[R.Scherbakov]

The two opponents resumed the theoretical argument that they had begun at the World Cup in 2007. Bacrot did not repeat his own idea here, but instead tried to improve upon the game Aronian − Van Wely/Wijk aan Zee 2008. However, Karjakin defended well − he established control over the central d−file which secured his vulnerable king.

1.e4 At this moment I was not having a good tournament (it ended even worse to me, I lost the last two rounds after this game) so I really needed a victory. **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6** As usual Adams goes for one of the most solid lines. **5.d4 exd4** 5... c6 or 5... doesn't change the position. **17...Qxc6N 18.Ne7+!? Kh8 19.Nxc6 Na4**

20.b3 Here Black got the "ideal formation", all pieces seems to be in the right squares. The problem is that White can slowly improve the position. **20...Nc3 21.Rfe1!** I think the position is much more interesting with knights and gives more practical winning chances. **21...a5 22.Bd4 Bxd4 23.Nfxd4** This is the best square for the queen. Black can only wait. **23...a4 24.Rec1?!** It is not clear why the rook is better placed on c1. **24...Nd5 25.Ne5** I was not completely sure about this, which is why I didn't play it in the previous move. Now I have a weakness on e3 but if I wanted to win I had to go for it.
[25.a3]
25...Bg8 26.g3 The logical idea after f4. The black queen is far from the kingside so it is easier to attack there.

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Nc3 d6 6.Na4 A relatively rare, but logical move. White wants to exchange Black's dark−squared bishop and thus obtain the advantage of the bishop pair, which Black can't prevent.
[Earlier I analysed for you 6.Bg5 Lupulescu, C (2594)−Georgiev, K (2645)/ Dresden GER 2008/ [Mikhalevski, V].]
6...Bb6 Now Black wants to play 7...Na5 exchanging White's light−squared bishop,

and so White plays **7.c3** in order to escape the exchange.

[The main line goes 7.Nxb6 axb6 8.c3 Na5 9.Bb5+ Bd7 Here is an example. 10.c4 c6 11.Ba4 c5 12.Bg5 Bxa4 13.Qxa4+ Qd7 14.Qxd7+ Nxd7= 0−1 Bakliwal, G (2300)−Iuldachev, S (2555)/Calcutta 1997.]

7...Ne7 Black also tested a number other moves, but the text was tested only once before by an unknown player. This move starts a typical manoeuvre of this knight in these Italian positions ...Nc6−e7−g6.

[7...Na5 is a playable alternative. 8.Bb5+ Bd7 *(* The point of 7.c3 is to meet *8...c6* with *9.Nxb6 axb6 10.Ba4±* and the bishop escapes to c2, while the knight on a5 is misplaced. *)* 9.Bxd7+ *(9.Nxb6 axb6* transposes into 7.Nxb6. *)* 9...Qxd7 10.Bg5 Qe6 11.Nxb6 axb6 12.Bxf6 Qxf6 13.Qa4+ and in view of a threat of 14. b4 Black has to play Ke7 which by itself is not a big deal as the king will soon be evacuated from the centre. Losicki, M−Rajski, W/Poznan 1998.]

8.0−0

[8.Bg5!? Ng6 9.Nh4 is an attempt to exploit Black's manoeuvre. This way White usually tries to retain the pin along the d8−h4 diagonal. Here Black can choose between Nf4 *(* and *9...Nxh4)*]

8...Ng6 9.Re1 White protects the e4−pawn and thus prepares d4.

[In that game White played 9.Nxb6 axb6 10.Qb3?! 0−0 11.Bg5 h6 12.Nh4 Nh8 13.Bxf6 Qxf6 14.Nf3 Ng6∓ White, E (2028)−Cooper, L/ Monmouth 2003.]

9...0−0 10.Nxb6 axb6 11.Bb3

A flexible move. White anticipates Black's plan with ...Be6 and thus prepares Bc2 in order to save the bishop from exchange.

[After 11.d4 h6 White achieves nothing special.]

11...Re8 It seems that Black prevents d4. **12.Bd2 h6 13.a4** White takes some space on the queenside. **13...Bd7** It turns out that Aronian has a different plan in mind − he prepares ...d5, while the rook on e8 will be protecting the e5−pawn. **14.h3 Bc6 15.Bc2**

[15.c4 with the bishop on b3 doesn't look great, though it prevents ...d5.]

15...d5 The plan has been accomplished and the position is equal. **16.b4 dxe4 17.dxe4 Bd7!** Black transfers the bishop to e6 to take control of the c4−square. **18.Be3 Be6 19.Nd2**

[19.Qxd8 Rexd8=]

19...Qe7 20.Qe2 Red8! Correctly leaving one of the rooks on a8 in order to prevent a5. **21.Red1 Nd7** Black prepares ...Qf6 with the idea of ... Nf4. **22.Qf3 Qh4 23.Nf1** White prepares the Ng3−f5 manoeuvre. So **23...Qf6!** Black forces an exchange of queens. **24.Nh2 Qxf3 25.Nxf3 f6** Black consolidates his position in the centre and prepares ... Ne7−c8−d6 to fight for the c4−square. **26.Nd2** White brings the knight to b3 in order to prepare a5 and thus get to Black's weaknesses.

[In case of 26.Rd2 with the idea of Rad1 Black can play Ndf8 *(26...Ne7 27.Rad1 Nc8 28.Nh4 Nd6 29.Nf5±* is better for White. *)*]

26...Ne7

[26...Nf4 27.Re1 Kf7 also deserved

attention, but Black had a clear plan in mind and didn't want to look for some unprepared tactics.]

27.Nb3 Nc8 28.a5 Nd6 Each side has carried out his plan and the position remains balanced.

[Certainly not 28...bxa5? 29.Nc5!+− and Black loses at least a pawn.]

29.Rdb1 A strange−looking move. I believe White's idea is to meet 29...Nc4 with 30.Bc1 and to keep the rooks connected.

[29.axb6 Rxa1 30.Rxa1 *(30.Nxa1?! Nxb6* is fine for Black as the c4−square is in his hands. *)* 30...Nxb6 31.Ra7 Nbc8 32.Ra8 b6! and Black is fine again.]

29...Kf7

[I also don't see what was wrong with the simple 29...Nc4 30.Bc1 b5=]

30.f3 Ke7

[In case of 30...Nb5 White would have to sacrifice the c3−pawn temporarily in order to maintain the balance.

31.Kf2 Rdc8!? In anticipation of an exchange on b6 Black brings the rook to the future semi−open line.

[31...Nb5 is met by 32.Bd3! again and after Nxc3 33.Rc1 Nd1+ 34.Rxd1 Bxb3 35.Rdc1 White obtains sufficient compensation for a pawn.]

32.Bd3 Bc4 33.Ke2 Ra6 Black prepares to double rooks along the a−file or just imitates activity. **34.axb6**

[34.Bxc4!? deserved serious attention with the idea to recapture on a1 with his rook. In the game it was impossible as the knight on b3 was hanging. Nxc4 35.axb6 Na3! *(35...Rxa1 36.Rxa1±)* 36.Rc1 cxb6= and Black doesn't seem to have any problems.]

34...Rxa1 35.Nxa1 cxb6

[Both 35...Nxb6!?]

[and 35...Nb5 36.Rc1 Nxb6 deserved attention.]

36.Nc2 Ra8 37.Ra1 Rxa1 38.Nxa1 b5! An easy way to equality. Black is going to establish his knight on c4. **39.Nc2** White is one move short of playing Na3. **39...Bxd3+! 40.Kxd3 Nc4= 41.Bf2** White prepares an exchange of the knight by means of Ne3 with a subsequent break on the queenside by means of c4, but this idea is harmless for Black. **41...Kd6 42.Ne3 Nxe3 43.Bxe3 h5! 44.g4**

[44.c4 is always met by means of Kc6 That's why Levon played 41...Kd6.]

44...hxg4 45.hxg4 g5 Closing the position on the kingside and building a fortress. **46.Kc2** A quiet, but interesting game, which featured sophisticated manoeuvres. The position was never far from equality and so the outcome of the game is fully justified. Probably 8.Bg5 is the best chance to set Black problems. **½−½**

[Mikhalevski, V]

1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 Bb6 A relatively uncommon line. Black moves the bishop away from the possible attacks d4 and b4, and keeps the option of ...d5 in reserve. While playing this line Black has to be ready to allow an exchange of the dark−squared bishop. See 6.Bb3.
[The main line 5...a6 occurred in a majority of the games. Ivanchuk, V (2776)−Navara, D (2702)/ Havana CUB 2011/[Mikhalevski, V].]
[Sometimes Black deviates with 5...0−0 Macieja, B (2651)−Fressinet, L (2718)/Wattenscheid GER 2011/ [Mikhalevski, V].]
[While 5...d6 may transpose either to 5...a6 after 6.Nbd2 *(* or to the text in case of *6.b4 Bb6)* 6...a6 7.Bb3 Ba7 Hamdouchi, H−Van Hoolandt, P/ Nice FRA 2002/[Paul Motwani].]
6.b4 This way White takes space on the queenside.
[After the most popular 6.0−0 the game may continue d6 7.Bb3 Ne7 8.Nbd2 c6 saving the dark−squared bishop from exchange.]
[Wang Yue also faced 6.Bb3

freeing the c4−square for the knight. d6 7.Nbd2 Ne7 *(7...a6* doesn't make much sense as Black loses a tempo compared to 5...a6. *)* 8.Nc4 Ng6 9.h3 0−0 10.Bc2 Re8 11.0−0 *(11.a4!?)* 11...Be6 12.Nxb6 axb6 13.a3 d5 and Black equalised in Tiviakov, S (2643)−Wang Yue (2703)/Khanty Mansiysk 2007.]

6...d6 7.a4 a5

[7...a6 is almost equally popular.]

8.b5 Ne7 9.0−0 Ng6 This move order looks more precise than 9...0−0 as it reduces White's options.

[The immediate 9...0−0 may transpose to 9...Ng6 after 10.Nbd2 *(* but may also have an independent value if White develops his dark−squared bishop first. *10.Bg5; 10.Be3)* 10...Ng6]

10.Nbd2 0−0 11.Ba2

[White main alternatives include 11.Bb3]

[11.Ba3]

[11.Re1]

11...c6 Surprisingly, the position, which ensues after this move is already very uncommon.

[The young Chinese player Zhou Jianchao tested the aggressive 11...Bg4!? This game is worth serious interest. 12.h3 Bh5! Black is not afraid of 13.g4 and prepares 13...Nf4. 13.g3 *(13.g4? Nxg4 14.hxg4 Bxg4 15.Kh1 Qf6 16.Rg1 h5* leads to a dangerous initiative for the sacrificed piece. *)* 13...d5 14.Ba3 *(14.exd5!?)* 14...dxe4!? 15.dxe4 Bxf3! 16.Nxf3 Nxe4 17.Bxf8 Qxf8 *(* Probably after *17...Qxd1 18.Rfxd1 Rxf8 19.Kg2 Nxc3* Black didn't like *20.Rd7* though he should be able to solve his problems. *)* 18.Qd3! A clever counterattack. *(18.Kg2 Nxc3 19.Qb3 Nxa2 20.Rxa2±* is slightly better for White. *)* 18...Nxg3

A) 19.Nxe5! was critical. Nxf1 *(19...Nxe5 20.Qxg3±)* 20.Bxf7+ Kh8 21.Nxg6+ hxg6 22.Qxg6 Ng3! 23.Kg2! Bxf2! 24.Rf1! Be3! 25.Qxg3 Qc5 26.c4 Rf8 and Black survives the attack, though he is still under some pressure.;

B) 19.Ng5 leads to a draw. 19...Nxf1 20.Nxf7 e4! 21.Qxe4 Ng3! 22.Qf3 Qe7 and a draw was agreed in Jobava, B (2713)−Zhou Jianchao (2636)/Martuni ARM 2011 due to a perpetual.]

12.Re1 White has been preparing the transfer of the queen's knight to g3, typical for this type of position.

[12.d4 looks premature due to cxb5! *(12...Bg4 13.bxc6 bxc6 14.Qc2±* Kurnosov, I (2579)−Maiorov, N (2487)/ Minsk 2007. *)* 13.axb5 Bg4!]

[12.bxc6 bxc6 13.d4 Ba6 *(13...Re8 14.dxe5 Nxe5 15.Nxe5 dxe5 16.Qc2* is also roughly equal. Psakhis, L (2550)−Schussler, H (2475)/Lugano 1988. *)* 14.Re1 Re8 doesn't seem to present problems for Black.]

12...d5!? This healthy positional idea is based on tactics.

[Black also has an interesting tactical idea at his arsenal: 12...cxb5 13.axb5 Bd7 14.Rb1 Nh4!? with the idea 15.Nxh4 *(15.h3=)* 15...Ng4! with the initiative.]

13.h3 Movsesian covers the g4−square.

[After 13.exd5?! cxd5 White shouldn't play 14.Nxe5? in view of Nxe5 15.Rxe5 Bxf2+∓

with the subsequent 16. ..Ng4.]
[13.Ba3 Re8 14.c4 dxe4 15.Nxe4 Nxe4 16.dxe4 c5!= is ok for Black.]
13...Re8 14.Nf1 h6 Black covers the g5−square and thus prepares 15. ..dxe4.
[After 14...dxe4 15.Ng5 Re7 16.Nxe4 Nxe4 17.dxe4 Black feels some discomfort, though the position remains equal.]
15.Qc2 Be6 Another point behind 14... h6. Wang Yue's play is simple and strong. **16.Rb1 Bc7** A solid, but probably not the best option.
[16...Qc7! with the idea of 17. ..Rad8 looks pretty strong and may lead to favorable complications for Black. 17.bxc6 *(17.Ng3 Rad8)* 17...dxe4!? *(17...bxc6)* 18.cxb7 *(18.dxe4 Bxa2 19.Qxa2 Qxc6* is fine for Black. *)* 18...exd3 19.bxa8N!? dxc2 20.Nxc7 cxb1Q 21.Bxb1 Bxc7∓ and White has to think of equality.]
17.c4?! White is trying to apply some pressure, but weakening the dark squares turns out to be a serious drawback.
[It would be better to continue with the natural 17.Ng3]
17...Bd6! Taking control over the important dark diagonal a3−f8 and getting ready for 18.c5. Black has at least equalised. **18.cxd5?!**
This inaccurate exchange leads to Black's advantage.
[After 18.c5 the dark−squared bishop finds a good square near the king. Bf8]
[18.bxc6 bxc6 19.Bd2 deserved attention.]
18...cxd5 19.Bd2 Rc8 20.Qb2 Bc5!∓ Black is seizing the initiative. **21.Ng3 Qb6!** Suddenly it's not easy to meet Black's threats. **22.Rf1?!**
Another inaccurate move and Black increases his advantage.
[Probably 22.Be3 Bxe3 23.Rxe3 d4 24.Bxe6 Qxe6 25.Ree1 Nd7!∓ would be better, though Black is on top anyway.]
22...Nf4!∓ 23.d4
[23.Bxf4 is hardly a good idea either. exf4 24.exd5 Bxh3!∓]
23...Bxd4 24.Nxd4 Nd3! When playing 22...Nf4 Black should have seen this intermediate move. **25.Qa3 Qxd4** Black has won a pawn and possesses a serious advantage. **26.Be3**
[26.exd5!? looks like a better defense. Nxd5 27.Rbd1 e4 28.Bxd5 Bxd5 29.Nf5! *(29.Bxa5 Qe5!* leads to a strong initiative. *)* 29...Qc5 30.Qxc5 Rxc5∓ with the idea 31.Bxa5?! Bb3 32.Nd6 Bxd1 33.Nxe8 Bxa4 34.Nd6 f5∓]
26...Rc3! Another important intermediate move, which Black had to see in advance. **27.Qd6** The only practical chance.
[27.Bb3 doesn't leave much hope in view of Qb4 28.Qa2 Qd6∓]
27...Qxa4 28.Bxd5 Bxd5 29.exd5 Qa3? One step from a virtually winning position Black errs.
[After the correct 29...Nf4 30.Ra1 Qc4! 31.Rxa5 N4xd5∓ White has very little chance of a successful defense.]
30.Qxa3? White returns the favor.
[After 30.Qb6!∓ White creates counterplay thanks to his strong d−pawn and the weakness of the a5−pawn.]
30...Rxa3 31.d6 Rd8∓ Now Black is a healthy pawn up again. **32.Rfd1 Kh7!?**

Preparing 33... Kg6. **33.Nf5 Nd5 34.Bc1 Nxc1 35.Rbxc1**
[35.Rxd5? runs into Ne2+ 36.Kh2 Nc3−+]
35...Nc3 36.Rd2 g6? A mistake, probably in time trouble.
[36...a4! was strong. 37.b6 Rb3 38.Rdc2 Nb5 39.Rc7 a3 40.Ra1 Kg6 41.g4 Nxd6 42.Nxd6 Rxd6 43.Rxb7 Rxh3−+ and after an exchange of the b and a−pawns Black wouldn't have problems leading the game to a win.]
37.Ne3 Nxb5
[37...Rb3 is likely to lead to a drawish rook endgame with four pawns versus three on one side after 38.Nc4 a4 39.Na5 Rxb5 40.Nxb7 Rxb7 41.Rxc3∓ with an unavoidable exchange of the a and d−pawns.]
38.Nc4 Rc3?! After this inaccuracy a draw is unavoidable.
[38...Ra4! 39.d7 Kg7!∓ was still possible, with chances for a win.]
39.Rxc3 Nxc3 40.Nxa5 Ne4
[40...Rd7 41.Nxb7 Na4 is safer.]
41.Nxb7 Rd7 and in this roughly equal position a draw was agreed. A sad miss from the Chinese player who was very close to a win... The line chosen by White in this game doesn't seem to promise any advantage, both 11...c6 and 11...Bg4 lead to good play for Black.

Sulskis,Sarunas: ' As top players are usually well aware of matters relating to king safety, their blood−thirsty adversaries might instead venture to launch an attack on the queenside. For an attack to have a better chance of prevailing over defence, clear targets are usually necessary and doubled and isolated pawns fit in this category perfectly. The main strategic issue is how to provoke such weaknesses in the face of an uncooperative opponent. Often one must travel a road that runs through the thin red line of a risky opening... For the second time in the tournament an unorthodox Georgian grandmaster opts for the same particular Italian Game set−up, which has been branded harmless by opening theory for at least five decades. We have reached on of the critical position of the entire variation. White has a space advantage but Black has enough resources to challenge White's centre. Besides the pressure against the central d4−pawn, Black could eliminate White's spatial advantage by means of f7−f6. In this way, his rook comes into play and the pressure along the f−file might become serious.

A) Hardly a good idea for White is 11.Bxc6 bxc6 especially taking into account that 12.Qa4?!

FIDE Candidates 2020 (9.1) 20.04.2021

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 h6 6.0−0 d6 7.Re1 0−0 8.h3 Bb6 This move has been played recently at least four times by Mamedyarov. In fact, one of the games was against Caruana and so Fabiano decided to include it in his own repertoire.

[Earlier we considered three alternatives. 8...a5!? Papp,G (2587)− Harikrishna,P (2768) Novi Sad SRB 2016 [Mikhalevski,V]]

[8...Re8 Ding Liren (2791)−Carlsen,M (2863) chess24.com INT 2020 [Mikhalevski, V]]
[and 8...a6 in Firouzja,A (2728)−Tari, A (2633) Stavanger NOR 2020 [Mikhalevski,V] The latter transposed to 8...Re8.]

9.Nbd2 Ne7 The main line, a typical transfer of the knight to g6.
[9...a5 transposes to 8...a5. Here you can find a lot of games of Nakamura's.]

10.d4 This may turn out to be premature. The text has been seen in at least five games and Black won all of them!
[Other options include 10.Bb3 with the idea of exchanging the dark−squared bishop by means of 11.Nc4. Ng6 Black may ignore it. *(10...c6!? 11.Nf1 Ng6* is also playable. *)*
A) In case of 11.Nc4 Be6 12.d4 Black equalises by means of exd4 13.cxd4 Bxc4 14.Bxc4 Nxe4 15.Bd5 *(15.Rxe4?! d5* is better for Black thanks to the isolated pawn in the centre. *)* 15...Ng5! 16.Nxg5 hxg5 17.Bxb7 Rb8 18.Bc6 Qf6 19.Be3 Ne7 20.Be4 Nf5 21.Qh5 g6 22.Bxg5 gxh5 23.Bxf6 Bxd4!=;
B) 11.Nf1 Now I can suggest a new move 11...c5!? , which is directed against d3−d4.]
[10.Nf1 Ng6 11.Ng3 *(11.Bb3* transposes to 10.Bb3. *)* 11...Be6 12.Bb3 and now I can suggest c5 again, which has never been seen yet. 13.a4 *(* After *13.d4 Bxb3! 14.axb3 cxd4 15.cxd4 exd4 16.Nxd4 Re8∓* Black obtains a comfortable position. *)* 13...Rc8 14.Bxe6 fxe6 15.Qb3 Qe7 16.a5 Bd8 with equal chances.]
[10.a4 a5 transposes to 9.a4. Now after 11.Bb3 c6 seems to be the most accurate. 12.d4 Ng6 13.Bc2 Re8 and then either
A) or 14.Nf1 d5! 15.Nxe5 Nxe5 16.dxe5 Nxe4 *(16...Rxe5!? 17.Bf4 Rxe4! 18.Bxe4 Nxe4 19.Be3 Bc7* leads to compensation for the sacrificed material. *)* 17.Bxe4 dxe4 18.Qh5 Anand,V (2757)−Mamedyarov,S (2772) Bucharest 2019. Now Black should play Re6!
A1) or 19.Bf4 Qe8! 20.Rxe4 g5 21.Be3 *(21.Bg3?* runs into *f5 22.Qxe8+ Rxe8 23.Re2 Be6∓)* 21...f5! 22.Qxe8+ Rxe8 23.Bxb6 fxe4 24.Bc7 Bf5 with a position of dynamic equality.;
A2) 19.Rxe4 Qd5 20.Re1 Rg6;
B) 14.Nc4 Bc7 15.Be3 in Caruana,F (2822)−Mamedyarov, S (2772) Bucharest 2019, which can be answered by exd4 16.Bxd4 *(16.cxd4? Nxe4 17.Bxh6 d5!∓)* 16...Nd7 with the idea of 17...Nde5 and Black is doing fine.]

10...Nc6! The best reaction. Suddenly the knight comes back to c6 in order to put pressure on d4.
[10...Ng6 is less accurate.]

11.a4!? A new move.
[In the only preceding game White played 11.dxe5 and after Nxe5 12.Nxe5 dxe5 13.Qf3 Be6 Audi,A (2360)−Atalik,S (2505) Novi Sad 2019. Now White could try to set some problems by means of *(* Instead, *13...Qe7!* preparing 14...Be6 was more accurate with the idea to meet *14.Nf1* with *Be6 15.Bxe6 Qxe6 16.Ng3 Rfd8 17.Nf5 Kh7* and Black

is fine. *)* 14.a4 a6 15.a5 Ba7 16.Bf1 Re8 17.Nc4 Bd7 18.Ne3 with a slight edge for White.]

11...a5! The best reaction. Now the players transpose to a game between two Chinese players.

[After the straightforward 11...exd4 12.cxd4 Nxd4? 13.Nxd4 Bxd4 White plays 14.Nb3 Bc5 15.Nxc5 dxc5 16.Qc2!± with a dangerous position for Black.]

12.Ba2!? White prepares 13.Nc4 and sacrifices a pawn for the initiative.

[The aforementioned game saw 12.dxe5 Nxe5 13.Nxe5 dxe5 14.Qe2 Qe7 15.Bb3 Xu,Y (2536)−Xiang,Z (2409) Xingtai 2018. Now the most accurate would be Bc5 16.Nf1 Rd8 17.Ng3 Ra6! with a comfortable position.]

12...exd4! Black has to accept the challenge. **13.Nc4!** The point of the previous move. Kirill damages Black's pawn structure and obtains the bishop pair at the cost of a pawn. **13...dxc3 14.Nxb6 c2** Fabiano's idea is to retain control of the b4−square.

[Nevertheless, 14...cxb6 deserved attention. 15.bxc3 Re8 16.Bb1 Be6 17.Be3 d5 18.e5 Ne4 with a position of dynamic equality.]

15.Qxc2 cxb6

[The intermediate 15...Nb4 doesn't make much sense, as after 16.Qd1 Black has no time to capture the a2−bishop due to the hanging rook on a8.]

16.Bd2! The b4−square has to be covered. **16...Be6!** Very logical. Caruana exchanges one of the bishops. **17.Bxe6 fxe6 18.Qb3** A double attack on e6 and b6. **18...Qe8!?** An interesting idea. Black gives back two pawns for the initiative, while the queen will protect the knight on c6. **19.Qxb6**

[After 19.Rad1 Black can still transfer the knight to c5. Nd7 20.Be3 Nc5 21.Bxc5 dxc5 22.Qxb6 Rxf3! 23.gxf3 Nd4 24.Re3 Qh5 promises sufficient counterplay for an exchange.]

19...Nd7! 20.Qe3

[or 20.Qxb7 Nc5 21.Qc7 Rd8 22.Qb6 Rxf3! 23.gxf3 Ne5! 24.Bxa5 Ra8! 25.Qxd6 Ncd3! with a serious initiative.]

20...e5! Black places his pawns on dark squares in order to restrict White's minor pieces. Weakening the d5−square and the d6−pawn is compensated by the activity of his pieces. **21.Qd3**

[After 21.Rad1 Nc5 22.Qc3 Rf6 23.Be3 b6 Black is very solid.]

21...Qe6 The easiest. Black protects the d6−pawn and covers the light squares with his queen. **22.Nh4?!** Too optimistic.

[22.Rac1!? Kh7 23.Qe2 Nc5 24.Be3 b6 would have been roughly equal.]

22...Nc5 23.Qg3 White creates a threat of 24.Nf5, but Black has no problem stopping it. **23...Kh7! 24.Rad1**

[Now 24.Nf5 is met by Rf7 threatening both 25...Nxe4 and 25... d5. 25.Qh4 Nd4!∓ with the better chances for Black.]

24...g5!? It was unnecessary to weaken the king's position.

[The prophylactic 24...Rf7! was more accurate. Now after 25.Bc3 *(25.Nf5?* runs into *Nxe4!* The main idea behind 24...Rf7. *26.Rxe4 Qxf5−+)* 25...Nxa4 26.Nf5 Rd8∓ Black retains an extra pawn and slightly the better chances.]

[White hoped for 24...Nxa4 25.Nf5 Rf7? *(25...Qg6* is still enough for equality. *)* 26.Bxh6! gxh6 27.Rxd6+−]

25.Nf3! Rf7! Black doubles on the f−file.

26.Bc1?

[26.Bxg5? doesn't work in view of Rg8!−+]

[26.Nh2! was necessary, with the idea to meet Nxa4 with 27.Qa3 Nc5 *(*or *27...b5 28.Be3 Nb4 29.Rd2 Rc8 30.Red1 Rc6 31.Nf3* and it's difficult for Black to make progress. *)* 28.Be3 b6 *(28...Nxe4 29.f3 Nc5 30.Bxc5 dxc5 31.Qxc5* gives White compensation thanks to the weakened position of the black king. *)* 29.Re2 White prepares to double rooks on the d−file. b5 30.Bxc5 dxc5 31.Qxc5 Nd4 32.Re3 with roughly equal chances.]

26...Raf8? Black returns the favour.

[For some unclear reason Caruana rejects 26...Nxa4! Now White doesn't seem to have any compensation for the pawn. 27.Nd2 *(*Now *27.Qg4 Qxg4 28.hxg4 Rd7*−+ is insufficient. *)* 27...Nc5∓]

27.Qg4 Qxg4 28.hxg4 Rf6 29.Be3 Nxa4 30.Rd5!? The rook is heading for b5.

[Simple 30.Re2! would be more accurate. Nb4 31.Red2 Kg8 32.Rc1 and control of the c−file compensates for the pawn.]

30...Nxb2 The only try to set problems.

31.Rc1! Alekseenko covers the c4−square. **31...R8f7 32.Rc2 Na4 33.Rc4** Now the knight can't escape the chase without giving back a pawn. **33...Nb2 34.Rc2 Na4 35.Rc4 Nc5** An attempt to retain some winning chances. **36.Bxc5 dxc5 37.Rcxc5**

[37.Rdxc5! was more precise with the idea to bring the knight to b3. For example, Re6 38.Nd2 Rd6 39.Nb3 Rd1+ 40.Kh2 Rxf2 41.Rb5! Rf7 42.Nxa5 Nxa5 43.Rxa5 Rd4 44.Rxd4 exd4 45.Rd5 with good chances to hold.]

37...Re7 The wrong rook. Black had to keep it on the seventh rank.

[37...Re6!? was worth a try, but White equalises with precise defence. 38.Nxe5 Nxe5 39.Rxe5 Rxe5 40.Rxe5 b6 41.Rb5 Rb7 42.Kf1 a4 43.Ke2 a3 44.Rb3! 38.Nxe5 Nxe5 39.Rxe5 Rxe5 40.Rxe5 Ra6 Fabiano hoped that this would be a win, but White equalises with relative ease. **41.Re7+ Kg6 42.Rxb7 a4 43.f3 a3 44.Rb1 a2 45.Ra1 Kf6 46.Kf2 Ke5 47.Ke3 Ra8! 48.Kd3!** The king goes towards the a−pawn. **48...Kf4 49.Kc4 Kg3 50.e5! Kxg2 51.e6 Kxf3 52.Kd5! Kxg4 53.e7** The strong passed pawn compensates for the material deficit. **53...Kf3 54.Rxa2 Re8 55.Ke6 g4 56.Kf7 Rxe7+**

[or 56...Rb8 57.e8Q Rxe8 58.Kxe8 g3 59.Kf7 h5 60.Kg6 h4 61.Kg5 h3 62.Ra3+ Kf2 63.Ra2+ Kf3 64.Ra3+ and the king can't escape the checks.]

57.Kxe7 g3 58.Kf6 g2 59.Rxg2 Kxg2 A logical outcome, while 8...Bb6 is perfectly playable.

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6 5.c3 d6 6.Nbd2 g5 7.Nf1
One of two main reactions to Black's early aggression, together with 7.h3.
[Earlier we considered 7.h3 in Anand,V (2767)−Nepomniachtchi,I (2775) Zagreb CRO 2019 [Mikhalevski,V]]
[and 7.h4 in Alekseenko,K (2696)−Vitiugov,N (2722) chess. com INT 2020 [Mikhalevski,V]]
7...g4! 8.N3d2
[8.Nh4 isn't bad, as after Nxe4?! *(8...d5!?* leads to equality after *9.exd5 Nxd5 10.Qb3 Na5 11.Qa4+ Nc6 12.Qb3* and neither side can avoid a repetition. *)* 9.dxe4 Qxh4 10.Ne3 White obtains dangerous compensation.]
8...d5!? This standard break in the centre works well for Black.
[8...Bg7 is less accurate in view of 9.Ne3! h5 10.Qb3! *(10.a4!?* is also possible. *Qe7 11.a5 a6 12.Ndf1! h4?* Andriasian,Z (2600)−Caruana,F (2828) Chess.com INT 2019 and now *13.f3!±* promised White a clear edge. *)* 10...Qd7 *(10...Na5 11.Bxf7+ Kf8 12.Qa4 Kxf7 13.Qxa5±)* 11.0−0 Na5 12.Qc2± with some edge for White.]
[However, 8...h5!? 9.Ne3 Bh6= makes sense. Zierk,S (2499)−Matinian,N (2475) Chess. com INT 2020]
9.exd5 Nxd5 10.Ne3! The only attempt to set some problems.
[10.Qb3?! is dubious in view of Nf4! *(10...Na5 11.Qa4+ Nc6 12.Qb3* leads to a repetition. *)* 11.Bxf7+ Ke7 12.Bc4 Nxd3+ 13.Bxd3 Qxd3 and I prefer Black.]
10...Nxe3 11.fxe3 Na5
Black exchanges the light−squared bishop, but his lack of development and the weak square on f5 give White the better chances.
[11...f5! 12.0−0 h5! was correct and led to a position of dynamic equality, but it's not easy to play like this without home preparation.]
12.0−0! Nxc4 13.Nxc4 Bg7 14.e4! h5 15.Ne3! Qd6! A clever move, which has the point of counter attacking the d3−pawn after White trades on f5. **16.Qb3** White forces short castling, although it's not too scary here.
[16.Nf5!? would offer better chances

for an advantage. Bxf5 17.Rxf5 Rd8! 18.Qb3 Rd7 19.Bg5! f6 20.Bh4 Qb6+ 21.Qxb6 axb6 22.Rd1 with a slight edge for White thanks to the pawn weaknesses on the kingside.]

[Another option seems to be 16.Bd2 Be6! *(16...Qxd3?* is strongly met by *17.Nd5! Qc4 18.Bg5±)* 17.Qa4+ Bd7 18.Qb3 Be6 19.Nf5 Bxf5 20.Rxf5 0−0−0 21.Rxf7 Bh6 22.Bxh6 Rxh6 23.Rd1 Rf6 with good compensation for a pawn.]

16...0−0

[16...Be6!? 17.Qxb7 0−0 with compensation for a pawn is sensible too.]

17.Qc2 b6?!

[Black had to attack the d3−pawn immediately. 17...Rd8!

A) or 18.Qf2 Be6 19.Qh4 Qb6! 20.Kh1 Rxd3 21.Nf5 Bxf5 22.exf5 Rad8! 23.f6 Rd1 24.Bg5 Rxa1 25.Rxa1 Qxb2 26.Rg1 Bf8 27.Qxh5 Qxc3 28.Bh6 Qd3! 29.Bxf8 Rxf8 30.Qxg4+ Qg6 31.Qd7 with equal chances.;

B) 18.a4 Be6! *(* but not *18...Qxd3?? 19.Rd1!+−)* 19.Qf2 a5 20.Nf5 Bxf5 21.Qxf5 Qg6 is also fine for Black.;

18.Bd2! Ba6!

[Now 18...Rd8? doesn't reach the goal due to 19.Rad1! and the d−pawn is untouchable, while Ba6? 20.Nf5 Qxd3 21.Qc1 Qxe4 22.Rde1 Qd3 23.Bh6+− leads to a decisive attack.]

19.c4 Rad8 20.Nd5⩲ Probably Black missed this defence. **20...Bc8!** Black has to cover the f5−square and prepare f5.

[20...c6? is strongly met by 21.Bb4 c5 22.Bc3+−]

21.Rae1!? Prophylaxis against 21...f5.

[21.Rad1! was better, protecting the weakest point in White's position, the d3−pawn. f5 22.Bg5 Rde8 23.d4!⩲]

21...f5 22.exf5?! This capture is slightly inaccurate and allows Black to equalise.

[22.d4!? looks promising and after f4! 23.Qc1! c6 24.Bb4 Qh6! 25.Bxf8! Bxf8 26.dxe5! Bc5+ 27.Kh1 cxd5 28.exd5 Be3 29.Qb1± White is better thanks to the strong pawn centre.]

22...Bxf5 23.Bb4 c5 24.Bc3 Be6= 25.Qd2?

[White had to play 25.Rxf8+! Rxf8 26.d4!! e4! 25...Rxf1+ 26.Rxf1 Bxd5 27.cxd5 Qg6!∓ Probably Alekseenko missed this strong move. Now White's position is dangerous. **28.Qd1**

[or 28.Qc2 b5! 29.Qb3 Qxd3 30.Rd1 Qe3+ 31.Kh1 b4!∓]

28...Rxd5? Black returns the favour.

[or 53...gxh3 54.Qf2=]

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Surprisingly, the Evans gambit is starting to gain some popularity.
4...Bxb4 5.c3 Be7 6.d4 Na5 I've already analysed this line for you not less than twice in the last year and a half, not counting the current game.
7.Bd3 This move, which looks like the most logical retreat, is actually just the third most popular line after the following alternatives.
[7.Nxe5 Fressinet, L (2707)−Efimenko, Z (2701)/Wijk aan Zee NED 2011/[Mikhalevski, V].]
[and 7.Be2 Brkic, A (2587)−Tkachiev, V (2644)/Istanbul TUR 2012/[Mikhalevski, V].]
7...d6 This defence was introduced by Max Euwe back in 1946. I'll remind you that a similar idea takes place after 7. Be2. Black returns the pawn in order to safely complete the development of his kingside.
[7...exd4 8.cxd4 d5! 9.exd5 Qxd5 10.Nc3! in Feist, R−Glitz, M/Roethenbach 1996 allowed White to obtain a strong initiative for the sacrificed pawn.]
8.dxe5 dxe5 9.Nxe5 Nf6 10.0−0
[After 10.Qa4+ c6 Black has obtained a better version of 7.Be2 since the d−file is blocked by the White's light−squared bishop, which is itself in a hanging position. Paez, A (1770)−Corredor Castellanos, C (1874)/Bogota 2012.]
10...0−0 11.Qc2 Short follows a recent game from the young American International Master, though the line was introduced by the man behind 1.b4, Alexey Sokolsky. **11...c5!** A good novelty. Black makes a luft for his queen.
[Earlier Black tested other options: 11...Bd6 12.Nf3 Nc6 13.Bg5?! *(13.Nbd2!?* looks like a possible improvement. *)* 13...h6 14.Bh4 g5 15.Bg3 Nh5 16.Nbd2 with a complex position in Molner, M (2489)−Erenburg, S (2629)/ICC INT 2012.]
[The stem game featured 11...Be6 12.Rd1 Qc8 13.Nd2 and after Rd8 14.Nf1?! Black realized that the queen on c8 is misplaced and played *(14.Nb3! Nxb3 15.axb3±)* 14...c5 with a roughly equal position in Sokolsky, A−Shishov, M/Baku 1958.]
12.f4?! Nigel is trying to keep the knight on e5, but weakens the a7−g1 diagonal.
[12.Nd2 was safer and led to a position of dynamic equilibrium.]

12...c4! The Cuban number two underlines White's inaccuracy by this pawn sacrifice. **13.Be2**

[After 13.Nxc4 Black develops a strong initiative. Nxc4 14.Bxc4 Bc5+ 15.Kh1 Ng4 16.f5 Qh4 17.g3 Qh3 18.Qg2 Qxg2+ 19.Kxg2 Re8∓]

13...Bc5+ 14.Kh1 b5! It's becoming clear that Black has won the opening battle. **15.Ba3 Qe7!** Black supports the bishop in order to retain control over the important a7−g1 diagonal. **16.Bxc5 Qxc5 17.Nd2 Bb7** Both sides have completed development, but Black has obtained the better chances thanks to the weakening move 12. f4. **18.Rae1 Rad8 19.Bf3 h6** A useful move, which gives the king a luft. **20.h3 Rfe8?** Black's play looks logical and strong, but in fact the last move was inaccurate and allowed White to exploit the tactical features of the position..

[Black should have preferred another useful move 20...a6]

21.Re2?! Short misses his chance.

[21.Nxf7! An unexpected tactical blow. Kxf7 *(* It makes sense to reject the sacrifice and obtain some positional compensation for the exchange after *21...Rd3!? 22.Ne5 Rxe5 23.fxe5 Qxe5)* 22.e5 Rxd2! *(22...Bxf3?! 23.Nxf3 Nd5 24.Qh7!* with a powerful attack.*;* or *22...Ng8?! 23.Bh5+ Kf8 24.Bxe8 Rd3!! 25.Ne4! 21...Rxe5!? A logical exchange sacrifice, which leads to a comfortable position for Black.

[However, Black also had some reasonable alternatives, such as 21...Nd7 22.Nxd7 Rxd7 23.e5 Bxf3 24.Nxf3 Rd3 with a slight edge.]

22.fxe5 Qxe5 23.Rd1

[I like the immediate 23.a4!? looking for counterplay on the queenside. a6 24.Qa2!? Nc6 25.Qb2 Bc8 26.axb5 axb5 27.Rb1 Bd7 28.Qxb5 Qxb5 29.Rxb5 Nd4 30.Rb2 Nxe2 31.Bxe2 with roughly equal chances.]

23...Bc6! Bruzon supports the b5−pawn and prepares a manoeuvre of the knight via b7 to c5. **24.Nf1! Nb7** This move looks like an inaccuracy.

[It would be better to keep the rook by means of 24...Re8]

25.Rxd8+ Nxd8 26.Ne3! Ne6 27.Nd5 Ng5 28.Nxf6+ gxf6 29.Qd2! White has seriously improved his position within the last few moves, though Black retains good compensation for the exchange. **29...Kg7 30.Qe3 a6** An inaccuracy.

[The immediate 30...a5!? would be better.]

31.Re1! a5 32.a3 Qg3?! It seems that Black missed White's reply.

[Black should have waited by means of 32...Ba8!]

33.Bg4! Qxe3

[33...Qe5 allowed the bishop to regroup to f5. 34.Bf5!±]

34.Rxe3 Nxe4 35.Bd7! Now White obtains some winning chances.

35...Bd5!

[After 35...Bxd7? 36.Rxe4± the endgame is very unpleasant.]

36.Bxb5

[36.Kh2! h5 37.h4! was more

precise as it would delay the advance of the f−pawn to f5. Kg6 38.Bxb5 f5 39.Re1!±]

36...f5! Black prepares the advance of the king to e5. **37.Kh2 Kf6 38.Re1 Ke5** Now Black's compensation for the exchange looks sufficient. **39.Ba4 Kd6 40.Rc1 f4?!**

[40...Ke5! was better, staying with the king in the centre.]

41.Bd1! Kc5 42.Bg4

[42.Kg1! looks better.]

42...Ng3! 43.Re1 Ne4 44.Rc1 Ng3 45.a4?! A risky move as the pawn on the light square may become vulnerable.

[45.h4!?]

45...f5! 46.Bd1 Bc6! Now White is tied to his weak pawns. **47.Kg1?** Looks like a blunder.

[47.Ra1! was necessary to free the bishop.]

47...Bxa4! The advantage changes hands. **48.Kf2?!** Short has lost the thread and got into trouble.

[After the correct 48.Bf3! Bb3 49.Re1! Kd6 50.Re8! a4 51.Ra8 White should be able to hold a draw.]

48...Bxd1 49.Rxd1 Ne4+ 50.Ke1 Nxc3 Now it's not easy to stop the passed pawns. **51.Rd8?**

[Surprisingly the best defence is the passive 51.Ra1 Kb4 52.Kd2 a4 53.Kc2 though it doesn't guarantee a draw.]

51...a4! 52.Kd2 Kb4 53.Kc2 a3 54.Rd4? After this mistake there is no way back.

[The most stubborn would have been 54.Rh8 h5! 55.Ra8 Nb5! 56.Kd2 Kb3! 57.Rb8 Ka4 58.Ra8+ Kb4 59.h4 Kb3! 60.Rb8 Ka4 61.Ra8+ Kb4 Eventually White finds himself in zugzwang and his defence collapses. 62.Ra6 Nc3! 63.Kc2 Na4−+]

54...Ne4? Black returns the favour.

[54...a2! led to a simple win after 55.Kb2 Ne2! 56.Rd8 c3+ 57.Kxa2 c2−+]

55.Rd8?

[55.Rd5! Nc5 56.Rxf5 Nd3 57.Rf8 allowed Short to put up some resistance.]

55...Nc3! 56.Rd4?

[56.Rh8 was better. See 54.Rh8.]

56...a2! Finally Black finds an easy path to a win. **57.Kb2 Ne2** and White resigned, not waiting for the advance of the c−pawn. An interesting fighting game despite numerous mistakes. However, the opening line looks pretty good for Black and so the ball is in White's court.

Candidates Tournament (6) 23.03.2020
[Giri,Anish]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5
My opponent has a lot of experience playing the Italian and I even read some praise of his skills in this subtle opening by Magnus Carlsen himself. **4.0−0 Nf6 5.d3 d6 6.c3 0−0 7.Re1 a5**
I played with ...a6 more often, but this system is one of the main lines as well. Black stops White from grabbing space on the queenside. **8.Nbd2 Be6 9.Bb5 Ba7** After some thought I decided to deviate from the main theoretical move.

[9...Qb8! 10.Nf1 Qa7 is what they usually do here, but I fancied my chances more in less explored waters.]

10.Nf1 If White wants to look for an advantage in this variation he has to do it somewhere between now and move 13, because after I got the d5 break, my position was very fine. On every move White has alternatives. **10...Ne7 11.Ng3** Instead, White could play d4 or h3 already here. **11...c6** It looked sensible to kick the bishop while it is forced to go to a4, before he pushed d4. **12.Ba4 Ng6 13.h3**

[13.d4 was more principled, taking the center first, but then surely White

was bothered by Bg4!? when indeed it is not so easy for him.]

13...d5! 14.exd5 Nxd5 The e5 pawn is not hanging because of the Bxf2+ Qf6+ trick in the end and in general, Black got a good version of this central pawn break. I was satisfied with this position, rarely does one get a slight edge with Black against such a well prepared player. That said, white's position remains solid, of course. **15.Bc2**

[15.d4 is more natural immediately, but it is most likely just going to transpose. exd4 16.Nxd4 Qc7!? 17.Nxe6 Bxf2+! is a theme: 18.Kxf2 fxe6+ 19.Kg1 Qxg3]

15...Qc7

[I actually spent some time pondering over the overly risky 15...f5!? but finally decided that it is too murky, plus the move in the game is simple and good.]

16.d4 exd4 17.Nxd4 Rae8 I spent a little too long on this obvious move, but I was trying to pin down my small plus and hesitated a lot between this move and the more direct 17...Ndf4.

[17...Ndf4 had me excited as I was deeply immersed in tactics after Nxe6, but White is never going to be this suicidal and has some solid options to try and hold the balance. 18.Nge2!? *(18.Nxe6 Bxf2+ 19.Kxf2 Nxh3+ 20.gxh3 fxe6+ 21.Bf5 Rxf5+ 22.Nxf5 Qh2+ 23.Ke3 exf5* is very spectacular and also winning. *)*]

18.Bg5 Sensible, White wants to finish his development too.

[18.Be4 is what I expected, when I finally settled on the simple retreat Nf6!? Now if White captures everything he once again has some issue on f2. 19.Bxg6 hxg6 20.Nxe6 Bxf2+!? 21.Kxf2 fxe6 and Black will win back the piece with dividends, because 22.Nf1 fails to Ng4+ 23.Kg1 Rxf1+! and Black will crush.]

18...Ndf4

[18...h6!? was an alternative I considered very seriously too. 19.Bd2 Ndf4 Black keeps some pressure.]

19.Qd2 Bd5 20.Rxe8?! Very natural to trade down with tempo, but objectively White should give up the bishop pair to equalize.

[20.Bxg6 Nxg6 21.Ndf5 f6 22.Be3= and White is not having much fun, but stands nonetheless very solid.]

20...Rxe8 21.Re1 Taking on g6 was again a better option. **21...Re5?!** I planned this from very far and it does look pretty, but quite clearly after I played it I realized that it was an awful idea. I simply miscalculated.

[21...Rxe1+ 22.Qxe1 Kf8! would lead to a surprisingly substantial advantage. White not only has an issue with the g2 pawn, but don't forget about the little a2 soldier as well. *(22...Ne6* was actually played in a high level game that reached this far, although from a slightly different move order. 0−1 (51) Grandelius,N (2687)−Hovhannisyan,R (2630) Reykjavik 2019 *23.Ngf5* would sort of equalize though. *)*]

22.Bxf4 Rxe1+! Fortunately I got my mind back in time and noticed that my original plan of keeping the e−file with Nxf4 fails to Be4 when I am suddenly in trouble, as the f4 knight is hanging.

[22...Nxf4 23.Be4! Just for fun I tried to figure out a way here during the game, but it was no longer possible,

White is simply better already.]

23.Qxe1 Qxf4 24.Qe8+?! Tempting check, but actually White will regret it later. No funky business works here.

[24.Ngf5! Bc5 25.a3 White should be defending modestly, the queen on e1 does a good job defending from Qc1+.]

24...Nf8 25.Bb3 This move came as a surprise, I expected White to fish for some chances in 25.Ngf5, though after 25...Bc5 I didn't see how he can proceed.

[25.Ngf5 Bc5 26.Bb3 was actually a better option here. Bxb3 27.axb3 g6 28.Qe3 Qxe3 29.Nxe3 Bxd4 30.cxd4 Ne6 and this endgame I felt is holdable, but Black is still very much pressing.]

25...Bxd4 26.cxd4 Bxb3 27.axb3 Qf6?! The problem was that I considered mostly the natural move ...g6, which was well met with Ne4 and once I spotted Qf6 I was just too happy not to play it. In fact I was sort of proud of this move, but it was actually here where I let the biggest part of my edge slip.

[27...h6! For some reason I didn't consider this simple move, which is a pity, because the line is not that complicated − 28.Ne4 Qc1+ 29.Kh2 Qxb2! and the queen is in time to return, after picking up the important pawn.]

28.Qe4! Now that White retreats Black enjoys a pawn structure for free, but at the same time, White is still very solid and it is hard to convert Black's position edge into something real. **28...g6**

[28...Qe6!? felt right, but I didn't want to allow a knight endgame, which I felt was too drawish. 29.Qxe6 Nxe6 30.Ne2]

29.Ne2 Ne6 30.h4 h5?! very sloppy. I played this swiftly and usually these inclusions happen indeed automatically, but here it was important to regroup the queen immediately to d6, which I later realized turned out to be not so easy.

[30...Qd8! Now White doesn't have time for Qe5, that's the point. 31.g3 Qd6∓]

31.g3 Qd8 32.Qe5 Qb6?! I had to of course go Qc7 to keep any winning chances, but not wanting such an endgame in general and having refused it in much better version earlier, I acted too stubborn. **33.d5! cxd5 34.Qxd5 Kf8** I bluffed that I had Nc5−Nd3, but obviously White has many ways to deal with it. Now the position is just totally equal. Black still has a better pawn structure on the queenside, but White's queen is more centralized.

[34...Nc5 35.Qd4!? is one of the many ways to indirectly protect the b3 pawn. *(35.Nd4 Nd3* was my point, though here too, White has resources, thanks to his excellent pieces. *)*]

35.Nc3 Qc7 36.Ne4 Qc1+ 37.Kg2 Qxb2 At this point I had given up on this game and expected White to smoothly coast towards equality. My opponent, however, decided to use the momentum which was in his favour for the last few moves and decided to try his luck.

[37...Qc6 38.Qe5!]

38.Qd7? Taking on b7 would be the easiest when White should manage it quite easily. At first I thought the move in the game was fine as well, but then I noticed that I can reply with the calm **38...b6!** Now it turns out that White can no longer win back the pawn. **39.Nd6**

Qf6 40.Qe8+ Kg7 41.Qd7
Accompanied by the draw offer, to which I by accident instantly replied "yes, I can see that." Embarassing stuff and my only excuse is that the draw offer came as a shock. **41...Kg8** Black of course has a way to play on. **42.Qe8+ Nf8 43.Qc6!** After a long think my opponent pulled himself together and found the way to defend. My advantage started to evaporate as I started to calculate the lines deeper and finally I settled on the long line which seemed to offer some practical chances. **43...Qd8!**
[43...b5 looks brilliant, but White forces a draw with 44.Qd5!]
[43...Qd4 44.Nb5 Qd8 45.Nc7 was a problem. White is doing ok here, rerouting the knight to d5.]
44.Nc4 I expected this move, but turns out there was a cleaner way for White.
[44.Nb7! is very strong, but I must say not easy. Qd4 45.Nd6! and Black can't improve his position. This is just OK for White.]
44...Ne6!?
[44...Qd7 was another try to squeeze something out of this. One nice line goes 45.Qxb6 Qd5+ 46.Kg1 a4! the point. 47.bxa4!? Qxc4 48.a5 and the best Black can get is 3 vs 2 queen endgame− Qc1+ 49.Kh2 Qf1 50.a6 Nd7 51.Qd4 Ne5! 52.Qxe5 Qxf2+ 53.Kh3 Qf1+ 54.Kh2 Qxa6 which, after some suffering, should be held.]
45.Nxb6 Nd4 46.Qc5
[46.Qb7!? is the computer way to hold this. Nxb3 47.Nd7 a4 48.Ne5 and White manages, due to better coordination, but this really would be a tough call to make, when you can force all the queenside pawns off the board instead.]
46...Nxb3 47.Qb5 Nd2!
[47...a4!? also kept some chances alive and would likely lead to a similar endgame. For example 48.Nxa4 Qa8+ 49.Kh2 Nd4 50.Nb6! Qe4 51.Qd5 Nf3+ 52.Kg2 Nxh4+ 53.Kh2 Nf3+ 54.Kg2]
48.Qxa5 Qd3 I actually didn't see how White could clinch the draw here and it seems there is no way. **49.Qa1!**
White finds the right way, bailing out into a pawn down knight endgame, which obviously should be within.
[49.Kh2 is the move I was expecting from a far, when I planned Qd4! 50.Kg1 Ne4 51.Qe1 Nxg3 52.Qe8+ Kg7 53.Nd7 Ne2+ 54.Qxe2 Qxd7 with what I thought was serious winning chances, though I am not sure.]
49...Qe4+ 50.Kg1 Nf3+ 51.Kf1 Nxh4 52.Qa8+ All forced. Now we get a 3 vs 2 endgame. I wanted to prevent g4 for a while and I am not sure if White can play without f4 forever. Something to think about. Carlsen−Anand is a game to study. The position was the same with colors reversed and White having a4−b3−c3 vs b6−c5 pawns. There Vishy defended better than Kirill, conceptually, as he kept the knight around good squares, but eventually stumbled as well, after meeting h4 (there a5) with g4(b5) instead of gxh (bxa). **52...Qxa8 53.Nxa8 Nf3 54.Kg2 Ne5 55.f4 Ng4 56.Nb6 Kf8 57.Nd5 Ke8 58.Nc3 Ke7 59.Ne4 Ne3+ 60.Kf3 Nc4 61.Ng5 Kf6 62.Ne4+ Kf5 63.Nf2** The first moment I got hopeful. [63.Nc5!?]

63...Nd2+ 64.Ke3 Nf1+ 65.Kf3 Nh2+ 66.Kg2 Ng4 67.Nh3 This stops Ke4, but the knight is completely misplaced here. **67...f6 68.Kf3 Ke6 69.Ke4 Kd6 70.Ng1 Kc5**

72...Nf5+ 73.Kf3 Kc4 74.Nh3 Nd4+ 75.Ke3 Nf5+ 76.Kf3 Kd4 77.Nf2 Nd6 78.Nh3? This is suddenly a losing mistake, although not so suddenly. At this point I was already wondering if I am not actually winning, but in fact White has a findable defense.

[78.Nd1 Nc4 *(78...Nf5 79.Nb2 h4 80.gxh4 Nxh4+ 81.Kg4 Nf5 82.Kf3; 78...Ne4 79.Nb2 Nc3 80.Kg2)* 79.Ke2 when Black doesn't have a good move and will have to let white knight outside the perimeter.]

78...Ne4? I liked the look of this move, but I missed the strength of 80.Kg2!. Black had two ways to win, both quite subtle, but the main key was to keep the knight dominated.

[78...Kd3 79.Nf2+ Kd2 80.Nh3 Nf5 81.Kf2 Kd3 82.Kf3 Nd4+ 83.Kf2 Kd2 84.Ng1 Kc3 Some triangle action. 85.Ke3 Nf5+ 86.Kf2 Kc2 87.Nf3 Kd3 88.Ne1+ Ke4 89.Ng2 h4! 90.gxh4 Ng7! beautiful win. 91.Kg3 f5 92.Ne1 Nh5+ 93.Kf2 Nxf4 and Black will eventually also pick up h4.]

Nd6 86.Kf3 Ke1 87.Nd3+ Kf1 Black walks around and eventually wins. All, still, not so simple, of course.]

79.Ng1 Kd3 80.Kg2! I didn't count on this move. With little time on the clock as well, I felt how it started slipping away. **80...Nd2 81.Kf2 Ke4 82.Ne2 Nb1** Here in the mutual time trouble, I briefly thought I am sort of winning it, but unfortunately White finds the only moves: **83.Ng1! h4 84.Nh3!** Here it has slowly became apparent that White escaped, so I tried some last tricks and surprisingly it worked, already when I really didn't expect it to. **84...Kf5 85.gxh4 Kg4 86.f5** Classy way to do it, but not even the only way.

[86.Kg2 Kxh4 87.Nf2=]

86...gxf5 I was wondering what if I keep both f−pawns and try to get my knight to e6 and eventually get some f4 Kf5 in. With good defense White can prevent that, but even more importantly with the next move my opponent doesn't even give me that.

[86...Kxf5 87.Kg3 Nd2 88.Nf4 Nf1+ 89.Kf3=]

87...Nc3 88.Nf2+ Kg3 89.Nd3?? Shocking, after such a long sequence of great defensive moves, I really didn't expect White to stumble here. 89.h5 also draws, but 89.Nh1+ is a very direct variation. 7 hours is a lot of hours though.

[89.Nh1+!]

89...Nd5+ 90.Kd4 Nf4! White must have missed this move. The pawn endgame is lost, and now that the white king is misplaced, so is the knight endgame. **91.Nc5 Kxh4 92.Ke3 Kg3 93.Nb3 Ne6 94.Nd2 f4+ 95.Ke2 Ng5 96.Kf1 f3 97.Kg1 f2+ 98.Kf1 f5 0−1**

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6 5.c3 d6 6.Nbd2 g5 I decided to include one blitz game, as it featured an interesting line with 6...g5. I remind you that Dubov's 5...g5 was seen in the previous update. **7.h4!?** A new move, which has the point of gaining the h2−square for the knight's retreat.
[Earlier we considered 7.h3 in Anand,V (2767)−Nepomniachtchi,I (2775) Zagreb CRO 2019 [Mikhalevski, V]]
[7.Nf1 is the main alternative to 7. h3.]
7...g4 8.Nh2 h5! Black connects pawns and prepares 9...Bh6. **9.Nhf1?!** White transfers the knight to g3.
[9.Qb3! was strong. Qe7
Now it seems that the queen on b3 is misplaced and White has to consider ...Na5 after Black covers the a4−e8 diagonal, but White retains some edge after *(9...Qd7 10.Nhf1 Na5 11.Qc2 b5 12.Bb3 Bb7 13.Ng3 Nxb3 14.axb3±)* 10.Nhf1! as it's difficult for Black to cover the a4−e8 diagonal. *(10.Ndf1 Nd7 11.Ng3 Na5 12.Qc2 Nxc4 13.dxc4 Qxh4 14.Nhf1 Qe7 15.Rxh5 Rxh5 16.Nxh5 Nb6* is fine for Black. *)* 10...Bh6! *(10...Nd7?! 11.Ne3±* is uncomfortable for Black. *)* 11.Ng3 a6 12.Ndf1! Bxc1 13.Rxc1 b5 14.Bd5 Na5 15.Qa3 Nxd5 16.exd5 Nb7 17.c4!±]
9...Bh6 An inaccuracy.
[9...d5! Seems to equalise. For example, 10.exd5 Nxd5 11.Ne4 *(11.Qb3 Na5 12.Qa4+ Nc6=)* 11...Be7 12.Bg5 Nb6! An important resource. 13.Bxe7 *(*The immediate *13.Ne3?* runs into *f6−+)* 13...Qxe7 14.Ne3 Bd7 15.a4 f5 16.Ng5 0−0−0 with roughly equal chances.]
10.Ng3 Ne7 11.Ndf1 White brings his knights towards the weak f5−square, thus underling the main drawback to Black's 6...g5. **11...Bf4! 12.Qb3** White provokes short castling as Black's kingside was weakened.
[12.Ne3!? looks more challenging.]
12...Rf8? After this unfortunate move the king will have to stay in the centre. The text is also a tactical blunder.
[Black had to accept the challenge. 12...0−0! 13.d4 c6 14.Qc2 Ng6 15.Be3 b5 16.Bd3 Re8= and Black's king is safe enough.]

13.Ne3 White plays according to his plan and misses a chance to win a pawn.

[13.Bxf4! exf4 14.Nxh5! Nxh5 15.Qb5+ Bd7 16.Qxh5± wins a pawn for no compensation.]

13...c6 Black creates a threat of 14...b5.

14.Qc2

[14.a4! was better, as the queen on b3 makes the ...d6−d5 advance difficult and prevents ...Bc8−e6. Qc7 15.0−0 Bd7 16.a5± with an edge for White.]

14...d5 It turns out that Black isn't yet ready for this central break.

[14...Be6!? deserved attention. Black finishes development of the queenside and castles. However, White seems to retain some edge. 15.Ne2 Qc7 16.0−0 0−0−0 17.b4 d5 18.Bb3 Kb8 19.g3±]

15.Bb3! Be6

[15...Qc7!?± is more accurate.]

16.Ne2? Alekseenko misses another good chance to set serious problems.

[16.exd5! cxd5 17.Ba4+! Bd7 18.Nef5! A clever tactical idea. The threats of 19.Nd6 and 19.Ng7 don't leave much choice. Nxf5 19.Bxf4 exf4 20.Nxf5 Rh8 21.0−0± leads to a clear edge for White, who managed to open up the position against Black's king.]

16...Qd7? Black takes away an important square, which he will need for the f6−knight.

[Black had to prepare long castling by means of 16...Qc7! 17.exd5 *(17.g3 Bxe3 18.Bxe3 0−0−0 19.0−0−0 Nd7* is roughly equal. *)* 17...Nfxd5! *(17...cxd5 18.0−0 0−0−0 19.d4! 17.g3 Bxe3 18.Bxe3 a5?! I would try not to push this pawn, taking into account the fact that the king will have to castle long.

[18...Qc7 would be better, even with loss of tempo, although White's chances are higher this time. 19.Bh6 Rg8 20.Bg5 Rg6 21.0−0 0−0−0 22.Rad1± and the weakening of the kingside starts to tell. In particular, the g5−square is weak.]

19.0−0 Ng6?!

[19...Qc7!?]

20.Rad1!?

[20.Rfe1!? deserved attention with an unpleasant x−ray on the e−file. For example, Qc7 21.Bg5 Nh7 22.Bh6 Rg8 23.exd5 cxd5 24.d4!+−]

20...Qc7 21.Rfe1+− Black is in deep trouble.

[21.Bg5!? was also strong. Nd7 *(*or *21...Nh7 22.Bh6 Rg8 23.exd5 cxd5 24.d4+−)* 22.d4!+− was also strong.]

21...0−0−0 This move loses an exchange, but it's not easy to give Black any good advice. **22.Bg5 Nd7 23.Bxd8 Rxd8 24.d4!** The best way to convert a material advantage is to exchange a lot of pieces. The rest is easy. **24...Nb6 25.exd5 cxd5 26.dxe5 Nxe5 27.Nd4 Nf3+ 28.Nxf3 gxf3 29.Qd3 Rg8 30.Qxf3 Bg4 31.Qe3 Bxd1 32.Rxd1 Kb8 33.Bxd5 a4 34.a3 Rd8 35.Bf3 Rg8 36.Bg2 f5 37.Rd4 Nc4 38.Qe6 Rc8 39.Qxf5 Nd6 40.Qxh5 Rf8 41.Qe5** Black's early activity on the kingside backfired in this game. 7.h4 is interesting, but White has to continue

with 9.Qb3!

[Roiz,M]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 0−0 7.Re1!? This original setup is gaining popularity nowadays. **7...a5 8.Nbd2 Be6** The main drawbacks to this move were demonstrated in this game. **9.Bb5!** In my opinion, this continuation is much more dangerous for Black than **9...Ba7**
[9...Qb8]
[9...Ne7]
10.Nf1 White's development advantage plus the pressure on d6 makes Black's position rather dicey.
[10.h3 Ne7 11.d4 Ng6 12.Ba4 c6 13.Bc2]
10...Ne7 This isn't the optimal square for the queen, but Black has to develop his pieces somehow. **11.Ng3** A natural novelty. GM Alekseenko tranfers his bishop to b3 in order to secure his king. **11...c6 12.Ba4?!** A consistent continuation, but it gives Black an important tempo to consolidate. **12...Ng6 13.h3**
[13.d4 Bg4 14.h3 Bxf3 15.Qxf3 exd4 16.Bg5]
13...d5! An important prophylactic move. GM Vidit manages to parry the nasty threats and secure his king for a while.
[13...h6 14.d4 b5 15.Bc2]
14.exd5 Now this doesn't bother Black. **14...Nxd5 15.Bc2**

25...Bxd4 26.cxd4 Bxb3 The rest is

just agony. **27.axb3 Qf6**
[27...h5 28.Qe5 *(28.Nxh5 Qxd4 29.Qe2 Qd5)* 28...Qxe5 29.dxe5 Nd7 30.Nxh5 Nxe5 31.Nf4 g5 32.Ne2 Nd3]

[32...Kf8]
The only way to put−up resistance was **33.d5 cxd5 34.Qxd5 Kf8 35.Nc3! Qc7 36.Ne4∓** , and Black still has to find a way to make progress. Once again, **36...Qc1+!? 37.Kg2 Qxb2** would have offered Black a powerful attack. **38.Qd7**

45.Nxb6 Nd4 46.Qc5∓ drops material for nothing special.
[46.Qb7!? Nxb3 47.Nd7 was brilliantly refuted in an engine game from the previous update. Still, I prefer this to the text as after White's next move ...a7−a6 turns out to be a loss of time. a4 48.Ne5 Qe8 49.Nd7 Kg7 50.Qc6 Qe6 51.Qxa4 Qd5+ 52.Kg1 Nd4 53.Qa7 Nf3+ 54.Kf1]
Good enough was also **46...Nxb3!? 47.Qb5 Nd2 48.Qxa5 Qd3∓** , but GM Vidit chooses the simpler way. I guess the natural **49.Qa1** was rejected by Kirill in view of **49...Qe4+!? 50.Kg1 Nf3+ 51.Kf1 Nxh4** , and Black has decent attacking chances. However, it was much better and would have kept an approximate balance. Deserving serious attention was **52.Qa8+!?** as now 14...Rd8 would leave the Pf7 unprotected. Play might continue: **52...Qxa8 53.Nxa8 Nf3 54.Kg2** A long strategic struggle is ahead. In comparison to the above−mentioned note, **54...Ne5!?** is less promising because of **55.f4** , but still, after **55...Ng4 56.Nb6 Kf8 57.Nd5 Ke8** White could have expanded his initiative on the k−side. More energetic was **58.Nc3! Ke7 59.Ne4 Ne3+ 60.Kf3 Nc4 61.Ng5↑** White's attacking chances are much better. **61...Kf6 62.Ne4+ Kf5 63.Nf2↑** The attempt to release the pressure on the Pg7 by means of **63...Nd2+ 64.Ke3 Nf1+** doesn't look attractive in view of **65.Kf3 Nh2+ 66.Kg2 Ng4 67.Nh3↑** The following classical game saw **67...f6 68.Kf3 Ke6 69.Ke4 Kd6 70.Ng1 Kc5 71.Kd3 Nh6 72.Ke3 Nf5+ 73.Kf3 Kc4⩲** White had decent attacking chances, though the position seems unclear. [Earlier we considered 10.Bb3 in Vachier Lagrave,M (2779)−Navara,D (2741) Biel SUI 2018 [Mikhalevski,Victor]]

10...Ng6 11.h3!?

[11.Bb3 transposes to 10.Bb3.]

[11.d4 exd4 12.cxd4 Bb4 13.Re2 is best met by Nxe4! *(13...d5?!* So,W (2780)−Nakamura,H (2777) chess.com INT 2018 *)* 14.Nxe4 d5 15.Bd3 dxe4 16.Bxe4 c6=]

11...c6 As it turned out I followed Nakamura's game against Nepomniachtschi from 2019. See below. Black's idea is to prepare ...d6−d5.

[Probably the most accurate is 11...Be6 12.Bxe6 fxe6 13.d4 Bb6 14.Be3 Nd7 with equal chances.]

12.Bb3! White removes the bishop from a possible attack from the d−pawn.

[Ian preferred 12.d4 exd4 13.cxd4 *(13.Nxd4!?* looks better. *)* 13...Bb4 14.Bd2 and now Black has the idea of Nxe4! again. *(14...d5* in Nepomniachtchi, I (2773)−Nakamura,H (2741) Kolkata 2019 was less accurate. *)* 15.Nxe4 d5 16.Bd3 dxe4 17.Bxe4 Bxd2 18.Qxd2 Qf6 with equal chances.]

12...d5!? I thought that if this move works tactically it had to be played.

[12...Re8 13.d4 Bb6 *(13...exd4?! 14.cxd4±* Kacharava,N (2206) − Gharibyan,M (2346) Jermuk 2017 *)* 14.Be3 leads to a slight edge for White, as he is the first to create tension in the centre.]

[12...b5!? 13.d4 Bb6 14.a4 also promises a slight edge for White for the aforementioned reason.]

13.exd5 Nxd5 This recapture may turn out to be slightly inaccurate.

[13...Qb6! I didn't even consider this intermediate move.

A) 14.Qe2 cxd5 15.Nxe5 Nxe5 16.d4 Bxd4 17.cxd4 Ng6 is reasonable for Black.;

B) After 14.Qc2 Nxd5 15.Nxe5 Nxe5 16.Rxe5 Bd6! A slightly unusual idea. 17.Re1 *(17.d4 Bxe5 18.dxe5 a4 19.Bxd5 cxd5 20.Be3 Qg6* leads to a position of dynamic equality. *)* 17...Bxg3 18.Bxd5 cxd5 19.Be3 Qg6 20.fxg3 Bf5!;

C) 14.d4 exd4 15.cxd4 Bb4 16.Re2 Nxd5 17.Ne5 Bd6! 18.Nxg6 fxg6 19.Qd3! Kh7 20.Bc2 Bf5! 21.Nxf5 Nb4 22.Qc4 gxf5 with a slightly worse, but defendable position for Black.]

14.Nxe5

[14.Nh5! This strong move, which covers the f6−square and prepares 15. Nxe5, deserved serious attention. Qd6! 15.Bxd5 cxd5 16.Nxe5! Bxf2+! *(16...Nxe5? 17.d4±)* 17.Kxf2 Nxe5 18.Bf4 Qb6+ 19.Kf1 Ng6 20.Be3 Qd6 with an acceptable position for Black.]

14...Nxe5? The first serious mistake.

[It was necessary to play 14...Bxf2+! 15.Kxf2 Nxe5 During the game I thought that White would be better here thanks to his bishop pair, but in fact the vulnerability of the white king yields Black counter chances. 16.d4 Qf6+! 17.Kg1 Qh4! 18.Nf1 Ng6 and the well−placed pieces compensate the bishop pair.]

15.d4! Now White obtains an advantage of the bishop pair in a very good version.

[15.Rxe5? was impossible in view of Bxf2+ 16.Kxf2 Qf6+−+ A well−known idea in many Giuoco Piano positions.]

15...Nd7 The only way to retain material equality.

[15...Bxd4? 16.Qxd4 Ng6 17.Nh5+− leads to immediate problems.]

16.Bxd5! Amin creates an isolated pawn. **16...cxd5 17.dxc5 Nxc5**

18.Bf4?± The Egyptian GM didn't spot a much stronger option, which sets almost unsolvable problems.

[After the correct 18.Nh5! with the idea of 19.Qd4. Ne6 *(18...Qh4 19.Re5!+−* isn't better. *)* 19.Qg4! Ng5 20.Qd4 f6 21.Nf4+− White wins the d5−pawn and obtains a winning position.]

18...Be6?!

[18...Ra6!? 19.Qf3 Ne6 20.Rad1 Nxf4 21.Qxf4 Re6**±** would be a better practical chance.]

[18...Ne4!? giving up a pawn, but converting to a position with opposite−coloured bishops is another practical chance.]

19.Qd4!? White attacks the knight on c5 and creates a threat of 20.Nh5.

[19.Nh5!? Qh4 20.Bg3 Qg5 21.Re5 Qd8 22.Qd4 f6 23.Re3 Rc8 24.Rae1 Ne4 25.f3 Rc4 26.Qd1 Nxg3 27.Nxg3 Bf7 28.Nf5**±** also leads to a big advantage for White.]

19...Qh4! The only move. Black counter attacks the f4−bishop and prevents 20. Nh5. **20.Qxc5** White chooses the stable advantage of a good knight versus a bad bishop and an isolated pawn on d5, but makes Black's task easier.

[There were a couple of good alternatives. 20.Re5!? Nd7 21.Re3 *(21.Nh5 Nf6 22.Nxf6+ Qxf6* is worse, but playable for Black. *)* 21...g5 22.Ne2!**±** with the idea of meeting gxf4? *(22...Rfe8!±* is better. *)* with 23.Rg3++−]

[20.Re3!?**±**]

20...Qxf4 21.Rad1

[White could try 21.Qb6!? Rfb8 22.Ne2 Qg5 23.Kh2 Re8! 24.Nd4 Qd8!**⩲** with a worse, but defendable position.]

21...Rfc8!?

[21...b6! looks more accurate. The point is that after 22.Qxb6 *(22.Qd4 Qxd4 23.Rxd4 b5! 24.a3 Rfc8⩲* is similar to the game. *)* 22...Rab8 23.Qxa5 Rxb2 24.Re2 Rfb8 Black obtains sufficient compensation for the pawn.]

22.Qd4? Bassem overestimates his chances in the endgame.

[22.Qb6! was better. Qc4 23.a3 Qc5 24.Qxc5 Rxc5 25.Ne2**⩲**]

22...Qxd4 23.Rxd4 Rc4 A little premature.

[I had to start with 23...b5! preparing 24...b4 and only after

A) 24.Ne2 b4! also leads to sufficient counterplay after 25.cxb4 Rc2 *(25...axb4 26.Rxb4 Rxa2 27.Nd4 Rc4* should hold too. *)*

B) 24.a3 Rc4=]

24.Rxc4 dxc4 25.Re5!
I'd underestimated this move. **25...Bd7!?** My idea was to cover the b5−square, where White's rook was heading, too.
[25...b6!? trying to connect pawns deserved attention. 26.Rb5 Rb8 27.Ne2 Rd8! 28.Nd4 Rd6 29.Nxe6 Rxe6±]

26.Ne2 The knight is heading for d4.
[After 26.Rc5 Ra6! is strong. 27.Rxc4 Be6 28.Ra4 *(* or *28.Rc7 Rb6 29.b3 a4 30.bxa4 Rb1+ 31.Kh2 Rb2 32.f3 b6* with good chances to hold. *)* 28...b5 29.Ra3 a4!]

26...Re8?! I missed that White's king gets to d4.
[After 26...Kf8! 27.Nd4 Ra6! 28.Re2 a4 29.a3 h5= Black would equalise.]

27.Rxe8+ Bxe8 28.f3 A typical position with a good knight versus a bad bishop.
[28.Nd4!?]

28...Kf8? Black is not in time in the centre and so I had to focus on the kingside.
[I had to look for counterplay by means of 28...f5! 29.Kf2 Kf7 30.Ke3 Kf6 31.Kd4 g5! Black sacrifices a pawn, but creates counterplay on the kingside. 32.Ng3 Bc6 33.Kxc4 g4 and Black equalises.]

29.Kf2 Ke7 30.Ke3 Kd6 31.Kd4±
Now White has a stable advantage.

31...b5
[Once again it would be better to sacrifice a pawn and look for counterplay. 31...f6!? 32.Kxc4 Ke5 33.Kc5 Bg6 34.g3 Bd3 35.Nf4 Bf1 36.h4 g5 37.Nd5 Be2 38.f4+ gxf4 39.gxf4+ Kf5 40.b4! Kg4 41.Nxf6+ Kxh4 42.Kd4+−]

32.a4
[After 32.Ng3! Black can't stop 33.Nf5, 33.Nh5 and 33.Ne4. For example, g6 *(32...Bd7 33.Nh5 g6 34.Nf6 Bf5 35.Ne4+! Kc6 36.h4 Bc8 37.a3* and White is going to play Ke5 with a decisive advantage. *)* 33.Ne4+ Ke6 34.Kc5+−]

34.Ne4+ Kc6 35.Kxc4 Be6+ 36.Kd4+−

Instead, he constantly tries to outplay his opponent in the middlegame. The present game more or less confirms this scenario. It should be said that this move had never been tried in serious games.

[9.0−0 Re8 *(9...Ne5 10.Bb3 a6)* 10.Qd2 Ne5 11.Bb3 a6 does not confront Black with problems, as shown in my article.]

9...bxc6 10.0−0 Re8 11.Re1

[11.Qd2 d5⇄]

11...Be6!? I did not hesitate too much before playing this move, which more or less completes Black's development and neutralizes White's pressure along the c4−f7 diagonal.

[When checking my article, I was slightly surprised to find out that I had recommended 11...Nd7 12.Qd2 Ne5 13.Bb3 Be6 . Generally speaking, this looks acceptable for Black, but during the game I was not keen to spend two tempi on placing the knight on a relatively unstable square.]

12.Bb3 White has to maintain the tension if he wants to fight for an advantage.

[12.Bxe6 Rxe6 13.Qd2 Qb8 14.b3 Qb4]

12...Qb8! The regroupment initiated by this move is more or less knwon from the classic games of Lasker and Capablanca in the Steinitz variation of the Spanish Opening. Black has a solid position, but has little space, which requires from him a very rational positioning of his forces. Black plans ... a5 and ...♕b4, aiming to force the exchange on e6 by a further advance of the a−pawn to a4.

[12...Bxb3 13.axb3±]

13.Qd2 Qb4?! But this is the wrong move order. Immediately after pressing my clock, I understood that this was the kind of micro−mistake that my opponent was waiting for.

[13...a5! 14.Rad1 *(14.Ba4 Qb7* wins a tempo compared to the game. *)* 14...Qb4 15.Ba4 Ra6]

14.Ba4! There is no easy way to defend the c6−pawn. **14...Qb7**

[14...Bd7 looks a bit passive and takes the d7−square away from the knight.]

15.Ne2 a5 16.Bd4 Bd7 Somehow, Black still is OK, which speaks volumes about the unpretentious character of White's play in the opening. **17.c4** A double edged move. White gains some space, but weakens the dark squares.

18...Nh5! 19.Bxg7 Nxg7 20.c5! This is the only way to prevent Black from stabilizing on the dark squares.

20...Ne6 21.cxd6 cxd6∞

White maintains his space advantage, but his position is far from perfect. The second rank is weak and the a4−bishop is slightly misplaced. If Black manages to play ...d5 under favourable circumstances, his position would become very pleasant. **22.Rad1**

[I was slightly surprised by this move and expected 22.Red1 , which removes the e1−rook from the vulnerable position.]

22...Rad8 This looks safest, but the line examined in the comments to the next move also speaks in favour of placing the other rook on d8.

[22...Red8 23.f4 *(* After *23.Nc3* Black can play *d5* already. *24.exd5 cxd5)* 23...Nc5 24.Nc3 d5 Frankly speaking, I was afraid that my kingside would remain vulnerable.]

[10...Ba7!? removing the bishop from c5 also deserved attention.]

11.d4 Since Black's knight left the d4−square without control White strikes in the centre.

11...exd4 12.cxd4 Bb4 13.Bd2 Nxb5 14.axb5 Bd7 Very straightforward and logical play. **15.Qb3** This counter−attack on b4 leads to some simplifications.

16.Bxb4 axb4 17.Rxa8 Qxa8 18.Qxb4 Qa4?! This move is an inaccuracy.

[18...Bc6 was better, although White retains some pressure. 19.Nc3 Re8 20.d5 Bd7 21.Qd4 is slightly more comfortable for White, who has more space.]

19.Qd2?! White returns the favour, but has the idea of playing 20.Nc3.

[19.Qxa4 Bxa4 20.Nc3 Bc6 21.Nd2⩲ would yield a slight edge for White thanks to his strong centre.]

19...Bc6

[After 19...Re8! 20.Nc3 Qb3 Black doesn't have problems.]

20.Nc3 Qa8 This looks a little passive to me.

[Both 20...Qb3 21.d5 Bd7 22.Nd4 Qb6]

[and 20...Qb4 keeping the queen active, promised equal chances.]

21.d5! Bd7 22.Nd4 This move blocks the d−file and allows Black to play ...c6 at the appropriate moment.

[After the correct 22.Qd4!
, which stabilizes White's position in the centre, Black would be under some pressure.]
22...Re8!?
[22...c5!? was also sufficient for equality.]
23.Re3 c6 Karjakin exchanges one of the central pawns and equalises.
24.dxc6 bxc6 25.Nf3 White attacks the d6−pawn, but Black has no problems protecting it. **25...Qb8 26.Qe2**
[26.Rd3 Nxe4 27.Nxe4 Rxe4 28.Rxd6 Be8 29.Rd8 Qc7= also leads White nowhere.]
26...c5 27.e5 Time to think about safety.
27...dxe5 28.Rxe5 Rxe5
[28...Be6 29.Rxc5 Bxh3 30.Re5 Be6 is hardly a serious attempt to take over the initiative.]
29.Nxe5 Be6 30.Nf3 Qb4 and in this slightly more pleasant position for Black, if still rather equal, a draw was agreed. 10.Bb5 doesn't seem to set serious problems. White has to either prefer the main line 10.Nbd2 or Giri's 10.d4.

12th Puhajarve Rapid 2012 (14.1)
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Bd3 Short repeats the line which he recently tested against Bruzon. I'm sure he prepared an improvement upon that game, possibly 12.Nd2, which I recommended in my annotations to that game. **7...exd4** Black is the first to deviate, though the line has been known for over 60 years and was first tested by Bogoljubow.

[Bruzon preferred 7...d6 Short, N (2698)−Bruzon Batista, L (2713)/ Poikovsky RUS 2012/[Mikhalevski, V]. I also prefer this line, which looks safer than the text.]

8.cxd4 d5 The most logical. Black has to stake his presence in the centre.
9.exd5! The most critical continuation. White brings the queen to the centre where she will be attacked by means of 10.Nc3.

[9.Qa4+ was played more often, though after Nc6 10.exd5 Qxd5 11.0−0 Nf6 12.Re1 0−0 13.Nc3 Qd8= Black experiences no problems. Burovic, I (2380)−Zerdo, M (2192)/ Neum 2000.]

9...Qxd5 10.Nc3 Bb4

[In the only preceding game Black retreated the queen to d8, which shouldn't solve his problems. 10...Qd8 Feist, R−Glitz, M/Roethenbach 1996. White's play in that game can be improved by means of 11.Qa4+! c6 12.Bd2!± and the misplaced knight on a5 yields White good chances to obtain an advantage.]

[10...Qe6+ 11.Be3 Nf6 12.0−0 0−0 13.Re1 Qd6 14.Rc1 also looks promising for White.]

11.Qc2 Nf6 12.Ba3 An interesting tactical trick, though I'm not sure the exchange of dark−squared bishops is useful for White.

[I prefer 12.0−0! , which virtually forces an exchange on c3. Bxc3 13.Qxc3 0−0 14.Re1 Nc6 15.Ba3 Rd8 16.Bc4 with a serious initiative.]

12...Qd6 13.Bxb4 Qxb4 14.0−0 0−0
15.Ne4!? White offers an exchange of knights in order to exploit his development advantage and the misplaced position of the black pieces on the queenside. **15...Nd5**

[In case of 15...Nxe4 16.Bxe4 White restores the material balance and retains the slightly better chances.]

16.Rab1

[16.Nc5!? , which prevents Black's queen retreat to e7 and attacks the h7−pawn, makes a lot of sense. h6 17.Bh7+ Kh8 18.Be4 with a serious initiative.]

16...Qe7 17.Ng3 Short provokes a weakening of the kingside, though that's possibly not the best solution as the knight on g3 will be misplaced after the obvious reply.

[In case of 17.Rb5 Black would play Nb4 18.Qb1 Nxd3 19.Qxd3 b6 20.Re1 g6 21.Re5 Qd8 22.Rd5 Qe7 and though White's position looks

promising Black doesn't have any real weaknesses and I don't see how to make progress.]

17...g6! This way Black restricts both the knight on g3 and the bishop on d3.

18.Rfe1 Qd8 19.Ne5 This pseudo−active move might be inaccurate.

[After 19.Qd2!? attacking the a5−knight and preparing 20.Qh6 White retains pressure. c6 *(19...Nc6?! 20.Qh6 Qf6 21.Nh5 Qh8 22.Qg5±* is dangerous for Black as White takes advantage of the hanging position of the d5−knight. *)* 20.h4 with the initiative.]

19...c6 20.Qd2 Be6?! This developing move is dubious.

[20...f6! was strong and White faces a problem where to place his knight, when 21.Nc4 allows the exchange of Black's misplaced knight on a5. *(21.Nf3* is met by *Bg4;* and the piece sacrifice *21.Nxg6 hxg6 22.Bxg6* isn't entirely clear, though Short could have tried this option in the current game, as time for solving problems was limited. *)*]

21.Rbc1

[Both players missed a strong tactical shot. 21.Nh5! Qh4 The only defence. *(21...gxh5?* is bad due to the simple *22.Qh6 f5 23.Qxe6+)* 22.Qxa5± and White wins back a pawn on the queenside an obtains the better chances.]

21...Rc8

[21...Re8! would be better, protecting the bishop and vacating the f8−square . 22.Qh6 Qe7! and Black brings the queen to f8.]

22.h4

[Now 22.Nh5 isn't dangerous for Black. Qh4! 23.Qxa5 Qxh5 24.Qxa7 Rc7 and Black is fine.]

[22.f4! with the idea of 23.f5 retained the initiative.]

22...b6! Protecting the knight on a5 Black prepares 23...Qf6 **23.h5 Qf6 24.Re4 Rfe8 25.hxg6** This exchange could have been delayed. **25...hxg6 26.Qh6 Qg7**

[26...Rcd8 would have been better as 27.Rh4 is met by Qg7 28.Qd2 c5!]

27.Qh2? Nigel overestimates his attack and gets into trouble.

[After the correct 27.Qd2 White retains counterchances as the queen participates in play in the centre and on the queenside, in particular she prevents the c5−break.]

27...Nf6! 28.Rh4 Bd5? The bishop is better on e6 covering the f5−square and keeping the d−file open for Black's rook.

[I see nothing wrong with the simple 28...Rcd8! preparing 29...c5.]

[But not 28...Bxa2? 29.Nf5! gxf5 30.Bxf5± with the subsequent 31.Rc3 and a very strong attack.]

29.f3! A clever idea! White prepares both 30.Kf2 followed by 31.Rh1 and 30. Rh6! with a sacrifice on g6 to follow. Suddenly Black comes under attack as the latter threat is hard to meet.

[29.Nf5!? was still possible. gxf5 30.Bxf5 Rcd8 31.Rc3 Qxg2+! The only defence. 32.Qxg2+ Bxg2 33.Kxg2 with full compensation for a pawn.]

[The immediate 29.Rh6? would have been wrong in view of the simple Rxe5! 30.dxe5 Ng4−+]

29...c5 30.Kf2? Too slow.

[After 30.Rh6! with the idea of 31. Nxg6 Black would be forced to give up

an exchange, though it doesn't save him. Rxe5 31.dxe5 Nd7 *(or 31...Ne8 32.Ne4+−)* 32.f4+− with a decisive advantage.]

30...cxd4 31.Rh1 Kf8! The king escapes. **32.Ne2??** A blunder.

[32.Re1 Kg8 33.Rh1 Kf8 is equal.]

32...Nh5?? Probably both players were short of time.

[32...Rxe5!−+ wins a piece.]

33.f4?

[33.Nd7+! Ke7 34.Rxd4+−]

33...Nc6!−+ The rest was played in severe time trouble and so it makes no sense to comment on it. **34.Nxc6 Bxc6 35.g4 Bxh1 36.gxh5 Be4 37.hxg6 Bxd3 38.Rh8+ Ke7 39.Rxe8+ Rxe8 40.gxf7 Qxf7 41.Nxd4 Qd5 42.Qh4+ Kd7 43.Qf6 Qe4 44.Qg7+ Re7 45.Qg4+ Kc7 46.Nf3 Qe3+ 47.Kg3 Be4 48.f5 Bxf3 49.Qf4+ Qxf4+ 50.Kxf4 Bd5 51.f6 Rf7 52.Ke5 Bxa2 53.Kf5 a5 54.Kg6 a4** The line with 7... exd4 looks promising for White, though more practical tests are necessary. URS−chT Cup 07th final A (5) 08.1971
[Sadorra,Julio]

This game was played at a time when Boris Spassky reached the peak of his career. After taking the world title from Petrosian in 1969, he achieved his highest ever FIDE rating of 2690. During this period, he played games where he was demolishing GMs in the world top 50 from the opening stage til the middlegame. In this game, he was playing a seasoned GM who was ranked #32 in the world then. Diese Partie wurde zu einer Zeit gespielt, als Boris Spassky den Höhepunkt seiner Karriere erreichte. Nachdem er 1969 den Weltmeistertitel von Petrosian übernommen hatte, erreichte er sein bisher höchstes FIDE−Rating von 2690. In dieser Zeit spielte er Partien, in denen er GMs aus den Top 50 der Welt von der Eröffnung bis zum Mittelspiel vernichtete. In dieser Partie spielte er gegen einen erfahrenen GM, der damals auf Platz 32 der Weltrangliste stand.

6.d4 Spassky goes for the fianchetto variation which is enough to give White an edge. 6 Be2 and 6 Bf4 are considered to be mainlines of this system. Spassky wählt die Fianchetto−Variante, die ausreicht, um Weiß einen

Vorteil zu verschaffen. 6 Le2 und 6 Lf4 gelten als Hauptlinien dieses Systems.

[6...Bb6 7.d5 a6 8.Ba4]

7.cxd4 Bb4+!? This is a typical move as it usually provokes a weakening in White's position after f2−f3. However Black was in for a surprise from the World Champion. Dies ist ein typischer Zug, da er normalerweise eine Schwächung der weißen Stellung nach f2−f3 provoziert, aber Schwarz wurde vom Weltmeister überrascht.

[7...Bb6 8.d5 a6 9.Ba4 Ba5+ 10.Bd2 Bxd2+ 11.Nbxd2 b5 12.dxc6 bxa4 13.Qxa4]

8.Bd2! This was a novelty at the time. Such a move looks positionally ugly but Spassky had in mind a nice harmonious set−up for his pieces in the subsequent moves. Das war zu dieser Zeit ein Novum. Ein solcher Zug sieht positionell hässlich aus, aber Spassky hatte einen schönen harmonischen Aufbau für seine Figuren in den folgenden Zügen im Sinn.

10.0−0! A principled move since it avoids trades which usually helps the side with less space. It is impressive to see Spassky conceive this, and the previous move, back when there were no strong engines. In case you are curious, the strongest engines highly approve of these moves! Ein prinzipieller Zug, da er Tauschaktionen vermeidet, die normalerweise der Seite mit weniger Raum helfen. Es ist beeindruckend zu sehen, wie Spassky diesen und den vorherigen Zug erdachte, als es noch keine starken Engines gab. Falls Sie

neugierig sind, die stärksten Engines heißen diese Züge sehr gut! **10...0−0**

11...Ne7 12.Bf1 By comparing the activity of the bishops, we can already see who has won the opening battle. The only essential thing to secure a strategic advantage for White is to get his king to safety. Wenn wir die Aktivität der Läufer vergleichen, können wir bereits sehen, wer die Eröffnungsschlacht gewonnen hat. Um einen strategischen Vorteil für Weiß zu sichern, muss er nur seinen König in Sicherheit bringen. **12...c6** An attempt to activate the queen and create counterplay. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0 6.0−0 d5 7.exd5 Nxd5 8.a4 a5 9.Re1 Bg4 10.Nbd2 Nb6 11.Bb5 Bd6 12.Ne4 While preparing for the game I considered this move to be the most accurate. One of the points to delaying 12. h3 is that Black is then unable to play ...f5 because of Neg5. With the inclusion of the moves h3 and ...Bh5 13.Ne4 can be met by 13...f5.

[Earlier we only considered 12.h3 Nepomniachtchi,I (2767)−Aronian,L (2785) Doha QAT 2016 [Mikhalevski, V]]

12...Na7 13.h3 Bh5 This position can also occur after 12.h3. **14.d4**
The most logical. White gets rid of the backward pawn on d3. **14...Nxb5**

[After 14...exd4 15.Nxd6! Qxd6 16.Qxd4 Nxb5 17.axb5 Qxd4 18.Nxd4± Black was under some pressure in Kovalev,V (2596)−Parligras,M (2596) Konya 2016]

15.axb5 f6!?N I'd prepared this novelty for the game. Black simply supports the e5−pawn and opens the e8−h5 diagonal for the light−squared bishop.

[Earlier Black tested two alternatives: 15...exd4 16.Nxd6!? *(16.g4 Bg6 17.Nxd6 Qxd6 18.Qxd4 Qxd4 19.Nxd4 a4 20.Bf4 Rfc8* Black equalised in Vachier Lagrave,M (2789)−So,W (2778) Paris 2018. *)* 16...Qxd6 17.Qxd4 Bxf3 *(17...Qxd4 18.Nxd4* transposes to 14...exd4. *)* 18.Qxd6 cxd6 19.gxf3 a4 20.Re7 Rfb8 21.Rc7± with some superiority for White.]

[15...Bxf3 16.Qxf3 exd4 17.cxd4 *(17.Nxd6!* is stronger. *Qxd6 18.Rd1±)* 17...Bb4 18.Rd1 Qd5 19.Bf4 f5 and Black was fine in Shankland,S (2661) −Sevian,S (2531) Saint Louis 2015]

16.Be3 The most logical.

[After 16.dxe5 Bxe5 17.Qxd8 Rfxd8 18.Nxe5 fxe5 Black is close to equalising.]

16...Nc4 17.Qa4! White is taking advantage of the fact that the b2−pawn is untouchable because of a check from b3. **17...Bf7!?** I simply decided to support my knight in a good position on c4. Now ...Nxb2 is threatened.

[I also considered 17...Nb6 , but didn't like 18.Qb3+ Bf7 19.Qc2 In fact, Black can continue with exd4 *(19...Nc4!?* is also acceptable. *)* 20.Nxd4 Nd5 21.Bd2 Re8 22.Nxd6 Rxe1+ 23.Rxe1 Qxd6 24.Nf5 Qd7 25.c4 Bg6 26.cxd5 Qxf5 27.Qxc7 Qxd5 28.Bc3 Re8! 29.Qxa5 Rxe1+ 30.Bxe1 Be8 and Black equalises.]

18.dxe5! Bxe5! Black is getting rid of his bad bishop.

[18...Nxe5 19.Nxe5 Bxe5 20.Rad1 is rather unpleasant for Black, as after Qb8 I would have to meet 21.f4 with Bd6 and then White can choose between 22.b6± *(* and *22.Nxd6 cxd6 23.b6±* with better chances for White in both cases. *)*]

19.Nxe5 Nxe5!

[It doesn't make sense to create an isolated pawn by means of 19...fxe5? 20.Bc5 Re8 21.Qc2± with a clear edge for White.]

20.Rad1 Qc8 21.b3?! Up to this point

White played pretty well and obtained a slight edge, but after the text Black equalises.

[21.Bd4! was better, and after Nc4 22.Re2 Rd8 23.Rd3± White retains the slightly better chances.]

21...Rd8! Black is fighting for the d3−square. **22.Rxd8+**

[22.Rd4!? was more accurate, with the idea of h6 *(22...b6!?)* 23.c4 b6 24.Qa1 trying to keep some pressure on Black, although the chances are roughly equal.]

22...Qxd8 23.Bd4? This is already a serious mistake.

[23.c4 was necessary. Qd3 24.Bf4 Ng6 25.Bxc7 Re8 26.c5 f5 27.c6! Qd5! 28.Bxa5! bxc6! *(*After *28...fxe4 29.c7* the c−pawn is very dangerous. *)* 29.Ng3 cxb5 30.Rxe8+ Bxe8 31.Qb4 and White should be able to retain equality.]

23...Qd5!?∓ The text looked like a very logical response, which yields Black the better chances, but I had an alternative that was at least as strong.

[23...Nd3!? 24.Re3 Nf4 25.Re1 *(25.Kh2 b6! 26.Rg3 Nh5 27.Re3 Qd5∓)* 25...Ne6 26.Be3 b6∓]

24.Bxe5! This exchange is necessary. **24...Qxe5 25.Re3 b6!** Black protects the a5−pawn and is ready to bring the rook into play. **26.Ng3! Qd5! 27.Qg4?** Too optimistic, preparing 28.Nf5

[I understand that White didn't want to block the queen on a4, but this was his best chance. 27.c4! Qd1+ 28.Kh2 Re8∓ and Black is better thanks to his active queen.]

27...Rd8? Returning the favour. I saw that I could play 27...h5, but thought that it makes sense to bring my rook into play first.

[After the correct 27...h5! 28.Qf4 Qxb3! *(28...Qxb5!?* is also better for Black. *29.Nf5 Re8 30.Rg3 Re1+ 31.Kh2 Qe5! 32.Qd2 Bg6! 33.f4 Qe4! 34.Rxg6 Qxf5∓)* 29.Nf5 Re8 30.Rg3 *(* In case of *30.Rxe8+ Bxe8* White can't create a mating threat due to 31...Qb1+. *)* 30...Kf8!! 28.Kh2?!

[28.c4! was necessary. Qd1+ 29.Kh2 Qxg4 30.hxg4 Kf8 31.f3= and White should be able to hold.]

28...h5! 29.Qf4 Qd6! Black forces a favourable endgame due to the weakness of White's queenside.

30.Qxd6

[30.Qa4? Re8!−+ is just bad.]

30...cxd6! The surprising, but correct, recapture. My idea is to destroy White's pawn structure on the queenside after 31. c4 d5. **31.Re7!** The best defence. Ragger is trying to compensate the defects of his pawn structure by the activity of his rook.

[After 31.c4?! d5 32.Rd3 Kf8 It's difficult for White to keep his queenside together. 33.Nf5 Rc8! 34.cxd5 Bg6! 35.Rf3 *(35.g4 Rc5! 36.Kg3 Rxb5 37.d6 Bxf5 38.gxf5 Ke8! 39.d7+ Kd8 40.Kf4 Rb4+ 41.Kf3 b5∓* and Black retains good chances to convert his positional

advantage, as all of the white pawns are weak. *)* 35...Rc5∓]

31...Bxb3 32.Ra7! The rook has to be behind the a−pawn.

[32.Nxh5 Bf7 33.Ng3 Ra8!−+ is bad for White, as the a−pawn supported from behind is too dangerous.]

32...Be6?⊕ A mistake in my time trouble. My idea was to secure the seventh rank by means of 33...Rd7, but it turns out that White can reset the material balance and bring his knight back to d4.

[32...Bf7! 33.Nf5 Kf8∓ was correct.]

33.Ra6?⊕ White also misses a chance to capture the h5−pawn.

[33.Nxh5! Rd7 34.Ra6! Rb7 I thought that White can't stop 35... Bc4, but in fact he is just in time after 35.Ng3! Kf7 *(35...Bc4?* runs into *36.Nf5 Bxb5?? 37.Ra8++−* with 38.Nxd6 to follow. *)* 36.Ne2= reaching the position from the game without the h−pawn.]

33...Rb8?

[I had to start with 33...Bc4! 34.Nxh5 *(34.Rxb6? Ra8!−+* is just hopeless. *)* 34...Bxb5 35.Rxb6 Bc4 36.Rb1 a4∓ and Black is better thanks to the strong a−pawn.]

34.Ra7?

[Once again White misses a chance to capture the h−pawn. 34.Nxh5! Rb7 35.Ng3= transposing to 33. Nxh5.]

34...h4!∓ Now Black keeps the h−pawn and obtains good winning chances.

35.Ne2 The knight is heading to d4.

35...Bd5! 36.Nd4 Rb7

[I had a feeling that 36...Ra8! may work, but had no time to calculate it.

A) 37.Rd7 a4 38.Rxd6 Bc4 39.Rxb6 *(39.Rc6 Bd3 40.Rxb6 a3 41.Nb3 a2 42.Na1 Bc4−+* with the idea of bringing the rook to the first rank, is fatal for White. *)* 39...a3 40.Nc2 a2−+;

B) 37.Ra6 Rxa6 38.bxa6 Kf7 39.g3 g5 40.Nb5 Ke7−+]

37.Ra6 Bc4?! This move wasn't necessary. I made the move to stop 38. Nc6, but it turns out that I could simply bring the king.

[37...Kf7! 38.Nc6 *(38.g3 g5!−+)* 38...Ke8!−+ I missed this strong move in time trouble.]

38.g3! hxg3+

[38...g5 was a better practical chance, as my opponent would have to find 39.Nf5 with limited time on the clock. d5 40.Nd6 Rb8 41.gxh4 gxh4 42.Nxc4 dxc4 43.Kg2 Kf7 44.Kf3 Rd8 45.Rxb6 Rd3+ 46.Kg4 Rxc3 47.Kxh4 and it tuns out that rook endgame is equal. For example, Rb3 48.Kg4 c3 49.Kf5 Ke7 50.h4 a4 *(* or *50...c2 51.Rc6 Rxb5+ 52.Kg6 Rb2 53.h5=)* 51.Ke4 c2 52.Rc6=]

39.Kxg3 Kf7 40.h4! d5 41.Kf4 This is White's best setup. Now Black can't make progress. **41...Kg6**

[I realised that it makes no sense to play 41...Ke7 42.h5 Kd6 since 43... Kc5 isn't a threat in view of 44.Ra8 and the b5−pawn is untouchable.]

42.Kg4 The simplest.

[It's not necessary to initiate complications, although they seems to lead to a drawish rook endgame. 42.h5+ Kxh5 43.Kf5 Re7 44.Kf4 Re4+ 45.Kg3 Re1 46.Rxb6 a4 47.Ra6 Rb1 48.Rxa4 Bxb5 49.Nxb5 Rxb5 50.c4=]

42...Bd3 My only chance is to try ...Rc7.

43.f3 Kh6 44.h5
[44.Kf4!? is more accurate.]
44...Rc7 45.Rxb6 Rxc3 46.Rd6?!
A serious mistake, which leads to Black's advantage.
[46.Kf4! was necessary, supporting the knight. Kxh5 47.Rb8 Rc4 48.Ke3 Bf1 49.Rh8+ Kg6 50.Rh1 Rc3+ 51.Kf2 Bd3 52.Ra1=]
46...a4

47.b6? A losing move.
[47.Kg3! Rc4 48.Rxd5 a3 would transpose to 46... Rc4.]
47...Rc4−+ Now White is in trouble.
48.Rxd5 Rb4 49.Rd8 g6!? I decided to prevent mating threats right away.
[49...a3! 50.b7 a2 51.b8Q f5+! This important intermediate move allows Black to win. 52.Kf4 Rxb8 53.Rxb8 g5+! Another strong intermediate move, which avoids a checkmate threat. 54.Ke3 a1Q 55.Kxd3 and Black should be able to convert his material advantage.]
50.hxg6 a3! 51.Kf4! I missed this defensive resource, but Black can still win. **51...a2 52.Ra8 Rxd4+?** Missing a win.
[52...Bc4! was correct. I saw this idea, but considered the text to be simpler. 53.Kf5! Rxb6
A) 54.Ra7 Bd3+ 55.Kf4 Rb4 56.Ke3 Bc4 57.g7 Rb7! 58.Ra3 Rb1! 59.Nc2 Kxg7 60.Kd2 Bb3 61.Nd4 Rd1+ 62.Kc3 Bf7 63.Nc2 Rf1 64.Kd4 Rf2 65.Na1 Kg6 66.Ke3 Rb2 67.Ra6 Rb1 68.Nc2 Rb3+ 69.Kf4 *(69.Kd2 Rxf3−+)* 69...Rb2 70.Na1 Rb1 71.Nc2 Rc1−+ and Black wins.;
B) 54.Rh8+ Kg7 55.Rh7+ Kg8 56.Ra7 Bd3+! 57.Kf4 Ra6 58.Rxa6 Bxa6 59.Nb3 Kg7 60.Na1 Kxg6−+ and Black wins this endgame without big problems. The plan is to bring the bishop to a4 after winning the f−pawn in order to trap the knight on a1. For example, 61.Nb3 f5 62.Na1 Bb5 63.Nb3 Ba4 64.Na1 Kf6 65.Ke3 Kg5 66.Ke2 f4 67.Kd2 Kh4 68.Kc3 Kg3 69.Kb4 Bd1−+]
53.Ke3 Rd7
[or 53...Rd8 54.b7!=]
54.b7! I missed this intermediate move. Now the ensuing rook endgame with an extra pawn is a dead draw.
[I hoped for 54.Rxa2? Bb5 55.Rb2 Bc6−+]
54...Rxb7 55.Kxd3 Rb2 56.Ke4! Kxg6 57.Kf4 Black can't make progress without losing the f−pawn. **57...Rb4+ 58.Kg3 Rb2 59.Kf4 Kf7 60.Kf5 Rb5+ 61.Kf4 Rb2 62.Kf5 Ke7 63.Ra7+ Kd6 64.Kxf6 Rf2 65.Kg5 Rg2+ 66.Kf6 Rf2 67.Kg5 Rg2+ 68.Kf6 Kc5 69.f4 Kb4**

Zalakaros Open (4) 21.05.2017
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.0−0 d6 6.c3 a6 7.a4 Ba7
8.Na3 0−0 One of Black's options in this position. He is ignoring the idea of 9. Bg5 and getting on with fast development.
[Eljanov started with 8...h6 a couple of times this year. One of the games can be found in our PGN archive. See Adams,M (2761)−Eljanov, P (2751)/Shamkir AZE 2017/ [Mikhalevski,V].]
[Another option 8...Ne7 , which was featured in many top level games in 2016, also occurred in one of my games, Bachmann,A (2649)−Mikhalevski,V (2545)/ Philadelphia 2016/[Mikhalevski,V]]
9.h3 This move is possible, but isn't necessary.
[9.Nc2 Ne7 10.Bg5 *(10.Be3* transposes to the blitz and rapid games Anand−Carlsen and Carlsen−Anand, GCT 2016, respectively. *)* 10...Ng6 11.Nh4 Nf4!= A typical idea in many Giuoco Piano positions. *(11...Nxh4 12.Bxh4 h6 13.Kh1* looks slightly better for White. *)* 12.d4 Be6 13.dxe5 dxe5 14.Bxe6 and now Nxe6! *(*After the inaccurate *14...fxe6? 15.Bxf4 exf4 16.e5 Ne4=* the position was equal in Bologan,V (2640)−Fedoseev,V (2665)/ Sochi RUS 2016. *)* 15.Qxd8 Raxd8 16.Bxf6 gxf6 17.Nf3 Nc5∓ led to a clear edge for Black.]
[9.Bg5!? h6 10.Bh4 g5
A) 11.Bg3 Ne7 *(11...g4!? 12.Nh4 Nh5* is a possible improvement upon Black's play in the Anand game. *)* 12.Nc2 Kg7 13.Kh1 Nh5 14.d4 was better for White in a blitz game So,W (2770)−Anand, V (2770)/Leuven BEL 2016.;
B) 11.Nxg5 hxg5 12.Bxg5 Kg7 13.Qf3 as in Atlas,V (2432)−Maeser, F (2302)/Switzerland SUI 2017 is the critical test of 8...0−0.]
9...Ne7 A typical transfer of the knight to g6.
[Black also tested 9...Be6 10.Bxe6! *(*Instead *10.Be3?! Bxe3 11.fxe3 Qd7=* was equal in Moreno Tejera,E (2444)−Van Foreest,J (2615)/Berlin GER 2017. *)* 10...fxe6 11.b4 yielded White some chances for an edge.]
[It was still possible to play 9...h6!? preventing a pin along the d8−h4 diagonal.]
10.Nc2
[10.Bg5 is a principled alternative, bur Black can answer it with Ng6 11.Nh4 Kh8!∓ preparing 12...g6.]
10...a5 A useful move, which stops White from grabbing space on the queenside by means of a5. On the other

hand, Black can also skip it by means of the natural 10...Ng6.

[10...Ng6!? 11.a5 c6 12.Be3 Bb8 13.Bb6 Bc7 14.Bxc7 Qxc7∓ with a good position for Black in the computer game Dinkelberger,S (2554)−Magicprof,S (2552)/Engine Room 2015.]

11.Be3 This move looks like a natural follow−up to the Nb1−a3−c2 manoeuvre.

[Now 11.Bg5 doesn't set problems. Ng6 12.Nh4 Kh8! with 13. ..h6 to follow.]

11...Ng6 I considered this move to be a little more flexible than 11...Bxe3, although both options are sufficient for equality. **12.Bxa7 Rxa7 13.Ne3 c6** Black has been preparing the ...d5 advance. **14.Bb3 Re8!** Black isn't satisfied with equality, which could be achieved by the advance of the d−pawn. Instead I brought the rook into play to make the ...d5 move more powerful.

[In case of the immediate 14...d5 15.exd5 cxd5 16.d4 e4 17.Ne5 Ra6 the position is roughly equal.]

15.Bc2 h6 This move is a little slow and unnecessary. Black had more useful moves at his disposal.

[I also considered the move 15...b6!? to bring the queen's rook along the seventh rank. 16.d4 Rd7 *(16...exd4?!* is dubious as after *17.Nxd4* the c6−pawn is hanging. *)* 17.Nd2 Bb7 18.Re1 d5 19.exd5 exd4 20.cxd4 Nf4! 21.Nf3 *(21.Qf3 N4xd5=)* 21...N4xd5= with equal chances.]

[The computer's suggestion 15...Ra6!? with the idea of playing 16... d5 and 17... Rb6, looks a little weird to me, but in fact it has a point. For example, 16.d4 *(16.Re1 d5 17.Nf1 Rb6∓)* 16...exd4 17.Qxd4 Nf4 18.Rfe1 c5! 19.Qc4 Rb6 20.Rad1 Be6 21.Qf1 Qc7 22.b3 Bxb3 23.Bxb3 Rxb3 24.Nf5 Rb6 25.g3 Ng6 26.Nd2≅ with compensation for a pawn.]

[15...d5 is still premature and can be answered by 16.d4! opening up the position and taking advantage of the misplaced rook on a7.]

[The most human is 15...Ra8!? bringing the rook back to the seventh rank.]

16.Re1 Ra8! Finally the rook comes back. **17.d4 Qc7** I didn't want to decide on the position of my light−squared bishop right away.

[Nevertheless, 17...Be6!? was interesting. For example, 18.d5 Bd7 19.dxc6 Bxc6 20.Nc4 Re6 with equal chances.]

18.Nh2 This didn't look like the right move to me.

[I would prefer 18.Qd2! with the idea of 19.Rad1. Be6! *(* or *18...Bd7 19.Rad1 Rad8 20.dxe5 dxe5 21.Qd6 Qxd6 22.Rxd6 Be6 23.Red1 Rxd6 24.Rxd6* with a slight edge for White. *)* 19.Rad1 Rad8 *(19...Qc8* is worth attention. *)* 20.c4 Bc8 and White is just slightly better thanks to his spatial advantage.]

18...Bd7!? Black's idea is to complete development.

[Another idea would be to give up the centre temporarily with 18...exd4!? and then prepare the ...d6−d5 break. 19.Qxd4 Be6 20.Rad1 Rad8 21.Nhg4 Bxg4 22.hxg4 Kh8 23.f3 d5= equalising.]

19.Nhg4 Bxg4! The bishop on d7 was

disturbing the other pieces and so it makes a lot of sense to exchange it.
20.hxg4 exd4! My idea was to create a target on e4. **21.Qxd4 Re5?!⊕**
Too risky. I wanted to double my rooks along the e−file and play ...d5, but the rook on e5 is in a vulnerable position.
[21...Re6 22.f3 Rae8 23.c4 Nh4]
[21...Ne5!? 22.f3 Rad8 23.Nf5 d5 24.exd5 Nxd5 25.Qf2 Ne7=]
22.Rad1 Rae8? This move is just bad.
[22...d5 23.exd5 Nxd5 24.Nf5 Rae8 25.Re4±]
23.Qxd6?! Nisipeanu decided not to take chances.
[23.Nc4! promises more. R5e6 24.Nxd6 Nxg4 The critical position. Here White has a number of options:
A) 25.Nxe8 leads to a lot of complications. Qh2+ 26.Kf1 Rxe8 27.f3 Nh4! 28.Qg1 Qf4 29.Ke2 Ne5! 30.Qf2 Nf5! with the idea to meet 31.exf5 with Qc4+ 32.Kd2 Qf4+=;

23...Qxd6 24.Rxd6 Nxe4 25.Rd4 Nf6! Black is still slightly worse, but he managed to trade White's central pawn.

30.Rxe8+ Kxe8 Being in time trouble I wanted to play "safer".
[Even though I saw the right recapture. 30...Nxe8!? 31.Rd4 Nd6= Black takes the c4−square under control and equalises.]

34.Rd6! I missed this move. Now White has a serious edge, **34...g5**

35.Kd3 White is activating his king.
35...Rc7! The rook was misplaced on c5 and so it's important to bring it back.

41...Kf7! I need the e7−square for my rook. **42.Rd8!** Nisipeanu covers the d3−square. **42...Re7+!** Forcing the king back. **43.Kd4 Rc7! 44.g3!** Another good try. White covers the f4−square, so the black knight can't escape through it. **44...Ke6!** I decided to activate my own king.
[44...g6!? covering f5 was also interesting.]
45.Ke4 Nb3! The knight is coming back to c5. **46.Rb8 Rd7!** Here White realised that he doesn't have much and so a draw was agreed.
[46...Rd7! 47.Rb6+! *(47.Rxb4?? leads to a nice finish. Nd2#)* 47...Kf7
A) 48.Rxb4 Nd2+ 49.Ke5 *(*But not *49.Kf5?? Re7!* with a threat of 50.. .g6 is deadly. *)* 49...Nf3+ 50.Ke4 Nd2+= with a perpetual.;

[If Black deviated from 46...Rd7 with 46...Nc5+ 47.Kd4 Nb3+ 48.Kd3 Nc5+ 49.Ke2 he would have to solve some problems. White can't set problems if he plays 9.h3, but instead 9.Bg5 is critical.]

Olympiad−44 Chennai (6.1) 03.08.2022
[Harikrishna, Pentala]

This game was played in round 6. At this point the young Uzbekistan team was playing exceptional chess and on

board 1 Nodirbek was on 100% score. In this game he did not hide his intentions and went for a highly complicated battle. Diese Partie wurde in Runde 6 gespielt. Zu diesem Zeitpunkt spielte das junge usbekische Team außergewöhnliches Schach, und an Brett 1 hatte Nodirbek 100% der Punkte. In dieser Partie verbarg er seine Absichten nicht und ließ sich auf einen hochkomplizierten Kampf ein. **1.e4** Harikrishna,Pentala **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Bg5** In the Italian game, trends keep changing. What was once considered harmless becomes quite scary with the help of engines and a fresh perspective. I have anticipated his choice of 5.Bg5 as he is on 100% score and recently became very popular. There are various move orders white can choose between the quiet 5.c3 or 5.0−0 In der Italienischen Partie ändern sich die Trends ständig. Was einst als harmlos galt, wird mit Hilfe von Engines und einer neuen Perspektive ziemlich beängstigend. Ich habe seine Wahl von 5.Lg5 vorweggenommen, da es auf 100% der Punkte kommt und in letzter Zeit sehr populär geworden ist. Es gibt verschiedene Zugfolgen, bei denen Weiß zwischen dem ruhigen 5.c3 oder 5. 0−0 wählen kann.

[5.c3 d6 6.0−0 0−0 7.a4 a6
Quite a popular choice by many top players. Eine sehr beliebte Wahl bei vielen Spitzenspielern.]

5...h6 6.Bh4 d6 7.0−0 a5 8.c3 Ba7 9.a4 This was the first new move for me. White can play either 9.Re1 or 9. Nbd2 which would transpose to a variation I looked at.. Dies war der erste neue Zug für mich. Weiß kann entweder 9.Te1 oder 9.Sbd2 spielen, was zu einer Variante führen würde, die ich mir angesehen habe... **9...g5 10.Bg3 Ne7** I quite liked the idea as White is not able to play d4 as he pawn on e4 is hanging. Having the knight on g6 helps to launch the attack on White's king. Mir gefiel die Idee sehr gut, da Weiß nicht d4 spielen kann, da der Bauer auf e4 hängt. Der Springer auf g6 hilft, den Angriff auf Weiß' König zu starten. **11.Qb3?!** Forcing me to play 0−0. I was suprised by this decision as I would have played 0−0 in any case. After Qb3, I am able to play ...Nh5 without any issue. Zwingt mich dazu, 0−0 zu spielen. Ich war von dieser Entscheidung überrascht, da ich in jedem Fall 0−0 gespielt hätte. Nach Db3 kann ich ohne Probleme ...Sh5 spielen. **11...0−0 12.Nbd2 Ng6 13.d4 Nh5 14.dxe5?** A serious error. Even though White has wasted a couple of moves in the opening, ot is the d4 pawn which restricts the activity of my bishop on a7. Ein schwerer Fehler. Obwohl Weiß in der Eröffnung ein paar Züge vergeudet hat, ist es der d4−Bauer, der die Aktivität meines Läufers auf a7 einschränkt.

[14.Kh1!? The idea of Kh1 is to reroute the knight via g1 and e2. Sacrificing the d4 pawn is not a big issue as White would be able to generate a lot of counterplay. Die Idee von Kh1 ist, den Springer über g1 und e2 umzuleiten. Den d4−Bauern zu opfern ist kein großes Problem, da Weiß in der Lage wäre, eine Menge Gegenspiel zu generieren. Qf6
Of course I would not take the pawn on d4. Natürlich würde ich den Bauern auf d4 nicht nehmen. *(14...g4 15.Ng1*

14...Nxg3

[14...g4! This is more precise as it forces White's knight to retreat to the unpleasant e1 square. Dies ist präziser, da es den weißen Springer zwingt, sich auf das unangenehme Feld e1 zurückzuziehen. 15.Ne1 Nxg3 16.hxg3 dxe5 17.Rd1 h5−+ White is totally lost here thanks to the bishop on a7 and the advancement of g and h pawns. [17...Qf6! prevents the white rook on f1 from moving. White's knight is also stuck on h2 as the square on f1 is occupied by rook. verhindert, dass der weiße Turm auf f1 ziehen kann. Der weiße Springer sitzt auch auf h2 fest, da das Feld auf f1 vom Turm besetzt ist.]

18.Rfe1 Kg7 19.Re2 h5 20.Ndf1 h4 21.Rd3 After this move the game is over. Nach diesem Zug ist das Spiel vorbei.

[21.gxh4 This move puts up lot of resistance and Black is only marginally better. Dieser Zug leistet eine Menge Widerstand und Schwarz steht nur unwesentlich besser. Qxh4 22.g3 This move might have skipped Nodirbek's attention. It is unusual to give away the g3 square which is usually occupied by the knight. It is slightly scary for White in view of a possible black trippling on the h−file and delivering a checkmate. In fact White has pretty good counterplay on the d−file. Dieser Zug könnte Nodirbeks Aufmerksamkeit entgangen sein. Es ist ungewöhnlich, das Feld g3 zu verschenken, das normalerweise vom Springer besetzt ist. Es ist ein wenig beängstigend für Weiß im Hinblick auf ein mögliches schwarzes Vertripeln auf der h−Linie und das Erreichen eines Schachmattes. In der Tat hat Weiß ziemlich gutes Gegenspiel auf der d−Linie. Qg5∓]

22...Nf4 23.Nxg4 Bxg4 24.Ne3 Bxe3 25.Rexe3 Ng6 Here 25...Kf6 and 25... Kh8 are winning as well. I simply decided to safeguard my king and continue the attack on the h−file by bringing both my rooks. Hier sind 25... Kf6 und 25...Kh8 ebenfalls gewinnbringend. Ich beschloss einfach, meinen König zu schützen und den Angriff auf die h−Linie fortzusetzen, indem ich meine beiden Türme brachte.

TUR−chT Konya (6.5)		21.07.2019

[Firouzja,Alireza]

This was a very important match, as we were playing against one of the favourites. My opponent is the Turkish number 1. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.h3 d6 6.c3** An ancient line, leading to a very complicated game. **6...a6 7.a4 h6 8.0−0 0−0 9.Re1 Re8!?** A very strong move. My opponent had already played this line before, so I was prepared for it. **10.a5 Ba7 11.Bb3 Be6 12.Ba4!** Still preparation. **12...Bd7 13.Nbd2 Ne7! 14.Bc2!?** Threatening Ba7. **14...Ng6 15.d4 Bc6 16.Ra3!?** I was very proud this move. Now the b2 pawn is not weak anymore. **16...Rc8**

Vrnjacka Banja 156/116 2023
[Perunovic,Milos]

Predke, Alexandr: 'This game was played in 5th round of the European Individual Championship, which took place in Vrnjacka Banja, Serbia. I was looking forward to this event, because my previous tournament with classical control was the Dubai open which

finished in September 2022. Also I want to note that European Individual became the first tournament for me where I played under Serbian flag and it inspired me to play interesting games. I would like to say few words about my perfomans there. The tournament was not easy, I had several hard games and losing positions, but finally I always saved the game. Because of the high tension in my games in the first part, by the end of the tournament I was very tired which didn't allow me to fight for medals. But I entered in top 23 and qualified to the World Cup 2023. So my final result wasn't so bad. In a tournament with around 500 participants, you have to try to win all games, with the white and black pieces, of course with white it is just a must−win situation.' Predke, Alexandr: 'Diese Partie wurde in der 5. Runde der Europäischen Einzelmeisterschaft gespielt, die in Vrnjacka Banja, Serbien, stattfand. Ich freute mich auf dieses Ereignis, denn mein letztes Turnier mit klassischer Kontrolle war das Dubai Open, das im September 2022 zu Ende ging. Ich möchte auch erwähnen, dass das European Individual das erste Turnier für mich war, bei dem ich unter serbischer Flagge gespielt habe, und das mich zu interessanten Partien inspiriert hat. Ich möchte ein paar Worte über meine Leistungen dort verlieren. Das Turnier war nicht einfach, ich hatte mehrere schwierige Partien und Verluststellungen, aber letztendlich konnte ich die Partie immer retten. Wegen der hohen Spannung in meinen Partien in der ersten Hälfte war ich am Ende des Turniers sehr müde, was es mir nicht erlaubte, um Medaillen zu kämpfen. Aber ich bin unter die besten 23 gekommen und habe mich für den World Cupt 2023 qualifiziert. Mein Endergebnis war also gar nicht so schlecht. Bei einem Turnier mit rund 500 Teilnehmern muss man versuchen, alle Partien zu gewinnen, mit den weißen und schwarzen Figuren, mit Weiß ist es natürlich eine Muss−Situation.' **1.e4** Predke, Alexandr Predke, Alexandr Predke, Alexandr: 'Perunovic,Milos' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 d6 6.c3 a5 7.Re1 h6 8.Nbd2 0−0** Predke, Alexandr: 'I think it's the first inte resting moment of the game. Black plays standard for nowadays Giuoco Piano with the pawn on a5, but I suppose that Black has a more exact order of moves which could force me to play h2−h3. Now I can try to save tempo and play without the pawn on h3.' Predke, Alexandr: 'Ich denke, das ist der erste interessante Moment der Partie. Schwarz spielt wie heutzutage im Giuoco Piano Standard−mit dem Bauern auf a5, aber ich vermute, dass Schwarz eine genauere Zugfolge hat, die mich zwingen könnte, h2−h3 zu spielen. Jetzt kann ich versuchen, Tempo zu sparen und ohne den Bauern auf h3 zu spielen.' **9.Nf1 Ne7** Predke, Alexandr: 'The standard transfer of the knight c6 to the square g6 for positions like this.' [Tiviakov]

Before the Dutch championship I was in a very good form, winning almost all the tournaments where I was playing. And having prepared well for this tournament I was hoping to win the championship. The reality came different, I was getting winning positions only to draw them. Thus, I just gave 1,5 points as a present to my opponents. This game against Jan Werle is my win from the Championship. Who would have thought that I would win only 1 game?! **1.e4** Tiviakov,Sergei Tiviakov,Sergei Tiviakov,Sergei: 'Tiviakov' **1...e5 2.Bc4** Usually I make this move to avoid the Petroff Defence. **2...Nf6 3.d3 Nc6 4.Nf3 Be7 5.0−0 0−0 6.Bb3**

[13.Bg5!? deserves serious attention. After the exchange on f6 the d5 square will become weak and White can hope for the advantage because of the bad bishop f8.]

13...cxb4?!

[It is premature to exchange on b4, there was no direct threat and Black should have played ⌓13...b5 14.Nbd2 etc]

14.axb4 b5 15.Nbd2

[It is a pity but White can't play 15.d4?! immediately since he is not fully developed. After exd4 16.Nxd4 Bb7 17.Nd2 *(17.Bg5?! h6 18.Bh4 Nxd4 19.Qxd4 g5 20.Bg3 Bg7* is bad for White *)* 17...d5= Black reaches equality.]

15...Bb7

[But 15...a5 can be met by 16.d4± with the initiative in the center.]

16.Bg5 h6
[Here and 1 move later Black should have considered seriously to play 16...Be7!? , followed by ♘d7 or ♘h5, trying to exchange the bad bishop f8.]
17.Bh4 Rc8
[17...Be7!? Δ♘d7, Δ♘h5]
18.Nf1
[18.Nb3!? deserved the most serious attention, preventing once and forever the possible advance a6−a5. But during the game I thought my knight will better be placed on e3, controlling the square d5. Well, it is not easy during the game to take such decisions.]
18...Nb8 19.Ra3 Nbd7 20.Ne3 Qc7 21.Bb3 g6
[Black continues to play passively when he had an excellent possibility to free himself and to exchange a couple of pawns. ⌓21...a5 should have been preferred when after 22.Rxa5 *(22.bxa5 d5 23.Ra2 dxe4 24.dxe4 Bxe4∞* is unclear*; 22.Bxf6 axb4!)* 22...Qxc3 23.Bxf6 *(*or *23.Rxb5 Bc6 24.Ra5 Qxb4 25.Ra1±* with slight advantage for White *)* 23...Nxf6 24.Rxb5 Bc6 25.Rb6 Nd7 26.Ra6 Qxb4 27.Bd5± White is only marginally better.]

23...d5□
[Black has to play energetically otherwise he is just positionally lost. After 23...Rf8 24.Nhg4 Nxg4 25.hxg4± his position is very difficult.]

27.Rea1
[White has no time for 27.g4 when after g5 28.Bg3 Nf6= Black is OK. White has to worsen the position of the knight d7 first.]
27...Nb8 28.g4
[During the game I thought I have no time for 28.Nf1!? since Black wins the piece after f5 29.Nd2 Δf4 , but White can just sacrifice the bishop with a strong attack after *(29...g5 30.Bg3+−)* 30.Ne4 Qf8 31.Qg4 g5 32.Bxg5 hxg5 33.Nxg5±]
28...g5 29.Bg3 Red8 Now Black wins the pawn d5 back, but his position remains compromised. If White brings his knight to f5 it will be very difficult for Black to save the position. **30.Qe2 Qxd5 31.Rd1 Rc6⊕**

Bundesliga 1617 (5.1) 03.12.2016
[Meyer,CD]

"SLOW ITALIAN" (Entscheidung in Zeitnot) Am dritten Bundesliga−Wochenende in Aachen gab es für den SV Werder Bremen nach einem mißglückten 2:6−Saisonstart endlich den erhofften Doppelschlag gegen den Aufsteiger Aachen sowie gegen Trier. Allerdings waren beide Siege tatsächlich knapp und auch etwas glücklich. Der scheinbar deutliche 5:3−Erfolg über den DJK Aufwärts Aachen, der erstmalig am Spitzenbrett seinen Topstar GM Julio Granda Zuniga aufbot, kam auch "dank Caissas Hilfe" zustande: Der Peruaner, der im Februar nächsten Jahres 50 wird, konnte gegen Alexander Areshchenko (30) nach einem schweren Fehler des Ukrainers im 28. Zug mit einer gekonnten taktischen

Wendung die Partie auf der Stelle für sich entscheiden. Doch Granda Zuniga verpasste seine Großchance, verlor dann in Zeitnot die Übersicht und ging sang− und klanglos unter. **1.e4** Meyer,Claus Dieter Meyer,Claus Dieter Meyer,Claus Dieter: 'Meyer,CD' **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3** "Slow Italian" ist − ähnlich dem geschlossenen Spanier mit d3 − wieder groß in Mode, wie auch kürzlich im WM−Match zwischen Carlsen und Karjakin gesehen. **5...d6**

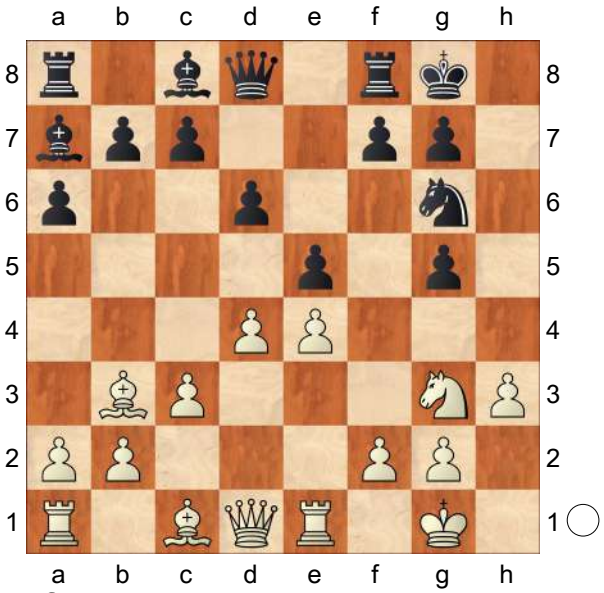
13.d4 Ng5 Consequent but not really good. Konsequent, aber nicht wirklich gut. **14.Nxg5 hxg5**



One of Black's main problems is that he did not neutralize the b3−bishop's pressure yet. Which is the best way to prove Black's attack premature?

15.Nf5 As natural as this move may seem, it still allows Black retaining reasonable play. So natürlich dieser Zug scheinen mag, er erlaubt Schwarz dennoch, ordentliches Spiel zu

behaupten.

[15.h4!! This far from obvious move, forcing Black to either weaken his king's position or else expose his knight, is the only move guaranteeing an advantage. Dieser bei weitem nicht offensichtliche Zug, der Schwarz zwingt, entweder seine Königstellung zu schwächen oder seinen Springer zu exponieren, ist der einzige Zug, der Vorteil garantiert.

15...Nf4? This simply exposes the knight, forcing Black to make an unsound sacrifice. Dies exponiert einfach den Springer und zwingt Schwarz, ein ungesundes Opfer zu bringen.

[15...Be6? "Better late than never" does not apply to this move. White's attack develops very fast now. "Besser spät als nie" gilt für diesen Zug nicht. Der Angriff von Weiß entwickelt sich jetzt sehr schnell. 16.Qg4 Bxb3 *(16...Nf4 17.g3+−)* 17.Bxg5! f6 18.Bh6! Bf7 19.Bxg7 Re8 20.Re3+−]

[4.d4 The most principled solution by White, losing no time to create conflict in the centre. Nf6!
A) The principled 5.Ng5 d5! shows us the main tactical idea behind this system. 18.c4± White is slightly better thanks to the permanent weakness on d6. However, now the d6−pawn is protected and it's not easy for White to create additional pressure on it since f4 is met by Bxc3 followed by Nxe4, while after Ne2 (with the idea of f4) the e4−pawn will remain unprotected. Nevertheless, White has a plan of Ne2−c1−d3. This way he exchanges his passive knight on c3 with Black's strong knight on c5 and then gets a chance to attack the d6−pawn by means of Bb6−c7.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nbd2 Nxe4 8.d5 Ne7 The most popular continuation.

[Earlier we considered 8...Nxd2 Nakamura,H (2799)−Giri,A (2776) Khanty−Mansiysk RUS 2015 [Mikhalevski,V]]

9.0−0 Bxd2 A slightly surprising idea. I don't understand why Black should exchange his dark−squared bishop for White's knight.

[9...Nxd2! is more accurate. 10.Nxd2 *(10.Bxd2 Bxd2 11.d6! cxd6 12.Qxd2* transposes to the aforementioned game Nakamura−Giri. *)* 10...0−0 11.a3

A) In a recent online game after 11...Bxd2 12.Bxd2 d6 13.Rc1 Ng6 14.Bc3 c5? 15.dxc6 bxc6 16.Re1± Black came under pressure. Bortnyk,O (2598)−Nihal,S (2620) Chess.com INT 2021. Anyway, the play of both players can be improved. *(16.Qd4!±* would set even bigger problems. *)*;

B) 11...Bc5!? 12.Ne4 d6 13.Re1?! *(13.Nxc5 dxc5* leads to roughly equal chances. *)* 13...Bb6 14.a4 a5∓ and Black was slightly better in Ostrovskiy,A (2403)−Molner,M (2501) Montreal 2013]

10.Nxd2 Nf6 This position is already extremely rare and had been seen on practice only once.

[10...Nxd2 11.Bxd2 transposes to 9...Nxd2 10.Nxd2 Bxd2.]

11.Nf3 0−0! An improvement on the preceding game.

[11...h6? 12.b4 0−0 13.Bb2± led to a dangerous position for Black in Nataf,I (2534)−Degraeve,J (2555) Montpellier 2015]

12.Bg5! Now Black should agree either on the doubling of pawns after 13.Bxf6 or 13.d6. **12...d6?!** A risky move.

[12...Ng6! was better. 13.d6 cxd6 14.Qxd6 Ne4! 15.Bxf7+! Rxf7 16.Qxg6! Qe8! 17.Qh5 b6 18.Rae1 Bb7 19.Nd2 Re7! 20.Qxe8+ Rexe8 21.Nxe4 Bxe4 and White is just nominally better.]

13.Bxf6 gxf6 14.Nd4

[14.Qd2! was more challenging. c5 15.dxc6 bxc6 16.Rac1 d5 17.Bd3 Qd6 18.Nd4 Kg7 19.Rc3! Bd7 20.Rfc1± and Black is under pressure.]

[14.Rc1! c5 15.dxc6 bxc6 16.Qd2 transposes to 14.Qd2.]

14...f5?! This looks inaccurate.

[It would be better to get rid of the d5−pawn by means of 14...c5! 15.dxc6 bxc6 16.Re1 Bd7 17.Qf3 d5 18.Bd3 Ng6± with a slightly worse, but playable position.]

15.Nf3? This move throws away all of

the advantage. The knight was useful on d4 to stop an advance of the c−pawn.

[After the correct 15.Rc1! Ng6 *(15...Bd7 16.Bd3 Kh8 17.Qf3±* is also highly unpleasant. *)* 16.Re1± the weaknesses on f5 and c7 yield White a clear edge.]

15...Ng6 16.Qd4 Re8 17.Rfe1 Bd7 Black has fully equalised. **18.Bd3**

[18.Rxe8+!? Qxe8 19.Qc3 a6 20.Re1 Qd8 21.Bf1= deserved attention.]

18...Rxe1+ 19.Rxe1 c5! 20.dxc6 Bxc6 21.Bxf5 Bxf3 22.Bxg6! hxg6 23.gxf3 White has definitely misplayed the position. A few moves ago Black had doubled pawns on the kingside, now it's White who has doubled pawns, while Black's doubled pawns have disappeared. Nevertheless, the position remains equal. **23...Qg5+**

[The immediate 23...Rc8 looks more to the point.]

24.Kf1 Rc8 25.Qxd6 Qb5+ 26.Kg2 Qxb2 27.Qd5 White has centralised the queen and wants to bring his rook to the seventh rank. **27...b6!** Black prepares a rook lift from c5. **28.Qd7!**

[28.Re7 Qf6 29.Rxa7 Rc5 30.Qa8+ Kg7 is unnecessary for White.]

28...Rf8 This move is a little passive, but Black retains equal chances.

[Black didn't have to reject the logical 28...Rc5! 29.Qd8+ Kg7 30.Re8 Rh5 31.Qe7 Rf5 32.Qh4 Rh5 with a likely repetition.]

29.Qxa7 Kg7 30.Re4 Qf6 31.Qc7 Ra8

32.Rf4 Qg5+ 33.Kh1 Rf8 34.Qc3+ Kg8 35.Rg4 Qc5 36.Qb3 Qc6 37.h4 White is trying to set some problems thanks to his extra pawn on the kingside and more active rook. **37...Rd8 38.h5 Rd6?!** This is already inaccurate.

[38...Qc1+! was correct, but I assume Alekseenko didn't have time to calculate the consequences of this move. 39.Kh2 *(39.Rg1 Qc5)* 39...Rd1 40.Rxg6+ Kh8! 41.Qxf7 Rh1+ 42.Kg3 Rg1+ *(42...Qg1+!? 43.Kf4 Qc1+=)* 43.Kh4 Rh1+ 44.Kg4 Rg1+ 45.Kf5 Qb1+ 46.Kf6 Qb2+ 47.Ke7 Qa3+ and it turns out that White can't escape the checks. However, it's difficult to play like this in a game.]

39.Kg2! Kg7 40.h6+!? Kxh6 41.Qxf7 Rf6! The only move. **42.Rh4+ Kg5 43.Rg4+ Kh6 44.Qb3 Rf5!** The only move again. **45.Qe3+ Kg7 46.a4 Qf6! 47.Qd3 Kh7 48.Qd7+ Kh6 49.Rg3 Rh5! 50.Qe8 Kg7 51.f4** A silent draw offer. **51...Qf5 52.Qe5+** Good defence from Black in the critical moments, but he didn't have to reach such a dangerous position. The bottom line is that 9... Nxd2 looks better than 9...Bxd2. **½−½**

The previous examples have convinced us that White's pianissimo setup contains more venom than it may seem at first sight. Black's best recipe for a fiasco is developing naturally, without anticipating the danger. However, there are players who are aware of the dangers. They usually treat the opening and early middlegame phase more carefully. In such cases, White needs to

rely on a positional phase, aiming at obtaining a latent kingside pressure. This is the first example illustrating such a situation. It also continues the discussion of White's incomplete development. More details at the due moment. **11.Nf1 Be6 12.N3h2 Bxb3 13.axb3 d5 14.Qf3 dxe4** Releasing the tension is an important concession.

Tata Steel−A 84th (7)		22.01.2022

[Grandelius,Nils]

1.e4 e5 2.Nf3 Nc6 The Petroff! As Karjakin was one of Nepomniatschi's seconds for the World Championship match, it was of course a reasonable possibility. On the other hand, Karjakin has never in his life played the Petroff before, and in a previous round of the tournament he already played 2...Nc6 against Esipenko. Therefore, I can't say I focused particularly much on preparing for the Petroff in this game. **3.Bc4 Nf6 4.d3 Bc5 5.c3 0−0 6.0−0 d5 7.exd5 Nxd5!?** A rare but smart move order, which I had actually just overlooked in my preparations. **8.Re1** Qd3 looks like a funny square, but the idea was invented by Jorden Van Foreest and actually makes a lot of sense. The queen on d3 hits h7, which means that a later h4 Ng5 will be tough for Black to handle. I can't say that I'm a big expert on this line, but thought that it looked interesting enough for a game. **8...Bg4!** The big difference. By delaying short castle for a move Black gains some extra possibilities. **9.Nbd2?!** After a long think I decided not

to tempt fate but go for a solid approach, due to misevaluating the arising endgame. **9...Nb6 10.h3 Bh5 11.Bb3 Qxd3 12.Nxe5** Basically I thought my slight lead in development should give me some initiative, which Karjakin with accurate play would be likely to neutralize. However, this seems to be a bit of a misevaluation. Within the next couple of moves Black easily catches up in development, after which the two bishops are clearly the most important factor. It turns out that White is the one having to be careful here. **12...Qf5?! 13.Nef3?! Rfe8 14.g4 Bxg4 15.hxg4 Qxg4+** Until now there hasn't really been much content in the game at all, and normally one would ask why I chose to annotate this game at all. But the reason starts from this moment on. Instead of playing a normal move, after which Black is pleasant but perhaps not really better, I decided to go for a line which seemed to me quite risky, but also very unusual and interesting. **16.Kh1?!** Although it makes the game enjoyable to watch, I still have to be honest and admit that objectively, my position now turns rather risky. **16...Ne5** The critical move. **17.Nh2?!** Again, the question mark is for the objective evaluation, although by now I am just following what I intended on my last move. **17...Qg6 18.Bc2 Nd3 19.Bxd3 Qxd3 20.Ndf3**

[20.Nb3 Qxd1 21.Rxd1 Bxf2 22.Ng4 Bh4 23.Rg1]

20...Qxd1 The point of the whole tactical sequence over the last few moves. The knight is trapped for basically the rest of the game, but on the other hand Black's king is also trapped and I do have a plan of pushing my kingside pawns. In hindsight, I was a bit too optimistic before reaching the position, as my 'attack' really isn't going anywhere at all. Still, it is also rather difficult for Black to activate the pieces. **21.Rxd1 Bxf2?! 22.Bf4!?** An interesting, perhaps even beautiful, but also rather unnecessary idea. **22...c6 23.Rd2?! Be3 24.Bxe3** In order to play f5 and g4. **24...Rxe3?** Missing an excellent practical chance. **25.Nd4** Now I have time for both f5 and g4, after which the c8−bishop is not stronger than my h7−knight! **25...Nc4 26.Rf2 Rae8 27.Raf1**

[27.Nf5! Black can't play ...d5. Re1+ 28.Rxe1 Rxe1+ 29.Kg2]

27...Nd6 28.Nf5 Nxf5 29.Rxf5 Making sure that there is no Ba6−b5−a4. **29...f6 30.Kg2** It's just a draw, as Black can't really enter. **30...Kf7 31.Rd1 h5**

[31...Re2+ 32.Rf2 and now for instance something like h5!? Intending g4. Certainly not better for White objectively, but still the sort of interesting position one is looking for when playing 8.Qd3. 33.Nf3 Rxf2+ was my intention, and now after 34.Kxf2 g5 35.a4]

32.Rf2

[32.Rxh5 Re2+ is annoying. 33.Kg3 seemed to me much less impressive here, as Black can go Rxb2! immediately. 34.Rd7+ Re7 followed by Ne6 and/or Bd6 looks absolutely fine for Black. 35.Rxe7+!? was the more ambitious option though. It looked a bit too odd for me during the game, but as my move was completely harmless, Qe2 is probably the way. Kxe7]

32...g5 Doesn't change much, but there

is nothing else. **33.Rd7+ R3e7 34.Rd6 Re6 35.Rd7+ R8e7 36.Rd8 g4**
[36...Kg6 37.Rg8+ Rg7 38.Rh8! is just equal.]
37.Rh8
[37.Nf1 h4 38.Rh8 g3! Black is very slightly better, although White of course should hold. 39.Rf4!? was even more accurate to equalize the game completely. Re2+ 40.Kg1 g2 41.Nh2 Black will have to take the knight, after which it's very close to a draw. Rxb2 42.Rh7+! is the tactical point − now there is no Bg5+. Ke8 was the more natural option, and the move I expected. 43.Rxe7+ Was my intention, but now Black has a better version than the game. Kxe7! 44.Rxh4 Rxa2 45.Rh7+ Kd6 46.Rxb7 a5 Compared to the game Black has gotten Bf6 basically for free. It's of course still not a lot, but I certainly wouldn't enjoy facing Karjakin with White here...]
37...Kg6 38.Rg8+ Rg7
[38...Kh7 39.Ra8 was of course technically possible, but after Re2 I have traded a set of pawns and it should be rather drawish.]
39.Rf8 Kg5 looks scary for White as Black is entering, but it does allow **40.Nf1!** after which Black is the one having to be a bit careful. **40...h4?? 41.a4 a5**
[41...Rg6! was the move I feared the most during the game. Black is trying to untangle slowly with Rb6−d6 etc. 42.Rf7 bothered Karjakin, but Re5 now 'threatens' Be7, and after 43.Rxb7 f5! Black will be able to regroup. It's still very hard to make further progress after for instance 44.Rf7]
[41...g3 42.Nxg3 hxg3 but at least Black is making progress. 43.Kxg3]
42.b4 and the bishop is out, after which Black in essence is playing with two extra pieces. **42...b6 43.bxa5** would be a draw if I was allowed to pass, but due to zugzwang I am losing the c4−pawn. **43...bxa5!** The computer points out that this is a very decent try for Black. We both didn't really consider letting my rook enter on e7, but that turns out to be empty activity. **44.Ra8!!** A fantastic resource, pointed out by Karjakin's second Denis Khismatullin. Neither me nor Karjakin were close to spotting it during the game. **44...Re5 45.Nd2!** is the point.
[45.Rc8 f5 and now the simplest is probably 46.Rf8 After which the knight is ready to get out to g5. White is at least not worse!]
45...g3 46.Nf3+ And although Black is a full bishop up and there is a lot of material on the board, it seems to be fortress. White simply goes with the king to e3/f2/f3 and uses the bishop to never let Black enter g4 with the king. The rest of the board is blocked and the bishop always has enough squares, so at least as far as I and Khismatullin can tell it's just a draw! **46...Kf4? 47.Rf1 h3+** Looks active, but after the simple **48.Kxh3−+** There isn't really any defence against Kh8 Bg8 eventually. **48...g2** should definitely have been played. I hadn't yet realized just how important it was to keep Black's bishop out. **49.Rf2** bothered me during the game, but I have **49...Ke3**
[49...Ke3 50.Rxg2! after which Black should force a draw with Kxf3!

51.Rxg7 was perfectly possible immediately, just pushing the pawns. Rh5#]

Movsesian comes up with a new idea.
[Recently I analysed for you 18.Qa4 , which occurred in the game Radjabov, T (2713)−Karjakin, S (2772)/Shamkir AZE 2014/ [Mikhalevski, V].]
18...Rae8
[The immediate 18...Qb5 was interesting, with the idea 19.Rab1 *(* or *19.b3 Qc6)* 19...Rd8 20.Rxe4 Qd5 21.Ree1 Qxa2 with a slightly more pleasant position for Black.]
19.Rad1 Qb5
[19...Qc4!? deserved attention, when after 20.Rd7 R6e7 21.Rxe7 Rxe7 22.Qg4 Re6 The chances are roughly

equal.]

20.Qe2 Movsesian has overlooked Black's strong reply.

[20.Rd2!= was more accurate and promised equal chances.]

20...e3! First Black damages White's pawn structure. **21.fxe3**

[After 21.Bxe3 Qxe5 22.Qd2 Bxe3 23.Rxe3 Qb5 24.Rxe6 Rxe6 some accuracy is still required from White, though the position should be equal.]

21...Qa4! A double attack on f4 and a2.

22.Qf3

[or 22.Rf1 Qxa2 23.Rd7 Rb6 when White hasn't fully equalised yet.]

22...Rb6! The only move as Black had to protect the b7−pawn. **23.b4?!** After this dubious move Black seizes the advantage.

[After 23.Rf1 Qxa2 24.Rd7 Qe6 25.Rxc7 Rxb2 26.Rxb7 Rxb7 27.Qxb7 Bc5 It's easier to play with Black, though the position remains roughly equal.]

23...Qxa2∓ Bacrot is better thanks to his better pawn structure. **24.Rd7 Rc6 25.h4** Sergey's idea was to prevent a possible ...g5, which Black can play at the appropriate moment to secure his king.

[White should have tried 25.Red1!? hoping to create counterplay, though after Qe6∓ Black is better.]

25...Rxc3 26.Qxb7 Bb6 Now White has an additional problem on b4. **27.Qf3 Qb3**

[27...Qe6!? was an interesting alternative. 28.Red1 Rc4 29.Rd8 Rxd8 30.Rxd8+ Kh7∓ Black is better thanks to the White's weaknesses on b4, e3 and e5.]

28.Kh2! Qxb4?!

Etienne underestimates White's initiative.

[28...Qe6!?∓ was still good.]

29.Rf1? After this move Black consolidates and enjoys an extra pawn.

[29.Red1! was better, when White creates counterplay. For example, Qc4 30.Rd8 Rxd8 *(30...Qe6?? loses to 31.Qa8 Rxd8 32.Rxd8+ Kh7 33.h5!+−)* 31.Rxd8+ Kh7 32.Rf8!= and Black has to be careful.]

29...Qc4!∓ 30.Rd5 White is disconnecting the black queen and the f7−pawn.

[30.Bg3 is met by the coldblooded Rf8∓]

30...Rf8!? The f7−pawn needs good protection.

[30...Qc6!∓ was strong in order to bring the queen to e6.]

31.Rfd1 Rc1!? Since Black is a pawn up any exchange makes his task easier.

[Once again 31...Qc6!∓ was strong.]

32.R1d3

[32.Rxc1 Qxc1 33.e6 fxe6 34.Rd7 is a better practical chance as it requires very accurate play from Black. Nevertheless, Black retains a clear edge by means of Qc4! 35.Qg4 Rf7 36.Rd8+ Kh7 37.h5 Qe4∓]

32...Qc6! 33.h5 Rc5!? The same tactic of exchanges.

[33...a5!?∓ pushing the a−pawn was strong too.]

34.e4 Rc4

[34...Qe6!∓]

35.Bg3 Qe6 36.Rd8 Rc1??

A blunder. Probably both players were already short of time. We shouldn't forget that this was a rapid game.

[36...Bc5 would have retained Black's

edge.]
37.Qf5? White returns the favour.
[After the correct 37.Rxf8+! Kxf8 38.Rd8+ Ke7 39.Bh4+ f6 40.exf6+ gxf6 41.Bxf6+! Qxf6 42.Re8+!+− White wins.]
37...Qxf5?!
[37...Bc5!∓ was better.]
38.exf5 Rf1 39.e6 fxe6 40.fxe6 R1f5?
[40...Bc5= would have equalised.]
41.e7
[41.Bh4! Bc5 *(41...Rxh5?* is impossible in view of *42.Rxf8+ Kxf8 43.Rd8#)* 42.e7+− and White wins a piece.]
41...Rxh5+ 42.Bh4 Rxh4+ 43.Kg3??
[It wasn't too late to play 43.Rh3 when after Rxh3+ 44.Kxh3 Re8 45.Rxe8+ Kf7 46.Ra8 Kxe7 47.Rxa6= the position is equal.]
43...Bf2# 18. Qh5 doesn't look like a serious improvement. The position remains equal and so the ball remains in White's court.

1.e4 From time to time I have started to play this move which has given me some more enthusiasm for chess. **1...e5 2.Nf3 Nc6 3.Bc4 Nf6** Strange enough, but I played the Benko three times in this tournament with half a point out of three being the result for Black. **4.d3**
[4.Ng5+−]
[4.d4 is a worse version]
4...Bc5 5.c3 White is trying to develop as soon as possible the kingside even at the price of returning the pawn in some lines. **5...a6 6.Bb3 d6 7.Nbd2 0−0** Trying to get a typical position from previously mentioned lines, but here White has at least one extra tempo thanks to the fact that he can castle immediately. **8.h3 Ba7?!** The queen is quite well placed on a5 and the best for Black would be to bring the knight into play. **9.Nf1 Ne7**
[9...d5 10.Qe2 dxe4 and to be honest I prepared here ♕g4 which is good enough but the computer suggests the even stronger. 11.dxe4! Nh5 12.g3 Nf6]
10.Ng3 I was also considering the setup with the knight on c4, but Black can always exchange it so why to lose so many tempi for one knight manoeuvre. **10...Ng6 11.0−0** Exploiting the fact that queen has to lose one more tempo.

13.cxd4 d5 14.e5 Ne4 15.Bc2! My idea was to put the bishop on b2 in order to face the black fianchetto on a equal basis. And the only move which would allow me to protect on e4 preparing b3 and to take under control the c4 square, which was actualy Black's threat, was ♕e2. **15...Nh4**

[9...a5 are the alternatives.]
10.a5! Very deep novelty. This move has several purposes. 1.White wins space on the queenside. 2. White prepares Qb3 which can't be met by Na5 3.White stops 10.Be6, which will be met by 11.Bxe6 and 12.d4 4.Black has no other useful moves than 10...Ba7, which is not always useful. Very often, Black wants to play d5 and Bf8 or to exchange the bishop on e3 without losing tempo for Ba7.

10...Ba7
[10...Be6 This move is critical. 11.Bxe6 Rxe6 *(11...fxe6* make no sense with the rook on e8. Black's main idea in this structure is to attack the f−file. [11...Rf8 with the idea that Ne7−g6 is possible, but it is not human nature to play such a move.]
[11...Re7 looks ugly]

12.Be3! When Black already loses time for Ba7, White exchanges this strong bishop. **12...Bxe3 13.Rxe3 Rb8?** Black is preparing Be6. The engine screams that this move is a serious mistake and suggests 13...Nh5 followed by Qf6 and Ne7 or 13...Qf8, 14...Ne7 as an improvement.
[13...Nh5 14.d4 Qf6 15.Nbd2 Nf4 16.d5 Ne7 17.Bf1 Qg6 18.Kh2 f5 19.c4± White's grip on the queenside is quite obvious, and Black's attack doesn't seem very dangerous.]
[13...Qf8 14.Nbd2 Ne7 15.d4 Ng6 16.Bf1 I can't see Black's where is Black's counterplay here. White is ready to start advancing his pawns on the queenside.]

14.d4 White strikes first. **14...b5 15.axb6 cxb6 16.Nbd2 b5 17.Bf1** The pawns on the queenside will be weaknesses in the future. White's idea is c4 in an appropriate moment. **17...Qc7** Black is leaving e7−square for the knight. **18.d5 Ne7 19.c4** Just in time. **19...b4 20.Qa4 Nd7 21.Qa5** White exchanges queens and enters a pleasant endgame. The pawns on d6 and a6 are quite weak. **21...Qxa5 22.Rxa5 f5** Black is desperately tried to organize some counterplay.
[22...Nc5 is well−met by]

23.Nb3 White is leaving the d2 square for the other knight and also prepares c4−c5 break. **23...fxe4 24.Nfd2 Nf6 25.Nxe4 Nxe4 26.Rxe4 Bf5** This move leaves a6 pawn without protection, but the Indian GM is trying to defend with active play. **27.Re1 Bc2 28.Nd2** Black does not achieve anything, now the pawn on a6 is just lost. **28...Nf5 29.Rxa6 Red8 30.Rea1 Nd4** The knight stays beautiful, but it is useless. [37.d6+]
[37.f3 followed by Ne4 finishes the game immediately.]

37...Kf8
[37...Rxf2]

38.Rxe5 The rest is just pure technique. Black has no chances at all. **38...Rf7 39.Ra6 Kg7 40.f3 Rdd7 41.d6 Rf8 42.Rxc5 Rfd8 43.Rd5 Nf5 44.Bxb3 Ne3 45.Re5 Rxd6 46.Rxd6 Rxd6**

Smirnov delays playing ...Ba7, which, as the game shows, proves to be to his

advantage.

[A key question is whether White can exploit Black's move order by playing 8.Bg5!? − see Tiviakov−Pavasovic in the book for coverage of this move.]

[If 8.Re1 h6 9.Nbd2 Be6 White must avoid 10.Bc2? *(10.h3 Re8* transposes to the main game *)* 10...Ng4! 11.Re2 because of the tactic Bxf2+! 12.Rxf2 Ne3 13.Qe2 Nxc2 14.Rb1 Bxa2 and here 15.b3 Bxb1 16.Nxb1 N2b4 17.cxb4 Nxb4 favours Black.]

8...h6 9.Re1 Re8 10.Nbd2 Be6

11.Bc2 In view of Black's reply, this might be one position where White should allow an exchange of light−squared bishops.

[11.Nh2 is covered in the notes to Tiviakov−Pavasovic in the book.]

[11.Nc4 Ba7 12.a4 is another way for White to play it.]

11...d5! Black certainly gains something from delaying ...Ba7 in this particular line. This is all the more evident when we consider that one of Black's defensive options with the bishop on a7 is ...B(a7)−c5−f8!

[11...Ba7 12.Nf1 d5 would transpose to the previous game, Smirin−Pelletier.]

12.b4 Bologan chooses a kind of reversed Philidor set−up, which looks logical.

[12.Qe2 Bf8 13.exd5 *(*or *13.Nf1 b5 14.Ng3 g6 15.Rd1 Bg7 16.Be3 Qe7* with an equal position, S.Ganguly−L. Fressinet, Dresden 2008. *)* 13...Qxd5 14.Ne4 Nxe4 15.dxe4 Qb5 16.Bd3 Qa4 17.Bc2 Qb5 18.Bd3 Qa4 19.Bc2 Qb5 1/ 2−1/2 B.Gelfand−L. Aronian, Moscow 2009.]

12...Bf8 13.a3 Qd7 14.c4?!

This doesn't work out very well for White.

[After 14.Bb2! there are ideas of exd5 followed by c4, and plenty of tension remains in the position.]

14...dxe4 15.dxe4 Nh5! 16.Nxe5

What else? Otherwise the knight is coming to f4. **16...Nxe5 17.Qxh5 Qd4 18.Rb1 Nxc4** Black regains his pawn with at least equality, and his position soon improves further. **19.Nxc4 Qxc4 20.Re2 a5! 21.b5?** It was time for White to think about bailing out and simplifying as much as possible.

[Black can meet 21.bxa5 with Rxa5! 22.Qxa5 Qxe2 23.Qd2 Black is better here because the a3−pawn is very weak, but White has good drawing chances because of the exchanges.]

21...a4! Now both queenside pawns are weak. **22.Qf3 Red8 23.Bf4?** Perhaps time trouble already, or did the team situation require desperate measures? **23...Bxa3! 24.e5 Bf8** Calmly back to base, and now the a−pawn's a runner. The rest is ridiculously easy for Smirnov. **25.h4 a3 26.h5 a2 27.Ra1 Ra3** Delaying ...Ba7 in favour of 7... 0−0 works quite well if White continues normally, although White certainly could have improved with 14 Bb2!. As alternatives, White should consider 11 Nh2 and, earlier, 8 Bg5 which might be the most challenging move.

14.Nbd2 White's plan includes Bb2 followed by c4, when the knight on d2 supports the c−pawn.
[In a recent game White played 14.a4 Brkic, A (2587) −Tkachiev, V (2644)/Istanbul TUR 2012/[Mikhalevski, V], though Black equalized easily.]

14...Bg4 15.Bb2 Before playing c4 White develops the dark−squared bishop to the long diagonal, from where it will put pressure on Black's kingside.
[In the only preceding game White tested the immediate 15.c4 Angulo, A (2000) −Santivanez Montes, M (2235)/Lima 2002, which Black should answer with Nxc4 16.Nxc4 bxc4 17.Qxc4 Rab8 with roughly equal chances.]

15...Nd7 The knight is going to either e5 or b6 to make the c4 advance difficult.

16.c4!?
[It would be interesting to start with 16.h3 Then after
A) Maybe Li Chao didn't like 16...Bxf3 17.Nxf3 *(17.Bxf3 Nb6* stops c4. *)* 17...Nb6 Black has stopped c4, but White can regroup with 18.Bc1 However, I believe the

position remains roughly equal.;
B) 16...Bh5 17.c4 Black's light−squared bishop won't be able to return to e6 as it did in the game.]

16...Nxc4 17.Bxc4

[In case of 17.Nxc4 bxc4 18.h3 Bxf3 19.Bxf3 Rab8 20.Be2 Bf6 21.Bxf6 Nxf6 22.Qxc4 Rfe8 Black obtains compensation for the weak pawn on c6.]

17...bxc4 18.Qc3 This idea doesn't promise any advantage, though it looks tempting to advance the e−pawn to e5 with a gain of tempo.

[18.Rab1 c5 19.Nxc4 Rfe8 with roughly equal chances. *(19...Bxf3 20.Qc3 Bf6 21.Qxf3 Bxb2 22.Rxb2* is marginally better for White thanks to the blockade on c4 and the potentially weak pawn on c5. *)*]

18...Bf6 19.e5 Be7 20.Qxc4

[A further advance of the e−pawn 20.e6?! is dubious in view of the simple Bf6 21.exf7+ Rxf7 22.Qc1 Bxb2 23.Qxb2 Bxf3 24.Nxf3 Rxf3! 25.gxf3 Ne5 26.Qe2 Rf8 with a dangerous initiative.]

[After 20.Nxc4 Nb6 I prefer Black.]

20...Be6∓ Black has obtained a better position thanks to the bishop pair and because White's dark−squared bishop is restricted by his own pawn. **21.Qc2 c5** a slight inaccuracy.

[21...Bd5! was better, with the idea to transfer his knight to e6 via f8 .]

22.Ne4 h6?! Hammer stops Ng5 ideas, but misses that the e6−bishop can be attacked from another side.

[22...Rfd8 was better as Black can meet 23.Neg5 with Nf8 replacing the light−squared bishop with a knight on a nice blocking position.]

23.Nd4! Rab8! Since Nxe6 can't be prevented it has to be ignored.

[Unfortunately, Black can't move his bishop to d5 23...Bd5? in view of 24.Nf5± with a dangerous initiative.]

24.Nxe6 fxe6 25.Rad1 Rfe8?

A surprising mistake. Black is preparing to protect his weak pawn on e6, but allows penetration of the White's knight to d6 with gain of tempo.

[It was necessary to accept the pawn sacrifice. 25...Nxe5 26.Qc3 Rb4! A strong move, which Black had to see in advance. 27.Rfe1 *(* or *27.f3 Qb6!* Another strong intermediate move. *28.Ba1 Rd4 29.Rxd4 cxd4 30.Qxd4 Nc6*= and Black is very close to equality. *)* 27...Rf4! 28.f3 Rf5 29.Ba1 Bf6 and Black's extra pawn partly compensates the hanging position of his pieces. Nevertheless, I still like White's chances.]

26.Rfe1 This move is a little slow, when White's idea is to prevent 26...Nxe5.

[The simple 26.Nd6! Red8 27.f4 Nb6 28.Rd3± transferring the rook to g3 yielded White a clear advantage.]

26...Qc6?!

[26...Nxe5? doesn't work in view of 27.Ng5! Bxg5 28.Bxe5+− and White wins an exchange.]

[26...Red8 was better, admitting a mistake, although White retains slightly the better chances after 27.f4±]

27.Bc1 The Chinese player doesn't want to force matters.

[27.Nf6+! was strong. Nxf6 *(27...gxf6??* fails to *28.Qg6+ Kh8 29.Qxh6+ Kg8 30.Qg6+ Kf8 31.Bc1*+− with mate. *)* 28.exf6 Rxb2 Black has no choice, but to sacrifice

an exchange. 29.f7+! Inviting the king to f7. Kxf7 30.Qxb2± and with an exchange for a pawn White's chances are higher.]

27...Rf8

[27...Red8 deserved attention, leaving the f8−square for the knight.]

28.Qc3

[It would be more precise to return to the right path with 28.Bb2!?]

28...Rb4 29.Ng3?! Too passive. White seems to lose the thread.

[The natural 29.Nd6 was better.]

29...Qa4

[29...Rf7! 30.Qc2 Bf8 would secure the kingside and reset coordination between the pieces.]

30.Be3?! Probably the players were short of time as their play at this stage of the game is far from perfect.

[Surprisingly, 30.Bxh6 isn't dangerous for Black in view of Rd4! *(* But not *30...gxh6?! 31.Qd3!±* winning back a piece White retains an extra pawn. *)* 31.Bd2 Nxe5! with equal chances. However that's what White had to do.]

30...Rc4?! Hammer misses a chance to seize the initiative.

[It seems that they both missed that 30...Nb6! was possible, transferring the knight to d5. It s important that the c5−pawn is untouchable 31.Bxc5 is met by Rc4! 32.Qxc4 Nxc4 33.Bxe7 Rf7∓ with Black's advantage.]

31.Qb2 Nb6 32.Rc1

[32.Qb1! is likely to lead to a repetition after Qc2 33.Qb5 Qa4 preventing activation of White's queen.]

32...Rxc1 33.Rxc1 Nc4

[33...Nd5!∓ was better.]

34.Qb7! Nxe3 35.Qxe7 Qf4

[35...Rxf2! would be more accurate and led to equality. For example, 36.Kxf2 *(36.Qxe6+!? Rf7! 37.Qc8+ Kh7 38.Qxc5 Qf4 39.Kh1 Rb7* with sufficient counterplay. *)* 36...Ng4+ 37.Ke1 *(37.Kf3 Nxh2+ 38.Ke2 Qg4+ 39.Kd2 Qd4+ 40.Kc2 Qc4+ 41.Kb2 Qb4+ 42.Ka1 Qd4+=)* 37...Qb4+ 38.Kd1 Qd4+ 39.Kc2 Ne3+ 40.Kb1 Qb4+ 41.Ka1 Qd4+=]

36.Qxg7+! Now the game goes into a slightly better rook endgame for White.

36...Kxg7 37.Nh5+ Kg6 38.Nxf4+ Rxf4 39.fxe3 Ra4 40.Rxc5 Rxa2 41.e4! It turns out Black is going to lose one of his kingside pawns. **41...Kg5**

[41...a5 doesn't guarantee a draw. 42.Rc6 Kf7 43.Rc7+ Kf8 44.Rh7 a4 45.Rxh6 a3 46.Rf6+ Ke7 47.Rf3±]

42.Rc6 Kf4 43.Rxe6 Ra4

A weird move.

[43...Ra1+ deserved attention. 44.Kf2 Ra2+ 45.Kf1 transposing to the game.]

44.Kf2

[After 44.g3+ Kxe4 45.Rxh6 Kxe5 46.Kg2 White retains certain chances for a win.]

44...Ra2+ Black transposes to 43...Ra1.

45.Kf1 Ke3 46.g4

[46.g3 is a better practical chance.]

46...Rxh2 47.Rg6 Rf2+ 48.Kg1 Re2! 49.e6 Kf4 50.Kf1 Rxe4 51.Kg2 Re3 52.Kf2 Re4 53.Kg2 Re3 54.Kf2 Re4 and in this equal position a draw was agreed. The novelty 15.Bb2 doesn't look dangerous for Black. Hence, the ball remains in White's court.

As a warning signal, we should mention that the limit between winning/ playable/ unsound sacrifices of this kind is very tiny. But, at the same time, even if the sacrifice is not good objectively, similar practical problems when choosing the best defences as Carlsen's can eventually lead to success. [GM Grigor Grigorov]

In the next example, we will see the advantages of the advance d3−d4. As pointed out earlier, White's idea is to provoke ...exd4 when after cxd4, he will put pressure on the c−file. This idea works very well in a combination with the advance b4−b5 which gains space and fixes the c7−pawn. Markus Ragger applied exactly this idea in the game − **18.b5 Nb8 19.d4 Nd7 20.Be3 Ng6 21.Nf3** White increases the pressure on e5. Sooner or later, after running out of useful moves, Black will have to make a concession by taking on d4. **21...Nf6 22.Ng3 exd4?!** I find this decision premature.
[In this kind of Italian endgames, Black should adopt the waiting strategy by playing 22...Nd7 Actually, it is not so easy for White to provoke ...exd4. Probably, he should settle for the manoeuvre

Nf1−d2−c4, thus increasing the pressure on e5.]

23.cxd4 d5 24.e5 Nd7 This is the position Black was going for. Sermier was planning to free himself with the break ...c7−c6. **25.Rc2 Bb6 26.Ne2!** Good prophylactic move. Taking the f4−square under control is important. **26...Rfc8 27.Rdc1 Ne7 28.Nf4 Kf7 29.g4!** Another strong positional decision. White not only takes the f5−square from the black knight but is also planning to eventually play g4−g5, creating new targets on the kingside. **29...c6 30.bxc6 Rxc6 31.Rxc6 Nxc6**

[The alternative 31...bxc6 is well met by 32.Nd3± Taking the c5−square under control and planning Rb1.]

32.g5! Once again, we see the principle of two weaknesses in action. Since Black has concentrated his forces on the queenside, White starts playing on the other wing. His dream would be to play h3−h4 followed by Kh3−g4. **32...Rh8 33.Rb1**

[Even more precise would have been 33.h4! Bd8 34.gxh6 gxh6 35.h5 Fixing the h6−pawn and creating a stronghold on g6. Nb6 36.Rb1+− Black cannot defend on both wings. Since his rook is tied to the defence of the h6−pawn, White can win the game on the queenside. A possible idea would be the manoeuvre Nf3−e1−d3−c5 when Black's position would collapse.]

33...Ne7 34.Rc1 Nf5 35.Rc3 Re8 36.h4? This is already a mistake.

[The simple 36.g6+ Ke7 37.h4 would have retained the advantage.]

36...Rh8? Black returns the favour. After this move, he is just lost.

[After 36...Nxh4! 37.Nxh4 hxg5 38.Nxe6 Kxe6 39.Nf3 Kf5= The position is about equal.]

37.g6+ Ke7 38.Bc1?! This move does not let the advantage slip away but is not the most direct approach.

[Once again, more precise would have been 38.Kh3]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3! a6 The 2nd most popular move. The queen pins the d2 knight, so the c4 pawn cannot be taken. White cannot win back the sacrificed pawn immediately, but instead completes the kingside development. **6.Bb3! Ba7 7.Nbd2** White wants to take the c4 pawn, since that the d2 knight is not pinned anymore. **7...0−0** After Black protects the c4 pawn with b5, White launches forward to attack the c6/b5/ c4 pawn structure. **8.0−0!±** Undermining the b5 pawn and trying to weakening the c4 one is a typical idea. **8...d6 9.h3!** This is a dynamic move with multiple

serious threats. Trading the bishop is ideal for White, and it limits the retreating squares. The bishop is not comfortable on ♗f5 or ♗d5 because of the e4 push. Also, the bishop retreat to d7 is passive. Further dangers arise when White continues to pressure with ♗f3 which will be an unplesasant move for Black as the h1−a8 diagonal has become greatly weakened. **9...h6 10.Re1** This also leads to a better position. The next moves are pretty forced for both colours. **10...Nh5 11.Nf1 Qf6 12.Be3 Nf4?** A logical recapture, but a mistake. White can use the weakened h1−a8 diagonal in a beautiful way.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 If CBM 101 can be taken as a good guide then Black has decided that this relatively straightforward line − aiming for an IQP position at the expense of the bishop pair − is a decent practical choice. **6.cxd4 Bb4+ 7.Nc3 Nxe4 8.0−0 Bxc3 9.d5 Bf6 10.Re1**

So what compensation can Black claim for the bishop pair here when we compare this position to 'standard IQPs'? Well, the first thing is that the attack on d4 all but obliges this rather passive bishop move − of course the bishop would rather be on g5, but needs must. Moreover, Black has aspirations to create a more than usually effective light square blockade (or more!). However, whilst Bg5 has been prevented for the moment, it remains a possibility to be reckoned with, as does the development of the white queen to f3 and from there to g3/h3, enabled strangely enough by the knight 'missing' from f3. **10...Ne7 11.Rxe4 d6 12.Bg5! Bxg5 13.Nxg5! h6 14.Qe2 hxg5 15.Re1!** The doubling of Black's f−pawns which this prepares seems to carry venom on two grounds: 1) White has chances to push in the centre with d4−d5 rendering the f−pawns and the f5 square much more problematic. 2) A further exchange of bishop for knight may leave Black with surprising difficulties covering his dark−square

weaknesses on the king−side. The game is a good illustration of this latter point!

1.e4 Roiz,M Roiz,M Roiz,M: 'Roiz, Michael Roiz,Michael: 'Roiz,M'' **1...Nc6 2.Nf3 e5 3.Bc4 Nf6 4.d3 h6 5.0−0 d6 6.c3 g6** Richard chooses a somewhat risky, but less explored setup.
7.Re1
[More energetic is 7.d4! Qe7 *(7...Bg7 8.dxe5 dxe5 9.Qxd8+ Nxd8 10.Nxe5±)* 8.Re1 Bg7 9.Nbd2 0−0 10.h3 Kh8 11.a4 Bd7 12.a5 a6 13.Bd3 Rae8 14.Nf1± Radjabov,T − Amin,B Doha QAT 2016]
7...Bg7 8.h3 0−0 9.d4 Now, when Black's development is almost completed, this advance is less promising for White. **9...Nd7N** Transferring the knight to b6 is an interesting idea, but it yields White time for consolidating the centre.
[But 9...Nxe4?! is dubious: 10.dxe5 Ng5 11.Bxg5 hxg5 12.e6± Andriasian,Z − Lomsadze,D Jermuk ARM 2012]
[However, 9...exd4 is safer: 10.cxd4 d5 11.exd5 Ne7 12.Nc3 Nexd5 13.Ne5 c6= Antipov,M − Marholev,D Marianske Lazne CZE 2009]
10.Na3
[10.Be3!? looked somewhat provocative, but inviting the knight to c4 is a typical idea in the Ruy Lopez. The play might continue: Nb6 11.Bb3 Na5 12.Bc2 Nac4 13.Bc1 exd4 14.cxd4 c5 15.b3 cxd4 *(15...Na5 16.Be3±)* 16.bxc4 d3 17.Qxd3 Bxa1 18.Nc3↑ and White's initiative more than compensates for the exchange.]
10...Nb6 11.Bb5
[Another natural retreat − 11.Bb3 Re8 would more or less force White to release the tension in the centre, and after 12.dxe5 Nxe5 13.Nxe5 Rxe5 14.Bf4 Re8 Black is close to equalising.]
11...Bd7 12.Be3?! Losing control over the e4−pawn could have invited some troubles.
[Instead, Hou Yifan should have played 12.dxe5 Nxe5 13.Nxe5 dxe5 14.Bxd7 Nxd7 15.Be3 Qe7 16.Qb3± putting Black under some positional pressure.]
12...Kh7?! Richard is returning the favour.
[A stronger move was 12...f5! 13.Qb3+ Kh7 14.exf5 gxf5 15.dxe5 dxe5 and the potential play along the g−file might cause White definite problems.]
13.dxe5 dxe5 14.Nc4 Qe7
[A more accurate try was 14...Nxc4 15.Bxc4 Na5 16.Bd3 b6 17.Qe2 Qe7=]
15.a4 Rad8 16.Qe2 In the resulting position with a symmetrical pawn structure White's chances are preferable due to better coordination between the pieces. **16...Nxc4 17.Qxc4 Qf6 18.Bxc6** This ''greedy'' decision changes the favourable course of game.
[It was better to maintain the tension by means of 18.Qe2 a6 19.Bc4 Be6 20.b4± and Black is doomed to a passive defence.]

18...Qxc6 19.Qxc6 Bxc6 20.Bxa7 Rg8! It looks like this strong move was underestimated by Hou Yifan. It turns out that Black is able to push f7−f5 and activate both of his bishops. **21.a5**

[21.Bc5 b6 22.Bb4 f5 23.a5 Bxe4 24.axb6 cxb6 25.Ra7 Rge8 26.c4 Kg8 27.Bc3 Bf6=]

21...f5 22.exf5 gxf5 Now most of Black's pieces are very active. **23.Red1?** White cannot afford such a passive move.

[In the event of 23.Nxe5 Bxe5 24.Rxe5 Rxg2+ 25.Kf1 Rd2 26.Re7+ Kg8 27.Rxc7 Rg6= Black would obtain enough counterplay for a draw, but White had no reason for rejecting it.]

23...Ra8

[Another move which was good enough was 23...Rxd1+! 24.Rxd1 Bf6 25.Ne1 Ra8 26.Bc5 Rxa5∓ achieving a big positional advantage.]

24.Be3 f4 25.Bd2 A sad necessity − this is the only way to avoid a loss of material. **25...Bf6!** Now Black's pieces are dominating over the board.

[Richard correctly rejected 25...e4 26.Ne1 Be5 27.c4! Bxb2 28.Bxf4 Bxa1 29.Rxa1∓ and Black's material advantage doesn't guarantee anything yet.]

26.Ne1 Rg7? This inaccurate move could have spoiled all the advantage!

[The correct way was 26...Bxg2 27.Nxg2 f3 28.Be3 Rxg2+ 29.Kh1 Kg6 30.Rg1 Rxg1+ 31.Kxg1 Kf5∓ and the activity of Black's king might become a decisive factor.]

28...Bxg2+ 29.Nxg2 f3!

[Of course, not 29...Rxg2? 30.Ke2 Bh4 31.Rf1 and White's king is extremely safe.]

30.Be3 e4! The last precise move.

[30...Rxg2 31.Ke1 Kg6 32.Kd2 e4 33.a6 bxa6 34.Rxa6 Rd8+ 35.Kc2 Rxd1 36.Kxd1 Kf7 was also winning, but the text is more convincing.]

Continental Open (6) 17.08.2019
[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Bg5 I've recently analysed for you this line. This time I had a chance to face it on my own. **5...h6** This is much more popular than 5...Be7.

[The aforementioned game saw the immediate 5...Be7 Yu Yangyi (2738)−Vidit,S (2707) Danzhou CHN 2019 [Mikhalevski,V]]

6.Bh4 Be7 It's curious that Sevian played this line as black earlier this year.

[Another way of playing is 6...d6!? Black ignores the pin, but can play .. . g5 at the appropriate moment. Here is a recent example from top level chess: 7.c3 a6 8.Nbd2 Ba7 9.a4 Qe7 10.Qe2 *(10.0−0!?)* 10...Be6 11.b4 Bxc4 12.Nxc4 Qe6 13.Bxf6 Qxf6 14.0−0 0−0 15.b5 Nd8 16.Rfb1 axb5 17.axb5 Ne6 with roughly equal chances in Yu,Y (2736)−Aronian,L (2756) Riga 2019, but the play of both players can be improved.]

7.Nbd2

[7.Bg3 d6 8.a4 is a bit more popular. The point of White's last move is to keep the light−squared bishop. Usually play continues 0−0 9.h3 Be6 10.Bxe6 fxe6 11.Nbd2 Qe8 12.0−0 Nh5 13.Bh2 Qg6 14.c3 Rf7 15.b4 Raf8 16.Kh1 Bg5! 17.Nxg5 Qxg5 and Black was ok in Demchenko,A (2679)−Sevian,S (2647) chess.com INT 2019]

7...d6 8.c3

[8.a4 was tested twice by the Russian GM Demchenko, who is an expert in the line with 5.Bg5.]

8...a6 A useful move, which creates the positional threat of 9...Na5.

[There are a couple of alternatives which are worth considering. 8...Nh5 9.Bg3 Nxg3 10.hxg3 Bf6 *(10...0−0!? 11.a4 Nb8!* preparing ...c6 and transferring the knight to a better square is a good alternative. *)* 11.Nf1 Ne7?! 12.Ne3 c6 13.Bb3⩲ with some edge for White in Gunina,V (2507)−Muzychuk,M (2540) Stary Smokovec 2018]

[I prefer 8...g5!? 9.Bg3 g4! *(*but not *9...Nh5? 10.Nxe5!+−)* 10.Ng1 *(10.Nh4?* runs into *Nxe4!∓)* 10...Nh5 11.Nf1 Nxg3 12.hxg3 Bg5

with a comfortable position for Black.]
9.a4 Nh5 A typical reaction, but not the best.
[In the only preceding game Black played 9...0−0 10.Bg3 Be6 11.Bxe6 fxe6 12.0−0± with some edge for White in Sethuraman,S (2632) − Hirneise,T (2459) Germany 2017]
[Once again Black could go with 9...g5! 10.Bg3 g4 11.Ng1 *(11.Nh4? Nxe4!∓)* 11...d5! This central break yields Black slightly the better chances. 12.exd5 Nxd5 13.h3 gxh3 14.Nxh3 Be6∓ and the knight on h3 is misplaced.]
10.Bg3 After removing the bishop White threatens 11.Nxe5, which explains my next move.
[10.Nxe5? would be a blunder. Nxe5 11.Bxe7 Qxe7 since 12.Qxh5? runs into Bg4−+ and the queen is trapped.]
[10.Bxe7 Qxe7 11.Nf1 Be6 12.Ne3 Bxc4 13.Nxc4 0−0 14.Ne3 Nf6 doesn't look like anything serious for White.]
10...g6!? 11.0−0 0−0 12.b4
[12.Re1!? Kg7 13.Bd5 a5 would be about equal.]
12...Kg7 Black prepares ...f5. **13.Ba2** This turns out to be inaccurate.
[13.h3!? f5 14.Bh2 fxe4 15.dxe4 Bg5 is also good for Black, but still better than the game.]
13...f5! 14.exf5 Nxg3!
[Of course not 14...gxf5? 15.Nxe5! Nxe5 16.Bxe5+ dxe5 17.Qxh5 Qxd3 18.Nc4±]
15.fxg3
[15.f6+ Bxf6 16.hxg3 d5∓]
[15.hxg3 gxf5∓ is also in Black's favour.]
15...gxf5∓ Black is already slightly better thanks to his good control of the centre.
16.Qb3 Samuel is getting his rook into play.
[16.Nc4 Bf6 17.Qe2 Ne7 18.a5∓ looks better.]
16...Bf6! 17.Rae1 White is getting ready for 18.d4. **17...Ne7!∓** A strong move.
18.Qc2 A hidden trap, which prevents my knight from getting to g6.
[Now 18.d4? is bad. e4 19.Nxe4 *(19.Nh4 d5!−+)* 19...fxe4 20.Rxe4 Bf5−+]
18...Qe8!?
[18...a5!? 19.b5 c6∓ also deserved serious attention.]
[18...Ng6? would be a blunder. 19.d4! e4 20.Nxe4! fxe4 21.Qxe4 d5 22.Qd3± leads to a strong attack due to the threat of Bb1.]
19.Nc4 Bd7 A slight inaccuracy.
[19...b5! 20.axb5 axb5 21.Ne3 Qg6∓ retains a clear advantage.]
20.a5 Qh5!? Time to connect rooks.
[Another way to do so is 20...Qg6!?∓]
21.Ne3! Rae8 22.d4?!
[White should have chosen waiting tactics. 22.Qd2!?∓]
22...e4 23.Nd2 Bg5!∓ Once again Black is clearly better. **24.Rf2 f4**
[24...Qg6!? preparing an advance of the h−pawn was strong.]
25.gxf4 Bxf4 26.Ndf1 d5!?
Black creates a protected passed pawn.
[26...Qg5!? 27.g3! *(27.Qxe4?* is bad due to *Ng6! 28.Qd3 Bxh2+! 29.Nxh2 Rxf2 30.Kxf2 Qh4+−+* and Black wins. *)* 27...Bxe3 28.Nxe3 Rxf2 29.Qxf2 Rf8 30.Qe2 Rf3∓ is also better for Black.]
27.c4 An attempt to undermine the centre. **27...c6** The simplest. I just

support the centre with the pawn.

[27...Qg5!? 28.cxd5 Nf5! 29.Nxf5+ Bxf5 30.h4 Qg4 31.Ne3 Qxh4 32.g3 Bxg3 33.Nxf5+ Rxf5 34.Rxf5 Bxe1 35.d6 leads to some complications, although they seem to be in Black's favour too.]

28.b5 White complicates matters in time trouble. **28...axb5!?**

[28...Qg5! seems to be even stronger, as White has no threats on the queenside. 29.cxd5 cxd5 30.h4 *(30.bxa6 bxa6)* 30...Qxh4 31.g3 Qg5! with a decisive edge.]

29.cxb5 Bd6!?

[Once again 29...Qg5!? was possible and after 30.g3 Rf6−+ Black doubles rooks on the f−file.]

30.bxc6 Bxc6!−+ So far so good. Black has achieved a winning position.

31.Ree2 Bb5! 32.Rxf8 Rxf8 33.Rf2 Bd3?!⊕ An inaccuracy in severe time trouble, although Black retains a clear edge.

[33...Bxf1! 34.Nxf1 Rxf2 35.Qxf2 Qd1!−+ was very strong and White would be virtually paralyzed.]

34.Qb2 Rxf2?!

[It wasn't too late to play 34...Bxf1! 35.Nxf1 Rxf2 36.Kxf2 *(36.Qxf2? Qd1!* is still very strong for Black. *)* 36...Qh4+ 37.Ke2 Qg5 38.Ke1 h5∓ with a clear edge thanks to the protected passed pawn in the centre and the better pieces.]

35.Qxf2 Qg5?! A blunder.

[I had to play 35...Bxf1! 36.Kxf1 *(36.Nxf1? Qd1!−+)* 36...Bxh2 37.g3 Qh3+ 38.Qg2 Qxg3 39.Nxd5 Nc6 40.Qxe4 Qg1+ 41.Ke2 Qg6∓ and Black retains some hopes to win.]

36.Ng3?! Fortunately, White was also very short of time.

[Otherwise he would find 36.Bxd5! Nxd5 37.Nf5+ *(* or *37.h4 Qf6 38.Nxd5 Qf7! 39.Qxf7+ Kxf7 40.Nfe3 Bg3* and Black shouldn't have problems to hold thanks to his bishop pair. *)* 37...Kf7 38.Nxd6+ Ke7 39.Nf5+ Kd7±]

36...Kg6! covering both h5 and f5 Black prepares 37...Bf4.

[I had to avoid 36...Bf4? 37.Qxf4!+− That's why 36...Kg6 was needed.]

37.Bb3?!

[37.Ngf1!= was more precise.]

37...Bf4! 38.Ngf1 Bxf1! 39.Nxf1 Nc6? Now the position is equal.

[39...Qf6! was strong, with the idea to target the d4−pawn. 40.h4 Bb8! 41.Ne3 Qxd4 42.Bxd5 Qa1+ 43.Qf1 Qxf1+ 44.Kxf1 Nxd5 45.Nxd5 Bg3∓ yielded Black winning chances.]

40.Bxd5!? Qxd5

[40...Bxh2+ 41.Kxh2 Qh5+ 42.Kg1 Qxd5 43.Qg3+ Kf6 44.Ne3 Qxd4 45.Kh2=]

41.Qxf4 Qxd4+ 42.Ne3 Due to the bad position of his king Black has to force an exchange of queens. **42...Qa1+ 43.Kf2 Qf6 44.Qxf6+** and a draw was agreed in this completely equal knight endgame. The setup which occurred in the game doesn't seem to promise much for White. One of the key ideas for Black in this opening is the ...g7−g5−g4 advance. **½−½**

promise any advantage, which Black proved with some good play.

1.e4 Vallejo Pons **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.Ng5** This is a line which I use from time time and which usually leads to complex positions with a material imbalance which are hard to evaluate. Dies ist ein Abspiel, das ich gelegentlich anwende und das normalerweise zu komplexen, schwer

zu beurteilenden Stellungen mit materiellem Ungleichgewicht führt. Es una línea que he empleado de vez en cuando, y que normalmente lleva a posiciones complejas de difícil evaluación y con desequilibrio material.
4...d5 5.exd5 b5 Not the main move, but fortunately I remembered that Arkadij himself had been faced with this move in the Turin Olympiads. So I had been able to prepare for the move. Nicht der Hauptzug, doch zum Glück erinnerte ich mich, dass Arkadij selbst diesen Zug bei der Olympiade in Turin vorgesetzt bekam, daher konnte ich mich darauf vorbereiten. Esta no es la jugada principal, pero por suerte recordaba que el propio Arkadij se había enfrentado a esta jugada en la Olimpiada de Turín, así que pude prepararme contra ella.
6.Bf1 h6 7.Nxf7! It is important for the black king to remain exposed on the f−file so that White has time to organise his defence. 9...Bxf2+ After thinking for quite a few minutes, Arkadij decided on this piece sacrifice. Presumably it had become clear to him that after all other moves White's position is clearly preferable; so he tried to bet on gaining some practical chances. Nach vielen Minuten Nachdenken entschloss sich Arkadij zu diesem Figurenopfer. Vermutlich wurde ihm klar, dass nach allen anderen Zügen die weiße Stellung klar vorzuziehen ist; deshalb versuchte er, auf praktische Chancen zu setzen. Después de pensar durante muchos minutos Arkadij se decidió por este sacrificio de pieza. Probablemente advirtió que con el resto de jugadas la posición blanca es claramente preferible, así que intentó aprovechar las chances prácticas del sacrificio. **10.Kxf2□** It did not take me long to realise that my next moves were forced if I wanted to survive. Here it gradually dawned on me that I had a lot of advantageous continuations. The problem was that I had to decide upon a single one of them! Nach diesem Zug war mir klar, dass ich nicht forciert matt werden würde, was ich als Teilerfolg erachtete. Hier sah ich allmählich, dass ich viele vorteilhafte Fortsetzungen hatte; das Problem liegt darin, dass man sich für eine einzige entscheiden muss! Después de esta jugada, ya tenía claro que no iba a recibir mate forzado, lo cual ya me parecía un pequeño éxito. Aquí empecé a ver que tenía muchas opciones ventajosas, el problema es que había que decidirse sólo por una!

23.hxg5 g6 24.Bf3 I was no longer interested in tactical adventures, so because of the great material advantage I decided to simplify the position. The remaining moves were played out simply because we did not have all that much time left on our clocks. Der Rest wurde einfach deshalb gespielt, weil wir auf unseren Uhren nicht mehr allzu viel Zeit hatten. Alapin was the founder of a fair amount of modern chess theory, including the Alapin Opening 1 e4 e5 2 Ne2, which has more−or−less vanished from tournament play (even 2 Qh5!? enjoys grandmaster support in 2005), while 1 e4 c5 2 c3 is usually unfairly referred to as the c3−Sicilian, when again it should carry his name. To that end **7.Qb3** is the most usual continuation here, though White has tried other moves as well:

8...Bb6 '!' The most testing move, planning ...Na5 to remove the dangerous light−squared bishop.

9...Na5 The only consistent move.

[Instead 9...dxe5 10.Ba3 transposes to Grosar−Gross]

13...d5 In this game, Black hits onto the right plan, although I prefer opening the centre one move earlier, as indicated in the previous game. **14.exd5 Bxd5 15.Nh4 Rad8 16.Nhf5 Kh8**
A mysterious move, whi9ch was also played by Anand in a blitz game (see below).
[16...Bc5!? As indicated by one of the participants to the webinar, transferring the bishop back to f8 would have consolidated the king's residence. After the game move, we have a familiar position with strong minor piece pressure against the black kingside. The difference is that White has given up space in the centre and does not have a pawn on e4. In order to start the attack, he needs to clear the diagonal for his bishop on c2, which offers Black

some chances in the centre, though.]

17.d4!? exd4

[17...e4? 18.Ne3 endangers the pawn on e4 and Black's bishop. The immediate threat is c3−c4. b5 19.Nh5 Nxh5 *(19...Ng8 20.Nxd5 Qxd5 21.Qg4+−* wins the pawn on e4. *)* 20.Qxh5 Qe6 21.Nxd5 Rxd5 22.Qh4 Black loses either the far advanced pawn or the exchange after f5 23.Bb3+−]

18.Nxg7 There is no way back for White. Black has a difficult choice now.

18...Kxg7?

[18...Rxe1+! would have been better, in order to reduce White's control over the e−file and deviate the queen from the attacking path. 19.Qxe1 Kxg7? Still a mistake. Black should have used his central activity. *(19...d3! 20.Bxd3 Bxg2 21.Kxg2 Qxd3 22.N7f5 Qd5+; 19...Bxg2! 20.Kxg2 Qd5+ 21.Kf1 Qb5+ 22.Kg2 Qd5+ 23.Kf1 d3 24.Bb3 d2 25.Bxd5 dxe1Q+ 26.Kxe1 Rxd5 27.N7f5 Ne4=* with balanced chances in each case. *)* 20.Bxh6+ Kh8 *(20...Kxh6? 21.Qd2+ Kg7 22.Nf5+)* 21.Qd2 Rg8 22.Qf4 Qd6 23.Qh4 Qxg3 24.fxg3 1−0 Giri,A (2773)−Anand,V (2804) Stavanger (blitz) 2015]

19.Bxh6+! Not only an attacking move but also a fast way of developing. This is a first example in which White starts an attack with incomplete development. However, the bishop on c1 is active anyway. The only problem is the rook on a1, solved by the last and next moves.

This is that kind of games, that leaves you with strange feelings. Both of us spend a lot of time in the first part of the

game, but when I came to my room, after the game, and started to look at it, I didn't write too much variations. Obviously, I had a question: "What was I thinking about?". The problem of this game, that all variations what you have to calculate, have no concrete assesement, most often it's "compensation", "initiative", "no compensation"... And you have to choose between positions with different "compensations" and "initiatives". Even now, I still don't sure, what is right, and what is wrong. 12.b3!? Mikhalevski,V: 'Mamedov wants to play on, which is a risky decision. Objectively the position is equal and he had to accept a repetition.' This is a really fresh position which has occurred only twice in practice, but in both games White tried the typical development with b3−♗b2.

[The only drawback to this line is White can force a repetition now if he wants with 12.Ng5 Qf6 13.Ne4 Qe6=]

[12.Nbc3 is another natural option, which also leads to a complex game: Nf4! *(*More precise than *12...g6 13.Qf3 f5 14.Nxd5! cxd5 15.Nc3 e4 16.Bb5+ Kf7! 17.Qe3 Bb7 18.Ne2 Bg7∞* although Black's centre and development seem very promising here as well. *)* 13.Qf3 Be7 I like this position for Black as he just keeps developing and seizing space in the centre with normal moves, while White couldn't make use of h2−h4 and still faces problems to bring the pieces into play. These illustrative lines provide a good example of that: 14.Ng3! The best solution to improve the bishop. *(14.Bf1?* is usually good to prepare both d3 and g3, but after *f5! 15.Ng3* White has some problems. *0−0 16.d3 Rb8!* This simple move makes White's development harder by keeping b2 under pressure. *17.Nge2 Nd5! 18.a3 Bf6∓* and White has serious problems in development.*; 14.b3* helps White to develop the pieces, but Black should fine as well: *f5 15.Ng3 0−0 16.Bb2 e4! 17.Qxf4 exd3+ 18.Qe3 dxc2 19.Qxe6+ Bxe6 20.Rc1 c5! 21.Rxc2 f4 22.Nge4 c4 23.bxc4 Nxc4∓* with good initiative for the pawn. *)* 14...Nxd3+ *(14...g6?* is bad due to *15.h5!±)* 15.Qxd3 0−0 Again, Black has the bishop pair, faster development and the idea of advancing the pawns in the centre. White should still finish the development and the h−pawn has turned into a target. Black is at least fine, as show the following variations: 16.b3 Rd8 17.Qe3 *(17.Qe2* gives extra options for Black, for example: *c5!↑)* 17...c5 Black is not rushing, instead preparing to continue activating his forces. 18.Ba3!? *(18.0−0 Nc6!* looks good for Black, with multiple threats. *)* 18...Rd4 19.Nge2 *(*Increasing the pressure on c5 with *19.Nce4* is not effective due to *f5! 20.Nxc5 Qd5* and White has

Qf6 24.0−0 f4 25.Qe4 Bf5 26.Qc4+ Kh7 27.Ne4! Qh4!∞ The position remains complex. Black is two pawns down but should regain at least one, and still has some chances on the kingside. These variations are by no means forced and can be improved, but they give a good idea of how rich is the position and full of ideas for both sides.]

12...g6 Mikhalevski,V: 'This way Grandelius forces the queen away from an active position.' **13.Qe2?** Mikhalevski, V: '!?' White's idea is to induce ♘f4, but this turns out to be a risky plan. 10...Bg7 11.a4!? Positionally well−grounded continuation. Advancing his

corner pawn White intends to restrict Black's possibilities on the Q−side and to conquer more space, − the plan, which is known as quite effective in some other variations of Giocco Pianissimo. Yet, Akopian, who would be satisfied with a draw in this game, finds an antidote against the threatening increase of White's initiative.

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d4 A very old Gambit, which has been employed for the first time in 1853! White sacrifices a pawn in order to exploit his better development. **5...Bxd4!** In my opinion the most principled response to White's aggressive approach.

[5...exd4 6.e5 d5 leads to Max Lange Attack , which is more complicated choice to compare with 5...Bxd4]

6.Nxd4 Nxd4 7.f4 White plays very energetically − he tries to open new files and diagonals.

[The most popular alternative is 7.Bg5 but you can hardly see this move in the games of strong players. Black's best reaction is h6 8.Bh4 Qe7 *(* The natural *8...g5?!* runs into the unexpected *9.f4!* with dangerous initiative. *)* 9.Nc3 *(9.f4* is easily refuted by means of *Qc5! 10.fxe5 Nf3+ 11.Kh1 Nxh4 12.exf6 Qxc4 13.Na3 Qc5 14.Qe1 g5−+* with winning advantage Bergez,L (2344)−Taylor,W (1993) Castell de Sant Ferran 2016 *)* 9...g5 10.Bg3 d6 11.f4 Thematic tactical idea c6 *(11...gxf4 12.Bh4* looks a bit annoying. *)* 12.fxe5 dxe5 and it seems Black has solid pawn up Noble,R−Graham,S (2243) ICCF email 2010]

7...d6 8.fxe5

[I would to mention also 8.c3 Nc6 9.f5 that has been played quite a lot. Ne7! The right plan. Black should prepare the d6−d5 break in the center. 10.Qf3 d5!? *(* There is nothing wrong with *10...c6)* 11.exd5 Qd6 *(11...Bxf5 12.Bg5* gives White some play. *)* 12.Bb5+ c6 13.Ba4 *(13.dxc6? 8...dxe5 9.Bg5 White's main idea in this line. The pin along h4−d8 diagonal looks very annoying. However Black can easily handle this situation and prepare castle queenside. **9...Qe7!**
I would suugest not to rush with 9...Be6 as in many cases we can play Bd7.
10.Na3 The most challenging move, the rest is too easy for Black

[10.c3 Ne6 11.Bxf6

A) 11...Qc5+ 12.Kh1 Qxc4 13.Bxe5 Qxe4 14.Bxc7

B) 11...gxf6 Black can even simplify by means of 12.Na3 Nf4 Black has a great game as in the following example 13.Kh1 h5 14.Qf3 Bg4 15.Qf2 h4 and Black was just better in Lipecki,A−Gabris, V (2343) ICCF email 2010]

10...Bd7 Black naturally prepares the queenside caslte.

[Surprisingly, 10...Rg8 has been fashionable recently, where Black anticipates capture on f6 and prepares to fight for the open g−file. However, I would prefer the more natural approach with 10...Bd7]

11.Qe1 Probably White's best continuation here.

[White's main alternative 11.c3 leads to a fantastic game for Black. Ne6 12.Bxf6 gxf6 13.Qf3 Nf4! Now 14.g3 Nh3+ 15.Kh1 has been played twice, but I found a very powerful novelty h5!N It transpires that not only White can attack in this variation. The approximate line here would be 16.Qxf6 Qxf6 17.Rxf6 h4! and Black's initiative on the kingside looks very powerful.]

11...Ne6 12.Bxf6

[Most probably 12.Bh4 which occurred only once in Nogal,J (2315)−Bucsa,I (2085) ICCF email 2010 can be an improvement for White. Here I would recommend the following idea h6!?N with idea to get rid of annoying pin by means of 13... Ng5]

12...gxf6 13.Qe3

[Worse is 13.Qf2 Nf4 14.Kh1 f5!? *(14...h5* also looks strong with the following idea: *15.g3 Nh3 16.Qxf6 Qxf6 17.Rxf6 h4→* and Black has nice initiative on the kingside. *)* 15.exf5 Li,R (2446)−Banawa,J (2359) Saint Louis 2015 Now surprising a6! covering b5−square and preparing Bc6 at the same time would have been extremely strong. It's hard to imagine what White can do to prevent Black's initiative.]

Erbil 119/99		2013

[Sulskis,Sarunas]

Uncharted Chess Territory A New International Chess Experience in Iraq! Despite my profound curiosity about the environment in which we live − planet Earth − the first time a Syrian friend invited me to come to Iraq to take part in an international tournament in Erbil, I chickened out. Erbil lies in the north of Iraq and is effectively the capital of the autonomous region of Kurdistan. A year flew by since my initial refusal but then my faithful friend invited me again to Erbil, this time to the 2nd International Kurdistan Chess Festival. He suggested that I should inspect the website of the event, read the feedback of those European players who had played in the 1st tournament and be assured it was absolutely safe in that part of Iraq. I promptly took up his suggestion, whilst also spending some time on an enticing read of the heritage of the remarkable Erbil. After this I could no longer resist going to Iraq. Having completed all my games in the Festival, as well as my ten day stay in Iraq, I could only regret the timid decision I had made the previous year. The Kurdish hospitality was amazing and the Festival organization excellent. Despite the obvious international flavor, the playing hall was not overcrowded. There were 71 players, male and female, competing together in a Swiss−system tournament of 9 rounds. But perhaps I should point out the one drawback of the Festival, for the second year in a row the tournament wasnâ □t Elo−rated due to unresolved questions between organisers and Iraqi Chess Federation. I am not going to elaborate on a subject which, in my view, goes beyond the boundaries of chess, but chesswise I feel deeply sorry for all those young Iraqi players whose title norm aspirations were dashed. The Elo favourite, Sergei Tiviakov from the Netherlands, affirmed his strong grandmaster status by starting with five consecutive wins. **1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 a6 6.Bb3 Ba7 7.h3 d5**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.0−0 0−0 6.Nbd2 John Emms: 'Just like Radjabov, Smirin chooses an anti−d5 move−order.' **6...d6**

John Emms: 'Pelletier doesn't bite and returns to the main lines.'

[6...d5 is covered in Radjabov−Bacrot.]

7.c3 a6 8.Bb3 Ba7 9.h3 Be6 John Emms: 'This remains a solid option for Black, especially when White has committed to an early Nbd2.'

[9...h6 10.Re1 Be6]

10.Bc2

[10.Re1 remains the most played move, but the straightforward Bxb3! has proved to be okay for Black − see the notes to Svetushkin−Haslinger in the book. A more recent example: 11.Qxb3 Qd7 12.Nf1 *(12.Qxb7?? loses to the queen to Rfb8)* 12...h6 13.Be3 Rfe8 14.Bxa7 Rxa7 15.Ng3 Qe6 16.Qc2 d5 17.d4 Raa8 18.dxe5 Nxe5 19.Nd4 Qb6 20.Rad1 1/2−1/2, O.Korneev−R.Swinkels, Torres Vedras 2011.]

10...h6 John Emms: 'Black probably doesn't need to play 10....h6 with this move order.'

[He can probably go right ahead with 10...d5 and there are certainly situations where Black benefits from not having spent a move on ...h6. For example, 11.exd5 *(11.Re1 dxe4 12.dxe4 Nh5!* is fine for Black − see Svetushkin−Haslinger in the book*;* or after *11.Ng5* it's unclear whether White wants to even take on e6 *)* 11...Bxd5 12.Re1 Re8 13.Nf1 and now instead of 13...h6, which transposes to our main game, Black can equalise with e4! (R. Strohhaeker−T.Hirneise, Prievidza 2008) 14.dxe4 Bxe4]

11.Re1 Re8 John Emms: 'is another commonly played move order.' **12.Nf1 d5 13.exd5** John Emms: '!?' '!?' John Emms: 'This pawn capture is often far less innocuous than it looks.'

[The main alternative is keeping the tension with 13.Qe2 − see Areshchenko−Aleksandrov in the book.]

13...Bxd5 John Emms: 'Alternatively:'

[a) 13...Nxd5 14.Ng3 Qd6 15.Nh4 Rad8 16.Qf3 Qf8 17.Nh5!? Rd6 18.Bxh6!? *(18.d4!?)* 18...gxh6 19.d4 Kh8 20.dxe5 Rdd8 21.Rad1 and White has a very strong attack for the piece, B.Predojevic−R.Hess, Moscow 2011. This is an example example of the attacking potential hidden in White's position.]

[b) 13...Qxd5 looks solid: 14.Ng3 Rad8 15.Bd2 *(15.Be3 Bxe3 16.Rxe3* is equal, D. Fitzsimons−S. Collins, Dublin 2011. *)* 15...Qd6 *(* or *15...Bc5!?* planning ... Bf8 *)* 16.Qe2 with an equal position in A. Areshchenko−F.Holzke, Dresden 2007, although not for long: Bxh3? 17.gxh3 e4 18.Nf5! exf3 19.Qxe8+ Nxe8 20.Nxd6 Nxd6 21.d4 and White won.]

14.Ng3 Qd7 15.Nh4 John Emms: '!?' '!?' John Emms: 'Smirin gets going with his knights on the kingside. As soon as one of the knights reaches f5, Black always has to be wary of possible sacrifices on g7 or h6.'

[15.Be3 is also tricky, but okay for Black if he plays accurately: Bxe3 16.Rxe3 Rad8! *(16...Re7?! 17.Nh4! Be6 18.Nh5! Nxh5 19.Qxh5 Qd6 20.Rg3! Kf8 21.Re1* and suddenly White has drummed up a fierce attack from seemingly nowhere. H. Hamdouchi−P.Van Hoolandt, Nice 2002, concluded *Bd7 22.Ree3 e4 23.dxe4 Qd2 24.Bb3 Qxb2 25.Ref3 Ne5 26.Ng6+ Nxg6 27.Qxg6* and 1−0 *)* 17.Qe2 Bxf3 18.Qxf3 Nd5 19.Ree1 Re6 20.Rad1 with a roughly level position, J.Degraeve−J. Votava, Erfurt 2009.]

15...Rad8

[Black should also consider preventing Nf5 with 15...Be6 . After 16.Qf3 Qd5 17.Ne4 *(17.Qe2)* 17...Nxe4 18.Rxe4 *(18.dxe4!?)* 18...Qd7 Black was okay in Z.Nagy−E.Csom, Budapest 1998.]

16.Nhf5 Ne7 John Emms: '!?' '!?' John Emms: 'Pelletier decides to gambit his e5−pawn, Marshall Attack−style, in order to get rid of the knight on f5.'

[If Black ignores the attack then White could certainly think about a sac on h6 or g7. For example, 16...b5 17.Bxh6!? gxh6 18.Qd2 Re6 19.d4 Nh7 20.Nxh6+ Kh8 21.Ng4 with a dangerous attack for White, similar to the one in Predojevic−Hess, above, in A.Olsson−A. Ornstein,

Sweden 2006. The game concluded Rg8 22.dxe5 Rxg4 23.hxg4 Nxe5 24.Bf5 Qd6 25.Nh5 Nc4 26.Rxe6 fxe6 27.Qh6 Qe7 28.Bxh7 Qxh7 29.Qf8+ Qg8 30.Qf6+ Kh7 31.g5 1−0.]

[In view of these problems for Black, I suggest rushing the bishop back to the kingside with 16...Bc5! preparing ...Bf8. In many cases the defensive bishop on f8 is stronger than the superficially active one on a7.]

17.Rxe5 John Emms: '!' '!' John Emms: 'Smirin accepts the challenge, and the evidence suggests that this was the right decision.' **17...Nxf5 18.Rxf5 Qc6 19.d4!** John Emms: 'It's more important to block out Black's dark−squared bishop − a key strategic goal for White in the Italian Game − than it is to defend the g2−pawn. In fact I'm being too simplistic − the truth is that White has got time to play d3−d4 because the g2−pawn is mined, as we see next move.' Ignoring the threat to the g2−pawn. Ignoriert die Bedrohung des Bauern g2.

[The passive Das passive 19.Qf1 is not necessary ist nicht nötig.]

19...Bxg2 John Emms: '?' '?' John Emms: 'This isn't Black's best move, but if he doesn't take this pawn he still has to justify his pawn sacrifice.' Not good, but it's not easy for Black to justify his pawn deficit anyway. Nicht gut, aber es fällt auch sonst Schwarz nicht leicht, sein Bauerndefizit zu rechtfertigen.

[For example Zum Beispiel 19...g6 20.Rxd5!? Nxd5 21.Bxh6 , with two pawns for the exchange and light−squared superiority. , mit zwei Bauern für die Figur und weißfeldriger Überlegenheit.]

[For example, 19...Rd6 20.Kh2! and now Bxg2 *(20...Rde6!* is best, with some compensation *)* 21.f3! traps the bishop.]

20.Rxf6! John Emms: 'If it wasn't for this shot, White would be in some trouble. As it is, he gains two pieces for a rook, and a clear advantage.' Leaving Black with the unpleasant choice to either allow a weakening of the kingside or abandon the ♗g2. 11.Nh4 Typical response, before Black is in time with Ng6. Black has freed himself in the center and has soundly placed pieces, but with the semi−open f−file and pressure along the a2−g8 diagonal, White has some potential for the kingside initiative. Dies ist eine sehr komplizierte Bauernstruktur. Schwarz hat sich im Zentrum befreit und verfügt über gut platzierte Figuren, aber mit der halboffenen f−Linie und Druck entlang der Diagonale a2−g8 hat Weiß ein gewisses Potenzial für die Initiative am Königsflügel. **13.Qf3 Nb6 14.e4 Qd6** Both sides playing sensible moves here. Beide Seiten spielen hier vernünftige Züge. **15.Qe2 Bg4 16.Nhf3 Rad8 17.h3 Bh5** Interesting idea, inviting g4, which could also backfire. Interessante Idee, die zu g4 einlädt, was aber auch nach hinten losgehen könnte. **18.g4** It is always hard to tell, whether this weakening is worth shutting down the h5 bishop. Often the situation is dynamically balanced and the side that plays better is proven right. The stakes are high. Es ist immer schwer zu sagen, ob diese Schwächung es wert ist, den Läufer auf h5 auszuschalten. Oft ist die Situation dynamisch ausgeglichen und die Seite, die besser spielt, hat Recht. Die Einsätze sind hoch.

[18.Qe3!? Less commital way was very possible as well. Auch ein weniger verpflichtender Weg war durchaus möglich.]

18...Bg6 19.Rfd1 Nfd7 Vidit starts shuffling. Vidit beginnt zu manövrieren. **20.Bb3 Nc5 21.Nc4 Qf6 22.Ba2 Rfe8** The tension is very high in the position and now Sindarov goes wrong. Die Spannung in der Stellung ist sehr hoch, und jetzt greift Sindarov daneben. **23.Kg2?** The king ends up vulnerable to tactical ideas here. White had to calculate the variations precisely at this point, as this mistake basically costs him the game already. I told you the stakes were high. Der König wird hier anfällig für taktische Ideen. Weiß muss an dieser Stelle die Varianten genau berechnen, denn dieser Fehler kostet ihn im Grunde schon die Partie. Ich sagte ja, dass die Einsätze hoch sind.

[23.Rd2!? This somewhat consolidating move would keep the dynamic balance. Now in the same variation down the road, the tactics no longer win for Black. Dieser etwas konsolidierende Zug würde das dynamische Gleichgewicht erhalten. Jetzt, in der gleichen Variante, gewinnt Schwarz mit dieser Taktik nicht mehr. Nbxa4 24.h4 Qf4 25.Ncxe5 Rxe5 26.Nxe5 Qxe5 27.h5 Now Black has enough for equality after 27...Bxe4! but no more. The game continuation of 27...Rxd3 is no longer possible, as Bxe4 later does not come with check. Jetzt hat Schwarz nach 27...Lxe4! genug für Ausgleich, aber nicht mehr. Die

Partiefortsetzung 27...Txd3 ist nicht mehr möglich, da Lxe4 später nicht mit Schach kommt. Bxe4 28.dxe4 Qg3+ and the mess continues, but the assesment is that of a dynamic equality, apparently. und das Chaos geht weiter, aber die Bewertung ist die eines dynamischen Gleichgewichts, wie es scheint.]

23...Nbxa4! Vidit is going for it, having calculated it all precisely. Vidit geht darauf ein, er hat alles genau berechnet. **24.h4** Forcing Black's hand. Zwingt Schwarz zum Handeln. **24...Qf4! 25.Ncxe5 Rxe5 26.Nxe5 Qxe5 27.h5** Probably Sindarov had seen this far, but missed the final touch. Wahrscheinlich hatte Sindarov so weit gesehen, aber den letzten Schliff verpasst. **27...Rxd3!** Neat tactic that is a lot easier to calculate from upclose than from a far. There are many things that Sindarov could have missed − 28.Rxd3 Nxd3! threatens Nf4+, while 28.hxg6 Qg3+ 29. Kh2 Qh3+! (though hxg6 is also better for Black) 30.Qh2 Qf3+! wins on the spot as well. Eine raffinierte Taktik, die aus der Nähe viel einfacher zu berechnen ist als aus der Ferne. Es gibt viele Dinge, die Sindarov übersehen haben könnte − 28.Txd3 Sxd3! droht Sf4+, während 28. hxg6 Dg3+ 29.Kh2 Dh3+! (obwohl hxg6 auch besser für Schwarz ist) 30.Dh2 Df3+! ebenfalls auf der Stelle gewinnt. **28.Bxf7+** This is already desperate. The rest of the game is frankly just conversion, as essentialy the result is already decided. Black is just up material. Das ist schon verzweifelt. Der Rest der Partie ist offen gesagt nur noch Umstellung, da das Ergebnis im Grunde schon feststeht. Schwarz hat nur noch Material.

[28.Rxd3 Nxd3!]

[28.hxg6 Qg3+ 29.Kh1 Qh3+ 30.Qh2 Qf3+!]

28...Kf8!? The strongest, though not the only way at this point. Das ist der stärkste, aber nicht der einzige Weg zu diesem Zeitpunkt. **29.Rxd3 Nxd3 30.Qe3 Qxe4+** Vidit chooses the most secure way to bring the point home. The game drags on, but the result is never in doubt. Vidit wählt den sichersten Weg, um den Punkt nach Hause zu bringen. Das Spiel zieht sich in die Länge, aber das Ergebnis steht nie in Frage. **31.Qxe4 Bxe4+ 32.Kg3 Kxf7 33.Rxa4 Bc6 34.Rxa5 Nxb2** It is not even close, though Sindarov does fight and makes it look closer than you would expect. Es ist nicht einmal eng, obwohl Sindarov kämpft und es enger aussehen lässt, als man erwarten würde. **35.Rf5+ Ke7 36.Re5+ Kf7 37.Rf5+ Kg8 38.Re5 Na4 39.c4 Nb6 40.g5 Kf7 41.Rf5+ Ke7 42.Re5+ Kd8 43.Rf5 Ke7 44.Re5+ Kd6 45.Rf5 Ke6 46.Rf8 Nxc4 47.Rh8 Nd6** White has been very persistent in trying to drum up some counterplay and so here Vidit decides to give in a little bit and give up one of the kingside pawns, correctly judging that this is the cleanest way to win, as his own passers are way more effective. Weiß hat sehr hartnäckig versucht, Gegenspiel zu entwickeln, und so beschließt Vidit hier, ein wenig nachzugeben und einen der Bauern am Königsflügel aufzugeben, da er richtig einschätzt, dass dies der sauberste Weg zum Sieg ist, da seine eigenen Freibauern viel effektiver sind. **48.Rxh7 Be4 49.g6 b5 50.Kf4 b4 51.Rh8 b3**

52.Rb8 Bd5 53.Ke3 b2 The final touch, hinting at the knight fork. Der letzte Schliff, spielt an auf die Springergabel.
54.h6 gxh6 55.Kd4 Nf5+ 56.Kc5 c6 57.Rxb2 Kf6 It took a long time, but the win was never in doubt and the final position is still winning for Black with a massive margin. Es dauerte lange, aber der Sieg war nie in Frage gestellt und die Endstellung ist immer noch mit großem Vorsprung für Schwarz gewonnen.

Altenkirchen 115/101		2012

[Tiviakov,Sergei]

1.e4 The traditional Rheinland−Pfalz open, held regularly in Altenkirchen is one of the most difficult tournament I have ever played in. Strong opposition and 2 rounds each day (each round can last for more than 5 hours) require very good concentration and excellent physical form not only to survive but also to show a good result. I would like to annotate for the readers of CBM 2 of my games from the most difficult day of the tournament, when I had to play 10,5 hours (with only a short break of 40 minutes to have lunch between the games). My opponent in the morning round was a talented Albanian player, living in Italy. Although no longer a chess professional, I remember him very well from Italian tournaments. He is a very tough opponent to crack with either colour. **1...e5 2.Nf3 Nc6 3.Bc4** I chose the Italian Game as frequently as the Ruy Lopez. The Italian Game is an excellent opening, you don't have to prepare much. Whoever plays better, wins. :−) **3...Nf6 4.d3 Be7** A little more passive system than the one with the development of the bishop to c5, but still very solid. It is not so easy to get any advantage after it either. **5.c3**

[5.0−0 0−0 6.Re1 d6 7.a4 is another very popular line, I have played it only once before.]

5...0−0

[5...d5 6.exd5 Nxd5 7.Qb3 is very sharp, but White should be better.]

6.Bb3 d6

[6...d5 is an alternative to the text.]

7.0−0 h6 Nowadays it is not the most popular continuation. 7...♘a5 8.♗c2 c5 is the one that being played most.

8.Be3!?

[I like this move played by me for the 3rd time. Although objectively, it is not the strongest move in the position, it is moving away from all theoretical lines. 8.h3 is considered to be the strongest move, giving White a small plus after Nh7 9.d4 Ng5 *(9...Bf6)* 10.Nxg5 Bxg5 11.f4± although I believe that White has too little here, and since it is the main line, Black usually is well−prepared against it. Besides, it has another drawback − 2 pair of pieces are exchanged, thus making it more difficult to keep up the pressure.]

[8.Nbd2]

[and 8.Re1 are another popular lines, although it is not clear how White can get advantage after both of them.]

8...d5!

[8...d5 is the most natural and the strongest continuation. The point is that the bishop on e3 is blocking the e−file preventing the attack on the e5−pawn. 8...Ng4 is a good altenative to the text which also should equalise. 9.Nbd2 *(9.Bc1)* 9...Nxe3 *(9...Nb8* is too artificial. 1.e4 Marin **1...e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 h6 5.0−0 d6 6.a3 g6 7.b4**

A slightly extravagant plan. Developing the bishop in fianchetto has never been a popular method in the open games. The obvious reason is that its activity will be restricted by the well defended e5−pawn. Moreover, the advantage of space achieved on the queen side can easily degenerate in weaknesses on light squares. **7...Bd7!?** I expected this line and found a small improvement over Delchev's previous game. Instead of preventing the slightly disturbing threat b5 by physical means, Black inhibits it in indirect way.

[7...a6 8.Bb2 Bg7 9.Nbd2 0−0 10.Re1 Nh5 *(10...Bd7)* 11.Bd5 Bd7 12.d4 with some initiative in the centre, 1−0 Delchev,A (2597)−Payen,A (2384)/Cappelle la Grande FRA 2005/ TWIC 536 (35)]

8.Bb2

[8.b5?! Na5 wins the pair of bishops for Black.]

8...Bg7 9.Nbd2 0−0 10.d4?!

Played at this stage of the game, this move is quite risky. The main problem is that White has invested considerable amount of time in pawn moves, while Black has developed in rather efficient way. Such an early confrontation of forces obviously favours the better developed side.

[10.Re1 was better.]

10...exd4 11.Nxd4 Re8 12.Re1 Qe7?!

Offering White an essential tempo to consolidate.

[Immediately after the game, GM Mihai Suba asked me whether 12...Ng4 wouldn't be just winning. We sat down to analyze and couldn't find a satisfactory continuation for White. Here is the fruit of our analysis, lightly edited with the help of the computer. 13.Nxc6 *(13.N2f3 Nce5 14.Be2 Nxf2 15.Kxf2 c5* or simply 14...Qf6. *)* 13...Qh4 14.Bxg7 Qxh2+ 15.Kf1 Qh1+ 16.Ke2 Qxg2 17.Bxh6 *(17.Bd4 Nxf2!−+; 17.Nd4 Kxg7 18.Rf1 Rxe4+ 19.Kd3 Qxf2!?∓)* 17...Nxf2 18.Qc1 Bg4+ 19.Ke3 Qg3+ 20.Kd4 bxc6 21.Bd3 Qe5+ 22.Ke3 c5 23.Rg1 Qd4+ 24.Kf4 f5⟶]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d3 Bc5 5.c3 d6 6.Bg5 This move, which was introduced by Staunton in London 1851(!) is a rather rare guest in modern tournament practice. Probably White based his preparation on a recent game of Aronian, who beat Michael Adams with it in London 2016.

[Earlier we considered four more popular alternatives 6.b4 in Caruana,F (2811)−Anand,V (2797)/Baden Baden GER 2015/[Mikhalevski,V]]

6...h6 The most natural reaction.

[Please review the stem game, which was played over 165 years ago. 7.Bh4 g5 The main line. This move was introduced in Staunton's time back in 1853(!). I'm not sure who was the first to do it: the Russian maestro Urusov or the English player Simons. You can find both games below.

[The aforementioned game saw 7...a6 8.Nbd2 Ba7 9.Bb3 Qe7 10.Nc4 Be6 11.Ne3 g5 12.Bg3 0−0−0 13.Ba4 Nb8 and although Black had a good position he eventually lost in Aronian,L (2785)−Adams,M (2748)/London ENG 2016.]

8.Bg3 0−0 A pretty rare option, although I'm not really surprised seeing this move, as my engine puts it in the first place.

[Those two old games featured 8...Bb6 9.Nbd2 Bg4 10.h3 Bh5 11.Nf1 Ne7 12.Ne3 c6 13.Qe2 a5 14.Bh2 a4 15.g4 Bg6 16.a3 Bc7 17.Ba2 b5 18.0−0−0 Qd7 19.Nf5± and so on. Boden,S−Simons,A/London 1853.]

[and 8...a6 9.b4 Ba7 10.a4 Ne7 11.Qb3 Rh7 12.Nbd2 Ng6 13.d4 g4 14.Nh4 Nxh4? *(14...exd4!* was necessary. *)* 15.Bxh4 exd4 16.e5! dxc3 17.Ne4+− Shumov,J−Urusov,D/Russia 1853.]

9.Nbd2

[9.h4 doesn't look dangerous as after g4 10.Nh2 Black can continue slowly a6 11.Nd2 Kg7 with roughly equal chances.]

[It's interesting to start with 9.b4!? Bb6 and only then 10.Nbd2 trying to gain a tempo by means of Nc4.]

9...a6! Black immediately retreats the bishop to a7.

[9...Kg7 was also tested by Black, but it allows 10.b4 , which is not big deal, but if one can retreat the bishop safely to a7 why not to do it right away. *(* After *10.Qe2 a6!* Black was ok in Yankovsky,R (2455)−Khachiyan,M (2502)/Monterey Park 2013. *)*]

10.a4 A novelty. This idea is rather typical for the modern Italian. White takes some space on the queenside and secures the position of his light−squared bishop.

[A preceding game saw 10.a3 Ba7 11.Qc2 Nh5 12.0−0−0 Kg7 13.Nf1 f5 14.exf5 Bxf5∓ and Black was better in Farago,S (2256) −Lyell,M (2313)/ Budapest 2015.]

10...Ba7!? Ding Liren decides to move the bishop away from a possible attack from one of the white pawns.

[10...Nh5!? was also possible since 11.Nxe5?! runs into Nxg3 12.Nxc6? *(12.hxg3! dxe5 13.Rxh6 g4!* looks fine for Black too. *)* 12...Bxf2+! 13.Kxf2 Nxh1+ and Black wins an exchange.]

11.0−0 White has to finish his development.

[11.Nf1 can be answered by Be6! 12.Bxe6 fxe6 and Black covers the f5−weakness and obtains a good position.]

11...Nh7 Black is planning on playing 12...h5.

[Now 11...Nh5? would be a mistake due to 12.Nxe5 Nxg3 13.Nxc6± and White wins a pawn.]

12.h3!? Prophylaxis. **12...Kh8**

The Chinese GM moves the king away from the a2−g8 diagonal and the g−file in order to create an option of playing ... f5.

[The immediate 12...h5 was a good alternative. For example, 13.Kh1 *(13.d4!?* sacrificing a pawn and hoping to fight for the initiative doesn't reach its goal because of *g4! 14.Bh4 Qd7)* 13...Qf6 14.Ng1 g4 with a promising position for Black.]

13.d4! A timely counterattack in the centre. **13...g4** Black chooses an aggressive continuation, which might be slightly inaccurate.

[13...exd4!? 14.cxd4 Nxd4 15.Nxd4 Bxd4 16.Nf3 Bxb2 17.Rb1 Bg7 18.Re1 leads to compensation for two sacrificed pawns. Nevertheless, Back could play like this.]

14.hxg4 Bxg4 Black's main problem is his damaged pawn structure. On the other hand White should survive Black's attack on the kingside. **15.Be2!?** It makes a lot of sense to unpin the f3−knight and create a threat of 16.dxe5.

[However, the immediate 15.dxe5!? trading more pieces, deserved serious attention. Nxe5 16.Be2 Nxf3+ 17.Nxf3±]

15...Rg8! A clever defence against 16. dxe5. **16.Kh1!** White has to move from the a7−g1 diagonal in order to renew the threat of 17. dxe5.

[The latter 16.dxe5 doesn't work in view of Bxf3 17.Nxf3 Rxg3−+ , which explains White's next move.]

16...Qf6 Black protects the e5−pawn. **17.d5?!** The first step in the wrong direction. White releases the pressure in the centre and opens the a7−g1 diagonal for the black dark−squared bishop.

[White should have played 17.dxe5! dxe5 18.Nh4! offering a favourable exchange of the light−squared bishops, as it weakens the f5−square. Be6! 19.Qe1! This way White has been preparing 20.Bc4, ready to meet 20...Rg4 with 21.f3. *(* The immediate *19.Bc4* is strongly met by *Rg4! 20.Bxe6 Qxe6 21.Nf5 Rag8∓* and suddenly Black creates unpleasant pressure on the kingside. *)* 19...Nf8! with roughly equal chances.]

17...Ne7 18.Bh4 Ng5 19.Nh2

[While playing 17.d5 White probably counted on 19.Nxg5 hxg5 20.Bxg4 , but then realised that Black's pressure on the kingside is rather annoying after gxh4∓]

19...Bc8! A clever retreat. Although Black can't avoid an exchange of the light−squared bishop he can obtain a better version of it. **20.Bg4!** Nevertheless, White has to trade the bishops. **20...Qg6!** Ding Liren is ready to get rid of his backward pawn by means of 21...f5. **21.Bh5?** Inconsistent.

[21.Bxc8 was necessary, even though Black's chances after Raxc8 22.Qg4 Qh7! 23.Rae1 f5 24.Qh5! Rcf8!∓ are higher.]

21...Qg7 Now White has to deal with the tactical threat of 22. ..Nxe4. **22.g3?** After this unfortunate move White experiences very serious problems.

[22.Qe2 was the better of evils. f5 23.f4 exf4 24.Rxf4 Bd7 25.Raf1 Raf8 26.g3∓ with a worse, but yet playable position.]

22...Bh3!

[22...f5!∓ is also pretty strong.]

23.Bxg5?! White was hoping to create some counterplay on the light squares,

but opening the h−file makes it unrealistic.

[23.Qe2 f5! 24.exf5 Raf8! 25.Bxg5 Qxg5 26.Ne4 Bxf1 27.Rxf1 Qxf5−+ with a decisive edge for Black.]

23...hxg5 24.Bg4 Bxf1 25.Qxf1 Qg6

[The direct 25...Qh7 26.Kg2 Kg7 27.Nhf3 Rh8−+ looks even more accurate.]

26.Kg2 Kg7 27.Nhf3 Rh8 28.a5

[28.Qc4 was a little better, although after c6! Black shouldn't have problems to convert his advantage.]

28...Ng8!? The knight is being transferred to f6.

[28...Nxd5! 29.exd5 *(*or *29.Bf5 Qf6−+)* 29...f5 30.Qc4 Raf8−+ is even stronger from the computer's standpoint, but I can understand the Chinese player who chose a much safer option.]

29.Qc4 Nf6 30.Bf5 Qh6!−+

Finally the queen got to the h−file.

31.Qd3 White had to protect the d2−knight as Black was threatening 31...g4.

31...Qh5! 32...Ng4 is coming. **32.Rf1 Rh6**

[There was nothing wrong with playing 32...Ng4−+ right away.]

33.Re1 Ng4 34.Bxg4 Qxg4

Black is an exchange up and his threats along the h−file are decisive, so White resigned. A convincing victory for the top Chinese player. Black proved that 6. Bg5 doesn't promise any opening advantage, although White's play can and should be improved.

0−1

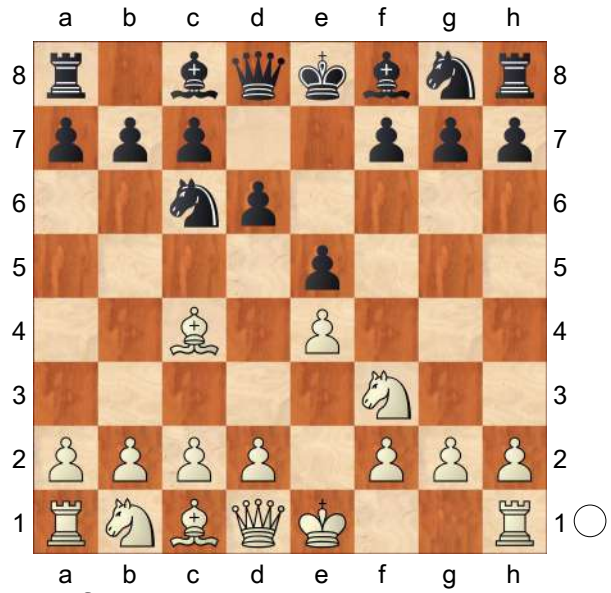
This game probably can be a good example how you can react and play in unknown situations. Diese Partie kann wahrscheinlich ein gutes Beispiel dafür sein, wie man in unbekannten Situationen reagieren und spielen kann. **1.e4 e5** I spent so much time in the morning guessing what my opponent can play which even included lots of games from Title Tuesday tournament with 1.a4 or 1...h5 :) But in the end it seems was more important to save some energy and have a clear mind. Ich verbrachte so viel Zeit am Morgen damit, zu erraten, was mein Gegner spielen könnte, was sogar viele Partien aus dem Title−Tuesday−Turnier mit 1.a4 oder 1...h5 beinhaltete :) Aber am Ende war es wohl wichtiger, etwas Energie zu sparen und einen klaren Kopf zu haben. **2.Nf3 Nc6 3.Bc4** Well, recently I played Ruy Lopez, Italian game and even Scotch here with white. I was not so sure what can be best and what my opponent can expect from me. Over the board at the last moment I decided to play Italian, because it was not exactly what I played last time against 1...e5 and it´s still a solid opening where you can have a long game. Nun, vor kurzem habe ich Spanisch, Italienisch und sogar Schottisch mit Weiß gespielt. Ich war mir nicht so sicher, was das Beste sein könnte und was mein Gegner von mir erwarten kann. Im letzten Moment entschied ich mich, Italienisch zu spielen, weil es nicht genau das war, was ich letztes Mal gegen 1...e5 gespielt hatte, und es ist immer noch eine solide Eröffnung, in der man eine lange Partie haben kann. **3...d6!?** I wouldn´t say that this move was absolutely new for me. But it´s very rarely played compared to 3...Bc5 or 3...Nf6. So I started to think what to do over the board after just 3 moves!

[There is also the similar move Es gibt auch den hnlichen Zug 3...Be7 which from the old Soviet books I remember for some reason was called Hungarian Defence. But with 3...d6 black has some additional ideas. der in den alten sowjetischen Büchern, an die ich mich erinnere, aus irgendeinem Grund Ungarische Verteidigung genannt wurde. Aber mit 3...d6 hat Schwarz einige zusätzliche Ideen.]

(Diagram)

Ich würde nicht sagen, dass dieser Zug absolut neu für mich war. Aber er wird sehr selten gespielt, verglichen mit 3... Lc5 oder 3...Sf6. Also begann ich nach nur 3 Zügen zu überlegen, was ich am Brett tun sollte! [#] **4.Nc3** After some thought I decided that some simple development will not hurt my position. After all I am playing with white! Nach einigem Nachdenken entschied ich, dass



eine einfache Entwicklung meiner Stellung nicht schaden würde. Immerhin spiele ich mit Weiß!

[My only knowledge basically at this pont was: many years ago I was reading an article about Russian Superfinal with some annotated games. White played Mein einziges Wissen zu diesem Punkt war: Vor vielen Jahren las ich einen Artikel über das Russische Superfinale mit einigen kommentierten Partien. Weiß spielte 4.c3 to prepare d2−d4. I guess it´s a natural reaction like we play against 3...Bc5 or some Ruy Lopez. But black reacted with the unorthodox um d2−d4 vorzubereiten. Ich denke, es ist eine natürliche Reaktion, wie wir sie gegen 3...Lc5 oder Spanisch spielen. Aber Schwarz reagierte mit dem unorthodoxen f5!?
as I undestood was an idea of Leela Chess Zero which attracted D.Dubov and D. Paravian who have an original playing style. war, wie ich verstanden habe, eine Idee von Leela Chess Zero ist, die D. Dubov und D. Paravian angezogen hat, die einen originellen Spielstil haben. 5.d3 Qf6!?
another move against basic rules: I was taught in childhood not to play with the queen early in the opening ein weiterer Zug gegen die Grundregeln: In meiner Kindheit wurde mir beigebracht, nicht mit der Dame zu Beginn der Eröffnung zu spielen. 6.Ng5 Nh6 7.f4 Bd7 8.0−0 0−0−0∞ it was a complex game, and according to analysis with an engine black was okay. 1−0 (62) Fedoseev,V (2674)−Dubov,D (2702) Moscow 2020. For me such play still looks a bit suspicious. I was not really inspired to try it with black, but at the same moment in our digital age with lots of information around, I was really lazy and too busy to spend time to analyze it more deeply. So I needed to solve the problems over the board instead. es war eine komplexe Partie, und laut der Analyse mit einer Engine war Schwarz okay. 1−0 (62) Fedoseev,V (2674)−Dubov,D (2702) Moskau 2020. Für mich sieht ein solches Spiel immer noch ein wenig verdächtig aus. Ich war nicht wirklich inspiriert, es mit Schwarz zu versuchen, aber in unserem digitalen Zeitalter mit vielen Informationen war ich zu faul und zu beschäftigt, um die Zeit für eine tiefere Analyse zu verwenden. Also musste ich stattdessen die Probleme am Brett lösen.]
[I guess, I could also try Ich denke, ich könnte auch versuchen 4.d4!? but I thought that with my move I can have more flexibilty aber ich dachte, dass ich mit meinem Umzug flexibler sein kann.]

4...Be7 It was turn for my opponent to

show how black should play here: Jetzt war mein Gegner an der Reihe, um zu zeigen, wie Schwarz hier spielen sollte:

[I was not so sure about Ich war mir nicht so sicher über 4...g5?! this can be in spirit of this line, but at the same moment I thought a might be a bit tto much since I haven't even castled short yet and an attack on the kingside is not dangerous at all. das kann im Sinne dieser Variante sein, aber im selben Moment dachte ich, dass das vielleicht ein bisschen zu viel ist, da ich noch nicht einmal kurz rochiert habe und ein Angriff am Königsflügel überhaupt nicht gefährlich ist.]

[In case of Im Falle von 4...Bg4 I was planning to do something like Ich hatte vor, etwas zu tun wie 5.h3 Bh5 6.g4!? If my king is still flexible to choose where to castle, why not? Wenn mein König immer noch frei wählen kann, wo er rochiert, warum nicht? Bg6 7.d4 and white gets some extra space and the black Bg6 is potentionally out of play. und Weiß bekommt etwas zusätzlichen Raum und der schwarze Lg6 ist möglicherweise aus dem Spiel.]

5.d4 Nf6

[Once again after Wieder einmal kann nach 5...Bg4 white can just play Weiß einfach 6.h3!? because f7 is not well protected. spielen, weil f7 nicht gut geschützt ist. Bxf3 *(6...Bh5 7.g4 Bg6 8.Be3 Nf6 9.d5 Nb8 10.Nd2)* 7.Qxf3 Nf6 8.d5 Nd4 9.Qd1 c6 10.a4 0−0 11.0−0 it looks kind of comfortable for white. The active Nd4 alone hardly can do much and eventually I believe white can push it with Be3 or even c2−c3 in some moment sieht ziemlich bequem für Weiß aus. Der aktive Sd4 allein kann kaum etwas ausrichten und ich glaube, dass Weiß ihn irgendwann mit Le3 oder sogar c2−c3 verdrängen kann.]

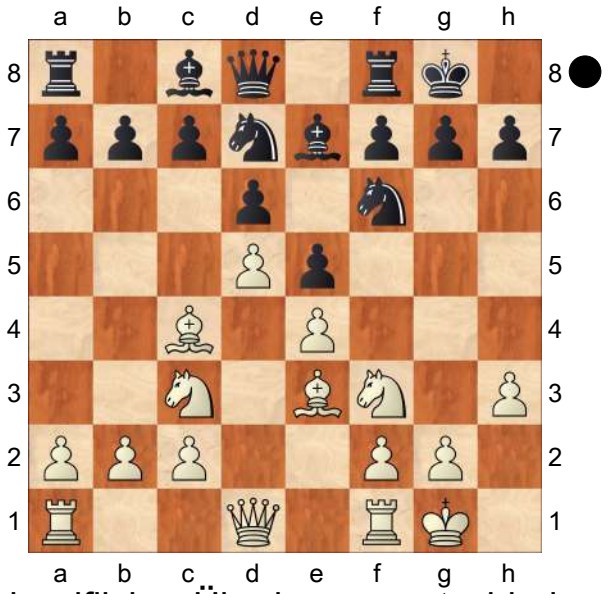
6.d5!? At that moment I thought that position is very similar to a Philidor Defence, where black has Nc6 instead of Nbd7. So I thought maybe I can play in a similar way with white here as well. In diesem Moment dachte ich, dass diese Stellung einer Philidor−Verteidigung sehr ähnlich ist, in der Schwarz Sc6 statt Sbd7 hat. Also dachte ich, vielleicht kann ich auch hier mit Weiß auf ähnliche Weise spielen.

[I also thought about keeping the tension at the center with Ich habe auch darüber nachgedacht, die Spannung in der Mitte zu halten mit 6.h3 0−0 7.0−0 but now I was not so sure about aber jetzt war ich mir nicht mehr so sicher über Nxe4!? 8.Nxe4 d5 9.Nxe5 dxc4 my center is destroyed and black can get a decent position mein Zentrum ist zerstört und Schwarz kann eine anständige Stellung erreichen]

6...Nb8 7.h3!? Since I have now more space thanks to d4−d5, I thought it makes sense to keep more pieces on board and prevent exchanges after Bg4. Also, h2−h3 can help me to play Be3 in some moment without having to worry about something like Ng4 Da ich jetzt dank d4−d5 mehr Raum habe, dachte ich, dass es sinnvoll ist, mehr Figuren auf dem Brett zu halten und Abtausch nach Lg4 zu verhindern. Außerdem kann mir h2−h3 helfen, irgendwann Le3 zu spielen, ohne dass ich mir Sorgen um

etwas wie Sg4 machen muss. **7...Nbd7 8.Be3** keeping more options for later. Who knows, maybe it can be even a good idea to castle queenside Behält sich mehr Optionen für später. Wer weiß, vielleicht kann es sogar eine gute Idee sein, lang zu rochieren **8...0−0 9.0−0** After some thought I decided to go for a safe and more practical option

[It can be more ambitious to play Anspruchsvoller sein könnte 9.g4!? c6 10.g5 Nh5 but at the same moment I thought here my opponent will have an easier plan for the next moves aber im selben Moment dachte ich, dass mein Gegner hier einen einfacheren Plan für die nächsten Züge haben wird]



Nach reiflicher Überlegung entschied ich mich für eine sichere und praktischere Option[#]. **9...c6** This move looks natural, but when my opponent played it I was quite happy with it. I thought that now I have a good version of the Philidor Defence with some extra tempos since black played Nc6−b8−d7 instead of Nbd7 in one move Dieser Zug sieht natürlich aus, aber als mein Gegner ihn spielte, war ich sehr zufrieden damit. Ich dachte, dass ich jetzt eine gute Version der Philidor−Verteidigung mit einigen zusätzlichen Tempi habe, da Schwarz Sc6−b8−d7 statt Sbd7 in einem Zug spielte

[Maybe from the practical point of view it was better to play in King´s Indian style with Vielleicht war es aus praktischer Sicht besser, im Königsindisch−Stil zu spielen mit 9...Ne8!? to prepare g7−g6, Ne8−g7 and then f7−f5. Potentionally h2−h3 can be a weakness for white. Yes, it looks a bit too slow. But the position has a closed character and white still needs to be creative to use the space advantage on the queenside. This is not a typical King´s Indian where you can just push c4−c5−c6 and that´s it. um g7−g6, Se8−g7 und dann f7−f5 vorzubereiten. h2−h3 kann möglicherweise eine Schwäche für Weiß sein. Ja, es sieht ein bisschen zu langsam aus. Aber die Stellung hat einen geschlossenen Charakter und Weiß muss immer noch kreativ sein, um den Raumvorteil am Damenflügel zu nutzen. Dies ist kein typisches Königsindisch, wo man einfach c4−c5−c6 vorpreschen kann und das war's.]

10.a4 I believe white has enough resources to keep control over the d5 square. Look also how economically each move was played before: white didn´t spend any tempo to move with the same piece twice. Ich glaube, dass Weiß genug Ressourcen hat, um die Kontrolle über das Feld d5 zu behalten. Schauen Sie sich auch an, wie sparsam

jeder Zug zuvor gespielt wurde: Weiß hat kein Tempo aufgewendet, um zweimal mit der gleichen Figur zu ziehen. **10...Nb6**

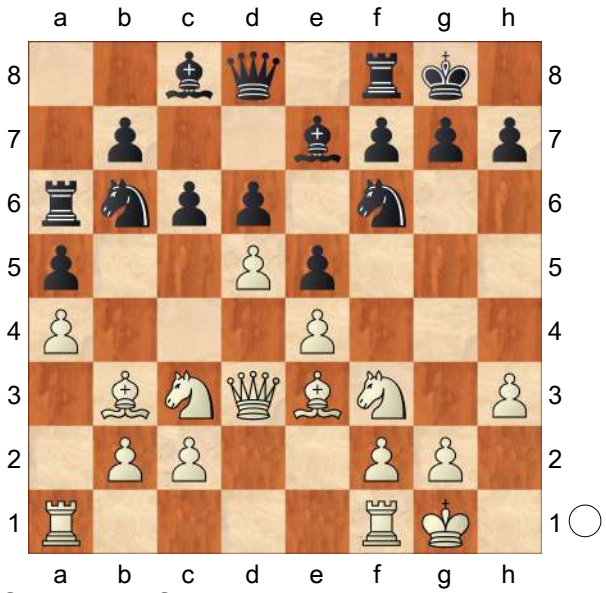
[After Nach 10...cxd5 11.Bxd5 Nxd5 12.Nxd5 Nf6 13.Nxf6+ Bxf6 14.c4± maybe white´s advantage is small, but they have very comfortable play ist der Vorteil von Weiß vielleicht gering, aber er hat ein sehr komfortables Spiel]

11.Bb3 a5?! I think this plan just doesn´t work for black. Ich denke, dass dieser Plan für Schwarze einfach nicht funktioniert.

[I think black should choose the least evil and play something like Ich denke, Schwarz sollte das geringste Übel wählen und etwas spielen wie 11...cxd5 12.Bxb6 Qxb6 13.a5 Qa6 14.Nxd5 Nxd5 15.Bxd5 Be6 The pawn structure looks like some Sicilian Najdorf with e7−e5 Die Bauernstruktur sieht aus wie ein sizilianischer Najdorf mit e7−e5 16.Bxe6 *(16.c3 Bxd5 17.Qxd5 Rac8 18.Rfd1 Rc5⇄)* 16...fxe6 17.c3± I like white here because it´s not so easy for black to create an active counterplay. But still there is lots of play ahead Ich mag Weiß hier, weil es für Schwarz nicht so einfach ist, ein aktives Gegenspiel zu entwickeln. Aber es liegt noch viel Spiel vor uns]

12.Qd3 Ra6?! Following the wrong plan. I understood that my opponent wanted to take on b6 with a rook instead of the queen. But such an idea is very easy to prevent.

(Diagram)



Verfolgt den falschen Plan. Ich verstand, dass mein Gegner auf b6 mit einem Turm anstelle der Dame schlagen wollte. Aber eine solche Idee ist sehr leicht zu verhindern. **13.Nd2! cxd5 14.Bxb6 Qxb6**

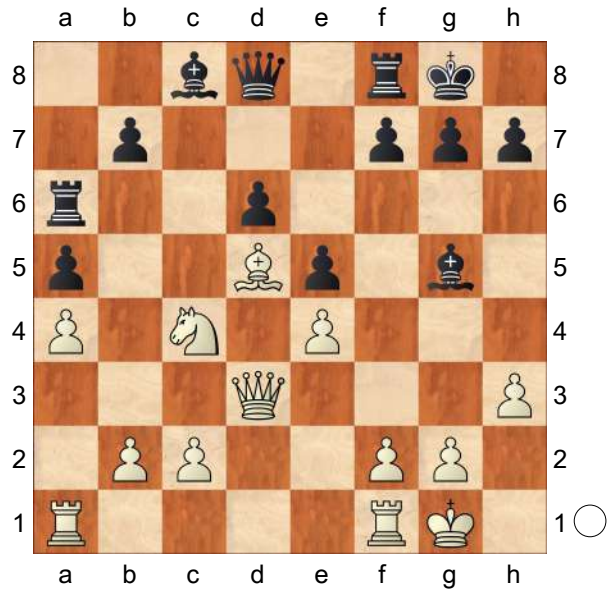
[14...Rxb6 15.Nxd5 Nxd5 16.Bxd5 Rxb2 17.Nc4 Rb4 18.c3 trapping the rook fängt den Turm]

15.Nxd5

[For a while I thought about keeping more pieces on board with Eine Zeit lang habe ich darüber nachgedacht, mehr Fguren auf dem Bord zu behalten mit 15.Bxd5 , but I didn´t really like aber mir missfiel irgendwie Qd4 Also since I have one very good square d5, but at the same moment so many pieces it makes sense to exchange some of them. Imagine if I can keep just Nd5 against Be7 − could be a dream in such structures! Da ich außerdem ein sehr gutes Feld d5 habe, aber gleichzeitig so viele Figuren, macht es Sinn, einige davon zu tauschen. Stellen Sie sich vor, wenn ich nur Sd5 gegen Le7 behalten kann − das könnte ein Traum in

solchen Strukturen sein!]

15...Nxd5 16.Bxd5 Bg5 17.Nc4 Qd8



[#] **18.c3!** I was very happy with my position. Now it looks like Philidor pawn structure transformed to some Sicilian Sveshnikov variation. My main concern was not to waste time and not let my advantage slip away. Ich war sehr zufrieden mit meiner Stellung. Jetzt sieht es so aus, als hätte sich die Philidor−Bauernstruktur in eine sizilianische Sweschnikow−Variante verwandelt. Mein Hauptanliegen war es, keine Zeit zu verlieren und meinen Vorteil nicht zu verspielen.

[My first natural instinct was to play Mein erster natürlicher Instinkt war. 18.Rfd1 but then I realized that my opponent wants to play aber dann habe ich gemerkt, dass mein Gegner Kh8 and later f7−f5. All my pieces on the queenside right now, so maybe he can have some counterplay against my king on the other side. spielen will und später f7−f5. Alle meine Figuren befinden sich jetzt am Damenflügel, also kann er vielleicht etwas Gegenspiel gegen meinen König auf der anderen Seite haben.]

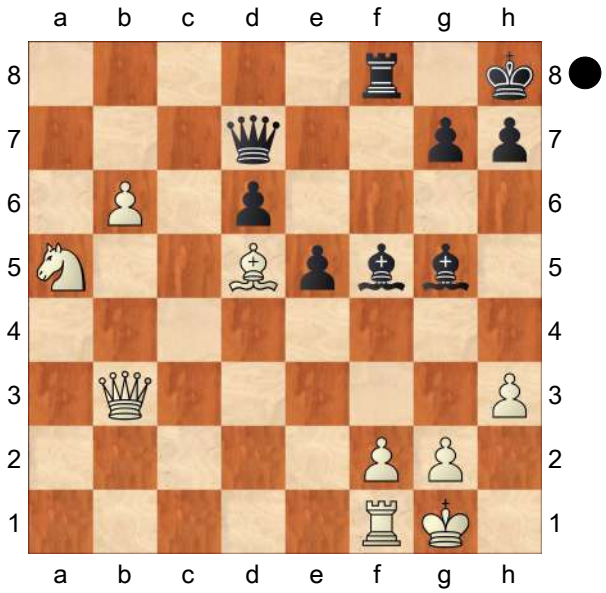
[I started to think about Ich begann über 18.Rad1 to keep at least one rook on the kingside. But then I found the much better idea with direct play on the queensside and played c2−c3 nachzudenken, um wenigstens einen Turm am Königsflügel zu behalten. Aber dann fand ich die viel bessere Idee mit direktem Spiel am Damenflügel und wählte c2−c3]

[To be honest, also good might be Um ehrlich zu sein, gut könnte auch sein 18.Ra3 Kh8 19.Rb3 Qc7 20.Ra1 and black has too many weak pawns und Schwarz hat zu viele schwache Bauern]

18...Kh8 19.b4 Somehow white´s play goes really fast. All previous black moves a7−a5, Ra6 etc. just helped me. Irgendwie geht das Spiel von Weiß sehr schnell. Alle früheren schwarzen Züge a7−a5, Ta6 usw. haben mir nur geholfen. **19...axb4 20.cxb4 f5 21.b5 Ra7 22.exf5 Bxf5 23.Qa3** The white Bd5 is just a monster here. It helps to push pawns on the queenside, and at the same moment I can use it quickly for the defence of my own king if needed Der weiße Bd5 ist hier einfach ein Monster. Er hilft, Bauern am Damenflügel vorzuschieben, und gleichzeitig kann ich ihn schnell für die Verteidigung meines eigenen Königs nutzen, falls nötig **23...b6 24.a5 bxa5 25.b6 Ra6 26.Qb3 Qd7 27.Rxa5 Rxa5 28.Nxa5**

(Diagram)

And with still equal material on the board, my opponent decided that he had



enough torture in this game! Very simple, but at the same moment effective play for white, wasn't it? [Und bei immer noch gleichem Material auf dem Brett entschied mein Gegner, dass er in dieser Partie genug Qualen ertragen hatte! Sehr einfaches, aber gleichzeitig effektives Spiel für Weiß, nicht wahr?

[Bartel,Mateusz]

This game was played in the middle of thePolish championship. It was already clear that both Kacper and I were fighting for medals and at the end he was second while I was 3rd, so it's clear that this game was very important. My opponent wa the biggest star of last month in Poland. The Polish Chess Federation awarded him a prize of "Hetman" for the year 2015 for spectacular achievments, which is not surprising, because he improved from 2530 to 2650 (and now, as I am writing this words, his live rating is around 2680!). Piorun (which in Polish means Thunder) is a very talented player and also former World Champion in Solving. It's very difficult to play him, especially because of the fact that he is fearless and always wants to win! **1.e4** Bartel,M Bartel,M Bartel,M: 'Bartel, Mateusz Bartel,Mateusz: 'Bartel,M'' **1...e5 2.Nf3 Nc6 3.Bc4** When playing e5 these days, 3.♗c4 is move you should expect from everybody. **3...Nf6** A risky choice as it's an invitation to the crazy lines with 4.♘g5. **4.Ng5** And, of course, Kacper accept it! **4...d5 5.exd5 Na5 6.Bb5+ c6 7.dxc6 bxc6 8.Bd3** I must say that I was quite naive and went for this sharp and complicated line without serious knowledge of the details. **8...Nd5**

[8...Ng4 is the other option for Black.] **9.h4!?** Well, it came as a shock! I knew that such a move exists, but nothing more. Having it as a surprise over the board is an unpleasant feeling. **9...Nf4** The most human choice in my opinion.

[If I had a better memory or had studied the games of my brother more carefully, I would have known that he has played this line with Black! Michal chose 9...Be7 which is very straightforward and leads to insane complications: 10.Qf3 f5 11.Bxf5 Rf8 12.g4 *(12.Qh5+ g6 13.Bxg6+ hxg6 14.Qxg6+ Kd7 15.d3* also deserves attention and − to be honest − White should be better *)* 12...g6 13.Nxh7 gxf5 14.Nxf8 e4 15.Qg2 Bxf8 1/2 (36) Pijpers,A (2333)−Bartel,M (2296) Haarlem 2012,

with a very, very complex play.]

10.Bf1 Qd5?

[The whole concept of this move is wrong, as exchanging queens is not as good as I thought. A better move was 10...h6!?

A) 11.Ne4 Ne6 *(* the alternative is the sharp *11...f5 12.g3 fxe4 13.gxf4 Bf5 14.fxe5 Bc5 15.Qh5+ g6 16.Qe2 0−0∞)* 12.d3 Be7 and Black should have some initiative for a pawn.;

B) 11.Nf3 Bd6 12.d3 *(12.g3 e4 13.gxf4 exf3 14.Qxf3 0−0* should be ok for Black *)* 12...Qe7!? 13.g3 e4 14.dxe4 Qxe4+ 15.Be3 Nd5 and Black is ok.]

[10...Bc5 may also be a nice move as after, let's say, 11.Nc3 *(11.c3 h6 12.Nf3 Qe7! 13.b4 Bg4!→)* 11...0−0 12.d3 h6 13.Nge4 Bd4 Black is very active.]

11.Qf3!

[During the game I thought that 11.Rg1 was an option and after that I planned to play Bc5 12.d3 *(* the trick is that *12.Nc3?* loses to *Bxf2+ 13.Kxf2 Qd4+)* 12...Qd8!? (this one I didn't see) 13.g3 Nd5 and Black is fine.]

11...h6

[A worse try was 11...f6 12.Nc3 Qxf3 13.Nxf3 and it's a healthy pawn up for White.]

12.Qxd5

[After 12.Nc3 Qd7! 13.Nh3 *(13.Nge4 f5 14.Ng3 Bd6* and Black is about to get an advantage *)* 13...Ne6 The game looks nice for Black. In such positions it's important to place your knight on d4 and Black is ready to move there.]

12...cxd5

[It was probably pointless to play 12...Nxd5 since there are no visible pluses after this, while the bad pawn structure remains on the board.]

13.Nf3± e4 14.d3 Ne6?

[This is serious mistake, which leads to a very forced line. I should have played 14...Nxd3+ 15.Bxd3 *(15.cxd3 exf3* may lead to a better position for Black. *)* 15...exd3 16.cxd3 I had the feeling that this position is just worse and didn't want to play it. However, it is probably just holdable, but not without problems. White is a pawn up, but at the same time my light−squared bishop offers long term counter−chances.]

[After the game I thought that maybe 14...Ng6 was better, but after 15.dxe4 dxe4 16.Nd4 Bc5 17.Be3 0−0 White is just a pawn up.]

15.dxe4 dxe4 16.Bb5+! Ke7

[16...Bd7 17.Bxd7+ Kxd7 18.Ne5+ Ke7 19.Bd2 Nd4 20.Bxa5 Nxc2+ 21.Ke2 Nxa1 22.Na3 Ke6 23.Nec4 was just lost]

17.Ne5 Nd4 18.Ba4 It was important to give check on b5, to have this defensive move. **18...Kf6 19.c3 Ne6**

[The only move. Going for this position I thought that 19...Kxe5 20.cxd4+ Kxd4 was fine for me, but this is an endgame in which the activity of the king is not very useful, as the king can be mated. The position is almost lost after 21.Bd2 *(21.Bf4!?)* 21...Nc4 22.Bc3+ Kc5 23.0−0+−]

20.Ng4+ Kg6 21.h5+± Kh7

So, the king has gone from e8 to h7 − this is a rather unusual way of castling! Unfortunately, it doesn't give Black much,

as both bishop and rook are not easily brought into the game, while Black is... a pawn down! **22.Bc2** There was no urgent need to place the bishop on c2, but it's more than just tempting − white attacks the e4−pawn and also prepares action against the king (and possibly the rook on a8 too). **22...f5 23.Ne5 Nb7!** Even if computer isn't impressed by this move, I am proud of it. The knight can do nothing on a5, while now I can think about ♘b7−c5 and later ♗c8−a6, which looks like a reasonable plan as d3 is the weakest point in White's position.

24.Ng6?!

[I don't like this move, as the knight on e5 is a strong piece, while on g6 it's not that good. It was much better to develop other pieces, for example 24.Nd2 Nbc5 25.Ndc4 and it's close to being winning. The only problem for a human in such a position is that all ways look good enough and it's hard to decide which is best.]

24...Rg8 25.Be3 Nbc5 26.Nd2 Ba6 Here, I must say, I was happy with my position. The engines laugh, of course, but at least I coud see a target and it was the d3−square. **27.0−0−0?**

[White would be practically winning after the strong 27.g4! Nd3+ 28.Bxd3 Bxd3 29.gxf5 . However, without an engine, I would say it's a complicated position. Seeing +2 makes me a bit surprised... Probably Kacper also thought that this is not that promising as even in analysis we didn't look at the g2−g4 move!]

27...Be2 28.Rde1

[Again, a very strong move was 28.g4 Bxd1 29.Kxd1!? and Black's position collapses.]

28...Nd3+ 29.Bxd3 Bxd3 30.Nxf8+?

[It was the very last moment to play g2−g4. After 30.g4 fxg4 31.Rh4 White was much better, but with a bishop on d3 it would be still not that simple to convert.]

30...Rgxf8 31.f4 A very solid move which makes a draw the most probable result. It was a difficult decision for Kacper, as he understood that his position should have been winning somewhere. Sometimes you can't accept the facts and you keep on playing for a win, when objectively you should be looking for a draw. This time, my opponent decided that it was better to accept what was happening and block the kingside.

[The alternative was 31.g3 ,but after a5 it not simple to show how White can play, while Black will try to press on queenside.]

31...Rac8

[31...a5 was also possible, but I wanted to stop ♘b3−d4.]

32.Nb3 Rfd8 33.g3 Rd5 34.Rh2 a5 35.Na1! Not very complicated, but nonetheless, a very nice move. **35...Kg8 36.Nc2 Rb5 37.Rf2 Kf7** The last 3 moves show that Black has no plan and is just waiting. **38.Na3**

[Probably, White can't do much as after 38.Rd1 Ke7 39.Rfd2 Rc7 White can't improve, because 40.Ne1?? loses to *(* a more promising line may be *40.Rxd3 exd3 41.Rxd3* and this is what I was afraid of. Black can't win this, while White can try to make use of the powerful pawns on the queenside. Still, it should be close to a draw after *Rd7 42.Rxd7+ Kxd7 43.b3 Rb8* with g7−g6 to come. *)*

40...Rxc3+]
38...Rb7 39.Nc2 Nc7 An invitation to ♘d4−f5 and... a draw. With a rook on b7, the knight cannot come to d4 with tempo − that's why it's possible now to play ♘c7, and why it didn't work earlier. **40.Nd4 Nd5!** A simple move which forces the draw. **41.Nxf5 Rxc3+ 42.bxc3 Rb1+ 43.Kd2 Rb2+ 44.Kd1 Nxe3+ 45.Rxe3 Rb1+ 46.Kd2 Rb2+ 47.Ke1 Rb1+**

1.e4 e5 2.Bc4 Nf6 3.d3 Nc6 4.Nf3 Bc5 5.c3 d6!? It seems like this alternative to the mainline is alive and kicking. The theory would be developing faster if White played the Four Pawns Attack more often. **6.0−0 0−0 7.h3**

[7.b4]

7...Bb6!? Black tries to cajole his

A slow move, but if left in peace White will continue with Rc1, Be2 and 0−0 maintaining a huge space advantage. **9...Ng6!** Logical and necessary. Black has to counterattack immediately. **10.Nf1**
There begins a long forcing variation. Black has to sacrifice a couple of pawns to break White's stranglehold on the centre. Meanwhile White has to take the material on offer or else his e5 point will crumble, guaranteeing Black a good game. **10...Be6!**
[10...c6]
11.Ng3

13...a5 14.b3 h6
[14...Rfe8! Note that is too late for White to change his mind and lash out with 15.Qd3? as Qc6 is now simply good for Black. Tom analysed the ultra−sharp 16.Nf5 in Moser−Fier. His conclusion is that White has some advantage. However, in the messy counterattacking positions that arise this isn't going to upset Alekhine fans too much. Black could also delay this move with Nd7]
15.Nh2 Kh7 16.Ra2 The dust has settled. White is a pawn up but his doubled pawns and Black's activity greatly complicate matters. White has tried other moves here but they all seem dubious. For example **16...Qe6! 17.Ng4**
This turns out poorly but Black has the initiative in all lines, for example **17...Ne7 18.Kh2 Nd7 19.f4 exf4 20.Bxf4 Rae8 21.Rd2 Bc5** White's king has escaped the centre and nominally a rook and two pawns is ample material for two minor pieces. But Black's bishops are very strong whereas all is gloomy in White's camp: his f4 pawn is terminally weak, he has no passed pawn, his rook lack activity and his bishop is a poor piece.
22.Nh5 Qg6
[Black doesn't want to give up his dark squared bishop with 22...Ng6? 23.Rf1 *(23.Nxg7* Naturally *Kxg7? 24.Bxh6+ Kg8 25.Bxf8* would be embarrassing for White. Here Alexander Volzhin looked at *Kxf8* in Brener−Pushkin which leads to sharp and unclear play after *)* 23...f5]

If you give the game to a computer it will point out various missed opportunities for Black in the endgame, but Khairallah deserves credit for making it such a hard fight. It was better to activate the rook on b1 with **49.Kh2!** This would also guard the second rank. Simply **49...Rb8** was very good for Black. The best chance for White to survive was **50.g4!** but it's no surprise that Bologan didn't see this quiet move when his king is being hunted. Black would have the pleasant choice between forcing a draw by repetition or pursuing his attack. **50...Ra8 51.Kg3 Nc6 52.h4 Ra7 53.g5** but not **53...Nb8?? 54.Rb1 Nxa6 55.Ra1 Ra8 56.h5** mate! The winning attempt is **56...Nc7** when White's king has to walk a tight rope: **57.Rxa8 Nxa8 58.Kf4 Nb6 59.Kf5 Nd5 60.Ke5 Ne7 61.Ke4 Kf8 62.Ke5 Ng8** and the assault continues.

Black would have a decisive initiative after **63.Kf5!** e.g. **63...Ke7? 64.Ke5 Kf8 65.Kf5 Kg7 66.Ke5 Ne7 67.Ke4 Nc6 68.Kd5** But Black's onslaught is also unstoppable after **68...Nb4+ 69.Ke5 Nc6+ 70.Kd5 Nd8 71.Ke5** or **71...Nb7 72.Kf5! Nd6+ 73.Ke5** with 21...Bh4+ looming. White does best to grovel with **73...Nc4+ 74.Kf4 Na5 75.g6 fxg6**

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.cxd4 Bb4+ 7.Nbd2 An extremely rare move and an infrequent alternative to 7.Nc3 and 7. Bd2. **7...d5** One of the ways to destroy White's pawn centre, probably not the most precise.

[7...Nxe4 Nakamura,H (2799)−Giri,A (2776) Khanty−Mansiysk RUS 2015 [Mikhalevski, V]]

[7...Bxd2+ 8.Bxd2 Nxe4 9.d5 Nxd2 *(9...Ne7* is also playable. *)* 10.Qxd2 transposes to 7...Nxe4.]

8.exd5 Nxd5 9.0−0 Bxd2?! This capture is premature. Somehow, I thought that the knight will be better than my dark−squared bishop, but I was wrong.

[The correct move was 9...0−0 10.a3 *(* In case of *10.Ne4* Black answers with *Bg4)* 10...Bxd2 11.Bxd2 Be6!? *(* Kramnik preferred *11...Bg4* , which is less accurate. *12.h3 Bh5 13.g4! 10.Bxd2 0−0 11.Qb3!? A logical novelty. White puts pressure on the d5−knight and makes development of the light−squared bishop difficult.

[After 11.Bg5 f6 12.Bh4?! Be6 13.Re1 Qd7! Black equalises. *(13...Bf7 14.Ne5!±* Bortnyk,O (2598) −Nakamura,H (2736) Chess.com INT 2020 *)*]

11...Nce7 I felt that I have to keep the knight on d5.

[11...Nb6 looks risky because of 12.d5 Ne7 13.Rfd1±]

12.Rfe1 c6 Stabilizing the knight on d5. **13.Rac1** Very logical play from Mamedov so far. He brings all of his pieces into play. **13...a5! 14.a4± Kh8?!** It was better to take the a3−f8 diagonal under control.

[However, after 14...Qd6! 15.h3 h6 16.Re5± White retains some pressure.]

15.h3 f6 The point of the previous move. I wanted to take control of the e5−square with the king away from the a2−g8 diagonal. **16.Re2?!** A slight inaccuracy, which allows me to take control of the aforementioned a3−f8 diagonal.

[16.Qa3!± was correct.]

16...Qd6!± 17.Rce1 Bd7 Black manages to complete development. **18.Bd3!?** A tricky move,

which I underestimated during the game.
18...g5? Too optimistic. I was preparing 19... Ng6. However, when I played this move I missed the Qc2−c5 idea.
[18...b6! was necessary, covering the c5−square. Black obtains a slightly passive, but solid position with good chances to hold.]
19.Qc2
[19.h4! would set more problems. h6 *(19...g4 20.Nh2 g3 21.fxg3 Rg8 22.Nf1 Nf5 23.Bxf5 Bxf5 24.Rf2*+− leads to a healthy extra pawn for White. *)* 20.Bc3! Nf5 21.Qc2 g4 22.Nd2 Nxh4 23.Ne4 Qc7 24.Ng3! f5 25.Qc1! f4 26.Re7!± and Black is in big danger.]
19...h6

20.Qc5 Rauf offers a favourable exchange of queens. This way he gets rid of his isolated pawn and creates a target on a5.
[20.Nh2!? Rf7 21.Qb3 b6 22.Nf1 Nf5±]
20...Nc8? A losing move. Right after playing it I realised that after 21.Bb1 my idea of 21...b6 doesn't work any more.
[20...Nf5!± with the idea of 21...b6 was necessary and allowed to hang on. White doesn't seem to have anything better than 21.Qc2 *(21.Bxf5 Qxc5 22.dxc5 Bxf5 23.Nd4 Bg6* is playable. *)* 21...Nfe7 22.Nh2±]
21.Bb1! I missed this move. **21...Qxc5**
A sad necessity. I had to make a move which I wanted to avoid, especially with my knight misplaced on c8.
[21...b6? runs into 22.Qc2 f5 23.Ne5+−]
22.dxc5 b6! The only way to bring that knight into play, although it leads to a further weakening of the queenside.
23.Rc1!? White supports the c5−pawn.
[Another strong option was 23.Nd4!? bxc5 24.Ne6 Bxe6 25.Rxe6 Ra6 26.Bd3 Ra7 27.Rxc6 Nb4 28.Bxb4 cxb4 29.Ree6 Kg7 30.Bc4+− with full domination.]
23...bxc5 24.Rxc5 Nd6! A tactical way to protect the a5−pawn. **25.Nd4!**
[25.Rxa5? is a mistake due to Rxa5 26.Bxa5 Ra8 27.b4 Nc4=]
[25.Bxa5? is strongly met by Nb7±]
25...Rfc8

[26.Be4! Nxe4 27.Rxe4+−]
26...Nb7?⊕ I had already been in time trouble for a very long time.
[26...Nb6! 27.Bb3 Nb7 28.Rc3 c5 29.Nb5 Re8! 30.Rxe8+ Rxe8 31.Rf3 Rf8 32.Bc3 Kg7± was my only chance to retain a playable position.]

[27...Nd6 28.Nxc6 Rxc6 *(28...Bxc6 29.Rxc6!*+− *)* 29.Bxd5+−]
28.Bxd5! Mamedov simplifies into an easily won position. **28...cxd5 29.Rxc8+ Rxc8 30.Re7 Nc5 31.b3!**
Rauf protects the a4−pawn and underlines the weakness of the a5−pawn. **31...Ra8 32.Be3!**
Now he creates a strong threat of 33. Nf3. **32...Rc8!?**
[32...Re8 33.Rf7 Kg8 34.Rxf6 Rb8

33.Rf7!+− White wins the f6−pawn.

33...f5 34.Nf3

[34.Nxf5!?+− Bxf5 35.Rxf5 Nxb3 36.Rxd5+− leads to a decisive advantage.]

34...Kg8! 35.Re7 It seems that White wins a piece, but I was lucky to have **35...d4! 36.Bxd4 Bc6!** giving up a pawn, but saving a piece. **37.Rg7+ Kf8 38.Rh7 Bd5!** The only move again.

[39.Rh8+! Bg8 40.Rxh6 g4 41.Bxc5+ Rxc5 42.hxg4 fxg4 43.Nd4+− was good enough in order to win the game.]

39...Kg8!± White missed this move, which allows Black to create counterplay. **40.Rxh6 Nxb3** Suddenly Black has threats of a perpetual: Rc1 with Nd2−f1 to follow. **41.Bb2 Rc2 42.Rd6**

54.Rb5!± Kf5! My chance is to activate the king and attack White's king. **55.h4?!**

55...Nd6

[55...Ra3+!? deserved serious attention. 56.Rb3 Ra1 57.Rb4 Ra3+ 58.Kf2 Ne5±]

56.Rb6? Surprisingly, this move leads to a draw by force.

[56.Rb4! was necessary and after Ra3+ 57.Rb3 Ra1± White retains winning chances.]

56...Ne4+! 57.Nxe4 Ra3+!=

[Van Wely,Loek]

After having survived the first round with big trouble against a Vietnamese boy, I was paired with Bareev in the second round. Historically he has been an unpleasant opponent for me, and apart from that a very tricky and clever opponent. So I was advised not to let Evgeny into my backyard! Although pretty cautious, I still managed to lose with White. Now trying to win with Black vs Bareev isnt the easiest task, but fortunately when I was young and extremely fearless, I was not a bad King's Indian player. **1.e4 e5 2.Bc4 Nf6 3.d3 Bc5 4.Nf3 Nc6 5.c3 a6 6.Bb3 Ba7**

[Earlier I faced 7.Nbd2 in Sevian,S (2665)−Mikhalevski,V (2578) Sturbridge 2019 [Mikhalevski,V]]
7...d6 8.c3 An extremely rare move. There was only one predecessor at the GM level.
[The main line and a favourite line of the Russian GM Demchenko goes 8.a4 0−0 9.h3 Be6 10.Bxe6 fxe6 11.c3 Demchenko, A (2641)−Kovalev, V (2648) Lichess.org INT 2020, and now the most accurate for Back seems to be Nh5 12.0−0 *(12.Nxe5?* runs into *Nxg3 13.Nxc6 bxc6 14.fxg3 d5!* with a decisive advantage for Black, as White's king is stuck in the centre. *)* 12...Qe8 13.Nbd2 Qg6 14.Bh2 transposing to the following game. Rf7 15.b4 Raf8 with equal chances in Demchenko,A (2679)−Sevian,S (2647) chess.com INT 2019]
8...g6!?
[The aforementioned game saw 8...0−0 9.0−0 Van Foreest,L (2515)−Svane,R (2610) Skopje 2019, and now *(9.a4!?)*
A) 9...g6 10.h3 *(10.a4!?)* 10...Na5;
B) 9...Na5! would still be good for Black. 10.Bb5 c5! with the idea of 11...Qb6 was strong. 11.Nbd2 a6 12.Ba4 Nh5 and Black is doing fine.]
[Probably the most accurate would be 8...Na5!? 9.Bb5+ c6 10.Ba4 b5 11.Bc2 c5 12.0−0 0−0 13.h3 Qb6 with roughly equal chances.]
9.a4
[It would make sense to safeguard the dark−squared bishop from an exchange by means of 9.h3!? 0−0 10.a4 transposing to another game of the Russian GM. Nh5 11.Bh2 Demchenko,A (2670)−Gledura,B (2626) Barcelona 2018. Now the most accurate is Kg7! 12.0−0 Bg5 13.a5 *(13.d4 Bf4)* 13...a6 14.d4 Bf4 with just a slight edge for White.]
9...Nh5 10.a5 Oparin takes some space. **10...a6** The a−pawn has to be

stopped. **11.Nbd2 Bf6** My idea was to transfer the bishop to g7. A similar idea was also employed by the Hungarian GM Gledura in the aforementioned game. However, it's unnecessary to transfer the bishop to that diagonal.

[Instead, I could play 11...0−0!? 12.0−0 transposing to the subsequent game: Kh7 *(12...Kh8!?)* 13.d4 exd4 14.cxd4 Bf6 15.Nb3 Bg4 with roughly equal chances in Piorun, K (2665)−Matlakov,M (2691) Germany 2016]

12.h3! I'd underestimated this move. Now after a trade on g3 the f7−pawn is a target. Nevertheless, I decided to play **12...Nxg3** I didn't want to let him play 13. Bh2.

[12...Bg5!? 13.Bh2 Bf4 is playable even with a waste of a tempo: ...Be7−f6−g5.]

13.fxg3 0−0 14.Qe2

[14.0−0! looks more flexible.]

14...Bg7 15.g4!?

[15.0−0 was still good.]

15...Ne7! My idea was to support the ... d6−d5 advance. **16.0−0±** White is better thanks to some pressure on the f−file.

16...c6 Probably weakening the b6−square wasn't justified.

[My computer suggests the slightly surprising 16...b5!? 17.axb6 cxb6 preparing to develop the light−squared bishop to b7, but now White has a better pawn structure. 18.Kh1 Bb7 19.Rf2± retaining a certain pressure.]

17.Ba2?!

[White could underline the weakness of the b6−square by means of 17.Qf2! d5 18.Ba2± when Black starts to experience serious problems.]

17...d5? This way I block the a2−g8 diagonal and prepare 18...Qxa5. However, after the text the e5−pawn is vulnerable, while White can easily prepare for Black's idea.

[I saw the correct 17...b6! , which has a very concrete idea: Black attacks the a5−pawn, while after 18.axb6 *(18.Nc4* saves the a−pawn, but after *bxa5 19.Nxa5 Kh7! 20.b4 c5*= Black equalises again. *)* 18...Qxb6+ 19.Kh1 Black wins the b2−pawn. Qxb2 20.Rfb1 Qxc3 21.Nc4 Be6 22.Rc1 Qb4 23.Rab1 Qa4 24.Bb3 Qb5 25.Nxd6 Qb8 26.Bxe6 Qxd6 with roughly equal chances.]

18.Kh1! White removes the king from the a7−g1 diagonal and thus avoid an intermediate check, which would have been possible after ...Qxa5 Bxd5.

[18.exd5?! is less convincing, as after Nxd5 White can't capture the e5−pawn. 19.Nxe5? Re8 20.d4 f6∓ and White loses a piece.]

18...Qc7! 19.b4! Be6 20.d4?

A serious mistake, which could pass the advantage to Black.

[20.Nb3! was strong, when the knight is heading to c5. Rad8 21.Nc5 Nc8 *(21...Bc8 22.Rae1 Rde8±)* 22.Rf2 Nd6 23.Raf1± and Black is under serious pressure.]

20...exd4?!

[20...dxe4! was the correct capture.

A) I rejected the text because of 21.Nxe5 , but missed that after Bxa2 22.Rxa2 I can play f6! *(* I considered only *22...Bxe5? 23.dxe5 Qxe5? 24.Nxe4±* with White's edge. *)* 23.Nec4 f5!∓;

B) 21.Nxe4 Bxa2 22.Qxa2 exd4 23.cxd4 *(23.Nxd4 Nd5∓)*

23...Nd5∓ with a comfortable advantage for Black thanks to the pawn weaknesses in White's position.]

21.Nxd4 Kh7?! I thought it would be useful to move away from a possible check on e6.

[Once again I saw the correct move 21...Rae8! , but preferred the text, which looked more flexible to me.]

22.Rae1!? c5?!

[I had to prefer 22...Bd7 and only after 23.Rf3 *(23.Qf2! Rae8!)* 23...c5 with good chances to equalise.]

23.Nxe6?!

[23.Nf5! was way stronger, when White is threatening to exchange the dark−squared bishop. cxb4 *(23...gxf5 24.exf5±* is unsatisfactory for Black.*; 23...Bxf5 24.exf5±* is also better for White. *)* 24.Nxg7 Kxg7 25.cxb4 Rad8 26.Qf2!±]

23...fxe6 Now the position is balanced.

24.Rxf8 Rxf8 25.exd5 Nxd5 26.Qxe6! White sacrifices two pawns for an initiative on the light squares. **26...Nxc3 27.Bb3 cxb4 28.Nf3! Qxa5** This greedy move isn't bad, but it was safer to offer an exchange of queens.

[28...Qc6! 29.Kh2!? *(*After *29.Qe7 Rxf3 30.gxf3 Qxf3+* Black can force a perpetual. *)* 29...Rc8 30.Qxc6 Rxc6 31.Re8 Bf6 32.h4 Rc7 33.g5 hxg5 34.hxg5 Be7 35.Nd4 Bd6+ 36.Kh3 Re7 with a position of dynamic equality, when White's activity compensates the material deficit.]

29.h4! White's main target is the g6− pawn. **29...Qd8?!** This move is already dubious. I had to look for the queen exchange.

[So, 29...Qc7 30.h5 Qc6 31.hxg6+ Kh8 32.g5 Qxe6 33.Rxe6 hxg5 34.Nxg5 Rf1+ 35.Kh2 Bf6 36.Rb6 Kg7 37.Bc2 Nd5 38.Rxb7+ Kh6! 39.Nf7+ Kh5= would allow Black to retain the balance.]

30.g5? White pushes the wrong pawn.

[30.h5! was better. Qf6 31.Qd7! Kh8 32.Re6 Qd8 33.Qxb7 Qa8! 34.Qd7 Qd8 35.Qc6 Qa8 36.Nh4! Rf1+! 37.Kh2 Be5+! 38.Rxe5! *(38.g3? Rf2+ 39.Kh3 Qxc6 40.Rxc6 Ne4! 41.Nxg6+ Kg7=* and the threat of checkmate saves Black. *)* 38...Qxc6 39.Nxg6+ Qxg6 *(39...Kg7? 40.Re7+ Kf6 41.Rf7+ Kg5 42.Rxf1±* leads to a very strong attack. *)* 40.hxg6 Kg7 41.Bc2! Rf8!± when Black retains chances to survive, but White is better.]

30...Qd3? I returned the favour. Both players were already short of time.

[Black would be doing fine after 30...Qc8! 31.h5! Qxe6 32.Rxe6 gxh5 33.g6+ Kh8 34.Re7 with a position of dynamic equality again.]

31.h5!+− Now White's attack is unstoppable. **31...gxh5**

[31...Qf5 32.hxg6+ Qxg6 33.Qg4!+− threatening 34.Re6 is also bad for Black.]

32.gxh6

[32.Ne5! would finish the game much faster. Rf1+ 33.Kh2 Bxe5+ 34.Rxe5 and White's threats are way too strong. Rh1+ 35.Kxh1 Qf1+ 36.Kh2 Qf4+ 37.Kg1 Qd4+ 38.Re3+− White escapes the checks and wins.]

32...Bf6! 33.Bc4 Qg6 34.Qd7+? A serious mistake.

[34.Qd6! was correct, and after Qxh6 35.Bd3+ Kg8 *(35...Kh8 36.Ne5+−)*

36.Ne5+− White is winning.]
34...Kxh6= 35.Bd3?? This may seem to win at first sight, but in fact it could lead to the opposite result! **35...Qf7??** Unfortunately I was too short of time to find the winning move.
[35...Rd8! 36.Qxd8 Bxd8 37.Bxg6 Kxg6−+ when three passed pawns guarantee a win for Black.]
36.Qf5+− Now it's all over. **36...Bd8 37.Re6+ Kg7 38.Qh7#** 8.c3 shouldn't set any serious problems, but Black has to answer it with the accurate 8...Na5!

1.e4 Quintiliano,R **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.0−0 Nf6 5.d3 0−0 6.Re1 d6 7.c3 Ne7!?** Aronian came up with this different move order to surprise Hou Yifan. **8.Nbd2**

[8.d4 Bb6 9.h3 *(9.dxe5 Ng4* is the point which justifies 7...♘e7 *)* 9...Ng6 10.Nbd2 c6 11.Bb3 would transpose to more theoretical positions.]

[8.a4 a5]

8...Bb6 9.Bb3 c6 10.Nf1 Ng6 The difference is that by playing this way Black avoided the a4 variations which are in fashion, and quickly organised the position to play ...d5 soon. **11.Ng3 h6 12.h3** We have now reached a better known path by transposition. **12...d5! 13.exd5 Nxd5 14.d4**

[14.Nxe5? is bad Nxe5 15.Rxe5 Bxf2+! 16.Kxf2 Qf6+]

14...exd4 15.Nxd4 Be6!? Aronian plays dynamically to solve the only problem of his position − how to develop the ♗c8.

[15...Bc7 is more played, but after 16.Qf3± White keeps a little pressure.]

16.Nxe6 The principled way to explore Black's last move.

[16.Bc2 has also been tried Ndf4 *(16...Bxd4?! 17.Qxd4 Ndf4? 18.Re4!* ;1−0 Souleidis,G (2410)−Sonntag,H (2391) Oberliga NRW 1011 2010 (8.3) and suddenly Black is already losing material − *)* 17.Nxe6 Qxd1 18.Rxd1 Nxe6 19.Nf5 Rad8 20.Be3 Bxe3 21.Nxe3 Rxd1+ 22.Rxd1 Rd8 23.Rxd8+ Nxd8± ½−½ Brkic,A (2597)−Wagner,D (2485) Styrian op−A 2014 (7)]

16...fxe6 17.Rxe6! Hou Yifan accepts the challenge. **17...Rxf2** Judging by his time management, Aronian had all this stuff analysed beforehand and knew the safer path and the danger of this position.

[For example 17...Bxf2+? 18.Kh1 Nh4 *(18...Bxg3? 19.Rxg6 Bf4 20.Qd4! Qc7 21.Bxf4 Rxf4 22.Rxg7+! Qxg7 23.Qxf4+−)* 19.Nh5 Qd7 20.Qg4 Nf5 21.Rg6! with a strong attack for White *(21.Rxh6? 18.Kh1 Nh4 This position is a very critical one, and Hou Yifan invested a great amount of time to calculate and evaluate the resulting positions. **19.Qg4!** And finally, she played the best move. **19...Qf8?!** A clever idea, as White has the possibility to play for a win, or secure the draw − the second one is Hou Yifan's choice. **20.Qxh4** With less than 30 minutes for the next 20 moves, against 1:20 hour(!) for Aronian, Hou Yifan takes the wisest decision, namely to force the draw.

[20.Bxh6! could had been the alternative, however, many variations end in a much better position for White, but not winning, so it is a very

difficult choice to make when you are short of time Rxg2 21.Bxd5 cxd5 22.Bf4 Qc5 *(22...Qf7 23.Rh6!* Quintiliano,R: 'transposes to 22...♕f7' *Rxg3 24.Bxg3 Nf5 25.Rg6 Ne3 26.Qe6±)* 23.Re3 *(23.Be3 Qc4!)* 23...Qf8! *(23...Qc6 24.Qxh4 Bxe3 25.Kxg2 d4+ 26.Kh2 dxc3 27.b3! [10...h6 Ü 80/(348)]

11.exd5 John Emms: '!'

[This move is much stronger than 11.Nbd2?! .]

11...Qxd5 John Emms: 'The queen recapture has been Black's usual choice, and it's the only way to defend e5 directly.'

[The ideal way to recapture on d5 would be with the bishop, but this leaves the e5−pawn en prise and White should certainly accept the Marshall Gambit style offer: 11...Bxd5 12.Nxe5 Nxe5 13.Rxe5 Qd6 14.d4 *(* watch out for *14.Re1?? Qg3!)* 14...c5 was A.Delchev−A.Stefanova, Benidorm 2005. In the game

A) 15.Bg5! looks stronger to me, and I think Black is struggling to prove equality after Rad8 *(* or *15...cxd4 16.Bxf6)* 16.Qd3 g6 17.Nd2 cxd4 18.cxd4;

B) 15.Be3 Qc6 16.Rf5 g6 17.Rg5 Rad8 left Black with good compensation, especially in view of White's awkwardly placed rook.]

[I can find only one game with

11...Nxd5 , but this move can't be ruled out. For example, 12.Nbd2 *(*if *12.Nxe5?! Nxe5 13.Rxe5* , Black once again has the trick *Bxf2+!)* 12...Nf4 *(*if *12...f6* , White plays *13.d4* intending either dxe5 or c4 followed by d5 *)* 13.Nf1 *(*or *13.Ne4!? Qf6 *(15...exd4* is met by *16.Qh5 h6 17.Nxf7)* 16.Ne4 Qe7 17.d5 Nd8 (A.Shlakich−V.Frolochkin, St Petersburg 2007) and now 18.Be3 with some advantage for White.]

12.Bg5 John Emms: '!' John Emms: 'This is a key move. Black probably doesn't want to give White the opportunity to play Bxf6, and ...Nd7 is the natural retreat. But this leaves the queen on d5 somewhat awkwardly placed, and to have any chance of gaining an advantage White must try to exploit this to the maximum.' **12...Nd7**

[12...Qc5!? looks strange, and 13.Qe2 *(13.Bh4!?* is an interesting alternative *)* 13...Nd7 seems to invite 14.Nbd2 followed by Ne4 gaining more time. However, Black has the resource Nd4! 15.cxd4 Qxc2 , as played in A.Brkic−M.Pap, Bosnjaci 2009. This isn't entirely clear, but White should probably choose either 16.dxe5 *(*or *16.Be7!? Rfe8 17.Ba3 exd4 18.Rac1 Qa4 19.Rxc7)* 16...Nc5 17.Rac1 Qxd3 18.Be3 .]

13.Nbd2 Rfe8 John Emms: 'Could this logical move actually be a mistake? Let's explore the alternatives:'

[13...Rae8 helps Black in some lines if White plays 14 Ne4, because with the other rook on f8 Black is better placed for ...f5. However, in A. Delchev−M.Kazhgaleyev, Gonfreville 2006, White began harassing the black queen to good effect: 14.c4! Qc5 *(*or *14...Qa5 15.a3* intending b4 *)* 15.Ne4 Qb6 16.Ba4 Nd4 17.Nxd4 exd4 , and here 18.c5! obliged Black to give up the exchange with Nxc5 , *(*since *18...Qxb2 19.Re2! Qb4 20.a3 Qa5 21.Bd2* traps the black queen. *)*]

[The tempting 13...f6 is answered convincingly by 14.d4! . White has every chance of gaining an advantage here. For example, Bf7 *(*or *14...fxg5 15.Bb3 Qd6 16.Ne4 Qe7 17.d5)* 15.Be3 exd4 16.cxd4 Rad8 17.Be4 Qd6 18.Qc2! Nxd4 19.Bxd4 Bxd4 20.Bxh7+ Kh8 21.Re4! was played in T.L.Petrosian−H.Melkumyan, Yerevan 2010. Here Black felt obliged to give up a piece for insufficient compensation after Bxf2+ *(*if Black plays *21...c5* instead, *22.Rh4* 24 gives White a promising attack; he is already threatening mate with 23 Bg8+ Kxg8 Qh7 *)* 22.Kxf2 Qb6+ 23.Re3 Rfe8 24.Rae1 .]

[13...h6 has been played by Nigel Short. It's a move Black would like to play and it might even be his best option. Where should White retreat his bishop?

A) . If 14.Bh4 , Black can claim he has gained something because the bishop can no longer come back down the c1−h6 diagonal to annoy the black queen in certain lines.;

B) 14.Be3 is a decent response, and Bxe3 15.fxe3!? Qd6 16.d4 f5 17.Bb3 Kh8 was roughly equal in Z.

Efimenko−N.Short, Kemer 2007.;
C) . After studying this position for quite some time, I realized that there was a third option; White doesn't have to move the bishop at all: 14.Ne4!? is a very interesting possibility for White here. If Black takes the bishop it looks to me like White gets a fierce attack in return. Here's just a sample of the many possible lines: hxg5 15.Bb3 Qb5 16.Nfxg5 Bxb3 *(* or *16...Bf5 17.Bc4 Qxb2 18.Qh5 Nd8 19.Rab1 Qc2 20.Nxf7)* 17.Qh5! Rfe8 18.axb3 Nd8 *(18...Qxb3?* is met by *19.Ra3 Qd5 20.c4)* 19.Qh7+ Kf8 20.Ng3 Nf6 21.Qh8+ Ke7 22.Qxg7 and the attack is still burning strongly. It's still early days in the development of this line. With accurate play Black might well be okay, but it does seem easy to go wrong. Initially Short's 12...h6 looked like the most reliable move to me, but I can no longer say this with any certainty in view of 14 Ne4!?.;

[Ganguly,S]

1.e4 Ganguly,Surya Shekhar Ganguly, Surya Shekhar Ganguly,Surya Shekhar: 'Ganguly,S' Mareco plays lot of things and I ended up preparing pretty much everything except 1.e4 by making a wild guess that he won't opt for it :−) **1...e5** After making few more wild assumptions I decided to go for 1...e5 and eliminated 1...e6 and 1...c5 . **2.Nf3 Nc6 3.Bc4** Once again this is something that I didn't guess. I should stop making guesses. I guess I am not good at guesses! **3...Bc5 4.0−0 Nf6 5.d3 0−0 6.c3 d6** I have played both d6 and d5 in this position. For this game I decided on less forcing lines. **7.b4** This was the real surprise. This line is not so popular and is not that critical yet. Oh yes in case you are wondering.... I didn't guess this! **7...Bb6 8.a4** I remembered that against Akopian in last world rapid I had played a6 and during the game itself realised a5 was better. **8...a5 9.b5 Ne7** Here finally my opponent stopped blitzing and started to think. **10.Be3** This is slightly inaccurate. Now Black has number of ways to react and all of them looked decent.

[10.Nbd2 is the most popular move.]
10...c6 There were other ways also but I felt this move simply ruins White's idea and makes the e3−bishop a bit aimless.
11.Re1 Bc7!? I will get d5 before he gets d4 so basically it will be some sort of reverse Italian with weird pawn structure on the queenside.

[11...Bxe3 12.Rxe3 Ng6=
was the most classical approach and Black gets easy equality. However, at this stage I wanted to keep more pieces and get d5 as early as possible.]

[11...d5 I wanted to make this work but couldn't do so. 12.Bxb6 Qxb6 13.exd5 cxd5 14.Bb3 Ng6 *(14...Bg4* doable but this was not the point of playing d5 *)* 15.Nxe5! Nxe5 16.Rxe5 Ng4 17.Re2 Qd6 18.g3 I wasn't sure about my compensation here Ne5 *(18...Qh6 19.f3)* 19.Re3!**±**
and I didn't see anything concrete for Black.]

12.Nbd2 d5 13.Ba2 Ng6 14.h3

[14.Bg5!? h6 *(14...Be6* I was happy with this *)* 15.Bxf6 gxf6 even this was not so bad. Black will create some attacking chances on the kingside *(15...Qxf6 16.exd5 cxd5 17.Bxd5 Nf4 18.Ne4±)* 16.exd5 cxd5 17.c4 Nf4 with a messy position. I wasn't sure which one to opt for in the event of 14.♗g5. Both looked complicated and Black has good counterplay.]

14...h6 15.Qc2 Here I thought if I play ... ♗e6 then he might have some d4 ideas so I came up with an interesting alternative instead. **15...Bd7!?**

[15...Be6 16.d4 although the engine thinks this is also fine for Black Nxe4 17.Nxe4 Bf5 18.Nfd2 Qh4!
being the point.]

16.Rab1

[16.d4 with the bishop on d7 this

never works dxe4 no more ...♗e6 business 17.Nxe4 Bf5]

16...Qc8! Suddenly the idea of ...♗xh3 becomes annoying. The white queen is awfully placed at c2 which won't be able to reach f1 so fast after the sac on h3.

17.Nf1 Rd8 The threat is better than its execution.

[17...Bxh3!? 18.gxh3 Qxh3 19.N3h2□ Otherwise White might as well resign *(19.Ng3 Nf4−+; 19.N1h2 Ng4−+; 19.Qe2 dxe4 20.dxe4 Nxe4−+)* 19...Nh4! looked tempting but I did not see a clear way *(19...d4 20.cxd4 exd4 21.Bxd4 Nh4 22.f4 Bxf4 23.Bxf6* wasnt' clear either *)* 20.f3 Nh5⩱ Surely Black has huge compensation but during the game I wasn't completely sure and hence decided to wait further.]

[17...Nh5!? This was also very tempting 18.bxc6 bxc6 19.exd5 Bxh3 20.N1h2∞ Here also I did not see a clear cut way and I did not want to commit so fast.]

18.Ng3 Be6! For now, just waiting. I did not see how white is improving and realised there are not many useful moves for White. Now that d4 is also not working (thanks to the queen on c8) I wanted to have my bishop on e6.

[18...Bxh3 19.bxc6 bxc6 20.gxh3 Qxh3 21.Qe2!± now the queen is in time. As a matter of fact this was also the only move for White.]

19.Bd2? Mostly he wanted to play c4 at some point and hence removed the bishop from e3 so that d4 will not come with tempo.

[19.Red1 Nf4! 20.Bxf4 exf4]

[19.d4 Nxe4 20.Nxe4 dxe4 21.Bxe6 Qxe6 the advantage of having the queen on c8 22.Qxe4 f5 23.Qc2 e4↑]

[19.Kh2 probably this was practically the best..., get rid of ♗xh3 ideas. Definitely not a move that one would like to make with the bishop on c7. Bd6 20.Bb6 Re8 I prefer Black here.]

19...Bxh3! And now that ♕e2−♕f1 takes one more extra move....this is the time! Just the previous move Black played ♗d7 to e6 and now ♗e6 to h3. All thanks to ♗d2 which prevents ♕e2. **20.bxc6** Including this makes sense as it can only benefit White. **20...bxc6 21.gxh3 Qxh3** No more ♕e2 business. **22.Rb7**

[22.Qd1 Nf4 23.Bxf4 exf4 24.Nf1 dxe4−+]

22...Ng4! With the threat of ...♘h4.

[22...dxe4 I checked this out a bit too. Trying to take on d2 23.Bxf7+ *(23.dxe4 Rxd2−+)* 23...Kh8 24.Ng5! Comps *(24.dxe4 Rxd2−+; 24.Nxe4* I saw this, which is also fine *Nxe4 25.Rxe4 Qxf3 26.Rxc7)* 24...hxg5 25.Bxg6±]

[22...Rd7! The computer says this is also fine. I quite liked my move too. Much more human and stylish :P]

23.Bc1 Now White is coming with ♕e2−♕f1. Black must react fast to stop this only plan of White.

[23.Rxc7 Nh4 is mate in two]

[23.Be3 With the bishop on e3 white is kind of stalemated! White's only plan is to get ♕e2−♕f1 but with the bishop on e3 that doesn't work. Now nobody moves on the kingside and white has absolutely zero plan. Rd7! White's only defence is ♕e2−♕f1 and with the bishop on e3 that does not happen. *(23...Rd6 24.Rxc7 Rf6*

25.Qe2 Nh4 26.Nxh4 Qh2+ 27.Kf1 Qxg3 28.Rc1 Qxh4 29.Ke1 dxe4 also wins but is completely unnecessary *)* 24.Qe2 *(24.exd5 e4−+)* 24...Nxe3 The disadvantage of having the bishop on e3 25.Qxe3 *(25.fxe3 Qxg3+−+)* 25...Nf4−+]

23...Ra7!! Giving no time for ♕e2−♕f1.

[23...Bd6 24.Qe2 Bc5 25.d4 exd4 26.Qf1 White has no problems anymore.]

[23...Rd6!? 24.Qe2 this was my problem *(24.Rxc7 Rf6 25.Qe2 Nh4−+)* 24...Nh4 *(24...Rf6 25.Qf1±)* 25.Nxh4 Qh2+ 26.Kf1 Qxh4 27.Qc2□ I left lff calculating around here as by now I realised the game continuation was much stronger Qh3+ 28.Ke2 Nxf2 29.Nf5 Nxd3 30.Nxd6 Nxe1 31.Kxe1 Bxd6∓ is a computer generated line.]

24.Rxa7

[24.Rxc7 good or bad this was absolutely needed Rxc7 25.Qe2 The only way dxe4 26.dxe4 Nh4! *(26...Rd3* unfortunately this cool move didn't work *27.Qxd3 Nh4 28.Qd8+* This being the problem *Kh7 29.Qxh4+−; 26...Rcd7 27.Qf1 Qxf1+ 28.Nxf1 Rd3 29.Ne3 Nxe3 30.Bxe3 Rxc3 31.Rb1⇄)* 27.Nxh4 Qxh4 28.Kg2 *(28.Qf3 Rd3!−+; 28.Nf1 Rd6−+)* 28...Qh2+ 29.Kf3 Qh3! I had to spot this move well in advance and surprisingly this was the move which somehow took quite some time to spot. 24...Bb6 25.d4

[25.Be3 Bxa7! 26.Bxa7 Nf4−+]

[25...Bxa7 26.exd5 too late for an attack now.... every move counts! exd4 27.Qf5! dxc3 28.Qxf7+!! I don't like to get such shocks during a game! It reminds me of Krasenkow − Nakamura, Barcelona 2007. Kxf7 *(28...Kh8 29.Qxa7+−* not only is the bishop gone but White is also protecting f2 so no more ...♘h4 tricks either *)* 29.dxc6+ Kf6 30.Re6+ Kf7 I didn't really bother to check if White is winning or its just a draw. In any case the computer confirms that this is 0.00.]

26.cxd4 Here I so much wanted to sac three pieces by playing 26...exd4 but at some point, I convinced myself that even if I sacrifice three pieces I would get only one point for winning the game. Mr. Gelfand and his masterpiece 'Positional decision making' took over and Shirov's great 'Fire on board' despite having its momentary excitement couldn't come to the fore. Although that was solely because of my lack of calculation.

26...Bxa7 Now the threat is again ... ♗xd4 and there is no way to stop it.

[26...Bxd4 27.Nxd4 at this stage, I would have been three pieces down and I wanted to make this work but didn't see the exact way Nh4 28.f4 *(28.f3* would reach similar lines and white will also lose the pawn *)* 28...Qxg3+ 29.Kf1

A) 29...Nh2+ 30.Ke2 N4f3 I was trying to mate White here but.. 31.Qc3∞ I didn't see a clear way out here *(31.Rd1!±* computers *)*;

B) 29...Nf3!! this is the move order that I missed 30.Nxf3 Qxf3+

31.Kg1 Qg3+ 32.Qg2 *(32.Kf1 Nh2+ 33.Qxh2 Qxh2−+* and White loses another piece *)* 32...Qxe1+ 33.Qf1 Qb4−+ very computerish. Nevertheless, had I seen all these lines I am sure I would have decided to implement 'fire on board'.]

27.Be3 Just when it looks like White stopped ...♗xd4....

[27.Qd3 Nh4−+]

[27.Qe2 Bxd4 28.Nxd4 Nh4−+]

[27.Rd1 dxe4 28.Qxe4 Nh4−+]

1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.0−0 d6 7.a4 Ba7 8.Na3
We have already seen a similar setup in this update. In that game I played with the bishop on b6 and had time to play ... c6 to save the bishop from exchange by means of ...Bc7.
[A few recent games saw the extremely rare 8.Bg5 Mamedov, R (2655)−Caruana,F (2804)/Shamkir AZE 2016/[Mikhalevski,V].]
8...Ne7 9.Nc2 Ng6
[9...0−0 , which was played by both Carlsen and Anand in their games against each other, might be the most accurate. 10.Be3 Bxe3 11.Nxe3 a5! A similar move can be found in the current game, when Black stops White from advancing his a−pawn and taking space on the queenside. *(*Vishy played *11...Ng6* , which Magnus met by *12.a5!* Carlsen,M (2855)−Anand,V (2770)/ Leuven BEL 2016. *)* 12.Re1 Ng6 13.Bb3 c6 14.Bc2 Re8 15.d4 Qc7 16.dxe5 dxe5 17.g3 h6 18.Qe2 Be6 with equal chances in Anand,V (2770)−Carlsen, M (2855)/Leuven BEL 2016.]
10.Be3
[10.a5!? deserved serious attention.]
10...0−0 11.Bxa7 Rxa7 12.Re1N
Only this move is new. White protects the e4−pawn in order to push his d−pawn to d4.
[Once again 12.a5!? was worth attention.]
[In a couple of recent games White played 12.Ne3 c6 *(12...Ng4 13.Qd2 a5 14.d4 Ra8 15.dxe5 N4xe5 16.Nxe5 Nxe5 17.Bb3±* was slightly more pleasant for White in Anand,V (2762)−Aronian,L (2786)/Moscow RUS 2016 thanks to the pawn in the centre. *)* 13.Qc2 d5 14.Bb3 Ra8 15.Rfd1 Re8 and Black was fine in Grischuk,A (2747)−Karjakin,S (2774)/ Almaty KAZ 2016.]
12...a5! The idea behind the move was explained above. **13.d4 Ra8**
Time to bring the rook back into the game. **14.dxe5 dxe5 15.Qxd8 Rxd8 16.Ng5 Rf8!?**
[During the game we both thought that 16...Nh8!? with the idea of 17...h6, is dangerous because of 17.f4!? though, in fact, after exf4 18.e5 Nd5 Black doesn't seem to experience any problems.]
17.Ne3! A strong move, which also provokes a wrong idea which I was

attracted by in the game. **17...h6**
[It would be safer to play 17...Bd7!? 18.Nd5 h6 19.Nf3 *(* Doubling pawns by *19.Nxf6+ gxf6* shouldn't bother Black. *)* 19...Rfd8! 20.g3 Nxd5 21.Bxd5 Bh3! 22.Rad1 Rd6!= and if White captures the b7−pawn he loses the b2−pawn back.]
18.Nf3 Nxe4 I missed White's 20th move.
[18...Rd8!? is still perfectly playable. 19.Red1 Rxd1+ 20.Rxd1 Bd7 21.Bb3 Bc6 22.Nd2 Nd7! 23.Nd5 Nc5 24.Nxc7 Rd8 25.Nd5 Kf8 *(25...Nxb3? 26.Nxb3 Bxa4* is impossible in view of a discovered attack. *)* 26.Bc2 Bxa4 27.Bxa4 Nxa4 28.Ra1 b5 29.Nb3 Ne7! 30.Nxa5 *(* or *30.Nxe7 Kxe7 31.Nxa5 Rd6!* and Black wins back the b2−pawn. *)* 30...Nxd5 31.Nc6 Rd7 32.exd5 Rxd5 33.b3 Nb6= with equal chances.]
19.Nd5 Bf5 20.Ba2! A very strong move. White takes the bishop away from a likely attack of the e4−knight from d6. Now Black's pieces start hanging.
[20.Bd3? would be strongly met by Nxc3!∓]
[while 20.Nxc7 Rac8 21.Bd3 Rxc7 22.Bxe4 Bxe4 23.Rxe4 f6 is also fine for Black.]
20...c6
[I also considered 20...Nc5! and in fact it would be stronger than the text. 21.Nxc7 *(21.Nxe5 Rae8! 22.Nxg6 Bxg6 23.Nxc7 Rxe1+ 24.Rxe1 Nxa4=)* 21...Rac8 22.Nb5 Bc2 23.Nxe5 Nxe5 24.Rxe5 Rfd8! 25.Nd4 Bxa4 and Black is close to equalising as 26.Re7 can be answered by Be8]
21.Nb6!
[21.Ne3?! is less accurate. Be6! 22.Bxe6 fxe6 23.Nc4 Rf4 24.Ncxe5 Nxe5 25.Nxe5 Nc5!= An important resource, which allows Black to equalise. *(25...Nxf2 26.Re2 Rf5! 27.Nxc6 bxc6 28.Rxf2 Re5* should also be holdable. *)*]
21...Rad8!
[After 21...Ra6 22.Nc4 my rook is stuck on a6. Nc5 23.Ncxe5 Nd3! 24.Nxd3 Bxd3 25.Rad1 Bf5 26.Bc4 Raa8 27.Nd4 Bd7 28.Nb3 Bf5 29.h3± and White's pressure is annoying.]
22.Bb1 Nd6
[22...Ng5!? This idea hadn't crossed my mind. At first, it seems that White wins a piece, but suddenly Black creates counterplay. 23.Bxf5 Nxf3+ 24.gxf3 Nh4 25.Bd7! *(* White can't keep the f3−pawn as *25.Be4* is met by *f5;* while *25.Bg4* is answered by *f5 26.Bh5 g6 27.Bxg6 Nxg6* with equal chances in both cases. *)* 25...Nxf3+ 26.Kg2 Nxe1+ 27.Rxe1 f6 28.Bf5± and despite the rook and two pawns for two minor pieces, White's chances are higher due to the weakness of the light squares and the a5−pawn.]
23.Bxf5 Nxf5 24.Nxe5 Nd6!?⊕ I was already pretty short of time. This move is designed to exchange one of the knights if they jump to c4.
[24...Nf4!? isn't much better. 25.g3 Nd5 26.Nec4 Nxb6 27.Nxb6 Nd6 28.Rad1 Nc8 29.Nc4 b6 30.f4]
25.Ned7 Rfe8 26.Nc5± White's knights occupy very nice positions, while Black's queenside pawns are very weak.
26...f5!? I spent most of my remaining

time on this move. **27.Ne6**
[27.Nb3 Nf4 28.Rxe8+ Rxe8 29.g3 Nd5 30.Nxd5 cxd5 31.Nxa5 Re2 32.b4 was also possible, but yielded Black some counterplay.]
27...Rb8 28.Rad1 Ne4 The point of my 26th move. **29.Nd4** As Axel explained after the game, he simply missed the advance of my f−pawn.
[29.Nd7!? deserved attention. Rbc8 30.Nd4 f4 31.f3 Nd6 32.Nb6 Rxe1+ 33.Rxe1 Rd8 34.Kf2±]
29...f4 He missed this move. **30.Nf5?** White started playing on my time and made a mistake.
[30.Nb3! was correct. f3! The only chance to create counterplay. 31.g3 Ng5 32.Rxe8+ Rxe8 33.Kf1 Re2 34.Rd2± and due to the weakness of Black's queenside pawns White is clearly better.]
30...Nc5!= Now Black has a target on a4. **31.h4** White connected his hopes on the advance of the h−pawn, but
31...Re5!?
[31...Rxe1+ 32.Rxe1 Nd3 33.Re4 Rf8 34.h5 Nge5= is also equal.]
32.h5 Nd3!? An interesting trick, though it wasn't necessary.

36.Ne7+ Kf7? 0.97/25 After this unfortunate move White is better again.

15.Bxd5 Nf4 16.Be4 Qd6 17.d4 f5 18.Bc2 e4 19.Ne5 Bc7N An important novelty for the theory of the variation. In this line Kotronias has experience with the White pieces, therefore his improvement on the Black side is most likely a result of careful analysis of the position. Black doesn't expose his rook on e5 yet (he might need this square for other pieces as well) and instead makes a useful move with the other rook, which wasn't doing much on a8 anyway.

This game continues the discussion initiated in the previous one. Black will develop mechanically, allowing White to establish decisive kingside pressure.
12...Qd7 A mechanical move, which does not improve Black's position. Black should have hurried with ...d6−d5.
[12...Bxb3 13.axb3 d5]
[12...d5]
13.Bc2 Ne7 The same plan as above.

Tata Steel−A 82nd (3) 13.01.2020

[Van Foreest,Jorden]

1.e4 e5 2.Nf3 Nc6 3.Bc4 I prepared the Alapin variation for this tournament hoping it would catch my opponents off guard. Dubov is a renowned expert in the Sveshnikov, and Rossolimo, while the Alapin is seldom seen at high level.

3...Bc5

7...h6 8.Ng3 0−0 9.0−0 Ba7

Up to this point we are following main theory. Instead of the text move, 9...Bg4 was played by Carlsen and Anand amongst others. The text is slightly less popular but also seen frequently. **10.Bb3 Re8 11.h3** White has to challenge the c4 pawn, it clamps down the white forces on the queen−side. Once gotten rid of the nuisance, white can aim to build a strong centre. **11...Be6 12.Bc2 d5 13.exd5 Nxd5**

14.Re1 Qd6 15.Nh4 Qe7 16.Nhf5

We have reached move 16 in the game, but still there have been a number of games played. Dubov chose the most popular and logical move. However, I believe it not to be the most accurate one.

[16.Qh5! Nnext is ...Rae8 and Black seems to have just enough activity. Rad8?! It is unwise to take the pawn, since after 17.d4 both threats of ...Rf6 and ... Re1+ are difficult to deal with.

A) 17...exd4 18.Bxh6 gxh6 19.Qxh6;

B) 17...Nf6 18.Qf3 Bd5 *(18...exd4 19.Nhf5 Qf8 20.Nxh6+)* 19.Qd3;

C) 17...Nf4! I think this move, aiming for an endgame, is better. 18.Bxf4 exf4 19.Nf1 *(19.Ngf5 Qg5 20.Qxg5 hxg5 21.Nf3 g6 22.Nh6+ Kg7 23.Ng4 f6)* 19...Rd5 20.Qxd5 Bxd5 21.Rxe7 Nxe7]

16...Qf6 17.Qf3! A strong move, leaving Black a difficult choice.

[17.Qg4 With 2 strong bishops for White, the black position is very unpleasant here. g6? 18.Nxh6+!−+ is not advisable. Kf8 19.Ne4 Bxf2+ 20.Nxf2 It may seem that White has a very pleasant position due to the advantage of having the bishop pair in an open position. Yet, with a couple of strong moves Black can still maintain the balance: Bxg4! 21.Nhxg4]

17...g6 With this move Black initiates a small tactical sequence, which turns out favourable for White. I believe 17. ..exd4 would still have been good enough for equality.

[17...Kh7 18.d4 g6 19.Ne4 *(19.Be4 exd4)* 19...Qxf5 20.Ng5+ wins for White. Qxg5 21.Bxg5 loses the knight. hxg5 22.dxe5]

[17...Kh8 18.d4 is a line I calculated during the game. Although White is definitely better, nothing is clear yet. *(18.Re4 g6 19.Nh4 Qg7)* 18...g6 trying to disrupt White's plans is ineffective: 19.Be4! exd4 20.Nxh6 Qxf3 21.Bxf3 loses a piece for Black. Kg7 This is possible, but I was not sure about the complications after both 19... e4 and even 19...Qxb5. 22.Bd2]

18.Nxh6+ Kg7 The point of Black's previous move. **19.Qxf6+** Playing it simple. **19...Nxf6 20.Ne4** Tactical events have come to an end. It is clear that if White manages to coordinate his pieces and push c3−c4 he will be on top. It is up to Black to create counterplay, but this is very hard, mainly because the knight b6 is seriously out of the game.

[20.Bd1 In hindsight I would say this would have been a more practical way of playing, limiting the black counterplay. Rad8! would have been the best way to finish black off. I was about to go for it, but then I noticed a defence, or so I thought. 21.Be2 Nd5 22.Ng4 Nf4 *(22...f5* I saw the correct winning line after 31...Qxd1 but here I was not sure how to win. Hence I went for 29.Bb4. It turns out I missed an easy way: *23.Nh2! Nf4 24.Bxf4 exf4 25.Ngf1* and with Rd8+ next White is completely winning. *)*]

20...Nh7

[20...Nxe4 is a nice line, in which White promoted to a new queen and dealt with Black's threats. 21.dxe4 Rh8 22.Ng4 Bxg4 23.hxg4 Rh4 is also winning for White. 24.Kf1 *(24.Bd1)*]

21.g4 After some consideration I decided it was worth giving up the exchange, since in return White gets wonderful positional compensation.

[21.h4 Rf8 *(21...f5!* I had missed

this move, stopping the pawn from queening, and threatening ...Bd4+. Suddenly Black would be very much back into the game. *22.Ng5!* is probably still winning. *Bd5* is the computer suggestion, and with the evaluation of +6 we can be sure White is winning. During the game it was not all that clear to me what was going on though. *23.Nxh7 Kxh7!* The only move to win. *24.g4; 21...Rad8! 22.g4 f5 23.gxf5 gxf5 24.Ng3)* 22.g4 f5 was the line I saw during the game, thinking the pawn is unstoppable.]

21...f5 Although it is an obnoxious choice, I think my opponent should have decided to take the exchange since in the game my pawns will steamroll forward and Black finds it difficult to get anything in return. **22.gxf5 gxf5 23.Ng3 f4 24.Ngf5+ Kg6**

[24...Kf6 25.d4! Ng5 26.Ng4+ Kf7 27.Kg2+− Bd5+! Simply capturing the white queen would have made things much more complicated for me, especially considering I was planning on recapturing 34.bxc4 here which turns out to be a severe mistake: 28.Kf1]

25.d4 Ng5 This is quite a sad square for the knight, but there wasn't anything better. **26.Kg2 Bd5+** A clever idea, attempting to get the knight back into the game via b5. **27.Kf1 Nf3 28.Rd1**

[28.Re2! This counter−intuitive recapture would have been immediately winning, the key difference being that the rook defends a lot of important squares along the fourth rank, making it impossible for Black to create any counterplay against my king.]

28...Rad8 By this point I knew my position should be winning. Still Black has chances of creating a mess because of his far advanced pawns on the kingside. **29.Ne7+ Kxh6** My opponent sensibly tries to complicate matters, since in the long run my strong pawns will be decisive. **30.Nxd5** I decided to go for the most direct idea, thinking it was basically game over with Black losing material in every line. However, I had missed the very inventive idea Dubov came up with. **30...Nfxd4 31.cxd4 Rxd5! 32.dxe5 Rxd1+** The sequence of 31...Qf5 followed by 32...Re4 had escaped my attention. Even though I am a full rook up it is not so easy to deal with the counterplay Black has created. **33.Bxd1** After some thinking I went for this interesting move sacrificing my queen but trying to promote my c−pawn. **33...Kg5? 34.h4+ Kf5 35.Bc2+?!** Not the most exact way, but it should still be good enough for the win.

[35.Bd2 Bd4+−]

35...Kg4?! After this, there will be no more chances. **36.Bd1+**

[36.Bd2!]

36...f3 37.Bg5 Nxe5 38.Bc2

[38.Rc1 Nd3 39.Rc4+! Once again the rook on the 4th rank proves very useful, covering all check's from the black queen. Kh3]

38...Nc4 39.Re1 Rxe1+ 40.Kxe1 Nxb2 41.Bf6 Time control has been reached, and there should be many ways to win. I chose the most straightforward one. **41...Nc4 42.Bg6 Bc5** Black has a few checks, but the white king will find shelter, after which the huge material surplus will tell. **43.Bf7**

[43.h5+− Bf8! was the last chance of creating a mess. Nevertheless White is still winning after]

World Blitz 2015 (18.64) 14.10.2015
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Nbd2 d6 7.0−0 Ba7 8.Bb3 Ne7 A relatively rare move order.
[It has been a while since we last analysed this line and in that game Black played the main line 8...0−0 Lahno, K (2488)−Ivanchuk, V (2786)/ Cap d'Agde FRA 2008/[Mikhalevski, V].]
9.d4 Ng6 10.Nc4 An interesting novelty. White is trying to exploit the fact that Black's king is stuck in the centre.
[In two preceding games White tried two different moves, which transposed into each other. 10.h3 0−0 11.Re1 and so on. Vajda, L (2632)−Zhao, Z (2537)/Canberra 2013.]
10...Nxe4?! A wrong reaction.
[10...exd4! was necessary. 11.cxd4 0−0! Black leaves White with the

centre, but the latter can't keep it due to ...d5 and ... Nxe4 ideas. 12.e5 *(12.Re1 b5 13.Na5 Bb6 14.Nc6 Qd7 15.d5 Bb7 16.Qc2 Rae8=)* 12...dxe5 13.Ncxe5 Bf5 with roughly equal chances.]

11.dxe5

[11.Re1! was even stronger. Bf5 12.Ne3 Bd7 *(12...Be6 13.Bxe6 fxe6 14.Ng4!±; 12...Bc8?! 13.Nd5±)* 13.Nd5 f5 14.Be3 c6 15.dxe5! and Black has nothing better than Bxe3 16.Nxe3 dxe5 17.Nd2! , which leads to a strong initiative.]

11...d5 12.Nd6+! Nxd6! This capture is necessary.

[After 12...cxd6? 13.Qxd5 0−0 14.Qxe4 dxe5 15.Nxe5± White wins a pawn.]

[13.Bg5!? deserved attention. f6 14.exd6 Qxd6 *(14...fxg5?* loses to *15.Qxd5+−)* 15.Re1+ Kf8 16.Be3± with strong initiative for a pawn.]

13...c6

[13...Qxd6! would be more accurate.

A) 14.Re1+ Be6 15.Qxd5 *(15.Bxd5?!* is strongly met by *Rd8! 16.Bxe6 Qxd1 17.Bd7+ Kxd7 18.Rxd1+ Kc6* and leads to a slight edge for Black. *)* 15...0−0−0! 16.Qxd6 Rxd6 17.Bxe6+ Rxe6 18.Rxe6 fxe6 19.Be3 Bxe3 20.fxe3 Kd7 and Black doesn't have any problems.;

B) 14.Bxd5! 0−0 15.Re1 Ne7 16.Bb3 Qxd1 17.Rxd1 Ng6 18.h3! h6 and Black is just a tiny bit worse due to the problem of developing the light−squared bishop.]

14.Re1+ Be6 15.c4! Qxd6 Another slight inaccuracy.

[It would be better to start with 15...0−0!? 16.cxd5 cxd5 17.Bxd5 Qxd6 18.Bxe6 *(18.Bxb7?* is met by *Bxf2+!∓)* 18...Qxd1 19.Rxd1 fxe6 20.Be3! *(20.Re1?* is inaccurate in view of *Nh4!)* 20...Bxe3 21.fxe3 Rac8 and White is just slightly better thanks to a better placed knight.]

16.cxd5 cxd5 17.Qxd5!

[17.Bxd5?! is met by Rd8! again. 18.Bxe6 Qxd1 19.Bd7+! Kxd7 20.Rxd1+ Ke6!=]

17...Qxd5?! Another natural move, which turns out to be inaccurate.

[17...0−0−0! 18.Qxd6 Rxd6 19.Bxe6+ Rxe6 20.Rxe6 fxe6 21.Bd2± White is slightly better thanks to a weak pawn on e6.]

18.Bxd5 0−0−0 19.Bxe6+ fxe6

20.Be3!

[20.Rxe6 Rd1+ 21.Re1 Rxe1+ 22.Nxe1 Rf8 23.Be3 Bxe3 24.fxe3 Ne5 yields Black certain compensation for a pawn thanks to his active pieces.]

20...Bxe3 21.Rxe3± White is better thanks to a weak pawn on e6 and a slightly misplaced knight on g6.

21...Rhe8

[After 21...Rd6 I didn't like 22.Ng5 , but it can be answered by Rd2! 23.Nxe6 Rxb2 24.Nxg7 Rf8 25.Re8+ Rxe8 26.Nxe8 Nf4± with counter chances thanks to the active rook.]

22.g3! Restricting my knight on g6.

22...Rd5! 23.Rae1 Kd7 24.h4! h6!

25.Rc3 White is preparing a doubling of rooks on the c−file.

[25.Kg2!?]

25...Rf8

[25...Ke7!? deserved attention,

preparing to cover the seventh rank with the d5−rook.]

26.Rec1 Rf7?! This move loses a pawn, although Black retains drawing chances.

[26...Ne7! with the idea of ...Nc6 was strong since 27.Rc7+ Kd6 28.Kg2 Rdf5 forces White to come back to c3. 29.R7c3 Nc6 and Black is close to equalising.]

27.Rc7+ Ke8 28.Rxf7 Kxf7 29.Rc7+ Kf6 30.Rxb7 Ne5! Usually rook endgames offer most chances of survival. **31.Nxe5 Rxe5±** Despite White's extra pawn his win isn't guaranteed. **32.a4 Rd5 33.b4 Rd4** My idea was to play 34...a5 and trade a pair of pawns on the queenside, which White prevents with his next move.

[The immediate 33...g5!? makes sense.]

34.a5! g5! Black should reduce material on the board. **35.hxg5+**

[35.h5!? is an interesting try, but Black seems to hold. For example, g4 36.Kf1 Re4 37.Rb6 Kf5 38.Rxa6 Rxb4 39.Ra8 Ra4 40.a6 Kg5 41.a7 Kxh5 42.Ke2 Ra3 43.Kd2 Ra2+ 44.Ke3 Ra3+ 45.Ke4 Ra2 46.Ke5 Ra6 47.Kf6 e5+! *(47...Ra5?* Suddenly leads to checkmate after *48.Rc8! 35...hxg5 36.Kf1 Re4 An attempt to keep the king away from the queenside.

[36...Rd2!? 37.Rb6 Rb2 38.f3 Ke5 39.Rxa6 Rxb4 40.Kg2 g4 41.fxg4 Rxg4 42.Ra8 Ra4 43.a6 Kf6 44.a7 Kg7 is a draw, but White may have chances if he doesn't bring his a−pawn to a7.]

37.f3 Re3 38.Kf2

[38.Kg2!? White could consider bringing his king to g4 after exchanging a6 for b4.]

38...Rb3 This way Black is targeting both b4 and f3−pawns. **39.g4 Ke5 40.Rb8?!** After this inaccurate move a draw is relatively easy.

[40.Rb6!? promised winning chances, but Black seems to hold again. For example, Kf4 41.Ke2 e5! *(41...Ke5? 42.Kd2 Kd5 43.Kc2 Rxf3 44.Rxa6 Kc4 45.Rb6 Rf2+ 46.Kd1 Ra2 47.a6 Kd3 48.Ke1 e5 49.b5 Ra1+ 50.Kf2 e4 51.Rd6+ Kc4 52.b6 Rxa6 53.b7 Ra2+ 54.Ke3 Rb2 55.Rd7 Kc5 56.Kxe4 Kc6 57.Rg7 Rb5 58.Rxg5 Rxb7 59.Rg6+ Kc5 60.g5+−)* 42.Kd2 Kxf3 43.Kc2 Ra3 44.Rxa6 e4 45.Rf6+ Kxg4 46.a6 Ra2+ 47.Kd1 *(47.Kb3 Ra1 48.Kc2 Ra2+ 49.Kd1)* 47...Kh3 48.b5 Ra5 49.b6 Ra1+ 50.Kd2 Ra2+ 51.Kc3 Rxa6 52.b7 Rxf6 53.b8Q Kg4= with a draw in according to the Nalimov tablebases.]

[20...Rab8 21.0−0 Kg7 is also fine for Black.]
21.Ndf1?! White postpones castling, first he would like to improve his knight. Moreover he is threatening ♘e3, ♘hg4 to exert pressure on h6. Nevertheless

this is an inaccuracy, because Black can gain the initiative.

[21.0−0 was the most natural.]

21...Rfb8 22.Ne3 Bxe3 Of course the knight has to be taken, otherwise ♘hg4.

23.Qxe3 Be6 A logical continuation.

[The smart 23...Nc4! was the strongest reply, 24.dxc4 Rxa2 25.0−0 *(25.Rxb8 Ra1+ 26.Ke2 Rxh1∓)* 25...Rxb1 26.Rxb1 c5∓ and White's pawn structure is weak.]

[25.Qxa2? loses immediately, because of Nc4! 26.Qc2 Na3−+]

25...Rxb8 26.Qxa2 Qe6 27.Qa1?! Too passive.

[27.Qxe6 was important, fxe6 28.Ke2]

[or 27.Qc2= followed by 0−0 and White can hold his position.]

27...Nb3! 28.Qd1 Nc5 This was a good knight manoeuvre, now the c3− and d3− pawns are weak. **29.0−0 Rb3 30.Qc2 Ra3!** Giri continues the pressure with very deep moves! **31.Rb1?!**

[Still 31.d4 was more accurate, but after Qb3!∓ Black's chances are better.]

31...Qa2! 32.Qxa2 Rxa2 Now White loses a pawn. **33.Ng4**

[33.Rd1 Ra3∓]

To be honest I have never trusted this line as I never liked the position after **10.f3** but as many strong players went for this line I had a look at it again.
10...Bh5 I think that this move doesn't offer enough conmpensation to Black.
[So here my proposition is the yet untested 10...Bf5!? Black attacks the pawn on c2, which is very important for the white pawn stucture. Now White has several ways:
A) After the direct 11.Qxe5 Bxc2 Black enjoys his compensation and a good game after

POL−ch Warsaw (6) 23.02.2012

[Bartel,Mateusz]

Bartosz Socko is a good friend of me, but at the same time, one of the most inconvenient opponents. I have lost many games (we are talking only about classical time control) to him, winning only one − at the previous Polish Championship. This time, I was supposed to play Black and as the statistics say, before that game I had lost all my games vs. Bartosz with Black! The fact that after a good start in the tournament (3,5/4) I had easily lost my game in round 5 (vs Kamil Miton) and the next day I was supposed to play Bartosz, wasn't really improving my situation... **1.e4 e5 2.Nf3 Nc6 3.Bc4** I also expected 3.♗b5 and then both ♗xc6 and ♗a4. **3...Nf6 4.d3** One can say that it was a pleasant surprise, as after 4.♘g5 Bartosz has a... 100% score (or almost) vs such players as Naiditsch, Bacrot etc...! Of course, I was prepared, but would it be enough for such a monster?! **4...Be7 5.Nbd2** Mikhalevski, V: 'A rather unusual continuation. White's knight is likely to choose the d2−f1−g3 route.' I don't think that this move is correct − I'd prefer more natural 0−0 or c3 connected with ♗b3.

[The main line is 5.0−0 Radjabov, T (2740)−Ponomariov, R (2733)/Medias

ROU 2010/[Mikhalevski, V].]
[5.c3 Slaby, J−Ehrenfeucht, W/Polish Ch., Polanczyk, Poland 2000/[Paul Motwani].]

5...0−0 6.0−0 d6 Mikhalevski, V: 'Black protects the e5−pawn and creates a positional threat of 7...Na5, exchanging the light−squared bishop.' **7.Bb3** Mikhalevski, V: 'Once again White chooses an extremely rare continuation, though the idea behind the move is similar to 7.c3.'

[Mikhalevski, V: 'Usually White prevents the aforementioned threat by means of' 7.c3 Mikhalevski, V: 'and after' was much more logical, or Na5 the bishop escapes the exchange via b5 and a4. 8.Bb5 a6 9.Ba4 b5 10.Bc2 c5 Now the position reminds us of Chigorin's System in the Spanish with the d−pawn on d3 instead of d4. White's extra tempo on Re1 isn't very important since the rook is likely to go to e1 anyway.]
[7.a4 − both with the idea of protecting the bishop on c4. The move in the game also protects the bishop, but the way is a bit improper.]

7...Na5 8.Ba4 c5 Mikhalevski, V: 'Black takes control of the d4−square trying to obtain a good version of the Chigorin system.' **9.c3** Mikhalevski, V: 'White vacates the c2−square for the bishop and prepares d4.'

[The only preceding game featured 9.Re1 Qc7 *(9...Rb8!?)* 10.c3 Nc6 11.Nf1 Be6 12.Bg5 Rad8 Dimitrova, L (2070)−Dimitrova, R/ Bankia 1991. Now White should have played 13.Ne3 fighting for the d5−square.]

9...Rb8! Mikhalevski, V: 'This looks more useful than the Spanish 9...a6.' Maybe it is not very difficult to play this move, but you can also miss it. The point is that Black wants to play ...b5 and get a very Ruy Lopez−like structure, but instead of the useless a6 he will have the useful ♖b8 − which is helping to play the move ...b4 then. **10.d4 b5 11.Bc2 Qc7** Mikhalevski, V: 'While Black played all useful moves White lost at least one tempo on d3−d4 if we compare with the Chigorin.' **12.d5** A typical, normal move. The position is very similar to a classical Chigorin variation, but there are several significant differences − first of all White has played d2−d3−d4, so he lost a tempo, secondly Black has played ♖b8−b5 not a6−b5. So Black is, at least, 2 tempi up in comparison to the classical position. Also the position of the knight on d2 is not perfect − of course, it usually goes there, but rather in a clarified situation, and here − it seems − nothing is clear yet. **12...c4!?** Mikhalevski, V: '!' Mikhalevski, V: 'An important move, which prevents 13.b3. The latter restricts the knight on a5, when in the game it will be transferred to c5.' An interesting attempt. Usually, with a rook on a8 and a pawn on a6, this is a weak move, as after a2−a4, Black has problems with the a−file. At this moment (with the knight on d2!) a4 is totally not working due to ...b4 (thanks to the rook on b8). So, why not play c4, which is preparing the c5−square for the knight from a5? **13.h3 Nb7 14.Re1**

[Nothing was offered by 14.a4 a6 and the b3−square seems to be very weak now.]

14...Bd7 Preparation of ...♘c5 and also − very popular in the so−called soviet

chess school − "connecting" the rooks. What that connection gives − no−one really knows, apart of the fact that they are connected.

[I didn't like the immediate 14...Nc5 , because of 15.b4 (without the knight on c5 this never works due to the hanging pawn on c3) cxb3 16.axb3 a5 17.b4 and the knight can't really jump to a4. So, that's why I have played ...♗d7 − to prepare the square a4 for the knight in that line.]

15.Nf1 Nc5 Mikhalevski, V: 'Black has obviously won the opening battle winning one and a half tempi compared to the aforementioned Chigorin System in the Spanish: one on d3−d4, half on ...Rb8 instead of ...a6.' **16.g4?** Mikhalevski, V: '?!' Mikhalevski, V: 'White wants to obtain a nice outpost on f5, but being behind in development allows the following beautiful combination.' This move is always a bit risky, as there are many ways for Black to get a nice position. Apart from the move played in the game and the move suggested in the comments you can also try something like ...h7−h5. I recommend you to check the game Hou Yifan−Kosteniuk, Nalchik 2008, where in a similar position (white pawn on a3, black on a6, the black rook on a8) Black played ...h5 and won convincingly.

[Probably it was time to play 16.b4 and after cxb3 17.axb3 a5 18.Bd2 Rfc8 it's clear that Black is very fine, thought White is ok as well.]

[16.Ng3!? was safer, though promised no advantage.]

16...Nfxe4!? Mikhalevski, V: 'An intuitive piece sacrifice. Bartel is faithful to his style, also a recent victory in the Aeroflot Open gives one lots of confidence.' Objectively, this move is not great, but I couldn't stop my hands, when I realised that this may work. What's the point? The fact that it will be difficult for White to coordinate his pieces. So, we can say that this is a positional sacrifice for long term initiative. In practical play − this is dangerous, but as it is with "fire on the board", dangerous for both sides...

[Objectively, it was better to play the much more "normal" 16...b4 and begin an operation on the queenside. It's not easy to say if Black is already better, but it seems so.]

[Black could have continued playing on the queenside by means of 16...a5]

17.Bxe4? Not a big mistake, but the alternative looked more natural.

[After 17.Rxe4! Mikhalevski, V: 'was more accurate, but probably White underestimated Black's initiative in the game.' Nxe4 18.Bxe4 f5 19.gxf5 Bxf5 20.Ng3 Bc8! *(* worse is *20...Bxe4 21.Nxe4* Mikhalevski, V: 'with a double−edged position.' *Qd7 22.Nfg5 Bxg5 23.Nxg5 Rf6 24.Qg4* and White is better*; 20...Bxh3?* Mikhalevski, V: '?!' Mikhalevski, V: 'is met by' *21.Nxe5* Mikhalevski, V: '!' *dxe5 22.Qh5 g6 23.Qxh3±)* 21.a3! Qd7 22.Qf1 White should be better, although the position is very unclear. However, there is no doubt that it was the path White should have chosen.]

17...Nxe4 18.Rxe4 f5 19.gxf5 Bxf5 20.Ng3 Mikhalevski, V: '!?' Mikhalevski, V: 'White is trying to obtain a position from the 17.Rxe4 line, but here Black isn't forced to capture the rook on e4.'

[Worth considering was 20.Rg4 Bxg4 21.hxg4 b4 with a sharp, unclear position.]

20...Qd7! Mikhalevski, V: 'Bartel brings the queen closer to the kingside.' Very important move. Compare things to the position arising after 17.♖xe4. Then there would be a bishop on e4 and Black wouldn't be able to play this move. Now it's possible and strong − Black is still hoping to take on e4, but much more important is the pawn on h3 − if it dissapears, than Black can have a new target − the white king. **21.Re1**

[Mikhalevski, V: 'After' 21.Nxf5 was very risky: Qxf5 Mikhalevski, V: 'White is going to lose the f2−pawn.' 22.Nd2 *(22.Re3 Bd8)* 22...Qxf2+ 23.Kh1 Bg5]

[, but it was possible to play 21.Re3 though it looks very non−human − e3 should be the place for a bishop to protect f2.]

21...Bxh3 Mikhalevski, V: 'Black's threat of 22...Bg4 forces' **22.Nh2** The threat was ...♗g4. **22...Rf6!?** Mikhalevski, V: 'Black doubles the rooks on the f−file and brings one of them to g6.' There were other moves, like ...♗h4 and ...♗d8, but this is the most logical − the target is the king! **23.Be3** Objectively, a bit incorrect.

[Mikhalevski, V: 'Black isn't worried by the bishops exchange after' If White had played 23.Bg5 nothing would stop me from Rxf2!? and with 3 pawns for a rook and the pair of bishops Black would have a strong, long term initiative, e.g. *(23...Rg6* as the f2−pawn loses one of its defenders. *24.Bxe7 Qxe7* with good compensation. *)* 24.Kxf2 Bxg5 25.Kg1 Rf8 26.Ne4 Bd8 and I think that in practical play Black's position is more promising, as the white king is unprotected.]

23...Rbf8?!

[23...Rg6 was better, to have after 24.Kh1 the move Bh4 . Then there is nothing else for White but 25.Rg1 and the position after Bxg3 26.Rxg3 Rxg3 27.fxg3 Bf5 is balanced (but I would prefer Black, as the white squares seem to be dramatically weak).]

24.a4? Mikhalevski, V: 'This seemingly logical move is inaccurate.' It seems logical, as White wants to activate his rook from a1, but it is simply too slow.

[Mikhalevski, V: 'In case of' More logical and simply the strongest was 24.Kh1 Mikhalevski, V: 'Black can consider a positional exchange sacrifice.' . Now again, I probably would sacrifice: Rxf2 *(* now *24...Rg6* is a bit too slow *25.Rg1 Bh4 26.Ne4 Bf5 27.f3±)* 25.Bxf2 Rxf2 26.Re2 Rf4 Mikhalevski, V: 'and the position remains tense.' , but it seems that with the king already on h1, White is a bit better prepared for such a position as he was in the commentary to 23.♗g5. Anyway, the position remains very unclear, with chances for both sides.]

24...Rg6 Mikhalevski, V: '!' Mikhalevski, V: 'It seems that White missed this strong intermediate move. Now the threat of 25...Bh4 is more than serious.' **25.Qh5?** Mikhalevski, V: 'After this mistake Black is better.' White wanted to take the h4−square under control, but this move is very unfortunate − first of all Black can take the pawn, secondly − the queen is really bad placed on the h−

file.

[Now the move 25.Kh1 Mikhalevski, V: '!' Mikhalevski, V: 'was necessary, with the idea to meet' was absolutely necessary. After Bh4 Mikhalevski, V: 'with' *(*during the game I was mostly calculating: *25...Bg4 26.Nxg4 Rxg4 27.Kg2 Qf5* with serious pressure. *)* 26.Rg1 Bxg3 27.Rxg3 Rxg3 28.fxg3 Qf5 Black should be a bit better. 29.Qd2 Qe4+ 30.Kg1 bxa4 31.Bxa7= with hopes for a successful defence.]

[It's also worth of mentioning that 25.axb5 Mikhalevski, V: '?' Mikhalevski, V: 'loses to' was losing because of the elegant line Bh4 26.Rxa7 Mikhalevski, V: 'allows' *(26.Kh1 Bxg3 27.fxg3 Rxg3* and White can't protect the king and avoid big material losses. *28.Qd2 Bg2+ 29.Qxg2 Rxg2 30.Kxg2 Qxb5−+* and White is lost. *)* 26...Bxg3 Mikhalevski, V: '!' 27.Rxd7 Bxf2+ 28.Kh1 Bg2#]

25...bxa4 Mikhalevski, V: '∓!' Mikhalevski, V: 'Black has obtained enough material for the piece, while the attack is still going on.' A very practical decision − White is totally paralysed, so why not take a pawn?!

[What was possible later, at this moment would be premature: 25...Bg4 26.Nxg4 Rxg4 27.Qh3 h5 28.axb5 h4 29.Rxa7 Qf5 30.Kh2 hxg3+ 31.fxg3 Qc2+ 32.Qg2 Qh7+ 33.Qh3=]

26.Ra2 Mikhalevski, V: '?!' Mikhalevski, V: 'Socko underestimates the threats.' What else?!

[Now and a move later the move 26.Kh1 wasn't possible due to Bg4 27.Nxg4 Rxg4 28.Kg2 Rh4−+]

26...Bd8? Mikhalevski, V: '!' Mikhalevski, V: 'A strong manoeuvre. Black brings the passive dark−squared bishop to b6 and exchanges White's important defender.' During and shortly after the game I was very proud of this move. The bishop is Black's weakest piece and Black wants to exchange it for the very strong bishop from e3, which is protecting the important f2−square. What can be more logical?! Unfortunately, the whole plan is wrong, due to tactical tricks.

[For engines, and for humans also, a very clear win is on offer after 26...Bg4! 27.Nxg4 Rxg4 28.Qh3 and now the simple h5 with the idea ... h4 is killing, as after 29.Qxh5 Rh4 30.Qg6 Rf6 with ...♕h3 to come is finishing the game immediately.]

27.Rea1 Mikhalevski, V: '?' Mikhalevski, V: 'Leaving the e3−bishop without defence could become deadly for White, although it wasn't easy to realize that.'

27...Bb6? Mikhalevski, V: 'Black returns the favour.'

[Mikhalevski, V: 'After the correct' It was still posible to win after 27...Bg4 Mikhalevski, V: '!' but now lines would be a bit different: 28.Nxg4 Rxg4 Mikhalevski, V: 'the threat of 29...Rh4 makes White's position highly unpleasant.' 29.Qh3 *(29.Rxa4 Rh4 30.Qe2 Qh3−+* wins back a piece after 31...Qh2 and 32...Qxg3.*;* or *29.Qh2 h5 30.Rxa4 h4−+)* 29...h5 *(29...Rf3! 30.Kg2 Rxe3! 31.fxe3 Bh4 32.Rxa4 Rxg3+ 33.Qxg3 Bxg3 34.Kxg3 Qb5∓* and Black is likely to convert his advantage into a win. *)* 30.Rxa4 h4 31.Rxa7 Qf5−+]

28.Bxb6 axb6 29.Rxa4 Qf7 Mikhalevski, V: '!' Mikhalevski, V: 'The only move.' So, here is the key position of the game. I was sure that Black is winning and... the game showed me that I was right. Right, until I checked the game with... the audience! I commented on the game to the spectators and my brother, who was among them, showed me the correct line. **30.Qe2??** Mikhalevski, V: '?' Mikhalevski, V: 'A decisive mistake.'

[Mikhalevski, V: 'In order to save the game White should have found the following idea:' White could have saved the game by 30.Qxh3! Qxf2+ 31.Kh1 Rxg3 32.Qf1 and now we have a dead drawn situation as after each move with the queen, for example Qc2 what I had planned, White can play *(32...Qe3* Now it may seem that White loses due to some deadly threat along the a8−h1 diagonal, but *33.Qxf8+!!* saves the day. *Kxf8 34.Rf1+! Ke7 35.Ra7+ Ke8 36.Ra8+* with a perpetual. *)* 33.Qxf8+! what my brother showed during analysis! Now , thanks to the d5−pawn, White has a perpetual! Kxf8 34.Rf1+ Ke7 35.Ra7+ Ke8 36.Ra8+=]

30...h5! Mikhalevski, V: '−+!' Mikhalevski, V: 'White can't stop 31...h4 and so he is doomed.' This move was missed by my opponent.

[Nothing would come of 30...b5 (in order to protect c4 and take on d5 later on), because of 31.Ra8 Qxd5 32.Rxf8+ Kxf8 33.Qf3+ Qxf3 34.Nxf3 and White is simply better.]

[Of course, also 30...Qxd5 was wrong, as White can play 31.Qxc4]

31.Ra8 There was nothing better, but other lines were a bit more complicated.

[The crucial was 31.Rxc4 Qxd5 Mikhalevski, V: 'or' 32.Qe4 *(32.Re4 h4* Mikhalevski, V: '−+' Mikhalevski, V: 'is also hopeless.' *)* 32...Qd2! Mikhalevski, V: '−+!' and White is hopeless now 33.Qxg6 *(33.Nf3 Rxg3+; 33.Qe1 Rxg3+)* 33...Qxf2+ 34.Kh1 Qg2#]

31...h4 The rest is simple − Black is simply a lot of material up. **32.Rxf8+ Qxf8 33.Qf3 hxg3 34.fxg3 Qxf3 35.Nxf3 Rxg3+ 36.Kf2 Rg2+** Mikhalevski, V: 'White is two pawns down and his position is completely lost.' **37.Ke3 Bg4** Mikhalevski, V: '!' Mikhalevski, V: 'Black is precise to the end.' The simplest.

[White hoped for 37...Rxb2?? 38.Ng5±]

38.Ra8+ Kf7 39.Ra7+ Kf6 Mikhalevski, V: 'The threat of 40...Rg3 forces White to resign, while any knight move leads to mate in one, 40...Re2. A nice win from the 2012 Polish Champion! White's setup doesn't promise any opening advantage.'

1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4 exd4 5.e5 The Scotch Gambit is rather rare at top levels but I've played it a few times recently. Play often become very strategically complex. **5...d5 6.Bb5 Ne4 7.Nxd4 Bd7**

[7...Bc5 8.Be3 Bd7 *(*or *8...0−0 9.Nxc6 bxc6 10.Bxc5 Nxc5 11.Bxc6* are the other mainlines. *)*]

8.Bxc6 bxc6 9.0−0 Be7 A rare line which I always thought was rather passive but is probably fully playable.

[9...Bc5 is by far the main move]

[While 9...c5 Pert,N (2570)−Howell,D (2663) Bournemouth 2016, was played earlier this summer.]

10.f3 Nc5

[10...Ng5 11.f4 Ne4 would just transpose.]

11.f4 I started spending time around here trying to remember my analysis.

11...Ne4 Jones,G: 'would just transpose.'

[11...0−0 12.f5 looks very dangerous, despite engines not being convinced. In the game Naiditsch elects to keep flexible. Ne4 Jones,G: 'again looks to be asking for trouble and would transpose to 11...0−0.' *(12...Bg5 13.Nc3 Re8 14.Re1 Bxc1 15.Qxc1 Qh4 16.Qe3 Ne4* Horvath,A (2487)−Bitoon,R (2455) Melaka 2012. Here the engine offers *17.Rad1!±* as

Rxe5? loses to *18.Nf3)* 13.Nc3

A) 13...Bc5 This is very rare but I think necessary. Black's counterplay down the a7−g1 diagonal lessens White's initiative. 14.Nxe4 dxe4 15.Kh1 Qe8? *(15...Re8* has to be played. *)* 16.Nb3 Bb6 17.c4 a5 18.c5 a4 19.cxb6 axb3 Westphal,F−Sabel,R (2050) Wiesbaden 1997 20.b7! Rxa2 21.Rb1!+−;

B) 13...c5 Again White has a choice where to place the knight. 14.Nde2 would be quite similar to the game. *(* A fairly recent game continued *14.Nxe4 dxe4 15.Nb3 Bb5 16.Re1 c4 17.Nd4 Bc5 18.Be3 Bd7 19.Kh1 Re8* Radionov,T (2285)−Gajek,R (2434) Vienna 2016. Evidently Black resigned while White decided between 18.Rf3 and simply picking up the bishop on c6.]

[12.Nc3 has good chances of reaching positions similar to the game.]

12...c5 This is the main point of developing the bishop to e7 rather than c5, but I think White now has good chances.

[12...Bc5 isn't so common but reaches yet more crazy positions.]

[12...0−0 again looks to be asking for trouble and would transpose to 11... 0−0.]

13.Ne2 It's always difficult to decide where to put the knight.

[13.Ne6!? looked interesting and I spent a while looking at it. Bxe6 *(13...fxe6?! 14.Qh5+ g6 15.fxg6 Bb5 16.g7+ Kd7 17.gxh8Q Qxh8 18.Rf7* seemed to keep control. *)* 14.fxe6 fxe6 15.Nd2⩲ I thought I must have enough compensation for the pawn but Black's position doesn't look that dangerous either.]

[13.Nb3 is the main alternative, and looks quite promising. 13...Bb5

[13...Bc6 has also been tried but with no pin or pressure on f5 White looks to be doing very well with 14.Nf4]

14.a4 I thought it useful to push the bishop back to a6 so that the bishop wouldn't have the c6−square.

[14.Na3!? was chosen by the legendary Sveshnikov here. Bc6 *(14...Ba6?! 15.c4!)* 15.c4 d4 16.Nf4 Bg5 17.Nd3± Sveshnikov,E (2565)−Fercec,N (2405) Nova Gorica 1996.]

14...Ba6 15.Nbc3 This appears to be the first new move of the game. On the one hand I'm allowing my queenside structure to be wrecked but now I have more control of the centre, in particular the d4−square, and play down the b−file.

[15.Nd2 was played by a future GM. c6?! *(15...0−0!?* is possible here as White has no pressure on d5*.;* I was expecting something like *15...Nxd2 16.Bxd2 Qd7 17.Rf2 0−0−0∞* Here I thought Black's king was fairly safe. *)* 16.Qe1?! Qc7?! 17.Nxe4! White could have played this a move earlier. dxe4 18.Bf4 0−0−0 19.Rf2 e3 20.Bxe3 Rd5 21.Bf4+− 1−0 Vocaturo,D (2383)−Lafuente,P (2522) Sautron 2008. Black's opening had been a complete disaster.]

15...Nxc3 16.bxc3 Qd7 17.Rf2 0−0−0 An extremely complicated position, and with the four c−pawns very hard to judge. Black has the bishop pair and if the position opens up that will be the main factor. However his king is more vulnerable and White can try to utilise his e5 and f5 pawns as a battering ram to break through in the centre or the queenside. The pawns also give White a useful space advantage. **18.Nf4!?** Here Naiditsch had a long think and was obviously not particularly happy with his position. **18...g5?!** I hadn't really considered this but was now pretty happy with my position.

[18...Qc6 would be sensible to react to e5−e6 with ...f7−f6 but now Black's queenside pawns are vulnerable. After 19.Rb1 Bb7 20.Qg4 Kb8 21.Qxg7 Black doesn't get sufficient counterplay for his collapsing kingside.]

[18...Qxf5! must be critical of course, and was Black's only good option.

A) 19.Nd3! Qe6 20.Ba3 Bxd3 *(*or *20...Rhe8 21.Nxc5 Bxc5 22.Bxc5 Rd7 23.Bd4∞)* 21.cxd3 White's structure has been repaired and so Black's additional pawn isn't so relevant, while he might have some long−term problems with his king. Qxe5 22.d4!⩲;

B) 19.Nxd5?! looks tempting but it turns out White has the looser king. 19...Qxe5 20.Qg4+ *(20.Nxe7+* Here White should bail out with *Qxe7 21.Qg4+ Qd7 22.Qxd7+*

Rxd7 into a worse ending but it should be holdable. *)* 20...Kb8 21.Rb1+ Ka8! Visually this looks very risky and I don't think I really considered it during the game but Black is now doing very well as he has the big threat of ...♕e1+.]

19.Nh5 A good outpost and preventing Black from getting counterplay on the kingside.

[19.e6 is how the engine wants to continue but I wasn't sure how to evaluate the position after Qc6 20.Nd3 f6 I have a huge bulkhead on e6 but I thought Black might be able to play around it with a break in the centre or by pushing his h−pawn.]

19...Rhg8 20.Qg4 Kb8 A difficult position. Obviously I want to break with my e and f−pawns but I need to be very careful not to allow Black's bishops to be activated. **21.Bd2** I wasn't sure where to put the bishop. Hitting the c5−pawn looked sensible but didn't want to block the a or e−files. **21...Ka8 22.Re1 Bc4 23.a5** With time getting rather low for both of us I thought just cutting out counterplay to be the most sensible approach.

[Stockfish tells me it was now to time to break with 23.e6 fxe6 24.fxe6 Qxa4 I thought this could easily be good for me but on the other hand I've gone 'all−in'. The following is one of the engine's top lines and shows how random the position has become. 25.Rf7 Qxc2 26.Rxe7 Qxd2 27.Qg3! d4 28.Rd7 dxc3 29.Rxd2 cxd2 30.Rd1 Be2 31.e7! Bxd1 32.exd8Q+ Rxd8 33.Qxc7 Rb8 34.Qd7 Bxh5 35.Qxd2±]

23...Rb8 24.h3! Giving my king some luft and ideas of f5−f6 now the queen is defended. I couldn't see a killer breakthrough so decided first to wait.

24...h6 25.Qf3

[25.f6 Qxg4 26.hxg4 Bf8 This was how I wanted to play initially. The problem is I can't get any further without allowing the bishops some squares. 27.e6 fxe6 Here the engine comes up with the strong idea of rerouting the knight. 28.f7! Rh8 *(28...Rg6 29.Nf6±)* 29.Nf6! Bd6 30.Nd7 Rbd8 31.Ne5±]

25...Qc8

[25...Qc6 was what I expected. Now I should take the plunge with 26.f6 Bf8 27.e6! fxe6 28.f7 Rg6 29.Nf6±]

26.Ng3!? Opting for a different, and what looked to me, safer plan. Now my queen has access to h5 and I can also contemplate ♘e4 ideas.

[26.Re4?! is what I'd probably have played in a blitz game but looked unnecessary here.]

[26.f6 Bf8 27.e6 fxe6 28.f7 is similar to the previous note and still very good for White.]

26...Re8 27.Qh5 Now a pawn drops.

27...f6 28.Qxh6 Rh8 The best practical try.

[28...fxe5 29.Qc6+ Qb7 30.Qxb7+ Kxb7 *(30...Rxb7 31.Rxe5 Rbb8 32.f6+−)* 31.f6 Bd6 32.Nf5+− White's kingside pawn masse should be decisive.]

29.Qg7

[29.Qg6 was also possible and perhaps simpler. After fxe5 30.Qc6+ play is similar to the previous note.]

29...Qd8 30.Qf7

[30.exf6 Bxf6 31.Qf7 g4 didn't seem so clear to me.]

30...fxe5 31.f6 Bd6 32.Bxg5 Qg8 33.Qxg8
[Originally I thought 33.Qd7!? might be clever but I decided to keep things straightforward. In fact this has the engine's approval. Qxg5 34.Qc6+ Rb7 35.Rb1 Ba6 *(35...Rhb8 36.Nf5* Black is completely paralysed. *Qxf6 37.Ne3 Qh4 38.Nxc4 Qxc4 39.Rxb7 Rxb7 40.a6+−)* 36.f7 Qd8 37.Nf5 Rf8 38.Nxd6 cxd6 *(38...Qxd6 39.Qe8+ Qd8 40.Qxd8+ Rxd8 41.Rxb7 Kxb7 42.f8Q+−)* 39.Rb3+−]
33...Rbxg8 34.h4 e4 So I'm a pawn up with 3 connected passed pawns but I still have to be very careful, being particularly low on time. **35.Nf5 Be5 36.g4**
[36.Nh6 was another idea but I thought my pieces were slightly misplaced. Rf8 37.Re3 Bxf6 38.Rxf6 Rxf6 39.Bxf6 Rxh6 I thought this should be holdable for Black.]
[36.Ne7 Rxg5 is Black's whole point. However I missed that here I have the intermezzo 37.f7! and White's winning. *(37.hxg5? Bh2+=* is just a draw. *)*]
[36.Re3? would again allow Rxg5 37.hxg5 Bh2+ 38.Kh1 Bg3+ 39.Kg1=]
36...Bxc3 37.Re3 Be5
[37...d4!? I thought a good practical try. I was intending 38.Rxc3 *(38.Rxe4 Bd5* and I also have to give back the exchange (with a winning position) as *39.Re7? Rxg5)* 38...dxc3 39.Kg2 Black's structure is so horrible that White should just be winning.]
38.Ne7
[38.f7! Rf8 39.Ne7 Rh7 40.Ng6 was the more accurate move order but the text doesn't spoil anything.]
38...Rb8
[38...Rxg5 39.hxg5 Bd4 40.Nf5+−]
39.Ng6 d4
[39...Bd4 40.Nxh8 Rxh8 41.c3 Bxe3 42.Bxe3 d4 would extend the game but White should be winning fairly easily.]
40.Nxe5 dxe3 41.Bxe3
[41.Nxc4!? also looked tempting but there's no need to give the second exchange.]
41...Rxh4 42.Nxc4
[42.f7 was safer but I calculated that I wasn't getting mated. In principle I thought it mattered more to keep my more advanced f−pawn rather thn the g−pawn.]
42...Rb1+ 43.Kg2 Rxg4+ 44.Kh3 Rg8

1.e4 Dembo,Yelena **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.b4 Bxb4 5.c3 Be7 6.d4 Na5 7.Be2** Dembo,Yelena: 'This was Kasparov's choice when he employed the Evans and is considered to be the main move. White retains his ♗ and retreats it all the way back to e2 in order

to be able to recapture with the ♕ on d4. This approach has given Black headaches over time, and obtaining a good position with black is not that easy. Black's main problem is the loose and offside state of his ♘a5 (which justifies White retreating the ♗), as well as his lack of development. It is these factors that White tries to exploit. Since ...exd4 looks pretty much forced, by activating yet another piece (the ♕, with ♕xd4) White puts pressure on Black's position and hinders his kingside development, as ...♘f6 can be met by e4−e5. '

Admittedly, this approach is not very ambitious, but it certainly is risk−free and quite acceptable. Perhaps White can hope for a slight edge, due to his central space advantage, but his development is somewhat lacking. Black can try ...♘d7 or ...♖e8 to remove the ♘e5, the ♘a5 is not that badly placed anymore and so on. Food for thought!]

8.Qxd4 Dembo,Yelena: 'Now Black must make an important decision. [John Emms]

This is a first of two updates on my book 'Beating 1 e4 e5', a repertoire book for White based on the Italian Game and the Bishop's Opening. This has given me an excellent opportunity to check out recent games and developments in the Italian Game and Bishop's Opening. In the two updates, I'm including those games which particularly catch my eye. The first two games here feature the Modern Variation, where White delays or even avoids kingside castling, holds firm in the centre and aims for a gradual attack on the kingside. This approach continues to be popular and is used successfully by GMs Sergei Tiviakov and David Howell. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 a6 6.Bb3 Ba7 7.Nbd2 0−0 8.h3 d6 9.Nf1 d5 10.Qe2 h6** With 10...h6, White can continue normally by 11 Ng3 but 11 g4!? is an attractive alternative, especially now that Black has given White's attack a 'hook' with ...h6.
[Tiviakov has also recently faced the more typical Black defence 10...dxe4 11.dxe4 Qe7 and here he tried 12.Ne3!? but this was met quite effectively. *(12.Ng3* is the usual move for White − see the games Tiviakov−Sargissian and Howell−Ashton in the book. *)* 12...Bxe3! I mentioned in the book that "exchanging the a7−bishop for a knight on e3 is an underrated defensive resource in many lines. The

bishop on a7 looks impressive, but when White goes for an all−out assault on the kingside there's a danger it might become an uncomfortable spectator." After the game I spoke to Tiviakov, and he admitted that he was quite surprised by 12...Bxe3 and that he didn't get anything from the opening. 13.Qxe3 Be6 14.Bc2 Ne8 15.0−0 Nd6 16.Re1 f6 17.b3 a5 18.Qe2 a4 19.Be3 Qf7 20.Nd2 Rfd8 and Black was comfortably placed in S.Tiviakov−J. Hawkins, Daventry 2010. Whites has the two bishops, but Black's pieces are very well coordinated.]

11.g4!? Tiviakov chooses the aggressive approach. **11...dxe4 12.dxe4 Nh7** Stalling White's kingside play by preventing g5, for the moment at least.

[In the book I gave 12...Nd7 (the typical reaction to g2−g4 − Black's knight heads for e6) 13.Ng3 *(* I quite like *13.Ne3!? Nc5 14.Bc2* when the knight can also go to d5; compare the game Gonzalez−Gomez in the book) *)* 13...Nc5 14.Bc2 Ne6 15.Nf5 Re8 16.h4 Nf4 17.Bxf4 exf4 18.Rd1 Qf6 19.g5 hxg5 20.hxg5 Qg6 21.N5h4 Qh5 22.Qd2 Bc5 23.g6 Bd6 24.gxf7+!? *(* Rybka prefers the paradoxical *24.Qd5!* , because even after an exchange of queens White keeps an initiative: *Qxd5 25.Rxd5 Be6 26.Rh5* etc *)* 24...Kxf7 25.Rg1 Bg4 26.Bb3+ Kf6 27.Rxg4!? Qxg4 28.Qd5 Ne5 29.Nxe5 Rxe5?? *(* after *29...Bxe5* there's nothing obvious for White; now the attack is decisive *)* 30.Qf7+ Kg5 31.Kd2! Kh6 32.Rh1 Qh5 33.Nf5+ Rxf5 34.exf5 and 1−0, V.Komliakov−I. Yagupov, Russia 1995.]

13.Ne3 Be6 14.Bc2!? A common theme that's been seen so many games in the Italian Game: White is prepared to retreat the bishop because he doesn't want to free Black's game via exchanges. White's main plan here is Bd2, queenside castling and then attack!

14...f6

[14...Re8 15.Bd2 b5 16.0−0−0 b4 17.Nf5 Bxf5 18.gxf5 bxc3 19.Bxc3 Nd4 20.Bxd4 Bxd4 21.Nxd4 exd4 22.Rhg1 Qf6 23.Qg4 Qg5+ 24.f4 Qxg4 25.hxg4 c5 26.e5 Rab8 27.Rg3 Rb4 28.a3 Rb6 29.Rh3 Reb8 30.b3 f6 31.e6 Kf8 32.b4 cxb4 33.Rxd4 bxa3 34.Rxa3 R6b7 35.Rxa6 Ke7 36.Rc4 Nf8 37.Be4 Rb4 38.Ra7+ Kd6 39.Rc6# was Y.Gonzalez Vidal−D.Otero, Havana 2001. White was always somewhat better in this game, as Black struggled to activate his knight on h7.]

[Perhaps Black should consider not holding back, and playing 14...b5 . This certainly makes sense if White continues with his plan of queenside castling, although White could always switch plans, castle short and then combine Rd1 and Nd5 with a2−a4.]

15.Bd2 b5

[Or maybe here 15...Bxe3!? with similar motives to the Tiviakov−Hawkins game, above.]

16.0−0−0! Whose attack is stronger? The evidence from the next few moves suggests that it's White's. **16...Na5**

[If 16...Bxa2? 17.b3 and the bishop is trapped.]

[On 16...Ng5 17.Nf5! Bc4 18.Bb3 Bxb3 19.axb3 Nxf3 20.Qxf3 Qe8 White can break things open with 21.g5! fxg5 22.h4]

17.Nf5 Qe8

[17...Bxa2? 18.Bxh6! is very good for White,]

[while after 17...Bc4 18.Qe1 Black's bishop move has achieved little.]

18.b3 c5 19.h4 c4 20.b4 Nc6 21.g5 White's attack has proved to be faster. **21...a5 22.Rdg1 Bxf5 23.exf5 axb4 24.g6?**

[White keeps a clear advantage after 24.gxh6! and I'm unsure why Tiviakov avoided this move. If bxc3 25.Rxg7+ Kh8 26.Bxc3 White's ideas include h5 followed by Nh4 and it's difficult to see Black surviving in the long run. Tiviakov's choice does trap and win the knight on h7, but as it's such a poor piece there's a good argument for keeping it on the board!]

24...bxc3 25.Bxc3 Kh8

[After 25...Bd4! Rybka actually favours Black.]

26.Rg4 Bc5 27.Kb1 Bb4 28.Bb2 Ba3 29.Bc3 Bb4 30.Ba1! Tiviakov goes for the win, and is rewarded (perhaps both players were in time trouble). But the positions is still very unclear at this point, and 24 gxh6! would have made things much easier for White. **30...Bc5 31.gxh7 Rf7 32.Rhg1 Rfa7 33.Bb2 Bf8 34.a4!** Just in time. **34...Nb4 35.Be4 Rc8 36.Qe3 Rxa4 37.Nxe5! fxe5? 38.f6! g5 39.Rxg5**

[White finally crashes through and mates after 39.Rxg5 hxg5 40.Qxg5]

[Negi,Parimarjan]

1.e4 Negi,P **1...e5 2.Bc4** Popularly used to avoid the Petroff, but Wei Yi seems to like switching between various non Spanish variations in order to avoid theoretical lines... **2...Nf6 3.d3 Nc6**

[3...c6 is the obvious extra option allowed by this move order, and while there is nothing objectively wrong with it, I felt more like developing my pieces:)]

4.Nf3 This was rather surprising − if he wanted to play the closed Italian then why not simply play from the 2.♘f3 move order?

[4.Nc3 is what I was expecting since he has played it before as well. Now after Na5 Black manages to get the bishop pair, and we get a special type of structure after dxc4, and a long strategic fight.]

4...Be7 5.0−0 0−0 6.Re1 d6 7.a4 Kh8!?

[7...Na5 8.Ba2 c5 is a more stable alternative, but I was in the mood of something more enterprising. Besides, I wanted to test him in more forcing variations...]

8.Nc3

[The inclusion of 8.a5 a6 shouldn't make much difference. 9.Nc3 can still be met by Bg4 10.h3 Bh5 11.Nd5 *(11.g4? Nxg4! 12.hxg4 Bxg4 13.Be3 Qd7 14.Nb1 f5 15.Bd5 fxe4 16.Bxe4 d5 17.Nbd2 dxe4 18.dxe4 Bxf3 19.Nxf3 Qg4+ 20.Kf1 Rxf3* 0−1 (20) Rendle,T (2400)−Tissir,

At first Black's position looks fine but perhaps White's play could be improved upon in the following game: 15.Nh4 Be8 16.Nf5 Nc6 17.c3 Qd7 18.Be3 Nd8 19.Qd2 Bf7 20.c4 c6 21.Bxf7 Nxf7∓ ½−½ (36) Womacka,M (2427)−Nemcova,K (2261) Teplice 2012]

[8.c3 Ng8 9.d4 f5! 10.dxe5 fxe4 11.Rxe4 Rxf3! is a rather famous line by now. 12.gxf3 *(12.Qxf3 d5!∓)* 12...Nxe5 13.Rxe5 dxe5 14.Qxd8 Bxd8 15.Nd2 Nf6 16.Ne4 Nxe4 17.fxe4 Bg4= ½−½ (21) Fedorchuk,S (2635)−Giri,A (2722) Germany 2012]

8...Bg4!? 9.h3 Bh5 10.Be3

10...Nd4!?N A very obvious novelty... my opponent responded rather quickly with **11.g4?** I can't imagine what he expected me to play − since this just forces me to sacrifice on g4.... after which he lapsed into nearly an hour's long period of thought.

[11.Bxd4 exd4 12.Nd5 *(12.Nb1 Bxf3 13.Qxf3 c6!?=* **Δ** d5...♗b4. *)*

A) 12...Bxf3 13.Qxf3 Nd7 seemed somewhat better during the game. 14.Nxe7 *(14.Qe2 Bg5=)* 14...Qxe7 15.Qg3 *(15.Ba2 a5=)* 15...a5 *(15...Rae8 16.f4 a5 17.Qf2 Qf6 18.g4±)* 16.f4 seems more pleasant for White.;

B) 12...Nxd5 13.Bxd5 was interesting... somehow during the preparation I had under−estimated this, but I wasn't too sure about which setup to play here in the game: c6 14.Bb3 Bxf3 *(14...Bf6 15.g4* seems scary for Black *)* 15.Qxf3 Bf6 and Black has a solid position, but it's easy to realise during the game that White's position is more pleasant.]

11...Nxg4! 12.Nxd4!? Of course it's not a great move... but it's easier to play than the scary looking positions after hxg4, especially against a prepared opponent.

[12.hxg4 Bxg4 13.Bxd4 exd4 is of course the critical line, but it only begins to look dangerous for White. 14.Nb5 basically, every move gives Black excellent compensation. *(14.Nd5 Bg5!∓)* 14...d5!? *(14...c5⩱)* 15.exd5 Bc5↑]

12...Nxe3 13.Qxh5 Nxc4

[13...g6 was a possible intermediate move, but I didn't see the point.]

14.dxc4 exd4 15.Ne2 Bf6 16.Rad1 Qe8!?

[16...c5 I became worried that after 17.Nf4 and ♘d5, White might suddenly get excellent compensation.]

17.Nxd4 Bxd4 I thought getting rid of the knight removes any chance of counterplay from his position... at the same time it gives him better drawing chances with a passive setup as well. Objectively perhaps ...♕xa4 was better, but it wasn't an easy decision in my opinion:

[17...Qxa4 18.b3 Qd7 *(18...Qa2!?)* 19.Nf3 g6 20.Qh6∓]

18.Rxd4 Qxa4 19.b3 Qa2 20.Qd5!

White manages to get excellent counterplay with this and create a mess.
[I had expected 20.Rd2 Rae8 21.Qd5 b6 when I have an excellent position.]
20...Qxc2 21.Qxb7 Qc3! The computer isn't very impressed, but practically, of course I had to go for the h3−pawn...
22.Red1 Qxh3 23.Qxc7 Qg4+
An annoying move in time pressure. Otherwise White would have defended with ♖1d3−♖g3... **24.Kf1**
[Amazingly enough, White could actually defend with 24.Kh1! since f5 there are better moves according to the computer, but it doesn't seem as easy as I thought at all. 25.Qxd6 doesn't promise Black all that much since it's impossible to lift the rook to the kingside on time.]
24...f5! Now this is strong. I felt White's position wass absolutely collapsing... but it seems I under−estimated his chances after the sacrifice of another pawn: **25.e5 Qh3+ 26.Ke2 dxe5 27.Rd8**
[27.Rg1! Amazingly, I didn't realise that the position is still insanely complicated − rather than me being on the verge of winning: Qh5+ 28.Ke1 Rg8 29.Rd7 Qh6 *(29...Rac8 30.Rdxg7!±)* 30.Kd1 and even though Black is of course better... it's a strangely complicated position.]
27...Qg4+
[27...Qxb3 somehow I forgot about this move, but I am not sure if Black can win after 28.Rxf8+ Rxf8 29.Rd8 Qc2+ 30.Kf1 Qc1+ 31.Ke2 Kg8 32.Rxf8+ Kxf8 33.c5 and the perpetual checks are always hanging in the air...]
28.Kf1
[28.Ke1!? would have been a tougher defence. I wasn't yet sure of what to do since ...h5 doesn't work as well here due to the e1−king defending the d1−rook − thus allowing ♖xa8.
A) 28...h5 29.Rxa8 Qe4+ 30.Kf1 Rxa8 31.Rd7 *(31.Rd8+ Rxd8 32.Qxd8+ Kh7 33.Qg5* not so easy to convert *)* 31...Rg8 32.Rd5 with excellent chances to draw.;
B) 28...Qe4+ 29.Kf1 h6!? was my plan eventually, and maybe it is even an excellent practical try since it's not easy to decide for Black. 30.Rxa8 Rxa8 31.Rd5 *(31.Rd8+ Rxd8 32.Qxd8+ Kh7)* 31...Re8∓]
28...h5! Since ♖xa8 isn't possible.
29.Rxf8+ Rxf8 30.Rd3! Amazingly he found this resource with almost no time on the clock.
[30.Rd8 Rxd8 31.Qxd8+ Kh7 32.c5 will just run into a mating net after h4 33.c6 h3 34.c7 h2 35.Qd5 e4 36.c8Q h1Q#]
30...f4 The only way. **31.Qxe5 f3**
32.Rd6! Another amazing resource... at one point I had nearly an hour more, but my time was fast approaching the last minutes as well.
[32.Qe3 Rf4! would finish the game.]
32...Kh7 Again, the only way forward.
[32...Qg2+ 33.Ke1 Qg1+ 34.Kd2 Qxf2+ 35.Kc3 Amazingly, there are no checks now, and it's impossible to avoid a perpetual check.]
33.Rd4! These only moves were beginning to infuriate me... but after seeing my next moves I thought I had finally found a win to finish things off:
33...Qg2+

[33...Qg6 34.Qe4 is very drawish.]

34.Ke1 Qg6! Since ♕e4 isn't possible here.

[34...Qg1+ 35.Kd2 Qxf2+ 36.Kc3 is messy.]

35.Rd7 Another, seemingly, only move!

[35.Kd2 Re8 36.Qd5 Re2+ 37.Kc3 Rxf2 38.Rf4! is some insane computer defence, but I wouldn't imagine any human considering this playable for White.]

35...h4 36.Kd2 h3 Things began to look smooth for me now, I really couldn't see any counter for him... **37.Rd6 Rf6 38.c5!?**

[Unfortunately, I spent all my time calculating 38.Rxf6 Qxf6 39.Qh2 Qe6!? and Black should be able to win eventually.]

38...Qh6+ 39.Kc2 Now, with my clock running out, I panicked and did not play the natural h2. **39...Qg6+**

[39...h2! Alas, just one more accurate move was required...the point is that after 40.Rxf6 gxf6 41.Qc7+ Kg6 42.Qg3+ Kf5 43.Qxf3+ White seems to get a lot of checks, but Black will find a safe haven on the queenside: Qf4 44.Qh5+ Ke6 45.Qe8+ Kd5 46.Qd7+ Kxc5 47.Qc8+ Kb6 48.Qe6+ Kc7 49.Qf7+ Kd6 50.Qf8+ Kc6! 51.Qe8+ Kb7−+]

40.Kd2 He returns the favour.

[40.Kb2! I just couldn't find a way to continue.]

40...Rf5 I suddenly decided that I had excellent winning chances in the endgame... but that is of course very hard to figure out with no time left: **41.Rxg6 Rxe5 42.Rg3! Rh5 43.c6 h2 44.c7 Rc5**

[44...h1Q! would have led to a very exciting line, but I was too tired to calculate it till the end: 45.c8Q Rd5+ 46.Ke3 Qe1+ 47.Kxf3 Qh1+! the move which I obviously missed. 48.Ke3 *(48.Rg2 Qd1+! 49.Kf4 g5+! 50.Rxg5 Qd2+−+)* 48...Re5+! 49.Kd4! Qe4+ 50.Kc3 Qe1+ 51.Kd4 Qxf2+ 52.Kxe5 Qxg3+ 53.Ke4 Qxb3 this should be practically winning...]

45.Rh3+ Kg6 46.Rxh2 Rxc7 47.Rh3 Rf7 48.Kd3!

[48.Ke3 Rb7! would be suffering.]

48...Rf4 49.Rh1 Rb4 50.Ra1! The simplest. It's impossible to win this position since my pieces are too passive. The rest of the game was quite uneventful:

[50.Kc3 Re4 51.Rh3 Rf4 and I was hoping to gain a move like this, although the computer isn't impressed at all.]

Moscow Grand Prix 2017 (8.9) 20.05.17

[Mikhalevski,V]

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d3 0−0

[5...a5 can be found in the current update, see Vachier Lagrave,M (2795)−Gledura,B (2602)/Chartres FRA 2017 [Mikhalevski,V].]

6.Bg5 This relatively rare line was introduced by Staunton in 1841! Earlier

this year Carlsen employed it in his game against Karjakin at Wijk aan Zee, and it was probably this that inspired Salem to try it.

[Earlier we considered 6.Nbd2 Radjabov,T (2713)−Karjakin,S (2772)/ Shamkir AZE 2014/[Mikhalevski,V]]

[6.0−0 So,W (2771)−Aronian,L (2792)/ Saint Louis USA 2016/[Mikhalevski, V]]

[6.b4 Macieja,B (2651)−Fressinet,L (2718)/ Wattenscheid GER 2011/ [Mikhalevski,V]]

[6.Bb3 Radjabov,T (2756)−Shirov,A (2745)/Baku AZE 2009/[Mikhalevski, V]]

6...h6 The most logical. Black forces the dark−squared bishop to make a choice.

[In the aforementioned game Black played 6...d6 , which led to interesting complications after 7.Nbd2 h6 8.Bh4 g5 9.Nxg5 hxg5 10.Bxg5 Kg7 11.Qf3 Be6 12.b4 Bb6 13.Bd5± with a dangerous position for Black in Carlsen,M (2840)−Karjakin,S (2785)/ Wijk aan Zee NED 2017.]

7.Bh4 Be7 Since ...d6 wasn't played yet Black can retreat the bishop and unpin the f6−knight. This is the most popular option by far. **8.Bg3**

[Usually White starts with 8.Nbd2 and only after d6 plays 9.Bg3]

8...d6 9.Nbd2 White transposes to 8. Nbd2. **9...g6** A new idea. Inarkiev wants to play 10...Nh5 and so he controls the h5−square to avoid tactics, but it can be done without a loss of time. It seems that the Russian GM was unfamiliar with the 9...Na5 idea.

[9...Na5! used to be the main line and it leads to some advantage for Black. So I'm surprised that Salem went for this line. 10.Bb5 Nh5 This way Black exchanges the dark−squared bishop while avoiding tactics connected with Nxe5. 11.d4 *(* According to GM Macieja *11.0−0* is correct, but in fact White is on the defensive in both cases. *)* 11...Nxg3 12.hxg3 exd4 13.Nxd4 Tiviakov,S (2637)−Naiditsch, A (2674)/Sibenik 2010. Here *(13.cxd4* Macieja,B (2616)−Georgiev,K (2666)/ Porto Carras 2011, and after *c5!∓* Black is on top. *)* 13...Bf6 promised some edge for Black.]

[The immediate 9...Nh5? runs into 10.Nxe5! Nxg3 11.Nxc6± winning a pawn. That's why Black started with 9...Na5!]

10.a3 A modest move, which has the point of leaving the bishop on the a2−g8 diagonal in case of 10...Na5.

[10.a4 looks more natural.]

10...Nh5 11.Nf1!? White is getting ready to recapture on g3 with the knight. **11...Kh7!** Meanwhile Black has been preparing the ...f5 break. **12.Ne3! f5 13.exf5 gxf5 14.d4?** An interesting, but risky option.

[14.Qc2? is bad because of f4 15.Nd5 *(*or *15.d4+ Kg7−+)* 15...fxg3 16.hxg3 Nf6 17.d4+ Kg7 18.Ng5 Rh8! 19.Nxf6 Bxf6 20.Nf7 Qe8 21.Nxh8 exd4+ 22.Kf1 Qxh8∓ with a clear edge for Black.]

[14.Nd5! was necessary, with the idea to meet f4 with 15.Nxe7 Qxe7 16.Bh4= and the bishop escapes.]

14...f4∓ 15.Nh4 An attempt to complicate matters.

[Alternatives aren't much better. For example, 15.d5 Na5 16.Bd3+ Kg7 17.b4 fxe3 18.bxa5 Nxg3 19.fxg3 c6∓]

[or 15.Nd5 e4! 16.Nd2 fxg3 17.Qxh5 gxf2+ 18.Kf1 Bf5∓ with a clear edge for Black in both cases.]

15...Nxg3!

[But not 15...fxg3?? 16.Bd3+! Kg8 17.Qxh5+−]

16.Qc2+ Kh8! The only, but sufficient retreat. **17.Ng6+ Kg7 18.Nxf8 Qxf8 19.fxg3** White is opening the f−file, hoping to create some threats.

[19.hxg3 fxe3 20.0−0 e2−+ leads to a decisive edge for Black.]

19...fxe3 Black has obtained two pieces for a rook and his chances are much higher. **20.Rf1 Bf6!** Black has to block the f−file in order to prevent 21.Rf7.

21.Qe4! White creates a threat of 22. Bd3. Surprisingly, Black doesn't do anything to prevent it. **21...exd4?** Ernesto goes astray.

[21...d5! would dis−coordinate White's forces and lead to a big edge for Black. 22.Qxd5 *(22.Bxd5 exd4 23.Bb3 Qe7−+* is just bad for White. *)* 22...exd4 23.cxd4 *(23.Rxf6 Kxf6 24.0−0−0 e2! 25.Bxe2 Qe8! 26.Rf1+ Kg7 27.Bc4 Bg4−+* and White doesn't have enough for the sacrificed piece. *)*]

22.Bd3! Now White's initiative is dangerous. **22...Qf7!** The only defence.

[22...Kf7?? 23.Ke2! with the idea of 24.Rxf6 is hopeless for Black.]

23.0−0−0

[23.Qh7+ was safer. Kf8 24.Qxh6+ Ke7 25.Bg6! Qg7 *(25...Qf8 26.Qh7+ Qg7 27.Qxg7+ Bxg7 28.Rf7+* leads to a transposition. *)* 26.Qxg7+ Bxg7 27.Rf7+ Ke6 28.Rxg7 Kf6 29.Rg8 Ne7 30.Rxc8 Rxc8 31.Bd3 with a complicated endgame with roughly equal chances.]

23...e2! 24.Qh7+ Kf8 25.Qxh6+ Ke7 26.Bxe2 Qg7 Inarkiev decides to force a draw.

[He still he could have played on 26...Be6!? 27.cxd4 Rh8 28.Qe3 Qg7! 29.Rxf6 Qxf6 30.d5 Qe5! 31.Qd2 Bxd5 32.Qxd5 Qxd5 33.Rxd5 Rxh2∓ with some hopes to win the game.]

27.Rxf6! Qxf6 28.Qh7+ Qf7 29.Qh4+ Qf6 30.Qh7+ Qf7 31.Qh4+ Neither side can avoid the repetition and so a draw was agreed. A short, but tense battle. The line with 6.Bg5 doesn't seem to set Black any problems, but the most accurate way to play for Black is 9...Na5.

[Probably Black should prefer 17...Nb6!?]
18.dxe5 Bxe5 19.Nxe5 Nxe5 20.Rad1 Qc8 21.Bd4! An improvement over a game between the same players which took place two months earlier. I proposed this move in my annotations to that game.
[21.b3?! Ragger,M (2690) − Mikhalevski,V (2565) Porto Carras 2018 [Mikhalevski,Victor]]
21...Nc4
[21...Re8 22.Ng5±]
22.Bxf6! Ragger definitely prepared this move at home.
[I offered 22.Re2±]
22...gxf6? Brave, but bad. The sacrifice had to be declined.
[22...Qf5! 23.Bd4 Rfe8 24.Ng3 Qg5± with certain compensation for the pawn, as it's not easy to protect the b2−pawn.]
23.Nxf6+ Kh8
[23...Kg7 is even worse. 24.Rd7! *(*During the game I didn't like *24.Nd5!?* , which is also enough for a win. For example, *c6 25.Ne7 Qc7 26.bxc6 bxc6 27.b3 Ne5 28.Qh4! Bxb3 29.Rd4 Rf6 30.Qg5+ Ng6 31.Rh4!)* 24...Kxf6 25.Ree7+− and, despite being two pieces up here, Black has no defence. b6 26.Qd1! Kg7 27.Re4! c5! 28.bxc6 Qxc6 29.Rg4+ Qg6 30.Qd4+ Kg8 31.h4!+−]
24.Rd7? A serious mistake, which throws away the advantage.
[The only move was 24.b3! Qf5 25.Ng4 h5 26.Nh6! Qf4 27.Nxf7+ Rxf7 28.Qxc4 Qxc4 29.bxc4+− with a won endgame.]
24...Bg8! The only, but sufficient defence. **25.Qxc4!** Now White has to make the only move in order to stay in the game. Otherwise he loses a piece.
25...Qxd7!
[But not 25...Rxf6?? 26.Qd4 Qf8 27.Re4+− with a deadly pin.]
26.Qxg8+! Rxg8 27.Nxd7 As a result of the tactical battle White has obtained two pawns for an exchange, but Black is already better. **27...Rad8 28.Ne5**
[In case of 28.Nf6 Black plays Rgf8 29.Ne4 Rfe8! 30.f3 Rd2!∓]
28...Rd2 I simply missed my opponent's reply.
[28...Rge8 looks correct. 29.Re2 Kg7 30.f4 Rd5 31.Kf2 Rxb5 32.g4 and although Black is technically better it's easier to play this position with white.]
29.Nc4 Rd5
[29...Rc2! with the idea of 30...Rf8 was a difficult move to make, especially in a rapid game. 30.Re7 Rf8 31.Rxc7 Rfxf2 32.Rxb7 Rxg2+ 33.Kf1 Rh2 34.Kg1 Rxh3 35.Rd7 Rg3+ 36.Kf1 Rg4∓]
30.Nxa5 Rxb5 31.b4 Now the chances are equal, but again it's easier to play with White who has connected passed pawns. **31...Rg6**

[Once again I had to focus on his pawns. 31...Rf8! 32.Re7 Rd5 33.Rxc7 Rd1+ 34.Kh2 Rxf2= would yield Black sufficient counterplay.]

32.Re8+ Rg8 33.Re3 Rg6?!

[Both 33...b6!? 34.Nc6 Rd5] [and 33...Rd5!? would offer Black sufficient counterplay.]

34.g4!± b6

[34...Kg8! 35.Nb3 Rd5 36.Kg2 h5 37.Kg3 hxg4 38.hxg4 Rd1 39.f3 Kf7± was better, although it's difficult to defend this position in a practical game, especially with a limited amount of time.]

35.Nc4 Rd5 36.Kg2± b5

[36...Rf6!± was necessary to stop an advance of the f−pawn.]

37.Ne5 Ra6! Finally I activate this rook.

38.Nd3 Kg8 39.Nc5 Rf6

[39...Ra3!? was worth a try.]

40.Kg3+− Now the position is practically lost. **40...Rd1 41.Ne4?** An inaccuracy, which yields Black chances.

[41.f4! was simpler. Rg1+ 42.Kf2+−]

41...Rf8? Missing my chance.

[I had to pin the knight by means of 41...Re6 42.f4 h6 43.f5 Re7 44.Kf4 Kf7 with chances to hold.]

42.f4 Rg1+ 43.Kf2 Rh1 44.f5 Ra8 45.Kg3 Raa1 46.Nf6+ Kg7 47.Nh5+

[47.Ne8+ Kf7 48.Nxc7+−]

47...Kf7 48.Re6! The rest is easy.

48...Rad1 49.Rc6 Rd3+ 50.Kf4 Rhxh3 51.Rxc7+ Kf8

[or 51...Kg8 52.Rc8+ Kf7 53.Rh8+−]

52.Rxh7 Rxc3 53.Kg5 Rc4 54.Rb7 Rxb4 55.Nf4 Re3 56.Ng6+ Ke8 57.f6 Rf3 58.Re7+ Kd8 59.f7 Rc4 60.Re8+ Kc7 61.f8Q Rxf8 62.Rxf8 b4 63.Rf3 Kd6 64.Nf4 Rc5+ 65.Kf6 Rb5 66.Rb3 Rb8 67.Nd3 Rf8+ 68.Kg5 Rf3 69.Nc1 Rf1 70.Na2 Kc5 71.Rxb4 Rf2 72.Ra4

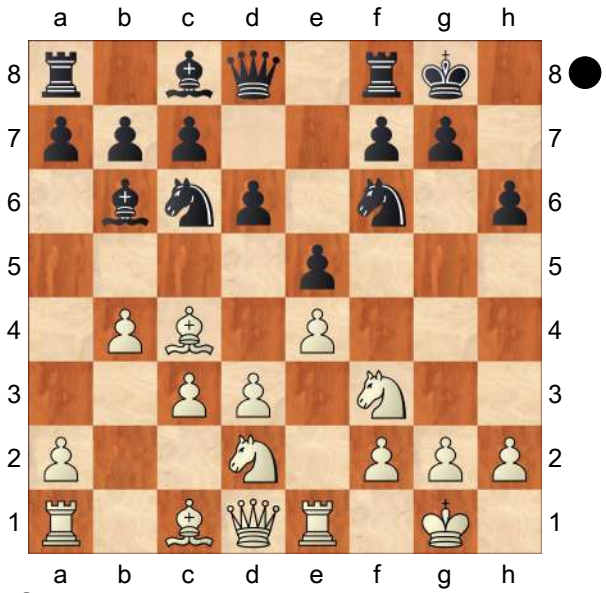
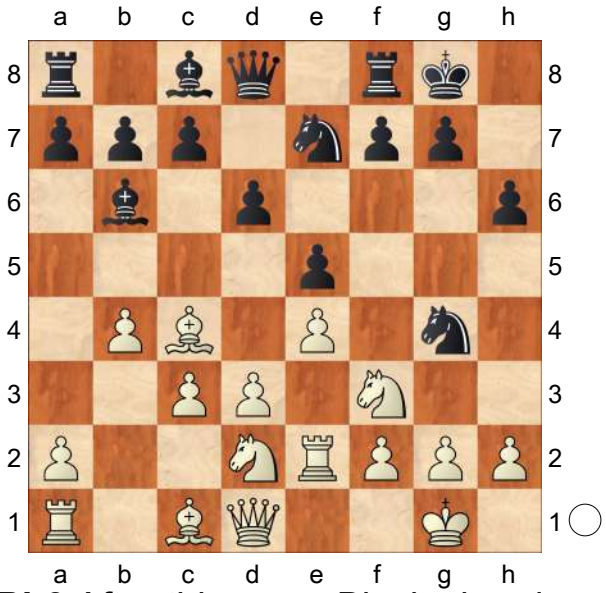
1.e4 Predke, Alexandr **1...e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.0–0 d6 6.c3 h6 7.b4 Bb6 8.Re1 0–0 9.Nbd2**



The first interesting moment in the game. My opponent played fast and I supposed that he had prepared something for me, but unfortunately I didn't remember the theory, so I started to think. **9...Ng4**

[Initially I wanted to play 9...Ne7 with a standard idea − ♘e7−g6 but I was scared of something like 10.d4!? and after exd4 *(* in the event of *10...Ng6 11.Bf1* White is slightly better *)* 11.cxd4 Nc6 Black takes a pawn, but position becames very sharp and my opponent could have prepareted it at home. *(11...d5? 12.e5!±* Black has a problem because the knight on f6 is under attack and in the event of 12...dc 13.ef the knight on e7 does not allow the queen to take on f6. *)*]

10.Re2 Ne7 it was my idea but maybe it wasn't very goodl



11.Bb3 After this move Black already has an equal position.

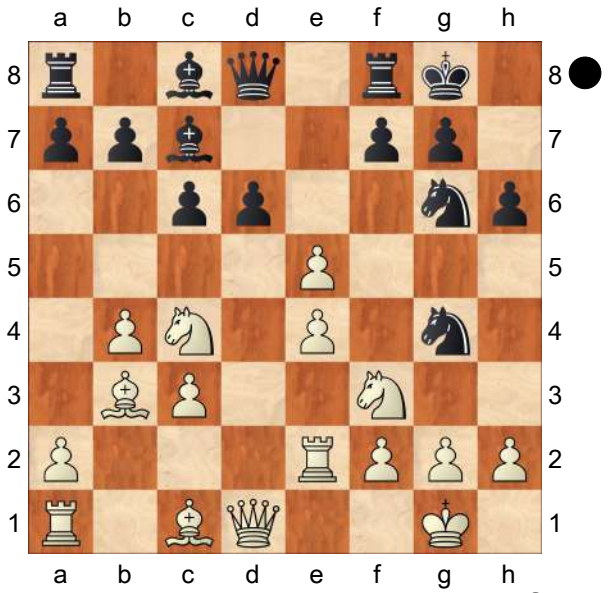
[11.d4! exd4 *(* may be Black has to play *11...Ng6 12.Re1 c6 13.h3 Nf6 14.Bf1* with a slightly better position for White. *)* 12.cxd4 I was planning to play d5 now White can't play 13.e5 because the knight has left the f6 square, but the computer shows that White has some advantage after: 13.Bb3! dxe4 14.Nxe4± so I think that 11.d4 was the strongest move in the position.]

11...c6 12.Nc4 Active play.

[But maybe he had to play more carefully, for example: 12.h3 Nf6 13.Re1 Ng6 14.d4 and the position is equal.]

12...Bc7 13.d4 Ng6 14.dxe5

(Diagram)



This was a very important moment for determining the direction of the game **14...dxe5!** I had felt that Black's position was preferable and I decided to keep the tension on the board.

[I could exchange all of the knights and after 14...N4xe5 15.Nfxe5 Nxe5 16.Nxe5 dxe5= it is just a drawish position.]

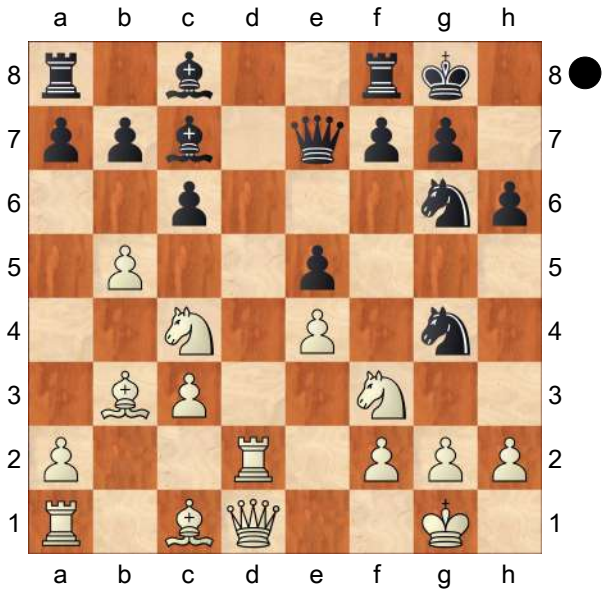
15.Rd2

[After the queen exchange I think that Black's position is slightly better. 15.Qxd8 Rxd8↑ It is easier to play with Black due to the natural idea ♗c8−e6, b7−b5, a7−a5.]

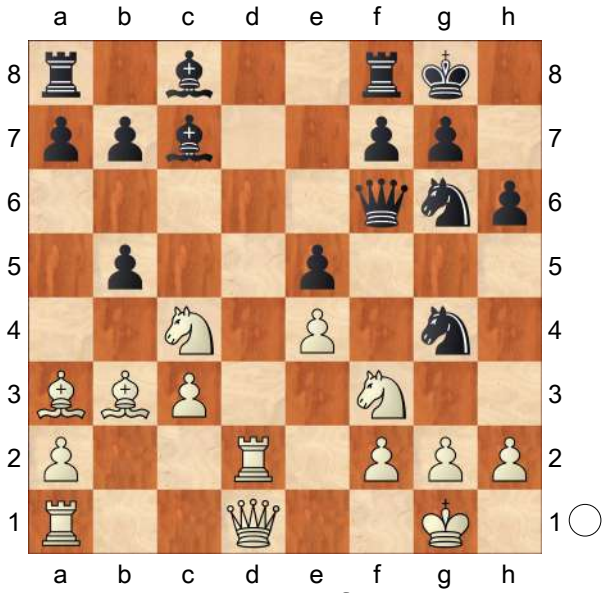
15...Qe7 16.b5?! I didn't spent a lot of time to calculate of this move but it is really not a good choise for White. However, it looks very logical − he wants to open the diagonal for his bad bishop on c1

[16.Nd6 Bxd6 17.Rxd6 Nf6!↑ and here Black has an initiative because of the weak e4−pawn and the strange rook on d6.]

(Diagram)



16...cxb5! I was excited when I made this move. I spend around twenty minutes but it was definitely not a waste of time! **17.Ba3 Qf6**

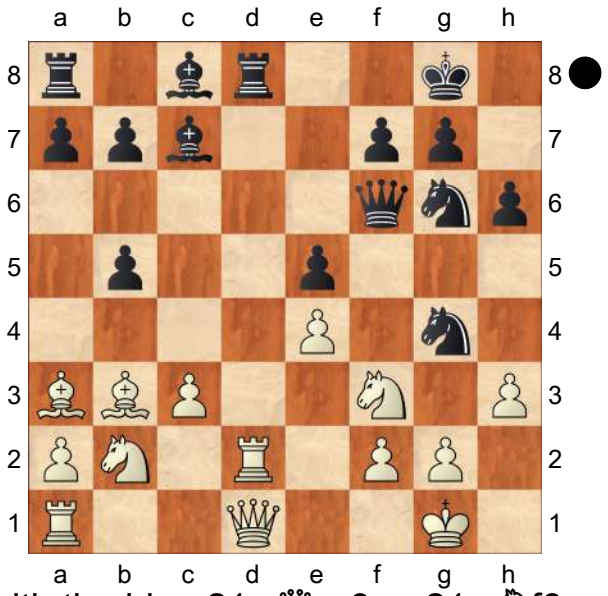


Here I calculated a lot of interesting variations: **18.Nd6**

[18.Nb2 with the ideas to take the rook on f8 and catch the knight on g4. Rd8! Parrying the first threat. 19.h3

(Diagram)

I really did like my position after Nxf2 *(19...Rxd2! 20.Qxd2 Qa6!−+*



with the idea 21...♕xa3 or 21...♘f6. Very cute winning geometry, unfortunately I didn't see it during the game. *)* 20.Rxd8+ Bxd8 21.Kxf2 Bb6+ 22.Kf1 Bxh3 23.gxh3 Rd8 I thought that Black has decisive attack but here White has an equal position according to the computer after 24.Nd3!]

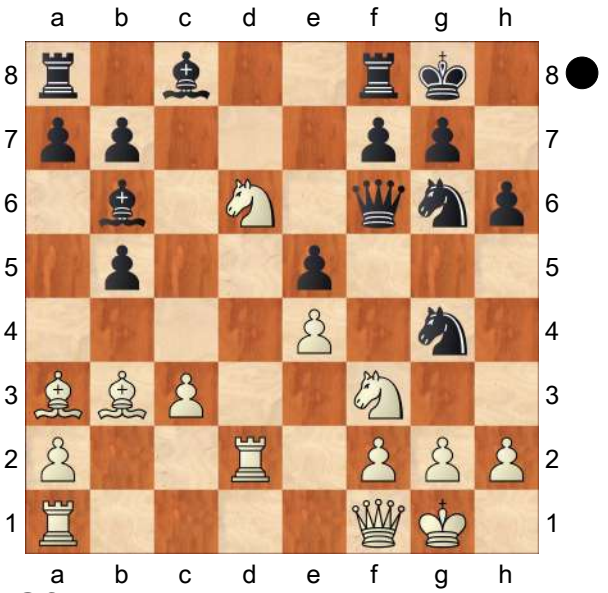
[18.Bxf8 bxc4 19.Bd6 *(19.Bxc4 Kxf8 20.h3 Nxf2 21.Kxf2 Bb6+ 22.Kf1 Nf4∓* White has an extra exchange but due to the weak king Black is better. *)* 19...Nxf2! 20.Kxf2 *(20.Rxf2 Bxd6 21.Bxc4 Bc5 22.Nd4 Nf4∓)* 20...Bb6+ 21.Kf1 cxb3 22.axb3 Be6∓]

18...Bb6! A very important move − I had to attack the f2−pawn to save my knight on g4 **19.Qf1?** During the game I felt that this looked very strange and very slow for this sharp position.

[19.h3 Nxf2 20.Rxf2 Nf4∓]

[19.Nxb5 Nxf2 20.Rxf2 Bxf2+ 21.Kxf2 Qb6+∓]

(Diagram)

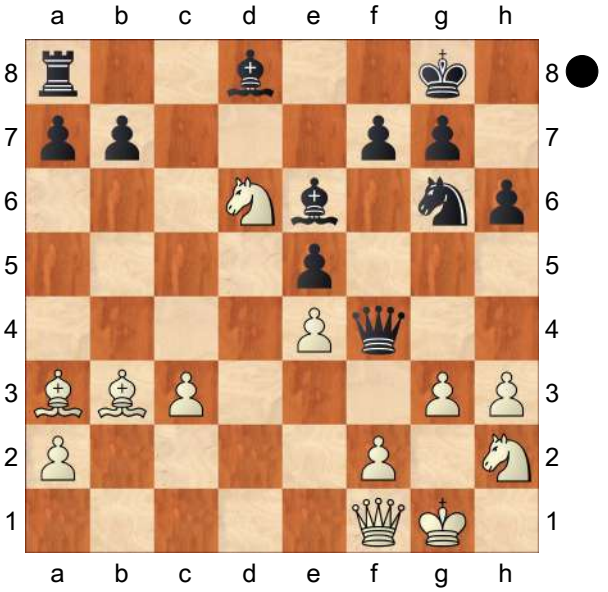


19...Qf4! Attacking the h2−pawn and the rook on d2 with threats like Nxh2 or Nh4.

[Also I calculated 19...Nf4 but didn't find a win after 20.Qxb5]

20.h3 Nh2 21.Nxh2 Qxd2

Here Black's position is absolutely winning. He just has to develop all pieces and convert the material advantage. **22.Rd1 Qf4 23.Nxb5 Rd8 24.Rxd8+ Bxd8 25.Nd6 Be6 26.g3**



The strangest moment in the game. I calculated a lot of difficult variations, but didn't understand a very simple thing. I really just decided that after 26...♕d2

my queen will be trapped and I had to choose between 26...♕g5 and 26...♕f6 where everything wasn't so easy!

26...Qg5?

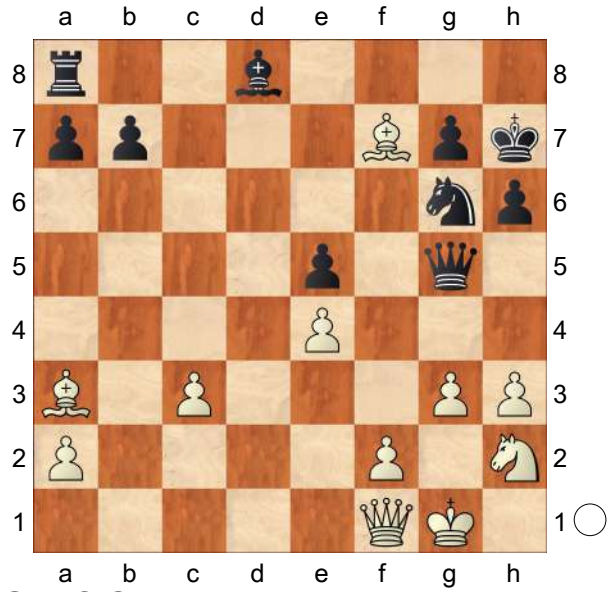
[26...Qf6? 27.Ne8! Qg5 28.Bxe6 Bb6 *(28...fxe6? 29.Nf3 Qh5 30.g4+−* Now the queen is really trapped! *)* 29.Bxf7+! Kxf7 30.Qc4+= with perpetual check]

[Of course I saw 26...Qd2! but I thought that it is lost because of 27.Nf3 and the queen is caught but I could take the c3−pawn Qxc3−+ and the game is over.]

27.Nxf7! Bxf7 28.Bxf7+ Kh7

I destroyed my position but the show goes on. Now Black has only a slightly better position.

[28...Kxf7? 29.Qc4+ Ke8 30.Qb5+ Kf7 31.Qxb7++−]



29.Qd1? Serious mistake with the wrong idea.

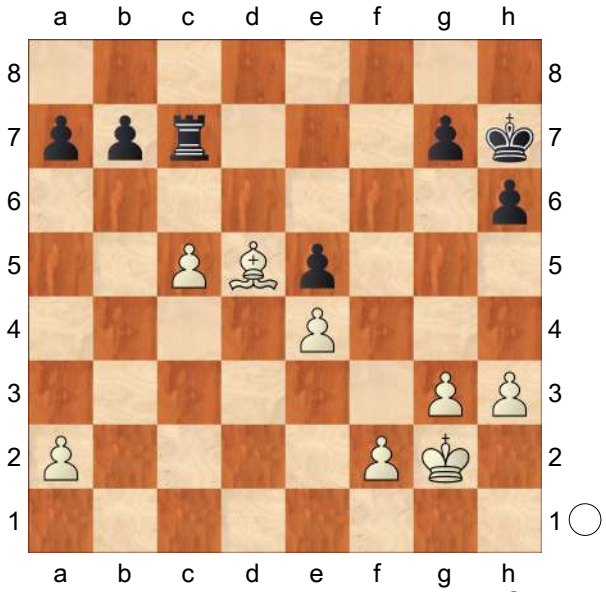
[After the correct 29.Ng4 Bb6 Black is better but nothing special. White is holding.]

29...Bb6 30.Qg4?

[30.Ng4!∓ Ok, it was better, but after Qd1 nobody plays like that.]

30...Qxg4 31.Nxg4 Rc8 It was a surprise for me after the game when I found out that this positions is just winning for Black. I had understood that I had a serious advantage, but a computer shows something around −4!

32.c4 Bc5 33.Bc1 Rc6 With the idea ♖a6−a2. **34.Be3 Bxe3 35.Nxe3 Ra6 36.c5 Rc6 37.Bd5 Rc7 38.Nf5 Ne7 39.Nxe7 Rxe7 40.Kg2 Rc7−+**



I just have to bring my king to the f2−pawn and take it. **41.h4 Kg6 42.Kf3 Kf6 43.Ke3 Rxc5 44.Bxb7 Rc3+ 45.Kd2 Ra3 46.Bd5 a5 47.Ke2 Ke7 48.Kf1 Kd6 49.Kg2 Kc5 50.h5 Kd4 51.Kh3 Rf3 52.Kg2 Rf8 53.Kf1 Kd3 54.Bc6 Rb8 55.Bd5 Rb2 56.a4**

[56.Kg1 Ke2 57.Kg2 Ke1−+ The plan is in action.]

56...Rb4 57.Bc6 Kd4 With the idea ♔c5 and one of the pawns would be taken.

[Nagesh,Havanur]

Tal's opponent, Jack Miller (1937−2012) was the President of the San Diego Chess Club. He was also a member of Labate's Chess Centre, Anaheim, CA USA and it was here that the game was played. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Nf6 4.d4**
[Years ago Tal had run into trouble after 4.Ng5 Bc5!? (Traxler Counterattack) in a famous game with young readers of a Soviet newspaper. That game ended in a fighting draw. Here he avoids the line as he wants to attack himself.]
4...d6? This is a beginner's move, losing a pawn.
[4...exd4 is standard.]
5.dxe5 Nxe4 6.Bxf7+! Kxf7 7.Qd5+ Be6 8.Qxe4± Tal emerges a pawn up in this well−known opening trap. No surprises so far. **8...Be7 9.0−0**
[9.Nc3 completing development on the queenside is also possible.]
9...d5 10.Qd3 Qd7 11.Re1 Raf8 An unusual plan. He intends an all−out offensive against the king.
[11...Rhf8 followed by...Kg8 is a safer alternative.]
[11...Bf5 looks playable. But it's dangerous to allow the possibility of e5−e6.]
12.Nc3 Ke8 13.Ng5? This move offers Black counterplay on the f−file.
[13.Bg5! would have kept everything under control.]
13...Bc5! inaugurating a brilliant counterattack **14.Nxe6 Bxf2+ 15.Kh1 Bxe1 16.Nxf8?!** One cannot judge this move strictly. It was a simultaneous display, after all.
[Otherwise he would have played 16.Nxd5! Ba5 *(16...Qxe6?? 17.Nxc7++−)* 17.Nxf8 Rxf8 18.Be3 Nxe5 19.Qb3±]
16...Rxf8 17.Bg5? This aggressive could have backfired.
[17.Bd2! would have eliminated the road block by the bishop on e1.]
17...Nb4 18.Qe2 Nxc2 19.e6! Sheer intimidation!
[not 19.Rxe1? Nxe1 20.Qxe1 Qf5 21.h4 Qf1+ 22.Qxf1 Rxf1+−+]
19...Qd6?! This move initiating a combination has a fatal flaw.
[He would have won with 19...Qc6! 20.Rd1 d4 followed by ...Rf2.]
20.Nb5
[Tal saw 20.Rxe1? Nxe1 21.Qxe1 losing to Qe5!−+]
20...Qe5! Tal's queen, rook and bishop are attacked and the king is threatened with mate in two. **21.h4!!** A breezy move that puts out the fire round him. **21...Qg3**
[21...Qxe2?? 22.Nxc7# is a lovely finish with Black queen being only a spectator.]
22.Rd1! Rf2 Once again Black's attack threatens to turn into a towering inferno. **23.Qxf2!!** Pouring cold shower on all his hopes. **23...Bxf2 24.Rxd5 Qxh4+** Threatened by Rd8 mate, Black is forced

to surrender the queen. **25.Bxh4 Bxh4 26.Nxc7+ Kf8 27.Rf5+ Bf6 28.Rd5 a5 29.Rd7 Nb4 30.Rf7+ Kg8 31.Rxf6! Nc6** Never say die!

[31...gxf6 allows 32.e7+−]

32.Rf7 g6 33.e7 A bright finish! Tal remembered this game on his return from the USA and showed it to David Bronstein who insisted on having the whole score for posterity. Tal obliged and so it came to be preserved.

Playing Italian against my Italian opponent! **3...Bc5 4.d3 Nf6 5.0−0 0−0 6.Nc3!?** Objectively 6.Nc3 kind−moves are not really dangerous for Black, but since it's not been investigated deeply, I wanted to give it a try. **6...h6** is being played to prevent Bg5.

[In case of 6...d6 White can also do 7.Na4!? going after Black's c5−Bishop.]

7.Be3!? Typical idea. By trading off the Bishops on e3 square White wants to open up the f−file. **7...Bxe3**

[7...Bb6!? is an alternative for Black.]

8.fxe3 d6 Black is ready to play ...−Na5

9.d4 exd4

[9...Na5 10.Be2±]

[After 9...Bg4!? 10.h3 Bh5 11.Qd3 Re8= Black's Bishop on h5 is well placed and their position is solid.]

10.exd4 Nxe4!? This move is tempting. Black wants to simplify the position and get a sound position. **11.Nxe4 d5 12.Bd3 dxe4 13.Bxe4** After Black's 10...−Nxe4 more or less all was forced until here. Now Black has a wide choice.

13...Ne7?! Most natural, but a bit passive.

[13...Re8 is much more principle. In case of 14.Bxc6 bxc6 15.Qd3 Qd5 Black looks comfortable. 16.c4 *(16.Ne5?! c5∓)* 16...Bf5 17.Qc3 Qd6=]

14.Ne5! grabbing more space in the center **14...f6**

15.Nc4 an interesting choice but perhaps not the best one

[15.Nf3!? was much better according to the engine. White has provoked ...−f6 and now can return back home, just in the style of AlphaZero.]

15...c6

19...Bg8 20.Ne3 Rae8

[fearless engines offer 20...Bxa2!? but after 21.c4 I doubt anyone would consider here f5! and apparently Black's OK... Sure...:)]

21.Qh5 Bh7?? This simply loses on the spot **22.Bxh7 Kxh7 23.Ng4!** and Black cannot prevent the Rxf6 threat **23...Qd7 24.Rxf6!** It was a total shocker for my opponent. He believed his position was already fine, and his assessment would be correct if only not this beautiful move! **24...Nd5 25.Rxe8 Rxf6 26.h3 Rf7 27.Qe5** Black resigned here. 1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.d3 Nf6 5.Bg5 Be7

[It's much more common to start with 5...h6 and only after 6.Bh4 Be7 You can find a couple of examples of this line in our Archive.]

6.Bh4 A new move in the position. White brings the bishop to h4 without being attacked by the h−pawn. One needs a good reason to do this, as it may turn out to be a loss of a tempo. White's idea is to play 7.Bg3, but I don't understand why he had to rush with it.

[Earlier we considered 6.a4 Yu Yangyi (2738)−Vidit,S (2707) Danzhou CHN 2019 [Mikhalevski,V]]

[Other options include 6.Nc3]

[and 6.0−0]

6...0−0 7.Bg3 d6 8.a4 Kh8 Grischuk unpins the f7−pawn in order to prepare the ...f7−f5 advance. **9.Nc3 Ng8**

[9...Bg4 10.h3 Bh5 11.Bh2 a6∓ is a better choice according to my computer, but Alexander wants to keep it simple, as he is satisfied with a draw after winning the first game of the match.]

10.Nd5 f5 11.h3?! This provocative move is dubious.

[White had to prefer 11.exf5 Bxf5 12.Nd2 , although Black has no problems at all after, for example, Nf6 *(12...a5!?* is also good for Black. *)*]

11...Nf6 Black is in a safe mode, it seems.

[Otherwise, he would play 11...f4! 12.Bh2 Nf6∓ Now the h2−bishop is awful and Black has a clear edge.]

12.Qe2? White's play looks careless.

[12.exf5 was necessary. Bxf5 13.0−0 Bg6 14.c3 with equal chances.]

16.Bb3 fxe4

[And again 16...f4! was stronger. 17.d4 Nc6 18.dxe5 Bxe5∓]

It's hard to understand White's play in this game. I don't understand why he gives up the centre. **17.Qxe4?!**

[17.dxe4 would be more logical, although Black is already better. Qe8!? 18.0−0 Bd7∓]

17...Bf5 18.Qe2 Qe8! The Russian player transfers the queen to the kingside. **19.Bc2 Nd5!?∓**

[19...g5!∓ would be even stronger preparing...Ng6.]

20.0−0 Qc6 Black has a much better control of the centre and so his position is better and safe, exactly what one needs after winning the first game of the match. **21.Bb3 Bg6! 22.d4** This break in the centre only creates a weak pawn

on d4. **22...exd4 23.cxd4 Bf7** Once again Grischuk chooses the safest possible move.

[23...Nb4! 24.Rac1 Qb6∓ promised more.]

24.Rac1 Qd7 25.Rfe1 Rfe8 26.Qd2 Nb4 Black is heading for exchanges. **27.Qc3 Bxb3 28.Qxb3 Rxe1+ 29.Rxe1 Re8** Black trades as many pieces as possible. **30.Rc1** Not the best choice, but what are you going to do when you need to win at all costs, and your position requires playing for a draw.

[30.Rxe8+ Qxe8 31.Bf4 is roughly equal.]

30...h6

[30...Re4!∓ promises more, but Grischuk is satisfied with a draw.]

31.Bf4 b6 32.Bd2 c5 33.dxc5 bxc5 34.Bc3 Bxc3 35.bxc3 Nd3 36.Rb1

[After 36.Rd1 Alexander prepared c4! and the pawn is untouchable due to a fork on b2.]

36...Qf5 37.Qb5?!

[37.Qc2 would be answered by Qe4 unpinning the knight and securing the position.]

37...Rf8∓ Black created a strong threat of 38...Nf4 and so White decides that enough is enough and offers a draw. **38.Rf1?** A draw offer in a virtually lost position.

[38.Rf1? Now after Nf4 39.Re1 Qg6−+ Black wins at least the h3−pawn.]

[38.Rd1! Nf4 39.Qc6 was necessary, but after Rf6∓ Black retains the better chances. This game demonstrates how one can play for a draw without taking any risks. All of White's play starting with 6.Bh4, can't be recommended.]

[White had a few reasonable alternatives. 22.Rh1! gxf4 23.Bd2 Kh8 24.Qf3 Rg8+ 25.Kf1 c6! 26.Qxc6 Qh5 27.Ke1 Ng5! 28.Bxf4 Re6! 29.Qd5 Ne4! 30.Qxe6 Qf3 31.Rf1 Qxc3+ 32.Ke2 Qb2+ 33.Kf3 Qc3+ 34.Ke2 with repetition.]

[22.Bd2 gxf4 23.Rh1 transposes to 21.Rh1.]

[and finally even 22.fxg5 f4 23.Bc1 Kh8 24.Kh2 Nxg5 25.Qg2 Re6! 26.Qg4 Qxg4 27.hxg4 Rh6+ 28.Kg1 Nf3+ 29.Kg2 Nh4+ 30.Kh1 Nf3+ with repetition again.]

22...Kh8!∓ Probably Pichot underestimated Black's reply. **23.Kh2?** This is already a losing move.

[It was necessary to cover the second rank by means of 23.Rf2! gxf4 24.Bd2 Rg8+ 25.Kf1 c5 26.Re1 Qh5!! with just a slight preference for Black thanks to vulnerability of the white king.]

23...Rb8!−+ White can't stop the rook from getting to the second rank without heavy material losses. **24.Qxe6**

[24.Rf2 doesn't help. Nxf4 *(24...gxf4* also wins. *)* 25.Qc6 Nxh3−+]

24...Rb2+ 25.Rf2 Rxf2+ 26.Bxf2 Qxf2+ 27.Kh1 Qxf3+ 28.Kh2

[28.Kg1 gxf4−+ is completely hopeless.]

28...Qxf4+

[28...g4! would be even more convincing. Now after 29.hxg4 Qxf4+ 30.Kg2 fxg4−+]

29.Kh1 Qf3+ 30.Kh2

[30.Kg1 is relatively better, although White's position remains lost. Qg3+ 31.Kf1 Qxh3+ 32.Ke2 Qxc3 33.Qh6 Qc4+ 34.Kf3 g4+ 35.Kg2 Rf7−+]

30...g4! 31.hxg4 fxg4 32.Qh6 g3+ 33.Kh3 Rf5 Now White either loses the queen or gets checkmated. **34.Kh4**

Rf4+ 35.Kh3 Qg4+ 36.Kg2 Qe2+ 37.Kxg3 Rf3+ 12...Ba5 is an interesting line, which promises equal chances. White had to prefer 22.Rh1 or 23.Rf2 to retain balance.
0−1
