Kxb7 h4 35.c5+−]

[29...h5 30.Ke6! c6 *(30...g4 31.g3+ Ke4 32.Kd7 c6 33.c5 Kf3 34.Kc7+−)* 31.Kd7 Ke4 32.Kc7 Kd4 33.c5 Kc4 34.Kxb7 Kb5 35.Kxa7 g4 36.g3+−]

[29...Kf5 30.b5 or 30 a4 also looks +− . Black should follow the good example White gave: bringing the ♔ into the counter−attack.]

30.c5 After 30 Ke6 Black should not play 30...Kf2 because of 31 g4! (see line) but 30...Kd4 (see line)

[30.Ke6 Kf2 *(30...Kd4 31.c5* and now *Kc4* even gives Black chances. *)* 31.g4! Kf3 32.Kf5 a6 33.a4 b6 34.Kg6 Kxg4 35.c5!+−]

30...h5 It is necessary to prevent g2−g4.

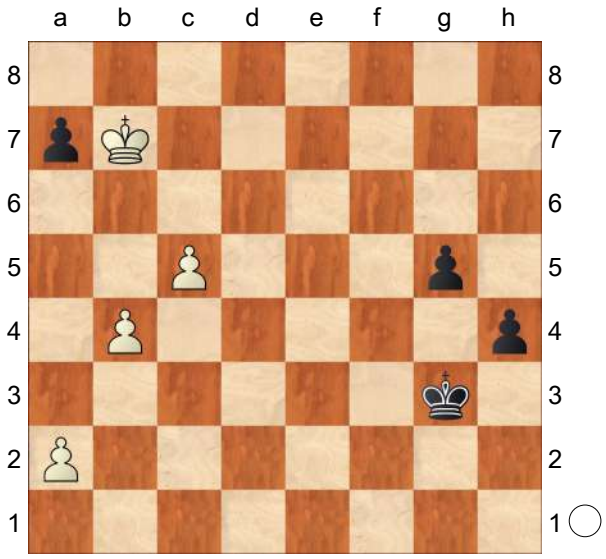
31.Ke6 Kf2 32.g3 Not

[32.g4 hxg4 33.Kf5 g3!−+]

32...Kg2 33.Kd7 Kxh2 34.Kxc7 Kxg3 35.Kxb7 h4 Diagram

(Diagram)

So far I had to calculate all this in the opening, my conclusion was that, in the worst case, I had to face an ending with ♕ against ♕ and a−pawn which theoretically seems to be draw. This proves, of course for the time being, that 23 ♘xd4 does not offer White chances for a win. But what is for certain in our game?? **36.c6 h3 37.c7 h2 38.c8Q**



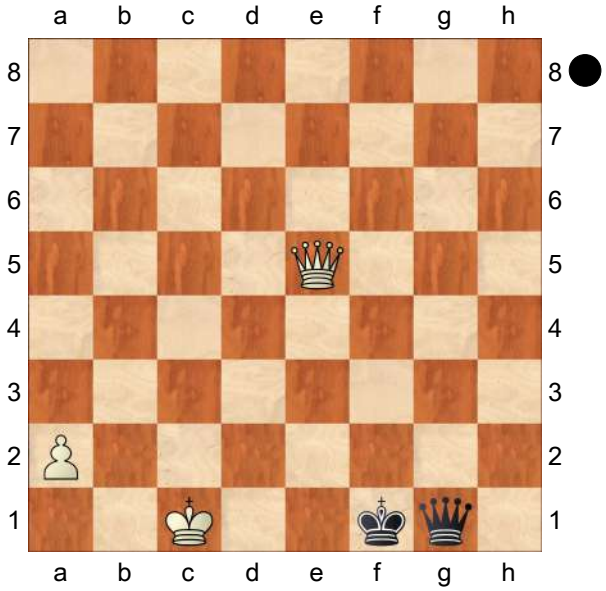
h1Q+ 39.Kxa7 Qh7+ 40.Kb8 Qe4 41.b5 Qf4+ 42.Kb7

[42.Qc7 Kg2=]

42...g4 43.b6 Kf2 44.Qc5+ Kf1 45.Qb5+ Kf2 46.Ka6 g3 47.Qc5+ Kf1 48.b7 Qb8 49.Qc8 Qd6+ 50.Ka5 Qe5+ 51.Ka4 Qe4+ 52.Ka3 Qe3+ 53.Kb4 Qe7+ 54.Kb3 Qe3+ 55.Qc3 Qb6+ 56.Qb4 Qe3+ 57.Kc2 Qf2+ 58.Qd2 Qc5+ 59.Qc3 Qf2+ 60.Kb1

[60.Kd1 Qe2+ 61.Kc1 g2 62.Qf6+ Qf2! will not bring success either.]

60...Qf4 61.Qc1+ Qxc1+ 62.Kxc1 g2 63.b8Q g1Q 64.Qe5 Diagram



At last the awaited ♕ against ♕ and a−pawn ending! An extensive article written by Mednis has been a great help to me. In this article, supported by the computer program Belle, Mednis gave two examples: a "good" one (van der Wiel−Fedorowicz, Graz 1981) and a "bad" one (Gligoric−Timman, Bugojno 1980). Clearly Mednis shows how difficult this ending is and how easily even "top"−players can go astray. The best defence for Black is to "park" his ♔ in the opposite corner (f1, f3, h3 and h1). Gligoric moved his ♔ into the direction of the a−pawn and lost. Of course Black has to avoid the exchange of ♕s. Preventing the a−pawn to walk to a7 is impossible, but even then there are a lot of drawish positions. But it is not easy and Black has to play very accurately. **64...Kg2+ 65.Kd2 Qa7 66.Qe4+ Kh2 67.Qh4+ Kg2 68.Qg4+** Here White apologised for not offering a draw because he wanted to acquire experience with this type of ending. A loss of time and energy because he could have found this type of ending at every decent "endgame" CD ROM. The remaining moves do not deserve any comment. **68...Kh1 69.Qh4+ Kg2 70.Qe4+ Kh2 71.a4 Qa5+ 72.Kd1 Qd8+ 73.Ke2 Qf6 74.Qd5 Qe7+ 75.Kd1 Qa7 76.a5 Qg1+ 77.Kc2 Qg6+ 78.Kb2 Qf6+ 79.Kb3 Qa6 80.Ka4 Kg1 81.Qg5+ Kf2 82.Qb5 Qa8 83.Qb6+ Kg2 84.Qg6+ Kf2 85.a6 Qa7 86.Qc2+ Kg1 87.Ka5 Qe3 88.Qb1+ Kg2 89.Qb7+ Kh2 90.Qd5 Qa3+ 91.Kb5 Qb2+ 92.Kc6 Qc2+ 93.Qc5 Qg2+ 94.Qd5 Qc2+ 95.Kb7 Qb2+ 96.Kc7 Qg7+** Here I offered a draw, referring to those CD−ROM's but

White refused, because of his hypothetical chances for the first place in the tournament and achieving an IGM−norm. **97.Qd7 Qc3+ 98.Kb8 Qb4+ 99.Qb7 Qf8+ 100.Ka7**

□ **Sveshnikov,E.**
■ **Stefansson,H.**
Liepaya (rapid) 2004
[Jan Pinski]

If you compare the dates of this game with the previous one, you will see that Grandmaster Sveshnikov has had a lasting passion for this rather harmless line. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5 7.Bb5 Ne4 8.cxd4 Bb4+!?** This simple move (patzer sees a check, patzer plays a check) gives Black a sound and rather solid game. **9.Bd2**
[White has no road leading to an advantage. Sveshnikov has had to realise this in his practical games, where he also tried 9.Nbd2 Bd7 10.0−0 0−0 and now at least two moves in his games:
A) 11.Nxe4 dxe4 12.Ng5 Nxe5 13.Qa4 Bxb5 14.Qxb5 Nd3

15.Be3 Qe7 16.f3 c6 17.Qc4 b5! and Black is at least equal, E. Sveshnikov−M.Krasenkow, Vilnius 1997.;

B) 11.Bd3 Bf5 12.Qc2 Bxd2 13.Bxd2 Bg6?! *(*the improvement could be *13...Bg4! 14.Bxe4 dxe4 15.Qxe4 Bxf3 16.Qxf3 Qxd4 17.Bc3 Qc4* with equality *)* 14.Bc3 Qe7 15.Rae1 gave White a slightly advantage in E.Sveshnikov−S. Azarov, Minsk 2000, but surely he realised that it was easy for Black to improve, as he deviated in the current game.;

C) 11.−−]

9...Nxd2 10.Bxc6+ bxc6 11.Nbxd2 c5 12.a3

[12.dxc5 has been played, but I prefer not to go into the games and instead present

A) Ok, ok, here is some old stuff, but then you have to eat your greens! 12...Bxc5 13.Qc2 Bb6 14.Qc6+ Qd7 *(*or *14...Bd7 15.Qxd5 0−0 16.0−0 Be6 17.Qc6 Qd3* with some compensation *)* 15.Qxa8 0−0 16.Rc1 c5 17.Qb8 Ba6 18.Qd6 Qb5 19.Kd1 Qe2+ 20.Kc2 Qd3+ with equality according to Macieja;

B) 12...0−0! , which is a new idea. 13.Qa4 Rb8 14.0−0 Bxc5 15.Nb3 Bb6 16.Rfd1 c5 and as I see it Black is slightly better.]

12...Bxd2+ 13.Qxd2 c4! This move might seem surprising, but it gives Black easy equality. Optically it looks as if the pawn is placed on a wrong coloured square, given Black's light−squared bishop, but if we look slightly further than automatic dogmatism, we will see that the pawns will actually support the bishop rather than restrict it. Also, the f3−knight was probably hoping to occupy one of the dark squares in the centre, and this is now nothing but a dream.

[One practical example saw the reasonable alternative 13...Bg4 14.dxc5 Bxf3 15.gxf3 0−0

A) . Here White went wrong with 16.c6? , as after Re8 17.f4 , Black should deviate from B. Macieja−A.Aleksandrov, European Team Championship 2003, with , Black should deviate from B. Macieja−A.Aleksandrov, European Team Championship 2003, with , Black should deviate from B. Macieja−A. Aleksandrov, European Team Championship 2003, with Qd6 18.0−0−0 Qxc6+ 19.Kb1 Rab8 and be slightly better.;

B) . If instead 16.0−0−0 Qe7! 17.Qd4 Rab8 18.Rd2 Rb5 and Black has counterplay. *(18...−−)*;

C) 16.−−]

14.0−0 Rb8! Black keeps an eye on the b2−pawn, which gives him good counterplay. **15.Rfe1 0−0 16.Qc2 g6 17.Nd2 Qg5! 18.Re3 Qg4 19.Qc3 c5 20.Nf3 cxd4 21.Nxd4 Rb6 22.Rae1**

[Or 22.b4 cxb3 23.Nxb3 Be6 24.Nd4 Rfb8 with equality.]

La Strategie tournament−2 1884−8 1884
[Rosenthal in Le Monde I]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.a4 If
[5.b5 Na5 6.Nxe5 Nh6 7.d4 d6 8.Bxh6 gxh6 was analysis that we have given in La Strategie 1882, p. 138. Black always obtains a superior game.]
5...a6 6.0−0 d6 7.a5 Ba7 8.d3
Weak; the right move was 8. c3. If
[8.b5 axb5 9.Bxb5 Bd7 10.Nc3 Nge7 followed by ...0−0 Black is better, beacuse White remains with the isolated a−pawn that will be very difficult to defend.]
8...Nxb4 9.c3 Nc6 10.d4 Nf6
Well played. If
[10...exd4 11.cxd4 Nf6 12.e5 dxe5 *(12...d5 13.exf6 dxc4 14.Re1+* and wins *)* 13.Be3 Bxd4 14.Qb3 Qd7 15.Nc3± followed by Rfe1 and Rad2 with advantage as Black cannot develop his pieces.]
11.dxe5 Nxe5 12.Nxe5 dxe5 13.Qa4+
[13.Qxd8+ Kxd8 14.Bg5 *(14.Bxf7 Nxe4)* 14...Kd7 favours Black [TH: I

find this dubious as White isn't worse after Bxf6; doesn't Black have a better move?]]

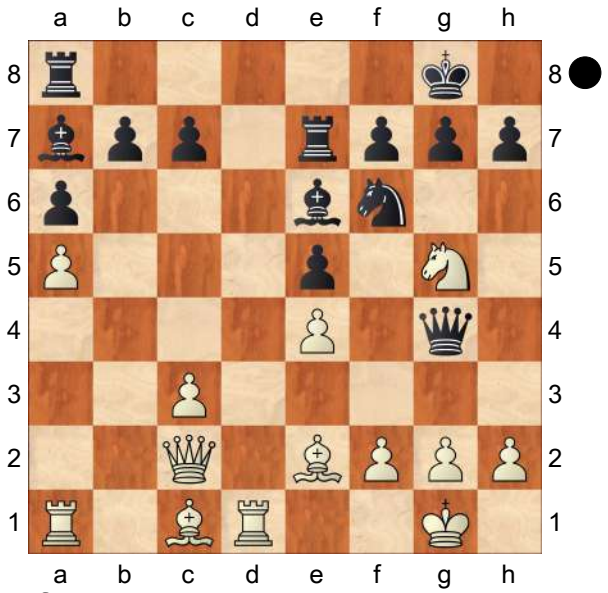
13...Qd7 14.Qc2 0−0 15.Nd2 Qg4 An error which compromises the game; [Better translation needed!!] the right move was 15...

[15...Bc5 16.Nf3 Qe7 favouring Black.]

16.Nf3 Re8

[16...Qxe4 17.Qb3 Bc5 TH: Black has better moves here, maybe 17... Qf5 or 17...Bh3 so it is not clear that the offer of the e−pawn was correct. 18.Re1 Qc6 *(18...Qg6* or ...Qg4 or ... Qf4 *19.Rxe5+−)* 19.Nxe5±]

17.Ng5 Re7 18.Rd1 Be6 19.Be2



Qh4 If

[19...Bb3 20.Qb2 *(20.Qd2* or ♕d3 *Qd7∓; 20.Qxb3 Qxe2∓)* 20...Qh4 *(20...Bxf2+ 21.Kh1+−)* 21.g3 Bxf2+ 22.Kg2! Qh6 23.Qxb3+−]

20.g3 Qh6 21.Nxe6 and White should win easily (TH)... **21...Qg6 22.Ng5 h6 23.Nh3 Qxe4 24.Qxe4 Nxe4 25.Rd3 Nc5 26.Ba3 Rd7 27.Rxd7 Nxd7 28.Rb1 b6 29.axb6 Bxb6 30.Kg2 Nf6 31.Rd1 g5 32.f3 Kg7 33.Nf2 Re8 34.Ne4**

[34.Bxa6? Ra8]

34...Nxe4 35.fxe4 Ba5 36.Bc4 Bxc3 37.Rd7 c5 38.Rxf7+ Kg6 39.Rc7 Rf8 40.Rc6+ Rf6 41.Rxa6 Rxa6 42.Bxa6 Bd4 43.Kf3 h5 44.h3 h4 45.g4 Kf6 46.Ke2 Bg1 47.Kd3 Bf2 48.Kc4 Be3 49.Bxc5+− Rosenthal writes here: Evidently White has a winning position, however the game was ended as a stalemate [draw] following an analysis sent by M. Amiros in which he had overlooked the sacrifice of Black's bishop in one variation... Does this mean the game was adjudicated here and an error in analysis sent by White where he overlooked a stalemate possibility resulted in the adjudicator giving Black a draw. .. If so, isn't that a bit harsh when White is a piece up? Would that happen nowadays? If Amiros had been awarded a win,. he would have been first and Laquiere second in the tournament! Interesting, if true, that an error in analysis ccccat adjudication time decided first prize in teh first true international CC tournament: worth highlighting in your introduction to the article!

□ **Perrin,Frederick**
■ **Morphy,Paul**
casual [2] New York 1857
[Sergeant, P.]

Steinitz, W.: '[The following game, played by Mr. Paul Morphy against Mr. F. Perrin, has been sent to us for publication by the latter gentleman who states that it has never before appeared in print, and that it was the second game played by the youthful master in New York, in 1857, after his arrival for the purpose of entering in the tournament of the First American Congress which laid the foundation for his fame. The game occurred at the old New York Chess Club, which was located at the corner of University Place and 12th Street.]' **1.e4** Sergeant, P. Maroczy: Paul Morphy. Game 58. S.66. Sergeant, P. Maroczy: Paul Morphy. Game 58. S.66. Steinitz, W. Sergeant, P. Maroczy: Paul Morphy. Game 58. S.66. Fritz 6 (6s): 'C54: Giuoco Piano: 4 c3 Nf6, main lines with 5 d4 and 5 d3' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5** [This move is universally commended; but White's reply here is not good.] Sergeant, P.: '[This move is universally commended; but White's reply here is not good.]' Steinitz, W.: '[We believe that at the time when this game was played the practical development of this move was in its infancy, and was only known to close students of the analysis of the day, such as young Morphy was, no doubt. Before its discovery by Anderssen, if we recollect right, the above form of the Giuoco Piano was considered one of the strongest of openings, whereas it is now hardly practiced, excepting with the modification that the attack does not advance d2−d4 early, and is contented to adopt the waiting move d2−d3.]'
7.Bb3 Fritz 5.00 (5s): 'N'
[7.Bb5 has long been the standard continuation, though Black gets a good game against it also with (Sergeant, P.) has long been the standard continuation, though Black gets a good game against it also with Steinitz, W.: 'is, however, undoubtedly better than the move in the text.' Ne4]

11...Re8
[11...Ne7 12.Nf1 Ng6 13.Ng3 Re8 14.d4]

12.Nf1 d5 13.Qe2
[13.exd5 Bxd5 14.Ng3 Qd7 15.Be3 Bxe3 16.Rxe3 Re7 *(16...Rad8 17.Qe2 Bxf3 18.Qxf3 Nd5 19.Ree1 Re6 20.Rad1)* 17.Nh4 is excellent for White and so Black may just have to retreat his knight. Presumably with a symmetrical pawn structure (i.e. both sides having isolated a− and c−pawns) White's bishop pair should give him a niggling edge, although eventually Black should be able to arrange ...Ba6. or Be6 18.Nh5! Nxh5 19.Qxh5 Qd6 20.Rg3 Kf8 21.Re1 Bd7 22.Ree3 e4 23.dxe4 Qd2 24.Bb3 Qxb2 25.Ref3 Ne5 26.Ng6+ Nxg6 27.Qxg6]

13...Qd7
[13...dxe4 14.dxe4 b5 *(14...Nh5 15.Nxe5)* 15.N3h2 *(15.Ng3 Bc4)* 15...Ne7 , after which Mickey went on to win in J.Pomes Marcet−M.Adams, Mainz 2001. or 16.Rd1 Qc8 17.Qf3 Nh7 when the d3−square is ripe for an invasion and as usual White lags

behind in development instead of 18.Ng4 Ng6 19.Nfe3 Black's idea then is to develop the queen on c7, although Rd8 20.Nf5!? Rxd1+ 21.Qxd1 is sneaky! With that in mind, perhaps White's most flexible is Qd8!? as after 22.Qe1?! h5! , 23.Nh2? is unplayable because ...Qxc3+ will no longer be a fork. hence Nf4 24.Bxf4 exf4 , returning more to the realms of our previous game Of course Black could still employ 25.Rd1 but if he doesn't venture out with it now it won't be chased back later! A continuation not yet seen is Qe8!? 26.Qd2 Bxf5 . It looks to me as though 27.exf5]

14.Ng3 Rad8!? 15.Kh2

[15.Nh4 Bxh3 16.gxh3 was a successful smash−and−grab raid in M.Bluvshtein−T.Roussel Roozmon, Montreal 2002 Qxh3 17.Nhf5 Ng4 18.Be3 Qh2+ 19.Kf1 Qh3+ 20.Kg1]

[15.Bd2 Bc5 , J.Cox−J.Emms, London 2005, can hardly be deemed as a winning attempt for White, but it does also highlight Black's difficulties in reaching positions in which he can create winning chances The alternative 16.Rad1 d4 17.Bb1 b5 18.Rc1 would transpose to the main game. Basically it seems that Black has the choice of where he wants the white queen to be when he parks his own queen on c7. The immediate deployment encourages some crazy lines, e.g. dxc3 *(18...Bf8 19.cxd4; 18...Bb6)* 19.bxc3 Bf8 20.Be3]

[15.Nh2 b5 *(15...Ne7?!* has less point now as the c3−pawn isn't even attacked. Black should of course opt for the immediate *16.Qf3!* , when he stands well upon either *Ng6)* 16.Qf3 Nh7 17.Ng4 d4 - White has two pieces for a rook but will struggle to complete his kingside development. maybe 18.Nf5!? is stronger or Bxf5 19.exf5!]

15...Kh8

[15...Qe7 16.Nh4 Ng4+]

16.Nh4 Ng8

[16...Ne7 17.Qf3 dxe4 . Well, objectively I suppose White is slightly better, but actually Black went on to win in M.Ulibin−A.Cherniaev, Biel 2004. Mind you, Alexander plays a lot in England and he is a very slippery customer! 18.dxe4?! Ng6]

17.Qf3 Bc5 18.Ngf5 Bf8 19.g4 g6 20.Rg1 dxe4 21.dxe4 gxf5 22.gxf5 Bc4 23.f6 Re6 24.Rxg8+ White grabs a pawn but Black's counterplay soon becomes self−evident. **24...Kxg8 25.Be3 Ne7 26.fxe7 Bxe7 27.Rg1+ Bg5 28.Qh5 Rf6** Black is a piece for a pawn up but it is that pawn that saves White's blushes. **29.b3 Bb5 30.a4 Bc6** 20...a5 and **31.Rxg5+** are obvious alternatives; they both look reasonable but are unlikely to change the outcome of this game. The pawn is of course weak here and destined to drop off. However, it only got in the way and the **31...hxg5 32.Qxg5+ Rg6 33.Nxg6 fxg6 34.b4 Re8** of E.Ovod−V.Sanchez Martin, Oropesa del Mar 2000 doesn't really constitute an improvement. **35.Bb3+ Kh8 36.Qh4+ Qh7 37.Bh6 Rf8 38.Qg5 Rxf2+ 39.Kg3 Rf7 40.Qxe5+ Rg7 41.Qg5 Be8 42.Bxg7+ Qxg7 43.Qh4+ Qh7** was roughly equal in R.Palliser−D.Gormally, British Rapidplay Championship, Halifax 2004.

44.Qf6+ Qg7 45.e5 would transpose to our main game **45...g5** has proven to be okay in practice too, e.g. **46.a5 Qxf6 47.exf6 Bd7 48.Bd5 Bc8 49.Bf3 b6 50.Bg4 Bb7 51.Bf5**
½−½

C54

□ **T.Radjabov**
■ **V.Anand**
(rapid) Baku 2009
[John Emms]

Let's consider yet another option. This time it's for White, if he has played 8 h3: **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3 h6 9.Be3!** If Black is going to play ...g5, then Be3 is a much better move than Re1. It was Tiviakov more than anybody who showed that the plan with Be3 is not a harmless one, although he usually plays it a move earlier (see the next game). **9...Bxe3** This is certainly not a mistake, at least from an objective viewpoint. However, it does appear that the resulting positions with the semi−open f−file are easier for White to play than Black, something which is demonstrated to some extent in this game.

[The aggressive 9...g5!? remains a decent option, but White has less to fear here than with 9 Re1?! g5. For example, 10.Bxa7 Nxa7 (Black wants to keep the option of ... 0−0−0!) 11.d4 Qe7 12.Nbd2 g4 13.hxg4 Nxg4 *(*or *13...Bxg4 14.dxe5 dxe5 15.Nc4 Nc6 16.Ne3 Rg8 17.Re1 Rd8 18.Nd5 Nxd5 19.exd5 e4 20.Kf1!* with some advantage for White, D. Pavasovic−L.Fressinet, European Ch., Plovdiv 2008 *)* 14.Ba4+!? *(*I prefer this to *14.dxe5 dxe5 15.g3* , as played in I. Khamrakulov−F.Vallejo Pons, Pamplona 2007 *)* 14...b5 *(*if *14...Bd7* , White replies *15.Bxd7+ Qxd7 16.dxe5 dxe5 17.Nc4* and Nh4−f5 is the plan,*;* or *14...c6 15.dxe5 dxe5 16.Nc4!)* 15.Bb3 and White, having induced ...b5, will follow up with a4.]

[The safest option is 9...0−0 which transposes after 10.Nbd2 to Tiviakov−De Vreugt, note 'c' to Black's 9th move.]

10.fxe3 0−0 11.Nbd2 Be6

[The immediate 11...Ne7 is met by 12.Nh4! after which not only is 12... Ng6 impossible, but Black also has to be wary of exchange sacrifices on f6.]

[11...d5 also doesn't completely solve Black's problems, as typically this advance leaves White with a strong centre. For example, 12.exd5 Nxd5 13.Qe1! Nf6 14.d4 Re8 15.Qg3 Be6 *(15...exd4 16.exd4 Be6* is better *)* 16.Nxe5 Nxe5 17.dxe5 Nd7 18.Ne4 Kf8 19.Rad1 Bxb3 20.axb3 Qe7 21.e6 Qxe6 22.Qxc7 with a clear advantage for White, W.Schill−R. Rasmussen, Budapest 2004.]

12.Bc2 Ne7

[12...d5 looks more appealing here, and yet I still think White has a small edge after 13.exd5 Nxd5 14.Qe1 Re8 15.Qf2 planning d4.]

13.Nh4! This is a key move and almost an automatic response to ...Ne7.

13...Ne8 Anand begins to drift. In fact this and his following two moves make a very strange impression. Perhaps he was initially planning on the super−solid

...g6 and ...Ng7 but then decided against it.

[13...Ng6 looks more natural, against which White replies with 14.Nf5 . What is clear is that Black has no easy solution in his search for equality.]

14.d4 Bd7?! This definitely feels wrong.

[If 14...g6 there follows 15.Ndf3 f6 16.Bb3 *(* or *16.Nh2!?)* 16...Ng7 17.Bxe6+ Nxe6 18.Qb3 and Black is still under some pressure.]

[Perhaps he should try to create some action in the centre with 14...c5!? .]

15.Bb3! Why not? **15...Nf6**

[This allows a promising exchange sacrifice, but it's too late to go back with 15...Be6? because of 16.Bxe6 fxe6 17.Rxf8+ Kxf8 18.Qb3 Qc8 19.dxe5 dxe5 20.Nc4 .]

16.Rxf6! I wouldn't have thought Radjabov spent too long on this move. It looks, and is, a very dangerous sacrifice.

16...gxf6 17.Qh5 Kg7 18.Rf1 Be6

[If 18...Ng6 there follows 19.Nf5+ Bxf5 20.exf5 Ne7 21.Ne4! Ng8 *(* or *21...d5 22.Nxf6!)* 22.Rf3 d5 23.Rg3+ Kh7 24.Qg4 and mate with Qg7.]

19.Rf3! c5

[Black needs to keep his bishop on e6 to provide at least some protection for his shaky light squares. After 19...Bxb3 20.Rg3+! *(20.axb3 Rh8!)* 20...Kh7 21.axb3 it's extremely difficult for Black to defend: exd4 *(* or *21...Qd7 22.Ndf3!* planning Nh2−g4 *)* 22.Rg4! dxe3 23.Nf5 Nxf5 24.Qxf5+ Kh8 25.Qh5 Kh7 26.Rh4 and White mates.]

20.Rg3+

[White could have kept some advantage with 20.Bxe6 fxe6 21.Qg4+ . Black has to allow Kh7 *(* since *21...Kf7? 22.d5! exd5 23.exd5* intending Ne4 is very strong *)* 22.Qxe6 .]

20...Kh7 21.Bxe6? Missing a great chance. Although 21 Bxe6 is undoubtedly tempting, it only leads to perpetual check.

[Radjabov could have played 21.Nf5! Nxf5 22.exf5 Bxb3 23.axb3 , which would have given him a very dangerous attack, and probably a winning one. For example, exd4 *(* or *23...Qe7 24.Rg4 Rg8 25.Rh4 Qf8 26.Ne4)* 24.Ne4! dxe3 25.Rg4! e2 26.Kf2! , and there is no good defence to the threat of Rh4.]

21...fxe6 22.Rg6 Nxg6 23.Qxg6+ Kh8 24.Qxh6+ Kg8 25.Qg6+

[The winning try for White is 25.Ng6 , threatening 26 Qh8+ Kf7 27 Qh7+ Ke8 28 Qg7!. The only defence for Black is Qd7! but it's good enough. A key point is that after 26.Qh8+ Kf7 27.Qh7+ Ke8 28.Nxf8 Qxh7 29.Nxh7 Ke7 , as indicated by Malcolm Pein in 'CHESS', White's knight on h7 is trapped.]

25...Kh8 26.Qh6+

½−½

(Game 11) Pune 2004

[Chris Ward]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.0−0 d6 8.Re1

[8.Nbd2 0−0 9.h3 Be6 10.Re1 Re8

11.Nf1 h6 12.Ng3 Qd7 13.Bc2 d5 14.Qe2]

8...0−0!? In my opinion the fact that English GM Michael Adams has favoured this move should make us all sit up and take note. With the text Black shows that he is eager to regain the c5− pawn but prefers not to commit the queen. **9.h3 h6 10.Nbd2 Be6 11.Bc2**

[11.Nf1 Re8 *(11...Bxb3 12.axb3 Re8)* 12.N3h2 *(12.Ng3; 12.Be3)* 12...Bxb3 13.axb3 Qd7

A) 14.Ng3 Ne7 15.b4 c6 16.Ng4 Qe6 17.Be3 *(17.Qf3)* 17...Bxe3 18.Nxe3 d5 19.exd5 Nexd5 *(19...cxd5)* 20.Nc4 Nd7 21.Ne4 Nf4 22.Qf3 b5 23.Na5 *(23.Ncd6)* 23...f5 24.Nc5 Nxc5 25.bxc5 Nd5 26.Nb7 e4 27.dxe4 fxe4 28.Qg3 Nf6 29.Nd6 Re7 30.b4;

B) 14.Qf3 Qe6 15.Ng3 Ne7 *(15...Qxb3 16.Nf5)* 16.b4 c6 17.Ng4 Nxg4 18.hxg4 d5 19.Nf5 Rad8 20.g3 f6 21.Kg2 dxe4 22.dxe4 Nxf5 23.gxf5 Qc4 24.Be3 Bxe3]

11...Re8

[11...Ne7 12.Nf1 Ng6 13.Ng3 Re8 14.d4]

12.Nf1 d5 13.Qe2

[13.exd5 Bxd5 14.Ng3 Qd7 15.Be3 Bxe3 16.Rxe3 Re7 *(16...Rad8 17.Qe2 Bxf3 18.Qxf3 Nd5 19.Ree1 Re6 20.Rad1)* 17.Nh4 is excellent for White and so Black may just have to retreat his knight. Presumably with a symmetrical pawn structure (i.e. both sides having isolated a− and c− pawns) White's bishop pair should give him a niggling edge, although eventually Black should be able to arrange ...Ba6. or Be6 18.Nh5! Nxh5 19.Qxh5 Qd6 20.Rg3 Kf8 21.Re1 Bd7 22.Ree3 e4 23.dxe4 Qd2 24.Bb3 Qxb2 25.Ref3 Ne5 26.Ng6+ Nxg6 27.Qxg6]

13...Qd7

[13...dxe4 14.dxe4 b5 *(14...Nh5 15.Nxe5)* 15.N3h2 *(15.Ng3 Bc4)* 15...Ne7 , after which Mickey went on to win in J.Pomes Marcet−M.Adams, Mainz 2001. or 16.Rd1 Qc8 17.Qf3 Nh7 when the d3−square is ripe for an invasion and as usual White lags behind in development instead of 18.Ng4 Ng6 19.Nfe3 Black's idea then is to develop the queen on c7, although Rd8 20.Nf5!? Rxd1+ 21.Qxd1 is sneaky! With that in mind, perhaps White's most flexible is Qd8!? as after 22.Qe1?! h5! , 23.Nh2? is unplayable because ...Qxc3+ will no longer be a fork. hence Nf4 24.Bxf4 exf4 , returning more to the realms of our previous game Of course Black could still employ 25.Rd1 but if he doesn't venture out with it now it won't be chased back later! A continuation not yet seen is Qe8!? 26.Qd2 Bxf5 . It looks to me as though 27.exf5]

14.Ng3 Rad8!? 15.Kh2

[15.Nh4 Bxh3 16.gxh3 was a successful smash−and−grab raid in M.Bluvshtein−T.Roussel Roozmon, Montreal 2002 Qxh3 17.Nhf5 Ng4 18.Be3 Qh2+ 19.Kf1 Qh3+ 20.Kg1]

[15.Bd2 Bc5 , J.Cox−J.Emms, London 2005, can hardly be deemed as a winning attempt for White, but it does also highlight Black's difficulties in reaching positions in which he can create winning chances The

alternative 16.Rad1 d4 17.Bb1 b5 18.Rc1 would transpose to the main game. Basically it seems that Black has the choice of where he wants the white queen to be when he parks his own queen on c7. The immediate deployment encourages some crazy lines, e.g. dxc3 *(18...Bf8 19.cxd4; 18...Bb6)* 19.bxc3 Bf8 20.Be3]
[15.Nh2 b5 *(15...Ne7?!* has less point now as the c3−pawn isn't even attacked. Black should of course opt for the immediate *16.Qf3!* , when he stands well upon either *Ng6)* 16.Qf3 Nh7 17.Ng4 d4 - White has two pieces for a rook but will struggle to complete his kingside development. maybe 18.Nf5!? is stronger or Bxf5 19.exf5!]

15...Kh8

[15...Qe7 16.Nh4 Ng4+]

16.Nh4 Ng8

[16...Ne7 17.Qf3 dxe4
. Well, objectively I suppose White is slightly better, but actually Black went on to win in M.Ulibin−A.Cherniaev, Biel 2004. Mind you, Alexander plays a lot in England and he is a very slippery customer! 18.dxe4?! Ng6]

17.Qf3 Bc5 18.Ngf5 Bf8 19.g4 g6 20.Rg1 dxe4 21.dxe4 gxf5 22.gxf5 Bc4 23.f6 Re6 24.Rxg8+ White grabs a pawn but Black's counterplay soon becomes self−evident. **24...Kxg8 25.Be3 Ne7 26.fxe7 Bxe7 27.Rg1+ Bg5 28.Qh5 Rf6** Black is a piece for a pawn up but it is that pawn that saves White's blushes. **29.b3 Bb5 30.a4 Bc6** 20...a5 and **31.Rxg5+** are obvious alternatives; they both look reasonable but are unlikely to change the outcome of this game. The pawn is of course weak here and destined to drop off. However, it only got in the way and the **31...hxg5 32.Qxg5+ Rg6 33.Nxg6 fxg6 34.b4 Re8** of E.Ovod−V.Sanchez Martin, Oropesa del Mar 2000 doesn't really constitute an improvement. **35.Bb3+ Kh8 36.Qh4+ Qh7 37.Bh6 Rf8 38.Qg5 Rxf2+ 39.Kg3 Rf7 40.Qxe5+ Rg7 41.Qg5 Be8 42.Bxg7+ Qxg7 43.Qh4+ Qh7** was roughly equal in R.Palliser−D.Gormally, British Rapidplay Championship, Halifax 2004. **44.Qf6+ Qg7 45.e5** would transpose to our main game **45...g5** has proven to be okay in practice too, e.g. **46.a5 Qxf6 47.exf6 Bd7 48.Bd5 Bc8 49.Bf3 b6 50.Bg4 Bb7 51.Bf5**

□ **Counterattack Example**

■ **Anand,V.**

Superbet Rapid & Blitz (18.4) 09.11.2019 *[GM Aleksander Delchev]*

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.0−0 d6 6.c3 a6 7.a4 Ba7 8.Re1 0−0 9.h3 Re8 10.Nbd2 Be6

[The usual move order is 10...h6 11.b4 Be6 12.Bxe6 Rxe6 13.Qc2 , and this is the most important opening position of the line.]

11.Bxe6 Rxe6 12.b4 d5 As a result of his clever move order, Black saved a whole the tempo by avoiding h7−h6.

13.Bb2 Nh5!? The idea of this move is more than clear: Black starts an attack on the kingside. But can this be correct? The centre is still open and White has an immediate counterattack with **14.b5!** Of course Giri had seen this move, but it looks like he doesn't care much about giving away a piece. **14...Nf4! 15.bxc6 Rg6** White gladly takes the offered piece, but now the question is how to hold off the attack. **16.d4!** You need strong nerves to be a good defender. For now, Anand holds the first wave by closing the bishop's diagonal. But what will he do after **16...Rxg2+ 17.Kh1!** Of course, this is the only way. It is too late to evacuate, therefore the safest place for the king is in the corner.

[17.Kf1 Qf6 *(17...Qc8?! 18.Ng1!)* 18.cxb7 Rb8 19.Re3 Qg6 20.Ke1 Nxh3! And White's king is in grave danger. *(20...Rxf2 21.Kxf2 Qg2+ 22.Ke1 Qg3+=* is only a draw. *)*]

17...Qc8! 18.Ng1! Rxf2 19.Rf1! Nxh3

[19...Nd3 20.Qc2 dxe4 21.Rxf2 Nxf2+ 22.Kh2 is quite unclear, too.]

20.Qh5! Immediately after resisting the first wave, Anand starts his counterattack **20...Nf4 21.Qxe5 Nd3 22.Qg5 Rxf1 23.Rxf1 Nxb2** Giri restores the material balance, but now the initiative is firmly in White hands. **24.Qxd5**

[24.Rb1! is winning on the spot, but Anand is focused on the kingside.]

24...bxc6 25.Qxf7+ Kh8 26.Ndf3

[26.Ngf3 Qh3+ 27.Nh2 is better.]

26...Nxa4?? Giri completely ignores White's attack

[26...Qe8 27.Ne5 Qxf7 28.Rxf7 c5 29.Nc6 Kg8 30.Rxc7 also looks very bad for Black, but after the move in the game, Black is just lost.]

27.Ne5

[27.Ng5 leads to quick mate after Qg8 28.Qh5 h6 29.Nf7+ Kh7 30.Nf3]

27...Qe8 28.Qc4 Nb6

[No better is 28...Qh5+ 29.Kg2 Nb2 30.Qb3+−]

29.Nf7+? Going for a draw. After

[29.Qa2! Qh5+ 30.Kg2 , Black would be dead lost. h6 *(30...Qg5+ 31.Kh2! Qe7 32.Nh3+−)* 31.Rf5 Qd1 *(31...Qe8 32.Rf8+)* 32.Ng6+ Kh7 33.Nf8+ Kh8 34.Nf3 With a mating attack and total domination for White.]

29...Kg8 30.Nh6+ Kh8 31.Nf7+ Kg8 The question what is more successful, the attack or the counterattack, remained unanswered in this game. **½−½**

□ **D.Bronstein**
■ **B.Ivkov**
Amsterdam 1968
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Bb3 Even if White is planning to castle kingside under most circumstances, I think 6 Bb3 is a good move against 5...d6 because: 1. It forces Black to be careful with move orders. More specifically, 6...0−0 can be answered by 7 Bg5!. 2. With ...d5 much less likely after ...d6, White can afford to delay castling for a move or two. **6...h6 7.0−0**

[7.Nbd2 , together with sixth−move alternatives for Black, was discussed in Erenburg−Kreizburg, where White delayed castling.]

7...0−0 8.Nbd2

[Of course there's nothing wrong with 8.Re1 , but in this game White tries something a bit different.]

8...Be6

[Even here Black often plays 8...a6 , when 9.Re1 would transpose to normal lines.]

[If Black plays 8...Bb6 , 9.Nc4 is a logical reply after which Be6 transposes to the main game.]

9.Nc4!? This is an attempt to both utilize the early Nbd2 and exploit Black's omission of ...a6 and ...Ba7. White avoids the exchange of bishops and now Black must be wary of d4−d5. **9...Bb6**

[9...b5!? is double−edged: it forces the exchange of light−squared bishops but at a cost of offering White something to attack on the queenside. 10.Ne3 Bb6 *(10...Qd7!* is better *)*

11.Bxe6! fxe6 12.a4 a6 13.axb5 axb5 14.Rxa8 Qxa8 15.Qb3 , forking b5 and e6, is the type of line that Black has to avoid.]

[Strangely enough, the risky−looking 9...a6 is actually playable here. If 10.d4 *(10.Re1* and*; 10.a4* are decent alternatives *)* 10...exd4 11.cxd4 , Black doesn't have to play Bxc4 to avoid losing a piece *(* - he can play *11...b5!?* . Here *12.dxc5 bxc4 13.Ba4 Ne5 14.Nxe5 dxe5* was roughly level in M.Maric−F. Izeta Txabarri, Oviedo (rapid) 1993. *)*]

10.a4

[10.Nxb6 axb6 is less challenging for Black because White cannot keep the bishop pair; for example, 11.Re1 Bxb3 12.Qxb3 Re8 13.Qc2 Qd7 with a level position, K.Asrian−V. Korchnoi, Dagomys 2008.]

10...Re8 Lining up the possibility of...d5.

[The impatient 10...Bxc4?! is inadvisable, and in R.Ramesh−M. Lodhi, New Delhi 2007, Black was soon regretting his loss of control of the light squares: 11.Bxc4 a5 12.Re1 Ne7 13.Nh4! Qd7 14.h3 g5 *(* if *14...c6* , White plays *15.Ba2* and Qf3 *)* 15.Nf3 Ng6 16.d4 Kg7 17.Be3 Qe7 18.Nd2 Nf4 19.Bf1 Nd7 20.Nc4 f6 21.g3 Ne6 22.Be2 Rh8 23.Kh2 Rad8 24.Bh5 Kh7 25.Bg4 Qf7 26.Bf5+ Kg7 27.b3 with a large advantage.]

[10...Nd7 11.Nxb6?! *(11.Ba2* intending b4 looks stronger to me *)* 11...Bxb3 12.Qxb3 axb6 was level in Y.Kosashvili−Y.Kraidman, Tel Aviv 1989, but I think White again took on b6 too readily.]

11.Bc2! This is unusual, and a nice example of Bronstein's renowned creativity. Black is invited to double White's c−pawns, but at a cost of ceding the light squares and giving White a bind on d5.

[11.Re1 Bc5!? 12.a5 *(12.Ba2!?)* 12...Ng4! 13.Ne3 Bxe3 resulted in a quick draw in S.Movsesian−A. Morozevich, Sarajevo 2008. I wonder whether either player was aware of this earlier game.]

11...Nd7?!

[Another point of White's last is to protect e4, so that if 11...d5 White can safely take a pawn with 12.Ncxe5 Nxe5 13.Nxe5 dxe4 14.dxe4 Qxd1 15.Rxd1 etc.]

[In his notes for 'Chess Informant 6', Ivkov prefers 11...Bxc4 12.dxc4 , although he still evaluates this position as a clear advantage for White. I'm not convinced that Black's position is so bad - he is after all quite solid. That said, I do still prefer White, who can slowly improve his position and also think about Nh4−f5 ideas.]

12.a5! Bxc4 13.axb6 Be6 14.bxc7 Qxc7 15.d4 Ivkov also evaluates this as a clear advantage for White. The two bishops, central control and better structure indicate that this time there's no argument from me! **15...Bg4 16.d5 Bxf3?!**

[16...Ne7 is better, but 17.h3 Bh5 18.g4 Bg6 19.Nh4 (Ivkov) is still very promising for White.]

17.Qxf3! Nd4 18.cxd4 Qxc2 19.Bxh6! Winning a pawn, in view of 19...gxh6 20 Qg4+. White has a virtually decisive advantage here but Bronstein begins to let it slip; and the final position, where

the players agreed a draw, is genuinely unclear. **19...Nf6 20.Qg3 Nh5 21.Qg4 g6 22.dxe5?**

[22.Rac1! Qxb2 23.Rc7 intending Qxd4 24.Qd7 (Ivkov) should be winning for White.]

22...Rxe5 23.f3 Qxb2 24.Be3 Re7 25.Qh4 Rc7 26.g4?

[And here 26.Qg5 keeps an edge.]

26...Nf6 27.Rab1 Qe5 28.Rfd1 Nh7 29.Rbc1 Rxc1

½–½

C54

□ **Eames,R..**

■ **Cherniaev,A..**

Masters Hastings (4) 31.12.2013

[Chris Ward]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.b4 Bb6 7.Qb3

[7.Bb3 certainly saw things liven up quickly. Black opted to reject the rook on h1 in favour of h6?! but 8.Nbd2 a6 9.Nc4! Ba7 10.Be3 0−0 11.Bxa7 left a clear initiative to White in Wang, K (2152)−Kaufman, R (2307) Arlington 2010. Of course White could just play 9 Qd2 and regards the text, I'm not sure whether it isn't just chasing away the black knight to greener pastures. On the other hand, maybe that's a little harsh as I suppose it does help gain more control over d5 and is of course consistent with White's last move. With reference to Cherniaev's other annotated game this month, it is interesting/amusing to see that Alex didn't appear to want to employ Rxa7 when it was actually doing something! Here of course it would halt (for now at least) g4−g5 and though I wouldn't say necessarily best, it certainly worked following 12.0−0 Be6 13.Re1 Ra8 14.h3 Re8 15.a4 Qd7 16.a5 Na7 17.Rc1 Rad8 18.Ba4 c6 19.Ne3 Qe7! 20.c4 Rf8 when White was very poorly coordinated in Londers, J (1939)−Van Mechelen, J (2247) Lommel 2012. Investigated in the past, 21.Rb1 Bd7]

[7.a4 a5 8.Qb3 0−0 9.Be3 Bxe3 10.fxe3 Ne7 is arguably an accurate sequence that leaves chances for both sides. The bizarre sequence (particularly from Black's point of view) 11.0−0 c6 had already occurred in an earlier round with Lenier−Chernaiev also annotated in this January 2014 update. 12.Nbd2 d5 13.exd5 cxd5 14.Bb5 Ng6 15.Rae1 Qd6 16.c4 Be6 17.c5 Qc7 18.Qb2 axb4 19.Qxb4 h6 20.Nh4 Ne7 21.Qb2 Nd7 22.Rc1 Rfc8 23.g3 f6 24.e4 Nxc5 25.d4 exd4 26.Qxd4 Qe5 27.Ndf3 Qxd4+ 28.Nxd4 Bh3 29.Rfe1 dxe4 30.Rc4 b6 31.Ng2 g5 32.Ne3 Nd3 33.Ra1 Ne5 34.Rcc1 Rxc1+ 35.Rxc1 Rd8 36.Nec2 Nf3+ 37.Nxf3 exf3 38.Ne1 Bg4 39.h3 Bxh3 40.Nxf3 Bg4 41.Kf2 Rc8]

7...0−0 And so with have an Accelerated Dragadorf in which Black deliberately delays ...Bg7 for various reasons that regular subscribers will be very aware of. A transposition to the regular Dragadorf is far from guaranteed as Black often never gets around to fianchettoing his king's bishop at all with it frequently finding alternative action along the f8−a3 diagonal. **8.a4 a6 9.Bg5 h6**

[9...Qe7 and now 10.Nbd2!! Be6 11.Bd5 *(11.0−0* would carry all sorts

of threats although the clever 19 Nxe6! is even stronger. No, Black can't allow the rooks to be swapped off but *Ba7 12.Qc2! Rfb8 13.a5* wouldn't be a good way to achieve that objective! In light of the game continuation, this though does look like an inaccuracy when *Nd8!* feels nicer for Black. When Alex entered the commentary room after the game he said that he wish he had played *14.Rfe1 Bxc4 15.Nxc4* but the text can't be bad. *Ne6 16.Ne3 Nxg5 17.Nxg5 Nh5 18.Nh3* certainly looks like a plausible alternative continuation. Then *g6 19.Nd5 Qd8* seemed in the balance until *20.Qe2 Ng7 21.Kh1?!* (thematic in terms of structure but Black's poorly coordinated pieces aren't ready for this). *f5 22.f4 c6 23.Ne3 Qf6 24.fxe5 dxe5 25.exf5 gxf5 26.Rf1 Kh8 27.Ng4 Qh4* had seen White emerge with a significant development advantage and immediate threats in Eggleston, D (2372)−Tebb, D (2215) Liverpool 2008. *28.Nxe5!? Re8 29.Nf7+ Kg8 30.Qa2* looks like more fun. or *Re6* coming to the same thing. *31.Nfg5* is also not out of the question. A typical plan for White might then be to manoeuvre a knight to g3 so as to challenge the h5−knight and obviously meet ...Nxg3 with hxg3 for a handy half−open h−file. Here though either white knight retreat to e2 can be met well by 10...h6!. Following *Rae8 32.Rae1 Qh6* I don't see how the bishop being on d3 fits into the equation. Black should be fine with normal moves too but *33.Nxe6 Nxe6 34.Nf4)* 11...Nd8 12.Nc4 and forced mate! or Ba7 13.0−0 c6 14.Bxe6 fxe6 15.d4 So not exd4? i.e. 16.cxd4 Nf7 17.Bxf6 threatening amongst other things, Bb6+. or gxf6 18.Rae1 Kh8 19.d5 Although clearly Black had the idea on his mind, indeed immediately here cxd5! 20.exd5 e5 hitting e6 and again freeing up that h5−square for the queen looks rather dangerous. 21.Nh4!? seems set to prevent Qd7 because of 22.Qf3 although then Ng5 23.Qf5 Qxa4 facilitating Qh5+ is a bit crazy! 24.Nxd6]

10.a5 Bxf2+ 11.Kxf2 So, the standard queenside a4 challenge has occurred but a little later than usual. In the interim White has bought himself the d5−square through g4−g5 but that advance has left the future of his own king a little less certain. **11...Ng4+!** And not for the first time in the Accelerated Dragadorf we are about to see one of the advantages of not moving the dark−squared bishop to g7. **12.Ke2 hxg5** The thematic central break, only possible because of the discovered attack against the now out of sorts knight on b4. **13.h4 gxh4** Around here I commented that I didn't feel that White's opening play had come to much and observed that I now favoured Black. Structurally he stands well but of course there are always going to be tactical considerations. **14.Rxh4 Ne7 15.g3 Ng6?! 16.Rh1 Nf6 17.Nbd2!** The strength of which White missed. **17...c6 18.Qd1 d5 19.Bb3** The position is really quite murky here. White had plenty of candidate moves but clearly he was eager to get castled.

19...b6 20.Qg1 Rb8 21.axb6 Qxb6 22.Qh2 Via this move order though Black is not obliged to accept the offered knight. **22...Bg4 23.Kf1 Qe3 24.Nxe5 Nh5 25.Qf2 Nxg3+ 26.Kg2 Qxf2+ 27.Kxf2 Nxh1+ 28.Rxh1 Nxe5 29.d4 Nd7 30.Rg1 Be6 31.Bc2 Rb6** and a repetition for a draw is a fair result! Again **32.Nf3** would be flattened by **32...dxe4!** Upon the immediate **33.Bxe4** , beautiful is **33...Bd5! 34.Bf5 Bxf3**
½−½

16: Correspondence 2006
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 This is the classical main line, which was popular until White found some new ideas after 8 Qf3 and especially 8 Bd3. Basically, the bishop

is just placed on a square where it hopefully won't interrupt White's development too much. I imagine this line is still very popular at club level, so I'd definitely recommend the reader investing some time to study it. **8...h6 9.Nh3!?** This is the pet move of GM Bartosz Socko. Black won't gain any more time kicking around the white knight, but at the same time the knight is badly placed on h3 and it won't be easy to get it back into the game. This makes sure that Black has decent, lasting compensation. With that said, Black still needs to display accuracy in this variation, and a fair amount of patience and belief can help too. Black should develop his pieces to active squares and not worry too much about being a pawn down. White is the one who has to solve the problem of the h3−knight. **9...Bc5!** The most active square for the bishop and any eventual b2−b4 threats aren't too dangerous because Black happily plays ...Nb7 to redirect the knight.

[The point of the entire variation is that 9...Bxh3 10.gxh3 is nothing to worry about as White. He has the bishop−pair and Black isn't going to mate White anytime soon. I do think that this is quite playable for Black as well, but why trade a living bishop for a dead knight?]

[I used to think 9...g5 was the key move for Black and it was employed by an extremely young Magnus Carlsen. However, it looks like White can play 10.Nc3 Bg7 11.d3 Qb6 12.Ng1! , as in B.Socko−E.Bacrot, Antwerp 2009. White has the better position. The knight is redirected to f3, the bishop on g7 isn't ideally placed, and Bacrot's g4 was simply met with 13.h3! .]

10.d3

[10.0−0 doesn't change anything because White has to play d2−d3 to develop anyway. After 0−0 11.d3 we have transposed to the game.]

10...0−0 11.0−0 This natural move gives Black an additional option.

[I would prefer the far less popular 11.Nc3! , developing my pieces before castling. This is where Black needs to be patient and simply put his pieces on natural squares. With the knight on h3, Black will always have compensation. With Nb7! the worst placed piece is improved, while Black maintains flexibility with his other pieces. One typical variation goes 12.Bf3 Qc7 13.0−0 *(13.Ng1* is still met with *Qb6!)* 13...Nd6 . Although White has somewhat managed to develop, the knight on h3 remains stuck. He should perhaps try to get it out with White should perhaps try to get it out with 14.Kh1 , but this looks very artificial and Black gets a very good position after, say, Re8 15.Ng1 e4! .]

[Note too that compared to the 9...g5 line, 11.Ng1? doesn't work because of Qb6 when White doesn't have the resources to defend f2.]

11...Bxh3!? Taking advantage of White's early castling.

[For those of you who only want a simple solution (there's nothing wrong with that!), we can, of course, go 11...Nb7! with a similar position to the one we looked at after 11 Nc3. Black follows up with ...Nd6 and ...Re8 (and

...Qc7 if necessary to protect c6). This would probably be my preferred set−up and has been heavily analysed by Bologan. However, I don't think Black needs to know much more than this desired set−up, other than the possible ...e5−e4 break.]

12.gxh3 Qd7 Black eyes the damaged pawn structure on the kingside. **13.Bg4**

[Protecting h3 with 13.Kg2 is one way to go, but it feels like Black gets fantastic compensation with Nb7 followed by either ...Nd6 or ...Nd5 and ...f5.]

[I think White's best bet might be the slightly strange looking 13.Bf3! when Qxh3 14.Bg2 is quite disturbing for Black. The kingside isn't nearly as weak as it seemed to be and White has the bishop−pair. Still, Black's activity should be enough to keep the balance after Qe6 .]

13...Nxg4 14.hxg4

[14.Qxg4 is probably more challenging, but with f5! Black includes his rook in the attack on the kingside. After, for instance, 15.Qg2 Rf6 16.Kh1 Nb7 17.Nc3 Nd6 Black has fair chances, with good positional compensation and certain prospects on the kingside.]

14...f5! A double−edged move, but Black needs to create some counterplay against the white kingside. The downside is that the e4−square is weakened, and this would be a great square for a white knight. **15.Nd2**

[If White plays 15.gxf5 , Black could try Qxf5 16.Qe2 e4!? with the idea of 17.dxe4 Qg6+ 18.Kh1 Rxf2! 19.Rxf2 Bxf2 20.Qxf2 Qxe4+ and Black has a draw by perpetual check.]

15...fxg4

[I like the move 15...e4 , to avoid having to fight against a strong white knight on e4. The point is that 16.dxe4 *(* here White should try *16.gxf5* when *exd3 17.Ne4 Qxf5 18.cxd3 Bd4* is about equal *)* 16...fxg4! is a much better version for Black. The pressure down the f−file is daunting.]

16.Qe2 Rae8 17.Ne4 Nb7!

Black should aim to redirect his knight towards the centre. **18.Be3 Bd4 19.c3 Bb6 20.a4 Rf3 21.b4**

[White could have tried the surprising 21.Bxh6 , but it looks like Black keeps the balance after Qxd3 *(* the point is, of course, that *21...gxh6? 22.Qxf3! gxf3 23.Nf6+* wins material for White *)* 22.Qxd3 Rxd3 23.Bg5 Nc5 .]

21...Nd6 22.Bxb6 axb6 23.a5 bxa5 24.bxa5 Nxe4

[I would prefer the more chaotic 24...Nf5!? when the knight reaches h4 and various tactical motifs appear.]

25.Qxe4 . Here the players agreed to a draw, which seems to be the most likely outcome, but in a practical game Black is the one who might come under pressure.

11: French Team Championship 2007
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1 d6 7.a4 Kh8 8.a5 a6
[Some sources recommend 8...Rb8 instead, but I don't like this because after 9.c3 Ng8 10.d4 f5 11.d5! the knight can't retreat to b8.]
9.c3 Ng8 10.d4
[10.Qb3!? tries to nail Black's bishop to c8 where it has to protect b7, but it doesn't stop Black from playing with his other pieces. Indeed, Black can break out with f5 11.exf5 Rxf5! . The top game V.Tkachiev−L. Fressinet, Cap d' Agde (rapid) 2002, continued 12.Nbd2 Nf6 13.Be6 *(* Houdini recommends the strange *13.Qd1* , to give the c4−bishop a retreat square, but it's hard to believe Black would be worse after *d5 14.Bb3 Bc5 15.Bc2 Ba7 16.h3 Ng8!)* 13...Bxe6 14.Qxe6 Qd7 15.Qxd7 Nxd7 when it's clear that Black has no problems at all.]
10...f5 11.dxe5 fxe4 12.Rxe4 Rxf3! 13.gxf3 Bf5! This time, we will insert ... Bf5.
[The problem behind 13...Nxe5 is that after 14.Bf4! Nxc4 15.Rxc4 Nf6 16.Nd2 c5 Black isn't really threatening to trap White's rook on c4 because there's a square for it on a4.]
14.Re1
[Alternatively: 14.Rf4 hasn't been tried yet, probably because Black

equalizes on the spot with dxe5! 15.Qxd8 Rxd8 16.Rxf5 Rd1+ when the bind on the first rank is annoying and the f5−rook isn't well placed either.]

[14.e6 was dealt with efficiently in the all−GM encounter K.Maslak−J. Radulski, Olomouc 2005: Qe8! 15.Kh1 Qg6 16.Nd2 Bxe4 *(16...Ne5!?)* 17.fxe4 Rf8 with a very pleasant position for Black. Radulski went on to score a nice win.]

14...Nxe5 15.Be2 A comfortable, but slightly passive set−up.

[Instead, 15.Na3 doesn't waste any time, but Black can sooner or later pick up the bishop−pair which should give him lasting compensation: Qe8 16.Bf4 Qg6+ 17.Bg3 h5! 18.Kh1 . Now Nxc4! 19.Nxc4 h4 20.Bf4 Rf8 produces a very dangerous attack.]

15...Qe8 16.Kh1

[White's usual try for an advantage is 16.Bf4 Qg6+ 17.Bg3 Rf8 However, Black seems to obtain good compensation by picking up the bishop−pair:

A) 18.f4 Nd3! 19.Bxd3 Bxd3 is fine for Black.;

B) 18.Qd5 h5! 19.Kh1 Nd3 and White has to give up the bishop−pair.;

C) 18.Na3!? h5 19.Kh1 Nd3! and White should again give up the bishop−pair because 20.Rg1 Qh7 21.h4 g5! is very dangerous for him. *(21...−−)*;

D) 18.−−]

16...Nf6 17.Be3

[17.Bf4 would now allow Nh5! with good positional compensation.]

17...c6?!

[Not the best and I much prefer 17...Bd7 . Black brings the bishop to a dangerous diagonal.]

18.Rg1 Qf7 19.Nd2 d5 20.Nf1 Rf8 21.Ng3 Bc8 Even if White has consolidated his position and Black has played the inaccurate 17...c6, it's still difficult for White to make progress.

22.Bd4 Bd6 23.b4 Ng6 24.Qd2 Nf4 25.Rae1 Nh3 26.Rg2 Nf4 27.Rgg1 Nh3 28.Rg2 Nf4

12.Ng3 h6 Very committal as Black has lost the option of castling queenside. In other words he is rather forced to sacrifice the exchange on c3, or at least that is what I thought! Black's other options include:
[12...Be6]
13.Nh4 Whether this helps White or not is the question. In one sense Black becomes slightly more cramped with his rook on f8, but the white queen may also become a target on g7. As Tarrasch once said, 'the threat is stronger than the execution', so maybe White should keep Qg7 as an option. **13...Kh7**
[13...Be6 14.Ngf5 22...Qxb3+ was the threat. Qd7 15.Qf3]
14.Nhf5 Qe8?! A bit slow and Black really needed to take some action. Thus we should consider:
[14...Qd8! White aims to open up Black's king.]
15.Qf3?! Ng8 16.Nxg7?! This move comes rather late now. **16...Kxg7**
17.Nh5+
[17.Nh5+! Yes, yes, yes! Kg6 *(17...Kh8 18.Qg3)* 18.Qg3+

Black has a big advantage, but that quickly changes! Kxh5 19.Bd1+?]

Correspondence 1989

[Ripperger]

1.e4 e5 2.Nf3 Nc6 3.d4 exd4 4.Bc4 Bc5 5.c3 Nf6 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 h6 14.Qe2 hxg5 15.Re1 Be6 16.dxe6 f6 17.Re3 We have now reached a key position, in which Black has three almost equally valid

continuations at his disposal, which however are very different in so far as the strategy to be followed is concerned. Wir haben nun eine wichtige Schlüsselposition erreicht, in der Schwarz drei fast gleichwertige Fortsetzungen zur Verfügung stehen, die sich jedoch durch die sich anschließende Strategie deutlich unterscheiden. **17...d5** This attack on the bishop wins Black a tempo and clears the d6 square for the queen. Schwarz gewinnt mit diesem Angriff auf den Läufer ein Tempo und räumt das Feld d6 für die Dame.

[17...Kf8 prepares to defend th kingside with the king itself. sieht die Verteidigung des Königsflügels mit Hilfe des Königs vor.]

[By Mit 17...c6 Black opens the d8−h5 diagonal but does not commit himself to where he will finally post his king. öffnet Schwarz die Diagonale d8−h5, lässt aber die endgültige Postierung des Königs noch offen.]

18.Rh3 Rxh3 19.gxh3 g6 20.Qf3 Qd6! This is the theoretical innovation in this game. Das ist die theoretische Neuerung dieser Partie.

[20...f5? 1−0 Szecsi,P−Tasnadi Fernpartie 1987 will be examined in the game Szecsi−Tasnadi. beleuchten wir in der Partie Szecsi−Tasnadi.]

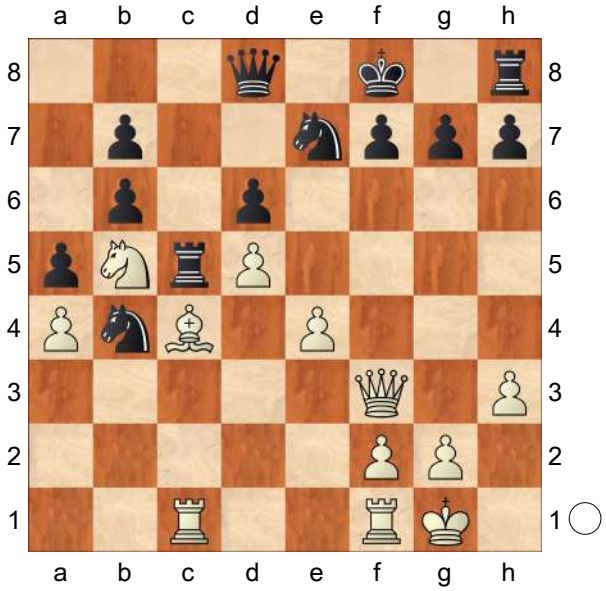
□ **Saint Petersburg**
■ **London,British Chess Club**
intercity telegraph 1886−7 (1) 1886
[International Chess Magazine 1888:4; Fine]

The London−St Petersburg telegraph correspondence match was played 1886−87. Chigorin was captain of the St Petersburg team and Henry Bird was captain for London. Later Chigorin was also involved in telegraph matches against Paris (1894−5) and Vienna (1897−8). **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Bc5 6.0−0 d6 7.d4 exd4 8.cxd4 Bb6 9.Nc3 Bg4**
[9...Na5 was becoming more usual around this time.]
10.Bb5 Kf8 11.Be3 Nge7 12.a4

Chigorin won two OTB games against Gunsberg from this position in later years (5th match game 1890 and Hastings 1895). **12...a5 13.Bc4 Qc8 14.Rc1 Nb4 15.d5 Qd8?! 16.Bxb6 cxb6 17.h3 Bxf3 18.Qxf3 Rc8 19.Nb5 Rc5** Diagram



20.e5!→ Nc8

[20...Nbxd5 21.Bxd5 Rxd5 22.Nxd6 f6 23.Nxb7 Qd7 24.exf6 gxf6 25.Qxf6+ Kg8 26.Rfe1 Ng6 27.Rc7+−]

[20...dxe5 21.d6 Ned5 22.Bxd5 Rxd5 23.Rc7 Qe8 24.Rfc1+−]

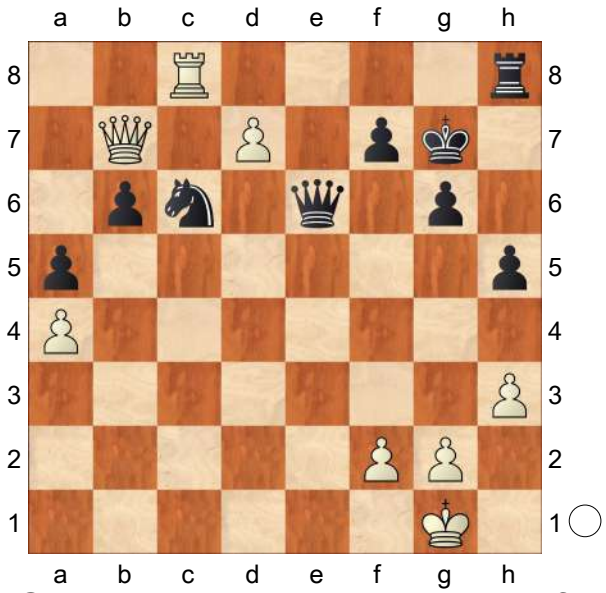
21.Rfe1! h5 22.exd6 Nxd6 23.Nxd6 Qxd6 24.Re6 Qd7 25.d6 Rxc4

Black had probably been relying on this resource (and its main point at the note to move 30). **26.Rxc4 Qxe6 27.Qxb7 g6 28.Rc8+ Kg7 29.d7 Nc6** Diagram

(Diagram)

30.Qxc6!

[30.Rxc6? Qe1+ 31.Kh2 Qxf2 32.Qc7 Rd8 stops the white pawn, because if 33.Qxd8 Qf4+ Black draws by perpetual check]



30...Qxc6 31.Rxc6 Rd8 32.Rd6 Kf8 33.Kf1 Ke7 34.Rxb6 Rxd7 35.Rb5 Ra7 36.g4 hxg4 37.hxg4 f6 38.Kg2 Ra6 39.Kg3 Ra7 40.Kf4 Ra6 41.f3

At this point, London (who had lost the other game) gave up the match 1.5−0.5 but in Chigorin's opinion, White must have won had the game been played out to a finish. Original notes were in Steinitz's International Chess magazine 1888:4 (pp45−46), reproduced in vol.2 of Prof Carlo Pagni's "Correspondence Chess Matches Between Clubs".

[RR41.f3 Reuben Fine analysed this position in his 'Basic Chess Endings' #406 pp.395−7 and concluded that Chigorin's assessment was over−optimistic. Fine wrote that passive play loses but counter−attack could draw: Rc6! 42.Rxa5 Rc4+ 43.Ke3 *(43.Kg3 g5 44.Ra7+ Ke6 45.a5 Rc2 46.a6 Ra2 47.Ra8 Kf7!=)* 43...Rc3+ 44.Ke4 Rc4+ 45.Kd5 Rf4 46.Kc6 *(46.Ra7+ Kd8!)* 46...Rxf3 47.Rc5 f5! 48.gxf5 *(48.g5 f4 49.a5 Rf1 50.a6 f3 51.a7 Ra1 Δ52.Kb7? f2)* 48...Rxf5! This is now a six−man ending so Fine's remaining analysis

can be tested by tablebase. 49.Rc2 *(49.Rxf5 gxf5 50.a5 f4* and both queen *)* 49...g5 (All moves except the suicidal ...Rc5+ draw.) 50.Kb6 *(50.Ra2 Kf7 51.a5 Kg6 52.a6 Rf6+* (Only move − TH) and the White King must retreat *)* 50...Rf6+ 51.Kb7 *(51.Rc6? Rxc6+ 52.Kxc6 g4* and Black wins *)* 51...Rf5 52.Ra2 Kf6 53.a5 Kg6 54.a6 Rf7+ (Only move) 55.Kc6 Rf6+ 56.Kc5 Rf5+ 57.Kd4 Rf4+ 58.Ke3 Rf8 (Only move) 59.a7 Ra8 Fine now stated: "20 K−B4 K−B3 etc, =" but White's 20th is illegal.]

□ **J.Nun**
■ **J.Spesny**
Czech League 1998
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5
[Note: the actual move order of this game was 3...Nf6 4.d3 Bc5 5.0−0 d6 6.c3 0−0 7.b4 Bb6 8.a4 a6 9.Bg5 Qe7 10.Nbd2 .]
4.c3
[It will be interesting to see how the relatively fresh line with 4 c3 Nf6 5 d3 0−0 6 0−0 d5!? progresses (see the notes to White's 6th move, below). If White wants to prevent or discourage ...d5 and is happy to play the Classical Main Line with 0−0, he could try the move order 4.d3 Nf6 5.0−0 0−0 6.Re1 *(*or *6.h3* , intending *d5 7.exd5 Nxd5 8.Re1* transposing to Emms−Wittman,*;* or finally *6.Bb3!?* as suggested by Kindermann. *)*]
4...Nf6 5.d3 0−0!? Black castles even more quickly than in the previous game. If White reacts slowly, Black's intention is almost certainly to play ...d5 here.
[Can Black play ...d5 even sooner? The answer is no. 5 d3 actually sets a little trap, which has caught out a fair number of players. The immediate 5...d5? is a serious error which can be punished by 6.exd5 Nxd5 7.Qb3! .

A) The threat to capture on d5 is a surprisingly awkward one for Black to meet, given that 7...Na5? runs into 8.Qb5+ .;
B) If Black plays 7...Be6 , White can safely grab the pawn with 8.Qxb7 . Black still has problems with his c5−bishop and if Nde7 *(8...Nce7;* and *8...Na5* both lose to *9.Qb5+)* there follows 9.Qb5 Bxc4 10.Qxc4 and White is simply a pawn up for nothing.;
C) 7...−−]

6.b4!? This move isn't an attempt to win a pawn with b5. Instead the idea is to force Black's bishop to make a decision and to gain some space on the queenside. The b2−b4 advance nearly always makes more sense if Black hasn't yet played ...a6 allowing the bishop to drop back to a7 in one go. One thing White has to bear in mind when advancing with b4 and a4 is that queenside castling becomes less desirable, so White usually ends up castling short.

[If 6.Bg5 Black should play h6 7.Bh4 Be7! . Compare the note on 7 Bg5 in the previous game.]

[6.Nbd2 is a decent alternative, planning to meet d5 with 7.exd5 Nxd5 8.Ne4 *(* or *8.0−0 Bg4 9.Ne4)* 8...Bb6 9.0−0 - compare Oratovsky−Gozzoli.]

[The most common choice for White here is actually 6.0−0 , indicating a desire to play the Classical Main Line seen in Chapter Three (for example, after 6...d6 7 Bb3 a6). But what happens if Black insists upon d5 here? You would assume that it would be somewhat risky, given that White hasn't spent any time on Bb3 or h2−h3, but that doesn't seem to be the case and it's noticeable that some very strong players have tried this recently. It's early days, but I think a critical line is 7.exd5 Nxd5

A) 8.b4 Be7 transposes to 6...Be7 in the next note, *(* while if *8...Bb6?* White can play *9.Bxd5 Qxd5 10.c4* and 11 c5 trapping the bishop *)*;
B) 8.Re1 Bg4 9.h3 Bh5 10.Nbd2 *(10.g4 Bg6 11.Nxe5 Nxe5 12.Rxe5 c6* is playable, but it does give Black considerable compensation for the pawn *)* 10...Nb6! *(10...Nf4?! 11.Ne4! Be7 12.Ng3* is good for White *)* 11.b4!? *(11.Bb5 Bd6* has proved to be acceptable for Black: for example, *12.Ne4 f5 13.Ng3 Bxf3 14.Qxf3 Qd7* , Ni Hua−P.Harikrishna, Reggio Emilia 2007 *)* 11...Bd6 *(11...Nxc4? 12.Nxc4* leaves e5−hanging *)* 12.Bb3 Kh8 13.Ne4 f6 14.a4 and White is slightly the more active, D.Vocaturo−M.Godena, Sarre 2009.]

6...Bb6

[This is the most natural retreat, and also by far the most popular, but 6...Be7!? isn't silly.

A) White should avoid the greedy 7.b5?! Na5 8.Nxe5 , as Nxc4! 9.Nxc4 d5 10.Ncd2 *(* or *10.exd5 Qxd5* hitting g2 and b5 *)* 10...dxe4 11.Nxe4 a6 12.bxa6 Rxa6 , as played in S.Vysochin−M. Godena, Internet 2008, gives Black excellent compensation.;
B) After the wiser 7.0−0 d5!? 8.exd5 Nxd5 , the idea is that White's weaknesses on the

queenside created by the b−pawn's advance compensate Black for the problems he experiences defending e5. The critical line seems to be 9.b5 Na5 10.Bxd5! *(*rather than *10.Nxe5 Bf6* , again with good compensation for Black *)* 10...Qxd5 11.c4 . For example, Qd8 *(*or *11...Qe6 12.Re1 f6 13.Bd2 b6 14.Bxa5 bxa5 15.Nd4!? Qd7 16.Nc6 a6* with an unclear position, S.Tiviakov−L.Babujian, Mashhad 2010 *)* 12.Bd2! *(12.Bb2 e4!)* 12...b6 13.Nxe5 Bf6 14.Bxa5 bxa5 15.d4 Bxe5 16.dxe5 Be6 17.Na3 and White was better in W. Spoelman−I.Kurnosov, Budva 2009. This line could certainly do with further tests.;

C) 7.−−]

7.a4 a6

[If 7...a5 , White can safely grab the e5−pawn: 8.b5 Ne7 9.Nxe5! d5 10.exd5 Ng6 11.Nxg6 Re8+ 12.Kf1 hxg6 13.Bg5 Qd6 14.Bxf6 Qxf6 15.d4 Re4 16.Nd2 Rf4 17.f3 with some advantage for White, A. Galliamova−E.Vasiukov, Moscow 1989. True, White's king isn't ideally placed, but Black's dark−squared bishop is shut out and two extra pawns have to be worth something.]

8.Bg5 Now that Black can no longer unpin with ...Be7, this move becomes much more desirable.

[A typical continuation after 8.0−0 is d6 *(*or *8...d5 9.exd5 Nxd5 10.Qb3 Nf6 11.Ng5 Qe8* , B.Gelfand−A. Shirov, Munich 1993, and here Gelfand suggests *12.Be3* with an edge for White *)* 9.Nbd2 Ne7 10.Bb3 (intending Nc4 to hit the b6−bishop) Ng6 11.Nc4 Ba7 12.Be3 Be6 13.Bxa7 Rxa7 14.Re1 Ra8 with a roughly level position.]

8...d6 9.Nbd2 Qe7 Planning to deal with the pin by playing ...Nd8−e6. Black does something similar in a main line of the Four Knights Game. There it even has a name, 'the Metger unpin'.

[If 9...h6 10.Bh4 g5 then 11.Bg3 is of course okay, *(*but *11.Nxg5!? hxg5 12.Bxg5* would be hugely tempting (compare Emms−Flear). *)*]

10.0−0!

[White is wise to castle kingside here, especially with the queenside pawns well advanced. Moreover, if White doesn't play 10.Nf1 , there's no chance of falling for a very nice trick. I was considering the variation h6 11.Bh4 g5 *(11...Be6* , planning an exchange of bishops followed by ... Qe6, looks fine for Black *)* 12.Nxg5? hxg5 13.Bxg5 which at first seemed fairly promising for White. It would be, but for Nxe4!! 14.Bxe7 Bxf2+ 15.Ke2 Bg4# , which is mate for Black! Please watch out for this one!]

10...Nd8

[10...h6 11.Bh4 and only now Nd8 avoids Nh4 and forces White to find another plan. On the other hand, ... Ne6 no longer comes with tempo. In L. Yudasin−R.Hess, New York 2004, White sensibly chose to start action in the centre: 12.a5 Ba7 13.d4 (now ...Ne6 would drop the e−pawn) exd4 14.Nxd4 *(14.cxd4* is also interesting, intending *Nc6 15.e5 dxe5 16.dxe5 Nxe5 17.Re1 Nxf3+ 18.Qxf3* with play for the pawn *)* 14...Nc6 15.Nf5!? *(*I prefer White's position after

15.Nxc6 bxc6 16.Qf3 - a6 is a constant worry for Black *)* 15...Bxf5 16.exf5 Rfe8 17.Qc2 Rad8 18.b5!? d5? *(*I'm not sure why Black avoided the straightforward *18...Ne5!)* 19.bxc6 dxc4 20.cxb7 Qe2 21.Ra2 Qd3 22.Nf3 and White had a clear plus.]

11.Nh4!

[The right idea, interfering with Black's unpinning plan. Flicking in 11.a5 Ba7 before playing 12.Nh4 is also good.]

[Any quiet move, like 11.Re1 , allows Ne6 and after 12.Bh4 Black could even just play h6 followed by ...Nf4−g6 to finally break the pin.]

[11.d4 Ne6 would also be fine for Black.]

11...Ne6 12.Nf5 Qd8 13.Bh4 Nf4

[Moving this knight to g6 is the right plan, but Black could consider 13...a5 14.b5 and only then Nf4 . Judging by what happens later, this insertion of pawns moves which gives Black more control of c5 might be a good idea.]

14.Ne3! Heading for d5. **14...Ng6 15.Bg5 h6 16.Bxf6 Qxf6 17.Nd5 Qd8 18.Nxb6 cxb6 19.g3!** Restricting the knight on g6. **19...Bh3 20.Re1** Initially I had no idea why White induced ...h6 instead of just playing 15 Bxf6, but maybe it's because Black now has to watch out for Qh5 ideas attacking g6 and h3. **20...Be6 21.Qb3 Bxc4 22.Nxc4 d5 23.Ne3 dxe4 24.dxe4** I didn't like Black's plan of exchanging bishops (20... Qg5 looked less accommodating) and White enjoys a significant advantage now. His structure is healthier and his knight eyeing outposts on f5 and d5, is clearly stronger than its counterpart. **24...Rc8 25.Rad1 Qe7 26.Rd3 Rfd8 27.Red1 Rxd3 28.Rxd3 Rd8 29.Nd5 Qe6 30.Qd1 Kh8 31.b5 axb5 32.axb5 Rd6 33.c4 Nf8? 34.Qa1! Nd7 35.Ra3?**

[Missing a big chance: 35.Qa8+! Kh7 36.Qd8! threatens a devastating 37 Ne7. Black is forced to play Nc5 , but then 37.Nf6+ Qxf6 38.Rxd6 wins the exchange.]

35...Nc5 36.f3 Kh7 37.Ra8 f5! Now Black is right back in the game. **38.exf5 Qxf5 39.Ra3 Qc2 40.Rc3 Qe2 41.Qf1 Qd2 42.Qc1 Qxc1+ 43.Rxc1 e4 44.fxe4**

European Championship, Plovdiv 2008
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.0−0 d6 8.Re1
[Note that with the move order 8.Nbd2 0−0 9.h3 Be6 , 10.Bc2 d5 11.exd5 is less effective since it can be met simply by Bxd5 - another reason for choosing 8 Re1 over 8 Nbd2.]
8...0−0 9.h3 Be6 10.Bc2 d5 11.exd5!
[This move is much stronger than 11.Nbd2?! .]
11...Qxd5 The queen recapture has been Black's usual choice, and it's the only way to defend e5 directly.
[The ideal way to recapture on d5 would be with the bishop, but this leaves the e5−pawn en prise and White should certainly accept the Marshall Gambit style offer: 11...Bxd5 12.Nxe5 Nxe5 13.Rxe5 Qd6 14.d4 *(*watch out for *14.Re1?? Qg3!)* 14...c5 was A.Delchev−A.Stefanova, Benidorm 2005. In the game
A) 15.Bg5! looks stronger to me, and I think Black is struggling to prove equality after Rad8 *(*or *15...cxd4 16.Bxf6)* 16.Qd3 g6 17.Nd2 cxd4 18.cxd4;
B) 15.Be3 Qc6 16.Rf5 g6 17.Rg5 Rad8 left Black with good compensation, especially in view of White's awkwardly placed rook.]
[I can find only one game with 11...Nxd5 , but this move can't be ruled out. For example, 12.Nbd2 *(*if *12.Nxe5?! Nxe5 13.Rxe5* , Black once again has the trick *Bxf2+!)* 12...Nf4 *(*if *12...f6* , White plays *13.d4* intending either dxe5 or c4 followed by d5 *)* 13.Nf1 *(*or *13.Ne4!? Ng6 14.Nfg5 Bd5 15.Qh5 h6 16.Nf3)* 13...Ng6 14.Ng5 Bd7 *(14...Bd5!?)* 15.d4! Qf6 *(15...exd4* is met by *16.Qh5 h6 17.Nxf7)* 16.Ne4 Qe7 17.d5 Nd8 (A.Shlakich−V.Frolochkin, St Petersburg 2007) and now 18.Be3 with some advantage for White.]
12.Bg5! This is a key move. Black probably doesn't want to give White the opportunity to play Bxf6, and ...Nd7 is the natural retreat. But this leaves the queen on d5 somewhat awkwardly placed, and to have any chance of gaining an advantage White must try to exploit this to the maximum. **12...Nd7**
[12...Qc5!? looks strange, and 13.Qe2 *(13.Bh4!?* is an interesting

alternative *)* 13...Nd7 seems to invite 14.Nbd2 followed by Ne4 gaining more time. However, Black has the resource Nd4! 15.cxd4 Qxc2 , as played in A.Brkic−M.Pap, Bosnjaci 2009. This isn't entirely clear, but White should probably choose either 16.dxe5 *(*or *16.Be7!? Rfe8 17.Ba3 exd4 18.Rac1 Qa4 19.Rxc7)* 16...Nc5 17.Rac1 Qxd3 18.Be3 .]

13.Nbd2 Rfe8 Could this logical move actually be a mistake? Let's explore the alternatives:

[a) 13...Rae8 helps Black in some lines if White plays 14 Ne4, because with the other rook on f8 Black is better placed for ...f5. However, in A. Delchev−M.Kazhgaleyev, Gonfreville 2006, White began harassing the black queen to good effect: 14.c4! Qc5 *(*or *14...Qa5 15.a3* intending b4 *)* 15.Ne4 Qb6 16.Ba4 Nd4 17.Nxd4 exd4 , and here 18.c5! obliged Black to give up the exchange with Nxc5 , *(*since *18...Qxb2 19.Re2! Qb4 20.a3 Qa5 21.Bd2* traps the black queen. *)*]

[b) The tempting 13...f6 is answered convincingly by 14.d4! . White has every chance of gaining an advantage here. For example, Bf7 *(*or *14...fxg5 15.Bb3 Qd6 16.Ne4 Qe7 17.d5)* 15.Be3 exd4 16.cxd4 Rad8 17.Be4 Qd6 18.Qc2! Nxd4 19.Bxd4 Bxd4 20.Bxh7+ Kh8 21.Re4! was played in T.L.Petrosian−H.Melkumyan, Yerevan 2010. Here Black felt obliged to give up a piece for insufficient compensation after Bxf2+ *(*if Black plays *21...c5* instead, *22.Rh4* 24 gives White a promising attack; he is already threatening mate with 23 Bg8+ Kxg8 24 Qh7 gives White a promising attack; he is already threatening mate with 23 Bg8+ Kxg8 Qh7 *)* 22.Kxf2 Qb6+ 23.Re3 Rfe8 24.Rae1 .]

[c) 13...h6 has been played by Nigel Short. It's a move Black would like to play and it might even be his best option. Where should White retreat his bishop?

A) If 14.Bh4 , Black can claim he has gained something because the bishop can no longer come back down the c1−h6 diagonal to annoy the black queen in certain lines.;

B) 14.Be3 is a decent response, and Bxe3 15.fxe3!? Qd6 16.d4 f5 17.Bb3 Kh8 was roughly equal in Z. Efimenko−N.Short, Kemer 2007.;

C) After studying this position for quite some time, I realized that there was a third option; White doesn't have to move the bishop at all: 14.Ne4!? is a very interesting possibility for White here. If Black takes the bishop it looks to me like White gets a fierce attack in return. Here's just a sample of the many possible lines: hxg5 15.Bb3 Qb5 16.Nfxg5 Bxb3 *(*or *16...Bf5 17.Bc4 Qxb2 18.Qh5 Nd8 19.Rab1 Qc2 20.Nxf7)* 17.Qh5! Rfe8 18.axb3 Nd8 *(18...Qxb3?* is met by *19.Ra3 Qd5 20.c4)* 19.Qh7+ Kf8 20.Ng3 Nf6 21.Qh8+ Ke7 22.Qxg7 and the attack is still burning strongly. It's still early days in the development of this line. With accurate play Black might well be okay, but it does seem easy to go wrong. Initially Short's 12...h6

looked like the most reliable move to me, but I can no longer say this with any certainty in view of 14 Ne4!?. and the attack is still burning strongly. It's still early days in the development of this line. With accurate play Black might well be okay, but it does seem easy to go wrong. Initially Short's 12...h6 looked like the most reliable move to me, but I can no longer say this with any certainty in view of 14 Ne4!?.;

D) 14.−−]

14.Ne4! Black definitely has some problems to solve here, the main one being to find a stable square for his under pressure queen.

[Black has fewer concerns after 14.Be3 Bxe3 15.Rxe3 h6 , as played in Z.Almasi−L.Aronian, European Team Ch., Heraklion 2007.]

[It's also worth noting that 14.c4 is less effective here, since Black has Qd6 intending 15.Ne4 Qf8! .]

14...Nc5 Desperately trying to ease congestion by exchanging a pair of knights, but White is having none of it. Predojevic's analysis in 'Chess Informant 102', given below, suggests that there is no easy way out for Black, but he can minimize White's advantage: Desperately trying to ease congestion by exchanging a pair of knights, but White is having none of it. Predojevic's analysis in 'Chess Informant 102', given below, suggests that there is no easy way out for Black, but he can minimize White's advantage:

[a) 14...f5?! 15.Bb3 Qb5 16.Bxe6+ Rxe6 17.a4 Qd5 *(*or *17...Qxb2 18.Re2 Qb6 19.Be3 Nd4 20.cxd4 fxe4 21.dxe4 exd4 22.Bxd4)* 18.c4 Qa5 19.Bd2 Qb6 20.a5 Qxb2 21.Bc3 Bxf2+ 22.Kf1 Qxa1 23.Bxa1 Bxe1 24.Neg5 Re7 25.Nxe1 Nxa5 26.Nc2 with a clear advantage for White.]

[b) 14...Nf8! 15.Qe2 h6 16.Be3 Ng6 17.Bxa7 Rxa7 18.Qe3 b6 19.Bb3 Qd7 20.Ba4! Raa8 21.Rad1 with an edge for White. If f5? , 22.d4! is a strong reply: for example, b5 23.Nc5 Qf7 24.Nxe6 bxa4 25.d5 etc.]

15.Ng3! No trades! White is planning d4, or even b4 to force the knight back to d7.

15...h6 16.Be3 Nd7

[16...Rad8 looks more natural, but even here 17.d4 exd4 18.cxd4 Nb4 19.Bb1! *(19.dxc5 Qc4)* 19...Nd7 20.a3 Nc6 (Predojevic) 21.Ba2 followed by d5 looks very strong.]

17.Bxa7 Rxa7 18.d4! exd4 19.cxd4 This is an extremely favourable IQP position for White: Black's rooks are momentarily disconnected and his minor pieces could be in better positions. The immediate threat is 20 Bb3 followed by 21 d5, and in fact this isn't easy to meet.

19...Nf6 Covering the d5−square (and h7 after Qd3), but is it enough? **20.Bb3 Qa5 21.Bxe6?** Missing a huge opportunity.

[White can still play 21.d5! , and indeed Predojevic's analysis suggests that it leads to a decisive advantage: Rd8 *(*or *21...Nxd5 22.Bxd5 Rd8 23.Rxe6!)* 22.dxe6! Rxd1 23.exf7+ Kf8 24.Raxd1 Ra8 25.Nh4 Qg5 26.Ngf5 . It's difficult for Black to meet White's many ideas, including Rd3−g3.]

21...Rxe6 22.Rxe6 fxe6 23.a3 Qd5 24.Rc1 Ra8 White still has a small edge here, but Black is certainly over the worst and the game soon ends in a draw. **25.Ne2 Rd8 26.Qc2 Qe4 27.Qc4 Qd5 28.Qc2 Qe4 29.Qc4 Qd5 30.Qc3 Qd6 31.Qb3 Na5 32.Qc2 Nc6 33.Qb3 Na5 34.Qc2 Nc6 35.Nc3 Qf4 36.Ne2**

Let's consider yet another option. This time it's for White, if he has played 8 h3:
Let's consider yet another option. This time it's for White, if he has played 8 h3:
1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3 h6 9.Be3! If Black is going to play ...g5, then Be3 is a much better move than Re1. It was Tiviakov more than anybody who showed that the plan with Be3 is not a harmless one, although he

usually plays it a move earlier (see the next game). If Black is going to play ... g5, then Be3 is a much better move than Re1. It was Tiviakov more than anybody who showed that the plan with Be3 is not a harmless one, although he usually plays it a move earlier (see the next game). **9...Bxe3** This is certainly not a mistake, at least from an objective viewpoint. However, it does appear that the resulting positions with the semi−open f−file are easier for White to play than Black, something which is demonstrated to some extent in this game.

[The aggressive 9...g5!? remains a decent option, but White has less to fear here than with 9 Re1?! g5. For example, 10.Bxa7 Nxa7 (Black wants to keep the option of ... 0−0−0!) 11.d4 Qe7 12.Nbd2 g4 13.hxg4 Nxg4 *(* or *13...Bxg4 14.dxe5 dxe5 15.Nc4 Nc6 16.Ne3 Rg8 17.Re1 Rd8 18.Nd5 Nxd5 19.exd5 e4 20.Kf1!* with some advantage for White, D. Pavasovic−L.Fressinet, European Ch., Plovdiv 2008 *)* 14.Ba4+!? *(* I prefer this to *14.dxe5 dxe5 15.g3* , as played in I. Khamrakulov−F.Vallejo Pons, Pamplona 2007 *)* 14...b5 *(* if *14...Bd7* , White replies *15.Bxd7+ Qxd7 16.dxe5 dxe5 17.Nc4* and Nh4−f5 is the plan,*;* or *14...c6 15.dxe5 dxe5 16.Nc4!)* 15.Bb3 and White, having induced ...b5, will follow up with a4.]

[The safest option is 9...0−0 which transposes after 10.Nbd2 to Tiviakov−De Vreugt, note 'c' to Black's 9th move.]

10.fxe3 0−0 11.Nbd2 Be6

[The immediate 11...Ne7 is met by 12.Nh4! after which not only is 12... Ng6 impossible, but Black also has to be wary of exchange sacrifices on f6.]

[11...d5 also doesn't completely solve Black's problems, as typically this advance leaves White with a strong centre. For example, 12.exd5 Nxd5 13.Qe1! Nf6 14.d4 Re8 15.Qg3 Be6 *(15...exd4 16.exd4 Be6* is better *)* 16.Nxe5 Nxe5 17.dxe5 Nd7 18.Ne4 Kf8 19.Rad1 Bxb3 20.axb3 Qe7 21.e6 Qxe6 22.Qxc7 with a clear advantage for White, W.Schill−R. Rasmussen, Budapest 2004.]

12.Bc2 Ne7

[12...d5 looks more appealing here, and yet I still think White has a small edge after 13.exd5 Nxd5 14.Qe1 Re8 15.Qf2 planning d4.]

13.Nh4! This is a key move and almost an automatic response to ...Ne7.

13...Ne8 Anand begins to drift. In fact this and his following two moves make a very strange impression. Perhaps he was initially planning on the super−solid ...g6 and ...Ng7 but then decided against it.

[13...Ng6 looks more natural, against which White replies with 14.Nf5 . What is clear is that Black has no easy solution in his search for equality.]

14.d4 Bd7?! This definitely feels wrong.

[If 14...g6 there follows 15.Ndf3 f6 16.Bb3 *(* or *16.Nh2!?)* 16...Ng7 17.Bxe6+ Nxe6 18.Qb3 and Black is still under some pressure.]

[Perhaps he should try to create some action in the centre with 14...c5!? .]

15.Bb3! Why not? **15...Nf6**

[This allows a promising exchange sacrifice, but it's too late to go back

with 15...Be6? because of 16.Bxe6 fxe6 17.Rxf8+ Kxf8 18.Qb3 Qc8 19.dxe5 dxe5 20.Nc4 .]

16.Rxf6! I wouldn't have thought Radjabov spent too long on this move. It looks, and is, a very dangerous sacrifice.

16...gxf6 17.Qh5 Kg7 18.Rf1 Be6

[If 18...Ng6 there follows 19.Nf5+ Bxf5 20.exf5 Ne7 21.Ne4! Ng8 *(* or *21...d5 22.Nxf6!)* 22.Rf3 d5 23.Rg3+ Kh7 24.Qg4 and mate with Qg7.]

19.Rf3! c5

[Black needs to keep his bishop on e6 to provide at least some protection for his shaky light squares. After 19...Bxb3 20.Rg3+! *(20.axb3 Rh8!)* 20...Kh7 21.axb3 it's extremely difficult for Black to defend: exd4 *(* or *21...Qd7 22.Ndf3!* planning Nh2−g4 *)* 22.Rg4! dxe3 23.Nf5 Nxf5 24.Qxf5+ Kh8 25.Qh5 Kh7 26.Rh4 and White mates.]

20.Rg3+

[White could have kept some advantage with 20.Bxe6 fxe6 21.Qg4+ . Black has to allow Kh7 *(* since *21...Kf7? 22.d5! exd5 23.exd5* intending Ne4 is very strong *)* 22.Qxe6 .]

20...Kh7 21.Bxe6? Missing a great chance. Although 21 Bxe6 is undoubtedly tempting, it only leads to perpetual check.

[Radjabov could have played 21.Nf5! Nxf5 22.exf5 Bxb3 23.axb3 , which would have given him a very dangerous attack, and probably a winning one. For example, exd4 *(* or *23...Qe7 24.Rg4 Rg8 25.Rh4 Qf8 26.Ne4)* 24.Ne4! dxe3 25.Rg4! e2 26.Kf2! , and there is no good defence to the threat of Rh4.]

21...fxe6 22.Rg6 Nxg6 23.Qxg6+ Kh8 24.Qxh6+ Kg8 25.Qg6+

[The winning try for White is 25.Ng6 , threatening 26 Qh8+ Kf7 27 Qh7+ Ke8 28 Qg7!. The only defence for Black is Qd7! but it's good enough. A key point is that after 26.Qh8+ Kf7 27.Qh7+ Ke8 28.Nxf8 Qxh7 29.Nxh7 Ke7 , as indicated by Malcolm Pein in 'CHESS', White's knight on h7 is trapped.]

25...Kh8 26.Qh6+

□ **Tiviakov,S.**
■ **Pavasovic,D.**
European Championship 2008
[John Emms]

So far we have concentrated on Black's most popular choice, 7...Ba7, but in the next two games we consider 7...0−0 and 7...Bg4. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3**
[Incidentally, if you really want to warn someone about the dangers of combining Bg5 and 0−0 when Black hasn't castled, then the following, often quoted and quite beautiful line usually does the trick: 5.0−0 d6 6.Bg5?! h6 7.Bh4?! g5! 8.Bg3 h5!? *(8...Bg4* is a good alternative, with a safe edge for Black *)* 9.Nxg5 h4 10.Nxf7 hxg3!! 11.Nxd8 Bg4 12.Qd2 Nd4 13.Nc3 Nf3+! 14.gxf3 Bxf3 and, faced with an inevitable mate, White resigned in V.Knorre−M. Chigorin, St Petersburg 1874.]
5...d6 6.Bb3 a6 7.0−0 0−0
[Perhaps one the main reasons 7...Ba7 is played so often is because it really does discourage 8.Bg5?! . Given that Black has yet to commit his king, and furthermore White has committed his, Black shouldn't hesitate to advance on the kingside: h6! 9.Bh4?! *(* it's not too late for *9.Be3!)* 9...g5! 10.Bg3 *(* it's pretty obvious that the piece sacrifice *10.Nxg5? hxg5 11.Bxg5* shouldn't work, and *Rg8! 12.h4 Bg4* is a good reply *)* 10...Qe7 . Black will castle queenside, and the time gained attacking the white bishop with ...h6 and ...g5 will give him a vital

head start in the race of pawn storms. For example, 11.Nbd2 Bd7 12.d4 0−0−0 13.d5 Nb8 14.Ba4 Rdg8 15.Bxd7+ Nbxd7 16.Kh1 Nf8 17.Ng1 h5 18.f3 h4 19.Bf2 Bxf2 20.Rxf2 g4 and Black is the only one attacking, G.Carames−G.Flear, San Sebastian 1995. This is certainly a line that White needs to avoid.]

8.Bg5!? If Bg5 is a good idea when only Black has castled, and a bad idea when only White has castled, what about when both sides have castled? −− 'Doubled−edged' is probably an accurate assessment. Once the bishop is forced back to g3, White must work hard to avoid it being shut out of the game. On the other hand, Black's weaknesses on the kingside won't go away.

[If White wants to reach lines identical or similar to those we've already covered in this chapter, he can simply play 8.Re1 . Black will nearly always retreat prophylactically with . ..Ba7 to transpose directly, either here or a bit later. Occasionally, though, Black keeps his bishop on c5, and after a subsequent ...d5 there's the option of retreating it to f8 to cover the kingside. −−− Here are some possibilities: h6 9.Nbd2 Be6 *(*note that if *9...Ng4 10.Re2 Kh8* , *11.h3!* forces the ht back to f6 and thwarts Black's ...f5 plan − this is one drawback of ...h6 *)*

A) . Warning! White must avoid 10.Bc2? here, in view of the tactic Ng4! 11.Re2 Bxf2+! 12.Rxf2 Ne3 13.Qe2 Nxc2 14.Rb1 Bxa2 when 15.b3 Bxb1 16.Nxb1 N2b4 17.cxb4 Nxb4 favours Black.;

B) 10.h3 should be played. For example, Re8 11.Nh2 *(*or *11.Nf1 Bxb3 12.axb3 d5 13.Qe2 Bf8 14.Ng3 g6 15.b4 Qd7* with an equal position, M.Erdogdu−L.Aronian, Bursa 2010 *)* 11...d5 *(11...Bxb3 12.axb3 d5 13.b4 Bf8 14.Qf3 dxe4 15.dxe4 Qd7 16.Nc4 Rad8 17.Ng4 Nxg4 18.hxg4 Qe6 19.Ne3 Ne7 20.Qe2 c6 21.Nc4 Nc8 22.Be3 Nd6* also offers equal chances, A.Shchekachev−R. Kholmov, Omsk/Perm 1998 *)* 12.Qf3 Qd7 13.Ndf1 Kh7 14.Ng3 Rad8 15.Bc2 d4!? 16.c4!? and there's a tense battle in prospect, with White attacking the kingside and Black seeking action on the other wing. D. Lobzhanidze−D.Svetushkin, Dresden Olympiad 2008, continued b5 17.cxb5 Nb4 18.Bb1 axb5 19.a3 Na6 20.Nf5 Ng8 21.Ng4 f6 22.Ba2! (it's definitely worth getting rid of the Italian bishop here!) Bxa2 23.Rxa2 Qe6 24.Ra1 Bf8 25.Qg3 c5 26.a4 b4 27.Bd2 Ne7 28.f4! Nxf5 29.exf5 Qxf5 30.fxe5 h5? *(30...fxe5 31.Rf1 Qg6 32.Bxh6!* is unclear *)* 31.Rf1 Qg6 32.Rxf6 *(32.Nxf6+! gxf6 33.Qxg6+ Kxg6 34.Rxf6+* is good for White *)* 32...gxf6 33.Nxf6+ Kg7 34.Nxh5+ Kh7 35.Nf6+ Kg7 36.Nh5+ with a draw by perpetual check.;

C) 10.−− and now:]

[One further point worth mentioning here is that 8.Be3 , although still playable, lacks a bit of punch. Because Black has not yet played ... Ba7, Bxe3 9.fxe3 leaves him a tempo ahead of lines considered in the last two games.]

[If White is really keen to play the Be3 plan, 8.h3 intending to meet Ba7 with

9.Be3 is a wiser option.]

8...h6 9.Bh4 g5! At some point Black is going to have to take action against the pin, and now is as good a time as any.

[If Black delays ...g5 there might well be occasions where Nxg5 is a promising sacrifice. For example, 9...Be6 10.Nbd2 Re8 11.Kh1!? (A.Cherniaev−S.Haslinger, Hastings 2006/07) g5 12.Nxg5!? *(* moreover, if White chooses the safe *12.Bg3* , Black's ...Be6 and ...Re8 don't really fit in with the ...g5 plan *)* 12...hxg5 13.Bxg5 , intending f4.]

[Finally, if 9...Bg4 10.h3 Bh5 11.g4! Bg6 12.Nbd2 and Black has lost his chance to play ...g5 altogether.]

10.Bg3

[One strong reason not to delay ...g5 is that 10.Nxg5 fails here: hxg5 11.Bxg5 Kg7 12.Qf3 Rh8 intending 13.Qg3 Nh5! (Karpov).]

10...Bg4

[If Black could quickly reroute his c6−knight to g6 he really would be doing well (compare this with the next game, with colours reversed). Fortunately for White, 10...Ne7 can be met strongly by 11.d4! when the pressure on e5 brings the g3−bishop right back to life.]

[Something that Black must also avoid is 10...Nh5? , as the 11.Nxe5! trick works here: Nxg3 12.Nxc6 bxc6 13.hxg3 etc.]

[10...Ba7 11.Nbd2 Bg4 transposes to the note to Black's 11th move, below.]

11.Nbd2

[I wonder whether White should consider 11.h3!? here. After

A) if 11...Bd7!? , 12.d4 Ba7 13.Re1 *(* or *13.Qd3)*;

B) 11...Bh5 12.Nbd2 White adopts the same plan seen in the next note, with Nc4−e3. J.Nun−J.Franzen, Trnava 1985, continued Qd7 13.Nc4 Ba7 14.Qe2 Kg7 15.Ne3 Ne7 16.Rad1 Nh7? 17.d4! f5 18.Nxf5+ Nxf5 19.exf5 Rxf5 and here Rybka's suggestion of 20.dxe5 Rxf3 21.Kh2! looks very good for White, intending Rxg3 22.Qxh5 . Experience is scarce at the moment, but this looks like a line worth pursuing.]

11...Nh5!

[Early on there was a high−profile game, M.Chandler−A.Karpov, Bath 1983, after 11...Ba7

A) , which probably discouraged some players from using this line: 12.Kh1 Bh5! *(* White intended to meet *12...Nh5* with *13.h3! Nxg3+ 14.fxg3)* 13.Qe1 *(13.Nc4!)* 13...Kg7 14.Bd1 Bg6 15.Nc4 Re8 16.Bc2 Qd7 17.Qd2 Rad8 when Karpov had a rock−solid position and went on to win.;

B) . However, I don't see a reason for White to delay the Nc4−e3 plan seen in the previous note, and this presents Black with more of a challenge: 12.h3

B1) if 12...Bd7 White can play 13.Nc4 *(* or perhaps *13.Bh2* preventing *Nh5* in view of *14.Nxe5)* 13...Nh5 14.Bh2 Nf4 15.Ne3 with an unclear position;

B2) 12...Bh5 13.Nc4! Bg6 14.Ne3 Kg7 *(* I think Black should play *14...Nh5 15.Bh2 Nf4 16.Qd2 Kg7 17.Nd5* with unclear play *)* 15.Qd2 Ne7

16.h4! g4 17.Nh2 Qc8 18.Bd1 h5 19.Bc2 Nc6 20.Rae1! Qd7 21.Kh1 Kg8 22.f4! exf4 23.Rxf4 Bxe3 24.Qxe3 Qe7 25.Nf1 Nd8 26.Rf2 Re8 27.Qd2 Nd7 28.Ne3 Nb6 29.Nf5 Qf8 30.e5 d5 31.Ref1 Kh8 32.b3 with a dominating position for White, B.Philippeit−A.Beyer, correspondence 2004 (in fact, Black resigned here). Okay, Black's defence was far from perfect, but this Nc4−e3 plan does give him something to think about.;

C) 12.−−]

12.Kh1! Releasing the pin on the f−pawn so that White can play h3.

[White definitely should avoid 12.Nc4 Qf6! 13.Ne3 Bxf3 14.Qxf3 Qxf3 15.gxf3 , as played in A.Vajda−Z. Gyimesi, Nagykanizsa 2003. It's hard to see the bishop on g3 taking any further part in the game!]

12...Qf6 The most natural follow−up to 11...Nh5, but Black has other decent options here:

[12...Kg7 13.h3 Bd7 14.Nh2 Nxg3+ 15.fxg3 f5! (one of the points of 12...Kg7) 16.exf5 Bxf5 17.Ne4 Bb6 18.g4 Bxe4 19.dxe4 with an equal position, S.Tiviakov−E.Van den Doel, Wolvega 2008.]

[12...Ng7!? (providing light−squared cover on the kingside) 13.h3 Bh5 14.Bh2 Kh8 15.Nc4 Qf6 16.g4 Bg6 17.Ne3 Ne6 18.Nf5 Ba7 19.Qe2 with an almost symmetrical position, again roughly level, K.Shanava−G. Sargissian, European Championship, Dresden 2007.]

13.h3 Bd7 14.Nd4

[14.d4!? is critical but Black seems to be okay: exd4 *(14...Ba7? 15.Nxe5!)* 15.e5!? *(15.Nxd4 Nf4 16.Nxc6 Bxc6 17.Qf3* was agreed drawn in J. Nunn−J.Pinter, Helsinki 1983 *)* 15...Qg6! *(15...dxe5?! 16.Ne4 Qe7 17.Nfxg5 Nxg3+ 18.fxg3 hxg5 19.Qh5* wins for White − Nunn*;* or *15...Nxg3+ 16.fxg3 Qg6 17.cxd4 Nxd4 18.Nxd4 Bxd4 19.Rf6! Qg7 20.Qh5!)* 16.cxd4 Nxd4 17.Nxd4 Bxd4 and it's not clear whether White has enough play for his pawn investment, although this could do with a test.]

14...Nf4

[After 14...exd4 15.Qxh5 Black has some problems to solve, with f4 or e5/Ne4 ideas in the air.]

15.Nxc6 Bxc6 16.Nc4 d5! This seems to equalize. **17.Nxe5!? Qxe5 18.d4 Bxd4**

[18...Qxe4 19.f3 Qe7 20.Re1 Qd6 21.dxc5 Qxc5 22.Bxf4 gxf4 23.Qd3 is a risky pawn for Black to take.]

19.exd5 Bxd5 20.Bxf4 Qxf4 21.Bxd5 Be5

[Here the database gives 21...Qf5?? 22.g3?? , but 21...Be5 is a thousand times more likely!]

[Rogozenco,Dorian]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 A direct 5. ... 0−0 is more precise only if White plays the same plan he did in the game. In that case Black will play d7−d5, without losing time for d6. But after 5. ... 0−0 White has an additional possibility to play 6.Bg5. A direct 5. ... 0−0 is more precise only if White plays the same plan he did in the game. In that case Black will play d7−d5, without losing time for d6. But after 5. ... 0−0 White has an additional possibility to play 6.Bg5.

[5...0−0 6.Bg5 *(6.0−0 d5=)* 6...h6 7.Bh4 and the move g7−g5 is now bad because it weakens the position of the king. and the move g7−g5 is now bad because it weakens the position of the king.]

6.Nbd2

[6.Bg5 h6 7.Bh4 g5 8.Bg3 Bg4 favours Black. favours Black.]

6...0−0 Having analized their encounter from round 3, Lasker found a different way to combat White's opening plan. Having analized their encounter from round 3, Lasker found a different way to combat White's opening plan.

[6...a6 7.h3 Ba7 8.Bb3 Nd7 9.Nf1 Nc5 10.Bc2 d5 11.Qe2 d4 12.c4 f6∞ 0−1 Chigorin,M−Lasker,E/St Petersburg 1895 (47) 0−1 Chigorin,M−Lasker,E/St Petersburg 1895 (47)]

7.Nf1 Too direct. Nowardays this is a common plan − to play Nf1−g3 before castling, but here Black can open the center. Too direct. Nowardays this is a common plan − to play Nf1−g3 before castling, but here Black can open the center.

[7.Bb3 More flexible. White keeps the possibility of Nf1−g3 or Nc4 and also after Black's d6−d5 White will not be forced to take on d5, what happened in the game. More flexible. White keeps the possibility of Nf1−g3 or Nc4 and also after Black's d6−d5 White will not be forced to take on d5, what happened in the game.]

7...d5! Looks like Black lost a tempo by playing first d6 and then d5. But in fact this is the right positional rule − open the center if the enemy's king didn't castle yet. Looks like Black lost a tempo by playing first d6 and then d5. But in fact this is the right positional rule − open the center if the enemy's king didn't castle yet. **8.exd5 Nxd5 9.Be3** This is a rather dubious strategy − white is trading his bishop too early. On the other hand Chigorin had his own opinion about it, because later he played this line again. This is a rather dubious strategy − white is trading his bishop too early. On the other hand Chigorin had his own opinion about it, because later he played this line again. **9...Nxe3 10.fxe3?!**

[10.Nxe3 Qd6 11.Qe2 Be6= 1−0 Chigorin,M−Charousek,R/Nuremberg 1896 (35) 1−0 Chigorin,M−Charousek,R/Nuremberg 1896 (35)]

10...e4! Very nice positional pawn sac. White's central doubled pawns will need a permanent protection and Black can develop the initiative, while white king will always be in danger. Very nice positional pawn sac. White's central doubled pawns will need a permanent protection and Black can develop the initiative, while white king will always be in danger.

[10...Bg4!?]

11.dxe4 Qe7 12.Qc2

[12.Bd5 Ne5⩲]

12...Ne5 13.Nxe5 Qxe5 14.0−0−0 White has no choice. The knight on f1 must protect e3 and so the only way to run away from center for white king is the long castle. But Lasker develops a quick attack there as well. White has no choice. The knight on f1 must protect e3 and so the only way to run away from center for white king is the long castle. But Lasker develops a quick attack there as well. **14...c6 15.Re1** This move is the result of White's dubious strategy. To remove the knight from f1 he must protect e3. Anyway soon he must give back the pawn, so I would rather think of giving back some material at once and finish quick the kingside development. This move is the result of White's dubious strategy. To remove the knight from f1 he must protect e3. Anyway soon he must give back the pawn, so I would rather think of giving back some material at once and finish quick the kingside development.

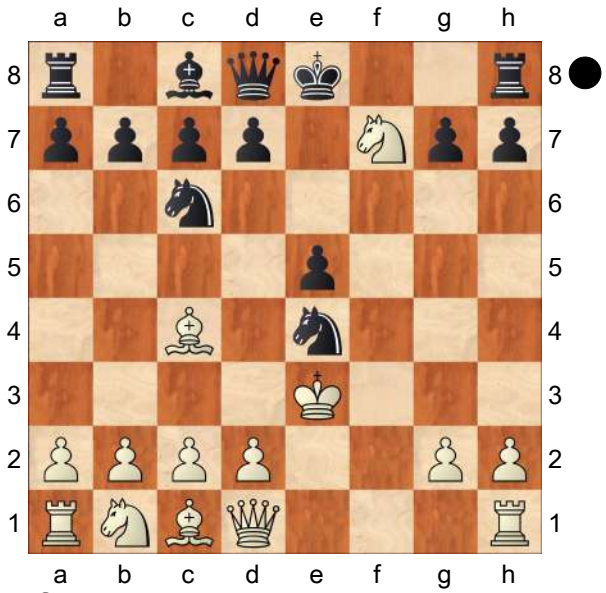
□ **Martinovsky,Eugene Simeon**
■ **Albano,Anthony**
USA corr 1990
[various]

Albano comments: The Martinovsky game, despite its age, refutes analysis from NIC Yearbook 55. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5 5.Nxf7 Bxf2+ 6.Kxf2 Nxe4+ 7.Ke3**

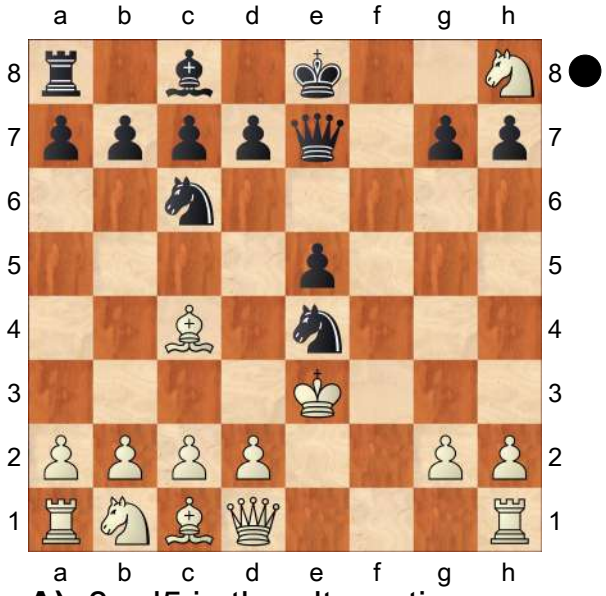
(Diagram)

The NIC article claims that this move, "ridiculed for decades", refutes the Traxler! Until recently, theoreticians didn't see the need to investigate the consequences in any depth but some Dutch amateurs have been making amazing discoveries. The survey by Nirav Christophe and Arne Moll says "The solution is to play the king into the



open field and 'grab everything': White wins, basically because he is too much up in material. Black has two possibilities: 7...Qh4 and 7...Qe7.We present two games, which show that neither move works." **7...Qh4!** "With a winning attack for Black", Keres (1968). It looks as if this is the right move after all, but it's only a draw not a win.

[7...Qe7 is the official refutation but it doesn't convince. 8.Nxh8!! ? from Palkövi.



A) 8...d5 is the alternative:

9.Qh5+!? Given by Cramer but not mentioned by Palkövi g6 10.Nxg6 Qc5+ 11.Ke2 "White is apparently much better, but the game is still complex."− D.Heisman.

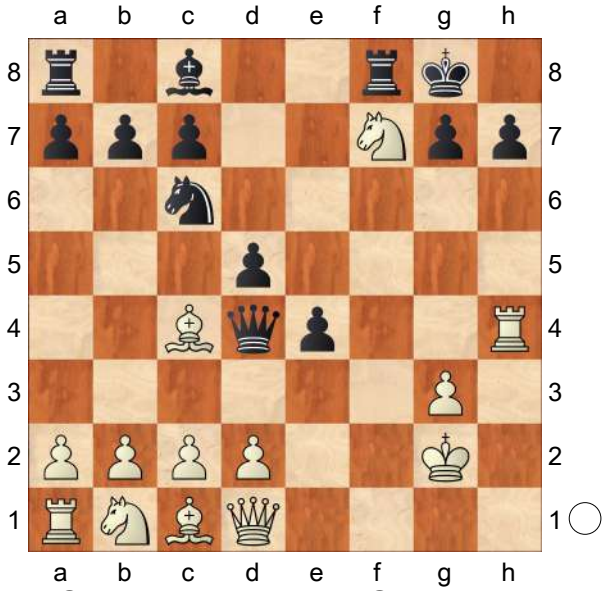
A1) 11...Nd4+ 12.Kf1± Bg4 *(12...Qxc4+ 13.d3)* 13.Qxe5+;

A2) 11...Qxc4+ 12.Ke1 hxg6 13.Qxg6+ "White seems more than okay, but there is still some play left"− Heisman.;

B) 8...Qg5+ 9.Kxe4 d5+ "and Black wins" (Estrin, 1970); "Black has a decisive attack" − Zagorovsky, Romantic Chess Openings (1982) *(9...Qf4+* not mentioned in NIC YB55, is worth another look says Heisman. However, it is also hard to find anything concrete for Black here: *)* 10.Bxd5! Bf5+ *(* no better are *10...Qf4+ 11.Kd3 Qd4+ 12.Ke2;* or *10...Qxg2+ 11.Qf3 Bf5+ 12.Ke3)* 11.Kf3 Bg4+ Not mentioned by Heisman *(11...Qf4+ 12.Ke2 Nd4+ 13.Ke1* TH: as so often, Black can win the white queen but at a high price: *Nxc2+ 14.Qxc2! Bxc2* Heisman: "The computer thinks that White is winning easily, but his uncoordinated pieces make it hard for him to make progress for a long time. Black has some practical chances. White's best move at first looks likely to be something like 15.♘c3, but apparently even after that Black can generate some chances, so the less likely move 15.♗xb7 is probably better." *)* 12.Kf2 Bxd1 13.Bxc6+ bxc6 14.Rxd1 The Dutch writers say that "Way back in 1934, Menovsky analysed a win for Black with Qh5 but he only analysed an inferior reply for White. After the active *(* Instead *14...Ke7! 15.Kg1!±* is best play according to Christophe & Moll. (White went on to win with the inferior 15 d3?! in the correspondence game Christophe−Topolovec; see NIC YB55) *)* 15.Rf1! Christophe & Moll reckon "White will win easily with his huge material advantage. Because of his corrupted pawn structure, Black has no counterplay whatsoever." Are they right? *(15.Rh1? Qh4+! 16.g3 Qd4+ 17.Kg2 Qe4+ 18.Kg1 0−0−0 19.d3 Qe1+ 20.Kg2 Qe2+ 21.Kh3 Rf8−+* J.Menovsky, Chess Review, December 1934. *)* 15...Qxh2 16.d3 Kd7 Not considered in the Dutch survey, but whether this should change the assessment is somewhat doubtful. *(16...Qh4+ 17.Kg1 Qd4+ 18.Rf2 0−0−0 19.Nd2 Rf8 20.Nf3* Christophe & Moll*; 16...0−0−0 17.Nd2 Qh4+ 18.Kg1 Rxh8 19.Ne4+−* Christophe− T.E.Hartmeyer, corr 1993. *)* 17.Nd2 Rxh8 18.Nf3 Qh5 19.Bd2 Re8 20.Bc3 *(20.Rae1!?; 20.Rad1!?)* 20...e4 21.dxe4 Rxe4 22.Bd4 g5 Black is setting some problems now. 23.Rh1 *(23.Bxa7 g4∞)* 23...Qf7 24.Kg1 Qf4 25.Rxh7+ Kc8 26.Rd1 g4 27.Rh4 Qd6 28.Rd3 gxf3 29.Rxe4 Qg6 30.Rxf3 Qxe4 31.Bc3 Qxc2 32.a3 Kd7 ½−½ Holzner−Bruchtel, Germany corr 1993.]

8.g3 Nxg3 Heisman also considers in some detail the YB55 suggestion of 8...♕e7!?, sacrificing a tempo on the 7...

♕e7 line to provoke g2−g3. **9.hxg3 Qd4+ 10.Kf3 d5 11.Rh4** 11 ♗e2 is an alternative examined in some detail, but inconclusively, by Heisman. **11...e4+ 12.Kg2 0−0**



The NIC YB article says:"Over the last 30 years, many have tried to prove that White has more than the draw he can get with 13 ♕h5 ♖xf7 14 ♗xd5 ♕f2+ 15 ♔h1 ♕f1+" (Chitny−Chromik, corr 1975). ...But the members of our Amsterdam chess club had already known better since 17 January 1990. The solution was found in a train, while returning from a team match." **13.Nc3** "In fact a very logical move, because White just develops a piece" say Christophe and Moll. This move is not mentioned by Cramer or Palkövi. According to Heisman's Traxler CD, White has a reasonable position. He thnks it may be the best of his alternatives here."Just before this book was published, I found out that New in Chess Yearbook 55 also championed this move, which I found long before I read their article." **13...dxc4** against 13...♕xc4 (one of Black's main ideas in this line) the NIC analysts suggest 14 ♖f4. **14.Qh5 Ne7!**
Not in YB55! Heisman credits this to German analyst Martin Bennedik and gives the whole game as analysis, but CC−IM Anthony Albano had already played it ten years earlier!
[NIC YB55 gives 14...Be6 15.Nb5 Qb6 16.b3 Ne7 17.Ba3 Bf5 18.Nh6+ gxh6 19.Bxe7 Qxb5 20.Bxf8 Rxf8 21.Rf1 cxb3 22.Rg4+ Kh8 23.Rgf4 bxc2 24.Rxf5 Qxf1+ 25.Rxf1 Rxf1 26.Qe5+ Kg8 27.Qd5+ 1−0 N.Christophe−R.Brachtel, corr 1993]
15.Nxe4 Heisman gives a lot of analysis to show that 15 ♕xh7+ ♔xf7, 15 ♖xe4 ♕f6 and 15 ♘b5 ♕f6 are all good for Black. **15...Bf5 16.Nfg5**
[16.Neg5 Qd5+ 17.Qf3 Qxf3+ 18.Kxf3 Bg6 19.Rxc4 Nd5 is slightly better for Black says Heisman..]
16...h6 17.Nc3 Bg4 18.Nh3 Qf6
Heisman shows 18...♗xh3+ draws and his main line 18...Rf4!? 19 ♖xg4 ♖xg4 20 d3 ♖f8 is given as "with compensation".

□ **Bologan,Viktor**
■ **Malakhov,Vladimir**
EU−Cup 23rd Kemeri (4.5) 06.10.2007
[Glenn Flear]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Nbd2 White sometimes reverses the order of his moves, but the main point is that Bologan intends to avoid (or at least delay) castling in order to retain additional options. This is the modern, and perhaps most challenging, way of handling the opening.

[The traditional main line continues 6.0−0 Ba7 7.Bb3 d6 8.Nbd2 0−0 . Many games have reached this position where White usually tries one of the three following moves:

A) 9.Nc4 Ne7 10.Bg5 Ng6 11.Nh4 Kh8 12.Qf3 *(*after *12.Nxg6+ fxg6!?;* , and *12.Ne3 h6 13.Nxg6+ fxg6* , Black accepts a compromised structure but obtains some activity in return *)* 12...h6 13.Bxf6 Nxh4 14.Bxh4 Qxh4 15.Ne3 Bd7 , V.Sanduleac−G. Flear, Chamalières 2008, White has no particular problems at present, but the bishop pair gives Black long−term potential.;

B) 9.Re1 (this enables Black to kick−start his counterplay) Ng4! 10.Re2 Kh8 11.h3 Nh6! 12.Nf1 f5 13.Bxh6 gxh6 14.exf5 Bxf5 15.N1h2 Qf6 16.Qd2 Rae8 and Black is very active which more than compensates for his damaged pawns, K.Spraggett−M.Adams, French Team Ch. 2001.;

C) 9.h3 h6 10.Re1 Nh5 11.Nf1 Qf6 12.Be3 Ne7! *(*I was recently shown by Jean−Marc Degraeve that *12...Nf4?!* is inferior due to *13.Ng3 g6 14.d4* and White has a small but persistent edge *)* 13.Bxa7 *(*or *13.d4 Nf4 14.Ng3 Neg6 15.Bc2 Nh4 16.Nxh4 Qxh4 17.Qf3 g6 18.Rad1 Kg7 19.Nf1 Ne6 20.dxe5 dxe5 21.Bxa7 Rxa7 22.Qg3 Qxg3 23.Nxg3 Ra8* and Black had more or less equalized, A.Areshchenko−K. Sakaev, Russian Team Ch. 2008 *)* 13...Rxa7 14.Ne3 Nf4 15.Kh2 Ra8 16.a4 Be6 17.Bxe6 fxe6 (opening the f−file has its points, but here White is well placed to thwart any enemy activity and the black position is shown to lack vitality) *(*instead *17...Nxe6* is very solid *)* 18.Ng1 Rad8 19.g3 Nfg6 20.Rf1 d5 21.Qe2 Nc6 22.Ng2 Rf7 23.h4 Rdf8 24.Rad1 Nge7 , A.Karpov−A.Yusupov, Bugojno 1986. Black has nothing better to do than wait, while White can hope to improve and even consider a timely break−out with f2−f4.;

D) 9.−−]

6...Ba7 7.Bb3 In the case of an early ...d7−d6 the bishop will have to drop back anyway to meet the positional threat of ...Na5, and in the case of ...d7−d5 White may prefer not to capture on d5. So this actually constitutes a useful (semi−waiting) move inviting Black to show his hand! **7...0−0 8.h3**

[After 8.Nf1 , Black should react actively with d5! 9.Qe2 dxe4 *(9...Be6* keeps some tension *)* 10.dxe4 Ng4 11.Ne3 Nxe3 12.Bxe3 Bxe3 13.Qxe3 is equal.]

8...d6

[Here 8...d5 has been played quite often, and certainly has a positive side, but after 9.exd5 Nxd5 10.Ne4 White's knight on e4 is quite well posted.]

9.Nf1 d5! Only now that White has retreated his knight to f1 does Malakhov react in the centre. **10.Qe2 Be6 11.Ng3**

[Following 11.Bc2 , Black could opt for b5 , gaining space and giving himself the useful option of ...d5xe4, d3xe4, ...Bc4.]

11...dxe4 12.dxe4 Bxb3 13.axb3 Ne8 Black aims to use this knight to cover the f5−square. **14.Nf5 Nd6 15.g4!?** Supporting the knight with the g−pawn in this way makes it difficult for Black to contemplate exchanging on f5, since that would open the g−file, giving White attacking chances. One of the points behind delaying castling is that White gives himself this type of possibility.

[More cautious is 15.0−0 ; e.g. Qf6 16.Bg5 Qe6 17.Nxd6 Qxd6 18.Qc4 Rfe8 19.Rfd1 Qe6 20.Qxe6 Rxe6 21.Rd7 f6 22.Bd2 Re7 and Black had equalized in S.Tiviakov−P.Leko, Wijk aan Zee 2006.]

15...Qf6 16.h4 Qe6 17.b4 f6 18.h5 White seeks attacking chances, whereas Black aims for solidity on the kingside and play in the centre. **18...Rad8 19.N3h4 Rd7 20.Kf1** White finally decides on the future of his king: the g2−square. **20...Rfd8 21.Kg2 Qc4** The exchange of queens reduces the effectiveness of any white attack.

22.Qxc4+ Nxc4 23.g5!? Rd1 24.gxf6

[After 24.Rxd1 Rxd1 25.gxf6 gxf6 White has great knights but they lack support and he has to be careful along the first rank.]

24...Rxh1 25.Ne7+

[Tiviakov analyses 25.Kxh1 gxf6 26.Nh6+ Kf8 27.N4f5 Rd1+ 28.Kg2 Nd2 29.Ng4 as unclear. Both sides have precariously−placed pieces.]

25...Nxe7 26.fxe7 Re8 27.Kxh1 Bxf2 28.Nf5 Nd6

[Perhaps Black could have played for more than equality with 28...g6! 29.Nh6+ Kg7 30.Ng4 Bh4 31.Bh6+ Kf7 32.Rf1+ Ke6 , when he emerges with an extra pawn as e7 is set to fall.]

29.Nxd6 cxd6 30.Bg5 h6 31.Kg2 hxg5 32.Kxf2 The rook ending is drawish after **32...Rxe7 33.Rg1** .

[Myers]

Dunne: Walter Muir [born 07.08.05] has deservedly earned the title of the Grand Old Man of American Correspondence Chess. His influence is felt everywhere, and his pioneering spirit has led American players into the international arena−−nine times Canadian Correspondence Chess Association Champion, twice British Overseas CC Champion, 16−time champion of the Illinois CCA, winner of 9 ICCF Master Tournaments, qualified 7 times for ICCF World Championship second−round play, and represented the United States on 4 Olympiad teams. Muir was the first US player to defeat a USSR player (Atiashev) in ICCF competition, and was awarded the title of International Correspondence Chess Master in 1971. Walter has been active as a chess administrator and OTB player, but his

experience in postal play is nonpariel. **1.e4** Myers Berliner etc Myers **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 b5 6.Bf1 Nd4 7.c3 Nxd5 8.Ne4 Qh4 9.Ng3 Bg4 10.f3 e4 11.cxd4 Bd6 12.Qe2!?** Berliner etc: 'Introduced in this game' **12...0−0**

□ **Nun,J.**
■ **Spesny,J.**
Czech League 1998
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5
[Note: the actual move order of this game was 3...Nf6 4.d3 Bc5 5.0−0 d6 6.c3 0−0 7.b4 Bb6 8.a4 a6 9.Bg5 Qe7 10.Nbd2 .]
4.c3
[It will be interesting to see how the relatively fresh line with 4 c3 Nf6 5 d3 0−0 6 0−0 d5!? progresses (see the notes to White's 6th move, below). If White wants to prevent or discourage ...d5 and is happy to play the Classical Main Line with 0−0, he could try the move order 4.d3 Nf6 5.0−0 0−0 6.Re1 *(*or *6.h3* , intending *d5 7.exd5 Nxd5 8.Re1* transposing to Emms−Wittman,*;* or finally *6.Bb3!?* as suggested by Kindermann. *)*]
4...Nf6 5.d3 0−0!? Black castles even more quickly than in the previous game. If White reacts slowly, Black's intention is almost certainly to play ...d5 here.
[Can Black play ...d5 even sooner? The answer is no. 5 d3 actually sets a little trap, which has caught out a fair number of players. The immediate 5...d5? is a serious error which can be punished by 6.exd5 Nxd5 7.Qb3! .
A) . The threat to capture on d5 is a surprisingly awkward one for Black to meet, given that 7...Na5? runs into 8.Qb5+ .;
B) . If Black plays 7...Be6 , White can safely grab the pawn with 8.Qxb7 . Black still has problems with his c5−bishop and if

Nde7 there follows *(8...Nce7;* and *8...Na5* both lose to *9.Qb5+)* 9.Qb5 Bxc4 10.Qxc4 and White is simply a pawn up for nothing.;
C) 7...−−]

6.b4!? This move isn't an attempt to win a pawn with b5. Instead the idea is to force Black's bishop to make a decision and to gain some space on the queenside. The b2−b4 advance nearly always makes more sense if Black hasn't yet played ...a6 allowing the bishop to drop back to a7 in one go. One thing White has to bear in mind when advancing with b4 and a4 is that queenside castling becomes less desirable, so White usually ends up castling short.

[If 6.Bg5 Black should play h6 7.Bh4 Be7! . Compare the note on 7 Bg5 in the previous game.]

[6.Nbd2 is a decent alternative, planning to meet d5 with 7.exd5 Nxd5 8.Ne4 *(* or *8.0−0 Bg4 9.Ne4)* 8...Bb6 9.0−0 − compare Oratovsky−Gozzoli.]

[The most common choice for White here is actually 6.0−0 , indicating a desire to play the Classical Main Line seen in Chapter Three (for example, after 6...d6 7 Bb3 a6). But what happens if Black insists upon d5 here? You would assume that it would be somewhat risky, given that White hasn't spent any time on Bb3 or h2−h3, but that doesn't seem to be the case and it's noticeable that some very strong players have tried this recently. It's early days, but I think a critical line is 7.exd5 Nxd5

A) 8.b4 Be7 transposes to 6...Be7 in the next note, *(* while if *8...Bb6?* White can play *9.Bxd5 Qxd5 10.c4* and 11 c5 trapping the bishop *)*;
B) 8.Re1 Bg4 9.h3 Bh5 10.Nbd2 *(10.g4 Bg6 11.Nxe5 Nxe5 12.Rxe5 c6* is playable, but it does give Black considerable compensation for the pawn *)* 10...Nb6! *(10...Nf4?! 11.Ne4! Be7 12.Ng3* is good for White *)* 11.b4!? *(11.Bb5 Bd6* has proved to be acceptable for Black: for example, *12.Ne4 f5 13.Ng3 Bxf3 14.Qxf3 Qd7* , Ni Hua−P.Harikrishna, Reggio Emilia 2007 *)* 11...Bd6 *(11...Nxc4? 12.Nxc4* leaves e5−hanging *)* 12.Bb3 Kh8 13.Ne4 f6 14.a4 and White is slightly the more active, D.Vocaturo−M.Godena, Sarre 2009.]

6...Bb6

[This is the most natural retreat, and also by far the most popular, but 6...Be7!? isn't silly.

A) . White should avoid the greedy 7.b5?! Na5 8.Nxe5 , as Nxc4! 9.Nxc4 d5 10.Ncd2 *(* or *10.exd5 Qxd5* hitting g2 and b5 *)* 10...dxe4 11.Nxe4 a6 12.bxa6 Rxa6 , as played in S.Vysochin−M. Godena, Internet 2008, gives Black excellent compensation.;
B) . After the wiser 7.0−0 d5!? 8.exd5 Nxd5 , the idea is that White's weaknesses on the queenside created by the b−pawn's advance compensate Black for the problems he experiences defending e5. The critical line seems to be 9.b5 Na5 10.Bxd5! *(* rather than *10.Nxe5 Bf6* , again with good compensation for Black *)* 10...Qxd5 11.c4 . For example, Qd8 *(* or

11...Qe6 12.Re1 f6 13.Bd2 b6 14.Bxa5 bxa5 15.Nd4!? Qd7 16.Nc6 a6 with an unclear position, S.Tiviakov−L.Babujian, Mashhad 2010 *)* 12.Bd2! *(12.Bb2 e4!)* 12...b6 13.Nxe5 Bf6 14.Bxa5 bxa5 15.d4 Bxe5 16.dxe5 Be6 17.Na3 and White was better in W. Spoelman−I.Kurnosov, Budva 2009. This line could certainly do with further tests.;

C) 7.−−]

7.a4 a6

[If 7...a5 , White can safely grab the e5−pawn: 8.b5 Ne7 9.Nxe5! d5 10.exd5 Ng6 11.Nxg6 Re8+ 12.Kf1 hxg6 13.Bg5 Qd6 14.Bxf6 Qxf6 15.d4 Re4 16.Nd2 Rf4 17.f3 with some advantage for White, A. Galliamova−E.Vasiukov, Moscow 1989. True, White's king isn't ideally placed, but Black's dark−squared bishop is shut out and two extra pawns have to be worth something.]

8.Bg5 Now that Black can no longer unpin with ...Be7, this move becomes much more desirable.

[A typical continuation after 8.0−0 is d6 *(* or *8...d5 9.exd5 Nxd5 10.Qb3 Nf6 11.Ng5 Qe8* , B.Gelfand−A. Shirov, Munich 1993, and here Gelfand suggests *12.Be3* with an edge for White *)* 9.Nbd2 Ne7 10.Bb3 (intending Nc4 to hit the b6−bishop) Ng6 11.Nc4 Ba7 12.Be3 Be6 13.Bxa7 Rxa7 14.Re1 Ra8 with a roughly level position.]

8...d6 9.Nbd2 Qe7 Planning to deal with the pin by playing ...Nd8−e6. Black does something similar in a main line of the Four Knights Game. There it even has a name, 'the Metger unpin'.

[If 9...h6 10.Bh4 g5 then 11.Bg3 is of course okay, *(* but *11.Nxg5!? hxg5 12.Bxg5* would be hugely tempting (compare Emms−Flear). *)*]

10.0−0! White is wise to castle kingside here, especially with the queenside pawns well advanced.

[Moreover, if White doesn't play 10.Nf1 , there's no chance of falling for a very nice trick. I was considering the variation h6 11.Bh4 g5 *(11...Be6* , planning an exchange of bishops followed by ...Qe6, looks fine for Black *)* 12.Nxg5? hxg5 13.Bxg5 which at first seemed fairly promising for White. It would be, but for Nxe4!! 14.Bxe7 Bxf2+ 15.Ke2 Bg4# , which is mate for Black! Please watch out for this one!]

10...Nd8

[10...h6 11.Bh4 and only now Nd8 avoids Nh4 and forces White to find another plan. On the other hand, ... Ne6 no longer comes with tempo. In L. Yudasin−R.Hess, New York 2004, White sensibly chose to start action in the centre: 12.a5 Ba7 13.d4 (now ...Ne6 would drop the e−pawn) exd4 14.Nxd4 *(14.cxd4* is also interesting, intending *Nc6 15.e5 dxe5 16.dxe5 Nxe5 17.Re1 Nxf3+ 18.Qxf3* with play for the pawn *)* 14...Nc6 15.Nf5!? *(* I prefer White's position after *15.Nxc6 bxc6 16.Qf3* − a6 is a constant worry for Black *)* 15...Bxf5 16.exf5 Rfe8 17.Qc2 Rad8 18.b5!? d5? *(* I'm not sure why Black avoided the straightforward *18...Ne5!)* 19.bxc6 dxc4 20.cxb7 Qe2 21.Ra2 Qd3 22.Nf3 and White had a clear plus.]

11.Nh4! The right idea, interfering with

Black's unpinning plan.
[Flicking in 11.a5 Ba7 before playing 12.Nh4 is also good.]
[Any quiet move, like 11.Re1 , allows Ne6 and after 12.Bh4 Black could even just play h6 followed by ...Nf4−g6 to finally break the pin.]
[11.d4 Ne6 would also be fine for Black.]
11...Ne6 12.Nf5 Qd8 13.Bh4 Nf4
Moving this knight to g6 is the right plan,
[but Black could consider 13...a5 14.b5 and only then Nf4 . Judging by what happens later, this insertion of pawns moves which gives Black more control of c5 might be a good idea.]
14.Ne3! Heading for d5. **14...Ng6 15.Bg5 h6 16.Bxf6 Qxf6 17.Nd5 Qd8 18.Nxb6 cxb6 19.g3!** Restricting the knight on g6. **19...Bh3 20.Re1**
Initially I had no idea why White induced ...h6 instead of just playing 15 Bxf6, but maybe it's because Black now has to watch out for Qh5 ideas attacking g6 and h3. **20...Be6 21.Qb3 Bxc4 22.Nxc4 d5 23.Ne3 dxe4 24.dxe4** I didn't like Black's plan of exchanging bishops (20...Qg5 looked less accommodating) and White enjoys a significant advantage now. His structure is healthier and his knight eyeing outposts on f5 and d5, is clearly stronger than its counterpart.
24...Rc8 25.Rad1 Qe7 26.Rd3 Rfd8 27.Red1 Rxd3 28.Rxd3 Rd8 29.Nd5 Qe6 30.Qd1 Kh8 31.b5 axb5 32.axb5 Rd6 33.c4 Nf8? 34.Qa1! Nd7 35.Ra3?
[Missing a big chance: 35.Qa8+! Kh7 36.Qd8! threatens a devastating 37 Ne7. Black is forced to play Nc5 , but then 37.Nf6+ Qxf6 38.Rxd6 wins the exchange.]
35...Nc5 36.f3 Kh7 37.Ra8 f5!
Now Black is right back in the game.
38.exf5 Qxf5 39.Ra3 Qc2 40.Rc3 Qe2 41.Qf1 Qd2 42.Qc1 Qxc1+ 43.Rxc1 e4 44.fxe4

7...0−0 ½−½ (27) Oratovsky,M−Gozzoli,Y Tarragona 2007 **8.h3** This is basically an attempt to transpose to the main lines discussed in the previous chapter, if Black plays 8...d6. But what happens if Black advances one square further? This is basically an attempt to transpose to the main lines discussed in the previous chapter, if Black plays 8...d6. But what happens if Black advances one square further? **8...d5!** In an ideal world, Black would like to play ...d5 in one jump and with White having played Nf1, but usually he can meet both these conditions only if White plays inaccurately (for example with the move order 8 Nf1?! d5!). Even so, one out of two isn't bad, and this looks like a reliable option for Black. In an ideal world, Black would like to play ...d5 in one jump and with White having played Nf1, but usually he can meet both these conditions only if White plays inaccurately (for example with the move order 8 Nf1?! d5!). Even so, one out of two isn't bad, and this looks like a reliable option for Black. **9.exd5!?** White chooses Plan B: taking on d5 and relying on active piece play and pressure against Black's centre.

[9.Qe2 has been played many times, even by such players as Bologan, but the problem is that after has been played many times, even by such players as Bologan, but the problem is that after Re8 10.Nf1 White is basically a tempo down on the main line, with Black having played ...d5 in one go.]

[If White wants to keep his options open in the centre, then committing to kingside castling with If White wants to keep his options open in the centre, then committing to kingside castling with 9.0−0 is a reasonable choice, although dxe4! 10.dxe4 Qe7 does leave Black with an equal share

of the chances. For example, does leave Black with an equal share of the chances. For example, 11.Nh2 Be6 12.Bc2 Rad8 13.Qf3 Nd7 14.Re1 f6 15.Ndf1 Qf7 , K.Shanava−M.Kobalija, Tbilisi 2009.]

9...Nxd5 10.Ne4! This is the only move to challenge Black.

[Note that one of the points behind playing ...d5 with the white knight on d2 is revealed after Note that one of the points behind playing ...d5 with the white knight on d2 is revealed after 10.0−0?! Nf4! , which is something White definitely needs to avoid. Compare Roy Chowdhury−Skjoldborg, where White doesn't have this problem because the knight is still on b1.]

[With the centre semi−open, With the centre semi−open, 10.Nf1?! is far too slow. Either is far too slow. Either Nf4!? *(*or simply or simply *10...Be6 11.Ng3 f6 12.0−0 Kh8)* 11.Bxf4 exf4 followed by ...Re8+ is more than okay for Black.]

10...Bf5

[10...h6? is strongly met by is strongly met by 11.Bxh6! . This tactical shot, intending . This tactical shot, intending gxh6 12.Bxd5 Qxd5 13.Nf6+ , is well worth remembering. However, Black does have two decent alternatives here: , is well worth remembering. However, Black does have two decent alternatives here: , is well worth remembering. However, Black does have two decent alternatives here:]

[a) 10...f6! 11.0−0 *(11.Be3!?)* 11...Kh8 is extremely solid (compare my game against Greet). After is extremely solid (compare my game against Greet). After 12.Re1 Be6 13.Ng3 Qd7 14.Nh4 Rad8 15.Qh5 Bf7 16.Qf3 Nde7 17.Bc2 Bd5 18.Qh5 Bf7 19.Qf3 the position was equal in Xu Yuhua−N.Short, Jinan 2003.]

[b) 10...f5!? is riskier but also playable. For example, is riskier but also playable. For example, 11.0−0! Kh8 12.Neg5 h6 13.Nh4! hxg5! *(13...Nce7? 14.Re1!* is good for White − Quezada Perez is good for White - Quezada Perez is good for White − Quezada Perez is good for White - Quezada Perez *)* 14.Qh5+ Kg8 15.Bxg5 Qd6 16.c4 (R.Perez Garcia−O.Ruiz, Villa Clara 2007), and here Quezada Perez assesses (R. Perez Garcia−O.Ruiz, Villa Clara 2007), and here Quezada Perez assesses Nd4! 17.cxd5 Nxb3 18.axb3 as unclear.]

11.0−0

[11.Ng3 is also possible. Bg6 12.0−0 Nf4 *(*I prefer I prefer *12...Nf6!* when the position looks equal to me *)* 13.Bxf4! exf4 14.Ne4 Bxe4 15.dxe4 Qf6 16.Qd5! proved to be better for White in V.Bologan−M.Krasenkow, Spanish Team Championship 2006.]

11...Bg6 12.Re1 Kh8 13.Ba4

[White lures the b−pawn forward to create some light−squared weaknesses on the queenside, although this does consume some time. After the more typical White lures the b−pawn forward to create some light−squared weaknesses on the queenside, although this does consume some time. After the more typical 13.Ng3 f6 14.Nh4 Bf7

15.Nhf5 Qd7 16.Qf3 Rad8
the position is similar to Xu Yuhua−Short, above, and the chances are level.]

13...b5 14.Bb3 f5?! This is too ambitious and too loosening; it certainly does the bishop on g6 no favours at all. Furthermore, White's set−up is well geared to meet this advance. Having said that, while looking through many games I have noticed a tendency for Black to lunge forward with ...f5 even when it's not justified. This could be caused by the natural inclination amongst many players to be always doing something, even when the best course of action is to 'do nothing'.

[14...f6! is still the best move here.]

15.Neg5 Qd6 16.Nh4! Suddenly White's pieces come to life, and Black has to deal with problems both on the kingside and in the centre. Suddenly White's pieces come to life, and Black has to deal with problems both on the kingside and in the centre. **16...Rad8 17.Nxg6+**

[17.d4! is a strong alternative, since is a strong alternative, since exd4? *(*if Black plays if Black plays *17...e4* , the a7−bishop is once again shut out of the game; what's more, after , the a7−bishop is once again shut out of the game; what's more, after *18.Bxd5 Qxd5 19.Nxg6+ hxg6 20.Bf4* Black must be careful not to be mated down the h−file *)* 18.Re6! is immediately crushing.]

17...Qxg6 18.Qe2 h6 19.Nf3 Qf6 20.Nxe5!? Heading for complications.

[20.Bd2 , possibly followed up by a2−a4, leaves White with a solid edge − Black still has many light−squared weaknesses to defend. , possibly followed up by a2−a4, leaves White with a solid edge - Black still has many light−squared weaknesses to defend. , possibly followed up by a2−a4, leaves White with a solid edge − Black still has many light−squared weaknesses to defend. , possibly followed up by a2−a4, leaves White with a solid edge - Black still has many light−squared weaknesses to defend.]

20...Rde8? A whole book could be written on the subject of 'the wrong rook'.

[20...Rfe8! prevents Nd7 ideas, and the resulting position after the long tactical sequence prevents Nd7 ideas, and the resulting position after the long tactical sequence 21.Bg5! *(21.d4 Bxd4!)* 21...Rxe5! *(21...hxg5?? 22.Qh5+ Kg8 23.Bxd5+)* 22.Bxf6 Rxe2 23.Bxd8 Bxf2+ 24.Kf1 Rxe1+ 25.Rxe1 Bxe1 26.Bxd5 Nxd8 27.Kxe1 offers Black excellent drawing chances.]

21.Nd7?

[Missing an opportunity: 21.d4! Bxd4 and only then and only then 22.Nd7 is stronger. White keeps some advantage after is stronger. White keeps some advantage after Rxe2 23.Rxe2 Qd6 *(23...Nxc3 24.bxc3 Qd6 25.Nxf8 Bxc3 26.Re8!! Bxa1 27.Ng6+ Kh7 28.Bf7!* wins *)* 24.Nxf8 Be5 25.Ng6+ .]

21...Rxe2 22.Rxe2 Nxc3! An important resource, which saves Black. The neat perpetual check which follows is more or less forced.

[22...Qd6 23.Nxf8 would give White a decisive advantage.]

23.bxc3 Qxc3 24.Bb2 Qxd3 25.Nxf8

[If 25.Re6 , not , not Qxd7?? *(* but instead but instead *25...Qd2!* (covering h6) *26.Nxf8 Qxb2* and again White will take the perpetual check *)* 26.Rxh6#! !]

25...Qxe2 26.Ng6+ Kh7 27.Nf8+ Kh8 ½–½

Sevilla 2010

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3

[Note that the game's actual move order was 6.0−0 Ba7 7.Nbd2 d6 8.Bb3 0−0 9.h3 Ne7 10.Re1 Ng6 11.Nf1 Be6 12.Ng3 h6 13.d4 Re8 , but for convenience I've changed the move order into the one where White delays castling.]

6...Ba7 7.h3 d6 8.Nbd2 Ne7

As I mentioned in the previous game, the knight manoeuvre from c6 to g6 is a typical plan for Black, mirroring White's own knight manoeuvre to g3. Black's knight definitely prefers the g6−square to c6. One merit of the c3−pawn which is often forgotten is how well it restricts Black's knight when it is on c6.

[If 8...0−0 9.Nf1 and only then Ne7 , I think White should just transpose to the main game with 10.Ng3 *(*I don't think I don't think *10.Bg5 Ng6* gives White anything *)* 10...Ng6 .]

9.Nf1 Ng6 10.Ng3 0−0 This is an important moment. This is an important moment. **11.0−0!** So what does White do? He changes plan! Let's call this one 'Plan C'. −−− The position is virtually symmetrical after 11 0−0, but the advantage of the first move still counts for something. White is the first to be able to push in the centre, and this is often enough to give him a small advantage.

[Black's knight on g6 is very well placed to battle against any typical

kingside action from White. 11 Nh4 is prevented; Black's knight on g6 is very well placed to battle against any typical kingside action from White. 11 Nh4 is prevented; 11.Bg5?! achieves less than nothing after simply achieves less than nothing after simply h6!]
[and finally, 11.Nh2 with the plan of Ng4 and Qf3 is well met by with the plan of Ng4 and Qf3 is well met by d5 when White has to avoid when White has to avoid 12.Qf3?? *(* he can play he can play *12.Ng4* , but *dxe4 13.Nxf6+ Qxf6 14.Nxe4 Qf5* , as in S.Yudin−V.Belov, St Petersburg 2006, is basically level *)* 12...Nh4! .]

So what does White do? He changes plan! Let's call this one 'Plan C'. The position is virtually symmetrical after 11 0−0, but the advantage of the first move still counts for something. White is the first to be able to push in the centre, and this is often enough to give him a small advantage. So what does White do? He changes plan! Let's call this one 'Plan C'. The position is virtually symmetrical after 11 0−0, but the advantage of the first move still counts for something. White is the first to be able to push in the centre, and this is often enough to give him a small advantage. **11...h6**

Black usually plays this move, either here or a bit later, to prevent both Bg5 (as a reply to ...d5) and Ng5 (as a reply to ...Re8). He usually follows up, in some order, with ...Re8, ...Be6, ...c6, ...Qc7 etc. Meanwhile, White will build up the pressure with Re1, d4, Be3 etc. Alternatively: Black usually plays this move, either here or a bit later, to prevent both Bg5 (as a reply to ...d5) and Ng5 (as a reply to ...Re8). He usually follows up, in some order, with ...Re8, ...Be6, ...c6, ...Qc7 etc. Meanwhile, White will build up the pressure with Re1, d4, Be3 etc. Alternatively: Black usually plays this move, either here or a bit later, to prevent both Bg5 (as a reply to ...d5) and Ng5 (as a reply to ...Re8). He usually follows up, in some order, with ...Re8, ...Be6, ...c6, ...Qc7 etc. Meanwhile, White will build up the pressure with Re1, d4, Be3 etc. Alternatively:

[If a) If 11...d5?! 12.Bg5! and the pin on the knight causes Black some problems, but after 11...h6 Black is ready to advance in the centre.]
[11...Be6 12.d4 Re8 13.Re1 h6 transposes to the main game.]
[c) 11...b5 is Black's main alternative here, and this is covered in the next game.]

12.Re1 ½−½ (30) Korneev,O−Campora, D Seville 2010

[The immediate The immediate 12.d4 is also possible, with a likely transposition.]

12...Be6

[12 Re1 prevents 12...d5? , which fails tactically to , which fails tactically to 13.exd5 Nxd5 14.Nxe5 Nxe5 15.Rxe5 Bxf2+ 16.Kxf2 Qf6+ 17.Qf3 Qxe5 18.Qxd5 .]
[12...Nh7!? is interesting and certainly playable. Black is mirroring a plan which White often employs − holding the centre and advancing with the knights on the kingside. One game worth seeing is S.Kindermann−D. Sebastian, German League 2006. Kindermann demonstrated on his excellent DVD why White shouldn't

fear aggression from the black knights: is interesting and certainly playable. Black is mirroring a plan which White often employs - holding the centre and advancing with the knights on the kingside. One game worth seeing is S.Kindermann−D. Sebastian, German League 2006. Kindermann demonstrated on his excellent DVD why White shouldn't fear aggression from the black knights: is interesting and certainly playable. Kindermann demonstrated on his excellent DVD why White shouldn't fear aggression from the black knights: is interesting and certainly playable. Black is mirroring a plan which White often employs - holding the centre and advancing with the knights on the kingside. One game worth seeing is S.Kindermann−D. Sebastian, German League 2006. Kindermann demonstrated on his excellent DVD why White shouldn't fear aggression from the black knights: 13.d4 Qe7 *(13...Qf6* is a decent alternative *)* 14.Be3 *(14.Nf5* is also possible *)* 14...Ng5 15.Nh2!? Nf4?! (this is very tempting, but Black should play something else here) 16.h4! Nh7 *(*after *16...Nge6 17.Nf5 Qd8 18.g3* Black is driven back completely *)* 17.Nf5! Bxf5 18.exf5 , and Black supposedly strong knight on f4 actually turned out to be a fatal weakness.

A) . If If . If 18...Qxh4 19.g3 Qg5 20.Kh1 Qxf5 21.gxf4 exf4 22.Qf3 and White wins the knight for insufficient compensation.;
B) . Or Or . Or 18...Qf6 19.g3 Nh3+ *(*in the game Black chose in the game Black chose *19...Qxf5 20.gxf4 exf4 21.Bd2* , but White soon won *)* 20.Kg2 Qxf5 21.Qg4 Qxg4 22.Nxg4 and the knight is trapped on h3 (analysis by Kindermann). Obviously I wouldn't rule out 12...Nh7 on the basis of this game, as there are several alternatives for both sides early on.;
C) 18...−−]

13.d4 White finally advances in the centre. We'll come across this structure quite a few times throughout the book. This central tension certainly favours White, and because of this he should look to maintain it as long as possible. He should only advance with d5 or capture on e5 if there is a concrete reason for doing so, as otherwise this would only help Black. Likewise, Black is usually reluctant to exchange on d4, as this gives White a powerful, mobile pawn centre. White finally advances in the centre. We'll come across this structure quite a few times throughout the book. This central tension certainly favours White, and because of this he should look to maintain it as long as possible. He should only advance with d5 or capture on e5 if there is a concrete reason for doing so, as otherwise this would only help Black. Likewise, Black is usually reluctant to exchange on d4, as this gives White a powerful, mobile pawn centre. **13...Re8**

transposes to the main game. , but for convenience I've changed the move order into the one where White delays castling. **14.Bc2!**

[Once again we see this retreat, avoiding the exchange of bishops and the easing of Black's position. In this instance, with White enjoying the initiative in the centre, it's much easier to understand its merits. The bishop on e6, blocking the e−file, is not particularly well placed to help Black put pressure on White's centre. Having said that, White probably doesn't have to retreat immediately, since Once again we see this retreat, avoiding the exchange of bishops and the easing of Black's position. In this instance, with White enjoying the initiative in the centre, it's much easier to understand its merits. The bishop on e6, blocking the e−file, is not particularly well placed to help Black put pressure on White's centre. Having said that, White probably doesn't have to retreat immediately, since 14.Be3 Bxb3 15.Qxb3 looks a bit better for him.]

[One word of warning: although Nf5 is undoubtedly a very tempting option, and one which should always be considered, White has to be careful not to play it too early otherwise he runs the risk of his central control being loosened. For example, here One word of warning: although Nf5 is undoubtedly a very tempting option, and one which should always be considered, White has to be careful not to play it too early otherwise he runs the risk of his central control being loosened. For example, here 14.Nf5?! exd4 15.cxd4 d5! leaves White in some trouble. It's better to build up slowly and check out Nf5 possibilities later on.]

14...c6 15.Be3 Qc7 16.Qd2 Rad8

[16...Kh7 might be more accurate, since 17.Nf5 looks less threatening here: *(* the more patient *17.Rad1 Rad8* transposes to the note to Black's 17th move − see below *)* looks less threatening here: 17...Bxf5! 18.exf5 Nf8! 19.dxe5 Bxe3 20.Qxe3 dxe5 , when , when 21.Nxe5 only brings about an equal position after only brings about an equal position after N6d7! 22.Nxd7 Rxe3 23.Nxf8+ Rxf8 24.Rxe3 , as in R. Perez Garcia−L.Henris, Charleroi 2005. , as in R.Perez Garcia−L.Henris, Charleroi 2005.]

17.Rad1

[17.Nf5! looks promising for White. Black has to be very careful. For example:

A) 17...Bxf5 18.exf5 Nf8 19.Bxh6! gxh6 20.Qxh6 , C.Lamoureux−F. Forgues, French League 2008;

B) , or or , or 17...d5 18.Nxg7! Kxg7 19.Bxh6+ Kg8 20.exd5 Bxd5 21.Nxe5 Bb8 22.Qg5 Nh7 23.Qg3 , A.Areshchenko−E. Sutovsky, Gibraltar 2007, with good play for White in both cases.;

C) . In A.Volokitin−Zhou Jianchao, Khanty Mansiysk 2007, Black chose In A.Volokitin−Zhou Jianchao, Khanty Mansiysk 2007, Black chose . In A.Volokitin−Zhou Jianchao, Khanty Mansiysk 2007, Black chose 17...exd4 , whereupon whereupon , whereupon

C1) however, 18.Bxh6!

looks much stronger: for example, looks much stronger: for example, Bxf5 *(*or *18...d3 19.Bxg7!)* 19.exf5 gxh6 20.Qxh6!;

C2) 18.cxd4 d5! 19.Nxg7 Kxg7 20.Bxh6+ Kg8 21.Bg5 Nxe4 proved to be insufficient for White.;

D) 17...−−]

17...d5?! Black is trying to solve all his problems at once with this advance, but it looks like White can refute it with careful play.

[Therefore Black should just accept a manageable disadvantage with Black is trying to solve all his problems at once with this advance, but it looks like White can refute it with careful play. Therefore Black should just accept a manageable disadvantage with 17...Kh7 . Then . Then transposes to the note to Black's 17th move - see below . Then transposes to the note to Black's 17th move − see below transposes to the note to Black's 17th move - see below 18.Qc1 vacating the d−file looks sensible, after which there are still some Nf5 possibilities in the air. For example, vacating the d−file looks sensible, after which there are still some Nf5 possibilities in the air. For example, b5 (S.Jessel−Wang Li, Yerevan 2006) (S. Jessel−Wang Li, Yerevan 2006) 19.Nf5! when Bxf5? 20.exf5 Nf8 21.dxe5 Bxe3 22.Qxe3 dxe5 23.Rxd8 Qxd8 24.Bb3 is good for White.]

18.Nxe5! Nxe5 19.Bf4! Nxe4

[A much earlier game had continued A much earlier game had continued 19...Bxh3

A) 20.Bxe5? Rxe5 21.dxe5 Qxe5 with excellent play for Black, who threatens .. .Qxg3, S.Kudrin−A. Kosten, London 1988. with excellent play for Black, who threatens ...Qxg3, S.Kudrin−A. Kosten, London 1988. with excellent play for Black, who threatens .. .Qxg3, S.Kudrin−A. Kosten, London 1988.;

B) . It's possible that White players were discouraged by that game, but it's possible that White players were discouraged by that game, but . It's possible that White players were discouraged by that game, but 20.exd5! appears to be a major improvement as far as I can see: for example, or finally Nf3+ *(20...Nfg4 21.Qe2!;* or *20...Bg4 21.Rxe5!; 20...−−)* 21.gxf3 Qd7 22.Be5 intending Qxd5 23.Qd3! .;

C) 20.−−]

20.Bxe4 dxe4 21.Bxe5 Qe7 22.Nh5! This is very strong,

[although even the simple This is very strong, although even the simple 22.Nxe4 leaves Black with nothing substantial for the pawn, with the try leaves Black with nothing substantial for the pawn, with the try f6 losing to 23.Bxf6 gxf6 24.Qxh6 .]

22...f6 23.Bxf6! gxf6 24.Qxh6 White's attack should be winning. The various threats of Nxf6+, Re3 and Re4 cannot be met properly. White's attack should be winning. The various threats of Nxf6+, Re3 and Re4 cannot be met properly. **24...Bf5**

[If 24...f5 25.Re3 Bb8 , White has the nice move , White has the nice

move 26.f4! intending exf3 27.Rxe6! and wins.]

25.Nxf6+?

[I'm not sure why Korneev avoided I'm not sure why Korneev avoided 25.g4! , as it looks very strong: Bh7 26.Nxf6+ Kh8 27.Rxe4! Qf7 *(* perhaps he had missed that after perhaps he had missed that after *27...Qxe4 28.Nxe4 Rxe4* , White can play *29.Qf6+)* 28.Rde1 Rxe4 29.Rxe4 must be winning for White.]

25...Kf7 26.Nxe8 Rxe8 27.Qf4

[27.g4 intending Bg6 28.f4! is still good for White. The final position, where the players agreed a draw, is no longer so clear.]

■ **Lebedev,V.**
17: Correspondence 2011
[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 The classical continuation. The knight remains centralized, but Black gets to kick it around a bit. This was usually the variation I faced as Black until people discovered the 8 Bd3 line. **9...e4!**
10.Ne5 Bc5!
[A strong refinement, compared to the previous main move, 10...Bd6 . The big idea is that after 11.d4 *(* another option after 10...Bd6 is the interesting *11.f4!?* which wouldn't be on the cards with a bishop on c5 *)* 11...exd3 12.Nxd3 Qc7 , White can play 13.b3! when Black has to reckon with Bc1−b2xf6. I do think Black can still keep the balance, but forcing c2−c3 out of White looks like an improvement for Black.]
11.c3 More or less necessary. **11...0−0!** This is a strong move order that I haven't seen mentioned anywhere before.
[Let's look at why I think it is Black's best move order: The most popular move is 11...Bd6 , which is very similar to the 10...Bd6 main line, albeit with c2−c3 inserted. This is by no means bad for Black, but I wish to avoid the positions arising after 12.f4!

exf3 13.Nxf3 0−0 14.0−0
when White can follow up with d2−d4 and Black has to play very accurately to prove his compensation.]
[The second most popular move, and the one recommend by Bologan, is 11...Qc7 , which forces 12.d4 exd3 13.Nxd3 Bd6 and this is the same position that we reach in our main line, but with both sides not yet having castled. Here White has several alternatives to going short, like, for instance 14.Nd2 , which was tried by Georgiev recently. These alternatives shouldn't be troubling for Black, but why give White more options?]

12.0−0! Quite shockingly, this precise and refined move order has only been played once by two untitled players.
[Others have preferred: We're not bothered by 12.b4 because Black can play Bd6 *(* or even *12...Qd5 .)*]
[It might look like White should play 12.d4 exd3 13.Nxd3 , but instead of committing the queen to c7, we have alternatives, with Bb6! a very strong idea. The bishop would be well placed on d6 too, but this way Black obtains maximum pressure along the d−file. After 14.0−0 Re8! Black is already threatening to win material with ...Ba6 or ...Bf5, and White is simply in big trouble. In M.Mueller−A.Lisanti, Griesheim 2003, after 15.b4 Nc4 16.Nf4 Ba6 *(16...Qxd1 17.Bxd1 Ba6* looks even more convincing *)* 17.Qb3 White missed a stunning resource: Rxe2!! 18.Nxe2 Ng4 and his coordination was destroyed. There are all sorts of tactics in the air, such as 19.Bf4 Nxf2 20.Rxf2 Bxf2+ 21.Kxf2 Qh4+ 22.Bg3 Qe4!
and Black wins because of White's inability to develop himself.]

12...Qc7
[We avoid the 12...Bd6 move order because that way White gains the annoying possibility of 13.f4! .]

13.d4 exd3 14.Nxd3 Bd6 This is an important position. Black's compensation consists of his quick development and White's clumsy pieces. The knight on d3 has jumped all over the board and it's still no good. Black will continue with moves like ...Bf5, ... Rad8, ...Rfe8 and ...c5, with a very strong initiative in the centre. **15.g3**
[15.h3 isn't nearly as effective. When Black engages in tactical motifs along the d−file, he will have the opportunity of playing ...Bh2+ instead of just going ...Bxg3. This is a clear improvement for Black. For example, Bf5 16.Nd2 Rad8 17.b4 and now Black can go Bxd3! 18.Bxd3 Bh2+ with a clear advantage.]

15...Bf5 There's nothing special about this. Black develops his pieces to active squares, while White just tries to get his pieces off the rear ranks. **16.Nd2** White decides to prevent ...Nc4 before playing the necessary b2−b4 to develop his queenside.
[Instead: 16.Be3 develops the bishop, but also exposes it. After Rfe8 17.Nd2 Black can go Nd5!?
with a complex position *(* or *17...Bxg3 18.hxg3 Rxe3 19.fxe3 Qxg3+ 20.Kh1* when we at least have a perpetual check, but probably no more than that. *)*]
[16.Bf4 doesn't solve anything either, because Rad8 17.Bxd6 Rxd6

leaves White in a bind he can't get out of.]

[White does actually develop his queenside with 16.b4 Nc4 17.Nd2 Nxd2 18.Bxd2 , but after a5 Black's positional compensation is more than sufficient. Black will follow up with ...Rfd8 and ...Ne4, with huge pressure.]

16...Rad8 17.b4 Nb7! Keeping it simple. Black is going to break with ...c5 and destroy White's pawn structure on the queenside.

[Bologan likes 17...Rfe8!? and attaches an exclamation mark to the move. Although I agree that it's a cute idea, I don't think it's theoretically better than our logical main line. The idea is that 18.bxa5 can be met with Qe7 when Black regains the piece. The position after 19.Nb4 Bxb4 20.cxb4 Qxe2 21.Qxe2 Rxe2 22.Nb3 is complex but probably about equal.]

18.Nc4

[White could also bring his knight to d4 with 18.Nf3 , but after c5 19.bxc5 Nxc5 20.Nd4 Bh3 21.Re1 Nce4 Black regains his sacrificed pawn with active and well−placed pieces. However, to be fair, White should be able to draw this with accurate play.]

18...Rfe8 19.Be3 Nd5

[Black could also go for the immediate 19...c5 when White's centre and queenside come under pressure.]

20.Bd2 c5 21.Rc1! White finds the only way to keep the balance, but then again, this is a high−level correspondence game. **21...Nf6 22.Re1 Bf8** Maximizing the pressure along the central files. **23.Ncb2 Qd7 24.Be3 Ng4 25.Bxc5 Nxc5 26.bxc5 Qc8** With Black's pressure mounting, White has to liquidate to try and save the draw. **27.Qa4 Re4 28.Qxa7** Black is now three pawns down, but his grip on the position is very strong. White can't consolidate his material advantage. **28...Rd7 29.Qa5 Rxe2! 30.Rxe2 Bxd3 31.Nxd3 Rxd3 32.c6 Rd6 33.c7 Rc6 34.Qa4 Rxc7 35.Re8 Qf5 36.Qf4** . At this point this ridiculously well−played correspondence game ended in a shared point. The players probably analysed it down to a draw, but in a practical game I wouldn't mind playing on with the black pieces.

GBR corr 1890
[Fraser]

Myers: This is Game #15 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident

that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3 d5

[Another idea which is worth mentioning is Romanishin's 6...d6 7.c3 and now d5!? . Paradoxical? Yes, but certainly not to be underestimated.

A) A key point to appreciate is that in some lines - those in which White targets the e5−pawn, White's extra move c2−c3 may do more harm than good. The d3−pawn lacks protection and White's queen's knight is denied access to c3. For example, 8.exd5 Nxd5 9.Re1 *(9.h3 Bf5 10.Re1 Bf6 11.Na3 Nb6!* equalizes, S. Belkhodja−L.Fressinet, Cergy Pontoise 2004*;* or *9.Nbd2?! Nf4!)* 9...Bg4! 10.h3 Bh5 11.g4 Bg6 12.Nxe5 Nxe5 13.Rxe5 c6 and White's knight is denied use of the c3−square (compare the note to Black's 9th move in the previous game).;

B) Rather than exchanging on d5, in this instance it might be wiser to build up more slowly. At least here the extra c2−c3 is going to be useful. For example, 8.Qe2 dxe4 *(*or *8...d4 9.Ba4! Bg4 10.Nbd2 dxc3 11.bxc3 Na5 12.h3 Bd7 13.Bc2 Bd6 14.d4* with some advantage, S.Kudrin−G.Kuzmin, Kusadasi 1990 *)* 9.dxe4 Bc5 *(*or *9...Bg4 10.h3 Bh5 11.Nbd2 Nd7 12.Rd1)* 10.Bg5 h6 11.Bh4 Qe7 12.Nbd2 *(*Lukacs suggests *12.Bd5 g5 13.Bg3)* 12...a6 13.Nc4 *(13.Bd5!?* is an interesting alternative *)* 13...Be6 14.Bc2 g5 15.Bg3 Bg4 16.b4 *(*if *16.h3* Black has *Nh5!?* , and here *17.Kh1 Nf4 18.Bxf4 Bxf3 19.Qxf3 exf4 20.e5!* is worth investigating *)* 16...b5 , S.Tiviakov−L.Fressinet, Wijk aan Zee 2004. Here Rybka likes the idea of

B1) in the game Tiviakov lost after 17.Ne3 Bxe3 18.Qxe3 Nh5 19.Bb3 Rad8 20.Bd5 Rd6 21.Qc5?! *(21.h3!)* 21...Bxf3 22.Bxc6?? Nf4! 23.gxf3 Qe6! 24.Bxf4 gxf4 25.Kh1 Qh3 26.Rg1+ Kh7 , with a decisive attack for Black;

B2) 17.Ncd2 , intending 17...Bb6 18.a4! when Black has problems with his b−pawn.;

C) 8.−−]

7.exd5 Nxd5 8.h3 The solid option. Now there is no annoying pin on the knight to worry about, and next up White will pressure the e5−pawn with Re1. On the other hand, Black does have an extra tempo to organize his position in another way. **8...a5** A surprising move, but actually this has become the main line. It's the sort of move that many players would disregard over the board unless they knew of its merits beforehand. The alternative approach for Black is to reinforce the defence of his e5−pawn, either with ...Bf6/...Re8 or ...f6:

[a) 8...Bf6 9.Re1 and now:

A) 9...Re8 10.Nbd2 Bf5 *(*or *10...Nb6 11.Ne4 Bf5 12.Nfg5* intending *Bg6 13.h4!?)* 11.Ne4

Bxe4 *(*the 'careful' *11...h6* turns out to be careless after *12.Bxh6!)* 12.dxe4 *(12.Rxe4* is a decent alternative *)* 12...Nf4 (S.Vratonjic−B.Lajthajm, Vrnjacka Banja 2006) and now instead of taking the knight on f4, which looks too accommodating to me, why not 13.Be3 intending Qe7 14.c3 Rad8 15.Qc2 ? I admit we're not talking about a clear edge, but White's bishop pair must count for something.;

B) 9...Be6 10.Nbd2 Nf4 11.Ba4!? Nd4 *(*Bologan thinks that *11...Ng6 12.Bxc6 bxc6 13.Ne4 Be7* gives Black counterplay, but I still prefer White's position after *14.Nfg5 Bd5 15.Qh5 h6 16.Nf3)* 12.Ne4 Ng6 13.Nxd4 exd4 14.Qh5 Be7 15.Bg5 Bd5 *(*Bologan suggests *15...f6* , but White can win a pawn here with *16.Nxf6+! Bxf6 17.Rxe6 Bxg5 18.Rxg6!)* 16.Bxe7 Nxe7 17.Re2 left White the more active in V.Bologan−V.Malaniuk, Novgorod 1995. *(*Moreover *17.Nc5!?* might be even stronger. *)*;

C) 9...−−]

[b) 8...Be6 9.Re1 Bf6 transposes to the previous note.]

[c) 8...Kh8 9.Re1 f6 10.c3!? *(*the typical answer to ...f6, *10.d4* , is good enough for an edge after *exd4 11.Nxd4 Bc5 12.Nxc6 bxc6 13.Qh5* , as in S.Martinovic−C.Micic, Pancevo 2003 *)* 10...Nb6?! *(*Bologan gives *10...Bf5 11.d4! exd4 12.Nh4 Bxb1 13.Rxb1 f5 14.Nf3 Bf6 15.cxd4 Qd6 16.Bg5! Rad8 17.Bxf6 Nxf6 18.Ne5 Nd5 19.Rc1* with a small advantage for White *)* 11.d4 exd4 12.cxd4 Nb4 13.Nc3 c6 14.Qe2 , V.Bologan−G.Garcia, Wijk aan Zee 1996. White has a dream IQP position, and a significant advantage, simply because of Black's chronic weakness down the a2−g8 diagonal.]

9.a3!

[Black's idea with 8...a5 is to force the bishop on b3 off the diagonal and into a kind of no man's land. For example, 9.Re1 is met by a4 intending 10.Bc4 Nb6! 11.Bb5 Nd4! and it doesn't take long to realize that things are not going White's way. So White normally makes sure the bishop can stay on the diagonal, either by playing 9 a3 or 9 a4.]

[9.a4 Nd4! 10.Nxd4 *(10.Nxe5? Nxb3 11.cxb3* cripples White's pawns *)* 10...exd4 is proving to be very solid for Black.

A) White has been making no headway here. For example, 11.Qf3 Be6 12.Nd2 Nb4 with equality, A. Dyakov−P.Leisebein, correspondence 2004.;

B) Karjakin played 11.Re1 against Gelfand (Khanty−Mansiysk, 2009) but this was answered by some inspiration: Ra6!! . The point behind this piece offer is that after 12.Bxd5 *(*in the game Karjakin chose *12.Qh5* , but after *Nb4 13.Na3 Rg6* it was Black who held the initiative *)* 12...Qxd5 13.Rxe7 Rg6 White is in some trouble - analysis suggests that Black has at least perpetual check. Overall, giving Black the b4−square seems to make life too easy for him.;

C) 11.−−]

9...a4
[The difference here is that 9...Nd4 can be met by 10.Ba2! and there is no ...Nb4 to worry about. Black appears to be active but this is only temporary, and there remain long−term issues regarding the safety of the e5−pawn. White has good chances of an advantage here. For example, Nxf3+ 11.Qxf3 c6 12.Re1 Qc7 13.Qg3 Bf6 14.Nd2 g6 15.Nf3 Re8 16.d4! e4 17.Qxc7 Nxc7 18.Ng5 Bxg5 19.Bxg5 with the bishop pair and some weak dark squares to target, I.Almasi−R.Shabtai, Budapest 1994.]
[9...Be6 10.Re1 Bf6 is similar to 8... Bf6, above: 11.Nbd2 h6 *(*I think *11...a4!? 12.Ba2 Nf4* is a better chance for equality *)* 12.Ne4 Be7 13.c3 Bd6 14.Ba4 (this move, again!) Nde7 15.Be3 Rb8 *(*or *15...f5 16.Nc5!)* 16.d4 exd4 17.Nxd4 Nxd4 18.Bxd4 (White will take on d6 and rely on his bishop pair for an edge, which increases quite quickly...) Nf5 19.Nxd6 Nxd6 20.Qf3 Qh4? 21.Re5! Nc4? 22.Rh5 Qe7 23.Bxg7! Kxg7 24.Qg3+ Kh7 25.Qf4 and Black resigned, Z.Efimenko−M.Kravtsiv, Alushta 2007.]
10.Ba2 Kh8 Preparing ...f6.
[10...f5? is too ambitious, and in fact White has a nice trick which wins a pawn: 11.Nc3 Be6 12.Nxe5! Nxe5 13.Re1 and now Bf6 *(*or *13...Qd6 14.Nb5)* 14.d4 .]
11.Re1 f6 12.d4
[As usual, meeting ...f6 with d4 is the best chance to gain an edge, albeit a slight one. 12.Nbd2 Bc5 13.Ne4 Bb6 14.c3 Bf5 15.Nh4 Be6 is typically solid for Black, S.Martinovic−A.Kizov, Zlatibor 2007.]
12...exd4 13.Nxd4 Ndb4 14.axb4
[I wonder whether White can pose more problems with 14.Nxc6 here. After Nxc6 15.Nc3 Black's slight weaknesses remain, and the knight is more actively placed on c3. There's the issue of what to do about Qxd1 16.Rxd1 Bf5 , but I think 17.Bf4 still gives Black some work to do. If Bxc2 there follows 18.Rd2 *(*or *18.Rd7)* 18...Bb3 19.Bxb3 axb3 20.Bxc7 and Black still hasn't fully equalized.]
14...Qxd4 15.c3 Qxd1 16.Rxd1 Bf5 17.Na3 With slight weaknesses on a4 and c7, Black has to be careful. However, with accurate defence, as Kasparov displays here, it looks like he should be okay. **17...Ne5 18.Nb5 c5 19.bxc5 Bxc5 20.Nd4 Rfd8 21.Be3 Bg6 22.Rd2 Bf7 23.Bxf7 Nxf7 24.Re2 Bxd4 25.Bxd4 Nd6 26.Bb6 Rdc8 27.Re7 h6 28.Bd4 b5 29.Rae1 Nf5 30.Rb7 Nxd4 31.cxd4 Rcb8! 32.Ree7 b4 33.Rxg7 Rxb7 34.Rxb7 a3 35.bxa3 bxa3 36.Rb1 a2 37.Ra1 Kg7 38.Kf1 Kf7 39.Ke2 Ke6 40.Kd3 Kd5 41.Kc3**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3 d5
[Another idea which is worth mentioning is Romanishin's 6...d6

7.c3 and now d5!? . Paradoxical? Yes, but certainly not to be underestimated.

A) . A key point to appreciate is that in some lines − those in which White targets the e5−pawn, White's extra move c2−c3 may do more harm than good. The d3−pawn lacks protection and White's queen's knight is denied access to c3. For example, 8.exd5 Nxd5 9.Re1 *(9.h3 Bf5 10.Re1 Bf6 11.Na3 Nb6!* equalizes, S. Belkhodja−L.Fressinet, Cergy Pontoise 2004*;* or *9.Nbd2?! Nf4!)* 9...Bg4! 10.h3 Bh5 11.g4 Bg6 12.Nxe5 Nxe5 13.Rxe5 c6 and White's knight is denied use of the c3−square (compare the note to Black's 9th move in the previous game).;

B) . Rather than exchanging on d5, in this instance it might be wiser to build up more slowly. At least here the extra c2−c3 is going to be useful. For example, 8.Qe2 dxe4 *(*or *8...d4 9.Ba4! Bg4 10.Nbd2 dxc3 11.bxc3 Na5 12.h3 Bd7 13.Bc2 Bd6 14.d4* with some advantage, S.Kudrin−G.Kuzmin, Kusadasi 1990 *)* 9.dxe4 Bc5 *(*or *9...Bg4 10.h3 Bh5 11.Nbd2 Nd7 12.Rd1)* 10.Bg5 h6 11.Bh4 Qe7 12.Nbd2 *(*Lukacs suggests *12.Bd5 g5 13.Bg3)* 12...a6 13.Nc4 *(13.Bd5!?* is an interesting alternative *)* 13...Be6 14.Bc2 g5 15.Bg3 Bg4 16.b4 *(*if *16.h3* Black has *Nh5!?* , and here *17.Kh1 Nf4 18.Bxf4 Bxf3 19.Qxf3 exf4 20.e5!* is worth investigating *)* 16...b5 , S.Tiviakov−L.Fressinet, Wijk aan Zee 2004.

B1) . In the game Tiviakov lost after 17.Ne3 Bxe3 18.Qxe3 Nh5 19.Bb3 Rad8 20.Bd5 Rd6 21.Qc5?! *(21.h3!)* 21...Bxf3 22.Bxc6?? Nf4! 23.gxf3 Qe6! 24.Bxf4 gxf4 25.Kh1 Qh3 26.Rg1+ Kh7 , with a decisive attack for Black.;

B2) . Here Rybka likes the idea of 17.Ncd2 , intending Bb6 18.a4! when Black has problems with his b−pawn.;

B3) 17.−−;

C) 8.−−]

7.exd5 Nxd5 8.h3 The solid option. Now there is no annoying pin on the knight to worry about, and next up White will pressure the e5−pawn with Re1. On the other hand, Black does have an extra tempo to organize his position in another way. **8...a5** A surprising move, but actually this has become the main line. It's the sort of move that many players would disregard over the board unless they knew of its merits beforehand. The alternative approach for Black is to reinforce the defence of his e5−pawn, either with ...Bf6/...Re8 or ...f6:

[8...Bf6 9.Re1 and now:

A) 9...Re8 10.Nbd2 Bf5 *(*or *10...Nb6 11.Ne4 Bf5 12.Nfg5* intending *Bg6 13.h4!?)* 11.Ne4 Bxe4 *(*the 'careful' *11...h6* turns out to be careless after *12.Bxh6!)* 12.dxe4 *(12.Rxe4* is a decent alternative *)* 12...Nf4 (S.Vratonjic−B.Lajthajm, Vrnjacka Banja 2006) and now instead of taking the knight on f4, which looks too accommodating to me, why not 13.Be3 intending Qe7 14.c3 Rad8

15.Qc2 ? I admit we're not talking about a clear edge, but White's bishop pair must count for something.;
B) 9...Be6 10.Nbd2 Nf4 11.Ba4!? Nd4 *(*Bologan thinks that *11...Ng6 12.Bxc6 bxc6 13.Ne4 Be7* gives Black counterplay, but I still prefer White's position after *14.Nfg5 Bd5 15.Qh5 h6 16.Nf3)* 12.Ne4 Ng6 13.Nxd4 exd4 14.Qh5 Be7 15.Bg5 Bd5 *(*Bologan suggests *15...f6* , but White can win a pawn here with *16.Nxf6+! Bxf6 17.Rxe6 Bxg5 18.Rxg6!)* 16.Bxe7 Nxe7 17.Re2 left White the more active in V.Bologan−V.Malaniuk, Novgorod 1995. *(*Moreover *17.Nc5!?* might be even stronger. *)*;
C) 9...−−]

[8...Be6 9.Re1 Bf6 transposes to the previous note.]

[8...Kh8 9.Re1 f6 10.c3!? *(*the typical answer to ...f6, *10.d4* , is good enough for an edge after *exd4 11.Nxd4 Bc5 12.Nxc6 bxc6 13.Qh5* , as in S.Martinovic−C.Micic, Pancevo 2003 *)* 10...Nb6?! *(*Bologan gives *10...Bf5 11.d4! exd4 12.Nh4 Bxb1 13.Rxb1 f5 14.Nf3 Bf6 15.cxd4 Qd6 16.Bg5! Rad8 17.Bxf6 Nxf6 18.Ne5 Nd5 19.Rc1* with a small advantage for White *)* 11.d4 exd4 12.cxd4 Nb4 13.Nc3 c6 14.Qe2 , V.Bologan−G.Garcia, Wijk aan Zee 1996. White has a dream IQP position, and a significant advantage, simply because of Black's chronic weakness down the a2−g8 diagonal.]

9.a3!

[Black's idea with 8...a5 is to force the bishop on b3 off the diagonal and into a kind of no man's land. For example, 9.Re1 is met by a4 intending 10.Bc4 Nb6! 11.Bb5 Nd4! and it doesn't take long to realize that things are not going White's way. So White normally makes sure the bishop can stay on the diagonal, either by playing 9 a3 or 9 a4.]

[9.a4 Nd4! 10.Nxd4 *(10.Nxe5? Nxb3 11.cxb3* cripples White's pawns *)* 10...exd4 is proving to be very solid for Black. White has been making no headway here.
A) . For example, 11.Qf3 Be6 12.Nd2 Nb4 with equality, A. Dyakov−P.Leisebein, correspondence 2004.;
B) . Karjakin played 11.Re1 against Gelfand (Khanty−Mansiysk, 2009) but this was answered by some inspiration: Ra6!! . The point behind this piece offer is that after 12.Bxd5 *(*in the game Karjakin chose *12.Qh5* , but after *Nb4 13.Na3 Rg6* it was Black who held the initiative *)* 12...Qxd5 13.Rxe7 Rg6 White is in some trouble − analysis suggests that Black has at least perpetual check. Overall, giving Black the b4−square seems to make life too easy for him.;
C) 11.−−]

9...a4

[The difference here is that 9...Nd4 can be met by 10.Ba2! and there is no ...Nb4 to worry about. Black appears to be active but this is only temporary, and there remain long−term issues regarding the safety of the e5−pawn. White has good chances of an advantage here. For example,

Nxf3+ 11.Qxf3 c6 12.Re1 Qc7 13.Qg3 Bf6 14.Nd2 g6 15.Nf3 Re8 16.d4! e4 17.Qxc7 Nxc7 18.Ng5 Bxg5 19.Bxg5 with the bishop pair and some weak dark squares to target, I.Almasi−R.Shabtai, Budapest 1994.]
[9...Be6 10.Re1 Bf6 is similar to 8... Bf6, above: 11.Nbd2 h6 *(*I think *11...a4!? 12.Ba2 Nf4* is a better chance for equality *)* 12.Ne4 Be7 13.c3 Bd6 14.Ba4 (this move, again!) Nde7 15.Be3 Rb8 *(*or *15...f5 16.Nc5!)* 16.d4 exd4 17.Nxd4 Nxd4 18.Bxd4 (White will take on d6 and rely on his bishop pair for an edge, which increases quite quickly...) Nf5 19.Nxd6 Nxd6 20.Qf3 Qh4? 21.Re5! Nc4? 22.Rh5 Qe7 23.Bxg7! Kxg7 24.Qg3+ Kh7 25.Qf4 and Black resigned, Z.Efimenko−M.Kravtsiv, Alushta 2007.]

10.Ba2 Kh8 Preparing ...f6.
[10...f5? is too ambitious, and in fact White has a nice trick which wins a pawn: 11.Nc3 Be6 12.Nxe5! Nxe5 13.Re1 and now Bf6 *(*or *13...Qd6 14.Nb5)* 14.d4 .]

11.Re1 f6 12.d4 As usual, meeting ...f6 with d4 is the best chance to gain an edge, albeit a slight one.
[12.Nbd2 Bc5 13.Ne4 Bb6 14.c3 Bf5 15.Nh4 Be6 is typically solid for Black, S.Martinovic−A.Kizov, Zlatibor 2007.]

12...exd4 13.Nxd4 Ndb4 14.axb4
[I wonder whether White can pose more problems with 14.Nxc6 here. After Nxc6 15.Nc3 Black's slight weaknesses remain, and the knight is more actively placed on c3. There's the issue of what to do about Qxd1 16.Rxd1 Bf5 , but I think 17.Bf4 still gives Black some work to do. If Bxc2 there follows 18.Rd2 *(*or *18.Rd7)* 18...Bb3 19.Bxb3 axb3 20.Bxc7 and Black still hasn't fully equalized.]

14...Qxd4 15.c3 Qxd1 16.Rxd1 Bf5 17.Na3 With slight weaknesses on a4 and c7, Black has to be careful. However, with accurate defence, as Kasparov displays here, it looks like he should be okay. **17...Ne5 18.Nb5 c5 19.bxc5 Bxc5 20.Nd4 Rfd8 21.Be3 Bg6 22.Rd2 Bf7 23.Bxf7 Nxf7 24.Re2 Bxd4 25.Bxd4 Nd6 26.Bb6 Rdc8 27.Re7 h6 28.Bd4 b5 29.Rae1 Nf5 30.Rb7 Nxd4 31.cxd4 Rcb8! 32.Ree7 b4 33.Rxg7 Rxb7 34.Rxb7 a3 35.bxa3 bxa3 36.Rb1 a2 37.Ra1 Kg7 38.Kf1 Kf7 39.Ke2 Ke6 40.Kd3 Kd5 41.Kc3**

□ **Rohde,Hans Dietrich**
■ **Morss,Mark F**
WT/M/GT/365 corr ICCF 1996
[Morss]

In this game my opponent was Hans−Dietrich Rohde of Kirchheim, Germany.
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Be2 h6 9.Nf3 e4 10.Ne5 Bd6 11.f4
[11.d4 exd3 12.Nxd3 Qc7 13.b3 0−0 14.Bb2 is a major alternative for White]

11...exf3
[11...Qc7 is playable, for example 12.0−0 0−0 13.Nc3 Bf5 14.a3 Nd5! Timman−Gligoric, Bad Lauterberg 1977]

12.Nxf3 0−0 13.d4 Qc7
[13...c5!?]

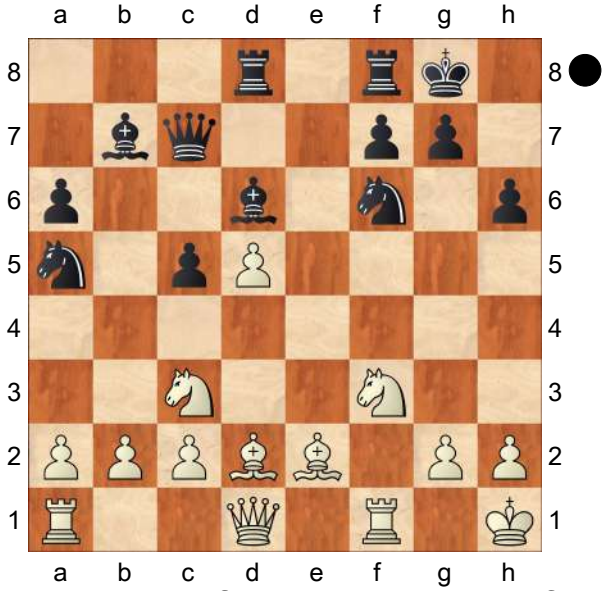
14.0−0 c5 15.Nc3 a6 16.d5 Bb7
With this move, I was following a couple of games by Lengyel.
[16...Re8 17.Kh1 Rb8 18.a3 Ng4 19.h3 Ne3 20.Bxe3 Rxe3 21.Rb1 Qe7 was Estrin−Levin fish, USSR 1949. The judgment of Gligoric in ECO−2 is that Black has plenty for his pawn.]

17.Kh1 Rad8
[Possibly better is 17...Rfe8
A) 18.Bd2 Ng4! and White's 18th

move appears to have been a waste of time *(18...Rad8* see note to Black's 18th in the game*; 18...Rab8 19.b3!* with advantage to White *)*;
B) 18.Nh4 Be5 19.Nf5 Rad8 20.Bxh6 Nxd5 21.Bd3 Nxc3 22.Qg4 Qc6 23.Bxg7 Qxg2+! was satisfactory for Black in Estrin−Letic, postal 1964]

18.Bd2! This is new, so far as I know, and it is a very strong challenge to 16... Bb7.

[18.Nh4 Be5 19.Nf5 Nxd5 20.Nxd5 Bxd5 21.Qe1 Rfe8 22.Qh4 Re6 was equal in Bagirov−Lengyel, Beverwijk 1965]
[18.Be3 1/2−1/2 was Estrin−Lengyel, Lublin 1971]



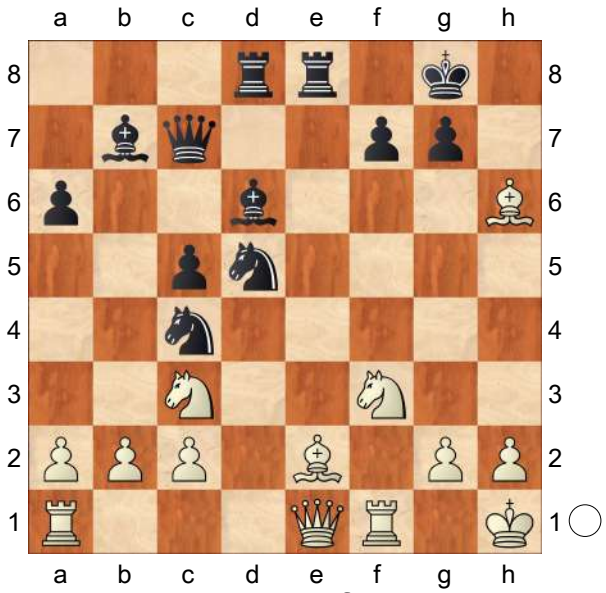
Game position after 18. Bd2. **18...Bf4**
I played this move after coming to the conclusion that it was very imprortant to prevent White from forming the battery Qe1, Bd2 against Black's rim−knight.

[More natural, but apparently no better, was 18...Rfe8

A) 19.a3

A1) 19...Bf4 20.Re1 *(20.Bxf4 Qxf4* is even *)* 20...Bxd2 21.Qxd2 Bxd5 *(21...Nxd5 22.Bxa6 Nxc3 23.Rxe8+ Rxe8 24.Bxb7 Na4 25.Re1* favors White *)* 22.Nxd5 Rxd5 with an even game;
A2) 19...Nxd5? 20.Nxd5 Bxd5 21.Bxa5 Qxa5 22.Qxd5 Rxe2 23.Nd4;

B) But White can simply go ahead and play 19.Qe1! in view of Nc4?! *(19...Bf4 20.Bxf4 Qxf4* transposes back into the game *)* 20.Bxh6! Nxd5



Analysis position after 20...Nxd5.

B1) 21.Nxd5 Bxd5 22.Qc3 *(22.Bg5! f6 23.Rd1* see B2 *)* 22...Be5! *(22...Ne5 23.Bg5 f6 24.Bf4 Ng4 25.Bxd6 Qxd6 26.Bc4* favors White *)* 23.Nxe5 Qxe5 24.Qxe5 Rxe5 25.Bxc4 Bxc4 26.Bf4 Re2 with equality;
B2) 21.Bg5! f6 22.Nxd5 Bxd5 23.Rd1 fxg5 *(23...Bf7 24.Bc1* and Black has nothing to compensate for his pawn *)* 24.Rxd5 Ne3 25.Rxg5 Bf4 *(25...Nxf1? 26.Bc4+)* 26.Qh4 c4 27.Rh5! Nxf1 28.Ng5! Kf8

29.Bxf1 and White has a very powerful initiative;

C) 19.b3 Bf4! *(19...Nxd5? 20.Nxd5 Bxd5 21.Bxa5 Qxa5 22.Qxd5 Rxe2 23.Nd4; 19...Bf8? 20.Qe1* and the rim−knight is quite vulnerable *)* 20.Bxf4 *(20.Bc4? Nxc4 21.bxc4 Ng4!)* 20...Qxf4 21.Bd3 Nxd5 with an even game]

19.Bxf4 Qxf4 20.Qe1 Rfe8 21.Nd2 This is innacurate, but it makes no difference, since Black has nothing better than to allow the previous position to be repeated. **21...Qg5**

[21...Qd6 22.Qf2 Bxd5 23.Rad1 Qe5 *(23...Re5 24.Nc4 Nxc4 25.Bxc4* also favors White *)* 24.Nf3 Bxf3 25.Qxf3 and Black doesn't have enough play to make up for his inferior pawns.]

[21...Qc7? 22.Rxf6 gxf6 23.Nde4]

22.Nf3 Qf4 Black has nothing better than to repeat the position.

[22...Qe3 Less efficient would be

A) 23.Rd1! Nxd5 *(23...c4 24.d6)* 24.Nxd5 Bxd5 25.Bxa6 is significantly better for White;

B) 23.Bd3 c4 24.Qxe3 Rxe3 25.Bf5 g6 26.Bh3 Nxd5 and the game is approximately even.]

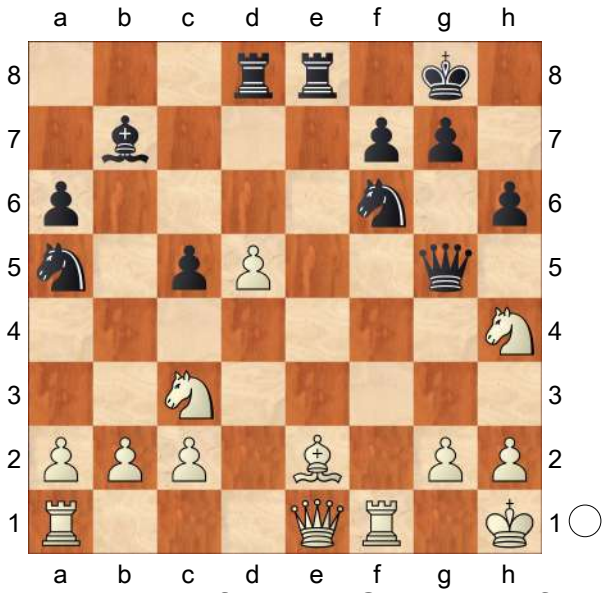
23.Nh4! This time White finds the best move.

[23.Rd1 Qb4 24.b3 Nxd5 25.Nxd5 Rxd5 with approximate equality]

23...Qg5

[23...Qc7 24.Rxf6! gxf6 25.Nf5 Qf4 26.Qf1! and the exchange−down ending is nevertheless very good for White.]

(Diagram)



Game position after 23...Qg5. **24.Rf5**

[I believe White can obtain the advantage with 24.Qf2!

A) 24...Bxd5 25.Nxd5 Rxd5 26.Bxa6 Rd2 27.Qf4 Qxf4 28.Rxf4 Rxc2 29.Ra4 Nc6 *(29...Re4? 30.Rxa5 Rxh4 31.Bd3)* 30.Bb5 Rc8 31.Nf5 looks good for White;

B) 24...c4 25.Rad1 Bxd5 26.Nxd5 Rxd5 27.Rxd5 Qxd5 28.Nf5 Although the material is even, Black has nothing to compensate for his inferior pawn structure. Also, White's knight is beautifully posted.]

24...Qe3 25.Qf1

[25.Rd1 Nc4 and the rim−knight gets back into the game.]

25...Qd4

[25...Nxd5? 26.Rxf7 Nxc3 27.Rxg7+! is a disaster.]

26.Rf4

[26.Nf3 Qb4 27.Rb1 Nxd5 and the game is even.]

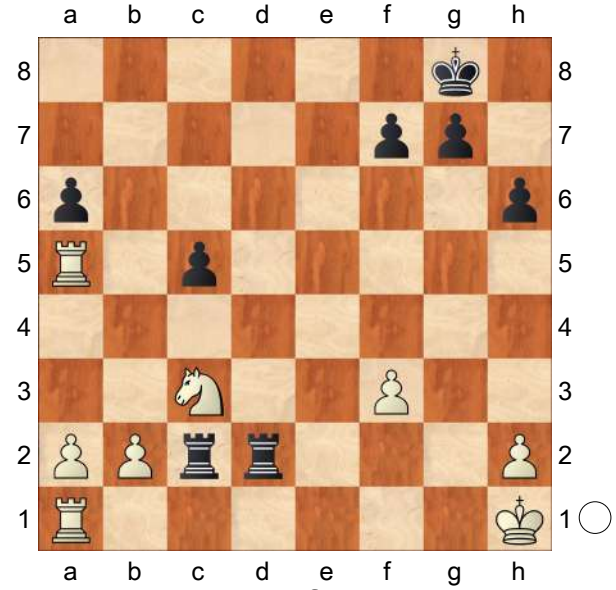
26...Qe5 27.Ra4 Nxd5 28.Nf3

[28.Rxa5 Nxc3 29.Bxa6 *(29.Bc4 Nd5 30.Rd1 Qf6* is also even *)*

29...Bxa6 30.Rxa6 Nd1 31.Nf3 Qe2 Black's more active pieces compensate for his material disadvantage.]
[28.Nxd5 Rxd5 29.Bd3 c4 30.Bxc4 Nxc4 31.Rxc4 *(31.Qxc4? Bc6!)* 31...Rd2 is at least equal for Black]

28...Qe6 29.Rxa5

[29.Nxd5 Qxe2 30.Qxe2 Rxe2 31.Nc3 Rxc2 32.Rxa5 Bxf3 33.gxf3 Rdd2



Analysis position after 33...Rdd2. Black has sufficient compensation for his missing piece.]

29...Nxc3 30.Bxa6 Bxf3 31.bxc3

[31.gxf3? Qb6]
[31.Qxf3 Nd1 32.Bf1 Qe1 33.Ra7 Rf8 34.Kg1 Qd2 35.Bd3 *(35.Kh1 Nf2+ 36.Kg1 Nd1=)* 35...Qe1+ 36.Bf1 Qd2=]

31...Ba8

[Less clear but seemingly adequate is 31...Qb6 32.Ra3 Be4 and now:
A) 33.Bc4 Re7 34.Rb3 *(34.Rb1? Bxg2+ 35.Kxg2 Rd2+ 36.Kh1 Qc6+ 37.Kg1 Qg6+ 38.Kh1 Qe4+ 39.Kg1 Qe3+ 40.Kh1 Qe5 41.Qh3 Qe4+ 42.Kg1 Qxc4)* 34...Qg6 35.Qf2 Re5 and it appears that Black's initiative is worth more than White's pawn.;
B) 33.Bd3 Bxd3 34.cxd3 Rxd3 35.Qxd3 Qb2 with an approximately equal game.;
C) 33.Bb5? Bxg2+]

32.Bd3

[32.Bc4 Bxg2+ is similar to the game continuation.]

32...c4 33.Bxc4 Bxg2+ 34.Kxg2 Rd2+ 35.Kg1 Qg4+

½–½

C55

□ **Ragozin,Viacheslav**
■ **Kortschnoj,Viktor Lvovich**
Leningrad sim 1945
[Petronijevic,Zoran]

The simul master, Ragozin, was one of the best Sowiet players. He was well−known as Botvinnik's second. At the time this simul was played, Kortschnoj was at the beginning of his chess career.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Be7

The Hungarian Defence gives Black a passive but firm play. **4.0−0**

[Nowadays, the move 4.d4 is considered to be best.]

4...Nf6 5.d4

[Interesting is 5.d3!?]

5...d6?!

[More accurate was 5...exd4]

6.dxe5?!

[Such imprecise moves are often played in the simuls. Preferable was 6.d5 after which White has a slight edge.]

6...Nxe5 7.Nxe5 dxe5 8.Qe2

[Interesting is 8.Qxd8+ Bxd8 9.f3]

8...0−0

[Tempting is 8...Qd4!? although after 9.Nd2 Bg4 10.Qe1 0−0 11.h3± White has a slight edge.]

9.Rd1 Bd6?!

[Suspicous move which gives White a slight edge. Better was 9...Qe8!?]

10.Bg5

[Better was 10.Nc3±]

10...Qe7

[Preferable was 10...h6 11.Bh4 a5 and Black isn't worse.]

11.Nc3 c6 12.Rd3

[Better was 12.Qf3±]

12...Be6? This move is a clear mistake.

[Better was 12...b5! 13.Qd2 *(13.Bxb5 cxb5 14.Qd1 Rd8=)* 13...Bb4 14.Bb3 h6 15.Bxh6 Nxe4 16.Qe3 Nxc3 17.bxc3 Bc5 18.Bg5 Bxe3 19.Bxe7 Re8 20.fxe3 Rxe7 21.Rd8+ Kh7 22.Rad1 f6 23.R8d6 Bb7∞]

13.Bxe6?!

[In his book, Kortschnoj gives 13.Rf3 as a better move Bg4? *(*In fact, this move loses. After a better *13...Rad8±* White has only a slight edge. *)* 14.Bxf6 Qxf6 15.Rxf6 Bxe2 16.Rxd6? *(*One more mistake in Kortschnoj's analysis. Better was *16.Bxf7+ Rxf7 17.Rxd6+−)* 16...Bxc4 17.Rd7 According to Kortschnoj, White is preferable. However, this position is close to equal.]

[Much better was 13.Bxf6 gxf6 14.Rad1!± with a clear edge for White.]

13...Qxe6 14.Rad1?

[White misses a very strong move 14.Qf3! Be7 15.Qf5± and White is clearly better.]

14...Rfd8?

[Black also misses a better move 14...Bc5 after which Black is only slightly worse.]

15.Qf3! Very strong move which gives White a clear edge. **15...Be7 16.Qf5 Qxf5**

[If Black tries 16...h6 17.Qxe6 fxe6 18.Bh4± White will have a clear edge.]

17.exf5 Kf8 18.Bxf6 Bxf6 19.Ne4 Rxd3 20.Rxd3 Ke7

[Slightly preferable is 20...Be7 21.g4 f6 22.Kg2±]

21.f3?!

[After the best 21.g4 h6 22.Kg2 Bg5 23.Kf3± White has a clear advantage.]

21...b6 22.Kf2

[22.Rd6 seems tempting.]

22...Rd8? Objectively, this move should lose the game.

[Better was 22...Rc8 White has a clear edge, but it is the question if he can win.]

23.Ke3?

[White can win in a forced way 23.Rxd8 Kxd8 24.Nxf6 gxf6 25.Kg3 Ke7 26.Kh4 Kf8 27.Kh5 Kg7 28.c4 h6 29.b4 b5 30.cxb5 cxb5 31.h4 Kh7 32.Kg4 Kg7 33.f4 h5+ 34.Kf3 Kg8 35.Ke4 exf4 36.Kxf4 Kf8 37.Ke4+−]

23...Rxd3+ 24.Kxd3 Kd7

[Better was 24...g6 25.g4 Bh4 Black is still suffering, but after a proper play he should hold.]

25.g4

[Better was 25.Nxf6+ gxf6 26.c4 Kd6 27.a3 Kc5 28.b4+ Kd6±]

25...h6 26.b4

[Again, better is 26.Nxf6+]

26...Be7 27.c3 f6?
[Better was 27...b5]
28.a4 b5 29.a5?!
[This move leads to an even play. After a better 29.axb5 cxb5 30.Ng3 White is clearly better. However, it is hard to say if he can win. Let's see a possible line: Kd6 31.Ke4 Bf8 32.Nh5 Kc6 33.h3 a6 34.f4 Kd6 35.h4 exf4 36.Nxf4 Be7 37.Nh5 Bf8 38.Kd4 Kc6 39.Nf4 Bd6 40.Ne6 Be5+ 41.Kd3 Bg3 42.h5 Kd6 43.Nxg7 Kd5 Black is a pawn down, but his active King gives him good drawing chances.]
29...c5= 30.bxc5 Kc6 31.h4 Bxc5 32.g5 hxg5 33.hxg5 Be7 34.g6 ½−½

□ **M.Oratovsky**
■ **Y.Gozzoli**
Tarragona 2007
[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 a6 6.Nbd2 Ba7 7.Bb3 0−0 8.h3 This is basically an attempt to transpose to the main lines discussed in the previous chapter, if Black plays 8... d6. But what happens if Black advances one square further? **8...d5!** In an ideal world, Black would like to play ...d5 in one jump and with White having played Nf1, but usually he can meet both these conditions only if White plays inaccurately (for example with the move order 8 Nf1?! d5!). Even so, one out of two isn't bad, and this looks like a reliable option for Black. **9.exd5!?** White chooses Plan B: taking on d5 and relying on active piece play and pressure against Black's centre.

[9.Qe2 has been played many times, even by such players as Bologan, but the problem is that after Re8 10.Nf1 White is basically a tempo down on the main line, with Black having played ...d5 in one go.]

[If White wants to keep his options open in the centre, then committing to kingside castling with 9.0−0 is a reasonable choice, although dxe4! 10.dxe4 Qe7 does leave Black with an equal share of the chances. For example, 11.Nh2 Be6 12.Bc2 Rad8 13.Qf3 Nd7 14.Re1 f6 15.Ndf1 Qf7 , K.Shanava−M.Kobalija, Tbilisi 2009.]

9...Nxd5 10.Ne4! This is the only move to challenge Black.

[Note that one of the points behind playing ...d5 with the white knight on d2 is revealed after 10.0−0?! Nf4! , which is something White definitely needs to avoid. Compare Roy Chowdhury−Skjoldborg, where White doesn't have this problem because the knight is still on b1.]

[With the centre semi−open, 10.Nf1?! is far too slow. Either Nf4!? *(* or simply *10...Be6 11.Ng3 f6 12.0−0 Kh8)* 11.Bxf4 exf4 followed by ...Re8+ is more than okay for Black.]

10...Bf5

[10...h6? is strongly met by 11.Bxh6! . This tactical shot, intending gxh6 12.Bxd5 Qxd5 13.Nf6+ , is well worth remembering. However, Black does have two decent alternatives here:]

[a) 10...f6! 11.0−0 *(11.Be3!?)* 11...Kh8 is extremely solid (compare my game against Greet). After 12.Re1 Be6 13.Ng3 Qd7 14.Nh4 Rad8 15.Qh5 Bf7 16.Qf3 Nde7 17.Bc2 Bd5 18.Qh5 Bf7 19.Qf3 the position was equal in Xu Yuhua−N.Short, Jinan 2003.]

[b) 10...f5!? is riskier but also playable. For example, 11.0−0! Kh8

12.Neg5 h6 13.Nh4! hxg5! *(13...Nce7? 14.Re1!* is good for White - Quezada Perez *)* 14.Qh5+ Kg8 15.Bxg5 Qd6 16.c4 (R.Perez Garcia−O.Ruiz, Villa Clara 2007), and here Quezada Perez assesses Nd4! 17.cxd5 Nxb3 18.axb3 as unclear.]

11.0−0

[11.Ng3 is also possible. Bg6 12.0−0 Nf4 *(* I prefer *12...Nf6!* when the position looks equal to me *)* 13.Bxf4! exf4 14.Ne4 Bxe4 15.dxe4 Qf6 16.Qd5! proved to be better for White in V.Bologan−M.Krasenkow, Spanish Team Championship 2006.]

11...Bg6 12.Re1 Kh8 13.Ba4

[White lures the b−pawn forward to create some light−squared weaknesses on the queenside, although this does consume some time. After the more typical 13.Ng3 f6 14.Nh4 Bf7 15.Nhf5 Qd7 16.Qf3 Rad8 the position is similar to Xu Yuhua−Short, above, and the chances are level.]

13...b5 14.Bb3 f5?! This is too ambitious and too loosening; it certainly does the bishop on g6 no favours at all. Furthermore, White's set−up is well geared to meet this advance. Having said that, while looking through many games I have noticed a tendency for Black to lunge forward with ...f5 even when it's not justified. This could be caused by the natural inclination amongst many players to be always doing something, even when the best course of action is to 'do nothing'.

[14...f6! is still the best move here.]

15.Neg5 Qd6 16.Nh4! Suddenly White's pieces come to life, and Black has to deal with problems both on the kingside and in the centre. **16...Rad8**

17.Nxg6+

[17.d4! is a strong alternative, since exd4? *(* if Black plays *17...e4* , the a7−bishop is once again shut out of the game; what's more, after *18.Bxd5 Qxd5 19.Nxg6+ hxg6 20.Bf4* Black must be careful not to be mated down the h−file *)* 18.Re6! is immediately crushing.]

17...Qxg6 18.Qe2 h6 19.Nf3 Qf6

20.Nxe5!? Heading for complications.

[20.Bd2 , possibly followed up by a2−a4, leaves White with a solid edge - Black still has many light−squared weaknesses to defend.]

20...Rde8? A whole book could be written on the subject of 'the wrong rook'.

[20...Rfe8! prevents Nd7 ideas, and the resulting position after the long tactical sequence 21.Bg5! *(21.d4 Bxd4!)* 21...Rxe5! *(21...hxg5?? 22.Qh5+ Kg8 23.Bxd5+)* 22.Bxf6 Rxe2 23.Bxd8 Bxf2+ 24.Kf1 Rxe1+ 25.Rxe1 Bxe1 26.Bxd5 Nxd8 27.Kxe1 offers Black excellent drawing chances.]

21.Nd7?

[Missing an opportunity: 21.d4! Bxd4 and only then 22.Nd7 is stronger. White keeps some advantage after Rxe2 23.Rxe2 Qd6 *(23...Nxc3 24.bxc3 Qd6 25.Nxf8 Bxc3 26.Re8!! Bxa1 27.Ng6+ Kh7 28.Bf7!* wins *)* 24.Nxf8 Be5 25.Ng6+ .]

21...Rxe2 22.Rxe2 Nxc3! An important resource, which saves Black. The neat perpetual check which follows is more or less forced.

[22...Qd6 23.Nxf8 would give White a decisive advantage.]

23.bxc3 Qxc3 24.Bb2 Qxd3 25.Nxf8

[If 25.Re6 , not Qxd7?? *(* but instead *25...Qd2!* (covering h6) *26.Nxf8 Qxb2* and again White will take the perpetual check *)* 26.Rxh6#! !]

25...Qxe2 26.Ng6+ Kh7 27.Nf8+ Kh8 ½−½

GBR corr 1890
[Fraser]

Myers: This is Game #84 published in a book called "A Selection of 200 Games of Chess, Played by Correspondence, with Notes and Critical Remarks by Geo. B. Fraser, Dundee." GBF includes this short preface: "The Games which follow are selected from various Correspondence Tourneys organized under my Conductorship, between the years 1887 and 1896. With few exceptions, none of them have hitherto

appeared in print. A large majority will be found to exhibit a pleasing liveliness and animation somewhat unusual in Chess by correspondence." A fair number of these games (33) were played by GBF himself, so it is evident that he was both an avid correspondence player and an early organizer of correspondence chess events. (GBF was also an active OTB player, mainly in Scotland. For example, GBF finished a respectable second in the 1st Scottish Championship, played in Glasgow in 1884, just a half−point behind the winner.) It is not known whether the games are printed in any particular order, and no dates are provided for the games individually. I have somewhat arbitrarily assigned a date of 1890 to each game, for database purposes. **1.e4** Myers Fraser **1...e5 2.Bc4 Nf6 3.Qe2 Bc5 4.c3 d6 5.Nf3 Nc6 6.d3 h6 7.0−0 g5?** Fraser: This advance is somewhat premature.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bb6 5.a4 a6 6.Nc3 Nf6 7.d4!?
An interesting gambit which, for no apparent reason, is seldom played in tournaments. Objectively White does not get any advantage here, but the play is interesting and complicated, so there are practical chances. **7...Bxd4**
Probably the best.
[7...exd4 8.Nd5 Nxd5 9.exd5 Qe7+ 10.Kf1 gives White serious attacking possibilities. Here we should look at two options:
A) 10...Nxb4!? 11.Bg5 f6 12.Qd2! and Black is in trouble because the white rook is heading for e1. Maybe somehow Black can survive; for instance Qc5 13.Qe2+ Qe7! is worth a try, *(* as *13...Kd8? 14.Re1 Nxc2 15.Ne5 Qf8* leads to *16.d6!! d3 17.Qe4 cxd6 18.Nf7+ Kc7 19.Bf4 Nxe1 20.Qd5 Kb8 21.Bxd6+ Qxd6 22.Nxd6* and White wins. Whether White can improve his attack after 13...Qe7 is hard to judge. But the pressure is on Black all the same, and I do not recommend it. *)*;
B) 10...Ne5 11.d6 cxd6 12.Bd5 Qf6 13.Ng5 0−0 14.Ra3
B1) if 14...d3 15.f4! Ng6 *(*or *15...dxc2 16.Qxc2 g6 17.Rh3* with a strong attack *)* 16.Qh5 h6 17.Ne4 Qd4 18.Qxg6 dxc2 19.Ke2 and White wins;
B2) 14...h6 15.Ne4 Qf5 16.Rg3 Ng6 17.c4 dxc3 18.h4 c2 19.Qd2 Qh5 . Now White should continue 20.Nf6+!! *(*not *20.Rxg6? Qd1+ 21.Qe1 Kh8 22.Rg3 Qxd5 23.Bb2 Bd4 24.Bxd4 Qxd4 25.Rc3 Re8 26.f3 d5* 0−1 S.Conquest−L. Winants, Amsterdam 1996 *)* 20...gxf6 21.Bf3 Qf5 22.h5 Re8 23.hxg6 fxg6 24.Bd5+ Re6 25.Rf3 Qg5 26.Bxe6+ dxe6 27.Qxc2 with a winning position.;
C) 10...−−]
[7...Nxd4 is so far untested, but could prove to be playable. Still, White is able to create real compensation for the pawn after
A) but not 8.Nxe5? Qe7! when Black is much better, e.g. 9.Nxf7? *(9.Nd3 d5! 10.Bxd5 c6 11.Bc4 Nxe4 ,;*or *9.a5 Ba7 10.Nd3 d5! 11.Nxd5 Qxe4+ 12.Ne3 Bg4)* 9...Rf8;
B) 8.Bg5! d6 9.Nd5 and now we

have:
B1) 9...Bg4 10.c3 Nxf3+ 11.gxf3 Bh3 12.Qb3! and suddenly Black cannot protect himself without returning the pawn in an inferior position.;
B2) 9...c6 10.Bxf6 gxf6 11.Nxb6 Qxb6 12.c3 Nxf3+ 13.Qxf3 f5 14.0−0!? with decent compensation for the pawn. White is at least not worse. *(14.−−)*;
B3) 9...−−]

8.Nxd4 Nxd4 9.f4 d6 10.0−0
[The less ambitious 10.fxe5 dxe5 11.Bg5 has also been tried: Be6 12.Nd5 c6 13.Nxf6+ gxf6 14.Bxe6 fxg5 15.Bc4 Ne6! , and now White should play the humble 16.Bxe6 *(*instead of the sharp *16.Qh5? 0−0 17.c3 Nf4 18.Qf3 b5 19.Bb3 Qd3* where Black is much better, R.Leyva−F.De la Paz, Cienfuegos 1997 *)* 16...Qxd1+ 17.Rxd1 fxe6 with good drawing chances.]

10...h6
[White is quite ready for 10...Be6 11.Bxe6 *(*weaker is *11.Nd5?! Nxe4 12.Qd3 c6 13.Ne3 d5 14.fxe5 dxc4 15.Qxe4 Ne2+ 16.Kh1 Qd4 17.Qxd4 Nxd4 18.Bb2 0−0−0* and Black is better, R.Leyva−J.Olivera, Holguin 1999 *)* 11...fxe6 12.Be3 Nc6 13.b5 axb5 14.axb5 Rxa1 15.Qxa1 with the initiative.]

11.fxe5
[11.Nd5!? Nxd5 12.Bxd5 0−0 13.c3 Nc6 was tried out in J.Palkovi−P.Acs, Budapest 1997, continuing 14.f5?! *(*White should prefer *14.Bxc6! bxc6 15.fxe5 dxe5 16.Qh5 Qe7 17.Be3* and White has some initiative here *)* 14...Qf6 15.Qh5 Ne7 16.g4?! *(*instead *16.Bb3* and Black is only slightly better *)* 16...Nxd5 17.exd5 e4 18.g5 Qe5 19.gxh6 g6 20.h7+ Kh8 21.Qh4 Bxf5 and Black had a clear advantage.]

11...dxe5 12.Nd5 Be6
[12...Nxd5?! 13.Bxd5 gives Black some trouble, e.g. 0−0?! *(13...Rf8 14.Qh5* with an attack *)* 14.Qh5 Qe7 15.Bxh6! when White regains the material and still has an attack.]

13.Nxf6+ gxf6 14.Bd3 White should not force the play yet.
[After 14.Bxe6 Nxe6 15.Qf3 Nd4 16.Qxf6 Qxf6 17.Rxf6 Nxc2 18.Rb1 Nd4 19.Rxh6 Rxh6 20.Bxh6 Ke7 Black is perhaps slightly better because of the powerful knight on d4.]

14...Nb3 15.Rb1 Black has now escaped from the opening with a pleasant equality, but the game is still going, and the two players are still comparing their abilities.
[15.cxb3? is met by Qd4+ 16.Be3 Qxe3+ 17.Kh1 0−0−0 18.Rf3 Qd4 with a clear advantage.]

15...Nxc1 16.Qxc1 Qd4+ 17.Kh1 f5 18.exf5 Bd5 19.Be2 0−0−0 20.c3 Qe4 21.Bf3 Qd3 22.Bxd5 Rxd5 23.Rd1 Qxd1+ 24.Qxd1 Rxd1+ 25.Rxd1 Rd8 26.Re1?!
[The pawn ending looks bad for White, but it is a draw! See for yourself: 26.Rxd8+! Kxd8 27.g4 Kd7 28.Kg2 Kd6 29.Kf3 b5 30.axb5 axb5 31.h4 f6 32.Ke4 c6 33.Kf3 Kd5 34.Ke3 and Black cannot make progress.]

26...f6 27.Kg1 Rg8
[27...Rd3 would allow 28.Re4! *(*after the passive *28.Rc1 Kd7*

Black is much better *)* 28...Rxc3 29.Rh4 Rb3 30.Rxh6 Rxb4 31.Rxf6 Rxa4 32.Re6 Re4 33.g3 with enough counterplay for a draw.]

28.Re4 h5 29.h3 Rg5 30.g4 Kd7 31.Kf2 hxg4 32.hxg4 Kd6 33.Kf3 Rg7 34.Re1!

[If 34.c4 a5! and Black has good winning chances.]

34...Kd5 35.Rh1 Kc4 36.Rh6 Rf7 37.Ke4 Kxc3 38.Rxf6!! This is the beautiful idea White has planned for some moves. Remember Euwe's rule: when two connected passed pawns have a total of four moves combined to reach the back row, the rook is no longer able to stop them on its own.

38...Rxf6 39.g5 Rb6 The correct defence.

[If 39...Rf8? 40.Kxe5 Kxb4 41.f6 Re8+ 42.Kf5 Kxa4 43.g6 and White wins.]

40.f6 Rxb4+ 41.Kxe5 Rg4! Black finds the draw. He is able to set up a simple fortress that cannot be broken. In the remainder of the game he needs to make one accurate move, but it would not have been unfair had White stopped playing for a win around here. **42.f7 Rxg5+ 43.Ke4 Rg4+ 44.Ke3 Rxa4 45.f8Q Kb3 46.Qc8 b5** This is the fortress. **47.Qxc7 Rc4 48.Qb6 Rc3+ 49.Kd4 Rc4+ 50.Kd5 b4 51.Qxa6 Rc3 52.Qa1 Rc8 53.Qf1 Rc3 54.Kd4 Ka3 55.Qa6+ Kb3 56.Qa5 Rc1 57.Qd5+ Ka3 58.Qa5+ Kb3 59.Kd3 Rc8 60.Qa6 Rc7 61.Qe6+ Ka3 62.Kd2 Rc5 63.Qd6 Rc3 64.Qd5 Rc8 65.Kd3 Rc1 66.Qa5+ Kb3 67.Kd4 Rc4+ 68.Kd5 Rc1 69.Kd6 Rc2 70.Qa1 Rc3 71.Kd7 Rc5 72.Kd6 Rc3 73.Kd5 Rc7 74.Qd1+ Ka3 75.Qa1+ Kb3 76.Kd6 Rc3 77.Qe1 Ka3** ½−½

□ **Dominguez Perez,L..**
■ **Van Wely,L..**
Wijk aan Zee (2) 15.01.2014
[Chris Ward]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 At first glance it looks as though the knight is misplaced here but we know from White's perspective this line is all about developing pieces at the expense of the black queen and from a3 the white knight has both c4 and b5 at its disposal.
6...d5 Incredibly Van Wely thought for 52 minutes before playing this move and I find it incredible that he seemingly

wasn't prepared for this possibility. We haven't looked at this position for a while on ChessPublishing but as far as I can make out our old conclusions pretty much stand firm: **7.Bb5** I guess White assumed that he was gaining a risk free edge with this but upon reflection the advantage seems minimal. Far more logical would be to continue hassling the black queen whilst improving the position of the other pieces. Yes, **7...Ne4 8.cxd4 Bb6 9.Nc3 0−0** Next then is whether the pawn on d6 is going to be a permanent thorn or ultimately rounded up! **10.Be3 Bg4** The scenario with the knights on the queenside certainly suits White whose steed supports the d6− pawn whilst eyeing up the c7−square, whilst its opposite number has a completely defensive role for now on a square that Black would like to push a pawn! **11.h3** This advance is also very natural. Clearly ...b6 is a move that Black is going to need to play in the future so clamping Black's queenside is very logical. **11...Bh5 12.Qc2 Nxc3** Most would have expected ... b6 with a5 but in fact it was the other way around, with the outcome being the same!

[12...Bg6]

13.bxc3 f6 14.exf6 Qxf6 Suddenly this knight springs to life with the b3−square on its 'to do' list. **15.Be2 Na5 16.0−0 Bxf3**

[16...Rae8]

17.Bxf3 c6 18.Rae1

[18.Be2 Nc4 19.Bd3 Nxe3 20.Bxh7+ Kh8 21.fxe3 Qh6 22.Bg6 Qxe3+ 23.Kh1 Bc7]

18...Nc4 19.Bc1 Bc7 Seemingly passive, in fact this frees the knight of the d−pawn defending duties in order to go on the offensive (via e4).

[19...Rae8 20.Be2 Re6 21.Bd3 g6 *(21...h6 22.f4 c5 23.dxc5 Bxc5+ 24.Kh1 Bb6 25.Rxe6 Qxe6 26.Qe2 Qxe2 27.Bxe2 Nd6 28.Kh2 Ne4)* 22.Bg5 Qf7 23.Rxe6 Qxe6 24.Qb1 Re8 25.h4]

20.Bg4

[20.Be2]

20...Rae8 Yep the knight is pretty active here and of course the Dragon bishop is brought into play too. **21.g3**

[21.Bf5 but concluded that after 5 Nc3, then 5...Nf6 would be more prudent with 5...Qxc5 a bit suspect and allowing the tricky and promising 6 Nd5!?. g6 22.Bd3 Kg7]

21...Bd6 Simply threatening to take on c4 and then on b2 and maybe on d6 too!

[21...Qf7 as in this site's annotated Lastin, A−Savchenko, B Voronezh 2005. Previously we have looked at 22.h4]

22.h4 Qf7

[22...Ba3 23.Bg5 Qf7 24.Bf5 g6 *(24...h6 25.Bg6)* 25.Bd3 Nb2 26.Rxe8 *(26.Be2 Re4 27.f3 Re6)* 26...Rxe8 27.Bf4 Nxd3 28.Qxd3 Qf5 29.Qd1 Bf8 with in Wittmann, W (2339)−Jakab, A (2402) Budapest 2004, chances for both sides and a position that is reminiscent of the Hyper−Accelerated Dragon 4 Qxd4 variation. 30.Be5?! h5 31.Kg2 b5 has previously seen White make quite a lot out of his lead in development e. g. 32.a4 a6 33.Qa1]

23.h5

[23.Rxe8 Rxe8 Full annotations of that can be found in Pert, R−Storey, C/Douglas IOM 2005. I agree with John Shaw's assessment in the

'Experts' book (on the Sicilian) that 24.Bf5 g6 25.Bd3

A) 25...Kg7 26.h5;

B) 25...Ba3 26.Bxa3 *(26.Bxc4 Bxc1 27.Bxd5!?)* 26...Nxa3 27.Qa4 Nc4 when Black had two pieces for the rook (and 2 pawns) but the king and knight were decisively paralysed in Nakamura, H−Wojtkiewicz, A New York 2005. Or 28.Bxc4 dxc4 29.Qxa7;

C) 25...Qe6 26.Kg2 Qg4 27.Qd1 Qxd1 28.Rxd1 Bc7! is better for White. Black can cope with White's bishop for knight advantage but he has some tactical problems e.g. *(28...b5 29.h5)* 29.h5 Re6 30.Bxc4 dxc4 31.d5 Re2 32.dxc6 bxc6 33.h6 Rxa2 34.Be3]

[Not seen too often but with the best results in competitive play is 23.Bf5 This obviously prepares a fianchetto of the queen's bishop but once that is accomplished offers a handy retreat square for the queen. One example is Rxe1 24.Bxh7+ Kh8 25.Rxe1 Qf3]

23...Ba3 24.Bg5 h6 25.Bf4 Bd6 26.Rxe8 Rxe8 Now with an opposite coloured bishop scenario, the similar **27.Bc1**

[27.Bf5? looks tempting but is definitely dodgy because of Qxh5 28.Bg6 Qe2!]

27...Ba3 28.Bf4 Bd6 should also be drawn. Upon **29.Bc1** Black could either recapture or respond with **29...Ba3 30.Bf4 Bd6** hitting both b2 and d6.

31.Bd2 Re4 32.Bd1 b5

[32...Qf5 with a rare practical outing being disastrous for Black: 33.Bc1 *(33.Kg2!?* Most common in practical play is *Bxg3* when we have featured games with both 7 Be3 and 7 Nb5 but 7 e5!? could also be critical. *)* 33...Qh3 34.Bf3 Re7! (if Black could settle into a Dragon style set−up then White's pieces might look replaced, but White isn't going to allow that to happen.) *(*or again *34...Rh4* to inhibit Black's development. or *35.Re1)* 35.Qd1 Qf5 36.Kg2 Qb1 37.Be2 *(37.a4? a5!* (Bad news for Black's queen's rook!) *)* 37...Qe4+ 38.Bf3 Qb1]

33.Kg2 is no great shakes either with **33...a5?** failing to **34.Bf3**

It soon becomes clear that the position is a little deceptive. Sure the b6−pawn is a target but **34...Re6** can be met well by **35.Bc1** and in fact Black has no serious problems.

[35.Re1! Rf6]

I was actually commentating online for playchess on this Rd 2 of the Wijk Aan Zee event but we didn't spend too much time on this game. Following exd5, I wondered at first whether Black might suffer a little down that half−open e−file. Something like **35...Ba3 36.Bf4 Bd6 37.Bc1 Ba3 38.Bf4 Bd6 39.Bc1** suggests though that Black get equal action elsewhere and hence the text advance that the white d−pawn won't get peppered (on d5 at least!).

½−½

C54

□ **O.Korneev**

■ **D.Campora**

Seville 2010

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3

[Note that the game's actual move order was 6.0−0 Ba7 7.Nbd2 d6 8.Bb3 0−0 9.h3 Ne7 10.Re1 Ng6 11.Nf1 Be6 12.Ng3 h6 13.d4 Re8 , but for convenience I've changed the move order into the one where White delays castling.]

6...Ba7 7.h3 d6 8.Nbd2 Ne7

As I mentioned in the previous game, the knight manoeuvre from c6 to g6 is a typical plan for Black, mirroring White's own knight manoeuvre to g3. Black's knight definitely prefers the g6−square to c6. One merit of the c3−pawn which is often forgotten is how well it restricts Black's knight when it is on c6.

[If 8...0−0 9.Nf1 and only then Ne7 , I think White should just transpose to the main game with 10.Ng3 *(*I don't think *10.Bg5 Ng6* gives White anything *)* 10...Ng6 .]

9.Nf1 Ng6 10.Ng3 0−0 This is an important moment. **11.0−0!**

[Black's knight on g6 is very well placed to battle against any typical kingside action from White. 11 Nh4 is prevented; 11.Bg5?! achieves less than nothing after simply h6!]

[and finally, 11.Nh2 with the plan of Ng4 and Qf3 is well met by d5 when White has to avoid 12.Qf3?? *(*he can play *12.Ng4* , but *dxe4 13.Nxf6+ Qxf6 14.Nxe4 Qf5* , as in S.Yudin−V.Belov, St Petersburg 2006, is basically level *)* 12...Nh4! .]

So what does White do? He changes plan! Let's call this one 'Plan C'. The position is virtually symmetrical after 11 0−0, but the advantage of the first move still counts for something. White is the first to be able to push in the centre, and this is often enough to give him a small advantage. **11...h6** Black usually plays this move, either here or a bit later, to prevent both Bg5 (as a reply to ...d5) and Ng5 (as a reply to ...Re8). He usually follows up, in some order, with ... Re8, ...Be6, ...c6, ...Qc7 etc. Meanwhile, White will build up the pressure with Re1, d4, Be3 etc. Alternatively:

[a) If 11...d5?! 12.Bg5! and the pin on the knight causes Black some problems, but after 11...h6 Black is ready to advance in the centre.]

[b) 11...Be6 12.d4 Re8 13.Re1 h6 transposes to the main game.]

[c) 11...b5 is Black's main alternative here, and this is covered in the next game.]

12.Re1

[The immediate 12.d4 is also possible, with a likely transposition.]

12...Be6

[12 Re1 prevents 12...d5? , which fails tactically to 13.exd5 Nxd5 14.Nxe5 Nxe5 15.Rxe5 Bxf2+ 16.Kxf2 Qf6+ 17.Qf3 Qxe5 18.Qxd5 .]

[12...Nh7!? is interesting and certainly playable. Black is mirroring a plan which White often employs - holding the centre and advancing with the knights on the kingside. One game worth seeing is S.Kindermann−D. Sebastian, German League 2006. Kindermann demonstrated on his excellent DVD why White shouldn't fear aggression from the black knights: 13.d4 Qe7 *(13...Qf6* is a decent alternative *)* 14.Be3 *(14.Nf5* is also possible *)* 14...Ng5 15.Nh2!? Nf4?! (this is very tempting, but Black should play something else

here) 16.h4! Nh7 *(*after *16...Nge6 17.Nf5 Qd8 18.g3* Black is driven back completely *)* 17.Nf5! Bxf5 18.exf5 , and Black supposedly strong knight on f4 actually turned out to be a fatal weakness.

A) If 18...Qxh4 19.g3 Qg5 20.Kh1 Qxf5 21.gxf4 exf4 22.Qf3 and White wins the knight for insufficient compensation.;

B) Or 18...Qf6 19.g3 Nh3+ *(*in the game Black chose *19...Qxf5 20.gxf4 exf4 21.Bd2* , but White soon won *)* 20.Kg2 Qxf5 21.Qg4 Qxg4 22.Nxg4 and the knight is trapped on h3 (analysis by Kindermann). Obviously I wouldn't rule out 12...Nh7 on the basis of this game, as there are several alternatives for both sides early on.;

C) 18...−−]

13.d4 White finally advances in the centre. We'll come across this structure quite a few times throughout the book. This central tension certainly favours White, and because of this he should look to maintain it as long as possible. He should only advance with d5 or capture on e5 if there is a concrete reason for doing so, as otherwise this would only help Black. Likewise, Black is usually reluctant to exchange on d4, as this gives White a powerful, mobile pawn centre. **13...Re8 14.Bc2!**

[Once again we see this retreat, avoiding the exchange of bishops and the easing of Black's position. In this instance, with White enjoying the initiative in the centre, it's much easier to understand its merits. The bishop on e6, blocking the e−file, is not particularly well placed to help Black put pressure on White's centre. Having said that, White probably doesn't have to retreat immediately, since 14.Be3 Bxb3 15.Qxb3 looks a bit better for him.]

[One word of warning: although Nf5 is undoubtedly a very tempting option, and one which should always be considered, White has to be careful not to play it too early otherwise he runs the risk of his central control being loosened. For example, here 14.Nf5?! exd4 15.cxd4 d5! leaves White in some trouble. It's better to build up slowly and check out Nf5 possibilities later on.]

14...c6 15.Be3 Qc7 16.Qd2 Rad8

[16...Kh7 might be more accurate, since 17.Nf5 *(*the more patient *17.Rad1 Rad8* transposes to the note to Black's 17th move - see below *)* looks less threatening here: 17...Bxf5! 18.exf5 Nf8! 19.dxe5 Bxe3 20.Qxe3 dxe5 , when 21.Nxe5 only brings about an equal position after N6d7! 22.Nxd7 Rxe3 23.Nxf8+ Rxf8 24.Rxe3 , as in R.Perez Garcia−L. Henris, Charleroi 2005.]

17.Rad1

[17.Nf5! looks promising for White. Black has to be very careful. For example:

A) 17...Bxf5 18.exf5 Nf8 19.Bxh6! gxh6 20.Qxh6 , C.Lamoureux−F. Forgues, French League 2008;

B) or 17...d5 18.Nxg7! Kxg7 19.Bxh6+ Kg8 20.exd5 Bxd5 21.Nxe5 Bb8 22.Qg5 Nh7 23.Qg3 , A.Areshchenko−E.Sutovsky, Gibraltar 2007, with good play for White in both cases.;

C) In A.Volokitin−Zhou Jianchao, Khanty Mansiysk 2007, Black chose 17...exd4 whereupon
C1) however, 18.Bxh6! looks much stronger: for example, Bxf5 *(*or *18...d3 19.Bxg7!)* 19.exf5 gxh6 20.Qxh6!;
C2) 18.cxd4 d5! 19.Nxg7 Kxg7 20.Bxh6+ Kg8 21.Bg5 Nxe4 proved to be insufficient for White.;
D) 17...−−]

17...d5?!
[Black is trying to solve all his problems at once with this advance, but it looks like White can refute it with careful play. Therefore Black should just accept a manageable disadvantage with 17...Kh7 . Then 18.Qc1 vacating the d−file looks sensible, after which there are still some Nf5 possibilities in the air. For example, b5 (S.Jessel−Wang Li, Yerevan 2006) 19.Nf5! when Bxf5? 20.exf5 Nf8 21.dxe5 Bxe3 22.Qxe3 dxe5 23.Rxd8 Qxd8 24.Bb3 is good for White.]

18.Nxe5! Nxe5 19.Bf4! Nxe4
[A much earlier game had continued 19...Bxh3
A) it's possible that White players were discouraged by that game, but 20.exd5! appears to be a major improvement as far as I can see: for example, −− *(20...Nfg4 21.Qe2!;* or *20...Bg4 21.Rxe5!;* or finally *20...Nf3+ 21.gxf3 Qd7 22.Be5* intending *Qxd5 23.Qd3!)*;
B) 20.Bxe5? Rxe5 21.dxe5 Qxe5 with excellent play for Black, who threatens ...Qxg3, S.Kudrin−A. Kosten, London 1988.]

20.Bxe4 dxe4 21.Bxe5 Qe7 22.Nh5!
[This is very strong, although even the simple 22.Nxe4 leaves Black with nothing substantial for the pawn, with the try f6 losing to 23.Bxf6 gxf6 24.Qxh6 .]

22...f6 23.Bxf6! gxf6 24.Qxh6
White's attack should be winning. The various threats of Nxf6+, Re3 and Re4 cannot be met properly. **24...Bf5**
[If 24...f5 25.Re3 Bb8 , White has the nice move 26.f4! intending exf3 27.Rxe6! and wins.]

25.Nxf6+?
[I'm not sure why Korneev avoided 25.g4! , as it looks very strong: Bh7 26.Nxf6+ Kh8 27.Rxe4! Qf7 *(*perhaps he had missed that after *27...Qxe4 28.Nxe4 Rxe4* , White can play *29.Qf6+)* 28.Rde1 Rxe4 29.Rxe4 must be winning for White.]

25...Kf7 26.Nxe8 Rxe8 27.Qf4
[27.g4 intending Bg6 28.f4! is still good for White. The final position, where the players agreed a draw, is no longer so clear.]

27...Qf6 28.g4 Bg6 29.Qxf6+ Kxf6 30.a4
½−½

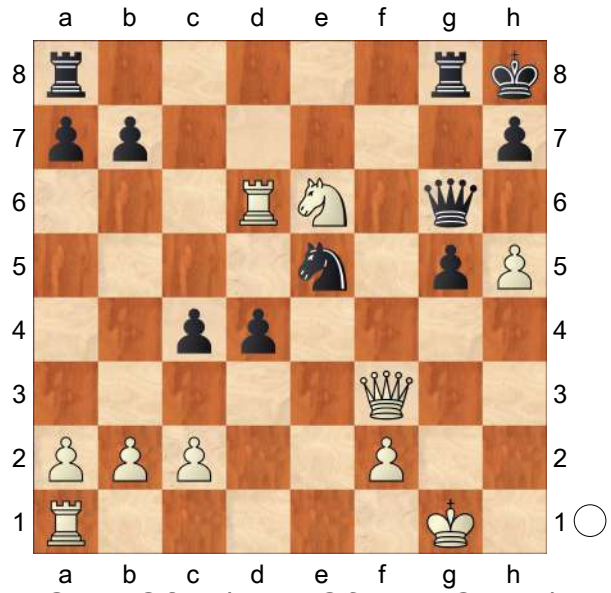
□ **Baffo,Jeffrey Alan**
■ **Morss,Mark F**
USCF−93RT21 corr 1993
[Morss [notes a bit garbled]

The white pieces in this game were commanded by Jeff Baffo, a U. S. Air Force officer who was stationed, during the course of the game, first in Germany

and then in Colorado Springs, Colorado. He is a notable gambiteer, as I discovered when I saw a nice postal win of his with 1. e4 e5 2. Nf3 Nf6 3. Nxe5 d6 4. Nxf7!? published in Chess Life
1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.0−0 Bc5 6.e5 d5 7.exf6 dxc4 8.Re1+ Be6 9.Ng5 Qd5 10.Nc3 Qf5 11.Nce4 Bf8 Rubinstein's move, and in principle, the most solid move in the position. Black will not permit his opponent to establish a pawn on g7.
12.Nxf7! The complications arising from this move are critical for the evaluation of 11 ... Bf8, and perhaps of the entire Max Lange. For alternatives see Soricelli−Morss. **12...Kxf7 13.Ng5+ Kg8 14.g4**
[14.Nxe6 Re8 15.fxg7 Bxg7 16.Nxc7 Rxe1+ 17.Qxe1 Be5 18.Nd5 Kf7 is good for Black.]
14...Qg6
[14...Qxg4+? 15.Qxg4 Bxg4 16.f7#]
[14...Qxf6? 15.Rxe6 Qd8 16.Qf3 Qd7 17.Re7! and White won in Saemisch−Reiman, Bremen 1927]
[14...Qd5 is universally considered to be a fatal mistake, but I think it deserves to be taken more seriously: 15.Nxe6 Rc8 Simple chess. *(15...Ne5? 16.f7+ Kxf7 17.Ng5+ Kg8 18.Rxe5! Qxe5 19.Qf3* and Black's queen was fatally overworked in Denker−Adams, New York 1940 *)* 16.fxg7 Bxg7
A) 17.Nxg7 Kxg7 18.Bf4 Rhf8 19.Qd2 Kh8 unclear cha nces in view the strange pawn situation, but Black's game does not look worse *(*Bf4 Be5 Bxe5 *19...Ne5* Nf4 Qd6 *20.g5* Rf8 *)* 20.Re4! Re8 relatively worse is Qe2 Rxe4 *(*Rd8 Ne6 Qg6 *20.f3* Re8 Qe2 *)* 20...Qxe4 21.Be5+ Black works to unbottle his kingside, but he still has some problems to overcome. For example, a4 intending Ra3. White has some advantage.;
B) 17.Nf4! Qd7 18.Qe2! Ne5]
[Rxe6 14...gxf6! Rxf6 Ne5 Keres considered only 15.f4 *(15.Nxe6 Bg7! 16.Nxc7* Qd8 Nxa8 Bxf6 is excellent for Black *)* 15...Bc5 16.Be3! Nd3 with a fantastic game for Black]
15.Rxe6
[15.fxg7 Bd5! 16.gxh8Q+ Kxh8 17.Bf4 Bg7! 18.f3 Nb4 19.Rc1 *(19.Ne4 d3)* 19...Rf8 20.Nh3 c3 21.b3 *(21.bxc3 Nxa2 22.Ra1 Nxc3* also favors Black *)* 21...d3 and Black is much better − analysis by Morss]
15...gxf6 16.Qf3 Kg7 Keres attributes this move to Tartakower. **17.Bf4** Baffo regarded this as an innovation, though it is one that I had spent some time analyzing before our game ever began.
[17.Ne4 Be7 18.Bg5 Raf8 19.h4 h5 *(19...fxg5 20.Rxg6+)* 20.Ng3 hxg4 21.Nf5+ Kh7!]
17...Bd6 18.Bxd6
[18.h4 a move advocated by Keene and Levy in the 1984 edition of their Opening Repertoire for the Attacking Player. This creates some problems for Black. I think Black should take the opportunity to consolidate his kingside and play Rhf8 *(18...h5 19.Bxd6 cxd6 20.Rxd6* and the threat of 21. Rd7+ is very difficult to meet*;* Keene and Levy quote an analysis of Estrin's which goes *18...Bxf4 19.Qxf4 Rhe8! 20.Qxc7+ Kg8 21.Qxb7* Instead of 21 ♖ae1

analysed by Estrin *Rxe6 22.Qxa8+ Qe8 23.Qxe8+ Rxe8 24.Nf3 Re4 25.g5 Ne5 26.Kg2 Nxf3 27.Kxf3 Rxh4 28.gxf6* favors White because of his more active King and better pawns. One way or the other, I am persuaded that 18...Bxf4 does not solve Black's problems. *)* 19.Bxd6 *(19.Rxd6 cxd6 20.Ne6+ Kh8 21.Nxf8 Rxf8 22.Bxd6 Rg8 23.Bg3 Ne5∓; 19.Rae1? fxg5!)* 19...cxd6 20.Rxd6 Kh8 21.Ne6 *(21.Qd5 h6)* 21...Rg8 22.g5 fxg5 23.h5 Ne5∞



24.Qd5 Qf6 *(24...Qf5 25.Qxd4)* 25.Kg2 Ng4 26.Qxd4 Qxd4 27.Rxd4 Nf6 28.Rxc4 Rae8 29.Re1 Nxh5 30.Rce4 Nf6 31.Re5 h5∓]

18...cxd6 19.Nh3

[19.Ne4 Rhf8 *(19...Ne5 20.Qxf6+ Qxf6 21.Nxf6* (Sorowiak−Jaworski, Polish cc Champ. 1994), appearsunclear but I suspect not worse for Black. *)*]

19...Rhf8 20.Nf4 This should have been the critical position of the game.

20...Qg5?! I did not rise to the occasion, playing this move on general principles without much calculation.

[20...Qf7!]

21.Nh3? The knight, having established himself on a very advantageous post, inexplicably retreats. **21...Qh4 22.Rxd6 Rad8 23.Rxd8 Rxd8 24.Rd1 Kh8**

[24...Kg8 25.Nf4 Ne5 26.Qg2]

25.g5 fxg5 26.Qf6+ Kg8 27.Qxg5+ Qxg5+ 28.Nxg5 I thought I had some advantage here based on my mobile queenside pawns. I would appreciate it if anyone can tell me how I should have conducted this ending. **28...Rd5**

[28...d3 possibly better 29.cxd3 Rxd3 30.Rxd3 *(30.Rc1 b5 31.Ne4 Nd4)* 30...cxd3 31.Ne4 Nd4 and White's king has a hard time approaching the d−pawn, while in the meantime, Black can bring up his own king to threaten White's knight.]

29.Ne4 Kf7 30.Rd2 Kg6

[30...Ke6 31.Kg2 b5 32.f4 Kf5 33.Kf3 and Black makes no progress.]

31.Kg2 b5 32.f3 b4 33.f4 Ra5

34.Kf3! c3 Played with the draw offer. White's rook and knight cooperate extremely well against Black's king.

[34...Rxa2 35.Rg2+ Kf5 36.Nd6+ Ke6 37.Nxc4]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3 d5

[Another idea which is worth mentioning is Romanishin's 6...d6 7.c3 and now d5!? . Paradoxical? Yes, but certainly not to be underestimated.

A) A key point to appreciate is that in some lines - those in which White targets the e5−pawn, White's extra move c2−c3 may do more harm than good. The d3−pawn lacks protection and White's queen's knight is denied access to c3. For example, 8.exd5 Nxd5 9.Re1 *(9.h3 Bf5 10.Re1 Bf6 11.Na3 Nb6!* equalizes, S. Belkhodja−L.Fressinet, Cergy Pontoise 2004*;* or *9.Nbd2?! Nf4!)* 9...Bg4! 10.h3 Bh5 11.g4 Bg6 12.Nxe5 Nxe5 13.Rxe5 c6 and White's knight is denied use of the c3−square (compare the note to Black's 9th move in the previous game).;

B) Rather than exchanging on d5, in this instance it might be wiser to build up more slowly. At least here the extra c2−c3 is going to be useful. For example, 8.Qe2 dxe4 *(*or *8...d4 9.Ba4! Bg4 10.Nbd2 dxc3 11.bxc3 Na5 12.h3 Bd7 13.Bc2 Bd6 14.d4* with some advantage, S.Kudrin−G.Kuzmin, Kusadasi 1990 *)* 9.dxe4 Bc5 *(*or *9...Bg4 10.h3 Bh5 11.Nbd2 Nd7 12.Rd1)* 10.Bg5 h6 11.Bh4 Qe7 12.Nbd2 *(*Lukacs suggests *12.Bd5 g5 13.Bg3)* 12...a6 13.Nc4 *(13.Bd5!?* is an interesting alternative *)* 13...Be6 14.Bc2 g5 15.Bg3 Bg4 16.b4 *(*if *16.h3* Black has *Nh5!?* , and here *17.Kh1 Nf4 18.Bxf4 Bxf3 19.Qxf3 exf4 20.e5!* is worth investigating *)* 16...b5 , S.Tiviakov−L.Fressinet, Wijk aan Zee 2004. Here Rybka likes the idea of

B1) in the game Tiviakov lost after 17.Ne3 Bxe3 18.Qxe3 Nh5 19.Bb3 Rad8 20.Bd5 Rd6 21.Qc5?! *(21.h3!)* 21...Bxf3 22.Bxc6?? Nf4! 23.gxf3 Qe6! 24.Bxf4 gxf4 25.Kh1 Qh3 26.Rg1+ Kh7 , with a decisive attack for Black;

B2) 17.Ncd2 , intending 17...Bb6 18.a4! when Black has problems with his b−pawn.;

C) 8.−−]

7.exd5 Nxd5 8.h3 The solid option. Now there is no annoying pin on the knight to worry about, and next up White will pressure the e5−pawn with Re1. On the other hand, Black does have an extra tempo to organize his position in another way. **8...a5** A surprising move, but actually this has become the main line. It's the sort of move that many players would disregard over the board unless they knew of its merits beforehand. The alternative approach for Black is to reinforce the defence of his e5−pawn, either with ...Bf6/...Re8 or ...f6:

[a) 8...Bf6 9.Re1 and now:

A) 9...Re8 10.Nbd2 Bf5 *(*or *10...Nb6 11.Ne4 Bf5 12.Nfg5* intending *Bg6 13.h4!?)* 11.Ne4

Bxe4 *(*the 'careful' *11...h6* turns out to be careless after *12.Bxh6!)* 12.dxe4 *(12.Rxe4* is a decent alternative *)* 12...Nf4 (S.Vratonjic−B.Lajthajm, Vrnjacka Banja 2006) and now instead of taking the knight on f4, which looks too accommodating to me, why not 13.Be3 intending Qe7 14.c3 Rad8 15.Qc2 ? I admit we're not talking about a clear edge, but White's bishop pair must count for something.;

B) 9...Be6 10.Nbd2 Nf4 11.Ba4!? Nd4 *(*Bologan thinks that *11...Ng6 12.Bxc6 bxc6 13.Ne4 Be7* gives Black counterplay, but I still prefer White's position after *14.Nfg5 Bd5 15.Qh5 h6 16.Nf3)* 12.Ne4 Ng6 13.Nxd4 exd4 14.Qh5 Be7 15.Bg5 Bd5 *(*Bologan suggests *15...f6* , but White can win a pawn here with *16.Nxf6+! Bxf6 17.Rxe6 Bxg5 18.Rxg6!)* 16.Bxe7 Nxe7 17.Re2 left White the more active in V.Bologan−V.Malaniuk, Novgorod 1995. *(*Moreover *17.Nc5!?* might be even stronger. *)*;

C) 9...−−]

[b) 8...Be6 9.Re1 Bf6 transposes to the previous note.]

[c) 8...Kh8 9.Re1 f6 10.c3!? *(*the typical answer to ...f6, *10.d4* , is good enough for an edge after *exd4 11.Nxd4 Bc5 12.Nxc6 bxc6 13.Qh5* , as in S.Martinovic−C.Micic, Pancevo 2003 *)* 10...Nb6?! *(*Bologan gives *10...Bf5 11.d4! exd4 12.Nh4 Bxb1 13.Rxb1 f5 14.Nf3 Bf6 15.cxd4 Qd6 16.Bg5! Rad8 17.Bxf6 Nxf6 18.Ne5 Nd5 19.Rc1* with a small advantage for White *)* 11.d4 exd4 12.cxd4 Nb4 13.Nc3 c6 14.Qe2 , V.Bologan−G.Garcia, Wijk aan Zee 1996. White has a dream IQP position, and a significant advantage, simply because of Black's chronic weakness down the a2−g8 diagonal.]

9.a3!

[Black's idea with 8...a5 is to force the bishop on b3 off the diagonal and into a kind of no man's land. For example, 9.Re1 is met by a4 intending 10.Bc4 Nb6! 11.Bb5 Nd4! and it doesn't take long to realize that things are not going White's way. So White normally makes sure the bishop can stay on the diagonal, either by playing 9 a3 or 9 a4.]

[9.a4 Nd4! 10.Nxd4 *(10.Nxe5? Nxb3 11.cxb3* cripples White's pawns *)* 10...exd4 is proving to be very solid for Black.

A) White has been making no headway here. For example, 11.Qf3 Be6 12.Nd2 Nb4 with equality, A. Dyakov−P.Leisebein, correspondence 2004.;

B) Karjakin played 11.Re1 against Gelfand (Khanty−Mansiysk, 2009) but this was answered by some inspiration: Ra6!! . The point behind this piece offer is that after 12.Bxd5 *(*in the game Karjakin chose *12.Qh5* , but after *Nb4 13.Na3 Rg6* it was Black who held the initiative *)* 12...Qxd5 13.Rxe7 Rg6 White is in some trouble - analysis suggests that Black has at least perpetual check. Overall, giving Black the b4−square seems to make life too easy for him.;

C) 11.−−]

9...a4

[The difference here is that 9...Nd4 can be met by 10.Ba2! and there is no ...Nb4 to worry about. Black appears to be active but this is only temporary, and there remain long−term issues regarding the safety of the e5−pawn. White has good chances of an advantage here. For example, Nxf3+ 11.Qxf3 c6 12.Re1 Qc7 13.Qg3 Bf6 14.Nd2 g6 15.Nf3 Re8 16.d4! e4 17.Qxc7 Nxc7 18.Ng5 Bxg5 19.Bxg5 with the bishop pair and some weak dark squares to target, I.Almasi−R.Shabtai, Budapest 1994.]

[9...Be6 10.Re1 Bf6 is similar to 8... Bf6, above: 11.Nbd2 h6 *(*I think *11...a4!? 12.Ba2 Nf4* is a better chance for equality *)* 12.Ne4 Be7 13.c3 Bd6 14.Ba4 (this move, again!) Nde7 15.Be3 Rb8 *(*or *15...f5 16.Nc5!)* 16.d4 exd4 17.Nxd4 Nxd4 18.Bxd4 (White will take on d6 and rely on his bishop pair for an edge, which increases quite quickly...) Nf5 19.Nxd6 Nxd6 20.Qf3 Qh4? 21.Re5! Nc4? 22.Rh5 Qe7 23.Bxg7! Kxg7 24.Qg3+ Kh7 25.Qf4 and Black resigned, Z.Efimenko−M.Kravtsiv, Alushta 2007.]

10.Ba2 Kh8 Preparing ...f6.

[10...f5? is too ambitious, and in fact White has a nice trick which wins a pawn: 11.Nc3 Be6 12.Nxe5! Nxe5 13.Re1 and now Bf6 *(*or *13...Qd6 14.Nb5)* 14.d4 .]

11.Re1 f6 12.d4

[As usual, meeting ...f6 with d4 is the best chance to gain an edge, albeit a slight one. 12.Nbd2 Bc5 13.Ne4 Bb6 14.c3 Bf5 15.Nh4 Be6 is typically solid for Black, S.Martinovic−A.Kizov, Zlatibor 2007.]

12...exd4 13.Nxd4 Ndb4 14.axb4

[I wonder whether White can pose more problems with 14.Nxc6 here. After Nxc6 15.Nc3 Black's slight weaknesses remain, and the knight is more actively placed on c3. There's the issue of what to do about Qxd1 16.Rxd1 Bf5 , but I think 17.Bf4 still gives Black some work to do. If Bxc2 there follows 18.Rd2 *(*or *18.Rd7)* 18...Bb3 19.Bxb3 axb3 20.Bxc7 and Black still hasn't fully equalized.]

14...Qxd4 15.c3 Qxd1 16.Rxd1 Bf5 17.Na3 With slight weaknesses on a4 and c7, Black has to be careful. However, with accurate defence, as Kasparov displays here, it looks like he should be okay. **17...Ne5 18.Nb5 c5 19.bxc5 Bxc5 20.Nd4 Rfd8 21.Be3 Bg6 22.Rd2 Bf7 23.Bxf7 Nxf7 24.Re2 Bxd4 25.Bxd4 Nd6 26.Bb6 Rdc8 27.Re7 h6 28.Bd4 b5 29.Rae1 Nf5 30.Rb7 Nxd4 31.cxd4 Rcb8! 32.Ree7 b4 33.Rxg7 Rxb7 34.Rxb7 a3 35.bxa3 bxa3 36.Rb1 a2 37.Ra1 Kg7 38.Kf1 Kf7 39.Ke2 Ke6 40.Kd3 Kd5 41.Kc3**

□ **G.Lee**

■ **G.Flear**

British Championship 2002

[Glenn Flear]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Bd2 Nxe4!?

[The main book move is 7...Bxd2+

, and after 8.Nbxd2 d5 9.exd5 Nxd5 10.Qb3 Black has a choice: he can offer a repetition with Na5 11.Qa4+ Nc6 ; or solidify his hold on d5 with 10...Nce7, when White has some pressure that compensates for the isolated pawn. I don't consider Black's position to be bad but I prefer the game move, which offers more practical winning chances and of course takes White out of his comfort zone.]

8.Bxb4 Nxb4 9.Bxf7+ Kxf7 10.Qb3+ d5!? A good try for the advantage.

[I have also played the equal endgame after 10...Kf8 11.Qxb4+ Qe7 and tried to grind away, but now I only reserve this for when I want to be very solid (see the theory section for more details on this move).]

11.Ne5+ This natural 'book' move is possibly an imprecision, but few can resist the temptation of pushing Black's king about!

[I consider 11.Qxb4 Re8 12.0−0 to be more prudent (as played in a game from the J.Zukertort−W.Steinitz Breslau match from 1872), when play is about equal after Kg8 13.Re1 b6 14.Qb3 Be6 .]

11...Ke6!

[BEWARE!... of placing your king on the wrong square! 11...Kf6 is inferior due to 12.f3 , as the king blocks the d8−h4 diagonal and occupies the natural retreat square for the knight.]

12.Qxb4 c5!

[Hitting back at the centre is the dynamic option. Instead 12...Qf8 is playable, but the resulting exchange of queens seems to give 'only' equality for Black, e.g. 13.Qxf8 Rxf8 14.f3 Nd6 15.Nc3 Nf5 16.0−0−0 c6 17.Rhe1 Kd6 , as in N.Rossolimo−W. Addison, US Championship, New York 1965.]

13.Qa3

[I had 13.Qb3?! Qa5+ in a rapidplay game and, with White's king also stuck in the centre, Black soon took control.]

[Instead 13.Qa4 is well met by Qb6! .]

13...cxd4 14.Nf3 Qb6 15.0−0 Kf7

[Threatening to evacuate the king into safety. In fact Black can even consider moves such as 15...Kf6!?]

[or 15...Re8 , as White isn't able to get at Black's king.]

16.Nbd2

[My opponent rejected 16.Ne5+ because of Kf6! *(* which is more ambitious than the oft−quoted and not very convincing variation of Levenfish's that continues *16...Ke6 17.Nf3 Kf7)* , after which Lukacs adds 17.Nd3 Bf5 with an edge to Black.]

[Instead 16.Rd1 is best (see the theory section).]

16...Re8 DANGEROUS WEAPON! With Black's king near to being tucked away, the half−a−pawn advantage is becoming important. **17.Qb3**

[Krause gives 17.Nb3 d3 18.Rad1 Bg4 19.Rxd3 Bxf3 20.Rxf3+ Kg8 , with an edge for Black.]

17...Nxd2 18.Qxd5+

[Instead 18.Nxd2 allows Black to reach a good ending after Qxb3 19.Nxb3 Re2 .]

18...Be6 19.Qh5+ Kg8 20.Nxd2 Qxb2 Demolishing White's queenside. **21.Nf3 Bxa2 22.Qa5**

[Black would also have good winning chances after 22.Nxd4 Qxd4 23.Rxa2 a6 .]

22...Re2 23.Rad1 Here Black has to find the right way. **23...Qc3**

[After 23...b6! I thought that 24.Qa6 would be annoying, but Lukacs points out that Rf8 25.Qxa7 Bd5 would be very strong.]

[23...a6? , on the other hand, can be parried by 24.Nxd4 Re4 25.Rd2 .]

24.Qb5 Bc4?

[Black should play 24...Rae8! 25.Rxd4 *(*not *25.Nxd4? Re1 ,;* or if *25.Qxb7 R2e7* and ...Bc4 *)* 25...Qc6 .]

25.Qxb7 Rae8 26.Qxa7

[After 26.Rc1 Black keeps the advantage with Rc2 *(*but not *26...Rxf2??* because of the cool *27.Kxf2!)* 27.Rce1 Rf8 28.Re7 d3 .]

26...R2e7 27.Qxd4 Qxd4 28.Nxd4 Bxf1 29.Rxf1 So Black emerges with an exchange for a pawn, but with all the pawns on one wing a careful defender should be able to draw. **29...Rd7 30.Nf3 h6 31.h4 Red8 32.g3 Rd1 33.Rxd1 Rxd1+ 34.Kg2 Kf7 35.Ng1 Ke6 36.Nh3 Kf5 37.Nf4 Ra1 38.Kf3 Ra3+ 39.Kg2 Ke4 40.Ne6 Ra7 41.Nf4 Rf7 42.Nh3 Kd3 43.Kf1 Rf5 44.Kg2 Ke4 45.Kf1 Ra5 46.Kg2 Rb5 47.Nf4 Ra5 48.Nh3 Ra2 49.Nf4 g5 50.hxg5 hxg5 51.Ne6 Ra5 52.g4 Re5 53.f3+ Ke3 54.Ng7 Rd5 55.Kg3 Ra5 56.Ne6 Re5 57.Ng7 Ke2 58.Nf5 Rd5 59.Ng7! Ra5**

[There is no joy for Black after 59...Rd3 60.Ne6 Rxf3+ 61.Kg2 Rf4 62.Kg3! .]

60.Kg2 Re5 61.Nh5 Ke3 62.Kg3 Ra5 63.f4 Ra1 64.fxg5 Rg1+ 65.Kh4 Kf3 66.g6 Rxg4+ 67.Kh3 Rxg6 68.Kh4 Rg4+ 69.Kh3 Ra4 70.Nf6 Rf4 71.Nh5 Rg4 72.Nf6 Rg7 73.Nh5 Rg4 74.Nf6 Rd4 75.Nh5 Rd6 76.Kh4 Rg6 77.Kh3 ½−½

URS telechess 1968
[ChessBase II]

Quintiliano, Renato: 'Let's see the great Mikhail Tal giving the Traxler Variation a shot. This is a curious game as Tal is not facing another grandmaster, but the readers of Pravda, the main newspaper of the Soviet Union at that time. ' **1.e4** Quintiliano, Renato **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5 Bc5** Quintiliano, Renato: '?!' **5.Nxf7** Quintiliano, Renato: '!?' Quintiliano, Renato: 'This is the most ambitious and adventurous option for White.' **5...Bxf2+** Quintiliano, Renato: '!' Quintiliano, Renato: 'This is the point behind Black's play, otherwise he would just be lost.' **6.Kxf2** Quintiliano, Renato: '?!' Quintiliano, Renato: 'Greedy, but likely wrong.'

[6.Kf1! Quintiliano, Renato is the correct answer.]

6...Nxe4+ Quintiliano, Renato: 'White now has the task of deciding where to put his king. ' **7.Kg1** Quintiliano, Renato: 'The most played.'

[The brave 7.Ke3! Quintiliano, Renato should be the best try for White, see next game; the other options are just losing:]

[7.Ke2?? Quintiliano, Renato Nd4+ 8.Ke3 Qh4−+]

[7.Ke1? Quintiliano, Renato Qh4+

8.g3 Nxg3−+]

7...Qh4 8.g3

[8.Qf1? Quintiliano, Renato was tried in a few games, but White ends in trouble after Rf8 9.d3 *(9.g3 Qe7!* White can't avoid fall into tactical ideas here, for example *10.Kg2 d5! 11.Bxd5 Bh3+!! 12.Kxh3 Qd7+ 13.Kg2 Qxd5⟶)* 9...Nd6! 10.Nxd6+ cxd6 White is simply lost. 11.Qe2 Nd4 12.Qd2 Qg4−+]

8...Nxg3 Quintiliano, Renato: '!' **9.hxg3**

[9.Nxh8 Quintiliano, Renato would end in a draw after Nd4! *(9...Nxh1 10.d3! d5 11.Bxd5 Qd4+ 12.Be3! Qxe3+ 13.Kxh1+−)* 10.hxg3 *(10.Nc3? d5!* seems dangerous for White. *)* 10...Qxg3+ 11.Kf1 Qf4+=]

9...Qxg3+ 10.Kf1 Rf8 11.Qh5 Quintiliano, Renato: '?' Quintiliano, Renato: 'This is too optimistic.'

[11.Nc3 Quintiliano, Renato was better, but the likely result should be a draw after d5! 12.Bxd5 Bh3+ 13.Rxh3 Qxh3+ 14.Kg1 Qg3+ 15.Kh1 *(15.Kf1? Rxf7+! 16.Bxf7+ Kxf7−+)* 15...Qh3+ 16.Kg1 Qg3+=]

11...d5 Quintiliano, Renato: '!' Quintiliano, Renato: 'Black is two pieces down, but keeps playing energetic chess. '

12.Bxd5 Nd4 Quintiliano, Renato: '?' Quintiliano, Renato: 'But here Tal went wrong.'

[12...Nb4! Quintiliano, Renato was the right continuation, although the knight seems misplaced at first sight. 13.Qf3□ *(13.Bb3* doesn't avoid *Nxc2!)* 13...Qxf3+ 14.Bxf3 Rxf7 The only way to save White from big material losses is 15.c3 Rxf3+ 16.Kg2 Rf6 17.cxb4 Even here, Black is better after b6! 18.Re1 Bb7+ 19.Kh2 0−0−0 20.Nc3 Rdf8⟶ when White is still under unpleasant pressure due to Black's piece activity.]

13.Qh2 Quintiliano, Renato: '?' Quintiliano, Renato: 'White is the side which misses a big chance now.'

[13.Nc3! Quintiliano, Renato Quintiliano, Renato: 'was natural and good, trying to solve White's development issues:' c6 Quintiliano, Renato *(13...Bg4* Quintiliano, Renato *14.Qh2!* forcing the queen's exchange is a great accomplishment here. *Qxh2 15.Rxh2 Nxc2 16.Rb1 Nb4 17.Bxb7 Rxf7+ 18.Kg1+−)* 14.Bc4 Bg4 *(14...b5 15.Ne4! Qf4+ 16.Kg1 bxc4 17.d3+−)* 15.Qh4 Qf3+ 16.Kg1 Rxf7 17.Bxf7+ Kxf7 18.d3 Rf8 19.Rh2!+−]

13...Qg4

[An objectively better try was 13...Qxh2 Quintiliano, Renato 14.Rxh2 Nxc2 15.Rf2 Nxa1∓]

14.Qxe5+ Quintiliano, Renato: '?'

14...Be6 Quintiliano, Renato: '!' **15.Bxe6 Qf3+** Quintiliano, Renato: '?' Quintiliano, Renato: 'This seems clever, but it is only enough for a draw.'

[The simple 15...Nxe6! Quintiliano, Renato was very good, as it is difficult now to imagine how White will save his king from a strong attack by Black's pieces, for example 16.Qe2 Rxf7+ 17.Ke1 Rf3! 18.Rf1 *(18.d3 0−0−0 19.Be3 Re8 20.Bf2 Qa4!!−+)* 18...Rxf1+ 19.Kxf1 Qf5+ 20.Qf2 Qxc2 21.Nc3 0−0−0 The white king is too much exposed, and the following line illustrates well how quickly White's position may collapse: 22.Ke1 Rf8 23.Qe3 Nf4 24.Qe4

Nd3+ 25.Ke2 Nxc1+ 26.Ke3 Qxe4+ 27.Nxe4 Rf1 28.Nf2 Re1+ 29.Kf3 Nd3−+]

16.Kg1 Ne2+ 17.Kh2 Qf2+ 18.Kh3 Qf3+ Quintiliano, Renato: '?' Quintiliano, Renato: 'This seems like a draw, but actually White can fight for more.'

[18...Rxf7 Quintiliano, Renato was correct, when after 19.Bxf7+ Kxf7 although White wants more, he must be satisfied with a draw. 20.Qe3 *(20.d3 Qf3+ 21.Kh2 Qf2+=; 20.Rh2?* is even losing after *Qf3+ 21.Kh4 Nf4!* Black is a piece + rook down in this position, but the perfect coordination of queen + knight shows that White is the side who is lost! *22.Qf5+ Kg8 23.Qg4 Ng6+ 24.Kh5 Qf7! 25.Qe4 Re8−+* and White faces big material losses. *)* 20...Nf4+ 21.Kg4 Qg2+! 22.Qg3 *(22.Kxf4* leads to a draw after *g5+! 23.Kf5 Qd5+ 24.Kg4 Qg2+ 25.Kf5 Qd5+* since *26.Qe5?* would be too much due to *Qf3+ 27.Kxg5 Rg8+* with mate in a few moves. *)* 22...Qxh1 23.Qxf4+ Kg8 Even being two pieces up, due to his very exposed king and poor development White is the side which needs to take care in this position; of course, these variations are by no means forced, but they provide a nice example of Black's possibilities in such positions in this line. 24.Nc3 Rf8 25.Qe4 Qg1+ 26.Kh3 Qf1+ 27.Kg3 Qg1+ the draw seems the wise choice now, as 28.Qg2? seems already worse for White after Qe1+ 29.Kh3 Qe6+ 30.Kh2 Qe5+! 31.Kh3 Qh5+ 32.Kg3 Qg5+ 33.Kh3 Qh6+! 34.Kg3 Qf4+ 35.Kh3 Rf5! and Black should win the queen: 36.Qe2 Qh6+ 37.Kg3 Rg5+ 38.Kf3 Qh5+ 39.Kf4 Qh4+ 40.Ke3 Rg3+ 41.Qf3 h5+−]

19.Kh4 Qf2+ 20.Kh5 Quintiliano, Renato: '?!' Quintiliano, Renato: 'Wrong square for the king.'

[20.Kg5! Quintiliano, Renato would probably solve White's problems, as Rxf7 is bad now: 21.Bxf7+ Kxf7 22.Qf5+! White should win after this exchange. Qxf5+ 23.Kxf5 Ng3+ 24.Kg4 Nxh1 25.Nc3 Re8 26.Kf3! Re1 27.b3+−]

20...Rxf7 Quintiliano, Renato: '!'

21.Bxf7+ Kxf7 22.Rh2 Quintiliano, Renato: '?' Quintiliano, Renato: 'This seems the decisive mistake.'

[22.Rh3! Quintiliano, Renato was the right move, preventing the check on f3; Black must be accurate now and play Qg2! *(22...Nf4+ 23.Kg4 Nxh3 24.Qd5+! Ke7 25.Qe4+ Kf7 26.Qf3+!+−)*

A) 23.Re3? g6+ 24.Kh4 h5!! Once more, we have an almost artistic position: suddenly, Black has almost no pieces left, but yet he has a dangerous attack! 25.Qxc7+ Kg8 26.Rg3 *(26.Qc4+ Kg7 27.Rxe2 g5+! 28.Kxh5 Rh8#)* 26...Qe4+ 27.Kg5 Nxg3 28.Qxg3 Qe7+! 29.Kh6 Qg7+ 30.Kg5 Rf8 31.Nc3 Kh7! 32.Nd5 Rf5+ 33.Kh4 Qd4+ 34.Kh3 Qxd5−+;

B) 23.Rd3! Qh1+ 24.Kg4 Qg2+ 25.Kh4 Qf2+ 26.Rg3 Nxg3 27.Qxc7+ Kg8 28.Qxg3 Qf6+ 29.Kh3 Qf1+ 30.Qg2 Qxc1∞]

22...Qf3+ 23.Kh4 g5+ Quintiliano, Renato: '!' **24.Qxg5** Quintiliano, Renato: '□'

[24.Kxg5? Quintiliano, Renato Rg8+

25.Kh6 Qc6+]
24...Rg8 25.Qh5+
[25.Qxg8+ Quintiliano, Renato Kxg8 26.Rxe2 Qxe2 27.Nc3 Qf3−+]
25...Qxh5+ 26.Kxh5 Ng3+ Quintiliano, Renato: '?' Quintiliano, Renato: 'For some reason, Tal missed a simple win here.'
[26...Nf4+! Quintiliano, Renato: 'was the winning check:' 27.Kh6 *(27.Kh4 h5!)* 27...Rg6+ 28.Kxh7 Rg7+ 29.Kh6 Kg8!−+ Quintiliano, Renato: 'with unavoidable mate.']
27.Kh6? Quintiliano, Renato: '??'
[27.Kh4= Quintiliano, Renato: 'would force the draw, since' Nf5+ Quintiliano, Renato 28.Kh5 h6? is bad due 29.d3+−]
27...Nf5+ Quintiliano, Renato: '?' Quintiliano, Renato: 'And again!'
[27...Rg6+! 28.Kxh7 Ne4!−+ 29.Rf2+ Quintiliano, Renato Nxf2 30.Nc3 Ng4 31.d3 *(31.Ne4 Rh6#)* 31...Nf6+ 32.Kh8 Rg8#]
28.Kxh7 Rg7+ Quintiliano, Renato: 'An interesting and strange game, which provided amusing analysis!'

□ **Radjabov,T.**
■ **Anand,V.**
(rapid) Baku 2009
[John Emms]

Let's consider yet another option. This time it's for White, if he has played 8 h3:

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3 h6 9.Be3! If Black is going to play ...g5, then Be3 is a much better move than Re1. It was Tiviakov more than anybody who showed that the plan with Be3 is not a harmless one, although he usually plays it a move earlier (see the next game). **9...Bxe3** This is certainly not a mistake, at least from an objective viewpoint. However, it does appear that the resulting positions with the semi−open f−file are easier for White to play than Black, something which is demonstrated to some extent in this game.

[The aggressive 9...g5!? remains a decent option, but White has less to fear here than with 9 Re1?! g5. For example, 10.Bxa7 Nxa7 (Black wants to keep the option of ... 0−0−0!) 11.d4 Qe7 12.Nbd2 g4 13.hxg4 Nxg4 *(* or *13...Bxg4 14.dxe5 dxe5 15.Nc4 Nc6 16.Ne3 Rg8 17.Re1 Rd8 18.Nd5 Nxd5 19.exd5 e4 20.Kf1!* with some advantage for White, D. Pavasovic−L.Fressinet, European Ch., Plovdiv 2008 *)* 14.Ba4+!? *(* I prefer this to *14.dxe5 dxe5 15.g3* , as played in I. Khamrakulov−F.Vallejo Pons, Pamplona 2007 *)* 14...b5 *(* if *14...Bd7* , White replies *15.Bxd7+ Qxd7 16.dxe5 dxe5 17.Nc4* and Nh4−f5 is the plan*;* , or *14...c6 15.dxe5 dxe5 16.Nc4!)* 15.Bb3 and White, having induced ...b5, will follow up with a4.]

[The safest option is 9...0−0 which transposes after 10.Nbd2 to 9...h6 in Tiviakov−De Vreugt.]

10.fxe3 0−0 11.Nbd2 Be6

[The immediate 11...Ne7 is met by 12.Nh4! , after which not only is 12... Ng6 impossible, Black also has to be wary of exchange sacrifices on f6.]

[11...d5 also doesn't completely solve Black's problems, as typically this advance leaves White with a strong centre. For example, 12.exd5 Nxd5 13.Qe1! Nf6 14.d4 Re8 15.Qg3 Be6 *(15...exd4 16.exd4 Be6* is better *)* 16.Nxe5 Nxe5 17.dxe5 Nd7 18.Ne4 Kf8 19.Rad1 Bxb3 20.axb3 Qe7 21.e6 Qxe6 22.Qxc7 with a clear advantage for White, W.Schill−R. Rasmussen, Budapest 2004.]

12.Bc2 Ne7

[12...d5 looks more appealing here, and yet I still think White has a small edge after 13.exd5 Nxd5 14.Qe1 Re8 15.Qf2 planning d4.]

13.Nh4! This is a key move and almost an automatic response to ...Ne7.

13...Ne8 Anand begins to drift. In fact this and his following two moves make a very strange impression. Perhaps he was initially planning on the super−solid ...g6 and ...Ng7 but then decided against it.

[13...Ng6 looks more natural, against which White replies with 14.Nf5 . What is clear is that Black has no easy solution in his search for equality.]

14.d4 Bd7?! This definitely feels wrong.

[If 14...g6 there follows 15.Ndf3 f6 16.Bb3 *(* or *16.Nh2!?)* 16...Ng7 17.Bxe6+ Nxe6 18.Qb3 and Black is still under some pressure.]

[Perhaps he should try to create some action in the centre with 14...c5!? .]

15.Bb3! Why not? **15...Nf6**

[This allows a promising exchange sacrifice, but it's too late to go back

with 15...Be6? because of 16.Bxe6 fxe6 17.Rxf8+ Kxf8 18.Qb3 Qc8 19.dxe5 dxe5 20.Nc4 .]

16.Rxf6! I wouldn't have thought Radjabov spent too long on this move. It looks, and is, a very dangerous sacrifice.

16...gxf6 17.Qh5 Kg7 18.Rf1 Be6

[If 18...Ng6 there follows 19.Nf5+ Bxf5 20.exf5 Ne7 21.Ne4! Ng8 *(* or *21...d5 22.Nxf6!)* 22.Rf3 d5 23.Rg3+ Kh7 24.Qg4 and mate with Qg7.]

19.Rf3! c5

[Black needs to keep his bishop on e6 to provide at least some protection for his shaky light squares. After 19...Bxb3 20.Rg3+! *(20.axb3 Rh8!)* 20...Kh7 21.axb3 it's extremely difficult for Black to defend: exd4 *(* or *21...Qd7 22.Ndf3!* planning Nh2−g4 *)* 22.Rg4! dxe3 23.Nf5 Nxf5 24.Qxf5+ Kh8 25.Qh5 Kh7 26.Rh4 and White mates.]

20.Rg3+

[White could have kept some advantage with 20.Bxe6 fxe6 21.Qg4+ . Black has to allow Kh7 *(* since *21...Kf7? 22.d5! exd5 23.exd5* intending Ne4 is very strong *)* 22.Qxe6 .]

20...Kh7 21.Bxe6? Missing a great chance. Although 21 Bxe6 is undoubtedly tempting, it only leads to perpetual check.

[Radjabov could have played 21.Nf5! Nxf5 22.exf5 Bxb3 23.axb3 , which would have given him a very dangerous attack, and probably a winning one. For example, exd4 *(* or *23...Qe7 24.Rg4 Rg8 25.Rh4 Qf8 26.Ne4)* 24.Ne4! dxe3 25.Rg4! e2 26.Kf2! , and there is no good defence to the threat of Rh4.]

21...fxe6 22.Rg6 Nxg6 23.Qxg6+ Kh8 24.Qxh6+ Kg8 25.Qg6+

[The winning try for White is 25.Ng6 , threatening 26 Qh8+ Kf7 27 Qh7+ Ke8 28 Qg7!. The only defence for Black is Qd7! but it's good enough. A key point is that after 26.Qh8+ Kf7 27.Qh7+ Ke8 28.Nxf8 Qxh7 29.Nxh7 Ke7 , as indicated by Malcolm Pein in 'CHESS', White's knight on h7 is trapped.]

25...Kh8 26.Qh6+

European Championship, Plovdiv 2008

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.0−0 d6 8.Re1

[Note that with the move order 8.Nbd2 0−0 9.h3 Be6 , 10.Bc2 d5 11.exd5 is less effective since it can be met simply by Bxd5 - another reason for choosing 8 Re1 over 8 Nbd2.]

8...0−0 9.h3 Be6 10.Bc2 d5 11.exd5!

[This move is much stronger than 11.Nbd2?! .]

11...Qxd5 The queen recapture has been Black's usual choice, and it's the only way to defend e5 directly.

[The ideal way to recapture on d5 would be with the bishop, but this leaves the e5−pawn en prise and White should certainly accept the Marshall Gambit style offer: 11...Bxd5 12.Nxe5 Nxe5 13.Rxe5 Qd6 14.d4 *(* watch out for *14.Re1?? Qg3!)* 14...c5 was A.Delchev−A.Stefanova, Benidorm 2005. In the game

A) 15.Bg5! looks stronger to me, and I think Black is struggling to prove equality after Rad8 *(*or *15...cxd4 16.Bxf6)* 16.Qd3 g6 17.Nd2 cxd4 18.cxd4;
B) 15.Be3 Qc6 16.Rf5 g6 17.Rg5 Rad8 left Black with good compensation, especially in view of White's awkwardly placed rook.]

[I can find only one game with 11...Nxd5 , but this move can't be ruled out. For example, 12.Nbd2 *(*if *12.Nxe5?! Nxe5 13.Rxe5* , Black once again has the trick *Bxf2+!)* 12...Nf4 *(*if *12...f6* , White plays *13.d4* intending either dxe5 or c4 followed by d5 *)* 13.Nf1 *(*or *13.Ne4!? Ng6 14.Nfg5 Bd5 15.Qh5 h6 16.Nf3)* 13...Ng6 14.Ng5 Bd7 *(14...Bd5!?)* 15.d4! Qf6 *(15...exd4* is met by *16.Qh5 h6 17.Nxf7)* 16.Ne4 Qe7 17.d5 Nd8 (A.Shlakich−V.Frolochkin, St Petersburg 2007) and now 18.Be3 with some advantage for White.]

12.Bg5! This is a key move. Black probably doesn't want to give White the opportunity to play Bxf6, and ...Nd7 is the natural retreat. But this leaves the queen on d5 somewhat awkwardly placed, and to have any chance of gaining an advantage White must try to exploit this to the maximum. **12...Nd7**

[12...Qc5!? looks strange, and 13.Qe2 *(13.Bh4!?* is an interesting alternative *)* 13...Nd7 seems to invite 14.Nbd2 followed by Ne4 gaining more time. However, Black has the resource Nd4! 15.cxd4 Qxc2 , as played in A.Brkic−M.Pap, Bosnjaci 2009. This isn't entirely clear, but White should probably choose either 16.dxe5 *(*or *16.Be7!? Rfe8 17.Ba3 exd4 18.Rac1 Qa4 19.Rxc7)* 16...Nc5 17.Rac1 Qxd3 18.Be3 .]

13.Nbd2 Rfe8 Could this logical move actually be a mistake? Let's explore the alternatives:

[a) 13...Rae8 helps Black in some lines if White plays 14 Ne4, because with the other rook on f8 Black is better placed for ...f5. However, in A. Delchev−M.Kazhgaleyev, Gonfreville 2006, White began harassing the black queen to good effect: 14.c4! Qc5 *(*or *14...Qa5 15.a3* intending b4 *)* 15.Ne4 Qb6 16.Ba4 Nd4 17.Nxd4 exd4 , and here 18.c5! obliged Black to give up the exchange with Nxc5 , *(*since *18...Qxb2 19.Re2! Qb4 20.a3 Qa5 21.Bd2* traps the black queen. *)*]

[b) The tempting 13...f6 is answered convincingly by 14.d4! . White has every chance of gaining an advantage here. For example, Bf7 *(*or *14...fxg5 15.Bb3 Qd6 16.Ne4 Qe7 17.d5)* 15.Be3 exd4 16.cxd4 Rad8 17.Be4 Qd6 18.Qc2! Nxd4 19.Bxd4 Bxd4 20.Bxh7+ Kh8 21.Re4! was played in T.L.Petrosian−H.Melkumyan, Yerevan 2010. Here Black felt obliged to give up a piece for insufficient compensation after Bxf2+ *(*if Black plays *21...c5* instead, *22.Rh4* 24 gives White a promising attack; he is already threatening mate with 23 Bg8+ Kxg8 Qh7 *)* 22.Kxf2 Qb6+ 23.Re3 Rfe8 24.Rae1 .]

[c) 13...h6 has been played by Nigel Short. It's a move Black would like to play and it might even be his best option. Where should White retreat his

bishop?

A) If 14.Bh4 , Black can claim he has gained something because the bishop can no longer come back down the c1−h6 diagonal to annoy the black queen in certain lines.;

B) 14.Be3 is a decent response, and Bxe3 15.fxe3!? Qd6 16.d4 f5 17.Bb3 Kh8 was roughly equal in Z. Efimenko−N.Short, Kemer 2007.;

C) After studying this position for quite some time, I realized that there was a third option; White doesn't have to move the bishop at all: 14.Ne4!? is a very interesting possibility for White here. If Black takes the bishop it looks to me like White gets a fierce attack in return. Here's just a sample of the many possible lines: hxg5 15.Bb3 Qb5 16.Nfxg5 Bxb3 *(*or *16...Bf5 17.Bc4 Qxb2 18.Qh5 Nd8 19.Rab1 Qc2 20.Nxf7)* 17.Qh5! Rfe8 18.axb3 Nd8 *(18...Qxb3?* is met by *19.Ra3 Qd5 20.c4)* 19.Qh7+ Kf8 20.Ng3 Nf6 21.Qh8+ Ke7 22.Qxg7 and the attack is still burning strongly. It's still early days in the development of this line. With accurate play Black might well be okay, but it does seem easy to go wrong. Initially Short's 12...h6 looked like the most reliable move to me, but I can no longer say this with any certainty in view of 14 Ne4!?.;

D) 14.−−]

14.Ne4! Black definitely has some problems to solve here, the main one being to find a stable square for his under pressure queen.

[Black has fewer concerns after 14.Be3 Bxe3 15.Rxe3 h6 , as played in Z.Almasi−L.Aronian, European Team Ch., Heraklion 2007.]

[It's also worth noting that 14.c4 is less effective here, since Black has Qd6 intending 15.Ne4 Qf8! .]

14...Nc5 Desperately trying to ease congestion by exchanging a pair of knights, but White is having none of it. Predojevic's analysis in 'Chess Informant 102', given below, suggests that there is no easy way out for Black, but he can minimize White's advantage:

[a) 14...f5?! 15.Bb3 Qb5 16.Bxe6+ Rxe6 17.a4 Qd5 *(*or *17...Qxb2 18.Re2 Qb6 19.Be3 Nd4 20.cxd4 fxe4 21.dxe4 exd4 22.Bxd4)* 18.c4 Qa5 19.Bd2 Qb6 20.a5 Qxb2 21.Bc3 Bxf2+ 22.Kf1 Qxa1 23.Bxa1 Bxe1 24.Neg5 Re7 25.Nxe1 Nxa5 26.Nc2 with a clear advantage for White.]

[b) 14...Nf8! 15.Qe2 h6 16.Be3 Ng6 17.Bxa7 Rxa7 18.Qe3 b6 19.Bb3 Qd7 20.Ba4! Raa8 21.Rad1 with an edge for White. If f5? , 22.d4! is a strong reply: for example, b5 23.Nc5 Qf7 24.Nxe6 bxa4 25.d5 etc.]

15.Ng3! No trades! White is planning d4, or even b4 to force the knight back to d7.

15...h6 16.Be3 Nd7

[16...Rad8 looks more natural, but even here 17.d4 exd4 18.cxd4 Nb4 19.Bb1! *(19.dxc5 Qc4)* 19...Nd7 20.a3 Nc6 (Predojevic) 21.Ba2 followed by d5 looks very strong.]

17.Bxa7 Rxa7 18.d4! exd4 19.cxd4

This is an extremely favourable IQP position for White: Black's rooks are momentarily disconnected and his minor

pieces could be in better positions. The immediate threat is 20 Bb3 followed by 21 d5, and in fact this isn't easy to meet. **19...Nf6** Covering the d5−square (and h7 after Qd3), but is it enough? **20.Bb3 Qa5 21.Bxe6?** Missing a huge opportunity.

[White can still play 21.d5! , and indeed Predojevic's analysis suggests that it leads to a decisive advantage: Rd8 *(* or *21...Nxd5 22.Bxd5 Rd8 23.Rxe6!)* 22.dxe6! Rxd1 23.exf7+ Kf8 24.Raxd1 Ra8 25.Nh4 Qg5 26.Ngf5 . It's difficult for Black to meet White's many ideas, including Rd3−g3.]

21...Rxe6 22.Rxe6 fxe6 23.a3 Qd5 24.Rc1 Ra8 White still has a small edge here, but Black is certainly over the worst and the game soon ends in a draw. **25.Ne2 Rd8 26.Qc2 Qe4 27.Qc4 Qd5 28.Qc2 Qe4 29.Qc4 Qd5 30.Qc3 Qd6 31.Qb3 Na5 32.Qc2 Nc6 33.Qb3 Na5 34.Qc2 Nc6 35.Nc3 Qf4 36.Ne2**

□ **S.Tiviakov**
■ **D.Pavasovic**
European Championship, Plovdiv 2008
[John Emms]

So far we have concentrated on Black's most popular choice, 7...Ba7, but in the next two games we consider 7...0−0 and 7...Bg4. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3**
[Incidentally, if you really want to warn someone about the dangers of combining Bg5 and 0−0 when Black hasn't castled, then the following, often quoted and quite beautiful line usually does the trick: 5.0−0 d6 6.Bg5?! h6 7.Bh4?! g5! 8.Bg3 h5!? *(8...Bg4* is a good alternative, with a safe edge for Black *)* 9.Nxg5 h4 10.Nxf7 hxg3!! 11.Nxd8 Bg4 12.Qd2 Nd4 13.Nc3 Nf3+! 14.gxf3 Bxf3 and, faced with an inevitable mate, White resigned in V.Knorre−M. Chigorin, St Petersburg 1874.]
5...d6 6.Bb3 a6 7.0−0 0−0
[Perhaps one the main reasons 7...Ba7 is played so often is because it really does discourage 8.Bg5?! . Given that Black has yet to commit

his king, and furthermore White has committed his, Black shouldn't hesitate to advance on the kingside: h6! 9.Bh4?! *(*it's not too late for *9.Be3!)* 9...g5! 10.Bg3 *(*it's pretty obvious that the piece sacrifice *10.Nxg5? hxg5 11.Bxg5* shouldn't work, and *Rg8! 12.h4 Bg4* is a good reply *)* 10...Qe7 . Black will castle queenside, and the time gained attacking the white bishop with ...h6 and ...g5 will give him a vital head start in the race of pawn storms. For example, 11.Nbd2 Bd7 12.d4 0−0−0 13.d5 Nb8 14.Ba4 Rdg8 15.Bxd7+ Nbxd7 16.Kh1 Nf8 17.Ng1 h5 18.f3 h4 19.Bf2 Bxf2 20.Rxf2 g4 and Black is the only one attacking, G.Carames−G.Flear, San Sebastian 1995. This is certainly a line that White needs to avoid.]

Returning to the game, and the position after 7...0−0: **8.Bg5!?** If Bg5 is a good idea when only Black has castled, and a bad idea when only White has castled, what about when both sides have castled? 'Doubled−edged' is probably an accurate assessment. Once the bishop is forced back to g3, White must work hard to avoid it being shut out of the game. On the other hand, Black's weaknesses on the kingside won't go away.

[If White wants to reach lines identical or similar to those we've already covered in this chapter, he can simply play 8.Re1 . Black will nearly always retreat prophylactically with ...Ba7 to transpose directly, either here or a bit later. Occasionally, though, Black keeps his bishop on c5, and after a subsequent ...d5 there's the option of retreating it to f8 to cover the kingside. Here are some possibilities: h6 9.Nbd2 Be6 *(*note that if *9...Ng4 10.Re2 Kh8* , *11.h3!* forces the knight back to f6 and thwarts Black's ... f5 plan - this is one drawback of ...h6 *)*

A) Warning! White must avoid 10.Bc2? here, in view of the tactic Ng4! 11.Re2 Bxf2+! 12.Rxf2 Ne3 13.Qe2 Nxc2 14.Rb1 Bxa2 when 15.b3 Bxb1 16.Nxb1 N2b4 17.cxb4 Nxb4 favours Black.;

B) 10.h3 should be played. For example, Re8 11.Nh2 *(*or *11.Nf1 Bxb3 12.axb3 d5 13.Qe2 Bf8 14.Ng3 g6 15.b4 Qd7* with an equal position, M.Erdogdu−L.Aronian, Bursa 2010 *)* 11...d5 *(11...Bxb3 12.axb3 d5 13.b4 Bf8 14.Qf3 dxe4 15.dxe4 Qd7 16.Nc4 Rad8 17.Ng4 Nxg4 18.hxg4 Qe6 19.Ne3 Ne7 20.Qe2 c6 21.Nc4 Nc8 22.Be3 Nd6* also offers equal chances, A.Shchekachev−R. Kholmov, Omsk/Perm 1998 *)* 12.Qf3 Qd7 13.Ndf1 Kh7 14.Ng3 Rad8 15.Bc2 d4!? 16.c4!? and there's a tense battle in prospect, with White attacking the kingside and Black seeking action on the other wing. D. Lobzhanidze−D.Svetushkin, Dresden Olympiad 2008, continued b5 17.cxb5 Nb4 18.Bb1 axb5 19.a3 Na6 20.Nf5 Ng8 21.Ng4 f6 22.Ba2! (it's definitely worth getting rid of the Italian bishop here!) Bxa2 23.Rxa2 Qe6 24.Ra1 Bf8 25.Qg3 c5 26.a4 b4 27.Bd2 Ne7 28.f4! Nxf5 29.exf5 Qxf5 30.fxe5 h5? *(30...fxe5 31.Rf1 Qg6 32.Bxh6!* is unclear *)* 31.Rf1 Qg6 32.Rxf6 *(32.Nxf6+! gxf6 33.Qxg6+ Kxg6*

34.Rxf6+ is good for White *)* 32...gxf6 33.Nxf6+ Kg7 34.Nxh5+ Kh7 35.Nf6+ Kg7 36.Nh5+ with a draw by perpetual check.; **C)** . 10.−−]

[One further point worth mentioning here is that 8.Be3 , although still playable, lacks a bit of punch. Because Black has not yet played ... Ba7, Bxe3 9.fxe3 leaves him a tempo ahead of lines considered in the last two games.]

[If White is really keen to play the Be3 plan, 8.h3 intending to meet Ba7 with 9.Be3 is a wiser option.]

8...h6 9.Bh4 g5! At some point Black is going to have to take action against the pin, and now is as good a time as any.

[If Black delays ...g5 there might well be occasions where Nxg5 is a promising sacrifice. For example, 9...Be6 10.Nbd2 Re8 11.Kh1!? (A.Cherniaev−S.Haslinger, Hastings 2006/07) g5 12.Nxg5!? *(* moreover, if White chooses the safe *12.Bg3* , Black's ...Be6 and ...Re8 don't really fit in with the ...g5 plan *)* 12...hxg5 13.Bxg5 , intending f4.]

[Finally, if 9...Bg4 10.h3 Bh5 11.g4! Bg6 12.Nbd2 and Black has lost his chance to play ...g5 altogether.]

10.Bg3

[One strong reason not to delay ...g5 is that 10.Nxg5 fails here: hxg5 11.Bxg5 Kg7 12.Qf3 Rh8 intending 13.Qg3 Nh5! (Karpov).]

10...Bg4

[If Black could quickly reroute his c6−knight to g6 he really would be doing well (compare this with the next game, with colours reversed). Fortunately for White, 10...Ne7 can be met strongly by 11.d4! when the pressure on e5 brings the g3−bishop right back to life.]

[Something that Black must also avoid is 10...Nh5? , as the 11.Nxe5! trick works here: Nxg3 12.Nxc6 bxc6 13.hxg3 etc.]

[10...Ba7 11.Nbd2 Bg4 transposes to the note to Black's 11th move, below.]

11.Nbd2

[I wonder whether White should consider 11.h3!? here. After **A)** if 11...Bd7!? , 12.d4 Ba7 13.Re1 *(* or *13.Qd3)*; **B)** 11...Bh5 12.Nbd2 White adopts the same plan seen in the next note, with Nc4−e3. J.Nun−J.Franzen, Trnava 1985, continued Qd7 13.Nc4 Ba7 14.Qe2 Kg7 15.Ne3 Ne7 16.Rad1 Nh7? 17.d4! f5 18.Nxf5+ Nxf5 19.exf5 Rxf5 and here Rybka's suggestion of 20.dxe5 Rxf3 21.Kh2! looks very good for White, intending Rxg3 22.Qxh5 . Experience is scarce at the moment, but this looks like a line worth pursuing.]

11...Nh5!

[Early on there was a high−profile game, M.Chandler−A.Karpov, Bath 1983, after 11...Ba7 .

A) That probably discouraged some players from using this line: 12.Kh1 Bh5! *(* White intended to meet *12...Nh5* with *13.h3! Nxg3+ 14.fxg3)* 13.Qe1 *(13.Nc4!)* 13...Kg7 14.Bd1 Bg6 15.Nc4 Re8 16.Bc2 Qd7 17.Qd2 Rad8 when Karpov had a rock−solid position and went on to win.;

B) However, I really don't see a

reason for White to delay the Nc4−e3 plan seen in the previous note, and this presents Black with more of a challenge: 12.h3

B1) if 12...Bd7 White can play 13.Nc4 *(*or perhaps *13.Bh2* preventing *Nh5* in view of *14.Nxe5)* 13...Nh5 14.Bh2 Nf4 15.Ne3 with an unclear position;

B2) 12...Bh5 13.Nc4! Bg6 14.Ne3 Kg7 *(*I think Black should play *14...Nh5 15.Bh2 Nf4 16.Qd2 Kg7 17.Nd5* with unclear play *)* 15.Qd2 Ne7 16.h4! g4 17.Nh2 Qc8 18.Bd1 h5 19.Bc2 Nc6 20.Rae1! Qd7 21.Kh1 Kg8 22.f4! exf4 23.Rxf4 Bxe3 24.Qxe3 Qe7 25.Nf1 Nd8 26.Rf2 Re8 27.Qd2 Nd7 28.Ne3 Nb6 29.Nf5 Qf8 30.e5 d5 31.Ref1 Kh8 32.b3 with a dominating position for White, B.Philippeit−A.Beyer, correspondence 2004 (in fact, Black resigned here). Okay, Black's defence was far from perfect, but this Nc4−e3 plan does give him something to think about.;

C) 12.−−]

12.Kh1! Releasing the pin on the f−pawn so that White can play h3.

[White definitely should avoid 12.Nc4 Qf6! 13.Ne3 Bxf3 14.Qxf3 Qxf3 15.gxf3 , as played in A.Vajda−Z. Gyimesi, Nagykanizsa 2003. It's hard to see the bishop on g3 taking any further part in the game!]

12...Qf6 The most natural follow−up to 11...Nh5, but Black has other decent options here:

[a) 12...Kg7 13.h3 Bd7 14.Nh2 Nxg3+ 15.fxg3 f5! (one of the points of 12...Kg7) 16.exf5 Bxf5 17.Ne4 Bb6 18.g4 Bxe4 19.dxe4 with an equal position, S.Tiviakov−E. Van den Doel, Wolvega 2008.]

[b) 12...Ng7!? (providing light−squared cover on the kingside) 13.h3 Bh5 14.Bh2 Kh8 15.Nc4 Qf6 16.g4 Bg6 17.Ne3 Ne6 18.Nf5 Ba7 19.Qe2 with an almost symmetrical position, again roughly level, K. Shanava−G.Sargissian, European Championship, Dresden 2007.]

13.h3 Bd7 14.Nd4

[14.d4!? is critical but Black seems to be okay: exd4 *(14...Ba7? 15.Nxe5!)* 15.e5!? *(15.Nxd4 Nf4 16.Nxc6 Bxc6 17.Qf3* was agreed drawn in J. Nunn−J.Pinter, Helsinki 1983 *)* 15...Qg6! *(15...dxe5?! 16.Ne4 Qe7 17.Nfxg5 Nxg3+ 18.fxg3 hxg5 19.Qh5* wins for White - Nunn*;* or *15...Nxg3+ 16.fxg3 Qg6 17.cxd4 Nxd4 18.Nxd4 Bxd4 19.Rf6! Qg7 20.Qh5!)* 16.cxd4 Nxd4 17.Nxd4 Bxd4 and it's not clear whether White has enough play for his pawn investment, although this could do with a test.]

14...Nf4

[After 14...exd4 15.Qxh5 Black has some problems to solve, with f4 or e5/Ne4 ideas in the air.]

15.Nxc6 Bxc6 16.Nc4 d5! This seems to equalize. **17.Nxe5!? Qxe5 18.d4 Bxd4**

[18...Qxe4 19.f3 Qe7 20.Re1 Qd6 21.dxc5 Qxc5 22.Bxf4 gxf4 23.Qd3 is a risky pawn for Black to take.]

19.exd5 Bxd5 20.Bxf4 Qxf4 21.Bxd5 Be5

[Here the database gives 21...Qf5??

22.g3?? , but 21...Be5 is a thousand times more likely!]
22.g3

■ **V.Anand**

Baku (rapid) 2009

[John Emms]

Let's consider yet another option. This time it's for White, if he has played 8 h3: **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 d6 7.0−0 Ba7 8.h3 h6 9.Be3!** If Black is going to play ...g5, then Be3 is a much better move than Re1. It was Tiviakov more than anybody who showed that the plan with Be3 is not a harmless one, although he usually plays it a move earlier (see the next game). **9...Bxe3** This is certainly not a mistake, at least from an objective viewpoint. However, it does appear that the resulting positions with the semi−open f−file are easier for White to play than Black, something which is demonstrated to some extent in this game.

[The aggressive 9...g5!? remains a decent option, but White has less to fear here than with 9 Re1?! g5. For example, 10.Bxa7 Nxa7 (Black wants to keep the option of ... 0−0−0!) 11.d4 Qe7 12.Nbd2 g4 13.hxg4 Nxg4 *(* or *13...Bxg4 14.dxe5 dxe5 15.Nc4 Nc6 16.Ne3 Rg8 17.Re1 Rd8 18.Nd5 Nxd5 19.exd5 e4 20.Kf1!* with some advantage for White, D. Pavasovic−L.Fressinet, European Ch., Plovdiv 2008 *)* 14.Ba4+!? *(* I prefer this to *14.dxe5 dxe5 15.g3* , as played in I. Khamrakulov−F.Vallejo Pons, Pamplona 2007 *)* 14...b5 *(* if *14...Bd7* , White replies *15.Bxd7+ Qxd7 16.dxe5 dxe5 17.Nc4* and Nh4−f5 is the plan*,;* or *14...c6 15.dxe5 dxe5 16.Nc4!)* 15.Bb3 and White, having induced ...b5, will follow up with a4.]

[The safest option is 9...0−0 which transposes after 10.Nbd2 to Tiviakov−De Vreugt, note 'c' to Black's 9th move.]

10.fxe3 0−0 11.Nbd2 Be6

[The immediate 11...Ne7 is met by 12.Nh4! after which not only is 12... Ng6 impossible, but Black also has to be wary of exchange sacrifices on f6.]

[11...d5 also doesn't completely solve Black's problems, as typically this advance leaves White with a strong centre. For example, 12.exd5 Nxd5 13.Qe1! Nf6 14.d4 Re8 15.Qg3 Be6 *(15...exd4 16.exd4 Be6* is better *)* 16.Nxe5 Nxe5 17.dxe5 Nd7 18.Ne4 Kf8 19.Rad1 Bxb3 20.axb3 Qe7 21.e6 Qxe6 22.Qxc7 with a clear advantage for White, W.Schill−R. Rasmussen, Budapest 2004.]

12.Bc2 Ne7

[12...d5 looks more appealing here, and yet I still think White has a small edge after 13.exd5 Nxd5 14.Qe1 Re8 15.Qf2 planning d4.]

13.Nh4! This is a key move and almost an automatic response to ...Ne7.

13...Ne8 Anand begins to drift. In fact this and his following two moves make a very strange impression. Perhaps he was initially planning on the super−solid ...g6 and ...Ng7 but then decided against it.

[13...Ng6 looks more natural, against which White replies with 14.Nf5 . What is clear is that Black has no easy solution in his search for equality.]

14.d4 Bd7?! This definitely feels wrong.

[If 14...g6 there follows 15.Ndf3 f6 16.Bb3 *(* or *16.Nh2!?)* 16...Ng7 17.Bxe6+ Nxe6 18.Qb3 and Black is still under some pressure.]

[Perhaps he should try to create some action in the centre with 14...c5!? .]

15.Bb3! Why not? **15...Nf6**

[This allows a promising exchange sacrifice, but it's too late to go back with 15...Be6? because of 16.Bxe6 fxe6 17.Rxf8+ Kxf8 18.Qb3 Qc8 19.dxe5 dxe5 20.Nc4 .]

16.Rxf6! I wouldn't have thought Radjabov spent too long on this move. It looks, and is, a very dangerous sacrifice.

16...gxf6 17.Qh5 Kg7 18.Rf1 Be6

[If 18...Ng6 there follows 19.Nf5+ Bxf5 20.exf5 Ne7 21.Ne4! Ng8 *(* or *21...d5 22.Nxf6!)* 22.Rf3 d5 23.Rg3+ Kh7 24.Qg4 and mate with Qg7.]

19.Rf3! c5

[Black needs to keep his bishop on e6 to provide at least some protection for his shaky light squares. After 19...Bxb3 20.Rg3+! *(20.axb3 Rh8!)* 20...Kh7 21.axb3 it's extremely difficult for Black to defend: exd4 *(* or *21...Qd7 22.Ndf3!* planning Nh2−g4 *)* 22.Rg4! dxe3 23.Nf5 Nxf5 24.Qxf5+ Kh8 25.Qh5 Kh7 26.Rh4 and White mates.]

20.Rg3+

[White could have kept some advantage with 20.Bxe6 fxe6 21.Qg4+ . Black has to allow Kh7 *(* since *21...Kf7? 22.d5! exd5 23.exd5* intending Ne4 is very strong *)* 22.Qxe6 .]

20...Kh7 21.Bxe6? Missing a great chance. Although 21 Bxe6 is undoubtedly tempting, it only leads to perpetual check.

[Radjabov could have played 21.Nf5! Nxf5 22.exf5 Bxb3 23.axb3 , which would have given him a very dangerous attack, and probably a winning one. For example, exd4 *(* or *23...Qe7 24.Rg4 Rg8 25.Rh4 Qf8 26.Ne4)* 24.Ne4! dxe3 25.Rg4! e2 26.Kf2! , and there is no good defence to the threat of Rh4.]

21...fxe6 22.Rg6 Nxg6 23.Qxg6+ Kh8 24.Qxh6+ Kg8 25.Qg6+

[The winning try for White is 25.Ng6 , threatening 26 Qh8+ Kf7 27 Qh7+ Ke8 28 Qg7!. The only defence for Black is Qd7! but it's good enough. A key point is that after 26.Qh8+ Kf7 27.Qh7+ Ke8 28.Nxf8 Qxh7 29.Nxh7 Ke7 , as indicated by Malcolm Pein in 'CHESS', White's knight on h7 is trapped.]

25...Kh8 26.Qh6+

□ **Spieringshoek,Pieter Johannes**
■ **Van Oosterom,Joop J**
Netherlands ch−09 1980−81 1980
[G. den Broeder]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Qe7 Een oude, oerdegelijke variant, welke beide partners vrij spel belooft. **5.d4 Bb6 6.0−0 d6 7.h3 Nf6 8.Re1 h6 9.a4 a6 10.b4** Iets gebruikelijker is toch wel 10 Le3. Met de tekstzet richt Wit zich definitief op de damevleugel. **10...g5** Dat is het gevolg : Zwart komt onmiddellijk opzetten op de koningsvleugel, en hoopt op het juiste moment de diagonaal a7−g1 te kunnen openen. **11.Ba3** Tegen Mol speelde Spieringshoek 11 b5, de loper op c1 voor de verdediging handhavend. **11...g4 12.hxg4 Nxg4 13.b5 Na5 14.Be2** Een koene keuze. Het alternatief was 14 Lf1, waarmee g2 wordt gedekt en later eventueel via de 2e lijn het zwakke punt f2 beschermd kan worden. Op e2 staat de loper de eigen stukken enigszins in de weg, maar daar staat tegenover dat Pb1 nu gunstig omgespeeld kan worden. **14...Qf6** Als antwoord wordt de druk op d4 opgevoerd. **15.Nbd2 Rg8 16.Nf1** Dat was dus de bedoeling van 14 Le2, jammer alleen dat het vervolg Pe3 niet wordt uitgevoerd. Overigens was ook 16 Pc4,Pxc4 17 Lxc4 niet slecht. **16...Be6 17.bxa6 bxa6 18.Bb4 Nb3!?** Van Oosterom voert wel konsekwent zijn plan door. de ondermijning van d4 is nu een feit. Het lijkt overigens dat Pb3 in moeilijkheden kan komen, maar daar heeft de zwartspeler iets op gevonden. **19.a5 Ba7 20.Rb1 exd4 21.e5!** Een schitterende riposte, veel sterker dan onmiddellijk 21 Lxa6. **21...Qg7!** Met vreselijke dreigingen. Het lijkt echter dat Wit nu weer de diagonaal kan sluiten, met alle moeilijkheden voor het bedreigde ros op b3 van dien.
[Zwart kan niet slaan omdat het openen van de d−lijn na bijv. 21...dxe5 22.Bxa6 d3 *(*Veel sterker *22...Rb8 23.Rb2 c5* (CW) *)* 23.Bb5+ hem fataal zou worden. Toch lijkt het er op dat van Oosterom bewust op deze verwikkelingen heeft aangestuurd.]
22.cxd4 Nxe5 23.g3 Op 23 Pg3 is Zwart's komende combinatie wat ontkracht, maar vermoedelijk vreesde Spieringshoek dan het antwoord − f5. **23...Nxd4!** Daar is dan de zorgvuldig voorbereide overval, tegelijk de enige uitweg uit de huidige problemen. Zwart moet echter veel materiaal geven voor de dame. **24.Nxd4 Bxd4 25.Qxd4 Nf3+ 26.Bxf3 Qxd4 27.Bxa8 Kd7 28.Bg2?**
[Zwart moet het in dit eindspel natuurlijk hebben van zijn vrijpionnen. Van beslissende betekenis daarbij is of de witte stukken al dan niet tot een behoorlijke samenwerking kunnen komen. Daartoe was nu 28.Red1

waarna Wit m.i. in staat is de vrijpionnen op te vangen en uiteindelijk uit te schakelen. Qxd1 29.Rxd1 Rxa8 volgt 30.Bd2! h5 31.Rb1!]

28...Rb8 Nu echter moet Wit zich in allerlei bochten gaan wringen om nog op de been te blijven. Al ras komen de pionnen naar voren. **29.Re4 Qd3 30.Rbe1 c5 31.Bd2 Rb2 32.Bxh6** Nu is die pion niet belangrijk meer. **32...d5 33.Rf4 Rb1!** Noodzakelijk, om verder te komen. Wit heeft zich vooalsnog op het nippertje staande gehouden, en het is nu zaak diens aanvalspotentieel te beperken **34.Rxb1 Qxb1 35.Kh2 c4** Weer een stapje verder, en nog is wit niet aan het woord gekomen. **36.Nd2**

[Reeds de beslissende fout. Juist was alleen nog 36.Ne3! Qg6 (vermoede lijk het beste) 37.Rh4! en de zwarte pionnen worden op tijd onschadelijk gemaakt, bijv. c3 38.Nxd5 Bxd5 39.Bxd5 c2 40.Be3 Qd3 41.Rd4 Qxd4 42.Bxd4 c1Q 43.Bxf7! en remise is onvermijdelijk (− Dh6+ enz).]

36...Qd1 37.Nf3 c3 Nu gaan beide vrijpionnen een vol stuk kosten. **38.Ne5+ Kc8 39.Bf3 Qe1 40.Bg7 c2 41.Nd3 Qd2 42.Rd4 f6 43.Bxf6** De beslissende desorganisatie. **43...Bf5 44.Rxd5 Bxd3 45.Rc5+ Kd7 46.Bd4 Qh6+ 47.Kg2 c1Q 48.Rxc1**

[Aardiger was nog 48.Rd5+ Ke6 49.Re5+ Kf7 50.Bd5+ Kf8 51.Be3 Qhh1#]

48...Qxc1 49.Bb6 Qe1 50.Bb7 Be4+ 51.Bxe4 Qxe4+ 52.Kh3 Ke6 0−1

1.e4 White is not named in CC155 but can be identified from results in ICCF website. Players against whom bennett has Black are: Carolei (ITA), Labate (USA), Ian P.O'Toole (USA), P.Havira (SLK) and F.Osuna Osuna (ESP). My guess is Labate as the others don't meet the description of the opponent in the magazine. Somebody told me Mathias was White but that would mean they played the game with the wrong colours

in error, or else this was a friendly. **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1 Ne7 11.Rxe4 d6 12.Bg5 Bxg5 13.Nxg5 0−0 14.Nxh7 Kxh7 15.Qh5+ Kg8 16.Rh4 f5 17.Qh7+ Kf7 18.Rh6 Rg8 19.Re1 Bd7?**

7: Beijing (rapid) 2008

[Martin Lokander]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 For practical purposes, I fiddled with the move order.

[The game actually went 5.c3 0−0 *(5...d5!?* is another option which probably transposes *)* 6.0−0 and we have transposed.]

5...0−0 6.c3 In my database, this move has been played almost 2,000 times, yet I don't think it's that good. White is obviously not worse, but I also think he can't fight for a serious theoretical advantage by allowing a quick ...d7−d5. This has already been discussed in the theoretical introduction.

[Before I show some concrete variations, let's look at some minor alternatives: 6.Be3 is a type of move I often see in practice by club players.

However, it walks straight into d5! .]
[6.h3 is useful against ...d5 breaks because Black can't play the ...Bg4 pin. I'd prefer d6 for now, with a very normal position. Indeed, after 7.a3 *(7.a4 Be6* is similar and harmless as well; Black will simply play ...Qd7 and enjoy a normal, balanced game - see the game Barua−Ganguly for a discussion of a similar position *)* 7...Be6 8.Re1 Qd7 Black should be satisfied with his solid position. If comparing to Barua−Ganguly where this type of position was discussed, 9.Nc3 is now very well met by Nd4! which forces the exchange of a few minor pieces.]
[6.Nbd2 is a no−nonsense move which continues rapid development. White hasn't lost time with his development and so opening up the position with ...d5 is probably premature. Instead, d6 7.c3 *(7.Bb3 Na5 8.Ba4 c5 9.c3* was the course of the excellent game B.Socko−M. Bartel, Warsaw 2012, where Black found *Rb8!* which is a more useful move than ...a6; Black later won a great game *)* 7...Na5 is likely to transpose to our next game after 8.Bb5 a6 9.Ba4 c5! 10.Re1 as White's 10th move alternatives doesn't look terribly challenging.]
[6.a4!? tries to gain space on the queenside while not committing to anything in centre. Interestingly, this is a pet variation of GM Bologan, who has himself supplied an effective antidote against it: d5! (surprisingly rare in practice, but logical since a2−a4 doesn't challenge the black centre) 7.exd5 Nxd5 8.Re1 *(*just like Bologan mentions, *8.h3* stops ...Bg4, but it leaves time for Black to consolidate his centre with *Kh8* followed by ...f6 *)* 8...Bg4 9.h3 Bxf3! 10.Qxf3 Nb6 . This is a very concrete problem behind 6 a4 - the bishop can't drop back to a2 because a4 would be en prise. This cute idea can help you remember how to face 6 a4. After 11.Nd2 Nxc4 12.Nxc4 f6 Black has successfully managed to consolidate his centre.]

6...d5 The principled reaction against the move c2−c3. White has difficulties taking active measures against Black's e−pawn when d3 is such a big weakness. **7.exd5 Nxd5** White usually has two ways to play against the ...d5 break. Either he goes for the immediate Re1 and challenges the pawn on e5, or he plays h2−h3 and prevents ...Bg4 first. The immediate Re1 is often the most critical approach, but it's also the most risky if Black decides to sacrifice this pawn (like we saw in Game 5). **8.Re1**

[8.h3 was dealt with in a brilliant way in J.Gunnarsson−M.Adams, Kallithea 2008: Nb6 9.Bb5 Nb8!! . A fantastic move by Adams. The e5−pawn is untouchable and the bishop is left in confusion on b5. After 10.d4 *(10.Nxe5? Qd5* loses a piece *)* 10...e4 11.Nfd2 c6 12.Be2 f5 Black already had a stable advantage and Adams later won this game.]

8...Bg4 9.h3 Bh5 10.Nbd2

[10.g4 is always a critical test, but with White's pawn on d3 it shouldn't be surprising that he is the one in danger after Bg6 11.Nxe5 Nxe5 12.Rxe5 Nb6! .]

10...Nb6 11.Bb5 f6! Black has

managed to consolidate his centre and enjoys a very pleasant position. **12.Ne4 Qd5** Forcing a decision from the b5−bishop while intending to put pressure on the d3−pawn. **13.Qb3 Bf7 14.Qxd5 Bxd5 15.c4?!** A mistake, but in a rapid game they are unavoidable.

[White could have kept an equal game with 15.d4 .]

15...Bxe4 16.Rxe4 Nb4! Now we see the problem. Suddenly White has to deal with the d3−pawn while his light−squared bishop is suffocating, similarly to the Gunnarsson−Adams game mentioned above. **17.d4** The best try. **17...c5!** Very accurate play from Kravtsiv. The bishop continues to suffer on b5.

[Kryvoruchko wanted to free his bishop with 17...a6 18.c5! , although even here Black can count on a stable advantage after axb5 19.cxb6 c5!]

18.dxc5

[A better try, albeit still desperate, is 18.Bd2 when Black can win a pawn with cxd4 19.Nxd4 Nd3! .]

18...Bxc5 19.a3 Nd3 20.Be3 a6 And there we have it. Who would have thought that this bishop would cause White such problems? **21.b4**

[White can still try to break free with 21.Ne1 , but after Bxe3 22.Nxd3 Bd4 23.c5! axb5 24.cxb6 Rfc8 the endgame is horrible for him.]

21...Bxe3 22.Rxe3 axb5 23.Rxd3 e4! A final fork that ends White's misery. Kryvoruchko, now an established 2700−player, decided to keep going for a few moves, but even for a rapid game this is completely over. **24.Rd6 Nxc4 25.Rd5 exf3 26.Rxb5 Rf7 27.a4 fxg2 28.a5 Rd7 29.Rc1 Ne5 30.Kxg2 Kf7 31.Rc2 Re8 32.Rb6 Re6 33.Rxe6 Kxe6 34.b5 Rd5 35.b6 Rxa5 36.Rc7 Nd7 37.Rxb7 Rb5**
0−1

C55

□ **Souleidis,G.**
■ **Ragger,M.**
5: German League 2007
[Martin Lokander]

In this game we will see another way for White to deal with the threat of ...Na5, by giving the bishop a square on c2. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Bb3** A good move. The bishop can be tucked away on c2 and White waits for ...d6 before playing c3. **6...d6**

[There's some coverage of 6...d5 in the theoretical introduction, above, but this is my main recommendation. Once again, Black has ...Na5 on his mind.]

7.c3 d5! What's going on here? Black just moved his pawn to d6, and on the very next move he moves it again. Compared to 6...d5, we simply gave away a free tempo to White. But what's important is the inclusion of c2−c3, which isn't White's dream move. It weakens the d3−pawn a lot and assures Black of good counterplay. Technically Kupreichik played it first, but Romanishin made it popular by using the variation repeatedly in 1988. **8.exd5** In this game we will deal with this capture.

[It's more popular to maintain the tension in the centre with 8.Nbd2]

[or with 8.Qe2 . These moves will be

dealt with in our next game.]
8...Nxd5 9.Re1 The usual continuation, putting immediate pressure on the e5−pawn.
[9.h3 is the calmer alternative, which eliminates the pin with ...Bg4. On the other hand, Black gets more time to consolidate his centre. Bf5! puts pressure on White's d3−pawn and after 10.Re1 Bf6 White would like to find a way to develop his pieces. The manoeuvre Nb1−d2−e4 would be nice to accomplish, but the d3−pawn is a constant problem. Of course, 11.Bc2 Nb6! (keeping more pressure on d3 and making sure Nbd2 is impossible) 12.Qe2 Nd5! (now White probably has nothing better than repeating the position as ...Nf4 is an issue) 13.Qf1 is playable, but White's development has undoubtedly become quite artificial. One decent way to continue is a5 14.Nbd2 a4 , grabbing space on the queenside. Chances are about equal.]
9...Bg4! Compared to 6...d5, White's weak d3−pawn makes Black's pawn sacrifice very attractive. **10.h3 Bh5 11.g4** Generally the critical continuation, but White should probably stay clear of it.
[That said, 11.Nbd2 Nf4! is not pleasant to face either.]
11...Bg6 12.Nxe5 Nxe5 13.Rxe5 c6 Black's compensation lies in his rapid development and the numerous weaknesses in the white camp. Apart from White's kingside, the d3−pawn is again an issue. **14.Bxd5?!** A mistake after which Black's initiative becomes very dangerous.
[Instead: 14.Nd2 is a common idea, but here Nf4! is a huge problem.]
[14.Qf3 might be the best try, but Black still seems to be better after Bd6 *(14...Bf6!?* is an interesting alternative as well *)* 15.Rxd5 (trying to give back some material to consolidate) *(* also possible here is *15.Re1 Bc7!* . This prepares ...Qd6 with a very dangerous attack *)* 15...cxd5 16.Bxd5 Qe7 when his rapid development continues to count for something and White no longer has a material advantage.]
14...Bd6
[14...Bf6 might be even better.]
15.Rg5 Not good,
[but White already has serious problems as 15.Re1 cxd5 is extremely dangerous for him.]
15...cxd5 16.Qf3 f5! A very strong move by Ragger. Opening the f−file is the highest priority. **17.gxf5 Be7** The tactical reason why 16...f5 works. If Black manages to open up the f−file for nothing, White will be busted. **18.f6 Bxf6 19.Qxd5+ Rf7!** Very strong.
[The natural 19...Kh8 isn't as accurate as 20.Qxd8 Raxd8 21.Rxg6! hxg6 22.d4 keeps White in the game.]
20.Qxd8+ Rxd8 21.Rxg6 hxg6 22.Be3
[The reason 22.d4 doesn't work well now is because Bh4! wins the f2−pawn.]
22...Rxd3 23.Nd2 Rfd7 Black has a comfortable extra exchange and he would love to trade a pair of rooks which would leave White's queenside up for grabs. Winning is just a matter of technique. **24.Rd1 Bd8!** Black exchanges the bishop on e3 which

holds White's position together. **25.Kf1 Bb6 26.Ke2 Bxe3 27.fxe3 b5!** White is stuck in a kind of zugzwang where only his pawns can move. **28.h4 Kh7 29.a4 a6!** Black doesn't need to give White any passed pawns and Ragger went on to win after activating his king. **30.axb5 axb5 31.e4 Kh6 32.Ke1 Kh5 33.Ke2 Rd8 34.Ke1 Re3+ 35.Kf2 Rxe4 36.Nxe4 Rxd1 37.b3 Kxh4 38.Ke2 Rb1 39.b4 g5 40.Nd6 g4 41.Nf5+ Kh3 42.Nxg7 g3 43.Nh5 g2 44.Nf4+ Kg3 45.Nxg2 Kxg2 46.Kd3 Rd1+**
