[Colovic,Aleksandar]

A common theme in these three games was that So didn⇗t manage to utilise his preparation, whereas his opponents managed to get in theirs. It is psychologically difficult to play in such situations, but So showed his tenacity in defence admirably. However, things were about to change, starting with his next game in Round 5 against Anand. Here So got his opening right and he drew without any problems. **1.e4** GM Boris Avrukh **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0** GM Boris Avrukh: '!?' [8.Re1 used to be the main line. Bg4 Again, this pin is the best way to defend the pawn. Note that the move 8...Re8 would be a typical mistake in view of 9.d3−d4 where Black loses at least a pawn. 9.h3 Bh5 10.Nbd2 Nb6 We are already familiar with this idea. The move ...Nb6 is always a decent reaction when the d3−pawn is not protected. 11.b4 *(11.Bb5* transposes to 8. Nbd2 *)* 11...Be7 Now the critical game seems to me 12.Qe2 White can win the central pawn by means of *(12.b5 Na5 13.g4 Bg6 14.Nxe5* but Black retains a nice compensation after *Bf6!* for example *15.Nxg6 hxg6 16.Ne4 Naxc4 17.dxc4 Nxc4*= 1/2−1/2 (33) Jovanovic,Z (2550)−Bosiocic,M (2555) Austria 2014 *)* 12...Nxc4 13.Nxc4 f6 14.b5 White has to play energetic in order not to get worse positionally Nb8 15.d4 a6! A great way to generate a counterplay. Blac k opens up the position and brings his a8−rook into play. 16.bxa6 Rxa6 17.dxe5 all this happened in Vocaturo,D (2574)−Hammer,J (2689) Gjakova 2016 , now Black should have continued Nd7!N 18.g4 Bf7 Black's active pieces and the pair of bishop compensate the missing pawn. Furthermore, White has a weakened king and a damaged pawn structure.] [8.Nbd2 (GM Boris Avrukh) The idea of this move is to bring the knight into the centre by playing Ne4. The main drawback is that after Nb6 Black could make use of the vulnerability of the d3−pawn. White's bishop couldn't remain on the a2−g8 −diagonal. 9.Bb5 Bd6 By protecting the e5−pawn, Black prepares the typical Ne7−g6 followed by a7−a6 when White must part with his b5−bishop. That is why White should put additional pressure on e5 by means of 10.Re1 Bg4 This pin is a typical way to protect the e5−pawn in this variation. 11.h3 Bh5 12.Ne4 *(* Another good example is *12.a4* As in the main line, White's idea is to bother the b6−knight by means of a4−a5. We should prevent it by playing *a5 13.Ne4 Na7* It becomes clear that White's annoying bishop will be eliminated. *14.d4 Nxb5 15.axb5 Bxf3 16.Qxf3 exd4 17.cxd4 Bb4!* Black was perfectly fine in Shankland, S (2661)−Sevian,S (2531) Saint Louis

Rab8* and Black was already better in Wei,Y (2714)−Vidit,S (2648) Abu Dhabi 2016 *)* 13.Bg5 f6 14.Be3 a6 15.Bxc6 bxc6 16.Ng3 Bf7 Black reached a comfortable equality in Carlsen,M (2855)−Aronian,L (2792) Leuven 2016. His pair of bishops and space advantage in the centre compensate the doubled pawns on the c−file.]
[Sometimes, before attacking the e5−pawn, White prevents the move ...Bg4 by means of 8.h3 (GM Boris Avrukh) In this way, however, he loses a valuable time which gives Black the opportunity to create pressure against the d3−pawn. Nb6 9.Bb5 *(*In my opinion too passive *9.Bb3 Bf5 10.Bc2 Qd7* Black has comfortable game as in the following game *11.Nh4 Be6 12.Nd2 f5 13.Qh5?! Rae8 14.Nb3 Bd6∓* Ardelean,R (1702)−Sohier,J (2240) Arad 2016 *)* Now I like 9...f6! despite 9...Bd6 being more popular. Generally, when it is possible, the bishop should stay on the a7−g1 diagonal. 10.Nbd2 Qd5! threatening 11...Bxf2 followed up by 12...Qxb5 11.d4 exd4 12.Nb3 Bd6 13.Nbxd4 Nxd4 14.Nxd4 Be5= Black equalised comfortably in Nemeth,M (2492)−Erdos,V (2651) Zalakaros 2014]
[It is interesting to mention that in response to 8.b4 (GM Boris Avrukh) Black's best is Be7 In this particular position, the b6−square is not very suitable for the bishop, since the advance of White's queenside pawns could be annoying.

A) It's already well−known that 9.b5 Na5 10.Bxd5 Qxd5 11.c4 Qd7! is good for Black. One of the model games here continued 12.Bd2 e4! 13.Bxa5 exf3 14.Qxf3 a6! B) 9.Re1 Bf6 This is one of the ideas behind the move 8...Be7. By tranferring his bishop to f6, Black wants to make use of the weakened long diagonal. One of the recent games continued 10.Bg5 Bxg5 11.Nxg5 Nf4! 12.Nf3 Bg4∓ When Black is better due to his more active pieces and lead in development. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5 7.Bb5 Ne4 8.cxd4 Bb6 9.Nc3 0−0 10.Be3 Bg4 11.Qc2 Another relatively rare option from Wesley So. We've already seen a game where he surprised the World Champion on the 12th move after 11.h3.

[For the main line 11.h3 see So,W−Carlsen,M in the current update.]

11...Bf5 12.Qb3 Ne7 Black protects the d5−pawn.

[In fact, he had an interesting alternative at his disposal. 12...Na5!?

A) 13.Qxd5? is met by Qe7! with a strong threat of 14...c6 and White's queen finds herself in a trap. 14.Nxe4 *(14.e6!* is the lesser evil, but after *fxe6 15.Qe5 c6 16.Nxe4 cxb5∓* Black is already clearly better. *)* 14...Be6 15.Nf6+ gxf6 16.Qe4 Qb4+ 17.Nd2 Qxb5−+ Bukojemski,A (2240)−Gavrilov,A (2488) Krakow 2011;

B) 13.Qb4 was tested in correspondence chess without much success. c6 14.Be2 Nc4! 15.Bxc4 Ba5! 16.Qb3 dxc4 17.Qxc4 Qb6∓ and Black was better in: Schilling,F (2379)−Pesonen,S (2333) ICCF email 2008;

C) 13.Qa4 c6 14.Be2 Nxc3 15.bxc3 Bc7 16.Bg5 Qd7 17.0−0 h6 18.Bh4 b5 19.Qd1 Nc4 and Black was doing fine in Bachmann,A (2609)−Swiercz,D

(2665) Moscow 2016]

13.0−0 c6 14.Be2 Rb8?! A slightly dubious novelty from the World Champion.

[The most accurate is the immediate 14...f6!

A) 15.Na4 Ng6 16.exf6 Rxf6 17.Nxb6 Qxb6?! Socko,B (2643)−Gyimesi,Z (2586) Austria 2010. Now *(17...axb6!=* was better. *)* 18.Ne5! was strong and promised an edge for White.;

B) 15.exf6 Nxf6! The correct recapture. *(15...Rxf6 16.Ne5 Ng6* in Ni,H (2641)−Navara,D (2656) Reggio Emilia 2007 promised White a slight edge after *17.f4)* 16.Ne5 Nd7! 17.f4 Ng6! with roughly equal chances.]

15.Na4 I don't understand why So needed to push the dark−squared bishop to c7, as after ...f6 it will put pressure on e5, while the knight on a4 will be misplaced.

[15.Nh4! Be6 16.Qc2! f5 17.exf6 Nxf6 18.Bd3± promises White the better chances, in particular because of the misplaced knight on e7 and the weak e5−square.]

15...Bc7 16.Nh4 f6! Now Black doesn't have to retreat the bishop. If White's knight was still on c3 the text would be impossible due to the hanging knight on e4. **17.Bf3** White puts pressure on the e4−knight, threatening to win a piece by means of 18.Nxf5.

[17.f4!? would initiate complications after g5! 18.fxg5 fxe5 19.dxe5 Bxe5 20.Nc5 b6 21.Nxe4 Bxe4 22.Rxf8+ Qxf8 23.Rf1 Qc8 and lead to a position of dynamic equality.]

17...b5! A clever defence, which was probably missed by the American player.

[Surprisingly there is nothing wrong with 17...fxe5!? either. For example, 18.Nxf5 Nxf5 19.Bxe4 Nxe3 20.fxe3 exd4 21.g3 Qe7 22.Bf3 b5= and Black wins a piece back.]

18.Nc3 The only move, which allows Black to exchange his e4−knight.

[Now 18.Nxf5 Nxf5 19.Bxe4 runs into bxa4−+ and White also loses the bishop on e4.]

18...Nxc3 19.exf6? A mistake, which could lead to Black's advantage.

[19.Qxc3 was necessary. b4 20.Qc1 fxe5 21.dxe5 Bxe5 22.Nxf5 Nxf5 *(22...Rxf5 23.Bg4 Rf8 24.g3!* leads to good compensation for the sacrificed pawn. *)* 23.Qxc6 Nxe3 24.fxe3 Kh8 25.Bxd5 Qe7! with equal chances.]

19...Be4? Magnus returns the favour.

[The immediate 19...Qd6! was stronger. 20.g3 Qxf6 21.Qxc3 Bh3 22.Bg2 *(22.Rfe1?* loses to *g5 23.Bg2 Bg4!−+)* 22...Bxg2 23.Nxg2 Bb6∓ with slightly better chances for Black thanks to a weak pawn on d4 and the weak kingside light squares.]

20.bxc3 Qd6! 21.g3 Bxf3 22.Bf4 White prefers the dark−squared bishop, a choice he may have regretted.

[22.Nxf3!? Qxf6 23.Ne5 Qe6 24.Rae1 Nf5 25.f3 is also equal.]

22...Qxf6 23.Bxc7 Rb7 24.Be5 Qf7 25.Nxf3 Qxf3 The position remains equal, but White has to be careful due to the weakened light squares near his king. **26.Qb4?** Wesley underestimates the danger.

[26.Bd6!? Rf6 27.Be5 Rf7 28.Rae1 Nf5 29.Qd1= was much safer.]

[or even the immediate 26.Rae1 Nf5

27.Qd1=]

26...Nf5 27.Qc5? Too greedy. White had to think about the safety of his king instead.

[It was necessary to bring the queen back by means of 27.Qb3 Nh6 28.h3∓ with a slightly worse, but playable position.]

27...Rbf7!−+ Now White is helpless against Black's attack, mostly because his queen is completely out of play.

28.Rae1 h5! A decisive advance of the h−pawn. **29.h3 h4 30.Qxc6**

[After 30.g4 Black can win in style by means of Ng3 hoping for *(* It has to be said that the simple *30...Ne7 31.Kh2 Qd3! 32.Kg2 Qd2!* wins easily. *)* 31.fxg3 Qxf1+ 32.Rxf1 Rxf1+ 33.Kh2 R8f2#]

30...Nxg3! 31.Bxg3

[31.fxg3 runs into the same checkmate. Qxf1+ 32.Rxf1 Rxf1+ 33.Kh2 R8f2#]

31...hxg3 32.Re8 g2! 33.Rxf8+ Rxf8 White loses a rook and so he resigned. 11.Qc2 doesn't look like a serious attempt to set problems and 12...Na5 is a strong way to meet it.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 In this chapter, we will look at examples where White plays d2−d4 and Black defends passively. Usually, this leads to problems for Black as White can strengthen his position on both wings. **5...0−0**

1.e4 Mikhalevski,V **1...e5 2.Nf3 Nc6 3.Bc4** This year has seen an explosion of interest in the Giuoco Piano, with many new games not only on GM level, but also elite clashes. In March at the Moscow Candidates White was successful with the Italian and its popularity soared. The resulting positions can resemble the ubiquitous Antiberlin line

[3.Bb5 Nf6 4.d3 Bc5 5.c3 0−0 6.0−0 , but of course there are notable differences as well − the main one being in the Ruy Lopez Black always has to reckon with Bxc6 motifs.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Curiously, during the World Championship match, Ding has only faced the Spanish. I was eager to find out if he still recalls all the move orders of the Italian. Seltsamerweise hat Ding während des Weltmeisterschaftskampfes nur gegen Spanisch gespielt. Ich war gespannt, ob er sich noch an alle Zugfolgen von Italienisch erinnert. **3...Nf6 4.d3 Bc5 5.Bg5** It is possible to pin the knight at various moments, though sometimes Black can prevent that with h7−h6, which is one reason why sometimes one can pin it immediately. Es ist möglich, den Springer zu verschiedenen Zeitpunkten zu fesseln, obwohl Schwarz dies manchmal mit h7−h6 verhindern kann, was ein Grund ist, warum man ihn manchmal sofort fesseln kann. **5...h6 6.Bh4 d6** Another theme is to unpin with Be7, but Ding stays true to his principles and goes for the more ambitious way to deal with the pin, eventual g7−g5. Ein anderes Thema ist die Entfesselung mit Le7, aber Ding bleibt seinen Prinzipien treu und wählt den ehrgeizigeren Weg, mit der Fesselung umgehen, eventuell g7−g5. **7.c3** is now debated instead of 7. h3. wird nun anstelle von 7.h3 disktutiert. **7...a5 8.Nbd2 Ba7 9.a4** An interesting cat and mouse game, with both sides delaying short castle. Now Ding blinks first. Ein interessantes Katz− und Mausspiel, bei dem beide Seiten kurz rochieren. Jetzt blinkt Ding zuerst. **9...0−0N** It was possible to keep delaying castling, but it would then have to be some sort of a committal move, so it wasn't an obvious decision. Starting with g5 and castling after that was also possible, but then Black would have to take a dangerous looking h2−h4 break into account. Es war möglich, die Rochade weiter hinauszuzögern, aber dann müsste es sich um eine Art verbindlichen Zug handeln, also war es keine klare Entscheidung. Mit g5 zu beginnen und danach zu rochieren, war auch möglich, aber dann müsste Schwarz einen gefährlich aussehenden h2−h4−Durchbruch in Betracht ziehen.

10.h3! This was bad news for Ding, who was surely hoping that White would castle at some point. Now g5 looks

dangerous, but at the same time it is not clear how to prepare it, since Kh8 may only backfire due to g4! push. Das war eine schlechte Nachricht für Ding, der sicher hoffte, dass Weiß irgendwann rochieren würde. Jetzt sieht g5 gefährlich aus, aber gleichzeitig ist nicht klar, wie man es vorbereiten soll, da Kh8 durch den Vorstoß g4! nur nach hinten losgehen kann. **10...g5?** Principled, but the sacrifice is just too dangerous in this particular version. Instead, Black could try to play it safer. 10...Kh8?! that I suggested, wasn't great in view of 11.g4! which occured to me during the game as well, but instead 10... Be6 wasn't terrible. Prinzipiell, aber das Opfer ist in dieser Variante einfach zu gefährlich. Stattdessen könnte Schwarz versuchen, es sicherer zu spielen. 10... Kh8?!, das ich vorschlug, war angesichts von 11.g4!, das mir auch während der Partie einfiel, nicht gut, aber stattdessen war 10...Be6 nicht schlecht.

[10...Kh8?! 11.g4!]

[10...Be6]

11.Nxg5! This sacrifice, although typical is rarely very strong. Here it works really well, though, as White has played a very useful move h3 and delayed castling short, which doesn't neccessarily go well with the kingside attack. Dieses Opfer ist zwar typisch, aber selten sehr stark. Hier funktioniert es jedoch sehr gut, da Weiß einen sehr nützlichen Zug h3 gespielt und die kurze Rochade hinausgezögert hat, was nicht unbedingt gut zum Angriff am Königsflügel passt. **11...hxg5 12.Bxg5 Kg7** Black needs this move, as Qf3 is coming anyway. Schwarz braucht diesen Zug, denn Df3 kommt sowieso. **13.Qf3** An automatic. Eine Automatik. **13...Be6** The most sensible. Black's ideas here are mainly connected to Nb8−Nbd7 here, as far as I could understand. My preparation didn't go much deeper here and the only thing I recollected was that in a position very similar to this one, there is Be6 Nf1 Bxf2+ Ke2! idea. Das Vernünftigste. Die Ideen von Schwarz sind hier hauptsächlich mit Sb8−Sbd7 verbunden, soweit ich das verstehen konnte. Meine Vorbereitung ging hier nicht viel tiefer und das einzige, woran ich mich erinnerte, war, dass es in einer Stellung, die dieser sehr ähnlich ist, die Idee Le6 Sf1 Lxf2+ Ke2! gibt. **14.Nf1! Rh8** This confused me somewhat and it was quite clever. Das hat mich etwas verwirrt und war ziemlich clever.

[14...Bxf2+ Looks very tempting, but the refutation is very elegant− Sieht sehr verlockend aus, aber die Widerlegung ist sehr elegant. 15.Ke2! Avoiding all the Nxe4 tactics. The bishop remains hanging on f2 and the pressure on the f6 knight will soon become unbearable as Nh2 is coming and the f−file is now open as well. Vermeidet alle Sxe4−Taktiken. Der Läufer bleibt auf f2 hängen und der Druck auf den Springer auf f6 wird bald unerträglich, da Sh2 kommt und die f−Linie nun ebenfalls offen ist.]

[14...Nb8 is the move I expected during the game. ist der Zug, den ich während der Partie erwartet habe. 15.Ng3 Nbd7 16.Nh5+ Kg6 17.Bh4 Would probably force Black to give up the queen, with some material advantage for White. Würde Schwarz wahrscheinlich dazu zwingen, die Dame aufzugeben, mit etwas

Materialvorteil für Weiß.]

15.Ne3! This is the way to go here. Das ist hier der richtige Weg.

[I discarded Ich verwarf 15.Ng3 due to aufgrund von Kg6 16.h4? Bg4 17.Bxf6 Qd7! and the white queen is trapped in a rather thematic fashion. und die weiße Dame ist auf eine ziemlich thematische Weise gefangen.]

15...Qe7 Black keeps the tension, which confused me even more. I kept calculating Nb8 on every move, as well as captures on e3 and c4 and for a moment here, after not guessing any of Ding's moves I played an intuitive long castle, missing some concrete things along the way. Schwarz hält die Spannung aufrecht, was mich noch mehr verwirrte. Ich berechnete bei jedem Zug Sb8 sowie Schlagzüge auf e3 und c4, und nach einem Moment spielte ich, nachdem ich keinen von Dings Zügen erraten hatte, eine intuitive lange Rochade, wobei ich einige konkrete Dinge auf dem Weg dorthin übersah.

[15...Bxc4 loses right away− verliert auf Anhieb. 16.Ng4!]

[15...Bxe3 16.fxe3 Nb8 Also doesn't work here− Funktioniert hier auch nicht. 17.0−0 Nbd7 18.Qg3!
I don't think I saw this (point being the move that follows), but the computer is helping out, now that the game is over. Ich glaube nicht, dass ich das gesehen habe (der Punkt ist der folgende Zug), aber der Computer hilft jetzt, wo die Partie vorbei ist. Nh5 19.Bxe6! The complications work out for White. Die Komplikationen funktionieren für Weiß. fxe6 20.Qg4 And White is winning. Und Weiß gewinnt.]

16.0−0−0? Sometimes you make a move and you feel it is bad. My idea was to meet Nb8 with d4, but I had in general underestimated the Nf5+ idea, even though initially it was what I had intended. Manchmal macht man einen Zug und hat das Gefühl, dass er schlecht ist. Meine Idee war es, Sb8 mit d4 zu begegnen, aber ich hatte die Sf5+− Idee unterschätzt, auch wenn ich das ursprünglich vorhatte.

[16.Rf1! Was a better move order. Now after Nb8, Nf5+ is deadly. War eine bessere Zugfolge. Jetzt ist nach Sb8 Sf5 tödlich. Nb8 17.Nf5+ Bxf5 18.Qxf5 Nbd7 Obviously I saw potential in this position for White, but it wasn't too direct and I wasn't sure if Black doesn't get to drum up some counterplay somewhere, with a c6−d5 or some Rag8 Kf8 ideas. Natürlich sah ich in dieser Stellung Potenzial für Weiß, aber es war nicht allzu direkt und ich war mir nicht sicher, ob Schwarz nicht irgendwo mit c6−d5 oder einigen Tag8−Kf8−Ideen etwas Gegenspiel aufziehen kann. 19.0−0−0 c6 20.Rde1 It is important to take care of the e3 square before going f4, since Be3+ is there. Es ist wichtig, sich um das Feld e3 zu kümmern, bevor man f4 macht, da es Le3+ gibt. b5 21.Ba2 b4 This counterplay is not fast enough. Dieses Gegenspiel ist nicht schnell genug. 22.f4 And White starts having some real threats. Black's position is collapsing. Und Weiß beginnt, echte Drohungen aufzustellen. Die Stellung von Schwarz bricht zusammen.]

16...Rag8? Missing more or less the

only chance in this game to get back into it. I think at this point both myself and my opponent were too confused by the position and each other's moves, so in a way we both took a pause in calculating and decided to just make some random moves that felt useful. Verpasst mehr oder weniger die einzige Chance in dieser Partie, wieder ins Spiel zu kommen. Ich glaube, zu diesem Zeitpunkt waren sowohl ich als auch mein Gegner zu verwirrt von der Stellung und den Zügen des anderen, so dass wir beide in gewisser Weise eine Rechenpause einlegten und beschlossen, einfach ein paar zufällige Züge zu machen, die uns sinnvoll erschienen.

[16...Bxe3+ Here this actually works for Black. Hier funktioniert das tatsächlich für Schwarz. 17.fxe3 Nb8! *(*not nicht *17...Bxc4? 18.Rhf1!)* 18.Rhf1 Nbd7 A move ago this operation wasn't good enough for Black, but now having castled long, White lost a tempo, compared to a short castle, when rook would appear on f1 on its own. Vor einem Zug war diese Operation für Schwarz nicht gut genug, aber jetzt, da er lang rochiert hat, hat Weiß ein Tempo verloren, verglichen mit einer kurzen Rochade, wonach der Turm von selbst auf f1 erscheinen würde. 19.Bd5! White now has to be accurate to maintain the balance Weiß muss nun genau sein, um das Gleichgewicht zu halten. *(19.Rf2 Bxc4 20.dxc4 Qe6 21.Rdf1 Nh7!* is better for Black ist besser für Schwarz*;* while während *19.Qg3 Nh5! 20.Bf6+ Kh7!* the move I missed from a far is also good for Black. der Zug, den ich von weitem übersehen habe, ebenfalls gut für Schwarz ist. *)* 19...c6 Black has options at this point. Mit einer sehr unklaren Position, die die Engine als ungefähr ausgeglichen bewertet.]

17.Rhf1! This felt good for many reasons. Das fühlte sich aus vielen Gründen gut an. **17...Nb8 18.d4?!** This was the whole point behind my long castle and it is definitely not a bad idea, but Nf5+! was stronger. Note that White had to wait for Nb8, otherwise after a premature Nf5+ Bxf5 Qxf5 operation Black would have Nd8!−Ne6, which is an idea I noticed during the game as well. Das war der Sinn meiner langen Rochade und es ist definitiv keine schlechte Idee, aber Sf5+! war stärker. Man beachte, dass Weiß auf Sb8 warten musste, sonst hätte Schwarz nach einer verfrühten Sf5+ Lxf5 Dxf5− Operation Sd8!−Se6, eine Idee, die ich auch während der Partie bemerkte.

[18.Nf5+! This is sort of winning, apparently. Das gewinnt anscheinend irgendwie. Bxf5 19.Qxf5 Nbd7 20.Rde1 Kf8 21.f4 The engine evaluations are through the roof and it

does look good for White. Die Engine−Bewertungen gegen durch die Decke und es sieht gut aus für Weiß.]

18...exd4 19.cxd4 Nbd7 At this point I started delving deeper into the complications with 19...Nbd7 and 19...Nc6!? and I have to say all I could verify was that White is on the good side of things. Although I suspected I had more at some point, I still wasn't too unhappy with the situation. The time trouble was looming as well. An diesem Punkt begann ich, die Komplikationen mit 19...Sbd7 und 19...Sc6!? näher zu untersuchen, und ich muss sagen, dass ich nur feststellen konnte, dass Weiß auf der guten Seite der Dinge steht. Obwohl ich vermutete, dass ich irgendwann mehr hatte, war ich nicht allzu unglücklich mit der Situation. Auch die Zeitnot drohte.

[19...Nc6!? I expected this one, which from a far I had missed. hatte ich erwartet, das hatte ich von weitem übersehen. 20.e5 dxe5 21.d5 Nd4 22.Rxd4 Bxd4 23.dxe6 fxe6 Here I was calculating 24.Ng4, which is a little better for White, but the computer prefers another knight move. Hier hatte ich 24.Sg4 berechnet, was für Weiß etwas besser ist, aber der Computer bevorzugt einen anderen Springerzug. 24.Nc2!? White has a safer king and being down just an exchange, the material deficit is no longer significant and it is clear that Black has an unpleasant task ahead. Weiß hat einen sichereren König und da er nur eine Qualität weniger hat, ist das Materialdefizit nicht mehr signifikant und es ist klar, dass Schwarz eine unangenehme Aufgabe vor sich hat.]

20.e5!?

[I saw thatl Ich sah, dass 20.d5? Ne5! leads to a good position for Black zu einer guten Stellung für Schwarz führt,]

[but interestingly there was an alternative in aber interessanterweise gab es mit 20.h4!? eine Alternative.]

Abgesehen davon fühlt sich der Zug in der Partie sehr richtig an. **20...dxe5 21.d5 Qb4!** I had anticipated this move, fortunately, as otherwise it would have been a very unpleasant surprise. Black gets to stay in the game due to some nice geometry. Zum Glück hatte ich diesen Zug vorausgesehen, denn sonst wäre es eine sehr unangenehme Überraschung gewesen. Schwarz kann dank einer schönen Geometrie im Spiel bleiben. **22.Qe2!** Of course 22.dxe6? would allow Black to collect everything with Bxe3 and Qxc4−Qxe6, but the most tempting move was 22.Kb1. Fortunately I had more than one reason to refuse it, in particular 22...Bxe3 23.fxe3 Qxc4 24.Bxf6+ Nxf6 25.Qxf6+ Kf8 26.dxe6 and a surprising perpetual mechanism with 26...Qe4+!. Natürlich würde 22.dxe6? Schwarz erlauben, mit Bxe3 und Qxc4−Qxe6 alles zu sammeln, aber der verlockendste Zug war 22.Kb1. Glücklicherweise hatte ich mehr als einen Grund, ihn abzulehnen, insbesondere 22...Bxe3 23.fxe3 Qxc4 24.Bxf6 Nxf6 25.Qxf6 Kf8 26.dxe6 und einen überraschenden Dauerschachmechanismus mit 26...Qe4!

[22.dxe6? Bxe3+ 23.fxe3 Qxc4+ 24.Kb1 Qxe6]

[22.Kb1 Bxe3 23.fxe3 Qxc4

24.Bxf6+ Nxf6 25.Qxf6+ Kf8 26.dxe6 Qe4+!=]

22...Bxh3? A very desperate idea, and actually Ding was thinking in the right direction, but this is not exactly the way to do it. Eine sehr verzweifelte Idee, und eigentlich hat Ding in die richtige Richtung gedacht, aber das ist nicht gerade der richtige Weg.

[22...Bxe3+ The most obvious move, but it is the next one that is hard. Das ist der naheliegendste Zug, aber der nächste ist der schwierigste. 23.fxe3 Of course here I was only really calculating 23...Nxd5, where I didn't see how exactly Black would save himself in the endgame after 24.Bxd5 Qc5+ 25.Qc2!. Indeed, that is a lost position for Black. Instead Black has a spectacular desperado here. Natürlich habe ich hier nur 23...Sxd5 berechnet, wo ich nicht sah, wie genau sich Schwarz im Endspiel nach 24.Lxd5 Dc5+ 25.Dc2! retten würde. Das ist in der Tat eine verlorene Stellung für Schwarz. Stattdessen hat Schwarz hier einen spektakulären Desperado. Bg4!! A truly amazing resource. Eine wirklich erstaunliche Ressource. *(23...Nxd5 24.Bxd5 Qc5+ 25.Qc2!)* 24.Bxf6+! This is stronger, since Das ist stärker, denn *(24.hxg4 Ne4!* is a strong resource ist eine starke Ressource. *)* 24...Nxf6 25.hxg4 Rh4 and Black stays afloat, though complications are still very promising for White, according to the engine. und Schwarz hält sich über Wasser, obwohl die Komplikationen für Weiß laut der Engine immer noch sehr vielversprechend sind.]

23.gxh3 Kf8 24.h4! I liked the clever 24.Nc2, but then I realized the knight belongs on f5. Also looking at Black's rooks stuck in the corner, I understood that most likely I am just winning at this point. The material is equal, but I have a safer king and better pieces. Ich mochte das clevere 24.Sc2, aber dann wurde mir klar, dass der Springer nach f5 gehört. Als ich mir die Türme von Schwarz in der Ecke ansah, wurde mir klar, dass ich zu diesem Zeitpunkt wahrscheinlich einfach gewinne. Das Material ist gleich, aber ich habe einen sichereren König und bessere Figuren.

24...Bd4 This was slightly disturbing, since I realized that 25.Sf5 can be met with Lxb2+!. Without too much hesitation I decided to play by hand here. Dies war etwas beunruhigend, da ich erkannte, dass 25.Sf5 mit Lxb2+! beantwortet werden kann. Ohne lange zu zögern entschied ich mich, hier mit der Hand zu spielen. **25.Rxd4!?** In a way I got lucky that this wins, because I have to be honest I didn't see even half of the relevant variations. In gewisser Weise hatte ich Glück, dass dies gewinnt, denn ich muss ehrlich sagen, dass ich nicht einmal die Hälfte der relevanten Varianten gesehen habe.

[Much cleaner is Viel sauberer ist 25.Bb5! when White is winning without having to calculate anything. wonach Weiß gewinnt, ohne etwas berechnen zu müssen.]

The problem, however was that as soon as I saw the exchange sac, I didn't allow myself to resist. Das Problem war jedoch, dass ich, sobald ich das Qualitätsopfer sah, nicht mehr widerstehen konnte.

25...exd4 26.Nf5 This looks all very

pretty and everything works out well. 26...Nb6 27.d6! was a beautiful winning line I had calculated during my opponent's thinking time. Das sieht alles sehr hübsch aus und alles funktioniert gut. 26...Nb6 27.d6! war eine schöne Gewinnvariante, die ich in der Bedenkzeit meines Gegners berechnet hatte. **26...Rxg5!?** A classy way to put up some resistance. Direct 26...Ne5 would lead to the same thing after 27. Bb5 as Rxg5 would anyway be forced. Eine elegante Art, Widerstand zu leisten. Direktes 26...Se5 würde nach 27.Lb5 zum selben Ergebnis führen, da Txg5 ohnehin erzwungen wäre.

[26...Nb6 27.d6!]

27.hxg5 Ne5 During game as well, I felt 27...Ne4 was a tougher one to crack. Auch während der Partie hatte ich das Gefühl, dass 27...Ne4 schwieriger zu knacken war.

[27...Ne4!? 28.Bd3! Here Black should sacrifice the knight. Hier sollte Schwarz den Springer opfern. Nc3!? 29.bxc3 dxc3 And White has to do some conversion. The cleanest would be 30.Kd1! Qxa4 31.Ke1 Qa1+ 32. Qd1, but I really wouldn't dare to bet on myself making these moves, Und Weiß muss eine Umwandlung vornehmen. Am saubersten wäre 30. Kd1! Dxa4+ 31.Ke1 Da1+ 32.Dd1, aber ich würde es wirklich nicht wagen, darauf zu wetten, dass ich diese Züge mache, instead I think stattdessen denke ich, dass 30.d6!? as more likely, with a winning endgame after wahrscheinlicher ist, mit einem gewonnenen Endspiel nach *(30.Kd1! Qxa4+ 31.Ke1 Qa1+ 32.Qd1)* 30...Qa3+ 31.Kb1 Qb3+ 32.Ka1 Qxa4+ 33.Qa2 , but there is still a long road ahead. , aber es ist noch ein langer Weg.]

28.Bb5! The bishop is well positioned here and it transpires that White is, after all, winning. Der Läufer ist hier gut positioniert und es zeigt sich, dass Weiß doch noch gewinnt. **28...Nfg4 29.Kb1!** I would make this move even if it was bad, but here it is actually the only way to win. Ich würde diesen Zug auch machen, wenn er schlecht wäre, aber hier ist es tatsächlich die einzige Möglichkeit zu gewinnen. **29...Kg8?** Being in a serious time trouble, Ding makes the last mistake, after which winning becomes automatic. Starting with Rh2, which he pointed out after the game, would still keep the intrigue, even though the engine points out various wins for White at this point. In ernster Zeitnot macht Ding den letzten Fehler, nach dem der Gewinn automatisch eintritt. Mit Th2 zu beginnen, worauf er nach der Partie hinwies, würde immer noch für Spannung sorgen, auch wenn die Engine an dieser Stelle verschiedene Gewinnmöglichkeiten für Weiß anzeigt.

[29...Rh2 30.d6! Der Rest ist trivial. **30...Nxh6 31.Qxe5 Ng4 32.Qxc7** Also winning was 32.Qf5 followed by g6, it was a matter of choice at this point. Ebenfalls gewinnbringend war 32.Df5, gefolgt von g6, es war zu diesem Zeitpunkt eine Frage der Wahl. **32...Kg7 33.g6!** Opening up the black king completely. [Here too 9.Nbd2 Nb6 10.Bb5 Bd6 11.h3 Bh5 would transpose]

9...Bh5 10.Nbd2 This has been the modern tabyia of this line. We know from another games that Black should go for the thematic regrouping. **10...Nb6! 11.Bb5 Bd6 12.Bxc6?!** As in the game Fedoseev−Shirov (game 4) I think this

exchange doees not give any advantage for White, but in that game the light−squared bishop was still on c8, giving Black extra options. Still, I don't think this is enough to advocate in favour of this move. **12...bxc6 13.Ne4 Re8**
[13...f5 14.Ng3 Bxf3 15.Qxf3 Qd7 this leads to positions similar to the main line]

11.Nxg5!? I wonder if White would play like this with a classical time rate?

[11.Bg3 Nh5 12.Bh2 g4 13.hxg4 Bxg4 yields Black the initiative.]

11...hxg5 12.Bxg5 The pin along the d8−h4 diagonal is always annoying, although in some cases Black is able to solve his problems and in the others he can't. Everything depends on the concrete position and only analysis can prove the correctness of the sacrifice in these positions. **12...Kg7** A typical way of dealing with the pin. Black protects the knight on f6 One of the defensive ideas includes ...Ne7 in order to unpin the f6−knight and then play Nh7. **13.Qf3** The most logical. White puts pressure on f6 and makes it more difficult to unpin.

13...Rh8! A useful move.

[After the immediate 13...Kg6 the bishop can retreat to h4. 14.Bh4 and now it's too late for Rh8? because of 15.Qg3++−]

18.Rae1 White deviates from a repetition. A very brave decision, as his position is objectively worse. **18...Be6?** The first serious mistake. Now the initiative is in White's hands.
[This time Black had to play 18...Qg8 , which makes 19.Qg3+? senseless. Kf8 and an exchange of queens favours Black.]
19.Qg3+!± Kf8 20.Bxe6 fxe6
21.Bxa7?

with a better version of the game.]
36...Rxg4
[36...Kg6 as worth a try in order to answer 37.Qh2? with Rh7]
37.Qh2± A Q+N combination is very strong in attack. **37...Rg7?**
[37...Kg8! was the very last chance to stay in the game. 38.Ke2±]

16.h3 Levon has been preparing 17.Be3.
[White could have tried to save a tempo on 16.h3 by playing 16.Be3 right away. Qc7!? *(16...Ng4 17.Bd2 Nf6 18.Nf5 exd4 19.N3xd4 Re8*

16...Qc7!? Before going for ...d5 Magnus protects the e5−pawn.

17.Be3

[White could try to set problems by means of 17.dxe5 , but Black would answer it with

A) 17...dxe5 is less accurate. 18.c4! a5 19.bxa5!

A1) 19...Qxa5 20.Bd2 Qc7 *(20...Qa6 21.c5!±)* 21.c5 Nd7 22.Be3**±** is also better for White.;

[I prefer 23...a5 24.b5 *(24.Qb3 Rae8=)* and only then 24...Rae8= with roughly equal chances.]

24.Qd3 White is moving the queen away from the c−file.

[24.a5!? was worth a try, although Black shouldn't have problems.]

24...Qf4 A waiting move.

[Both 24...a5!?]

World Rapid 2016 (9.3) 27.12.2016
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.a4 a5 An extremely rare idea, which was introduced at the top level by Aronian in London a few weeks before the current game. Earlier it had only been seen in some online games and a couple of games during the last Olympiad, in particular the young Romanian GM Deac tested it in his game against the Cuban GM Ortiz Suarez. That's more or less all we know about this move. One of the main ideas behind it is to delay ...d6 and try to play ...d5 in one move, and also prevent White from taking space on the queenside with the advance a4−a5.

[The main line 6...d6 occurred in the recent World Championship match. Carlsen,M (2853) −Karjakin,S (2772)/ New York USA 2016, game 5/ [Mikhalevski,V].]

7.c3 d5 First, this move was played by an unknown player back in 2001.

[The Romanian GM played 7...d6 8.h3 Be6 9.Nbd2 d5 10.Bb5 dxe4 11.dxe4 Nd7 with roughly equal chances in Ortiz Suarez,I (2581)− Deac,B (2524)/Baku AZE 2016.]

8.exd5 Nxd5 9.Nbd2 Ian follows the aforementioned recent game of Aronian's.

[9.Re1 is a possible alternative, when White puts immediate pressure on e5. However, it may lead to transposition into the current game. Bg4 *(*or *9...Nb6 10.Bb5 f6 11.Nbd2 Kh8 12.d4 exd4 13.Nb3 Bd6 14.Nbxd4±* with a slight edge for White. *)*

A) An attempt to unpin the knight by means of 10.h3 Bh5 11.g4?! fails. Bg6 12.Nxe5 Nxe5 13.Rxe5 c6 14.Bxd5 *(14.Qf3 Qc7! 15.Re1 Rae8* leads to a strong initiative for the sacrificed pawn. *)* 14...cxd5 15.Qf3 Qb6! 16.Rxd5 Rae8! 17.Nd2 f5! with some initiative.;

B) 10.Nbd2 Nb6 11.Bb5 Bd6 and a transposition occurs.]

9...Nb6 Levon forces the light−squared bishop away from the a2−h7 diagonal. **10.Bb5 Bd6** Now Black protects the e5−pawn and moves his bishop away from possible attack by the d2−knight. **11.Re1 Bg4!** Pinning the f3−knight Black protects the e5−pawn. **12.h3 Bh5 13.Bxc6** Nepomniachtchi opts out of 13. Ne4, as he probably knew that Black obtained an edge in Aronian's previous game and wasn't ready to show any improvement. By means of exchanging the c6−knight he avoids 15...Ne7 from the MVL−Aronian game, but the bishop pair yields Black a very promising position.

[13.Ne4 f5 14.Ng3 Bxf3 15.Qxf3 Ne7!

A) 16.Qxb7 would be critical, although I can understand the French player, who didn't want to check out the depth of Aronian's home preparation. Rb8 17.Qf3 c6! 18.Bxc6!? *(18.Ba6 Ra8 19.Bb7 Rb8! 20.Ba6* leads to a repetition of moves. *)* 18...e4! 19.dxe4 Nxc6 20.Nxf5 three pawns and the strong position of the knight on f5 yield White sufficient compensation for a piece.;

B) 16.Bg5? c6 17.Bc4+ Nxc4 18.dxc4 e4 19.Nxe4 fxe4 20.Qxe4

B1) After the correct 20...Qd7! 21.c5 *(21.Bxe7 Rae8−+* is hopeless. *)* 21...Bxc5 22.Bxe7 Bxf2+ 23.Kh2 Bxe1 24.Bxf8 Bxc3∓ Black wins a pawn.;

B2) 20...Rf7?! Levon missed a chance to fight for an edge. 21.Rad1 Qc7 22.Rxd6 Qxd6 23.Bxe7= with equal chances in Vachier Lagrave,M (2804)−Aronian,L (2785)/London ENG 2016.]

13...bxc6 14.Ne4 f5 15.Ng3 Bxf3 16.Qxf3 Qd7∓ Black has won the opening battle and is better thanks to his strong pawn centre and the misplaced knight on g3. **17.c4** White denies access of the b6−knight to d5 and restricts it, but weakens the dark squares on the queenside. **17...Rae8** A very logical move, which strengthens the centre. **18.b3!** Preparing to transfer the a1−rook via a2 **18...Bc5** Black puts pressure on f2 and prepares the 19...e5−e4 break, which explains White's reaction.

[18...Bb4! would set more problems. 19.Rd1 *(*After *19.Re2 g6! 20.Bb2?! Qd6∓* with the idea of 21...Nd7 Black is clearly better. *)*]

19.Ra2! White protects the f2−pawn and brings the rook into play. **19...Bb4 20.Rf1?!** This move looks wrong as the rook on f1 is passive.

[20.Bd2!? deserved attention. Bxd2 21.Rxd2 g6 22.Rde2 Qd6 23.d4! e4 *(23...Qxd4 24.Qxc6* is slightly better for White, who now has a slightly better pawn structure. *)* 24.Qc3 Ra8 with roughly equal chances.]

20...Rd8!? An interesting tactical trick.

[20...Nc8! was strong, transferring his misplaced knight to a better position. For example, 21.Bd2 Bxd2 22.Rxd2 Ne7 23.Re1 Ng6∓ and Black is better.]

21.Bg5? White falls into a trap.

[After 21.Rd1 Black can play Nc8 22.Bb2 Rde8∓ with better chances, although the immediate 20...Nc8 should be preferred.]

21...f4! Locking the door behind the dark−squared bishop. **22.Bxd8**

[After 22.Ne4? Rde8−+ the bishop on g5 is trapped and can't escape.]

22...fxg3 23.Qxg3 Qxd8 24.Qxe5 Qxd3∓ After a forced sequence of moves Black achieved a better position with two minor pieces versus a rook and a pawn, while the b3−pawn is vulnerable. **25.Re2** The Russian player is trying to compensate his material disadvantage by the activity of his pieces.

[25.Rb2 Qd6! 26.Qe4 Nd7∓ leads to a stable advantage for Black.]

[25.Qe6+ Kh8 26.Qxc6 Qxb3 27.Re2 Qxc4 28.Qxc4 Nxc4 29.Rc1 Nb6 30.Rxc7 Nxa4∓ doesn't look promising for White either.]

25...Qxb3−+ 26.Re4 Qd3

[26...Qc2−+ is even more accurate.]

27.Qe6+ Kh8 28.Qxc6 Qd7

[It would be more accurate to start with 28...h6!−+ securing the king's position.]

29.Re6 Qxc6

[29...Bd6!? was clever keeping the rook on the e−file rather passive. 30.Qxd7 Nxd7 31.Re2 Kg8 32.Rb1

Nb6]
30.Rxc6 Rf7 31.Rd1
[31.Ra1!?∓ is a better defence.]
31...g6 32.Rd8+ Kg7 33.Rb8 Nd7

34.Rb5
[34.Rb7 would be met by Bd6! 35.Rb5 Ne5 36.Ra6 Nxc4−+]
34...Nb6 35.g3 Rd7?!
[35...Kf8! is more accurate, threatening to bring the king to d7. For example, 36.h4 Ke8 37.h5 gxh5 38.Rxh5 Nxa4−+]
[The immediate 35...Nxa4? would be wrong in view of 36.Rb7 Bd6 37.Rb5 and White wins back one of the queenside pawns.]
36.h4! White is trying to create counterplay. **36...Kf7 37.h5 Nxa4 38.hxg6+ hxg6 39.Rg5 Nb2 40.Rcxg6 Re7**
[40...c5!?∓ was possible as the king escapes checks via d8. 41.Rg7+ Ke8 42.Rg8+ Ke7 43.R8g7+ Kd8−+]
41.c5 Bc3? A serious mistake, which costs Black his advantage. It has to be said that the players were possibly already short of time.
[Instead 41...a4−+ was strong.]
42.Ra6
[42.Rh6! was better, bit it wouldn't be easy to realise this, even in a game with a classical time rate.]
42...Re6! 43.c6 Na4 44.Rh5! Kg6 45.Rd5
[45.Rb5!∓ would prevent 45...Bb4.]

51...Kf6 52.Rh6+ Kg5 53.Rhxd6 cxd6 54.Rxd6 Ne4? Black misses a rather simple win.
[54...a4! 55.Rd4 a3!−+]
55.Ra6 Now White brings the king to the queenside and Black is unable to win.
55...Nxg3 56.f6

[It wasn't late to go astray with 69.Rxa5?? Kc4−+ and White can't stop checkmate.]
69...Nc5+ 70.Kb5 Ne4 71.Rh4 Kd3 72.Rh3+ Kc2 73.Rh4 Nc3+ 74.Kc4 Nb1 75.Rh2+ Kc1 76.Ra2 Na3+ 77.Kb3 Nb5 78.Rc2+ Kd1 79.Rc4 Bd2 80.Rc5 An interesting fighting game. The opening line with 6...a5 which was chosen by Aronian is very interesting and seems to promise Black equal chances. So, the ball is now in White's court.

Therefore, even a world−class player like So can't really create counterplay. Now, of course, one can ask why the position is actually lost for White. From a purely material point of view, everything is still balanced. The main problem is that the white minor pieces have no good squares. In addition, Black has full control over the center and the half−open f−file. In connection with the favorably placed black heavy pieces, a difficult−to−defend king attack is thus also to be expected.' Von daher kann auch

ein Weltklassespieler wie So nicht wirklich Gegenspiel kreiren. Nun kann man sich natürlich die Frage stellen, warum die Stellung eigentlich verloren für Weiß ist. Rein materiell gesehen, ist ja noch alles ausgeglichen. Das Hauptproblem ist, dass die weißen Leichtfiguren keine guten Felder haben. Hinzu kommt, dass Schwarz die volle Kontrolle über das Zentrum und die halboffene f−Linie hat. Therefore, even a world−class player like So can't really create counterplay. Now, of course, one can ask why the position is actually lost for White. From a purely material point of view, everything is still balanced. The main problem is that the white minor pieces have no good squares. In addition, Black has full control over the center and the half−open f−file. In connection with the favorably placed black heavy pieces, a difficult−to−defend king attack is thus also to be expected.' Von daher kann auch ein Weltklassespieler wie So nicht wirklich Gegenspiel kreiren. Nun kann man sich natürlich die Frage stellen, warum die Stellung eigentlich verloren für Weiß ist. Rein materiell gesehen, ist ja noch alles ausgeglichen. Das Hauptproblem ist, dass die weißen Leichtfiguren keine guten Felder haben. Hinzu kommt, dass Schwarz die volle Kontrolle über das Zentrum und die halboffene f−Linie hat. Tata Steel−A 82nd (2) 12.01.2020
[So,Wesley]

This game was played in Round 2. I drew my first game with Black against Fabiano and then here I was playing the legendary Viswanathan Anand, one of my biggest heroes in chess. A true living legend, he is one of the most talented chess players of all time. Before our game I spent some time studying his best games and they are truly aesthetically pleasing to analyse. The fact that this man is still one of the best players in the world at the age of fifty is incredible. **1.e4** In India Vishy played the Sicilian against me in blitz, and won handily. However in classical games he mostly plays 1...e5. He has tons of experience with 1.e4 e5 with both White and Black. **1...e5 2.Nf3 Nc6**
Here I was not sure which line exactly Vishy planned to play against the Ruy Lopez with 3.♗b5. He usually prepares something new and very solid for Black in his repertoire. To get an advantage against him and his preparation is almost impossible...he prepares very deeply. So I decided to play 3.♗c4, the Giuco Piano. **3.Bc4 Bc5 4.c3 Nf6 5.d3** With this move−order White gets the option to delay castling and develop his other pieces first. If Black castles short, then White gets extra options. For example the pin with ♗g5 becomes more annoying. **5...d6**
[If Black castles right away 5...0−0 then 6.♗g5 or 6.♘bd2 are very serious moves.]

6.Nbd2 0−0 Of course there is nothing wrong with this move, but I thought that possibly more precise was 6...a6 or 6... a5. Black did not have to castle right away but could delay it for the time being. **7.h3** Controlling the g4−square, but also in some cases White can actually attack on the kingside with g4. **7...a6** Threatening to win the bishop pair with ♘a5. In my preparations I noticed that Vishy has gone for the ...a6 setup more often recently. So I thought he would play it here. He probably was thinking that I would castle sooner or later and transpose to normal paths, but for this game I wanted to try something different.

[The other main alternative is 7...a5 when after 8.0−0 there have been played many games and lots of theory.]

[Black does not necessarily have to move his a−pawn. Another good alternative is 7...Ne7 a very solid move, regrouping the knight to a better square on g6. Black wants to play c6 and d5 in the future. This variation is super solid also.]

8.Bb3 Keeping the bishop pair.

[8.a4 is another good way to keep the bishop, when Black can play ...a5. a5 9.g4]

8...Be6 Now that White lost a tempo moving his bishop, Black offers a trade. He has many alternatives here and the position is very flexible. Black is very solid of course, and as typical in Giuco Piano structures, the position is very close to equal. **9.Bc2**

[In my view Black is completely fine after 9.Bxe6 fxe6 10.b4 Ba7 11.0−0 Qe8 just because White has lost a tempo moving the light−squared bishop to b3.]

9...d5

[9...h6 prevents ♘g5, but it gives White a hook to target on the kingside. So White can play 10.g4 right away, or prepare it first with 10.♕e2.]

10.Ng5 Mikhalevski,V: '!?' Mikhalevski,V: 'This move has never before been seen at a high level, although it's not without venom.' This was the idea of the variation. White threatens to grab the bishop on e6 and win the bishop pair. If Black retreats his e6−bishop then this knight can aim to go to e4 instead (after exd5).

[Early White mostly preferred 10.Qe2 Duda,J (2706)−Eljanov,P (2720) Dresden GER 2017 [Mikhalevski, Victor]]

10...dxe4 Mikhalevski,V: '!?' Mikhalevski, V: 'An interesting move, which leads to some complications.'

[10...Nxe4

A) 11.Nxe6? in view of Bxf2+! 12.Ke2 fxe6 13.dxe4 *(13.Nf3?* is even worse. *Ng3+ 14.Kxf2 Nxh1+ 15.Qxh1 e4! 16.dxe4 dxe4 17.Bxe4 Qh4+! 18.Ke3 Qf4+−+)* 13...Qg5! B) 11.Ndxe4 dxe4

B1) 12.0−0! White protects the f2−pawn and wants to damage Black's pawn structure with Nxe6 and recapture on e4 with the d−pawn, all of this after the preliminary 13.Qh5. e3!? *(12...Bd5!?* saving the light−squared bishop is fine too. *13.Qh5 h6 14.Nxe4 Bb6 15.Ng3 Qf6! 16.d4! [Retreating the bishop was possible when I was going to take 10...Bc8 11.exd5 Qxd5 12.0−0 with a small advantage.]

11.Nxe6 Mikhalevski,V: '!' Mikhalevski,V: 'In the beginning it looks dangerous to open the f−file, but it's clear that Wesley analysed this position with a computer.' **11...fxe6 12.dxe4** Still following my preparation. Here I knew that 12...♕e8 was enough to equalize, but Vishy thought for a really long time and went for it. **12...Bxf2+!?** Mikhalevski,V: 'Vishy falls into a trap, probably on purpose.' Objectively a very good sacrifice, but perhaps not practically! Black makes a draw here, but the problem is he has to be very precise and exact! So it's a high risk, high reward move.

[Mikhalevski,V: 'He could also proceed with' 12...Qe8 Mikhalevski,V: ', which prepares 13...Nh5.' is the solid alternative. After

A) 13.Qe2;

B) 13.Nb3 Bb6 *(* After *13...Bxf2+? 14.Kxf2 Nxe4+ 15.Kg1 Nf2 16.Qe2 Nxh1 17.Kxh1* White is winning. *)* 14.Qe2 Nh5 15.Be3 Nf4 16.Bxf4 exf4 17.e5 f3! 18.gxf3 Qh5 19.Nd2 Qxe5 20.Nc4 Qxe2+ 21.Kxe2 Ne7! with a roughly equal endgame.;

C) 13.0−0 Rd8 White does not have time to regroup and consolidate his forces. Black is very active and ♘h5 is coming next move. *(13...Nh5 14.Nb3 Bb6 15.Be3! Rd8 16.Qg4 Bxe3 17.fxe3 Nf6 18.Qe2 Qe7* and Black doesn't seem to have any problems. *)*]

[After the game Vishy mentioned 12...Nd5 but here White can simply play 13.♘f3, with a better ending. 13.Nf3 Nf4 14.Qxd8 Raxd8 15.Bxf4 Rxf4 16.0−0±]

13.Kxf2 The next few moves are forced. **13...Ng4+ 14.Kg1 Ne3** Mikhalevski,V: 'Black wins back a piece, but after' Black wins the piece back, but his knight ends up trapped on c2. **15.Qe2 Nxc2 16.Rb1** Mikhalevski,V: 'his knight on c2 is in a trap.' **16...N6d4!** Mikhalevski,V: 'I assume the Indian

"tiger" also analysed this position at home. Black has to sacrifice the knight in order to obtain counterplay. Otherwise, after 17.Nf3 he would lose the knight on c2 for free.' Very precise. Black cannot afford to give White time to consolidate his position. **17.cxd4 Qxd4+**

[Not 17...Nxd4 18.Qe1 Qg5 19.Kh2 when the White Queen will come to g3 next, and defend against all the threats.]

18.Kh2 Rf2 19.Qg4 Mikhalevski,V: '!' This is the only move. **19...Ne3** Mikhalevski,V: 'The point of sacrificing the c6−knight on d4.' **20.Qxe6+** Besides forcing Black to spend a tempo to defend against the check, I manage to pick up a pawn or two. **20...Kh8 21.Rg1** Defending the crucial g2 spot. Now White wants to get rid of the knight on e3. He can do this by playing ♘f3 or ♘b3 next, attacking the Black Queen and allowing his bishop to capture the annoying knight next. **21...Qd3!** Mikhalevski,V: 'A clever move, which makes it difficult for White to move.' This immobilizes White's forces right now. Black is also threatening ♕e2. **22.Qxe5** Not only grabbing a pawn, but also the Queen is on the way to g3, where it will defend crucial squares. Here Vishy has played perfectly so far, and he has a way to make a draw. Your computer will probably show the drawing line in seconds, but over the board it's not so simple to see. The problem is Black does not even have a pawn for the piece, and one mistake immedaitely loses the game. **22...Raf8?** Mikhalevski,V: 'Only this move is a mistake.' The losing mistake. This looks very natural, but after this White manages to consolidate and defend his king.

[Black can force a draw by 22...Nxg2! Mikhalevski,V: 'was necessary.' the variation is not that simple though; Black still has to be very precise.

A) 23.Rxg2 Rxg2+ 24.Kxg2 Qe2+ leads to a perpetual right away. 25.Kg1 *(25.Kg3 Qe1+)* 25...Qe3+=;

B) 23.Kh1 Raf8! *(23...Qxh3+ 24.Qh2 Qg4 25.b4* followed by ♖b3 next move. White is better. *)* 24.Qc3 *(24.Rxg2?* is bad because of *Rxg2 25.Kxg2 Qe2+ 26.Kg3 Qf2+ 27.Kg4 h6!!−+* and despite two extra pieces White's position is hopeless. *)* 24...Qe2 25.Qg3 And now Black has to find the only move R8f7! protecting the vital g7 pawn. Black draws in all lines, as your computer can show you. Mikhalevski,V: 'or'

B1) 26.Qg4 Ne3 27.Qxe2 Rxe2 it turns out that the endgame is also equal despite White's extra piece. 28.Rg3 *(*or *28.Rg5 Re1+ 29.Kh2 Re2+* with a repetition. *)* 28...Re1+ 29.Rg1 Re2=;

B2) 26.b3 Nf4! That's why 25... Rf7 was played. Now the g7− pawn is protected. 27.Ba3! Nh5! 28.Qe5! R7f4! *(28...R7f3!* is also equal. *29.Qe8+ Rf8 30.Qe5)* 29.Qe8+ Rf8 30.Qe5= It's curious that most of the moves in this sequence are forcing for both sides.;

B3) 26.Rxg2 Rxg2 27.Qxg2 Rf2= 28.Qg1 Qe3 29.Qg4 Qe1+ 30.Qg1 Qe3 with a repetition.]

23.Qg3 Mikhalevski,V: '!?' Mikhalevski,V:

'A slight inaccuracy, although it retains a clear edge for White.' The queen is the best defender for the king. From g3 it controls so many squares. The game is lost for Black, just with one mistake.

[Surprisingly it was better to provoke 25... h6 with 23.Qg5! h6 24.Qg3 The reason is that this way White avoids the .. .Rf6−g6 plan, which was necessary after the immediate 23. Qg3. R8f3 25.Nxf3 Rxg2+ 26.Qxg2! Nxg2 27.Bd2!+− and White should be able to convert his material advantage.]

23...Qe2 Mikhalevski,V: '?' Mikhalevski, V: 'This mistake is based on a miscalculation. Black thought that he created a threat of 24...Nxg2, but it turned out to be wrong.'

[23...R8f6 was necessary and after 24.b4! Rg6 25.Rb3! Rxg3 26.Rxd3 Nf1+! 27.Nxf1 *(*of course not *27.Rxf1?? Rgxg2+ 28.Kh1 Rh2+ 29.Kg1 Rfg2#)* 27...Rxd3 28.Ng3 Rxa2± with a worse, but still playable position.]

24.b4 Mikhalevski,V: '+−!' Mikhalevski,V: '25.Rb3 is coming.' Vishy missed this move. Now White activates the rest of his queenside and it turns out that Black's threats are not lethal. **24...Rxg2+**

[24...Nxg2 is simply met by 25.Kh1 when the knight cannot move as it would open up the g−file. Black has no attack.]

25.Rxg2 Nxg2 Here White has a couple of winning moves. My choice was actually not the most precise. **26.Qg4** Mikhalevski,V: '!' Mikhalevski,V: 'Vihsy missed this intermediate move and had to resign as he is just a piece down.' But here Vishy resigned, although he could have played a few more moves.

[Stronger was 26.Bb2 Nf4+ 27.Kh1 when it turns out the counter attack on Black's king is impossible to face. Nh5 28.Qg2 Rf2 29.Rf1 and White wins.]

[After 26.Qg4 White forces the exchange of queens, and Black has to play Nf4+ 27.Qxe2 Nxe2 Now White cannot allow ♖f2+, and he has to shed a pawn 28.Kg2 Nf4+ 29.Kf3 Nxh3+ 30.Ke3 Nf2 31.Bb2 this ending should be easily winning, but at least Black has two pawns for the piece. With this win I started the long Tata Steel Chess journey most pleasantly. Wijk Aan Zee is one of my favorite places to play but truthfully it is an exceptionally long tournament in the dead of Dutch winter in a remote though lovely village on the North Sea. You need some good encouragement early on to keep your focus all the way through. Also, this was also only my 2nd win against Anand in classical chess and it made me feel like I am improving!]

[Obviously his idea was to meet 26.Qxg2? with Rf2−+ A short, but very interesting game. Wesley's 10. Ng5 is interesting and leads to complications, but Black retains equal chances with precise play. Both 10... Nxe4 and 10... dxe4 are possible.]

Tata Steel−A 82nd (4)		14.01.2020

[So,Wesley]

Back to wild and wonderful Wijk aan Zee. I have been playing this January tournament ever since i was 14 years old and coming back is always a bit like coming home. The fact that very little ever changes is comforting. The beach with the silver sea, the small paths through the tall grass, the local Spar for cheese pastries, the hot coffee in every shop, fried kibbeling in Juliana plein, the same dogs or their children, and pony and goatee still grazing in their small field (honestly how old are those two?).... It's all so comforting and gives a feeling of happiness for someone who travels constantly for his job and is always in new places. Even our hotel room doesn't change which is nice because I know exactly where my few items should go. Before this game Alireza had just been on a tear, winning two games and leading the tournament with 2.5/3. What to do? Just try my best I guess. **1.e4** Against 1.e4 Alireza plays many different Sicilians, in particular he also plays the Najdorf. Now in the Najdorf it's almost impossible to gain an advantage against it these days, and the positions possibly suit his style very well. Against 1.c4 he plays 1...e5, so we could get a form of Reversed Sicilian. I decided to keep it simple and play 1.d4. **1...e5** He also plays 1...♘f6. For example against Caruana he played the King's Indian! I also prepared for the King's Indian, however after Ding Liren gave it up 4 years ago, it's very rare to see a 2700+ GM play that opening nowadays. The reason behind this is the King's Indian feels a bit cramped, and White has too many good systems against it. By the way his King's Indian game with Caruana is a great game so I suggest you take a look at that game as well (if you haven't already). **2.Nf3 Nc6** He's only tried the QGA a few times, but he played it against Duda two days earlier. He got a really good position that game and was even outplaying Duda. So I suppose why not try it again? **3.Bc4 Bc5 4.c3** Instead of 3.e4, I decided to play this variation instead. I was not sure how deep his preparation was against 3.e4, as he does not have enough games and he seemed very confident to face it. **4...Nf6 5.d3 d6 6.Bg5 h6** The main line of the classical QGA. Black has also played 6...♘c6 in recent games, but I think that line is not as superior. 6...a6 is definitely more solid. **7.Bh4** White has many moves here, but I played this move 7.b3 before and it's a playable move. It's not a very concrete forcing variation, but I like the arising positions after it. **7...a6 8.Nbd2 Ba7 9.0−0 0−0** We were both playing fast as we were actually following my game against Mamedyarov played a few months back. Also current theory indicates that this is Black's best defense. **10.a4** Preparing to meet b5 with ♗f3. **10...g5 11.Bg3 Kg7 12.Re1** We both continue developing our pieces. **12...Nh7 13.b4** Preventing the minor piece trade. I was still on my preparation. **13...h5 14.h3** Controlling the dark−squares on the queenside. **14...h4**

[14...g4]

15.Bh2 Slowly improving the position of my pieces. The idea of this mysterious rook move is to free squares and swing my Queen and the other Rook over to the queenside. White is slightly better here as his pieces control more vital squares (I control d4,e4, and e5 squares) and my pieces are more harmonious than his. But Black has no weaknesses. **15...g4!?** Interesting. Black does not want to play passively and he wants to activate his pieces right away. I was expecting the more solid 15...♖fd8 or 15...♘d5. **16.hxg4** Controlling the e4−square and activating my bishop. **16...Bxg4 17.b5** Preparing ♖fc1. **17...Ne7 18.d4** Here I was expecting the solid move 18...♕b7 but Alireza surprised me with his choice. **18...Ng6!?** A very strange move. I would never have considered it! The knight becomes passive in the corner. However it's not simple to refute it over the board. **19.bxa6** Trading rooks. 19.♗xe5 is possible stronger. **19...bxa6 20.Nf1 exd4**

[20...Ng5 21.Ne3 Bxf3 22.gxf3 Nh3+ 23.Kg2 Ngf4+ 24.Bxf4 Nxf4+ 25.Kh2]

21.cxd4 Forcing Black to give up the bishop pair. **21...Bxf3 22.gxf3**

[22.Qxf3 Bxd4 23.Rad1 Be5]

22...f5 Gaining time by attacking the pieces on the d−file. **23.Ne3**

[23.exf5 Rxf5 24.Kh1]

23...fxe4 Now his queen is very well centralized in the center. **24.fxe4** Preparing to challenge his powerful queen in the center. **24...Qg5+ 25.Kh1 Rxf2 26.Nf5+**

[26.Bg1 Rb2 This knight manoever was Caruana's idea actually. He played it against Levon Aronian two years ago. The point is to keep d4 under control so White cannot jump to e5 with ♘e5. It's surprisingly difficult to get anything here. 27.Qc1 Rab8 28.Bb5 Rb3 29.Qc2 Rxe3 30.Bxe3 Qg3 31.Bf1]

[26.Ra2 Raf8 27.Rxf2 Rxf2 28.Bg1 Rb2 29.Qc1 *(29.Rf1 Kh8 30.Ng4 Rd2 31.Qf3 Bxd4 32.Qf7 Ne7 33.Be6 Bxg1 34.Qe8+ Ng8 35.Rxg1)* 29...Rb8 30.Nf5+ Kh8 31.Bh2]

26...Kh8 27.Rg1 White is just a bit better in this ending, but nothing special. I have the bishop pair, but they are not yet too active. **27...Rxh2+ 28.Kxh2** Preventing him from playing f5. **28...Qf4+ 29.Kh3 Ng5+ 30.Rxg5 Qxg5?** Alireza goes for active play, however he probably miscalculated as now this pawn is overextended and in great danger. **31.Qg1**

[31.Qf3 we transpose to my game against Vladislav Artemiev played a few days later on the 7th round. In that game (I had Black) I did not experience too many problems. Bxd4 32.Nxd4 Ne5!]

31...Nf4+

[31...Qh5 32.Qe3]

32.Kh2 Qxg1+ 33.Rxg1 Slowly approaching the center. **33...d5**

[33...Rb8 34.Rg4 Rb2+ 35.Kg1 Ne2+ 36.Kf1 *(36.Bxe2 Rxe2 37.Rxh4+ Kg8 38.Ne7+ Kg7 39.Nc6 Bb6* ½−½ (38) So,W (2763)−Mamedyarov,S (2765) Riga 2019 *40.a5 Rc2=* There is another variation here with *41.axb6* a prophylactic move, intending to capture on c5 or occupy the center depending on what

Black does. If Black takes on d4 *Rxc6)* 36...Ng3+ 37.Ke1 Nxf5 38.exf5 d5 39.Bxd5 Rb6 40.Rxh4+ Kg7]

34.Bxd5?! Here I considered other alternatives too: **34...Nxd5**

[34...Rb8 35.Bc4 Rb2+ 36.Kh1 Nh5 37.e5 Ng3+ 38.Rxg3 hxg3 39.e6]

35.exd5 Re8

[35...Rg8 36.Rxg8+ Kxg8 37.Kh3 Kf7 38.Kxh4 Kf6 39.Kg4 Bxd4 40.Nxd4 Ke5]

36.Kh3

[36.Rg4 Re1 *(36...Re2+ 37.Kh3 Ra2 38.Kxh4 Rxa4 39.Kg5)* 37.a5 is an alternative. Putting the bishop on a more active square. Here I thought the best move was h3 38.Kxh3 Ra1 placing his pieces on solid squares. After 39.Rh4+ Kg8 Black is very close to equality. But in the game with 12...♖c8, I was able to keep more pieces on the board. The problem with 40.Ne7+? is Kf7 the white knight has no good squares to go to. The Mamedyarov game went 41.Nc6 Rh1+ 42.Kg3 Rxh4 43.Kxh4 Bxd4= when White got absolutely nothing from the opening. 44.Nxd4 Ke7]

36...Bb6

[36...Re4!? If 37.Rg4 Rxg4 is better for White. Black has some weak pawns that needs defending. 38.Kxg4 Kg8± I think Black is okay after 39.Kxh4 Kf7! equalizes according to the engine. The idea is after 40.Kg5 Black has Ke8! followed by taking on b3. Therefore 16. ♗d3 was not accurate for me. However stronger was 41.Kf4 White just wants to double rooks on the c−file. Kd7 42.Ke4 c6 43.dxc6+ Kxc6 does not work due to 44.Ne7+ Kd7 45.Ng6± I think Black is okay after Kd6 46.Ne5 Bb8]

37.Kxh4 Rd8? After this unfortunate exchange, Black loses as White is able to invade with the king. **38.Rg5**

[Apparently best was 38.Kh5! Bxd4 39.Rh1 Kg8 when White can attack Black's pawns with ♗e6 or ♗d5−b7. White has good practical chances to win. 40.Kg6! After Bc5 41.Rh7 is what he probably missed. Now he cannot take on f2, and White will slowly round up the e4−pawn. Rxd5 loses because of the pin 42.Rxc7 winning a piece. Simpler was Rxf5 to bring the king to e6 and control the light−squares. I thought that Black should be okay here. 43.Kxf5!? But it might be better to play Bb4 44.Kf6 a5 45.Rf7 Bc3+ when White will win a pawn by taking on d6 next move. 46.Kg6 Bb4 47.Rf5 allows the extra option]

38...Kh7? 39.Rh5+ If Black's king were on e6 he can hold, as now he has ♗b6+ preventing my king from invading. But now Black is helpless as he does not have any counterplay. **39...Kg6**

40.Ne7+ Kf6 41.Nc6 Threatening ♔d7 or ♔b7. Making sure that Black cannot create a passed pawn on the kingside.

41...Re8 42.Re5 Rh8+ 43.Kg4 a5

[At first 43...Bxd4 fixing the pawn structure, in particular Black's pawns on the light−squares are very vulnerable. But Black has 44.Re6+! with counterplay on the e3−pawn. So this is not enough.]

44.Rf5+ Kg6

[44...Kg7 forces the king to go back. After the game Alireza pointed out that

45.d6! is enough to hold. And indeed I cannot find a win here. Black sets up a fortress and holds even down a pawn. cxd6 46.Rb5 Bd8 47.Nxd8 Rxd8 48.Kf5 and Black just puts his king on e6. Unlike in the game White here cannot invade with his king.]

45.Ne5+ Kg7 46.Rg5+ Kh7 47.Rh5+ Now Black cannot prevent White from queening one of the pawns, so Alireza resigned. This was a nice win for me. It's clear that my opponent is talented, and I am sure we will see more exciting games from him in the future. As for me I finished my long walk through Wijk Aan Zee with +2. It's clear that there are a lot of improvements necessary for me to become a better player, and find ways to retain energy until the end of the tournament. I really like Wijk Aan Zee, it's people and particularly the chess organizers. They all go the extra mile and make a month long tournament proceed smoothly and graciously. Thank you Jeroen Van den Berg, Myra Rooselaar, and the focused, efficient and generous Tata Steel Chess team. **47...Kg7 48.Rxh8 Kxh8+− 49.Nc4 Kg7 50.Kf5** gives White two pawns in the center without any obstacles. I'm pretty confident White should be able to win this, however I do not want to analyse too deeply, so I'll leave it to you to decide. **50...Kf7!** was the last chance to try and hold. The point is that my king cannot approach as 38.♔d4 is met by ♗b6+ winning the f2−pawn. After ♔e6 it seems that Black has a fortress. So perhaps it's just a draw! **51.d6** **1−0**

(m/2) 71/208 1997
[Khalifman,Alexander; Nesis,Gennady]

Martin Breutigam: 'When the theme announcement knockout World Cup 1997 came from the editorial office, I dug out some of my old texts and tried to remember the atmosphere on site in Groningen again. I was particularly impressed by some of Viswanathan Anand's performances back then, in December 1997. The Indian, who had just turned 28 and was number two in the world, eliminated the grandmasters Predag Nikolic, Alexander Khalifman, Alexei Shirov, Boris Gelfand in

succession before also defeating Michael Adams in the final. What a long, nerve−wracking road! But Anand almost didn't make it at all, because he was on the brink of elimination at an early stage. I quote from one of my newspaper articles at the time: For four hours Aruna had been sitting in the last row of spectators reading while her husband Viswanathan Anand was doing his next job in the knockout World Championship. This time, however, the whispering crowd and Anand's body language did not bode well. The petite Indian had long since put aside her reading, and a look of worry spread across her face. Anand, the last remaining top favorite in the knockout competition (...), was noticeably trying to maintain his composure. Only a few days ago he had played cat and mouse on the chessboard with the strong grandmaster Predrag Nikolic. But in this third round, against the Russian Alexander Khalifman, everything was different. After the first game ended in a draw, Anand's moves in this second one seemed strangely contrived. Khalifman, on the other hand, played very strongly and after 40 moves had pushed the favorite into a hopeless position. All at once, all the luster of Anand's personality seemed to fade. He rubbed his eyes, propped his head up with his hands, chewed his lower lip, looked confusedly at his scoresheet, and then back up at a monitor showing the very nasty game position he was sitting in front of: A race of passed pawns was brewing in a rook ending. Actually hopeless for Anand, because Khalifman's pawns had already advanced much further. Although it was the Indian's move, he still didn't look at the board, but at the audience and then at his opponent. He wasn't going to shake hands, was he? "Yes", Anand confessed afterwards, "I was thinking of just giving up." Besides, he half−jokingly revealed what had really been bothering him in this hopeless situation. I was thinking about where I could get a ticket home the fastest now. Before going to the station, he then rather made another move, king to c1. And lo and behold, now Khalifman showed a little weakness. Too hastily he raced with a pawn to f4. After that it suddenly became "very tricky" again, Anand said later. Although Khalifman still had a chance to win, both players shook hands and agreed on a draw. The score was 1−1, and Anand won the tiebreak the next day.' Martin Breutigam: 'Als aus der Redaktion die Themenansage ⇄K.o.−WM 1997⊕ kam, kramte ich einige meiner alten Texte hervor und versuchte, mich wieder an die Atmosphäre vor Ort in Groningen zu erinnern. Besonders beeindruckend fand ich damals, im Dezember 1997, einige Auftritte von Viswanathan Anand. Der gerade 28 Jahre alt gewordene Inder, Nummer zwei der Welt, schaltete der Reihe nach die Großmeister Predag Nikolic, Alexander Khalifman, Alexei Shirov, Boris Gelfand aus, ehe er im Finale auch Michael Adams besiegte. Welch langer, nervenaufreibender Weg! Doch beinahe hätte ihn Anand gar nicht beschreiten können; er stand nämlich schon frühzeitig kurz vor dem Aus. Ich zitiere aus einem meiner damaligen Zeitungstexte: Vier Stunden lang hatte Aruna in der letzten Zuschauerreihe

gesessen und gelesen, während ihr Ehemann Viswanathan Anand seinen nächsten Auftrag bei der K.o−WM erledigte. Der tuschelnde Zuschauerpulk sowie Anands Körpersprache versprachen diesmal jedoch nichts Gutes. Längst hatte die zierliche Inderin ihre Lektüre beiseite gelegt, und auf ihrem Gesicht breitete sich ein sorgenvoller Blick aus. Anand, der letzte noch im K.o.−Wettbewerb verbliebene Topfavorit (...), war spürbar um Contenance bemüht. Noch vor wenigen Tagen hatte er mit dem starken Großmeister Predrag Nikolic auf dem Schachbrett Katz und Maus gespielt. Doch in dieser dritten Runde, gegen den Russen Alexander Khalifman, war alles anders. Nachdem die erste Partie remis endete, wirkten Anands Züge in dieser zweiten merkwürdig gekünstelt. Khalifman spielte hingegen sehr stark und hatte den Favoriten nach 40 Zügen in eine aussichtslose Lage gedrängt. Mit einem Mal schien der ganze Glanz der Anand⇗schen Persönlichkeit verblasst. Er rieb sich die Augen, stützte den Kopf mit den Händen, kaute an der Unterlippe, schaute verwirrt auf sein Partieformular und dann wieder hoch zu einem Monitor, der genau jene scheußliche Partiestellung zeigte, vor der er gerade saß: In einem Turmendspiel bahnte sich ein Wettlauf der Freibauern an. Eigentlich hoffnungslos für Anand, denn Khalifmans Bauern waren bereits viel weiter vorgerückt. Obwohl der Inder am Zug war, schaute er immer noch nicht aufs Brett, sondern mit mattem Blick ins Publikum und dann zu seinem Gegner. Er wollte doch nicht etwa seine Hand reichen? ⇄Ja⊕, gestand Anand hinterher, ⇄ich dachte daran einfach aufzugeben.⊕ Außerdem verriet er halb im Scherz, was ihn in dieser hoffnungslosen Lage wirklich beschäftigt hatte. ⇄Ich habe überlegt, woher ich jetzt am schnellsten ein Ticket für die Heimreise bekomme.⊕ Bevor es zum Bahnhof ging, machte er dann doch lieber noch einen Schachzug, König nach c1. Und siehe da: Nun zeigte Khalifman eine kleine Schwäche. Zu voreilig raste er mit einem Bauern nach f4. Danach sei es plötzlich noch einmal ⇄very tricky⊕ geworden, so Anand später. Obwohl Khalifman immer noch Siegchancen besaß, einigten sich beide Spieler händeschüttelnd auf Remis. Damit stand es 1:1. Den Tiebreak entschied Anand anderntags für sich. [12...Bg6]
13.bxc3 White covers the g4−square before bringing the queen to e2. **13...f6 14.exf6** The only try to set problems is to keeps queens on. **14...Qxf6!** The Russian GM is faithful to himself. You can find at least three of his games with this move. Black's idea is to neutralise the strong light−squared bishop on b3. **15.Be2** White takes advantage of the weakened c4−square. If Black's b−pawn was on b7 the position would be roughly equal. **15...Na5** The e5−pawn is protected indirectly. **16.0−0** The position is almost symmetric. White hopes to exploit the weakness of the c4−square and the a6−pawn. **16...Rae8!** Nothing is new under the sun. Peter has already played this move 5 years ago against Karjakin. See below.
[16...Bxf3 doesn't promise any advantage. 17.Bxf3 c6 18.Rae1 Nc4 19.Bc1= In some games Black played Rae8 , but Peter always preferred the d6−square for the queen. The immediate 20.Be2 is another option. For example, Re6 21.Bd3 g6! 22.g3?! is dubious in view of]
17.Ne5!? A novelty by Aronian.
[17.Rae1 Nc4 18.Bxc4 Bxf3 19.Bd3± with some edge to White. The alternative Be4 has been exclusively tested in correspondence chess. It would be interesting to test it over the board.]
17...Bxe2 18.Qxe2! An interesting attempt to exploit the weaknesses of the

queenside. **18...Qe6?** As often happens the first independent move turns out to be a mistake. **19.Rae1 Nc4 20.Nxc4?!** Slightly inaccurate, although White retains an edge.

10...g5!? My computer isn't happy with this move at first, although it is the main line. **11.Bg3**

[11.Nxg5? is insufficient in view of hxg5 12.Bxg5 Rg8 13.h4 Bg4−+]

11...Nd7! This strong retreat had already been seen at least three times. Black's idea is to transfer the knight to g6 via f8.

[and 12.d4]

12...Nf8 13.b5 Nd8 This retreat turns out to be slightly inaccurate, although it's far from obvious.

14.d4! Ng6 Black has no problem to hold the centre. Now White has to deal with the advance of the kingside pawns.
15.h3! Prophylaxis. **15...h5**
We can conclude that Black has won the opening battle. He has an attack on the kingside, while White didn't achieve much on the queenside. **16.Bd5!**
Lenier creates a threat of 17.bxa6 and provokes a weakening of the queenside.
16...c6!? An accurate human move. First of all, Black stops 17.bxa6 and only then creates an attack on the kingside.

[Giri, Anish]

1.e4 Giri,Anish Giri,Anish Giri,Anish: 'Giri, Anish' **1...e5 2.Nf3 Nc6 3.Bb5 Nf6** Teimour stays true to the ever solid Berlin defense. **4.d3 Bc5 5.c3**
I suspect this came as a minor surprise, since I usually go for other Anti−Berlins. **5...d6** Somewhat shockingly, my opponent mixes up the move order as early as move 5. The traditional order is 5...0−0 6.0−0 d6, but I guess Teimour suddenly got confused with 6.Bxc6!? bxc6 7.Nxe5, which is a testing line, but Black is supposed to be fine in complications after 7...d5. **6.d4!?** Fortunately I had refreshed my move orders before the game, as incidentally the day before I mixed up my own against Carlsen (in a different opening, but still). The 6.d4 is the "punisher", though objectively Black is not really in any serious trouble yet. **6...exd4** Black has to give up the center. The fact that this only move took Teimour quite a bit of time, only confirmed that he indeed mixed up the order. **7.cxd4 Bb4+ 8.Bd2** The right way to play for advantage, though 8.Kf1!? looks super tempting, trying to win material.

[8.Kf1!? When I had re−checked this before the game, I concluded that Black is fine by force. d5! Only move. 9.e5 Ne4 10.Qa4 White still appears to be winning some material, but Black has a few way to organize counterplay, due to White's weakened king on f1. One instructive sample line goes− a5 11.Bxc6+ bxc6 12.Qxc6+ Qd7! 13.Qxa8 Qb5+ 14.Kg1 0−0 15.h3 Bb7 16.Qa7 Ra8 17.Na3 Qe2! 18.Qxb7 Qxf2+ 19.Kh2 Qg3+ With a perpetual check. All theory, as they say.]

8...Bxd2+?! While 5...d6 is merely somewhat inaccurate, the decision to not allow the doubling of the c−pawns is already a serious mistake. Having given up the center already, Black is not in the position to prevent abstract threats like Bxc6 and should try to create counterplay quickly, in order to compensate for the strategic issues, such as lack of space in the center and potentially doubled pawns.

[8...0−0 9.Bxc6 Bxd2+ 10.Nbxd2 bxc6 11.0−0 This is the critical position, where Black has to act fast, to try to come up with some counterplay before White gets to fully consolidate their center.]

9.Nbxd2 Bd7?! Besides that it loses a crucial tempo, it is also the fact that the doubling of the pawns, as bad as it is, trades a piece, which is a big relief for Black, as he lacks space. So I am not sure he should fear it much. **10.0−0 0−0 11.Re1** This move is obvious. **11...Re8 12.h3** I decided to prevent any Bg4 ideas, but developing the other rook with 12.Rc1 would have been more rough.

[12.Rc1! a6 13.Bd3 I may have

underestimated this retreat, but it is a good square for the bishop, guarding the e4 pawn. Bg4 This is not an issue now. 14.Qb3 White has the pawns in the center well guarded and the queen will soon step over to c3, overprotecting the d4 pawn as well.]

12...Ne7 Transferring the knight to g6 doesn't solve the problems. **13.Bf1 c6?!** This felt very wrong. Black isn't generating counterplay, but is weakening the d6 pawn. **14.Qb3!?**

Highly sophisticated. I felt that 14.e5 would sell my advantage too short, but actually it was simple and strong.

[14.e5 dxe5 15.dxe5 Nfd5 16.Ne4 Nf5 I wasn't sure how much this was, as 17.g4 Nh4 kind of works out for Black. The position is just really good here though, as White can slowly mobilize and bring the a1 rook into play as well, before starting some concrete action. Black active looking knights have no promising jumps here.]

14...Qb6?! I was very surprised to see this move, giving me Qa3 for free, but Teimour had an issue that he couldn't solve after the more natural 14...Qc7.

[14...Qc7 15.Ng5 Rf8 I was trying to make e5 work here, but Teimour told me that 16.f4!? scared him away, and indeed it is a very cool idea. 16.f4!? *(16.e5 dxe5 17.dxe5 Nfd5)* 16...h6 17.Ngf3 idea being d5 *(17...Nh5 18.f5)* 18.e5 Nh5 19.f5! and capturing the pawn, loses to 20. g4!.]

15.Qa3! Eyeing the d6 pawn. **15...Qc7**

[15...d5 16.e5 Nh5 is not a solution to the problem. 17.g3 Cuts out the h5 knight.]

16.Nc4 Nc8 17.e5! With the knight so passive on c8, this operation felt well timed. **17...dxe5 18.dxe5 Nd5**

I thought of some concrete ideas related to 19.Ng5, but eventually realized that White just has to strengthen the position.

19.Rac1 Also strong was 19.Rad1.

19...h6 20.b4!? I really liked this idea, preventing b5 and c5 once and for all.

[20.Nd4! Got intuitively dismissed on the account of b5 as well as c5, but it just works by force. b5 *(20...c5 21.Qf3!* Is a powerful intermezzo. *Ndb6* Here there are many good moves, but my engine's first choice is incredible. *22.a4!* I will see myself out. *Nxa4 23.Bd3! cxd4 24.Nd6!)* 21.e6! Freeing the e5 square for the knight, with an overwhelming advantage, once the c6 pawn falls.]

20...Qd8?! Black spent a lot of time on this move and after thinking along for a while, I realized that 20...Ndb6! is the best chance, trying to get rid of my annoying c4 knight and potentially free the knight on c8 from the defense of the d6 square. Teimour's move is more passive.

[20...Ndb6! White has plenty of options here, but it's hard to say which one is the best. Black can keep struggling on here.]

21.Qb2! Now my play is extremely easy.

21...Rb8 22.a3! Black doesn't want anything, so I can just afford to optimize my position. Interestingly, this move is also the engine's top choice, which goes to show that simple human logic can sometimes almost as if by accident match the all−knowing AI. **22...a6**

23.Rcd1 Rook is slightly better placed here. **23...Qc7** Here it's time to go for

the final push. **24.Qd4** I couldn't choose between this and Bd3, with the same idea, to setup a battery along the b1−h7 diagonal, which would be the final improvement of my pieces, when Black's position would crack.

[24.Bd3! is even cleaner, as in the game there is still a bit of work left to do.]

24...Bf5 Black fights for the b1−h7 diagonal, but for this I prepared a simple response. **25.Nh4 Bh7 26.Bd3!** Trading away a defender and introducing the idea of Rd3−Rg3. Black was already busted for a while, but now he is finally facing concrete problems. **26...b5** This pushes the c4 knight away, but at a high cost. The c6 pawn is now hopelessly backward and weak. **27.Bxh7+ Kxh7 28.Na5! Nce7 29.Rc1** I decided to just collect the c6 pawn, but there were prettier roads to victory.

[29.e6! was a good one, making Black choose between different options, all of which are quite unacceptable.]

29...Rbd8 30.Qe4+ Kh8 31.Nf3 I decided to go for the c6 pawn and there was no changing my mind at this point.

[31.Nb3!? Aiming for domination with Nc5 and eventual f4−f5 was also a way to convert.]

31...Qd7 32.Rc2 I thought this was accurate, as 32.Nd4 seemed to fail to 32...Nxb4, but in fact 33.e6! wins for White. **32...Ng6** Black tries to give up the doomed pawn and seek some active play, but one knight on f4 is not going to give White much headache.

[32...Rc8 Defending passively not going to save the game either. 33.Rec1 Nb6 34.Rd2 Ned5 35.Nd4 Ne7 36.Kh2 Black is out of moves and White will eventually f4−f5 Black to suffocation.]

33.Nxc6 I just take the pawn. **33...Rc8 34.Rec1 Ngf4 35.Ncd4** Now I just go back. There is no compensation for the pawn. **35...Rxc2 36.Rxc2 f6** White is fully mobilized and ready for this attempt to stir up some drama in the center. **37.Rc5! fxe5 38.Nxe5** Black is the one losing material here, despite him being the one with a pin. **38...Nc3 39.Rxc3 Qxd4 40.Nf7+** An intermezzo that seals the game. Black resigned, losing material on the board, but also running out of time. **1−0**

A rare line, which was introduced by the Russian GM Fedoseev in 2017.
[The main line 11.b4 is also part of this update.]
11...Qe7 Black protects the f7−pawn and prepares 12...Na5. This is the only move that Black has tested in this position.
[11...Na5? doesn't work because of 12.Bxf7+ Kf8 13.Qa2+− This retreat is possible thanks to the a4−move.]

12.a5 Otherwise White's previous move makes no sense. **12...b5!** A strong novelty. Black seems to damage his pawn structure this way, but the concrete factors turn out to be more important.
[Earlier Black tried 12...Rb8 13.Nf1 Be6 14.Be3 Bxc4 *(14...Nh5!?)* 15.Qxc4 Qd7 16.b4 Qe6?! *(16...d5!* was better. *)* 17.Qxe6 Rxe6 18.Bxa7 Nxa7 19.Ne3 Rd8 20.c4 and White obtained an edge in Fedoseev, V (2703)−Negi,P (2670) Khanty−Mansiysk 2017]

[and 12...Nh5 13.Nf1 Qf6 14.Qd1?! Illijin,N (2167) −Arcuti,D (2342) Graechen 2017, and Black could have equalised by means of *(14.N1h2!?)* 14...Qg6!=]
13.axb6 cxb6 Black is taking advantage of the unfortunate position of the bishop on c4. **14.Bd5!**
[14.Bxa6?! is dubious in view of Na5! 15.Qb5?! *(15.Qc2* is better, but after *Bxa6 16.b4 Bc8!* Black is at least fine. *)* 15...Bd7 16.Qb4 Nc6! 17.Qb3 b5!∓ and the bishop gets stuck on a6, while 18.Bxb5? runs into Bxf2+ 19.Kxf2 Rxa1−+]
[14.Qc2 b5 15.Ba2 a5 is also good

for Black.]

14...Qc7!

[14...Nxd5? 15.exd5 Nb8 16.d4± is dangerous for Black.]

15.Qc4 This way White wins a pawn, but Black obtains sufficient compensation.

[In case of 15.c4 b5!= is strong, with the idea of 16.cxb5? axb5 17.Qxb5 Bd7 18.Qc4! Nxd5 19.exd5 Bxf2+ 20.Kxf2 Rxa1 21.dxc6 Bxc6∓ and Black is better thanks to the vulnerable position of the white king.]

15...Bb7 16.Bxc6 Bxc6 17.Rxa6 Qb7! 18.Ra3

[Of course not 18.Ra1? b5 with 19...Bxf2 to follow.]

18...b5 19.Qb3 Rac8?! This seems to be inaccurate, as it's not the best way to prepare ...d5.

[19...Qb6! was strong. 20.Re2 d5! 21.exd5 Bxd5 22.Qc2 Nh5 23.Ne4 Qc7! with good compensation for the sacrificed pawn.]

20.Qa2?! Nakamura returns the favour.

[20.Qd1! was more accurate. Bb6 *(20...b4 21.cxb4 Bb8 22.Nc4±)* 21.Nb3 d5 22.Na5 Bxa5 23.exd5 Bxd5 24.Rxa5 Rcd8 25.Re3±]

20...Bb6?! Grischuk makes a natural move, but thus turns out to be inaccurate too.

[It makes sense to provoke a weakening of the c3−pawn by means of 20...Bc5! 21.b4 Bb6 22.Nh4 Bd7! with the subsequent 23...d5 and Black equalises.]

21.b4?! This response justifies 20...Bb6.

[21.Nb3! with the idea of 22.Na5, was the only attempt to set problems. Bd7! 22.Qa1! d5 23.Be3!± with a slight edge for White.]

21...d5!= Now Black has sufficient compensation again. **22.Qc2 Re6! 23.Nh4 Nh5! 24.Nb3 dxe4 25.dxe4 Nf6! 26.Nd2 Rd8 27.Nhf3 Rc8 28.Bb2 Qe7 29.c4** Hikaru is already happy to finish the game in a draw.

[White could also wait by means of 29.Bc1!?=]

29...bxc4 30.Qxc4 Nh5! 31.Nf1? A mistake, probably in time trouble.

[31.Nb3 Bb7 32.Nc5= was better and led to equality.]

31...Nf4∓ Suddenly White starts to experience problems. **32.Ng3 Qe8! 33.Rc1 Rd8** Black moves the rook away from the c−file, but misses an advantage.

[33...Kh7!∓ was more precise and promised Black a serious edge.]

34.Qc2! Bb5 35.Rd1 Rc8 Grischuk played this move and offered a draw. Indeed, now the position is roughly equal.

[or 35...Rxd1+ 36.Qxd1 Qe7 37.Qd2 f6 38.Bd4 Nxh3+ 39.gxh3 exd4 40.Nxd4 Qd7 41.Nb3 Rd6 42.Qf4 is roughly equal.]

[35...Rc8 For example, 36.Rc3 Rxc3 37.Qxc3 f6 38.Bc1 Ba4 39.Rf1 Bb5 40.Rd1= Black introduced an important novelty, 12...b5, which seems to equalise the position.]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.0−0 0−0 7.Re1 Bb6
An improvement of his on.
[Aronian was successful just a week ago in the following game: 7...Ng4

8.Re2 Kh8 9.d4 Bb6 10.h3 Nf6 11.a4 a5 12.Be3 exd4 13.cxd4 Nb4 14.Nc3 Nxe4 15.Nxe4 d5 16.Ned2 dxc4 17.Nxc4 Nd5 18.Nxb6 cxb6 Saric,I (2667)−Aronian,L (2758) Batumi 2019]

8.a4 Ng4N Now Aronian jumps with the knight closer to the enemy king and this turns out to be technically a novelty. Although the idea is very common in the Italian once that the rook leaves the f1 square.

[The predecessor was also a top game and also a short time control: 8...a5 9.h3 Ne7 10.d4 Ng6 11.Bd3 c6 12.Be3 h6 13.Nbd2 Be6 14.Qc2 Bc7 15.Rad1 Qe7 16.c4 Vachier Lagrave,M (2789)−Alekseev, E (2616) Riadh 2017]

9.Rf1 Kh8 Unleashing the idea behind the knight thrust. f7−f5 is on the agenda.

10.h3 Nh6 11.b4

[11.Bxh6 only helps Black as it opens more files for the black major pieces. After: gxh6 Black will follow with Qd8−f6−g7 and prepare f7−f5 nevertheless.]

11...a6

[The other way to save the bishop: 11...a5 Provides an additional possibility to White: 12.b5 Ne7 13.Nbd2 f5 14.Ng5!? as the black knight stands on the road of the queen.]

12.Bb3 f5 13.Nbd2 Qf6 14.Ra2! In order to overprotect the f2 square. On top of that, the rook is defended itself.

[For instance in the line: 14.Nc4 Ba7 15.b5 axb5 16.axb5 Black has the resource: Bxf2+ 17.Rxf2 Rxa1 18.bxc6 bxc6 with unclear play.]

14...a5

[Here more accurate for Black is: 14...Ba7!? not fearing: 15.b5 Na5]

15.b5 Nd8 16.Nc4 So consistently created a play on the queenside and brought his pieces into the game. His position is filled with potential energy.

16...fxe4 17.dxe4 White misses a golden opportunity!

[So could have unleashed the hidden energy of his pieces with the original pawn sacrifice: 17.Ng5!! With the key point: exd3 *(* Or: *17...Ba7 18.b6! cxb6 19.Nxe4* when Black's centre collapses. *)* 18.Nxb6 cxb6 19.f4! to open the f−file for his rooks. Now all the white pieces make sense, whereas the black queenside is sleeping.]

17...Bc5 18.Bg5 The beginning of a wrong idea.

[So needed to swap the dangerous bishop once and for all: 18.Be3! Then: Bxe3 19.fxe3!? followed by Ra2−f2 looks good for the first player.]

18...Qg6 19.Bxd8 The follow up is already a decisive mistake!

[19.Kh1 was mandatory, although here too Black has a pleasant choice between the sharp complications after: Bxh3!? *(* And the simple step−by−step kingside attack: *19...Ne6!?)* 20.gxh3 Qh5]

19...Bxh3! No automatic recaptures for Aronian! Instead, he goes for a forcing line: **20.Bg5 Bg4 21.Ncd2 Rxf3!!** Beautiful! The bishop is worth more than the rook as a pinner. Plus, the second rook gets a piece of the action. **22.Nxf3 Rf8 23.Nxe5!** The only way not to lose at once. Alas, also insufficient as after: **23...Qxg5 24.Nxg4 Nxg4 25.Be6 Ne5**

The forcing play is over. Despite the nominal material advantage for White, he is lost. The absolute power of the black pieces is crushing. He can use all his pieces into the attack (whereas So misses both his rooks), and the opposite−coloured bishops practically secure Black an extra piece. **26.Kh1**

[The last chance was: 26.Bh3! Nf3+ 27.Kh1 Qh6 although Black should also slowly build decisive threats here too.]

26...Qh4+ 27.Kg1 Rf6!

[But not the hasty: 27...Nf3+ 28.gxf3 Rf6 When White can defend with: 29.Re1 *(* Or with: *29.Kg2 Rxe6 30.Rg1)* 29...Rxe6 30.Kf1]

[However: 27...g5! was winning as well.]

28.Bh3 g5 29.Qd5 g4 30.Qxb7 gxh3

Aronian sees a forcing win and does not look any further.

[30...Rf8! would not have even allowed a check.]

31.Qc8+ Kg7 32.Qxh3 Nf3+ 33.Kh1

This leads to mate.

[Naturally 33.Qxf3 should not save White either due to: Rxf3 34.gxf3 Qg3+]

33...Rh6!

[So resigned, not waiting for: 33...Rh6 34.Qxh4 Rxh4#]

16.dxe5 Nxe4 17.Nxe4 dxe4 18.Qxd8 Raxd8 19.Bf4 The first critical position. White is going to win the e4−pawn, but Black will penetrate to the second rook with the rook. The game will show if Black has enough compensation for the pawn. It's also clear that both players analysed this position at home. So we're gonna see their homework. **19...h6** Black is including the moves ...h6 and h4 before playing e3. A questionable decision because later Black may want to advance the f−pawn, which would then create a weakness on g6.

[32...Ka7 33.Rf7 Black could remain in the game. Delaying this recapture deserved attention, by, for instance, Qa1+!? Tata Steel−A 82nd (11) 24.01.2020
[Duda,Jan Krzysztof]

The game was played on 11th round, and after a free day which felt no fun at all. Magnus had just overcome a drawing crisis and had scored 3/3 in the last rounds. Still he was down to Caruana by half a point, so I assumed he would go for an even higher winning streak. Furthermore the free day made me paranoic about his opening preparation. After much thought I decided to stay loyal to my 1.e4 and see what happens, without certainity though.
1.e4 e5 So after all this hours spend on repeating all kinds of Sicilian variations, French Defence, Modern, Scandinavian and even Alekhine Defence, he just played 1...e5. A true surprise. **2.Nf3 Nc6 3.Bc4 Bc5**
[Not even going for 3...Nf6 as he played against Van Foreest a couple of rounds earlier]
4.c3 Nf6 5.d3 d6 So the Italian game. The only prep I had done was that I wasn't going to play a set up with Bg5. Not a brilliant stuff, but at least I had played the Italian 32 times in my recent years. **6.Nbd2 a6**

7.Nf1 Mikhalevski,V: 'A pretty rare move. White transfers the knight to g3 before castling in order to save a tempo on the Re1 move. This would be necessary had White castled.' Pretending to save a tempo on Re1 later on, but most importantly avoid ...Ng4/...f5 stuff.
[7.Bb3 Mikhalevski,V: 'is the main line. 7...h6 Mikhalevski,V: 'Carlsen doesn't want to deal with the Bg5 pin after he castles.' **8.Ng3 0−0 9.0−0** I didn't remember the exact move order from my game against Mamedyarov. Obviously I wasn't willing to allow Bf8 anymore. Luckily here Black can hardly play d5, because his e5−pawn would be too weak. My opponent's next move deprives him of this option once and for all. **9...Ba7** Mikhalevski,V: 'As soon as

the bishop retreats to a7 Black creates a positional threat of 10...Na5. So,' **10.Bb3** I spent some time choosing between the game continuation and the more positional 10.a4. **10...Re8** Mikhalevski,V: 'Black prepares 11...Be6, although the immediate 10...Be6 was also tested.'

[The same position after 10.Bb3 was reached in the following game, by transposition. It saw 10...Be6 Carlsen,M (2826)−Nakamura,H (2758) London ENG 2011 [Mikhalevski,V]]

[12.Re1 , which leads to a transposition to an early 0−0, was reviewed a long time ago by Olivier Renet in Vorobiov,E−Grischuk,A. I've given a few references to the current game because of the numerous transpositions, which occur on almost every single move.]

[⌓14.d4 0.21/20]

14...Ng6 0.21/20 This natural move is slightly inaccurate. Black had to start with 14...Nh5.

[Now 14...Nh5! is strong and promises Black equality since White can't stop the black knight from appearing on f4. The problem is that the f2−pawn is pinned and so White can't play 15.g3. With the idea ...Nh5−f4. 15.Nf1 Nf4=]

[⌓14...Nh5 −0.10/21]

16.axb5 axb5 17.Ng3

[After 17.cxb5 Bb6 White's extra pawn on the b−file is nonessential.]

17...bxc4 18.dxc4 Re8 0.45/22 A useful move, as the rook was doing nothing on e6, but Black seems to have a more important idea.

[18...Qe8!? trying to transfer the queen to c6 was interesting. 19.Qc2 Qc6 with 20...Bb6 to follow. The pressure on the c4 and e4 pawns makes White's task more difficult. 20.Nd2±]

27...Ne6 28.Kg2! Radjabov is not in a hurry. He slowly improves his position, while Black doesn't have a good plan. **28...Nf6 29.Re1↑** White is in control.

15...Rd8 16.Bb2 b5!? I felt this is a good moment to push b5. Now the b2 bishop doesn't have much purpose. **17.axb5 axb5 18.Rad1 dxe4 19.dxe4 Rd6 20.Rxd6 cxd6!?** Changing the structure to some sort of a Najdorf Sicilian. There is a potential for the long term d6−d5 push here. **21.Bc1 Ne7 22.Be3** I didn't mind the bishop trade and still felt I have a pleasant position. White's c3 pawn is somewhat weaker than my d6 pawn and also White's e4 pawn needs some attention. In the long term I have ideas to push d5 or get the knight to f4 somehow. **22...Bxe3 23.Rxe3 Qc6 24.Rd3 Ra8 25.Qd1 Ra6 26.Re3 g6** I played it a little safe, not wanting to deal with any Nf5's, but I could have also sent my e7 knight to f4.

27.Nd2 Kg7 28.Nb3 Qc7 29.Nf1 Ra3 30.Nfd2 Nh5 Sending a knight to f4 after all. I wasn't sure what exactly it is doing there, but it felt right. I was actually expecting 31.g3 and wanted to return, having weakened White somewhat. **31.Qf1 Qd7 32.Re1 Nf4 33.Kh2 Qc6** Allowing a strong resource.

34.c4! bxc4 35.Na5! This is why I shouldn't have gone 33...Qc6. Now I lost

all my advantage, but there was still one trap left apparently. **35...Qc7 36.Qxc4?** Counting on a queen trade. White had to take with the knight, as now suddenly there is a concrete issue. **36...Qb6!** Very sneaky, hitting the f2 pawn. **37.Rf1 Ra4!** Suddenly I can just pick up the b4 pawn. The position was very hard to defend and I managed to convert it. **38.Qc3 Rxb4 39.Nac4 Qc5 40.g3 Ne6 41.f4** In hindsight it would have been a better attempt to defend passively, but the position was quite seriously bad, so this desperate attempt to seek for active play felt justified in some way. **41...Nd4 42.Qd3 exf4! 43.gxf4 d5!** The most technical, now it becomes apparent that the f2−f4 push only backfired and with the weak king as well, White was doomed. **44.Ne3 dxe4 45.Nxe4 Qc6 46.Ng3 Kh7 47.Qe4 Rb2+ 48.Ng2 Qxe4** the queen trade wins by force. **49.Nxe4 Nef5 50.Nf6+**
[50.Rf2 Rxf2 51.Nxf2 Nf3+ 52.Kh1 Ng3# is a picturesque mate!]
50...Kg7 51.Nd5 Nh4 52.Nde3 Nxg2 After 53.Nxg2 Nf5 White can't avoid a liquidation into a lost pawn endgame. **0−1**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0 6.0−0 d5 7.exd5 Nxd5 8.a4 a5 9.Re1 Bg4 10.Nbd2 Nb6 11.Bb5 Bd6 12.Ne4 Na7 13.h3 Bh5 14.d4 Nxb5 15.axb5 exd4 16.Nxd6 Qxd6 17.Qxd4 Bxf3 A new move from Shirov. Black weakens White's pawn structure on the kingside, but his pawn on d6 will not be great either.

[Early we only considered 17...Qxd4 in Navara,D (2738)−So,W (2765) Saint Louis USA 2019 [Mikhalevski,V], which promises equal chances.]

18.Qxd6 cxd6 19.gxf3 White is about to play 20.Re7, which explains Black's idea. **19...Rfd8**

[19...a4 20.Re7 Rfb8 looks passive, but is nevertheless playable thanks to the fixed weakness on b2.]

20.Re7 This move doesn't promise much, as Black exchanges White's active rook and creates just enough counterplay on the queenside.

[A better option would be to restrict the b6−knight by means of 20.b3! a4! *(* or *20...Nd7* transferring the knight to c5. *21.Be3! 20...Rd7 21.Rxd7

[21.Re1 admitting the inaccuracy of the last move was worth some attention.]

21...Nxd7 22.Bf4 Probably Duda connected his hopes to this move.

22...Nb6! An important move. Shirov creates counterplay thanks to the b2−pawn.

[22...d5? would be wrong. 23.Rd1 Nf6 24.Be5 Re8 25.f4**±** with a very dangerous endgame for Black as his queenside pawns are week.]

23...a4! The most accurate. Black gets rid of his weak pawn on the a−file. Since the rook on a8 is protected Black is threatening to capture the b−pawn and so White's reaction is rather forced.

24.bxa4 Rxa4 25.Re1! White has to keep his rook.

22...Qf7 The attack on the f2−pawn prevents 23.Nxe5.

[After 22...Rf5 23.Qg3 Bxf3 24.Bxf3 And now Bf3−g4 would win. Qf7 25.Bg4 Rf6 26.Re3± White's chances are still slightly higher.]

23.Qh4 Now Black has to deal with the threat of 24.Ng5. Against e5−e4. Nf3−g5 is the strong threat. **23...Bg6?!** An explicable inaccuracy. It's clear that Black didn't want to exchange his bishop for the f3−knight.

[23...Bxf3 24.Bxf3 Rd8± might have been the lesser evil, although White retains the better chances.]

24.Bb3! This strong move is the only way to set problems. The attack on the black pawn centre is rather annoying.

24...Qd7 25.Qg3!± Now there is no good way to protect the e5−pawn.

25...d4 0.99/25 An attempt to create counterplay, which doesn't work if White answers it correctly.

30...Bxd3 Endgame KRB−KRB **31.Rd1 Be4** Black transfers the bishop to c6 and equalises the game. **32.Rd6 Bc6 33.Bd5** This move equals a draw agreement, but the position was already equal anyway. **33...Bxd5 34.Rxd5=** KR−KR **34...Re1+ 35.Kh2** Rd5−d8+ would kill now. **35...h6 36.Rd7 Rc1 37.Rxb7** 0.01/26

[or 5...d6 , which often transposes to 5...a6. I also tested all these moves.]

6.Bb3 A flexible move, which keeps all the options open. In some lines the c4−square will be used by the b1−knight.
[The immediate 6.0−0 occurred in Wehmeier, S−Campora, D/Andorra AND 2001/[Paul Motwani]. d6 7.Bb3 a6 8.h3 h6 9.Re1 Ba7 10.Nbd2 Nh5 11.Nf1 Qf6 12.Ne3 Nf4 13.Ng4 Qg6 14.Bxf4 exf4 15.d4 Bxg4 16.hxg4 Qxg4 17.Qd3 Ne7 18.e5 d5 19.Bc2 g6 20.Qd2 c5 21.Nh2 Fedorov,A (2604)−Belov,V (2549) Silivri 88/68 2003 CI1−130 [Fedorov,

6...d5 Black exploits the fact that he saved a tempo on ...d6 and attacks the centre directly. **7.Qe2** A typical reaction. White protects the e4−pawn and will try to prove that d5 leads to Black's centre becoming vulnerable.

[7.Nbd2 h6 8.0−0 Re8 9.exd5 Nxd5 10.Ne4 Be7 11.d4 exd4 12.Nxd4 Nxd4 13.Qxd4 Be6 14.Rd1 c6 15.Rd3 Bf5 16.Bd2 Bh4 17.Re1 Qe7 18.c4 Qxe4 19.Rxe4 Rxe4 20.Qc5 Re2 21.Rf3 Be4 Yentin,R (2097)−21.Qc4 (2600) Kazan 2013 EXT 97−B [Adriano, CHECK! #535] 0−1]

7...a5 This aggressive move is a novelty. Shirov decides to close the centre by means of ...d4 and so his play on the queenside, which provokes weakening of the White's position, is understandable. **8.a4** Black is slightly better. **8...d4N** I'm always cautious when I release the pressure in the centre like this as now White has his hands freed for play on the kingside. Moreover, it's usually not so simple to find counterplay.

[8...Be6 with the idea of ...dxe4 was a possible alternative. 9.Nbd2 Ba7 and so on.]

[10...Qd6 provoking the knight to c4 and thus avoiding its transfer to the kingside by means of Nf1−g3 deserved attention.]

11.Nh4 −0.35/19 White creates a threat of Ng6 and also prepares Nf5.

[11.Bd5!? with the ideas Bxc6 and Nb3 was interesting. Now in case of Nb8 *(11...dxc3!? 12.bxc3 Rd8)* 12.Bc4! Nc6 White obtains the text with an extra tempo (the bishop on c4 instead of b3), which he can use by means of 13.Nb3 with some pressure.]

[11.Bd5= 0.13/23]

11...Rd8 12.h3! This move is directed against ...Bg4. It's also a useful move before playing Nf5 as it's not so easy to find a constructive move for Black.

12...Be6

[12...Nh7 seems wilder. 13.Ndf3 Be6 14.Bxe6 fxe6 15.Ng6 Qf6]

13.Rd1 White makes another useful move and prepares the Nf1−g3 manoeuvre after the preliminary exchange on e6. **13...Rd7** Black is preparing to double rooks against the d3−pawn. **14.Bxe6 Qxe6**

[Don't play 14...fxe6 15.Nc4±]

15.c4 Since Black concentrated on the pressure along the d−file White closes the centre and concentrates on the kingside. **15...Ne7 16.Nf1 g5** White was ready to fight for the f5−square by means of Ng3 and so Black is in a hurry. **17.Nf3 Ne8!** A clever idea. Before bringing the knight to g6 Black covers the f5−square with another knight. **18.g4** White prevents ...f5, which was in Black's plans and prepares Ng3.

[After 18.h4 f6! *(18...g4?* 3.32/24 18...f7−f6 −0.17 is impossible in view of *19.Nxe5!+−)* 19.N3h2 Kh7 20.Qf3 Rd6 21.Ng3 Ng7 22.h5 Bb4 23.Ng4 Rf8 the position is roughly equal.]

White prepares Rh1 with the subsequent opening of the h−file by means of h4 and hxg5. **20...Ng6 21.Rh1 Ra6** 0.06/23
[Black's alternative is to exchange his weak f5−square for the f4−square. So 21...Qe8 with the idea of ...Ne6 was interesting.]
[21...Qe8∓ −0.66/23]
22.Nf5= White prepares 23.h4.
[In case of 22.h4? −1.98/25 22.Ng3−f5 0.08 Qxg4 Black wins a pawn.]

[24...Ne7= 0.23/24 remains equal.]

7.Re1 This is only the fifth most popular move in this position, though it was played by the thirteen world champion, Garry Kasparov, in a simultaneous game and also in a recent game of the reigning world champion. The latter played with the black pieces.

7...0−0 8.Nbd2

[The aforementioned game saw 8.h3 a6 *(* A couple of recent games featured *8...a5)* 9.Bb3 This position occurred in at least three games of Harikrishna in 2016. b5 Carlsen transposed into a Spanish a tempo down, as the bishop reached the b3−square in two moves (Bc4−b3) instead of three (Bb5−a4−b3). *(9...Re8* is a more popular alternative. *)* 10.Nbd2 Bb6 11.Nf1 Ne7 12.a4 Rb8 13.d4 Ng6 with a typical position for the Spanish with 5.d3, but a tempo down for Black, Harikrishna,P (2752)−Carlsen,M (2857) Baku AZE 2016]

8...a6 One of the main lines in this position. As usual, Black creates an escape square for the dark−squared bishop and creates a positional 'threat' of 9... Na5, which Giri ignores. **9.Nf1** Anish is following Kramnik's idea of delaying the Bb3 move, at least the latter was the only top player employing it in this exact position. You can also find a similar idea in the current update, when Kramnik beat Anand with a delay of both Bb3 and a4. **9...Na5** A bold move. Black isn't afraid to see what the Dutch GM prepared for him.

[Kramnik faced 9...Ba7 Now the idea of 10...Na5 is more real and so the 14th world champion retreated the light−squared bishop to b3. 10.Bb3 and the players transposed into a much more popular position with early Bb3. Kramnik,V (2801) −Eljanov,P (2765) Stavanger NOR 2016]

10.b4 Only the position of the bishop on c5 allows White to delay the Bb3 or a4 moves. **10...Nxc4 11.bxc5 Na5 12.cxd6 cxd6** After a series of exchanges a very interesting position has arisen. **13.a4!** An attempt to fix Black's weaknesses on the queenside. **13...b5!** Mamedyarov solves this problem instantly. **14.axb5 axb5 15.Rb1** White shows that Black has a target on b5, but White has a similar weakness on c3, which Shakriyar attacks with his next move. **15...Qc7! 16.Bd2** 0.03/22

[16.Ne3⩲ 0.39/22 deserves consideration.]

16...Re8 0.36/22 Mamedyarov has been preparing the ...Nb7−c5 manoeuvre.

[7...Ng4 is interesting. 8.Re2 Na5 9.Nbd2 Nxc4 10.Nxc4 Be6]

8.Nbd2 Be6 9.Bb5 Ne7 A very rare move with which Black scored three losses in three games, including this one. The idea behind the move is typical and well−known for the Giuoco Piano − the knight is being transferred to g6. The position is equal.

Tbilisi GEO 2017 [Mikhalevski,Victor]]
10.d4!? A novelty. The point of the early d4 is to obtain an escape square on d3 for the light−squared bishop.

10...Ba7 A logical retreat, although Black had a reasonable alternative.

Jerusalem FIDE Grand Prix (1.2)
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5 7.Bb5 Ne4 8.cxd4 Bb6 9.Nc3 0−0 10.Be3 Bg4 11.h3 Bh5 12.Qc2 Ba5 The third most popular option after 12...Nxc3 and 12... Bg6, the former recently replacing the latter as the main line. It is the first time I have covered it here.

[You can found recent examples of both other lines in our archive. 12...Bg6 Aronian, L (2758)−Adams,M (2694) Batumi GEO 2019 [Mikhalevski, V]]

[12...Nxc3 Aronian, L (2772)−Karjakin, S (2754) Bucharest ROU 2019[Mikhalevski,V]]

13.0−0 The most natural move and the main line. **13...Bxf3 14.gxf3 Nxc3**

[14...Nxd4!? is an interesting alternative. 15.Bxd4 Qg5+ 16.Kh1 Bxc3! 17.bxc3 Qf5! 18.Rfc1!

The only chance to avoid a perpetual and retain some winning chances. *(18.fxe4* led to a draw by perpetual in a later game. *Qxh3+ 19.Kg1 Qg4+ 20.Kh2 Qh4+ 21.Kg2 Qg4+* 1/2−1/2 (21) Brkic,A (2560) − Martinovic,S (2555) Bjelovar 2019*; 18.Kg2 Qg5+ 19.Kh2 Qf4+* also doesn't allow to avoid a draw. *)* 18...Qxh3+ 19.Kg1 Ng5! 20.Be2 Nxf3+ 21.Bxf3 Qxf3 As a result of Black's combination he has obtained three pawns for a piece. 22.Qd1! Qe4? *(22...Qf5!* with good control over the light squares, was better and promised roughly equal chances. *)* 23.Qh5± Aryan,C (2553) − Baeumer,L (2245) Biel 2019]

15.bxc3 Qd7! An interesting tactical idea. Black attacks the h3−pawn and prepares 16...Nxd4. **16.Kh2** White protects the h3−pawn.

[In the only preceding game White avoided 16...Nxd4 by means of 16.Bxc6 Qxc6

A) 17.Kg2!?

A1) 17...Qxc3!? is also equal. For example, 18.Qxc3 Bxc3 19.Rab1 Rab8 20.Rfc1 Ba5 21.Rb5 Bb6 22.Rxd5 Rfd8 23.Rxd8+ Rxd8 24.d5 Rxd5 25.Bxb6 axb6 26.Rxc7 g5 27.f4 *(*or *27.Rxb7 Rxe5 28.Rxb6 Ra5 29.Rb2 Ra4* with a dead draw. *)* 27...gxf4 28.Rxb7 Rxe5 29.Rxb6 Ra5=;

A2) 17...f6 18.f4 Qxc3 *(18...Rae8!?=)* 19.Qxc3 Bxc3 20.Rac1 Ba5 21.e6 *(21.Rc5 Bb6 22.Rxd5 Rad8 23.Rxd8 Rxd8 24.Rb1 Kf7* is fine for Black. *)* 21...Rfe8 22.f5 g6 23.Kf3 gxf5 24.Rc5 Bb6 25.Rxd5 Rxe6 26.Rd7 Rd6 27.Rg1+ Kh8 28.Rxd6 cxd6 leads to a roughly equal endgame.;

B) 17.f4 Qg6+ 18.Qxg6 fxg6 19.Rab1 Bb6 20.Kg2 Rae8 *(20...Kf7!?* looks more accurate. *)* 21.Rfc1! c6 22.a4! Re7 23.c4 dxc4 24.Rxc4 Rd7 25.Kf3 Kf7 26.Ke4 Anton Guijarro,D (2643)− Svane,R (2610) Skopje 2019 and now Ke6 promised equal chances.]

16...Nxd4! 17.cxd4

[17.Bxd7? Nxc2∓ leads to a position with a healthy extra pawn for Black.]

17...Qxb5 18.Rg1 White creates a threat of 19.Bh6. **18...g6!** A correct reaction. Black is not afraid of weakening the dark squares on the kingside, as White won't be able to take advantage of them.

[18...Kh8? would be a mistake in view of 19.Rxg7! Kxg7 20.Rg1+ Kh8 21.Qf5 Qb6 22.Bg5 f6 23.Bxf6+ Rxf6 24.exf6 Qd6+ 25.f4 Bd2 26.Rg4 Rf8 27.Rh4 Bxf4+ *(27...Rf7?* runs into *28.Rxh7+! Rxh7 29.Qc8+)* 28.Kg2! h6 29.Rxf4+− with a winning position.]

19.Rab1 Qc4!?

[19...Qa6!?]

20.Qxc4 This exchange of queens leads to an easy draw. White's only chance to play on is to keep queens on the board.

[20.Qf5! Rae8! 21.h4! was the best chance to set some problems.]

20...dxc4 21.Rxb7 Rfb8 22.Rgb1 Rxb7 23.Rxb7 Bb6 Now in order to free the rook from b7 White has to push the d−pawn, which will be lost and then

massive exchanges will lead to a draw.
24.d5 Rd8 25.Bg5
[or 25.Bxb6 axb6 26.Rxc7 Rxd5 27.Rxc4 *(* or *27.e6 fxe6 28.Rxc4 Rd2 29.a4 Rxf2+ 30.Kg3 Ra2 31.Rc6 Rxa4 32.Rxb6 e5 33.Rb8+ Kg7 34.Rb7+ Kh6 35.Re7 Ra5 36.h4=)* 27...Rxe5=]
25...Ra8!
[Obviously not 25...Rxd5?? 26.Bf6 Bc5 27.Rb8+ Bf8 28.Be7+−]
26.Be3
[In case of 26.d6 cxd6 27.exd6 c3 28.d7 c2 Black's passed pawn is more dangerous than White's, while the rook is still stuck on b7.]
26...Rd8 27.Bg5 A short, but important game for the theory of this line. It seems that White's only chance to fight for an opening advantage is 20.Qf5 and so 12... Ba5 is an interesting alternative to the more popular lines 12...Bg6 and 12... Nxc3.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.c3 d5!? 7.exd5 Nxd5 8.Re1 Bg4 9.h3 Bh5 10.Nbd2 Nb6 11.Bb3! Cabrilo,Goran: '*' **11...a5!?** This can be an interesting alternative to solve Black's opening problems without going into the positional battles and endgames seen in the previous games.
12.Ne4
[12.a4 is also a natural reaction. In this case, Black could transpose to familiar paths with Qxd3 13.Nxe5 Qf5 14.Nef3 Rad8 15.Qe2 Nd5 *(15...Qc8?* would be a mistake now, as after *16.Qb5* Black can't attack the enemy queen with a7−a6. *)* 16.Ne4 Bxf3 17.Qxf3 Qxf3 18.gxf3 Bb6 with a similar endging as in the previous games.]
12...a4! 13.Bc2
[13.Nxc5 axb3 14.Nxb3 wins a pawn, but after Qd5! Cabrilo,Goran: '∞' Black has a very active position. For example: 15.g4!? *(15.Qe2 f5!* might be unpleasant for White. *)* 15...Bg6 16.d4 *(16.c4 Qxd3 17.Qxd3 Bxd3 18.Nxe5 Nxe5 19.Rxe5 Bxc4=)* 16...Rfe8 17.Be3

13...Ra5!?N Mamedyarov's new idea.

[A previous game went 13...Be7 Cabrilo,Goran: '− 145/101' but it wasn't enough to solve Black's problems, and after 14.Ng3 Bxf3 15.Qxf3 Bg5 16.d4! Bxc1 17.Raxc1 exd4 18.Be4! dxc3 19.Rxc3↑ 1−0 Stevic,H (2575)−Plenca,J (2483) CRO−ch Vinkovci 2020 (2)]

14.b4 Cabrilo,Goran: 'N' Now Black is able to equalise without problems.

[The obvious alternative is to grab the bishop pair. 14.Nxc5 Rxc5 Black has the easy plan of exerting maximum pressure on d3 now, which seems enough to keep the balance. A possible variation could be 15.Be3 Rd5 Cabrilo,Goran: '∞' 16.Qe2 f5!? *(16...Ra5* is suggested by the engine, but we had so much work to bring this rook to the centre! *)* 17.Bxb6 *(*If *17.Rad1* Black can continue the provocative play with *Nd7!? 18.Bxa4 Kh8!* when the pin on f3 gives Black some attacking chances on the kingside. For example: *19.Bg5!? [Now 14.Ng3 can be answered by Bg6 as Black is not losing the pawn on e5. 15.Ne4 Be7 16.Bd2 Rd5=]

[14.Bg5 Be7 15.Bxe7 Qxe7 16.Ng3 Bxf3 17.Qxf3 f5!⇄ is another typical idea which offers counterplay for Black.]

[14.Rb1 prepares the same idea from the game, but Black can anticipate it now: Be7! 15.b4 axb3 16.axb3 Ra2⇄]

[An entirely different plan would be 14.Bd2!? Be7 *(14...h6 15.b4 axb3 16.axb3 Rxa1 17.Qxa1 Bd6 18.Bd1 Be7=)* 15.Ng3 Bg6 *(15...Bxf3 16.Qxf3 f5!?* can be considered as well. *17.Nxf5 Bg5 18.Bxg5 Qxg5 19.d4! exd4∞)* 16.c4 Ra8 17.Bc3 f6 18.Nh4↑ all of these moves look playable and lead to interesting positions, but only tournament practice will show which is the most promising.]

14...axb3 15.Bxb3 Be7! 16.Ng3 Bg6 17.d4 Bf6?! Cabrilo,Goran: '∞'

[Black should have played 17...exd4 18.cxd4 Ra8= with an equal game. *(18...Nd5 19.Bd2 Ra8∞)*]

18.Be3

[18.Ne4! would have put some pressure on Black's position. exd4 *(18...Be7 19.Bd2±* keeps improving White's position. *)* 19.Nxf6+ Qxf6 20.cxd4 Rd8 21.Bb2 Nd5 22.Ne5± and White has an easier game.]

18...exd4 19.Nxd4

[Now in case of 19.cxd4 Nd5 20.Bd2 Ra8= Black is fine.]

19...Nd5

[19...Ne5!?↑ could be even more pleasant for Black from a practical point of view.]

20.Nxc6 bxc6 21.Bxd5

[White had to find a very difficult idea to keep the balance here: 21.Bd4 Nxc3 22.Bxf6! Qxf6 *(* In case of *22...Qxd1? 23.Bxc3!*+− wins for White. That's the difficult move to find in a blitz game. *)* 23.Qd2 Raa8 24.Rac1⩲ and White certainly has enough compensation for the pawn.]

21...cxd5 22.Bd4 Anand went for simplifications, but the resulting endgame is advantageous for Black.

22...h6 23.Bxf6 Qxf6 24.Qd4 Qxd4 25.cxd4 Rfa8 26.Re2

[26.Rac1!⇄ was more precise.]

26...Bd3 27.Rd2 Bc4 28.Nf5 Rxa2 29.Rdxa2 Rxa2 30.Rxa2 Bxa2 31.f4! I can't see an easy way how Black could break through. Perhaps some incredibly subtle plan might win for Black, but this doesn't matter during a blitz game... **38...Kc6 39.Nd1 Kb5 40.Ne3 c4 41.Nd1 Ka4 42.Kb2 Kb4 43.Nc3 f6 44.Na2+ Kb5 45.Nc3+ Kc6 46.Nd1 Bf3 47.Nc3 Bg2 48.Nd1 Be4 49.Nc3 Kd6 50.Kc1 Kd7 51.Kd2 Kc6 52.Kc1 Bg2 53.Kb2 Kd6 54.Nd1 Bf3 55.Ne3 Kc6 56.Nf5 Bg4 57.Nxg7 Kd6 58.f5 Ke7 59.Ne6 Kd6 60.Nf4 Bf3 61.Kc3 Kc6 62.Kb4 Bg4 63.Kc3 Kd6 64.Kb4 Kc6** Of course, a blitz game is too little to give a precise evaluation of Mamedyarov's idea 13...♖a5, but It may have opened a new interesting chapter in the 6...d5 variation.

49th Capablanca Elite 2014 (5.2) 12.5.14

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0 Black's trying to play without ...a6 and ...Ba7, which is the most common idea in those positions.

6.0−0 d5 Black is taking advantage of the fact that his pawn is still on d7. The main problem with the early ...d5 is the vulnerability of the e5−pawn. If this can be solved Black is usually doing fine.

[6...d6 Wehmeier, S−Campora, D/ Andorra 2001/[Motwani].]

7.exd5 Nxd5 8.a4!? A very rare, but interesting move. White's idea is to take space on the queenside with b4 and a5. If Black stops it with 8...a5 then the b5−square becomes weak and White can attack the centre by means of Bb5.

[8.Re1 is the main line and the most logical move, in my opinion.]

8...a6 An accurate move, which secures the a7−square for the dark−squared bishop and takes the b5−square under control. **9.a5** A novelty in an already very uncommon position.

[9.Re1 was still possible, but if Ivanchuk wanted to play like this he would have done it without including the moves a4 and ...a6.]

9...Nf6 The hanging position of the knight on d5 is slightly annoying and so Black moves it back to f6. **10.Nbd2** White has been preparing 11.Ng5 with

Ne4 to follow, which explains Black's next move. **10...h6 11.Qe2**
White moves the queen from the d−file in order to avoid an exchange of queens after the upcoming Ne4 Nxe4 dxe4.
11...Re8 Black protects the e5−pawn and creates an escape square on f8 for the dark−squared bishop. **12.Ne4 Bf8!**
[In case of 12...Nxe4 13.dxe4 White is slightly better thanks to the space he took on the queenside.]
13.Bb3 A clever move. White is transferring the bishop to a4 from where it puts pressure on the centre. Moreover this way he avoids an exchange of the light−squared bishops after ...Be6, which could have happened if the bishop stayed on c4. **13...Be6 14.Ba4 Nd7!** Black is protecting the e5−pawn, while preparing the advance ...f5. **15.b4** Meanwhile Vassily protects the a5−pawn and covers the c5−square. **15...f5 16.Ned2**
[16.Ng3 would have been better. Play may continue Qf6 17.Re1 Rad8 18.Rb1 Qf7 and now White may even consider 19.Bg5!? though the position remains roughly equal.]
16...g5 Black brings the bishop to g7 in order to support the centre, while the g−pawn may go to g4 pushing White's pieces back.
[The natural 16...Qf6 with ...Rad8 to follow, was good too.]
17.Bb2 Bg7 18.Nc4 White puts some pressure on the centre. **18...Bxc4**
[Once again 18...Qf6 deserved serious attention.]
19.dxc4 g4 20.Rad1? This seems to be over−optimistic. White sacrifices a piece for some initiative, but it turns out to be insufficient.
[After the simple 20.Ne1 e4 21.Rd1 Qe7 22.f4! exf3 23.Qxe7 Rxe7 24.gxf3= the chances are about equal.]
20...gxf3 21.Qxf3 White is threatening 22.Qd5+. So **21...Rf8 22.Bc1**
[Now 22.Qd5+ is met by means of Rf7 23.c5 Qe7 24.Bb3 Nf8∓]
22...Rf7
[22...Qe7 seems to be more accurate. For example, 23.Qd5+ *(* or *23.Bxc6 bxc6 24.Qxc6 Nf6∓* and with only two pawns for a piece White's compensation is insufficient. *)* 23...Rf7 24.Bxc6 Nf6! 25.Qf3 bxc6 26.Qxf5 e4 27.Qg6 h5∓ and Black is clearly better.]
23.c5 Qf6! Black doesn't mind giving back an exchange, though in fact, he had no choice.
[After 23...Kh8 24.Bb3 Black wouldn't have anything better than Qf6 but then it's better to play it right away. *(24...Re7 25.Qxf5* is fine for White. *)*]
24.Bb3 Nf8
[24...Kh7 Unpinning the rook was a reasonable alternative. 25.Bxf7 Qxf7∓]
25.g4? An unfortunate move. Now the c1−bishop will be completely out of play.
[25.Bxf7+ Qxf7]
25...f4!∓ 26.Qe4? Ivanchuk has clearly overestimated his position.
[26.Bxf7+ was necessary, but Black is already much better after Qxf7 27.Qd5 Ne6∓]
26...Ne6!−+ Now Black simply keeps an extra piece. **27.f3 Kh8 28.Rde1 Re8**
[28...Ng5! 29.Qc2 Rd7−+ with the ideas ...Rad8 and ...e4 was even better.]

29.Kh1 Rfe7
[Once again 29...Ng5−+ deserved attention.]
30.Qf5 Qh4 31.Bxe6 Rxe6 32.Bxf4 Rf6
[32...Qh3! 33.Bg3 e4! was winning instantly as 34.fxe4 is met by means of Rf6−+]
33.Bg3 Rxf5 34.Bxh4 Rf4 The ensued endgame should be won for Black too, but he still has to solve some technical problems. Nevertheless, they were solved and Black won rather easily.
35.Re4 Ref8 36.Kg2 Kg8 37.Bg3 Rxe4 38.fxe4 Rxf1 39.Kxf1 Bf6 40.h4 Kf7 41.Ke2 Ne7 42.Kf3 Ke6 43.Bf2 Ng6 44.g5 hxg5 45.h5 Ne7 46.Be3 c6 47.Kg4 Ng8 48.Bd2 Nh6+ 49.Kg3 Be7 50.Bc1 Kf6 51.Bd2 Bf8 52.Bc1 Ng8 53.Bd2 Bh6 Black's setup with an early 6....d5 is an interesting way to fight for the initiative from the very beginning. I believe its critical test should be 8.Re1, though Ivanchuk's idea of a4−a5 is not without poison too.

I thought about playing other openings, but for now I figured that for a crucial game I should stick to what I know best. However it's probably not the best idea to just play one opening all the time, and it does get boring to keep playing the Berlin, so perhaps in the future I should prepare other openings against 1.e4. At the very least it'll bring more excitement.

Zwei Partien vor Schluss dachte ich, ich hätte einen ziemlich guten Vorsprung, aber leider ging Leinier voll in die Offensive und gewann seine letzten beiden Partien mit Schwarz und Weiß. Obwohl ich später im Blitz−Tiebreak verlor, blieben wir zwei Tage länger in Berlin, damit ich an der Online−Rapid−Weltmeisterschaft teilnehmen konnte. Wegen dieser Verzögerung bei der Abreise hatten wir das Privileg, eine Versammlung von Tausenden von Menschen mitzuerleben, die durch die Friedrichstraße marschierten, um gegen die Impfpflicht zu protestieren. Es war eine riesige Menschenmenge, die wir von unseren Fenstern aus fast zwei Stunden lang beobachten konnten. Sie waren ruhig und geordnet, und ihre Kinder marschierten ruhig mit. Unabhängig davon, wo man in dieser Debatte steht, konnte ich zumindest nicht anders, als stolz auf sie zu sein, weil sie den Mut hatten, ihre Meinung zu äußern und Stellung zu beziehen. Und nun haben sie sich in jüngster Zeit auch noch offen für einen unterdrückten Nachbarn eingesetzt. Eine Unterstützung, die sie teuer zu stehen kommen könnte. Ich habe wirklich Respekt und Bewunderung für das deutsche Volk. Perunovic,Milos: 'So, Wesley: 'Weiß steht kurz davor, einen vierten Bauern zu verlieren, und gab deshalb auf. Eine schöne Partie für

mich, obwohl ich nichts Besonderes tun musste, da Leinier in den Zügen 23 und 27 Fehler beging. Nach diesem Sieg führte ich die Gruppe mit 3/4 an, während Pentala Harikrishna und Leinier jeweils 2/4 hatten. World−ch Tournament (5) 18.09.2007

[Marin,Mihail]

1.e4 e5 2.Bc4!? Anything is preferable to a Petroff. **2...Nf6 3.d3 Bc5 4.Nf3 d6 5.c3 Nc6** From the Bishop's Opening, play has transposed to the Italian game, the Giuoco Pianisimo variation. Although there are more subtleties here than the quiet character of the position might suggest, I have the feeling that it better suits Kramnik's style than Leko's, which makes me doubt whether the opening choice was really inspired. Or maybe Leko just wanted to take some sort of additional day−off after his defeat from the previous round?! **6.Bb3 a6 7.0−0 Ba7 8.Re1 0−0 9.h3 h6 10.Nbd2 Re8 11.Nf1 Be6 * 12.N3h2** We have reached one of the main tabyias of the Giuoco Pianissimo. White concentrates his forces on the kingside, in order to generate some threats against the enemy king, while Black is supposed to combine defence with counterplay in the centre. **12...Bxb3 13.axb3**

[13.Qxb3 makes less sense, because the queen would have to return to the kingside anyway.]

13...Qd7 A logical move, as one would expect from Kramnik. Black completes his development by connecting his rooks. Although play is carried out in "pianissimo mode", neither side should neglect natural development, especially from the perspective of the possible opening of the centre with either d4 or ... d5.

[13...a5 prevents the generally desirable b4, but does not contribute to development in any way. 14.Ng3 d5 This also looks premature. 15.Qf3 dxe4 16.dxe4 Re6 17.Nf5 The threat ♗xh6 forces Black into a slightly contorted regrouping. Qf8 18.Qg3 Kh8 19.Ng4 Nh7 *(19...Nxg4 20.hxg4 Qc5 21.g5 hxg5 22.Bxg5→* Gavrikov; Chebanenko *)* 20.Nge3 Rg6 21.Qh4± Gavrikov,V (2550)−Van der Sterren,P (2520)/Tallinn 1987/EXT 97 (1−0, 35). White has strong pressure on the kingside and in the centre.]
[13...Re6 14.Ng3 Qd7 15.Qf3 Kh8 Black focuses on defence, giving up the idea of opening play in the centre. This will give White the possibility to consolidate his domination. 16.Nf5 Rg8 17.b4 Bb6 18.Ng4 Nh7 *(* The opening of the h−file with *18...Nxg4 19.hxg4±* is very dangerous for Black, because of the placement of his king. *)* 19.Nge3 Bxe3 20.Bxe3± White has completed his development, has more space and an active bishop. Rf6 21.Qg4 Rg6 22.Qf3 Rf6 23.Qd1 Ne7 24.Ng3 Nc6 25.Qb3 Qe6 26.Qa4 Rg6 27.b5 axb5 28.Qxb5 Rb8 29.d4± Ye Jiangchuan (2510)−Pinter,J (2595)/Elista 1998/CBM 066 ext (1−0, 71). The greater mobility of White's pieces have allowed him to increase his advantage, by switching to the other wing. The g6−rook and the h7−knight have remained mere spectators.]
[13...Ne7 14.Ng3 Qd7 15.Ng4 This might be slightly premature. *(15.Qf3 Qe6 16.b4* transposes to our main game. *)* 15...Nxg4 16.hxg4 d5 And this is very slightly premature, too. *(16...Qe6 17.b4 d5* is a slightly improved form of the main game from Black's point of view, because he saved the move ...c6. *)* 17.Qf3 dxe4 18.dxe4 Rad8 19.g5 hxg5 20.Bxg5 Qe6 21.b4 f6 22.Be3 Svetushkin,D (2486)−Sharma,D (2327)/Linares 2000/CBM 075 (1−0, 77). White is only minimally (possibly, optically) better, because of the relative weakness of the enemy kingside. However, the symmetrical character of the position should entitle Black to hope for full equality.]

14.Qf3 Qe6 15.Ng3 Ne7

[15...Qxb3? 16.Nf5!→ *(16.Bxh6 Qxb2!?⇄)*]

16.b4

[16.Ng4?! Nxg4 17.hxg4 Qxb3]

16...c6 17.Ng4 White builds up his typical kingside attack, but Black is slightly better developed and has the possibility of reacting in the centre.

17...Nxg4

[This is probably better than 17...Nh7 Ü 75/(299) , as played in Leko−Anand, Sarajevo 1999. White maintained some pressure for a while, but later lost a pawn and had to fight for a draw. 18.Be3 Bxe3 19.Qxe3 Rad8 20.d4 *(20.f4!?* might be a better way to fight for space. *)* 20...exd4 21.Qxd4 *(21.cxd4 Qg6* Δf5, Δ♘d5 *22.Ra5 d5!?⇄* ⇔5 *)* 21...Qg6 22.Ne3 Ng5= Leko,P (2694)−Adams,M (2716)/Sarajevo 1999/CBM 071 (½−½, 61)]

18.hxg4 d5 'N'

[18...Rad8]

19.Nf5 Rad8 Black has completed the mobilisation of his forces and has at least equal chances. **20.g3 f6 21.Kg2 dxe4 22.dxe4 Nxf5 23.gxf5 Qc4**

24.Be3 White decides to complete his development, practically giving up any hope of a sacrificial attack based on ♗xh6 and tacitly offering a draw.

[It is instructive to check that White's attack has no real chances for success, mainly because his development is incomplete. However, this does not mean he could not have tried it: 24.Qg4 Kf8! *(24...Kh8?? 25.Bxh6! gxh6 26.Rh1+−)* 25.Rh1 *(25.f4* is risky, because it sets up tension which White is not prepared for: *Rd3!? 26.fxe5 Bb8!∓)* 25...Rd7 *(25...Rd3? 26.Bxh6 gxh6 27.Rxh6 Ke7 28.Rh7+ Kd8 29.Qg7+−; 25...Re7!?)* Unfortunately, White cannot activate the other rook BEFORE making this sacrifice. 26.Bxh6 gxh6 27.Rxh6 Ke7! 28.Rh7+ Kd8 29.Rd1 Ree7 30.Rxd7+ Rxd7 31.Rxd7+ Kxd7 32.Qg7+ Ke8 33.Qxb7 Qxe4+= Anyway, this would have been a more entertaining way of forcing a draw.]

24...Bxe3 Black controls the only open file, but White has no weaknesses and his king has a safer residence. Therefore, the draw agreement is entirely justified. **½−½**

FIDE World Cup (2.4) 08.09.2017
[Sethuraman,SP]

I was paired against my compatriot GM Harikrishna in the second round. Is it World Cup 2015? No 2017!! Yes strangely enough we had faced each other in the exact same second round of the 2015 edition as well, which ended in my favour. The first game was a short draw with the black pieces in the Berlin Defence and the second game was very complicated and also ended into a draw forcing the playoffs. This was the first time I had been in the playoffs in the World Cup considering that I won the first two matches in the World Cup 2015 without having the need to play the tiebreak as well as here in the first round too against Ruslan I didn't have the need to play the tiebreak. So it was completely new to me, whereas my opponent had some hiccoughs getting through the first round after having to play several tiebreak rounds. So he had the experience of facing the tiebreaks and I was new to it. On one hand it can be an advantage for my opponent but on the other hand he might be tired too after having to play tough games every day. It is very hard to say but it was an interesting fight. In the first game I had a big advantage but failed to convert it and it ended in a draw. So in the second one I got to play a fine positional game, not making a single mistake! **1.e4** Sethuraman,S So yeah the second game heated up. **1...e5 2.Nf3 Nc6 3.Bc4** The Italian is very fashionable nowdays just bypassing all the Spanish Ruy Lopez systems and of course the Berlin. **3...Bc5 4.c3 Nf6 5.d3 0−0 6.a4** There are many move orders for both sides and this is one of the orders where Black gets to play ...d5 but White makes use of his a4 to expand immediately by a5 which is not possible when he has castled.

47.Kxh4 Rxf3 48.bxa6 bxa6 49.c5 Now the game peters out to a draw by force. **49...Rf1 50.Rd6 Ra1 51.Rxc6 Rxa5 52.Kg5 Kd7** Lenderman, Aleksandr, Mon Hokmomr: 'The position is equal.' **53.Rd6+ Ke7 54.Rc6 Kd7 55.Rd6+ Ke7 56.Rc6** Lenderman, Aleksandr, Mon Hokmomr: ' Weighted Error Value: White=0.10 (very precise) / Black=0.10 (very precise) ' A very nice last round battle. Nepo really tried hard to create chances but Radjabov was really prepared well in the opening, and also was in excellent form in the event and only he could have won this game. Congratulations to Radjabov on a huge result, which possibly even giveshim some outside chances to qualify for the Candidates.

8.Nbd2 a5 9.Nf1 Be6 10.Bb5

All of this is very popular nowadays and both players actually have a lot of experience in the line. **10...Ne7 11.d4 Ba7**

[The other main direction of the line is: 11...exd4 12.cxd4 Bb6 13.Ng3 d5 14.e5 Ne4 The game resembles the Ruy Lopez. Carlsen recently won an important game against Nakamura with: 15.Bd3 Which is the right diagonal for his bishop. *(* Instead in an earlier game White chose: *15.Be3 Nf5 16.Nxf5 Bxf5 17.Nd2 Nxd2 18.Qxd2 a4 19.b4 axb3 20.axb3 c6 21.Be2 Qe7* and a draw later evidently did not suffice the world

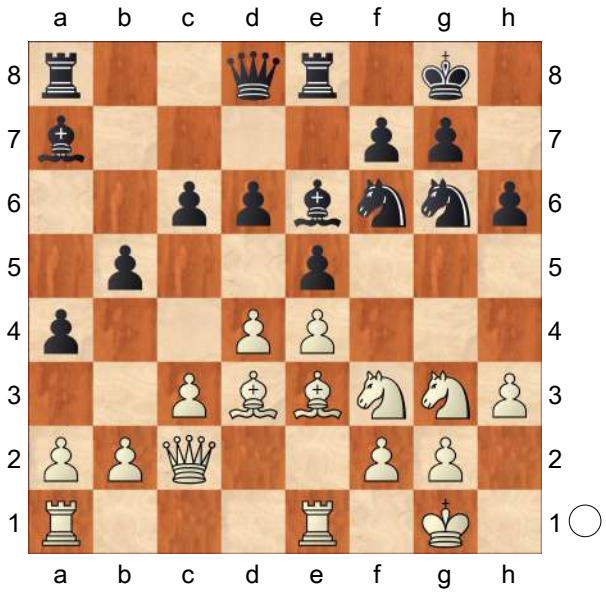
12.Ng3 Ng6 13.h3 White's centre is impressive and he has better chances.

13...c6 14.Bd3 a4 15.Be3 Re8 16.Qc2 b5

(Diagram)

17.b4N A good novelty. So wants to fix the queenside which is Black's territory and then shift to the kingside.

[The predecessor saw White gaining some advantage after: 17.c4 bxc4 18.Bxc4 Bxc4 19.Qxc4 d5 20.Qxc6



exd4 21.Bxd4 Bxd4 22.Nxd4 Ne5 23.Qc3 Rc8 24.Qd2 Nc4 25.Qb4 dxe4 26.Ndf5 Karjakin,S (2773)−Le,Q (2739) Saint Louis 2017]

17...axb3 An a serious inaccuracy in return. Carlsen wants to generate counterplay along the a−file, possibly swap the rooks there but falls short by a critical tempo.

[Defending the position after: 17...Qe7 18.Rad1 Rad8 19.Bf1 does not seem very appealing, but it was the lesser evil for Black.]

18.axb3 Qc7 19.Ra6 White is the one to use the open file. **19...Qb7**

[Since Black cannot ofer the rook swap at once: 19...Bb6 due to the nasty little detail: 20.Rxb6! Qxb6 21.dxe5 and White wins material.]

20.Rea1 The simple tripling of the major pieces is a deadly threat for Black. Therefore, he needs to step on the mined square with his bishop: **20...Bb6** And it seems as it will work as the second white rook on a1 is now en prise in case of the capture on b6.

[The in−between capture: 20...exd4 Was a try as well, when after: 21.cxd4

Bb6 22.Rxa8 Rxa8 23.Rxa8+ Qxa8 24.e5 *(*However, in this case, White can use another strong idea: *24.d5! Bxe3 25.dxe6 Bb6 26.exf7+ Kxf7 27.Nf5* with a clear edge for the first player. *)* 24...dxe5 25.dxe5 Bxe3 26.exf6 Qa1+ 27.Nf1 Bf4 Black should be able to survive.]

21.Rxa8 Rxa8 22.Rxa8+ Qxa8 23.dxe5 So wins a pawn and in the process destroys the opponent's castling. The win is within his reach. **23...Qa1+**

[Or: 23...Bxe3 24.exf6 Bg5 25.fxg7 Qa1+ 26.Bf1 Bf6 27.Nd4 with a huge advantage for White. as the dark−squared bishop is at least protecting the king in this line.]

24.Bf1 Bxe3 25.exf6 Bb6

[Perhaps Black should have switched to the line from above: 25...Bg5 26.fxg7 Bf6 27.Nd4 as the dark−squared bishop is at least protecting the king in this line.]

26.fxg7 Ne5 27.Qd2 Going for the king at once.

[Here too, the centralization: 27.Nd4! Bxd4 28.cxd4 Qxd4 29.Nh5 Qc5 30.Qd1 would have led to a win for White. Next, he will prepare the advance of the f−pawn and slowly squeeze his opponent.]

27...Nxf3+ 28.gxf3 Kxg7 29.Kg2! An important move in So's plan. White is unpinning his bishop and it will be a key piece in the attack. **29...b4!** The last chance! A second pawn is sacrificed but the queen gains access to the kingside. Carlsen clearly understands that without some help from the pieces he will be mated.

[For instance: 29...Qa7 30.Nh5+ Kh7 *(*Or: *30...Kg6 31.f4 Kxh5 32.f5* and the lonely king cannot survive. *)* 31.Bd3 with the unstoppable e4−e5+ and mate to follow is losing without any fight.]

30.Nh5+ So is consistent with his attack.

[There was an argument about the pawn capture too: 30.cxb4 Qd4 *(30...Qe5 31.f4* and White has both the extra pawn and the attack. *)* 31.Qxd4+ Bxd4 32.Bc4 Bd7 Especially if one could spot from afar the nice little tactic: 33.b5! cxb5 34.Bxb5 that undoubles the pawns and wins.]

30...Kg6 Suprisingly, this is not the best.

[The slippery computer somehow avoids the mate in the line: 30...Kh7 31.Bd3 Kg6 32.Nf4+ Kg7 33.e5 Qxc3 34.Nh5+ Kf8 35.Qxh6+ Ke7 36.Qf6+ Kd7]

31.Nf4+ Kh7 32.Nxe6 Without this bishop, the end is almost here. **32...bxc3**

[32...fxe6 33.Qxd6 is hopeless obviously.]

33.Qf4 fxe6 34.Qf7+ Kh8 35.Qf8+ Kh7 36.e5 Pffff! Just a move away from the win So slips!

[But with a couple of minutes on the clock it was impossible to calculate the following lengthy line: 36.Bd3! Qd1 *(*White's win is easier after: *36...e5 37.Bc4 d5 38.exd5 Qe1 39.Bd3+)* 37.Qxd6 c2 38.e5+ Kg7 39.Qe7+ Kg8 First White is going to clear the board from the opponent's pawns: 40.Qxe6+ Kg7 41.Qg6+ Kf8 42.Qxh6+ Kf7 43.Qf6+ Then Whit will find a pawn to insert the bishop into the attack: Kg8 *(*Or So may also promote his central pawn with: *43...Ke8 44.e6 Qxd3 45.Qf7+ Kd8 46.e7+ Kc8 47.e8Q+)* 44.Bc4+ Kh7

45.Qf7+ Kh6 46.Qf8+ Kg6 47.Bf7+ Once that the bishop is in, mate is inevitable: Kf5 48.Bg8+ Kxe5 49.Qe7+ Kf5 50.Bh7+ Kf4 51.Qf6# You have probably noticed that this main line is fifteen moves long. And there were some sublines...]

36...Qd1 The d3 square is covered, there is no more mate and Carlsen is suddenly out of the woods! **37.Qf7+ Kh8 38.Qe8+ Kh7 39.Qd7+ Kh8 40.Qc8+ Kg7 41.Qd7+ Kh8 42.Qe8+ Kg7 43.Qe7+ Kh8 44.Qxe6** Frustrated, So keeps playing for a win but now he will be the only one to risk. **44...Qd4!** The world champion is taking his chance at once.

[Had he had wanted to force a draw, he would have opted for: 44...c2 45.Qxh6+ Kg8 46.Qg6+ when perpetual is inevitable.]

45.Qe8+ Kg7 46.Qe7+ Kg8 47.Qe6+ Kg7 48.Qf6+ Kh7 49.Qe7+ Kg8 50.Qe6+ Kg7 51.Qd7+ Kf8 52.Qf5+ Ke8 53.Qc8+ And the king escapes from the checks.

[Instead: 53.Qe6+ Kd8 54.Qg8+ Kc7 55.Qg7+ Would have still forced perpetual as: Kb8 is forced. *(*The attempt to block the checks with the bishop after: *55...Kc8??* Would have lost the game: *56.Ba6+ Kd8 57.Qf8+ Kd7 58.e6+ Kxe6 59.Bc8+ Kd5 60.Qf5+ Qe5 61.Qf7+ Kd4 62.Qc4#)* 56.Qf8+]

53...Ke7 54.exd6+ Qxd6 55.Qf5 Qd4 Centralization. The super−passer on c3 coupled with the threats that Black create with his own pieces allows Carlsen a chance to squeeze So. **56.Qc2 Qg7+ 57.Kh1 Qe5 58.Bd3 Bc7 59.Kg2 Qh2+ 60.Kf1 Qxh3+** A second passer there is. **61.Ke2 Qe6+ 62.Be4 Be5 63.Qa2 Qd6 64.Qa7+ Kf6 65.Qh7 Qd2+ 66.Kf1 Bd4** More pressure. Carlsen won a ton of games with his trademark grinding. **67.Qg6+ Ke7 68.Qg3 Bf6!**

[There is no time yet for: 68...c2 69.Qc7+ Kf8 70.Qc8+ Kg7 71.Qc7+ with a draw.]

69.Qc7+ Qd7 70.Qf4!

[Correctly avoiding the pure opposite−coloured bishop endgame: 70.Qxd7+ Kxd7 when Black has realistic winning chances thanks to his distant passers.]

70...h5 Although the machines indicate that the position is still equal, it is evident for a human that the only one who can play on is Black. White cannot hope for anything other than a perpetual check. **71.Qe3 Qd4 72.Qf4 Qd6 73.Qe3 c5** A bit more progress. It should have been extremely painful for So to suffer like this after the won position he knew he had before. **74.Bg6+ Kd8 75.Qe8+ Kc7 76.Be4 h4 77.Kg2 Qd7 78.Qh5**

[The computer suggests that: 78.Qa8 Kb6 79.f4 was best, with equality.]

78...Kb6 79.f4 Qe6 80.Qg6

[Here most accurate was: 80.Qh7! Not letting the black king in: Ka5 81.Qa7+]

80...Ka5! Now White's position gets close to critical. **81.Bf5 Qd6**

[Missing the strong: 81...Qa6! 82.Qe8 Kb4 Next the king will come to b2 and even though there is no mathematical win yet, the practical chances that the world champion has, coupled with his exceptional technique would have spelt trouble for So.]

82.Qe8 Kb6 83.Be4 Kc7 84.Qa8 Qxf4 85.Qc6+ Kd8 86.Qd5+ Ke8 87.Bg6+ Ke7 88.Qxc5+ Maybe it was So who felt that the ending will be a good one?

[An instant draw was: 88.Qb7+ Kd8 89.Qb6+ Kd7 90.Qb7+]

88...Qd6 89.Qe3+ Kf8?? And there it is! The decisive blunder.

[Any other reasonable move would have led to a draw: 89...Kd7]

[Or: 89...Qe5]

[Or: 89...Be5]

90.Qe8+ Kg7 91.Qf7+ Kh6 92.Qh7+ Kg5 93.Qh5+ Mate is inevitable and chess justice prevailed.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 h6 More about 6... h6 can be found in my annotations to Giri's game, which is mentioned below.
7.a4 White is preparing to trap the dark−squared bishop by means of 8.b4 and 9. a5. Moreover, now White doesn't have to worry about the ...Na5 idea, which occurred in Giri's game, any more.
[7.Re1 is also part of this update. See Giri,A (2755)−Mamedyarov,S (2761) Moscow RUS 2016]
7...a6 We've reached an important junction. White has at least five equally popular lines.
[The main alternative is 7...a5 , which was recently employed by the world champion in a blitz game. 8.Na3 Bxa3 *(* Usually Whites castles. *8...0−0)* 9.Rxa3 0−0 10.Re1 Re8 11.h3 Be6 12.Bb5! 8.h3 A useful move, which covers the g4−square. It's curious that it has previously only been seen in one grandmaster game.
[White also tested 8.Nbd2]
[8.Re1]
[8.Na3]
[and finally 8.b4 , though the latter has never been seen at the high level.]
8...0−0 Now the players transposed into a slightly more popular position.
[In case of 8...g5 with the idea to take advantage of the early h3, White can either answer with the prophylactic 9.Nh2 *(* or the computer's *9.b4 Ba7 10.Be3 g4 11.hxg4 Bxg4 12.Bxa7 Rxa7 13.Nbd2 Rg8 14.g3* though the latter looks a little scary. *)*]
9.Re1 The most common move order.
[White can also transpose into 8.Nbd2 by means of 9.Nbd2]
9...Re8 Black has been preparing an exchange of the light−squared bishops. However, I'm not sure the move is necessary.
[Black can play the immediate 9...Be6 , which was employed by the fifteenth world champion. Giri,A (2798)−Anand, V (2784) Zurich SUI 2016 [Mikhalevski,V]. It reached the text by transposition.]
10.Nbd2 The players have just transposed into a recent game of Karjakin's, which I analysed for you in the previous update. See the reference below. **10...Be6** This line scores pretty

badly, though this may have nothing to do with its objective assessment.

11.Bxe6 Rxe6 12.b4 Ba7 13.Qc2 d5 Black falls into the same positional trap Navara fell into last month.

[13...Ne7 14.Nf1 Ng6 15.Ng3 d5 16.c4 c6 17.a5 *(17.Bd2!?)* 17...Qd7 18.c5 Rae8 19.Nf5 Bb8 and soon Black equalised in Hracek,Z (2591)−Kryvoruchko,Y (2693) Baku AZE 2016]

14.Nb3! Now the c5−square is vulnerable. **14...Ne7** Probably Shakhriyar prepared this new move for the game, but missed the interested pawn sacrificed employed by the Russian player.

[14...b5 led to a quick loss in Karjakin, S (2769) −Navara,D (2742) Baku AZE 2016 [Mikhalevski,V]]

15.exd5 Qxd5

[15...Nfxd5 16.Rxe5 Rc6! 17.Na5! Rxc3 18.Qd2 b6 19.Bb2 bxa5 20.Bxc3 axb4 21.Bb2!± and Black's compensation for the exchange seems to be insufficient.]

[Probably 15...Nexd5 is the best recapture, which may justify Black's novelty. 16.Rxe5 Rc6! 17.Na5 *(17.Nc5!? Bxc5 18.bxc5 Rxc5 19.Bb2±* might be more challenging. *)* 17...Rxc3 18.Qd2 Qd6! This idea doesn't work with the knight on e7 (15...Nfxd5). 19.Bb2 Qxb4 20.Bxc3 Nxc3 21.Nc4 c6 Though even here Black still has to prove that he has enough compensation.]

16.c4 Qd6 17.Nc5!? A very interesting resource. Ian sacrifices a pawn for the initiative.

[After 17.Bb2 Ng6 18.d4 exd4 19.Rxe6 Qxe6 20.Nfxd4 Qe4 21.Qxe4 Nxe4 22.Re1 Bxd4 23.Nxd4 Re8 24.Nf5 Nd6 25.Rxe8+ Nxe8 26.Kf1 Black is slightly worse, but his position might be holdable.]

17...Bxc5 18.bxc5 Qxc5 19.Ba3 Qa5 20.d4! Ng6! The only move.

[20...e4? is bad because of 21.d5±]

21.Bb2! White puts more pressure on the e5−pawn, trying to provoke its advance. **21...Rae8**

[Black could have tried 21...e4 22.d5 Ree8 23.Nd2! Qc5! Preparing 24...e3. *(23...e3 24.fxe3 Nd7 25.Rab1 Rab8 26.Bd4±* is better for White. *)* 24.Qb3! *(24.Bxf6* an be answered by the intermediate *e3! 25.Nf1 exf2+ 26.Qxf2 Qxf2+ 27.Kxf2 gxf6 28.Rxe8+ Rxe8 29.Rb1 Rb8 30.a5* and though White retains some pressure it's unclear if it yields anything substantial. *)* 24...Qd6 25.Re3!± with a strong initiative.]

22.Bc3! The queen is forced to a passive position on a7. **22...Qb6**

23.Rab1

[23.a5! Qa7 24.dxe5 Nd7 25.Rad1± leads to the game with the a−pawn on a5 instead of a4, which should favour White.]

23...Qa7 24.dxe5 Nd7 25.Rbd1± Ndf8?! This looks slightly inaccurate.

[25...Ngf8!? deserved attention, though Black is still under pressure.]

26.h4!± White is pushing all the black pieces to passive positions. **26...Qc5** Mamedyarov is trying to bring the queen back into play.

[26...Rc6 27.h5 Ne7 28.Qd3 Ne6 29.Nd4 Nxd4 30.Bxd4 Qa8 31.e6!± is not much fun either.]

27.h5 Ne7 28.Re4! Black can hardly move, while White has a number of

strong ideas, which include 29.Nd4 and 29.Rg4. **28...Rc6**

[Black could try to complicate matters by means of 28...b5!? though after the precise 29.Rb1! *(29.Nd4 b4 30.Bd2 f5 31.Nxe6 Nxe6* leaves some practical chances, though White is clearly better anyway. *)* 29...bxc4 30.Bb4! Qd5 31.Rxc4 Rc6 32.Bc5! Nf5 33.Rd1 Qe6 34.Qd3!± and Black is almost in zugzwang.]

29.Nd4!?

[29.Rg4!± with the idea of Nd2−e4−f6 looks even stronger, but Ian chooses a simpler approach.]

Black has nothing better than **29...Qxc4**

[29...Rb6? 30.a5+− loses an exchange under even worse circumstances.]

30.Nxc6 Qxc6 31.Qd3! The rest of the game is a rather technical matter, though some accuracy is still required.

31...b5 32.axb5 axb5 33.Bb4!? White prepares 34. Rb1.

[33.Rb1!? Nd5 34.Bd2+− as also strong.]

33...Qb7! The best defence, where Black prepares to protect the b5−pawn by means of ...c6. **34.Bxe7**

Nepo prefers to simplify the position.

[34.e6! was stronger, as it forces Black to capture with a pawn.

A) 34...Nxe6? loses to 35.Qd7 Qc8 36.Rxe6! *(36.Bxe7 Qxd7 37.Rxd7 Nc5 38.Red4 Nxd7 39.Rxd7*+− also wins. *)* 36...fxe6 37.Bxe7+−;

B) 34...fxe6 35.Qd4! Nc6 36.Qc5 Nxb4 37.Rxb4 c6 38.Rbd4±]

34...Rxe7 35.Rd4! The rook is coming to the back rank. **35...Rxe5 36.Rd8 Qc6 37.Qd7!?** Once again a very practical decision.

[After 37.Rb8 Re8 38.Qxb5 Qxb5 39.Rxb5 Rc8± White would have to solve some technical problems.]

37...Qc5? A losing move.

[After 37...Qc3! 38.Qg4 Re1+ 39.Kh2 Rxd1 40.Qxd1 Qc5± Black retains some practical chances.]

38.Qc8! Now there is no defence against 39.Rxf8. **38...Rxh5** Black hopes to build a fortress, but his dreams are not going to come true. **39.Rxf8+ Qxf8 40.Rd8 Qxd8 41.Qxd8+ Kh7 42.Qd7!?** White takes away the f5−square and thus prevents the rook from getting to f6.

[42.Qxc7 Rf5 43.g4 Rf6 44.Kf1+− should also win without big problems, but at least Black has a stable position for his rook.]

42...f6

[42...Rc5!? was worth a try. 43.Qxf7 c6 with the idea to place the rook on c4, but White wins on the kingside. 44.g3+−]

43.Qxc7 b4 44.Qc2+ Kh8 45.Qc4 Re5 46.g3 Kh7 47.Kg2 b3 48.Qxb3 Kh8 49.Kh3 Rh5+ 50.Kg4 Rg5+ 51.Kh4 Re5 52.f4 Ra5 53.Qc3 Rd5 54.Qb4! Black is in zugzwang and has to allow the Kh5−g6 idea. So he resigned. A great win for the Russian player, who has been in fantastic form recently. Black experiences some problems in the line which occurred in the game, and so I would like to suggest the immediate 9... Be6, as played by Anand.

[21...Bxd5?? loses to 22.Ne7+]

22.Ne7+ A risky, but interesting idea. White is going to keep his knight on e7, supported by two rooks, in order to cover the c8−square and close the e−file. At the same time White restricts Black's bishop, which was probably the main reason why White preferred 22.Ne7 over

■ **So,Wesley 2782**
Olympiad−42 Baku (8.3) 10.09.2016
[GM Davorin Kuljasevic/So,Wesley]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 In the following game, Wesley So used a rare, but quite effective plan of counterattack against White's e4−d4 pawn centre. **5...0−0 6.a4 d6 7.c3 a6 8.h3** I think in general White does not want to commit his kingside pawns right away, but he cannot play Re1 without fear of Ng4.

[8.Re1 might allow Ng4 *(8...Ba7)* 9.Re2 when my analysis runs *(9.d4? exd4 10.cxd4 Nxd4! 11.Nxd4 Qh4−+)* 9...Kh8 10.d4 Ba7 11.h3 Nf6 12.Re1 exd4 *(12...h6 13.Bb3)* 13.cxd4 d5 *(13...Nxe4 14.Rxe4 d5 15.Rh4 dxc4 16.Qc2 f5 17.Bg5 Qe8 18.Nc3 Qg6 19.Ne2±* gives White too strong an initiative for the pawn. *)* 14.exd5 Nxd5 15.Bxd5 Qxd5 16.Nc3 Qd8 *(16...Qd6 17.d5 Nb4 18.Re4 Bf5 19.Bf4 Qc5 20.Re2±)* 17.d5 Nb4 18.Bf4 with a position that should be close to equality.]

[8.Nbd2 Ba7]

8...Ba7 9.Re1 Ne7 The most typical

plan in this kind of pawn structure. Black puts his knight on g6 and prepares the c6−d5 break in the centre.

[I was also considering 9...Re8 10.Nbd2 Be6 but I wasn't very sure.... The point is that White really doesn't mind the exchange of light−squared bishops and with the appearance of a knight on c4 it is not clear if the time spent by Black is worth it.]

[9...Be6 Even here the exchange of the light−squared bishops on e6 will lead to the opening of the f−file (so in my next round against Aryan Tari, I went for 10.Nbd2). Bxc4 11.Nxc4 b5 12.Ne3± in this position White remains with a slight advantage.]

10.d4

[10.Bg5 Ng6 11.Nh4 Kh8 12.Nxg6+ fxg6 is excellent for Black.]

10...Ng6 I just continue manoeuvring my pieces.

[I was also looking at 10...exd4 11.cxd4 d5 12.exd5 h6 *(12...Nexd5 13.Bg5 h6 14.Bh4* gives an annoying pin on the diagonal− *g5 15.Nxg5! hxg5 16.Bxg5+−)* 13.Nc3 Nexd5 14.Nxd5 Nxd5 15.Qb3 c6 16.Bd2± but apparently Black does not completely equalize here. White has a lead in development and pressure in the open files to compensate for his isolated d−pawn.]

11.Bd3

[11.Nbd2 transposes to the Kramnik game−see 10.Nbd2.]

11...c6

[11...Nh5 right away is possible too.]

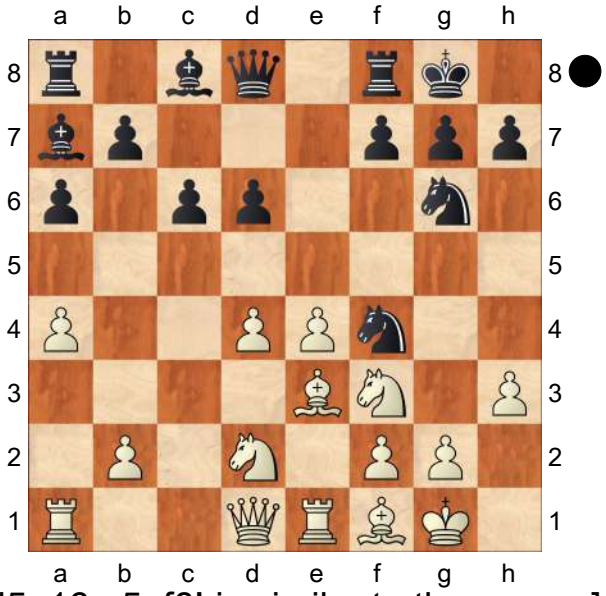
[However if Black does not like all these Nh5−f4 knight moves then 11...Re8 12.Qc2 Be6 is a good option. Black is simply preparing the ... d5 break, and if this operation is successful he equalizes completely. *(12...h6 13.Be3 d5 14.Nbd2 exd4 15.Bxd4 Bxd4 16.Nxd4 Nf4=)*]

12.Be3 Nh5!? This is Wesley's new idea compared to the games that we have seen so far. He plans to put the knight on f4 and then clear the centre with a series of pawn breaks. **13.Nbd2**

[13.Bf1 might be a possible improvement. exd4 14.cxd4 d5 15.exd5 cxd5 16.Nc3]

13...Nhf4 14.Bf1 exd4 15.Bxd4

[15.cxd4



d5 16.e5 f6! is similar to the game.]

[15.Nxd4 d5=]

15...Bxd4 16.cxd4

[16.Nxd4 Ne5 17.Re3 Qf6 leads to a balanced position, as my knights have good outposts in the centre.]

16...d5 17.e5 f6!= This is the final point of the central operation. The strong white central pawn duo will be reduced to only a pawn after the exchange. It is important to keep in mind that this operation is available to Black only if his knight is not on f6. This is why Nf6−h5−

f4 the manoeuvre was crucial for its success. **18.Ra3**
[18.a5 fxe5 19.dxe5 Qe7∞]
18...fxe5 19.dxe5 GM Ian Nepomniatchi is always interesting and keeps surprising me by making unexpected and quick decisions. For example here, I was almost sure that he would recapture with the knight and then try to make use of the open e−file.
[19.Nxe5 Nxe5 20.Rxe5 Ng6 21.Re1 Qf6 22.Nf3 Bf5=]

[20...Ne6]
21.Rb3 Bf5 I have plenty of options here and perhaps what I chose is not the most accurate. But playing Black in a team event means that you have to guarantee your safety first and I chose to finish my development.
[Both 21...Rf7]
[and 21...Ne6 22.g3 Qf7 give Black good play. The undeveloped bishop on c8 gives me a moment of concern though.]
22.Nd4 Ne6
[22...Nh4!? Stockfish's suggestion.]
23.Nxf5? This is where the battle starts to turn in my favour.
[White maintains equality by 23.Nxe6 Bxe6 24.g3 Rf7 25.f4 Raf8= when White has a strong pawn chain although he always has to be wary of a piece sacrifice on f4.]
23...Rxf5 24.Bd3 Rf4 There is no point in taking the pawn on e5 yet. **25.Bxg6 hxg6 26.Qd1**
[A more stubborn line is 26.Rg3 Raf8 27.Nf3 Rxa4 28.Rxg6∓]
26...Raf8 27.Rf3 Qb4∓ Black has a dream position. Blockading knight on e6, full control of the f−file, and on top of that I am threatening to pick up his queenside pawns. **28.Rxf4 Rxf4 29.Nf3**
[29.Qc2 Qc5 30.Qxc5 Nxc5 31.b3 Kf7∓ and Black starts picking up loose pawns.]
29...Qxa4
[29...Qxb2 might be even stronger, but I prefer to take his a−pawn as it is well−known that a knight has the most trouble when defending against a passed rook pawn. And besides, I keep the b−file closed.]

(ol) 130/113 2016

[Sokolov,Ivan]

So,Wesley: 'I think this year's Olympiad was significantly harder than those of other years. First of all, it seemed like everyone was intense, strong, focused and competitive. Secondly, it was the first time that a team had to win 10 out of 11 matches in order to gain first place (normally 9.5/11 suffices). So even though everyone was saying we had a strong team, nothing was ever easy or guaranteed. Every single step was dangerous. Then finally, when we should have been able to relax knowing we'd nailed it, there was a strangely complex tiebreak that kept everyone holding their breath. This game was played in the 8th round. Our team was leading 6.5/7 and Russia was only half a point behind (they lost their match against Ukraine). I don't need to tell you how crucial this match was in the fight for an Olympic gold medal. ' **1.e4** So,Wesley So, Wesley: 'Sokolov,Ivan Sokolov,Ivan Sokolov,Ivan: 'GM Boris Avrukh'' Mikhalevski,V So,Wesley So,Wesley So, Wesley: 'Sokolov,Ivan Sokolov,Ivan Sokolov,Ivan: 'GM Boris Avrukh'' **1...e5 2.Nf3 Nc6** So,Wesley: 'Ian is purely a 1. e4 player with an aggressive and imaginative style. Before this game he was very much on fire with 7 out of 7 and it wasn't a surprise that the Russians gave him the white pieces for this match. Usually he goes 3.d4 for a Scotch Game. ' **3.Bc4** So,Wesley: 'The Giuoco Piano is an evergreen opening and it is one of the oldest in chess, having roots all the way back to the 17th century. It has become popular once again as a way to get a game.' **3...Bc5 4.0−0 Nf6 5.d3 0−0**

[I think he must have been inspired by a game played by GM Karjakin in the previous round: 5...d6 So,Wesley 6.c3 a6 7.a4 h6 8.Nbd2 0−0 9.h3 Re8 10.Re1 Be6 11.Bxe6 Rxe6 12.b4 Ba7 13.Qc2 d5 14.Nb3 b5 15.Be3 Bxe3 16.Rxe3 Rd6 17.Nc5± Qc8 18.Ree1 Nh5? 19.exd5 Rxd5 20.Qa2+− Karjakin,S−Navara,D Baku 2016, and White won super quickly.]

6.a4 So,Wesley: 'Sokolov,Ivan: 'GM Boris Avrukh: '!?' GM Boris Avrukh: 'The latest trend in this popular line. White

gains space on the queenside and triesto delay the move c2−c3 , as it allows the immediate 6...d5 (see Anand−So 2016 in this survey). In general, he would play c2−c3 only after d7−d6.'" So, Wesley: 'A relatively new move, reintroduced this year by GM Grischuk. White makes sure that d3 is firmly defended in case of a breakthrough in the center with ...d5.'

[A month earlier Vishy Anand played 6.c3 So,Wesley d5 7.exd5 Nxd5 8.a4 *(8.Re1 Bg4 9.h3 Bh5)* 8...Nb6 but had to agree to a draw later on.]

[6.Nbd2 So,Wesley d6 7.c3 a6 8.Bb3 is the old main line. But unable to get much with it, White players found this plan of a2−a4. The idea is to be able to develop the knight on a3 in some cases, and to gain space on the queenside.]

7.c3 So,Wesley: 'Sokolov,Ivan: 'GM Boris Avrukh: 'This move is always an important plan of White's strategy. Most probably, his next moves will be Re1, Nbd2−f1−g3 followed by d3−d4. Before going Re1, however, it is important to take the g4−square from the knight.'" So, Wesley: 'I think in general White does not want to commit his kingside pawns right away, but he cannot play ♖e1 without fear of ♘g4.'

[Another important line here is 8.Nbd2 So,Wesley GM Boris Avrukh Ba7]

8...Ba7 Mikhalevski,V: 'This line was played earlier this year by Wesley's team mate, Nakamura. Black moves the bishop away from a possible attack from the d−pawn.'

[Black also played 8...h6 Mikhalevski, V]

[and 8...Be6 Mikhalevski,V]

9.Re1 Mikhalevski,V: 'The same position occurred by transposition in the recent blitz game Caruana−So.'

[9.Nbd2 (So,Wesley) (Sokolov,Ivan) (GM Boris Avrukh) see 8. Nbd2 Ne7 (GM Boris Avrukh) This is a very thematic idea for this type of positions. The reader shoud know that the c6−knight is Black's worst piece in the position since the c7−pawn couldn't participate in the fight for the centre. That is why Black is going for the manouevre Nc6−e7−g6. Later on, Black has to decent plans: 1) fight for the centre by means of c7−c6 followed by d6−d5 2) develop a kingside initiative by playing Nh5 and Qf6.]

9...Ne7 So,Wesley: 'Sokolov,Ivan: 'GM Boris Avrukh: 'Again the same thematic idea.'" So,Wesley: 'The most typical plan in this kind of pawn structure. Black puts his knight on g6 and prepares the c6−d5 break in the center.'

[I was also considering 9...Re8 So,Wesley 10.Nbd2 Be6 but I wasn't very sure.... The point is that White really doesn't mind the exchange of light−squared bishops and with the appearance of a knight on c4 it is not clear if the time spent by Black is worth it.]

[Mikhalevski,V: 'Wesley himself faced' 9...Be6 So,Wesley So,Wesley Mikhalevski,V: 'on the next day.' So,Wesley: 'I think this year's Olympiad was significantly harder than those of other years. First of all, it seemed like everyone was intense, strong, focused and competitive. Secondly, it was the first time that a team had to win 10 out of 11 matches in order to gain first place (normally 9.5/11 suffices). So even though everyone was saying we had a strong team, nothing was ever easy or guaranteed. Every single step was dangerous. Then finally, when we should have been able to relax knowing we'd nailed it, there was a strangely complex tiebreak that kept everyone holding their breath. This game was played in the 8th round. Our team was leading 6.5/7 and Russia was only half a point behind (they lost their match against Ukraine). I don't need to tell you how crucial this match was in the fight for an Olympic gold medal. Harikrishna,P (2733)−Inarkiev,E (2693) Germany 2018]

[Another interesting way to deal with White's threat is 10...Bg5

A) It's important to mention that 11.Nxe5? runs into Nxe5 12.Bxe5 *(12.Qxh5?* loses the queen. *Bg4)* 12...Bxd2+ 13.Kxd2 Qg5+! The key. Black save his knight and wins the bishop on e5. 14.f4 Qxg2+ 15.Kc1 dxe5−+;

11.hxg3 Nb8 The last word of theory, first introduced by Kramnik in 2017. Since the knight is restricted on c6 Black brings it to a better position.

12.Ba2 Only this retreat is new. White has been preparing the d3−d4 advance and moves his bishop away from a possible ...d6−d5 break.

[Earlier Topalov played 12.0−0 Nd7 13.Re1 c6 *(13...a5!?)* 14.d4 Qc7 15.Bb3 Topalov,V (2740)−Dominguez Perez,L (2739) Saint Louis 2019, and now after Nf6 16.Nc4 Be6 17.dxe5 Bxc4 18.Bxc4 *(18.exf6 Bxb3 19.Qxb3 Bxf6)* 18...dxe5 Black is doing fine.]

14...Qc7 15.g4 White wants to open up the h−file by means of g5. **15...c5!** A very logical approach. Black follows the golden rule of chess to answer an attack on the flank with a counter attack in the centre. **16.g5! hxg5?** Instead of opening the h−file Black had to continue playing in the centre.

[16...cxd4! was necessary. 17.gxh6 *(17.g6 dxc3 18.Bxf7+ Kh8 19.0−0! Qc6! 20.Bd5 Qc5 21.Nb3 Qc7 22.Bf7 Qc6* with a balanced

[19.Rh6 Kg7 20.Rdh1 cxd4 transposes to the game.]

19...cxd4 20.Rh6 Kg7 21.Nb1? A serious mistake, which changes the assessment of the position from winning for White to equal.

[21.Kb1! was correct.

21...Nc5! 22.Nxd4! A clever tactical shot. White tries to bring the queen into the attack on the b1−h7 diagonal.

22...Bd7? Black returns the favour.

[22...Qe7! was the best defence.

25...Be6! 26.Bxe6?!

[26.Nxb7! was better objectively. Nd3+! *(26...Nxb7? 27.Bxe6 fxe6 28.Rxb7* is bad for Black. *)* 27.Kd2

A) 27...Qb6!? is also interesting. 28.Bxe6 Qxf2+! 29.Kd1! *(29.Kxd3??* loses to *Rad8+−+)* 29...Qe3! Black creates a threat of 30...Nf2. 30.Rxf7! Rxf7 31.Rf1! Rb8! 32.Qd2 Qxe4 33.Rxf6 *(33.Bxf7+ Kg7)* 33...Rbxb7 34.Rxf7 Rxf7 35.b4 Nf4 36.Bxf7+ Kxf7 37.Qd7+ is also equal.;

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.Bg5 Quite surprisingly, we have never considered this line on our site.
[However, we did consider the following six continuations: 5.0−0 Nakamura,H (2761)−Grischuk,A (2772) Moscow RUS 2019[Mikhalevski,V]]

[5.Bb3 Burnett, R−Naylor,J Coulsdon 1999 [Paul Motwani]]
5...Be7 This is already a pretty rare continuation in the current position, although the idea of unpinning the knight this way is rather common in similar positions.
[5...h6 6.Bh4 Be7 is more common. In fact, Vidit has already played like this and lost the game, so this time he decided to try to avoid including the moves ...h6 and Bh4. *(6...d6!?)*]
6.a4 0−0
[6...h6 7.Bh4 transposes to 5...h6.]
7.Nc3 d6 8.h3!? White prevents a pin which is possible after 8.0−0.
[In the only preceding game at the GM level White played 8.0−0 Kh8 *(8...Bg4!? 9.h3 Bxf3 10.Qxf3 Nd4 11.Qd1 c6* deserved attention. *)* 9.h3 Be6 10.Re1 a6 11.Rb1 h6 12.Bxf6 *(12.Be3!?±)* 12...Bxf6 13.Nd5 Rb8 14.b4 Bxd5 15.exd5 Ne7 16.d4 Ng6 17.dxe5 Nxe5 18.Nxe5 Bxe5 and Black equalised, Kogan,A (2569)−Roiz,M (2680) Helsingor 2008]
8...Be6 9.Bxf6 Bxf6 10.Bxe6 fxe6 11.0−0 A typical position, in which Black doesn't seem to have many problems.
11...d5 A possible, but unnecessary move.
[11...a6!? is a useful move, which has the point of covering the b5−square in case Black decides to bring the queen to the kingside via e8. 12.Nb1 *(12.Ne2 Ne7 13.c3 Ng6=)* 12...Bg5! 13.c3 Qf6 14.Nbd2 Rf7 *(14...Bxd2!? 15.Qxd2 h6)* 15.Nc4 Raf8 16.b4 Ne7 and Black is fine.]

12.Qe2 Qd7 13.Nb1 White transfers the knight to d2. **13...a5** Meanwhile, Black doesn't allow White to take space on the queenside with 14.a5. **14.Nbd2 Rad8 15.Nb1** I'm not sure if a repetition took place. I have a feeling that g3 was played on move 15. **15...Ra8 16.Nbd2 Rad8 17.g3**

[17.c3!? covering both d4 and b4 squares deserved attention.]

17...Be7 Vidit transfers the bishop to a more active position, as it was rather passive on f6. **18.Kg2**

[Greedy 18.exd5? exd5 19.Nxe5 Nxe5 20.Qxe5 runs into Bf6∓ 21.Qh5 Bxb2 22.Rab1 Bc3−+]

18...Bd6= Here the bishop is better as the f−file is open for the black rooks, while the bishop has more work to do on the a3−f8 diagonal. The position is equal. **19.h4** White is trying to demonstrate some activity. **19...Qe8**

[19...Rf7! looks more to the point, when Black simply doubles his rooks on the f−file. 20.Ng5 Rf6 21.c3 Rdf8 22.Rae1 h6 23.Nh3 Qf7= and Black doesn't have a single problem.]

20.c3 h6 21.Rh1 White removes the rook from the protection of the f2−pawn and so Black has a chance to put pressure on f2.

[21.Nb3 with the idea to prepare d4 makes sense.]

21...Qh5

[After 21...Rd7!? 22.Rae1 Rdf7 White would have to retreat the rook to f1. 23.Rhf1 Qd7=]

22.Rae1 Bc5?! It was unnecessary to weaken the e5−pawn, as the pressure on f2 isn't real.

[A waiting move, such as 22...Rb8 would be better.]

23.Rhf1 White creates a threat of 24. exd5. **23...Qg6 24.Nh2!?** An interesting idea. White is planning to play 25.h5 and then bring his knights to g4 and f3 in order to put pressure on e5.

[Obviously, White didn't want to simplify matters by means of 24.exd5 exd5 25.h5 Qxh5 26.Nxe5 Qxe5 27.Qxe5 Nxe5 28.Rxe5 c6=]

24...Rf6? A surprising mistake. It's clear that Black has lost the thread.

[It was necessary to wait with 24...Bb6 For example, 25.Ng4 *(25.h5 Qg5 26.exd5 exd5 27.Nhf3 Qxh5 28.Nxe5 Qxe2 29.Rxe2 Nxe5 30.Rxe5 Rde8=;* or *25.Ndf3 Bc5)* 25...Rf7 26.h5 Qg5 27.f3 Qxh5 28.exd5 exd5 29.f4 Qg6 30.Nxe5 Nxe5 31.fxe5 Rxf1 32.Rxf1 d4=]

[24...Kh8 25.h5 Qf7 26.exd5 exd5 27.Nhf3]

25.h5 Now all White's pieces come into play with gain of tempo, while the rook on f6 prevents the queen from going to f7, as then the rook will be trapped.

25...Qh7

[25...Qe8 26.exd5 exd5 27.d4!+− is also bad for Black.]

26.Ng4 Rf7 27.Nf3 Bd6 28.Nh4!± The g6−square is also weak. **28...Ne7**

29.Qd1! White creates a threat of 30. exd5, while Black's position is very passive and no counterplay can be created. **29...d4** This move is equal to resignation, but good advice was already costly for Black.

[29...dxe4 30.dxe4 Rff8 31.Qb3+− is also hopeless.]

30.Qb3+− A very sad position for Black who is unable to protect his weaknesses. **30...dxc3 31.bxc3 Kh8 32.Qxe6 Qg8**

33.Qc4 Qe8 34.Rh1 Rf8 35.Qe6 Qc6? A mistake in a bad position.
[35...Kh7 would be the very last attempt to stay in the game.]
36.Ng6+ Nxg6 37.hxg6 Bc5 38.Rxh6+
[38.Rxh6+ gxh6 39.Qxe5+ Kg8 40.Nxh6# 5...Be7 is a reasonable way to meet the 5.Bg5 line, but a dull position after the opening is not to everyone's taste.]

26...Bd3 runs into **27.Rd2+−** and White wins a piece. **27...Bc4 28.Nf5**

doesn't give Black much hopes of survival either. Based on a miscalculation. **28...Rxa2!?** with the idea of ♗h6−f4 would have been more stubborn. Duda goes for the forcing sequence, but technically it would have been better to play **29.Rdxa2!?** , with the idea of executing the plan mentioned on the previous move. **29...Rxa2 30.Rxa2** is very bad for Black as well. White's plan consists of improving his position with moves like B♗f3, g3 and shift the attention to the queenside by b4, ♔b2−b3, followed by a timely break based on either a4 or c4. There is nothing wrong with Duda's move, but White has a stronger option available. By playing **30...Bxa2!** White takes away the f4−square from the black queen and so after **31.f4** White has the shot **31...Kf8! 32.Kf2 Bb1! 33.Ne3 Be4+−** is winning for White, as **34.g3 Ke7 35.Ke2 Kd6 36.Kd2 c5 37.Kc3 h5** is quite hopeless, because of Black's horrible bishop and the fractured pawn formation. **38.h4? 11...Be6 12.Bxe6 Rxe6 13.b4!
White takes some space on the queenside. **13...d5!**
Black counterattacks in the centre. Everything is pretty logical. **14.Ng3**

[14.Qc2! , as in Giri,A−Caruana,F Leuven 2016, saving the queen from a trade would promise more chances for an advantage.]

14...dxe4! 15.dxe4 Qxd1 16.Rxd1 Rd6! An important move. Black is ready to create a backward pawn on d6 as he wouldn't have problems advancing it to d5 later. **17.Ba3**

[After 17.Rxd6 play could develop the following way. cxd6 18.Ba3 d5 19.exd5 Nxd5 20.b5 Na5 21.Nxe5 axb5 22.axb5 Nb3 23.Rb1 Bxf2+ 24.Kxf2 Rxa3=]

18.Re1 White wants to keep more pieces on the board. This looks a little weird, although it doesn't really change the assessment of the position. **18...Re8**

[18...Rd3 doesn't do much, as after 19.Bb2 Ne8 20.Kf1= with 21.Ke2 to follow Black would have to think of the safety of his rook.]

19.c4! Rd3!

[Certainly not 19...bxc4? 20.b5±]

20.axb5 axb5 21.c5!? It may seem that White achieved something by restricting Black's dark−squared bishop, but the weakness of the b4−pawn yields Black enough counterplay.

[21.cxb5 Nd4 22.Bb2 Bb6! 23.Bxd4 exd4= is fine for Black despite the small material deficit, as White's b−pawns are doubled and Black has a passed pawn on the d−file.]

21...Ra8! The threat of 22...Bxc5 explains White's next move. **22.Bb2!?** White sacrifices a pawn in order to take advantage of the pin on the a−file.

[22.Rec1 leads to a repetition after Rb3 23.Nd2 Rd3 24.Nf3]

22...Nxb4 23.Rec1! White has to cover the c2−square. Now he is ready to win the e5−pawn back. **23...Rb3! 24.Bxe5 Nd3 25.Rd1 Nxe5 26.Nxe5 Rxg3!** An important tactical resource, which was foreseen by Tomashevsky a few moves ago. The following exchanges lead to complete equality. So, after the moves **27.fxg3 Bxc5+ 28.Kh2 Rxa1 29.Rxa1 Nxe4 30.Rb1**

[The game could have finished by a nice perpetual. 30.Nc6!? Bd6 31.Rb1 Bxg3+ 32.Kh1 Bf2 33.Rxb5 Ng3+ 34.Kh2 Nf1+]

30...b4

[30...Nd6 31.Nc6 Kf8 32.Re1! is also equal.]

[30...b4 and a draw was agreed in view of 31.Nd3 Bd6 32.Nxb4 f5= A well played, virtually mistake−free game. Black proved that the endgame which ensued after 14.Ng3 is equal and so White should have preferred 14.Qc2.]

[GM Davorin Kuljasevic/Szabo,Kr]

In this chapter, we will examine two top−level games in which both sides execute their central breaks and we get a typical middlegame with an open center. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3**

[4.0−0 Nf6 5.d3 d6 6.a4 h6 7.c3 a5 8.Nbd2 0−0 9.Re1 Ne7 10.Nf1 c6 11.Ng3 Bb6 12.Bb3 Ng6 13.h3 Re8 Curiously, Anand 'copies' all of his opponent's moves. Usually, this is not a good strategy since White can utilize his first−move advantage. 14.d4 Be6 *(*Keeping the symmetry with *14...d5* was an option, but White could finally break it with *15.dxe5 Nxe5 16.Nxe5 Rxe5 17.Bf4±)* 15.Bc2 Bc7 16.Be3 d5!? Quite incredibly, the position has become symmetrical once again. There is a way for White to obtain an advantage now, but Karjakin missed it. 17.exd5 This is too meek. *(*The right way was *17.Nxe5 Nxe5 18.dxe5 Nxe4 19.Nxe4 dxe4 20.Qxd8 Raxd8 21.Bxe4 Bxe5* and White can win a pawn by force in the endgame with *22.Bb6 Rd2 23.Bxc6! bxc6 24.Rxe5 Rxb2 25.Bxa5 Ra8±* Black probably has good drawing chances due to the opposite−coloured bishop, but White can try to win without any risk. *)* 17...Bxd5 18.Bxg6 fxg6 19.Nxe5

Bxe5 20.dxe5 Rxe5 21.Bd4=
The slight weakening of Black's pawn structure isn't enough to pose any serious problems. Rxe1+ 22.Qxe1 Qd6 23.Qd2 Re8 24.Re1 Rxe1+ 25.Qxe1 Bb3 26.Ne4 Nxe4 27.Qxe4 Qe6 28.Qf4 Qf7 29.Qe5 Bxa4 30.Qxa5 Bb3 31.Qe5 g5 32.f3 1/2−1/2 (32) Karjakin,S (2785)−Anand, V (2779) Doha 2016]

4...Nf6 5.d3 a6 6.0−0 d6 7.a4 Ba7 8.Re1 0−0 9.h3 Ne7 10.Nbd2 Ng6 11.Nf1 c6 12.Bb3 d5!? A bold idea worth remembering. Usually Black prepare this break by overprotecting the e5−pawn or playing ....h6 to prevent Bg5. Here, however, there are some concrete tactical ideas that work for Black. **13.Ng3**

[The first point is that the e5−pawn is defended tactically in the view of 13.exd5 Nxd5 14.Nxe5?! Nxe5 15.Rxe5 Bxf2+ 16.Kxf2?? Qf6+]

[The second one is that in the case of 13.Bg5 we can make a promising pawn sacrifice with h6! 14.Bxf6 Qxf6 15.exd5 Rd8 16.dxc6 bxc6⩲ when black pieces have a lot of potential.]

13...Be6 14.exd5 Nxd5N A logical novelty by Bacrot.

[14...Bxd5 15.Be3 *(15.Bxd5 Qxd5 16.Be3 Bxe3 17.Rxe3 Rad8=* is also heading for an equal position. *)* 15...Bxe3 16.Rxe3 Qb6 17.Ra3 Qc7= Howell−Svidler, Hockenheim 2016, with a balanced position.]

15.d4 White immediately opens the centre and he is hoping that his knight will be strong on d4.

[15.a5!? was also an interesting option.]

15...exd4 16.Nxd4 Qc7! A very nice tactical solution for the protection of the e6−bishop. **17.Bxd5**

[Now 17.Nxe6? could have been met by Bxf2+! This intermediate check is the point! 18.Kxf2 fxe6+ 19.Kg1 Qxg3∓ and suddenly Black is much better.]

[17.Ngf5!? was an alternative choice, Rae8 18.Bg5 Ndf4 and Black looks nicely placed.]

17...Bxd5 18.Ndf5 White activates his knight and prepares for neutralising the a7−bishop with Be3. **18...Rad8 19.Qg4 Be6 20.Be3**

[The tempting 20.Nh5? could have been met by Bxf5 21.Qxf5 Rd5! 22.Qf3 Bb8 23.g3 *(23.Ng3 Ne5!∓)* 23...Qd7∓ and suddenly Black becomes very active.]

20...Bb8! An ambitious move! Black keeps his bishop pair and he hopes the queen and bishop battery can be dangerous on the b8−h2 diagonal.

21.Bc5?? A decisive mistake, which loses immediately. White blunders, missing Black's reply!

[21.Rad1 was the natural move, Rfe8 22.Bc5∞ and Black has the bishop pair, but White's pieces are active, so this is still a double−edged fight.]

21...Bxf5!−+ Black immediately finds the tactical motif. **22.Nxf5**

[The point is that, 22.Qxf5 could have been met by Rd5−+ and White loses his bishop.]

22...Qh2+ 23.Kf1 Rd2 White can't avoid the mating attack. **24.f4 h5 25.Qf3 Qh1+ 26.Bg1 Ba7 27.Re3 Bxe3 28.Nxe3 Re8 29.Nc4 Rc2 0−1**

Burgas Black Sea (1) 12.09.2012
[Postny,Evgeny]

Baadur Jobava is a very creative and aggressive player, especially when he has the White pieces. On many of his games we can find new ideas and some great fighting middlegames. In this game, from a position that was about equal,

Baadur tries to keep a lot of tension in the center and blunders a great tactic by Malakhov. We'll see a short and very spectacular game. **1.e4** Jobava's main move is 1. d4, but he likes to play 1.e4 against players that mainly answer with 1...e5. **1...e5 2.Nf3 Nc6 3.Bc4** Jobava's favorite Italian. **3...Bc5 4.c3** Diagramm #

[4.b4 In a few of his previous games, Baadur tried this move, but it seems that he had enough of it, and instead goes for one of the main lines.]

4...Nf6 5.d4 exd4 6.e5 Probably the only try for White to get an advantage.

[6.cxd4 Bb4+ 7.Bd2 Bxd2+ 8.Nbxd2 d5 ! 9.exd5 Nxd5 and White has nothing better than to make a draw by playing 10.Qb3 Na5 11.Qa4+ Nc6 12.Qb3 Na5]

6...d5 The main move for Black. **7.Be2** !? Diagramm # This move was tried before as well, by Vallejo.

[7.Bb5 Ne4 8.cxd4 Bb6 This is the main line which is considered to be OK for Black.]

7...Ne4 8.cxd4 Bb6

[8...Bb4+ 9.Bd2 Nxd2 10.Nbxd2 0−0 11.0−0 Black got the bishop pair, but White's much better pawn structure gives him a slightly better position. This was seen in the game Vallejo,P−Ponomariov 2011]

9.Nc3 N Jobava is improving on his own game that was played just a few months ago against Kamsky.

[9.0−0 Bg4 10.Be3 f5 ! Typical and important move for Black in many lines. 11.exf6 Qxf6 12.Nc3 0−0−0 and Black was doing fine, and even managed to win the game. Jovaba, B−Kamsky, G. Amsterdam 2012.]

9...0−0

[9...Bg4 10.Be3 and we can see a clear difference, Black doesn't have the f5 move because after exf6, Black can't take back with the queen due to the simple Nxd5. 0−0 *(10...f5?! 11.Qb3)* 11.0−0 may transpose to the game Kislinsky−Almasi/Legnica 2013. may transpose to the game Kislinsky−Almasi/Legnica 2013. f6 ! *(11...f5* would be the wrong choice now. *12.Qc1* ! This is what White was hoping for! Now he's threatening to play Nxd5 and at the same time stopping Black from pushing f5−f4. *Bxf3* The only chance for Black is to force matters. *13.gxf3* ! *Nxd4 14.fxe4* White is a piece and doing clearly better, but some tension still remains in the position. *)* 12.exf6]

10.0−0 Diagramm # **10...Bf5** A slightly unusual play by Black. More normal is 10...Bg4 or maybe even 10...f5.

[10...f6!? It's possible to undermine White's central chain right away. It's possible to undermine White's central chain right away.

A) 11.Qb3 fxe5 12.dxe5 *(12.Nxe4 Na5 13.Qc2 dxe4 14.Bc4+ Nxc4 15.Qxc4+ Kh8 16.Nxe5 Qe7 17.Qd5 c6 18.Qxe4 Qb4⩲)* 12...Kh8⇄;

B) 11.exf6 Nxf6 12.Be3 Bg4?! I think this position should be close to equal. But here we find an important psychological moment: usually White has this position a tempo down, because instead of 7. Be2, the main move is 7.Bb5, but I think that a tempo shouldn't matter much here and that Black should be doing fine. *(*Both Both *12...Ne7;*

and *12...Bf5* are playable for Black. *)* 13.h3 Bh5 14.Na4 Qd6 15.Rc1 Ne4 16.Nc5 Bxc5 17.dxc5 Qd8 18.Qb3± ½−½ (27) Gross,H−Holovsky,Z ICCF corr 1987 ½−½ (27) Gross,H−Holovsky,Z ICCF corr 1987 ½−½ (27) Gross,H−Holovsky,Z ICCF corr 1987]

[10...Bg4]

11.Na4 As usual, Jobava is being very creative − the main idea for White is to try not to exchange the knight from c3 for the bishop on b6. The usual move 11. Be3 would lead to about an equal position after 11...Bg6, followed by f5.

[11.Be3 f6 12.exf6 and and Nxf6 are playable for Black. are playable for Black. 13.Rc1 Qd6 14.Re1 Rae8 15.h3 Ne7 16.Nb5 Qd7 17.Bf4 a6 18.Ne5 Qd8 19.Nc3 Ng6 20.Bg3 c6= ½−½ (76) Socko,M (2451)−Matras,A (2274) Chorzow 2013 ½−½ (76) Socko,M (2451)−Matras,A (2274) Chorzow 2013 ½−½ (76) Socko,M (2451)−Matras,A (2274) Chorzow 2013]

11...f6 !? Of course! White takes away a piece from the center, to a4 − and Black immediately starts his play in the center.

12.a3 Diagramm # Wow, what a move! Baadur is telling Malakhov: "You don't have any move to improve Your position and I'm not afraid of fxe5". Well. .. of course, objectively, a move like 12.a3 can't be good, but from a practical point of view, it makes some sense − it's really hard to find the right continuation for Black.

[12.Be3 Bg4 13.Nxb6 axb6 14.Re1 Re8 15.h3 Bh5=]

[12.exf6 Qxf6 would just lead to some good play for Black.]

12...fxe5 ?! White's dreams are starting to come true. It would be very interesting to see what Baadur had prepared against 12...Qe7!, basically forcing White to play 13.exf6, after which White's position can never be better. **13.Nxb6**

[13.dxe5 ? Bxf2+ ! 14.Rxf2 Nxf2 15.Kxf2 Nxe5 A rook and two pawns plus an attack are clearly more than enough to be very well here with Black.]

13...axb6 14.Nxe5 Black has to face his first small problems. **14...Nxe5** Malakhov is going for a very sharp position.

[14...Qf6 15.Nxc6 *(15.f4 Nd6* followed by Be4 and Nf5 is good for Black. *)* 15...bxc6 16.Bf4 The White bishop is going to occupy a perfect square on e5. White will develop good play on the kingside in the future with g3 and f4. I think that White's position should be better here. However, probably this better is just "a little better".]

15.dxe5 Nc5 ! The right place for the Black knight is on e6, but the question is: is Black in time to do it?

[15...d4 16.Bc4+ Kh8 17.g4 Bg6 18.f4±]

16.Be3 Ne6 Diagramm # We are at a critical position. If Black doesn't lose anything during next move, his position will be very good, but it's still White's turn.. . **17.g4** ? White is starting the action, but on the wrong side!

[17.Qb3 ! would have been a very unpleasant move for Black. White wants to win the d5 pawn by playing Rad1 next. Kh8 It's hard to find a better way to defend the d5 pawn.

18.Rad1 d4 ! Now we see why Kh8 was necessary. It's never good for Black to push d5−d4. Now the Black bishop will be under attack on e4. 19.f4 The position is very complex, but I think that White should be doing a bit better here. White's idea of playing g4 followed by f5 is strategically very dangerous for Black.]

17...Bg6

[17...Be4 18.f3 Bg6]

18.f4 Be4 ! White's center is dangerous, but at the same time, in danger. The Black bishop on e4 is a beast and any weakening of the White king could almost lead to mate! White needs to be very careful now. would lead to the same position as in the game. **19.Qb3?** ? White doesn't feel the danger and doesn't realize he needed to stay "alive".

[It was necessary to eliminate the dangerous bishop: It was necessary to eliminate the dangerous bishop: 19.Bf3 ! To get rid of the bishop on e4 should be clearly the first priority. Bxf3 20.Qxf3 d4 *(20...Ra4 21.b4±)* 21.Rad1± Ra5 ! The Black rook is coming into the game through a5. The position is very complex, but from a practical point of view, it's much easier to play for Black... White has a lot of things hanging and it's very easy to blunder a tactical blow.]

19...Qh4 ! The beginning of White's end! Black is of course bringing his queen closer to the White king. Suddenly, the threat of playing Qh3 has become deadly... **20.Rf2** Diagramm # Nothing else to do, White can't stop Black from playing Qh3 next. In case of 20.Bd2?, Nd4! almost finishes the game. **20...Qh3** ! The Black queen takes a perfect position. The bishop on e3 is pinned. Black is just threatening to play Nd4 or Nxf4 next. **21.Bd1** This logical move is already losing. White blunders a very nice tactic.

[21.Qc3 was the only way to continue the game − even if to do such a move is very difficult because it just leads to a bad position. d4 Easy and good. 22.Bxd4 Nxf4 23.Bf1 Qxg4+ 24.Qg3 Black is a pawn up, but White is still fighting. The bishop pair gives White good chances for a draw.]

21...Rxf4! Suddenly White is collapsing. ! What a beautiful tactic! Suddenly White is collapsing. **22.Bxf4** Diagramm # **22...Nxf4** White is completely paralyzed. **23.Bf3** Giving Black a chance to finish the game in great style.

[23.Qxh3 Nxh3+ 24.Kf1 Nxf2 25.Kxf2 Rf8+ and Black is totally winning.]

23...Ne2+! ! Malakhov is in good tactical shape and doesn't allow any chance to slip away from him. **24.Rxe2 Bxf3** And we can clearly see that Black is just destroying White. Just a few moves ago, the whole position was very unclear. **25.Rf2 Qxg4+ 26.Kf1 Rf8** Bringing the last piece into the game. Black has two pawns for the exchange plus a very strong attack. White is just hopeless. **27.Re1 Qh3+ 28.Kg1** Diagramm # **28...Rf4** What a final position! I think Jobava was very upset after losing this kind of game, but he had his chances. All in all, the line with c3−d4 is not a real attempt to get an opening advantage, and probably we won't see Baadur playing it again for a while... **0−1**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Be7 5.0−0 0−0 6.Re1 d6 7.a4

* This slightly extravagant move is the introduction to one of White's main plans of this line of the Italian Game. At first glance, it might seem that White defends against an illusory threat (that of the advance of the enemy b−pawn) and in doing so just weakens the b4−square. However, the whole plan is much deeper than that, anticipating the long term evolution of the position. By over−defending the e5−pawn, Black threatened to exchange the active white bishop by means of ...♘a5. One simple solution in the spirit of the d3−lines of the Ruy Lopez would be to play 7.c3 and retreat the bishop to c2 (via b5−a4, if attacked). However, this would not prevent in any way the black queen side expansion. The text move not only aims to maintain the bishop on an active diagonal, but also prepares in advance for some sort of total blockade on light squares on the queen side. **7...Na5**

[7...Nd4 Ü 96/230]

8.Ba2 c5 The point is that Black hardly has another possibility of freeing his play than this typical manoeuvre. **9.Nc3** The most direct attempt to take advantage of the relative weakness of the d5−square.

[After 9.Nbd2 the knight needs considerably more time to get to d5. At the same time, the plan of opening the centre by means of c3 and d4 is not optimal, once the b4−square has been weakened. Nc6 10.c3 Be6 11.Nc4 h6 12.h3 Re8 13.d4?! *(13.Bd2=)* 13...exd4 14.cxd4 d5! 15.exd5 Bxd5 16.dxc5 Bxc5 17.Rxe8+ Qxe8 18.Be3 Qe7 19.Bxc5 Qxc5 20.Ne3 Bxa2 21.Rxa2 Rd8 22.Qb1 Nd4∓ Black's pieces dominate the centre. ½−½ Garcia Fernandez,C (2358)−Delchev,A (2602)/La Roda 2004/CBM 099 ext (63)]

9...Nc6 10.Nd5 Once again the most straightforward continuation.

[10.h3 Be6 11.Bg5 Ne8 12.Be3 Bxa2 13.Rxa2 Nc7 14.Ra1 d5= Once Black has carried out this thematical break, his spatial advantage compensates for the slight weaknes of the light squares. 15.exd5 Nxd5 16.Bd2 f6 17.Nxd5 Qxd5 18.Bc3 Rac8 19.Nd2 Bd6 A questionable decision. 10...Nxd5 11.Bxd5N 'N!?' A logical novelty. White does not need to close his bishop by capturing with the pawn.

[11.exd5 Nd4 12.c3 Nxf3+ 13.Qxf3= 0−1 Cornette,M (2357)−Boudre,J (2339)/Cannes 2005/CBM 105 ext (40)]

11...Be6 12.c3 For the time being neither side is interested in releasing the tension in the centre. The capture on e6 would strengthen Black's control over the light squares while ...♗xd5 would leave the knight without favourable squares for retreat after exd5. Therefore

both players calmly continue their development. **12...Qd7 13.Be3 Bxd5?!** But now Black loses his temper.

[Before exchanging on d5, he should have cleared the e7−square for his knight with 13...Bf6 . White can try to continue inhibiting the exchange with 14.Nd2 but then Ne7 seems to offer Black entirely adequate play. *(14...Bxd5?! 15.exd5 Ne7 16.Qf3* followed by ♘e4 looks disturbing for Black. *)*]

14.exd5 Nd8 Not a nice square for the knight. **15.Qb3 Kh8 16.Qb5 Qf5**

[Of course, after 16...Qxb5?! 17.axb5 White would increase his control over the light squares and get the a−file for his rooks, too.]

17.Nd2 f6 18.d4 Consequently played. Play on light squares frequently needs complementary moves on dark squares. White opens the position in order to get the fruits of his superior strategy so far. **18...a6** Black does not enjoy too much space and the queen's presence on b5 certainly agravates this problem, but this last move weakens the b6−square in chronic way and offers White additional ideas of increasing his activity. **19.Qb3 cxd4 20.cxd4** '±'

[20.Bxd4!? followed by ♗b6, a5 and eventually c4−c5 is a serious alternative.]

20...Rb8 21.Rac1 Qd7 22.Nc4 Nf7 23.Nb6 Qe8 White has reached a maximum of activity but now starts playing less energetically. **24.f3** Adams was obviously concerned about the possible advance of the black e−pawn, when his double pawns would lose any dynamism.

[However, 24.dxe5 dxe5 25.Rc2 looks like a simpler way to maintain the initiative. In spite of the fact that Black gets the d6−square for his minor pieces, the d−pawn can cause him lots of trouble, notto speak about the impossibility to fight for the control of the only open file.]

24...f5 25.Qc2

[Again 25.dxe5 dxe5 26.Rc2 looks preferable.]

25...Bh4 26.Re2 f4 27.Bd2

[27.Bxf4 Qd8!]

27...Bd8 28.Nc4 b5⇄ White has retreated completely and has lost all his advantage. **29.axb5 axb5 30.Na5 Bxa5 31.Bxa5 Qd7 32.Qc7 ½−½**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.a4 a6 7.0−0 h6 8.Be3 A pretty rare move, which shouldn't promise much. White offers an exchange of the dark−squared bishops in order to open the f−file.

[Earlier we considered a couple of alternatives. 8.Nbd2 Karjakin,S (2769)−Navara,D (2742) Baku AZE 2016 [Mikhalevski,V]]

8...Bxe3 9.fxe3 0−0 10.Nbd2 Be6?! This move turns out to be inaccurate.

[10...Na5!? 11.Ba2 c5 12.Qe1 Nc6 13.Nh4 Kh7 is equal.]

11.Bxe6 fxe6 White hopes to be better due to his knight on d2 being more flexible than the knight on c6. **12.Qb3**

[A couple of correspondence games, which preceded the current game, featured 12.b4!? This way White wants to take some space on the queenside. Qe8 *(* It makes sense to improve the position of the knight by either bringing it to g6, or d7 via b8. *12...Ne7!?; 12...Nb8!?)* 13.Qb3 g5?! 14.d4± Nopin,V (2380)−Laane,E (2395) ICCF email 2008]

12...Qd7 13.d4 White creates favourable tension in the centre.

[13.Qxb7?? Rfb8−+]

13...Kh7 Before exchanging pawns in the centre Svidler decides to cover the g6−square and moves his king away from the a2−g8 diagonal.

[Another good option is 13...b6!?]

[13...exd4 14.exd4 Kh7 15.Rf2 *(15.Rae1 e5)* 15...e5 16.Raf1 b5! and Black is close to equality.]

14.Rad1

[14.Qc2 looks good for a couple of reasons. First, White puts the queen on the same diagonal as the black king and second, he doesn't determine the position of the queen's rook.]

14...Rab8 Black isn't afraid of the x−ray on the d−file and protects the b−pawn.

[14...exd4!? 15.exd4 e5 16.Nc4 Qf7! 17.d5 Nd8 was a good alternative.]

15.Nc4 Harikrishna puts more pressure on the e5−pawn.

[15.Qc2 was still logical.]

15...exd4 Time to release the pressure.

16.exd4 b5! 17.axb5 axb5 18.Ne3 Ne7 Svidler brings his knight to e7 in order to meet 19.e5 with 19...Nfd5.

[18...Nxe4 19.Qc2 d5 20.Nd2± is slightly better for White, who wins back the e4−pawn, while creating pawn weaknesses in Black's position.]

[18...Qe8! was strong and promised equality. For example, 19.e5 *(*or *19.Qc2 Qg6=)* 19...dxe5 20.dxe5 Nd7 21.Qc2+ Kg8 22.Ng4 Nb6 The knight gets to d5 and Black equalises.]

19.Qc2 Pentala protects the e4−pawn and prepares a discovered attack, which explains Black's reaction.

[19.e5 Nfd5 20.Nxd5 Nxd5 21.Qc2+ Kg8 22.Rde1 Rbe8 doesn't promise much for White, but was still worth trying.]

19...Kg8 20.Rde1 Rbe8! Peter covers the weakest point in his position−the e6−pawn. **21.h3 Rf7** Both players make useful waiting moves. **22.b3** White tries to make progress, but weakens his position.

[22.e5!? Nfd5 23.Nxd5 Nxd5 24.Qe4 Rf4 25.Qg6 was more to the point, although the position is still equal.]

22...Qc6 23.Nd2 Ref8 24.c4?! Unnecessarily weakening White's position, in particular the d4−pawn which may become a target. **24...bxc4**

[24...Qb6!? 25.Nf3 Nc6 would underline the above, although after 26.d5 exd5 27.exd5 Nd4 28.Qd3 the position remains equal.]

25.bxc4 e5! Svidler provokes a weakening of the dark squares. **26.dxe5 dxe5 27.c5!** An important move, which helps to cover some dark squares.

27...Ng6 Although Black's position is more pleasant (since White has to protect his e4 and c5−pawns) it's difficult for Black to make any progress.

28.Nf5?! This seemingly active move may backfire, as White will have to deal with the idea of ...Nxe4. **28...Kh7!**

[The immediate 28...Nxe4?! would be wrong in view of the intermediate 29.Nxh6+!±]

29.Nf3! Nxe4 Peter simplifies the position, basically signing a peace agreement.

[29...Ra8 was correct and promised Black some chances, although White should be able to keep the balance

with some precise play. 30.N3h4! Nxh4 *(30...Nf4?* runs into *31.Rxf4! exf4 32.e5+−)* 31.Nxh4 Ra5! 32.Qb3! White experiences problems without this move. Rf8 33.Qf3 Qe6 34.Qf5+ Qxf5 35.exf5 Re8 36.Ra1! Rxc5 37.Rfc1 Rxc1+ 38.Rxc1 with sufficient compensation for the pawn.]

30.Nxe5?! A slight inaccuracy.

[30.Rxe4! Rxf5 31.Rfe1 Qf6 32.Nxe5 Rf1+ 33.Kh2 Rxe1 34.Rxe1 leads to full equality.]

30...Nxe5 31.Rxe4 Ng6 Peter plays it safe.

[31...Nd7! deserved attention, as White can't take advantage of the x−ray on the b1−h7 diagonal. 32.Rc4 g6 33.Ne3 Rxf1+ 34.Nxf1 Re8 35.Qf2 Kg7 with a nominal advantage for Black thanks to the vulnerability of the c5−pawn.]

32.Re3 Kh8 33.Ree1 The position is equal and so the players agreed to a draw. 8.Be3 is not such a bad line, and requires some accuracy from Black, although it shouldn't promise any advantage. 10...Na5 is one of the various possible ways to play with black. **½−½**

ACP Golden Classic (2) 15.07.2012
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Bb6 A relatively rare move order. Black's idea is to save the bishop from exchange without playing ...a6.
[Usually Black starts with 4...Nf6 See Jobava, B (2730)−Kamsky, G (2744)/ Amsterdam NED 2012/ [Mikhalevski, V] in the current update.]
5.d3 Nf6 6.0−0 The main line.
[However 6.Nbd2 or 6.Bb3, seem to be more flexible as it prevents Black from escaping with the bishop to c7. d6 *(* or *6...0−0 7.0−0 d6 8.Bb3)* 7.Bb3 in order to meet Ne7 with 8.Nc4 in both cases.]
6...d6 The players transposed to 4...Nf6, though Sasikiran seems to trick Jobava, as 0−0 is played instead of Nbd2 or Bb3 and so Black saves the bishop from exchange. **7.Nbd2**
[Now 7.Bb3 is likely to transpose to the game after Ne7 8.Nbd2 c6]
7...Ne7 8.Bb3 c6 Black is just in time to save the bishop from exchange. In the main lines Black usually plays ...a6 and ...Ba7, though the bishop is also good on c7. **9.Nc4**
[If White continues with 'normal' development 9.Re1 Ng6 *(* or *9...0−0)* 10.Nf1 0−0 11.Ng3 h6 12.h3 d5! is fine for Black as the e5−pawn is untouchable. 13.exd5 Nxd5 14.Nxe5 Nxe5 15.Rxe5 Bxf2+ 16.Kxf2 Qf6+ and Black wins an exchange. Just to let you know, the same idea wouldn't work with the c−pawn on c7 in view of Qf3 and White wins the knight on d5.]
9...Bc7 10.Bg5 Ng6 11.Nh4 Nf4!? A logical novelty in a very rare position. This idea has been known from similar positions.
[Earlier Black played 11...h6 12.Nxg6 fxg6 13.Bd2 Ning Chunhong (2347) − Zhao Xue (2490)/China 2010.
(It would be better to play *13.Bxf6! Qxf6 14.d4* with the initiative. *)*
Now Black should have played 13...Qe7 14.Ne3 Be6 with ...0−0 to follow.]
[11...Nxh4 12.Bxh4 h6 is another typical idea, but it doesn't work in this concrete position in view of 13.f4! exf4 14.Rxf4 g5 *(14...d5 15.Rxf6! gxf6 16.exd5 cxd5 17.Ne3*

12.Nf5! Bxf5 13.exf5 Qd7 14.Ne3! Now White is threatening 15.Bxf6 gxf6 16.g3 and the knight is trapped on f4.

14...N4d5

[In case of 14...d5?! White continues with his idea of 15.Bxf6 gxf6 16.g3 and Black experiences problems with the knight. Rg8 17.Kh1 Qd6 18.gxf4 exf4 19.Nxd5! cxd5 20.Re1+±]

[17.f6 isn't clear in view of g6 *(* but not *17...gxf6 18.Bxf6 Rg8 19.f4!* with an attack. *)*]

17...f6 18.Be3 Qf7 19.a4! White is going to take space on the queenside by means of a5, which can be followed by Ra4.

[19.c4 was a principled continuation. Probably Black prepared a pawn sacrifice: d4 20.Qxb7 Rb8 21.Qc6+ Qd7 22.Qxd7+ Kxd7 23.Bc1 d5 24.b3 dxc4 25.bxc4 Rb4 26.f3 Rhb8 and there is not ime for 27.Rf2 Rb1 28.Rxb1 Rxb1 29.Rc2 in view of e4!−+]

19...a5 A double−edged continuation. Black prevents a5, but weakens his queenside. **20.d4!?** White is provoking e4 in order to undermine Black's centre by means of c4. **20...0−0 21.Ra3** White is bringing the rook to b5, which would be followed by Qd1−b3. **21...e4 22.Qe2 Qd7!** Black prevents the Rb3 idea, though in fact White should have proceeded with his plan. **23.g4?** Weakening the kingside without any necessity.

23...g6! 24.Qb5 White has lost direction. It would have been better to recapture on b5 with the rook, but the slow 23.g4 prevented White from this idea. **24...Qf7!** Black is playing for an attack instead of equalizing with an exchange.

[24...Qxb5 is enough for equality.]

25.Rb3 I don't like the fact that White allowed an exchange on f5 as Black may develop a strong attack on the kingside.

[25.fxg6 hxg6 26.f3 was better, with an approximately equal position.]

25...gxf5 26.gxf5 Kh8 Black takes the initiative. **27.Qe2** White is covering the h5−square in order to prevent Qh5.

[The line 10.d4 in Kramnik,V (2808) − Carlsen,M (2832) Stavanger 2017 [Mikhalevski,Victor] caused Black many problems.]

10...Ng6 11.Nf1 c6 12.Ng3 Re8?! An inaccuracy, which is the cause of Black's problems.

[While playing this position with the black pieces Svidler preferred the immediate 12...d5! 13.Bb3 Be6! 1.e4 e5 2.Nf3 Nc6 3.Bc4 d6 Not the most popular line, but Artemiev played it at least twice in the same tournament. **4.d4** This aggressive approach has been seen at least twice on this one day! The second one was a blitz game in the Titled Tuesday tournament.

[5.d5 is an interesting alternative.]
5...d5 6.dxe5 The text is very rare. I wonder if the Polish GM prepared this line or was just improvising. White's idea is to win the d5−pawn.
[6.exd5 is the main line. It has to be answered by Nxd4 7.c3 *(7.d6 Qxd6 8.Bxf7+ Ke7* turns out to be good for Black. *)* 7...Nf5 8.d6! Nxd6 9.Nxf7! 7.Be2 This move is forced.
[7.f3? would be bad in view of dxc4 8.exf6 Bd7! 9.fxg7 Bxg7∓ and despite being a pawn down Black's position is better.]
7...Bxe2 8.Qxe2 Nxe4 9.Nxe4 dxe4= 10.Bf4 White protects the e5−pawn, but it might be slightly inaccurate.

14.Qg4+! Qd7! 15.Qxd7+ Rxd7 16.Rae1! Nxc2 17.Rxe4 Bc5

[17...Nb4 transferring the knight to d3 deserved attention as well.]

18.Na4 I'm not sure why White needs his knight on a4.

[18.e6! fxe6 19.Rxe6 Rf8 20.Re4 wouldn't fully equalise, but White's position should be defendable here.]

18...Be7 19.g3 Rhd8∓ Black is in full control of the open d−file. **20.Kg2**

[20.e6 would still be reasonable.]

20...Rd4

[20...Nb4!? transferring the knight to d3 is again an interesting alternative.]

21.Nc3 Nb4 22.Rxd4 Rxd4 23.Be3 Rd3 This is a slight inaccuracy.

[23...Rd8! would have kept the d3−square for the knight and retained winning chances.]

24.Kf3 Now the position is equal.

24...Bc5 25.Ke2 Bxe3 26.fxe3 Rd7 27.e6! Forcing a draw by repetition.

27...fxe6 28.Rf8+ Rd8 29.Rf7 Rd7 30.Rf8+ Rd8 31.Rf7 Rd7 32.Rf8+ I don't believe that Black can equalise by means of 3...d6, but it can serve as a surprise weapon. Surprisingly, the Fried Liver Attack with an extra tempo (the d−pawn on d4) doesn't promise White any advantage.

Here white has several plans, either going for a kingside attack, or playing in a positional manner, possibly looking for an endgame by means of ♘g6 trick in various positions. What he played is, I suppose the most dangerous attempt to tear my position apart **19.Bxd3 Qxd3** Here for a second I couldn't recall whether 19...b5 or 19...a5 is a more precise move order, as it's all of very subtle nature. Finally I decided it made sense to keep momentum and move randomly asap :)
20.Ndf3
[20.Nb3 Qxd1 21.Rxd1 Bxf2 22.Ng4 Bh4 23.Rg1]
20...Qxd1 21.Rxd1 Bxf2□ Not a very topical idea, but in given circumstances it just slows down White's attack, and swaps material. **22.Bf4 c6 23.Rd2 Be3 24.Bxe3 Rxe3 25.Nd4** A far more natural retreat. **25...Nc4!=** The last move of my analyses, as I had never really believed to reach this position ever, so I hadn't bothered to prolong the lines from here onwards. The pleasant thing was that in this virtually new position, my opponent had to make a choice, while I was enjoying my 1 hour + advantage, and other people's games :)
26.Rf2!? Here White could have basically played anything (at least top 15 engine lines are ok for the first player, obviously not all of them coming in a human sense of logic). The game choice simplifies the position, which is understandable given the time difference
26...Rae8 Not strictly necessary, but the best. **27.Raf1**

27...Nd6 28.Nf5 Nxf5 29.Rxf5 Black is a pawn up, but his king is too weak to offer chances for an objective advantage. During the game it seemed as if there were some chances to squeeze this, with help of engines, the feeling is utterly opposite. **29...f6 30.Kg2 Kf7 31.Rd1 h5**

37...Kg6 was my idea. **38.Rg8+!** would have been more combatitive, but still dead−level according to the machine. **38...Rg7**
[38...Kh7 39.Ra8 doesn't differ that much Re2 would have been perhaps the most challenging, but]

Wijk aan Zee 151/116 2022
[Sokolov,Ivan]

Santosh Vidit had an excellent start but (due to blunders) collapsed towards the end of event. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 h6 7.Re1 0−0 8.Nbd2 Bb6 9.h3**

[9.a4 − 147/105]

9...Ne7 10.d4 A relatively recent development in this line and (arguably)

the most direct one.

[White players have also tried different "slower" moves here, like 10.Bb3]

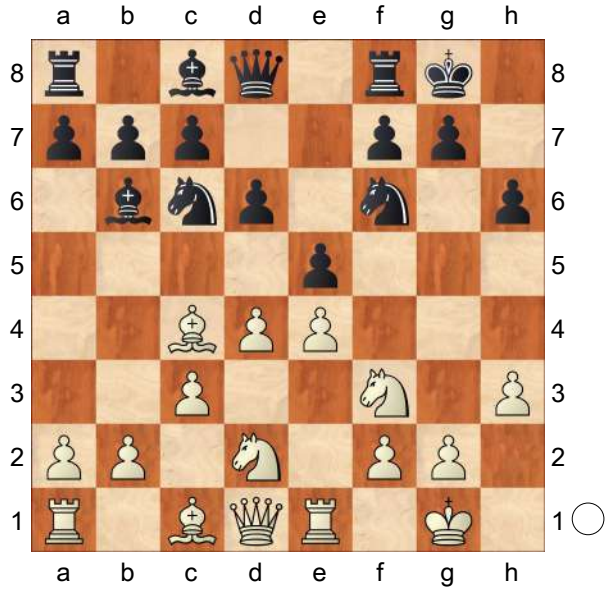
[or 10.a4]

[or 10.Nf1]

10...Nc6 Placing the knight back to c6−square may look somewhat unusual as Black's basic problem in the Italian (and the main reason White has some advantage) is the need to improve his Nc6 development. Here, however, Black has direct reason, because with his last move White has provided Black with a target (d4−pawn).

[Mamedyarov has experiance in this position and has previously tried a "more standard Italian development". 10...Ng6 However after 11.Bd3 c6 12.Nf1 Re8 13.Ng3 White had some advantage and went on to win in Karjakin,Sergey 2750 − Mamedyarov, Shakhriyar 2764, Saint Louis (rapid) 2019]

Diagram



11.a4 This is White's idea tried in the last Candidates and can lead to a pawn sacrifice.

[Black has nothing to worry about if White decides to try a less combative 11.dxe5 Nxe5 12.Nxe5 dxe5 as seen in recent top level game Sevian,Samuel 2668 − Oparin, Grigoriy 2659, Riga (blitz) 2021]

11...exd4N A novelty. Mamedyarov decides to fight versus the isolated pawn.

[The mentioned Candidates game went 11...a5 and White sacrificed a pawn 12.Ba2!? after exd4 13.Nc4 dxc3 14.Nxb6 c2 15.Qxc2 cxb6 we had a complex position, White having compensation, but perhaps not more. The game ended drawn in Alekseenko,Kirill 2698 − Caruana, Fabiano 2842, Yekaterinburg (ct) 2021]

12.cxd4 Now Mamedyarov forces the type of position his was aiming for.

12...d5

[Grabbing a pawn is (least to say) risky for Black: 12...Nxd4? 13.Nxd4 Bxd4 14.Nb3 Black does not have a good retreat for his bishop. Bc5 15.Nxc5 dxc5 16.Qc2± White is clearly better here having more than just a compensation. Qd4? 17.e5 Nh7 18.Be3+− ΔQxe5 19.Bxc5]

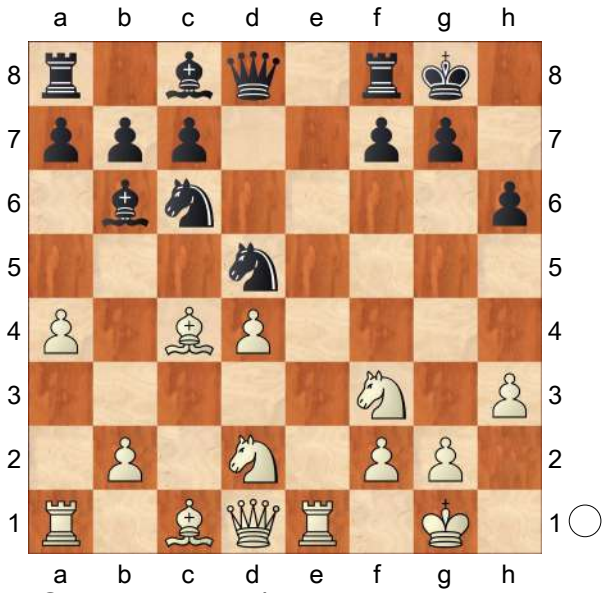
13.exd5 Nxd5 Diagram

(Diagram)

Diagram [#] Critical moment (and important one for theoretical assessment on this line). White needs to decide how to develop and I do not think Vidit choose the best way to do it. Diagram [#]



14.b3? This move (White voluntarely depriving himself from Ra3 rook lift) does not look natural here and now Black has easy play.

Diagram [#] White's set−up we sometimes (certainly not often) see in the isolated pawn positions. However, here it does not seem to be dangerous for Black. Mamedyarov does not choose the best way to arrange his pieces and White indeed gets strong attack.

Diagram [#] **16...Na5?**

[16...Ba5! looks to be equalizing on the spot, since it is difficult for White to avoid move repetition.

B) 17.Re2 Nf4 18.Re3 Nd5 19.Re2=]

17.Ne5→ Now White stands better. White has "free hand" to develop kingside attack, while is it difficult for Black to justify his 16...Na5? move − if Black takes on c4, he improves White's

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Nbd2 a6 6.c3 0−0 7.Bb3 d6 8.0−0 Re8 9.h3 This line used to score very well for White, although there were very few games at the GM level.

[Earlier Radjabov played 9.Re1 in Radjabov, T (2713)−Karjakin, S (2772)/Shamkir AZE 2014/ [Mikhalevski, V], which is the main alternative.]

9...Be6

[Adams transposed into a more popular line by means of 9...h6 10.Re1 Be6 Salgado Lopez, I (2606)−Adams, M (2725)/ Caleta 2013. This position can be reached by different move orders.]

10.Nc4 Harikrishna introduces a new idea. White is provoking a weakening of the queenside by means of ...b5, while the knight is heading to e3. If Black doesn't play ...d5 White may continue with 11.Ng5.

[10.Re1 would transpose into the aforementioned line after h6]

10...b5

[Once again 10...h6 preventing 11. Ng5 makes sense.]

11.Ne3 Now White's positional threat is 12. Bxe6, when Rxe6 loses a piece to an advance of the d−pawn 13.d4. The latter explains the retreat of the dark−squared bishop to b6. **11...Bb6 12.a4** Pentala puts some pressure on Black's queenside.

[Now after 12.Bxe6 Black can recapture with the rook Rxe6 *(* though *12...fxe6* covering the f5 and d5 squares is still preferable. *)*]

12...Rb8

[12...b4 was possible, even though it weakens the c4−square. 13.Bxe6 fxe6 14.Nc4 Ba7 with the subsequent 15... Rb8 and Black is close to equalising.]

13.axb5 axb5 14.Ng5 The Indian GM forces an exchange of the light−squared bishops, but his knight on g5 will be misplaced.

[14.Bxe6! was more accurate.

A) After 14...Rxe6 both 15.Nd5 *(* and *15.Nf5* lead to White's edge. *)*;

B) 14...fxe6 15.Nc2!± with a slight edge.]

14...Bxb3 15.Qxb3 Qd7 16.Nd5 Probably he connected his hopes to this move, but it's not dangerous for Black.

[It would be better to come back to f3 16.Nf3 with equal chances.]

16...Nxd5 17.Qxd5 Nd8! A nice move. Now the queen will be pushed away by means of ...c6, and the g5−knight with the help of ...h6 and eventually Black will bring his knight to e6 with a tiny edge for him due to the better position of his minor pieces. **18.Be3** The most accurate. White is offering to open up the f−file against the f7−pawn. **18...h6 19.Bxb6?!** This exchange turns out to be inaccurate as it weakens the f4−square.

[19.Nf3! was better, as now Ne6? is impossible in view of *(19...c6* is better. *20.Qa2 Ne6 21.b4* is roughly equal. *)* 20.Nxe5+−]

19...Rxb6 20.Nf3 Ne6! An unusual tactical trick. **21.Rfd1??** A serious mistake, which costs White the game.

[21.Nxe5! was necessary. Now after Qc8 22.Nf3 Nf4 23.Qf5 Qxf5 24.exf5 Nxd3 Black is slightly better thanks to his better pawn structure.]

21...Nf4 22.Qb3 d5!−+ Suddenly Black creates decisive threats on the kingside as his rook enters the attack from g6.

5...Bb6 6.d3 d6 7.a4 Diagram # Since most chess players start off playing the Italian Game as a kid, chances are high that you have asked yourself at some point or other: why can't White just grab space with b4 and a4? At least top grandmaster Jobava is still asking himself the question. After a win against Grischuk and a promising position against Fressinet in earlier games, this week he beat Kravtsiv and Eljanov doing just that. White wasn't necessarily better after the opening in those games (Eljanov should have played the immediate 31...Kh7), but in both cases a positional exchange sacrifice gave White the upper hand. An important counter−intuitive idea to remember is a well timed g3! to keep the black Ns away from f4. A key question that remains in the diagram position: why is everyone focussing on 7...a6 as a means to save the bishop? The interesting alternative is 7...a5, for example: 8.b5 Ne7 9.0−0 Ng6 10.Nbd2 0−0 11.Bb3 (after 11.Ba3 Black plays 11...Nh5! heading for f4, with the nice trap 12.Nxe5?? Nxe5 13. ChessBase: 'The Indian player Pentala Harikrishna seemed to overextend a little out of the opening against Anish Giri. The Dutch player however seemed to be content with a draw and offered a repetition... but Harikrishna would have none of that! He refused a draw in a position that really held no advantage to him, but was still very complex. Giri gradually fell under time pressure and in a critical decision he moved his rook in the wrong direction which resulted in catastrophe for his undefended king. Prague Masters 2nd (3) 14.02.2020

[Firouzja,Alireza]

1.e4 I had made two draws until this round, so I really wanted to push for the win in this game. **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0−0 Be7 6.d3** This is of course a slower move than 6. Re1, but it's in order to prevent the Marshall.

[6.Re1 b5 7.Bb3 0−0 With my opponent being a big expert of the Marshall, I thought this time I should avoid it.]

6...b5 7.Bb3 d6 8.c3!? These days, the c3 move in this position is surprise to people, mainly because of the more fashionable 8.a3!? which I played in the first round of this tournament against Ragger. But in the old days 8.c3 used to be the main line.

[I want to remind you that recently I analysed 8.Bd2 for you, which was successfully played by the world champion.]

8...0−0 9.h3 Na5 Mikhalevski,V: 'The main line. This idea is typical for many line of the Spanish. Black wants to get rid of the backward pawn on c7 and take better control of the centre with ... c7−c5.' Going for the Chigorin setup. Two rounds after this game, Vitiugov played 9...h6!? against me.

[Earlier we considered 9...Bb7 Grischuk,A (2767)−So,W (2799) Berlin GER 2018 [Mikhalevski,Victor]]

10.Bc2 c5 11.d4 Mikhalevski,V: 'It's curious that White is ready to go for a Chigorin System a tempo down (d2−d3−d4). In the regular Chigorin the f1−rook is already on e1, as White plays 6.Re1 instead of 6.d3.' So now we have the old Chigorin setup, but with one tempo down for White (normally in the classical line his rook is on e1 already!) But I thought in these closed positions the tempo wouldn't matter − and I was probably right! **11...Qc7 12.d5!** Mikhalevski,V: 'White takes space and prevents the knight on a5 from getting back to c6. Now his positional threat is to restrict it by means of 13.b3.' And now White should close the center because there is no time anymore for the Nbd2/Re1/Nf1 manoeuvre.

[12.Nbd2 cxd4 13.cxd4 Nc6 *(13...exd4 14.Nxd4 Re8 15.Re1 Bb7* and this just a decent position for Black because the white knight is still on d2 and not on g3! *)*]

12...Nc4!? Mikhalevski,V: 'Due to the

aforementioned idea Harikrishna decides to bring the knight to a better square.' Pentala was trying to exploit that my knight wasn't already on d2, making ... Nc4 impossible for Black here, but...

[Nevertheless, 12...Nd7 deserved attention, although after 13.b3!? *(13.Qe2!? Nb6 14.Rd1* is a reasonable alternative. *)* 13...Nb6 14.Bd2 c4 15.b4 Nb7 16.Be3 a5 17.a4!± White seems to retain the better chances.]

13.b3 Nb6 14.a4 Mikhalevski,V: '!' Mikhalevski,V: 'A logical approach. White should play on the queenside, as that's where he has a spatial advantage.'

14...c4! Mikhalevski,V: 'The correct reaction. Black gets the c5−square for one of his knights.' Now we can see that Black cannot really play the old 14... bxa4 15.bxa4 a5 plan because my knight is sitting on b1 and can go to the b5 square via a3!

[14...bxa4? 15.bxa4

A) 15...Nc4 , which looks dubious due to 16.Nfd2 *(* In the game he played the less accurate *16.Bd3 Na5 17.Nbd2±* , but was still better. Manik,M (2407)−Paravyan,D (2531) Pardubice 2017 *)* 16...Nxd2 *(* or *16...Na5 17.Na3±)* 17.Bxd2± with the idea of Na3−c4 and White is better.;

B) 15...a5 16.Na3 Ba6 17.Nb5±]

15.axb5 Mikhalevski,V: '!?' Mikhalevski, V: 'White wants to open the a and b−files on the queenside.'

[Another option is 15.bxc4!? , which Black would have to answer with Bd7! Surprisingly Black obtains decent compensation for the sacrificed pawn. Play may continue *(* After *15...bxc4? 16.Na3±* the c4−pawn is weak and the knight on b6 is misplaced.*; 15...Nxc4* loses a pawn to *16.axb5±)* 16.axb5 axb5 17.Rxa8 Rxa8 18.cxb5 Bxb5 19.Re1 Nfd7 20.Bd3 Bxd3 21.Qxd3 Qc4 22.Qxc4 Nxc4 and so on.]

15...axb5? Mikhalevski,V: 'A positional mistake. Pentala underestimates the danger of a stable position on the queenside, where his c4−pawn is a target for White's pieces.' Its really hard to believe that such a move can be mistake. But if you go deeper into the postion you understand that Black should not really care about the pawns, and he has some great square like c5 for his knight and can get excellent counterplay!

[15...cxb3! Mikhalevski,V: 'was better, creating a target on c3. And then' 16.Bd3 Mikhalevski,V: '!' *(16.Bxb3? Nxe4* Mikhalevski,V: 'is better for Black.' *)* 16...Nfd7! Probably the move that Pentala missed during the game. *(16...Nxe4!?* is interesting, but White retains a slight edge after *17.Bxe4 f5 18.Bd3 e4 19.Be2 exf3 20.Bxf3 Nd7 21.Qxb3 Nc5 22.Qc2±)* 17.Qxb3 *(17.Nfd2 f5! 18.Nxb3 fxe4 19.Bxe4 axb5 20.Rxa8 Nxa8 21.Na3 Ba6 22.Bd3 Rb8* with roughly equal chances as both sides have weaknesses. *)* 17...Nc5 18.Qc2 f5∞ with a very double−edged position!]

16.Rxa8 Nxa8 17.bxc4 bxc4

[17...Qxc4 Of course now this looks really ugly for Black. 18.Ba3

A) 18...Nd7 19.Bd3 Qa4 *(19...Qc7 20.Bxb5±)* 20.Qxa4 bxa4 21.Bb5 Nab6 22.c4± with a clear edge for White.;

B) 18...Re8 19.Bd3 Qc7 20.Bxb5+−]

18.Ba3! Mikhalevski,V: 'An interesting plan.' So here I found a very nice setup for my pieces which you can see in the game!

[However, 18.Be3!? with the idea of 19.Nbd2 would be stronger, as the c4−pawn is really weak. Meanwhile, the bishop on e3 takes control of the b6−square and so it will be more difficult to protect the weak pawn from b6. Nd7 19.Nbd2 Nab6 20.Qa1⩲ when the position of the dark−squared bishop on e3 is better than on b4, as White can use both a and b−files for his heavy pieces.]

18...Nd7 19.Nxe5 was the threat.

19.Bb4 Mikhalevski,V: '⩲' Mikhalevski,V: 'A nice square for the bishop. Firouzja consolidates his position and prepares 20.Qe2 and 21.Na3 or Nbd2, while the a−file is open for White's rook.' **19...Nc5** Mikhalevski,V: '?!' Mikhalevski,V: 'This move was played with the idea of undermining White's centre with ...f5, but this doesn't seem to work effectively.'

[19...Nab6 20.Qe2 f5 21.Na3 Ba6 would be more accurate, although still better for White.]

20.Qe2 Mikhalevski,V: '!?'

[Another good way of playing would be 20.Nbd2!? Nb6 21.Qb1! Ba6 22.Qb2 Rb8 23.Ra1± with serious pressure.]

20...Nb6 21.Nbd2 This was the setup that I had in mind when I played 18.Ba3.

21...f5! Mikhalevski,V: 'Black played . .. f5, which he prepared a few moves ago, but it just doesn't work.' The right move. Otherwise Black will slowly lose the battle on the queenside.

[The computer's suggestion 21...Ncd7 is an indication that 19...Nc5 was wrong.]

22.Rd1 Mikhalevski,V: 'An inaccuracy.' The logic behind this move is simple of course: after ...fxe4/Nxe4 the pawn on d5 will be well protected.

[22.exf5! was strong Nd3 *(* In case of *22...Bxf5 23.Bxf5 Rxf5 24.Nxc4±* White wins a pawn since *Nxd5?* runs into *25.Qa2!!*+− with decisive threats. *)* 23.f6! Rxf6 24.Bxd3 cxd3 25.Qxd3 Bf5 26.Qb5± White retains an extra pawn and the better chances.]

22...g6 Mikhalevski,V: 'The Indian GM protects the f5−pawn in order to recapture on f5 with a pawn.' **23.Qe3!** Mikhalevski,V: '!?' Mikhalevski,V: 'Alireza creates a positional threat of 24. Bxc5 and provokes an advance of the f−pawn.' Very nice move. **23...f4?** This move just really questions the move 21...f5! The idea was to open up things on the kingside and fight for some counterplay, but for some reason probably he thought he was just worse after the exchanges in the center. But anyway Black had to go for it!

[Mikhalevski,V: 'After' 23...fxe4 24.Nxe4 Nxe4 25.Bxe4 Mikhalevski, V: '⩲' Mikhalevski,V: 'White obtains a nice blockade, but Black should still have preferred 23...fxe4 over 24...f4.' Nd7⩲ with idea knight f6. White is still better, but Black is fighting.]

24.Qe2± Mikhalevski,V: 'Now White has a free hand to play on the queenside, as he doesn't have to worry about the centre.' From here I thought I was just winning because it's clear that White will win the battle on the queenside. **24...Ba6**

25.Ra1 Ra8 26.Qf1! Mikhalevski,V: 'Firouzja prepares to double his heavy pieces on the a−file.' Playing for the A file **26...Qc8**
[Of course I was not scared of 26...Nd3 because the knight on d2 will be well blocking the pawn on d3! 27.Bxd3 cxd3 28.Ra5 Nc4 29.Nxc4 Qxc4 30.Qa1+−]
27.Ra5
[27.Ra3 is more accurate, as now Nb3 can be met by 28.Qb1!± with a clear edge.]
27...Ncd7 Mikhalevski,V: '?' Mikhalevski, V: 'After this mistake Black's position is getting even worse.'
[Mikhalevski,V: 'Harikrishna had to try' 27...Nb3 Mikhalevski,V: '!' 28.Ra3 and Black has to either go back or exchange on d3 which does not improve his position at all. Nxd2 29.Nxd2 Bb5± with a worse, but playable position.]
28.Qa1
[28.Bd1!+− with a threat of 29.Be2, was even stronger.]
28...Bb5 29.Nb1 Mikhalevski,V: '!?' Mikhalevski,V: 'White prepares to transfer the knight to a3.' **29...g5**
30.Rxa8 Nxa8
[30...Qxa8 The endgame is of course completley winning for White: 31.Qxa8+ Nxa8 32.Na3 Ba6 33.Ba4 Nab6 34.Bb5 *(34.Bc6*+− with 35.Nd2 to follow and White wins a healthy pawn. *)* 34...Bxb5 35.Nxb5+−]
31.Qa7 Mikhalevski,V: '+−' Mikhalevski, V: 'Now 32.Na3 comes with decisive effect.' and the rest is just a matter of time. Black's pieces are all very passive and he has lots of weaknesses.
[31.Qa5!?+− was also strong.]
31...Nc7
[31...Qa6 32.Qxa6 Bxa6 33.Ba4 Nab6 34.Bc6 Nb8 35.Nxe5!+− is also bad for Black.]
32.Na3 Ba6 33.Ba4 Mikhalevski,V: 'White's pieces dominate the position. The threat of 34.Bxd7 Qxd7 35.Ba5 doesn't leave Black many chances.'
33...Nf6 Mikhalevski,V: 'This attempt to complicate matters fails, but Black didn't have anything better.' **34.Nxg5 Nfxd5 35.exd5 Bxg5 36.Bxd6 Nxd5 37.Bd7! Qb7 38.Be6+** Mikhalevski,V: 'This way White wins a pawn with check.'

2nd Prague Masters 2020 (6.4) 18.02.20
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 h6 7.Nbd2 0−0 8.h3 a6 9.a4 Re8 10.Qb3 A novelty from Firouzja. Frankly, I'm not sure what the queen is doing on b3, as ...Be6 is part of Black's plan, while the b7−pawn is untouchable.

[Earlier we analysed two games with the main line 10.Re1

See Nepomniachtchi,I (2740)−Mamedyarov,S (2761) Moscow RUS 2016 [Mikhalevski,V] , which reached this position by transposition.]

10...Be6

[10...Na5? runs into 11.Bxf7+ Kf8 12.Qa2+−]

11.a5! White takes space on the queenside and prevents the ...Na5 idea.

11...b5!? Navara untangles his position on the queenside.

[11...Rb8!? is also reasonable.]

12.axb6 cxb6 13.Bxe6 Rxe6 14.Rd1 d5! A typical advance in such a position, which equalises the chances. **15.exd5**

[In case of 15.Nf1 Black can play dxe4 16.dxe4 Qc7 17.Ng3 Na5 18.Qc2 Nc4 with roughly equal chances.]

15...Qxd5 16.Qxd5 Nxd5 17.Ne4

[17.Nb3 Bf8 18.d4 e4 19.c4 Ndb4! 20.d5 Re7 21.dxc6 exf3 22.Nd4 Rc8! is also equal, as Black wins the c6−pawn.]

17...Bf8 18.g4! White has to secure his knight on e4 by taking control of the f5−square. **18...a5** Meanwhile, Black frees his queen's rook from the defence of the a−pawn. **19.h4**

[19.c4 Ndb4 20.Be3 Rb8 is a little more pleasant for Black, as it's not easy for White to get rid of his d−pawn.]

19...Rd8 Black is doing just fine. He doesn't have any real weaknesses, while White's d3−pawn is relatively weak as well as the f4−square.

[19...b5! was Black's chance to set some problems. 20.Kf1 *(*or *20.g5 f5 21.gxf6 gxf6 22.c4 bxc4 23.dxc4 Ndb4 24.Ng3 f5!)* 20...a4 and White has to be accurate in order to equalise.]

20.g5 Alireza demonstrates his aggressiveness. However, this move is double−edged, as it loses control of the f5−square.

[20.Kg2 would be safer.]

20...hxg5 Navara misses a chance to set some problems.

[20...f6!? would probably be the most accurate, preparing the ...f6−f5 advance and keeping pawns on the h−file. 21.gxh6 gxh6 22.Ng3 f5! A clever move, which justifies 20...f6. The pawn is untouchable 23.Nxf5? Rf6−+]

21.hxg5 Nce7 The knight heads for g6 in order to put one of the knights on f4. So, White prevents this idea with **22.Nh4 Ng6** Nevertheless. **23.Nxg6 Rxg6 24.Kf1** Unpinning the g−pawn. **24...f5! 25.gxf6 gxf6 26.Ng3** Now the chances are equal. **26...Bh6** David exchanges the dark−squared bishops in order to secure the f4−square for his knight.

[26...Kf7 27.Ke2 Bh6 28.d4 is also equal.]

27.Bxh6 Rxh6 28.d4! Just in time. Firouzja gets rid of his main weakness.

28...Nf4 29.dxe5 Rxd1+ 30.Rxd1 fxe5 Black is more active, but the material is limited and so the chances for any side winning are tiny. **31.Ke1!** White takes his king away from a dangerous zone.

31...Kf7 32.b3

[32.Rd8!? looks logical, as White activates the rook.]

32...Ke8

[or 32...Ke6 33.Rd8=]

33.c4 White fixes black pawns on a5 and b6 and prepares to bring his king up.

33...Rg6 A waiting move. **34.Kd2** Time to use the king. **34...Rd6+ 35.Kc2**

Rxd1 36.Kxd1 The knight endgame is equal. **36...Kd7 37.Kd2 Kc6 38.Kc3 Ne6 39.Ne4 Nc5 40.Nxc5 Kxc5 41.f3** Now it's a dead draw. **41...b5 42.cxb5 Kxb5 43.Kc2 Kb4 44.Kb2 a4 45.bxa4 Kxa4 46.Kc3 Kb5 47.f4 Kc5 48.fxe5 Kd5 49.e6 Kxe6** 10.Qb3 doesn't seem to set Black any serious problems. Navara managed to solve them easily and so the ball remains in White's court. **½–½**

[22.Red1 gives Black an additional option of recapturing on d4 with the knight after Nc6]
22...cxd4 23.Red1 Nc6 Black is threatening to play 24...Qc8, unpinning the d4−pawn and thus winning the g4−pawn. **24.f3!** White has to protect the g4−pawn. **24...g6?** This move is a mistake.
[In my analysis of the aforementioned game I considered the correct 24...Re5! 25.Nf5 Now I would like to correct my own analysis with *(* In case of *25.Nd5* Black creates counterplay on the kingside by means of *h5!)* 25...Qc7! *(25...Rb5 26.Qc4 Qe6* is the line I considered, where Black is already close to equalising. *)* 26.Nxd4 Nxd4 27.Rxd4 Rxd4 28.Rxd4 h5! This is the key idea behind 25...Qc7. Despite being a pawn down Black has enough counterplay. For instance, 29.Rc4 *(29.gxh5 Rxh5 30.Qc3 Qh2+ 31.Kf2 Qh4+ 32.Ke2 Qh1 33.Qc8+ Kh7 34.Qg4 Rh2 35.Kf2 Qc1=* and so on. *)* 29...Rc5 30.Rxc5 Qxc5+ 31.Kh1 Qc1+ 32.Kh2 hxg4 33.Qxb7 Qf4+ 34.Kh1 gxf3 35.Qc8+ Kh7 36.Qh3+ Kg8 and White has to repeat moves 37.Qc8+ with a draw.]
25.Nd5± Now the weakness of the f6−square yields White the better chances.
25...Kg7?!
[25...Re6! is safer.]
26.Qb6!± A strong move. Now Black can't stop a strong exchange sacrifice on d4. **26...Re6?!** Black misses a series of beautiful tactical blows.
[26...Qc8 was better, though Black's position would remain difficult after 27.b4! Rd7 28.Rxd4 Qd8 29.Qxd8 Rexd8 30.R4d3 f5 31.gxf5 gxf5 32.a3± with a healthy extra pawn for White.]
27.Rxd4 Nxd4 28.Qxd4+ f6
[28...Kg8!? would be relatively better. Now after 29.Nf6+ Rxf6 30.Qxd7 Rxd7 31.Rxd7 b5 Black can try to defend a rook endgame a pawn down.]

29.Nc7! Re7 Black has clearly missed White's next move, but there was already nothing better.
[In case of 29...Qxc7 30.Qxd8± the rook endgame is even worse than in the previous case as the seventh rank was weakened by Black's 28th move.]
30.Ne8+!! A spectacular tactical blow! All three captures lead to the loss of an exchange. **30...Qxe8 31.Qxd8±** White has obtained a technically winning position, but some work still has to be done. **31...Qf7**
[or 31...Qxd8 32.Rxd8± with an unpleasant rook endgame.]
32.Rd6 g5 33.b3 Re8 34.Qb6 Re7 35.Qd4! Re6 36.Rd7 Re7 37.Rd5! White correctly keeps the rooks on, as Black would have more practical chances in a queen endgame. **37...Qe8 38.a4 Qc6 39.Rd6 Qc1+ 40.Kf2 Rf7**
[40...Re5 41.Rd8 Re7 42.e5!+− is also hopeless.]

FIDE World Cup (6.1) 06.12.2009

[Gelfand,Boris]

I think that this game was my best achievement in the World Cup. It is not so often that you beat such a strong player with Black by a mating attack and without him making an obvious mistake. Ich denke, dass diese Partie meine beste Leistung im World Cup war. Es kommt nicht oft vor, dass man einen derart starken Spieler als Schwarzer bezwingt, mit einem Mattangriff und ohne dass er einen offensichtlichen Fehler macht. **1.e4** Gelfand,B **1...e5 2.Bc4 Nf6 3.d3** So, no Petroff today. Sergey had already played the Bishop's Opening once against me in a rapid game in Nice in 2008. Also, kein Russisch heute. However, it is always nice to change from time to time. Damals hatte ich 3... c6 gezogen, ebenso wie dreimal im Jahr 2009 (darnter zweimal in Khanti Mansiysk). Aber eine Abwechslung von Zeit zu Zeit zu tut immer gut. **4.Nf3 Be7 5.0−0 0−0 6.Bb3**

Qatar Masters Open 2014 (6.18) 1.12.14
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.b4 A well−known line, which is out of fashion at the grandmaster level. You can mostly find some games of Jobava.
[5.d3 is more common.]
5...Bb6 6.d3 d6 7.Nbd2 A side line again. White wants to save a tempo on advancing the a−pawn.
[7.a4 is the main line by far. Movsesian, S (2700)−Wang Yue (2709)/Ningbo CHN 2011/ [Mikhalevski, V]. It was also played by Jobava.]
7...0−0
[The immediate 7...Ne7 with the idea to meet 8.Bb3 with c6 makes sense.]
8.0−0
[8.Bb3!? with the idea of 9.Nc4 prevents a retreat of the dark−squared bishop to c7.]
8...Ne7 9.Bb3 c6 Black is saving the dark−squared bishop from exchange.
10.Nc4 Bc7 11.Bg5 This pseudo−active move doesn't promise any advantage. Moreover, it's White who has to be accurate to retain equality.
11...Ng6 12.g3 A strange idea. White is covering the f4−square, but the weakening of the light squares yields Black at least decent play.
[Earlier White played mostly 12.Nh4 , which Black can answer by means of either d5 *(* or *12...Nf4 13.Bxf4 exf4 14.Nf3 d5 15.exd5 cxd5∓* Macieja, B (2634)−Fontaine, R (2527)/Istanbul 2003. *)* 13.exd5 cxd5 14.Ne3 Nf4!∓ Dgebuadze, A (2544) − Hector, J (2575)/ Germany 2012, with slightly better chances for Black in both cases.]
12...h6 13.Bxf6 Qxf6 14.Ne3 White is preventing 14...Bg4. **14...Bb6**
[I prefer 14...Bh3 15.Re1 a5! 16.a4 axb4 17.cxb4 Bb6 with a slight edge for Black.]
15.Kg2 Baadur is ignoring the positional threat of 15...a5. He seems to have his own vision of these positions.
[15.a4 looks more logical, in order to answer a5 with 16.b5]
15...a5! 16.a4 axb4 17.cxb4 Usually this exchange is favourable for Black as the d4−square is getting weaker. That's why I recommended 15. a4. However it's far from being easy to prove the incorrectness of White's play. Maybe because there is nothing wrong?
17...Bd7
[17...Ne7!? 18.a5 Ba7 looks logical as it prevents White's idea of b5. Moreover, Black can try to prepare d5.]
18.a5 Ba7 19.Qe2 Rfe8
[19...Ne7 still deserved attention.]
20.Rfc1 Jobava uses the opened c−file for one of his rooks. **20...Nf8**
[20...d5!? was interesting. For example, 21.b5 *(21.exd5?* is bad due to *Nf4+! 22.gxf4 exf4∓* Black wins back a piece with dividends. *)* 21...dxe4 22.dxe4 Bd4!

23.Ra2 Bxe3 24.Qxe3 cxb5 25.Bd5 Bc6 26.Bxc6 bxc6 27.a6 with a position of dynamic equality.]

21.b5! White is fighting for the d5−square. **21...Bc5?!** An inaccuracy.

[Black should have accepted the sacrifice. 21...cxb5 22.Nd5 Qe6! It looks scary to put the queen in such a dangerous position, but an intermediate check from h3 helps Black. 23.Nc7 Otherwise Black keeps an extra pawn. Qxb3 24.Rcb1 Qc3 25.Rc1= with a repetition.]

22.a6 bxa6? A serious mistake, which leads to a big advantage for White.

[It wasn't easy to find the best defensive move. 22...Ra7! The main point of this move is to have the f7−point protected. 23.axb7 Rxb7 24.bxc6 Rxb3 25.cxd7 Nxd7 26.Nd5± with just a slight edge for White thanks to the weakened d5−square.]

[22...cxb5?! is dubious, as after 23.axb7 Rab8 24.Bd5± the b7−pawn is too strong.]

23.bxc6 Bxc6? After this recapture Black is virtually lost.

[23...Be6 allowed him to stay in the game, although White enjoys a clear edge after 24.Nd5±]

24.Ng4 Qe7?!

[24...Qg6? is even worse. 25.Rxc5! dxc5 26.Nfxe5 Rxe5 27.Nxe5 Qf6 28.Bxf7+ Kh8 29.Nxc6+− with a decisive advantage.]

[24...Qd8! was necessary, although it shouldn't save Black. 25.Nfxe5!? This is the difference between 24...Qd8 and 24...Qe7, with the queen on e7 this move wouldn't be working. *(25.Rxc5 dxc5 26.Ngxe5 Rxe5 27.Nxe5 Be8±* is worse for Black, but he is still in the game. *)* 25...dxe5 26.Rxc5 Qd6 27.Qf3! Ra7 *(27...Qxc5?* leads to a forced mate. *28.Qxf7+ Kh7 29.Nf6+ Kh8 30.Qg8#)* 28.Raa5±]

25.Rxc5! dxc5 26.Ngxe5 Now Black can't protect the f7−square, but the move is still slightly inaccurate.

[26.Nfxe5! was more accurate, as it prevents 26...Qf6, which is possible after 26.Ngxe5. Rec8 27.Bxf7+ Kh7 28.f4 Be8 29.Bd5 with the idea Ra7? 30.Nxh6!! and now either Kxh6 *(*or *30...gxh6 31.Qg4+−)* 31.Qg4+− and White wins due to the hanging position of the rook on c8 and a threat of mate.]

26...Kh7

[26...Qf6! was the best defence. 27.Bxf7+ Kh7 28.Bxe8 Bxe8± and Black is still in the game.]

27.Nxf7! Now White is threatening 28. N3g5! **27...g6** Covering h5 Black prevents White's threat, but weakens h6. **28.Qe3! g5 29.h4!+−** White's attack is decisive. **29...Qf6 30.hxg5!** Winning in style. **30...Qxa1 31.g6+! Kg8 32.Nxh6+ Kh8 33.Nf5 Ra7 34.Bf7**

[34.Qh6+ leads to a forced mate after Nh7 35.d4!+−]

34...Nh7 35.g7+ A convincing win from the Georgian GM. The line with 8.Nd2 was insufficiently studied and deserves more attention than it attracted before. Nevertheless, Black shouldn't have any problems.

1−0

Qatar Masters Open 2014 (9.14) 04.12.14

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5 d5 7.Be2

A pet line of the Georgian GM, which started to gain popularity recently thanks to his efforts.

[7.Bb5 is much more common.]

7...Ne4 8.cxd4 Bb6

[8...Bb4+ is the main alternative. You can see how Baadur crushed a top 10 player in this line if you find Jobava, B (2702)−Karjakin, S (2786)/Loo RUS 2013/ [Mikhalevski, V] in our PGN archive.]

9.Nc3 Jobava has already played this line against Malakhov in 2012, although without much success. Probably this time he prepared an improvement. Quite surprisingly this position is already rather rare, although it may transpose into 9.0−0.

[9.0−0 occurred in Jobava, B (2730)−Kamsky, G (2744)/Amsterdam NED 2012.[Mikhalevski, V].]

9...0−0 10.0−0 Bf5!? One of the most logical moves. Black supports his knight on e4 and prepares ...f6, which is typical for this type of position. That's also what Malakhov played in the aforementioned game.

[Black's alternatives include 10...Bg4] [and 10...Be6 Both moves were tested at a high level.]

11.Na4 f6 12.Be3!? A prepared improvement upon 12.a3.

[12.a3 fxe5 13.Nxb6 axb6 14.Nxe5 Nxe5 15.dxe5 and here instead of Nc5 in Jobava, B (2734) −Malakhov, V (2700)/Burgas 2012. *(* Black could have played *15...d4!* with a good position. Probably that's why White started with 12.Be3. *)*]

12...Qe7! This seems to be the most accurate reaction. Black is trying to provoke 13. exf6.

[12...fxe5 can be answered by 13.Nxe5! *(* After *13.Nxb6 axb6 14.Nxe5* Black isn't forced to trade knights. Instead *Qe7* deserves attention. *)* 13...Qe7 *(* or *13...Nxe5 14.Nxb6 axb6 15.dxe5* with a slight edge for White thanks to the bishop pair. *)* 14.Qb3! Rad8 15.Nxc6 bxc6 16.Rac1± and pressure along the c−file yields White the upper hand.]

13.exf6 Rxf6 14.Rc1 Raf8?!

This natural move has a tactical flaw.

[Black should have played 14...Rg6 15.Kh1 Re6 with the idea of 16... Nxf2! 16.Qb3 Rd8 17.Nxb6 axb6 18.Rfe1 h6 19.Kg1 with roughly equal chances.]

15.Nxb6!?

[Starting with 15.Ne5!? was also possible as Nxe5 16.dxe5 Qxe5 17.Nxb6 axb6 18.Bd4± is still unsatisfactory for Black.]

15...axb6 16.Ne5!± The key. Now the knight is untouchable due to the hanging position of the rook on f6. that's why 14...Rg6 was better than the game.

16...h6! The best defence as White was threatening 17.f3 and 18.Bg5. So the g5−square has to be covered.

[16...Nxe5?! 17.dxe5 Qxe5 18.Bd4± loses an exchange.]

17.f4?! White could do better than this.

[He could either have played 17.a3! Rd8 18.f4±]

[or 17.f3 Ng5 18.Re1 Re6 19.f4± with a better version of the game in both cases]

17...Nd6! Vacating the e4−square for the bishop. **18.Bf2!?** White is bringing the bishop to h4, but it turns out that the move can be ignored.

[18.Re1!? Be4 19.Bg4 Nf5 20.Bf2 allowed White to retain a slight edge.]

18...Be4! Another precise move. **19.Bh4 g5! 20.fxg5**

[or 20.Nxc6 bxc6 21.fxg5 Rf5! An important move, which allows him to maintain the balance. 22.Qe1 hxg5 23.Bg3 Bxg2!!

A) or 24.Rxf5 Nxf5 25.Bg4 *(25.Kxg2?* loses to *Ne3+ 26.Kg1 Qe4−+)* 25...Be4 26.Bxf5 Rxf5 27.Rxc6 Qe8 28.Rxc7 Qb5 29.b3 Qd3 30.Be5 Rxe5 31.dxe5 Qd4+ 32.Qf2 Qa1+ 33.Qf1 Qd4+ with the perpetual.;

B) 24.Kxg2 Qe4+ 25.Kg1 Qe3+= is equal as White can't block the check due to the hanging rook on c1.;

C) 24.Bxd6 cxd6 25.Rxf5 Rxf5 26.Kxg2 Qe4+ 27.Kg3 Qe3+ 28.Kg2 Qe4+= with a draw.]

20...Rxf1+ 21.Bxf1 Nxe5 22.dxe5 Nf5! An important intermediate move. **23.Bf2 hxg5=** Now the weakening of the kingside is compensated by the strong position in the centre. **24.Qd2 c5!?** Black is showing his trumps. **25.b4!?** Baadur is provoking a weakening of Black's pawn structure. **25...c4!** **26.Bxb6 Qxe5!?** An interesting idea. Black is allowing Qxg5 with check in the hope to exploit the g−file for attack.

[26...Rf7!? with the idea of 27...Qxe5 deserved attention. 27.Qc3 Qe6 28.Bf2 Nh4]

27.Qxg5+ Kf7?! This retreat is slightly inaccurate.

[After the correct 27...Kh7! with the idea of 28... Rf6! Black creates sufficient counterplay for a pawn. White can also force a draw by means of 28.Qh5+ Kg7 29.Qg5+]

28.Be2! Probably Black missed this idea. Now White is slightly better. **28...Ke6**

[28...Rh8! was necessary. 29.g3 Qe7 30.Qf4 Qf6 31.Bc5 *(31.Bf2?!* can be met by *Rxh2 32.Bf3 Rxf2! 33.Kxf2 Qb2+ 34.Kg1 Qd4+=)* 31...b6 32.Bf2 *(32.Qc7+ Kg6 33.Qxb6 Qxb6 34.Bxb6 Nxg3 35.Bd1 Nf5=)* 32...Rxh2 33.Bf3 Rxf2 34.Kxf2 Qb2+ 35.Kg1 Qd4+ *(35...Bxf3 36.Qxf5+ Kg7)* 36.Kf1 *(36.Kg2 Qb2+ 37.Kf1 Bxf3 38.Qxf5+ Kg7 39.Qc2 Qf6* with sufficient compensation. *)* 36...Qd3+ 37.Be2 Qd4 with sufficient compensation.]

29.Bc5! Qf6? This move is already a serious mistake and leads to a clear edge for White.

[29...Rh8! was correct. 30.g3 Qg7 31.Qxg7 Nxg7 32.Bd4 Rg8= with the subsequent 33...Nf5 and quite surprisingly Black's counterplay is sufficient.]

30.Qg4!± Now White is threatening both 31.Bxf8 and 31.Bxc4. **30...Qb2?** As usually happens two mistakes follow each other.

[30...Rh8! was still necessary, although after 31.Bxc4 Qh4 32.Qxh4 Nxh4 33.Re1 Ke5 34.Bf1± White is already clearly better.]

31.Rf1 This is good enough for a win.

[However, 31.Re1! provoking Qc3

and only then 32.Rf1+− would be more accurate.]

31...Rf7

[31...Rc8 is a better practical chance, with the idea 32.Bf3 *(*or *32.Qg6+ Qf6 33.Qxf6+ Kxf6 34.g4 Rg8 35.Kf2±)* 32...Qg7! 33.Qf4 Qh6**±**]

32.Bxc4?! White is missing a clear win.

[After 32.Qg6+! Qf6 33.Qg8! Kd7 34.Qb8!+− Black is helpless.]

32...Qxg2+ 33.Qxg2 Bxg2 34.Re1+!

[After the erroneous 34.Kxg2? dxc4 the passed pawn yields Black sufficient counterplay.]

34...Kf6 35.Bd3 White is a pawn up and has the bishop pair, so the game enters a technical phase. Slowly but surely the Georgian GM leads the game to its logical conclusion. **35...Bh3 36.Kf2 Rh7 37.Bd4+ Kg5 38.Rg1+ Kf4 39.Bb2 Rf7 40.Re1 Kg4 41.Rg1+ Kf4 42.a4 Nd6 43.Rg7 Ne4+ 44.Ke2 Rf8 45.Bd4 Bg4+ 46.Ke1 Nd6 47.Bc5 Re8+ 48.Kd2 Ne4+ 49.Bxe4 dxe4 50.Rf7+ Ke5 51.Rxb7 Rd8+ 52.Ke1 Bf3 53.Be3 Rd3 54.Rb5+ Ke6 55.Bf4 Ra3 56.a5 Kf6 57.Kd2 Rd3+ 58.Kc2 Bd1+ 59.Kc1 Be2 60.Re5 Rd1+ 61.Kc2 Rd7 62.Rc5 Bd1+ 63.Kb2 Rd3 64.Rc3 Rd4 65.a6 Rxb4+ 66.Kc1 Bf3 67.Rc6+ Kf7 68.Be3 Bg4 69.a7 Ra4 70.Rd6 Ke7 71.Rd4 Ra6 72.Rxe4+ Be6 73.h4 Kf7 74.Re5 Rc6+ 75.Kb2 Rc8 76.h5 Ke7 77.h6 Kd6 78.Bf4 Kd7 79.Rxe6**

White's novelty 12.Be3 leads to a playable, but roughly equal position. Black's play can be improved by means of 14...Rg6 instead of 14...Rf8.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Bg5 h6 6.Bh4 Be7 7.Bg3 d6 8.a4 The main line.

[Earlier we considered the rare 8.c3 Oparin,G (2652) −Mikhalevski,V (2552) European Online Club Cup Group E 2021 [Mikhalevski,V]]

8...a5 An extremely rare move, which has the point of stopping an advance of the a−pawn.

[8...0−0 , which I considered in the annotations to my game against Oparin, is the main continuation.]

9.0−0 This is new in this exact position, but it transposes to an early 0−0 after Black's next move.

[9.c3 0−0 10.Nbd2 transposes to a slightly more popular position.]

9...0−0

[9...Nd7!? delaying short castles and preparing an offensive on the kingside was interesting. For example, 10.h3 g5 11.Nc3 h5 12.Nd5 g4 13.hxg4 hxg4 14.Nh2 Nf6 15.c3! Nh5 16.Nxg4 Be6 17.d4! Qd7 18.Be2! 0−0−0! with the initiative for a pawn.]

15...Bxg5 16.Nf3 Bf6 17.Qb3

A multi−purpose move, which takes control of the d5−square, vacates the d1−square for the a1−rook, and attacks the b7−pawn. **17...Qd7** A logical reply. Black protects the b7−pawn indirectly and connects rooks. **18.Qb5** White pins the c6−knight.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.a4 A pretty rare move order, although positions with a4 are rather popular in modern practice.
[6.Bg5 h6 7.Bh4 a6 8.a4 leads to the position in the game with the a−pawn on a6, instead of a5. Here Black prefers Ba7]
6...a5 7.Bg5 This idea is more popular without an inclusion of the moves a4 and a5.

B) 10...Nh5 delaying short castling might have been a safer choice. It's important that 11.Nxe5? doesn't work in view of Nxg3 12.Nxc6 Qf6! and Black wins material. *(12...Bxf2+! 13.Kxf2 Nxh1+−+* also works. *)*]
10.Nbd2
[10.0−0 would transpose into a more popular position. See Vachier Lagrave, M (2795)−Gledura,B (2602) Chartres FRA 2017 [Mikhalevski,V]]
10...Nh5! 11.h3! An interesting reaction. White wants to ask what the knight is doing on h5, as opening of the f−file after 11...Nxg3 seems to favour White.
[11.Nxe5? again runs into Nxg3 12.Nxc6 *(12.hxg3* is better, but retains an edge after *Nxe5 13.d4 Nxc4 14.Nxc4 d5! 15.Ne3 Be7 16.Rxh6 Ra6!∓)* 12...Bxf2+ 13.Kxf2 Nxh1+−+]
11...Qf6! A useful thematic move, which supports the knight on f4. **12.Qe2** White gets ready for long castling, while the knight on f4 will be eliminated instantly.
[12.Bh2! is a more accurate move order, which avoids 12...Ne7, which could have happened in the game. Now after Nf4 13.Bxf4 gxf4 14.Qe2 Kh8 we transpose to the game.]
12...Kh8 A logical move. Before brining the knight to f4 Black removes the king from the g−file.
[12...Ne7! Grischuk misses a strong idea. The knight is heading for f4 in order to exploit the position of the queen on e2. 13.Bh2 *(13.Nh2 Qg6* is also good for Black. *)* 13...Ng6 14.Nxe5! dxe5 15.Qxh5 Qxf2+

16.Kd1 Kg7 17.Qf3 Bd7! 18.Kc2 Rae8 with a slight edge for Black.]

13.Bh2 Nf4 14.Bxf4 gxf4 15.g4!? White gets rid of a potential weakness on g2. At the same time White prepares a kingside attack. **15...Bd7?** The first serious mistake. Grischuk shouldn't have left the pawn on g4.

[15...fxg3 is a necessary reaction. After 16.fxg3 Ne7 17.Kd1 Qg7 18.Kc2 c6 19.g4 d5 20.Ba2 Ng6 the position would be roughly equal.]

16.0−0−0± White is better, although it might not be easy to prove it. **16...Rg8 17.Rdg1** Harikrishna goes for a direct attack.

17...Rg7 18.Rg2 Rag8 19.Rhg1 White doubles rooks on the g−file in order to support the g4−pawn and thus to prepare the h3−h4 advance.

[19.Bb5!?⩲ deserved attention.]

19...Ba7

[In case of 19...Nd8 20.d4! is strong. exd4 21.g5! hxg5 *(21...Qe7 22.cxd4±* is better for White who has a strong centre. *)* 22.e5! Qh6 *(22...dxe5? 23.Ne4 Qb6 24.Nxc5 Qxc5 25.Nxg5+−* is bad for Black. *)* 23.cxd4 d5 *(23...Bb4 24.Ne4±)* 24.Bxd5 Be7 25.Qc4± and Black is under pressure.]

20.Nh2? White plans to prepare h3−h4 and so he protects the g4−pawn, but Black has a strong reply.

[20.Bb5! was better. This way White pins the knight, while any exchange of the light−squared bishops removes an attacker from the g4−pawn and allows White to play h4 without moving the knight from f3.]

20...Nd8! 21.h4? It may look promising to open the h−file, but Alexander assesses the position correctly.

[21.Qd1 protecting the a4−pawn was better. Ne6 22.h4 Qxh4 23.Nhf3 Qf6 24.Rh1 Rh7 25.Kb1= with sufficient compensation for the pawn.]

21...Qxh4! 22.Ndf3 Qe7!∓

23.g5? Now this move comes without tempo, which allows Black a strong intermediate move. It seems that both players missed 23...Bh3. **23...Ne6??** A losing move.

[23...Bh3! wins an exchange and leads to the opposite outcome. 24.Ng4 Rxg5! 25.Nxg5 Qxg5 and the threat of 26...f3 forces a king move. 26.Kb1 Bxg2 27.Rxg2 h5 28.Ne3 Qh4−+ with two extra pawns for Black.]

24.Ng4! The Russian player has clearly underestimated this move. **24...hxg5 25.Nh6!+−** Now he loses material and his position collapses. **25...Rh7 26.Nxg8 Kxg8 27.Nxg5 f3 28.Qxf3** An interesting theoretical battle, which demonstrates a few important ideas in the lines with Bg5.12.Bh2 is a more

accurate move order, while 15...fxg3 is a must.

I considered this idea in my annotations to Karjakin's game given below. I was very surprised when I realised that it has been tested at least 15 times since then, including some high−profile games and with Ding Liren on the black side again.
[Earlier we considered 10...Ba7 Karjakin,S (2769)−Tomashevsky,E (2728) Wijk aan Zee NED 2016 [Mikhalevski, V]]
11.Nh4!? An interesting idea. This move has been seen only once. White's idea is to free the f3−square, which can be occupied either by the d2−knight or the queen, while the knight is heading for f5.
[Carlsen played the idea I considered, while analysing Karjakin's game, 11.Nf1 It was also tested in most of the other games involving 10...Qb8. Qa7 12.Be3 Bxe3 13.Nxe3 Ne7 This is exactly the line I gave at the beginning of 2016. 14.a4 Ng6 15.Bc4 Bxc4 16.Nxc4 Qa6 17.g3 Rfe8= with equal chances in Carlsen,M (2837)−Ding Liren (2774) Saint Louis USA 2017]
11...Ne7!? The most natural. Black doesn't want to see White's knight on f5.
[Black can also consider one of the following alternatives: 11...a4!?]
[11...Qa7!? 12.Qf3 Ne7
in both cases the chances are roughly equal.]
12.Ndf3!
[12.Nf1?! would be dubious in view of Qa7 13.Be3 Bxe3 14.Nxe3 a4! 15.Bc4 Bd7! 16.a3 b5 17.Ba2 c5 with a slight edge for Black.]
12...c6 This move seems to help White.
[12...Qa7!? is the correct way of treating this position. 13.d4 Bb6?! *(13...exd4! 14.cxd4 Bb6=* with the idea of 15...d5 was better. *)* 14.Be3! promised White the upper hand. *(14.g4?!* Rakotomaharo,F (2431) −Gonda,L (2490) Budapest HUN 2017 *)*]
13.Ba4 Qc7 Black connects his rooks.
[13...Ng6!? deserved attention, as Black isn't afraid of doubling pawns. 14.d4! Bb6 15.Nxg6 fxg6 16.dxe5 dxe5 17.Bb3 Qe8 18.Be3 Bc7 and Black is close to equalising.]
14.d4 White creates a favourable tension in the centre. **14...Ba7**
[Now 14...exd4?! is dubious as after

15.cxd4 Bb6 16.Bf4! Black can't play 16...d5, while g5?! is strongly met by means of 17.e5! gxf4 18.exf6 Nd5 19.Ng5! Nxf6 20.Nxe6 fxe6 21.Rxe6±]

15.Bc2! Suddenly Black finds himself under some pressure. **15...Rad8**

[15...Ng6!? deserved attention. 16.Nxg6 fxg6 17.Be3 Rfe8 18.a4 g5 with a slightly worse, but reasonable position for Black.]

16.Be3! This is the reason. Now the bishop on a7 is hanging. **16...d5?!** An interesting idea, but it seems that White is better prepared for any opening of the position as the knight on e7 is misplaced.

[16...Ng6! was still a good option.]

17.exd5!

[17.Nxe5 is less accurate. dxe4 18.Qc1! c5! 19.Bf4 Nh5 20.Bxh6 cxd4 21.Bxe4 dxc3 22.bxc3 Ng6! 23.Bxg6 fxg6 24.Be3 Qxe5 25.Bxa7 Qf6 26.Nf3 Nf4 with some counterplay.]

17...exd4 18.Nxd4!±

[18.Bxd4? Bxd4 19.Nxd4 Bxd5 is equal.]

18...Bxd5 19.Qe2?! Bacrot goes astray. We shoudln't forget that this was a rapid game and so mistakes are unavoidable.

[19.Qc1! was the correct follow−up, moving away from the d−file and targetting the h6−pawn. Bb8! 20.g3 Qd7! 21.Nhf5! Rfe8 22.Bxh6! Nxf5 23.Bxf5 Rxe1+ 24.Qxe1± and the strong bishop on d5 doesn't fully compensate the pawn.]

19...Rfe8! Black starts fighting for the initiative, as there is an unpleasant x−ray on the e−file. **20.Rad1! Bb8! 21.g3 c5!** Forcing the knight away from a nice position on d4. **22.Nb5 Qc8! 23.c4! Bc6 24.Rxd8! Rxd8 25.Kh2 Re8! 26.Qd2! Qd7!** Both sides are up to the task and the position remains balanced.

27.Bxh6!? An interesting way to complicate matters, although it wasn't necessary.

[27.Nc3!?=]

[29.Nxg6 fxg6 30.Qxg6+ Qg7 31.Rxe8+ Bxe8 32.Qxg7+ Kxg7 is slightly better for Black.]

29...Nh5! The only move again.

would again have to spend two tempi just to get back to the starting position with Be7 and Rf8. Dubov verzichtet bewusst darauf, erst noch Lf8 zu spielen, da ihm bewusst ist, dass nach Lxe6 er sowieso mit dem Bauern zurückschlagen muss. Da ein wesentlicher Teil seines Gegenspiels anschließend über die f−Linie läuft, müsste er wiederum zwei Tempi aufwenden, nur um zur Ausgangsstellung mit Le7 und Tf8 zurückzugelangen.

Ich hab diesen Zug zwar in einer früheren Partie zwischen MVL und Dubov leicht kritisiert, da er die f−Linie verstellt, aber vielleicht kann er manchmal auch ganz nützlich sein, um etwas Stabilität in die Stellung zu bringen un d5 weiter zu unterstützen. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 h6 7.Re1 0−0 8.h3 Bb6 Since both Nbd2 and a4 was delayed Black can afford to retreat the bishop without pushing his a−pawn. Earlier this year the text was tested by Caruana. **9.Nbd2 Ne7 10.a4**
A rare option, which was tried earlier this year by Svidler. White creates a direct threat of 11.a5.
[Earlier we considered 10.d4 in Alekseenko,K (2698)−Caruana,F (2842) Yekaterinburg RUS 2021 [Mikhalevski,V], which didn't give White any advantage.]
10...c6 This move is part of Black's plan. First of all, it stops an advance of the a−pawn. Second, the text supports the ... d6−d5 advance. **11.d4!** As we already discussed on many occasions White should try to create tension in the centre.
11...Ng6 Now the f6−knight is protected by the queen on d8 and so Black's idea is to play 12...exd4 13.cxd4 d5.
[When the knight is still on e7 11...exd4 12.cxd4 d5?! is strongly met by 13.e5!±]

14.Nxe5 dxe5

15...Be6! 16.Nc4 Bxc4 I was surprised to learn that this way of playing is

Black's best. **17.Bxc4 a5!** A useful move before removing the queen from the d−file.

[17...Qe7?! would be wrong in view of 18.a5±]

18.Qe2! An important move before playing 19.Bd2 as the f2−pawn may need protection. **18...Qe7 19.Bd2 Rad8 20.Red1** Esipenko is planning 21.Be1 in order to open the d−file, but in fact it would be better to retreat the bishop to c1 and so 21. Rad1 should have been preferred.

[20.Rad1!? looks more natural, with the idea of Rd7 21.Bc1 Red8 22.Rxd7 Nxd7 23.Kh2 Nf6 24.Rf1± and Black is under some pressure.]

20...Rd7! Magnus doubles rooks in order to exchange them. **21.Be1 Rxd1** A little premature, although the World Champion was sure that he will hold the position without rooks

[21...Red8! looks stronger. 22.Rxd7 Rxd7 and White doesn't have any real winning chances.]

22.Rxd1 Rd8 23.Rb1 White transposes to the same type of position Black could get after 21...Red8.

[It would be more challenging to play 23.Rxd8+ Qxd8 24.g3± with slight, but long−term pressure.]

23...g6!? Black vacates the g7−square for the king.

[The immediate 23...h5!? with the idea of fixing the kingside by means of 24...h4, deserved attention.]

24.Kh2 Kg7= Now the position is equal. **25.Bb3!?** White prepares to trade rooks by means of 26.Rd1. **25...h5! 26.Rd1 Rxd1 27.Bxd1 h4!** Black fixes the h3−pawn and secures his position. **28.Qd3 Qe6 29.b3 Qe7 30.Kg1 Nd7 31.Be2 Nc5 32.Qc2 Qf6 33.Bf3 Qd8 34.Be2 Qf6 35.Bf3 Qd8 36.Be2** Neither side can make progress and so a draw was agreed. The 13.dxe5 novelty doesn't seem to promise much if it's answered by means of 13...Nxe5 14.Nxe5 Rxe5! 13.Qc2!? seems to be a better attempt to set some problems.

11.b4!? This is the most fashionable and challenging modern approach to this position. White is grabbing some space on the queenside and still keeps their knight on d2. If Black later pushes the d5 and b5 pawns, the white knight will target the c5 square on b3.
[11.Nf1 From this move order, we can transpose back to the game. Be6 12.Bxe6 Rxe6 13.b4!? Otherwise black has an option to play a6−a5. d5 14.Qc2 Qd7 − 11.b4]

10...a4!? It makes sense to take some space on the queenside. **11.h3** Peter covers the g4−square to avoid any ...Ng4 ideas.

[11.Ng3 deserved attention as well.]

11...Bb6!? Cheparinov avoids the d3−d4 idea, although it wasn't yet a threat.

[Another logical way of playing after 11.h3 would be 11...Nh5!? in order to bring the knight to f4. 12.Be3 Nf4 13.Kh2 Rf7!?

12.Be3 An attempt to gain a tempo based on Black's last move. **12...Bxe3 13.Rxe3 Qe8** Probably a little slow.

[The strongest move was Der stärkste Zug war 15.d5!+− My intuition told me that White would get great advantage with it, but nevertheless I refrained from it, for the following reasons:1) A few moves ago I calculated similar variations − and now I didn't realize that in the current position the whole thing looks significantly different. I

briefly considered the following line: Meine Intuition sagte mir, dass Weiß damit großen Vorteil bekommt, aber trotzdem verzichtete ich darauf, und zwar aus folgenden Gründen: 1) Vor ein paar Zügen berechnete ich ähnliche Varianten − und jetzt erkannte ich nicht, dass in der aktuellen Stellung das Ganze bedeutend anders aussieht. Ich übelegte mir kurz folgendes Abspiel: Na7 16.Bxa6 Bxh3 17.Bxb7 Bc8 18.a6 and in view of the opponent's options 18...c6 or 18...Nd7 I was anything but sure that I should go for it. und war mir angesichts der gegnerischen Möglichkeiten 18...c6 bzw. 18...Sd7 alles andere als sicher, dass ich mich darauf einlassen soll. Just that was the case now. I thought that after Black covers the f5− pawn with the queen or the rook, his position will simply collapse after further 23.exf5 Bxf5 24.Bxf5 along with (after the opponent's recapture on f5) 25.Nd4, 26.f4. But in doing so I overlooked a move after which Black will be absolutely fine. Oft geschieht, dass man sich in die Stellung vertieft, lange nachdenkt und... den allerschlechtesten Zug macht. Gerade das war jetzt der Fall. Ich glaubte, dass nachdem Schwarz den Bauern f5 mit der Dame oder mit dem Turm deckt, wird seine Stellung nach weiterem 23.exf5 Lxf5 24.Lxf5 nebst (nach dem gegnerischen Zurücknehmen auf f5) 25.Sd4, 26.f4 einfach zusammenbrechen. 28...Qg6 29.Rf1? Originally I wanted to take immediately on d5, but then my head failed again. Here, by the way, it can be explained by the fact that at that moment I already had little time and unconsciously wanted to end the game quickly with a king attack. Nervous tension was mainly responsible for my decision, but the less than optimal form I had in this tournament also played a role. Ursprünglich wollte ich sofort auf d5 nehmen, aber dann hat mein Kopf wieder versagt. Hier kann man das übrigens damit erklären, dass ich zu diesem Moment bereits wenig Zeit hatte und unbewusst die Partie schnell mit einem Königsangriff beenden wollte. Vor allem war für meine Entscheidung die Nervenanspannung verantwortlich, aber meine nicht gerade optimale Form, die ich bei diesem Turnier hatte, spielte auch eine Rolle.

36.Rg3? Probably the key moment of the game. Because of time pressure, I wanted to buy time with Rf3−g3−e3 first and only then look for a continuation that would decide the battle. But that wasn't the best idea − although the position still remains won, now the Rf7 is no longer covered by the other rook, and now you have to work hard to calculate the concrete variations accurately − and with only seconds on the clock. Wohl der Schlüsselmoment der Partie. Wegen Zeitnot wollte ich zuerst mittels Tf3−g3−e3 Zeit gewinnen und erst dann nach einer Fortsetzung suchen, welche den Kampf entscheiden würde. Das war aber nicht die beste Idee − obwohl die Stellung immer noch gewonnen bleibt, ist nun der Tf7 von dem anderen Turm nicht mehr gedeckt, und jetzt muss man sich anstrengen, um die konkrteten Varianten genau zu berechnen − und das mit nur Sekunden auf der Uhr.

China had been our main competitor in the Asian championship and needless to say this was a very crucial match for the final standings. **1.e4** Vidit,S **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.c3 0−0 6.0−0 d5** The most direct and concrete attempt to equalise against the Italian. The resulting position leads to the e5−point becoming the main battlefield. Most of the following moves from both sides either directly or indirectly influence control of the e5−point. **7.exd5 Nxd5** White already has a choice to make here. He has a wide variety of options at his disposal, leading to various kinds of strategically complex, yet balanced positions. **8.Nbd2**

Tata Steel−A 84th (8) 23.01.2022

[Giri,Anish]

1.e4 Giri, Anish Giri, Anish Perunovic, Milos Giri, Anish It is very rare these days to even be able to predict the first move of the opponent. Here too, it was hard to guess, as last year in Wijk aan Zee Andrey played 1.d4 against me, which back then too, was a small surprise. **1...e5 2.Nf3 Nc6 3.Bc4** Italian is a frequent guest in practice of both my opponent and myself. **3...Nf6 4.d3 Bc5 5.c3 0−0 6.0−0** Both sides have a lot of different move orders in the Italian. This particular one allows the d5 Italian, which is a fascinating sub−topic within the Italian itself. **6...d5 7.exd5 Nxd5** There are tons of games and analysis revolving around this tabia. Andrey decides to follow one of the main paths, the trend that was started by Van Foreest few years ago and the one that brought me some points on the white side as well. **8.Re1 Bg4 9.Nbd2 Nb6 10.h3 Bh5 11.Bb3** This was the twist back then. White offers a trade of e5 and d3 pawns. **11...Qxd3 12.Nxe5 Qf5** The endgame after 12...Bxd1?! is no fun, as I managed to prove in my game against Harikrishna, from the very memorable Shenzhen 2019. **13.Nef3** Now the pawn structure is rather symmetrical, but the main question is− does White threaten g4 here?

13...Rfe8!? A rare move, but an option that has been around for a while. Most top games go 13...Rad8, after which grabbing the bishop with 14.g4 is even

less attractive, but it does allow 14.Qe2! "grabbing" the e−file.

[13...Rad8 (Perunovic,Milos) − 146/106]

14.g4 Here this is pretty much forced. White has no other way to untangle his pieces. **14...Bxg4 15.hxg4 Qxg4+ 16.Kh1 Ne5** A fancy looking move, but not the one I can take creative credit for. It is suggested by the computers, but also has been played before in a correspondence game. When Andrey was thinking a little bit here, I started to wonder whether he contemplates allowing a forced draw with 17.Nxe5 Qh3+ 18.Kg1 Qg3+ 19.Kh1. On the one hand, a bailout against a well prepared opponent is natural, but on the other hand I suspected he was somewhat familiar with the position as well, not to mention the fact that playing a double edged position is in a way an opportunity. **17.Nh2** This is the winning attempt. **17...Qg6 18.Bc2 Nd3 19.Bxd3 Qxd3** Curiously, so far this has all been included in my Chessable course for White. I had no intentions to hide this important subvariation, not to mention we are still following the correspondence game. I believe I recommend here to not deviate from that one and follow with 20.Nb3. **20.Ndf3** Perunovic,Milos: 'N' One of the three ways to aim for an endgame (20.Nb3 and 20.Ndf1 are alternatives).

[20.Nb3 Perunovic,Milos: 'Diagram

20...Qxd1 21.Rxd1 Bxf2 This endgame with 3 pawns in one version or the other was something I had expected to get after 13...Rfe8!?. Now it is on White to mobilize his pieces and pose some problems, because if he allows Black to consolidate and trade some stuff, then the three pawns will eventually get moving. **22.Bf4** I had expected White to activate his h2 knight with Ng4 here or on the next move. **22...c6 23.Rd2?!** Not seeing anything clear cut, White chooses the wrong path of allowing trades. Instead, he should try to mobilize his light pieces, starting probably with 23.Ng4 and then try and create some threats on the kingside, which is easier said than done.

[⌓23.Ng4 Perunovic,Milos Bc5 24.b4

23...Be3! Trading stuff kind of helps me.
24.Bxe3 Rxe3 25.Nd4 Intending to activate the h2 knight. But now I can kick the rook away from the d−file.
25...Nc4! I was very happy with this move, kicking the rook away and bringing my knight closer to action.
26.Rf2 Rae8 I was getting more and more optimistic. The fact that I can choose to trade a rook at any point in time with Re1 was warming my heart.
27.Raf1?! A natural move, but somewhat inaccurate apparently.
[27.Nf5 Perunovic,Milos: '⌓' Would have led to a better version for White of the same kind of thing as in the game. 27...Nd6 I was wondering at this point, whether the more ambitious looking 27... f6 was stronger, but finally I decided to go with my instincts and just focus on reducing my opponent's counterchances.
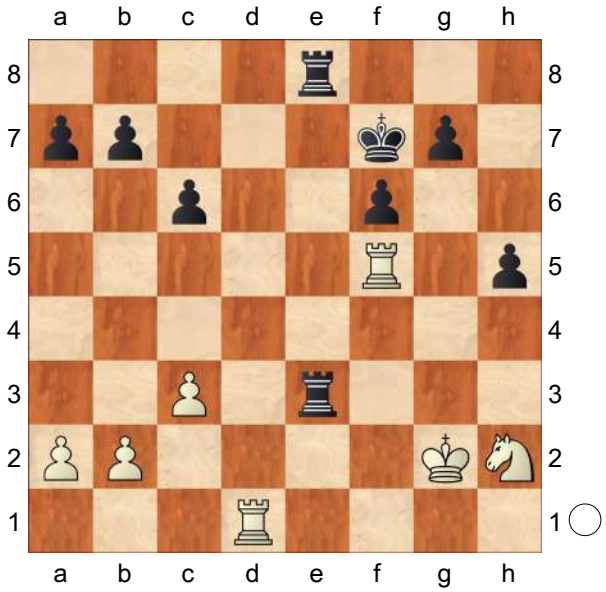
28.Nf5 At first I felt this makes my life easier, but then later I was still unsure what the knight trade does to my winning chances. **28...Nxf5 29.Rxf5 f6** There was also some merit in R8e7!? intending g6−h5 instead, but f6 Kf7 felt more natural and frankly I didn't doubt too much here. **30.Kg2 Kf7** Both sides are bringing the kings closer to action. It's not easy for White to come up with a good idea here. Black intends to trade a rook and slowly push the kingside pawns down the board, while for White it is a lot harder to come up with a clear plan.
31.Rd1 h5!? Perunovic,Milos: 'Diagram [31...Re2+ 32.Rf2 h5 was my initial idea, but then I didn't like that after 33.Nf3 I now have to trade the rook before pushing g5, in a somewhat unfavorable version. Rxf2+ 34.Kxf2 g5 35.a4 This is smart, creating some potential counterplay on the queenside, though even the direct 35. Rd7+ Re7 36.Rd8 followed by Nd4 was something where I thought my winning chances were somehow disappearing. With White knight being well centralized and the rook always ready to give checks from behind, I didn't see a realistic way to push my three pawns forward without weakening them too much.]



' Around here I realized that it is important in what version I push my pawns, as my winning chances depend a lot on whether White gets to coordinate his rook and knight to create some counterplay. **32.Rf2** Perunovic, Milos: '?!' Anticipating Re2, but now I

reverse the move order.

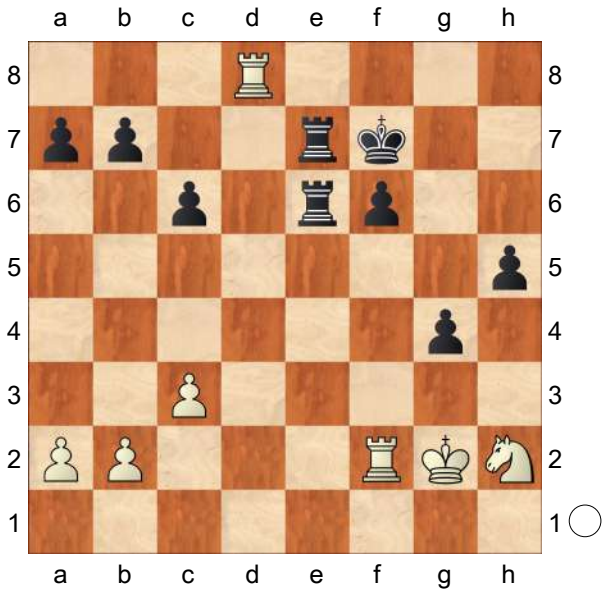
[32.Rxh5!? Perunovic,Milos: '!' Would change the position drastically, but the general outlook would remain the same. White would have to face a long struggle for a draw. Re2+ 33.Kg3 Rxb2 34.Rd7+ Re7 35.Rxe7+ Kxe7 I would enjoy this a lot, with two connected passers on the left and a majority on the right as well. Of course, draw would still be a huge favorite here, especially if White defends well. 36.Ra5 Perunovic,Milos a6 37.Nf3 Kd6∓]

32...g5! This is good, now I can meet 33. Nf3 with 33...Kg6!. I thought I can play Re2 later, but now that I look at the position again, I am wondering why I was planning Re2 at all, in fact. **33.Rd7+ R3e7 34.Rd6 Re6 35.Rd7+ R8e7!** I can't say I was close to accepting the move repetition, but still, given my low confidence at that point, the fact that I played the game with the Black pieces and that I am not something like a full rook up at this point, it was not a given that I wouldn't. **36.Rd8 g4!?** Perunovic, Milos: 'Diagram

[36...Kg6 Perunovic,Milos: '∓' 37.Rg8+ Rg7 38.Rh8 White is hanging on, as it is not easy to push the pawns too far up the board, with the rook disturbing from behind.]

(Diagram)

' It wasn't entirely clear to me, whether this was a better attempt at pushing for a win than 36...Kg6, but I thought with the psychological situation in mind and the potential time trouble, with move 40



close, but not quite there yet, this would be a much harder question to answer. **37.Rh8?** Perunovic,Milos: '?!' A big mistake, practically speaking one of the main ones that determined the outcome of this game.

[37.Nf1! This leads to a forcing sequence that works out just fine for White, despite it getting dangerously close. h4 There may be some other attempts, but I felt this was the most critical. 38.Rh8 g3 39.Rf4 Re2+ 40.Kg1 Here I was hoping something else would appear, but the back up variation that I saw was pretty much the best try anyway. g2 41.Nh2 Rxb2 42.Rh7+ Ke8 43.Rxe7+ Kxe7 44.Rxh4 Rxa2 45.Rh7+ Kd6 46.Rxb7 a5 I had a suspicion that this was going to be holding for White and that is also what the computers confirm. Too comfortable it is not, but given that what happened in the game was looking much more depressing, White clearly had to go for this. 47.Ng4= Perunovic,Milos]

37...Kg6 38.Rg8+ Rg7? It was a very difficult choice at this point, as frankly

both options, this and 38...Kh7 seemed practically winning to me. Whether White had some hidden defense in either of the two was difficult to see at that point, so I went with the one where my king is more active. Objectively, this was a wrong call.

[38...Kh7! It seems that the role my king should be playing is not supporting the pawn mass from up close, on g5, but to guard the rear, covering the h8−g8−f8 squares, neutralizing the rook on the 8th rank. 39.Ra8 Likewise 39.Rb8 is met with Re2, while Rf8 is always met with Kg7!. Re2 Neutralizing the f2 rook as well, now the f−pawn is ready to march (after Kg7 if need be). Nf1 is always met with h4!.]

39.Rf8 Kg5 I was very enthusiastic about this, but was soon to realise that it's not that easy to actually make progress. **40.Nf1 h4** Preventing the knight from entering the game. Nd2 is met by g3! as well, but as the time control passed, and I started thinking about the position more deeply, I realized that it is actually very hard to make progress and if White just waits and slowly pushes pawns on the queenside, there may be no way to win this game. **41.a4!** Andrey too, came to the same conclusion and realized he can just start making useful moves on the other side of the board, as my pawns aren't quite rolling. **41...a5!** The exclaim is for not pushing g3, which would allow White to liquidate into a drawn rook endgame.

[41...Rg6 Intending Re5 and f5 was my first instinct, but the problem is that even after that, it's still hard to get the pawns rolling. 42.Rf7 Re5 43.Rxb7 f5 44.Rf7 and it's not clear what's next, as the pawns seem stuck.]

[41...g3 42.Nxg3! hxg3 43.Kxg3 This rook endgame is just very drawish, with one extra pawn not being enough to win, as so often in those.]

42.b4 At some point I had a thought to now go for the rook endgame with g3 Nxg3 hxg3, as the c3 pawn is softer thanks to the a5−b4 inclusion, but the position still appeared drawn. Instead I decided to maintain the tension once again and hope for the best, even though I was not at all sure there will be a win in the end. **42...b6 43.bxa5** I felt this wasn't a good inclusion for White, but it doesn't change too much. **43...bxa5 44.Ra8 Re5** White has achieved nothing here and I am ready to push f5−f4. It is very tempting to go for Nd2−Nc4 here, but that turns out the be the losing mistake. **45.Nd2?** Instead, White had to just keep waiting. Surprisingly, even despite getting the pawn to f5, it is still hard to make progress for Black.

A2) 49...Rc5 50.Kf4 Kg6∓;

B) 45...f5 46.Rf8! White actually still holds here, objectively, as there is just no way to push the f−pawn forward.]

45...g3! Luckily I was hoping for this as

soon as I went for 41...a5, so it wasn't too hard to clinch the game at this point. **46.Nf3+ Kf4** Beautiful idea, stepping into a discovered check, but after 47. Nxe5 gxf2+! it's a countercheck. **47.Rf1**

31...Rg8 32.Rg3+− Black's position is not defendable. **32...Rde8 33.Ree3! c5**

34.Bc3 b6 35.Rg6! Now the threat of 36.Rxf6 leaves Black no chances for survival. **35...Qb7**

[Earlier we considered only 9.Bd2 Navara, D (2722)−Aronian, L (2783)/ Khanty−Mansiysk RUS 2010/ [Mikhalevski, V].]

9...0−0 10.Nbd2 The most popular.
[10.Bc2]
[10.Re1]
[and even the rare 10.Ba2
were all tested at the top level.]
10...Na5
[Deviating from the main line 10...h6
with the idea to prevent Ng5 and play
11...Re8 scores pretty well recently.]
11.Bc2
[The rare 11.Ba2 also makes sense,
leaving the bishop on the a2−g8
diagonal, from where it controls the
central square d5.]
11...c5 A typical idea in the Spanish. Now the position starts to resemble Chigorin's Variation with the d−pawn on d3 instead of d4. **12.Re1 Re8** Black vacates the f8−square for the bishop.
[Kamsky preferred the less popular
12...Qc7]
13.Nf1 Nc6 The purpose of this move is to fight for the centre.
[13...h6]
[13...Bf8 are logical alternatives.]
14.Ne3 This move has its advantages and disadvantages. Thus, the knight is fighting for the d5−square, although the diagonal of White's dark−squared bishop is now blocked.
[The more popular 14.h3 h6 15.Ng3
scores extremely well for White,
though probably Aronian was ready
for this continuation so McShane
chooses a less popular continuation,
which was tested by Kamsky.]
14...b4 Obviously Black would be happy were the c3−pawn to move in order to obtain full control over the d4−square, however White can easily ignore Black's idea. **15.h3** A novelty.
[In the only preceding game White
tried to fight for the centre by means
of 15.Bb3 Na5 16.Ba2 Rb8 17.d4?!
though his last move seems to be too
risky as Black can accept the pawn
sacrifice. exd4 18.cxd4 Nxe4
19.Nd5 b3? *(* After *19...Bf6!*
it wouldn't be easy for White to prove
he has enough for the sacrificed
pawn. *)* 20.Bb1 and White's play was
justified in Kamsky, G (2729) −Leko,
P (2747)/Dresden 2008.]
15...Rb8 16.Nc4 Before playing Bb3 White decides to take the a5−square away from Black's queen's knight.
16...Be6! A drawback of the last move. Now the bishop obtains a nice square on e6. **17.Bb3** White protects the c4−knight and prepares 18.Ng5. The latter explains Black's reply.
[Black would also be fine after 17.Ng5
Bxc4 18.dxc4 bxc3 19.bxc3 Na5]
17...h6! 18.Be3 bxc3 19.bxc3 d5!∓ Aronian seizes the initiative. **20.exd5**
[20.Ncxe5 Nxe5 21.Nxe5 Rxb3
22.Qxb3 d4 23.Qb7 dxe3 24.Rxe3
Bd6∓ is also good for Black.]
20...Nxd5 21.Qc2? The Englishman misses a nice tactical blow.
[After 21.Bd2 Bf6 22.Qc2
White is just slightly worse.]
21...e4!∓ This combination will enter many books on tactics. **22.dxe4** White has no choice, but to accept the temporary sacrifice. **22...Nxe3 23.Rxe3 Rxb3! 24.Qxb3 Na5 25.Nxa5**
[25.Qc2 Nxc4−+ is clearly bad for
White.]
25...Bxb3 26.Nxb3 Qb6 The game enters a technical stage. Probably Aronian was overconfident of the outcome of the game, and I have to say

justifiably so, however his play starting from this point was careless and he allowed Luke to obtain some counter chances. **27.Nbd2**

[27.Rb1!? would be the lesser evil.]

27...Qb2 28.Rae1 Rd8

[28...Bg5!? 29.Nxg5 Qxd2 30.Nf3 Qa2−+ would win without any problems.]

29.Nf1 c4

[29...Qa3−+ winning the a−pawn.]

30.Ne5 Bc5 31.Rf3 Qb3 32.a5 Rd6?! It wasn't necessary to sacrifice the kingside pawns in order to win the a−pawn. Black's idea can be explained by his desire to exchange the active rook on f3.

[32...f6!? 33.Ng4 *(*or *33.Ng6 Rd3!)* 33...h5 34.Nge3 Qxc3−+ is more than convincing.]

33.Nxf7 Rf6

[33...Rd3 34.Rf5 Ba3 35.Ne5 Rxc3 36.Ne3 gives White some hopes, though objectively the position remains winning.]

34.Rxf6 gxf6 35.Nxh6+ Kf8 Black wins the c3−pawn and it seems that the game should be over very soon.

36.Ng4 Qxc3 37.Rd1 Qb4?

[The simple 37...Qxa5 was better, but Levon thought that one passed pawn should suffice for an easy win.]

38.Nxf6 Now White obtains serious counterplay thanks to the four passed pawns on the kingside. **38...Kf7 39.Nd5 Qb2** Securing the advance of the c−pawn. **40.Nde3**

[Probably the computer's 40.Rd2 is better, as it delays the advance of the c−pawn.]

40...c3 41.Rd5 Be7 42.Rf5+ Ke8 43.g4 Time to advance the passed pawns. The e3−knight will be sacrificed for the c−pawn. **43...c2 44.Nxc2 Qxc2 45.Ng3** With a rook and four pawns for the queen White retains chances for a draw. Thus, an exchange of Black's bishop and White's knight will result in a fortress. **45...Qc7** Without winning the a−pawn Black can't make progress. **46.Nh5 Bd8**

[After 46...Qc2 47.Ng3 Bh4 48.Kg2 Qc3 White can ignore Black's "threat" and keep waiting. 49.Kh2! Bxg3+ 50.fxg3 Qc2+ 51.Kg1 Qxe4 52.Kh2= White waits with the king, while Black can't make progress. The fortress I was talking about is on the board.]

47.Kg2 Qc6

[47...Qc4!?]

48.Re5+ Kf7 49.g5 Qa4! 50.h4 Bxa5 Finally Black won the a−pawn, which he could have taken long ago without any effort. **51.Rf5+ Ke6**

[Probably it was better to leave the king in front of the pawns, though it's not that obvious to humans. 51...Kg8]

52.Nf4+?

[According to Houdini the coldblooded 52.Ng3 leads to equality. Here is an approximate line: Bc7 53.f4 Ke7 54.h5 Qd1 55.h6 Qd2+ 56.Kf3 Qd1+ 57.Kg2= and Black has to repeat the position as the h−pawn is extremely dangerous.]

52...Kd7 53.f3 Qc2+ 54.Kh3 Qf2! 55.Kg4 Be1!∓ Now the advance of White's pawns is stopped and Black has time to advance his own passed pawn.

56.Ng6

[56.Rd5+!? Kc6 57.h5 Qh4+ 58.Kf5 Bg3 59.Ne6 Qxh5 60.f4 Be1 and Black should be able to win.]

[The immediate 56.h5?? is impossible

due to Qh4#]
56...a5 57.Rf7+! Kd8 58.e5 a4 59.e6 Bb4 Black gives up his bishop and advances the a−pawn. **60.e7+ Bxe7! 61.Nxe7 Qc5!−+** Aronian's idea is to simplify into a winning pawn endgame.
62.Kh5! The only practical chance.
[62.g6 Qxe7!−+]
62...a3!
[Now 62...Qxe7?? is wrong. 63.Rxe7 Kxe7 64.Kh6 a3 65.g6 a2 66.g7=]
63.Kh6
[63.Nf5!? a2 64.g6 a1Q 65.g7 Qxg7! 66.Rxg7 Qxf5+ 67.Rg5 Qxf3+−+ with a winning endgame, though it would still require some technique from Black to win this position.]
63...a2 64.g6 Qc4! 65.Nf5 a1Q 66.Rf8+ Kc7 67.g7 A unique position. Despite having two queens Black has certain problems to win the game.
67...Qc6+! Levon finds a nice solution.
68.Kh7 Qxf3! 69.g8N! The very last attempt to hold, which is played mostly for the spectators.
[It turns out that after 69.g8Q Qh5+ 70.Nh6 Qb1+! 71.Kg7 Qbg6+ White gets mated.]
69...Qh5+ 70.Ngh6 Qe5! White is in zugzwang. **71.Ng7 Qxh4 72.Rf7+ Kb6 73.Ngf5 Qee4 74.Kg6 Qe6+ 75.Kg7 Qg5+ 76.Kf8**
[or 76.Kh8 Qgg6−+ with mate in a few moves.]
76...Qc8# A fascinating game! Black's play in the opening looks convincing and so White should look for an improvement to at least set some opening problems.

[Mikhalevski,Victor]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.0−0 d6 6.c3 a5 7.Re1

[Earlier we only considered 7.Bg5 Vachier Lagrave,M (2795)−Gledura,B (2602) Chartres FRA 2017 [Mikhalevski,V]]

7...h6 Svidler doesn't like to be pinned by means of Bg5 after castling.

[7...0−0 was also played.]

8.Nbd2 0−0 9.Nf1 Be6 10.Bb5 This move has become standard in positions with ...a5.In the October update we considered this position without the inclusion of the moves ...h6 and Nf1. In that case Black could play

9...Qb8. Now this move would be bad because of 11. d4. **10...Ne7** This retreat, in the position with the knight on d2 and white pawns on h3 and a4, is also part of the previous update.

[After 10...Na7?! 11.Ba4 b5 12.Bc2 the knight is misplaced on a7 and can't be brought back to c6 due to 13. d4. Bb6 13.h3 *(13.d4!⩲* yields White the upper hand. *)* 13...c5 14.d4 Qc7? *(14...cxd4! 15.cxd4 exd4 16.Nxd4 Bxd4 17.Qxd4 Nc6 18.Qd1 Rc8* was called for. *)* 15.d5± was better for White in Stearns,A (2292)−Airapetian, C (2079) Reno 2003. The ...Na7 retreat makes more sense when White's a−pawn is on a4.]

11.d4! Ba7 This natural move may turn out to be inaccurate.

[11...exd4!? 12.cxd4 Bb6 13.Ng3 d5 14.e5 Ne4 15.Nxe4 dxe4 16.Rxe4 c5 is worth considering, as Black obtains compensation for the sacrificed pawn.]

12.dxe5! A strong novelty from the Russian GM.

[In the only preceding game White played 12.Ng3 Ng6 13.h3 We have just transposed to a high−profile rapid game. c6 14.Bd3 Le Quang Liem played

A) 14...Nh7?! 15.Nf5!? *(15.Bc2!? Ng5 16.Nxg5 hxg5 17.Nf5⩲* promised White the slightly better chances as well. *)* 15...Re8 16.Be3 Qc7 17.Qd2⩲ Lu Shanglei (2628)−Wen Yang (2602) Huocheng County CHN 2017;

B) 14...a4!? in order to prevent White from playing this move. 15.Be3 b5 16.Qc2 Re8 17.c4 bxc4 18.Bxc4 Bxc4 19.Qxc4 d5! 20.Qxc6 exd4 21.Bxd4 Bxd4 22.Nxd4 Ne5 23.Qc3 Rc8 24.Qd2 Nc4 25.Qb4 Karjakin,S (2773)−Le Quang Liem (2739) Saint Louis USA 2017, and now the accurate Nxe4!= would equalise the position.]

12...Ng4

[12...dxe5 13.Qxd8 Rfxd8 14.Nxe5 a4 with the idea of 15...c6 doesn't promise full equality, as White can vacate the f1−square for the light−squared bishop by means of 15.Ng3!⩲]

13.Be3! Nxe5 14.Bxa7

[White is also slightly better after 14.Nxe5 dxe5 15.Bxa7 Rxa7 16.Ne3 with the idea of playing Bc4 and putting some pressure on Black. For example, Ra8 17.Bc4 Bxc4 18.Nxc4 Ng6 19.g3⩲]

14...Rxa7

[I understand Svidler, who didn't like his passive position after 14...Nxf3+!? 15.Qxf3 Rxa7 16.Qe3 Ra8 17.f4⩲ although it might be better than the game.]

15.Nd4!⩲ Since White is having more space it makes sense to keep more pieces on the board. We can already say that White has won the opening battle.

15...N7g6 Black is preventing 16.f4.

[In case of the immediate 15...Bd7 in an attempt to trade some pieces White would play 16.f4! N5c6 17.Ne3⩲]

16.Ne3 Bd7 17.Bf1 A very unpleasant position for Black, since White has better control of the centre, and the rook on a7 is misplaced. Moreover, White has a clear plan of improving his position with 18.g3 and 19. f4. **17...a4**

Peter is trying to take some space on the queenside.
[17...Re8 18.g3 Nc6 19.Bg2 Ra8 20.f4± is not much fun either.]
18.g3 Ne7 19.f4 N5c6 20.Nb5± Ra5
[is relatively better, but White is clearly better in both cases. 20...Ra8!? 21.c4±]
21.c4 Nb8 22.Qd2 That's why it was better to keep the rook on a8. **22...Ra8 23.Rad1** White's play is very simple, while Black's position is getting worse with every move. **23...Re8**
[23...Qc8!?± would have avoided the c5−break.]
24.Bg2
[24.c5! is winning at least a pawn since dxc5? runs into 25.Bh3+−]
24...Bc6?
[Once again Black should have played 24...Qc8± moving the queen away from the d−file.]
25.e5! Now Black's position collapses.
25...Nc8 26.exd6 This simple capture is good enough for a big edge, but White had an even stronger alternative at his disposal.
[26.Nf5! Nd7 27.Qc3! dxe5 28.fxe5 Re6 29.Bd5+− would finish the game on the spot.]
26...Nxd6 27.Nxd6
[Again 27.Nf5!+− is more accurate.]
27...Qxd6 28.Qxd6 cxd6 29.Nf5
[29.Rxd6!?±]
29...Rxe1+ 30.Rxe1 Ra6 31.Rd1 Rb6 32.Rd2 White holds onto his pawns and wins the d6−pawn. **32...Na6 33.Nxd6 Nc5 34.Nc8 Rb4!**

35.Ne7+ Kf8 36.Bxc6 Kxe7
The only move.
[36...bxc6?? loses instantly to 37.Nxc6 due to a threat of mate on d8.]
37.Bb5 a3! Svidler activates his rook at the cost of a pawn. **38.bxa3!**
[38.b3? would be a blunder in view of Nxb3 39.axb3 Rxb3 This is what Black hoped for. Now it's difficult for White to stop the a−pawn. 40.Ba4 Rb4! 41.Bd1 Rb1 42.Kf2 a2=]
38...Rb1+ 39.Kg2 Rc1 40.a4! b6!
[40...Rc3? would be wrong because of 41.Rd5! while b6? is strongly met by 42.a5+−]
41.a5!? White frees his c−pawn.
[Before playing a5 Jakovenko could improve his position on the kingside. 41.Kh3 Rc3 42.Kg4 with the idea of meeting Ra3 with 43.f5 and it turns out that taking on a4 is bad. Nxa4? 44.Rd7+ Kf6 45.Ra7+−]
41...bxa5 42.Rd5 Rc2+?!
An unnecessary check, which only improves the position of the white king.
[42...Ne6 is a better practical chance, although White should be able to break through Black's defence. 43.f5 Ng5 44.c5 g6 45.h4 Rc2+ 46.Kf1 Nf3 47.Rd7+ Kf6 48.fxg6 fxg6 49.c6 Ke6 50.Rh7 Nd4 51.Bd3 Rxc6 52.Rxh6 Kf7 53.Rh7+ Kf6 54.Ra7+−]
43.Kf3 Ne6 44.f5 Ng5+ In a bad position every move is bad.
[44...Nf8 45.c5 g6 46.g4+− is hopeless too.]
45.Ke3+− Now the c−pawn decides the game. **45...Rxa2 46.c5 Ra3+ 47.Kd4 Ra1 48.c6 Rd1+ 49.Kc4**
[or 49.Bd3+−]
49...Rc1+ 50.Kb3 Ne4 The very last trick. **51.Kb2!** Avoiding the trap.

[51.Re5+?? Kd6 52.Rxe4 Rb1+ 53.Ka4 Ra1+ 54.Kb3 Rb1+ would suddenly save the game as 55.Kc4 is met by Rb4+]

51...Rb1+ 52.Kc2 The c−pawn is unstoppable and so Black resigned. A well−played game by Jakovenko, who introduced a strong novelty, obtained a clear positional edge and flawlessly led the game to a win. After 12.dxe5! it seems that White obtains an unpleasant edge and so Black should try 11...exd4.

[Earlier we considered 8.a4 in two games of Kramnik's. Kramnik,V (2808) −Carlsen,M (2832) Stavanger 2017 [Mikhalevski,Victor]]

8...h6

[8...0−0 would transpose to an early

0−0, as in Naroditsky,D (2633)−Jakovenko,D (2742) Tsaghkadzor ARM 2015 [Mikhalevski,V]]

9.Nbd2

[9.h3 would lead to another transposition. Adams,M (2734)−Shirov,A (2699) Elista RUS 2007 [TonyK]]

9...g5 The second most popular continuation. Black takes advantage of the fact that he hasn't yet castled and starts an offensive on the kingside. 10...g4 is the immediate threat since the f3−knight doesn't have good escape squares. If he goes to h4 then ...Nxe4 is possible. Nevertheless, it has to be said that the text is risky, as it weakens the f5−square and delays development.

[9...0−0 is the main line and is much safer.]

10.Nf1 White vacates the d2−square for the f3−knight. Mikhalevski,V, Mon Hokmome: '!'

[10.d4 −0.13/20 counter attacking in the centre looks interesting. Mikhalevski,V, Mon Hokmome: '10.Nd2−f1 0.27 counter attacking in the centre looks interesting.']

10...g4 Mikhalevski,V, Mon Hokmome: 'White has an edge.' **11.N3d2 h5** Black keeps advancing his kingside pawns. A slightly unusual tactic in the opening, but Black hopes that the cramped position of the white pieces will justify it. **12.Nc4** 0.01/21

[12.Nb1± 0.33/21]

12...b5?! 0.52/22 Fedoseev is following his clubmate Vitiugov, who played like this in 2017. Black's idea is to force the knight to e3. Mikhalevski,V, Mon Hokmome: 'N'

[Mikhalevski,V, Mon Hokmome: 'Black should try' 12...h4!? 0.01/21 is more popular. White usually answers it with Mikhalevski,V, Mon Hokmome: '=' '!' 13.Be3!± , something 12...b5 avoids. 1.e4 Caruana,F **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.0−0 a6!?** A somewhat rare idea, which I had never seen before, although it makes perfect sense. **7.a4** Not very critical. I didn't really understand what was going

on. **7...Ba7 8.Nbd2 0−0 9.h3 h6** John Watson: 'The difference here from the dxc5 main lines is that White's knight is already on d4. In some ways that makes Black's defence easier, in that he can make convenient exchanges and his d−pawn is not attacked by White's queen. On the downside, his winning chances are greatly reduced.' **10.b4** Spending an important tempo and weakening the kingside, but I felt it was important to stop ...♗g4. This move is neither better nor worse than the alternatives; in any case White has no advantage. Nigel had been playing very quickly up to this point, but now he started to think. **10...Be6** A somewhat mysterious move. Black had stronger alternatives. **11.Bxe6 fxe6 12.Re1 Ne7 13.Nf1 Ng6 14.Ng3** The only way to continue playing. Otherwise ...♘e5 would come. **14...d5** The logical continuation of Black's play. **15.Be3** Nigel seemed surprised by this move, but to me it is the only logical choice. I need to find some way to neutralise the ♗c7−♕d6 battery, and a bishop on g3 fits the bill perfectly. **15...Bxe3 16.Rxe3 c6** Unfortunately, the bishop seems a little bit strange on h4 now.

[The computer tells me that 16...a5! is a draw. However, I can't imagine a human finding the line it suggests. 17.Qb3 c6!! 18.Rae1 axb4! , and Black will be able to hold the draw. 19.cxb4 Kh8 20.d4!? is also possible, and again Black will have to find a number of accurate moves before he can secure the draw. exd4 21.Nxd4 wins, because of a check on f4 incase of 52...♕c7 or 52... ♕f6. Nf4 22.e5 Nd7]

17.Qc2 a5 18.Rb1 John Watson: '!?' A key idea, but premature here. **18...axb4** Nigel considered this move for a long time, which made me feel my play at least wasn't completely absurd! **19.cxb4** White's structure has been damaged, but that isn't the end of the story. If White can comfortably blockade the d−pawn, he will have an advantage. **19...d4 20.Ree1** This move took some nerve to play, because I always had to watch out for ...d4. **20...Nh7** For some reason I was surprised by this move, although it is not a bad one. **21.Qd1** I can't allow ... ♗f5. **21...Rf7** A big surprise for me, although it is the computer's recommendation! **22.Nf1 Ng5 23.N1h2 Nxf3+?!** John Watson: 'My original version of this game gave it as drawn at this point, but that proves not to be the case, as Caruana goes on to win a lengthy battle. So my note that' A little bit passive. But I wasn't surprised when Nigel opted for this "safe" choice, because he was already low on time. This isn't strictly much of a mistake, but White does have some slight pressure after (which is easily neutralised). John Watson: 'As the game goes, White gains just enough edge to keep the pressure on. This didn't have to happen, however:' **24.Nxf3 Qe7 25.Rb2** Trying to provoke ...b5. I wasn't sure if it was really much of a weakness, but it can't hurt me (and gives him something to think about). **25...Raf8 26.Nh2 Nf4 27.Kh1 c5 28.b5** Up to this point, we had played pretty consistently and the normal result is a draw. But now things go wild! **28...b6?!** Not a very good move, but it's the idea behind it that's really disastrous. **29.h4** John Watson: '!' **29...Qc7??**

John Watson: '?' John Watson: 'This will lose material.' This is the real lemon. **30.g3** Nigel just missed this. Now Black loses a pawn. **30...Nxd3?!** Almost certainly not the best defence. This just weakens the position, but you can't blame Nigel in such a difficult position. **31.Qxd3** A weird move. I should mention we were both in time trouble, which might explain our less−than−ideal play in the following phase. **31...c4 32.Qf1 d3 33.Rd2 c3!?** Considering this allows mate, I feel strange not giving it a question mark, but considering the time situation (I had about a minute), this was a reasonable practical chance. Nigel played this move almost instantly, so it was clear he had calculated no more than 2 moves ahead, and was pretty much just bluffing. But this turned out to be a good bluff! **34.Rxd3?** I spent almost all of my time, calculating 34.♗xf7, feeling that there should be something, but not being able to work out the details. By the time I had pretty much worked out the line, I saw I had 10 seconds and couldn't bring myself to play 34.♗xf7, since I felt that I should be winning anyway. **34...Rxf2 35.Qh3 Qc4?** An unfortunate choice. He must have missed 37.♕d2. **36.Rd6 Re2 37.Rxe2!** Kinda forced, but very strong. I protect my pawns, defend my king from perpetual, and now the c−pawn is ready to roll. **37...Qxe2 38.Qxe6+ Kh8 39.Qxe5 c2 40.Rxh6+** I was a bit afraid sacking a pawn on the last move of the time control, with only seconds left to reassure myself, but the c−pawn just looked unstoppable. **40...Kg8 41.Qd5+ Rf7 42.Rc6 Qd1+ 43.Kg2** Not a bad move, but White will be forced to repeat. The idea that I played this with was really terrible, however. **43...c1Q 44.Rxc1??** Now this is just plain stupid. **44...Qxc1 45.Nf3** I thought it would be even easier to win like this, which was a terrible misjudgement. **45...Qc2+ 46.Nd2 Qxa4 47.e5 Qa3 48.e6 Re7 49.Ne4 Qb2+ 50.Kh3** I realized that to avoid perpetual check I would have to move my king to the queenside. **50...Qe2?** Losing. **51.Qd8+!** Wins! Finally I came to my senses. Now Black won't be able to make a draw, because he can't stop the king's migration to the queenside. **51...Kh7 52.Qxe7 Qxe4 53.Qf7 Qh1+** This is a useless pawn, but in any case Black couldn't hold, although other moves could've prolonged the game by a lot. **54.Kg4 Qe4+ 55.Kg5 Qe3+ 56.Qf4 Qa3 57.Qe4+ Kg8 58.e7 Qxg3+ 59.Kh5** A really tough and complicated game, with a lot of errors by both sides, but with many interesting ideas as well.

14...c5? This inaccuracy can be explained by a miscalculation.

[14...Bf5 supporting the knight on e4 and protecting the c6−pawn, was better. Now, after 15.Ne5 Nxc3 16.bxc3 c5! 17.Rae1!? *(17.Rfe1 Rfe8)* 17...c4 Black's position is slightly worse, but defendable.]

15.dxc5 Nxc5 16.Qc6! Bf7! 17.Nxd5! If I remember well, I missed this simple tactical blow, when I played 14...c5.

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4

The Evans Gambit is a relatively rare choice at the GM level. **4...Bxb4**

[I prefer the modest 4...Bb6 , which doesn't mean it's better than the text.]

5.c3 Be7 One of the three most popular lines.

[The other two are: 5...Bd6 Petrosian, T (2623)−Volokitin, A (2671) / Budva MNE 2009/ [Mikhalevski, V].]

[and 5...Ba5 Short, N (2645) − Sargissian, G (2676)/Wijk aan Zee NED 2008/[Tony Kosten].]

6.d4 The most natural way to compensate for a pawn.

[Also the other line 6.Qb3 doesn't seem to cause Black any problems: Nh6 7.d4 Na5 8.Qb5 Nxc4 9.Bxh6 Nd6 *(9...gxh6* is more popular. *)* 10.Qxe5 Nxe4! 11.Bxg7 Rg8 12.Qxe4 Rxg7 13.0−0 d5 14.Qe5 Kf8 and Black doesn't seem to experience any problems. Morozevich, A (2748)−Bacrot, E (2594)/Sarajevo 2000.]

6...Na5! 7.Nxe5

[After 7.Be2 Black can choose between exd4 *(* and *7...d6 8.Qa4+ c6)*]

7...Nxc4 8.Nxc4 d5 9.exd5 Qxd5

[9...Nf6 is much less popular, but looks playable to me.]

10.Ne3 Qa5

[Another logical retreat is 10...Qd8 11.0−0 Nf6 12.c4 0−0 13.Nc3 c6 14.Rb1 Re8 15.Bb2 Qc7 16.Qf3 Bd7 and Black was fine in Kasparov, G (2805)−Short, N (2655)/London 1993.]

11.0−0 Nf6 12.c4 0−0 13.Bd2

[or 13.Bb2 Qg5 *(13...c6* also deserves attention. *)* 14.Qf3 Re8 15.Nc3 c6 16.h3 Bd6 with a good position for Black in Leon Hoyos, M (2535)−Gustafsson, J (2634)/ Reggio Emilia 2008.]

13...Bb4 I'm not sure it's necessary to exchange one of the bishops as Black had the advantage of a bishop pair.

[In one recent game Black blundered with 13...Qh5?? 14.Nd5! and White won a piece in Robson−Perelshteyn, Lubbock 2010]

[13...Qa6!? Probably Efimenko didn't like his queen on a6, although I see nothing wrong with this move.]

14.Bxb4 Qxb4 15.Qd3 Now Black still has to solve some problems with development. **15...b6!?**

[After 15...Re8 16.Nc3 c6 17.Rab1 *(* After *17.c5 b6! 18.Rfb1 Qa5 19.Nc4 Ba6! 20.Nxa5 Bxd3 21.Rd1 Bc2 22.Rd2 bxa5 23.Rxc2 Rab8* Black is fine. *)* 17...Qd6 18.c5 Qf4 19.d5 White retains some pressure.]

16.Nc3 Bd7! With two accurate moves Black seems to extinguish White's initiative. **17.Rfd1 Rad8**

[17...Rfe8!? is a reasonable alternative.]

18.a4 An attempt to exploit the fact that Black left the a−file. **18...a5!** Preventing 19. a5. **19.h3 Qd6!** Black has fully equalised. **20.Rac1 Rfe8 21.c5!?** An interesting attempt to complicate matters. **21...bxc5 22.dxc5 Qxd3 23.Rxd3 Rb8!** But Black is precise. Now he's threatening ...Rb4, which forces further simplifications. **24.Rcd1 Bc6 25.Nc4 Rb4 26.Nxa5 Bxa4 27.Rd4! Rxd4 28.Rxd4 Re1+** Freeing the e8−square for the bishop. **29.Kh2 Be8 30.Nb3!** White prevented 30... Rc1. Now the position is completely equal and so a draw was agreed. It seems that Black is doing perfectly well in this line of the Evans gambit, so the ball is in White's court.

13...Nxc4 14.Bxc4 Bd6 15.h3?!
After this inaccurate move White starts to experience problems.
[It's understandable that White didn't want to weaken the light squares with 15.g3 , but it turns out to be a better defence. For example, Bh3 16.Re1 Rfe8 17.Rb1 a6 18.a4 h6 19.Nf1 with a playable position, though I still prefer Black.]
15...Re8!∓ Now it's difficult for White to untangle his forces. **16.Bb2?!**
This move doesn't look great either. White is trying to bring his queen's rook into play, but encounters some immediate problems.
[16.Re1 is the lesser evil. a6 *(16...Bd7!?* with the idea of 17...Bc6 deserves attention too. *)* 17.Bd3 b5 18.c4 Bh2+ 19.Kh1 Be5 20.Bb2

Bxb2 21.Qxb2 Rd8 22.Qc2
and though White is still worse it's not easy for Black to prove his superiority.]

16...Bh2+! A useful intermediate move. Before bringing the bishop to f4 Karjakin worsens the position of the white king.

17.Kh1 Bf4 Now the e4−pawn is hanging. **18.Rae1?** White protects the e4−pawn, but misses a strong tactical blow.

[18.Rfe1! was better, as after Bxh3? *(18...Bd7!* retains a serious edge. *)* 19.gxh3 Qd7 20.Kg2 Qxd2 *(20...Bxd2?* , which is strong after 18. Now Black's attack after Rxe8 doesn't promise more than equality.]

18...Bxh3! 19.gxh3 Qd7∓ 20.Qd3! The best White can do is to play an endgame with a deficit of a pawn.

[Now after 20.Kg2 Bxd2 21.Rd1 Black plays *(21.Re2 Qc6!* isn't much fun either. *)* 21...Nxe4!−+]

20...Qxd3 21.Bxd3 Bxd2

22.Re2?!

[22.Rd1! was better, fighting for the d−file. Now Bf4 can be answered by 23.Kg2∓ with the idea of meeting Nxe4? with 24.Kf3=]

22...Bf4∓ Now Black is in full control.

23.Rfe1 Be5 A logical move, which was played in anticipation of c4. **24.c4** It would have been better to refrain from exchanging the dark−squared bishops.

[24.Bc4!?∓]

24...Rad8 25.Bxe5 Rxe5 Now in addition to an extra pawn Black obtains control of the dark squares.

26.f4?! This move leads to a loss of another pawn, but good advice was very costly. **26...Rh5 27.Re3 Ng4!−+**

28.Be2

[28.Rf3 would have been met by Rxd3!−+]

28...Nxe3 29.Bxh5 Nxc4 Black is two healthy pawns up. Therefore White is doomed. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 d6 6.Bb3 0−0 I was really surprised when I found out that this line has not been covered here yet. So, this game is a good opportunity to fill the gap.

[6...a6 is much more popular these days. Vitiugov,N (2724)−Sasikiran,K (2638) Doha QAT 2015 [Mikhalevski, V]]

[6...Bb6 is a rare alternative. Fuchs,J (2339)−Mikhalevski, V (2525) Karlsruhe 2016 [Mikhalevski,V]]

7.h3 An interesting move order. White will try to delay castling short. **7...a6**

[The future world champion played 7...Ne7 8.0−0 Ng6 9.Nbd2 c6 10.d4 Bb6 11.Re1 Re8 12.Bc2 h6 with a standard position in Kazhgaleyev,M (2589)−Carlsen,M (2837) Astana 2012]

8.Nbd2 Be6 Recently this has been Black's main reaction to White's setup.

9.Bc2 White avoids a possible exchange of the dark−squared bishops.

[9.Nf1 is the main alternative, which can be met either by Bxb3 *(* or the immediate *9...d5* Bologan,V (2681)−Kamsky,G (2762) Beijing 2012 *)* 10.axb3 d5 like in Hou,Y (2671)−Mamedyarov,S (2736) Baku 2015]

9...d5 One of Black's main ideas, which creates tension in the centre.

[Black also tested 9...Ba7]

[and 9...h6]

10.Qe2 Before transferring the knight to the kingside White removes the queen from the d−file to avoid a trade.

[10.Nf1? would be a blunder in view of the simple dxe4 11.dxe4 Qxd1+∓ and Black wins a pawn.]

10...h6 Eljanov isn't afraid of a possible kingside attack, where White can use Black's last move as a hook.

[It's worth mentioning other options, such as 10...Re8 and only after 11.0−0 *(* After Black left the f−file it makes sense to play *11.Ng5!?)* 11...h6 Rendle,T (2356)−Bacrot,E (2695) chess.com INT 2017]

[and 10...Qe7 in Howell,D (2593)−Kurnosov,I (2606) Hastings 2009. I prefer the latter, as it looks more flexible since it avoids any aggression on the kingside and keeps the rook on the f−file.]

11.g4!? An aggressive approach. White is trying to take advantage of Black's last move.

[The standard 11.Nf1 can be answered by b5 in order to meet 12.Ng3?! with dxe4 13.Nxe4 *(13.dxe4?* runs into *Bc4 14.Qd1 Qxd1+ 15.Bxd1 Bd3∓* with a clear edge for Black. *)* 13...Nxe4 14.Qxe4 Bd5 15.Qe2 Re8∓ with better chances for Black in Mortazavi,A (2353)−Safarli,E (2691) London 2016]

B) 13...Be7 14.h4 f5 15.gxf5 Rxf5 16.Be3± Preparing long castles.]

12...d4! No more exd5. **13.Nb3** This idea is objectively wrong, but it isn't easy for Black to defend his position after the upcoming piece sacrifice.

13...Be7∓ Black managed to prevent White's idea of g5 and so the young Polish GM plays the piece sacrifice.

14.Nxe5!? A brave decision. It's clear that White prepared this idea with his previous move. **14...Nxe5 15.Nxd4 c5 16.Nf5 Kh8?!** It looks logical to remove the king from the g−file, but the move turns out to be wrong.

[16...Bh4! It makes sense to try and delay 17.f4 by means of this pin. 17.Kf1 *(* In case of *17.Be3* with the idea of castling long and then playing f4, Black comes with *Ng5! 18.Nxh4 Nxh3 19.Nf3 Nxg1 20.Nxg1 Rc8!∓* with a clear edge for Black. *)* 17...Ng6 18.f4 Qc7 19.Qf3 Rfe8 and so on.]

17.f4?!

[It's more accurate to start with 17.Be3! and only after Ng6 18.f4 Bh4+ 19.Nxh4 Qxh4+ 20.Qf2±]

17...Nc6?!

[17...Bh4+!∓ was strong, preventing White from castling.]

18.Be3 Now Black is under some pressure, which he didn't manage to stand. However, his position was defendable. **18...Rc8!? 19.Nxe7! Qxe7 20.Qf2 b6 21.h4** Tarrasch would be happy. White is ready to advance his g−pawn to g5 and his pawn chain looks impressive. **21...f6** An attempt to prevent 22.g5.

[Instead 21...Rcd8! was strong, with the idea to meet 22.g5 *(22.f5?* can be strongly met by *Ne5! 23.fxe6 Nxd3+! 24.Bxd3 Rxd3∓)* with 22...f5!! stopping Black's attack. 23.e5 Rg8 and Black is fine.]

22.f5 Bg8 23.0−0−0 White's idea is very simple, but nevertheless difficult to meet. He is going to double on the g−file and prepare the g5−break.

23...Ne5!?

[23...Bxa2!? is an interesting alternative. 24.g5 Ne5!? *(24...fxg5 25.hxg5 Nxg5* looks risky for Black, but is probably playable. *)* 25.g6 c4 26.dxc4 *(26.d4* runs into *Nd3+)* 26...Nxc4 27.gxh7 b5 28.Bd4 b4∓ and Black creates strong counterplay.]

24.Rg3?! This natural move turns out to be wrong.

[White could have started with 24.Kb1! protecting the a2−pawn.]

24...Rfd8?! An inaccuracy.

26.hxg5 hxg5 27.Rxg5! Probably the Ukrainian GM missed this strong move.

27...Qf7? After this move Black is just lost.

[27...Nxg5? runs into 28.Qh4+ Bh7 29.Bxg5 Nf3 30.Bxe7 Nxh4 31.Bxh4+− and White's pawns decide the game.]

34...Bxd5 35.Bxe5 A crushing victory for the young Polish GM! Nevertheless, Black is able to withstand White's aggression on the kingside. The best way to meet 11.g4 is 11...Be7. Alternatively, Black can play without 10... h6, for example, 10...Qe7.

[John Emms]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 0−0 This move used to have a very poor reputation, but more recently it's been noticeable that quite a few grandmasters have been willing to play it, including Gashimov. In fact 5... c5 is quite a logical choice for those who also play the Modern Benoni (like Gashimov), as this is exactly the structure we get in the main lines. **6.0−0!** The critical choice. **6...d6 7.h3!? a5** Black abandons the fianchetto plan. It might seem strange to play ...Be7, but it does at least allow some tactical possibilities based on discovered attacks against the g5−knight. **8.Re1 h6 9.Nbd2! Be6 10.Bb5 Qb8**

[11.Nf1 Qa7 12.Be3 Bxe3 was an unusual draw by repetition, R. Ponomariov−V. Gashimov, Khanty−Mansiysk 2011 we have to assume Ponomariov would have tried something different had Andreikin done the same thing 13.Nxe3 Ne7 14.a4 Ng6 15.Bc4 Bxc4 16.Nxc4 Qa6 17.g3 Rfe8!?]

11...Ne7

[11...a4]

[11...Qa7 and Black was okay, R. Ponomariov−D.Andreikin, Saratov 2011. In some of these lines, Black's cause is helped by White's offside knight on h4. With 7 Ng5 White hopes the knight reaches a more favourable circuit. 12.Qf3 Ne7]

12.Ndf3

[12.Nf1 Qa7 13.Be3 and now recent GM games have focussed on the unpinning Bxe3!? For example: 14.Nxe3 a4 15.Bc4 Bd7 16.a3 b5 17.Ba2 c5]

12...c6 I'm not convinced by 12...Bf6, since after White's next move Black is

forced to deal with the threat to his d−pawn in a way he might have preferred to avoid.

[12...Qa7 13.d4 Bb6 with good compensation, J, Paulsen−R.Porter, Norway 1993 *(13...exd4 14.cxd4 Bb6)* 14.Be3!? is an alternative *(*The main line runs *14.g4)*]

15.Bc2 It's hard to really argue with the way Bacrot plays it, as he soon builds up a significant advantage. **15...Rad8**

[15...Ng6 is a critical option, if only because after this move White cannot regain the pawn by force. However, instead White gains a strong initiative. For example, 16.Nxg6 fxg6 17.Be3 Rfe8 18.a4 g5]

29...Nh5 and the centre pawns are landing. It's very possible that we might be seeing more of 7 Ng5, since most of the recent developments have been on Black's side in the main line with 7 Nh4.

30.Rxe8+
[30.Rd1 and Black is still very much in the game. After Qe6 31.Qxh5 there would be nothing wrong with Black's position. Even so, the change in pawn structure after the exchange on e5 is virtually always in White's favour, and Qe2 32.Qxe2 looks promising for White too. In a previous game Black chose Rxe2 but after 33.Na3 , with e4−e5 ideas, Black felt obliged to play Rxf2+ in any case. After 34.Kg1 Rg2+ 35.Kf1 Bc7 36.h4 Rh2]

□ **Adams,Michael 2706**
■ **McShane,Luke J 2669**
GBR−ch 105th playoff1 rapid (1) 5.8.18
[Fernandez,Daniel Howard]

I was privileged to watch this game live: Adams' technique was quite something, even at this time control. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.0−0 d6 6.c3 0−0 7.a4 a5**

[7...a6 is marginally more played, and for some reason here White no longer plays with ♗g5. A fairly recent high−level test continued 8.Nbd2 Ba7 9.h3 Ne7 10.Re1 Ng6 11.Bb3 Re8 12.d4 h6 13.Bc2 and now Black may have gone slightly astray with c6?! 14.Nf1 d5 This is always a double−edged idea; there are lots of examples from all over the Ruy Lopez where it immediately equalises, and equally many where it ends up weakening the dark squares to a crippling extent. 15.Nxe5 Nxe5 16.dxe5 Nxe4 17.Bxe4 dxe4 18.Qxd8 Rxd8 19.Ng3± Anand,V−Aronian,L Saint Louis 2016]

8.Bg5 Qe7 9.Nbd2

[Black's idea is that after 9.d4 Bb6 10.d5 Nb8 White has gained space in the typical Ruy fashion, but the a5−pawn anchors the b6−bishop in position, and consolidates a grip on the c5−square, and therefore it is White who should think about hurriedly equalising the position.]

9...Be6 10.Qb3 Rab8 11.Rad1 h6 Around here, the psychology behind the two players' alternating decisions becomes quite interesting. As an educated outsider, the only thing I can say is that Black probably started thinking about winning the game at an inopportune time. **12.Bh4**

[Following 12.Bxe6 Black would probably (correctly) recapture immediately with the pawn: fxe6 13.Be3 Nd7=]

12...Ba7 13.Bxe6 Qxe6 Morally committing to the doubled f−pawn structure.

[13...fxe6= was still the correct recapture, in my opinion.]

14.Bxf6! Qxb3

[14...Qxf6 15.Nc4± is unpleasant − White will follow up with ♕b5 and be material up before Black even gets started; or alternatively play d4; or finally there is ♘e3−d5 to think about.]

15.Nxb3 gxf6 16.Nbd2 Rfd8 17.Nh4 Ne7 The position is still objectively almost balanced, but the momentum has moved over to White, in any game between competent players of equal strength. **18.Nc4 b5 19.Nxa5 Bb6?!**

[19...bxa4 20.Rd2 a3!? 21.bxa3 Rb5 22.Nc4 d5= was the machine prescription.]

20.b4 Bxa5

[20...bxa4 21.Ra1 Ra8 22.Rxa4 Ra7 23.g4±]

21.bxa5 b4 22.cxb4 Rxb4 23.g3

[23.Rc1±]
[23.f4!?]
[23.Rb1± Rxa4 24.Rfc1 is sensible, implementing the game line without delay.]

23...Ra8

[23...Rdb8!?= is a bizarre computer move that seems to improve − delaying taking either a−pawn until after Black has made some more useful moves, such as ...c6 or ... ♔g7.]

24.Rb1 Rxa4 25.Rfc1 At this point Luke took a good 4 minutes or so to make his choice, lowering his time from 7 to 3 minutes... **25...c5** The braver decision, but the pawn move would be required sooner or later.

[25...Ra7 26.Rb8+ Kg7 27.Re8 c5 28.Rb1 Rb4 29.Ra1 Kh7□± White has a very annoying pull here. Even the likely set of endgames with every pawn west of the half−way line being swept away is no panacea for Black.]

26.Rb6 Rd8

[26...R8xa5 27.Rxd6 Ra1 28.Rxa1 Rxa1+ 29.Kg2 Kg7 30.Rd7 Nc6 31.Nf5+ Kg6 32.Nd6±]

27.a6 f5 28.Nxf5! Now White is close to winning, but in a blitz finish anything can happen. **28...Nxf5 29.exf5 Kg7 30.Kf1 Ra2**

[30...h5!? 31.Ke2 e4±]

31.g4 Kf6 32.Rxc5 Kg5 33.Rc4 d5?

[33...Ra8 34.Rxd6 R8xa6 35.Rxa6 Rxa6± would be a pain, but possibly holdable.]

34.h4+! Now it is over. **34...Kxh4 35.Rxh6+ Kg5 36.Rh5+ Kf6 37.Rc6+ Ke7 38.Rh7** Not necessary, but nice − White threatens ♖e6+. **38...Rb8 39.Re6+ Kf8 40.Rh8+ Kg7 41.Rxb8 fxe6 42.fxe6 Kf6 43.Ra8 Kxe6 44.a7 Kf7 45.Rh8**
